- A sponsored project award is transferred from an external sponsor to CU Boulder under a grant, cooperative agreement, contract, purchase order or any other legally binding agreement. These awards differ from gifts, which are managed by the CU Foundation, because they include terms that restrict how the funds will be managed and expended.
- The total number of awards is calculated from the total number of funding increments for all projects (account numbers) during the fiscal year, e.g. some awards may be distributed to two, three or more projects for management purposes and have multiple funding increments during the fiscal year.
- The value of awards is calculated from the amount of funds obligated by the sponsor during the fiscal year for one budget period, not the total estimated cost for multiple budget periods, i.e. some awards receive incremental funding that may spread out the total obligations over several years. Award totals include direct and indirect costs.
- The report includes all the award actions taken during the fiscal year. Typically, an award is received 6-12 months after submission of a proposal. There may be some overlap with proposals submitted during the fiscal year, but there is no one-to-one relationship between proposals and awards in these reports.
- The Awards by Department report does not include CU Foundation (Boulder campus) gifts supporting research and creative work.
- 1. The Alliance for Technology, Learning, & Society (ATLAS) is a research institute with sponsored research and expenditures in the College of Engineering and Applied Science. The \$2,112,490 amount appears twice; once under RIO and once in CEAS, but is not duplicated in the grand total for FY23.

- This report includes all the proposals submitted during the fiscal year. Typically, proposals are funded or declined within six to twelve months after submission. There may be some overlap with the annual reports for awards that were received during the fiscal year, but there is no one-to-one relationship between proposals and awards in these reports.
- The number of proposals is calculated from the total number of submissions during the fiscal year.
- The value of proposals is calculated from the total estimated cost for all budget periods proposed. These amounts include direct and indirect costs and often are higher than the actual awarded amount.
