

UNIVERSITY OF COLORADO BOULDER

Enabling leaders and innovators in science who positively impact humanity with research that informs the public and inspires change.

CU Boulder, one of only 35 U.S. public research institutions in the Association of American Universities (AAU), is located at the base of the Rocky Mountains in the heart of one of the nation's top environmentally focused ecosystems. The university, the city and residents of Boulder, the state of Colorado, and local federal research labs collaborate to share their commitment to environmental sustainability.

- 75+ research centers
- 12 research institutes
- 50+ years of collaboration with 15+ federal research labs

For more than half a century, CU Boulder has been a leader in climate and energy research, interdisciplinary environmental studies, and human rights programs. The university has engaged in sustainability and humanitarian practices on campus and beyond:

- First university to achieve a Sustainability Tracking, Assessment and Rating System (STARS) Gold rating
- Home to Professor Bernard Amadei, founder of Engineers Without Borders
- First university to create an NCAA Division 1 zero-waste stadium and athletics program
- 5th all time in the nation for graduates serving as Peace Corps volunteers
- First university to be ranked Sierra Club's No. 1 greenest school

“Boulder has amazing citizenry that’s very concerned about climate change, very concerned about human rights, and with all of the national labs, Boulder has the heft to host a global summit every year on the scale of the Global Economic Forum.”

–David Clark, Right Here, Right Now Global Climate Alliance founder
