

University of Colorado **Boulder**

2017–18

University Catalog

Prepared by
The Office of the Registrar

June 15, 2017

TABLE OF CONTENTS

About CU Boulder	12	Arts & Sciences	121
About the Catalog	13	Policies & Requirements	123
Academic Calendar & Exams	13	Programs of Study	141
Academic Integrity	15	Actuarial Studies and Quantitative Finance	142
Academic Records	15	Actuarial Studies and Quantitative Finance - Certificate	143
Administration	16	Anthropology	144
Campus Map	16	Anthropology - Bachelor of Arts (BA)	152
Continuing Education	17	Anthropology - Minor	152
Credits & Grading	19	Applied Mathematics	153
Degrees & Graduation	20	Applied Mathematics - Minor	158
Registration & Enrollment	20	Statistics - Minor	159
Research	23	Art and Art History	159
Student Affairs	24	Art History - Bachelor of Arts (BA)	176
Health & Wellness	24	Art History - Minor	177
Housing	24	Art Practices - Bachelor of Arts (BA)	177
Student Conduct & Colorado Creed	25	Art Practices - Bachelor of Fine Arts (BFA)	178
Student Resources	26	Art Practices - Minor	179
Student Data Privacy	26	Asian Languages and Civilizations	179
Tuition Classification	27	Chinese - Bachelor of Arts (BA)	190
University Policies	28	Japanese - Bachelor of Arts (BA)	191
Alcohol & Other Drugs	28	Arabic - Minor	193
Campus Safety	29	Chinese - Minor	193
Communication	29	Hindi/Urdu - Minor	193
Copyright & Fair Use	29	Japanese - Minor	194
Diversity & Nondiscrimination	29	Middle Eastern and Islamic Studies - Certificate	194
Faculty	30	South Asian Languages and Civilizations - Certificate	195
Undergraduate Catalog	97	Asian Studies	196
Admissions	97	Asian Studies - Bachelor of Arts (BA)	197
General Admission Information	97	Asian Studies - Minor	204
Admission Requirements	98	Astrophysical and Planetary Sciences	209
Application Process	103	Astronomy - Bachelor of Arts (BA)	212
Credit by Examination	106	Astronomy - Minor	214
Transfer of College-Level Credit	111	Atmospheric and Oceanic Sciences	215
Minimum Academic Preparation Standards	113	Atmospheric and Oceanic Sciences - Bachelor of Arts (BA)	217
New Student & Family Programs	114	Atmospheric and Oceanic Sciences - Minor	220
Academic Advising	114	British and Irish Studies	221
Enrollment & Records	115	British and Irish Studies - Certificate	221
Financial Aid	116	Central and East European Studies	222
Student Finances	118		
Colleges & Schools	121		

Central and East European Studies - Certificate	222	Geography - Bachelor of Arts (BA)	330
Chemistry and Biochemistry	223	Geography - Minor	333
Biochemistry - Bachelor of Arts (BA)	229	Geological Sciences	334
Biochemistry - Minor	231	Geology - Bachelor of Arts (BA)	340
Chemistry - Bachelor of Arts (BA)	231	Geology - Minor	342
Chemistry - Minor	233	Germanic and Slavic Languages and Literatures	343
Classics	234	German Studies - Bachelor of Arts (BA)	355
Classics - Bachelor of Arts (BA)	240	German Studies - Minor	357
Classics - Minor	242	Nordic Studies - Minor	357
Cognitive Science	244	Russian Studies - Bachelor of Arts (BA)	358
Cognitive Science - Certificate	244	Russian Studies - Minor	362
Computer Science	245	History	362
Computer Science - Bachelor of Arts (BA)	253	History - Bachelor of Arts (BA)	382
Distributed Studies Program	254	History - Minor	384
Ecology and Evolutionary Biology	254	Humanities	384
Ecology and Evolutionary Biology - Bachelor of Arts (BA)	262	Humanities - Bachelor of Arts (BA)	389
Ecology and Evolutionary Biology - Minor	263	Humanities - Minor	390
Economics	264	Integrative Physiology	390
Economics - Bachelor of Arts (BA)	270	Integrative Physiology - Bachelor of Arts (BA)	395
Economics - Minor	271	International Affairs	397
English	272	Arctic Studies - Certificate	399
Creative Writing - Minor	283	European Union Studies - Certificate	399
English - Minor	283	Global Environmental Affairs - Certificate	400
English - Bachelor of Arts (BA)	283	International Affairs - Bachelor of Arts (BA)	401
Environmental Studies	284	International Media - Certificate	403
Environmental Studies - Bachelor of Arts (BA)	288	Jewish Studies	404
Renewable and Sustainable Energy - Certificate	290	Hebrew and Israel Studies - Minor	409
Ethnic Studies	291	Jewish Studies - Bachelor of Arts (BA)	409
Ethnic Studies - Bachelor of Arts (BA)	297	Jewish Studies - Minor	412
Ethnic Studies - Minor	299	Lesbian, Gay, Bisexual, Transgender and Queer Studies	413
Film Studies	299	LGBTQ Studies - Certificate	414
Film Studies - Bachelor of Arts (BA)	306	Linguistics	414
Film Studies - Bachelor of Fine Arts (BFA)	309	Linguistics - Bachelor of Arts (BA)	418
Film Studies - Minor	311	Linguistics - Minor	419
French and Italian	311	Mathematics	419
French - Bachelor of Arts (BA)	319	Mathematics - Bachelor of Arts (BA)	425
French - Minor	320	Mathematics - Minor	427
Italian - Bachelor of Arts (BA)	320	Medieval and Early Modern Studies	428
Italian - Minor	322	Medieval and Early Modern Studies - Certificate	428
Geography	322	Molecular, Cellular and Developmental Biology	429

Molecular, Cellular and Developmental Biology - Bachelor of Arts (BA)	436	Women and Gender Studies	534
Peace and Conflict Studies	437	Global Gender and Sexuality Studies - Certificate	541
Peace and Conflict Studies - Certificate	438	Women and Gender Studies - Bachelor of Arts (BA)	542
Philosophy	438	Women and Gender Studies - Minor	545
Philosophy - Bachelor of Arts (BA)	444	Writing and Rhetoric, Program for	547
Philosophy - Minor	446	Business	549
Physics	446	Policies & Requirements	553
Physics - Bachelor of Arts (BA)	453	Programs of Study	557
Physics - Minor	457	Business Administration	557
Political Science	457	Business Administration - Bachelor of Science (BS)	562
Political Science - Bachelor of Arts	466	Business - Minor	567
Political Science - Minor	468	Entrepreneurial Studies - Certificate	567
Psychology and Neuroscience	468	Global Business - Certificate	568
Neuroscience - Bachelor of Arts (BA)	476	Operations and Information Management - Certificate	568
Neurosciences and Behavior - Certificate	479	Real Estate - Certificate	569
Psychology - Bachelor of Arts (BA)	479	Socially Responsible Enterprise - Certificate	569
Religious Studies	481	Cross-College Programs	570
Religious Studies - Bachelor of Arts (BA)	486	Native American and Indigenous Studies - Certificate	570
Religious Studies - Minor	487	Public Health - Certificate	571
Sociology	487	Space - Minor	572
Sociology - Bachelor of Arts (BA)	494	Education	573
Sociology - Minor	495	Policies & Requirements	573
Care, Health and Resilience - Certificate	495	Programs of Special Interest	574
Spanish and Portuguese	496	Programs of Study	575
Portuguese Language and Culture - Minor	503	Elementary Education - Bachelor of Arts (BA)	584
Spanish - Bachelor of Arts (BA)	503	Leadership and Community Engagement - Bachelor of Arts (BA)	589
Spanish - Minor	506	Education - Minor	595
Speech, Language and Hearing Sciences	506	Leadership Studies - Minor	596
Speech, Language and Hearing Sciences - Bachelor of Arts (BA)	509	Teacher Licensure Program	598
Theatre & Dance	510	Post-Baccalaureate	600
Dance - Bachelor of Arts (BA)	521	Undergraduate Nondegree	608
Dance - Bachelor of Fine Arts (BFA)	523	Engineering & Applied Science	617
Dance - Minor	525	Policies & Requirements	620
Theatre - Bachelor of Arts (BA)	526	Programs of Study	624
Theatre - Bachelor of Fine Arts (BFA)	528	Aerospace Engineering Sciences	624
Theatre - Minor	532	Aerospace Engineering Science - Bachelor of Science (BS)	630
Western American Studies	532	Applied Mathematics	632
Western American Studies - Certificate	532		
Western Civilization Studies	533		
Foundations of Western Civilization - Certificate	533		

Applied Mathematics - Bachelor of Science (BS)	Mechanical Engineering - Bachelor of Science (BS)
..... 637 740
Chemical and Biological Engineering	Technology, Arts and Media
642	742
Chemical and Biological Engineering - Bachelor of	Technology, Arts and Media - Bachelor of Science
Science (BS)	(BS)
647	745
Chemical Engineering - Bachelor of Science (BS)	Technology, Arts and Media - Certificate
..... 649	747
Civil, Environmental & Architectural Engineering	Technology, Arts and Media - Minor
651	747
Architectural Engineering - Bachelor of Science (BS)	Environmental Design
..... 672	748
Civil Engineering - Bachelor of Science (BS)	Policies & Requirements
674	749
Environmental Engineering - Bachelor of Science	Programs of Study
(BS)	753
676	Environmental Design - Bachelor of Environmental
Architectural Engineering - Minor	Design (BEnvD)
679	758
Civil Engineering - Minor	Environmental Design - Minor
680	762
Computer Science	Media, Communication and Information
681	763
Computer Science - Bachelor of Science (BS)	Policies & Requirements
689	764
Computer Science - Minor	Programs of Study
691	770
Electrical, Computer & Energy Engineering	Advertising, Public Relations and Media Design
691	770
Computer Engineering - Minor	Strategic Communication - Bachelor of Science (BS)
710 774
Electrical and Computer Engineering - Bachelor of	Communication
Science (BS)	776
710	Communication - Bachelor of Arts (BA)
Electrical Engineering - Bachelor of Science (BS) 779
..... 712	Communication - Minor
714	780
Electrical Engineering - Minor	Critical Media Practices
714	780
Electrical Renewable Energy Systems - Minor	Media Production - Bachelor of Arts (BA)
714	785
Signals and Systems - Minor	Media Production - Minor
715	786
Engineering and Applied Science	Information Science
715	787
Biomedical Engineering - Minor	Information Science - Bachelor of Science (BS)
719 791
Energy Engineering - Minor	Information Science - Minor
720	792
Engineering Leadership - Certificate	Journalism
720	792
Engineering, Science and Society - Certificate	Journalism - Bachelor of Arts (BA)
720	796
Global Engineering - Minor	Journalism - Minor
721	797
Lighting Design - Certificate	Media Studies
722	798
Engineering Management	Media Studies - Bachelor of Arts (BA)
722	801
Engineering Entrepreneurship - Certificate	Media Studies - Minor
724	802
Engineering Management - Certificate	Music
724	802
Engineering Management - Minor	Policies & Requirements
724	804
Engineering Physics	Programs of Study
724	806
Engineering Physics - Bachelor of Science (BS)	Music
..... 728	806
Engineering Plus	Music - Bachelor of Music (BMus)
730	817
Engineering Plus - Bachelor of Science (BS)	Music - Bachelor of Arts in Music (BAMus)
732	832
Mechanical Engineering	Jazz Studies - Certificate
733	834
	Music Entrepreneurship - Certificate
	834

Music Technology - Certificate	835	Asian Languages and Civilizations - Doctor of Philosophy (PhD)	911
Music Education	835	Asian Studies	911
Music Education - Bachelor of Music Education (BMusEd)	844	Asian Studies - Graduate Certificate	911
Academic Enrichment Programs	851	Astrophysical and Planetary Sciences	915
Education Abroad	851	Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD)	919
Library Research	852	Atmospheric and Oceanic Sciences	920
Preprofessional Programs	852	Atmospheric and Oceanic Sciences - Master of Science (MS)	924
Presidents Leadership Class	853	Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD)	925
Reserve Officers Training Corps (ROTC)	854	Atmospheric and Oceanic Sciences - Graduate Certificate	926
Air Force Aerospace Studies (U.S. Air Force)	854	Oceanography - Graduate Certificate	926
Military Science (U.S. Army)	855	Behavioral Genetics	926
Naval Science (U.S. Navy & U.S. Marine Corps)	857	Behavioral Genetics - Graduate Certificate	927
Special Undergraduate Enrichment Programs	858	Chemistry and Biochemistry	928
Undergraduate Residential Programs	860	Biochemistry - Master of Science (MS)	936
Graduate Catalog	864	Chemistry - Master of Science (MS)	936
Graduate Programs A-Z		Biochemistry - Doctor of Philosophy (PhD)	937
Admissions	864	Chemical Physics - Doctor of Philosophy (PhD)	939
Academic Standards & Advising	865	Chemistry - Doctor of Philosophy (PhD)	941
Degree Requirements	865	Molecular Biophysics - Graduate Certificate	943
Master's Degree Requirements	866	Classics	943
Doctoral Degree Requirements	867	Classics - Master of Arts (MA)	947
Distance Education	869	Classics - Doctor of Philosophy (PhD)	948
Enrollment & Records	869	Cognitive Science	949
Student Finances	872	Cognitive Science - Doctor of Philosophy (PhD)	950
Colleges & Schools	875	Cognitive Science - Graduate Certificate	951
Arts & Sciences	875	Human Language Technology - Graduate Certificate	952
Programs of Study	876	Ecology and Evolutionary Biology	952
Anthropology	876	Ecology and Evolutionary Biology - Master of Arts (MA)	956
Anthropology - Master of Arts	880	Ecology and Evolutionary Biology - Doctor of Philosophy (PhD)	957
Anthropology - Doctor of Philosophy, PhD	883	Economics	957
Applied Mathematics	885	Economics - Doctor of Philosophy (PhD)	961
Applied Mathematics - Master of Science (MS)	890	English	963
Applied Mathematics - Doctor of Philosophy (PhD)	891	Creative Writing - Master of Fine Arts (MFA)	967
Art and Art History	892	English - Master of Arts (MA)	968
Art History - Master of Arts (MA)	901	English - Doctor of Philosophy (PhD)	969
Art Practices - Master of Fine Arts (MFA)	903		
Asian Languages and Civilizations	905		
Asian Languages and Civilizations - Master of Arts (MA)	910		

Environmental Studies	970	Linguistics	1026
Environment - Master of the Environment (MENV)	973	Linguistics - Master of Arts (MA)	1029
Environmental Studies - Master of Science (MS)	974	Linguistics - Doctor of Philosophy (PhD)	1030
Environmental Studies - Doctor of Philosophy (PhD)	975	Culture, Language and Social Practice - Graduate Certificate	1031
Environment, Policy and Society - Graduate Certificate	978	Mathematics	1032
Renewable and Sustainable Energy - Graduate Certificate	979	Mathematics - Master of Arts (MA)	1038
Science and Technology Policy - Graduate Certificate	979	Mathematics - Doctor of Philosophy (PhD)	1038
Ethnic Studies	979	Molecular, Cellular and Developmental Biology	1039
Comparative Ethnic Studies - Doctor of Philosophy (PhD)	982	Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD)	1042
Comparative Ethnic Studies - Graduate Certificate	983	Museum and Field Studies	1043
French and Italian	984	Museum and Field Studies - Master of Science (MS)	1045
French - Master of Arts (MA)	986	Museology - Graduate Certificate	1047
French - Doctor of Philosophy (PhD)	987	Philosophy	1048
Geography	989	Philosophy - Master of Arts (MA)	1051
Geography - Master of Arts (MA)	994	Philosophy - Doctor of Philosophy (PhD)	1053
Geography - Doctor of Philosophy (PhD)	995	Physics	1054
Development Studies - Graduate Certificate	996	Physics - Master of Science (MS)	1060
Population Studies - Graduate Certificate	996	Physics - Doctor of Philosophy (PhD)	1061
Geological Sciences	996	Political Science	1061
Geology - Master of Science (MS)	1002	Political Science - Doctor of Philosophy (PhD) ..	1068
Geology - Doctor of Philosophy (PhD)	1002	Psychology and Neuroscience	1068
Geophysics - Doctor of Philosophy (PhD)	1002	Neuroscience - Doctor of Philosophy (PhD)	1076
Geophysics - Graduate Certificate	1003	Psychology - Doctor of Philosophy (PhD)	1077
Hydrologic Sciences - Graduate Certificate	1004	Neuroscience - Graduate Certificate	1078
Germanic and Slavic Languages and Literatures	1004	Religious Studies	1078
German Studies - Master of Arts (MA)	1007	Religious Studies - Master of Arts (MA)	1080
Russian Studies - Master of Arts (MA)	1008	Sociology	1081
German Studies - Doctor of Philosophy (PhD) ..	1009	Sociology - Doctor of Philosophy (PhD)	1085
Critical Theory - Graduate Certificate	1011	Spanish and Portuguese	1087
History	1011	Spanish - Doctor of Philosophy (PhD)	1090
History - Master of Arts (MA)	1020	Spanish - Master of Arts (MA)	1091
History - Doctor of Philosophy (PhD)	1020	Speech, Language and Hearing Sciences	1092
Integrative Physiology	1021	Audiology - Doctor of Audiology (AuD)	1099
Integrative Physiology - Master of Science (MS)	1024	Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD)	1102
Integrative Physiology - Doctor of Philosophy (PhD)	1025	Speech, Language and Hearing Sciences - Master of Arts (MA)	1103
		Speech-Language Pathology Assistant - Graduate Certificate	1104
		Theatre & Dance	1104
		Applied Shakespeare - Graduate Certificate	1112

Dance - Master of Fine Arts (MFA)	1112	Education-Learning Sciences and Human Development - Doctor of Philosophy (PhD)	1173
Experience Design - Master of Fine Arts (MFA)	1114	Research and Evaluation Methodology	1174
Theatre - Doctor of Philosophy (PhD)	1115	Education - Research and Evaluation Methodology - Doctor of Philosophy (PhD)	1175
Theatre - Master of Arts (MA)	1116	Teacher Licensure Program	1177
Women and Gender Studies	1118	Engineering & Applied Science	1181
Women and Gender Studies - Graduate Certificate	1119	Policies & Requirements	1182
Business	1120	Programs of Study	1183
Programs of Study	1123	Aerospace Engineering Sciences	1183
Accounting - Master of Science (MS)	1130	Aerospace Engineering Sciences - Master of Science (MS)	1193
Business Administration	1131	Aerospace Engineering Sciences - Professional Master of Science (MSAES)	1193
Business Administration - Master of Business Administration (MBA)	1135	Aerospace Engineering Sciences - Doctor of Philosophy (PhD)	1194
Business Administration - Doctor of Philosophy (PhD)	1138	Astrodynamics and Satellite Navigation Systems - Graduate Certificate	1194
Business Analytics - Master of Science (MS)	1139	Remote Sensing - Graduate Certificate	1194
Finance - Master of Science (MS)	1139	Architectural Engineering	1195
Real Estate - Master of Science (MS)	1140	Architectural Engineering - Master of Science (MS)	1197
Supply Chain Management - Master of Science (MS)	1141	Architectural Engineering - Doctor of Philosophy (PhD)	1197
Taxation - Master of Science (MS)	1141	Chemical Engineering	1198
Education	1142	Chemical Engineering - Master of Science (MS)	1201
Policies & Requirements	1143	Chemical Engineering - Doctor of Philosophy (PhD)	1202
Programs of Special Interest	1144	Civil Engineering	1202
Programs of Study	1144	Civil Engineering - Master of Science (MS)	1213
Curriculum and Instruction	1156	Civil Engineering - Professional Master of Science (MSCVE)	1214
Education - Curriculum and Instruction - Master of Arts (MA)	1157	Civil Engineering - Doctor of Philosophy (PhD) .	1215
Education - Curriculum and Instruction - Doctor of Philosophy (PhD)	1161	Engineering for Developing Communities - Graduate Certificate	1215
Educational Equity and Cultural Diversity	1164	Computer Science	1216
Educational Equity and Cultural Diversity - Master of Arts (MA)	1164	Computer Science - Master of Engineering (ME)	1224
Educational Equity and Cultural Diversity - Doctor of Philosophy (PhD)	1167	Computer Science - Master of Science (MS)	1225
Educational Foundations, Policy and Practice	1168	Computer Science - Professional Master of Science (MSCPS)	1225
Educational Foundations, Policy and Practice - Master of Arts (MA)	1169	Computer Science - Doctor of Philosophy (PhD)	1226
Educational Foundations, Policy and Practice - Doctor of Philosophy (PhD)	1170	Electrical Engineering	1227
Educational-Learning Sciences and Human Development	1172	Electrical Engineering - Master of Engineering (ME)	1240
Education-Learning Sciences and Human Development - Master of Arts (MA)	1172		

Electrical Engineering - Master of Science (MS)	1240	Mechanical Engineering - Professional Master of Science (MSME)	1260
Electrical Engineering - Professional Master of Science (MSEE)	1241	Mechanical Engineering - Doctor of Philosophy (PhD)	1260
Electrical Engineering - Doctor of Philosophy (PhD)	1243	Technology, Media and Society	1261
Engineering & Applied Science	1243	Technology, Media and Society - Master of Science (MS)	1263
Embedded Systems Engineering - Graduate Certificate	1243	Technology, Media and Society - Doctor of Philosophy (PhD)	1265
Power Electronics - Graduate Certificate	1244	Telecommunications	1265
Engineering Management	1244	Telecommunications - Master of Science (MS)	1270
Engineering Management - Master of Engineering (ME)	1247	Telecommunications - Doctor of Philosophy (PhD)	1273
Engineering Entrepreneurship - Graduate Certificate	1248	Computer and Network Security - Graduate Certificate	1273
Engineering Management - Graduate Certificate	1248	Network Architecture - Graduate Certificate	1274
Leadership and Management - Graduate Certificate	1248	Telecommunications Policy - Graduate Certificate	1274
Managing Applied Research in Technology - Graduate Certificate	1248	Wireless Networks and Technologies - Graduate Certificate	1274
Performance Excellence in Technology Management - Graduate Certificate	1248	Interdisciplinary Programs	1274
Project Management - Graduate Certificate	1248	Computational Linguistics - Master of Science (MS)	1274
Quality Systems for Product and Process Engineering - Graduate Certificate	1249	Environmental Justice - Graduate Certificate	1275
Six Sigma Statistical Practitioner - Graduate Certificate	1249	Graduate Teacher Program - Graduate Certificate	1275
Technology Ventures & Product Management - Graduate Certificate	1249	Language Technology - Graduate Certificate	1276
Environmental Engineering	1249	Native American and Indigenous Studies - Graduate Certificate	1276
Environmental Engineering - Master of Science (MS)	1249	Organizational Leadership - Master of Science (MS)	1277
Environmental Engineering - Professional Master of Science (MSENV)	1250	Quantitative Biology - Graduate Certificate	1278
Environmental Engineering - Doctor of Philosophy (PhD)	1251	Quantitative Methods for Behavioral Sciences - Graduate Certificate	1278
Materials Science and Engineering	1251	Water Engineering and Management - Graduate Certificate	1279
Materials Science and Engineering - Master of Science (MS)	1252	Media, Communication and Information	1279
Materials Science and Engineering - Doctor of Philosophy (PhD)	1252	Programs of Study	1280
Mechanical Engineering	1252	Advertising, Public Relations and Media Design	1280
Mechanical Engineering - Master of Engineering (ME)	1259	Strategic Communication Design - Master of Arts (MA)	1282
Mechanical Engineering - Master of Science (MS)	1259	Communication	1283
		Communication - Master of Arts (MA)	1286
		Communication - Doctor of Philosophy (PhD) ...	1288
		Critical Media Practices	1288
		Interdisciplinary Documentary Media Practices - Master of Fine Arts (MFA)	1291

Emergent Technologies and Media Art Practices - Doctor of Philosophy (PhD) ..	1292	American Indian Law - Graduate Certificate	1381
Interdisciplinary Documentary Media Practices - Graduate Certificate	1293	Entrepreneurial Law - Graduate Certificate	1383
Emergent Technologies and Media Art Practices - Graduate Certificate	1293	Health Law and Policy - Graduate Certificate	1383
Information Science	1293	Juvenile and Family Law - Graduate Certificate	1384
Information Science - Master of Science (MS) ..	1296	Natural Resources Law and Policy - Graduate Certificate	1384
Information Science - Doctor of Philosophy (PhD)	1296	Tax Emphasis - Graduate Certificate	1385
Intermedia Art, Writing and Performance	1297	Programs A-Z	1386
Intermedia Art, Writing and Performance - Doctor of Philosophy (PhD)	1298	Courses A-Z	1392
Journalism	1299	Accounting (ACCT)	1392
Journalism - Master of Arts (MA)	1302	Advertising, PR & Media Design (APRD)	1396
Media Research and Practice - Doctor of Philosophy (PhD)	1303	Aerospace Engineering (ASEN)	1401
Media Studies	1304	Air Force Aerospace Studies - ROTC (AIRR)	1414
Media and Public Engagement - Master of Arts (MA)	1308	Anthropology (ANTH)	1414
Media Research and Practice - Doctor of Philosophy (PhD)	1303	Applied Math (APPM)	1425
Music	1309	Arabic (ARAB)	1431
Policies & Requirements	1310	Architectural Engineering (AREN)	1433
Programs of Study	1312	Architecture (ARCH)	1437
Music	1312	Art Film Studies (ARTF)	1437
Music - Master of Music (MMus)	1322	Art History (ARTH)	1439
Music - Doctor of Philosophy (PhD)	1323	Art Studio and Non-Studio (ARTS)	1445
Opera and Solo Vocal Performance - Graduate Certificate	1324	Arts & Sciences Courses (ARSC)	1458
String Quartet Performance - Graduate Certificate	1324	Asian Studies (ASIA)	1461
Woodwind Performance - Graduate Certificate ..	1324	Astrophysical & Planetary Sciences (ASTR)	1462
Music Education	1325	ATLAS (ATLS)	1467
Music Education - Master of Music Education (MMusEd)	1333	Atmospheric & Oceanic Sciences (ATOC)	1472
Musical Arts	1333	Baker Residential Acad Prgm (BAKR)	1476
Musical Arts - Doctor of Musical Arts (DMA)	1336	BCOR Applied Semester Experience (BASE)	1476
Law	1338	Biomedical Engineering (BMEN)	1477
Admissions	1342	Business Administration (BADM)	1477
Enrollment & Records	1342	Business Core (BCOR)	1478
Student Finances	1343	Business Environment & Policy (BPOL)	1480
Programs of Study	1343	Business Law (BSLW)	1480
Law - Master of Studies in Law (MSL)	1378	Business Minor (BUSM)	1480
Law - Juris Doctor of Laws (JD)	1378	Career Services (CSVC)	1482
		Center for Western Civilization (CWCV)	1482
		Center of the American West (CAMW)	1482
		Central and East European Studies (CEES)	1482
		Chemical Engineering (CHEN)	1482
		Chemistry (CHEM)	1487
		Chinese (CHIN)	1498
		Civil Engineering (CVEN)	1503
		Classical Greek Language (GREK)	1516

Classics (CLAS)	1517	Graduate Teacher Education (GRTE)	1685
College of Engineering and Applied Science Admin (COEN)	1524	Hebrew (HEBR)	1685

ABOUT CU BOULDER

General Information

As a comprehensive university, CU Boulder is committed to the liberal education of students via a broad curriculum ranging from the baccalaureate through the postdoctoral levels. The chancellor is the chief academic and administrative officer and is responsible for conducting campus affairs in accordance with the policies of the regents.

Students

With an enrollment of more than 32,000 students, the CU Boulder is the largest of the four-campus University of Colorado system. The student population comes from every state in the nation and from more than 130 foreign countries. Many different ethnic, religious, academic and social backgrounds are represented, fostering the development of a multicultural academic community that enriches each student's educational experience.

Faculty

CU Boulder has more than 1,204 tenured and tenure-track faculty, with 100 percent holding doctorates or appropriate terminal degrees. The faculty includes nationally and internationally recognized scholars with many academic honors and awards, including:

- David Wineland won the 2012 Nobel Prize in physics;
- Several CU Boulder research faculty from the National Snow and Ice Data Center shared the 2007 Nobel Peace Prize with former Vice President Al Gore for their contributions to the international report of the Intergovernmental Panel on Climate Change;
- John Hall won the 2005 Nobel Prize in physics;
- Carl Wieman and Eric Cornell won the 2001 Nobel Prize in physics;
- Tom Cech won the 1989 Nobel Prize in chemistry;
- Eight faculty have received MacArthur Fellowships, the so-called "Genius Grant."
- Twenty-three active or retired faculty are members of the National Academy of Sciences, all of whom are included in the membership of the American Academy of Arts and Sciences;
- Fifteen faculty are members of the National Academy of Engineering;
- Six faculty are members of the National Academy of Education.

Most faculty members, including full professors, teach both undergraduate and graduate classes. Faculty members incorporate their research and creative activities directly into instructional programs. Faculty participate in campus governance through the Faculty Senate and the Faculty Assembly. Students participate through the University of Colorado Student Government (CUSG) and the United Government of Graduate Students (UGGS).

Academic Offerings

The Boulder campus offers approximately 4,000 different courses in more than 110 distinct fields of study and 235 degree programs across the baccalaureate, master's, doctoral and professional levels. These courses represent a full range of disciplines in the humanities, the social sciences, the physical and biological sciences, the fine and performing arts, and the professions.

Research

CU Boulder is home to nearly 2,000 nationally and internationally recognized research faculty who have earned a global reputation for

outstanding teaching, research and creative work across more than 150 academic disciplines. While the classroom is the location for most instructional activities, laboratories, seminars and field work also are important features of the undergraduate and graduate experience. Students can get involved in research and creative work as early as their freshman year.

CU Boulder's sponsored research portfolio continues to grow. Since fiscal year 2006, CU Boulder has experienced 70 percent growth in research awards. Federal agency funding remains the mainstay of CU research, with 75 percent of awards coming directly from federal agencies. Five federal agencies are consistently the largest funding sources for CU Boulder awards:

- NASA,
- National Science Foundation,
- Department of Commerce,
- National Institutes of Health and
- Department of Defense.

CU Boulder remains the number one public university recipient of NASA research awards, and continues to be a national leader in aerospace and space research. Additionally, university researchers are expanding their impact through collaborative projects with industry, other universities, nonprofits and international partners.

CU Boulder's research institutes and research centers significantly contribute to the university's research and education missions, as well as the regional economy. Research faculty in academic departments, institutes and centers are continually expanding CU Boulder's research capabilities and collaborations, resulting in new knowledge, technologies and creative work for the benefit of Colorado, the nation and the world.

For more information, see the Research (p. 23) section.

Statutory Mission

CU Boulder's vision is grounded in its statutory mission as a national public research university. In Colorado statute, the university is defined as the "comprehensive graduate research university with selective admissions standards . . . offer(ing) a comprehensive array of undergraduate, master and doctoral degree programs" of what is now designated the University of Colorado System.

CU Boulder recognizes the exceptional opportunities associated with its role as a research university, and values the unique strength and character research achievements bring to undergraduate education. It is keenly aware of its responsibility for educating the next generation of citizens and leaders, and for fostering the spirit of discovery through research. Indeed, CU Boulder believes that its students, both graduate and undergraduate, benefit from the comprehensive mix of programs and research excellence that characterize a flagship university. Thus, CU Boulder's statutory mission is relevant today and will remain relevant tomorrow.

Since 2007, CU Boulder's strategic plan, *Flagship 2030*, has been guiding near-term actions and investments that will sustain CU's quality and competitiveness and, through visionary "flagship initiatives," will transform the university within the next quarter-century.

University of Colorado History

At its first session in 1861, Colorado's territorial legislature passed an act providing for a university in Boulder. Between 1861 and 1876, Boulder

citizens donated land south of town and made gifts from \$15 to \$1,000 to match the \$15,000 the state legislature appropriated for the university's construction. In 1875, Colorado citizens laid the cornerstone for the university's first building, Old Main, and officially founded CU in 1876, the same year Colorado joined the union. The university opened its doors the following year with 44 students, a president, and one instructor.

Today, the University of Colorado is a four-campus system that includes the University of Colorado Boulder, the University of Colorado Colorado Springs, the University of Colorado Denver and the University of Colorado Anschutz Medical Campus. The campuses have a combined enrollment of more than 63,000 students. To meet the needs of its students, the university system offers an extensive number of undergraduate, graduate and professional degree programs, as well as opportunities to study abroad, engage in public service and conduct research.

CU Boulder has a strong sponsored research portfolio, and the university also relies on revenues from tuition and fees, contracts and grants, investments and interest income, health services and the generous support of private foundations and donors.

An elected nine-member Board of Regents governs CU and is charged by the state constitution with the general supervision of the university and the exclusive control and direction of all its funds and appropriations, unless otherwise provided by law. The board conducts its business at regular meetings open to the public and through committees. The president is the chief administrative officer and is responsible for providing leadership to the university.

For more information about the CU Board of Regents, go to www.cu.edu/regents (<http://www.cu.edu/regents>); to learn more about the CU system, visit www.cu.edu (<http://www.cu.edu>).

Undergraduate Enrollment and Graduation Rates

CU Boulder's fall 2016 entering freshman class numbered 6,439. Of these, 45 percent were females, 52 percent residents of Colorado and 26 percent members of minority groups (African Americans, Asian Americans, Hispanics/Latinos, Native Americans and Pacific Islanders). Sixty-eight percent enrolled in the College of Arts and Sciences, 9 percent in the Leeds School of Business, 16 percent in the College of Engineering and Applied Science and 6 percent, combined, enrolled in the College of Media, Communication and Information, the Program in Environmental Design and the College of Music.

Of the freshmen entering in summer or fall 2010 who enrolled full time, 47 percent graduated within four years; 66 percent graduated within five years; and 70 percent graduated within six years. Of the students who entered in fall 2015, 87 percent returned for their second fall semester.

CU Boulder Accreditation and Affiliation

CU Boulder is accredited by the Higher Learning Commission (hlcommission.org; 800-621-7440 or 312-263-0456). See individual colleges and schools for program specific accreditation information.

For information on the content of academic programs and official degree designations, refer to the appropriate catalog sections.

As one of 34 U.S. public research institutions belonging to the prestigious Association of American Universities (AAU) - and the only member in the Rocky Mountain region - a goal at CU Boulder is to directly affect Colorado communities through collaborative research, innovation and

entrepreneurship. CU Boulder faculty, staff and students work with the broader community to establish unique connections that have lasting outcomes—both across Colorado and around the world.

About the Catalog

The *2017–2018 University Catalog* is an academic publication containing information about academic programs, policies and services; descriptions of colleges, schools and individual departments; and degree requirements, course descriptions and faculty listings as of Spring 2017.

The catalog is only published online in an accessible format. In accordance with requirements under the Americans with Disability Act (ADA), alternate formats are available upon request.

Because the catalog is compiled in advance of the published academic year, changes in programs and policies may occur. All catalog information is subject to change without notice or obligation, and the University of Colorado Boulder reserves the right to change any rules or curriculum requirements at any time. Current information may be obtained by consulting departmental advisors and reviewing registration materials distributed each semester.

The catalog is produced by the Office of the Registrar (<http://www.colorado.edu/registrar>) at the University of Colorado Boulder (<http://www.colorado.edu>). Previous academic catalogs can be found in the catalog archive (<http://www.colorado.edu/registrar/about/archive>). Questions concerning the catalog may be directed to catalog@colorado.edu.

Academic Calendar & Exams

The campus operates year round, with fall and spring semesters of 16 weeks each, a winter session in between fall and spring semesters, and a summer term that includes two three-week sessions (Maymester and Augmester), two five-week sessions, an eight-week session, a 10-week session and two intensive (one- or more-week) sessions.

For a complete calendar of academic and financial dates and deadlines, visit the Office of the Registrar's Academic Calendar (<http://www.colorado.edu/registrar/students/academic-calendar>) webpage. (<http://colorado.edu/registrar>)

The University of Colorado at Boulder has a legal and moral obligation to accommodate all students who must be absent from classes or miss scheduled exams in order to observe religious holidays; and takes care to not inhibit or penalize these students for exercising their rights to religious observance. For further information, see the university policy on the Observance of Religious Holidays and Absences from Classes and/or Exams (<http://www.colorado.edu/policies/observance-religious-holidays-and-absences-classes-and-or-exams>).

Summer 2017

May 15 (Mon.)	Classes begin for session M (Maymester)
May 29 (Mon.)	Memorial Day holiday; campus closed
June 2 (Fri.)	Final exams for session M (Maymester)
June 5 (Mon.)	Classes begin for sessions A, C and D

July 4 (Tues.)	Independence Day holiday; campus closed
July 7 (Fri.)	Final exams for session A (first five-week session)
July 11 (Tues.)	Classes begin for session B (second five-week session)
July 28 (Fri.)	Final exams for session C (eight-week session)
Aug. 7 (Mon.)	Classes begin for session G (Augmester)
Aug. 11 (Fri.)	Final exams for sessions B and D (second five-week session, 10-week session)
Aug. 24 (Thurs.)	Final exams for session G (Augmester)
Aug. 24 (Thurs.)	Degree conferral date (no campuswide ceremony)

Fall 2017

Aug. 28 (Mon.)	Classes begin
Sept. 4 (Mon.)	Labor Day holiday; campus closed
Oct. 1 (Sun.)	Freshman and transfer application deadline for spring semester
Oct. 1–4 (Sun.–Wed.)	Family Weekend
Nov. 15 (Weds.)	Freshman non-binding early action application deadline for fall semester and summer sessions
Nov. 20-22 (Mon.–Wed.)	Fall break; no classes
Nov. 23-24 (Thurs.–Fri.)	Thanksgiving holiday; campus closed
Dec. 14 (Thurs.)	Last day of classes
Dec. 15 (Fri.)	Reading day
Dec. 16-20 (Sat.–Wed.)	Final exams
Dec. 21 (Thurs.)	Degree conferral date (no campuswide ceremony)

Spring 2018

Jan. 14 (Sun.)	Freshman application deadline for summer and fall sessions
Jan. 15 (Mon.)	Martin Luther King Jr. holiday; campus closed
Jan. 16 (Tues.)	Classes begin
Mar. 1 (Thurs.)	Transfer application deadline for fall and summer sessions
Mar. 26-30 (Mon.–Fri.)	Spring break (campus closed Friday, March 30)
May 1 (Mon.)	Freshman confirmation deadline
May 3 (Thurs.)	Last day of classes
May 4 (Fri.)	Reading day
May 5-9 (Sat.–Wed.)	Final exams
May 10 (Thurs.)	University commencement ceremony; degree conferral date

Summer 2018

May 14 (Mon.)	Classes begin for session M (Maymester)
May 28 (Mon.)	Memorial Day holiday; campus closed
June 1 (Fri.)	Final exams for session M (Maymester)
June 4 (Mon.)	Classes begin for sessions A, C and D
July 4 (Wed.)	Independence Day ; campus closed
July 6 (Fri.)	Final exams for session A (first five-week session)
July 10 (Tues.)	Classes begin for session B (second five-week session)
July 27 (Fri.)	Final exams for session C (eight-week session)
Aug. 6 (Mon.)	Classes begin for session G (Augmester)
Aug. 10 (Fri.)	Final exams for sessions B and D (second five-week session, 10-week session)
Aug. 23 (Thurs.)	Final exams for session G (Augmester)
Aug. 23 (Thurs.)	Degree conferral date (no campuswide ceremony)

Final Examinations

It is the policy of the University of Colorado Boulder to adhere to the final examination schedule (<http://www.colorado.edu/registrar/students/academic-calendar/final-exam-schedule>) as published on the Office of the Registrar website each semester. While it may be appropriate not to give a final in some cases, such as laboratory courses, seminars and colloquia, final examinations are integral parts of the instructional program and should be given in all other undergraduate courses. Unless notified otherwise in writing during the first week of classes, students should assume that an examination will be given.

In addition to the principles stated above, the following guidelines should be followed by all faculty members and administrators in order to assure fairness and the best possible educational experience for students.

1. The final examination in a course must be given as scheduled and not at other times, even if the faculty member and all students in a course agree to such a change.
2. The week of classes preceding the scheduled final examination period should be used primarily for continued instruction and may include the introduction of new material. No hourly examinations are to be given during the seven days preceding the start of the final examination period. However, lab practicums and seminar presentations may be scheduled during this week.
3. Individual students may be granted a variance from these policies, provided the instructor is satisfied that the exception is based on good and sufficient reasons, and that such an exception for an early or late examination will not prejudice the interests of other students in the course.
4. When students have three or more final examinations on the same day, they are entitled to arrange an alternative examination time for the last exam(s) scheduled on that day. When students have two

final exams scheduled to meet at the same time, they are entitled to arrange an alternative examination time for the later course offered that day or week. Such arrangement must be made by the deadline to drop the course without dean and instructor permission in the tenth week of the semester. Students should make arrangements with the instructor of the affected course and are expected to provide evidence of these situations to qualify for exceptions.

5. This policy applies to all undergraduate students, including seniors. Graduating seniors are not exempted from final examinations. Such exemptions are inappropriate on both procedural and academic grounds.
6. The submission deadline of all grades for each semester is 90 hours after the conclusion of the final exam, minus Sundays and official designated university holidays.

Academic Integrity

A university's intellectual reputation depends on maintaining the highest standards of intellectual honesty. Commitment to those standards is a responsibility of every student, faculty member and staff member on the University of Colorado Boulder campus.

Honor Code

A student-run Honor Code was instituted on the Boulder campus in 2002. The intent of the Honor Code is to establish a community of trust in which students do not plagiarize, cheat or obtain unauthorized academic materials. An Honor Code Council collaborates with the colleges and schools in addressing allegations and instances of academic dishonesty and in assisting to educate all members of the university community on academic integrity issues.

Breaches of academic honesty include but are not limited to cheating, plagiarism and the unauthorized possession of examinations, papers, and computer programs.

A student accused of academic dishonesty may either accept the accusation made by a faculty member or request a hearing before a student panel, which will make a decision on the accusation of academic dishonesty. In addition to academic sanctions imposed by the faculty, students found responsible for academic dishonesty also face consequences from the Honor Code Council including but not limited to Honor Code probation, education seminars concerning academic writing and ethics, suspension and expulsion from the university. For information, visit the Honor Code Office (<http://honorcode.colorado.edu>) website.

The following terms are defined here for the benefit of all members of the university community.

Cheating

Cheating is defined as using unauthorized materials or receiving unauthorized assistance during an examination or other academic exercise. Examples of cheating include: copying the work of another student during an examination or other academic exercise or permitting another student to copy one's work; taking an examination for another student or allowing another student to take one's examination; possessing unauthorized notes, study sheets, examinations or other materials during an examination or other academic exercise; collaborating with another student during an academic exercise without the instructor's consent; using unauthorized technologies, such as calculators, computers, and smart phones; and/or falsifying examination results.

Plagiarism

Plagiarism is defined as the use of another's ideas or words without appropriate acknowledgment. Examples of plagiarism include: failing to use quotation marks when directly quoting from a source; failing to document distinctive ideas from a source; fabricating or inventing sources; and copying information from computer-based sources, i.e., the Internet.

Unauthorized Possession or Disposition of Academic Materials

Unauthorized possession or disposition of academic materials may include: selling or purchasing examinations, papers, reports or other academic work; possessing unauthorized solutions, instruction manuals or texts; taking another student's academic work without permission; possessing examinations, papers, reports or other assignments not released by an instructor; and/or submitting the same paper for multiple classes without advance instructor authorization and approval.

Academic Records

Degree Audit

A degree audit report helps students track degree requirements and progress in order to help them complete graduate on time. The audit outlines courses needed for the degree and applies college-defined rules, provides hypothetical "what if" degree information and identifies transfer credits and course cutbacks for repeated courses. The audit also includes transfer courses that have been applied to degree requirements. Students and advisors can access the degree audit tool through MyCUInfo (<http://mycuinfo.colorado.edu>).

Diplomas

A diploma is issued for each unique degree earned at the University of Colorado. Doctoral candidates receive their diplomas at commencement. Diplomas are mailed to all other graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and verified. All financial obligations with CU must be resolved before a diploma is issued.

In addition to the standard diploma, CU Boulder also offers alumni graduating in Fall 2015 and later a certified electronic diploma (CeDiploma) (<http://www.colorado.edu/registrar/students/graduation/cediploma>).

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. The hold prevents receipt of a diploma or an academic transcript of work at the university and registration for future terms. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (<http://www.heartlandecsi.com>) website. Questions may be directed to University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844.

Certified electronic diplomas (CeDiplomas), display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar's Diplomas (<http://www.colorado.edu/registrar/alumni/diplomas>) webpage.

Enrollment & Degree Certification

Using MyCUInfo (<http://mycuinfo.colorado.edu>), students may print an official enrollment certification at no charge. Certification of full- or part-

time enrollment is only available after the census date (approximately the third week of classes) for the semester in question. This certification can be used whenever enrollment or degree verification is required for car insurance, loan deferments, medical coverage, scholarship purposes, etc. The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC will be able to verify degrees and enrollment for only those students who have not placed a privacy restriction on their academic record. The student's name when enrolled, social security number or student ID, and date of birth will be required for identification purposes and enrollment or degree verification. All third parties should contact the National Student Clearinghouse by phone or visit their web site for current enrollment and degree verification information, instructions, and fees. Degrees also may be verified by ordering an official transcript, or official degree certification.

Transcripts

Official Transcripts

Students may order official transcripts through the MyCUInfo (<https://mycuinfo.colorado.edu>) portal. Official transcripts are available in paper or electronic PDF and may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit). Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

Transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Unofficial Transcripts

Currently enrolled students and alumni who have access to the MyCUInfo portal may access and print unofficial transcripts free of charge through MyCUInfo (<https://mycuinfo.colorado.edu>). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student's career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices on campus and at other University of Colorado campuses.

Administration

Board of Regents

Irene C. Griego, Chair, District 7; term expires January 2021
Glen Gallegos, Vice Chair, District 3; term expires January 2019
John Carson, District 6, term expires January 2021
Heidi Ganahl, At Large; term expires January 2023
Kyle Hybl, District 5; term expires January 2019
John "Jack" Kroll, District 1; term expires January 2023
Stephen Ludwig, At Large; term expires January 2019
Sue Sharkey, District 4, term expires January 2023
Linda Shoemaker, District 2; term expires January 2021

Administrative Officers CU System

Bruce Benson, President. BS, University of Colorado Boulder.
Leonard Dinegar, Senior vice president and chief of staff. BA, Catholic University of America; MA, University of Colorado Denver.
Michael Lightner, Vice president and academic affairs officer (interim). BS, MS, University of Florida; PhD, Carnegie-Mellon University.
Johnnie Ray, Vice president for advancement. BA, Texas Tech University.
Tanya Kelly-Bowry, Vice president for government relations. BA, University of Colorado Boulder; MA, Regis University.
Ken McConnellogue, Vice president for communication. BS, University of Colorado Boulder; MA, University of Northern Colorado.
Patrick O'Rourke, Vice president, university counsel, and secretary of the Board of Regents. BA, Creighton University; JD, Georgetown University Law Center.
Kathy Nesbitt, Vice president, employee and information services. BA, University of Colorado; JD, Southern University Law Center.
Todd Saliman, Vice president and chief financial officer. BA, University of Colorado Boulder.

CU Boulder

Philip P. DiStefano, Chancellor; professor of education. BS, PhD, Ohio State University; MA, West Virginia University.
Russell L. Moore, Provost and executive vice chancellor for academic affairs. BS, University of California, Davis; PhD, Washington State University.
Kelly Fox, Senior vice chancellor and chief financial officer. BA, University of Nebraska; MA, University of Colorado Denver.
Robert Boswell, Vice chancellor for diversity, equity, and community engagement. BA, Marietta College; PhD, University of Colorado Boulder.
Deborah J. Coffin, Vice chancellor for development. BS, BA, MA, University of Northern Colorado.
Frances Draper, Vice chancellor for communications and strategic relations. BA, Stanford University; MBA, University of California, Berkeley.
Terri Fiez, Vice chancellor for research and innovation. BS, MS, University of Idaho; PhD, Oregon State University.
Christina Gonzales, Vice chancellor for student affairs. BS, MA, New Mexico State University.
David Kang, Vice chancellor for infrastructure and safety. BS, University of California, San Diego; MS, University of California, Berkeley.
Catherine Shea, Chief of staff and director of ethics and compliance. BA, University of Notre Dame; JD, Catholic University Columbus School of Law.
Valerie Simons, Executive director and Title IX coordinator, Office of Institutional Equity and Compliance. BA, University of California, Berkeley; JD, Georgetown University.
Elvira Strehle-Henson, Managing Associate University Counsel. BA, JD, University of Colorado Boulder.
Rick George, Athletic director. BA, University of Illinois.

Campus Map

The Campus Setting

CU Boulder is located at the foot of the Rocky Mountains, at an altitude of 5,400 feet. The Flatirons geologic formation is visible from nearly everywhere on campus. The climate is temperate, with generally pleasant days and cool evenings. On average, Boulder enjoys about 300 sunny days each year. The main campus covers 600 acres and includes about

200 buildings constructed of rough-cut Colorado sandstone with red tile roofs. The rural Italian (or Tuscan vernacular) architectural style evolved from a master plan developed by Philadelphia architect Charles Klauder in 1919. The Norlin Quadrangle, including the original Old Main building, is listed in the State and *National Register of Historic Places*. The campus has been noted as one of the most aesthetically pleasing in the country.

Boulder County encompasses five ecological zones, from 5,000 feet above sea level (plains grassland) to 14,000 feet (alpine tundra). Downtown Boulder is only 20 miles from the Continental Divide and boasts some of the most spectacular scenery in the United States. The city of Boulder, population 103,000, is committed to preserving its beautiful natural environment and is surrounded by 45,000 acres of open space.

Denver, the state's capital city, is 30 miles from Boulder. Denver offers the attractions and resources of a large metropolitan area and is accessible from Boulder by traveling on U.S. 36, also known as the Denver–Boulder Turnpike. Denver's international airport is served by most major carriers and is located approximately 60 minutes southeast of Boulder. Boulder and the Denver International Airport are connected by a public transportation system.

Continuing Education

The mission of the Division of Continuing Education is to provide quality, innovative, lifelong learning opportunities to a diverse student population by extending the educational resources of the University of Colorado Boulder. A variety of credit courses, seminars, noncredit, certificate, and degree programs are offered through Continuing Education, which also administers CU Boulder's Summer Session. Only university-approved faculty teach in Continuing Education programs.

ACCESS and High School Concurrent Programs

In conjunction with CU Boulder academic departments, ACCESS (<http://ce.colorado.edu/programs/access>) (Available Credit Courses for Eligible Special Students) enables nondegree students to enroll in Boulder main campus undergraduate and graduate credit courses after degree-seeking students have registered. Colorado high school juniors and seniors interested in the challenge of university course work may enroll in ACCESS as part of the High School Concurrent Program (<http://ce.colorado.edu/programs/high-school-concurrent>). In addition to earning college credit, students may also earn credit toward high school graduation requirements.

Applied Music Program

The Applied Music Program (<http://ce.colorado.edu/programs/applied-music>) offers non-music majors the opportunity to earn CU credit for beginning or continuing music lessons on guitar, piano, voice, winds, brass, drums, percussion or strings. Instruction is available in individual or group sessions depending on the instrument.

CU Complete

The goal of CU Complete (<http://ce.colorado.edu/programs/cu-complete>) is to assist former CU Boulder students in the completion of their degrees. Advisors work with each student individually and offer a degree analysis, recommendations, resources and assistance in completing remaining requirements.

Evening Credit Program

Offered in conjunction with CU Boulder's academic departments, the Evening Credit Program (<http://ce.colorado.edu/programs/evening-credit>) provides credit courses in the evening on the Boulder campus. These affordable, smaller-sized classes are provided through various departments.

Extraordinary Program

The Extraordinary Program offers alternative solutions to meet unique needs of academic programs and departments across campus in terms of special student populations, customized schedules, and specific financial arrangements. There are over 200 courses offered annually, ranging from one-day workshops to courses that span multiple semesters. The program benefits the goals of 30 different departments and serves a wide variety of students, including first generation college-bound high school students; art post-bacc students; speech, language and hearing sciences professionals; K-12 teachers from local schools districts, across the nation and the world; degree-seeking students from CU Boulder and other institutions; and more. The program also enrolls students in graduate degree and certificate programs from nearly all schools and colleges.

Individualized Instruction

Individualized Instruction provides an opportunity for students to receive credit for university courses by meeting with faculty members outside the regular classroom setting. This option may be used when the student cannot reasonably be expected to enroll in the main campus course.

International English Center

The International English Center (<http://iec.colorado.edu>) (IEC) offers a range of comprehensive English language and culture programs designed for international children, teens, pre-collegiate, undergraduate and graduate students, working professionals, au pairs, and special groups. Students build and refine their communication skills through engaging classroom instruction, experiential learning, extended practice, and cultural activities. Full and part-time programs are available. Students can choose from classroom, hybrid and online formats. Programs include intensive English, ESL academic bridge (for conditionally admitted CU Boulder students), ESL credit for undergraduate and graduate students, EducationUSA Academy for international high school students, test preparation, language and culture for au pairs, global professional English, military English and leadership communication, teacher training, and customized options for special groups. The IEC is authorized to issue a form I-20 for qualified students seeking to study full-time on an F-1 visa. For some programs, qualified exchange visitors may request a form DS-2019 from the IEC to apply for a J-1 visa.

Master of Science in Organizational Leadership

The Master of Science in Organizational Leadership (<http://ce.colorado.edu/program-landing/master-science-organizational-leadership>) is an interdisciplinary, fully online professional master's degree that prepares early- to mid-career professionals to succeed as tomorrow's dynamic leaders. Through coursework that blends business, communications, and social sciences, the program develops the knowledge and skills students need to think critically about organizational challenges and how to address them using best practices. Students learn to align others around a shared vision, build and manage

effective teams, and apply the leadership skills necessary to excel in an increasingly fast-paced and complex work world.

Online Credit Program

The Online Credit Program (<http://ce.colorado.edu/programs/online-credit>) offers online versions of approved CU Boulder courses from over 25 departments on campus. Online courses hold the same breadth, depth and rigor as face-to-face courses while offering students more control over when and where they complete their coursework. A rich collaboration among faculty and instructional designers with expertise in learning technology focuses on ongoing enhancements of quality and innovation. Courses range from traditional semester-long courses to shorter intensive terms and self-paced courses.

Post-Baccalaureate Health Professions Program

The Post-Baccalaureate Health Professions Program (<http://ce.colorado.edu/programs/post-baccalaureate-health-professions>) is a partnership between the College of Arts and Sciences and the Division of Continuing Education. It is designed for career changers who were academically successful as undergraduates but have not completed the prerequisite science courses needed to apply to graduate medical programs. Students enter the program in a cohort and take all course work together. Academic advising, tutoring and preparation for applying to medical schools are provided.

Science Discovery

Science Discovery (<http://sciencediscovery.colorado.edu>) is a science education outreach organization designed to heighten student interest and increase literacy in science, technology, engineering, art and math (STEAM). Science Discovery connects K–12 students and teachers to current CU science through a broad array of programs including summer camps, after-school classes, in-school programs, teacher professional development workshops and Teen Science Cafés. Programs capitalize on CU Boulder's scientific resources, facilities and expertise (including CU graduate and undergraduate students) in order to excite students about STEAM, expose them to a variety of STEAM careers and professionals and inspire a future generation of scientists and engineers. Science Discovery reaches more than 25,000 students and teachers throughout Colorado.

Winter Session

Winter Session (<http://www.colorado.edu/winter>) allows students to immerse themselves in captivating subjects in unique destinations. Winter Session courses provide students with exciting off-campus learning experiences where they can gain field or lab experience for credit while working alongside CU Boulder's leading faculty experts.

Youth Piano Lessons Featuring CU Instructors

The CU Youth Piano Program (<http://ce.colorado.edu/programs/youth-piano>) trains students through weekly group and private lessons. Instructors are experienced teachers from the CU College of Music. The lessons provide thorough instruction at the highest and most effective pedagogical standards while providing opportunities for fun, motivation, and enjoyment of music.

Summer Session

Summer Session (<http://www.colorado.edu/summer>) offers over 600 campus courses and enrolls about 8,000 students in a relaxed, comfortable learning environment. Online and on-campus courses are available to students who wish to enhance or accelerate their academic progress. Courses are also open to students visiting from other colleges, teachers, high school students or others interested in pursuing their professional development or enrichment.

Special three-week summer sessions are offered throughout the summer season to provide intense, accelerated courses for those who need academic credits in an abbreviated time period.

Learn more about summer dates and deadlines and tuition at summer.colorado.edu (<http://www.colorado.edu/summer>).

Auditing

Auditing allows interested individuals the opportunity to attend university classes for no academic credit. Auditors must receive permission and obtain a signature from course instructors during the first week of class to be formally added to the roster.

Audited courses will appear on a special non-academic credit transcript; however, no academic credit is awarded. Registered auditors receive class instruction, D2L access and library privileges only. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

Note: Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course for no credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit.

Community Auditors

Community members age 18–54 can register for the Community Auditors program through Continuing Education by completing the Community Auditor Registration Form on the Community Auditors (<http://ce.colorado.edu/programs/community-auditors>) webpage. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

With instructor permissions, community auditors pay a set rate to audit as many classes as desired. Nonrefundable payment is due at the time of enrollment.

Senior Auditors Program

Individuals 55 years and older can register for the Senior Auditors Program through the CU Boulder Alumni Association and qualify for a reduced auditing rate. Registration and eligibility information is available on the Senior Auditors (<http://www.colorado.edu/alumni/programs/senior-auditors>) webpage. Contact the Alumni Association at 303-492-8484 for more information about this program.

Office for Outreach and Engagement

Public outreach and community engagement are crucial to the University of Colorado Boulder's role as a comprehensive public research university and are vital to the Division of Continuing Education's mission. The Office for Outreach and Engagement (<http://www.colorado.edu/outreach/oe>) serves the CU Boulder campus and the state by helping to connect research, teaching and creative work with public needs and interests. The

office administers the CU Boulder Outreach Awards for faculty-led outreach and engagement projects, manages the campus-wide Public Outreach and Community Engagement (<http://www.colorado.edu/outreach>) website, assists with program and proposal design, leads strategic outreach initiatives, organizes the CU on the Weekend lecture series and provides public relations support.

Credits & Grading

Grading System

The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale.

Standard Grade Points per Hour of Credit

A	superior/excellent, 4.0
A-	3.7
B+	3.3
B	good/better than average, 3.0
B-	2.7
C+	2.3
C	competent/average, 2.0
C-	1.7
D+	1.3
D	1.0
D-	minimum passing, 0.7
F	failing, 0.0

Grade Symbols

I	incomplete; changed to F if not completed within one year
IP	in progress; thesis at the graduate level or specified graduate-level courses
P	passing; under the pass/fail option, grades of D- and above convert to a P. Other specified courses may also be graded on a pass/fail basis.
NC	no credit
W	withdrew
***	class grades were not submitted when final grades were processed, or the student is currently enrolled in the course.

Explanation of an I (Incomplete) Grade

An I grade indicates that the student did not complete the requirements for the course by the end of the grading period for that semester. If the student does not complete the course requirements within one year, the I grade is converted to an F. When a final grade has been assigned, the transcript states, "Originally graded as Incomplete."

Requests for incomplete grades must be initiated by the student when, for reasons beyond his or her control, the student is unable to complete the course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given.

If an instructor grants a request for an incomplete, the instructor sets the conditions under which the course work can be completed and the time limit for its completion or if the course should be retaken. If a course is retaken, it must be completed on the Boulder campus or in Boulder evening classes, and the student must re-register for the course and pay the appropriate tuition.

The initial grade of I is not removed from the transcript if the course is retaken.

Grade Point Average

The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses; then the total credit points are divided by the total credit hours. Courses with grade symbols of P, NC, *** (grade not yet entered), W, I and IP are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/fail basis. Grades of I that are not completed within one year are converted to F grades and calculated in the GPA at the end of the one-year grace period. Below is example GPA calculation for a hypothetical semester.

Grade Earned: A;	Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0
Grade Earned: A-;	Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8
Grade Earned: B+;	Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2
Grade Earned: P;	Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded)
Grade Earned: F;	Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0
	Total of 15 credit hours with 44 credit points, so $44/15 = 2.93$ GPA

For individual GPA calculations related to academic standing and graduation from a college or school, students should refer to their academic dean's office.

Credit/No Credit

Students who wish to take course work for no credit must indicate this at the time they register for classes. Changes in credit registration are not permitted after the drop/add deadline in the summer or after the third Friday of the semester in the fall and spring. Tuition is the same whether or not credit is received in a class.

Pass/Fail (P/F)

Students should refer to the college and school sections of this catalog to determine the number of pass/fail credit hours that may be taken in a given semester or credited toward a bachelor's degree. Exceptions to the pass/fail regulations are permitted for certain courses that are offered only on a pass/fail basis.

The pass/fail option is only available if the course was built to allow the pass/fail option. Students who wish to register for a class on a pass/fail basis should do so when registering for the class.

Changes to or from a pass/fail basis are not permitted after the third Friday of the semester in the fall and spring or after the drop/add deadline in the summer. Prior to that date, students wishing to change a class's grading status from graded to pass/fail can do so in the MyCUInfo portal by first clicking on the "REgister for Classes Add, Drop or Swap Class" link on the "Academics / Schedule" tab. Then students can click on the "edit" option under the "Enroll" menu.

Grades of D- and above are considered passing grades. P grades do not affect student GPAs.

Variable Credit

Select courses, such as independent study courses, are offered as variable credit. Students should consult their academic advisor and designate the number of credit hours they wish to receive for the class at the time of registration.

Degrees & Graduation

Graduation

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their declared degree and major. Degrees are conferred at the close of fall semester, spring semester and summer session. Students must apply for graduation through MyCUInfo by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar's Graduation & Commencement (<http://www.colorado.edu/registrar/students/graduation>) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

Academic Program Discontinuance

In the event a degree program is discontinued, students currently enrolled in the program have a four-year period in which to complete their degree requirements. This four-year period starts at the end of the academic year in which the Colorado Department of Higher Education (CDHE) takes action to discontinue the program. No new or returning students will be admitted into a discontinued degree program. Students not completing the degree requirements in the four-year period are not permitted to receive the discontinued degree. In such cases, credit hours accumulated may be applied to the overall number of credit hours required toward graduation, but the student must seek the advice of their college or school to determine how these credit hours might apply to a new degree program.

Commencement

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For details about the ceremony, visit CU Boulder's Commencement (<http://www.colorado.edu/commencement>) website.

Diplomas

Please see the Academic Records (p. 15) section.

Registration & Enrollment

Registration

Visit the Office of the Registrar's Academic Calendar (<http://www.colorado.edu/registrar/students/academic-calendar>) webpage for specific academic and financial dates and deadlines. Students should also consult individual college and school sections of this catalog and their dean's office for additional information on special requirements and procedures. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Office of Disability Services (<http://www.colorado.edu/disabilityservices>) website or call 303-492-8671.

Confirmation Deposit

All new degree students pay a one-time \$200 confirmation deposit when they first confirm their intent to enroll at CU Boulder. Students are not permitted to register if the university has not received the deposit.

Confirmation deposits are refunded to students upon graduation or official withdrawal from CU Boulder within established dates and guidelines. All refunds are reduced by any outstanding financial obligations. Interest earned from confirmation deposits is used for student financial aid.

Questions regarding the confirmation deposit policy should be directed to the Office of Admissions, 303-492-6301.

MyCUInfo

Student registration and other important information and services are available through the student portal, MyCUInfo (<https://mycuinfo.colorado.edu>). Students access the MyCUInfo portal using a secure CU login name and IdentiKey password. For more information and registration instructions, visit the Registration (<http://www.colorado.edu/registrar/students/registration>) webpage.

Registering for Classes

All CU Boulder students register for classes via MyCUInfo. Students also use the MyCUInfo portal to check their assigned registration date and time, view any holds that may prevent registration (see "Holds"), see to-do lists and obtain advisor name and contact information.

New freshmen and transfer students receive their registration instructions and information during the New Student Welcome Experience. Continuing students may consult the academic calendar, view their registration appointments in the student portal, and also are notified via email each semester of registration periods and requirements.

Registration instructions are also available on the Enroll in Classes (<http://www.colorado.edu/registrar/students/registration/enroll>) webpage.

Holds

A hold may be placed on a student's record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold in the student portal.

Special Registrations

Intercampus Enrollment Program

CU Boulder students who are enrolled in at least one class on the Boulder campus may be allowed to register for up to two classes or 6 credit hours, whichever is greater, on another University of Colorado campus.

Graduate students should check with the Graduate School for exceptions to the home-campus registration requirement and limitations on credit hours at the host campus.

Generally, classes taken at other CU campuses must be required for graduation or unavailable on the Boulder campus in a given term, or the classes must conflict with another required class in which the student is enrolled.

Boulder students exercising this option pay tuition for their total credit hours at Boulder campus rates. Intercampus Enrollment forms and instructions are available on the Registration Programs (<http://www.colorado.edu/registrar/students/registration/registration-programs>) webpage.

Intercampus students are registered in host campus classes after continuing home students have had the chance to enroll. This excludes the Anschutz campus, where students will be enrolled on the first day of classes. Students must adhere to the add/drop deadlines of the host campus when making changes to their intercampus enrollment.

Boulder campus students who wish to take course work on another campus of the University of Colorado, but not through the Intercampus Enrollment program, may be able to register on that campus independent of Boulder-campus registration. However, they must apply for admission to and follow the registration procedures established by the other campus. Students should check with their dean's office for approval and course applicability to their degree program.

Late Registration

Non-enrolled students may be allowed to register late for a fall or spring semester. However, as of the third Friday of the semester, eligible students are assessed a \$100 late registration fee (this is different than charges assessed for late payments of the university bill). The late registration fee also applies to graduate students registering as candidates for degree or for thesis credit hours. For more information, visit the Drop a Class (<http://www.colorado.edu/registrar/students/registration/enroll/drop-class>) webpage.

University Employees and Dependents

CU Boulder offers a tuition benefit to eligible employees and their dependents. For current benefit information, visit Employee Services' Employee Tuition Waiver Benefit (<https://www.cu.edu/employee-services/employee-tuition-benefit>) website.

Auditing

Individuals who have not been admitted to the university and who wish to attend regular classes may do so by obtaining auditor's status. Auditors must receive permission and obtain a signature from course instructors during the first week of class to be formally added to the roster.

Audited courses will not appear on any transcript, formal or informal, as no credit is awarded. Registered auditors receive class instruction, learning management system access and library privileges. Being

an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

Note: Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course for no credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit.

Community Auditors

Community members age 18–54 can register for the Community Auditors program through Continuing Education by completing the Community Auditor Registration Form on the Community Auditors (<http://ce.colorado.edu/programs/community-auditors>) webpage. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

Community auditors pay for three credit hours at the in-state undergraduate tuition rate in the College of Arts and Sciences. The cost is a flat rate and, with instructor permission, auditors may audit as many classes as desired. Nonrefundable payment is due at the time of enrollment.

Senior Auditors Program

Individuals 55 years and older can register for the Senior Auditors Program through the CU Boulder Alumni Association and qualify for reduced rates. Registration and eligibility information is available on the Senior Auditors (<http://www.colorado.edu/alumni/programs/senior-auditors>) webpage. Contact the Alumni Association at 303-492-8484 for more information about this program.

Dropping & Adding Classes

Procedures

Students can add or drop classes from their schedule in the MyCUInfo portal or app. For more information, visit the Enroll in Classes (<http://www.colorado.edu/registrar/students/registration/enroll>) webpage.

Deadlines

For specific drop and add deadlines for fall and spring semesters, visit the Academic Calendar (<http://www.colorado.edu/registrar/students/academic-calendar>) webpage. For summer deadlines, visit Summer Session's Calendars (<http://www.colorado.edu/summer/resources/calendars>) webpage.

Add a Class

- Students add classes in MyCUInfo during designated registration and schedule adjustment periods each term without needing approval.
- After this time period, students must contact the instructor or the instructor's department to add a class. After the add deadline has passed, students may only enroll in a class with their dean's permission in addition to instructor permission.

Drop a Class

- No Record Drop: Students may drop individual classes in MyCUInfo with a refund and no record (no W grades) through the third Wednesday of the fall or spring semester (summer dates vary).
- Drop with Record: After the third Wednesday of the semester, students may continue to drop classes without instructor/advisor approval in MyCUInfo through Friday of the tenth week of the fall or spring semester (summer dates vary). However, tuition and fees are assessed and grades of W appear on the transcript.

- Late Drops: After the 10-week drop deadline, instructor and dean signatures are required to drop a class. Some colleges may require additional approval or processes, such as petitioning the dean (students should check with their school or college). Class drops are generally not approved after this date except in extraordinary circumstances. Tuition and fees are assessed and grades of W appear on the transcript.

Students dropping all of their classes should see the Withdrawal (p. 22) section.

Withdrawing from CU

A withdrawal from the University of Colorado Boulder occurs if you:

- never register for classes in a fall or spring semester; or
- drop all classes for a semester; or
- submit a withdrawal request to the Office of the Registrar.

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar's Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu>) webpage and review the current term's withdrawal calendar (http://www.colorado.edu/registrar/sites/default/files/attached-files/spring2017withdrawal_info.pdf) to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult their advisor and/or dean's office, and read the withdrawal information on the Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu>) webpage.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. This hold prevents receipt of a diploma or an academic transcript of work at the university and registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence. Details are available on the Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu>) webpage.

For more information, contact the Office of the Registrar at 303-492-6970 or withdraw@colorado.edu. For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 120) or the Graduate Tuition and Fee Policies (p. 873) sections.

Graduate Leave of Absence

Graduate and MBA students **must** apply for a leave of absence (<http://www.colorado.edu/registrar/students/withdraw-cu/leave-of-absence>) or be discontinued from the university. Graduate students who wish to take a leave of absence from the university must submit an application by the published deadline in a given term and get approval from their

department and their school, college or program to avoid having to reapply.

Graduate students taking an approved leave of absence are allowed two inactive semesters (plus summer), and are guaranteed a place in their current college or school and in their current major when they return to the university. Students must not have any disciplinary holds and must be in good academic standing with the university. Students registered for the semester in which they plan to begin their leave of absence must formally withdraw. See the "Withdrawal Procedures" section above.

A nonrefundable \$50 program fee is required at the time of application. For an application and more information, visit the Leave of Absence (<http://www.colorado.edu/registrar/students/withdraw-cu/leave-of-absence>) webpage.

Undergraduate Leave of Absence

Undergraduate students can take a leave of absence from the university for up to two semesters (plus summer) without having to reapply to CU Boulder. Eligible degree-seeking undergraduate students may maintain certain university benefits while taking leave from the university. Some benefits (such as Recreation Center access and health insurance through Wardenburg Health Services) are only available for an additional fee. Signing up for these elective benefits requires submitting an application and a nonrefundable \$50 administrative fee.

For an application and more information, visit the Leave of Absence (<http://www.colorado.edu/registrar/students/withdraw-cu/leave-of-absence>) webpage.

Law Student Withdrawal and Leave of Absence

A law student who desires to voluntarily withdraw from the university and drop all classes during the first (fall) semester must reapply for readmission, may only be readmitted to resume in a subsequent fall semester, and shall receive no readmission preference. Students who withdraw after completing the fall semester but before beginning on the second (spring) semester, must reapply for admission, shall normally be expected to wait until the next spring semester to resume their studies, and shall receive admission preference only in the next regularly scheduled spring semester. Law students **must** apply for a leave of absence (<http://www.colorado.edu/registrar/students/withdraw-cu/leave-of-absence>) or will be discontinued from the university. Department and college approval is required on the application.

Active Duty

Students who are military personnel, fire fighters and police officers who are called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Active Duty (<http://www.colorado.edu/registrar/students/withdraw-cu/active-duty>) webpage.

Retroactive Withdrawal

In certain situations, colleges, schools and programs accept petitions for retroactive withdrawals from one or more completed semesters. Students must clearly demonstrate that they experienced extenuating circumstances beyond their control that prevented them from withdrawing by the established deadline (e.g., serious cases of injury). Such petitions require specific and detailed documentation from appropriate licensed professionals in order to be considered. Students who believe they have encountered life events that may make them

eligible for a retroactive withdrawal should meet with their academic advisor before taking any action.

Retroactive withdrawals are seldom granted, and the review process may take several months. For petitions that are approved, grades of W will be recorded for all classes taken in the semester, irrespective of the original grade. Students who must withdraw within a given term due to extenuating circumstances should review the Academic & Financial Considerations (<http://www.colorado.edu/registrar/students/withdraw-cu/considerations>) webpage. Withdrawing students who have received financial aid should review the Financial Aid Withdrawal Policy (<http://www.colorado.edu/financialaid/policies/financial-aid-withdrawal-policy>) webpage.

Research

Research and innovation at CU Boulder is changing the world. While CU Boulder researchers, faculty and staff lead the charge, this transformational work includes increasing collaborations with undergraduate and graduate students, postdocs, entrepreneurs, and government and industry partners.

At the heart of this focus are the diverse contributions of a wide range of world-class experts, working together in new and innovative ways to accelerate ideas through the entire innovation life cycle, from idea to impact.

Explore the diverse avenues through which CU Boulder innovators are crafting global change—and learn how you can participate.

Major Research & Innovation Services and Initiatives

Office of Contracts and Grants

The Office of Contracts and Grants (<http://www.colorado.edu/ocg>) (OCG) partners with faculty and staff to prepare and submit proposals, including budgets, for external research funding. OCG is authorized to negotiate and accept sponsored research agreements on behalf of the Regents, monitor and provide guidance throughout the life of an award, and ensure final project closeout.

Office of Research Integrity

The Office of Research Integrity (<http://www.colorado.edu/innovate/ori>) supports CU Boulder's commitment to scientific and ethical integrity, as well as academic excellence in all research activities with which our students, faculty and staff are associated.

Office of Animal Resources

The Office of Animal Resources (<http://www.colorado.edu/innovate/office-animal-resources-oar>) is a service center responsible for providing high quality animal care, veterinary care and support for the research and teaching missions of CU Boulder.

Office of Postdoctoral Affairs

The Office of Postdoctoral Affairs (<http://www.colorado.edu/postdoctoralaffairs>) enhances and supports postdoctoral training and career development, helps build a sense of community among postdocs, and serves as a resource to campus and affiliated national labs.

Research Development and Funding Opportunities

Research Development (<http://www.colorado.edu/innovate/fundingawards>) offers a variety of tools and resources to help faculty,

students and staff identify and develop opportunities for scholarly activities.

Office of Industry Collaboration

The Office of Industry Collaboration (<http://www.colorado.edu/industry>) promotes and supports synergistic opportunities for engagement between CU Boulder and industry and business, strengthening connections that provide benefits to partners, students and local, state and national economies.

Technology Transfer Office

The Technology Transfer Office (<http://www.colorado.edu/techtransfer>) (TTO) ensures that CU Boulder and UCCS's world-class research creates world-class impact, bringing together industry partners, entrepreneurs and investors to help researchers solve important problems and improve quality of life worldwide.

AeroSpace Ventures

The CU Boulder AeroSpace Ventures (<http://www.colorado.edu/aerospaceventures>) initiative creates a collaborative environment in which CU Boulder's aerospace engineering and earth and space science faculty, students and industrial researchers work together to solve complex problems that lead to new discoveries and innovations.

Grand Challenge

CU Boulder's response to the Grand Challenge (<http://www.colorado.edu/grandchallenges>), *Our Space. Our Future.*, fuses CU Boulder's unique strengths in earth, space and social sciences with new technologies and partners to address the pace and pattern of changes for our environment, our resources and our planet.

Innovation & Entrepreneurship

CU Boulder fosters an environment for innovative thinking and the entrepreneurship spirit, offering a variety of programs and resources (<http://www.colorado.edu/entrepreneurship>) developed to foster and support creative ideas for new initiatives. From academic programs and student groups to community-wide support, you will find the resources and people to help you develop and launch ideas.

Research Institutes

CU Boulder's 11 research institutes (<http://www.colorado.edu/research/research-institutes>) account for more than half of all sponsored research dollars at the university—and they employ some of the most productive researchers in the country. With more than 900 researchers, students and supporting staff, the institutes make a major contribution to the university's research and education missions as well as the local and area economy.

Research Centers

In addition to the large research institutes, there are nearly 90 research centers (<http://www.colorado.edu/research/research-centers>) housed within academic departments or as subsets of the research institutes themselves. They can be found in all fields of the university, including humanities and the arts, social sciences, natural sciences, engineering, business and law.

To learn more about our major research & innovation services and initiatives, visit the Research & Innovation Office (<http://www.colorado.edu/innovate>) webpage.

Student Affairs

Health & Wellness

Wardenburg Health Services

Wardenburg Health Services is the primary health care resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Wardenburg Health Services (<http://www.colorado.edu/health>).

Counseling and Psychiatric Services

Counseling and Psychiatric Services offers confidential, on-campus mental health and psychiatric services for a variety of concerns such as academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (<http://www.colorado.edu/health/counseling>).

Disability Services

Students with disabilities are one of the many groups that make up our campus community and a diverse community broadens our understanding and appreciation for the contributions of each individual. We provide leadership and guidance regarding accommodations and universal access, which requires a collaborative relationship among all members of the university community. To learn more, visit Disability Services (<http://www.colorado.edu/disabilityservices>).

Automatic Enrollment in Student Gold Health Insurance

Students registered for six or more undergraduate credit hours or one or more graduate credit hours will be automatically enrolled in CU's Student Gold Health Insurance Plan and charged the semester premium every fall unless the selection is changed by the semester deadline.

Exceptions to automatic enrollment: new summer students, non-degree seeking Continuing Education, Leave of Absence Program, Study Abroad, Evening MBA program, or exclusively Be Boulder Anywhere courses.

Students can add the Campus Care supplement to their existing health insurance for basic coverage on campus or waive both university plans by providing proof of health insurance by the semester deadline.

For more information, visit the Health Insurance Requirement (<http://www.colorado.edu/health/insurance/health-insurance>) webpage.

Note: Plans available through the health insurance marketplace meet CU's health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (<http://connectforhealthco.com>) website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (<https://www.healthcare.gov>) website.

Housing

Residence Halls

Living on campus in a university residence hall is considered an important part of student life. Over 7,000 students are accommodated in double rooms, multiple occupancy rooms, singles and apartments in 24 residence halls. All halls are coeducational and range in sizes from 100 to 500 students. Each fall the residence halls provide a new home for over

6,000 entering freshmen. Subject to the availability of space, all freshmen are required to live in a residence hall for two academic semesters (a summer term does not count as an academic semester), unless they are married or live with parents and have permission to commute. Requests for permission to reside off campus for other reasons are considered on their merits, taking into account individual circumstances.

The residence halls provide a range of services and programs designed to support the intellectual, social and personal growth of single student residents. All residence halls, for example, offer tutoring services to residents at no cost. Additionally, a variety of academic and social programs are sponsored by residence hall and other university staff.

The residence hall dining service hours are planned to be convenient for most students' schedules. Campus Dining Services provides healthy food choices to diverse students which emphasizes convenience, value and variety. The dining program permits students (regardless of hall assignment) to eat in any residence hall dining center.

For more information about university housing options and/or permission to reside off campus, prospective students may contact:

Occupancy Management
Center for Community, Room S300
159 UCB
Boulder, CO 80309-0159
Email: studenthousing@colorado.edu

Application for Residence Hall Housing

New freshman and transfer students receive information from Housing & Dining Services about applying for housing after they have confirmed their intent to attend the university. Housing assignments are made on a first-come, first-assigned basis. The earlier applications are submitted, the better chance students have of being assigned to the residence hall of their preference. (Please note that Housing & Dining Services does not guarantee assignment to a particular building or program, type of accommodation or specific roommate.)

Note: Application for admission to the university and application for housing are two separate transactions. For information regarding admission notification and confirmation procedures, see the undergraduate Admissions (p. 97) section.

All housing contracts are for the full two-semester academic year or remainder thereof. An early termination of contract is subject to financial penalties as stated in the residence halls contract.

Housing Security Deposit

All students who live in the residence halls are required to pay a one-time security deposit of \$300 at the time of application. This security deposit is held by Housing & Dining Services and is released to the tuition and fee account within 60 days after the expiration of the housing contract. This deposit is forfeited by students who cancel after May 31, or students who do not live in the residence halls for the entirety of the housing contract period.

The security deposit required for housing is in addition to the confirmation deposit required for admission to the university.

Room and Board Rates per Semester

Residence hall room and board rates per person, per semester, for the 2017–18 academic year are:

Roommate(s) & community bath	\$6,999
Individual space & community bath	\$7,730
Roommate(s) & attached bath	\$7,730
Individual space & attached bath	\$7,950
Roommate(s) & apartment	\$8,088

A meal plan of 19 or 15 meals per week is included.

Off-Campus Housing

Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie's List, CU's rental database, on the Off-Campus Housing & Neighborhood Relations (<http://offcampushousing.colorado.edu>) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the spring semester, the office sponsors two off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (<http://offcampushousing.colorado.edu>) website or call 303-492-7053. Office hours are 8 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.

Note: First-year students must receive written permission from Housing & Dining Services before obtaining off-campus accommodations for the fall and spring semesters of their first year, as well as for the summer session preceding their fall start date.

The University of Colorado Children's Center provides child care for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing & Dining Services' website (<https://living.colorado.edu>) or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office

graduatefamilyhousing@colorado.edu

Student Conduct & Colorado Creed

Student Conduct Code

The purpose of the Office of Student Conduct and Conflict Resolution is to support community safety, student growth and success by helping students:

- Reflect on decisions
- Be accountable for their actions
- Make decisions in congruence with community standards of conduct

Clarification of Values

1. Students will have a greater understanding of the impact their decisions have on others.
2. Students will gain an understanding of the institutional values reflected through policies and practices.
3. Students will be able to identify ways in which they can make decisions in congruence with community standards of conduct.
4. Students will gain a better understanding of the importance of personal accountability and responsibility.
5. Students will be able to identify the harms caused by their decisions and determine the best method for repairing those harms.
6. Students will be able to reflect on their choices and develop individual goals for success.
7. Students will have a greater understanding of campus resources.

Authority

Article 7, Part B, of the Laws of the Regents requires each campus to develop a student code of conduct. The Office of Student Conduct is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the vice chancellor for student affairs or his/her designee for final determination. Questions regarding behavioral problems should be directed to:

Office of Student Conduct
University of Colorado Boulder, 10 UCB
Boulder, CO 80309
Phone: 303-492-5550

Jurisdiction

This policy governs:

- Student conduct that occurs on or as it relates to university property, or at official functions and university-sponsored programs conducted away from the campus. University property is denied as land, buildings and facilities in possession of or owned, used or controlled by the university or funded by university budgets.
- Student conduct that occurs off university property is subject to this policy if it: (1) adversely affects the health, safety or security of any member of the university community or the mission of the university; or (2) involves any records or documents of the university. For purposes of this policy, the university's mission is broadly denied to include both its academic goals and the importance of developing civic responsibility in its students.

Student Conduct Process

Informal Resolution

- This process may generally include, but is not limited to, a meeting with a conduct officer, completion of the agreement, and/or participation in the Restorative Justice program as is referenced in H.5.

- During the meeting, if the conduct officer determines that the informal resolution process may be appropriate, the conduct officer will offer it as an option to the student and address any questions the student may have about the process. If the student accepts responsibility for the alleged prohibited conduct and agrees to and completes the agreement developed during the meeting, then the OSC will consider the matter to be resolved informally.

Formal Resolution

- This process generally includes written notice of the factual allegations and alleged violations of the Student Conduct Code, the opportunity to meet with the conduct officer to address the allegations and provide information to the conduct officer, the conduct officer reviewing the allegations and making factual and violation determinations based on the preponderance of the evidence, and written notice to the student of the conduct officer's determinations.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing and Dining Services staff. For more information, visit the Residence Hall Handbook (<https://housing.colorado.edu/policies-procedures/residence-hall-handbook>) webpage.

Proceedings initiated under this policy are separate from civil or criminal proceedings that may relate to the same incident. Investigations or conduct proceedings by the university are not postponed while criminal or civil proceedings are pending, unless otherwise determined by the conduct officer.

The unexcused failure of a student to appear and/or respond to the conduct process does not prevent the university from proceeding with the conduct process.

Cases involving sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment and any related retaliation are subject to the Office of Institutional Equity and Compliance policies. For more information, visit the Office of Institutional Equity and Compliance (<http://www.colorado.edu/institutionalequity>) website or call 303-492-2127.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about classroom behavior, see the following website: www.colorado.edu/policies/classbehavior.html (<http://www.colorado.edu/policies/classbehavior.html>).

Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.

- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (<http://www.colorado.edu/creed>) website.

Student Resources

Students can take advantage of many on-campus resources, from Career Services to the Office of Diversity, Equity, and Community Engagement to Wardenburg Health Services. Visit the Division of Student Affairs (<http://www.colorado.edu/studentaffairs>) to learn more.

Student Data Privacy

Annual Notice to Students

The University of Colorado complies fully with the provisions of the Family Educational Rights and Privacy Act (FERPA) of 1974. The act was designed to protect the privacy of student education records, to establish the right of students to inspect and review their education records and the right to request an amendment or correction.

University guidelines explain procedures to be used by the institution for compliance with the provisions of the act. For more information, visit The Family Educational Rights and Privacy Act (FERPA) (<http://www.colorado.edu/registrar/students/records/ferpa>) webpage or contact the Office of the Registrar.

Students wishing to review their education records must schedule an appointment with the Office of the Registrar and present proper identification. All other records inquiries must be directed to the appropriate office, e.g., Office of Financial Aid, Bursar's Office, etc.

Students may not inspect the following, as outlined by the act: financial information submitted by their parents, confidential letters that they have waived their rights to review or education records containing information about other students, in which case the institution will permit access only to that part of the record that pertains to the inquiring student. Records that may be inspected include admissions, academic and financial aid files and cooperative education and placement records. Students may access many records directly via the MyCUInfo portal.

The Family Educational Rights and Privacy Act affords students certain rights with respect to their education records. They are:

1. The right to inspect and review education records within 45 days of the day the university receives their request for access.
2. The right to request amendment of education records that they believe are inaccurate or misleading.
3. The right to consent to disclosure of personally identifiable information contained in their education records, except to the extent that FERPA authorizes disclosure without consent.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the university to comply with the requirements of FERPA.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name
- student address (including designated local, mailing and home)
- local telephone number (not those defined as home or cell)
- campus email address
- dates of attendance
- enrollment status (e.g., full-time or part-time)
- class (e.g., freshman, sophomore)
- school/college/program or division of enrollment
- previous educational institutions attended
- major/minor fields of study
- university-recognized honors and awards, and degrees, honors or awards applied for or conferred (e.g., certificates, thesis and dissertation titles) and dates conferred
- participation in officially recognized activities/sports, including height and weight of athletes
- student employment status (e.g., teaching assistant, GPTI, resident advisor, work-study, tutor or other) and positions held at the university and dates of employment, as well as GPTI/teaching assistant Faculty Course Questionnaire (FCQ) ratings
- College Opportunity Fund application and authorization status
- expected date of completion in enrolled course of study
- student photo

Such information may be disclosed by the institution at its discretion, unless the student has explicitly requested in writing that it not be released.

Withholding Directory Information

Students have the right to withhold directory information from inquirers. To restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Confidential Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in MyCUInfo. The Privacy Settings (<http://www.colorado.edu/registrar/students/records/privacy>) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the

student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Tuition Classification

In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. The University of Colorado does not have discretion to make exceptions to the rules as established by state law.

New students are classified as in-state or out-of-state residents for tuition purposes on the basis of information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to in-state status must submit a petition with documentation in order to have their status reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes and Office of the Registrar contact information are available on the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency>) webpage.

Basic Requirement for Establishing Colorado Residency

To become eligible for in-state residency, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits. An individual who seeks to establish domicile while registered as a student is presumed to establish Colorado domicile solely for tuition purposes unless there is clear and convincing evidence to the contrary.

Colorado in-state tuition classification requires Colorado domicile for 12 consecutive months. A person must be 22 years of age or older, married, a graduate student or an emancipated minor in order to begin the 12-month period of establishing domicile in Colorado. Unemancipated minors qualify for in-state status if their parents have been domiciled in Colorado for at least one year.

Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following may be considered evidence of domicile:

- filing a tax return in Colorado and, if applicable, payment of Colorado state income tax

- Colorado driver's license or Colorado ID card
- Colorado vehicle registration
- voter registration in Colorado
- graduation from a Colorado high school
- lease or deed showing permanent occupancy of residential real property in Colorado
- continued residence in Colorado while not enrolled as a student and during semester breaks
- permanent employment or acceptance of future employment in Colorado
- any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, but individuals should take action on any factors that are appropriate in their circumstance.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement:

- Colorado National Guard members
- active duty military stationed in Colorado and their dependents in certain circumstances
- honorably discharged members of the U.S. Armed Forces and their dependents in certain circumstances
- returning active-duty military members
- Canadian military stationed in Colorado
- ASSET students with three years of Colorado high school and graduation
- children of new faculty members at Colorado state colleges and universities
- employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- plus others (see Exceptions to One-Year Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions>) webpage)

Requirements, including spouse and child eligibility, are detailed on the Exceptions to One-Year Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions>) webpage.

Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation

An emancipated minor is someone under age 23 who demonstrates total financial and residential independence. This means the student's parents have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation

is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who give false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

For more information on all requirements, see the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency>) webpage.

University Policies Alcohol & Other Drugs Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (<http://www.colorado.edu/aod>) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** *A Guide to Residence Hall Living*, available at the Department of Housing. Contact Residence Life, 303-492-7260. See also the Residence Hall Handbook (<https://housing.colorado.edu/resources-tips-policies-procedures/residence-hall-handbook>) webpage.
- **Student Conduct Code:** *Students' Rights and Responsibilities Regarding Standards of Conduct and Alcohol and Drug Policy*, available in the Office of Student Conduct, 303-492-5550. See also the Student Conduct Code Policies & Procedures (<http://www.colorado.edu/osccr/node/33/attachment>) handbook.
- **Safety:** Annual Security and Fire Safety Report (<http://www.colorado.edu/clery>).
- **Student life:** *The Guide to Student Life*, distributed to new and continuing students. Resources available on CU Boulder's Students (<http://www.colorado.edu/students>) webpage.

Individual and group counseling for students with substance abuse concerns is available through the Counseling and Psychiatric Services department of Wardenburg Health Services. For more information, visit the Counseling and Psychiatric Services (<http://www.colorado.edu/health/counseling>) webpage or call 303-492-5654 (CAPS at Wardenburg) or 303-492-6766 (CAPS at C4C).

Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

Campus Safety

Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive (at the start of the fall semester) information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (<http://www.colorado.edu/clery>). In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the University Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Other resources include the Office of Student Conduct at 303-492-5550, the Ombuds Office at 303-492-5077, and the CU Boulder Alcohol and Other Drugs Program at 303-492-5703.

Additional safety information can be found on the CU Police Department (<http://www.colorado.edu/police>) website and the Safety Website (<http://www.colorado.edu/safety>). For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@<https://twitter.com/cuboulderpolice>) and Facebook (CUBoulderPolice (<https://www.facebook.com/CUBoulderPolice>)).

Communication

Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (<http://www.colorado.edu/policies/student-e-mail-policy>) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology's Messaging and Collaboration (<http://www.colorado.edu/oit/services/messaging-collaboration>) webpage.

Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (<http://www.colorado.edu/libraries/copyright-information>) website.

Diversity & Nondiscrimination

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal opportunity to all students and employees.

Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

"At the University of Colorado Boulder we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not

limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly."

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the *Guidelines for Diversity Planning*

Institutional Equity and Compliance, Office of

The University of Colorado Boulder is committed to maintaining a positive learning, working and living environment and does not discriminate on the basis of race, color, national origin, pregnancy, sex, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy. The Office of Institutional Equity and Compliance investigates all claims alleging sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff or faculty pursuant to the University of Colorado Sexual Misconduct Policy, the University of Colorado Boulder Policy on Discrimination and Harassment, and the University of Colorado Policy on Amorous Relationships. Investigations are conducted by neutral fact-finders who treat all parties involved with respect and dignity and refer them to appropriate support services as needed. The University is committed to taking appropriate action against those who violate these policies.

The Office of Institutional Equity and Compliance also provides directly, or assists with the coordination of, educational workshops and trainings for all members of our community designed to promote an inclusive environment and to prevent acts of discrimination, harassment or sexual misconduct.

For more information or copies of the policies and procedures, or to report an allegation of sexual misconduct or protected class discrimination or harassment, please visit the Office of Institutional Equity and Compliance (<http://www.colorado.edu/institutionalequity>) website or call 303-492-2127.

PhD, Columbia University In the City of New York

Adler, Patricia A.
Professor Emeritus: Sociology
PhD, University of California, San Diego

Afridi, Khurram (https://experts.colorado.edu/display/fisid_153814)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Massachusetts Institute of Technology

Ahmed, Alaa Abdalla (https://experts.colorado.edu/display/fisid_144736)
Associate Professor: Integrative Physiology; Associate Professor: Mechanical Engineering
PhD, University of Michigan Ann Arbor

Ahmed, Nisar Razzi (https://experts.colorado.edu/display/fisid_153237)
Assistant Professor: Aerospace Engineering Sciences; Assistant Professor: Research & Engineering Ctr for Unmanned Vehicles (RECUV)
PhD, Cornell University

Ahn, Natalie (https://experts.colorado.edu/display/fisid_106044)
Professor: Chemistry and Biochemistry
PhD, University of California-Berkeley

Aiken, Ellen (https://experts.colorado.edu/display/fisid_103974)
Instructor: Sewall RAP
PhD, University of Colorado Boulder

- Akos, Dennis M. (https://experts.colorado.edu/display/fisid_131119)
Associate Professor: Aerospace Engineering Sciences; Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Ohio University
- Albert, Michelle A. (https://experts.colorado.edu/display/fisid_134708)
Senior Instructor: Program for Writing and Rhetoric
MFA, Naropa Institute
- Aldama, Arturo James (https://experts.colorado.edu/display/fisid_130739)
Associate Professor, Assoc Chair: Ethnic Studies
PhD, University of California-Berkeley
- Alexander, Katherine Laura Bos (https://experts.colorado.edu/display/fisid_157674)
Assistant Professor: Asian Languages and Civilizations
PhD, University of Chicago
- Alhadeff, Albert (https://experts.colorado.edu/display/fisid_100711)
Associate Professor: Art and Art History
PhD, New York University
- Ali, Aun H (https://experts.colorado.edu/display/fisid_155948)
Assistant Professor: Religious Studies
PhD, McGill Univ (Canada)
- Allen, David Lehigh (https://experts.colorado.edu/display/fisid_114466)
Senior Instructor: Psychology and Neuroscience; Lecturer: Continuing Education & Professional Studies
PhD, University of California-Los Angeles
- Alpern, Herbert P.
Professor Emeritus: Psychology and Neuroscience
- Alpern, Tyler J (https://experts.colorado.edu/display/fisid_115381)
Senior Instructor: Libby Arts RAP
- Amadei, Bernard (https://experts.colorado.edu/display/fisid_105978)
Professor: Civil, Environmental and Architectural Engineering
PhD, University of California-Berkeley
- Ambrose, Kirk T (https://experts.colorado.edu/display/fisid_115914)
Professor, Chair: Art and Art History; Professor: Classics; Professor: Critical Media Practices
PhD, University of Michigan Ann Arbor
- Amerika, Mark (https://experts.colorado.edu/display/fisid_116523)
Professor: Art and Art History; Faculty Director, Professor: Intermedia Art, Writing and Performance
MFA, Brown University
- Amy, Gary L.
Professor Emeritus: Civil, Environmental and Architectural Engineering
- Anderman, Elizabeth (https://experts.colorado.edu/display/fisid_144257)
Instructor, Assoc Faculty Director: Farrand RAP
- Anderson, Dana Z (https://experts.colorado.edu/display/fisid_102371)
Professor: Physics; Professor: Electrical, Computer and Energy Engineering (ECEE); Faculty Director: JILA
PhD, University of Arizona
- Anderson, Fred W (https://experts.colorado.edu/display/fisid_104273)
Professor: History
PhD, Harvard University
- Anderson, Kenneth M (https://experts.colorado.edu/display/fisid_113566)
Professor: Computer Science; Faculty Director, Professor: Information Science; Associate Dean: College of Engineering and Applied Science
PhD, University of California-Irvine
- Anderson, Robert S (https://experts.colorado.edu/display/fisid_130117)
Distinguished Professor: Geological Sciences
PhD, University of Washington
- Anderson, Ronald
Professor Emeritus: School of Education
- Anderson, Suzanne Prestrud (https://experts.colorado.edu/display/fisid_131099)
Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor: Geography
PhD, University of California-Berkeley
- Anderson, Virginia D (https://experts.colorado.edu/display/fisid_100365)
Professor: History
PhD, Harvard University
- Andersson, Krister Par (https://experts.colorado.edu/display/fisid_140076)
Professor: Institute of Behavioral Science (IBS); Professor: Political Science
PhD, Indiana University Bloomington
- Andrew, Julie Ann (https://experts.colorado.edu/display/fisid_148635)
Instructor: School of Education
MEd, Univ of New South Wales (Australia)
- Andrews, John T.
Professor Emeritus: Geological Sciences
- Andrews, Thomas G (https://experts.colorado.edu/display/fisid_149881)
Professor: History
PhD, University of Wisconsin-Madison
- Anseth, Kristi S (https://experts.colorado.edu/display/fisid_103471)
Distinguished Professor: Chemical and Biological Engineering; Distinguished Professor: Molecular, Cellular & Developmental Biology (MCDB); Distinguished Professor: Chemistry and Biochemistry
PhD, University of Colorado Boulder
- Antman, Francisca Marie (https://experts.colorado.edu/display/fisid_144606)
Associate Professor: Economics
PhD, Stanford University
- Appenzeller, William
Professor Emeritus: Leeds School of Business
- Arch, Joanna Jennifer (https://experts.colorado.edu/display/fisid_147415)
Assistant Professor: Psychology and Neuroscience
PhD, University of California-Los Angeles

Ardizzoni, Michela (https://experts.colorado.edu/display/fisid_145152)
Assistant Professor: French & Italian
PhD, Indiana University Bloomington

Arehart, Kathryn H (https://experts.colorado.edu/display/fisid_105561)
Professor: Speech, Language and Hearing Sciences (SLHS)
PhD, University of Washington

Argrow, Brian M (https://experts.colorado.edu/display/fisid_102860)
Professor: Aerospace Engineering Sciences; Professor: Research & Engineering Ctr for Unmanned Vehicles (RECUV)
PhD, University of Oklahoma Norman Campus

Arias, Ernesto G.
Professor Emeritus: Environmental Design

Arima, Yoshie (https://experts.colorado.edu/display/fisid_147528)
Instructor: Asian Languages and Civilizations
MA, University of Colorado Boulder

Armitage, Philip J (https://experts.colorado.edu/display/fisid_124718)
Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Cambridge (England)

Armstrong, David M.
Professor Emeritus: Ecology and Evolutionary Biology

Ashby, Neil
Professor Emeritus: Physics

Ashcraft, Karen Lee (https://experts.colorado.edu/display/fisid_147453)
Professor: Communication; Professor: Communication & Society RAP
PhD, University of Colorado Boulder

Asirvatham, Margaret (https://experts.colorado.edu/display/fisid_103670)
Senior Instructor: Chemistry and Biochemistry
PhD, Kansas State University of Agriculture and App Sci

Atkinson, William W. Jr
Professor Emeritus: Geological Sciences

Atnally, Diane L (https://experts.colorado.edu/display/fisid_113062)
Associate Professor: Classics
PhD, University of Michigan Ann Arbor

Atteberry, Allison (https://experts.colorado.edu/display/fisid_154598)
Assistant Professor: School of Education
PhD, Stanford University

Attwa, Mona Farrag (https://experts.colorado.edu/display/fisid_155976)
Instructor: Asian Languages and Civilizations
MA, American Univ In Cairo (Egypt)

Auguste, Reece Luke (https://experts.colorado.edu/display/fisid_149596)
Assistant Professor: Critical Media Practices
PhD, Univ of Nottingham (England)

Austin, James R (https://experts.colorado.edu/display/fisid_103455)
Professor: Music Education; Professor, Associate Dean: Music
PhD, University of Iowa

Auvinen, Karen Marie (https://experts.colorado.edu/display/fisid_106065)
Lecturer: Continuing Education & Professional Studies; Instructor: Libby Arts RAP

Avery, James
Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)

Axelrad, Penina (https://experts.colorado.edu/display/fisid_100792)
Professor, Chair: Aerospace Engineering Sciences
PhD, Stanford University

Aydin, Aysegul (https://experts.colorado.edu/display/fisid_143789)
Associate Professor: Political Science
PhD, SUNY at Binghamton

Ayres, Thomas R (https://experts.colorado.edu/display/fisid_100090)
Research Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Colorado Boulder

B

Babicz, Martin Charles (https://experts.colorado.edu/display/fisid_147676)
Instructor: History; Instructor: Libby Arts RAP; Instructor: Communication & Society RAP; Instructor: Sewall RAP

Bachtell, Ryan Karn (https://experts.colorado.edu/display/fisid_146084)
Associate Professor: Psychology and Neuroscience
PhD, Oregon Health Science University

Baena, Julio (https://experts.colorado.edu/display/fisid_101497)
Professor: Spanish and Portuguese
PhD, Georgetown University

Baggett, Lawrence W.
Professor Emeritus: Mathematics

Bailey, Dominic T. J. (https://experts.colorado.edu/display/fisid_145110)
Associate Professor: Philosophy; Associate Professor: Classics
PhD, University of Cambridge (England)

Bailey, Wendy Lynn (https://experts.colorado.edu/display/fisid_154942)
Instructor: Lockheed Martin Engineering Management Program

Bailey Mollborn, Stefanie Faun (https://experts.colorado.edu/display/fisid_142921)
Associate Professor: Institute of Behavioral Science (IBS); Associate Professor: Sociology
PhD, Stanford University

Baird, Vanessa Anne (https://experts.colorado.edu/display/fisid_115297)
Associate Professor: Political Science
PhD, University of Houston-University Park

Baker, Andrew B. (https://experts.colorado.edu/display/fisid_144377)
Associate Professor: Political Science
PhD, University of Wisconsin-Madison

Baker, Daniel N (https://experts.colorado.edu/display/fisid_103264)
Distinguished Professor: Astrophysical and Planetary Sciences (APS); Distinguished Professor: Physics
PhD, University of Iowa

- Baker, Donald C.
Professor Emeritus: English
- Balaji, Rajagopalan (https://experts.colorado.edu/display/fisid_118480)
Professor, Chair: Civil, Environmental and Architectural Engineering
PhD, Utah State University
- Balch, Jennifer Kakareka (https://experts.colorado.edu/display/fisid_154464)
Faculty Director, Assistant Professor: Geography
PhD, Yale University
- Balkin, David B (https://experts.colorado.edu/display/fisid_105481)
Professor: Leeds School of Business
PhD, University of Minnesota Twin Cities
- Ball, L. Duane
Professor Emeritus: Civil, Environmental and Architectural Engineering
- Ballantine, John T (https://experts.colorado.edu/display/fisid_102703)
Senior Instructor: Leeds School of Business
JD, University of Colorado Boulder
- Bally, John (https://experts.colorado.edu/display/fisid_105710)
Professor: Astrophysical and Planetary Sciences (APS); Professor: Center for Astrophysics & Space Astronomy (CASA)
PhD, University of Massachusetts at Amherst
- Bamforth, Douglas (https://experts.colorado.edu/display/fisid_101027)
Professor: Sewall RAP; Chair: Anthropology
PhD, University of California-Santa Barbara
- Banasiak, Meredith A (https://experts.colorado.edu/display/fisid_144267)
Senior Instructor Adjunct: Environmental Design
MArch, Arizona State University
- Bangs, F. Kendrick
Professor Emeritus: Leeds School of Business
- Banich, Marie (https://experts.colorado.edu/display/fisid_120646)
Professor: Psychology and Neuroscience; Professor: Institute of Cognitive Science (ICS)
PhD, University of Chicago
- Baranov, Oleg Valeryevich (https://experts.colorado.edu/display/fisid_149617)
Assistant Professor: Economics
PhD, University of Maryland College Park Campus
- Barchilon, Jacques
Professor Emeritus: French & Italian
- Barger, Nichole Nannette (https://experts.colorado.edu/display/fisid_131398)
Associate Professor: Ecology and Evolutionary Biology
PhD, Colorado State University
- Barham, Tania C.J. (https://experts.colorado.edu/display/fisid_140077)
Associate Professor: Institute of Behavioral Science (IBS); Associate Professor: Economics
PhD, University of California-Berkeley
- Barker, Lecia Jane (https://experts.colorado.edu/display/fisid_101367)
Assoc Chair: Information Science; Associate Professor: College of Media, Communication & Information
PhD, University of Colorado Boulder
- Barlow, Lisa K (https://experts.colorado.edu/display/fisid_100137)
Senior Instructor: Baker RAP
PhD, University of Colorado Boulder
- Barlow, Melinda B (https://experts.colorado.edu/display/fisid_109696)
Associate Professor: Film Studies
PhD, New York University
- Barnard, Holly Rene (https://experts.colorado.edu/display/fisid_147417)
Assistant Professor: Geography
PhD, Oregon State University
- Barnes, Frank S.
Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)
- Barrientos-Wood, Ruth M (https://experts.colorado.edu/display/fisid_117816)
Asst Research Professor: Psychology and Neuroscience
PhD, George Washington University
- Barry, Roger G.
Professor Emeritus: Geography
- Barth, Charles A.
Professor Emeritus: Astrophysical and Planetary Sciences (APS)
- Barth, Daniel (https://experts.colorado.edu/display/fisid_100820)
Professor: Psychology and Neuroscience
PhD, University of California-Los Angeles
- Bartlett, David
Professor Emeritus: Physics
- Bartlett, Jamie Lynn (https://experts.colorado.edu/display/fisid_156740)
Lecturer: Farrand RAP; Lecturer: Integrative Physiology; Lecturer: Honors RAP
- Barton, Taylor Wallis (https://experts.colorado.edu/display/fisid_157939)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE)
DSc, Massachusetts Institute of Technology
- Bartos, Otomar J.
Professor Emeritus: Sociology
- Basey, John M (https://experts.colorado.edu/display/fisid_105539)
Senior Instructor: Ecology and Evolutionary Biology
PhD, University of Nevada-Reno
- Bassoff, Bruce
Professor Emeritus: English
- Batey, Robert T. (https://experts.colorado.edu/display/fisid_122668)
Professor: Chemistry and Biochemistry
PhD, Massachusetts Institute of Technology
- Bauer, Amy (https://experts.colorado.edu/display/fisid_148723)
Instructor, Faculty Director: School of Law
JD, College of William and Mary

Bayard de Volo, Lorraine M. (https://experts.colorado.edu/display/fisid_143611)
Associate Professor, Associate Professor: Political Science; Faculty Director: Women and Gender Studies
PhD, University of Michigan Ann Arbor

Beagle, Chauncey M.
Professor Emeritus: Leeds School of Business

Beale, Paul D (https://experts.colorado.edu/display/fisid_101602)
Professor: Physics
PhD, Cornell University

Beamer, Charles Walter (https://experts.colorado.edu/display/fisid_151044)
Instructor, Faculty Director: Civil, Environmental and Architectural Engineering
PhD, University of Colorado Boulder

Bearce, David H. (https://experts.colorado.edu/display/fisid_147837)
Professor: Political Science; Professor: International Affairs Program
PhD, Ohio State University

Beaudry, Agnès (https://experts.colorado.edu/display/fisid_157677)
Assistant Professor: Mathematics
PhD, Northwestern University

Bebernes, Jerrold
Professor Emeritus: Applied Mathematics

Becher, Anne Helen (https://experts.colorado.edu/display/fisid_110035)
Senior Instructor: Spanish and Portuguese
MA, University of Colorado Boulder

Beck, Erik Richard (https://experts.colorado.edu/display/fisid_151172)
Instructor: Law Library
MS, University of Texas at Austin

Becker, Andreas (https://experts.colorado.edu/display/fisid_146675)
Associate Professor: Physics
Dr habil, Universite Laval (Canada)

Becker, Stephen R (https://experts.colorado.edu/display/fisid_154263)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE);
Assistant Professor: Applied Mathematics
PhD, California Institute of Technology

Bedard, Alfred J (https://experts.colorado.edu/display/fisid_100519)
Assoc Professor Adjunct: Integrated Teaching & Learning (ITL) Program

Beechy, Tiffany R. (https://experts.colorado.edu/display/fisid_149775)
Assistant Professor: English
PhD, University of Oregon

Beer, Francis A.
Professor Emeritus: Political Science

Begelman, Mitchell C (https://experts.colorado.edu/display/fisid_100446)
Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Cambridge (England)

Begley, Donna M (https://experts.colorado.edu/display/fisid_131000)
Senior Instructor: School of Education

Beitz, Michael D (https://experts.colorado.edu/display/fisid_156062)
Assistant Professor: Art and Art History
MFA, SUNY at Buffalo

Bekoff, Marc
Professor Emeritus: Ecology and Evolutionary Biology

Belknap, Joanne Elizabeth (https://experts.colorado.edu/display/fisid_113617)
Professor: Ethnic Studies; Professor: Sociology
PhD, Michigan State University

Bell, Alan
Professor Emeritus: Linguistics

Bell, Michael
Professor Emeritus: English

Bellucci, Justin T (https://experts.colorado.edu/display/fisid_147703)
Instructor: Environmental Design

Bennett, John Knox (https://experts.colorado.edu/display/fisid_116933)
Professor: Computer Science; Professor: Electrical, Computer and Energy Engineering (ECEE); Professor: Interdisciplinary Telecommunications
PhD, University of Washington

Bentley, Francoise Judith Benay (https://experts.colorado.edu/display/fisid_143307)
Lecturer: Continuing Education & Professional Studies

Berg, Margaret H (https://experts.colorado.edu/display/fisid_118371)
Associate Professor: Music Education
PhD, Northwestern University

Berggreen, Shu-Ling Chen (https://experts.colorado.edu/display/fisid_101636)
Associate Professor, Lecturer: Continuing Education & Professional Studies; Assoc Chair: Media Studies
PhD, University of Tennessee-Knoxville

Bergner, Bruce Alan (https://experts.colorado.edu/display/fisid_113315)
Associate Professor: Theatre and Dance
MFA, University of Illinois at Chicago

Bergquist, Marcelo R (https://experts.colorado.edu/display/fisid_144022)
Senior Instructor, Instructor Adjunct: Mechanical Engineering

Bernard, Jessica (https://experts.colorado.edu/display/fisid_153711)
Asst Professor Adjunct: Psychology and Neuroscience

Bernardini, Giulia (https://experts.colorado.edu/display/fisid_143777)
Instructor: Humanities; Instructor: Libby Arts RAP

Bernstein, Giora
Professor Emeritus: Music

Bernstein, Robin Miriam (https://experts.colorado.edu/display/fisid_152968)
Associate Professor: Institute of Behavioral Science (IBS); Associate Professor: Anthropology
PhD, University of Illinois at Urbana-Champaign

Bernthal, John Bradley (https://experts.colorado.edu/display/fisid_142379)

Associate Professor, Faculty Director: School of Law
JD, University of Colorado Boulder

Bernthal, Wilmar F.

Professor Emeritus: Leeds School of Business

Berry, J. Colleen (https://experts.colorado.edu/display/fisid_155491)

Instructor, Assoc Faculty Director: Center for Asian Studies
PhD, Indiana University Bloomington

Berta, Joseph E (https://experts.colorado.edu/display/fisid_101962)

Senior Instructor: Psychology and Neuroscience
PhD, University of Colorado Boulder

Bethancourt, Matthew Robert (https://experts.colorado.edu/display/fisid_156489)

Instructor, Faculty Director: ATLAS Institute
MFA, New School For Social Research

Betterton, Meredith D (https://experts.colorado.edu/display/fisid_125396)

Associate Professor: Physics; Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Harvard University

Beylkin, Gregory (https://experts.colorado.edu/display/fisid_100437)

Professor: Applied Mathematics
PhD, New York University

Bhagat, Sanjai (https://experts.colorado.edu/display/fisid_100789)

Professor: Leeds School of Business
PhD, University of Washington

Bhat, Yermal Sujeet (https://experts.colorado.edu/display/fisid_146506)

Instructor: Applied Mathematics
PhD, University of Florida

Bhattacharya, Atrayee (https://experts.colorado.edu/display/fisid_156320)

Instructor: Environmental Studies Program
PhD, Harvard University

Bickers, Kenneth Norman (https://experts.colorado.edu/display/fisid_130482)

Professor: Political Science; Faculty Director: College of Arts and Sciences
PhD, University of Wisconsin-Madison

Bickman, Martin (https://experts.colorado.edu/display/fisid_100230)

Professor: English
PhD, University of Pennsylvania

Bidwell Kovalev, Lorna Cinnamon (https://experts.colorado.edu/display/fisid_155117)

Asst Research Professor: Institute of Cognitive Science (ICS); Asst
Research Professor: Psychology and Neuroscience
PhD, University of Colorado Boulder

Bielefeldt, Angela R (https://experts.colorado.edu/display/fisid_110322)

Professor, Associate Professor, Lecturer: Civil, Environmental and Architectural Engineering; Faculty Director: College of Engineering and Applied Science
PhD, University of Washington

Bierbaum, Veronica (https://experts.colorado.edu/display/fisid_101124)

Professor: Chemistry and Biochemistry
PhD, University of Pittsburgh

Biernacki, Loriluai (https://experts.colorado.edu/display/fisid_115294)

Associate Professor, Assoc Chair: Religious Studies
PhD, University of Pennsylvania

Bilham, Roger G.

Professor Emeritus: Geological Sciences

Billingsley, Ronald

Professor Emeritus: English

Bird-Arvidsson, Jennifer (https://experts.colorado.edu/display/fisid_147651)

Associate Professor: Music
MM, University of Michigan Ann Arbor

Biringen, Sedat (https://experts.colorado.edu/display/fisid_105974)

Professor: Aerospace Engineering Sciences
DSc, Universite Libre de Bruxelles (Belgium)

Birkeland, Peter W.

Professor Emeritus: Geological Sciences

Birks, John W.

Professor Emeritus: Chemistry and Biochemistry

Black, John (https://experts.colorado.edu/display/fisid_126540)

Associate Professor: Computer Science; Associate Professor: Mathematics
PhD, University of California-Davis

Blair, Irene Verna (https://experts.colorado.edu/display/fisid_107261)

Professor, Assoc Chair: Psychology and Neuroscience
PhD, Yale University

Blanken, Peter David (https://experts.colorado.edu/display/fisid_114026)

Professor, Assoc Chair: Geography
PhD, Univ of British Columbia (Canada)

Blechman, Elaine A.

Professor Emeritus: Psychology and Neuroscience

Bliss, Anne

Professor Emeritus: Program for Writing and Rhetoric

Bloom, Bernard L.

Professor Emeritus: Psychology and Neuroscience

Bloom, Frederic M. (https://experts.colorado.edu/display/fisid_151709)

Professor, Associate Dean: School of Law
JD, Stanford University

Bloomfield, Elisabeth Marie Arnould (https://experts.colorado.edu/display/fisid_125576)

Associate Professor: French & Italian
PhD, University of California-San Diego

Blum, Arielle Melissa (https://experts.colorado.edu/display/fisid_154695)

Lecturer, Instructor: College of Engineering and Applied Science
MS, University of Colorado Boulder

- Blumenthal, Thomas (https://experts.colorado.edu/display/fisid_143346)
Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Johns Hopkins University
- Boardman, Alison Gould (https://experts.colorado.edu/display/fisid_141887)
Asst Research Professor: School of Education
PhD, University of Texas at Austin
- Boardman, Arthur M.
Professor Emeritus: English
- Boardman, Jason D (https://experts.colorado.edu/display/fisid_125577)
Professor: Sociology; Professor: Institute of Behavioral Science (IBS)
PhD, University of Texas at Austin
- Bock, Carl L E.
Professor Emeritus: Ecology and Evolutionary Biology
- Bock, Jane H.
Professor Emeritus: Ecology and Evolutionary Biology
- Boese, Elizabeth Sugar (https://experts.colorado.edu/display/fisid_154230)
Instructor: Computer Science
MS, Colorado State University
- Bohn, John (https://experts.colorado.edu/display/fisid_111716)
Research Professor: JILA
PhD, University of Chicago
- Boileau, Martin (https://experts.colorado.edu/display/fisid_113872)
Professor, Assoc Chair: Economics
PhD, Queen's Univ, Kingston (Canada)
- Bolton, Daniel Ryan (https://experts.colorado.edu/display/fisid_155168)
Instructor: Physics
PhD, University of Washington
- Bonde, Erik K.
Professor Emeritus: Ecology and Evolutionary Biology
- Bonjack, Stephanie Marie (https://experts.colorado.edu/display/fisid_156290)
Assistant Professor: University Libraries
MM, Northwestern University
- Boonin, David Isaac (https://experts.colorado.edu/display/fisid_113100)
Professor: Philosophy
PhD, University of Pittsburgh
- Boonin, Leonard
Professor Emeritus: Philosophy
- Boord, Daniel Olin (https://experts.colorado.edu/display/fisid_134649)
Professor, Chair: Critical Media Practices
MFA, University of California-San Diego
- Borden, Mark A (https://experts.colorado.edu/display/fisid_148514)
Associate Professor: Mechanical Engineering
PhD, University of California-Davis
- Boromisza-Habashi, David (https://experts.colorado.edu/display/fisid_145833)
Associate Professor: Communication
PhD, University of Massachusetts at Amherst
- Bortz, David Matthew (https://experts.colorado.edu/display/fisid_143348)
Associate Professor: Applied Mathematics
PhD, North Carolina State University at Raleigh
- Borum, John Owen (https://experts.colorado.edu/display/fisid_147714)
Instructor: Leeds School of Business
JD, University of Colorado Boulder
- Boss, Russel Wayne (https://experts.colorado.edu/display/fisid_105260)
Professor: Leeds School of Business
PhD, University of Georgia
- Boswell, Robert E (https://experts.colorado.edu/display/fisid_100196)
Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of Colorado Boulder
- Boulding, Carew Elizabeth (https://experts.colorado.edu/display/fisid_144417)
Associate Professor: Political Science
PhD, University of California-San Diego
- Bourne, Lyle E. Jr
Professor Emeritus: Psychology and Neuroscience
- Bowen, Scarlet (https://experts.colorado.edu/display/fisid_130905)
Lecturer: Women and Gender Studies
PhD, University of Texas at Austin
- Bowers, John Waite
Professor Emeritus: College of Media, Communication & Information;
Professor Emeritus: Communication
- Bowers, M Deane (https://experts.colorado.edu/display/fisid_101746)
Professor: University of Colorado Museum of Natural History; Professor,
Chair: Ecology and Evolutionary Biology
PhD, University of Massachusetts at Amherst
- Bowman, Christopher (https://experts.colorado.edu/display/fisid_102043)
Distinguished Professor, Faculty Director, Assoc Faculty Director: College
of Engineering and Applied Science; Professor: Chemical and Biological
Engineering
PhD, Purdue University
- Bowman, William D (https://experts.colorado.edu/display/fisid_105191)
Professor, Assoc Chair, Faculty Director: Institute of Arctic & Alpine
Research (INSTAAR); Professor: Ecology and Evolutionary Biology
PhD, Duke University
- Boyd, Samuel L (https://experts.colorado.edu/display/fisid_155484)
Assistant Professor: Religious Studies
- Boyd, William C. (https://experts.colorado.edu/display/fisid_146086)
Professor, Faculty Director, Associate Professor: School of Law; Faculty
Director: Renewable & Sustainable Energy Institute (RASEI)
PhD, University of California-Berkeley

Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562)
Associate Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Associate Professor: Environmental Studies Program
PhD, University of California-Santa Cruz

Bozic, Christy L (https://experts.colorado.edu/display/fisid_155482)
Scholar In Residence, Assoc Faculty Director, Lecturer: Lockheed Martin Engineering Management Program
PhD, Purdue University

Bradley, Adam Francis (https://experts.colorado.edu/display/fisid_147509)
Associate Professor, Faculty Director: English
PhD, Harvard University

Bradley, Elizabeth (https://experts.colorado.edu/display/fisid_100546)
Professor: Computer Science; Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Massachusetts Institute of Technology

Bradley, William C.
Professor Emeritus: Geological Sciences

Braider, Christopher (https://experts.colorado.edu/display/fisid_100300)
Professor, Assoc Chair: French & Italian
PhD, Trinity College, Dublin (Ireland)

Brain, David A (https://experts.colorado.edu/display/fisid_149098)
Assistant Professor: Laboratory for Atmospheric and Space Physics (LASP); Assistant Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Colorado Boulder

Branch, Melvyn C.
Professor Emeritus: Mechanical Engineering

Brandemuehl, Michael J.
Professor Emeritus: Civil, Environmental and Architectural Engineering

Brandenburg, Axel (https://experts.colorado.edu/display/fisid_156552)
Scholar In Residence: Laboratory for Atmospheric and Space Physics (LASP)

Brasseur, James Gordon (https://experts.colorado.edu/display/fisid_156801)
Research Professor: Aerospace Engineering Sciences
PhD, Stanford University

Bredeson, Garrett Zantow (https://experts.colorado.edu/display/fisid_154933)
Instructor: Philosophy

Breed, Michael D (https://experts.colorado.edu/display/fisid_103631)
Professor: Ecology and Evolutionary Biology; Faculty Director: College of Arts and Sciences; Faculty Director: Baker RAP
PhD, University of Kansas

Brennan, Christine (https://experts.colorado.edu/display/fisid_155861)
Assistant Professor: Speech, Language and Hearing Sciences (SLHS)
PhD, Northwestern University

Briggs, Derek Christian Mauthner (https://experts.colorado.edu/display/fisid_129597)
Professor: School of Education
PhD, University of California-Berkeley

Bright, Victor Mark (https://experts.colorado.edu/display/fisid_112696)
Professor: Mechanical Engineering; Professor: Electrical, Computer and Energy Engineering (ECEE); Faculty Director: Office of the Vice Chancellor for Research; Faculty Director: College of Engineering and Applied Science
PhD, Georgia Institute of Technology

Brinkman, P. Delbert
Professor Emeritus: Journalism

Briscoe, Georgia K (https://experts.colorado.edu/display/fisid_105331)
Senior Instructor: School of Law
MA, University of Michigan Ann Arbor

Brody, James M (https://experts.colorado.edu/display/fisid_101948)
Associate Professor: Music
MM, Indiana University Bloomington

Broersma, Leslee (https://experts.colorado.edu/display/fisid_112749)
Senior Instructor: Libby Arts RAP
MFA, University of Colorado Boulder

Bronstein, Albert
Instructor: Mathematics
PhD, University of Kentucky Lexington

Brower, Timothy L (https://experts.colorado.edu/display/fisid_147553)
Senior Instructor: Mechanical Engineering; Faculty Director: College of Engineering and Applied Science
PhD, Colorado State University

Brown, Benjamin P (https://experts.colorado.edu/display/fisid_153758)
Assistant Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Colorado Boulder

Brown, David S (https://experts.colorado.edu/display/fisid_110166)
Professor, Chair: Political Science
PhD, University of California-Los Angeles

Brown, Derek Philip (https://experts.colorado.edu/display/fisid_150027)
Instructor: Atmospheric and Oceanic Sciences (ATOC)
PhD, University of Colorado Boulder

Brown, Esther Lynn (https://experts.colorado.edu/display/fisid_129298)
Associate Professor: Spanish and Portuguese
PhD, University of New Mexico

Brown, Gordon E.
Professor Emeritus: Mathematics

Brown, Hank
Professor Emeritus: Political Science

Brown, Janice Carole (https://experts.colorado.edu/display/fisid_143612)
Professor: Asian Languages and Civilizations
PhD, Univ of British Columbia (Canada)

Brown, Marilyn Ruth (https://experts.colorado.edu/display/fisid_143782)
Professor: Art and Art History
PhD, Yale University

Brown, Matthew C (https://experts.colorado.edu/display/fisid_107370)
Instructor: Sociology; Instructor: Health Professions RAP
PhD, University of Colorado Boulder

- Brown, Timothy X (https://experts.colorado.edu/display/fisid_107534)
Professor: Electrical, Computer and Energy Engineering (ECEE); Professor: Computer Science
PhD, California Institute of Technology
- Browne, Eleanor Carol (https://experts.colorado.edu/display/fisid_156464)
Assistant Professor: Chemistry and Biochemistry
PhD, University of California-Berkeley
- Browne, Jeffrey William (https://experts.colorado.edu/display/fisid_153439)
Instructor: Journalism
MEd, University of Florida
- Brubaker, Jed Richards (https://experts.colorado.edu/display/fisid_156193)
Assistant Professor: Computer Science; Assistant Professor: Information Science
PhD, University of California-Irvine
- Bruce, Scott (https://experts.colorado.edu/display/fisid_122945)
Professor: History; Professor: Classics; Faculty Director: Center for Medieval and Early Modern Studies
PhD, Princeton University
- Brunner, Ronald D.
Professor Emeritus: Political Science
- Bruns, Steven M (https://experts.colorado.edu/display/fisid_103483)
Associate Professor, Associate Dean: Music
PhD, University of Wisconsin-Madison
- Bryan, Angela (https://experts.colorado.edu/display/fisid_115216)
Professor: Psychology and Neuroscience
PhD, Arizona State University
- Bryan, Joseph Henry (https://experts.colorado.edu/display/fisid_145802)
Associate Professor: Geography
PhD, University of California-Berkeley
- Bryant, Stephanie J (https://experts.colorado.edu/display/fisid_111810)
Associate Professor: Chemical and Biological Engineering
PhD, University of Colorado Boulder
- Brylowe, Thora (https://experts.colorado.edu/display/fisid_156063)
Assistant Professor: English
PhD, Carnegie Mellon University
- Buchanan, Angela S (https://experts.colorado.edu/display/fisid_122671)
Lecturer: Student Academic Services Center; Lecturer: Continuing Education & Professional Studies
MA, Ball State University
- Buchman, Thomas A.
Professor Emeritus: Leeds School of Business
PhD, University of Illinois
- Buchwald, Robert (https://experts.colorado.edu/display/fisid_148439)
Instructor, Lecturer: Student Academic Services Center; Assoc Faculty Director: Honors RAP
PhD, University of Colorado Boulder
- Budd, David A (https://experts.colorado.edu/display/fisid_101963)
Professor: Geological Sciences
PhD, University of Texas at Austin
- Buffington, Robert Marshall (https://experts.colorado.edu/display/fisid_144975)
Professor, Assoc Chair: Women and Gender Studies
PhD, University of Arizona
- Bullington, Sam N (https://experts.colorado.edu/display/fisid_152528)
Instructor: Women and Gender Studies; Lecturer: School of Education
- Burger, Douglas A.
Professor Emeritus: English
- Burger, Eric B (https://experts.colorado.edu/display/fisid_143577)
Senior Instructor: Program for Writing and Rhetoric
PhD, University of Utah
- Burns, Jack O (https://experts.colorado.edu/display/fisid_124317)
Professor: Astrophysical and Planetary Sciences (APS); Professor: Center for Astrophysics & Space Astronomy (CASA)
PhD, Indiana University Bloomington
- Burr, Chrystie (https://experts.colorado.edu/display/fisid_152969)
Assistant Professor: Economics
PhD, University of Arizona
- Bustamante, Heidi Margarita (https://experts.colorado.edu/display/fisid_146491)
Instructor: Integrative Physiology
MS, University of Colorado Boulder
- Buttenfield, Barbara P (https://experts.colorado.edu/display/fisid_107860)
Professor: Geography
PhD, University of Washington
- Byerly, Carol R (https://experts.colorado.edu/display/fisid_109670)
Lecturer: History
- Byrd, Richard H.
Professor Emeritus: Computer Science
PhD, Rice University
- Byrd, Sigman M. (https://experts.colorado.edu/display/fisid_127494)
Senior Instructor: Program for Writing and Rhetoric
PhD, University of Utah
- Byrnes, William (https://experts.colorado.edu/display/fisid_100643)
Associate Professor: Integrative Physiology
PhD, University of Wisconsin-Madison

C

- Caballero, Carlo (https://experts.colorado.edu/display/fisid_111681)
Associate Professor: Music
PhD, University of Pennsylvania
- Cadena, Brian C (https://experts.colorado.edu/display/fisid_145740)
Associate Professor: Economics; Assistant Professor: Institute of Behavioral Science (IBS)
PhD, University of Michigan Ann Arbor

Cai, Xiao-Chuan (https://experts.colorado.edu/display/fisid_100636)
Professor: Computer Science
PhD, New York University

Cain, Andrew J (https://experts.colorado.edu/display/fisid_129296)
Associate Professor, Lecturer: Continuing Education & Professional Studies; Assoc Chair: Classics
PhD, Cornell University

Caine, T. Nelson
Professor Emeritus: Geography

Calabrese, Andrew (https://experts.colorado.edu/display/fisid_101073)
Professor: Media Studies
PhD, Ohio State University

Calkins, Michael Andrew (https://experts.colorado.edu/display/fisid_149720)
Assistant Professor: Physics
PhD, University of California-Los Angeles

Calvin, Inga E (https://experts.colorado.edu/display/fisid_143774)
Lecturer: Baker RAP; Lecturer: Sewall RAP

Cameron, Catherine M (https://experts.colorado.edu/display/fisid_108375)
Professor, Assoc Chair: Anthropology
PhD, University of Arizona

Cameron, Jeffrey Carlyle (https://experts.colorado.edu/display/fisid_156473)
Assistant Professor: Chemistry and Biochemistry; Assistant Professor: Renewable & Sustainable Energy Institute (RASEI)
PhD, Washington University

Campbell, Kathleen G.
Professor Emeritus: College of Media, Communication & Information;
Professor Emeritus: Communication

Campbell, Margaret Catherine (https://experts.colorado.edu/display/fisid_118141)
Professor, Associate Dean: Leeds School of Business
PhD, Stanford University

Campeau, Serge (https://experts.colorado.edu/display/fisid_115395)
Professor, Assoc Faculty Director: Psychology and Neuroscience
PhD, Yale University

Campos, Paul F (https://experts.colorado.edu/display/fisid_102518)
Professor: School of Law
JD, University of Michigan Ann Arbor

Cantrell, Deborah Jane (https://experts.colorado.edu/display/fisid_144607)
Associate Professor, Faculty Director: School of Law
JD, University of Southern California

Carballo, Jeronimo Rafael (https://experts.colorado.edu/display/fisid_155949)
Assistant Professor: Economics
PhD, University of Maryland College Park Campus

Carey, Cynthia
Professor Emeritus: Integrative Physiology

Carey, Gregory (https://experts.colorado.edu/display/fisid_101322)
Associate Professor: Psychology and Neuroscience
PhD, University of Minnesota Twin Cities

Carlos, Ann M (https://experts.colorado.edu/display/fisid_105534)
Professor: Economics; Associate Dean: College of Arts and Sciences;
Professor: History
PhD, Univ of Western Ontario (Canada)

Carlson, Lawrence E.
Professor Emeritus: Mechanical Engineering

Carnahan, Shirley E (https://experts.colorado.edu/display/fisid_105936)
Senior Instructor: Humanities
PhD, University of Colorado Boulder

Carpenter, J Harrison (https://experts.colorado.edu/display/fisid_115915)
Senior Instructor: Ecology and Evolutionary Biology; Lecturer: Continuing Education & Professional Studies
MS, Michigan Technological University

Carpenter, Kristen Ann (https://experts.colorado.edu/display/fisid_147188)
Professor: School of Law
JD, Harvard University

Carr, Julia Alice (https://experts.colorado.edu/display/fisid_143349)
Associate Professor: English; Associate Professor: Intermedia Art, Writing and Performance
PhD, University of California-Berkeley

Carrico, Amanda R. (https://experts.colorado.edu/display/fisid_153054)
Assistant Professor: Environmental Studies Program
PhD, Vanderbilt University

Carroll, Clinton R (https://experts.colorado.edu/display/fisid_154726)
Assistant Professor: Ethnic Studies
PhD, University of California-Berkeley

Carter Carston, Ronald McKell (https://experts.colorado.edu/display/fisid_154921)
Assistant Professor: Institute of Cognitive Science (ICS); Assistant Professor: Psychology and Neuroscience
PhD, California Institute of Technology

Carthy, Nicholas R. (https://experts.colorado.edu/display/fisid_135356)
Associate Professor, Instructor: Music
BA, Guildhall School of Music, London (England)

Cartwright, Desmond S.
Professor Emeritus: Psychology and Neuroscience

Caruthers, Marvin H (https://experts.colorado.edu/display/fisid_103328)
Distinguished Professor: Chemistry and Biochemistry
PhD, Northwestern University

Cary, John R (https://experts.colorado.edu/display/fisid_105901)
Professor: Physics
PhD, University of California-Berkeley

Casagrand, Janet L (https://experts.colorado.edu/display/fisid_100934)
Senior Instructor: Integrative Physiology
PhD, Case Western Reserve University

- Casalaina-Martin, Sebastian Ben (https://experts.colorado.edu/display/fisid_145845)
Associate Professor: Mathematics
PhD, Columbia University In the City of New York
- Cash, Webster C (https://experts.colorado.edu/display/fisid_101759)
Professor: Astrophysical and Planetary Sciences (APS); Professor: Center for Astrophysics & Space Astronomy (CASA); Professor: Aerospace Engineering Sciences
PhD, University of California-Berkeley
- Cassano, John J. (https://experts.colorado.edu/display/fisid_121781)
Associate Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Associate Professor, Assoc Chair: Atmospheric and Oceanic Sciences (ATOC)
PhD, University of Wyoming
- Castel, Alison Rebecca (https://experts.colorado.edu/display/fisid_158167)
Instructor: Peace and Conflict Studies
MS, University of Pennsylvania
- Castro, Francisco (https://experts.colorado.edu/display/fisid_147992)
Instructor: Mechanical Engineering
PhD, University of Colorado Boulder
- Cateora, Phillip R.
Professor Emeritus: Leeds School of Business
- Cathey, W. Thomas
Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)
- Catlos, Brian Aivars (https://experts.colorado.edu/display/fisid_147829)
Professor: Religious Studies; Professor: History
PhD, Univ of Toronto (Canada)
- Cech, Thomas R (https://experts.colorado.edu/display/fisid_103252)
Distinguished Professor: Chemistry and Biochemistry; Distinguished Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of California-Berkeley
- Cerny, Pavol (https://experts.colorado.edu/display/fisid_151749)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE); Assistant Professor: Computer Science
PhD, University of Pennsylvania
- Cha, Jennifer N (https://experts.colorado.edu/display/fisid_151746)
Associate Professor, Assoc Chair: Chemical and Biological Engineering
PhD, University of California-Santa Barbara
- Chamberlin, H Scott (https://experts.colorado.edu/display/fisid_105456)
Professor: Art and Art History
MFA, New York State Col of Ceramics at Alfred Univ
- Chambers, Lee Virginia (https://experts.colorado.edu/display/fisid_106130)
Associate Professor: History
PhD, University of Michigan Ann Arbor
- Chan, Steve S (https://experts.colorado.edu/display/fisid_102816)
Professor, Professor: Political Science; Faculty Director: Farrand RAP
PhD, University of Minnesota Twin Cities
- Chang, Bor-Yuh Evan (https://experts.colorado.edu/display/fisid_146087)
Assistant Professor: Computer Science; Assistant Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of California-Berkeley
- Chang, Philip C (https://experts.colorado.edu/display/fisid_143541)
Senior Instructor: Music
MA, University of Rochester
- Chapin, Violeta Raquel (https://experts.colorado.edu/display/fisid_147683)
Clinical Assoc Professor: School of Law
JD, New York University
- Chapman, Andrew David (https://experts.colorado.edu/display/fisid_153016)
Lecturer: Philosophy; Lecturer: Libby Arts RAP; Lecturer: Baker RAP
- Charteris, Frances (https://experts.colorado.edu/display/fisid_100730)
Lecturer: Art and Art History
MFA, University of California-San Diego
- Chasteen, Stephanie Viola (https://experts.colorado.edu/display/fisid_145183)
Lecturer: Physics
- Chatterjee, Anushree (https://experts.colorado.edu/display/fisid_151712)
Assistant Professor: Chemical and Biological Engineering
PhD, University of Minnesota Central office
- Chaturvedi, Vidhu (<http://www.colorado.edu/alc/vidhu-chaturvedi>)
Instructor: Asian Languages and Civilizations
- Chawla, Louise
Professor Emeritus: Environmental Design
- Chellis, Matthew Wren (https://experts.colorado.edu/display/fisid_154415)
Assistant Professor: Music
MM, Manhattan School of Music
- Chen, Jin (https://experts.colorado.edu/display/fisid_143539)
Instructor: Asian Languages and Civilizations
MA, University of Colorado Boulder
- Chen, Lijun (https://experts.colorado.edu/display/fisid_149472)
Assistant Professor: Computer Science
PhD, California Institute of Technology
- Chen, Ming Hsu (https://experts.colorado.edu/display/fisid_149591)
Associate Professor: School of Law; Associate Professor: Political Science
PhD, University of California-Berkeley
- Chen, Yongmin (https://experts.colorado.edu/display/fisid_108989)
Professor: Economics
PhD, Boston University
- Chen, Zeyun (https://experts.colorado.edu/display/fisid_147332)
Assistant Professor: Leeds School of Business
PhD, University of Houston-Downtown

Chen, Zhe (https://experts.colorado.edu/display/fisid_148754)
Asst Research Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of Colorado Boulder

Chernus, Ira R (https://experts.colorado.edu/display/fisid_101043)
Professor: Religious Studies; Lecturer: Continuing Education & Professional Studies
PhD, Temple University

Chester, Lucy P (https://experts.colorado.edu/display/fisid_126541)
Associate Professor: History; Associate Professor: International Affairs Program
PhD, Yale University

Cheval, Melinda Kiger (https://experts.colorado.edu/display/fisid_108537)
Senior Instructor: College of Media, Communication & Information; Faculty Director: Communication & Society RAP; Lecturer: Continuing Education & Professional Studies
BS, West Virginia University

Chin, Karen (https://experts.colorado.edu/display/fisid_122666)
Associate Professor: Geological Sciences; Associate Professor: University of Colorado Museum of Natural History
PhD, University of California-Santa Barbara

Chinowsky, Paul (https://experts.colorado.edu/display/fisid_125496)
Professor: Civil, Environmental and Architectural Engineering
PhD, Stanford University

Chong, Albert (https://experts.colorado.edu/display/fisid_100586)
Professor: Art and Art History
MFA, University of California-San Diego

Christensen, Carl C.
Professor Emeritus: History

Christoff, Lorna Colleen (https://experts.colorado.edu/display/fisid_146614)
Instructor: Leeds School of Business

Chu, Xinzhaoh (https://experts.colorado.edu/display/fisid_141893)
Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Professor: Aerospace Engineering Sciences
PhD, Peking Univ (China)

Chung, Jae Won (<http://www.colorado.edu/alc/jae-won-chung>)
Assistant Professor: Asian Languages and Civilizations

Chung Feng, Chuan
Professor Emeritus: Civil, Environmental and Architectural Engineering

Ciarlo, David Michael (https://experts.colorado.edu/display/fisid_149618)
Associate Professor, Assoc Chair: History
PhD, University of Wisconsin-Madison

Ciplet, David (https://experts.colorado.edu/display/fisid_156064)
Assistant Professor: Environmental Studies Program
PhD, Brown University

Clark, Noel A (https://experts.colorado.edu/display/fisid_101947)
Professor: Physics
PhD, Massachusetts Institute of Technology

Clark, Patrick Ryan (https://experts.colorado.edu/display/fisid_156499)
Instructor: College of Media, Communication & Information
MFA, San Diego State University

Clark, Torin K (https://experts.colorado.edu/display/fisid_155959)
Assistant Professor: Aerospace Engineering Sciences
PhD, Massachusetts Institute of Technology

Clarke, Susan E.
Professor Emeritus: Political Science

Clauset, Aaron Julian (https://experts.colorado.edu/display/fisid_147554)
Assistant Professor: Computer Science; Assistant Professor: Ecology and Evolutionary Biology; Assistant Professor: Electrical, Computer and Energy Engineering (ECEE); Assistant Professor: Biofrontiers Institute; Assistant Professor: Applied Mathematics
PhD, University of New Mexico

Cleland, Carol (https://experts.colorado.edu/display/fisid_105674)
Professor: Philosophy
PhD, Brown University

Clelland, Jeanne Nielsen (https://experts.colorado.edu/display/fisid_113103)
Assoc Chair, Professor: Mathematics
PhD, Duke University

Clements, George F.
Professor Emeritus: Mathematics

Cline, Clinton C.
Professor Emeritus: Art and Art History

Cline, Ruth
Professor Emeritus: School of Education

Clough, David Edwards (https://experts.colorado.edu/display/fisid_102332)
Professor: Chemical and Biological Engineering
PhD, University of Colorado Boulder

Cobin, Martin T.
Professor Emeritus: Theatre and Dance

Cogswell, Carol (https://experts.colorado.edu/display/fisid_141919)
Research Professor: Electrical, Computer and Energy Engineering (ECEE)
MArch, University of Oregon

Coleman, Bertram E (https://experts.colorado.edu/display/fisid_103065)
Professor, Chair: Theatre and Dance
PhD, University of Texas at Austin

Collinge, Sharon Kay (https://experts.colorado.edu/display/fisid_107088)
Professor: Environmental Studies Program
PhD, Harvard University

Collins, Allan C.
Professor Emeritus: Psychology and Neuroscience

Collins, Richard B (https://experts.colorado.edu/display/fisid_101884)
Professor: School of Law
LLB, Harvard University

- Colunga, Eliana (https://experts.colorado.edu/display/fisid_129477)
Associate Professor: Psychology and Neuroscience; Associate Professor: Computer Science
PhD, Indiana University Bloomington
- Comerford, Julia M (https://experts.colorado.edu/display/fisid_151471)
Assistant Professor: Center for Astrophysics & Space Astronomy (CASA); Assistant Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of California-Berkeley
- Comstock, Cathy (https://experts.colorado.edu/display/fisid_101895)
Senior Instructor: Farrand RAP
- Conlon, Joan Catoni
Professor Emeritus: Music
- Conti, Peter S.
Professor Emeritus: Astrophysical and Planetary Sciences (APS)
- Conzelman, Caroline S (https://experts.colorado.edu/display/fisid_145356)
Instructor: Global RAP
PhD, University of Colorado Boulder
- Cook, Charles I (https://experts.colorado.edu/display/fisid_149148)
Lecturer: Interdisciplinary Telecommunications
- Cook, Sherri M. (https://experts.colorado.edu/display/fisid_154773)
Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, University of Michigan Ann Arbor
- Cookson, John Anthony (https://experts.colorado.edu/display/fisid_152874)
Assistant Professor: Leeds School of Business
PhD, University of Chicago
- Cool, Alison Collier (https://experts.colorado.edu/display/fisid_154599)
Assistant Professor: Anthropology
PhD, New York University
- Cooper, John
Professor Emeritus: Physics
- Cooper, Peter W. (https://experts.colorado.edu/display/fisid_134522)
Senior Instructor: Music
- Cooperstock, Andrew B (https://experts.colorado.edu/display/fisid_115393)
Professor: Music
DMA, Peabody Institute of Johns Hopkins University
- Copley, Shelley (https://experts.colorado.edu/display/fisid_104067)
Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Professor: Molecular, Cellular & Developmental Biology (MCDB); Professor: Chemistry and Biochemistry
PhD, Harvard University

Assistant Professor: University Libraries
MA, University of Arizona
- Covert, Herbert H (https://experts.colorado.edu/display/fisid_101542)
Professor, Assoc Chair: Anthropology
PhD, Duke University
- Cowell, James Andrew (https://experts.colorado.edu/display/fisid_107090)
Professor, Chair: Linguistics
PhD, University of California-Berkeley
- Cox, Jeffrey N (https://experts.colorado.edu/display/fisid_113253)
Professor: Humanities; Professor: English
PhD, University of Virginia
- Cox, Murray William (https://experts.colorado.edu/display/fisid_153192)
Instructor: Applied Mathematics; Instructor: Engineering-Bold Center
PhD, Texas AM University
- Craig, Robert T.
Professor Emeritus: College of Media, Communication & Information; Professor Emeritus: Communication
PhD, Michigan State University
- Conza, Giorgio (https://experts.colorado.edu/display/fisid_151173)
Instructor: French & Italian
MA, University of Venice (Italy)

Cranmer, Steven (https://experts.colorado.edu/display/fisid_155051)
Associate Professor: Laboratory for Atmospheric and Space Physics (LASP); Associate Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Delaware

Craven, Priscilla (https://experts.colorado.edu/display/fisid_108033)
Senior Instructor: French & Italian; Faculty Director: International Education
MA, University of Colorado Boulder

Cremaschi, Alejandro M. (https://experts.colorado.edu/display/fisid_134168)
Associate Professor: Music
DMA, University of Minnesota Twin Cities

Crimaldi, John (https://experts.colorado.edu/display/fisid_115733)
Professor, Associate Professor, Assoc Chair: Civil, Environmental and Architectural Engineering
PhD, Stanford University

Cripe, Kerry M (https://experts.colorado.edu/display/fisid_126542)
Senior Instructor: Theatre and Dance
MFA, Florida State University

Cropanzano, Russell Salvador (https://experts.colorado.edu/display/fisid_151710)
Professor, Chair: Leeds School of Business
PhD, Purdue University

Crumpacker, David W.
Professor Emeritus: Ecology and Evolutionary Biology

Cruz, Alexander (https://experts.colorado.edu/display/fisid_100402)
Professor: Ecology and Evolutionary Biology
PhD, University of Florida

Culp, Robert D.
Professor Emeritus: Aerospace Engineering Sciences

Cumalat, John P (https://experts.colorado.edu/display/fisid_105582)
Professor, Chair: Physics
PhD, University of California-Santa Barbara

Cundiff, Milford F (https://experts.colorado.edu/display/fisid_105396)
Associate Professor: Ecology and Evolutionary Biology
PhD, University of Colorado Boulder

Cundiff, Steven (https://experts.colorado.edu/display/fisid_112280)
Lecturer: Physics

Curran, Timothy (https://experts.colorado.edu/display/fisid_118454)
Professor: Psychology and Neuroscience
PhD, University of Oregon

Curry, James H (https://experts.colorado.edu/display/fisid_105730)
Professor: Applied Mathematics
PhD, University of California-Berkeley

Czubak, Magdalena (https://experts.colorado.edu/display/fisid_157955)
Assistant Professor: Mathematics
PhD, University of Texas at Austin

D

Dabove, Juan Pablo (https://experts.colorado.edu/display/fisid_125397)
Associate Professor: Spanish and Portuguese; Faculty Director: International Education
PhD, University of Pittsburgh

Daily, John W (https://experts.colorado.edu/display/fisid_100131)
Professor: Mechanical Engineering
PhD, Stanford University

Dalton, Bridget Monroe (https://experts.colorado.edu/display/fisid_151711)
Associate Professor: School of Education
EdD, Harvard University

Dam, Robert Anthony (https://experts.colorado.edu/display/fisid_155860)
Assistant Professor: Leeds School of Business
PhD, Northwestern University

Damrauer, Niels Harley (https://experts.colorado.edu/display/fisid_129797)
Associate Professor: Chemistry and Biochemistry
PhD, University of California-Berkeley

Danforth, Charles W. (https://experts.colorado.edu/display/fisid_130779)
Instructor: Astrophysical and Planetary Sciences (APS)

Darling, Jeremiah K (https://experts.colorado.edu/display/fisid_141767)
Associate Professor: Astrophysical and Planetary Sciences (APS); Associate Professor: Center for Astrophysics & Space Astronomy (CASA)
PhD, Cornell University

Darnell, Donald K.
Professor Emeritus: Communication

Darnell, Jerome C.
Professor Emeritus: Leeds School of Business

Dashti, Shideh (https://experts.colorado.edu/display/fisid_148493)
Assistant Professor, Faculty Director: Civil, Environmental and Architectural Engineering
PhD, University of California-Berkeley

Datta, Subhendu K.
Professor Emeritus: Mechanical Engineering

Daugherty, Paul J (https://experts.colorado.edu/display/fisid_128801)
Senior Instructor: Journalism; Lecturer: Continuing Education & Professional Studies
MA, University of Colorado Boulder

Dauverd, Celine (https://experts.colorado.edu/display/fisid_145804)
Associate Professor: History
PhD, University of California-Los Angeles

David, Emmanuel A. (https://experts.colorado.edu/display/fisid_146542)
Assistant Professor: Women and Gender Studies
PhD, University of Colorado Boulder

Davies, Kendi F (https://experts.colorado.edu/display/fisid_142304)
Associate Professor: Ecology and Evolutionary Biology
PhD, Australian National Univ (Australia)

Davies, Shaun William (https://experts.colorado.edu/display/fisid_152995)

Assistant Professor: Leeds School of Business
PhD, University of California-Los Angeles

Davis, John S (https://experts.colorado.edu/display/fisid_115443)

Professor, Associate Dean: Music
DMA, University of Northern Colorado

Davis, Robert H (https://experts.colorado.edu/display/fisid_105896)
Dean: College of Engineering and Applied Science; Professor: Chemical and Biological Engineering
PhD, Stanford University

Day, Heidi E W (https://experts.colorado.edu/display/fisid_116632)

Senior Instructor: Psychology and Neuroscience
PhD, University of Cambridge (England)

Day, Robert E.

Professor Emeritus: Art and Art History

De Alwis, Senarath P (https://experts.colorado.edu/display/fisid_103029)

Professor: Physics
PhD, University of Cambridge (England)

De Bartolome, Charles A M (https://experts.colorado.edu/display/fisid_101302)

Professor: Economics
PhD, University of Pennsylvania

De Lange, Marcel Sebastian (https://experts.colorado.edu/display/fisid_140404)

Senior Instructor: Environmental Design
MS, Delft University of Technology (Netherlands)

de Langhe, Bart (https://experts.colorado.edu/display/fisid_149819)

Assistant Professor: Leeds School of Business
PhD, Erasmus University (Netherlands)

de Stecher, Annette W (https://experts.colorado.edu/display/fisid_155095)

Assistant Professor: Art and Art History
PhD, Carleton University (Canada)

Deagman, Rachael Nicole (https://experts.colorado.edu/display/fisid_154125)

Instructor: English
PhD, Duke University

DeDecker, Brian S (https://experts.colorado.edu/display/fisid_143934)

Senior Instructor: Molecular, Cellular & Developmental Biology (MCDB)

Deetz, Stanley A.

Professor Emeritus: College of Media, Communication & Information;
Professor Emeritus: Communication
PhD, Ohio University

DeFries, John C.

Professor Emeritus: Psychology and Neuroscience

Degrad, Thomas A (https://experts.colorado.edu/display/fisid_102740)

Professor: Physics
PhD, Massachusetts Institute of Technology

deGrazia, Janet (https://experts.colorado.edu/display/fisid_107661)

Senior Instructor: Chemical and Biological Engineering
PhD, University of Colorado Boulder

Dehus, Mark D (https://experts.colorado.edu/display/fisid_146046)

Lecturer: Interdisciplinary Telecommunications
MS, University of Colorado Boulder

Delgado, Francisco Antenor (https://experts.colorado.edu/display/fisid_109275)

Senior Instructor: Leeds School of Business
PhD, University of Pennsylvania

Deluca, Laura M (https://experts.colorado.edu/display/fisid_101414)

Asst Professor Adjunct: Anthropology; Instructor: Residential Acad Program-SSI

Demaree, John D.

Professor Emeritus: Leeds School of Business

Demmig-Adams, Barbara (https://experts.colorado.edu/display/fisid_105649)

Professor: Ecology and Evolutionary Biology
Dr habil, Univ of Wurzburg (Germany)

Denny, Frederick M.

Professor Emeritus: Religious Studies

Desautels-Stein, Justin Jacob (https://experts.colorado.edu/display/fisid_147370)

Associate Professor: School of Law
LLM, Harvard University

Deshell, Jeffrey (https://experts.colorado.edu/display/fisid_118482)

Professor, Assoc Chair: English
PhD, SUNY at Buffalo

DeSouza, Christopher A (https://experts.colorado.edu/display/fisid_107460)

Professor: Integrative Physiology
PhD, University of Maryland College Park Campus

Dessau, Daniel S (https://experts.colorado.edu/display/fisid_107532)

Professor: Physics
PhD, Stanford University

Detweiler, Corrella Scott (https://experts.colorado.edu/display/fisid_128240)

Associate Professor: Molecular, Cellular & Developmental Biology (MCDB); Faculty Director: Office of the Vice Chancellor for Research
PhD, University of California-San Francisco

Deutmeyer, Megan Shannon (https://experts.colorado.edu/display/fisid_154265)

Assoc Chair, Associate Professor: Political Science
PhD, University of Iowa

Devin, Richard

Professor Emeritus: Theatre and Dance

DeWolfe, Oliver M (https://experts.colorado.edu/display/fisid_142992)

Associate Professor: Physics
PhD, Massachusetts Institute of Technology

Diachenko, Nada (https://experts.colorado.edu/display/fisid_101362)
Professor: Theatre and Dance
MA, New York University

Dickey, Kimberly (https://experts.colorado.edu/display/fisid_115735)
Professor: Art and Art History
MFA, New York State Col of Ceramics at Alfred Univ

Dickinson, Arthur L.
Professor Emeritus: Integrative Physiology

Dickson, Rebecca (https://experts.colorado.edu/display/fisid_105043)
Senior Instructor: Program for Writing and Rhetoric
PhD, University of Colorado Boulder

Didomenico, Randolph (https://experts.colorado.edu/display/fisid_100927)
Senior Instructor: Baker RAP
PhD, University of Colorado Boulder

Diduch, Paul Jordan (https://experts.colorado.edu/display/fisid_154510)
Instructor: Herbst Humanities Program
PhD, University of Dallas

Diekmann, James E.
Professor Emeritus: Civil, Environmental and Architectural Engineering

Dike, Steven (https://experts.colorado.edu/display/fisid_149880)
Instructor: Honors RAP; Instructor: History
MA, University of Virginia Central office

Dilaura, David L.
Professor Emeritus: Civil, Environmental and Architectural Engineering

Dilling, Lisa (https://experts.colorado.edu/display/fisid_138024)
Associate Professor: Environmental Studies Program; Assistant
Professor: Cooperative Institute for Research in Environmental Sciences
(CIRES)
PhD, University of California-Santa Barbara

Dimidjian, Sona Armine (https://experts.colorado.edu/display/fisid_140084)
Associate Professor: Psychology and Neuroscience
PhD, University of Washington

Dincao, Jose Paulo (https://experts.colorado.edu/display/fisid_143731)
Asst Research Professor: Physics
PhD, Univ of Sao Paulo (Brazil)

Ding, Yifu (https://experts.colorado.edu/display/fisid_146088)
Associate Professor: Mechanical Engineering
PhD, University of Akron

Doak, Daniel Forest (https://experts.colorado.edu/display/fisid_151963)
Professor, Assoc Faculty Director: Environmental Studies Program
PhD, University of Washington

Dockendorf, Matthew Paul (https://experts.colorado.edu/display/fisid_154511)
Instructor, Instructor: Music Education; Faculty Director: Music
MM, Ohio State University

Doersch, Charles Robert (https://experts.colorado.edu/display/fisid_135258)
Lecturer: Program for Writing and Rhetoric
MFA, Columbia University In the City of New York

Donald, Darnell K.
Professor Emeritus: Communication

Donato, Ruben (https://experts.colorado.edu/display/fisid_105537)
Professor: School of Education
PhD, Stanford University

Donavan, Janet Lynn (https://experts.colorado.edu/display/fisid_145270)
Senior Instructor: Political Science
PhD, University of Wisconsin-Madison

Donchez, Robert M (https://experts.colorado.edu/display/fisid_101267)
Senior Instructor, Faculty Director: Leeds School of Business
MBA, Fordham University

Doostan, Alireza (https://experts.colorado.edu/display/fisid_147382)
Associate Professor: Aerospace Engineering Sciences; Assistant
Professor: Center for Aerospace Structures (CAS)
PhD, Johns Hopkins University

Doran, Kevin (https://experts.colorado.edu/display/fisid_133349)
Asst Research Professor: Renewable & Sustainable Energy Institute
(RASEI)
JD, University of Colorado Boulder

Dougherty, Anne Margaret (https://experts.colorado.edu/display/fisid_101349)
Senior Instructor, Assoc Chair: Applied Mathematics
PhD, University of Wisconsin-Madison

Douglas, Marcia B (https://experts.colorado.edu/display/fisid_122696)
Associate Professor: English
PhD, SUNY at Binghamton

Douglass, Scot Ray (https://experts.colorado.edu/display/fisid_102347)
Associate Professor: Herbst Humanities Program; Faculty Director:
Engineering Honors Program
PhD, University of Colorado Boulder

Dow, John O.
Professor Emeritus: Civil, Environmental and Architectural Engineering

Dowell-Deen, Robin DeAnne (https://experts.colorado.edu/display/fisid_147779)
Assistant Professor: Molecular, Cellular & Developmental Biology (MCDB);
Assistant Professor: Computer Science
DSc, Washington University

Downey, Liam C (https://experts.colorado.edu/display/fisid_129297)
Associate Professor: Sociology
PhD, University of Arizona

Downton, James V.
Professor Emeritus: Sociology

Doyle, Damian P (https://experts.colorado.edu/display/fisid_100290)
Senior Instructor: Program for Writing and Rhetoric
PhD, University of Colorado Boulder

Dreitlein, Joseph
Professor Emeritus: Physics

Drennan, Kimberly Alaine (https://experts.colorado.edu/display/fisid_152242)

Instructor: Environmental Design
MArch, Rhode Island School of Design

Drumheller, John E (https://experts.colorado.edu/display/fisid_103707)
Senior Instructor: Music
DMA, University of Colorado Boulder

Dubin, Mark W.
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

Dubson, Michael A (https://experts.colorado.edu/display/fisid_102266)
Senior Instructor, Assoc Chair: Physics
PhD, Cornell University

Dufour, Darna L (https://experts.colorado.edu/display/fisid_100213)
Professor: Anthropology
PhD, SUNY at Binghamton

Dukehart, Merrit Elizabeth (https://experts.colorado.edu/display/fisid_149583)
Instructor: Program for Writing and Rhetoric
PhD, University of Colorado Boulder

Dukic, Vanja (https://experts.colorado.edu/display/fisid_148718)
Professor: Applied Mathematics
PhD, Brown University

Dukovic, Gordana (https://experts.colorado.edu/display/fisid_147414)
Associate Professor: Chemistry and Biochemistry
PhD, Columbia University In the City of New York

Dulk, George A.
Professor Emeritus: Astrophysical and Planetary Sciences (APS)

Dulock, Michael J (https://experts.colorado.edu/display/fisid_144338)
Associate Professor: University Libraries
MLIS, Drexel University

Duncan, Douglas K (https://experts.colorado.edu/display/fisid_126824)
Senior Instructor: Astrophysical and Planetary Sciences (APS)

Duncan, Thomas R.
Professor Emeritus: Advertising, Public Relations and Media Design

Dunn, James M (https://experts.colorado.edu/display/fisid_140593)
Associate Professor: Music
DMus, Arizona State University

Dunn, Martin L (https://experts.colorado.edu/display/fisid_103706)
Professor: Mechanical Engineering; Associate Dean: College of Engineering and Applied Science
PhD, University of Washington

Dupre, Jill VanMatre (https://experts.colorado.edu/display/fisid_144395)
Scholar In Residence, Scholar In Residence, Assoc Faculty Director:
ATLAS Institute
JD, University of Colorado Boulder

Duresse-Stimilli, Françoise (https://experts.colorado.edu/display/fisid_144418)
Associate Professor: Art and Art History
MFA, Temple University

Dusinberre, Edward (https://experts.colorado.edu/display/fisid_101358)
Assoc Professor Attendant Rank, Artist in Residence: Music

Dusinberre, Elspeth Rogers Mcin (https://experts.colorado.edu/display/fisid_111649)
Professor: Classics
PhD, University of Michigan Ann Arbor

Dutro, Elizabeth (https://experts.colorado.edu/display/fisid_141157)
Professor: School of Education
PhD, University of Michigan Ann Arbor

E

Eades, Luis E.
Professor Emeritus: Art and Art History

Eakin, Charles
Professor Emeritus: Music

Easton, Robert
Professor Emeritus: Applied Mathematics

Eaton, Robert
Professor Emeritus: Integrative Physiology

Eaves, Joel David (https://experts.colorado.edu/display/fisid_147419)
Assistant Professor: Chemistry and Biochemistry
PhD, Massachusetts Institute of Technology

Eberle, Jaelyn J (https://experts.colorado.edu/display/fisid_126544)
Associate Professor, Faculty Director: University of Colorado Museum of Natural History; Associate Professor: Geological Sciences
PhD, University of Wyoming

Echchaibi, Nabil (https://experts.colorado.edu/display/fisid_145054)
Associate Professor, Lecturer: Continuing Education & Professional Studies; Chair: Media Studies
PhD, Indiana University Bloomington

Eckart, Dennis R.
Professor Emeritus: Political Science

Ecker, Robert R.
Professor Emeritus: Art and Art History

Eckert, Erika L (https://experts.colorado.edu/display/fisid_101844)
Associate Professor: Music
BM, University of Rochester

Eddy, Frank W.
Professor Emeritus: Anthropology

Eddy, Marjorie Alexandra (https://experts.colorado.edu/display/fisid_111634)
Lecturer: Music; Lecturer: Humanities

Eggert, Katherine (https://experts.colorado.edu/display/fisid_103618)
Professor: English; Faculty Director: British and Irish Studies
PhD, University of California-Berkeley

Ehrenfeucht, Andrzej
Professor Emeritus: Computer Science

Ehringer, Marissa A (https://experts.colorado.edu/display/fisid_126595)
Associate Professor: Institute for Behavioral Genetics (IBG); Associate
Professor: Integrative Physiology
PhD, University of Colorado Denver

Eicher, Don L.
Professor Emeritus: Geological Sciences

Eid, Allison Hartwell (https://experts.colorado.edu/display/fisid_113078)
Instructor Adjunct: School of Law
BA, Stanford University

Eisenberg, Michael A (https://experts.colorado.edu/display/fisid_100427)
Professor: Institute of Cognitive Science (ICS); Professor: Computer
Science
PhD, Massachusetts Institute of Technology

Ellingson, Erica (https://experts.colorado.edu/display/fisid_100118)
Associate Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Arizona

Elliott, Delbert S.
Professor Emeritus: Sociology

Elliott, Jacqueline Michelle (https://experts.colorado.edu/display/fisid_140085)
Associate Professor, Chair: Classics
PhD, Columbia University In the City of New York

Elliott, Peter D (https://experts.colorado.edu/display/fisid_105048)
Professor: Mathematics
PhD, University of Cambridge (England)

Ellis, Clarence A.
Professor Emeritus: Computer Science

Ellis, Jay (https://experts.colorado.edu/display/fisid_122674)
Senior Instructor: Program for Writing and Rhetoric
PhD, New York University

Ellison, G. Barney
Professor Emeritus: Chemistry and Biochemistry
PhD, Yale University

Ellsworth, Michelle (https://experts.colorado.edu/display/fisid_112060)
Professor: Theatre and Dance
MFA, University of Colorado Boulder

Ellsworth, Oliver
Professor Emeritus: Music

Elmore, Peter Michael (https://experts.colorado.edu/display/fisid_103089)
Professor, Chair: Spanish and Portuguese
PhD, University of Texas at Austin

Emerson, Lori Ann (https://experts.colorado.edu/display/fisid_145834)
Associate Professor: English; Associate Professor: Intermedia Art, Writing
and Performance
PhD, SUNY at Buffalo

Emery, Nancy Christine (https://experts.colorado.edu/display/fisid_156291)
Assistant Professor: Ecology and Evolutionary Biology
PhD, University of California-Davis

Emery, William J (https://experts.colorado.edu/display/fisid_106038)
Professor: Aerospace Engineering Sciences
PhD, University of Hawaii at Manoa

Engel, Barbara A.
Professor Emeritus: History

Engel, Steven
Professor Emeritus: Leeds School of Business

England, Margaret Ann (https://experts.colorado.edu/display/fisid_142239)

Clinical Professor, Instructor Adjunct: School of Law
JD, University of Denver

Englander, Janos (https://experts.colorado.edu/display/fisid_147333)
Associate Professor: Mathematics
PhD, Israel Instit of Tech (Israel)

Enoka, Roger M (https://experts.colorado.edu/display/fisid_110122)
Professor: Integrative Physiology; Chair: Mathematics
PhD, University of Washington

Ergun, Robert E (https://experts.colorado.edu/display/fisid_115912)
Professor: Laboratory for Atmospheric and Space Physics (LASP); Assoc
Chair: Astrophysical and Planetary Sciences (APS)
PhD, University of California-Berkeley

Erhard, Paul M (https://experts.colorado.edu/display/fisid_100493)
Professor: Music
DMA, The Juilliard School

Erickson, Kenneth A.
Professor Emeritus: Geography

Erickson, Robert W (https://experts.colorado.edu/display/fisid_105514)
Professor: Electrical, Computer and Energy Engineering (ECEE); Faculty
Director: Academic Affairs; Faculty Director: College of Engineering and
Applied Science
PhD, California Institute of Technology

Ertimur, Yonca (https://experts.colorado.edu/display/fisid_151585)
Associate Professor, Professor: Leeds School of Business
PhD, New York University

Escamilla, Kathy M (https://experts.colorado.edu/display/fisid_109224)
Professor: School of Education
PhD, University of California-Los Angeles

Espelie, Erin Marie (https://experts.colorado.edu/display/fisid_148671)
Assistant Professor: Film Studies; Assoc Faculty Director: Center for
Environmental Journalism; Assistant Professor: Critical Media Practices
MFA, Duke University

Esposito, Larry Wayne (https://experts.colorado.edu/display/fisid_100502)
Professor: Laboratory for Atmospheric and Space Physics (LASP);
Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Massachusetts at Amherst

Evans, John A (https://experts.colorado.edu/display/fisid_152970)
Assistant Professor: Aerospace Engineering Sciences
PhD, University of Texas at Austin

Evjen, Harold D.
Professor Emeritus: Classics

Ewen, Hunter P (https://experts.colorado.edu/display/fisid_152587)
Instructor: Critical Media Practices
DMA, University of Colorado Boulder

F

Falconer, John L (https://experts.colorado.edu/display/fisid_101426)
Professor: Chemical and Biological Engineering
PhD, Stanford University

Falke, Joseph (https://experts.colorado.edu/display/fisid_101970)
Professor: Chemistry and Biochemistry
PhD, California Institute of Technology

Faller, James E (https://experts.colorado.edu/display/fisid_102047)
Professor Adjunct: Physics

Farago, Claire Joan (https://experts.colorado.edu/display/fisid_101552)
Professor: Art and Art History
PhD, University of Virginia

Farmer, Carson J.Q. (https://experts.colorado.edu/display/fisid_156292)
Assistant Professor: Geography
PhD, National University of Ireland (Ireland)

Farmer, G Lang (https://experts.colorado.edu/display/fisid_100498)
Professor: Geological Sciences; Faculty Director: International Education;
Associate Dean: College of Arts and Sciences
PhD, University of California-Los Angeles

Farnsworth, John A (https://experts.colorado.edu/display/fisid_153255)
Assistant Professor: Aerospace Engineering Sciences
PhD, Rensselaer Polytechnic Institute

Farokhfal, Reza (https://experts.colorado.edu/display/fisid_146455)
Instructor: Asian Languages and Civilizations
MA, Concordia University (Canada)

Farr, Elizabeth G (https://experts.colorado.edu/display/fisid_101732)
Professor, Faculty Director: Music
DMA, University of Michigan Ann Arbor

Farsi, Carla Emilia (https://experts.colorado.edu/display/fisid_101437)
Professor: Mathematics
PhD, University of Maryland College Park Campus

Fejer, Andras (https://experts.colorado.edu/display/fisid_103923)
Artist in Residence: Music

Feldman, Andrea (https://experts.colorado.edu/display/fisid_101230)
Senior Instructor: Program for Writing and Rhetoric
PhD, University of Colorado Boulder

Felippa, Carlos A (https://experts.colorado.edu/display/fisid_105701)
Professor: Aerospace Engineering Sciences
PhD, University of California-Berkeley

Fell, James E (https://experts.colorado.edu/display/fisid_100157)
Lecturer: Continuing Education & Professional Studies
PhD, University of Colorado Boulder

Fenn, Elizabeth Anne (https://experts.colorado.edu/display/fisid_149896)
Professor, Chair: History
PhD, Yale University

Ferguson, Michaele L. (https://experts.colorado.edu/display/fisid_129299)
Associate Professor: Political Science
PhD, Harvard University

Ferguson, Virginia Lea (https://experts.colorado.edu/display/fisid_110131)
Associate Professor, Assoc Chair: Mechanical Engineering
PhD, University of Colorado Boulder

Ferre, Valerio C (https://experts.colorado.edu/display/fisid_113064)
Professor: French & Italian; Associate Dean: College of Arts and Sciences
PhD, University of California-Berkeley

Fernbach, Philip M (https://experts.colorado.edu/display/fisid_149786)
Assistant Professor: Leeds School of Business
PhD, Brown University

Ferrell, Tracy L (https://experts.colorado.edu/display/fisid_101540)
Senior Instructor: Program for Writing and Rhetoric
PhD, University of Colorado Boulder

Ferris, Anna M (https://experts.colorado.edu/display/fisid_116252)
Associate Professor: University Libraries
MLS, Southern Connecticut State University

Ferris, David S (https://experts.colorado.edu/display/fisid_116817)
Professor, Chair: Humanities; Faculty Director: Comp Lit Grad Program
PhD, SUNY at Buffalo

Ferrucci, Patrick Richard (https://experts.colorado.edu/display/fisid_156307)
Assistant Professor: Journalism
PhD, University of Missouri-Columbia

Ferry, Robert J (https://experts.colorado.edu/display/fisid_104214)
Associate Professor: History
PhD, University of Minnesota Twin Cities

Fierer, Noah (https://experts.colorado.edu/display/fisid_142240)
Associate Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Associate Professor: Ecology and Evolutionary Biology
PhD, University of California-Santa Barbara

Fiesler, Casey Lynn (https://experts.colorado.edu/display/fisid_155950)
Assistant Professor: Information Science
PhD, Georgia Institute of Technology

Fiez, Theresa S. (https://experts.colorado.edu/display/fisid_156578)
Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Oregon State University

Fileva, Iskra Nikova (https://experts.colorado.edu/display/fisid_154600)
Assistant Professor: Philosophy
PhD, Boston University

Filipovic, Dejan S (https://experts.colorado.edu/display/fisid_126278)
Professor, Associate Professor, Assoc Chair: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of Michigan Ann Arbor

Fillman, Christy L. (https://experts.colorado.edu/display/fisid_145115)
Instructor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of Colorado Boulder

Fink, Robert
Professor Emeritus: Music

Finkelstein, Noah D (https://experts.colorado.edu/display/fisid_129919)
Professor: Physics; Faculty Director: OIT-Administration
PhD, Princeton University

Firestone, Robert
Professor Emeritus: Germanic and Slavic Languages and Literatures

Fischer, Gerhard
Professor Emeritus: Computer Science
PhD, University of Hamburg

Fischer, Katherine V (https://experts.colorado.edu/display/fisid_155474)
Lecturer: Farrand RAP; Lecturer: Libby Arts RAP; Lecturer: Honors RAP;
Lecturer: Sewall RAP; Lecturer: Miramontes Arts & Sciences Program
(MASP)

Fisher, John
Professor Emeritus: Philosophy

Fitch, J. Samuel
Professor Emeritus: Political Science

Fitzgerald, Jennifer L (https://experts.colorado.edu/display/fisid_140086)
Associate Professor, Assoc Chair: Political Science
PhD, Brown University

Flaxman, Samuel M (https://experts.colorado.edu/display/fisid_145698)
Associate Professor: Ecology and Evolutionary Biology
PhD, Cornell University

Fleshner, Monika R (https://experts.colorado.edu/display/fisid_103304)
Professor: Integrative Physiology
PhD, University of Colorado Boulder

Flexer, Roberta
Professor Emeritus: School of Education

Flores, Lisa A. (https://experts.colorado.edu/display/fisid_145474)
Associate Professor, Assoc Chair: Communication
PhD, University of Georgia

Flores, Nicholas E (https://experts.colorado.edu/display/fisid_107603)
Professor, Chair: Economics
PhD, University of California-San Diego

Flowers, Rebecca M (https://experts.colorado.edu/display/fisid_144054)
Associate Professor: Geological Sciences
PhD, Massachusetts Institute of Technology

Fluri, Jennifer L (https://experts.colorado.edu/display/fisid_154033)
Associate Professor: Geography
PhD, Pennsylvania State University

Foley, Teresa E. (https://experts.colorado.edu/display/fisid_147351)
Instructor: Integrative Physiology
PhD, University of Colorado Boulder

Fong, Judith Yem Siu (https://experts.colorado.edu/display/fisid_101120)
Professor, Faculty Director: University Libraries
MA, University of California-Berkeley

Foote, Kenneth E.
Professor Emeritus: Geography

Forbes, Graeme R (https://experts.colorado.edu/display/fisid_143615)
Professor: Philosophy
DPhil, Oxford Univ (England)

Forbes, Jeffrey M (https://experts.colorado.edu/display/fisid_100264)
Professor: Aerospace Engineering Sciences; Professor: Electrical,
Computer and Energy Engineering (ECEE)
PhD, Harvard University

Ford, William T.
Professor Emeritus: Physics

Fornberg, Bengt (https://experts.colorado.edu/display/fisid_108048)
Professor: Applied Mathematics
PhD, Univ of Uppsala (Sweden)

Forrest, Betsy Carroll (https://experts.colorado.edu/display/fisid_101645)
Lecturer: Atmospheric and Oceanic Sciences (ATOC); Lecturer: Baker RAP
PhD, University of Colorado Boulder

Forsman, Charles S.
Professor Emeritus: Art and Art History

Forward, John R.
Professor Emeritus: Psychology and Neuroscience

Fosdick, Lloyd D.
Professor Emeritus: Computer Science

Foster, Suzanne R.
Professor Emeritus: Art and Art History

Fowler, John S.
Professor Emeritus: Integrative Physiology

Fox, Barbara (https://experts.colorado.edu/display/fisid_106066)
Professor: Linguistics
PhD, University of California-Los Angeles

Fox, Jeffrey S (https://experts.colorado.edu/display/fisid_105586)
Professor: Mathematics
PhD, University of California-Berkeley

Fox, Jerome Michael (https://experts.colorado.edu/display/fisid_156682)
Assistant Professor: Chemical and Biological Engineering
PhD, University of California-Berkeley

Frajzyngier, Zygmunt (https://experts.colorado.edu/display/fisid_104000)
Professor: Linguistics
PhD, Univ of Warsaw (Poland)

France, Kevin Christopher (https://experts.colorado.edu/display/fisid_145201)
Assistant Professor: Laboratory for Atmospheric and Space Physics
(LASP); Assistant Professor: Astrophysical and Planetary Sciences (APS)
PhD, Johns Hopkins University

Frangopol, Dan M.
Professor Emeritus: Civil, Environmental and Architectural Engineering

Franklin, Allan D.
Professor Emeritus: Physics

Frederick, David M (https://experts.colorado.edu/display/fisid_101543)
Associate Professor: Leeds School of Business
PhD, University of Michigan Ann Arbor

Fredericks, Carla Francine (https://experts.colorado.edu/display/fisid_152859)
Clinical Assoc Professor, Instructor Adjunct, Faculty Director: School of Law
JD, Columbia University Central office

Fredricksmeier, Ernst A.
Professor Emeritus: Classics

Fredricksmeier, Hardy (https://experts.colorado.edu/display/fisid_115446)
Senior Instructor: Herbst Humanities Program; Senior Instructor: Farrand RAP
PhD, University of Texas at Austin

Fredrickson, Tammy L. (https://experts.colorado.edu/display/fisid_148888)
Clinical Asst Professor: Speech, Language and Hearing Sciences (SLHS)
PhD, University of Colorado Boulder

Frew, Eric W (https://experts.colorado.edu/display/fisid_134685)
Associate Professor: Aerospace Engineering Sciences; Assistant Professor, Associate Professor: Computer Science; Faculty Director: Research & Engineering Ctr for Unmanned Vehicles (RECUV)
PhD, Stanford University

Frey, Julia B.
Professor Emeritus: French & Italian

Frey, Lawrence R. (https://experts.colorado.edu/display/fisid_125937)
Professor: Communication
PhD, University of Kansas

Friedman, Naomi P (https://experts.colorado.edu/display/fisid_109519)
Assistant Professor: Institute for Behavioral Genetics (IBG); Assistant Professor: Psychology and Neuroscience
PhD, University of Colorado Boulder

Friedrich, Katja (https://experts.colorado.edu/display/fisid_133607)
Associate Professor: Atmospheric and Oceanic Sciences (ATOC)
PhD, Ludwig-Maximilians Univ of Munich (Germany)

Frongillo, Rafael M (https://experts.colorado.edu/display/fisid_156416)
Assistant Professor: Computer Science
PhD, University of California-Berkeley

Frost, Steven Earl (https://experts.colorado.edu/display/fisid_156502)
Instructor: College of Media, Communication & Information; Instructor: Art and Art History

Fuchs, Ewald F.
Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)

Furman, H. Patrick
Professor Emeritus: School of Law

Furtak, Erin M (https://experts.colorado.edu/display/fisid_144504)
Associate Professor: School of Education
PhD, Stanford University

G

Gabow, Harold
Professor Emeritus: Computer Science
PhD, Stanford University

Gale, Kendra L (https://experts.colorado.edu/display/fisid_125578)
Instructor: Communication & Society RAP
PhD, University of Minnesota Twin Cities

Galm, John
Professor Emeritus: Music

Gangadharbatla, Harsha (https://experts.colorado.edu/display/fisid_153279)
Associate Professor, Chair: Advertising, Public Relations and Media Design
PhD, University of Texas at Austin

Ganguly, Suranjan (https://experts.colorado.edu/display/fisid_102045)
Professor: Film Studies; Faculty Director: International Education; Faculty Director: College of Arts and Sciences
PhD, Purdue University

Garcea, Robert L (https://experts.colorado.edu/display/fisid_146103)
Professor: Molecular, Cellular & Developmental Biology (MCDB)
MD, University of California-San Francisco

Garcia, Diego (https://experts.colorado.edu/display/fisid_156036)
Professor: Leeds School of Business
PhD, University of California-Berkeley

Garnand, John J.
Professor Emeritus: Leeds School of Business

Garrity, Jane Marie (https://experts.colorado.edu/display/fisid_105467)
Associate Professor, Assoc Chair: English
PhD, University of California-Berkeley

Gasiewski, Albin J. (https://experts.colorado.edu/display/fisid_142882)
Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Massachusetts Institute of Technology

Gatten, David (https://experts.colorado.edu/display/fisid_156495)
Professor: Film Studies
MFA, School of the Art Institute of Chicago

Gautam, Sanjay Kumar (https://experts.colorado.edu/display/fisid_140614)
Associate Professor: History
PhD, University of Chicago

Gayley, Antonia Hollis (https://experts.colorado.edu/display/fisid_144505)
Assistant Professor: Religious Studies
PhD, Harvard University

Ge, Shemin (https://experts.colorado.edu/display/fisid_101387)
Professor, Chair: Geological Sciences
PhD, Johns Hopkins University

- Geck, Francis J.
Professor Emeritus: Art and Art History
- Geers, Thomas L.
Professor Emeritus: Mechanical Engineering
- Gentry, Gregory R (https://experts.colorado.edu/display/fisid_151707)
Associate Professor, Faculty Director: Music
DMA, University of Missouri-Kansas City
- George, Steven (https://experts.colorado.edu/display/fisid_103289)
Professor: Chemistry and Biochemistry; Professor: Mechanical Engineering
PhD, University of California-Berkeley
- Gerber, Matthew Dean (https://experts.colorado.edu/display/fisid_129799)
Associate Professor: History
PhD, University of California-Berkeley
- Gerding, Erik F. (https://experts.colorado.edu/display/fisid_149723)
Professor, Associate Professor, Associate Dean: School of Law
JD, Harvard University
- Gerke, Jennifer D (https://experts.colorado.edu/display/fisid_135135)
Associate Professor: University Libraries
MLS, Indiana University at South Bend
- Gerland, Oliver W (https://experts.colorado.edu/display/fisid_101092)
Associate Professor, Associate Professor: Theatre and Dance; Faculty Director: Honors RAP
PhD, Stanford University
- Gerren, Donna Sue (https://experts.colorado.edu/display/fisid_108563)
Senior Instructor: Aerospace Engineering Sciences
- Gerwig, Inger-Johanne
Professor Emeritus: Germanic and Slavic Languages and Literatures
- Gibert, John C (https://experts.colorado.edu/display/fisid_101680)
Associate Professor: Classics
PhD, Harvard University
- Gill, Ryan T. (https://experts.colorado.edu/display/fisid_122697)
Professor: Chemical and Biological Engineering; Assoc Faculty Director: Renewable & Sustainable Energy Institute (RASEI)
PhD, University of Maryland College Park Campus
- Gill, Sam D (https://experts.colorado.edu/display/fisid_103595)
Professor: Religious Studies
PhD, University of Chicago
- Gillett, Bernard (https://experts.colorado.edu/display/fisid_102629)
Senior Instructor: Farrand RAP
MA, University of Colorado Boulder
- Gimenez, Martha E.
Professor Emeritus: Sociology
- Gin, Douglas L. (https://experts.colorado.edu/display/fisid_122861)
Professor: Chemical and Biological Engineering; Professor: Chemistry and Biochemistry
PhD, California Institute of Technology
- Giovannelli, Leland (https://experts.colorado.edu/display/fisid_100755)
Senior Instructor, Faculty Director: Herbst Humanities Program
MA, University of Chicago
- Gladstone, Jason Daniel (https://experts.colorado.edu/display/fisid_154914)
Instructor: English
- Glahe, Fred R.
Professor Emeritus: Economics
- Glaser, Matthew A (https://experts.colorado.edu/display/fisid_105271)
Professor Attendant Rank: Physics
- Glass, Gene V (https://experts.colorado.edu/display/fisid_149833)
Research Professor: School of Education
PhD, University of Wisconsin-Madison
- Gleeson, Todd T (https://experts.colorado.edu/display/fisid_105480)
Professor, Faculty Director: Health Professions RAP; Professor: Integrative Physiology
PhD, University of California-Irvine
- Glenn, Jason (https://experts.colorado.edu/display/fisid_115556)
Professor: Astrophysical and Planetary Sciences (APS); Professor: Physics; Professor: Center for Astrophysics & Space Astronomy (CASA)
PhD, University of Arizona
- Glimp, David R. (https://experts.colorado.edu/display/fisid_143616)
Associate Professor: English
PhD, Johns Hopkins University
- Glover, Fred W.
Professor Emeritus: Leeds School of Business
- Goble, George G.
Professor Emeritus: Civil, Environmental and Architectural Engineering
- Goeldner, Charles R.
Professor Emeritus: Leeds School of Business
- Goetz, F. H. Alexander
Professor Emeritus: Geological Sciences
- Gold, Lawrence (https://experts.colorado.edu/display/fisid_100581)
Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of Connecticut
- Goldfarb, Kathryn Elissa (https://experts.colorado.edu/display/fisid_156471)
Assistant Professor: Anthropology
PhD, University of Chicago
- Goldfarb, Sidney
Professor Emeritus: English
- Goldman, Mara Jill (https://experts.colorado.edu/display/fisid_143542)
Associate Professor: Geography
PhD, University of Wisconsin-Madison
- Goldman, Martin V (https://experts.colorado.edu/display/fisid_100567)
Professor: Physics
PhD, Harvard University

Goldstein, Bruce Evan (https://experts.colorado.edu/display/fisid_147755)
Associate Professor: Environmental Design; Associate Professor: Institute of Behavioral Science (IBS)
PhD, University of California-Berkeley

Goldstein, Donna M (https://experts.colorado.edu/display/fisid_100448)
Faculty Director: Latin American Studies; Associate Professor: Media Studies; Professor: Anthropology
PhD, University of California-Berkeley

Gomez, Leila Gabriela (https://experts.colorado.edu/display/fisid_133563)
Associate Professor: Spanish and Portuguese
PhD, Johns Hopkins University

Gonzalez, Fredy (https://experts.colorado.edu/display/fisid_152971)
Assistant Professor: History
PhD, Yale University

Gonzalez, Luis
Professor Emeritus: Music

Goode, Bradley M. (https://experts.colorado.edu/display/fisid_134686)
Associate Professor, Instructor: Music
MM, DePaul University

Goodman, Nan (https://experts.colorado.edu/display/fisid_100633)
Professor: English; Faculty Director: Jewish Studies
PhD, Harvard University

Goodman, Zilla Jane (https://experts.colorado.edu/display/fisid_134687)
Senior Instructor, Assoc Faculty Director: Jewish Studies
PhD, Univ of Cape Town (South Africa)

Goodrich, James Andrew (https://experts.colorado.edu/display/fisid_109239)
Professor: Chemistry and Biochemistry
PhD, Carnegie Mellon University

Goodrich, Robert K.
Professor Emeritus: Mathematics

Goodrum, Paul M. (https://experts.colorado.edu/display/fisid_151965)
Professor: Civil, Environmental and Architectural Engineering
PhD, University of Texas at Austin

Goodwin, Andrew Pratt (https://experts.colorado.edu/display/fisid_151595)
Assistant Professor: Chemical and Biological Engineering
PhD, University of California-Berkeley

Gooseff, Michael N (https://experts.colorado.edu/display/fisid_155922)
Faculty Director, Associate Professor: Civil, Environmental and Architectural Engineering; Associate Professor: Institute of Arctic & Alpine Research (INSTAAR)
PhD, University of Colorado Boulder

Gopinath, Juliet T (https://experts.colorado.edu/display/fisid_147075)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE);
Assistant Professor: Physics
PhD, Massachusetts Institute of Technology

Gordon, Kenneth R.
Professor Emeritus: Leeds School of Business

Gordon, Noah Eli (https://experts.colorado.edu/display/fisid_147334)
Assistant Professor: English
MFA, University of Massachusetts at Amherst

Gordon, Paul (https://experts.colorado.edu/display/fisid_100661)
Professor: Humanities
PhD, Yale University

Gorokhovskiy, Alexander (https://experts.colorado.edu/display/fisid_126279)
Professor: Mathematics
PhD, Ohio State University

Gough, Raina V (https://experts.colorado.edu/display/fisid_149207)
Instructor: Chemistry and Biochemistry

Grabowski, Alena Marie (https://experts.colorado.edu/display/fisid_149727)
Assistant Professor: Integrative Physiology
PhD, University of Colorado Boulder

Graham, Larry
Professor Emeritus: Music

Grant, David R (https://experts.colorado.edu/display/fisid_100868)
Professor: Mathematics
PhD, Massachusetts Institute of Technology

Grant II, Don Sherman (https://experts.colorado.edu/display/fisid_154039)
Chair, Professor: Sociology
PhD, Ohio State University

Graves, Philip E (https://experts.colorado.edu/display/fisid_102050)
Professor: Economics
MA, Northwestern University

Greaney, Patrick F. (https://experts.colorado.edu/display/fisid_122807)
Professor: Germanic and Slavic Languages and Literatures
PhD, Johns Hopkins University

Green, Antonia M (https://experts.colorado.edu/display/fisid_103344)
Instructor: Spanish and Portuguese
MA, University of Missouri-Columbia

Green, James C (https://experts.colorado.edu/display/fisid_102344)
Professor: Astrophysical and Planetary Sciences (APS); Professor: Center for Astrophysics & Space Astronomy (CASA)
PhD, University of California-Berkeley

Green, Jeremy F (https://experts.colorado.edu/display/fisid_113077)
Associate Professor: English
PhD, University of Cambridge (England)

Green, Richard Mutegeki (https://experts.colorado.edu/display/fisid_129800)
Professor: Mathematics
MA, Oxford Univ (England)

Green, Sally Edith (https://experts.colorado.edu/display/fisid_122076)
Senior Instructor: Program for Writing and Rhetoric

Greenberg, Alan R.
Professor Emeritus: Mechanical Engineering

Greenberg, Edward S.
Professor Emeritus: Political Science

Greene, David Lee
Professor Emeritus: Anthropology

Greenwood, Michael J.
Professor Emeritus: Economics

Gregorio, Alvin P (https://experts.colorado.edu/display/fisid_143596)
Associate Professor: Art and Art History
MFA, Claremont Graduate School

Gries, Laurie Ellen (https://experts.colorado.edu/display/fisid_155951)
Assistant Professor: Communication; Assistant Professor: Program for Writing and Rhetoric
PhD, Syracuse University

Griffin, Amy Jo (https://experts.colorado.edu/display/fisid_151695)
Instructor, Faculty Director, Associate Dean: School of Law
JD, University of California-Berkeley

Griffin, John David (https://experts.colorado.edu/display/fisid_151708)
Associate Professor: Political Science; Faculty Director: Conference on World Affairs; Associate Professor: School of Law
PhD, Duke University

Grooms, Ian G (https://experts.colorado.edu/display/fisid_155588)
Assistant Professor: Applied Mathematics
PhD, University of Colorado Boulder

Gross, David L (https://experts.colorado.edu/display/fisid_103329)
Professor: History
PhD, University of Wisconsin-Madison

Gross, David Michael (https://experts.colorado.edu/display/fisid_109026)
Senior Instructor, Faculty Director: Leeds School of Business
PhD, University of Colorado Boulder

Gross, Mark D (https://experts.colorado.edu/display/fisid_100095)
Professor: ATLAS Institute; Professor: Computer Science
PhD, Massachusetts Institute of Technology

Grove, Vicki Jean (https://experts.colorado.edu/display/fisid_103689)
Senior Instructor: Germanic and Slavic Languages and Literatures
PhD, University of Colorado Boulder

Gruber, June L (https://experts.colorado.edu/display/fisid_153634)
Assistant Professor: Psychology and Neuroscience
PhD, University of California-Berkeley

Gruber, Marisa Aya (https://experts.colorado.edu/display/fisid_148523)
Professor: School of Law
JD, Harvard University

Grunwald, Dirk C (https://experts.colorado.edu/display/fisid_102261)
Professor: Computer Science; Professor: Interdisciplinary Telecommunications; Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of Illinois at Urbana-Champaign

Gunther, John G (https://experts.colorado.edu/display/fisid_141165)
Associate Professor, Faculty Director: Music
PhD, New York University

Gupta, Vijay
Professor Emeritus: Civil, Environmental and Architectural Engineering

Gurarie, Victor Vladimir (https://experts.colorado.edu/display/fisid_129918)
Professor: Physics
PhD, Princeton University

Guruswamy, Lakshman (https://experts.colorado.edu/display/fisid_120000)
Professor: School of Law
PhD, Univ of Durham (England)

Gustafson, Karl E (https://experts.colorado.edu/display/fisid_104877)
Professor: Mathematics
PhD, University of Maryland College Park Campus

Gutierrez, Gerardo (https://experts.colorado.edu/display/fisid_146867)
Associate Professor: Anthropology
PhD, Pennsylvania State University

Gutmann, Myron (https://experts.colorado.edu/display/fisid_154905)
Professor: Institute of Behavioral Science (IBS); Professor: History
PhD, Princeton University

Gwozdz, Ronald Scott (https://experts.colorado.edu/display/fisid_144830)
Instructor: Leeds School of Business
MBA, University of Colorado Boulder

H

Ha, Sangtae (https://experts.colorado.edu/display/fisid_153246)
Assistant Professor: Computer Science
PhD, North Carolina State University at Raleigh

Haas, John
Professor Emeritus: School of Education

Hachtel, Gary D.
Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)

Haig, Robin
Professor Emeritus: Theatre and Dance

Hale, Benjamin Slater (https://experts.colorado.edu/display/fisid_141456)
Associate Professor: Environmental Studies Program; Associate Professor: Philosophy
PhD, SUNY at Stony Brook

Hales, Ian W (https://experts.colorado.edu/display/fisid_134701)
Instructor: ATLAS Institute
MS, University of Denver

Hall, David Matthew (https://experts.colorado.edu/display/fisid_147474)
Asst Research Professor: Computer Science

Hall, Kira (https://experts.colorado.edu/display/fisid_123111)
Associate Professor: Linguistics; Associate Professor: Media Studies
PhD, University of California-Berkeley

Hallowell, Matthew Ryan (https://experts.colorado.edu/display/fisid_146163)

Associate Professor, Faculty Director: Civil, Environmental and Architectural Engineering
PhD, Oregon State University

Hallstead, Susan Rita (https://experts.colorado.edu/display/fisid_125579)

Senior Instructor: Spanish and Portuguese
MA, University of Pittsburgh

Halperin, Liora R (https://experts.colorado.edu/display/fisid_152972)

Assistant Professor: History
PhD, University of California-Los Angeles

Halverson, Nils W (https://experts.colorado.edu/display/fisid_134252)

Associate Professor: Astrophysical and Planetary Sciences (APS);
Associate Professor: Physics; Associate Professor, Faculty Director:
Center for Astrophysics & Space Astronomy (CASA)
PhD, California Institute of Technology

Hamilton, Andrew J S (https://experts.colorado.edu/display/fisid_101517)

Professor, Chair: Astrophysical and Planetary Sciences (APS); Professor:
Physics
PhD, University of Virginia

Hamilton, Fred A (https://experts.colorado.edu/display/fisid_105243)

Senior Instructor: University Libraries
MS, University of Tennessee-Knoxville

Hamlington, Peter Edward (https://experts.colorado.edu/display/fisid_149800)

Assistant Professor: Mechanical Engineering; Assistant Professor:
Aerospace Engineering Sciences
PhD, University of Michigan Ann Arbor

Hammer, Matthew A (https://experts.colorado.edu/display/fisid_156066)

Assistant Professor: Computer Science
PhD, University of Chicago

Hammer, Paul E. J. (https://experts.colorado.edu/display/fisid_146581)

Professor: History; Faculty Director: College of Arts and Sciences
PhD, University of Cambridge (England)

Hammons, Christian Stanford (https://experts.colorado.edu/display/fisid_152915)

Instructor: Anthropology; Instructor: Critical Media Practices
PhD, University of Southern California

Han, Min (https://experts.colorado.edu/display/fisid_105512)

Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of California-Los Angeles

Han, Richard Yehwei (https://experts.colorado.edu/display/fisid_122947)

Associate Professor: Computer Science
PhD, University of California-Berkeley

Han, Weiqing (https://experts.colorado.edu/display/fisid_115493)

Professor: Atmospheric and Oceanic Sciences (ATOC)
PhD, Nova University

Hand, Victoria (https://experts.colorado.edu/display/fisid_144609)

Associate Professor: School of Education
PhD, Stanford University

Hankin, Toby R.

Professor Emeritus: Theatre and Dance

Hanna, Martha (https://experts.colorado.edu/display/fisid_104557)

Professor: History; Faculty Director: Academic Affairs
PhD, Georgetown University

Hannigan, Michael P. (https://experts.colorado.edu/display/fisid_122655)

Associate Professor, Chair: Mechanical Engineering
PhD, California Institute of Technology

Harbeson, Eric John (https://experts.colorado.edu/display/fisid_147208)

Assistant Professor: University Libraries
MS, University of Illinois at Urbana-Champaign

Hardin, Kathryn Theresa Yarema (https://experts.colorado.edu/display/fisid_139358)

Clinical Asst Professor: Speech, Language and Hearing Sciences (SLHS)
MA, University of Colorado Boulder

Hargraves, Orin (https://experts.colorado.edu/display/fisid_153662)

Lecturer: Program for Writing and Rhetoric

Harrell, Nickholas Francis (https://experts.colorado.edu/display/fisid_154165)

Instructor: Law Library
JD, Lewis and Clark College

Harrington, Emily Marie (https://experts.colorado.edu/display/fisid_154601)

Associate Professor: English
PhD, University of Michigan Ann Arbor

Harris, Lorenzo R. (https://experts.colorado.edu/display/fisid_147634)

Artist in Residence: Theatre and Dance

Harris, Michael William (https://experts.colorado.edu/display/fisid_147313)

Lecturer: University Libraries; Lecturer: Continuing Education &
Professional Studies

Harrison, Jill Lindsey (https://experts.colorado.edu/display/fisid_149614)

Associate Professor: Sociology
PhD, University of California-Santa Cruz

Hart, John E.

Professor Emeritus: Atmospheric and Oceanic Sciences (ATOC)

Hart, Melissa (https://experts.colorado.edu/display/fisid_118127)

Professor, Faculty Director: School of Law
JD, Harvard University

Hartter, Joel N (https://experts.colorado.edu/display/fisid_154043)

Associate Professor: Graduate School; Associate Professor, Assoc
Faculty Director: Environmental Studies Program
PhD, University of Florida

Harvey, Lewis Orvis (https://experts.colorado.edu/display/fisid_101173)

Professor, Faculty Director: Psychology and Neuroscience
PhD, Pennsylvania State University

Harvey, Pamela Ann (https://experts.colorado.edu/display/fisid_148012)
Instructor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Tufts University

Hasan, Raza Ali (https://experts.colorado.edu/display/fisid_146167)
Instructor: English
MFA, Syracuse University

Hasen, David Milton (https://experts.colorado.edu/display/fisid_154672)
Associate Professor, Professor: School of Law
JD, Yale University

Hasenfratz, Anna (https://experts.colorado.edu/display/fisid_102393)
Professor: Physics
PhD, Lorand Eotvos University, Budapest (Hungary)

Hata, Kuniaki
Professor Emeritus: Music

Hauser, Gerard A.
Professor Emeritus: College of Media, Communication & Information;
Professor Emeritus: Communication

Hauser, John (https://experts.colorado.edu/display/fisid_102555)
Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of California-Berkeley

Hayes, Deborah
Professor Emeritus: Music

Hayes, Russell
Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)

Hayghe, Jennifer C (https://experts.colorado.edu/display/fisid_155969)
Associate Professor: Music
DMA, The Juilliard School

Haynes, Deborah J.
Professor Emeritus: Art and Art History

Hayworth, Eugene H. (https://experts.colorado.edu/display/fisid_126313)
Associate Professor, Faculty Director: University Libraries
MLS, Syracuse University

He, Chuan (https://experts.colorado.edu/display/fisid_124857)
Associate Professor: Leeds School of Business
PhD, Washington University

Healy, Alice F (https://experts.colorado.edu/display/fisid_100418)
Professor: Psychology and Neuroscience
PhD, Rockefeller University

Hearn, George (https://experts.colorado.edu/display/fisid_101059)
Associate Professor: Civil, Environmental and Architectural Engineering
PhD, Columbia University In the City of New York

Heathwood, Christopher Charles (https://experts.colorado.edu/display/fisid_141144)
Associate Professor: Philosophy
PhD, University of Massachusetts at Amherst

Hedberg, Natalie L.
Professor Emeritus: Speech, Language and Hearing Sciences (SLHS)

Heil, Leila Theresa (https://experts.colorado.edu/display/fisid_149780)
Assistant Professor: Music Education
PhD, University of Colorado Boulder

Heinz, Hendrik (https://experts.colorado.edu/display/fisid_156488)
Associate Professor: Chemical and Biological Engineering
PhD, ETH Zurich (Switzerland)

Heisler, Ruth E (https://experts.colorado.edu/display/fisid_103195)
Senior Instructor: Integrative Physiology
MA, University of Colorado Boulder

Hekman, David R (https://experts.colorado.edu/display/fisid_151359)
Assistant Professor, Associate Professor: Leeds School of Business
PhD, University of Washington

Hendricks, Jennifer Susan (https://experts.colorado.edu/display/fisid_151111)
Professor, Associate Professor: School of Law
JD, Harvard University

Hendrickson, Susan Marie (https://experts.colorado.edu/display/fisid_145101)
Senior Instructor: Chemistry and Biochemistry
PhD, Colorado State University

Henningsen, Matthew Scott (https://experts.colorado.edu/display/fisid_156802)
Lecturer: Program for Writing and Rhetoric; Lecturer: Farrand RAP

Henry, Mark Allen (https://experts.colorado.edu/display/fisid_134379)
Associate Professor, Assoc Chair: Theatre and Dance
MFA, University of Connecticut

Henze, Daven Ker (https://experts.colorado.edu/display/fisid_144858)
Associate Professor: Mechanical Engineering
PhD, California Institute of Technology

Henze, Gregor P. (https://experts.colorado.edu/display/fisid_146496)
Professor: Civil, Environmental and Architectural Engineering
PhD, University of Colorado Boulder

Hermann, Allen M.
Professor Emeritus: Physics

Hermele, Michael Aaron (https://experts.colorado.edu/display/fisid_143370)
Associate Professor: Physics
PhD, University of California-Santa Barbara

Hermes, Henry G.
Professor Emeritus: Mathematics

Hernandez, Mark T (https://experts.colorado.edu/display/fisid_107635)
Professor: Civil, Environmental and Architectural Engineering
PhD, University of California-Berkeley

Hernandez, Theresa D (https://experts.colorado.edu/display/fisid_102953)
Professor: Psychology and Neuroscience; Associate Dean: College of Arts and Sciences
PhD, University of Texas at Austin

Herrero-Senes, Juan (https://experts.colorado.edu/display/fisid_147159)
Associate Professor. Spanish and Portuguese; Faculty Director.
International Education
PhD, Univ Pompeu Fabra (Spain)

Hersh, Orly M (https://experts.colorado.edu/display/fisid_143580)
Senior Instructor: Program for Writing and Rhetoric; Assoc Faculty
Director: College of Media, Communication & Information
MA, Northern Arizona University

Hertzberg, Jean R (https://experts.colorado.edu/display/fisid_105315)
Associate Professor: Mechanical Engineering
PhD, University of California-Berkeley

Herzfeld, Ute C (https://experts.colorado.edu/display/fisid_106575)
Assoc Research Professor: Electrical, Computer and Energy Engineering
(ECEE)

Hearing, Vincent P.
Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)

Hewitt, John K (https://experts.colorado.edu/display/fisid_101035)
Professor: Psychology and Neuroscience
PhD, University of London (England)

Heydt-Stevenson, Jillian (https://experts.colorado.edu/display/fisid_111683)
Associate Professor: English
PhD, University of Colorado Boulder

Hickcox, Abby Lynn (https://experts.colorado.edu/display/fisid_151860)
Instructor, Assoc Faculty Director: Honors Program
PhD, University of Colorado Boulder

Hickerson, Ruth Lynne (https://experts.colorado.edu/display/fisid_151159)
Instructor: Communication
PhD, University of Denver

Hicks, Alison (https://experts.colorado.edu/display/fisid_146108)
Assistant Professor: University Libraries
MLIS, University of Texas at Austin

Higashida, Cheryl A (https://experts.colorado.edu/display/fisid_126280)
Associate Professor: English
PhD, Cornell University

Hill, Boyd H. Jr
Professor Emeritus: History

Hinckley, Eve-Lyn (https://experts.colorado.edu/display/fisid_147806)
Assistant Professor: Institute of Arctic & Alpine Research (INSTAAR);
Assistant Professor: Environmental Studies Program

Hindman, Bradley W (https://experts.colorado.edu/display/fisid_103726)
Asst Research Professor, Lecturer: Astrophysical and Planetary Sciences
(APS)
PhD, University of Colorado Boulder

Hintz, Saskia Barbara (https://experts.colorado.edu/display/fisid_144506)
Senior Instructor: Germanic and Slavic Languages and Literatures
PhD, New York University

Ho, Janice Chiew Ling (https://experts.colorado.edu/display/fisid_145805)
Associate Professor: English
PhD, Cornell University

Hobbs, Steven L (https://experts.colorado.edu/display/fisid_143724)
Instructor: Integrative Physiology
PhD, University of Colorado Boulder

Hodge, Stephen
Professor Emeritus: School of Education

Hoecker, Arne (https://experts.colorado.edu/display/fisid_152973)
Assoc Chair, Assistant Professor: Germanic and Slavic Languages and
Literatures
PhD, Johns Hopkins University

Hoefer, Mark (https://experts.colorado.edu/display/fisid_154264)
Associate Professor: Applied Mathematics
PhD, University of Colorado Boulder

Hoeffler, Charles Albert (https://experts.colorado.edu/display/fisid_153384)
Assistant Professor: Institute for Behavioral Genetics (IBG); Assistant
Professor: Integrative Physiology
PhD, University of Arizona

Hoehn, Alexander (https://experts.colorado.edu/display/fisid_104942)
Assoc Professor Adjunct: BioServe Space Technologies

Hoenger, Andreas (https://experts.colorado.edu/display/fisid_142883)
Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Univ of Basel (Switzerland)

Hoenigman, Rhonda Olcott (https://experts.colorado.edu/display/fisid_152997)
Assoc Chair, Instructor: Computer Science
PhD, University of Colorado Boulder

Hogan, Linda
Professor Emeritus: English

Hohlfelder, Robert
Professor Emeritus: History

Holbert, Marianne Bellino (https://experts.colorado.edu/display/fisid_146986)
Faculty Director: International Education; Senior Instructor, Assoc Faculty
Director: Environmental Design
MArch, Washington University

Holewinski, Adam P (https://experts.colorado.edu/display/fisid_155859)
Assistant Professor: Renewable & Sustainable Energy Institute (RASEI);
Assistant Professor: Chemical and Biological Engineering
PhD, University of Michigan Ann Arbor

Holland, Murray John (https://experts.colorado.edu/display/fisid_105126)
Professor: Physics
PhD, Oxford Univ (England)

Holley, Richard A.
Professor Emeritus: Mathematics

Hollis, Deborah R (https://experts.colorado.edu/display/fisid_100664)
Associate Professor, Faculty Director: University Libraries
MLS, University of Arizona

Holman-Johnson, Leigh (https://experts.colorado.edu/display/fisid_141980)
Associate Professor: Music
DMA, University of Colorado Boulder

Holmes, Kwame Alfred (https://experts.colorado.edu/display/fisid_152870)
Assistant Professor: Ethnic Studies
PhD, University of Illinois at Urbana-Champaign

Hoover, John J (https://experts.colorado.edu/display/fisid_113520)
Assoc Research Professor: School of Education
PhD, University of Colorado Boulder

Hoover, Stewart (https://experts.colorado.edu/display/fisid_104549)
Professor: Media Studies; Faculty Director: Center for Media, Religion and Culture
PhD, University of Pennsylvania

Hopewell, Susan Walsh (https://experts.colorado.edu/display/fisid_145039)
Assistant Professor: School of Education
PhD, University of Colorado Boulder

Hopkins, Kenneth
Professor Emeritus: School of Education

Horanyi, Mihaly (https://experts.colorado.edu/display/fisid_102420)
Professor: Laboratory for Atmospheric and Space Physics (LASP);
Professor: Physics
PhD, Lorand Eotvos University, Budapest (Hungary)

Horii, Yoshiyuki
Professor Emeritus: Speech, Language and Hearing Sciences (SLHS)

Horno-Delgado, Asunción
Professor Emeritus: Spanish and Portuguese
PhD, University of Massachusetts Amherst

Hornstein, Seth D (https://experts.colorado.edu/display/fisid_144237)
Senior Instructor: Astrophysical and Planetary Sciences (APS)
PhD, University of California-Los Angeles

Hosein, Adam Omar (https://experts.colorado.edu/display/fisid_147427)
Assistant Professor: Philosophy
PhD, Massachusetts Institute of Technology

Hoth, Kevin J. (https://experts.colorado.edu/display/fisid_149219)
Instructor: ATLAS Institute
MFA, University of Washington

Hough, Loren Evan (https://experts.colorado.edu/display/fisid_144904)
Assistant Professor: Physics
PhD, University of Colorado Boulder

House, Ernie
Professor Emeritus: School of Education

House, Veronica Leigh (https://experts.colorado.edu/display/fisid_143544)
Senior Instructor, Assoc Faculty Director: Program for Writing and Rhetoric
PhD, University of Texas at Austin

Howe, Charles W.
Professor Emeritus: Economics

Hrenya, Christine M (https://experts.colorado.edu/display/fisid_113245)
Professor: Chemical and Biological Engineering
PhD, Carnegie Mellon University

Hsiao, Frank S. T.
Professor Emeritus: Economics

Hsu, Chun-ling (https://experts.colorado.edu/display/fisid_126783)
Instructor: Asian Languages and Civilizations
MEd, University of Wisconsin-River Falls

Huang, Audrey May (https://experts.colorado.edu/display/fisid_154709)
Clinical Assoc Professor: School of Law
JD, University of Southern California

Huang, Peter Henry (https://experts.colorado.edu/display/fisid_149792)
Professor: School of Law
JD, Stanford University

Hubbard, Eleanor
Professor Emeritus: Sociology

Hubler, Mija H. (https://experts.colorado.edu/display/fisid_155134)
Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, Northwestern University

Huemer, Michael (https://experts.colorado.edu/display/fisid_113081)
Professor: Philosophy
PhD, Rutgers University Newark Campus

Hughes, Jonathan Edward (https://experts.colorado.edu/display/fisid_147335)
Assistant Professor: Economics
PhD, University of California-Davis

Hughes, Shannon M. (https://experts.colorado.edu/display/fisid_146574)
Asst Professor Adjunct: Electrical, Computer and Energy Engineering (ECEE)
PhD, Princeton University

Hulden, Mans Elis (https://experts.colorado.edu/display/fisid_154602)
Assistant Professor: Linguistics
PhD, University of Arizona

Hulden, Vilja Paivikki (https://experts.colorado.edu/display/fisid_154910)
Instructor: History

Humbert, James Sean (https://experts.colorado.edu/display/fisid_156202)
Associate Professor: Aerospace Engineering Sciences; Associate Professor: Mechanical Engineering
PhD, California Institute of Technology

Hunt, Peter (https://experts.colorado.edu/display/fisid_115394)
Professor: Classics; Professor: History
PhD, Stanford University

Hunter, Lawrence E (https://experts.colorado.edu/display/fisid_143568)
Professor: Computer Science

Hunter, Lori Mae (https://experts.colorado.edu/display/fisid_118372)
Professor: Institute of Behavioral Science (IBS); Professor: Sociology
PhD, Brown University

Hurley, Kelly K (https://experts.colorado.edu/display/fisid_105553)
Associate Professor: English
PhD, Stanford University

Hussein, Mahmoud Ismail (https://experts.colorado.edu/display/fisid_144300)
Associate Professor: Aerospace Engineering Sciences; Assistant
Professor: Center for Aerospace Structures (CAS)
PhD, University of Michigan Ann Arbor

Hutchison, Kent Edward (https://experts.colorado.edu/display/fisid_113101)
Professor: Psychology and Neuroscience
PhD, Oklahoma State University

Hynek, Brian Michael (https://experts.colorado.edu/display/fisid_130622)
Associate Professor, Associate Professor: Geological Sciences; Assistant
Professor: Laboratory for Atmospheric and Space Physics (LASP)
PhD, Washington University

Hynes, James T (https://experts.colorado.edu/display/fisid_106076)
Distinguished Professor: Chemistry and Biochemistry
PhD, Princeton University

I

Ih, Su-Ion (https://experts.colorado.edu/display/fisid_141091)
Associate Professor: Mathematics
PhD, Brown University

Irey, Charlotte York
Professor Emeritus: Theatre and Dance

Irvine, Leslie Jane (https://experts.colorado.edu/display/fisid_113150)
Professor: Sociology
PhD, SUNY at Stony Brook

Ishikawa, Yoshiyuki (https://experts.colorado.edu/display/fisid_102125)
Professor: Music
DMA, University of Michigan Ann Arbor

Ito, Tiffany Anne (https://experts.colorado.edu/display/fisid_113066)
Professor, Assoc Chair: Psychology and Neuroscience
PhD, University of Southern California

Iwamasa, Ken
Professor Emeritus: Art and Art History

Iyigun, Fevzi Murat (https://experts.colorado.edu/display/fisid_118373)
Professor: Economics
PhD, Brown University

J

Jacka, Jerry Keith (https://experts.colorado.edu/display/fisid_156067)
Assistant Professor: Anthropology
PhD, University of Oregon

Jackson, Betty R.
Professor Emeritus: Leeds School of Business

Jackson, Dennis
Professor Emeritus: Music

Jacobs, Janet L (https://experts.colorado.edu/display/fisid_100744)
Professor: Women and Gender Studies; Faculty Director: Honors Program
PhD, University of Colorado Boulder

Jacobs, Karen S (https://experts.colorado.edu/display/fisid_100280)
Associate Professor: English
PhD, University of California-Berkeley

Jacobs, Sharon Bogas (https://experts.colorado.edu/display/fisid_154417)
Associate Professor: School of Law
JD, Harvard University

Jaggar, Alison M (https://experts.colorado.edu/display/fisid_100454)
Professor: Women and Gender Studies; Professor: Philosophy
PhD, SUNY at Buffalo

Jagolinzer, Alan David (https://experts.colorado.edu/display/fisid_148591)
Associate Professor: Leeds School of Business
PhD, Pennsylvania State University

Jahn, Jody L (https://experts.colorado.edu/display/fisid_153426)
Assistant Professor: Communication
PhD, University of California-Santa Barbara

Jahn Hall, Alexandra (https://experts.colorado.edu/display/fisid_155096)
Assistant Professor: Institute of Arctic & Alpine Research (INSTAAR);
Assistant Professor: Atmospheric and Oceanic Sciences (ATOC)
PhD, McGill Univ (Canada)

Jakosky, Bruce M (https://experts.colorado.edu/display/fisid_105845)
Professor, Professor: Geological Sciences; Faculty Director: Laboratory for
Atmospheric and Space Physics (LASP)
PhD, California Institute of Technology

James, Sarah Anne (https://experts.colorado.edu/display/fisid_151713)
Assistant Professor: Classics; Faculty Director: International Education
PhD, University of Texas at Austin

Jamieson, Sara Reed (https://experts.colorado.edu/display/fisid_147773)
Instructor: Communication & Society RAP
PhD, University of New Mexico

Jan, Najeeb A (https://experts.colorado.edu/display/fisid_143581)
Assistant Professor: Geography
PhD, University of Michigan Ann Arbor

Jancosek, Elizabeth G.
Professor Emeritus: Speech, Language and Hearing Sciences (SLHS)

Jankowski, James P.
Professor Emeritus: History

Jansen, Kenneth E (https://experts.colorado.edu/display/fisid_147360)
Professor: Aerospace Engineering Sciences; Professor: Computer Science
PhD, Stanford University

Jany, Ursula Berit (https://experts.colorado.edu/display/fisid_154411)
Instructor: Germanic and Slavic Languages and Literatures
PhD, Ohio State University

Jaron-Becker, Agnieszka Anna (https://experts.colorado.edu/display/fisid_146689)
Assoc Research Professor: Physics
PhD, Univ of Warsaw (Poland)

Javernick-Will, Amy N (https://experts.colorado.edu/display/fisid_146430)
Associate Professor, Assistant Professor, Assoc Faculty Director: Civil, Environmental and Architectural Engineering
PhD, Stanford University

Jedamus, Paul E.
Professor Emeritus: Leeds School of Business

Jennings, Christina A (https://experts.colorado.edu/display/fisid_143545)
Associate Professor: Music
MM, The Juilliard School

Jennings, Tracy M (https://experts.colorado.edu/display/fisid_128765)
Senior Instructor, Faculty Director: International Education; Instructor, Faculty Director: Leeds School of Business

Jensen, Howard G.
Professor Emeritus: Leeds School of Business

Jeong, Jaewoong (https://experts.colorado.edu/display/fisid_155543)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Stanford University

Jessor, Richard
Professor Emeritus: Psychology and Neuroscience

Jessup, Elizabeth R (https://experts.colorado.edu/display/fisid_102065)
Professor, Chair: Computer Science
PhD, Yale University

Jesudason, Judith Packer (https://experts.colorado.edu/display/fisid_100338)
Professor: Mathematics
PhD, Harvard University

Jimenez-Palacios, Jose Luis (https://experts.colorado.edu/display/fisid_125580)
Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Professor: Chemistry and Biochemistry
PhD, Massachusetts Institute of Technology

Jobin, Nicole V (https://experts.colorado.edu/display/fisid_103920)
Instructor: Economics; Instructor, Assoc Faculty Director: Sewall RAP
PhD, University of Colorado Boulder

Johnson, Andrew M (https://experts.colorado.edu/display/fisid_149821)
Assistant Professor: University Libraries
MA, University of Wisconsin-Madison

Johnson, Eben Ormston (https://experts.colorado.edu/display/fisid_149952)
Instructor: Lockheed Martin Engineering Management Program
MBA, University of California-Davis

Johnson, Gregory B (https://experts.colorado.edu/display/fisid_111214)
Associate Professor: Religious Studies
PhD, University of Chicago

Johnson, Pieter T J (https://experts.colorado.edu/display/fisid_143590)
Associate Professor: Ecology and Evolutionary Biology
PhD, University of Wisconsin-Madison

Johnson, Stefanie Kathleen (https://experts.colorado.edu/display/fisid_153813)
Assistant Professor: Leeds School of Business
PhD, Rice University

Johnson, Thomas E (https://experts.colorado.edu/display/fisid_104242)
Professor: Institute for Behavioral Genetics (IBG); Professor: Integrative Physiology
PhD, University of Washington

Jonas, David (https://experts.colorado.edu/display/fisid_107145)
Professor: Chemistry and Biochemistry
PhD, Massachusetts Institute of Technology

Jones, Brandon A (https://experts.colorado.edu/display/fisid_149418)
Asst Professor Adjunct: Aerospace Engineering Sciences

Jones, Carla Mae (https://experts.colorado.edu/display/fisid_134172)
Associate Professor: Anthropology; Faculty Director: Center for Asian Studies
PhD, University of North Carolina Chapel Hill

Jones, Craig H (https://experts.colorado.edu/display/fisid_105590)
Professor: Geological Sciences
PhD, Massachusetts Institute of Technology

Jones, Daniel C L. (https://experts.colorado.edu/display/fisid_105705)
Senior Instructor: Honors Program
PhD, University of Colorado Boulder

Jones, Kevin Robert (https://experts.colorado.edu/display/fisid_102094)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of California-Berkeley

Jones, Matthew Carl (https://experts.colorado.edu/display/fisid_144611)
Associate Professor: Psychology and Neuroscience
PhD, University of Michigan Ann Arbor

Jones, Stephen B (https://experts.colorado.edu/display/fisid_101578)
Senior Instructor: Journalism; Asst Dean: College of Media, Communication & Information
PhD, University of Utah

Jones, Stephen Graham (https://experts.colorado.edu/display/fisid_146498)
Professor: English
PhD, Florida State University

Jones, William B.
Professor Emeritus: Mathematics

Joyce, Arthur A (https://experts.colorado.edu/display/fisid_115421)
Professor: Anthropology
PhD, Rutgers University New Brunswick

Judd, Charles M (https://experts.colorado.edu/display/fisid_101853)
Professor: Psychology and Neuroscience
PhD, Columbia University In the City of New York

Juhasz, Joseph
Professor Emeritus: Environmental Design

Juhasz, Suzanne H.
Professor Emeritus: English

Julien, Keith (https://experts.colorado.edu/display/fisid_108913)
Professor, Chair: Applied Mathematics
PhD, University of Cambridge (England)

Junge, Harald Jobst (https://experts.colorado.edu/display/fisid_148593)
Assistant Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Philipps University Marburg (Germany)

Jupille, Joseph H (https://experts.colorado.edu/display/fisid_140088)
Associate Professor: Political Science
PhD, University of Washington

Jurow, Aachey Susan (https://experts.colorado.edu/display/fisid_129478)
Associate Professor: School of Education
PhD, University of California-Berkeley

K

Kaar, Joel L. (https://experts.colorado.edu/display/fisid_148491)
Assistant Professor: Chemical and Biological Engineering
PhD, University of Pittsburgh

Kaempfer, William H (https://experts.colorado.edu/display/fisid_102376)
Professor: Economics
PhD, Duke University

Kaffine, Daniel Thomas (https://experts.colorado.edu/display/fisid_153280)
Associate Professor: Economics
PhD, University of California-Santa Barbara

Kahn, David C (https://experts.colorado.edu/display/fisid_148105)
Senior Instructor Adjunct: Environmental Design

Kallen-Brown, Jedediah A (https://experts.colorado.edu/display/fisid_153965)
Assistant Professor: Computer Science
DSc, ETH Zurich (Switzerland)

Kan, Pui Fong (https://experts.colorado.edu/display/fisid_145806)
Associate Professor: Speech, Language and Hearing Sciences (SLHS)
PhD, University of Minnesota Twin Cities

Kane, Nolan Coburn (https://experts.colorado.edu/display/fisid_151238)
Assistant Professor: Ecology and Evolutionary Biology
PhD, Indiana University Bloomington

Kane, Shaun Kevin (https://experts.colorado.edu/display/fisid_154603)
Assistant Professor: Computer Science; Assistant Professor: Information Science
PhD, University of Washington

Kanner, Michael David (https://experts.colorado.edu/display/fisid_100925)
Lecturer: Political Science; Lecturer: Global RAP; Lecturer: International Affairs Program

Kantha, Lakshmi H (https://experts.colorado.edu/display/fisid_100231)
Professor: Aerospace Engineering Sciences
PhD, Massachusetts Institute of Technology

Kaplan, Frank L.
Professor Emeritus: Journalism

Kaplan, Jules Gordon (https://experts.colorado.edu/display/fisid_106077)
Instructor: Economics; Instructor: Baker RAP; Lecturer: Continuing Education & Professional Studies
PhD, University of Colorado Boulder

Kapteyn, Henry C (https://experts.colorado.edu/display/fisid_115334)
Professor: Physics; Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of California-Berkeley

Karnauskas, Kristopher Benson (https://experts.colorado.edu/display/fisid_155094)
Assistant Professor: Atmospheric and Oceanic Sciences (ATOC);
Assistant Professor: Cooperative Institute for Research in Environmental Sciences (CIRES)
PhD, University of Maryland College Park Campus

Kaschube, Dorothea V.
Professor Emeritus: Anthropology

Kasprzyk, Joseph R. (https://experts.colorado.edu/display/fisid_151506)
Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, Pennsylvania State University

Kassoy, David R.
Professor Emeritus: Mechanical Engineering

Kates, James (https://experts.colorado.edu/display/fisid_146722)
Scholar In Residence: Speech, Language and Hearing Sciences (SLHS)

Katz, Steven
Professor Emeritus: English

Kaufman, Daniel Patrick (https://experts.colorado.edu/display/fisid_134174)
Associate Professor: Philosophy
PhD, University of Massachusetts at Amherst

Kaufmann, Vyga G. (https://experts.colorado.edu/display/fisid_151089)
Instructor: Psychology and Neuroscience

Kawin, Bruce F.
Professor Emeritus: English

Kay, Jennifer E. (https://experts.colorado.edu/display/fisid_153815)
Assistant Professor: Atmospheric and Oceanic Sciences (ATOC);
Assistant Professor: Cooperative Institute for Research in Environmental Sciences (CIRES)
PhD, University of Washington

Kearnes, Keith (https://experts.colorado.edu/display/fisid_118457)
Professor: Mathematics
PhD, University of California-Berkeley

Kearns, Carol A (https://experts.colorado.edu/display/fisid_100536)
Senior Instructor: Baker RAP
PhD, University of Maryland College Park Campus

Kearns, William
Professor Emeritus: Music

Keegan, Brian (https://experts.colorado.edu/display/fisid_158122)
Assistant Professor: Information Science; Assistant Professor: Computer Science
PhD, Northwestern University

Keen, Richard A.
Professor Emeritus: Atmospheric and Oceanic Sciences (ATOC)

Keister, Jay (https://experts.colorado.edu/display/fisid_115734)
Associate Professor: Music
PhD, University of California-Los Angeles

Keller, Eric Robert (https://experts.colorado.edu/display/fisid_151647)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE);
Assistant Professor: Computer Science
PhD, Princeton University

Keller, Matthew C (https://experts.colorado.edu/display/fisid_144507)
Associate Professor: Psychology and Neuroscience
PhD, University of Michigan Ann Arbor

Keller, Wolfgang (https://experts.colorado.edu/display/fisid_141891)
Professor: Economics
PhD, Yale University

Kellogg, Daniel Dixon (https://experts.colorado.edu/display/fisid_141124)
Associate Professor: Music
DMA, Yale University

Kelsey, Penelope M. (https://experts.colorado.edu/display/fisid_147607)
Professor: English; Faculty Director: Native American and Indigenous Studies
PhD, University of Minnesota Twin Cities

Kelso, Alec J.
Professor Emeritus: Anthropology

Kemp, David John (https://experts.colorado.edu/display/fisid_158828)
Lecturer: Environmental Design

Kempf, Sascha (https://experts.colorado.edu/display/fisid_149628)
Assistant Professor: Laboratory for Atmospheric and Space Physics (LASP); Assistant Professor: Physics
Dr habil, Tech Univ of Braunschweig (Germany)

Kent, Susan K (https://experts.colorado.edu/display/fisid_100080)
Professor: History
PhD, Brandeis University

Keplinger, Christoph Matthias (https://experts.colorado.edu/display/fisid_156421)
Assistant Professor: Mechanical Engineering
PhD, Johannes Kepler University Linz (Austria)

Ketelsen, Christian W (https://experts.colorado.edu/display/fisid_147863)
Instructor: Computer Science
PhD, University of Colorado Boulder

Kiernan-Johnson, Derek Huntley (https://experts.colorado.edu/display/fisid_145008)
Instructor: School of Law
JD, University of Michigan Ann Arbor

Kilpatrick, Zachary Peter (https://experts.colorado.edu/display/fisid_155782)
Assistant Professor: Applied Mathematics
PhD, University of Utah

Kim, Albert E. (https://experts.colorado.edu/display/fisid_143740)
Associate Professor: Institute of Cognitive Science (ICS); Associate Professor: Psychology and Neuroscience
PhD, University of Pennsylvania

Kim, Hun Shik (https://experts.colorado.edu/display/fisid_141126)
Associate Professor: Journalism
PhD, University of Missouri-Columbia

Kim, Jin-Hyuk (https://experts.colorado.edu/display/fisid_149615)
Assistant Professor: Economics
PhD, Cornell University

Kim, Kwangmin (https://experts.colorado.edu/display/fisid_147160)
Assistant Professor: History
PhD, University of California-Berkeley

Kim, Sangbok (https://experts.colorado.edu/display/fisid_149220)
Instructor: Asian Languages and Civilizations
PhD, University of California-Los Angeles

Kim, Suyeon (https://experts.colorado.edu/display/fisid_153470)
Lecturer, Instructor: Music

Kimbrough, Randle Keller (https://experts.colorado.edu/display/fisid_141167)
Associate Professor: Asian Languages and Civilizations
PhD, Yale University

King, D Brett (https://experts.colorado.edu/display/fisid_103815)
Senior Instructor: Psychology and Neuroscience; Lecturer: Continuing Education & Professional Studies; Instructor: Farrand RAP
PhD, Colorado State University

King, Joy K.
Professor Emeritus: Classics

King, Roger A.
Professor Emeritus: Computer Science

King, William M.
Professor Emeritus: Ethnic Studies

Kingsberg, Miriam L. (https://experts.colorado.edu/display/fisid_147112)
Associate Professor: History
PhD, University of California-Berkeley

Kinneavy, Gerald B.
Professor Emeritus: English

Kinney, Edward R (https://experts.colorado.edu/display/fisid_101717)
Professor: Physics
PhD, Massachusetts Institute of Technology

Kintsch, Walter
Professor Emeritus: Psychology and Neuroscience

Kirschling, Wayne (https://experts.colorado.edu/display/fisid_123149)
Scholar In Residence: Lockheed Martin Engineering Management
Program
DBA, University of Colorado Boulder

Kirshner, Benjamin R (https://experts.colorado.edu/display/fisid_134707)
Associate Professor, Faculty Director: School of Education
PhD, Stanford University

Kittel, Timothy (https://experts.colorado.edu/display/fisid_139473)
Faculty Director: International Education; Lecturer: Geography

Kjølseth, J. Rolf
Professor Emeritus: Sociology

Klages, Mary K (https://experts.colorado.edu/display/fisid_101897)
Associate Professor: English
PhD, Stanford University

Klaus, David M (https://experts.colorado.edu/display/fisid_107103)
Professor: Aerospace Engineering Sciences; Associate Professor:
BioServe Space Technologies
PhD, University of Colorado Boulder

Kleeman, Faye Yuan (https://experts.colorado.edu/display/fisid_113313)
Professor: Asian Languages and Civilizations
PhD, University of California-Berkeley

Kleeman, Terry F (https://experts.colorado.edu/display/fisid_114181)
Professor: Asian Languages and Civilizations; Professor: Religious
Studies
PhD, University of California-Berkeley

Kleiber, William Paul (https://experts.colorado.edu/display/fisid_151943)
Assistant Professor: Applied Mathematics
PhD, University of Washington

Kline, Bruce Richard (https://experts.colorado.edu/display/fisid_146513)
Senior Instructor: Leeds School of Business; Faculty Director:
International Education
MA, Northwestern University

Klinger, Eliza G (https://experts.colorado.edu/display/fisid_135110)
Instructor: Program for Writing and Rhetoric
MA, New Mexico State University

Klinger, Eric O (https://experts.colorado.edu/display/fisid_139359)
Senior Instructor: Program for Writing and Rhetoric
MA, New Mexico State University

Klymkowsky, Michael W (https://experts.colorado.edu/display/fisid_101226)
Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, California Institute of Technology

Knievel, Jennifer E. (https://experts.colorado.edu/display/fisid_120051)
Associate Professor, Faculty Director, Associate Dean: University Libraries
MS, University of Illinois at Urbana-Champaign

Knight, Jennifer Kirsten (https://experts.colorado.edu/display/fisid_101933)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of Michigan Ann Arbor

Knipp, Delores Jane (https://experts.colorado.edu/display/fisid_147655)
Research Professor: Aerospace Engineering Sciences
PhD, University of California-Los Angeles

Knowlton, Jennifer H (https://experts.colorado.edu/display/fisid_112458)
Senior Instructor: Program for Writing and Rhetoric
MA, University of Colorado Boulder

Knox, David Allen (https://experts.colorado.edu/display/fisid_158054)
Instructor: Computer Science
PhD, University of Colorado Health Sciences Center

Knutsen, Jeffrey Steven (https://experts.colorado.edu/display/fisid_145534)
Instructor: Mechanical Engineering
PhD, University of Colorado Boulder

Koberg, Christine S.
Professor Emeritus: Leeds School of Business

Koch, Tad H.
Professor Emeritus: Chemistry and Biochemistry
PhD, Iowa State University

Kocher, Ruth Ellen (https://experts.colorado.edu/display/fisid_143618)
Professor, Chair: English
PhD, Arizona State University

Kociolek, John Patrick (https://experts.colorado.edu/display/fisid_145728)
Faculty Director: University of Colorado Museum of Natural History;
Professor: Ecology and Evolutionary Biology
PhD, University of Michigan Ann Arbor

Kodas, Michael George (https://experts.colorado.edu/display/fisid_147577)
Instructor: Journalism; Assoc Faculty Director: Center for Environmental
Journalism
BS, University of Missouri-Columbia

Kolb, Burton A.
Professor Emeritus: Leeds School of Business

Kopen, Carmen Lynn (https://experts.colorado.edu/display/fisid_127181)
Instructor: Spanish and Portuguese
MA, University of Colorado Boulder

Kopff, E Christian (https://experts.colorado.edu/display/fisid_100649)
Associate Professor: Honors Program; Associate Professor: Classics
PhD, University of North Carolina Chapel Hill

Korevaar, David J (https://experts.colorado.edu/display/fisid_118374)
Professor: Music
DMA, The Juilliard School

Kornish, Laura Joyce (https://experts.colorado.edu/display/fisid_139966)
Associate Professor: Leeds School of Business
PhD, Stanford University

Koschmann, Matthew A. (https://experts.colorado.edu/display/fisid_145807)

Associate Professor: Communication
PhD, University of Texas at Austin

Koster, Hon-Yim

Professor Emeritus: Civil, Environmental and Architectural Engineering

Koster, Jean N.

Professor Emeritus: Aerospace Engineering Sciences

Kostoglodova, Elena Yurievna (https://experts.colorado.edu/display/fisid_100976)

Senior Instructor: Germanic and Slavic Languages and Literatures
MA, University of Colorado Boulder

Kotys-Schwartz, Daria (https://experts.colorado.edu/display/fisid_144738)

Senior Instructor: Mechanical Engineering; Faculty Director: College of Engineering and Applied Science
PhD, University of Colorado Boulder

Koval, Carl A (https://experts.colorado.edu/display/fisid_101151)

Professor, Chair: Chemistry and Biochemistry
PhD, California Institute of Technology

Kowalchuk, Andrea (https://experts.colorado.edu/display/fisid_154509)

Instructor: Herbst Humanities Program
PhD, University of Dallas

Kozar, Kenneth A.

Professor Emeritus: Leeds School of Business
PhD, University of Minnesota

Kraft, Richard

Professor Emeritus: School of Education

Krakoff, Sarah A (https://experts.colorado.edu/display/fisid_109697)

Professor: School of Law
JD, University of California-Berkeley

Kralj, Joel M (https://experts.colorado.edu/display/fisid_153055)

Assistant Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Boston University

Krarti, Moncef (https://experts.colorado.edu/display/fisid_104154)

Professor: Civil, Environmental and Architectural Engineering
PhD, University of Colorado Boulder

Kratzke, Peter J (https://experts.colorado.edu/display/fisid_126546)

Senior Instructor: Program for Writing and Rhetoric; Lecturer: Continuing Education & Professional Studies
PhD, University of Kentucky

Krauel, Javier (https://experts.colorado.edu/display/fisid_143248)

Associate Professor: Spanish and Portuguese; Faculty Director: International Education
PhD, Duke University

Kraus, Mary J (https://experts.colorado.edu/display/fisid_100903)

Professor: Geological Sciences
PhD, University of Colorado Boulder

Krauter, Kenneth S (https://experts.colorado.edu/display/fisid_107978)

Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Yeshiva University

Krauth, Philip L.

Professor Emeritus: English

Kreider, Jan F.

Professor Emeritus: Civil, Environmental and Architectural Engineering

Kreith, Frank

Professor Emeritus: Mechanical Engineering

Krizek, Kevin J. (https://experts.colorado.edu/display/fisid_145292)

Professor, Faculty Director: Environmental Design
PhD, University of Washington

Kroll, Paul W (https://experts.colorado.edu/display/fisid_102408)

Professor: Asian Languages and Civilizations
PhD, University of Michigan Ann Arbor

Krysl, Marilyn D.

Professor Emeritus: English

Kuchta, Robert (https://experts.colorado.edu/display/fisid_100844)

Professor: Chemistry and Biochemistry
PhD, Brandeis University

Kuczun, Sam

Professor Emeritus: Journalism

Kuempel, Peter L.

Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

Kuester, Edward F (https://experts.colorado.edu/display/fisid_102489)

Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of Colorado Boulder

Kugel, Jennifer Franzen (https://experts.colorado.edu/display/fisid_109472)

Assoc Research Professor: Chemistry and Biochemistry
PhD, University of Colorado Boulder

Kuglitsch, Rebecca Zuege (https://experts.colorado.edu/display/fisid_152452)

Assistant Professor: University Libraries
MLS, University of Washington

Kuhn, Timothy R (https://experts.colorado.edu/display/fisid_118144)

Professor, Assoc Chair: Communication
PhD, Arizona State University

Kunce, Catherine (https://experts.colorado.edu/display/fisid_120631)

Senior Instructor: Program for Writing and Rhetoric; Senior Instructor: Farrand RAP
PhD, University of Denver

Kunkel, Jerry W.

Professor Emeritus: Art and Art History

Kunz, P. Dale

Professor Emeritus: Physics

Kuskin, William (https://experts.colorado.edu/display/fisid_143742)

Professor: English
PhD, University of Wisconsin-Madison

Kuznetsov, Sergei Eugenievitch (https://experts.colorado.edu/display/fisid_113246)
Associate Professor, Assoc Chair: Mathematics
DSc, Vilnius State Univ (Lithuania)

L

Labio, Catherine (https://experts.colorado.edu/display/fisid_147608)
Associate Professor: English
PhD, New York University

Lagman, Eileen Anne (https://experts.colorado.edu/display/fisid_156308)
Assistant Professor: Program for Writing and Rhetoric; Assistant Professor: English
MA, DePaul University

Laguna, Manuel (https://experts.colorado.edu/display/fisid_102975)
Professor, Faculty Director: Leeds School of Business
PhD, University of Texas at Austin

Lambert, Joanna E (https://experts.colorado.edu/display/fisid_156206)
Professor: Anthropology
PhD, University of Illinois at Urbana-Champaign

Lamos, Steven Joseph (https://experts.colorado.edu/display/fisid_141169)
Associate Professor, Assoc Faculty Director: Program for Writing and Rhetoric; Associate Professor: English
PhD, University of Illinois at Urbana-Champaign

Lane, Constance Irene (https://experts.colorado.edu/display/fisid_149778)
Instructor: Theatre and Dance
BA, Beloit College

Lange, Anja K. (https://experts.colorado.edu/display/fisid_104576)
Faculty Director: International Education; Senior Instructor: Herbst Humanities Program
PhD, University of Colorado Boulder

Lansford, Edwin Tyler (https://experts.colorado.edu/display/fisid_147620)
Instructor: Classics

Lanterman, John Chesley (https://experts.colorado.edu/display/fisid_140309)
Senior Instructor: Environmental Design
MLA, University of Colorado Denver

LaRocca, Thomas J (https://experts.colorado.edu/display/fisid_143989)
Instructor: Integrative Physiology
PhD, University of Colorado Boulder

Larsen, Kai Rune (https://experts.colorado.edu/display/fisid_118160)
Associate Professor: Leeds School of Business; Associate Professor: Information Science
PhD, SUNY at Albany

Larson, Edwin E.
Professor Emeritus: Geological Sciences

Larson, Kristine M (https://experts.colorado.edu/display/fisid_105437)
Professor: Aerospace Engineering Sciences
PhD, University of California-San Diego

Lawrence, Dale A (https://experts.colorado.edu/display/fisid_104057)
Professor: Aerospace Engineering Sciences; Associate Professor: Research & Engineering Ctr for Unmanned Vehicles (RECUV)
PhD, Cornell University

Lawrence, Stephen R (https://experts.colorado.edu/display/fisid_102032)
Assoc Dean: Be Boulder Anywhere; Associate Professor: Leeds School of Business
PhD, Carnegie Mellon University

Lawson, Angelica Marie (https://experts.colorado.edu/display/fisid_154727)
Assistant Professor: Ethnic Studies; Assistant Professor: Film Studies; Faculty Director: Native American and Indigenous Studies
PhD, University of Arizona

Lazar, Joseph
Professor Emeritus: Leeds School of Business

Lazarino, Graziana
Professor Emeritus: French & Italian

Le, Hanh-Phuc (https://experts.colorado.edu/display/fisid_156223)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of California-Berkeley

Leach, Chris (https://experts.colorado.edu/display/fisid_105152)
Professor: Leeds School of Business
PhD, Cornell University

Leben, Robert R (https://experts.colorado.edu/display/fisid_105118)
Research Professor: Aerospace Engineering Sciences
PhD, University of Colorado Boulder

LeBourgeois, Monique Katherine (https://experts.colorado.edu/display/fisid_148411)
Assistant Professor: Integrative Physiology; Assistant Professor: Psychology and Neuroscience
PhD, University of Southern Mississippi

Lebra, Joyce Chapman
Professor Emeritus: History

Lecompte, Margaret D.
Professor Emeritus: School of Education

Lee, C. Nicholas
Professor Emeritus: Germanic and Slavic Languages and Literatures

Lee, Jintae (https://experts.colorado.edu/display/fisid_115390)
Associate Professor: Leeds School of Business
PhD, Massachusetts Institute of Technology

Lee, Mi-Kyoung (https://experts.colorado.edu/display/fisid_141821)
Associate Professor: Philosophy; Associate Professor: Classics
PhD, Harvard University

Lee, Minhyea (https://experts.colorado.edu/display/fisid_145209)
Assistant Professor: Physics
PhD, University of Chicago

Lee, Se-Hee (https://experts.colorado.edu/display/fisid_144739)
Professor, Assoc Chair: Mechanical Engineering
PhD, Seoul Nat Univ (Korea)

Lee, Yung-Cheng (https://experts.colorado.edu/display/fisid_103170)
Professor: Mechanical Engineering
PhD, University of Minnesota Twin Cities

Lehnert, Doris Pridonoff
Professor Emeritus: Music

Lehnert, Oswald
Professor Emeritus: Music

Leiderman, Mark N (https://experts.colorado.edu/display/fisid_115326)
Professor, Chair: Germanic and Slavic Languages and Literatures
Dr habil, Ural State Pedagogical Univ (Russia)

Leigh, Steven Robert (https://experts.colorado.edu/display/fisid_151706)
Dean: College of Arts and Sciences; Professor: Anthropology
PhD, Northwestern University

Leinwand, Leslie Anne (https://experts.colorado.edu/display/fisid_107104)
Distinguished Professor, Faculty Director: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Yale University

Lekson, Steve (https://experts.colorado.edu/display/fisid_108312)
Professor: University of Colorado Museum of Natural History; Professor: Anthropology
PhD, University of New Mexico

Leong, Daphne (https://experts.colorado.edu/display/fisid_115747)
Associate Professor: Music
PhD, University of Rochester

Lessley, Merrill J.
Professor Emeritus: Theatre and Dance

Lester, Alan P. (https://experts.colorado.edu/display/fisid_105385)
Lecturer: Geological Sciences
PhD, University of Colorado Boulder

Lester, Anne E (https://experts.colorado.edu/display/fisid_139524)
Associate Professor, Assoc Chair: History
PhD, Princeton University

Levitt, Paul M.
Professor Emeritus: English

Lewandowski, Heather Jean (https://experts.colorado.edu/display/fisid_111815)
Associate Professor, Assoc Chair: Physics
PhD, University of Colorado Boulder

Lewis, Barry L.
Professor Emeritus: Leeds School of Business

Lewis, Clayton H (https://experts.colorado.edu/display/fisid_100307)
Professor: Computer Science; Professor: Information Science
PhD, University of Michigan Ann Arbor

Lewis, Gary J (https://experts.colorado.edu/display/fisid_145854)
Professor, Instructor: Music
MM, Texas Tech University

Lewis, Mary Beth (https://experts.colorado.edu/display/fisid_153829)
Senior Instructor: Leeds School of Business
MBA, University of Pittsburgh Bradford Campus

Lewis, William M (https://experts.colorado.edu/display/fisid_102314)
Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Professor: Ecology and Evolutionary Biology; Professor: Center for Limnology
PhD, Indiana University Bloomington

Lewon, Jennifer Walentas (https://experts.colorado.edu/display/fisid_147362)
Clinical Asst Professor, Lecturer: Speech, Language and Hearing Sciences (SLHS)

Leyk, Stefan (https://experts.colorado.edu/display/fisid_145192)
Associate Professor: Geography
PhD, Univ of Zurich (Switzerland)

Li, Baowen (https://experts.colorado.edu/display/fisid_156203)
Professor: Mechanical Engineering
PhD, Carl von Ossietzky Universitat Oldenburg (Germany)

Li, Congming (https://experts.colorado.edu/display/fisid_100647)
Professor: Applied Mathematics
PhD, New York University

Li, Xiang (https://experts.colorado.edu/display/fisid_145009)
Assistant Professor: University Libraries
MS, University of Michigan Ann Arbor

Li, Xinlin (https://experts.colorado.edu/display/fisid_100016)
Professor: Laboratory for Atmospheric and Space Physics (LASP); Professor: Aerospace Engineering Sciences
PhD, Dartmouth College

Libertun, Ariel Ruben (https://experts.colorado.edu/display/fisid_140697)
Asst Professor Adjunct: Electrical, Computer and Energy Engineering (ECEE)

Lichtenstein, Donald (https://experts.colorado.edu/display/fisid_101701)
Professor: Leeds School of Business
PhD, University of South Carolina - Columbia

Liel, Abbie Boggiano (https://experts.colorado.edu/display/fisid_146431)
Associate Professor, Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, Stanford University

Lightner, Michael R (https://experts.colorado.edu/display/fisid_101723)
Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Carnegie Mellon University

Lillydahl, Jane
Professor Emeritus: Economics

Lim, Sungyun A. (https://experts.colorado.edu/display/fisid_148726)
Assistant Professor: History
PhD, University of California-Berkeley

Limerick, Patricia N (https://experts.colorado.edu/display/fisid_105459)
Professor, Faculty Director: Center of the American West; Professor: History
PhD, Yale University

Lin, Hsiao-Ling (https://experts.colorado.edu/display/fisid_149958)
Instructor: Music
MM, DePaul University

Linden, Karl G. (https://experts.colorado.edu/display/fisid_143747)
Professor: Civil, Environmental and Architectural Engineering; Faculty
Director: College of Engineering and Applied Science
PhD, University of California-Davis

Lindquist, Thea L (https://experts.colorado.edu/display/fisid_122803)
Professor: University Libraries
PhD, University of Wisconsin-Madison

Lindsay, Georgia (https://experts.colorado.edu/display/fisid_152004)
Senior Instructor: Environmental Design
PhD, University of California-Berkeley

Lineberger, William Carl (https://experts.colorado.edu/display/fisid_101695)
Distinguished Professor: Chemistry and Biochemistry
PhD, Georgia Institute of Technology

Linhart, Yan B.
Professor Emeritus: Ecology and Evolutionary Biology

Link, Christopher D (https://experts.colorado.edu/display/fisid_109073)
Associate Professor: Integrative Physiology
PhD, University of Massachusetts at Amherst

Linn, Robert L.
Professor Emeritus: School of Education

Linsky, Jeffrey
Professor Emeritus: Astrophysical and Planetary Sciences (APS)

Linz, Robert Michael (https://experts.colorado.edu/display/fisid_146868)
Senior Instructor: School of Law
MS, Florida State University

Liotta, Jeanne M. (https://experts.colorado.edu/display/fisid_145808)
Associate Professor: Film Studies
BFA, New York University

Lisbon, Adam Harry (https://experts.colorado.edu/display/fisid_152869)
Assistant Professor: University Libraries
MS, SUNY at Albany

Liston, Daniel P (https://experts.colorado.edu/display/fisid_102033)
Professor: School of Education
PhD, University of Wisconsin-Madison

Litt, Jill S. (https://experts.colorado.edu/display/fisid_140636)
Associate Professor: Environmental Studies Program
PhD, Johns Hopkins University

Little, Katherine C. (https://experts.colorado.edu/display/fisid_149872)
Professor: English
PhD, Duke University

Littlejohn, Ray Lynn (https://experts.colorado.edu/display/fisid_151752)
Scholar In Residence: Lockheed Martin Engineering Management
Program
PhD, University of Oklahoma Norman Campus

Liu, Faan Tone
Instructor: Mathematics
PhD, University of Colorado at Boulder

Liu, Xiaodong (https://experts.colorado.edu/display/fisid_144508)
Associate Professor: Economics
PhD, Ohio State University

Liu, Xuedong (https://experts.colorado.edu/display/fisid_118458)
Professor: Chemistry and Biochemistry
PhD, University of Wisconsin-Madison

Liu, Youjian (https://experts.colorado.edu/display/fisid_126283)
Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Ohio State University

Livneh, Ben (https://experts.colorado.edu/display/fisid_151999)
Assistant Professor: Cooperative Institute for Research in Environmental
Sciences (CIRES); Assistant Professor: Civil, Environmental and
Architectural Engineering
PhD, University of Washington

Lladser, Manuel Bosco (https://experts.colorado.edu/display/fisid_134170)
Associate Professor: Applied Mathematics
PhD, Ohio State University

Loersch, Christopher Alan (https://experts.colorado.edu/display/fisid_149841)
Assistant Professor: Psychology and Neuroscience
PhD, Ohio State University

Loewenstein, Mark J (https://experts.colorado.edu/display/fisid_102088)
Professor: School of Law
JD, University of Illinois at Urbana-Champaign

Logan, Kely Irene (https://experts.colorado.edu/display/fisid_147340)
Associate Professor: Advertising, Public Relations and Media Design
PhD, University of Texas at Austin

Long, Chris Evin (https://experts.colorado.edu/display/fisid_155455)
Associate Professor: University Libraries
MA, Indiana University Bloomington

Long, Mary K (https://experts.colorado.edu/display/fisid_109994)
Senior Instructor: Spanish and Portuguese
PhD, Princeton University

Long, Rong (https://experts.colorado.edu/display/fisid_151301)
Assistant Professor: Mechanical Engineering
PhD, Cornell University

Lopez, Enrique J (https://experts.colorado.edu/display/fisid_151426)
Assistant Professor: School of Education
PhD, Stanford University

Losoff, Barbara Ann (https://experts.colorado.edu/display/fisid_106944)
Associate Professor, Assoc Faculty Director: University Libraries
MLS, Emporia State University

Louie, Donna Funghar (https://experts.colorado.edu/display/fisid_110827)
Instructor: Baker RAP; Instructor: Libby Arts RAP

Lovenduski, Nicole Suzanne (https://experts.colorado.edu/display/fisid_147557)

Assistant Professor: Atmospheric and Oceanic Sciences (ATOC);
Assistant Professor: Institute of Arctic & Alpine Research (INSTAAR)
PhD, University of California-Los Angeles

Lowry, Christopher (https://experts.colorado.edu/display/fisid_143371)

Associate Professor: Integrative Physiology
PhD, Oregon State University

Lundell, Albert T.

Professor Emeritus: Mathematics

Lundquist, Julie Kay (https://experts.colorado.edu/display/fisid_147838)

Associate Professor: Atmospheric and Oceanic Sciences (ATOC)
PhD, University of Colorado Boulder

Lundy, Tiel Louise (https://experts.colorado.edu/display/fisid_151085)

Instructor: Film Studies; Instructor, Assoc Faculty Director: Libby Arts RAP
PhD, University of Denver

Lv, Qin (https://experts.colorado.edu/display/fisid_145832)

Associate Professor: Computer Science
PhD, Princeton University

Lymberopoulos, John P.

Professor Emeritus: Leeds School of Business

Lynch, Carol B.

Professor Emeritus: Ecology and Evolutionary Biology

Lynch, G. Robert

Professor Emeritus: Integrative Physiology

Lynch, John G. (https://experts.colorado.edu/display/fisid_147448)

Faculty Director, Professor, Associate Dean: Leeds School of Business
PhD, University of Illinois at Chicago

Lyons, Thomas

Professor Emeritus: English

Lyons, Tim (https://experts.colorado.edu/display/fisid_100214)

Instructor: Program for Writing and Rhetoric
MA, Johns Hopkins University

M

Macdonald, Christine (https://experts.colorado.edu/display/fisid_105513)

Senior Instructor: Program for Writing and Rhetoric
PhD, University of Colorado Boulder

Macfee, Raymond D. Jr

Professor Emeritus: Leeds School of Business

Mack, Natalie M (https://experts.colorado.edu/display/fisid_115340)

Senior Instructor: School of Law
JD, University of Colorado Boulder

MacLennan, Joseph E (https://experts.colorado.edu/display/fisid_104854)

Professor Attendant Rank: Physics

Macrae, Robert Eugene

Professor Emeritus: Mathematics

Maeda, Daryl Joji (https://experts.colorado.edu/display/fisid_141460)

Associate Professor: Ethnic Studies; Faculty Director: Academic Affairs;
Associate Professor: History
PhD, University of Michigan Ann Arbor

Magnanini, Suzanne M. (https://experts.colorado.edu/display/fisid_118145)

Associate Professor, Chair: French & Italian; Faculty Director: International Education
PhD, University of Chicago

Mahan, Kevin H (https://experts.colorado.edu/display/fisid_143975)

Associate Professor: Geological Sciences
PhD, University of Massachusetts at Amherst

Mahanthappa, K. T.

Professor Emeritus: Physics
PhD, Harvard University

Mahoney, Melissa J (https://experts.colorado.edu/display/fisid_129517)

Instructor, Lecturer: Chemical and Biological Engineering
PhD, Cornell University

Maier, Steven F (https://experts.colorado.edu/display/fisid_100482)

Distinguished Professor: Psychology and Neuroscience
PhD, University of Pennsylvania

Main, Gloria L.

Professor Emeritus: History

Main, Michael G.

Professor Emeritus: Computer Science
PhD, Washington State University

Majerfeld, Arnoldo

Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)

Maksimovic, Dragan (https://experts.colorado.edu/display/fisid_105609)

Professor: Electrical, Computer and Energy Engineering (ECEE); Faculty Director: College of Engineering and Applied Science
PhD, California Institute of Technology

Malcolm, Karen L (https://experts.colorado.edu/display/fisid_108575)

Instructor: Spanish and Portuguese
MA, University of Nebraska-Lincoln

Malin, Jonathan (https://experts.colorado.edu/display/fisid_151714)

Associate Professor: Music; Associate Professor: Jewish Studies
PhD, University of Chicago

Malitz, Jerome I.

Professor Emeritus: Mathematics

Maloy, Rebecca (https://experts.colorado.edu/display/fisid_125582)

Professor, Associate Professor: Music
PhD, University of Cincinnati

Malville, J. McKim

Professor Emeritus: Astrophysical and Planetary Sciences (APS)

Maness, Jack Marshall (https://experts.colorado.edu/display/fisid_141176)

Associate Professor, Faculty Director: University Libraries
MLS, Emporia State University

Manley, Kevin W (https://experts.colorado.edu/display/fisid_142342)
Instructor: Mathematics
PhD, University of Colorado Boulder

Mann, Ralph
Professor Emeritus: History

Manno, Jesse J (https://experts.colorado.edu/display/fisid_120813)
Senior Instructor: Theatre and Dance

Manteuffel, Thomas A (https://experts.colorado.edu/display/fisid_102137)
Professor: Applied Mathematics
PhD, University of Illinois at Urbana-Champaign

Mapel, David Reed (https://experts.colorado.edu/display/fisid_104552)
Associate Professor: Political Science
PhD, Johns Hopkins University

Marchitto, Thomas (https://experts.colorado.edu/display/fisid_128241)
Associate Professor: Institute of Arctic & Alpine Research (INSTAAR);
Associate Professor: Geological Sciences
PhD, Massachusetts Institute of Technology

Marden, Jason R. (https://experts.colorado.edu/display/fisid_147582)
Associate Professor: Electrical, Computer and Energy Engineering (ECEE);
Associate Professor: Aerospace Engineering Sciences
PhD, University of California-Los Angeles

Marino, Alysia Diane (https://experts.colorado.edu/display/fisid_146427)
Associate Professor: Physics
PhD, University of California-Berkeley

Marks, Alexia Brunet (https://experts.colorado.edu/display/fisid_147610)
Associate Professor: School of Law
PhD, Purdue University

Markusen, James R (https://experts.colorado.edu/display/fisid_103187)
Distinguished Professor: Economics
PhD, Boston College

Marshak, Michael Pesek (https://experts.colorado.edu/display/fisid_156422)
Assistant Professor: Renewable & Sustainable Energy Institute (RASEI);
Assistant Professor: Chemistry and Biochemistry
PhD, Massachusetts Institute of Technology

Marshall, Nathan Thomas (https://experts.colorado.edu/display/fisid_156034)
Assistant Professor: Leeds School of Business
PhD, Indiana University Bloomington

Marshall, Robert Andrew (https://experts.colorado.edu/display/fisid_155957)
Assistant Professor: Aerospace Engineering Sciences
PhD, Stanford University

Marslett, Geoffrey C (https://experts.colorado.edu/display/fisid_155970)
Assistant Professor: Film Studies
MFA, University of Texas at Austin

Martin, Andrew (https://experts.colorado.edu/display/fisid_113238)
Professor: Ecology and Evolutionary Biology; Faculty Director:
International Education; Faculty Director: A&S ASSETT
PhD, University of Hawaii at Manoa

Martin, James H (https://experts.colorado.edu/display/fisid_100495)
Professor: Institute of Cognitive Science (ICS); Professor: Computer
Science
PhD, University of California-Berkeley

Martin, Jennifer Mary (https://experts.colorado.edu/display/fisid_110125)
Senior Instructor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of Washington

Martin, Jessica Erin (https://experts.colorado.edu/display/fisid_143770)
Instructor: Global RAP; Instructor: International Affairs Program
PhD, University of Colorado Boulder

Martins-Filho, Carlos B (https://experts.colorado.edu/display/fisid_147510)
Professor: Economics
PhD, University of Tennessee-Knoxville

Martinsson, Per-Gunnar J (https://experts.colorado.edu/display/fisid_141180)
Professor: Applied Mathematics
PhD, University of Texas at Austin

Martuscelli, Tania A. (https://experts.colorado.edu/display/fisid_148379)
Assistant Professor: Spanish and Portuguese
PhD, University of Massachusetts at Amherst

Maskus, Keith E (https://experts.colorado.edu/display/fisid_103414)
Professor: Economics
PhD, University of Michigan Ann Arbor

Maslanik, James
Professor Emeritus: Aerospace Engineering Sciences

Mason, Gesel R (https://experts.colorado.edu/display/fisid_149966)
Assistant Professor: Theatre and Dance; Assistant Professor: Critical
Media Practices
MFA, University of Colorado Boulder

Mason, Patrick C (https://experts.colorado.edu/display/fisid_101840)
Professor: Music
MM, University of Nebraska-Lincoln

Massey-Warren, Sarah (https://experts.colorado.edu/display/fisid_145057)
Instructor: Program for Writing and Rhetoric
PhD, University of Colorado Boulder

Masters, Ryan Kelly (https://experts.colorado.edu/display/fisid_152730)
Assistant Professor: Institute of Behavioral Science (IBS); Assistant
Professor: Sociology
PhD, University of Texas at Austin

Mathys, Peter (https://experts.colorado.edu/display/fisid_100084)
Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Swiss Federal Instit of Tech, Zurich (Switzerland)

Matsunaga, Yumiko (https://experts.colorado.edu/display/fisid_149899)
Senior Instructor: Asian Languages and Civilizations
MA, University of Wisconsin-Madison

Matsuo, Tomoko (https://experts.colorado.edu/display/fisid_145041)
Assistant Professor: Aerospace Engineering Sciences
PhD, SUNY at Stony Brook

Mattar, Karim (https://experts.colorado.edu/display/fisid_153056)
Assistant Professor: English
DPhil, Oxford Univ (England)

Matthew, Dayna Bowen (https://experts.colorado.edu/display/fisid_129497)
Professor: School of Law
JD, University of Virginia

Matusik, Sharon Marie Frances (https://experts.colorado.edu/display/fisid_133564)
Professor, Dean: Leeds School of Business
PhD, University of Washington

Maute, Kurt Karl (https://experts.colorado.edu/display/fisid_113875)
Professor: Aerospace Engineering Sciences; Professor, Faculty
Director: Center for Aerospace Structures (CAS); Professor: Mechanical
Engineering
PhD, Univ of Stuttgart (Germany)

Mayer, Edgar N.
Professor Emeritus: French & Italian

Mayer, Stephanie Susan (https://experts.colorado.edu/display/fisid_114948)
Senior Instructor: Ecology and Evolutionary Biology

Mayer, Thomas
Professor Emeritus: Sociology

Mayr, Peter (https://experts.colorado.edu/display/fisid_155858)
Assistant Professor: Mathematics
Dr habil, Johannes Kepler University Linz (Austria)

Mazzeo, Robert (https://experts.colorado.edu/display/fisid_101031)
Associate Professor, Assoc Chair: Integrative Physiology
PhD, University of California-Berkeley

Mc Nown, Robert F (https://experts.colorado.edu/display/fisid_105915)
Professor: Leeds School of Business
PhD, University of California-San Diego

McBryan, Oliver
Professor Emeritus: Computer Science

McCabe, J Terrence (https://experts.colorado.edu/display/fisid_100063)
Professor: Anthropology; Professor: Institute of Behavioral Science (IBS)
PhD, SUNY at Binghamton

McCain, Christy (https://experts.colorado.edu/display/fisid_145010)
Associate Professor: University of Colorado Museum of Natural History;
Associate Professor: Ecology and Evolutionary Biology
PhD, University of Kansas

McCall, Raymond (https://experts.colorado.edu/display/fisid_102673)
Associate Professor: Environmental Design
PhD, University of California-Berkeley

McCarthy, Kevin
Professor Emeritus: Music

McClelland, Gary H.
Professor Emeritus: Psychology and Neuroscience

McConkey, Edwin H.
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

McCormick, Steven
Professor Emeritus: Applied Mathematics

McCray, Richard A.
Professor Emeritus: Astrophysical and Planetary Sciences (APS)

McDevitt, Michael Joseph (https://experts.colorado.edu/display/fisid_122949)
Professor, Assoc Chair: Journalism
PhD, Stanford University

McDonald, Margaret M (https://experts.colorado.edu/display/fisid_134703)
Associate Professor: Music
DMA, University of California-Santa Barbara

McGilvray, Dennis B.
Professor Emeritus: Anthropology

McGinley, William (https://experts.colorado.edu/display/fisid_102195)
Associate Professor: School of Education
PhD, University of Illinois at Urbana-Champaign

McGoodwin, James Russell
Professor Emeritus: Anthropology

McGranahan, Carole Ann (https://experts.colorado.edu/display/fisid_122673)
Associate Professor: Anthropology; Associate Professor: History
PhD, University of Michigan Ann Arbor

McGrath, Michael T (https://experts.colorado.edu/display/fisid_100133)
Professor Adjunct: Aerospace Engineering Sciences

McGraw, Albert Peter (https://experts.colorado.edu/display/fisid_133262)
Associate Professor: Leeds School of Business; Associate Professor:
Psychology and Neuroscience
PhD, Ohio State University

McGuire, Vincent X (https://experts.colorado.edu/display/fisid_100793)
Senior Instructor: Farrand RAP
PhD, University of Colorado Boulder

McHenry, Charles
Professor Emeritus: Chemistry and Biochemistry
PhD, University of California, Santa Barbara

McIntosh, J. Richard
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

McIntosh, Marjorie K.
Professor Emeritus: History

McIver, John P.
Professor Emeritus: Political Science

McKee, Paul (https://experts.colorado.edu/display/fisid_154465)
Associate Professor: Music
MM, University of Texas at Austin

McKenzie, Valerie J (https://experts.colorado.edu/display/fisid_142951)
Assistant Professor: Ecology and Evolutionary Biology
PhD, University of California-Santa Barbara

McKinney, Donald J (https://experts.colorado.edu/display/fisid_152974)
Associate Professor: Music
DMA, University of Michigan Ann Arbor

McKinnish-Harlee, Terra Greenw (https://experts.colorado.edu/display/fisid_115558)
Professor: Economics
PhD, Carnegie Mellon University

McKnight, Diane Marie (https://experts.colorado.edu/display/fisid_110517)
Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor: Civil, Environmental and Architectural Engineering
PhD, Massachusetts Institute of Technology

McLean, Polly E (https://experts.colorado.edu/display/fisid_100614)
Associate Professor: Media Studies
PhD, University of Texas at Austin

McLeod, Robert R (https://experts.colorado.edu/display/fisid_107547)
Professor, Chair: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of Colorado Boulder

McMahon, Jay W (https://experts.colorado.edu/display/fisid_150062)
Assistant Professor: Aerospace Engineering Sciences
PhD, University of Colorado Boulder

McMahon, Kevin Christopher (https://experts.colorado.edu/display/fisid_143892)
Senior Instructor: Leeds School of Business
MBA, Indiana University-Purdue Univ at Indianapolis

McManus, Joseph E (https://experts.colorado.edu/display/fisid_152168)
Scholar In Residence: Interdisciplinary Telecommunications
MS, Carnegie Mellon University

Mcnamara, Mei-Ling J (https://experts.colorado.edu/display/fisid_158310)
Assistant Professor: Journalism
PhD, Univ of Edinburgh (Scotland)

McNeill, Nathan John (https://experts.colorado.edu/display/fisid_151518)
Instructor: Mechanical Engineering
PhD, Purdue University

McQueen, Matthew B (https://experts.colorado.edu/display/fisid_143785)
Associate Professor: Integrative Physiology
DSc, Harvard University

McWilliams, Jenna Marie (https://experts.colorado.edu/display/fisid_155195)
Lecturer: School of Education

Medak-Saltzman, Danika Fawn (https://experts.colorado.edu/display/fisid_145844)
Assistant Professor: Ethnic Studies; Assistant Professor: History
PhD, University of California-Berkeley

Medeiros, Daniel Meulemans (https://experts.colorado.edu/display/fisid_145697)
Associate Professor: Ecology and Evolutionary Biology
PhD, California Institute of Technology

Medlin, James William (https://experts.colorado.edu/display/fisid_122699)
Professor, Faculty Director: Chemical and Biological Engineering
PhD, University of Delaware

Meens, David Eric (https://experts.colorado.edu/display/fisid_145241)
Lecturer: School of Education

Meiss, James D (https://experts.colorado.edu/display/fisid_103702)
Professor: Applied Mathematics
PhD, University of California-Berkeley

Mejia, Donna (https://experts.colorado.edu/display/fisid_151942)
Assistant Professor: Theatre and Dance
MFA, Smith College

Melbourne, Brett Andrew (https://experts.colorado.edu/display/fisid_144966)
Associate Professor: Ecology and Evolutionary Biology
PhD, Australian National Univ (Australia)

Meneghini-Stalker, Tamara L. (https://experts.colorado.edu/display/fisid_146090)
Associate Professor, Assistant Professor: Theatre and Dance
MFA, Northern Illinois University

Menken, Jane A (https://experts.colorado.edu/display/fisid_112411)
Research Professor: Institute of Behavioral Science (IBS); Distinguished Professor: Sociology
PhD, Princeton University

Menn, Lise
Professor Emeritus: Linguistics

Mertens, William G (https://experts.colorado.edu/display/fisid_105762)
Instructor: Economics; Lecturer: Continuing Education & Professional Studies; Instructor: CU at DC Internship
PhD, University of Colorado Boulder

Mewes, Horst (https://experts.colorado.edu/display/fisid_102085)
Associate Professor: Political Science
PhD, University of Chicago

Meyer, Elizabeth Jackson (https://experts.colorado.edu/display/fisid_156354)
Associate Professor, Associate Dean: School of Education
PhD, McGill Univ (Canada)

Meyer, Francois Georges (https://experts.colorado.edu/display/fisid_115559)
Professor: Electrical, Computer and Energy Engineering (ECEE); Professor: Applied Mathematics
PhD, INRIA (France)

Meyer, G. Dale
Professor Emeritus: Leeds School of Business

Meyers, Christina Nicole (https://experts.colorado.edu/display/fisid_155857)
Assistant Professor: Speech, Language and Hearing Sciences (SLHS)
PhD, University of Arizona

Michaelis-Cummings, Laura A (https://experts.colorado.edu/display/fisid_105599)

Professor: Linguistics

PhD, University of California-Berkeley

Michelson, Peter F.

Professor Emeritus: English

Michl, Josef (https://experts.colorado.edu/display/fisid_102977)

Professor: Chemistry and Biochemistry; Professor Attendant Rank: Psychology and Neuroscience

PhD, Czech Academy of Sciences, Prague (Czech Republic)

Mickelson, Alan R (https://experts.colorado.edu/display/fisid_100286)

Associate Professor: Electrical, Computer and Energy Engineering (ECEE);

Associate Professor: Interdisciplinary Telecommunications

PhD, California Institute of Technology

Mikhailova, Tatiana Alekseevna (https://experts.colorado.edu/display/fisid_135187)

Senior Instructor: Germanic and Slavic Languages and Literatures

MA, Ural State Univ (Russia)

Miklowitz, David J (https://experts.colorado.edu/display/fisid_105771)

Professor Adjunct: Psychology and Neuroscience

PhD, University of California-Los Angeles

Milburn, Catherine Knoll (https://experts.colorado.edu/display/fisid_142214)

Senior Instructor, Faculty Director: Leeds School of Business

MS, University of Colorado Boulder

Mileti, Dennis S.

Professor Emeritus: Sociology

Milford, Jana (https://experts.colorado.edu/display/fisid_103268)

Professor: Mechanical Engineering

PhD, Carnegie Mellon University

Miller, Dale Lee (https://experts.colorado.edu/display/fisid_115748)

Senior Instructor: Environmental Studies Program

MA, University of Colorado Denver

Miller, Ed

Professor Emeritus: Philosophy

Miller, Gifford Hubbs (https://experts.colorado.edu/display/fisid_102374)

Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor:

Geological Sciences; Faculty Director: International Education

PhD, University of Colorado Boulder

Miller, Kay

Professor Emeritus: Art and Art History

Miller, Olivia Kour (https://experts.colorado.edu/display/fisid_145260)

Instructor: Program for Writing and Rhetoric

PhD, SUNY at Binghamton

Miller, Shelly Lynn (https://experts.colorado.edu/display/fisid_110394)

Professor: Mechanical Engineering

PhD, University of California-Berkeley

Miller, Stanley

Professor Emeritus: Physics

Mills, Claudia

Professor Emeritus: Philosophy

Min, Young Kyung (https://experts.colorado.edu/display/fisid_156466)

Instructor: Program for Writing and Rhetoric

PhD, University of Illinois at Urbana-Champaign

Minor, Vernon H.

Professor Emeritus: Art and Art History

Miranda, Martina L (https://experts.colorado.edu/display/fisid_140091)

Associate Professor: Music Education

DMA, Arizona State University

Mishra, Shivakant (https://experts.colorado.edu/display/fisid_118376)

Professor, Assoc Chair: Computer Science

PhD, University of Arizona

Misri, Deepti (https://experts.colorado.edu/display/fisid_146428)

Associate Professor: Women and Gender Studies

PhD, University of Illinois at Urbana-Champaign

Mittal, Vijay (https://experts.colorado.edu/display/fisid_148386)

Asst Professor Adjunct: Psychology and Neuroscience

PhD, Emory University

Mitton, Jeffry B (https://experts.colorado.edu/display/fisid_101058)

Professor: Ecology and Evolutionary Biology

PhD, SUNY at Stony Brook

Miyake, Akira (https://experts.colorado.edu/display/fisid_107321)

Professor: Psychology and Neuroscience

PhD, Carnegie Mellon University

Miyake, Garret Morgan (https://experts.colorado.edu/display/fisid_154831)

Assistant Professor: Chemistry and Biochemistry

PhD, Colorado State University

Moddel, Garret (https://experts.colorado.edu/display/fisid_105440)

Professor: Electrical, Computer and Energy Engineering (ECEE)

PhD, Harvard University

Mody, Bella

Professor Emeritus: Media Studies

PhD, Gujarat University, India

Moeller, Paul D. (https://experts.colorado.edu/display/fisid_122618)

Faculty Director, Associate Professor: University Libraries

MA, University of Iowa

Moers, Willard Lee (https://experts.colorado.edu/display/fisid_114371)

Instructor: Speech, Language and Hearing Sciences (SLHS)

MA, Gallaudet University

Mohr, Peter J (https://experts.colorado.edu/display/fisid_155498)

Senior Instructor: Leeds School of Business

MS, Colorado State University

Mojola, Sanyu Amimo (https://experts.colorado.edu/display/fisid_145741)

Associate Professor: Sociology

PhD, University of Chicago

Mojzsis, Stephen J (https://experts.colorado.edu/display/fisid_118484)
Professor: Geological Sciences
PhD, University of California-San Diego

Molenaar, Keith Robert (https://experts.colorado.edu/display/fisid_102373)
Professor: Civil, Environmental and Architectural Engineering; Associate Dean: College of Engineering and Applied Science
PhD, University of Colorado Boulder

Molinaro, Nina L (https://experts.colorado.edu/display/fisid_105143)
Associate Professor: Spanish and Portuguese
PhD, University of Kansas

Molnar, Alex John (https://experts.colorado.edu/display/fisid_148836)
Research Professor: School of Education
MSW, University of Wisconsin-Milwaukee

Molnar, Peter Hale (https://experts.colorado.edu/display/fisid_114528)
Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Professor: Geological Sciences
PhD, Columbia University In the City of New York

Molotch, Noah Paul (https://experts.colorado.edu/display/fisid_139374)
Associate Professor, Associate Professor: Geography; Faculty Director: Institute of Arctic & Alpine Research (INSTAAR); Associate Professor: The Center for Water, Earth Science, and Technology
PhD, University of Arizona

Monk, James Donald
Professor Emeritus: Mathematics

Monson, Russell K.
Professor Emeritus: Ecology and Evolutionary Biology

Montealegre, Jose Ramiro (https://experts.colorado.edu/display/fisid_100072)
Associate Professor: Leeds School of Business
DBA, Harvard University

Montgomery, Bruce P (https://experts.colorado.edu/display/fisid_100667)
Professor: University Libraries
MA, University of Wisconsin-Madison

Montoya, Lupita Del Carmen (https://experts.colorado.edu/display/fisid_148045)
Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, Stanford University

Montoya Kirk, Celeste Marie (https://experts.colorado.edu/display/fisid_144862)
Associate Professor: Women and Gender Studies; Faculty Director: Miramontes Arts & Sciences Program (MASP)
PhD, Washington University

Mood, Dale P.
Professor Emeritus: Integrative Physiology

Moore, Russell (https://experts.colorado.edu/display/fisid_105756)
Professor: Integrative Physiology
PhD, Washington State University

Moorer, Daniel Fuller (https://experts.colorado.edu/display/fisid_151590)
Scholar In Residence, Faculty Director: Lockheed Martin Engineering Management Program
PhD, University of Colorado Boulder

Morey, Edward R (https://experts.colorado.edu/display/fisid_102256)
Professor: Economics
PhD, Univ of British Columbia (Canada)

Moriarty, Sandra E.
Professor Emeritus: Advertising, Public Relations and Media Design

Moritz, Marguerite J.
Professor Emeritus: Journalism
PhD, Northwestern University

Morley, Susan (https://experts.colorado.edu/display/fisid_116716)
Senior Instructor: Leeds School of Business
JD, University of Colorado Boulder

Morrison, Edward J.
Professor Emeritus: Leeds School of Business

Morrison, Wes
Professor Emeritus: Philosophy

Mortimer, Mildred
Professor Emeritus: French & Italian

Moses, Michele s (https://experts.colorado.edu/display/fisid_141025)
Professor, Associate Dean: School of Education
PhD, University of Colorado Boulder

Moskovit, Leonard
Professor Emeritus: English

Moss, Scott A. (https://experts.colorado.edu/display/fisid_144741)
Professor: School of Law
JD, Harvard University

Moteki, Mutsumi (https://experts.colorado.edu/display/fisid_100992)
Professor: Music
DMA, University of Michigan Ann Arbor

Motte, Warren F (https://experts.colorado.edu/display/fisid_100001)
Professor, Assoc Chair: French & Italian
PhD, University of Pennsylvania

Motter, Jeffrey Brian (https://experts.colorado.edu/display/fisid_156154)
Instructor: Communication
PhD, Indiana University Bloomington

Moyen, Nathalie (https://experts.colorado.edu/display/fisid_113873)
Associate Professor: Leeds School of Business
PhD, Univ of British Columbia (Canada)

Mozer, Michael C (https://experts.colorado.edu/display/fisid_105922)
Professor: Institute of Cognitive Science (ICS); Professor: Computer Science
PhD, University of California-San Diego

Mueller, Christopher B (https://experts.colorado.edu/display/fisid_103756)
Professor: School of Law
JD, University of California-Berkeley

Mueller, Erick Michael (https://experts.colorado.edu/display/fisid_140940)
Senior Instructor, Faculty Director: International Education; Faculty Director: Leeds School of Business
MBA, University of Colorado Boulder

Mueller, Karl Jules (https://experts.colorado.edu/display/fisid_107629)
Professor: Geological Sciences
PhD, University of Wyoming

Muhammed, Randa (https://experts.colorado.edu/display/fisid_152815)
Instructor: Asian Languages and Civilizations
BA, South Valley University (Egypt)

Mukherjee, Mithi (https://experts.colorado.edu/display/fisid_123112)
Associate Professor: History
PhD, University of Chicago

Muller, Brian H F (https://experts.colorado.edu/display/fisid_140230)
Associate Professor: Environmental Design
PhD, University of California-Berkeley

Muller-Sievers, Helmut Heinz (https://experts.colorado.edu/display/fisid_147511)
Professor: Germanic and Slavic Languages and Literatures; Faculty Director: Center for Humanities and the Arts; Professor: English
PhD, Stanford University

Munakata, Yuko (https://experts.colorado.edu/display/fisid_125036)
Professor: Psychology and Neuroscience
PhD, Carnegie Mellon University

Munkhoff, Richelle (https://experts.colorado.edu/display/fisid_143801)
Assistant Professor: English
PhD, University of Wisconsin-Madison

Munoz, James L.
Professor Emeritus: Geological Sciences

Munsat, Tobin Leo (https://experts.colorado.edu/display/fisid_134251)
Associate Professor: Physics; Faculty Director: Center for Integrated Plasma Studies (CIPS)
PhD, Princeton University

Murnane, Margaret (https://experts.colorado.edu/display/fisid_115333)
Distinguished Professor: Physics; Distinguished Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of California-Berkeley

Murphy, Kieran Marcellin (https://experts.colorado.edu/display/fisid_152976)
Assistant Professor: French & Italian
PhD, University of California-Santa Barbara

Murray, Seth (https://experts.colorado.edu/display/fisid_148038)
Instructor: Lockheed Martin Engineering Management Program
ME, University of Colorado Boulder

Murray, Todd W (https://experts.colorado.edu/display/fisid_146549)
Associate Professor: Mechanical Engineering
PhD, Johns Hopkins University

Musgrave, Charles Bruce (https://experts.colorado.edu/display/fisid_144977)
Professor, Chair: Chemical and Biological Engineering
PhD, California Institute of Technology

Mycielski, Jan
Professor Emeritus: Mathematics

Myer, Tom R (https://experts.colorado.edu/display/fisid_100922)
Associate Professor: Music
MM, East Texas State University

Myers, Seth G (https://experts.colorado.edu/display/fisid_153207)
Instructor: Program for Writing and Rhetoric
MA, University of Alaska Fairbanks

N

Nabity, James A. (https://experts.colorado.edu/display/fisid_153102)
Associate Professor: Aerospace Engineering Sciences
PhD, University of Colorado Boulder

Nagle, James L (https://experts.colorado.edu/display/fisid_126784)
Professor: Physics
PhD, Yale University

Nagpal, Prashant (https://experts.colorado.edu/display/fisid_151726)
Assistant Professor: Chemical and Biological Engineering
PhD, University of Minnesota Central office

Nakassis, Dimitri (https://experts.colorado.edu/display/fisid_154917)
Assoc Chair, Professor: Classics
PhD, University of Texas at Austin

Nandkishore, Rahul Mahajan (https://experts.colorado.edu/display/fisid_156417)
Assistant Professor: Physics
PhD, Massachusetts Institute of Technology

Narasimhan, Bhuvaneshwari (https://experts.colorado.edu/display/fisid_144863)
Associate Professor: Linguistics
PhD, Boston University

Nauenberg, Uriel
Professor Emeritus: Physics

Nauman, Robert (https://experts.colorado.edu/display/fisid_106835)
Senior Instructor: Art and Art History
PhD, University of New Mexico

Neff, Jason C (https://experts.colorado.edu/display/fisid_117652)
Professor: Environmental Studies Program; Faculty Director: Office of the Vice Chancellor for Research
PhD, Stanford University

Neil, Ethan (https://experts.colorado.edu/display/fisid_153411)
Assistant Professor: Physics
PhD, Yale University

Nelson, James E.
Professor Emeritus: Leeds School of Business

Nelson, Suzanne Linn (https://experts.colorado.edu/display/fisid_142847)

Instructor: Integrative Physiology
MA, University of Colorado Boulder

Nelson, Thomas Cavett (https://experts.colorado.edu/display/fisid_116011)

Senior Instructor, Faculty Director: Leeds School of Business
PhD, University of Colorado Boulder

Neogi, Sanghamitra (https://experts.colorado.edu/display/fisid_156773)
Assistant Professor: Aerospace Engineering Sciences
PhD, Pennsylvania State University

Nerem, Robert Steven (https://experts.colorado.edu/display/fisid_118478)

Professor: Aerospace Engineering Sciences; Faculty Director: College of Engineering and Applied Science
PhD, University of Texas at Austin

Nesbitt, David (https://experts.colorado.edu/display/fisid_100333)
Professor Adjunct: Physics

Nettleton, Ray W. (https://experts.colorado.edu/display/fisid_125678)
Assoc Professor Adjunct: Interdisciplinary Telecommunications
PhD, Purdue University

Neu, Corey P (https://experts.colorado.edu/display/fisid_156210)
Associate Professor: Mechanical Engineering
PhD, University of California-Davis

Neupauer, Roseanna Marie (https://experts.colorado.edu/display/fisid_134747)
Professor, Assoc Chair: Civil, Environmental and Architectural Engineering
PhD, New Mexico Institute of Mining and Technology

Nevelow Mart, Susan (https://experts.colorado.edu/display/fisid_149787)
Associate Professor, Faculty Director: School of Law
MLS, San Jose State University

Newberry, Patrick Thaxton (https://experts.colorado.edu/display/fisid_151925)

Lecturer: Baker RAP
MA, University of Colorado Boulder

Newlands, Carole E. (https://experts.colorado.edu/display/fisid_147504)
Professor: Classics

Newton, Peter (https://experts.colorado.edu/display/fisid_154466)
Assistant Professor: Environmental Studies Program
PhD, University of East Anglia (England)

Nguyen, Alexandra (https://experts.colorado.edu/display/fisid_145847)
Associate Professor: Music
DMA, University of Rochester

Nichols, Harvey
Professor Emeritus: Ecology and Evolutionary Biology

Nichols, Lynn Wayne (https://experts.colorado.edu/display/fisid_103654)
Senior Instructor: Theatre and Dance
PhD, University of Colorado Boulder

Nigro, Melissa A (https://experts.colorado.edu/display/fisid_152154)
Instructor: Atmospheric and Oceanic Sciences (ATOC)
PhD, University of Colorado Boulder

Nims, Abigail Andrews (https://experts.colorado.edu/display/fisid_152977)

Assistant Professor: Music
MM, Westminster Choir College

Noble, Richard D (https://experts.colorado.edu/display/fisid_101068)
Professor: Chemical and Biological Engineering; Faculty Director: College of Engineering and Applied Science
PhD, University of California-Davis

Nogueron-Liu, Silvia (https://experts.colorado.edu/display/fisid_155783)
Assistant Professor: School of Education
PhD, Arizona State University

Norcross, Alastair J. (https://experts.colorado.edu/display/fisid_144850)
Associate Professor: Philosophy
PhD, Syracuse University

Norgaard, Rolf P (https://experts.colorado.edu/display/fisid_102502)
Senior Instructor, Assoc Faculty Director: Program for Writing and Rhetoric
PhD, Stanford University

Norris, David O.
Professor Emeritus: Integrative Physiology

Norris, Jan Adam (https://experts.colorado.edu/display/fisid_101412)
Senior Instructor: Applied Mathematics; Lecturer: Mechanical Engineering
PhD, University of Colorado Boulder

Norton, Helen Louise (https://experts.colorado.edu/display/fisid_144613)
Professor, Associate Professor: School of Law
JD, University of California-Berkeley

Nozik, Arthur (https://experts.colorado.edu/display/fisid_113395)
Research Professor: Chemistry and Biochemistry
PhD, Yale University

Nugent, Teresa L (https://experts.colorado.edu/display/fisid_101477)
Instructor: English; Lecturer: Continuing Education & Professional Studies
PhD, University of Colorado Boulder

Nutt, Gary J.
Professor Emeritus: Computer Science

Nuttelman, Charles Raymond (https://experts.colorado.edu/display/fisid_142758)
Instructor: Chemical and Biological Engineering; Faculty Director: College of Engineering and Applied Science
PhD, University of Colorado Boulder

Nytch, Jeffrey C. (https://experts.colorado.edu/display/fisid_147341)
Associate Professor: Music
DMA, Rice University

O

O'Connor, Kevin C (https://experts.colorado.edu/display/fisid_148490)
Assistant Professor: School of Education
PhD, Clark University

O'Loughlin, John (https://experts.colorado.edu/display/fisid_101339)
Professor: Geography; Professor: Institute of Behavioral Science (IBS)
PhD, Pennsylvania State University

O'Reilly, Randall Charles (https://experts.colorado.edu/display/fisid_110512)
Professor: Psychology and Neuroscience
PhD, Carnegie Mellon University

O'Rourke, Sean Daniel (https://experts.colorado.edu/display/fisid_154418)
Assistant Professor: Mathematics
PhD, University of California-Davis

O'sullivan, William J.
Professor Emeritus: Physics

Oakes, Timothy S. (https://experts.colorado.edu/display/fisid_109269)
Professor: Geography; Faculty Director: Center for Asian Studies;
Professor: Critical Media Practices
PhD, University of Washington

Oddie, Graham James (https://experts.colorado.edu/display/fisid_104741)
Professor: Philosophy
PhD, University of London (England)

Odorizzi, Charles Gregory (https://experts.colorado.edu/display/fisid_118429)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of California-San Diego

Oest, Donald G (https://experts.colorado.edu/display/fisid_146623)
Instructor: Leeds School of Business
MBA, Fairleigh Dickinson University

Ohm, Paul K (https://experts.colorado.edu/display/fisid_142996)
Associate Professor: School of Law; Associate Professor: Interdisciplinary
Telecommunications
JD, University of California-Los Angeles

Okigbo, Austin Chinagorom (https://experts.colorado.edu/display/fisid_151507)
Assistant Professor: Music
PhD, Indiana University Bloomington

Old, William (https://experts.colorado.edu/display/fisid_103039)
Assistant Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of Colorado Boulder

Oliveras, Diana (https://experts.colorado.edu/display/fisid_107967)
Instructor: Baker RAP; Instructor: Sewall RAP; Instructor: Health
Professions RAP
PhD, University of New Mexico

Olson, Richard Kellogg (https://experts.colorado.edu/display/fisid_103121)
Professor: Psychology and Neuroscience
PhD, University of Oregon

Olwin, Bradley Bruce (https://experts.colorado.edu/display/fisid_109888)
Professor, Assoc Chair: Molecular, Cellular & Developmental Biology
(MCDB)
PhD, University of Washington

Orth, James D (https://experts.colorado.edu/display/fisid_152017)
Asst Research Professor: Molecular, Cellular & Developmental Biology
(MCDB)
PhD, Mayo Graduate School of Medicine

Ortman, Scott Graham (https://experts.colorado.edu/display/fisid_152978)
Assistant Professor: Anthropology
PhD, Arizona State University

Osborn, Christopher (https://experts.colorado.edu/display/fisid_142982)
Instructor: Film Studies
MFA, University of Colorado Boulder

Osborne, Myles Gregory (https://experts.colorado.edu/display/fisid_145809)
Associate Professor: History
PhD, Harvard University

Osnes, Mary Beth (https://experts.colorado.edu/display/fisid_102607)
Associate Professor: Theatre and Dance
PhD, University of Colorado Boulder

Osterman, Laura Olson (https://experts.colorado.edu/display/fisid_109800)
Associate Professor, Assoc Chair: Germanic and Slavic Languages and
Literatures
PhD, Yale University

Otero, Valerie K (https://experts.colorado.edu/display/fisid_118377)
Professor: School of Education
PhD, University of California-San Diego

Owen, Wyn F.
Professor Emeritus: Economics

P

Pace, Norman R.
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

Pak, Ronald Y S (https://experts.colorado.edu/display/fisid_105977)
Professor: Civil, Environmental and Architectural Engineering
PhD, California Institute of Technology

Palen, Leysia A (https://experts.colorado.edu/display/fisid_114604)
Professor: Computer Science; Faculty Director: College of Engineering and
Applied Science; Chair, Professor: Information Science
PhD, University of California-Irvine

Palmer, Amy E (https://experts.colorado.edu/display/fisid_141901)
Associate Professor: Chemistry and Biochemistry
PhD, Stanford University

Palmer, James
Professor Emeritus: Film Studies

Palmer, Martha (https://experts.colorado.edu/display/fisid_138162)
Professor: Linguistics; Professor: Computer Science
PhD, Univ of Edinburgh (Scotland)

Palmer, Michael
Professor Emeritus: Leeds School of Business

Palo, Scott E (https://experts.colorado.edu/display/fisid_109033)
 Professor: Aerospace Engineering Sciences; Professor: Colorado Center for Astrodynamics Research (CCAR); Associate Dean: College of Engineering and Applied Science; Professor: Electrical, Computer and Energy Engineering (ECEE)
 PhD, University of Colorado Boulder

Pampel, Fred
 Professor Emeritus: Sociology

Pang, Cecilia J (https://experts.colorado.edu/display/fisid_129479)
 Associate Professor: Theatre and Dance; Faculty Director: Libby Arts RAP
 PhD, University of California-Berkeley

Pann, Carter N (https://experts.colorado.edu/display/fisid_141461)
 Associate Professor: Music
 DMA, University of Michigan Ann Arbor

Pao, Lucy Y (https://experts.colorado.edu/display/fisid_107151)
 Professor: Electrical, Computer and Energy Engineering (ECEE); Professor: Aerospace Engineering Sciences
 PhD, Stanford University

Papuzza, Antonio (https://experts.colorado.edu/display/fisid_145295)
 Instructor: Leeds School of Business; Faculty Director: International Education; Lecturer: Continuing Education & Professional Studies
 PhD, Univ of Florence (Italy)

Paradis, David (https://experts.colorado.edu/display/fisid_126959)
 Instructor: History; Lecturer: Continuing Education & Professional Studies
 PhD, Emory University

Pardi, Arthur (https://experts.colorado.edu/display/fisid_105996)
 Professor: Chemistry and Biochemistry
 PhD, University of California-Berkeley

Parinandi, Srinivas C (https://experts.colorado.edu/display/fisid_155589)
 Assistant Professor: Political Science
 PhD, University of Michigan Ann Arbor

Park, Bernadette (https://experts.colorado.edu/display/fisid_103732)
 Professor: Psychology and Neuroscience
 PhD, Northwestern University

Park, Kwang-Chun
 Professor Emeritus: Aerospace Engineering Sciences

Park, Soyeon (https://experts.colorado.edu/display/fisid_151944)
 Assistant Professor: Molecular, Cellular & Developmental Biology (MCDB)
 PhD, Mayo Graduate School of Medicine

Park, Wounghang (https://experts.colorado.edu/display/fisid_122676)
 Professor, Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
 PhD, Georgia Institute of Technology

Parker, Roy Robert (https://experts.colorado.edu/display/fisid_151440)
 Professor: Chemistry and Biochemistry; Professor: Molecular, Cellular & Developmental Biology (MCDB)
 PhD, University of California-San Francisco

Parker, Scott E (https://experts.colorado.edu/display/fisid_109685)
 Professor: Physics
 PhD, University of California-Berkeley

Parkin, Don
 Professor Emeritus: Leeds School of Business

Parson, Rahul Bjorn (https://experts.colorado.edu/display/fisid_156069)
 Assistant Professor: Asian Languages and Civilizations
 PhD, University of California, Berkeley

Parson, Robert (https://experts.colorado.edu/display/fisid_101032)
 Professor, Assoc Chair: Chemistry and Biochemistry
 PhD, University of Michigan Ann Arbor

Pasnau, Robert C (https://experts.colorado.edu/display/fisid_115293)
 Professor: Philosophy; Faculty Director: Center for Western Civilization;
 Professor: Classics
 PhD, Cornell University

Paul, Michael J (https://experts.colorado.edu/display/fisid_156070)
 Assistant Professor: Computer Science; Assistant Professor: Information Science
 PhD, Johns Hopkins University

Payne, David Sanders (https://experts.colorado.edu/display/fisid_143848)
 Instructor: Leeds School of Business

Pearce, Lonni Dee (https://experts.colorado.edu/display/fisid_134710)
 Senior Instructor, Assoc Faculty Director: Program for Writing and Rhetoric
 PhD, University of Arizona

Peck, Janice Anne (https://experts.colorado.edu/display/fisid_106765)
 Professor: Media Studies; Associate Dean: College of Media, Communication & Information
 PhD, Simon Fraser University (Canada)

Pedersen-Gallegos, Liane G (https://experts.colorado.edu/display/fisid_107962)
 Instructor: Sociology

Pellegrino, John (https://experts.colorado.edu/display/fisid_130902)
 Research Professor: Mechanical Engineering
 PhD, University of Colorado Boulder

Penuel, William Richard (https://experts.colorado.edu/display/fisid_149719)
 Professor: School of Education
 PhD, Clark University

Peppet, Scott R (https://experts.colorado.edu/display/fisid_118290)
 Professor, Associate Professor: School of Law
 JD, Harvard University

Perez, Emma Marie (https://experts.colorado.edu/display/fisid_130962)
 Professor: Ethnic Studies; Professor: History
 PhD, University of California-Los Angeles

Perez-Pamies, Susanna (https://experts.colorado.edu/display/fisid_147675)
 Instructor: Spanish and Portuguese; Instructor: Speech, Language and Hearing Sciences (SLHS); Lecturer: Anderson Language Tech Center

Perigo, Levi D. (https://experts.colorado.edu/display/fisid_155562)
 Scholar In Residence: Interdisciplinary Telecommunications
 PhD, Nova University

- Perkins, Katherine K. (https://experts.colorado.edu/display/fisid_124217)
Assoc Professor Attendant Rank: Physics
- Persons, Charles Howard (https://experts.colorado.edu/display/fisid_145012)
Associate Professor: Theatre and Dance
MFA, Columbia University In the City of New York
- Peters, Kevin
Professor Emeritus: Chemistry and Biochemistry
- Peterson, Kristelia Garcia (https://experts.colorado.edu/display/fisid_154416)
Faculty Director, Associate Professor: School of Law
JD, Yale University
- Peterson, Patti H (https://experts.colorado.edu/display/fisid_101502)
Associate Professor: Music
DMA, University of Colorado Boulder
- Peterson, R. Jerome
Professor Emeritus: Physics
PhD, University of Washington
- Pezzullo, Phaedra Carmen (https://experts.colorado.edu/display/fisid_156204)
Associate Professor: Communication
PhD, University of North Carolina Chapel Hill
- Pfeffer, Tad (https://experts.colorado.edu/display/fisid_100207)
Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor: Civil, Environmental and Architectural Engineering
PhD, University of Washington
- Pflaum, Markus Josef (https://experts.colorado.edu/display/fisid_144979)
Professor: Mathematics
Dr habil, Humboldt Univ of Berlin (Germany)
- Phillips, George H.
Professor Emeritus: History
- Phillipson, Paul E.
Professor Emeritus: Physics
- Pielke, Roger A (https://experts.colorado.edu/display/fisid_104166)
Faculty Director: Athletics-Business Affairs; Professor: Environmental Studies Program
PhD, University of Colorado Boulder
- Pieplow, Kathryn (https://experts.colorado.edu/display/fisid_123285)
Senior Instructor, Assoc Faculty Director: Program for Writing and Rhetoric
JD, University of South Dakota
- Pieplow, Nathan D (https://experts.colorado.edu/display/fisid_131512)
Instructor: Program for Writing and Rhetoric; Assoc Faculty Director: Global RAP
MEd, University of Oregon
- Pierce, Aileen Jaitin (https://experts.colorado.edu/display/fisid_134704)
Senior Instructor, Assoc Faculty Director: ATLAS Institute
- Pierpont, Cortlandt G.
Professor Emeritus: Chemistry and Biochemistry
PhD, Brown University
- Piestun, Rafael (https://experts.colorado.edu/display/fisid_118538)
Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Israel Instit of Tech (Israel)
- Piket-May, Melinda J (https://experts.colorado.edu/display/fisid_102097)
Associate Professor, Assoc Professor Attendant Rank: Electrical, Computer and Energy Engineering (ECEE); Faculty Director: Office of the Chancellor
PhD, Northwestern University
- Pilewskie, Peter Andrew (https://experts.colorado.edu/display/fisid_134466)
Professor, Professor: Atmospheric and Oceanic Sciences (ATOC); Faculty Director: Laboratory for Atmospheric and Space Physics (LASP)
PhD, University of Arizona
- Pinkow, David
Professor Emeritus: Music
- Pinto, Leonard J.
Professor Emeritus: Sociology
- Pitlick, John (https://experts.colorado.edu/display/fisid_105951)
Professor, Assoc Chair: Geography
PhD, Colorado State University
- Pittenger, Mark A (https://experts.colorado.edu/display/fisid_102007)
Professor: History
PhD, University of Michigan Ann Arbor
- Pittman-Wagers, Justina (https://experts.colorado.edu/display/fisid_117148)
Senior Instructor: Psychology and Neuroscience
PsyD, University of Denver
- Plank, D. L.
Professor Emeritus: Germanic and Slavic Languages and Literatures
- Platter, Adele
Professor Emeritus: Sociology
- Pleszkun, Andrew R (https://experts.colorado.edu/display/fisid_102250)
Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of Illinois at Urbana-Champaign
- Pois, Anne Marie
Professor Emeritus: Women and Gender Studies
- Policastri, Joan Frances (https://experts.colorado.edu/display/fisid_153867)
Instructor: Law Library
MLS, University of Denver
- Polizzi, Jade Venus (https://experts.colorado.edu/display/fisid_140368)
Senior Instructor: Environmental Design
MArch, University of Colorado Denver
- Pollard, Ryan D (https://experts.colorado.edu/display/fisid_153106)
Instructor: Speech, Language and Hearing Sciences (SLHS)
PhD, University of Colorado Boulder

Pollock, Steven J (https://experts.colorado.edu/display/fisid_101392)
Professor: Physics
PhD, Stanford University

Polman, Joseph Louis (https://experts.colorado.edu/display/fisid_151296)

Professor, Associate Dean: School of Education
PhD, Northwestern University

Polson, Peter G.
Professor Emeritus: Psychology and Neuroscience

Popovic, Zorana (https://experts.colorado.edu/display/fisid_101494)
Distinguished Professor: Electrical, Computer and Energy Engineering (ECEE)

PhD, California Institute of Technology

Porter, Keith Alan (https://experts.colorado.edu/display/fisid_145182)
Research Professor: Civil, Environmental and Architectural Engineering
PhD, Stanford University

Potter, Hillary A (https://experts.colorado.edu/display/fisid_124938)
Associate Professor: Ethnic Studies
PhD, University of Colorado Boulder

Potter, Jason Timothy (https://experts.colorado.edu/display/fisid_103972)
Instructor: Philosophy

Potter, Thomas J.
Professor Emeritus: Art and Art History

Potts, Margaret Lee
Professor Emeritus: Theatre and Dance

Poulson, Barry
Professor Emeritus: Economics

Preston, Michael J.
Professor Emeritus: English

Price, John C (https://experts.colorado.edu/display/fisid_101129)
Professor: Physics
PhD, Stanford University

Prieto, Andres Ignacio (https://experts.colorado.edu/display/fisid_143948)
Associate Professor, Assoc Chair: Spanish and Portuguese
PhD, University of Connecticut

Proudfit, Charles L.
Professor Emeritus: English

Pyrooz, David C (https://experts.colorado.edu/display/fisid_155784)
Assistant Professor: Sociology
PhD, Arizona State University

Q

Qian, Zhiying (https://experts.colorado.edu/display/fisid_157736)
Senior Instructor: Asian Languages and Civilizations
PhD, University of California, Berkeley

Qualley, Charles A.
Professor Emeritus: Art and Art History

Quinn, Brian Dennis (https://experts.colorado.edu/display/fisid_155973)
Assistant Professor: French & Italian
PhD, University of California-Los Angeles

Quinn, Jeanne (https://experts.colorado.edu/display/fisid_111658)
Associate Professor: Art and Art History
MFA, University of Washington

R

Rabaka, Reiland Devaun (https://experts.colorado.edu/display/fisid_141463)

Professor, Chair: Ethnic Studies
PhD, Temple University

Radelet, Michael L (https://experts.colorado.edu/display/fisid_121802)
Professor: Sociology
PhD, Purdue University

Radzihovsky, Leo (https://experts.colorado.edu/display/fisid_107484)
Professor: Physics
PhD, Harvard University

Raj, Rishi (https://experts.colorado.edu/display/fisid_108413)
Professor: Mechanical Engineering
PhD, Harvard University

Rajaram, Harihar (https://experts.colorado.edu/display/fisid_103246)
Professor: Civil, Environmental and Architectural Engineering
PhD, Massachusetts Institute of Technology

Ramig, Peter R.
Professor Emeritus: Speech, Language and Hearing Sciences (SLHS)

Ramirez, Albert
Professor Emeritus: Psychology and Neuroscience

Ramirez, Karen E. (https://experts.colorado.edu/display/fisid_116951)
Senior Instructor: Sewall RAP; Instructor: School of Education
PhD, University of Illinois at Urbana-Champaign

Ramsay, Arlan
Professor Emeritus: Mathematics

Ramsberger, Gail (https://experts.colorado.edu/display/fisid_100943)
Associate Professor, Assoc Chair: Speech, Language and Hearing Sciences (SLHS)
DSc, Boston University

Ramsey, Andrea L (https://experts.colorado.edu/display/fisid_154420)
Assistant Professor: Music
PhD, Michigan State University

Ramsey, Carolyn Brooks (https://experts.colorado.edu/display/fisid_118536)
Professor, Associate Professor: School of Law
JD, Stanford University

Randall, Cora Einterz (https://experts.colorado.edu/display/fisid_102010)
Professor, Chair: Atmospheric and Oceanic Sciences (ATOC)
PhD, University of California-Santa Cruz

Randall, Erika Anne (https://experts.colorado.edu/display/fisid_144755)
Associate Professor, Assoc Chair, Chair: Theatre and Dance
MFA, Ohio State University

Randolph, Theodore W (https://experts.colorado.edu/display/fisid_101768)

Professor: Chemical and Biological Engineering
PhD, University of California-Berkeley

Rankin, Patricia (https://experts.colorado.edu/display/fisid_105939)

Professor: Physics
PhD, University of London (England)

Raschke, Markus B (https://experts.colorado.edu/display/fisid_148716)

Professor: Physics
PhD, Tech Univ of Munich (Germany)

Rast, Mark Peter (https://experts.colorado.edu/display/fisid_142997)

Associate Professor: Laboratory for Atmospheric and Space Physics (LASP); Associate Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Colorado Boulder

Raybon, Patricia

Professor Emeritus: Journalism

Reamon, Derek T (https://experts.colorado.edu/display/fisid_120538)

Senior Instructor: Mechanical Engineering; Senior Instructor: General Engineering; Faculty Director: College of Engineering and Applied Science
PhD, Stanford University

Rearick, David F.

Professor Emeritus: Mathematics

Reed, David Palmer (https://experts.colorado.edu/display/fisid_152458)

Scholar In Residence: College of Engineering and Applied Science; Scholar In Residence, Faculty Director: Interdisciplinary Telecommunications
PhD, Carnegie Mellon University

Regal, Cindy Anne (https://experts.colorado.edu/display/fisid_144184)

Associate Professor: Physics
PhD, University of Colorado Boulder

Reger, Jeremy J (https://experts.colorado.edu/display/fisid_156224)

Instructor: Music
DMA, University of Michigan Ann Arbor

Regoli, Robert M.

Professor Emeritus: Sociology

Regueiro, Richard A (https://experts.colorado.edu/display/fisid_134705)

Associate Professor, Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, Stanford University

Reid, Blake E (https://experts.colorado.edu/display/fisid_152860)

Clinical Asst Professor, Faculty Director, Instructor Adjunct: School of Law JD, University of Colorado Boulder

Reilly, Kerry Anne (https://experts.colorado.edu/display/fisid_131502)

Senior Instructor: Program for Writing and Rhetoric
MFA, University of Iowa

Reinholtz, Nicholas S (https://experts.colorado.edu/display/fisid_155180)

Assistant Professor: Leeds School of Business
PhD, Columbia University In the City of New York

Reitzammer, Laurialan Blake (https://experts.colorado.edu/display/fisid_145810)

Associate Professor: Classics
PhD, University of California-Berkeley

Ren, Zhiyong (https://experts.colorado.edu/display/fisid_153479)

Associate Professor: Civil, Environmental and Architectural Engineering
PhD, Pennsylvania State University Central Office

Rentschler, Mark Edwin (https://experts.colorado.edu/display/fisid_146091)

Associate Professor: Mechanical Engineering
PhD, University of Nebraska-Lincoln

Repenning, Alexander (https://experts.colorado.edu/display/fisid_104946)

Research Professor: Computer Science
PhD, University of Colorado Boulder

Requiro, David (https://experts.colorado.edu/display/fisid_155785)

Associate Professor, Assistant Professor: Music
MM, University of Michigan Ann Arbor

Restrepo, Juan G (https://experts.colorado.edu/display/fisid_145811)

Associate Professor: Applied Mathematics
PhD, University of Maryland College Park Campus

Reuer, Jeffrey J (https://experts.colorado.edu/display/fisid_155768)

Professor: Leeds School of Business
PhD, Purdue University

Rey, Ana Maria (https://experts.colorado.edu/display/fisid_146407)

Assoc Research Professor: JILA
PhD, University of Maryland College Park Campus

Reynolds, Leslie Jean (https://experts.colorado.edu/display/fisid_153008)

Associate Dean, Associate Professor: University Libraries
MLIS, University of Illinois at Urbana-Champaign

Reznicek, Birdie C (https://experts.colorado.edu/display/fisid_149091)

Instructor: Leeds School of Business

Reznik, Dmitry (https://experts.colorado.edu/display/fisid_147659)

Associate Professor: Physics
PhD, University of Illinois at Urbana-Champaign

Rhee, Soo H (https://experts.colorado.edu/display/fisid_123401)

Associate Professor: Psychology and Neuroscience
PhD, Emory University

Rhodes, Harumi B (https://experts.colorado.edu/display/fisid_155971)

Associate Professor, Assistant Professor: Music
Not Listed, New England Conservatory of Music

Richardson, Emily (https://experts.colorado.edu/display/fisid_115007)

Asst Research Professor: Psychology and Neuroscience
PhD, University of Iowa

Richey, Clyde W.

Professor Emeritus: Leeds School of Business

Richter, Antje (https://experts.colorado.edu/display/fisid_145310)

Associate Professor: Asian Languages and Civilizations
Dr habil, Univ of Kiel (Germany)

Richter, Matthias Ludwig (https://experts.colorado.edu/display/fisid_144864)
Associate Professor, Chair: Asian Languages and Civilizations
PhD, Univ of Hamburg (Germany)

Rickels, David Aaron (https://experts.colorado.edu/display/fisid_151424)
Assistant Professor: Music Education
DMA, Arizona State University

Rieker, Gregory Brian (https://experts.colorado.edu/display/fisid_151727)
Assistant Professor: Mechanical Engineering
PhD, Stanford University

Riggle, Gordon Grant (https://experts.colorado.edu/display/fisid_123304)
Lecturer: President's Leadership Class

Riis, Thomas L (https://experts.colorado.edu/display/fisid_100723)
Professor: Music; Lecturer: Continuing Education & Professional Studies
PhD, University of Michigan Ann Arbor

Rinaldo, Rachel Ann (https://experts.colorado.edu/display/fisid_156309)
Assistant Professor: Sociology
PhD, University of Chicago

Ringgenberg, Ralph G.
Professor Emeritus: Leeds School of Business

Riosmena, Fernando (https://experts.colorado.edu/display/fisid_144419)
Associate Professor, Associate Professor: Geography; Associate Professor: Sociology; Assistant Professor: Institute of Behavioral Science (IBS)
PhD, University of Pennsylvania

Ristinen, Robert
Professor Emeritus: Physics

Ritchie, Liesel A. (https://experts.colorado.edu/display/fisid_145347)
Assoc Research Professor: Institute of Behavioral Science (IBS); Assoc Research Professor: Environmental Studies Program

Ritzwoller, Michael H (https://experts.colorado.edu/display/fisid_102264)
Professor: Physics
PhD, University of California-San Diego

Rivas Rodriguez, Jose Javier (https://experts.colorado.edu/display/fisid_144516)
Associate Professor, Assoc Chair: Spanish and Portuguese
PhD, Univ of Santiago De Compostela (Spain)

Rivera, George F (https://experts.colorado.edu/display/fisid_103055)
Professor: Art and Art History
PhD, SUNY at Buffalo

Rivera, John-Michael (https://experts.colorado.edu/display/fisid_118393)
Associate Professor, Faculty Director: Program for Writing and Rhetoric; Associate Professor: English
PhD, University of Texas at Austin

Rivers, Julius Edwin (https://experts.colorado.edu/display/fisid_101652)
Professor: English; Professor: Critical Media Practices
PhD, University of Oregon

Rivlin, Eyal Ofer (https://experts.colorado.edu/display/fisid_151100)
Instructor: Jewish Studies
MA, Naropa Institute

Robbs, Brett
Professor Emeritus: Advertising, Public Relations and Media Design

Roberson, Lee
Instructor: Mathematics
PhD, University of Northern Colorado

Roberts, Lindsay Michelle (https://experts.colorado.edu/display/fisid_157161)
Assistant Professor: University Libraries
MLIS, University of Denver

Robertson, Benjamin John (https://experts.colorado.edu/display/fisid_146500)
Instructor: English
PhD, SUNY at Buffalo

Robertson, Scott H.
Professor Emeritus: Physics

Robichaux, Waldean
Professor Emeritus: Integrative Physiology

Robinson, Colene Flynn (https://experts.colorado.edu/display/fisid_140754)
Clinical Professor, Instructor Adjunct: School of Law
JD, Loyola University of Chicago

Robinson, Janet Schwartzberg (https://experts.colorado.edu/display/fisid_124489)
Instructor: Libby Arts RAP
MA, University of Colorado Denver

Robinson, Jeffrey C.
Professor Emeritus: English

Robinson, Peter
Professor Emeritus: Geological Sciences

Robinson, Rick Emery (https://experts.colorado.edu/display/fisid_156556)
Senior Instructor: Information Science
PhD, University of Chicago

Rock, Steven Karl (https://experts.colorado.edu/display/fisid_113689)
Associate Professor, Chair: Leeds School of Business
PhD, Pennsylvania State University

Roeder, Matthew J (https://experts.colorado.edu/display/fisid_120180)
Associate Professor: Music Education; Associate Professor, Faculty Director: Music
DMA, University of Colorado Boulder

Rogers, Andrei
Professor Emeritus: Geography

Rogers, Charles (https://experts.colorado.edu/display/fisid_101331)
Professor: Physics
PhD, Cornell University

Rogers, Jonathan L (https://experts.colorado.edu/display/fisid_153009)
Associate Professor: Leeds School of Business
PhD, University of Pennsylvania

Rogers, Richard G (https://experts.colorado.edu/display/fisid_106129)
Professor: Sociology
PhD, University of Texas at Austin

Rogers, Sarah (https://experts.colorado.edu/display/fisid_142221)
Lecturer: Environmental Studies Program

Roland, Lorecia Kaifa-Aliya (https://experts.colorado.edu/display/fisid_143551)
Faculty Director: International Education; Associate Professor:
Anthropology
PhD, Duke University

Romanov, Artemi (https://experts.colorado.edu/display/fisid_100659)
Professor: Germanic and Slavic Languages and Literatures; Faculty
Director: International Education; Faculty Director: Global RAP
MA, SUNY at Binghamton

Romatschke, Paul (https://experts.colorado.edu/display/fisid_149870)
Assistant Professor: Physics
PhD, Technical Univ of Vienna (Austria)

Romero, Brenda M (https://experts.colorado.edu/display/fisid_106117)
Associate Professor: Music
PhD, University of California-Los Angeles

Rondina, Giacomo (https://experts.colorado.edu/display/fisid_154419)
Assistant Professor: Economics
PhD, University of Wisconsin-Madison

Roper, Don E.
Professor Emeritus: Economics

Rosario-Ortiz, Fernando L. (https://experts.colorado.edu/display/fisid_146165)
Associate Professor, Assistant Professor: Civil, Environmental and
Architectural Engineering
PhD, University of California-Los Angeles

Ross-Bryant, Lynn
Professor Emeritus: Religious Studies

Rosse, Joseph G (https://experts.colorado.edu/display/fisid_105706)
Professor: Leeds School of Business
PhD, University of Illinois at Urbana-Champaign

Roth, Richard L.
Professor Emeritus: Mathematics

Roth, Yumi J (https://experts.colorado.edu/display/fisid_126287)
Associate Professor: Art and Art History
MFA, SUNY College at New Paltz

Roudbari, Shawhin (https://experts.colorado.edu/display/fisid_153645)
Assistant Professor: Environmental Design
PhD, University of California-Berkeley

Rowinski, Chris Morton (https://experts.colorado.edu/display/fisid_113035)
Lecturer: Speech, Language and Hearing Sciences (SLHS)

Rowland, Willard D.
Professor Emeritus: Media Studies

Ruben, Shalom D (https://experts.colorado.edu/display/fisid_149492)
Instructor: Mechanical Engineering; Instructor: Electrical, Computer and
Energy Engineering (ECEE)
PhD, University of California-Los Angeles

Rudy, Jerry W (https://experts.colorado.edu/display/fisid_101550)
Professor, Lecturer: Continuing Education & Professional Studies; Chair:
Psychology and Neuroscience
PhD, University of Virginia

Ruestow, Edward G.
Professor Emeritus: History

Runnells, Don
Professor Emeritus: Geological Sciences

Runner, Meredith
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

Rupert, Robert D (https://experts.colorado.edu/display/fisid_139802)
Professor, Assoc Chair: Philosophy; Chair: Faculty Council, A&S
PhD, University of Illinois at Chicago

Rush, David F.
Professor Emeritus: Leeds School of Business

Ryan, Joseph N (https://experts.colorado.edu/display/fisid_101037)
Professor: Civil, Environmental and Architectural Engineering
PhD, Massachusetts Institute of Technology

Ryan, Kathleen Marie (https://experts.colorado.edu/display/fisid_148481)
Associate Professor: Journalism
PhD, University of Oregon

S

Sable, Barbara Kinsey
Professor Emeritus: Music

Sacks, Elias R. (https://experts.colorado.edu/display/fisid_151425)
Assistant Professor: Religious Studies; Assoc Faculty Director: Jewish
Studies
PhD, Princeton University

Sadagopan, Neeraja (https://experts.colorado.edu/display/fisid_144517)
Assistant Professor: Speech, Language and Hearing Sciences (SLHS)
PhD, Purdue University

Saddoris, Michael Paul (https://experts.colorado.edu/display/fisid_152979)
Assistant Professor: Psychology and Neuroscience
PhD, Johns Hopkins University

Safran, Rebecca J (https://experts.colorado.edu/display/fisid_145518)
Associate Professor: Ecology and Evolutionary Biology
PhD, Cornell University

Safran, William
Professor Emeritus: Political Science

Salys, Rimgaila
Professor Emeritus: Germanic and Slavic Languages and Literatures

Sammakia, Tarek (https://experts.colorado.edu/display/fisid_101597)
Professor: Chemistry and Biochemistry
PhD, Yale University

Sampsel, Laurie (https://experts.colorado.edu/display/fisid_101802)
Professor: University Libraries; Professor: Music
MLS, Kent State University

Sampson, Earl D.
Professor Emeritus: Germanic and Slavic Languages and Literatures

Sampson, John Franklin
Professor Emeritus: Art and Art History

Sampson, William Walker (https://experts.colorado.edu/display/fisid_153994)
Assistant Professor: University Libraries
MLIS, University of Texas at Austin

Sancar, Fahriye Hazer
Professor Emeritus: Environmental Design

Sanders, Bruce W.
Professor Emeritus: Computer Science

Saner, Reginald A.
Professor Emeritus: English

Sankaranarayanan, Sriram (https://experts.colorado.edu/display/fisid_147413)
Associate Professor: Computer Science; Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Stanford University

Santos, Jose Ramon (https://experts.colorado.edu/display/fisid_124623)
Lecturer: Continuing Education & Professional Studies; Senior Instructor: Interdisciplinary Telecommunications
MS, University of Colorado Boulder

Saouma, Victor (https://experts.colorado.edu/display/fisid_100429)
Professor: Civil, Environmental and Architectural Engineering
PhD, Cornell University

Sasnett-Martichuski, Diane Kay (https://experts.colorado.edu/display/fisid_111599)
Senior Instructor: Psychology and Neuroscience; Lecturer: Continuing Education & Professional Studies
PhD, Colorado State University

Sather, Duane P.
Professor Emeritus: Mathematics

Saucedo Ceballos, Raul (https://experts.colorado.edu/display/fisid_153759)
Assistant Professor: Philosophy
PhD, Cornell University

Saul, Leif J (https://experts.colorado.edu/display/fisid_116130)
Senior Instructor: Integrative Physiology
PhD, University of California-Berkeley

Sauther, Michelle Linda (https://experts.colorado.edu/display/fisid_107236)
Professor: Anthropology
PhD, Washington University

Savage, Scott James (https://experts.colorado.edu/display/fisid_121239)
Associate Professor: Economics
PhD, Curtin Univ of Tech (Western Australia)

Sawchuk, Terry M (https://experts.colorado.edu/display/fisid_102477)
Associate Professor: Music
MM, University of Michigan Ann Arbor

Sawin, Lewis
Professor Emeritus: English

Sawyer, Sara Lea (https://experts.colorado.edu/display/fisid_155218)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Cornell University

Saxton, Richard W (https://experts.colorado.edu/display/fisid_144756)
Associate Professor: Art and Art History; Associate Professor: Critical Media Practices
MFA, Indiana University Bloomington

Scamehorn, Howard Lee
Professor Emeritus: History

Scanlan-Lyons, Colleen M. (https://experts.colorado.edu/display/fisid_148419)
Asst Professor Adjunct: Anthropology

Scarborough, Rebecca Anne (https://experts.colorado.edu/display/fisid_143741)
Associate Professor, Assoc Chair: Linguistics
PhD, University of California-Los Angeles

Scarritt, James R.
Professor Emeritus: Political Science

Schaal, David Andrew (https://experts.colorado.edu/display/fisid_114824)
Instructor: ATLAS Institute
MFA, University of Colorado Boulder

Schaberg, Petger J (https://experts.colorado.edu/display/fisid_103135)
Senior Instructor: Program for Writing and Rhetoric
MA, University of Colorado Boulder

Schattke, Rudolph
Professor Emeritus: Leeds School of Business

Schaub, Hanspeter (https://experts.colorado.edu/display/fisid_143818)
Professor, Assoc Chair: Aerospace Engineering Sciences; Professor: Colorado Center for Astrodynamics Research (CCAR)
PhD, Texas AM University

Schaub, Kevin D. (https://experts.colorado.edu/display/fisid_144142)
Instructor: Leeds School of Business
MBA, University of Colorado Boulder

Schauster, Erin E (https://experts.colorado.edu/display/fisid_156310)
Assistant Professor: Advertising, Public Relations and Media Design
PhD, University of Missouri-Columbia

Scheeres, Daniel J. (https://experts.colorado.edu/display/fisid_145035)
Distinguished Professor: Aerospace Engineering Sciences
PhD, University of Michigan Ann Arbor

Schibli, Thomas Richard (https://experts.colorado.edu/display/fisid_143464)
Associate Professor: Physics; Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Univ of Karlsruhe (Germany)

Schick, Brenda (https://experts.colorado.edu/display/fisid_110058)
Professor: Speech, Language and Hearing Sciences (SLHS)
PhD, Purdue University

Schincariol, Marcelo Tadeu (https://experts.colorado.edu/display/fisid_148724)
Instructor: Spanish and Portuguese

Schindler, Patricia A.
Professor Emeritus: Germanic and Slavic Languages and Literatures

Schlag, Pierre J (https://experts.colorado.edu/display/fisid_105653)
Distinguished Professor: School of Law
JD, University of California-Los Angeles

Schmidt, Steve (https://experts.colorado.edu/display/fisid_103713)
Professor: Ecology and Evolutionary Biology
PhD, Cornell University

Schmidt, Wolfgang
Professor Emeritus: Mathematics

Schmiesing, Ann C (https://experts.colorado.edu/display/fisid_106248)
Dean: Graduate School; Professor: Germanic and Slavic Languages and Literatures
PhD, University of Cambridge (England)

Schmitz, Amy Jean (https://experts.colorado.edu/display/fisid_118136)
Professor: School of Law
JD, University of Minnesota Twin Cities

Schnabel, Robert B.
Professor Emeritus: Computer Science

Schneider, Nathan Todd (https://experts.colorado.edu/display/fisid_156512)
Scholar In Residence: Media Studies
MA, University of California-Santa Barbara

Schneider, Nicholas M (https://experts.colorado.edu/display/fisid_102620)
Associate Professor: Laboratory for Atmospheric and Space Physics (LASP); Associate Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Arizona

Schnizer-Luger, Karoline (https://experts.colorado.edu/display/fisid_156579)
Professor: Chemistry and Biochemistry
PhD, Univ of Basel (Switzerland)

Schranz, Karoly (https://experts.colorado.edu/display/fisid_103924)
Assoc Professor Attendant Rank, Artist in Residence: Music

Schreuder, Willem A (https://experts.colorado.edu/display/fisid_143834)
Asst Professor Adjunct: Computer Science

Schulte, Stacey Lynn (https://experts.colorado.edu/display/fisid_146819)
Instructor: Environmental Design

Schultz, Lisa A. (https://experts.colorado.edu/display/fisid_153208)
Instructor: Law Library
MA, University of Missouri-Columbia

Schulzinger, Robert D.
Professor Emeritus: History

Schwartz, Andrew Abraham (https://experts.colorado.edu/display/fisid_146092)
Associate Professor: School of Law
JD, Columbia University In the City of New York

Schwartz, Daniel K. (https://experts.colorado.edu/display/fisid_118479)
Professor, Assoc Chair: Chemical and Biological Engineering; Professor: Chemistry and Biochemistry
PhD, Harvard University

Schwartz, Trudy L (https://experts.colorado.edu/display/fisid_108607)
Senior Instructor: Aerospace Engineering Sciences
MS, University of Colorado Boulder

Schwengler, Thomas (https://experts.colorado.edu/display/fisid_143850)
Lecturer: Interdisciplinary Telecommunications

Schütrumpf, Eckart E. W.
Professor Emeritus: Classics

Scott, F. Wayne
Professor Emeritus: Music

Seals, Douglas R (https://experts.colorado.edu/display/fisid_103375)
Professor: Integrative Physiology
PhD, University of Wisconsin-Madison

Sears, Curtis R (https://experts.colorado.edu/display/fisid_145482)
Senior Instructor, Instructor: Leeds School of Business
JD, University of Colorado Boulder

Sears, Kelly L (https://experts.colorado.edu/display/fisid_154467)
Assistant Professor: Film Studies
MFA, University of California-San Diego

Seastedt, Timothy (https://experts.colorado.edu/display/fisid_103519)
Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor, Assoc Chair: Ecology and Evolutionary Biology
PhD, University of Georgia

Segil, Jacob Lionel (https://experts.colorado.edu/display/fisid_155128)
Instructor: General Engineering; Instructor: Engineering-Bold Center
MS, University of Colorado Boulder

Segur, Harvey (https://experts.colorado.edu/display/fisid_102287)
Professor: Applied Mathematics
PhD, University of California-Berkeley

Selden, Karen E (https://experts.colorado.edu/display/fisid_113311)
Senior Instructor: School of Law
MLS, Simmons College

Selto, Frank
Professor Emeritus: Leeds School of Business
PhD, University of Washington

Senderovich, Aleksandr M (https://experts.colorado.edu/display/fisid_152981)
Assistant Professor: Germanic and Slavic Languages and Literatures
PhD, Harvard University

Seno, Cosetta (https://experts.colorado.edu/display/fisid_144515)
Associate Professor, Assoc Chair: French & Italian
PhD, University of California-Berkeley

Sepulveda Arellano, Julio Cesar (https://experts.colorado.edu/display/fisid_154923)
Assistant Professor: Geological Sciences; Assistant Professor: Institute of Arctic & Alpine Research (INSTAAR)
PhD, University of Bremen (Germany)

Serreze, Mark (https://experts.colorado.edu/display/fisid_106334)
Professor, Professor: Geography; Faculty Director: Cooperative Institute for Research in Environmental Sciences (CIRES)
PhD, University of Colorado Boulder

Seward, Lori Elizabeth (https://experts.colorado.edu/display/fisid_113934)
Faculty Director: International Education; Senior Instructor: Leeds School of Business
PhD, Virginia Polytechnic Institute and State Univ

Shaheen, Sean Eric (https://experts.colorado.edu/display/fisid_153664)
Associate Professor, Associate Professor: Physics; Assoc Chair: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of Arizona

Shang, Li (https://experts.colorado.edu/display/fisid_145412)
Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Princeton University

Shankman, Paul
Professor Emeritus: Anthropology

Shannon, Jennifer A. (https://experts.colorado.edu/display/fisid_147612)
Associate Professor: University of Colorado Museum of Natural History;
Associate Professor: Anthropology
PhD, Cornell University

Shannon, Robert J.
Professor Emeritus: Theatre and Dance

Shapiro, Ryan Benjamin (https://experts.colorado.edu/display/fisid_156418)
Assistant Professor: Computer Science; Assistant Professor, Assistant Professor: ATLAS Institute; Assistant Professor: School of Education
PhD, Northwestern University

Sharma, Anu (https://experts.colorado.edu/display/fisid_143814)
Professor, Chair: Speech, Language and Hearing Sciences (SLHS)
PhD, Northwestern University

Sharma, Vijaya Raj (https://experts.colorado.edu/display/fisid_104623)
Instructor: Libby Arts RAP
PhD, University of Colorado Boulder

Sharpless, Seth K.
Professor Emeritus: Psychology and Neuroscience

Shay, Maire Erin Jean (https://experts.colorado.edu/display/fisid_110594)
Asst Professor Adjunct: Linguistics

Shay, Robert S. (https://experts.colorado.edu/display/fisid_154671)
Dean, Professor: Music
PhD, University of North Carolina Chapel Hill

Shea, Mary Ann (https://experts.colorado.edu/display/fisid_100079)
Faculty Director: Academic Affairs

Sheehan, Anne (https://experts.colorado.edu/display/fisid_103645)
Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Professor: Geological Sciences
PhD, Massachusetts Institute of Technology

Sheffield, Elisabeth Ann (https://experts.colorado.edu/display/fisid_123500)
Associate Professor: English
PhD, SUNY at Buffalo

Shen, Jingshi (https://experts.colorado.edu/display/fisid_146414)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Columbia University In the City of New York

Shepard, James R.
Professor Emeritus: Physics

Shepard, Lorrie A (https://experts.colorado.edu/display/fisid_105949)
Distinguished Professor: School of Education
PhD, University of Colorado Boulder

Sherwood, David (https://experts.colorado.edu/display/fisid_105516)
Associate Professor, Assoc Chair: Integrative Physiology
PhD, University of Southern California

Shi, Jia (https://experts.colorado.edu/display/fisid_143673)
Instructor: Integrative Physiology
PhD, Boston University

Shin, Adrian (https://experts.colorado.edu/display/fisid_158138)
Assistant Professor: Political Science
PhD, University of Michigan Ann Arbor

Shirts, Michael R (https://experts.colorado.edu/display/fisid_156474)
Associate Professor: Chemical and Biological Engineering
PhD, Stanford University

Shiue, Carol Hua (https://experts.colorado.edu/display/fisid_141892)
Associate Professor: Economics
PhD, Yale University

Shneer, David (https://experts.colorado.edu/display/fisid_146105)
Professor: History; Professor: Jewish Studies; Professor, Chair: Religious Studies
PhD, University of California-Berkeley

Shull, J Michael (https://experts.colorado.edu/display/fisid_103350)
Professor: Astrophysical and Planetary Sciences (APS); Professor: Center for Astrophysics & Space Astronomy (CASA)
PhD, Princeton University

Sibley, Gabriel T (https://experts.colorado.edu/display/fisid_154632)
Assistant Professor: Computer Science
PhD, University of Southern California

Sicker, Douglas C. (https://experts.colorado.edu/display/fisid_123114)
Professor: Computer Science
PhD, University of Pittsburgh

Sideris, Petros (https://experts.colorado.edu/display/fisid_153057)
Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, SUNY at Buffalo

Sideris, Sabrina C (https://experts.colorado.edu/display/fisid_120493)
Instructor: INVST Community Studies

Sieber, Diane Elizabeth (https://experts.colorado.edu/display/fisid_101394)
Associate Professor: Herbst Humanities Program; Faculty Director: Global Engineering RAP
PhD, Princeton University

Siek, Jeremy G (https://experts.colorado.edu/display/fisid_143687)
Asst Professor Adjunct: Electrical, Computer and Energy Engineering (ECEE)
PhD, Indiana University Bloomington

Sievers, Robert E (https://experts.colorado.edu/display/fisid_102866)
Faculty Director: Grad Sch-Environmental Prgm; Professor: Chemistry and Biochemistry
PhD, University of Illinois at Urbana-Champaign

Siewert, Sam (https://experts.colorado.edu/display/fisid_105591)
Asst Professor Adjunct: Electrical, Computer and Energy Engineering (ECEE)

Silleras-Fernandez, Nuria (https://experts.colorado.edu/display/fisid_147213)
Associate Professor: Spanish and Portuguese
PhD, Univ Autonoma De Barcelona - UAB (Spain)

Silver, Daniel S (https://experts.colorado.edu/display/fisid_115564)
Associate Professor: Music
MM, University of Michigan Ann Arbor

Silverstein, Joann (https://experts.colorado.edu/display/fisid_101482)
Professor: Civil, Environmental and Architectural Engineering
PhD, University of California-Davis

Simonson, Peter D. (https://experts.colorado.edu/display/fisid_143251)
Professor, Assoc Chair: Communication
PhD, University of Iowa

Simpson, Michele D (https://experts.colorado.edu/display/fisid_145311)
Instructor: Farrand RAP

Singell, Larry D.
Professor Emeritus: Economics

Singh, Ravinder (https://experts.colorado.edu/display/fisid_112067)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Baylor College of Medicine

Sinkinson, Caroline B. (https://experts.colorado.edu/display/fisid_141709)
Associate Professor: University Libraries
MLIS, Kent State University

Skerski, Jamie L (https://experts.colorado.edu/display/fisid_149871)
Senior Instructor: Communication; Lecturer: Continuing Education & Professional Studies
PhD, Indiana University Bloomington

Skewes Cummings, Elizabeth (https://experts.colorado.edu/display/fisid_122724)
Associate Professor: Journalism; Lecturer: Continuing Education & Professional Studies
PhD, Syracuse University

Skodje, Rex T (https://experts.colorado.edu/display/fisid_103448)
Professor: Chemistry and Biochemistry
PhD, University of Minnesota Twin Cities

Slayden, David Lee (https://experts.colorado.edu/display/fisid_113297)
Associate Professor: Advertising, Public Relations and Media Design; Faculty Director: College of Media, Communication & Information
PhD, Indiana University Bloomington

Sloan, Royal Daniel Jr
Professor Emeritus: Political Science

Smalyukh, Ivan I (https://experts.colorado.edu/display/fisid_144757)
Associate Professor: Physics; Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Kent State University

Smith, Jeremy L (https://experts.colorado.edu/display/fisid_118265)
Professor, Associate Professor: Music
PhD, University of California-Santa Barbara

Smith, Stacey Dewitt (https://experts.colorado.edu/display/fisid_153407)
Assistant Professor: Ecology and Evolutionary Biology
PhD, University of Wisconsin-Madison

Smyth, Joseph R (https://experts.colorado.edu/display/fisid_101056)
Professor: Geological Sciences
PhD, University of Chicago

Smythe, Rodman
Professor Emeritus: Physics

Snell, Kathryn Elaine (https://experts.colorado.edu/display/fisid_155298)
Assistant Professor: Geological Sciences
PhD, University of California-Santa Cruz

Snow, Theodore P. Jr
Professor Emeritus: Astrophysical and Planetary Sciences (APS)

Snyder, Douglas J (https://experts.colorado.edu/display/fisid_154903)
Instructor: Baker RAP; Lecturer: International Affairs Program

Snyder, Howard
Professor Emeritus: Aerospace Engineering Sciences

Snyder, Lynn
Professor Emeritus: Speech, Language and Hearing Sciences (SLHS)

Sohi, Seema (https://experts.colorado.edu/display/fisid_144616)
Associate Professor, Associate Professor: History; Assoc Chair: Ethnic Studies
PhD, University of Washington

Sokhey, Anand Edward (https://experts.colorado.edu/display/fisid_147113)
Associate Professor: Political Science
PhD, Ohio State University

Sokhey, Sarah Wilson (https://experts.colorado.edu/display/fisid_147614)
Assistant Professor: Political Science
PhD, Ohio State University

Solomon, Phillip (https://experts.colorado.edu/display/fisid_100867)
Professor: Film Studies
MFA, Massachusetts College of Art

Soltero-Gonzalez, Lucinda A (https://experts.colorado.edu/display/fisid_144617)
Lecturer: School of Education
PhD, University of Arizona

Soltys, Michael A. (https://experts.colorado.edu/display/fisid_152021)
Instructor: General Engineering
PhD, University of Colorado Boulder

Somenzi, Fabio (https://experts.colorado.edu/display/fisid_103969)
Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, Politecnico Di Torino (Italy)

Song, Jeong-Hoon (https://experts.colorado.edu/display/fisid_154468)
Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, Northwestern University

Sorenson, Ralph Z.
Professor Emeritus: Leeds School of Business

Souder, Heidi L (https://experts.colorado.edu/display/fisid_151177)
Instructor: Baker RAP
PhD, University of South Florida

Sousa, Marcelo Carlos (https://experts.colorado.edu/display/fisid_122806)
Professor: Chemistry and Biochemistry
PhD, Univ of Buenos Aires (Argentina)

Sowah, Nii Armah (https://experts.colorado.edu/display/fisid_115125)
Senior Instructor: Theatre and Dance
MA, Lesley College

Spain Bradley, Anna Katrina (https://experts.colorado.edu/display/fisid_147409)
Associate Professor: School of Law; Faculty Director: Academic Affairs
JD, Harvard University

Spanier, Nancy L.
Professor Emeritus: Theatre and Dance

Speck, Sloan G. (https://experts.colorado.edu/display/fisid_155972)
Associate Professor: School of Law
LLM, New York University

Speiser, Theodore W.
Professor Emeritus: Astrophysical and Planetary Sciences (APS)

Spencer, Robert L (https://experts.colorado.edu/display/fisid_104362)
Professor: Psychology and Neuroscience
PhD, University of Arizona

Spencer, Sabrina Leigh (https://experts.colorado.edu/display/fisid_154911)
Assistant Professor: Chemistry and Biochemistry
PhD, Massachusetts Institute of Technology

Spera, Nicolo Ruggero Ferruccio (https://experts.colorado.edu/display/fisid_148406)
Assistant Professor: Music
DMA, University of Colorado Boulder

Spetzler, Hartmut A. W.
Professor Emeritus: Geological Sciences

Spielman, Seth Edward (https://experts.colorado.edu/display/fisid_148271)
Associate Professor: Geography
PhD, SUNY at Buffalo

Spillman, Robert
Professor Emeritus: Music

Spina, Alejandro (https://experts.colorado.edu/display/fisid_104240)
Senior Instructor: Mathematics
PhD, University of Colorado Boulder

Spinetto, Richard D.
Professor Emeritus: Leeds School of Business

Spires, David N.
Professor Emeritus: History

Sponheimer, Matthew James (https://experts.colorado.edu/display/fisid_129957)
Professor: Anthropology
PhD, Rutgers University New Brunswick

Sprain, Leah MH (https://experts.colorado.edu/display/fisid_151292)
Assistant Professor: Communication
PhD, University of Washington

Squillace, Mark S (https://experts.colorado.edu/display/fisid_140895)
Professor: School of Law
JD, University of Utah

Srubar III, Wilfred V. (https://experts.colorado.edu/display/fisid_153058)
Assistant Professor: Civil, Environmental and Architectural Engineering
PhD, Stanford University

Stade, Eric (https://experts.colorado.edu/display/fisid_100456)
Professor: Libby Arts RAP; Professor: Mathematics; Faculty Director:
Sewall RAP
PhD, Columbia University In the City of New York

Staelin, L. Andrew
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

Stafford, Gabrielle Marks (https://experts.colorado.edu/display/fisid_115917)
Senior Instructor, Instructor Adjunct: School of Law
JD, Boston University

Stafford, Todd (https://experts.colorado.edu/display/fisid_120676)
Senior Instructor: School of Law
JD, Duke University

Stallings, Michael C (https://experts.colorado.edu/display/fisid_108745)
Professor: Institute for Behavioral Genetics (IBG); Professor: Psychology and Neuroscience
PhD, University of Southern California

Stanley, William J (https://experts.colorado.edu/display/fisid_103616)
Associate Professor: Music
DMA, University of Illinois at Urbana-Champaign

Stanton, William J.
Professor Emeritus: Leeds School of Business

Stapp, Elizabeth Cole (https://experts.colorado.edu/display/fisid_149889)
Instructor: Leeds School of Business
JD, Boston University

Stark, Theodore (https://experts.colorado.edu/display/fisid_118462)
Senior Instructor: Theatre and Dance
MFA, Boston University

Steen, Sara (https://experts.colorado.edu/display/fisid_122698)
Associate Professor: Sociology
PhD, University of Washington

Steffen, Konrad
Professor Emeritus: Geography

Stein, Lara C (https://experts.colorado.edu/display/fisid_156437)
Asst Professor Adjunct: Anthropology

Steinbrenner, Julie Elizabeth (https://experts.colorado.edu/display/fisid_152041)
Instructor: Mechanical Engineering; Faculty Director: College of Engineering and Applied Science
PhD, Stanford University

Steinmo, Sven H (https://experts.colorado.edu/display/fisid_105905)
Professor: Political Science
PhD, University of California-Berkeley

Stenson, Kevin M (https://experts.colorado.edu/display/fisid_128676)
Associate Professor, Assoc Chair: Physics
PhD, University of Wisconsin-Madison

Stephen, Ricardo Hugh (https://experts.colorado.edu/display/fisid_145994)
Instructor: Chemistry and Biochemistry
PhD, University of Colorado Boulder

Stephenson, Craig A (https://experts.colorado.edu/display/fisid_144851)
Senior Instructor: Leeds School of Business
PhD, University of Arizona

Stern, Charles R (https://experts.colorado.edu/display/fisid_100941)
Professor: Geological Sciences
PhD, University of Chicago

Sternovsky, Zoltan (https://experts.colorado.edu/display/fisid_115211)
Associate Professor: Laboratory for Atmospheric and Space Physics (LASP); Associate Professor: Aerospace Engineering Sciences
PhD, Charles Univ, Prague (Czech Republic)

Stevens, Charlene (https://experts.colorado.edu/display/fisid_143589)
Associate Professor: Art and Art History
MFA, Indiana University Bloomington

Stevens, John Richard (https://experts.colorado.edu/display/fisid_145848)
Associate Professor, Assoc Chair: Media Studies
PhD, University of Texas at Austin

Stevenson, John A (https://experts.colorado.edu/display/fisid_101656)
Professor: English; Faculty Director: Center for Humanities and the Arts
PhD, University of Virginia

Stillman, Jamy A (https://experts.colorado.edu/display/fisid_156381)
Associate Professor: School of Education
PhD, University of California-Los Angeles

Stimilli, Davide (https://experts.colorado.edu/display/fisid_134650)
Associate Professor: Germanic and Slavic Languages and Literatures
PhD, Yale University

Stitzel, Jerry A (https://experts.colorado.edu/display/fisid_102954)
Associate Professor: Institute for Behavioral Genetics (IBG); Associate Professor: Integrative Physiology
PhD, Johns Hopkins University

Stock, David W (https://experts.colorado.edu/display/fisid_113762)
Associate Professor: Ecology and Evolutionary Biology
PhD, University of Illinois at Urbana-Champaign

Stocke, John T (https://experts.colorado.edu/display/fisid_103369)
Professor: Astrophysical and Planetary Sciences (APS); Professor: Center for Astrophysics & Space Astronomy (CASA)
PhD, University of Arizona

Stockton, Keith Michael (https://experts.colorado.edu/display/fisid_143887)
Instructor: Leeds School of Business; Instructor: Environmental Studies Program
PhD, University of Colorado Boulder

Stodieck, Louis S (https://experts.colorado.edu/display/fisid_105272)
Research Professor: Aerospace Engineering Sciences; Research Professor, Faculty Director: BioServe Space Technologies
PhD, University of Colorado Boulder

Stoldt, Conrad R (https://experts.colorado.edu/display/fisid_126290)
Professor: Mechanical Engineering
PhD, Iowa State University

Stone, Lauren Shizuko (https://experts.colorado.edu/display/fisid_154888)
Assistant Professor: Germanic and Slavic Languages and Literatures
PhD, New York University

Stowell, Michael (https://experts.colorado.edu/display/fisid_124136)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB); Associate Professor: Mechanical Engineering
PhD, California Institute of Technology

Strayhorn, Joshua Aaron (https://experts.colorado.edu/display/fisid_152584)
Assistant Professor: Political Science
PhD, Emory University

Striphas, Theodore G. (https://experts.colorado.edu/display/fisid_156205)
Associate Professor: Communication
PhD, University of North Carolina Chapel Hill

Strom, Paul (https://experts.colorado.edu/display/fisid_106128)
Senior Instructor: Honors Program
PhD, University of Denver

Struik, Ruth Rebekka
Professor Emeritus: Mathematics

Strzepek, Kenneth M.
Professor Emeritus: Civil, Environmental and Architectural Engineering

Stuckey, Andrew (<http://www.colorado.edu/alc/andrew-stuckey>)
Assistant Professor: Asian Languages and Civilizations
PhD, UCLA

Sture, Stein (https://experts.colorado.edu/display/fisid_104029)
Professor: Civil, Environmental and Architectural Engineering
PhD, University of Colorado Boulder

Sturgis, Daniel (https://experts.colorado.edu/display/fisid_111794)
Lecturer: Continuing Education & Professional Studies; Senior Instructor,
Instructor: Philosophy
PhD, University of Colorado Boulder

Stutzer, Michael J. (https://experts.colorado.edu/display/fisid_126711)
Professor: Leeds School of Business
PhD, University of Minnesota Twin Cities

Su, Tin Tin (https://experts.colorado.edu/display/fisid_113847)
Professor, Chair: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Carnegie Mellon University

Suding, Katharine Nash (https://experts.colorado.edu/display/fisid_116718)
Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor:
Ecology and Evolutionary Biology
PhD, University of Michigan Ann Arbor

Sue, Christina Alicia (https://experts.colorado.edu/display/fisid_145679)
Associate Professor, Assoc Chair: Sociology
PhD, University of California-Los Angeles

Sueoka, Noboru
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

Sullivan, Jacquelyn F (https://experts.colorado.edu/display/fisid_102481)
Faculty Director: College of Engineering and Applied Science

Sullivan, Patricia A (https://experts.colorado.edu/display/fisid_126640)
Professor: Program for Writing and Rhetoric; Professor: English
PhD, Ohio State University

Summers, Luis L.
Professor Emeritus: Civil, Environmental and Architectural Engineering

Summers, R Scott (https://experts.colorado.edu/display/fisid_113151)
Professor: Civil, Environmental and Architectural Engineering; Faculty
Director: Environmental Engineering Program (EVEN)
PhD, Stanford University

Sumner, Tammy R (https://experts.colorado.edu/display/fisid_105742)
Professor: Institute of Cognitive Science (ICS); Professor: Computer
Science
PhD, University of Colorado Boulder

Sun, Yacheng (https://experts.colorado.edu/display/fisid_145680)
Assistant Professor: Leeds School of Business
PhD, Indiana University Bloomington

Surden, Harry Adam (https://experts.colorado.edu/display/fisid_146083)
Associate Professor: School of Law
JD, Stanford University

Sutter, Paul Shriver (https://experts.colorado.edu/display/fisid_147513)
Professor: History
PhD, University of Kansas

Swadener, Marc
Professor Emeritus: Music

Swanson, Joel E. (https://experts.colorado.edu/display/fisid_134311)
Assistant Professor: Intermedia Art, Writing and Performance; Assistant
Professor: ATLAS Institute; Assistant Professor: Herbst Humanities
Program
MFA, University of California-San Diego

Swanson, Juleah Ann (https://experts.colorado.edu/display/fisid_155854)
Assistant Professor: University Libraries
MLS, University of Washington

Sweetman, Alex John (https://experts.colorado.edu/display/fisid_100531)
Associate Professor: Art and Art History
MFA, SUNY at Buffalo

Sweetman, Richard H.
Professor Emeritus: Speech, Language and Hearing Sciences (SLHS)

Symons, James M.
Professor Emeritus: Theatre and Dance

Syvitski, James P (https://experts.colorado.edu/display/fisid_107424)
Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor:
Geological Sciences
PhD, Univ of British Columbia (Canada)

Szafir, Daniel James (https://experts.colorado.edu/display/fisid_156420)
Assistant Professor: ATLAS Institute; Assistant Professor: Computer
Science
PhD, University of Wisconsin-Madison

Szafir, Danielle N (https://experts.colorado.edu/display/fisid_156317)
Assistant Professor: Computer Science; Assistant Professor: Information
Science
PhD, University of Wisconsin-Madison

Szendrei, Agnes Erzsebet (https://experts.colorado.edu/display/fisid_130160)
Professor: Mathematics
DSc, Hungarian Academy of Sciences (Hungary)

T

Taatjes, Dylan J (https://experts.colorado.edu/display/fisid_102436)
Associate Professor: Chemistry and Biochemistry
PhD, University of Colorado Boulder

Tabler, Alicia V (https://experts.colorado.edu/display/fisid_104217)
Instructor: Spanish and Portuguese
BA, University of Wyoming

Tallman, Kathryn Wood (https://experts.colorado.edu/display/fisid_152383)
Assistant Professor, Assoc Faculty Director: University Libraries
MS, University of Illinois at Urbana-Champaign

Tan, Wei (https://experts.colorado.edu/display/fisid_141464)
Associate Professor: Mechanical Engineering
PhD, University of Illinois at Chicago

Tan, Zhongping (https://experts.colorado.edu/display/fisid_149809)
Assistant Professor: Chemistry and Biochemistry
PhD, Columbia University In the City of New York

Tavel, Michael D (https://experts.colorado.edu/display/fisid_148855)
Senior Instructor Adjunct: Environmental Design

Taylor, Allan R.
Professor Emeritus: Linguistics

Taylor, Bryan Copeland (https://experts.colorado.edu/display/fisid_107421)
Professor: Communication; Faculty Director: Peace and Conflict Studies
PhD, University of Utah

Taylor, Edward Vincent (https://experts.colorado.edu/display/fisid_151510)
Assistant Professor: School of Education
PhD, University of California-Berkeley

Taylor, John
Professor Emeritus: Physics

Taylor, Robert H.
Professor Emeritus: Leeds School of Business

Taylor, Rodney L.
Professor Emeritus: Religious Studies

Taylor, Ronald G.
Professor Emeritus: Psychology and Neuroscience

Teitelbaum, Benjamin Raphael (https://experts.colorado.edu/display/fisid_151338)
Assistant Professor: Music; Instructor: International Affairs Program
PhD, Brown University

Templeton, Alexis S (https://experts.colorado.edu/display/fisid_141202)
Associate Professor: Geological Sciences
PhD, Stanford University

Thayer, Jeffrey P (https://experts.colorado.edu/display/fisid_134469)
Professor, Professor: Electrical, Computer and Energy Engineering (ECEE);
Faculty Director: College of Engineering and Applied Science; Associate
Professor: Colorado Center for Astrodynamics Research (CCAR); Assoc
Chair: Aerospace Engineering Sciences
PhD, University of Michigan Ann Arbor

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318)
Associate Professor: Music; Faculty Director: ATLAS Institute; Associate
Professor: Art and Art History
PhD, University of California-San Diego

Thibodeau, Thomas G (https://experts.colorado.edu/display/fisid_134750)
Professor, Faculty Director: Leeds School of Business
PhD, SUNY at Stony Brook

Thiem, Franz Nathaniel (https://experts.colorado.edu/display/fisid_144618)
Associate Professor: Mathematics
PhD, University of Wisconsin-Madison

Thieman Dino, Angela Lea (https://experts.colorado.edu/display/fisid_145591)
Instructor: College of Engineering and Applied Science

Thomas, David R.
Professor Emeritus: Psychology and Neuroscience

Thomas, Gary E.
Professor Emeritus: Astrophysical and Planetary Sciences (APS)

Thomas-Ruzic, Maria L (https://experts.colorado.edu/display/fisid_143443)
Senior Instructor: Linguistics

Thompson, Jane Ellen (https://experts.colorado.edu/display/fisid_103388)
Senior Instructor: School of Law
JD, University of Denver

Thornton, Michael Robert (https://experts.colorado.edu/display/fisid_116318)
Associate Professor: Music
BM, Temple University

Thorpe, Stephen (https://experts.colorado.edu/display/fisid_158585)
Scholar In Residence: School of Law

Thrasher, Amy H. (https://experts.colorado.edu/display/fisid_120907)
Clinical Asst Professor: Speech, Language and Hearing Sciences (SLHS)
MA, University of Colorado Boulder

Tiampo, Kristy F (https://experts.colorado.edu/display/fisid_155908)
Professor: Geological Sciences; Professor: Cooperative Institute for
Research in Environmental Sciences (CIRES)
PhD, University of Colorado Boulder

Tice, Frances Mei-Lin Siu (https://experts.colorado.edu/display/fisid_156018)
Assistant Professor: Leeds School of Business
PhD, Texas AM University

Tierney, Kathleen Jane (https://experts.colorado.edu/display/fisid_125978)
Professor: Institute of Behavioral Science (IBS); Professor: Sociology
PhD, Ohio State University

Tietjen, Jill S (https://experts.colorado.edu/display/fisid_111497)
Lecturer: College of Engineering and Applied Science

Tilton, Eric Small (https://experts.colorado.edu/display/fisid_126548)
Professor, Assoc Chair: Geological Sciences
PhD, University of California-Santa Cruz

Tingle, Natalia Sue (https://experts.colorado.edu/display/fisid_147736)
Assistant Professor: University Libraries
MLS, University of Denver

Tir, Jaroslav (https://experts.colorado.edu/display/fisid_149842)
Professor: Political Science
PhD, University of Illinois at Urbana-Champaign

Tolbert, Bert Mills
Professor Emeritus: Chemistry and Biochemistry

Tolbert, Margaret A (https://experts.colorado.edu/display/fisid_104976)
Distinguished Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Distinguished Professor: Chemistry and Biochemistry
PhD, California Institute of Technology

Tompkins, Elaine V.
Professor Emeritus: College of Media, Communication & Information;
Professor Emeritus: Communication

Tompkins, Phillip K.
Professor Emeritus: College of Media, Communication & Information;
Professor Emeritus: Communication

Tong, Wenfeng (https://experts.colorado.edu/display/fisid_144520)
Associate Professor: Leeds School of Business
PhD, Ohio State University

Toohey, Darin W (https://experts.colorado.edu/display/fisid_110652)
Professor: Global RAP; Professor: Atmospheric and Oceanic Sciences (ATOC); Faculty Director: Residential Acad Program-SSI
PhD, Harvard University

Tooley, Michael (https://experts.colorado.edu/display/fisid_100932)
Professor: Philosophy
PhD, Princeton University

Toomre, Juri (https://experts.colorado.edu/display/fisid_100767)
Professor: Astrophysical and Planetary Sciences (APS)
PhD, University of Cambridge (England)

Toon, Owen Brian (https://experts.colorado.edu/display/fisid_110521)
Professor: Laboratory for Atmospheric and Space Physics (LASP);
Professor: Atmospheric and Oceanic Sciences (ATOC)
PhD, Cornell University

Torriani, Chiara (https://experts.colorado.edu/display/fisid_132725)
Instructor: French & Italian

Toulouse, Teresa A (https://experts.colorado.edu/display/fisid_143728)
Professor: English
PhD, Harvard University

Touri, Behrouz (https://experts.colorado.edu/display/fisid_154604)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of Illinois at Urbana-Champaign

Tovstiadi, Esta Marisa (https://experts.colorado.edu/display/fisid_152150)
Assistant Professor: University Libraries
MLS, University of Kentucky

Townsend, Alan Ronald (https://experts.colorado.edu/display/fisid_107584)
Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor: Ecology and Evolutionary Biology; Professor: Environmental Studies Program
PhD, Stanford University

Tracey, Michael (https://experts.colorado.edu/display/fisid_104259)
Professor: Media Studies; Lecturer: Continuing Education & Professional Studies
PhD, Univ of Leicester (England)

Tracy, John A.
Professor Emeritus: Leeds School of Business

Tracy, Karen (https://experts.colorado.edu/display/fisid_101190)
Professor, Chair: Communication; Faculty Director: College of Media, Communication & Information
PhD, University of Wisconsin-Madison

Trager, Robert
Professor Emeritus: Media Studies

Travis, William R (https://experts.colorado.edu/display/fisid_101777)
Associate Professor: Geography; Faculty Director: Cooperative Institute for Research in Environmental Sciences (CIRES)
PhD, Clark University

Trifunovic, Danica (https://experts.colorado.edu/display/fisid_114084)
Instructor: French & Italian

Tripp, Erin Anne (https://experts.colorado.edu/display/fisid_152313)
Assistant Professor: University of Colorado Museum of Natural History;
Assistant Professor: Ecology and Evolutionary Biology
PhD, Duke University

Tsai, Janet (https://experts.colorado.edu/display/fisid_156447)
Instructor: General Engineering; Lecturer: Integrated Teaching & Learning (ITL) Program
PhD, University of Colorado Boulder

Tsai, Pei-San (https://experts.colorado.edu/display/fisid_115292)
Professor, Chair: Integrative Physiology
PhD, University of California-Berkeley

Tubbs, Robert (https://experts.colorado.edu/display/fisid_101761)
Associate Professor: Miramontes Arts & Sciences Program (MASP);
Associate Professor: Mathematics
PhD, Pennsylvania State University

Tucker, Gregory E (https://experts.colorado.edu/display/fisid_130605)
Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Professor: Geological Sciences
PhD, Pennsylvania State University

Tufo, Henry (https://experts.colorado.edu/display/fisid_127040)
Research Professor: Computer Science
PhD, Brown University

Tulin, Leonard G.
Professor Emeritus: Civil, Environmental and Architectural Engineering

Tzavella-Evjen, Terpsichori H.
Professor Emeritus: Classics

U

Udis, Bernard
Professor Emeritus: Economics

Uhlenbeck, Olke C (https://experts.colorado.edu/display/fisid_102471)
Professor Adjunct: Chemistry and Biochemistry
PhD, Harvard University

Urland, Geoffrey Raymond (https://experts.colorado.edu/display/fisid_151086)
Lecturer: Psychology and Neuroscience

Uzdensky, Dmitri Anatoljevich (https://experts.colorado.edu/display/fisid_147430)
Associate Professor: Physics
PhD, Princeton University

V

Vaida, Veronica (https://experts.colorado.edu/display/fisid_100313)
Professor: Chemistry and Biochemistry
PhD, Yale University

Valdovino, Luis Hector (https://experts.colorado.edu/display/fisid_101863)
Professor: Art and Art History
MFA, University of Illinois at Urbana-Champaign

Van Blerkom, Jonathan (https://experts.colorado.edu/display/fisid_100545)
Research Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, University of Colorado Boulder

Van Boven, Leaf D (https://experts.colorado.edu/display/fisid_126291)
Professor: Psychology and Neuroscience
PhD, Cornell University

Van Gerven, Dennis P.
Professor Emeritus: Anthropology

van Lil, Kira (https://experts.colorado.edu/display/fisid_145210)
Assistant Professor: Art and Art History
PhD, Ludwig-Maximilians Univ of Munich (Germany)

Van Nelson, Loredana Alina (https://experts.colorado.edu/display/fisid_142722)
Instructor: French & Italian

Van Vliet, Willem K. T.
Professor Emeritus: Environmental Design
PhD, University of Toronto

Van Vuuren, Sarel (https://experts.colorado.edu/display/fisid_124159)
Assoc Research Professor: Institute of Cognitive Science (ICS)
PhD, Oregon Graduate Institute of Science Technology

Van Wesep, Edward D (https://experts.colorado.edu/display/fisid_154573)
Associate Professor: Leeds School of Business
PhD, Stanford University

Van Zeghbroeck, Bart J (https://experts.colorado.edu/display/fisid_104113)
Professor: Electrical, Computer and Energy Engineering (ECEE); Professor: Mechanical Engineering; Faculty Director: College of Engineering and Applied Science
PhD, University of Colorado Boulder

Vance, Marina Eller (https://experts.colorado.edu/display/fisid_158217)
Assistant Professor: Mechanical Engineering
PhD, Virginia Polytechnic Institute and State Univ

Vanderheiden, Steven Jon (https://experts.colorado.edu/display/fisid_144759)
Associate Professor: Political Science
PhD, University of Wisconsin-Madison

Vandersall, Amy L.
Professor Emeritus: Art and Art History

Varanasi, Mahesh K (https://experts.colorado.edu/display/fisid_103090)
Professor: Electrical, Computer and Energy Engineering (ECEE); Professor: Mathematics
PhD, Rice University

Vasconez, Sandra L. (https://experts.colorado.edu/display/fisid_144198)
Senior Instructor: Civil, Environmental and Architectural Engineering
MA, University of Denver

Vasilyev, Oleg V. (https://experts.colorado.edu/display/fisid_126641)
Professor: Mechanical Engineering
PhD, University of Notre Dame

Veblen, Thomas T (https://experts.colorado.edu/display/fisid_105842)
Professor: Geography
PhD, University of California-Berkeley

Vernerey, Divya E. (https://experts.colorado.edu/display/fisid_145131)
Instructor: Mathematics
PhD, Northwestern University

Vernerey, Franck J. (https://experts.colorado.edu/display/fisid_144760)
Associate Professor: Mechanical Engineering
PhD, Northwestern University

Vigers, Alison Jane (https://experts.colorado.edu/display/fisid_142378)
Instructor, Assoc Faculty Director: Health Professions RAP; Instructor: Psychology and Neuroscience

Voakes, Paul S (https://experts.colorado.edu/display/fisid_130279)
Chair, Professor: Journalism
PhD, University of Wisconsin-Madison

Voeltz, Gia Kaarina (https://experts.colorado.edu/display/fisid_143587)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Yale University

Voida, Amy Kathryn Mitchell (https://experts.colorado.edu/display/fisid_155855)
Assoc Chair, Assistant Professor: Computer Science; Assistant Professor: Information Science
PhD, Georgia Institute of Technology

Voida, Stephen A (https://experts.colorado.edu/display/fisid_155856)
Assistant Professor: Information Science; Assistant Professor: Computer Science
PhD, Georgia Institute of Technology

Volkamer, Rainer (https://experts.colorado.edu/display/fisid_144988)
Associate Professor: Chemistry and Biochemistry
PhD, Univ of Heidelberg (Germany)

von der Nuell, Tobin D (https://experts.colorado.edu/display/fisid_113896)
Senior Instructor: Program for Writing and Rhetoric
MA, University of Colorado Boulder

Voss, James S (https://experts.colorado.edu/display/fisid_140891)
Scholar In Residence: Aerospace Engineering Sciences
MS, University of Colorado Boulder

Vossen, Thomas Wilhelmus (https://experts.colorado.edu/display/fisid_126642)
Associate Professor: Leeds School of Business
PhD, University of Maryland College Park Campus

Vrieze, Scott Ian (https://experts.colorado.edu/display/fisid_153059)
Assistant Professor: Psychology and Neuroscience; Assistant Professor: Institute for Behavioral Genetics (IBG)
PhD, University of Minnesota Central office

W

Wachtel, Howard
Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)

Waddell, Jay L (https://experts.colorado.edu/display/fisid_151520)
Instructor: Leeds School of Business
MS, University of Wisconsin-Madison

Wadsworth, Thomas Pearson (https://experts.colorado.edu/display/fisid_144382)
Associate Professor: Sociology; Lecturer: Continuing Education & Professional Studies
PhD, University of Washington

Wager, Tor Dessart (https://experts.colorado.edu/display/fisid_147666)
Professor: Psychology and Neuroscience; Professor: Institute of Cognitive Science (ICS)
PhD, University of Michigan Ann Arbor

Wagner, Kelvin (https://experts.colorado.edu/display/fisid_105344)
Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, California Institute of Technology

Wagner, Stephen R (https://experts.colorado.edu/display/fisid_139773)
Professor Attendant Rank, Lecturer: Physics

Wahr, John M.
Professor Emeritus: Physics

Waite, William M.
Professor Emeritus: Computer Science; Professor Emeritus: Electrical, Computer and Energy Engineering (ECEE)

Walba, David M (https://experts.colorado.edu/display/fisid_105830)
Professor: Chemistry and Biochemistry
PhD, California Institute of Technology

Walczak, Maciej Andrzej (https://experts.colorado.edu/display/fisid_153323)
Assistant Professor: Chemistry and Biochemistry
PhD, University of Pittsburgh

Walden, Glenda D (https://experts.colorado.edu/display/fisid_105898)
Instructor: Sociology
PhD, University of Colorado Boulder

Waldman, Donald M (https://experts.colorado.edu/display/fisid_100468)
Professor: Economics
PhD, University of Wisconsin-Madison

Walker, Deward
Professor Emeritus: Ethnic Studies

Walker, Deward E. Jr
Professor Emeritus: Anthropology

Walker, Melanie (https://experts.colorado.edu/display/fisid_101750)
Associate Professor: Art and Art History
MFA, Florida State University

Walker, Michael Edward (https://experts.colorado.edu/display/fisid_155103)
Instructor: Environmental Engineering Program (EVEN)
PhD, Illinois Institute of Technology

Walker, Theodore R.
Professor Emeritus: Geological Sciences

Walter, Douglas W (https://experts.colorado.edu/display/fisid_101811)
Professor: Music
DMA, Temple University

Walter, Martin E (https://experts.colorado.edu/display/fisid_105263)
Professor: Mathematics
PhD, University of California-Irvine

Walther, Geraldine E (https://experts.colorado.edu/display/fisid_142000)
Artist in Residence: Music

Wanderer, Jules J.
Professor Emeritus: Sociology

Wang, Xiang (https://experts.colorado.edu/display/fisid_145812)
Associate Professor: Chemistry and Biochemistry
PhD, Boston University

Wang, Yanwen (https://experts.colorado.edu/display/fisid_154266)
Assistant Professor: Leeds School of Business
PhD, Emory University

Ward, Wayne Hinson (https://experts.colorado.edu/display/fisid_114680)
Research Professor: Institute of Cognitive Science (ICS); Research Professor: Computer Science
PhD, University of Colorado Boulder

Waters, Brian Todd (https://experts.colorado.edu/display/fisid_155846)
Assistant Professor: Leeds School of Business
PhD, University of California-Los Angeles

Waters, Keith John (https://experts.colorado.edu/display/fisid_107518)
Professor: Music
PhD, University of Rochester

Watkins, Alexander Charlton (https://experts.colorado.edu/display/fisid_151514)

Assistant Professor: University Libraries
MLS, Pratt Institute

Watkins, Linda R (https://experts.colorado.edu/display/fisid_101513)

Distinguished Professor: Psychology and Neuroscience
PhD, Virginia Commonwealth University

Weatherley, Donald A.

Professor Emeritus: Psychology and Neuroscience

Webb, David C. (https://experts.colorado.edu/display/fisid_141204)

Associate Professor: School of Education
PhD, University of Wisconsin-Madison

Weber, Beverly Marie (https://experts.colorado.edu/display/fisid_144523)

Associate Professor, Assoc Chair: Germanic and Slavic Languages and Literatures
PhD, University of Massachusetts at Amherst

Weber, Jorg Mathias (https://experts.colorado.edu/display/fisid_142930)

Associate Professor: Chemistry and Biochemistry
PhD, Univ of Kaiserslautern (Germany)

Weers, Walter A.

Professor Emeritus: Civil, Environmental and Architectural Engineering

Wehner, Jeanne M.

Professor Emeritus: Psychology and Neuroscience

Wehr, Paul E.

Professor Emeritus: Sociology

Wei, William (https://experts.colorado.edu/display/fisid_100864)

Professor: History
PhD, University of Michigan Ann Arbor

Weidman, Patrick D.

Professor Emeritus: Mechanical Engineering

Weimer, Alan W (https://experts.colorado.edu/display/fisid_109152)

Professor: Chemical and Biological Engineering; Faculty Director: College of Engineering and Applied Science
PhD, University of Colorado Boulder

Weimer, Paul (https://experts.colorado.edu/display/fisid_104630)

Professor: Geological Sciences
PhD, University of Texas at Austin

Weiser, Philip J (https://experts.colorado.edu/display/fisid_114575)

Professor, Faculty Director: School of Law
JD, New York University

Weiss, Debra R (https://experts.colorado.edu/display/fisid_155205)

Senior Instructor, Faculty Director: University Libraries
MLS, University of North Carolina Chapel Hill

Weiss, Jeffrey B (https://experts.colorado.edu/display/fisid_102145)

Associate Professor: Atmospheric and Oceanic Sciences (ATOC)
PhD, University of California-Berkeley

Weiss, Rita S.

Professor Emeritus: Speech, Language and Hearing Sciences (SLHS)

Welner, Kevin G (https://experts.colorado.edu/display/fisid_115565)

Professor: School of Education
PhD, University of California-Los Angeles

Welsh, Megan Elizabeth (https://experts.colorado.edu/display/fisid_153633)

Assistant Professor: University Libraries
MLIS, University of Denver

Wenger, Paula (https://experts.colorado.edu/display/fisid_113621)

Senior Instructor: Program for Writing and Rhetoric; Senior Instructor: Leeds School of Business
MA, Miami University Oxford Campus

Wertheimer, Michael

Professor Emeritus: Psychology and Neuroscience

Wessman, Carol A (https://experts.colorado.edu/display/fisid_100909)

Professor: Cooperative Institute for Research in Environmental Sciences (CIRES); Faculty Director: Environmental Studies Program; Professor: Ecology and Evolutionary Biology
PhD, University of Wisconsin-Madison

Weston, Timothy B (https://experts.colorado.edu/display/fisid_107605)

Associate Professor: History
PhD, University of California-Berkeley

Wetherbee, Charles Tyler (https://experts.colorado.edu/display/fisid_151515)

Assistant Professor: Music
BM, Curtis Institute of Music

Whisman, Mark (https://experts.colorado.edu/display/fisid_113391)

Professor: Psychology and Neuroscience
PhD, University of Washington

White, Ahmed A (https://experts.colorado.edu/display/fisid_118146)

Professor: School of Law
JD, Yale University

White, Cindy Hagemeyer (https://experts.colorado.edu/display/fisid_107461)

Associate Professor: Communication; Associate Dean: College of Media, Communication & Information
PhD, University of Arizona

White, Eric C (https://experts.colorado.edu/display/fisid_101917)

Associate Professor: English
PhD, University of California-Berkeley

White, James (https://experts.colorado.edu/display/fisid_102726)

Professor: Institute of Arctic & Alpine Research (INSTAAR); Professor: Environmental Studies Program; Professor: Geological Sciences
PhD, Columbia University In the City of New York

White, Terrenda Corisa (https://experts.colorado.edu/display/fisid_152828)

Assistant Professor: School of Education
PhD, Teachers College at Columbia University

Whitehead, Deborah Faith (https://experts.colorado.edu/display/fisid_144239)

Associate Professor, Assoc Chair, Chair: Religious Studies
ThD, Harvard University

Whitt, Jan (https://experts.colorado.edu/display/fisid_103027)
 Professor, Lecturer. Continuing Education & Professional Studies; Assoc
 Chair. Journalism
 PhD, University of Denver

Wieman, Carl E (https://experts.colorado.edu/display/fisid_105375)
 Faculty Director. Center for Science Education
 PhD, Stanford University

Wiersma, Gabrielle Somnee (https://experts.colorado.edu/display/fisid_145475)
 Assistant Professor. University Libraries
 MLIS, University of Denver

Wilkerson, Donald H (https://experts.colorado.edu/display/fisid_104406)
 Senior Instructor. Program for Writing and Rhetoric
 MA, University of Colorado Boulder

Wilkins, Amy Catherine (https://experts.colorado.edu/display/fisid_143151)
 Associate Professor. Sociology; Lecturer. Continuing Education &
 Professional Studies
 PhD, University of Massachusetts at Amherst

Wilkinson, Charles F (https://experts.colorado.edu/display/fisid_100331)
 Distinguished Professor. School of Law
 LLB, Stanford University

Willcutt, Erik G (https://experts.colorado.edu/display/fisid_113861)
 Professor, Assoc Faculty Director. Psychology and Neuroscience
 PhD, University of Denver

William, Kaspar J.
 Professor Emeritus: Civil, Environmental and Architectural Engineering

Williams, Bianca Christel (https://experts.colorado.edu/display/fisid_147342)
 Associate Professor. Ethnic Studies; Associate Professor. Anthropology
 PhD, Duke University

Williams, Lawrence Edwin (https://experts.colorado.edu/display/fisid_145743)
 Assistant Professor, Associate Professor. Leeds School of Business
 PhD, Yale University

Williams, Letitia S.
 Professor Emeritus: Theatre and Dance

Williams, Mark W (https://experts.colorado.edu/display/fisid_105438)
 Professor. Institute of Arctic & Alpine Research (INSTAAR); Professor.
 Geography
 PhD, University of California-Santa Barbara

Willis, Erin N (https://experts.colorado.edu/display/fisid_156068)
 Assoc Chair, Assistant Professor. Advertising, Public Relations and Media
 Design
 PhD, University of Missouri-Systems office

Willis, John Matthew (https://experts.colorado.edu/display/fisid_140095)
 Associate Professor. History
 PhD, New York University

Willis, Michael Jared (https://experts.colorado.edu/display/fisid_152040)
 Senior Instructor, Faculty Director. Leeds School of Business
 MBA, Brigham Young University

Willmann, Kent D (https://experts.colorado.edu/display/fisid_148075)
 Instructor. School of Education

Wilson, James R.
 Professor Emeritus: Psychology and Neuroscience

Wilson, John B.
 Professor Emeritus: Art and Art History

Wilson, Terri Suzanne (https://experts.colorado.edu/display/fisid_155469)
 Assistant Professor. School of Education
 PhD, Columbia University Central office

Windell, John T.
 Professor Emeritus: Ecology and Evolutionary Biology

Windell, Maria A. (https://experts.colorado.edu/display/fisid_154605)
 Assistant Professor. English
 PhD, University of Virginia

Wingo, Ajume H (https://experts.colorado.edu/display/fisid_144391)
 Associate Professor. Philosophy
 PhD, University of Wisconsin-Madison

Winkiel, Laura Ann (https://experts.colorado.edu/display/fisid_145813)
 Associate Professor. English
 PhD, University of Notre Dame

Winklmann, Karl A.
 Professor Emeritus: Computer Science

Winn, Daryl
 Professor Emeritus: Leeds School of Business

Winokur, Mark (https://experts.colorado.edu/display/fisid_115732)
 Associate Professor. English
 PhD, University of California-Berkeley

Winston, Paul W.
 Professor Emeritus: Ecology and Evolutionary Biology

Wise, Jonathan S (https://experts.colorado.edu/display/fisid_151516)
 Assistant Professor. Mathematics
 PhD, Brown University

Withycombe, Jenny Lind (https://experts.colorado.edu/display/fisid_153354)
 Instructor. Ethnic Studies
 PhD, University of Tennessee-Knoxville

Wobbekind, Richard (https://experts.colorado.edu/display/fisid_100997)
 Associate Dean. Leeds School of Business
 PhD, University of Colorado Boulder

Wolak, Jennifer Lynn (https://experts.colorado.edu/display/fisid_133263)
 Associate Professor. Political Science
 PhD, University of North Carolina Chapel Hill

Wolfe, Lynn Robert
 Professor Emeritus: Art and Art History

Wolkowisky, Jay H.
 Professor Emeritus: Mathematics

Wolzien, Charles
Professor Emeritus: Music

Womack, Mike Fitzgerald (https://experts.colorado.edu/display/fisid_148502)
Assistant Professor: Art and Art History
MFA, Pratt Institute

Wood, William B. III
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

Woodman, Elizabeth A.
Professor Emeritus: Art and Art History

Woodman, George E.
Professor Emeritus: Art and Art History

Wrenn, John H.
Professor Emeritus: English

Wright, Constance
Professor Emeritus: English

Wright, Kenneth P (https://experts.colorado.edu/display/fisid_125586)
Professor: Integrative Physiology
PhD, Bowling Green State University

Wright, Nicole M (https://experts.colorado.edu/display/fisid_153060)
Assistant Professor: English
PhD, Yale University

Wustrow, Eric A. (https://experts.colorado.edu/display/fisid_156419)
Assistant Professor: Electrical, Computer and Energy Engineering (ECEE);
Assistant Professor: Computer Science
BE, University of Michigan Ann Arbor

Wuttke, Deborah S (https://experts.colorado.edu/display/fisid_108412)
Professor, Assoc Chair: Chemistry and Biochemistry
PhD, California Institute of Technology

Wyss, Walter
Professor Emeritus: Physics

X

Xi, Yunping (https://experts.colorado.edu/display/fisid_110518)
Professor: Civil, Environmental and Architectural Engineering
PhD, Northwestern University

Xiao, Jianliang (https://experts.colorado.edu/display/fisid_149777)
Assistant Professor: Mechanical Engineering
PhD, Northwestern University

Xu, Ping (https://experts.colorado.edu/display/fisid_101140)
Professor: Environmental Design
PhD, Harvard University

Xue, Ding (https://experts.colorado.edu/display/fisid_112336)
Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Columbia University In the City of New York

Y

Yaeger, Barbara Jean (https://experts.colorado.edu/display/fisid_151792)
Asst Research Professor: Institute of Cognitive Science (ICS)
PhD, Oakland University

Yamashita, Masano (https://experts.colorado.edu/display/fisid_147343)
Assistant Professor: French & Italian
PhD, New York University

Yang, Daniel
Professor Emeritus: Theatre and Dance

Yang, Ronggui (https://experts.colorado.edu/display/fisid_142640)
Professor: Mechanical Engineering
PhD, Massachusetts Institute of Technology

Yannacito, Donald R (https://experts.colorado.edu/display/fisid_103944)
Lecturer, Sr Instructor Attendant Rank: Film Studies

Yao, Xin (https://experts.colorado.edu/display/fisid_147215)
Assistant Professor: Leeds School of Business
PhD, University of Washington

Yarus, Michael J.
Professor Emeritus: Molecular, Cellular & Developmental Biology (MCDB)

Yazzie, Melanie A. (https://experts.colorado.edu/display/fisid_143620)
Professor: Art and Art History
MFA, University of Colorado Boulder

Yeh, Emily Ting (https://experts.colorado.edu/display/fisid_130119)
Professor, Chair: Geography
PhD, University of California-Berkeley

Yeh, Pei Hsiu (https://experts.colorado.edu/display/fisid_151584)
Assistant Professor: Computer Science; Assistant Professor: Electrical,
Computer and Energy Engineering (ECEE)
PhD, Massachusetts Institute of Technology

Yi, Rui (https://experts.colorado.edu/display/fisid_146697)
Associate Professor: Molecular, Cellular & Developmental Biology (MCDB)
PhD, Duke University

Yin, Hang Hubert (https://experts.colorado.edu/display/fisid_144763)
Associate Professor: Chemistry and Biochemistry
PhD, Yale University

Yin, Xiaobo (https://experts.colorado.edu/display/fisid_153484)
Assistant Professor: Mechanical Engineering; Assistant Professor:
Physics
PhD, Stanford University

Ying, Jordan Boyd-Graber (https://experts.colorado.edu/display/fisid_154406)
Assistant Professor: Computer Science
PhD, Princeton University

Yonemoto, Marcia A (https://experts.colorado.edu/display/fisid_107199)
Associate Professor: History; Faculty Director: Graduate Teacher Program
PhD, University of California-Berkeley

York, Jeffrey Glenn (https://experts.colorado.edu/display/fisid_148387)
Assistant Professor: Leeds School of Business
PhD, University of Virginia

Youkey, David A (https://experts.colorado.edu/display/fisid_105211)
Instructor: Philosophy
PhD, University of Colorado Boulder

Young, Gregory D (https://experts.colorado.edu/display/fisid_143374)
Instructor: Political Science; Instructor: International Affairs Program

Young, Phoebe S. K. (https://experts.colorado.edu/display/fisid_147429)
Associate Professor: History
PhD, University of California-San Diego

Young, Wendy Mores (https://experts.colorado.edu/display/fisid_146942)
Senior Instructor, Instructor: Chemical and Biological Engineering
PhD, University of Colorado Boulder

Youngquist, Paul Bruce (https://experts.colorado.edu/display/fisid_147514)
Professor: English
PhD, University of Virginia

Yulsman, Thomas H (https://experts.colorado.edu/display/fisid_109386)
Professor: Journalism; Faculty Director: Center for Environmental Journalism
MS, Columbia University In the City of New York

Z

Zable, Jack
Professor Emeritus: Mechanical Engineering

Zabotin, Nikolay (https://experts.colorado.edu/display/fisid_127038)
Research Professor: Electrical, Computer and Energy Engineering (ECEE)

Zagona, Edith A (https://experts.colorado.edu/display/fisid_106395)
Research Professor: Center for Advanced Decision Support for Water and Environmental Systems (CADSWES); Faculty Director: College of Engineering and Applied Science
PhD, University of Colorado Boulder

Zaharatos, Brian R (https://experts.colorado.edu/display/fisid_156225)
Instructor: Applied Mathematics
MS, Colorado School of Mines

Zane, Regan A (https://experts.colorado.edu/display/fisid_109504)
Associate Professor: Electrical, Computer and Energy Engineering (ECEE)
PhD, University of Colorado Boulder

Zarske, Malinda Schaefer (https://experts.colorado.edu/display/fisid_120823)
Instructor: General Engineering; Instructor: Engineering-Bold Center
PhD, University of Colorado Boulder

Zax, Jeffrey S (https://experts.colorado.edu/display/fisid_100898)
Professor, Assoc Chair: Economics
PhD, Harvard University

Zechman, Sarah Louise Center (https://experts.colorado.edu/display/fisid_156016)
Associate Professor: Leeds School of Business
PhD, University of Pennsylvania

Zeiler, Thomas W (https://experts.colorado.edu/display/fisid_101692)
Professor: History; Faculty Director: International Education; Faculty Director: International Affairs Program
PhD, University of Massachusetts at Amherst

Zemka, Sue (https://experts.colorado.edu/display/fisid_103078)
Professor, Assoc Chair: English
PhD, Stanford University

Zender, Jaime (https://experts.colorado.edu/display/fisid_122563)
Professor, Chair: Leeds School of Business
PhD, Yale University

Zhai, Zhiqiang (https://experts.colorado.edu/display/fisid_130604)
Professor, Associate Professor: Civil, Environmental and Architectural Engineering
PhD, Massachusetts Institute of Technology

Zhang, Dan (https://experts.colorado.edu/display/fisid_149619)
Associate Professor, Assistant Professor: Leeds School of Business
PhD, University of Minnesota Twin Cities

Zhang, Shuang (https://experts.colorado.edu/display/fisid_151517)
Assistant Professor: International Affairs Program; Assistant Professor: Economics
PhD, Cornell University

Zhang, Wei (https://experts.colorado.edu/display/fisid_146429)
Associate Professor: Chemistry and Biochemistry
PhD, University of Illinois at Urbana-Champaign

Zhong, Shijie (https://experts.colorado.edu/display/fisid_118396)
Professor: Physics
PhD, University of Michigan Ann Arbor

Ziemann, Paul Jeffrey (https://experts.colorado.edu/display/fisid_153281)
Professor: Chemistry and Biochemistry; Professor: Cooperative Institute for Research in Environmental Sciences (CIRES)
PhD, Pennsylvania State University Central Office

Zigmond, Rosalyn H (https://experts.colorado.edu/display/fisid_127550)
Instructor: Program for Writing and Rhetoric
PhD, University of Colorado Denver

Zimmerman, Eric (https://experts.colorado.edu/display/fisid_122809)
Professor: Physics
PhD, University of Chicago

Zimmerman, Michael
Professor Emeritus: Philosophy
PhD, Tulane University

Zizzi, Michael P. (https://experts.colorado.edu/display/fisid_143861)
Instructor: Sewall RAP; Instructor: Program for Writing and Rhetoric

Znidarcic, Dobroslav (https://experts.colorado.edu/display/fisid_104109)
Professor: Civil, Environmental and Architectural Engineering
PhD, University of Colorado Boulder

Zunger, Alexander (https://experts.colorado.edu/display/fisid_149868)
Research Professor: Renewable & Sustainable Energy Institute (RASEI)
PhD, Tel Aviv Univ (Israel)

UNDERGRADUATE CATALOG

The Office of the Vice Provost for Undergraduate Education is charged with overseeing the entire undergraduate student experience, including assessing outcomes and launching and supporting student-facing campus initiatives. The Office of Undergraduate Education develops and oversees first-year seminars and first-year interest groups; coordinates undergraduate academic policy; coordinates the campus advising structure; and is responsible for the coordination and assessment of campus retention and persistence initiatives.

The vice provost for undergraduate education oversees a variety of programs and offices that aren't affiliated with any single college but that serve all students across campus, including Air Force, Army and Naval ROTC; the Office of International Education; the presidents leadership class; special undergraduate enrichment programs, including the Boettcher and Norlin Scholars and the undergraduate research opportunities program; and the Student Academic Success Center.

Academic policies governing undergraduate education are initiated by the faculty in accordance with the laws of the Board of Regents. The Boulder Faculty Assembly is the largest of the faculty governance organizations and it interfaces with additional faculty governance groups in the colleges through a series of liaison relationships. Several advisory bodies are in place for the vice provost for undergraduate education, comprised of students, faculty and administrators. The Office of Undergraduate Education works closely with the offices of the vice chancellor for student affairs and the associate vice chancellor for enrollment management. The vice provost for undergraduate education reports to the provost.

Admissions

The Office of Admissions welcomes inquiries from prospective students regarding undergraduate admission. Through the admission process, the university seeks to identify applicants who will successfully complete a collegiate academic program. Admission is based on many criteria, including high school GPA or GED test scores, high school rank, the quality of course work, college entrance test scores, personal essays and the extent to which the minimum academic preparation standards (MAPS) (p. 113) have been met.

For additional undergraduate admission information, visit the Admissions (<http://www.colorado.edu/admissions>) webpage.

Visiting the Campus

Prospective students and their families are welcome to visit the Office of Admissions in Regent Administrative Center, room 125, between 9 a.m. and 5 p.m. (summer hours are 8:30 a.m. to 4:30 p.m.), Monday through Friday, except on holidays. Daily information sessions, walking tours of the campus and special all-day visit programs are offered. Although interviews are not used in the decision-making process, you are invited to visit the campus.

The best time to see the campus is when classes are in session (September through mid-December and mid-January to early May, with the exception of spring break); see the academic calendar (p. 13) for specific dates. There are dates when information sessions, campus tours and visit programs are not held due to holidays or university closures. It is important to check our website for the most current information.

Reservations

Reservations are required for all information sessions, tours and visit programs and can be made through your MyCUBoulder (<http://mycuboulder.colorado.edu>) account. For complete visit program descriptions, dates, reservation forms and campus maps, visit the Admission Visit Programs (<http://www.colorado.edu/visit/admissions>) webpage. Visit program dates for future academic years are added to the website as they become available (usually in August each year).

Daily Information Sessions and Campus Tours

Information sessions with an admission counselor are held Monday through Friday at 9:30 a.m. and 1:30 p.m. Following the information sessions are walking tours of the campus led by student guides, beginning at 10:30 a.m. and 2:30 p.m. Combined information sessions and tours are also held at 10:30 a.m. most Saturdays.

Campus Visit Programs

An excellent way to become acquainted with the campus is to participate in one of the campus visit programs specially designed for prospective students and parents.

These programs are offered throughout the year and provide prospective students and their families the chance to participate in information sessions, take a campus tour, learn more about residence hall life, talk with student and parent panels and meet with campus representatives, as well as attend classes or listen to a sample lecture. For more information about any or all of these visit programs or instructions on how to register, go to the Admission Visit Programs (<http://www.colorado.edu/visit/admissions>) webpage or call the Office of Admissions.

General Admission Information

Choosing a Program of Study

When applying for admission, students need to choose a major in one of CU Boulder's colleges or schools. Applicants who have not decided on a major can select an "open option" major. This allows students to explore different options during their first year of study. After this time, they will decide on a specific major for their remaining years. Students can also change their area of study, but this can result in additional course requirements that may add to the number of semesters necessary to complete a degree.

Although applicants can apply to only one CU Boulder college or school, after enrollment they can apply for transfer to another Boulder college or school through the intrauniversity transfer (IUT) process. Criteria for transferring from one college or school to another are competitive, and each college or school establishes its own standards.

Double Degrees, Double Majors, Minors and Certificate Programs

There are several programs that allow students to include additional areas of academic concentration beyond their chosen major. Two different degrees, either from the same college or school, or degrees from different colleges or schools, may be earned, providing certain conditions are met. Students are admitted to one major and degree program initially but may pursue a second degree as early as their first semester of

enrollment. Minor programs are offered in a number of undergraduate departments and programs in the College of Arts and Sciences, the Leeds School of Business, the College of Engineering and Applied Science and the School of Education. Certificate programs in arts and sciences, business, engineering and music fields are also available.

Preprofessional Study

Preprofessional advisors are available to help students interested in medicine, dentistry, physical therapy, veterinary medicine, nursing, pharmacy, physician assistant and other health professions or law. Students interested in these fields may apply to any of the majors open to new undergraduates, including the open option major in the College of Arts and Sciences. Students interested in one of the undergraduate or graduate health sciences programs offered at the University of Colorado Anschutz Medical Campus may complete preprofessional work on the Boulder campus. Admission is competitive, but preference to all health sciences programs is given to Colorado residents.

For more information, see the Preprofessional Programs (p. 852) section or visit the Pre-Health (<http://www.colorado.edu/advising/pre-health>) webpage.

Music Applicants

Prospective music majors must submit both an undergraduate application for admission to the Office of Admissions, and a College of Music supplemental application.

All music applicants are initially considered for admission to the College of Arts and Sciences Open Option major. Admission to a College of Music degree program (Bachelor of Arts in Music, Bachelor of Music Education, Bachelor of Music) is determined after the music audition and application evaluation process has been completed. Students who are admitted to the College of Arts and Sciences but not the College of Music will be able to keep their place in the College of Arts and Sciences.

Live auditions, which are preferred unless travel distance is prohibitive, are scheduled for selected Saturdays in January and February. Other live audition times may be arranged; high quality recordings also may be submitted in lieu of a live audition.

College of Music scholarships are awarded to music majors only. High school and college transfer students are automatically considered for merit-based music scholarships upon completion of the application process, including the audition. Transfer students who are receiving a music scholarship from their current institution must submit a scholarship release form before they can be awarded a music scholarship.

To access the College of Music Supplemental Application Form, as well as more detailed information about audition requirements, faculty and degree programs, visit the college's Admissions (<http://www.colorado.edu/music/admissions>) webpage.

Teacher Education Applicants

The School of Education offers multiple pathways for teacher candidates interested in transformative careers in education.

Undergraduate students interested in K–6 Elementary Education may either pursue the bachelor's degree in elementary education (new for fall 2017) or complete the teacher licensure requirements while earning a bachelor's degree from another college on campus. Students interested in K–12 Music Education complete the teacher licensure requirements

while earning a Music Education degree from the College of Music. Students interested in Secondary (7–12) teacher education will complete the teacher licensure requirements while earning a bachelor's degree in a corresponding field. CU Boulder offers Secondary programs in English, Mathematics, Science, Social Studies and the following foreign languages: French, German, Japanese, Latin, Russian and Spanish.

Students interested in an undergraduate degree combined with teaching licensure must apply to the other CU Boulder undergraduate degree program and then submit their application and credentials to the School of Education. Undergraduate students who plan to pursue teacher education should declare this intent to the school's Office of Student Services as soon as possible after enrolling at CU Boulder.

Teacher education applicants who have previously completed a four-year undergraduate degree program must submit their application to the Office of Admissions.

Refer to the School of Education section for more information about teacher education. For application and deadline information, interested students may also visit the School of Education (<http://www.colorado.edu/education>) website, email EdAdvise@colorado.edu or call 303-492-6555.

College Readiness in English and Mathematics

The state of Colorado mandates that all undergraduate students entering public institutions of higher education in Colorado be screened for college readiness in reading, writing and mathematics. To pass the screening requirements, students must present minimum test scores.

Students who have successfully completed four years each of college preparatory English and college preparatory math courses are deemed to have met the respective requirements regardless of the test score.

Students who do not meet CU Boulder's criteria for college readiness will be required to demonstrate readiness through an additional examination or to enroll in preparatory courses prior to completing the first 30 credit hours of course work on the Boulder campus. Students who have not demonstrated reading, writing and/or mathematics readiness will receive additional details after they confirm their intent to enroll at CU Boulder.

Admission Requirements

Students are freshman applicants if they are currently enrolled in high school, or if they have earned a high school diploma or its equivalent and have not enrolled in a college or university since graduation.

Admission Criteria

Many factors are considered in evaluating students' applications for admission to CU Boulder. Although academic performance in high school (high school GPA and the quality of course work) is the most important indicator of success, other factors are also considered. These include students' college entrance test scores (either the SAT or ACT), the trend in their grades, the extent to which the minimum academic preparation standards (MAPS) are met, their personal essays and the potential contributions they may make to the campus community. For information on MAPS, see MAPS table (p. 113) in this section.

Applicants whose records reflect nontraditional grading systems, unusual curricula or high school equivalency through the GED test will receive individual consideration.

College Entrance Tests

CU Boulder requires either the SAT or the ACT for admission consideration. We do not require the ACT Writing Test or the SAT Essay for CU Boulder admission consideration. The highest scores are used in the admission decision. If the same test is taken more than once, the scores are combined on each subsection to give the highest overall score. SAT subject test scores are not required. CU Boulder requires all visa holders graduating from a US high school to submit either an SAT or ACT score. We encourage all students to submit an SAT or ACT score to receive consideration or our automatic consideration merit scholarships. For more information, see the How to Apply for Undergraduate Admission section.

Minimum Academic Preparation Standards (MAPS)

Students who graduated from high school in 1988 or later are expected to have completed courses that meet certain minimum academic preparation standards (MAPS) before enrolling at CU Boulder. Students who attended a non-U.S. high school for two years or more are not subject to MAPS. Any MAPS deficiency will be considered during the admission review process. The MAPS for specific CU Boulder colleges and schools are listed in this section.

Students may be admitted to CU Boulder even though they have not met all the MAPS requirements. If that is the case, they are required to complete the appropriate MAPS courses once enrolled, and the credit hours may be applied toward graduation. *All MAPS deficiencies must be completed prior to graduation from CU Boulder.* Students may also complete missing MAPS course work at other colleges or universities, through approved credit-by-examination programs or by testing out through the appropriate foreign language department.

Policies Concerning MAPS Deficiencies

The policies of the Boulder campus with respect to completing MAPS course work after enrollment are as follows.

1. Appropriate missing MAPS course work is generally included in the credit hours for graduation.
2. All course work toward fulfillment of the MAPS must be taken for a letter grade.
3. It is strongly recommended that students enroll in and complete at least one MAPS course each term, beginning in the first term of enrollment, until such time as all MAPS are completed. This policy applies to new freshmen, transfer students and students transferring from other academic units on the Boulder campus and from other campuses of the university. Some colleges or schools may impose a sanction if the student does not complete one course per semester toward meeting MAPS deficiencies.
4. All students who first enroll in one academic unit at CU Boulder and subsequently transfer to another unit are required to meet the MAPS specified for the new unit, irrespective of their completion of MAPS units in their previous college or school.
5. Students in double-degree programs must meet MAPS requirements of both degree-granting units.

6. Students must consult with a CU Boulder academic advisor (or read their college or school's academic publications) to determine which specific courses may be used to meet a MAPS requirement (p. 113).

Advanced Placement

CU Boulder participates in the Advanced Placement program of the College Board. More than one-third of Boulder's entering freshmen submit Advanced Placement (AP) test scores each year. Official scores must be sent to the admissions office directly from the College Board for both first-year students and transfer students. For a guide to specific equivalencies, see the Advanced Placement (AP) Credit Table (p. 106).

For more information, write or call:

aphighered.collegeboard.org (<http://aphighered.collegeboard.org>)

International Baccalaureate

The International Baccalaureate (IB) Diploma programs provide preuniversity study. IB examinations, whether leading to a full IB diploma or to an IB certificate often qualify students for advanced standing at CU Boulder. In general, credit hours are granted for approved IB examinations at the higher level with a score of 4 or better.

Students admitted to the University of Colorado Boulder who have graduated from high school having successfully completed an International Baccalaureate Diploma program shall be granted 24 hours of college credit. Students should check with their college or school to determine if or how the earned college credit hours apply toward degree requirements. No CU Boulder tuition shall be charged for these credit hours. These credit hours shall be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB Diploma program. If the student scores less than 4 on any IB subject test, the credit hours granted shall be reduced accordingly.

An official copy of the diploma with test scores must be sent to the admissions office directly from the IB organization. For a guide to specific equivalencies, see International Baccalaureate (IB) Credit Table (p. 107). For the most current information on how CU Boulder evaluates IB credit hours, visit colorado.edu/admissions/selection/credit (<http://colorado.edu/admissions/selection/credit>).

212-696-4464

www.ibo.org (<http://www.ibo.org>)

Freshman Applicants Not Granted Admission

Students who are not granted admission as entering freshmen may consider transferring to CU Boulder after successful study elsewhere. Students are encouraged to complete at least one full year of transferable college or university course work, including any courses outlined in the

minimum academic preparation standards (MAPS) chart that were not met in high school.

Applicants are considered transfer students if they enrolled in any college-level course work (at another college or university, or other campus of the University of Colorado), full time or part time, since graduating from high school. Applicants are not considered transfer students if the only college-level classes they have taken were while enrolled in high school. To be considered for admission, transfer students must report all previous college work and have a high school diploma or its equivalent.

Competitive Admission Criteria

Transfer applicants are considered for admission on the basis of transfer as well as freshman criteria, including minimum academic preparation standards (MAPS). All transfer applicants who graduated from high school in 1988 or later are expected to have completed MAPS requirements before enrolling at CU Boulder.

CU Boulder's aim is to offer highly qualified and intellectually curious transfer students the opportunity to continue pursuing their educational goals. We practice a holistic admission review process, taking into account a variety of primary academic and secondary factors as they relate to your projected success in our competitive academic environment. You will be considered on an individual basis relative to a prediction of your academic success in the college to which you apply. For more information on competitive transfer admission guidelines, visit www.colorado.edu/admissions/transfer (<http://www.colorado.edu/admissions/transfer>).

College of Arts and Sciences

A cumulative college GPA of 2.50 or better in appropriate general education courses is required. Students who complete 30 credit hours of transfer-level work with a cumulative GPA of 2.70 at a Colorado community college and who apply by the equal consideration deadline are assured admission to the College of Arts and Sciences. Students must complete all of the Minimum Academic Preparation Standards (MAPS) to be guaranteed admission.

NOTE: This information applies to students who entered college after spring 1988. For those students who entered college prior to summer 1988, contact the Office of Admissions.

Leeds School of Business

A cumulative college GPA of 3.00 or higher is required. Preference is given to students who have completed microeconomics and macroeconomics and either statistics (business statistics strongly preferred) or calculus with competitive letter grades.

School of Education

The School of Education offers multiple pathways for teacher candidates interested in transformative careers in education.

Undergraduate students interested in K–6 Elementary Education may either pursue the bachelor's degree in elementary education (new for fall 2017) or complete the teacher licensure requirements while earning a bachelor's degree from another college on campus. Students interested in K–12 Music Education complete the teacher licensure requirements while earning a Music Education degree from the College of Music. Students interested in Secondary (7–12) teacher education will complete the teacher licensure requirements while earning a bachelor's degree in a corresponding field. CU Boulder offers Secondary programs in

English, Mathematics, Science, Social Studies and the following foreign languages: French, German, Japanese, Latin, Russian and Spanish.

Students interested in an undergraduate degree combined with teaching licensure must apply to the other CU Boulder undergraduate degree program and then submit their application and credentials to the School of Education. Undergraduate students who plan to pursue teacher education should declare this intent to the school's Office of Student Services as soon as possible after enrolling at CU Boulder.

Teacher education applicants who have previously completed a four-year undergraduate degree program must submit their application to the Office of Admissions.

Refer to the School of Education (p. 573) section for more information about teacher education. Interested students may also visit the School of Education (<http://www.colorado.edu/education>) website.

Program in Environmental Design

A college GPA of 2.75 or higher is required. Admission preference is given to students who have taken college-level courses in the areas of architecture, planning or environmental studies. Completion of courses in related fields of social science, natural science, fine arts or humanities is also considered in the admission review.

College of Engineering and Applied Science

Cumulative college GPA of 3.00 for all majors EXCEPT Mechanical Engineering, which requires a 3.30 cumulative college GPA. Transfer applicants must have taken courses relevant to an engineering curriculum, including at least two semesters of college-level calculus, along with two semesters of calculus-based physics with lab and/or college-level chemistry with lab. Chemical engineering and chemical and biological engineering applicants should have completed two semesters of college chemistry.

Grades in math, science and engineering courses should be B or higher EXCEPT Mechanical Engineering which requires a B+ or higher. (Exception: Students [resident or non-resident] who apply for admission for a semester that occurs within 18 months of their high school graduation date may also be competitive without having taken the above coursework, as long as the high school academic record meets selected minimum criteria. In addition, if any college-level work has been completed, the overall GPA should be 3.00 or higher.)

The college guarantees admission to any of its baccalaureate degree programs to students transferring from Colorado public institutions of higher education who meet the College of Engineering and Applied Science Guaranteed Admission Criteria for Colorado Transfers (<http://www.colorado.edu/admissions/transfer>).

College of Media, Communication and Information

Admission to the College of Media, Communication and Information requires a transfer student to have a minimum of 24 semester hours of appropriate college-level course work completed or in progress and an overall GPA of 3.00 as well as a 3.00 average GPA in CMCI prerequisites. Applicants must have completed or be in progress in the equivalent of the two introductory courses for the following majors:

- Communication: Public Speaking OR Group Interaction
- Information Science: Intro to Computer Science OR Intro to Programming
- Journalism: Fundamentals of Reporting OR New Media/Internet Media

- Media Production: Intro to Film
- Media Studies: Intro to Mass Media
- Strategic Communication: Principles of Advertising OR an equivalent Principles of Public Relations

College of Music

A college GPA of 2.75 or higher and an audition of all applicants is required. More information may be found at www.colorado.edu/music/admissions/undergraduate-transfers (<http://www.colorado.edu/music/admissions/undergraduate-transfers>).

College Entrance Tests

Transfer students are required to submit SAT or ACT scores, except those who have completed 24 or more semester hours of transferable college-level work at the time they apply.

Students' highest scores are used in the admission decision. If the same test is taken more than once, the scores on each subsection are combined to give the highest overall score. SAT subject test scores are not required. For more information, visit www.colorado.edu/admissions/selection (<http://www.colorado.edu/admissions/selection>).

Minimum Academic Preparation Standards (MAPS)

Effective for students who graduated from high school in spring 1988 or later, CU Boulder expects all transfer students to have completed courses that meet certain minimum academic preparation standards (MAPS). For MAPS requirements for specific CU Boulder colleges and schools, see the MAPS chart (p. 113).

MAPS requirements not met in high school may be met through equivalent college-level course work before or after transfer to CU Boulder. A semester course completed at the college level substitutes for a year of work in high school. Students who attended a non-U.S. high school for two years or more are not subject to MAPS.

The university invites applications from qualified international students. International applicants are those who already have, or will be applying for, a temporary U.S. visa such as F-1 and J-1. Applicants who are United States citizens, permanent residents, asylees or refugees are not considered international. These students should follow application and admission procedures for undergraduates or graduates as described elsewhere in this catalog.

More than 3,000 international students from more than 100 countries study at CU Boulder. Applications for admission are processed by the Office of Admissions. International students who wish to pursue a full-time program of study at the undergraduate or graduate level should go to the international student website at www.colorado.edu/admissions/apply (<http://www.colorado.edu/admissions/apply>) for admission information and online application forms.

Assistance after admission is provided by International Student and Scholar Services, located in the Office of International Education (www.colorado.edu/oie/iss) (<http://www.colorado.edu/oie/iss>). Boulder offers a full range of services to international students, including a host family program, orientation, special programs and activities for international students and personal attention to individual needs. For information, visit [www.colorado.edu/oie/international-student-and-](http://www.colorado.edu/oie/international-student-and-scholar-services/student-resources)

[scholar-services/student-resources](http://www.colorado.edu/oie/international-student-and-scholar-services/student-resources) (<http://www.colorado.edu/oie/international-student-and-scholar-services/student-resources>).

Intensive English language instruction is also offered by the International English Center. For information, visit <http://iec.colorado.edu>, email ieccu@colorado.edu or call 303-492-5547.

Prospective graduate students should visit www.colorado.edu/admissions/graduate (<http://www.colorado.edu/admissions/graduate>) for information and application forms specific to the academic department in which they are interested. Prospective graduate students can also call the campus telephone operator at 303-492-1411 and ask to have the call transferred to the department of interest or write to the specific department, University of Colorado Boulder, Boulder, CO 80309.

International Nondegree Students

The University of Colorado Boulder welcomes nondegree visiting international students from around the world. International students who are requesting a form I-20 (for an F-1 visa) are required to enroll full-time (6 credit hours in summer and 12 credit hours in fall and spring semesters). In order to maintain F-1 status, international students should not drop below full-time enrollment. Students on B-1/B-2 visas may be eligible to take one course. Visiting international students must meet academic prerequisites in order to enroll. Visiting international students who are not native speakers of English must also demonstrate English language proficiency by submitting valid TOEFL or IELTS scores, or by submitting proof that they completed at least one year of full-time academic study at a U.S. college or university or at an institution in a country where English is the native language (i.e., Australia, Canada).

Email ceadvise@colorado.edu (ceadvisor@colorado.edu) for additional information.

Readmit Students

CU Boulder undergraduate degree-seeking students who have not attended the Boulder campus for three semesters (including summer) since their last graded semester must submit the undergraduate Application for Readmission to the Office of Admissions. No application fee is required. Students who have attended any other college or university since attending CU Boulder must submit official transcripts directly from the issuing institution(s) to the Office of Admissions.

Students seeking readmission into a different college or school than that in which they were previously enrolled must note the requested change on their application. Otherwise, the university assumes that students will return to the same field of study, if eligible to do so. Students who request a change in college or school for which they are not eligible must request reconsideration for their previous program.

Former students in the College of Arts and Sciences wishing to return to the college must apply to their previous major. Students who wish to pursue a second undergraduate degree must apply to a major different from the one in which they received their degree. Students may not apply for a second bachelor's degree in the Leeds School of Business or the College of Media, Communication and Information.

Continuing undergraduate degree-seeking students who do not attend for three or fewer semesters (including summer), and who were not academically suspended are automatically eligible to return without having to readmit (does not apply to graduate students). This policy includes degree-seeking undergraduates who are only taking classes through Continuing Education. During these semesters of non-enrollment,

students' CU Boulder email and MyCUInfo accounts remain open. To return, students should register for classes during the regular enrollment period for the returning term. Students who received a refund of the confirmation deposit must repay it when returning. Consult the return chart at www.colorado.edu/registrar/students/withdraw-cu (<http://www.colorado.edu/registrar/students/withdraw-cu>) for important details.

Nondegree Students

Students who wish to take CU Boulder courses but are not currently admitted to a degree program at the university are classified as "nondegree students." Students apply as nondegree students through the Division of Continuing Education (<http://www.ce.colorado.edu>). Nondegree students may enroll in credit classes through the ACCESS (Available Credit Courses for Eligible Special Students) Program, the Evening Credit Program, the Online Credit Program, the Applied Music Program and Summer Session.

All nondegree students must have completed high school or have a high school equivalency diploma. Nondegree applicants under the age of 22 not enrolled in high school must meet criteria similar to freshmen entering CU Boulder. To determine eligibility, applicants must provide an unofficial copy of their high school transcripts and ACT/SAT scores.

If students have been denied admission to an undergraduate degree program, they may not enroll as nondegree students in the ACCESS Program for the semester for which they sought degree program admission. Nondegree student admission does not guarantee future admission to any degree program.

Nondegree students may also enroll for courses on a pass/fail basis. These courses are counted toward credit hours of pass/fail course work permitted according to the rules of the college or school to which students are admitted once they achieve degree status.

Nondegree students must maintain a 2.00 cumulative GPA. Failure to maintain the required GPA will result in the inability to continue taking classes as a nondegree student.

High school students interested in taking courses at CU Boulder apply as nondegree students through the High School Concurrent Program (<http://ce.colorado.edu/programs/high-school-concurrent>) administered by the Division of Continuing Education.

International students who want to apply to the university as nondegree students should read the International Students section above. Students interested in teacher licensure should refer to the School of Education section.

Nondegree Students Transferring to a Degree Program

Students who are currently enrolled or have been enrolled at any CU campus as nondegree students may apply for admission to an undergraduate degree program.

Students wishing to transfer to a graduate degree program should refer to the Graduate School section and individual college and school sections.

A degree-seeking applicant may transfer an unlimited number of credit hours taken as a nondegree student on any University of Colorado campus. However, applicability of these credit hours toward degree requirements is established by the colleges and schools. It is suggested that a student apply to a degree program as soon as admission requirements, including MAPS deficiencies, have been met. It is essential

that former nondegree students actively seek academic advising from the appropriate dean's office once they have been accepted into a degree program.

Second Undergraduate Degree Applicants

Students may apply for a second undergraduate degree at the University of Colorado Boulder, but should explore the various options in graduate study available at the university before doing so. Students applying for a second undergraduate degree must follow transfer admission guidelines, and those students who are admitted must keep in mind that all college and major requirements must be met in order to complete degree programs satisfactorily. Restrictions mandated by general university policies, as well as specific college and school policies, include the following:

1. Applicants may not apply to the major in which they received their first undergraduate degree.
2. Applicants must apply to a specific major; applications for an open option or undetermined major cannot be considered.
3. Second undergraduate degree applicants in the Program in Environmental Design are encouraged to investigate graduate programs.
4. The Leeds School of Business and the College of Media, Communication and Information do not consider students who have already completed an undergraduate degree. These students are strongly encouraged to investigate graduate study.
5. Students who already have an undergraduate degree from the College of Engineering and Applied Science and who desire a second undergraduate degree are strongly encouraged to investigate graduate study as an option.
6. Credit hours earned as a nondegree student at the University of Colorado may not be used toward major degree requirements for a second degree in the College of Arts and Sciences.

Students from Other CU Campuses

Students who wish to transfer to Boulder from another University of Colorado campus (Colorado Springs, Denver or Anschutz), from CU Study Abroad or from CU Continuing Education should refer to the Transfer Applicants section. These students must send a high school transcript, SAT or ACT scores and an official transcript from each college or university attended (outside the University of Colorado system) to the Office of Admissions. Currently enrolled degree students are not required to pay the application fee. Special consideration is given to applicants transferring from degree programs at other campuses of the University of Colorado. Course work completed at other campuses in the University of Colorado System will be a part of the student's cumulative university record and will not be considered as transfer credit hours. However, the applicability of this course work toward specific CU Boulder degree requirements will be determined solely by CU Boulder colleges and schools. External transfer credit presented by students to other University of Colorado campuses will be evaluated by CU Boulder guidelines upon the student's matriculation into a degree program at CU Boulder.

Denied Admission as a Freshman

Students who were not admissible to the University of Colorado Boulder based on high school academic records are encouraged to apply for transfer admission after at least 24 credit hours of transferable college-level course work are completed or in progress. This includes any

minimum academic preparation standards (MAPS) requirements not met in high school.

Application Process

Application Priority Dates and Admission Notification

Applications for degree candidates may be submitted beginning in August for the following spring, summer and fall terms.

The university reserves the right to deny admission to applicants whose total credentials reflect an inability to assume those obligations of performance and behavior deemed essential by the university and relevant to any of its lawful missions, processes and functions as an educational institution.

Freshman Applicants

Students can apply to CU Boulder using the Common Application. All students will be reviewed in the order their application file is completed (application is submitted and all required documents are received and official).

Spring Freshman Applicants

Spring applications are processed on a rolling basis. The Office of Admissions begins notifying applicants about admission decisions in October. Decisions are made approximately six to eight weeks after an application is complete. Full consideration is given to applications that are complete (including the application fee and all required credentials) by the Oct. 1, 2017, deadline.

Summer and Fall Freshman Applicants

There are two admission notification periods for fall and summer 2018 candidates.

Non-Binding Early Action

Freshman applicants who complete their file by Nov. 15, 2017, are guaranteed early action and will receive an admission decision on or before Feb. 1, 2018.

Students meeting the non-binding, early action deadline may be admitted, postponed or denied admission. Postponed students will receive an additional review and are strongly encouraged to submit additional academic information to strengthen their applications. Students who are postponed do not typically receive an admission decision until April 1, 2018.

Early action students are not required to enroll at CU Boulder, but must, if they choose to attend, confirm their intent to enroll by May 1, 2018.

Freshman Application Deadline

The freshman application deadline is Jan. 15, 2018. Students may begin applying and completing their files in August. All applicants with completed files by Jan. 15, 2018, will be notified of their admission decision no later than April 1, 2018.

Students must, if they choose to attend, confirm their intent to enroll by May 1, 2018.

Transfer Applicants

If a student submits a complete application on or before the transfer application deadline, they will receive an admission decision within six to eight weeks.

A complete application includes test scores (if you have less than 24 college credit hours), transcripts (high school and college), personal statement and application fee.

Transfer Application Deadlines

- Spring 2018: Oct. 1, 2017
- Summer 2018: March 1, 2018
- Fall 2018 early notification: March 1, 2018
- Fall 2018 regular decision: June 15, 2018

Notifications begin rolling out on Oct. 1, 2017, for spring applicants and March 1, 2018, for fall and summer applicants. We process applications in the order in which they are received. The earlier a complete application is submitted, the earlier a decision will be made.

Where to Send the Application, Fee and Credentials

Unless otherwise instructed, mail all application materials to:

Office of Admissions
Regent Administrative Center 125
University of Colorado Boulder
552 UCB
Boulder, CO 80309-0552

Mailing Address

Applicants must keep their mailing address current at all times. It is used for mailings until the applicant arrives on campus. Notices are also sent to this address regarding admission, registration and new student welcome, as well as other information. If an address changes or is no longer valid, notify the Office of Admissions immediately at 303-492-6301.

Application Checklist

1. Online application for admission
2. \$50 nonrefundable (\$70 USD for international students) application fee, payable online (if sending a check or money order, make payable to the University of Colorado; print student's name and date of birth on check)
3. Official high school transcript
4. Official college transcripts (if applicable)
5. SAT or ACT test scores (if applicable)
6. Two personal essays (freshman applicants) or one personal statement (transfer applicants)
7. Letter of recommendation (freshman applicants only)
8. Résumé or activities list (optional)

Confirmation Procedures

All admitted students are encouraged to confirm their intent to enroll as soon as possible after receiving their admission notification. Admission must be confirmed by official notification to:

Office of Admissions

Regent Administrative Center 125
University of Colorado Boulder
552 UCB
Boulder, CO 80309-0552

Confirmation Postmark Deadlines

- Freshmen
 - Summer: May 1
 - Fall: May 1
 - Spring: Dec. 1
- Transfers: varies; see confirmation instructions

If students register for classes and then decide not to attend, they may be assessed tuition depending upon the circumstances. For spring and fall semester policies, visit the Office of the Registrar's Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu>) webpage; for summer, visit Summer Session's Withdrawal (<http://www.colorado.edu/summer/resources/now-youve-enrolled/withdrawal>) webpage. Important policy differences exist for continuing students versus new, readmitted and transfer students.

The confirmation deposits are used as registration deposits each semester as long as registration is completed by the published deadline. Once students have attended CU Boulder, the deposit (minus any fees or other charges owed) will be returned when they graduate or officially withdraw from the university according to established deadlines.

Application Fees

Nonrefundable Application Fee (\$50/\$70 for international students)

University of Colorado Boulder Application

Pay online when submitting the application or by check or money order (made payable to the University of Colorado) after submission. If submitting a check or money order, include the student's full legal name and birth date. We recognize that some students may be faced with financial constraints in paying the application fee. Waivers can be granted for documented hardships if the student submits an application fee waiver form.

Common Application

Pay online when submitting the application. We recognize that some students may be faced with financial constraints in paying the application fee. Waivers can be granted for documented hardships if the student submits an application fee waiver form.

Students currently enrolled in an undergraduate degree program at another University of Colorado campus who are applying to an undergraduate degree program on the Boulder campus are not required to pay the application fee.

Required Credentials

Credentials or information sent by fax cannot be accepted as official documentation. Do not submit samples or photographs of design or artwork. A portfolio is not used for admission purposes and cannot be returned.

Official Transcripts

Official transcripts must be sent directly to the Office of Admissions from the issuing institution and must have the appropriate seals and signatures.

Other transcripts are not considered official. Transcripts that are marked, for example, "student copy," "issued to student" or "unofficial" are not accepted as official.

Unofficial transcripts cannot be used for admission or transfer credit purposes.

High School Transcript

Students should request that their high school send an official transcript of all work completed, beginning with grade 9, directly to the Office of Admissions, regardless of the number of college hours the student has completed (if any) or the date of graduation from high school.

Students who have attended more than one high school and whose most recent transcript does not include the complete high school record must submit official transcripts from each school.

If any part of the high school record is missing from the transcript, the processing of the application will be delayed.

Students who have not graduated and do not plan to graduate from high school must request an official certificate of high school equivalency and official GED scores, plus an official transcript of any high school work (grades 9–12) completed, to be sent to the Office of Admissions.

Official transcripts must be sent to the Office of Admissions from the issuing institution either electronically (transcripts@colorado.edu) or by mail and must have the appropriate seals and signatures. All credentials written in languages other than English must be accompanied by a literal certified English translation.

College Transcripts

Students should request that their official transcripts from each collegiate institution attended (except any campus of the University of Colorado) be sent directly from the issuing institution to the Office of Admissions. Be sure to include all institutions, regardless of the length of attendance, whether or not courses were completed and whether or not the record might affect admission or transfer credit. Also include any institutions attended during summers, interim terms and during high school.

Failure to list and submit transcripts from all institutions previously attended before enrolling at CU Boulder is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

SAT or ACT Test Scores

CU Boulder requires all freshman and transfer students (including U.S. citizens attending high school or college outside of the U.S) with fewer than 24 credits completed to submit an official score report for either the SAT or the ACT. International students only need to submit an SAT or ACT if they are graduating from a U.S. high school or wish to be considered for merit scholarships.

CU Boulder's SAT code is **4841** and the ACT code is **0532**.

Scores will be considered official if submitted electronically by the testing agency or if they are included on your official high school transcript.

The student's highest scores are used in the admission decision. If a student takes the same test more than once, we combine their highest score from each subsection to give them the highest overall score. Results from SAT or ACT tests taken in December or later may not be received in time if the student wishes to be considered for summer or fall admission of the following year.

For further information:

- consult a high school counselor,
- visit the SAT website (<http://www.collegeboard.com>), call 609-771-7600 or write to the College Board (SAT), P.O. Box 6200, Princeton, NJ 08541-6200, or
- visit the ACT website (<http://www.act.org>), call 319-337-1270 or write to ACT Registration, P.O. Box 414, Iowa City, IA 52243-0414.

Personal Essays

CU Boulder requires freshman applicants to submit two short personal essays and transfer applicants to submit one personal statement. Applications without essays are considered incomplete and will not be reviewed. Personal essays are the best way for the Office of Admissions to learn about applicants as individuals and to evaluate a student's academic performance within the appropriate context. There are no "correct" answers to the questions—responses should reflect the unique aspects and experiences of the applicant. The specific essay questions are available on the application.

Letters of Recommendation

One academic letter of recommendation will be required for all freshman applicants. The student's full legal name should be included at the top of recommendation letters.

Optional Documents

Applicants may submit additional letters of recommendation if you wish, however, doing so is optional. Applicants may also choose to submit a resume or list of co-curricular activities, work experience, leadership positions and awards.

College of Music applicants must also complete a College of Music application after their admission application has been submitted, provide a letter of reference and schedule an audition.

Credit by Examination

Advanced Placement (AP) Credit

¹ There is no guarantee that all AP credit will apply to a specific degree program. The dean's office of each college and school makes the final determination on how AP credits apply toward degree requirements. When the credit granted for a score of 3 on an AP exam is just Arts & Sciences credit that fulfills a specific core category, CU Boulder advises students that they are likely to be more successful in their college career if they fulfill that core category with a CU Boulder course and use their AP credit as elective credit.

² Engineering Students: Check with academic advisor in major department. Students will need the ability to learn additional programming languages for further computer science courses.

³ Students who want to continue taking Spanish courses beyond their AP credit level must take the Spanish department placement test. If the results of this test place them below their AP level, the Spanish department strongly recommends enrolling at the lower of the two levels.

⁴ Does not apply toward degree requirements for students in the College of Engineering and Applied Science.

NOTE: This table was prepared based on spring 2016 exams. Credit awarded is subject to change based on faculty review of spring 2017 exams. The credit in this table is for students who matriculate at CU Boulder in the 2017–18 academic year. Students who matriculated at CU Boulder in previous academic years need to refer to the tables in the catalog for their matriculation year to find the appropriate credit.

¹ There is no guarantee that all IB credit will apply to a specific degree program. The dean's office of each college and school makes the final determination on how IB credits apply toward degree requirements. When the credit granted for a Standard Level IB exam is just Arts & Sciences credit that fulfills a specific core category, CU Boulder advises students that they are likely to be more successful in their college career if they fulfill that core category with a CU Boulder course and use their IB credit as elective credit.

² Does not apply toward degree requirements for students in the College of Engineering and Applied Science.

NOTE: This table was prepared based on spring 2016 exams. Credit awarded is subject to change based on faculty review of spring 2017 exams. The credit in this table is for students who matriculate at CU Boulder in the 2017–18 academic year. Students who matriculated at CU Boulder in previous academic years need to refer to the tables in the catalog for their matriculation year to find the appropriate credit.

College-Level Examination Program

Credit for College Board subject examinations of the College-Level Examination Program (CLEP) in general biology, general chemistry, general psychology, introductory macroeconomics, introductory microeconomics, introductory sociology and calculus may be granted for a score at or above the 67th percentile. This credit is applied toward degree requirements at the discretion of the student's dean. Refer to the appropriate dean's office for the policy of that college or school.

Credit for CLEP subject examinations cannot be evaluated from college or high school transcripts; score reports must be submitted directly from the College Board. CLEP general examinations are not accepted for credit at CU-Boulder.

CLEP tests are administered through Career Services, 303-492-5854.

Transfer of College-Level Credit

The Office of Admissions performs an initial evaluation of transfer credit after applicants have been admitted. A complete evaluation of transfer credit cannot be made until all official credentials have been received.

The evaluation is made using the official transcripts sent directly to the university from each one of the applicant's previous colleges. Official transcripts exhibit the official seal and signature of the registrar. Transcripts that are marked "student copy," "issued to student," or "unofficial" are not accepted as official. Faxed transcripts are not accepted.

Course work of comparable content and scope to the CU Boulder curriculum will generally be transferred if it was completed at colleges or universities accredited by the Higher Learning Commission, or other regional associations at the time the work was completed. For international colleges or universities, the international equivalent of regional accreditation or Ministry of Education recognition will be considered. If course work was completed at a school not regionally accredited, the student may specifically request that their course work be considered for transfer. CU Boulder will utilize the recommendations of American Association of Collegiate Registrars and Admissions Officers (AACRAO) when making its decision.

These recommendations include but are not limited to:

- Educational quality of the sending institution
- Comparability of credit to be transferred to CU Boulder
- Applicability of the credit in relation to the programs being offered at CU Boulder
- Additional documentation that students may be required to provide regarding the course work for transferability

Exceptions to Recognition of Regional Accreditation

Transferability is based on the practices of the leading university, as reported to AACRAO, in the state where the institution is located. CU Boulder will make the decision on transferability based on the above criteria for institutions within the state of Colorado.

For Advanced Placement, International Baccalaureate, College Level Examination Program or military credit, refer to the detailed criteria in the corresponding sections.

Evaluation of Credit

Only courses taken at a college or university of recognized standing with grades of C- (1.70) or better are accepted for transfer. All transferred courses are recorded on the student's academic record.

Each college and school at CU Boulder determines:

- How transferred course semester credit hours are applied toward graduation requirements in accordance with the policies of the college or school
- The maximum number of semester credit hours that may transfer from a two-year or four-year postsecondary institution
- The minimum number of semester credit hours that must be completed on the Boulder campus in order to receive a degree
- The minimum number of semester credit hours that must be completed as a degree student in residence on the Boulder campus to receive an undergraduate degree
- The maximum number of semester credit hours earned through correspondence or in a similar format that are accepted toward a baccalaureate degree

Credit hours should have been earned no more than 10 years prior to transferring into an undergraduate degree program at the University of Colorado Boulder. Any determination of acceptance of semester credit hours toward the degree based on the content and the age of the credit is made in the college or school dean's office or by the student's major department.

College-level work taken during high school is evaluated in accordance with general guidelines for transfer credit at CU Boulder. Official college transcripts of work taken must be received in order for transfer credit to be awarded.

Course Work Requiring Additional Review

The following course work will require additional information before a decision can be made on acceptance for transfer credit.

- Independent study courses
- Internships
- Workshops
- Graduate course work

- Military credit
- Professional programs

Course Work Not Accepted for Transfer Credit

The following course work will not be accepted for transfer credit and will not count toward a degree at Boulder:

- any courses in which the grade earned is below a C- (1.70)
- courses identified by CU Boulder as remedial, such as remedial English, mathematics, science and developmental reading
- vocational-technical courses that are offered at two-year and proprietary institutions (exceptions may be granted only by the CU Boulder dean responsible for the student's curriculum—when exceptions appear to be warranted, appropriate department heads make recommendations to their respective deans regarding credit for such courses)
- courses in religion that constitute specialized religious training or that are doctrinal in nature
- credits earned for work experience or through a cooperative education program
- outdoor leadership education course work
- credits earned in physical education activity courses
- courses or programs identified as college orientation

Appeals Process

Students who wish to appeal the transferability of course work must write a letter within the first semester after the work is posted on the University of Colorado Boulder record or after receiving notice from the Office of Admissions that the course work was not accepted for transfer credit. The letter must be addressed to the Transfer Credit Department, Office of Admissions, and include:

- The name(s) of the previous institution(s) attended, the course number and title of each course for which the student was denied transfer credit and the date(s) of enrollment in each course
- A copy of the catalog description (from the appropriate year) for each course in question
- A copy of the syllabus or course outline (from the appropriate year) for each course in question. This information can be obtained from the sending institution
- A statement indicating why the credit(s) should be accepted

The Office of Admissions will re-evaluate the course(s) for which the student is requesting reconsideration in consultation with the appropriate dean or chair. A written response will be delivered to the student in a timely manner once the appropriate faculties have reviewed the course materials, past practices and the student's specific circumstances.

Transfer Credit From University of Colorado Campuses

Course work completed at other campuses in the University of Colorado system will be a part of the student's cumulative university record and will not be considered as transfer credit. However, the applicability of this course work towards specific CU Boulder degree requirements will be determined solely by CU Boulder colleges and schools. External transfer credit presented by students to other University of Colorado

campuses will be evaluated by CU Boulder guidelines upon the student's matriculation into a degree program at CU Boulder.

Number of Credit Hours Required for Graduation

Transfer students are held to the same residency and degree requirements as students who begin their undergraduate degree program on the Boulder campus. This assumes that transfer credit hours are in courses comparable in level and content to those required for graduation from an undergraduate degree program at the Boulder campus. College or school residency requirements, meaning the number of credit hours required to be taken as a degree student once admitted on the Boulder campus, are the same for transferring and nontransferring students.

Credit for Correspondence and Online Work

Each college and school determines the maximum number of credits taken through correspondence and online programs that are accepted toward a baccalaureate degree.

College-Level Work Taken during High School

If you took college-level courses while enrolled in high school, you may be able to transfer the credit to CU Boulder. Only courses taken at a college or university of recognized standing with grades of C- or better are accepted for transfer. All college-level work will be evaluated in accordance with CU Boulder transfer credit guidelines. College-level work taken concurrently with a high school program may be used to satisfy MAPS requirements. You must have an official college transcript sent directly to the Office of Admissions in order for transfer credit to be evaluated.

Advanced Placement Examinations

Credit for College Board Advanced Placement examinations cannot be evaluated from college or high school transcripts; score reports from the College Board must be submitted directly to the university for evaluation. For more information and a guide to equivalencies, refer to Freshman Applicants and the chart in this section or visit www.colorado.edu/admissions/transfer (<http://www.colorado.edu/admissions/transfer>).

College-Level Examination Program

Credit for College Board subject examinations of the College-Level Examination Program (CLEP) in general biology, general chemistry, general psychology, introductory macroeconomics, introductory microeconomics, introductory sociology and calculus may be granted for a score at or above the 67th percentile. This credit is applied toward degree requirements at the discretion of the student's dean. Refer to the appropriate dean's office for the policy of that college or school.

Credit for CLEP subject examinations cannot be evaluated from college or high school transcripts; score reports must be submitted directly from the College Board. CLEP general examinations are not accepted for credit at CU Boulder.

International Baccalaureate Examinations (IB)

In general, credit is granted for approved IB examinations at the higher level with a score of 4 or better. Students admitted to the University of Colorado Boulder who have graduated from high school with an International Baccalaureate Diploma shall be granted 24 hours of college credit. This credit will be applied toward degree requirements ONLY if approved by the college or school. Depending on the student's degree program, some of the 24 credit hours may not be applicable toward degree requirements. No CU Boulder tuition will be charged for these credits and the 24 credits will only be granted if the student receives a score of 4 or better on an examination administered as part of the IB Diploma program. If the student scores less than 4 on each IB subject test, the credit hours granted will be reduced accordingly. Official scores must be sent to the admissions office directly from the IB organization. For more information and a guide to equivalencies, refer to Freshman Applicants (p. 98).

Military Credit

Credit for military schooling is evaluated upon receipt of Form DD 214, Service Separation Certificate or the Joint Services Transcript (JST). Only work that has received an upper-division baccalaureate recommendation by the American Council on Education (ACE) can be awarded credit. This work, however, is transferred and recorded at the lower-division level. Foreign language credit taken through the State Department, Department of Defense or Defense Language Institute is assigned the recommended ACE credit.

Transfer Credit Conversion

CU Boulder operates on a semester system. Other campuses, including CU Boulder, operate on a two-term or semester system. Course credits from quarter system institutions must be converted from quarter hours to semester hours or credits. One quarter credit is equivalent to two-thirds of a semester credit. To convert quarter hours to semester hours, multiply the number of quarter hours by two-thirds and round off the total to the nearest tenth. For example, 4 quarter hours $\times 2/3 = 2.67$ or 2.7 semester hours of credit, or 3 quarter hours $\times 2/3 = 2$ semester hours of credit.

Minimum Academic Preparation Standards

One unit equals one year of high school study or one semester of college course work.

New Student & Family Programs

New Student & Family Programs works to support new undergraduate students and their family members as students transition to campus. New Student & Family Programs works with incoming students from the time they decide to attend CU Boulder through their first few weeks on campus. New Student & Family Programs continues to support family members throughout the student's experience at CU Boulder.

Incoming undergraduate students must complete an online orientation program, the Online Experience, in order to register for classes. The Online Experience helps incoming students learn more about student success, advising, registration and campus resources. New students should check their CU Boulder email account for more information about the Online Experience and other important next steps.

In addition to the online requirement, new students and their family members are encouraged to attend a New Student Welcome Day on campus. These optional one-day programs offer incoming students and family members an opportunity to come to campus and connect with academic advisors, faculty, current students and student life opportunities.

New Student & Family Programs also collaborates with campus partners to plan fall and spring Welcome events surrounding the first day of classes. Students participate in programs and have opportunities to connect with current students, faculty and staff to create a healthy and positive transition to CU Boulder.

For more information, visit the New Student & Family Programs (<http://www.colorado.edu/orientation>) website.

Academic Advising

Academic advising is a critical component in the success of undergraduate students. Its goal is to assist students in creating and achieving educational, career and life goals. Advising is more than offering information about academic courses and programs; it also involves encouraging students to formulate important questions about the nature and direction of their education. Advisors help students to explore their options and personalize their academic experience.

Advising Centers

There are several advising centers across the Boulder campus, primarily housed in colleges and schools. Academic advisors are professional staff or faculty members who have an expertise in navigating the entire curriculum and in developing mentoring relationships with students. Students are encouraged to meet with an advisor at least once each semester.

College of Arts & Sciences: Serving students pursuing the natural sciences, social sciences, and arts and humanities.

Leeds School of Business: Serving students pursuing accounting, finance, management and marketing.

School of Education: Serving students pursuing Bachelor of Arts in elementary education, Bachelor of Arts in leadership and community engagement, education minor, leadership studies minor and teacher licensure.

College of Engineering & Applied Science: Serving students pursuing aerospace engineering; chemical and biological engineering; civil, environmental and architectural engineering; electrical, computer and energy engineering; mechanical engineering; and computer science.

Program in Environmental Design: Serving students pursuing design studies or architecture, planning & landscape.

College of Media, Communication and Information: Serving students pursuing advertising, PR and media design; communication; critical media practices; information science; intermedia art, writing and performance; journalism; and media studies.

College of Music: Serving students pursuing music and music performance.

Enrollment & Records

Class Level

Class level is based on the total number of credit hours passed, as follows:

Freshman	0–29.9 credit hours
Sophomore	30–59.9 credit hours
Junior	60–89.9 credit hours
Senior	90–123.9 credit hours
Fifth-Year Senior	124 and above credit hours

The normal course load for most undergraduates is 15 credit hours each semester.

Course Load

Full-time status for undergraduate students is 12 or more credit hours for fall, spring and summer semesters for financial aid purposes. For enrollment verification and academic purposes (not related to financial aid), 12 credit hours is considered a full-time load in the fall and spring semester, and 6 credit hours is considered full time in the summer. For further information, view the Office of the Registrar's enrollment grid (<http://www.colorado.edu/registrar/students/registration/enroll-classes/credit-hour-limitations>).

Students who receive financial aid or veterans benefits or who live in university housing should check with the appropriate office regarding course-load requirements for eligibility purposes.

Intrauniversity Transfer Students

Students wishing to change colleges or schools within the CU Boulder campus follow the intrauniversity transfer (IUT) guidelines from the college or school into which they wish to transfer.

For more information on recommended course work in preparation for an IUT and other criteria, students need to consult college and school sections of this catalog or talk with an academic advisor in the program to which they plan to transfer. Some colleges and schools do not accept intrauniversity transfer students during the summer. It is important to note that admission to a college through the IUT process is competitive,

and not all students who apply are admitted. Decisions are based on course preparation, credit hours completed, grade point average and other criteria required by the specific college or school.

Degrees & Majors

In order to earn a baccalaureate degree from the University of Colorado Boulder, students must meet all degree and major requirements for their specific program of study and earn a minimum of 120 cumulative credit hours and a minimum of a 2.00 GPA. It is important to note that some degree and program requirements are higher than these minimum standards. See college and school sections of this catalog for specific degree policies and requirements.

In addition, students at CU Boulder may pursue dual degrees, concurrent degrees or additional majors, minors and/or certificates.

Double Degrees

A double degree at the baccalaureate level can be two different degrees from the same college or school (e.g., a BA and BFA from the College of Arts and Sciences), or two degrees from different colleges or schools (e.g., a BA from the College of Arts and Sciences and a BS from the College of Engineering and Applied Science). In order to earn a double baccalaureate degree, students must meet all individual degree requirements and receive approval from the academic college or school for each degree. Both degrees must be confirmed with the same graduation date (degrees are awarded concurrently).

Students who wish to pursue an additional baccalaureate degree *after* graduating with a baccalaureate degree from CU Boulder must file and application for readmission to the university. In addition, students should work with an academic advisor in the degree program they wish to add in order to determine appropriate procedures and additional requirements (e.g., additional residency requirements may apply beyond course requirements for the second degree and major). Not every college and school permits students to complete an additional baccalaureate degree after graduation.

Bachelor's/Accelerated Master's Degrees

Qualified students may be approved to pursue concurrent baccalaureate and master's degree programs, such as the Bachelor of Arts/Master of Arts (BA/MA). These programs are designed as accelerated, integrated curricula in which approved students are permitted to apply select courses/credits to both the baccalaureate and master's degrees.

Additional Majors

Some colleges and schools permit students pursuing a baccalaureate degree to graduate with more than one major (e.g., economics and French) under the same degree (e.g., BA) by completing all requirements for each major. The majors must be completed concurrently and will post to a degree record with the same graduation date. A minimum of 120 total credit hours is required for a degree with additional majors.

Minors

Students earning a baccalaureate degree may participate in a minor program. Minors are offered in a number of undergraduate colleges, schools and programs.

Certificates

Undergraduate students may pursue formal certificates in a variety of academic or interdisciplinary subjects. Each certificate program has unique requirements. Degree-seeking students who been verified to have

completed certificate requirements will have the certificate/s posted to their academic records at the time of graduation. Non-degree students who are approved to pursue select certificate programs must be admitted through Continuing Education.

Degree Audit

Degree audit reports are available for most degree and certificate programs to help students and advisors track requirements and progress. The degree audit tool may be accessed through MyCUInfo (<http://mycuinfo.colorado.edu>).

Academic Standing

Each college and school at CU Boulder has published minimum requirements for undergraduate students to remain in good academic standing. See respective college and school sections related to academic standards, including policies for probation and suspension.

In addition, federal regulations require students to make satisfactory academic progress in a program of study to be eligible for financial aid. See the Satisfactory Academic Progress (SAP) Policy (<http://www.colorado.edu/financialaid/policies/satisfactory-academic-progress-sap-policy>) webpage.

Class Rank

Undergraduate students can get a document that indicates their class rank among students graduating within the last year. Students in the College of Arts and Sciences and the College of Engineering and Applied Science will have a ranking within their major degree program. Students in other schools, colleges and programs will have a ranking within their college. The request form is available in MyCUInfo.

College-Level Examination Program

Credit for College Board subject examinations of the College-Level Examination Program (CLEP) in general biology, general chemistry, general psychology, introductory macroeconomics, introductory microeconomics, introductory sociology and calculus may be granted for a score at or above the 67th percentile. This credit is applied toward degree requirements at the discretion of the student's dean. Refer to the appropriate dean's office for the policy of that college or school.

Credit for CLEP subject examinations cannot be evaluated from college or high school transcripts; score reports must be submitted directly from the College Board. CLEP general examinations are not accepted for credit at CU-Boulder.

CLEP tests are administered through Career Services, 303-492-5854.

Course Challenge

The Institutional Undergraduate Course Challenge policy provides limited opportunities for students to take an examination (or equivalent) and earn credit for a course without registering for or taking the course. Applications for institutional course challenge are available on the Office of the Registrar web site. Requesting a course challenge option for any Guaranteed Transfer (GT) Pathways (<http://higher.ed.colorado.gov/academics/transfers/gtPathways/curriculum.html>) general education course is at the enrolled student's discretion.

Institutional course challenge requests are not approved if a student previously enrolled in the course (including earned transfer or test credits). This includes attempts in which a failing mark (F) or a W (drop) is recorded for the course. A student may only attempt to challenge an

individual CU Boulder course one time. If a student does not achieve a C- or better on an institutionally devised challenge exam, the student must enroll in the equivalent course in order to earn credit for it. A maximum of 36 credits may be earned through institutional course challenge.

Successful course challenges are recorded on transcripts as earned institutional, residential credit within the term completed. No grades or quality points are assigned ('CR' is recorded to denote earned credit). The name and catalog number of the course, credits, and that it was a challenge exam appear on transcripts.

CU Boulder assesses an administrative fee of \$115 for each institutional challenge exam (or the equivalent) attempted, regardless of a student's outcome on the challenge attempt.

Credit earned through institutional course challenge will apply to general education requirements, but may not always apply to specific degree requirements (see individual college/school policies and degree requirements).

Financial Aid

The Office of Financial Aid's primary goal is to ensure that students who have been admitted to the university have access to the resources available to fund their education. CU Boulder students may be eligible to receive financial aid from our office each year from federal, state, university and private sources.

Applying for Financial Aid

Students apply for financial aid by completing the Free Application for Federal Student Aid (FAFSA) at www.fafsa.ed.gov (<http://fafsa.ed.gov>). The FAFSA helps determine a student's eligibility for grants, work-study and loans, as well as some scholarships. The Office of Financial Aid provides students with their award eligibility to accept or decline.

For financial aid for fall 2017, spring 2018, and summer 2018, the 2017–18 FAFSA must be submitted. Students should apply as soon as possible after the FAFSA opens October 1, 2016, as some funds are first-come, first-served. Students must reapply for financial aid every year.

The Office of Financial Aid receives the FAFSA results electronically if CU Boulder is listed on the application (school code 001370).

Eligibility

Financial aid eligibility is based on the results of the FAFSA and the cost to attend CU Boulder.

The FAFSA application determines the Expected Family Contribution (EFC), a reference number schools use to best determine the family's financial situation. It's **not** the amount of money a family will pay for college, nor is it the amount of financial aid a student will receive.

Each year the Office of Financial Aid calculates the estimated cost of attendance including tuition, fee, housing and food, books and supplies, transportation, medical and personal expenses. The EFC is subtracted from the cost of attendance to determine the student's financial need. This financial need is considered when determining aid eligibility.

View more information on cost and budget examples (<http://www.colorado.edu/financialaid/cost-financial-aid>).

Financial Aid Awards

Financial Aid awarding begins as early as the February before a fall semester, but aid is continually offered as long as funds are available. Freshman and transfer students applying for aid for the 2017–18 academic year are encouraged to submit their FAFSA applications and any additional documentation requested by February 15, 2017 in order to receive aid information before the confirmation deadline of May 1, 2017. Types of awards available to CU Boulder students are listed below.

Loans

Students submit the FAFSA (<http://fafsa.ed.gov>) to be considered for the following loan programs.

Federal Direct Subsidized and Unsubsidized Loans (<http://www.colorado.edu/financialaid/types-aid/undergraduate-student-loans/federal-direct-loans-undergraduate-students>)

Funds are awarded and disbursed by CU Boulder. Undergraduate students may qualify for a combination of subsidized (i.e., federal government pays the interest) and unsubsidized loans. The interest rates for direct loans are determined annually. Annual limits depend on the year in school: freshmen can be awarded up to \$5,500, sophomores \$6,500, and juniors and seniors \$7,500. Independent students may borrow an additional amount of unsubsidized loans, freshmen and sophomores \$4,000, juniors and seniors \$5,000.

Interest on unsubsidized loans can be repaid while the student is in school. Repayment begins six months after the student graduates or ceases to be enrolled at least half-time (6 credit hours for undergraduates; 4 credit hours for graduates).

Federal PLUS Loan for Parents (<http://www.colorado.edu/financialaid/parent-loans>) or Graduate Students (<http://www.colorado.edu/financialaid/types-aid/graduate-loans/federal-graduate-plus-loans>)

These federal loans are available to graduate students and parents of dependent undergraduate students. The interest rate is fixed at 6.31 percent. Borrowers must complete a credit check.

Note: Parents borrowing a PLUS loan for their student will be regarded as parental support on in-state residency petitions for dependent students. Parents may request a deferment on payments until their student has finished with school.

Work-Study (<http://www.colorado.edu/studentemployment/work-study>)

Students should submit the FAFSA (<http://fafsa.ed.gov>) to be considered for work-study, since it is based on financial need. Students are awarded an amount of money they can work to earn through on-campus or approved off-campus agencies. These students receive a paycheck just like a non work-study job. Students may apply for a variety of jobs at competitive rates. Jobs can be found online through the CU Boulder Student Job (<https://ofa.colorado.edu/StudentJobsStudentLogin/login.aspx>) database.

Grants for Undergraduate (<http://www.colorado.edu/financialaid/types-aid/undergraduate-grants>) and Graduate (<http://www.colorado.edu/financialaid/types-aid/grantsassitantships-graduate-students>) Students

Grants are awards that do not have to be repaid. Students should submit the FAFSA (<http://fafsa.ed.gov>) to be considered for federal, state

and institutional need-based grants (including Pell, SEOG, Colorado Responsibility Grant, etc.).

Scholarships (<http://www.colorado.edu/scholarships>)

Donations from private individuals, corporations, foundations and the University of Colorado are all sources for scholarships. Incoming students are automatically considered for some scholarships through their admissions application.

CU Boulder Scholarship Application (<http://www.colorado.edu/scholarships/cuboulder-scholarship-app>)

Students may apply for scholarships offered by the Office of Financial Aid through the student portal beginning October 1 each year. Your FAFSA (<http://fafsa.ed.gov>) must be received no later than February 15 to be considered for scholarships with a financial need requirement. Some scholarships may have earlier deadlines.

Prospective students do not need to wait for formal acceptance to CU Boulder before applying for financial aid or scholarships.

Scholarships are highly competitive at CU Boulder. The selection committee considers academic achievement, honors, leadership, school activities and service to the community. Students should also search for scholarship opportunities within their academic program, college, club or campus organization.

Private External Scholarships (<http://www.colorado.edu/scholarships/private-scholarships>)

Students who receive a private scholarship from an organization outside the university must report the scholarship through the student portal. To ensure faster process, the check should be mailed or dropped off with a completed donor form (<http://www.colorado.edu/scholarships/sites/default/files/attached-files/donorform.pdf>). In addition, students are encouraged to write to their donors and express their gratitude.

When a scholarship donor does not specify how to disburse the funds through a donor form (<http://www.colorado.edu/scholarships/sites/default/files/attached-files/donorform.pdf>), the financial aid office equally divides awards of \$1,000 or more between the fall and spring semesters. Private scholarships less than \$1,000 are applied in full to the current semester bill.

Donors should mail their checks, payable to the University of Colorado, with a donor form (<http://www.colorado.edu/scholarships/sites/default/files/attached-files/donorform.pdf>) to:

University of Colorado Boulder
Office of Financial Aid, ATTN: Scholarship Services
77 UCB
Boulder, CO 80309-0077

Donors should mail scholarship checks at least one month prior to the bill due date to avoid incurring late and service charges. If a student's scholarship check is not submitted before by the bill payment deadline, he or she should make other arrangements to pay the bill.

Policies

The Office of Financial Aid follows regulations provided by the Department of Education, the Higher Education Reconciliation Act of 2005, the Family Education Rights & Privacy Act (FERPA) and in-house policies to administer federal, state and university funding. View a full

list of financial aid policies (<http://www.colorado.edu/financialaid/policies>) on our website.

Adjustments to Financial Aid (<https://www.colorado.edu/financialaid/policies/adjustments>)

There are a variety of circumstances that may require an adjustment to a student's financial aid award. Students should understand how dropping and adding courses, receiving other aid, or corrections on their FAFSA will impact their aid.

FERPA (<https://www.colorado.edu/financialaid/ferpa>)

The Family Education Rights & Privacy Act (FERPA) is a Federal law that protects the privacy of student educational records (which includes financial aid).

Satisfactory Academic Progress (SAP) (<https://www.colorado.edu/financialaid/policies/satisfactory-academic-progress-sap-policy>)

Students who apply for financial aid at CU Boulder are responsible for knowing and complying with the satisfactory academic progress policy. Briefly, the policy outlines the requirements to maintain satisfactory progress (i.e., minimum grade point average [GPA], completion rate, etc.), the consequences of failing to meet the requirements, and the process for appealing if the student loses eligibility.

Study Abroad (<https://www.colorado.edu/financialaid/apply-aid/study-abroad>)

Students must be enrolled in a CU Boulder study abroad program to be eligible for financial aid through CU Boulder's financial aid office. Students participating in a study abroad program through another university are not eligible.

Withdrawal Policy (<https://www.colorado.edu/financialaid/policies/financial-aid-withdrawal-policy>)

If a student enrolls at CU Boulder, receives financial aid, then withdraws, his or her financial aid is adjusted according to federal regulations. The student may owe a bill to the university after the financial aid is adjusted.

Policies on drug conviction, student loan code of conduct, students rights and responsibilities and verification are available on the Financial Aid Policy web page (<https://www.colorado.edu/financialaid/policies>).

Student Employment

Research studies indicate that students who work are as successful academically as those who do not. Jobs provide students with income, work experience and the opportunity to explore career options.

Work-Study (<http://www.colorado.edu/studentemployment/work-study>)

Work-Study is need-based financial aid. In order to determine eligibility for work-study, students must first submit the Free Application for Federal Student Aid (FAFSA) (<http://www.fafsa.ed.gov>). Get a quick overview of the program with our work-study video (<http://www.colorado.edu/studentemployment/video/work-study>).

Find a Job (<http://www.colorado.edu/studentemployment/find-job>)

Student Employment posts part-time on-campus and off-campus jobs for both work-study and non-work-study students. In addition, an on-call

temporary employment service allows students to register for occasional work including one-time child care, yard work and clerical jobs.

Student Employee Work Hours Policy

Undergraduate student employees are limited to working a maximum of 25 hours per week during the fall and spring semesters and 40 hours per week during the summer, per the Student Hourly Employee Work Hours Policy (<http://www.colorado.edu/studentemployment/policies>). The policy does not affect students working in non-university off-campus jobs, though we encourage students to prioritize their academics first when considering outside work commitments. View more information about this policy and other student employment policies on the Student Employment policy web page (<http://www.colorado.edu/studentemployment/policies>). (<http://www.colorado.edu/studentemployment>)

Student Employment is here to help connect students and employers. Visit Student Employment in Regent Administrative Center 205 (<http://www.colorado.edu/campusmap/map.html?bldg=RGNT&x=24&y=9>), call **303-492-7349** or email studentemployment@colorado.edu for more information.

Student Finances

Expenses

College Opportunity Fund (COF)

The College Opportunity Fund (COF), created by the Colorado Legislature, provides a stipend to eligible undergraduate students paying in-state tuition. The stipend pays a portion of total in-state tuition for eligible undergraduate students who attend a Colorado public institution or a participating private institution. Eligible undergraduate students must be admitted and enrolled at a participating institution to use the stipend for eligible undergraduate classes.

To receive the COF stipend, students must both apply for and authorize (two separate steps) it. For instructions, visit the Apply for and Authorize COF (<http://www.colorado.edu/registrar/students/cof/apply-authorize>) webpage. New accounts offer 145 available undergraduate credit hours.

COF-eligible students who exceed 145 eligible COF hours toward their degree may apply for additional semesters of eligibility. For more information, visit the COF Lifetime Limit Extensions (<http://www.colorado.edu/registrar/students/cof/extensions>) webpage.

Details of the COF program are determined by the Colorado Department of Higher Education (CDHE) and the College Assist Program (<http://cof.college-assist.org>). Students with questions about COF may contact the Office of the Registrar (<http://www.colorado.edu/registrar/about/contact-us>).

Confirmation Deposit

All new students (both in-state and out-of-state) must confirm their enrollment at the university by official notification and deposit of \$200. The deposit is nontransferable and must be paid by all students, regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU Boulder forfeit their deposit. Students who submit deposits after enrollment levels have been reached will not be accepted, and their deposits will be returned.

The confirmation deposit is not credited toward tuition and fees. It is refunded when a student graduates or officially withdraws from

CU Boulder within established dates and guidelines after paying any outstanding university obligations. Students should update their direct deposit bank account information before they graduate or withdraw to be sure they receive their refund.

Housing Deposit

Please see the Housing (p. 24) section for details.

Estimated Expenses

Expenses for students attending the University of Colorado Boulder vary depending on housing (on or off campus), program of study, state residency (tuition classification), personal needs and individual interests.

Tuition and fees are approved annually by the Board of Regents. Visit the Bursar's Office (<https://bursar.colorado.edu>) website for current rates.

The figures below are university-billed cost estimates based on a single undergraduate student enrolled full time for academic year 2017–18 (two semesters). For detailed descriptions of tuition and fees, visit the Bursar's Office (<https://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets>) website. The difference in range depends upon the student's major. Residential academic program (RAP) fees, program and course fees are not included in the estimated total because costs can vary depending on individual options. Additional costs such as transportation, medical and personal are not charged on the university bill but should be considered for planning purposes. The Office of Financial Aid provides budget examples (<http://www.colorado.edu/financialaid/cost/example-aid>) which may help you plan for other costs.

In-State Expenses (<https://bursar.colorado.edu/tuition-fees/annual-cost-estimate/undergraduate-colorado-resident>) (One academic year; resident for tuition purposes)

Tuition and Fees: \$12,086–\$17,150

On-Campus Room and Board (*based on double occupancy, standard room*): \$13,998

Books and Supplies: \$1,800

On-Campus Estimated Total: \$27,884–\$32,948

Out-of-State Expenses (<https://bursar.colorado.edu/tuition-fees/annual-cost-estimate/undergraduate-nonresident>) (One academic year; nonresident for tuition purposes)

Tuition and Fees: \$36,220–\$39,416

On-Campus Room and Board (*based on double occupancy*): \$13,998

Books and Supplies: \$1,800

On-Campus Estimated Total: \$52,018–\$55,214

International Expenses (One academic year; international nonresident for tuition purposes)

Tuition and Fees: \$37,984–\$41,180

On-Campus Room and Board (*based on double occupancy*): \$13,998

Health Insurance: \$3,990

Books and Supplies: \$1,800

On-Campus Estimated Total: \$57,772–\$60,968

Notes:

- The resident tuition amount assumes eligibility for and authorization for the use of the College Opportunity Fund (COF) stipend, which is \$77 per credit hour in 2017–18.
- Residency classification for tuition is determined by Colorado state law. See the Tuition Classification (p. 27) section.

- Does not include one-time new student fee or mandatory university-sponsored health insurance. See the Health & Wellness (p. 24) section.
- In-state tuition is charged per credit hour. Out-of-state and international tuition is a flat rate, regardless of the number of credit hours.
- In-state undergraduate students must apply for and authorize the College Opportunity Fund tuition stipend to help offset part of their tuition. See the undergraduate Student Finances (p. 118) section.
- In-state undergraduate tuition and mandatory fees (not including course and program fees) are guaranteed for four years. For more information, visit the Bursar's Office's Undergraduate Resident Tuition Guarantee (<https://bursar.colorado.edu/tuition-fees/cu-boulder-tuition-guarantee/undergraduate-resident-tuition-guarantee>) webpage.
- Out-of-state and international undergraduate students are guaranteed the same tuition rate for four years (not including mandatory fees, course and program fees). Students first registering summer 2017 through spring 2018 are guaranteed the same tuition rate through summer 2021. For more information, visit the Bursar's Office's Undergraduate Nonresident Tuition Guarantee (<https://bursar.colorado.edu/tuition-fees/cu-boulder-tuition-guarantee/undergraduate-nonresident-tuition-guarantee>) webpage.
- Students planning to attend summer session can visit the Bursar's Office (<https://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets/#sum17>) website for summer rates.
- Zero or fractional credit is treated as one hour in assessing tuition and fees. Tuition for no-credit (NC) courses (p. 19) is the same as for courses taken for credit.
- Students simultaneously enrolled in programs leading to two different degrees will be assessed tuition for the college or school with the higher tuition rate.

Bills & Payments

Online Bills

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (<https://bursar.colorado.edu/payments/payment-policies/tuition-fee-agreement-and-disclosure>).

The university bill includes tuition, mandatory fees, course and program fees, optional fees, on-campus room and board (p. 24), residential academic program (RAP) fees, student health insurance (see health insurance requirement (p. 24)) and other direct-university costs for one semester at a time. Textbooks and supplies up to \$1,500 from the CU Book Store can be charged to the bill. Adjustments made throughout the semester will appear immediately on the student account (e.g. health insurance waiver, dropping or adding courses, etc.). Additional costs such as transportation, medical and personal are not charged on the university bill but should be considered for planning purposes.

Bills for fall are available in mid-August. Spring bills are available in mid-January. Emails are sent to students' colorado.edu addresses and to authorized payers. Email is the official means of communication at CU Boulder. Failure to receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students and authorized payers can log in to MyCUInfo (<https://mycuinfo.colorado.edu>) and CUBill&Pay (<https://quikpayasp.com/cu/boulder/tuition/authorized.do>) at any time to view and pay the bill.

Authorized Payers

Bills are online only. Students access the bill through MyCUInfo. Parents do not automatically have access to see the bill due to federal privacy laws (<http://www.colorado.edu/registrar/students/records/ferpa>). Students must authorize payers (<https://bursar.colorado.edu/billing/cubillpay/parents>) in order to provide them with access to view and pay the bill. Students can authorize up to five people. Authorized payers access the bill through CUBill&Pay. Students are ultimately responsible for payment of the bill.

Authorized payer access is separate and distinct from CU Guest Access. If someone is helping pay tuition and fees on your behalf, we recommend granting both.

Payments

Payment due dates are listed on the bill and on the Bursar's Office (<https://bursar.colorado.edu/billing/due-dates>) website. Payment is due by 5 p.m. Mountain Time on the due date or 11:59 p.m. if paying online. Learn about exceptions for weekends and holidays (<https://bursar.colorado.edu/billing/due-dates/#important>).

Payment Methods

We encourage online payment from a traditional U.S. checking or savings account (electronic check or eCheck) in order to avoid paying a nonrefundable 2.75 percent service fee charged by NelNet Business Solutions for all credit and debit card transactions. Paying by eCheck is secure, fast and free.

We accept American Express, MasterCard, Visa and DISCOVER. A nonrefundable 2.75 percent fee applies to all credit and debit card transactions.

International payments (bank and wire transfers) can be made using Flywire. For more information about Flywire, visit the International Payment (<https://bursar.colorado.edu/payments/payment-methods/international>) webpage.

Learn about other payment methods on the Bursar's Office (<https://bursar.colorado.edu/payments>) website.

Payment Plans

Optional payment plans are available for students and authorized payers to pay tuition and fees over the course of the semester. For more information, visit the Payment Plans (<https://bursar.colorado.edu/payments/payment-plans>) webpage.

Also see the Policies (p. 120) section.

Policies

Add/Drop Tuition Adjustment

Adjustment of tuition and fees is made accordingly based on dates in the Add/Drop Calendar (<http://www.colorado.edu/registrar/students/academic-calendar/add-drop-calendar>).

Credit and Debit Card Service Fee

A nonrefundable 2.75 percent service fee charged by NelNet Business Solutions applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings accounts (electronic check or eCheck).

Dispute Rights

To dispute tuition and mandatory fee charges, you must make a formal appeal to the Tuition Dispute Committee by the end of the semester (last day of finals). Disputes will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. Complete a tuition dispute form and return the form, your statement and official documentation to the Bursar's Office Student Billing Department, Regent Administrative Center, 43 UCB, Boulder, CO 80309-0043, 303-492-5381 or bursar@colorado.edu. If you disagree with the charges and fail to avail yourself of the dispute process by the end of the semester, you will have been deemed to have waived your right to dispute the charges. For additional information on the dispute process, see Tuition Dispute (<https://bursar.colorado.edu/billing/tuition-dispute>).

Failure to Make Payment

Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.

A financial hold may be placed on your student record and remain until the balance is paid in full. You will not be able to:

- Adjust your current schedule (drop or add classes).
- Register for future classes.
- Receive transcripts.
- Receive a diploma or certification materials.
- Be re-admitted.

A late payment charge is assessed once per semester based on the amount due:

Balance Due	Late Charge
\$1.00–99.99	\$5
\$100.00–299.99	\$10
\$300.00–499.99	\$20
\$500.00–699.99	\$30
\$700.00–899.99	\$40
\$900.00 and over	\$50

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual percentage rate of 12%) to the unpaid principal balance less any payments or credits made.

After the end of the semester, past due accounts are referred to the university's Student Debt Management department for collection. Students will have an opportunity to establish a university-approved repayment agreement. Establishing a repayment agreement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the

university by the collection agency, including percentage-based fees of up to 30 percent of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student's account. The student may be responsible for reasonable attorneys' fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the amount owed to the university, the university may certify to the Colorado Department of Revenue information required for the recovery of past due debt.

Nondegree Students

Nondegree students enrolled in undergraduate courses are assessed tuition at the undergraduate student rate. Nondegree students enrolled in graduate courses are assessed tuition at the graduate student rate. Nondegree students enrolled in both graduate and undergraduate courses are assessed tuition at the undergraduate student rate.

Returned Payments

A \$20 fee is charged for all payments returned due to insufficient funds, closed account, or payment stopped (regardless of the amount). A \$30 fee is charged by NelNet Business Solutions for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when you make payment. A financial hold may also be placed on your account and you may be liable for collection costs and attorneys' fees as allowed by Colorado laws.

Payments are most often returned because deposits have been held. To avoid charges and penalties, call your bank to guarantee availability of funds.

Students Registered on More than One Campus

Students registering for courses on more than one campus of the university during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credits for which they are registered on that campus. Students may be eligible to use the concurrent registration option, in which case they pay the tuition rate of their home campus for the total hours enrolled at all campuses.

Tuition and Fee Agreement and Disclosure

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (<https://bursar.colorado.edu/payments/payment-policies/tuition-fee-agreement-and-disclosure>).

Tuition Classification

Students are classified as residents, nonresidents or international nonresidents for tuition purposes on the basis of answers provided on their application for admission and other relevant information. For more information, go to Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency>).

Withdrawal Policy Regarding Tuition and Fees

Students who pay the \$200 confirmation deposit and register for classes for any given semester are obligated to pay full tuition and fees for that semester, unless they officially withdraw from the university by published deadlines.

Tuition and fee obligations for students withdrawing from fall or spring semesters:

- Continuing students: Students who withdraw during the full-refund periods will have their confirmation deposit refunded unless there are any outstanding charges.
- New and readmitted students: New, readmitted and transfer students are not eligible for a refund of the confirmation deposit.

Deadlines to withdraw with no financial penalty vary by semester but occur about ten days before the first day of instruction. For the current refund and assessment schedule, visit the Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu>) webpage.

If students withdraw after the deadline to withdraw without being assessed a financial penalty, but before 11:59 p.m. on the third Wednesday of instruction, they are assessed a \$200 withdrawal processing fee. The confirmation deposit is automatically credited toward the withdrawal fee.

After the third Wednesday of instruction (the first drop deadline), there are three additional assessment periods.

- From the third Wednesday of instruction through the fifth Wednesday, students will be charged 40 percent of total tuition (not including the portion of tuition paid by College Opportunity Fund (COF) for in-state undergraduate students) and mandatory fees (CUSG student fees, athletic fee and capital construction fee).
- After the fifth Wednesday of instruction through the seventh Wednesday, students will be charged 60 percent of total tuition (not including the portion of tuition paid by COF for in-state undergraduate students) and mandatory fees (CUSG student fees, athletic fee and capital construction fee).
- After the seventh Wednesday of instruction, tuition will not be adjusted. In the case of extenuating circumstances (university error, recent medical condition, immediate family emergency, recent unanticipated financial problems or verification of non-attendance), students may dispute tuition and mandatory fee charges through the Bursar's Office. COF credit hours are expended and not refunded for withdrawals after the published deadline.

To comply with federal financial aid regulations, financial aid recipients' loan and scholarship awards may be adjusted.

Students should visit the Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu>) webpage for the most recent information, as the Board of Regents reserves the right to revise this schedule at any time. Refer to the Summer Session (<http://www.colorado.edu/summer>) website for information on the withdrawal policy and refund schedule for summer terms.

Students who do not pay the full amount due the university at the time of withdrawal must make arrangements for payment with the Student Debt Management department in the Bursar's Office. All withdrawals are handled through the Office of the Registrar.

Colleges & Schools

Arts & Sciences

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new

information is acquired and can participate in original research and creative work with individual faculty members.

The college offers a wide variety of fields of study, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

As the liberal arts college of CU Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with-and lead-the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems and speak and write effectively.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The core curriculum and breadth requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends and co-workers.

The college is also dedicated to outstanding graduate education. Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years. Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

Honors Program

The Arts and Sciences Honors Program provides a community for highly motivated and academically prepared undergraduate students and

offers opportunities for intellectual engagement through honors courses, academic-inspired events, and honors thesis research and creative work.

The Honors Program is a program of excellence in which the best teaching faculty are committed to serving the most highly motivated students. The Honors Program offers the opportunity to work closely with faculty, to engage with other honors students (<http://www.colorado.edu/honors/community>) and to write an honors thesis. Honors offers over 50 courses per year (<http://www.colorado.edu/honors/courses>) in a wide variety of areas. Honors courses are limited to an enrollment of approximately 17 students.

Incoming first-year students are invited to participate (<http://www.colorado.edu/honors/admission>) in the Honors Program based on multiple criteria that are set by the Office of Admissions. Transfer students must have a 3.3 GPA or better from their previous school. Currently enrolled students are eligible based on their academic achievement at CU Boulder and are expected to have a 3.3 GPA or better.

Latin honors (<http://www.colorado.edu/honors/graduation>) in the College of Arts and Sciences are conferred by the Honors Program. Students who wish to graduate *cum laude*, *magna cum laude* or *summa cum laude* must write and defend an honors thesis and maintain a certain GPA. Most students pursue Latin honors in their major (based on departmental requirements), but students may also pursue General Honors (<http://www.colorado.edu/honors/generalhonors>) via the Honors Program, providing students the opportunity to write an interdisciplinary thesis.

The Honors Residential Academic Program (Honors RAP (<http://www.colorado.edu/hrap>)) is the optional residential component of the program. Honors RAP is open to a limited number of qualified incoming and continuing students. Students engage in small classes and co-curricular activities, forming an academic community in their residence hall.

Miramontes Arts and Sciences Program

The Miramontes Arts and Sciences Program (MASP) is a community of diverse scholars dedicated to academic achievement. MASP accepts highly motivated students with strong academic records who are also members of traditionally underrepresented groups and/or are first-generation college students. MASP supports students through mentoring, instruction, skills workshops, enrichment opportunities, community activities, and participation scholarships.

For most members of MASP, support begins the summer before freshman year with the Program for Excellence in Academics and Community (PEAC), a summer residential program that helps first year students transition to the University. PEAC is an intensive and challenging academic program where students take a rigorous set of non-credit classes, learn valuable skills for academic success, are introduced to resources and opportunities on campus and in the College of Arts & Sciences, and participate in advanced enrichment and community-building activities. Continuing students interested in MASP can also apply through our MASP affiliate program.

Students receiving a participation scholarship in MASP commit to participating in a range of programming that include one-credit hour seminars on unique and advanced topics in Arts & Sciences, research colloquia where they meet and network with faculty members, skills workshops, and community conversations. Students are encouraged to participate in undergraduate research and/or other scholarly activities such as internships and study abroad programs. MASP students are also required to be involved with our community space and to

participate in community activities to help develop a strong sense of group cohesiveness and spirit. And MORE!

For more information, call the MASP office at **303-492-8229**.

Policies & Requirements

Academic Excellence

Dean's List

Students in the College of Arts and Sciences who have completed at least 12 credit hours of CU Boulder course work for a letter grade in any single semester with a term GPA of 3.75 or better are included on the dean's list and receive a notation on their transcript and a letter from the dean.

Graduation with Honors

The award of honors at graduation—cum laude, magna cum laude or summa cum laude—is determined by the Honors Program of the college and is based on several criteria, including the quality of original scholarly work. Honors are not conferred on a graduate simply by virtue of high grades. Students pursuing multiple majors or multiple degrees must complete their honors program and defend their thesis by the published deadline for the term/year in which their first major or first degree is conferred. Students intending to pursue honors must register with the Honors Program by the deadlines published on the Honors Program website. Honors requirements must be complete prior to graduation. Students "walking" in May but graduating in August must complete honors requirements, including defending the thesis, by the Honors Program deadline for May graduation. Interested students should consult the Honors Program listing in this catalog or contact the Honors Program in Norlin Library.

Graduation with Distinction

Students will graduate "With Distinction" if they have at least 30 credit hours completed at the University of Colorado Boulder and have a grade point average of 3.75 or higher for all course work completed at the University of Colorado. The average includes all grades except P.

Phi Beta Kappa

Phi Beta Kappa is the nation's oldest and most prestigious honor society. The CU Boulder chapter was established in 1904. Upper-division students whose undergraduate academic records fulfill certain requirements are eligible for election to membership in recognition of outstanding scholastic achievement in the liberal arts and sciences. Students are notified by mail of their nomination; students do not apply for Phi Beta Kappa membership.

Academic Standards

Good Academic Standing

Good academic standing in the college requires a cumulative grade point average of 2.00 (C) or above in all University of Colorado work. Grades earned at another institution are not used in calculating the grade point average at the University of Colorado (this includes courses taken at Metropolitan State University on the Denver campus). However, grades earned in another school or college within the University of Colorado system are used in determining a student's scholastic standing and progress toward the degree in the College of Arts and Sciences.

Academic Alerts

Students who complete their first semester on campus, whether they are a freshman or a new transfer student, with a grade point average that is

below 2.00 are placed on academic alert. Academic alert is a warning. Students on academic alert who earn a term grade point average of 2.00 or higher during their alert semester are allowed a second semester to achieve the required cumulative grade point average of at least a 2.00. Students who earn below a 2.00 term grade point average during their alert semester will be suspended.

Academic Probation

Continuing students whose cumulative grade point average falls below 2.00 are placed on probation. Those students who enroll in any term in the calendar year, excluding summers, after being placed on probation are expected to raise their grade point to a 2.00 or above overall by the end of that term. Neither CU-Boulder's summer session (including Maymester and Augmester) nor enrollment through Boulder evening courses counts as a probationary semester. Students are not dismissed at the end of the summer term.

Students placed on academic probation who elect to remain out of school for a full calendar year can return to the university with a two-semester window to achieve the required cumulative GPA of 2.00 or above. Students on probation who return after a hiatus of one year are placed on a second probation at the end of the semester in which they return if their cumulative grade-point average remains below 2.00 and are dismissed from the university if they do not achieve a minimum 2.00 cumulative grade-point average by the end of the semester following the imposition of the second probation.

Scholastic Suspension

Continuing students who still have a cumulative average below 2.00 after their semester of probation will be suspended and will not be able to register for University of Colorado daytime courses on any campus during any academic year, August to May. Students suspended from the college are eligible for readmission when they have achieved a cumulative 2.00 average by virtue of work done during the University of Colorado's summer term (any of the three campuses) and/or through the Division of Continuing Education and Professional Studies (Boulder evening or correspondence courses). Students who choose to enroll in continuing education courses to restore their good standing must maintain a 2.50 GPA or above in each term in continuing education or be suspended from both day classes and continuing education classes. They also may return as transfer students when they have overcome their deficiencies by enrolling at another institution (i.e., by achieving an overall 2.00 average in the University of Colorado work plus all work taken elsewhere since dismissal). These transfer grades are used only for the purpose of readmission and do not remain in the University of Colorado cumulative grade-point average. Suspended students pursuing this latter option have two semesters after readmission to bring their University of Colorado grade point average up to 2.00 or they are suspended again.

Academic Ethics

A university's intellectual reputation depends on the maintenance of the highest standards of intellectual honesty. Commitment to those standards is a responsibility of every student and faculty member at the University of Colorado. Cheating; plagiarism; illegal possession and distribution of examinations or answers to specific questions; alterations, forgery or falsification of official records; presenting someone else's work as one's own; or performing work or taking an examination for another student are examples of acts that may lead to suspension or expulsion. Reported acts of academic dishonesty must be referred to the Honor Council. The policies and procedures governing acts of academic

dishonesty can be found on the Web at honorcode.colorado.edu (<https://honorcode.colorado.edu>).

Policy on Grade Appeals

The following shall be the official policy of the academic units of the College, unless an academic unit submits an alternative procedure to the Dean for approval.

When a student believes that a grade has been improperly assigned, and discussions between the instructor and the student have not led to any resolution of the problem,

1. The student shall have the option of making a formal written appeal to the Department Chair. The appeal must specify the remedy desired by the student, and it must be submitted within 45 days of the end of the academic term in which the course was taken.
2. The Chair or designee will meet (together or separately) with the student and with the faculty member who taught the course. If the Chair/designee is unable to broker a solution mutually acceptable to both student and instructor, then
3. The Chair shall appoint an ad hoc Grade Appeals Committee, which will review the dispute. This Committee shall consist of at least three impartial faculty members competent in the subject matter of the course in question. The Chair will provide the Committee with the student's appeal and a written response from the faculty member.
4. Within 45 days, the Committee will submit a report and recommendation to the Chair, and the Chair will recommend to the instructor either (1) that the originally assigned grade stand; or (2) that a new grade be assigned.
5. In cases where a change of grade is recommended and the instructor does not wish to accept the recommendation of his/her colleagues, the Chair shall forward the written materials associated with the appeal to the Dean of the College.

Policy on Waiver of Degree Requirements

The College of Arts and Sciences does not waive degree requirements or excuse students from completing degree requirements. Petitions for exceptions to the academic policies stated here may be submitted to the Appeals Committee on Academic Rules and Policies. Such petitions will be considered only if they meet all three of the following conditions:

1. The student must document that she/he has made every effort to fulfill the policy or requirement as defined and must demonstrate that no other options exist for fulfilling the requirement as defined in this catalog.
2. The student must document that she/he is prevented from fulfilling the policy or meeting the requirement as defined here for compelling reasons beyond the student's control.
3. The student must demonstrate to the satisfaction of the faculty committee that she/he has fulfilled or will fulfill the intent of the policy or the requirement through an appropriate alternative.

Students who believe that their circumstances meet the conditions to submit a petition must first consult with their academic advisor. If the advisor offers options for meeting the requirement or policy as defined here, the student must pursue those options and should not submit a petition.

The Appeals Committee on Academic Rules and Policies is located in the Office of Academic and Curricular Affairs.

Credit and Enrollment

Transfer Credit

Work from another accredited institution of higher education that has been completed with a grade of C- (1.70) or better may be transferred to the University of Colorado. Categories of transfer course work not accepted by the university are described in the undergraduate Transfer of College-Level Credit (p. 111) section.

All courses transferred from junior and community colleges carry lower-division credit. Courses transferred from four-year institutions generally carry credits at the level at which they were taught at the previous institution, but can be subject to review on a course-by-course basis.

Colorado Student Bill of Rights

In the interests of promoting timely graduation and facilitating the transfer of students among the institutions of higher education in the state of Colorado, the College of Arts and Sciences and the University of Colorado Boulder adhere to the Student Bill of Rights as presented in Colorado Statute 23-1-125.

23-1-125. Commission directive - student bill of rights - degree requirements - implementation of core courses - competency test - prior learning

Student bill of rights. The general assembly hereby finds that students enrolled in public institutions of higher education shall have the following rights:

1. Students should be able to complete their associate of arts and associate of science degree programs in no more than sixty credit hours or their baccalaureate programs in no more than one hundred twenty credit hours unless there are additional degree requirements recognized by the commission;
2. A student can sign a two-year or four-year graduation agreement that formalizes a plan for that student to obtain a degree in two or four years, unless there are additional degree requirements recognized by the commission;
3. Students have a right to clear and concise information concerning which courses must be completed successfully to complete their degrees;
4. Students have a right to know which courses are transferable among the state public two-year and four-year institutions of higher education;
5. Students, upon completion of core general education courses, regardless of the delivery method, should have those courses satisfy the core course requirements of all Colorado public institutions of higher education;
6. Students have a right to know if courses from one or more public higher education institutions satisfy the student's degree requirements;
7. A student's credit for the completion of the core requirements and core courses shall not expire for ten years from the date of initial enrollment and shall be transferrable.

Statewide Guaranteed Transfer of General Education Courses

As of fall 2003, the two-year and four-year transfer articulation agreements among Colorado institutions of higher education were replaced by a statewide guaranteed transfer of approved general education courses taken at any Colorado public institution of higher

education. Under the statewide guaranteed transfer program, up to 31-33 credits of successfully (C- or better) completed course work will automatically transfer and apply towards graduation requirements at the receiving institution. The course work must be drawn from the list of approved guaranteed transfer courses and must meet the distribution requirements of the guaranteed transfer program. Further information about the statewide transfer program, including the list of approved courses and distribution requirements, can be found at the website of the Colorado Department of Higher Education, higher.ed.colorado.gov/Academics/Transfers/Students.html (<http://higher.ed.colorado.gov/Academics/Transfers/Students.html>).

As of fall 2006, a student graduating with an associate of arts or an associate of science degree from a Colorado community college and entering the College of Arts and Sciences is exempt from the written communication requirement and the lower-division component of the core curriculum. Note that students are still subject to the MAPS requirement. Additional information on the evaluation of transfer credit of Colorado community college course work and its application in select arts and sciences major programs can also be found at the Arts & Sciences Prospective Students (<http://www.colorado.edu/artsandsciences/student-resources/prospective-students>) webpage.

Students are required to follow the graduation requirements listed in this catalog at the time of their initial entry onto the Boulder campus.

Attendance

Successful work in the College of Arts and Sciences is dependent upon regular attendance in all classes. Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Failure to attend regularly may result in receipt of an F in a course. Students who, for illness or other legitimate reason, miss a final examination must notify the instructor or the Academic Advising Center no later than the end of the day on which the examination is given. Failure to do so may result in receipt of an F in the course.

Credit Policies

Advanced Placement Program

See Undergraduate Admission (p. 97) and the Advanced Placement Table (p. 106).

International Baccalaureate

Any student admitted to a University of Colorado campus after June 30, 2003, who has graduated from high school having successfully completed an International Baccalaureate (IB) diploma, program will be granted 24 credit hours of college credit. No tuition will be charged for these credits. These credits will be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB diploma program.

In addition, college credit is granted for International Baccalaureate examinations at the higher level with a score of 4 or better. For specific equivalencies, contact the Office of Admissions at 303-492-2458 or visit www.ibo.org (<http://www.ibo.org>).

College-Level Examination Program (CLEP)

The College of Arts and Sciences accepts a limited number of hours of CLEP credit from subject (not general) examinations toward its bachelor's degree programs (see Undergraduate Admission for subjects accepted). In addition, certain CLEP examinations may be used to meet the minimum academic preparation standards (MAPS) for admission to the university. No more than 30 total credit hours of CLEP will apply,

nor may CLEP credit be used in the final 30 credit hours presented for a degree.

CLEP tests are administered through Career Services, 303-492-5854.

Cooperative Education/Internships

Students in the College of Arts and Sciences may receive up to nine credit hours for a department-sponsored cooperative education program or internship. A maximum of six of the nine internship credits can be taken in the same department. Each internship project must be approved by the chair or associate chair of the department awarding the credit before the student enrolls in the course in order for the student to receive credit. Students are encouraged to contact their major department office or Career Services for information regarding the possibility of enrolling in a cooperative education program in their major. Many internships are graded on a pass/fail basis only. Participation in an internship with mandatory pass/fail grading does not affect the total credit hours of pass/fail a student may apply toward a degree. Some departments further restrict the use of internship credit toward meeting major requirements.

For further information on internship credit, visit advising.colorado.edu (<http://advising.colorado.edu>).

Credit/No Credit

Credit/no credit changes must occur during the schedule adjustment periods.

Credit Taken as a Nondegree Student

Once a student has been admitted to a degree program, credits from the Division of Continuing Education such as ACCESS, Boulder evening credit courses and CU Boulder correspondence classes may be eligible to be applied toward the degree. Students will receive initial advising during orientation once they have been accepted to a degree program in the College of Arts and Sciences.

Credit Taken Outside the College of Arts and Sciences

Students may apply a total of 30 credit hours from the other colleges and schools at CU Boulder as well as specified ROTC and President's Leadership Class courses toward the fulfillment of requirements for the BA and BFA degrees. Within these 30 total credit hours, up to eight credit hours in activities courses (applied music and ensembles) may be used. Transferred courses that were taught by departments considered to be outside the College of Arts and Sciences are counted as part of the allowed 30 credit hours. If a course has been approved to meet a core curriculum requirement and the course is taught outside the College of Arts and Sciences, the credit for this course will not be included as part of the 30 semester hour limitation.

Cross-Listed Courses

Courses that are cross-listed in two or more departments are credited in the department in which the student has the most credit hours, irrespective of the department in which the student formally enrolled for the course.

Foreign Language Courses

Students must receive a grade of C or better to enroll in the next level of a language sequence in Arabic, Chinese, Farsi, Hindi, Indonesian, Japanese and Korean. Students must receive a grade of C- or better to enroll in the next level of a language sequence in American Sign Language, Danish, Finnish, French, German, Greek, Hebrew, Italian, Latin, Norwegian, Portuguese, Russian, Spanish and Swedish. Students will not receive credit for a lower level course after credit has been given for a higher level course in the same sequence. For example, students who have passed

a 2000-level class will not receive credit for a 1000-level class in the same sequence. This rule applies to the following languages: American Sign Language, Arabic, Chinese, Farsi, French, German, Greek, Hebrew, Hindi, Indonesian, Italian, Japanese, Korean, Latin, Norwegian, Polish, Portuguese, Russian, Spanish and Swedish. Consult each department for specific restrictions, requirements and prerequisites.

Undergraduate introductory language courses (numbered at the 1000 and 2000 level) are designed for non-native speakers. Fluent speakers of a language are prohibited from enrolling in introductory courses in the language and can be dropped from these courses by the department or by the course instructor. Fluent speakers should consult the department website and this catalog or consult with the course instructor or department language coordinator about eligibility to enroll in upper-division language courses (numbered at the 3000 and 4000 level) before enrolling in such courses. Departments can exclude fluent speakers from upper-division language courses based on course content and/or instructional resources. Speakers who have not formally studied the language but have spoken the language in their home should consult with the associate chair of the language department or the department language coordinator about appropriate placement before enrolling in a language course.

Some classes offered by foreign language departments are taught in English and require no knowledge of foreign language. Read specific course descriptions and check with the departments.

Incomplete Grades

An I grade is given at the discretion of the course instructor only when a student has satisfactorily completed a substantial portion of a course and, for reasons beyond the student's control, is prevented from completing all work for the course within the term. Incomplete grades must be requested by the student and should not be awarded by the instructor for non-attendance. (In the case of non-attendance, the instructor should award the student the grade(s) earned.) If an incomplete grade is given, the instructor is required to document the reasons/grounds for the awarding of the incomplete grade, the specific work and conditions for completion of the course and the time frame within which the course work must be completed. The maximum time the instructor can allow for the completion of the course work and subsequent award of a course grade is one year from the end of the term the course was taken. After one year, if no final grade is awarded, the I will change to the grade of F. A copy of the Incomplete Agreement (forms are available from the dean's office) signed by the student and instructor and accompanied by documentation of the extenuating circumstances that resulted in the awarding of an incomplete should be filed with the Assistant Dean's Office and with the instructor's department office, and a copy should be given to the student.

Independent Learning

A maximum of 30 credit hours of correspondence/online learning work may count toward the degree. Arts and sciences courses offered by the CU Boulder Division of Continuing Education carry resident credit.

Independent Study

With departmental approval, students may register for independent study during the normal registration periods for each semester. Students may not register for more than 6 credit hours of independent study credit during any term. No more than 8 credit hours of independent study taken in a single department or program can be applied toward the total credit hours needed for graduation. A maximum of 16 credit

hours of independent study may count toward the degree. The minimum expectation for each hour of credit is 25 hours of work.

A student may not use independent study projects to fulfill the college's general education requirements. Some departments further restrict the use of independent study hours toward meeting major requirements.

Required Credit Hours Outside the Major

To complete the BA degree, students are required to complete a minimum of 75 credit hours outside their major department. Exceptions are:

- Students who complete designated departmental honors courses in their major and/or in honors thesis credit can reduce the 75 credit hours required outside the major department by a corresponding number of credits, up to a maximum of six.
- Students completing the bachelor of fine arts degree must complete a minimum of 53 credit hours outside of their major department.

Pass/Fail

Students in the College of Arts and Sciences may not use the pass/fail option for courses taken to fulfill general education (core) requirements, courses used to satisfy the foreign language requirement, courses used to fulfill the Minimum Academic Preparation Standards (MAPS), courses used to complete minor requirements or courses used to complete the minimum requirements for the major. A grade of F when earned in a course taken pass/fail will calculate into the GPA as a failing grade.

Students may take elective courses pass/fail, to a maximum of 6 credit hours. Courses offered only on a mandatory pass/fail basis are excluded from the maximum allowed. The pass/fail option may be used only for elective credit.

Repetition of Courses

If a student takes a course for credit more than once, all grades are calculated into the grade point average. However, the course is only counted toward graduation once, unless a course description specifically states that it can be taken more than once for credit.

ROTC Credit

The ROTC courses listed below have been certified as acceptable college-level course work by the faculty of the College of Arts and Sciences or by other colleges and schools on the Boulder campus. These courses are counted as elective credit toward the degree, subject to the 30-credit-hour limitation on course work taken outside the college for students in the BA and BFA programs. Courses not included on this list do not count toward any degree requirements. Transfer ROTC course work must be evaluated as equivalent to course work on this list to count toward degree requirements.

AIRR 3010 & AIRR 3020	Air Force Leadership Studies I and Air Force Leadership Studies II	6
AIRR 4010 & AIRR 4020	National Security Affairs/Preparation for Active Duty and National Security Forces in Contemporary American Society 2	6

NAVR 4101	Amphibious Warfare	3

Withdrawal

For specific withdrawal procedures and campus-wide policies, see the Withdrawal (p. 22) section.

Students in the College of Arts and Sciences who withdraw two semesters in a row will have a dean's stop placed on their registration. Summer session is not counted as a regular semester. They will not be permitted to return to CU Boulder before one full academic year has elapsed (not including their semester of withdrawal). Arts and sciences students may withdraw from all classes for a term until the last day that classes are taught by requesting withdrawal in the Office of the Registrar. Students cannot withdraw after classes have ended for a term.

These policies also apply to arts and sciences students who are enrolled in continuing education courses.

Readmission

Arts and sciences students who request readmission to the college are always readmitted to their major of record at the time they last attended the university. Readmitted students who desire to pursue a major different from their major of record must follow the college's process for declaring a new major (explained on the Academic Advising Center (<http://www.colorado.edu/artssciences/aacforstudents>) website) after they have been readmitted.

Requirements

Students are subject to the general degree requirements in effect at the time they first enter the Boulder campus of the University of Colorado and are subject to the major requirements in force at the time they declare the major. Arts and sciences students have 10 years to complete the requirements for a declared major. If the 10-year limit is exceeded, the student may be required to satisfy current major requirements. Students pursuing a major degree program identified for discontinuation by decision of the Board of Regents and the Colorado Commission on Higher Education have four years from the formal announcement of discontinuation to complete the degree program and graduate. The requirements, rules and policies stated here apply to all students first entering the Boulder campus during the 2014–15 academic year.

Students must complete a degree within 10 years. If it has been more than 10 years since matriculation into the College of Arts and Sciences and no degree has been completed, students may be subject to new curricula in place at the time of reenrollment. Please see the Minimum Major Requirements section for additional information on major requirements. Students may contact the Academic Advising Center for further assistance.

Academic Advising

Students in the college are expected to assume responsibility for planning their academic program in conjunction with their academic advisor in accordance with college rules and policies and with departmental major requirements. Any questions concerning these

provisions are to be directed to the student's academic advisor or to the Academic Advising Center.

The college cannot assume responsibility for problems resulting from students failing to follow the policies stated in the catalog or from incorrect advice given by someone other than an appropriate staff member of the college.

Advising

Academic advising is an integral part of undergraduate education.

Academic Advisors are professional staff members who guide students to identify, develop, pursue and attain meaningful educational and personal goals. Advising is more than the sharing of information about academic courses and programs. Students are ultimately responsible for choosing appropriate courses, for registering accurately and for meeting all degree requirements. However, academic advisors have an expertise in navigating the entire curriculum, which helps them to personalize students' academic experiences and ensure the integrity of a liberal arts education.

Center for First-Year Students

All new first-year students entering the college are advised in the Center for First-year Students, where they receive assistance in making a successful transition to the Boulder campus, are oriented to the academic expectations of the college and are supported in confirming their choice of major or in selecting an appropriate major.

In addition, through the Center for First-year Students, the Academic Advising Center provides comprehensive advising services to students who are undecided about their major or who are thinking of changing their major to another CU Boulder college or school.

Advising Beyond the First Year

All students who have confirmed their major of choice by the end of their first year are advised during their second year and beyond by professional advisors in their disciplinary area.

Preprofessional Advising Program

The advising center also provides preprofessional advising for all students who are preparing to pursue the study of law, medicine or other professional health fields. The Preprofessional Advising Program provides in-depth individual advising on preparation for these professional programs, provides workshops to prepare students for the application process and offers guidance in arranging professional internships and shadowing opportunities.

Responsibilities of Students and Advisors

Within the advising system on the Boulder campus, both students and advisors have responsibilities.

Students are responsible for:

- knowing the requirements of their particular academic program, selecting courses that meet those requirements in an appropriate time frame, registering accurately and monitoring their progress toward graduation;
- consulting with their academic advisor regularly throughout their academic career, so as to avoid seeking advising only during busy registration periods;
- being prepared for advising sessions (for example, by bringing in a list of questions or concerns, having a tentative schedule in mind and/or being prepared to discuss interests and goals with their advisor);
- knowing and adhering to published academic deadlines;

- monitoring their position on registration waitlists; and
- reading their CU email on a weekly basis.

Advisors are responsible for:

- helping students clarify their values, goals and abilities;
- helping students understand the nature and purpose of a college education;
- providing accurate information about educational options, requirements, policies and procedures;
- helping students plan educational programs consistent with the requirements of their degree program and with their goals, interests and abilities;
- assisting students in the continual monitoring and evaluation of their educational progress; and
- helping students locate and integrate the many resources of the university to meet their unique educational needs and aspirations.

Four-Year Graduation

The College of Arts and Sciences has adopted a set of guidelines to define the conditions under which a student should expect to graduate in four years. More information is available through the Academic Advising Center and major program and departmental offices.

The University of Colorado Boulder guarantees that if the scheduling of essential courses is found to have prevented a student in the College of Arts and Sciences from completing all course work necessary for a BA or BFA degree from the university by the end of the student's eighth consecutive fall and spring semester, the college will provide tuition plus any course fees for all courses required for completion of the degree requirements. Students must satisfy all the conditions described below to be eligible for this guarantee.

This guarantee extends to all students who enrolled the summer of 1994 or after into the College of Arts and Sciences as first-semester freshmen without MAPS deficiencies and who satisfy all the requirements described below. This guarantee cannot be extended to include completion of a second major, a double degree, a minor, a teaching certificate or other certificate program. Some CU Boulder study abroad programs may not provide a sufficient range of courses to allow students to meet the requirements and thus students who participate in study abroad are not included in this guarantee.

Four-Year Guarantee Requirements

1. Students should enroll in University of Colorado Boulder course work for eight consecutive fall and spring semesters.
2. No fewer than 60 credit hours of applicable course work should be completed with passing grades by the end of the second year (24 calendar months), 90 credit hours by the end of the third year (36 calendar months) and 120 credit hours by the end of the fourth year. Students should enroll in and pass an average of 15 credit hours each semester.
3. A minimum of 30 credit hours of college core-curriculum courses should be completed by the end of the second year, including college core-curriculum courses that also meet major requirements. All remaining college core-curriculum requirements must be fulfilled by the end of the eighth semester.
4. Students should complete 45 upper-division credit hours by the end of the eighth semester of study.
5. A GPA of at least 2.00 must be earned each semester.

6. Grades of C- or better in all course work required for the major should be earned, and students should have a cumulative GPA of 2.00 in all major course work attempted.
7. A recommended plan of study must be started toward the major no later than the start of the second semester of study (see note below for exceptions) and thereafter students must make adequate progress toward completing the major (defined by each major). A statement of adequate progress is available from the major or departmental office at the time the major is declared.
8. The major must be declared no later than the start of the second semester of study (see note below for exceptions), and students must remain in that major until graduation.
9. Students should meet with their assigned primary advisor each semester.
10. Students must register each semester within one week of the assigned registration time.
11. Students should avoid taking courses that are in conflict with the written advice of their assigned primary advisor.
12. Students should adhere to the General Credit and Enrollment Policies and Minimum Major Requirements listed in the Arts and Sciences section.
13. Courses in conflict with major or college core curriculum requirements should be avoided.
14. The student should apply online to graduate no later than the beginning of the seventh semester of study (see Graduation Deadlines section).
15. Documentation should be kept proving that these requirements were satisfied (e.g., records of advising meetings attended, advising records and instructions, etc.).

The recommended plan of study for the following majors must be started in the first semester of study to be eligible for this guarantee: BA in biochemistry; chemistry; ecology and evolutionary biology; Japanese; integrative physiology; molecular, cellular and developmental biology; geology; physics; and all majors that require foreign language course work when student proficiency falls below the entry-level language course of that major. Students seeking a BFA in dance or theatre must start the recommended plan of study for the corresponding BA program in the first semester of study and qualify for admission into the BFA program by the end of the third semester. Students seeking a BFA in film studies or fine arts must start the recommended plan of study for the corresponding BA program in the first semester of study and qualify for admission into the BFA program by the end of the fourth semester. If a student changes majors, the primary advisor, in consultation with the College of Arts and Sciences assistant dean's office, will review the courses taken to date to determine whether the college will continue to extend the four-year guarantee.

Graduation Requirements

Arts and sciences students must fulfill the following requirements for graduation:

1. Pass a total of 120 credit hours.
2. Maintain a 2.00 (C) grade point average in all University of Colorado work and a 2.00 (C) in all major course work attempted. (Some majors may require a higher minimum grade point average.)
3. Pass 45 credit hours of upper-division work (courses numbered in the 3000s and 4000s).
4. Arts and sciences students must complete a minimum of 45 credit hours in University of Colorado courses on the Boulder campus.

Of these 45 credit hours, a minimum of 30 credit hours must be in arts and sciences upper-division credit hours completed as a matriculated student in the College of Arts and Sciences at the University of Colorado Boulder and at least 12 of these upper-division credit hours must be in the major. A maximum of 6 credit hours taken at other University of Colorado campuses (CU Denver and UCCS) can be counted toward the minimum 45 credit hours required on the Boulder campus. Courses taken while on CU Boulder study abroad programs, through CU Boulder continuing education or CU Boulder correspondence courses are considered to be in residence.

5. For the Bachelor of Arts degree, students must complete a minimum of 75 credit hours outside their major department. Students who complete designated departmental honors courses in their major department and/or in honors thesis credit can reduce the 75 credit hours required outside the major department by a corresponding number of credits, up to a maximum of 6.
6. For the bachelor of fine arts degree, students must complete a minimum of 53 credit hours outside of their major.
7. Complete a major offered by the College of Arts and Sciences. Students are subject to the major requirements in force when they declare the major. See the sections Majors and Other Areas of Interest and Minimum Major Requirements in this section.
8. Complete the general education (college core curriculum) and MAPS requirements with the following limitations:
 - Although a single course may be listed in more than one core area, a student may use it to meet only one area requirement.
 - Neither independent study nor pass/fail courses may be used to meet MAPS-deficiencies, core requirements, minor requirements or the minimum major requirements.
 - A single course may be used to meet both MAPS and core requirements as long as the course is applicable to both requirements. For example, a student admitted with a MAPS deficiency in English composition may take WRTG 1150, to satisfy both the MAPS requirement and the core curriculum lower-division written communication requirement.

This policy only applies to college level course work (CU or accepted transfer credit). If a student is exempt from a given core area, this does not exempt the student from fulfilling a MAPS deficiency in that area. A description of the College of Arts and Sciences MAPS requirements can be found in the General Information section.

After fall 2010, the Minimum Academic Preparation Standards for mathematics for the College of Arts and Sciences is four units including two of algebra, one of geometry, and one of college preparatory math such as trigonometry, analytic geometry or elementary functions. This applies to students graduating from high school in spring 2010 and after.

If it has been more than 10 years since matriculation into the College of Arts and Sciences and no degree has been completed, students may be subject to new curricula in place at time of re-enrollment. See the Minimum Major Requirements (p. 129) section for additional information on major requirements. Students may contact the Academic Advising Center for further assistance.

Majors and Other Areas of Interest

To be eligible for the four-year guarantee, a student must begin the program of study and declare the major by the start of the second semester or earlier for some select majors. For complete information, see the Four-Year Graduation Requirements in this section.

All arts and sciences students pursuing a bachelor's degree must enter a degree-granting major by the end of their sophomore year (i.e., the semester in which they will complete 60 semester credit hours of work, including transfer work).

College academic advisors are responsible for advising students and also for certifying the completion of those students' programs for graduation. The college can assume no responsibility for difficulties arising out of a student's failure to establish and maintain contact with their assigned academic advisor.

Minimum Major Requirements

The following minimum requirements are specified by the college. In many cases departmental requirements may be higher than the minimums listed here.

1. A minimum of 30 credit hours in the major area (for the BFA, a minimum of 50 credit hours).
2. Thirty credit hours in the major area, all with grades of C- (1.70) or higher (no pass/fail credits can be applied to the major).
3. Eighteen credit hours of upper-division courses in the major, all with grades of C- (1.70) or higher.
4. Twelve credit hours of upper-division course work in the major on the CU Boulder campus.
5. A 2.00 (C) overall grade point average in all major work attempted.
6. Special requirements as stipulated by the major department.
7. No more than 8 credit hours of independent study.

Students are subject to those major requirements in effect at the time they formally declare the major. All College of Arts and Sciences students have 10 years to complete the requirements for a declared major. If this 10-year limit is exceeded, students may be required to satisfy the current major requirements. Students with further questions should consult a major advisor.

Open Option

"Open option" (OPNO) is a major designation, but it is not a degree program. Open option students are advised in the Center for First-Year Students, which offers a structured advising program that provides students with the necessary support and strategies to investigate and compare academic disciplines so they can make informed decisions about the degree programs they will pursue. Students can explore any major available in the college while completing course requirements toward a baccalaureate degree. To ensure that students graduate in a timely manner, open option majors are required to enter a specific degree program by the time they have completed 45 credit hours (approximately the end of the third semester). Students must declare and enter a degree-granting major by the start of the second semester (or earlier for certain majors) to maintain eligibility for the four-year guarantee.

Double Majors

Students pursuing either the BA or BFA degree may graduate with more than one major within the degree (e.g., economics and French) by completing all requirements for both majors. A minimum of 120 total credit hours is required for double majors within the College of Arts and Sciences.

Minors

A number of departments and programs in the College of Arts and Sciences offer minor programs. Participation in a minor program is optional for students pursuing a bachelor's degree. Course work applied

to a minor also may be applied toward general education (core curriculum or college list) and major requirements. Students may not earn a major and a minor in the same program of study. All requirements for the minor must be completed by the time the BA or BFA is conferred.

Departments and programs with approved minor programs currently include applied mathematics; astrophysical and planetary sciences; atmospheric and oceanic sciences; chemistry and biochemistry; Chinese; classics; dance; ecology and evolutionary biology; economics; English-creative writing; ethnic studies; French; geography; geological sciences; Germanic studies; history; Italian; Japanese; Jewish studies; linguistics; mathematics; Nordic studies; philosophy; physics; political science; religious studies; Russian studies; Spanish and Portuguese—Portuguese; theatre; and women's studies. Minors are also available in business, offered by the Leeds School of Business; and in computer science, offered by the College of Engineering and Applied Science. Interested students can find further information at advising.colorado.edu. (<http://advising.colorado.edu>)

Although the structure of specific minor programs may differ, all minors offered in the College of Arts and Sciences must have the following restrictions or minimum requirements:

1. A minimum of 18 credit hours must be taken in the minor area, including a minimum of 9 upper-division credit hours.
2. All course work applied to the minor must be completed with a grade of C- or better (no pass/fail work may be applied). The grade point average for all minor degree course work must be equal to 2.00 (C) or higher.
3. Students pursuing a major in distributed studies or an individually structured major are not eligible to earn a minor.
4. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.
5. Students may earn no more than two minors.
6. Students must complete all requirements for a minor by the time they graduate.

Areas of Interest

The college sponsors programs—but not undergraduate majors—in the areas of interest below. Course work in these areas is open to all interested students. Contact the Office of the Dean for more information.

- African American Studies
- American Indian Studies
- Asian American Studies
- Chicano Studies
- Honors
- International and National Voluntary Service Training
- Museum

Certificate Programs

The college also sponsors undergraduate certificate programs in a number of fields of study. Completion of specified course work in the certificate programs below entitles students to a certificate issued by the dean of the college. Students interested in these programs should contact the director of the appropriate program.

- Actuarial Studies and Quantitative Finance
- British and Irish Studies
- Central and Eastern European Studies

- Cognitive Sciences
- European Union Studies
- Foundations of Western Civilization
- Global Environmental Affairs
- Global Gender and Sexuality Studies
- International Media
- Lesbian, Gay, Bisexual and Transgender Studies
- Medieval and Early Modern Studies
- Middle Eastern and Islamic Studies
- Neurosciences and Behavior
- Peace and Conflict Studies
- Public Health
- South Asian Languages and Civilizations
- Western American Studies

Multiple Degrees

Dual Degrees

Two different degrees (i.e., a BA and BFA from the College of Arts and Sciences, or two degrees from different schools or colleges) may be earned from CU Boulder if the following conditions are fulfilled:

- The student meets the residency requirements of, and is enrolled in, both the College of Arts and Sciences and the college or school granting the second degree.
- The student completes a minimum of 145 credit hours when both degrees are offered within the College of Arts and Sciences.
- The student completes all requirements for both degrees when the degrees are offered by two different colleges.
- For the BA and BFA degrees, 90 credit hours of arts and sciences course work are required (courses from outside arts and sciences that have been approved for the arts and sciences core curriculum will apply toward the 90 credit hours).
- The student has completed all general education and major requirements of the College of Arts and Sciences.
- Both degrees must be awarded at the same time.

Second Baccalaureate Degrees

A student who has been awarded a baccalaureate degree, either from this college or elsewhere, may be granted a second baccalaureate degree provided the following conditions have been fulfilled:

1. All general requirements for the degree to be awarded by the College of Arts and Sciences have been met. (Students are subject to the general degree requirements in effect the semester they enter the second baccalaureate degree program.)
2. The major in the BA or BFA is different from the major in the first degree earned.
3. Arts and sciences students must complete a minimum of 45 credit hours in University of Colorado courses on the Boulder campus toward the second degree after admission to the second undergraduate degree program. Of these 45 credit hours, a minimum of 30 credit hours must be in arts and sciences upper-division credit hours completed as a matriculated student in the second undergraduate degree in the College of Arts and Sciences at the University of Colorado Boulder and at least 12 of these upper-division credit hours must be in the major. Courses taken as a nondegree

student or as part of a graduate degree program do not count in these minimum requirements.

Graduation Deadlines

Arts and Sciences students who have earned 80 or more credit hours and wish to walk in a commencement ceremony and/or graduate at the close of a term must submit an online application to graduate via the MyCUInfo (<https://mycuinfo.colorado.edu>) student portal, meeting all appropriate application deadlines published by the Office of the Registrar (see the Graduation & Diploma Calendar (<http://www.colorado.edu/registrar/students/academic-calendar/graduation-diploma-calendar>)). Students should also consult with their primary Arts and Sciences academic advisor.

Students who intend to complete their degree in summer (August) and want their name to appear in the spring (May) commencement program should apply online for the summer graduation term, submitting their application prior to the published spring commencement program deadline. Summer applicants who apply prior to the spring program deadline will automatically be included in the spring commencement program.

Students who apply to graduate but fail to fulfill all degree requirements by the deadline for that term/year must submit a new online graduation application for a future term/year in order for the college to confer the degree once all remaining requirements are complete. To be certified as having completed all degree and major/minor requirements, all credit hours and grades (including transfer course work and Continuing Education credit hours and grades) must be posted to the student records system by the deadline for reporting degrees for that term/year.

Core Curriculum

The mainstay of the general education requirements is the College of Arts and Sciences core curriculum. The core curriculum requirements are divided into two parts: skills acquisition and content areas of study. The following sections provide descriptions of the individual requirement areas, their underlying educational philosophies and goals and the list of approved courses. For the updated list of approved core courses, visit the college's Core Curriculum (<http://www.colorado.edu/artsandsciences/student-resources/core-curriculum>) webpage.

Exemptions

Selected majors and the ecology and evolutionary biology minor are exempt from portions of the core curriculum, as core course work is considered equivalent to course work in the major. Students who graduate with more than one exempt major may apply their exemptions cumulatively.

Skills Acquisition

These requirements are designed to assure that each student has attained a minimum level of competency in each of the areas listed: foreign language, quantitative reasoning and mathematical skills and written communication.

Although a single course may appear in several areas, students may use it to meet only one core requirement.

1. Foreign Language

All students are required to demonstrate, while in high school, third-level proficiency in a single modern or classical foreign language. Students who have not met this requirement at the time of matriculation will have a MAPS deficiency. They may make up the deficiency only by passing an

appropriate third-semester college course or by passing a CU Boulder approved proficiency examination. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of D- or higher.

Students who are under the core curriculum, but not subject to MAPS, must complete the foreign language requirement to meet degree requirements.

Questions about placement should be referred to the appropriate foreign language department.

The goal of the language requirement is to encourage students to confront the structure, formal and semantic, of another language, significant and difficult works in that language and one or more aspects of the culture lived in that language. This enables students to understand their own language and culture better, analyze texts more clearly and effectively and appreciate more vividly the dangers and limitations of using a translated document. The language requirement is a general education requirement and so concentrates on reading. In some languages other abilities may be emphasized as well. Understanding what it means to read a significant text in its original language is essential for general education according to the standards of this university.

CU Boulder courses that satisfy this requirement include the following:

ARAB 2110	Intermediate Arabic 1 ¹	5
CHIN 2110	Intermediate Chinese 1	5
DANE 2010	Intermediate Danish I - DILS	4
FINN 2010	Intermediate Finnish 1 - DILS	4
FREN 2110	Second-Year French Grammar Review and Reading 1 ¹	3
FRSI 2110	Intermediate Farsi 1 (formerly FRSI 2010)	4
GREK 3113	Intermediate Classical Greek 1 (formerly CLAS 3113)	3
GRMN 2010	Intermediate German 1 ¹	4
GRMN 2030	Intensive Intermediate German	5
HEBR 2110	Intermediate Modern Hebrew, First Semester ¹	4
HIND 2110	Intermediate Hindi 1 (formerly HNDI 2010)	5
INDO 2010	Intermediate Indonesian 1	4
ITAL 2110	Intermediate Italian Reading, Grammar, and Composition 1 ¹	3
JPNS 2110	Intermediate Japanese 1	5
KREN 2110	Intermediate Korean 1	5
LATN 2114	Intermediate Latin 1 (formerly CLASS 2114) ¹	4
NORW 2110	Second-Year Norwegian Reading and Conversation 1 ¹	4
PORT 2110	Second-Year Portuguese 1 ¹	3
RUSS 2010	Second-Year Russian 1 ¹	4
SLHS 2325	American Sign Language 3	4
SPAN 2110	Second-Year Spanish 1 ¹	3
SPAN 2150	Intensive Second-Year Spanish ¹	5
SWED 2010	Intermediate Swedish 1 - DILS ¹	4

¹ NOTE: This course is approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html (<http://higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

2. Quantitative Reasoning and Mathematical Skills (QRMS) (3–6 credit hours)

Liberal education should be able to think at a certain level of abstraction and to manipulate symbols. This requirement has two principal objectives. The first is to provide students with the analytical tools used in core curriculum courses and in their major areas of study. The second is to help students acquire the reasoning skills necessary to assess adequately the data which will confront them in their daily lives. Students completing this requirement should be able to: construct a logical argument based on the rules of inference; analyze, present and interpret numerical data; estimate orders of magnitude as well as obtain exact results when appropriate; and apply mathematical methods to solve problems in their university work and in their daily lives.

Students can fulfill the requirement by passing one of the courses or sequences of courses listed below or by passing the CU Boulder QRMS proficiency exam. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of D- or higher.

ECEN 1500	Sustainable Energy	3
ECON 1078	Mathematical Tools for Economists 1	3
ECON 1088	Mathematical Tools for Economists 2	3
MATH 1011	College Algebra	3
MATH 1012	Quantitative Reasoning and Mathematical Skills ¹	3
MATH 1071	Finite Mathematics for Social Science and Business	3
MATH 1081	Calculus for Social Science and Business	3
MATH 1110 & MATH 1120	Mathematics for Elementary Educators 1 and Mathematics for Elementary Educators 2	6
MATH 1112	Mathematical Analysis in Business	4
MATH 1130	Mathematics from the Visual Arts	3
MATH 1150	Precalculus Mathematics ¹	4
MATH 1212	Data and Models	3
MATH 2380	Mathematics for the Environment ¹	3
PHYS 1010	Physics of Everyday Life 1	3
PHYS 1020	Physics of Everyday Life 2	4
PSCI 2075	Quantitative Research Methods	3
PSCI 3105	Designing Social Inquiry: An Introduction to Analyzing Political Phenomena	3
Any 3 credits of mathematics courses numbered MATH 1300 and above or applied mathematics courses numbered APPM 1350 and above ²		3-5

¹ NOTE: This course is approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html (<http://higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

² NOTE: MATH 1300 and APPM 1350 are approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html (<http://higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

3. Written Communication (3 lower-division and 3 upper-division credit hours)

Writing is a skill fundamental to all intellectual endeavors. While some college courses require more writing than others, good writing is recognized as a necessary means of communication in every scholarly discipline. The core curriculum promotes the principle that ideas do not exist apart from language, and thus content cannot be isolated from style. For ideas to flourish, they must be expressed clearly and gracefully, so that readers take pleasure while taking instruction. Students may meet the lower-division component of this requirement by first passing one of the approved lower-division courses or by receiving a score of 4 or 5 on the English Language and Composition Advanced Placement exam. Students may then complete the upper-division component of this requirement by passing one of the approved upper-division courses or by passing the written communication proficiency exam. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of D- or higher.

Lower-Division Courses

ARSC 1080	College Writing and Research	4
ARSC 1150	Writing in Arts and Sciences ¹	3
CLAS 1020	Argument from Evidence: Critical Writing about the Ancient World	3
EBIO 1940	College Writing for Science Students	3
ENGL 1001	Freshman Writing Seminar	3
ENVS 1150	First-Year Writing in Energy, Environment and Sustainability	3
IPHY 1950	Introduction to Scientific Writing in Integrative Physiology	3
PHIL 1500	Reading, Writing and Reasoning	3
WRTG 1100	Extended First-Year Writing and Rhetoric ¹	4
WRTG 1150	First-Year Writing and Rhetoric ¹	3
WRTG 1250	Advanced First-Year Writing and Rhetoric ¹	3

¹ NOTE: This course is approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html (<http://higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

Upper-Division Courses

ARSC 3100	Multicultural Perspective and Academic Discourse	3
CHIN/JPNS 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization	3
EBIO 3940	Written Communication in the Sciences	3
ENVS 3020	Advanced Writing in Environmental Studies	3
GEOL 3090	Developing Scientific Writing Skills	3
HIST 3020	Historical Thinking & Writing	3
HONR 3220	Advanced Honors Writing Workshop ¹	3

IPHY 3700	Scientific Writing in Integrative Physiology	3
ITAL 3025	Advanced Composition 2: Introduction to Literary Writing	3
PHIL 3480	Critical Thinking/Writing in Philosophy	3
PHYS 3050	Writing in Physics: Problem-Solving and Rhetoric ¹	3
RLST 3020	Advanced Writing in Religious Studies	3
SOCY 4010	Sociology Capstone Course: Professional Writing	3
SPAN 3010	Advanced Rhetoric and Composition	3

Content Areas of Study

4. Historical Context (3 credit hours)

Courses that fulfill this requirement enable students to study historical problems or issues and to develop an understanding of earlier ideas, institutions and cultures.

Courses explore the times and circumstances in which social, intellectual, artistic or other developments occurred. The purpose of this exploration is to analyze subjects in their context, that is, to investigate both the processes and the meanings of change. Among the educational aims of these courses are the following: to contribute to historical perspectives that may help to clarify issues that arise today or will arise tomorrow, to arouse the curiosity of students concerning historical conditions that may be relevant to subjects studied in other courses and to expand the imagination by generating an awareness of the diverse ways in which our common humanity has expressed itself.

Students may choose to meet this 3-credit-hour requirement by passing any course listed below. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of *D-* or higher.

ANTH 1180	Maritime People: Fishers and Seafarers	3
ANTH 1190	Origins of Ancient Civilizations	3
ANTH 2200	The Archaeology of Human History	3
ANTH/CLAS 3009	Modern Issues, Ancient Times	3
ARAB 3230	Islamic Culture and the Iberian Peninsula	3
ARTH/CLAS 1509	Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World	4
ARTH/CLAS 3019	Pompeii and the Cities of Vesuvius	3
CEES/HIST 1626	Introduction to Central and East European History since 1770 ¹	3
CLAS 1030/ PHIL 1010	Introduction to Western Philosophy: Ancient ¹	3
CLAS/HIST 1051	The World of the Ancient Greeks ¹	3

CLAS/HIST 1061	The Rise and Fall of Ancient Rome ¹	3
CLAS 1140	Bread and Circuses: Society and Culture in the Roman World ¹	3

5. Human Diversity (3 credit hours)

Courses fulfilling this requirement increase the student's understanding of the world's diversity and pluralism through the study of two broad and interrelated areas: (1) the nature and meaning of diversity and the experience of marginalized groups; and (2) cultures other than those of Europe and the United States. This requirement explicitly identifies an awareness and understanding of pluralism as essential to a liberal education.

- Gender, Ethnic and Social Diversity.** Courses in this area are designed to expand the range of each student's understanding of the experience of individuals and groups who, because of such fundamental components of identity as race, ethnicity, gender or other characteristics, have been historically marginalized by society and placed outside of the mainstream. Generally courses will explore the ways in which marginalization has occurred and the reasons for this marginalization. The intent is to expand understanding of these social groups with the goal of identifying the way social categories shape human thought and experience.
- Non-Western Cultures.** These courses are designed to expand the range of the student's understanding of cultures that are not derived principally from the western experience. A comparative perspective introduces students to the commonality and diversity of cultural responses to universal human problems. Each course seeks to cultivate insight into and respect for diversity by requiring students to explore a cultural world quite different from their own.

Courses satisfying this requirement are intended to portray culture in the most integrated sense, including aspects of material adaptation, social pattern, ideas and values and aesthetic achievement.

Students are required to pass 3 credit hours of course work from any course listed below. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of D- or higher. Students who graduate with a major in ethnic studies are exempt from completing the human diversity requirement.

ETHN 2536	Survey of Chicana/o History and Culture (formerly CHST 2537/HIST 2537)	3	LGBT 2000/ WGST 2030	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies ¹	3

Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html (<http://higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

6. United States Context (3 credit hours)

Courses fulfilling the United States Context requirement explore important aspects of culture and society in the United States. They stimulate critical thinking and an awareness of the place of the United States in the world by promoting an understanding of the world views that the environment, culture, history and values of the United States have fostered. They are required to include some discussion of the realities and issues related to matters of ethnic and racial diversity that

characterize the nation's ongoing experience. These courses familiarize students with the United States and enable them to evaluate it critically.

These courses teach an appreciation of United States culture while inviting students to ask probing questions about values and ideals that are understood to be an integral part of the United States. Some of the questions that might be addressed in these courses are: How have citizens and other residents of the United States derived a sense of identity from geography, language, politics and the arts? How do people in the United States view and influence the world beyond the nation's borders? How have the rights and responsibilities of citizenship changed over time? How have U.S. citizens and residents in the United States dealt with opposing values? Completing this requirement, students will develop both a better understanding of the United States, present and past, and a considerable interest in the nation's future.

This 3-credit-hour requirement may be fulfilled by passing any course listed below. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of *D-* or higher.

ANTH 3170	America: An Anthropological Perspective	3

¹ NOTE: This course is approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html (<http://higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

7. Literature and the Arts (6 credit hours, 3 of which must be upper-division)

These courses promote a better understanding of fundamental aesthetic and cultural issues. They sharpen critical and analytical abilities so that students may develop a deeper appreciation of works of art. The goal of this requirement is to enhance the student's ability to read critically, to understand the elements of art and to grasp something of the complex relations between artist and public, and between art work and cultural matrix. The emphasis in courses which fulfill this requirement is on works that are generally recognized as central to and significant for one's cultural literacy and thereby enhance the student's understanding of our literary and artistic heritage.

Courses stress literary works as well as the history and criticism of literature and the arts. They may utilize creative projects as a means of arriving at a better understanding of the art form, but students may not use studio or performance classes to satisfy this requirement.

Students are required to pass 6 credit hours of course work in literature and the arts, of which at least 3 credit hours must be upper-division. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of *D-* or higher.

If students graduate with a major dealing in depth with literature and the arts (Chinese, classics, dance, English, fine arts, French, Germanic studies, humanities, Italian, Japanese, Portuguese, Russian, Spanish or theatre), they are exempt from this requirement.

Courses offered at CU Boulder that satisfy this requirement include the following:

Lower-division Courses

ARAB 2231	Love, Loss and Longing in Classical Arabic Literature	3
ARTH 1300	History of World Art 1 ¹	3
ARTH 1400	History of World Art 2 ¹	3
ARTH/CLAS 1509	Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World	4
ARTH/CLAS 2039	Greek Art and Archaeology	3
ARTH/CLAS 2049	Introduction to Roman Art and Architecture	3
ARTH 1709	Freshmen Seminar: Critical Introduction to Art History	3
ARTH 2409	Intro to Asian Art ¹	3

¹ NOTE: This course is approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html (<http://higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

Upper-division Courses

ARAB 3231	In the Footsteps of Travelers: Travel Writing in Arabic Lit	3
ARAB 3241	Art in Islamic Cultures	3
ARTH 4329	Modern Art 1	3
CHIN/HUMN 3341	Literature and Popular Culture in Modern China	3
CHIN 3351	Reality and Dream in Traditional Chinese Literature	3
CLAS/HUMN 4110	Greek and Roman Epic	3
CLAS/HUMN 4120	Greek and Roman Tragedy	3
CLAS/HUMN 4130	Greek and Roman Comedy	3
DNCE 4017	Dancing Histories: Sex, Gender and Race in U.S. Concert Dance	3
DNCE 4037	Contemporary Concert Dance: Shifting Perspectives in Performance (formerly DNCE 3027)	3
ENGL 3000	Shakespeare for Nonmajors	3
ENGL 3060	Modern and Contemporary Literature for Nonmajors	3
ENGL 3300	Literary London	3
FILM/RUSS 3211	History of Russian Cinema	3
FILM 3402	European Film and Culture	3
FILM/HUMN 3660	The Postmodern	3
FILM/HUMN 4135	Art and Psychoanalysis	3
FREN 3200	Introduction to Literary Theory and Advanced Critical Analysis	3
FREN 4300	Theatre and Modernity in 17th Century France	3
GRMN 3502	Literature in the Age of Goethe	3

GRMN/HUMN 3702	Dada and Surrealist Literature	3	Through a combination of lecture courses and laboratory or field experiences, students gain hands-on experience with scientific research.
GRMN/HUMN 3802	Politics and Culture in Berlin 1900-1933	3	They develop observational skills of measurement and data interpretation and learn the relevance of these skills to the formation and testing of scientific hypotheses.
GRMN/HUMN 4504	Goethe's Faust	3	
HEBR/JWST 4203	Israeli Literature: Exile, Nation, Home	3	The goal of this requirement is to enable students to understand the current state of knowledge in at least one scientific discipline, with specific reference to important past discoveries and the directions of current development; to gain experience in scientific observation and measurement, in organizing and quantifying results, in drawing conclusions from data and in understanding the uncertainties and limitations of the results; and to acquire sufficient general scientific vocabulary and methodology to find additional information about scientific issues, to evaluate it critically and to make informed decisions.
HEBR/JWST 4301	Venice: The Cradle of European Jewish Culture	3	
HIND 3851	Devotional Literature in South Asia	3	
HUMN 4170	Fiction and Reality: Literature, Science, and Culture	3	
HUMN/ITAL 4140	The Age of Dante: Readings from The Divine Comedy	3	
HUMN/ITAL 4150	Boccaccio's Decameron: Tales of Sex and Death in the Middle Ages	3	The natural science requirement, which consists of passing 13 credit hours of approved natural science course work, includes one two-semester sequence of courses and at least 1 credit hour of an associated lab or field experience. No more than two lower-division courses may be taken from any single department (1-credit-hour lab/field experience courses are excepted). To fulfill the natural science core requirement the lab/field experience courses must be affiliated with a natural science lecture course. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of <i>D-</i> or higher.
HUMN/RUSS 4811	19th Century Russian Literature	3	
HUMN/RUSS 4821	20th Century Russian Literature and Art	3	
ITAL 4145	The Age of Dante in Italian	3	
ITAL 4147	Visualizing Dante's Inferno: A Global Seminar in Florence Italy	3	
ITAL 4600	Once Upon a Time in Italy	3	
JPNS 3881	Environment, Nature and Disaster in Japanese Literature and Culture	3	Students who graduate with a major in the natural sciences (astrophysical and planetary sciences, biochemistry, chemistry, ecology and evolutionary biology, geology, integrative physiology, molecular, cellular and developmental biology or physics) or students who graduate with a minor in ecology and evolutionary biology are exempt from completing the natural science requirement.
JWST/RUSS 4401	The Russian Jewish Experience	3	
MUEL 3822	Words and Music	3	
MUEL 3832	Music in Literature	3	
RUSS 3241	Red Star Trek: Russian Science Fiction Between Utopia and Dystopia	3	Courses offered at CU Boulder that satisfy this requirement include the following:
RUSS 4831	Contemporary Russian Literature	3	
SCAN 3202	Old Norse Mythology	3	
SCAN 3203	19th & 20th Century Nordic Literature	3	
SCAN 3204	Medieval Icelandic Sagas	3	
SCAN 3205	Scandinavian Folk Narrative	3	
SCAN 3506	Scandinavian Drama	3	
SPAN 3260	Late 19th and 20th Century Argentine Narrative	3	
SPAN 3700	Selected Readings: Spanish Literature in Translation	3	
SPAN 3800	Selected Readings: Latin American Literature in Translation	3	
THTR 3011	American Musical Theatre History	3	

8. Natural Science (13 credit hours, including a two-course sequence and a laboratory or field experience)

These courses study the nature of matter, life and the universe. They enhance literacy and knowledge of one or more scientific disciplines, and enhance those reasoning and observing skills that are necessary to evaluate issues with scientific content. Courses are designed to demonstrate that science is not a static list of facts, but a dynamic process that leads to knowledge. This process is one of subtle interplay between observation, experimentation and theory, enabling students to develop a critical view toward the conclusions and interpretations obtained through the scientific process.

Two-semester Sequences

(Note: Although not recommended, the first semester of a sequence may be taken as a single course. Also, some sequences have included, corequisite or optional laboratories.)

- ANTH 2010¹ and ANTH 2020¹ (optional labs ANTH 2030¹, ANTH 2040¹)
- ASTR 1000 and ASTR 1020 (sequence does not include a lab)
- ASTR 1010 and ASTR 1020 (lab included in ASTR 1010)
- ASTR 1030¹ and ASTR 1040¹ (lab included in ASTR 1030)
- ATOC 1050¹ and ATOC 1060 (optional lab ATOC 1070¹)
- CHEM 1011¹ and CHEM 1031 (lab included in CHEM 1031)
- CHEM 1113 and CHEM 1133 (corequisite labs CHEM 1114 and CHEM 1134)
- CHEM 1400 and CHEM 2100 (corequisite labs CHEM 1401 and CHEM 2101)
- EBIO 1030 and EBIO 1040 (optional lab EBIO 1050)
- EBIO 1210¹ and EBIO 1220¹ (optional labs EBIO 1230, EBIO 1240)
- GEOG 1001¹ and GEOG 1011¹ (lab included)
- GEOL 1010¹ and GEOL 1020¹ (optional lab GEOL 1030¹)
- GEOL 1010¹ and GEOL 1040 (optional lab GEOL 1030¹)
- GEOL 1010¹ and GEOL 1060 (optional lab GEOL 1030¹)
- MCDB 1030¹ and MCDB 1041¹ (corequisite lab MCDB 1043)

- MCDB 1150¹ and MCDB 2150¹ (optional labs MCDB 1151¹, MCDB 2151¹)
- PHYS 1010¹ and PHYS 1020¹ (lab included in PHYS 1020)
- PHYS 1110¹ and PHYS 1120¹ (optional lab PHYS 1140¹)
- PHYS 2010¹ and PHYS 2020¹ (lab included)

¹ NOTE: This course is approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, <http://highered.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>. (<http://highered.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>)

Nonsequence Courses

ANTH 3000	Primate Behavior	3
ANTH 3010	The Human Animal	3
AREN 2110	Thermodynamics	3
ASTR 1200	Stars and Galaxies (formerly ASTR 1120)	3
ASTR 2000	Ancient Astronomies of the World	3
ASTR 2010	Modern Cosmology-Origin and Structure of the Universe	3
ASTR 2020	Space Astronomy and Exploration	3
ASTR 2030	Black Holes	3
ASTR/GEOL 2040	The Search for Life in the Universe	3

ATOC 4550	Mountain Meteorology	3
ATOC 4700	Weather Analysis & Forecasting	3
ATOC 4750	Desert Meteorology and Climate	3
ATOC 4770	Wind Energy Meteorology	3
CHEM 1021	Introductory Chemistry (lab included) ¹	4
CHEM 1400	Foundations of Chemistry	4
EBIO 3180	Global Ecology	3
ENVS 1000	Introduction to Environmental Studies	4
ENVS/PHYS 3070	Energy and the Environment	3
ENVS/GEOL 3520	Energy and Climate Change: An Interdisciplinary Approach	3
GEOG 3511	Introduction to Hydrology	4
GEOG/GEOL 4241	Principles of Geomorphology (lab included)	4
GEOL 2100	Environmental Geology	3
GEOL 3040	Global Change: The Recent Geological Record	3
GEOL 3720	Evolution of Life: The Geological Record	3
GEOL 3950	Natural Catastrophes and Geologic Hazards	3
IPHY 2420	Nutrition for Health and Performance	3
IPHY 3660	Dynamics of Motor Learning	3
MCDB 3150	Biology of the Cancer Cell	3

MCDB 3330	Evolution and Creationism	3
PHIL 1400	Philosophy and the Sciences ¹	3
PHIL 3410	History of Science: Ancients to Newton	3
PHIL 3430	History of Science: Newton to Einstein	3
PHYS 1230	Light and Color for Nonscientists	3
PHYS 1240	Sound and Music ¹	3
PSYC 2012	Biological Psychology ¹	3
PHYS/EDUC 1580	Energy and Interactions	3
SLHS 2010	Science of Human Communication	3

One-credit-hour Lab/Field Courses

(NOTE: Each course below has a prerequisite or corequisite.)

ANTH 2030	Laboratory in Biological Anthropology 1 ¹	1
ANTH 2040	Laboratory in Biological Anthropology 2 ¹	1
ATOC 1070	Weather and the Atmosphere Laboratory ¹	1
CHEM 1114	Laboratory in General Chemistry 1	1
CHEM 1134	Laboratory in General Chemistry 2	1
CHEM 1401	Foundations of Chemistry Lab	1
EBIO 1050	Biology: A Human Approach Laboratory	1
EBIO 1230	General Biology Laboratory 1	1
EBIO 1240	General Biology Laboratory 2	1
GEOL 1030	Introduction to Geology Laboratory 1 ¹	1
MCDB 1043	Exploring Genetics Laboratory	1
MCDB 1151	Introduction to Cell and Molecular Biology Lab ¹	1
MCDB 2151	Principles of Genetics Laboratory ¹	1
PHYS 1140	Experimental Physics 1 ¹	1

¹ NOTE: This course is approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, <http://highered.colorado.gov/Academics/Transfers/gtPathways/curriculum.html> (<http://highered.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

9. Contemporary Societies (3 credit hours)

All individuals function within social frameworks. Courses in contemporary societies introduce students to the study of social groups, including social institutions and processes, the values and beliefs shared by their members and the forces that mold and shape social groups.

They prepare students to approach social phenomena of all kinds in an informed and critical way, and to describe, analyze, compare and contrast them. Such study also provides students with new vantage points from which to view their own sociocultural assumptions and traditions.

These courses, which treat contemporary societies, study an individual society or compare several societies. All explicitly attempt to deepen the students' understanding of the cultural, political, economic or social contexts that shape people's lives. Their scope may be global or specific, but all courses that fulfill this requirement address social processes, institutions, values, forces and beliefs.

Students who graduate with a major in anthropology, economics, international affairs, political science, psychology or sociology are exempt from the contemporary societies requirement. Students may satisfy this 3-credit-hour requirement by passing any course listed below. Students who take approved CU Boulder course work to fulfill this

requirement must take the course for a letter grade and receive a passing grade of *D-* or higher.

ANTH 1200	Culture and Power	3
BAKR 1600	Creating a Sustainable Future	3
COMM 1210	Perspectives on Human Communication	3

¹ NOTE: This course is approved for the Colorado statewide guaranteed transfer program. Further information about the statewide guaranteed transfer program can be found at the website of the Colorado Commission on Higher Education, higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html (<http://higher.ed.colorado.gov/Academics/Transfers/gtPathways/curriculum.html>).

10. Ideals and Values (3 credit hours)

Ideals and values have usually been determined by long-standing traditions and fixed social practices. In our modern world, the interaction of different cultures, movement from place to place, electronic media and the rapidity of change, even within a given society, have combined to generate new constellations of ideals and hard choices among values.

Courses meeting the ideals and values requirement inquire into some specific sphere of human value (e.g. moral, religious, intellectual, aesthetic, environmental, etc.). In these courses students are encouraged to reflect upon fundamental ideals and values, their own and others, and the sources from which those value orientations derive. Such inquiry demands the development of the critical skills which help students identifying the assumptions and ramifications of value structures. It also requires consideration of approaches by which value systems are constructed, justified and applied, especially in regard to personal, societal and in some cases cross-cultural contexts.

Students may complete this 3-credit-hour requirement by passing any course listed below. Students who take approved CU Boulder course work to fulfill this requirement must take the course for a letter grade and receive a passing grade of *D-* or higher.

ARSC/NRLN 2000	Ways of Knowing: Constructions of Knowledge in the Academy and Beyond	3
CLAS/RLST 2610	Paganism to Christianity	3

Arts & Sciences

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new information is acquired and can participate in original research and creative work with individual faculty members.

The college offers a wide variety of fields of study, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

As the liberal arts college of CU Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with-and lead-the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems and speak and write effectively.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The core curriculum and breadth requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends and co-workers.

The college is also dedicated to outstanding graduate education. Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years.

Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

Honors Program

The Arts and Sciences Honors Program provides a community for highly motivated and academically prepared undergraduate students and offers opportunities for intellectual engagement through honors courses, academic-inspired events, and honors thesis research and creative work.

The Honors Program is a program of excellence in which the best teaching faculty are committed to serving the most highly motivated students. The Honors Program offers the opportunity to work closely with faculty, to engage with other honors students (<http://www.colorado.edu/honors/community>) and to write an honors thesis. Honors offers over 50 courses per year (<http://www.colorado.edu/honors/courses>) in a wide variety of areas. Honors courses are limited to an enrollment of approximately 15 students.

Incoming first-year students are invited to participate (<http://www.colorado.edu/honors/admission>) in the Honors Program based on multiple criteria that are set by the Office of Admissions. Transfer students must have a 3.3 GPA or better from their previous school. Currently enrolled students are eligible based on their academic achievement at CU Boulder and are expected to have a 3.3 GPA or better.

Latin honors (<http://www.colorado.edu/honors/graduation>) in the College of Arts and Sciences are conferred by the Honors Program. Students who wish to graduate *cum laude*, *magna cum laude* or *summa cum laude* must write and defend an honors thesis and maintain a certain GPA. Most students pursue Latin honors in their major (based on departmental requirements), but students may also pursue General Honors (<http://www.colorado.edu/honors/generalhonors>) via the Honors Program, providing students the opportunity to write an interdisciplinary thesis.

The Honors Residential Academic Program (Honors RAP (<http://www.colorado.edu/hrap>)) is the optional residential component of the program. Honors RAP is open to a limited number of qualified incoming and continuing students. Students engage in small classes and co-curricular activities, forming an academic community in their residence hall.

Faculty

Hickcox, Abby Lynn (https://experts.colorado.edu/display/fisid_151860)
Instructor; PhD, University of Colorado Boulder

Jacobs, Janet L (https://experts.colorado.edu/display/fisid_100744)
PhD, University of Colorado Boulder

Jones, Daniel C L. (https://experts.colorado.edu/display/fisid_105705)
Senior Instructor; PhD, University of Colorado Boulder

Kopff, E Christian (https://experts.colorado.edu/display/fisid_100649)
Associate Professor; PhD, University of North Carolina Chapel Hill

Strom, Paul (https://experts.colorado.edu/display/fisid_106128)
Senior Instructor; PhD, University of Denver

The Miramontes Arts and Sciences Program (MASP) is a community of diverse scholars dedicated to academic achievement. MASP accepts highly motivated students with strong academic records who are also members of traditionally underrepresented groups and/or are first-generation college students. MASP supports students through mentoring, instruction, skills workshops, enrichment opportunities, community activities, and participation scholarships.

For most members of MASP, support begins the summer before freshman year with the Program for Excellence in Academics and Community (PEAC), a summer residential program that helps first year students transition to the University. PEAC is an intensive and challenging academic program where students take a rigorous set of non-credit classes, learn valuable skills for academic success, are introduced to resources and opportunities on campus and in the College of Arts & Sciences, and participate in advanced enrichment and community-building activities. Continuing students interested in MASP can also apply through our MASP affiliate program.

Students receiving a participation scholarship in MASP commit to participating in a range of programming that include one-credit hour seminars on unique and advanced topics in Arts & Sciences, research colloquia where they meet and network with faculty members, skills workshops, and community conversations. Students are encouraged to participate in undergraduate research and/or other scholarly activities such as internships and study abroad programs. MASP students are also required to be involved with our community space and to participate in community activities to help develop a strong sense of group cohesiveness and spirit. And MORE!

For more information, call the MASP office at **303-492-8229**.

Actuarial Studies and Quantitative Finance

The Actuarial Studies and Quantitative Finance Certificate Program is an interdisciplinary undergraduate certificate program housed in the College of Arts and Sciences Departments of Mathematics, Applied Mathematics and Economics; and the Leeds School of Business, that is designed to provide the foundation for a lifetime of analytical problem solving. The Program appeals to accomplished students who enjoy solving analytic problems as applied in their career of choice. Students with these skills and interests are in high demand in the business world which becomes more analytical and mathematical every year. In addition, successful candidates will be well-prepared for further study at the graduate level.

Certificate

- Actuarial Studies and Quantitative Finance - Certificate (p. 143)

Actuarial Studies and Quantitative Finance - Certificate

The Actuarial Studies and Quantitative Finance Certificate Program offers two tracks:

- Actuarial Studies Track
- Quantitative Finance Track

Actuarial Studies Track

The actuarial studies track, offered by the College of Arts and Sciences, is designed to help students obtain the expertise in mathematics, economics and finance necessary to become actuaries—the mathematical planners of the insurance and pension industries.

Students in the program can be of any major or college, or can be classified as nondegree. The entrance requirement is three semesters of calculus completed with grades of B+ or better. There are a number of courses in mathematics, economics and business required to earn the certificate. The certificate is awarded by the dean of the College of Arts and Sciences.

Besides taking courses, students are encouraged to take the professional exams offered by the various actuarial societies. The entrance requirements can be waived for students who pass the first actuarial examination.

Interested students should contact one of the co-directors: David Grant at 303-492-7208 or Anne Dougherty at 303-492-4011, who will also provide advice on actuarial studies to students who are not in the program. For more information, visit the Actuarial Studies and Quantitative Finance Certificate Program (<http://www.colorado.edu/asqf>) webpage.

Quantitative Finance Track

The quantitative finance track, offered jointly by the College of Arts and Sciences and the Leeds School of Business, was initiated in the fall of 2004 and is designed to prepare students for financial and economics analyst positions that require outstanding quantitative skills. Often employers hire graduate students for such positions due to a shortage of undergraduates with the required combination of skills and training. This program is designed to meet this need.

The required curriculum is extensive and rigorous. Potential participants are encouraged to begin work early in their studies, preferably during the first year. Course work draws from the Departments of Mathematics, Applied Mathematics and Economics; and the Leeds School of Business. Qualified students enrolled in any college are invited to participate.

For admittance to the program, a student must earn a GPA of 2.87 or higher in Calculus I through III. However, students may be provisionally admitted after completion of Calculus I (MATH 1300 or APPM 1350) with a grade of B or better or through advanced placement. Additional GPA requirements must be met to earn the certificate. Participants may be given preference when enrolling in certain courses in the Leeds School of Business.

Interested students should contact Daniel Brown, Leeds School of Business, at daniel.brown@colorado.edu. For more information, visit the Actuarial Studies and Quantitative Finance Certificate Program (<http://www.colorado.edu/asqf>) webpage.

Requirements

Curricula are rigorous and multi-disciplinary, with required course work drawing from the Mathematics, Applied Mathematics, and the Economics Department, as well as the Finance Division of the Leeds School of Business. The confluence of such widely varying material is one of the unique features of the program. Successful completion of the program requirements is a significant accomplishment.

Actuarial Studies Track

The courses listed below are the minimum required in order to complete the Actuarial Studies track of our program. You must score a C- or better in all courses (VEE courses need B- or better for VEE credit).

Required Courses and Semester Credit Hours

Required Mathematics Courses

MATH 1300	Calculus 1	4-5
or APPM 1350	Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
or APPM 1360	Calculus 2 for Engineers	
MATH 2400	Calculus 3	4
or APPM 2350	Calculus 3 for Engineers	
MATH 2130	Introduction to Linear Algebra for Non-Mathematics Majors	3
or APPM 3310	Matrix Methods and Applications	
MATH 4510	Introduction to Probability Theory	3
or APPM 3570	Applied Probability	
MATH/APPM 4520	Introduction to Mathematical Statistics	3
MATH/APPM 4540	Introduction to Time Series	3

Required Economics Course

ECON 3070	Intermediate Microeconomic Theory	4
ECON 3080	Intermediate Macroeconomic Theory	3
ECON 4070	Topics in Microeconomics	3

Required Finance/Accounting Courses

BCOR 2002	Principles of Accounting and Finance	3
FNCE 3010	Corporate Finance	3

Additional Recommended Courses

APPM 4560	Markov Processes, Queues, and Monte Carlo Simulations	3
APPM 4570	Statistical Methods	3
APPM 4580	Introduction to Statistical Learning	3
ECON 3818	Introduction to Statistics with Computer Applications	4
ECON 4818	Introduction to Econometrics	3
FNCE 3030	Investment and Portfolio Management	3
FNCE 4040	Derivative Securities	3
MATH/APPM 4120	Introduction to Operations Research	3
MATH/APPM 4650	Intermediate Numerical Analysis 1	3

Quantitative Finance Track

Program requirements are extensive and challenging. Students must meet two separate GPA requirements:

1. The overall GPA for all courses applied to certificate requirements must be at least 3.00.
2. Students must meet a requirement specifically for mathematics and statistics courses applied to certificate requirements. This requirement can be met one of two ways, either by achieving a GPA of 2.87 or greater in calculus courses or a GPA of 3.00 or greater in the six mathematics and statistics courses required for the certificate.

Most students will begin study during their freshman year and continue throughout their undergraduate career. The number of credit hours taken may vary according to the specific courses completed.

The courses listed below are the minimum required in order to complete the Quantitative Finance track of our program. Please note that students must pass Calculus I, II, and III with a B grade or better in order to be admitted into the program. Students are encouraged to go beyond the minimum requirements, and most students do.

Required Courses and Semester Credit Hours

Required Mathematics Courses

MATH 1300	Calculus 1	5-4
or APPM 1350	Calculus 1 for Engineers	
MATH 2300	Calculus 2	5-4
or APPM 1360	Calculus 2 for Engineers	
MATH 2400	Calculus 3	4
or APPM 2350	Calculus 3 for Engineers	
MATH 2130	Introduction to Linear Algebra for Non-Mathematics Majors	3
or APPM 3310	Matrix Methods and Applications	
MATH 4510	Introduction to Probability Theory	3
or APPM 3570	Applied Probability	
MATH/APPM 4520	Introduction to Mathematical Statistics	3

Required Economics Course

ECON 2010	Principles of Microeconomics	4
ECON 2020	Principles of Macroeconomics	4
ECON 3070	Intermediate Microeconomic Theory	4
ECON 4818	Introduction to Econometrics	3

Required Finance/Accounting Courses

ACCT 3220	Corporate Financial Reporting 1	3
BCOR 2000	Accounting and Financial Analysis	4
BCOR 2200	Introductory Finance	3
FNCE 3010	Corporate Finance	3
FNCE 3030	Investment and Portfolio Management	3
FNCE 4040	Derivative Securities	3
FNCE 4820	Topics in Finance	3

Additional Recommended Courses (Choose One)

ACCT 3230	Corporate Financial Reporting 2	3-4
APPM 2360	Introduction to Differential Equations with Linear Algebra	
APPM 2750	Java: Training, Mathematical Algorithms, and Mobile Apps	
APPM 4560	Markov Processes, Queues, and Monte Carlo Simulations	
CSCI 1300	Computer Science 1: Starting Computing	
FNCE 4830	Seminar in Investment Banking	

FNCE 4820	Topics in Finance
FNCE 4050	Capital Investment Analysis
MATH/APPM 4540	Introduction to Time Series
Total Credit Hours	63-62

For a complete list of requirements and further information regarding the quantitative finance track and the related actuarial studies track, see the Actuarial Studies Program website. Interested students should contact Daniel Brown, daniel.brown@colorado.edu (Daniel.Brown@colorado.edu), Leeds School of Business.

Anthropology

Anthropology is the study of people, both ancient and modern, in their cultural, biological, and environmental contexts. The discipline incorporates a wide range of theoretical and methodological traditions, drawing on and contributing to approaches in the humanities, social sciences, and natural sciences. We assert that the diversity of anthropology is the source of both its uniqueness and its greatest strength as a discipline. As the only field to address all aspects of the human experience – cultural, biological, historical – anthropology provides both a broad vision of what it is to be human as well as creative synergies unavailable to other disciplines within the human sciences and humanities. We view the subdisciplines of cultural anthropology, archaeology, and biological anthropology as important foundations of our program because of their well-defined fields of study. Yet we also believe that recent trends in anthropological thought offer creative new directions that cut across and bridge the subdisciplines.

We see our long-term vision as a department coalescing around the theme of local/global dynamics; that is, the relationship between the small-scale of the lives of our subjects of study as cultural and biological beings, and the large-scale patterns of society and history. While addressed from different theoretical orientations and methodologies, all anthropologists struggle with the problem of understanding the relationship of the local to the global. We have identified four perspectives that address local/global dynamics in ways that cut across the subdisciplines: ecology and evolution, power and practice, globalization, and landscape and space. These intellectual bridges will create powerful new collaborations within the department and with other programs that will advance our research and teaching missions as well as create a more integrated departmental vision.

Course code for this program is ANTH.

Bachelor's Degree

- Anthropology - Bachelor of Arts (BA) (p. 152)

Minor

- Anthropology - Minor (p. 152)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bamforth, Douglas (https://experts.colorado.edu/display/fisid_101027)

ANTH 1030 (3) Principles of Anthropology 1

Evolution of humanity and culture from beginnings through early metal ages. Covers human evolution, race, prehistory, and rise of early civilizations. This course is taught through Continuing Education.

Additional Information: MAPS Course: Social Science

ANTH 1040 (3) Principles of Anthropology 2

Surveys the world's major culture areas. Covers components of culture, such as subsistence, social organization, religion, and language. This course is taught through Continuing Education.

Additional Information: MAPS Course: Social Science

ANTH 1100 (3) Exploring a Non-Western Culture: The Tamils

Surveys the social and economic patterns, ideas and values, and aesthetic achievements of the Tamils, a Hindu people who live in South India and Sri Lanka.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Asia Content

ANTH 1105 (3) Exploring a Non-Western Culture: Tibet

Introduction to Tibetan culture, history, religion, and society from an anthropological perspective, including traditional as well as contemporary dimensions. Topics will include Tibetan Buddhism, politics, nomadism, gender, refugee issues, and the global Tibetan diaspora, all framed within the larger methods and concepts of cultural anthropology.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Asia Content

ANTH 1115 (3) The Caribbean in Post-Colonial Perspective

Introduces the student to the varied peoples and cultures in the Caribbean region, emphasizing the historical, colonial, and contemporary political-economic contexts of their social structure and cultural patterns.

Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1120 (3) Exploring a Non-Western Culture: Hopi and Navajo

Explores two American Indian cultures, Hopi and Navajo and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic and humanistic viewpoint.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 1123

Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1135 (3) Exploring Cultural Diversity

Examines the geography, kinship, politics and religious values of a various cultures in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1140 (3) Exploring a Non-Western Culture: The Maya

Explores the culture of the Maya of Central America, emphasizing their material adaptations, social organizations, ideals and values, and artistic achievements in the past and the present.

Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1145 (3) Exploring a Non-Western Culture: The Aztecs

Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the clash of a non-western society with the western world with the arrival of the Spanish conquistadors.

Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1150 (3) Exploring a Non-Western Culture: Regional Cultures of Africa

Explores a small number of cultures in a specific sub-region of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements.

Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1170 (3) Exploring Culture and Gender through Film

Explores the concepts of culture and gender from an anthropological perspective, using films and other media, as well as written texts.

By analyzing media about other ways of life, students will learn the basic concepts of cultural anthropology and be able to apply them to any society. In addition, students will learn to think critically about documentary and ethnographic media.

Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 1180 (3) Maritime People: Fishers and Seafarers

Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present.

Additional Information: Arts Sci Core Curr: Historical Context

ANTH 1190 (3) Origins of Ancient Civilizations

Examines origins of the world's first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution.

Additional Information: Arts Sci Core Curr: Historical Context

ANTH 1200 (3) Culture and Power

Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence, ethnicity, migration, and globalization.

Additional Information: Arts Sci Core Curr: Contemporary Societies

ANTH 2010 (3) Introduction to Biological Anthropology 1

Detailed consideration of human biology, the place of humans in the animal kingdom, primate ecology and fossil evidence for human evolution. Required for ANTH majors.

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Natural Science

ANTH 2020 (3) Introduction to Biological Anthropology 2

Continuation of ANTH 2010. Emphasizes genetics, human variation, and microevolution.

Recommended: Prerequisite ANTH 2010.

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

ANTH 2030 (1) Laboratory in Biological Anthropology 1

Lab in human osteology and musculoskeletal system emphasizing comparative primate morphology, adaptation, and the fossil record documenting the natural history of primates. Meets the MAPS requirement for natural science: lab, when taken with ANTH 2010.

Recommended: Corequisite ANTH 2010.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science Lab or Lab/Lec

ANTH 2040 (1) Laboratory in Biological Anthropology 2

Experiments and hands-on exercises designed to enhance understanding of the principles and concepts presented in ANTH 2020. One two-hour class per week.

Recommended: Corequisite ANTH 2020.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

ANTH 2070 (3) Bones, Bodies, and Disease

Studies the human skeleton and introduces techniques used to evaluate demographic variables. Applies techniques through evaluation of photographic images of an excellently preserved mummified skeletal population from ancient Nubia to reconstruct prehistoric patterns of adaptation and biocultural evolution. Offered through Continuing Education only.

Recommended: Prerequisite ANTH 2010.

ANTH 2100 (3) Introduction to Cultural Anthropology

Covers current theories in cultural anthropology and discusses the nature of field work. Explores major schools of thought and ethnographic fieldwork in a range of cultures studied by anthropologists. Required for Anthropology majors.

Additional Information: Arts Sci Core Curr: Human Diversity

ANTH 2200 (3) The Archaeology of Human History

Where do we come from? This course provides a brief introduction to the practice of archaeology and then emphasizes the evidence for major events/transitions in human history over the last 2.5 million years. Required for ANTH majors.

Additional Information: Arts Sci Core Curr: Historical Context

ANTH 2210 (1) Laboratory Course in Archaeological Methods

Studies analytical methods in archaeological research including those employed both in the field and in the laboratory. Deals with practical exercises illustrating many of the theoretical principles covered in ANTH 2200.

Recommended: Corequisite ANTH 2200.

ANTH 3000 (3) Primate Behavior

Surveys naturalistic primate behavior. Emphasizes social behavior, behavioral ecology, and evolution as they lead to an understanding of human behavior.

Requisites: Requires a prerequisite course of ANTH 2010 or EBIO 1220 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ANTH 3005 (3) Dogs, Wolves and Human Evolution

Domestication of dogs from wolves started many tens of thousands of years ago. Explores the domestication process, wild wolf behavior, dog behavior, genetics of dog breeding, the cultural significance of dogs, the complexity of human-wolf interactions in North America and Europe and dog cognition in a larger comparative framework, including chimpanzees and other primates.

Requisites: Requires a prerequisite course of ANTH 2010 or EBIO 1210 (minimum grade C-).

ANTH 3009 (3) Modern Issues, Ancient Times

Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life. Formerly ANTH 2009.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 3009

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Core Curr: Historical Context

ANTH 3010 (3) The Human Animal

Identifies genetic, anatomical, physiological, social, and behavioral characteristics humans share with other mammals and primates. Explores how these characteristics are influenced by modern culture.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2010.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ANTH 3100 (3) Africa: Peoples and Societies in Change

Examines culture and politics in Africa through works by anthropologists and historians, as well as novels, films, and journalistic accounts. Special attention is devoted to the ways in which various African cultures have creatively and resiliently responded to the slave trade, European colonialism, and post-colonialism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 3110 (3) Ethnography of Mexico and Central America

A broad overview, focusing on Mexico and Guatemala. Major topics include ethnohistory, indigenous and mestizo peoples, and contemporary problems and issues.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 3160 (3) Peoples of the South Pacific

Surveys traditional island cultures and contemporary changes in the Pacific, focusing on how the Pacific Islands were first settled, some of the great anthropologists who studied the islanders, and how current environmental changes, such as global warming, threaten the future existence of the islands.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 3170 (3) America: An Anthropological Perspective

Historical and contemporary aspects of American life are considered from an anthropological perspective.

Additional Information: Arts Sci Core Curr: United States Context

ANTH 3180 (3) Gender, Culture, and Sexuality

Focuses on gender, that is, the making of men and women, and how gender is culturally constructed in different societies. Gender describes many areas of behavior, feelings, thoughts, and fantasies that cannot be understood as primarily biologically produced. Sexuality and sexual systems are sometimes viewed as products of particular gendering practices, but recent theories suggest that sexual systems themselves constitute gender.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

ANTH 3300 (3) Elements of Religion

Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3301

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 3760 (3) Exploring Culture and Media in Southeast Asia

Introduces students to the ethnographic method and critical media practices through immersion in the cultural politics of Indonesia. Students will learn to conduct ethnographic research and to use media-making as a research method. Students will learn the ethnography of Southeast Asia by focusing on the cultural diversity of Indonesia, with special attention to religious and political issues among marginalized groups.

Repeatable: Repeatable for up to 9.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr. Human Diversity

ANTH 4000 (3) Quantitative Methods in Anthropology

Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5000

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites ANTH 2010 and ANTH 2020.

ANTH 4020 (3-6) Explorations in Anthropology

Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 4045 (3) Introduction to Museum Anthropology

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5045 and MUSM 5045

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Anthropology

ANTH 4050 (3) Anthropology of Jews and Judaism

Explores topics in Jewish anthropology. Uses the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Explores fundamental questions about the definition of Jewish identity, practices and communities.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4050

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 4060 (3) Nutrition and Anthropology

Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5060

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites ANTH 2010 and ANTH 2020 or EBIO 1210 and EBIO 1220 or EBIO 1030 and EBIO 1040.

ANTH 4070 (3) Methods in Biological Anthropology

Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5070

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites ANTH 2010 and ANTH 2020 and ANTH 2030 and ANTH 2040 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).

ANTH 4110 (3) Human Evolutionary Biology

Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5110

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 4120 (3) Advanced Biological Anthropology

Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5120

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2010 or ANTH 2020 or EBIO 1210 or EBIO 1220.

ANTH 4125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective

Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5125

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

ANTH 4129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5129 and ARTH 4129 and CLAS 4129 and CLAS 5129

ANTH 4130 (3) Advanced Osteology

Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5130

Recommended: Prerequisites ANTH 2010 and ANTH 2020 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).

ANTH 4160 (3) Early Hominin Paleocology

Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5160

Grading Basis: Letter Grade

ANTH 4170 (3) Primate Evolutionary Biology

Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5170

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2010 or EBIO 1210.

ANTH 4180 (3) Anthropological Perspectives: Contemporary Issues

Students read, discuss, and write critical evaluations of contemporary publications in anthropology. Identifies basic themes that inform major anthropological perspectives. Students then bring these perspectives to bear on issues currently facing the human species.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 4210 (3) Southwestern Archaeology

Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5210

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

ANTH 4220 (3) From Olmec to Aztec: The Archaeology of Mexico

Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5220

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

ANTH 4224 (3) Archaeology of the Maya and Their Neighbors

Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5224

Recommended: Prerequisite ANTH 2200.

ANTH 4240 (3) Geoarchaeology

Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5240

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

ANTH 4270 (3) Plains Archaeology

Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5270

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

ANTH 4330 (3) Human Ecology: Archaeological Aspects

Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5330

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

ANTH 4340 (3) Archaeological Method and Theory

Surveys archaeological theories and methods within the context of the history of archaeology. Includes archaeological approaches to data recovery, analysis, and interpretation as well as an overview of cultural resources management and ethical issues in contemporary archaeology.

Recommended: Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).

ANTH 4350 (2-6) Archaeological Field and Laboratory Research

Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5350

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).

ANTH 4380 (3) Lithic Analysis and Replication

Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5380

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

ANTH 4390 (3) Research Methods in Archaeology I

Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5390

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

ANTH 4470 (3) Collections Research Practicum in Cultural Anthropology

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5470 and MUSM 4912 and MUSM 5912

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

ANTH 4500 (3) Cross-Cultural Aspects of Socioeconomic Development

Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5500

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 4505 (3) Globalization and Transnational Culture

Covers the historical foundations for contemporary global change, addressing colonialism, global outsourcing, and cultural imperialism, with a particular emphasis on gender, class, and consumerism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Departmental Category: Asia Content

ANTH 4525 (3) Global Islams

Examines the historical formation of Islam in Indonesia and Southeast Asia so as to situate contemporary Islamic practices in a global context.

Recommended: Prerequisite ANTH 2100.

ANTH 4530 (3) Theoretical Foundations of Sociocultural Anthropology

Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5530

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

ANTH 4570 (3) Anthropology of Fishing

Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5570

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 4580 (3) The Holocaust: An Anthropological Perspective

Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics and consequences as well as other genocides of the 20th century, using an anthropological approach.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4580

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ANTH 4610 (3) Medical Anthropology

Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5610

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

ANTH 4620 (3) Nationalism and Cultural Citizenship

Explores the nature of ethnic conflict, nationalism, and cultural citizenship in different contexts, including the United States. Is the nation-state dead? What effect do extranational and transnational organizations/institutions (e.g., European Union) have on the development of nationalism? Through the exploration of contemporary theory and case studies, this class will address these important contemporary concerns.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

ANTH 4630 (3) Nomadic Peoples of East Africa

Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5630

Recommended: Prerequisite students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

ANTH 4690 (3-6) Anthropology of Tibet

Explores the culture of Tibet in both historical and thematic manners, considering the long-term development of Tibetan cultural practices and institutions as well as many of the abrupt changes introduced to Tibet in the 20th century. Topics covered include region, politics, gender, warfare, poetry and literature, and life under Chinese rule and as refugees around the world.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

Recommended: Prerequisite ANTH 2100.

Additional Information: Departmental Category: Asia Content

ANTH 4710 (3) Departmental Honors in Anthropology 1

Course work built around theme of research design as a means of integrating previous training in the field of anthropology as well as providing an opportunity to perform creative scientific investigations. Prepares students to write an honors thesis in ANTH 4720. Required of students doing Anthropology departmental honors.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sciences Honors Course

ANTH 4720 (3) Departmental Honors in Anthropology 2

Continuation of ANTH 4710.

Recommended: Prerequisite ANTH 4710.

Additional Information: Arts Sciences Honors Course

ANTH 4730 (3) Latin American Politics and Culture through Film and Text

Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5730

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

ANTH 4735 (3) Contemporary Cuban Culture: Race, Gender and Power

Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5735

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Letter Grade

ANTH 4740 (3) Peoples and Cultures of Brazil

Thematically surveys theoretical and ethnographic issues that have been important in understanding Brazil. Read and write critically about textual and visual representations of Brazil presented in the course.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites ANTH 2100 and three or more cultural anthropology courses.

ANTH 4745 (3) Science, Technology and Society

Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5745

Grading Basis: Letter Grade

ANTH 4750 (3) Culture and Society in South Asia

Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5750

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Departmental Category: Asia Content

ANTH 4755 (3) Cultures of Expertise: Science, Power and Knowledge

Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5755

Grading Basis: Letter Grade

ANTH 4760 (3) Ethnography of Southeast Asia and Indonesia

Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5760

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Departmental Category: Asia Content

ANTH 4770 (3) Anthropology of Tourism

Introduces students to anthropological theories on tourism and considers those theories in the contexts of the varied sites and forms of tourism practiced around the world today. We will ask: why do people tour? Where do they go? And most centrally: how do the hosts to tourism feel about these outside visitors? Having been exposed to questions of globalization, development, belonging, race, gender, and desire, students will then be asked to reflect upon and theorize their own touristic experiences.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

ANTH 4800 (3) Language and Culture

Principles of language structure and how language and culture interrelate, how language and language use are affected by culture and how culture may be affected by use of, or contact with, particular languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 4800

Recommended: Prerequisites ANTH 2100 or LING 1000 or LING 2400 and students with 57-180 credits (Junior or Senior) only.

ANTH 4840 (1-8) Independent Study

For upper-division undergraduate students.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ANTH 4910 (1-3) Teaching Anthropology

Practicum by special arrangement only. Students learn to teach anthropology by serving as recitation leaders or tutors in introductory courses or as small group leaders in advanced courses.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ANTH 4930 (1-6) Anthropology Internship

Provides academically supervised opportunities for junior and senior anthropology majors to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5930

Repeatable: Repeatable for up to 9.00 total credit hours.

Recommended: Prerequisites ANTH 2010 and ANTH 2100 and ANTH 2200 and students with 57-180 credits (Junior or Senior) Anthropology majors, with a minimum 3.25 GPA.

Anthropology - Bachelor of Arts (BA)

Anthropology is the study of people, both ancient and modern, in their cultural context. The field involves a global look at human cultures from prehistoric times to the present, integrating findings from the social sciences, natural sciences and humanities. Students of anthropology learn to appreciate the variety of cultures throughout human history and to understand the meaning of human biological and cultural development as well as diversity.

The undergraduate degree in anthropology emphasizes knowledge and awareness of:

- basic methods, concepts, alternative theories and approaches and modes of explanation appropriate to each of the three main subfields of the discipline (archaeology, biological anthropology and cultural anthropology);
- basic archaeological techniques, including stratigraphy, dating and inference of human behavior from archaeological data, as well as human history from its beginning through the emergence of complex societies;
- variation, patterning and creativity in human communities and symbolic systems, including ecological, social structural and cultural factors exemplified in a diverse array of the world's societies, including those undergoing change as a result of globalization and the impact of contemporary social and political movements; and
- theories of primate and human evolution and the basic data of the hominid fossil record, as well as biological variation in contemporary human populations.

In addition, students completing the degree in anthropology are expected to acquire the ability and skills to:

- identify trends or patterns in anthropological data from different cultures or periods, identify an appropriate context of explanation or interpretation and formulate a testable explanation or reasonable

interpretation, including the ability to identify data that constitute credible evidence for an explanation or interpretation; and

- identify and define a significant problem or topic in anthropology and analyze and interpret data in a systematic manner.

International Bachelor of Arts (IBA)

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in Anthropology, in addition to completing all the current requirements for the BA with a major in Anthropology at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. (A minimum of 30 credit hours in anthropology, 18 of which must be upper division, is required for the degree.)

Required Courses and Semester Credit Hours

Required Courses

ANTH 2010	Introduction to Biological Anthropology 1	3
ANTH 2100	Introduction to Cultural Anthropology	3
ANTH 2200	The Archaeology of Human History	3
	One upper-division topical course in cultural anthropology	3
	One upper-division ethnographic area course in cultural anthropology	3
	One upper-division course in archaeology	3
	One upper-division course in physical anthropology	3

Electives

	Electives in anthropology (6 credit hours must be at the upper-division level; students planning to pursue graduate work in anthropology are advised to take ANTH 4000 and ANTH 4530)	9
--	---	---

Total Credit Hours		30
--------------------	--	----

In addition, students planning to pursue writing a senior honor's thesis or graduate work in Anthropology are advised to take ANTH 4000 and an upper-division Anthropology theory course.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for more information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in anthropology, students should meet the following requirement:

- By the beginning of the second semester, declare the anthropology major.

Anthropology - Minor

Anthropology is the study of people, both ancient and modern, in their cultural, biological and environmental contexts. Anthropology is the only field to address all aspects of the human experience—cultural, biological, historical—so the discipline necessarily incorporates a wide range of theoretical and methodological traditions, drawing on and contributing to approaches in the humanities, social sciences and natural sciences. It is the breadth of our vision of what it means to be human, as well as the breadth of our theoretical and methodological approaches, that

constitutes our unique mission and role within the university. Thus, a minor in anthropology would provide a rich intellectual complement to a wide range of majors within the College of Arts and Sciences.

Requirements

A minimum of 18 credits hours of anthropology courses, including a minimum of 9 upper-division credit hours, are required for the minor. All course work applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all anthropology course work must equal 2.00 (C) or higher.

Students will be allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work towards a minor in anthropology.

Course work applied towards a minor in anthropology may also be applied towards general education (core/college list) and major requirements.

Required Courses and Semester Hours

Required Courses

ANTH 2010	Introduction to Biological Anthropology 1	3
ANTH 2100	Introduction to Cultural Anthropology	3
ANTH 2200	The Archaeology of Human History	3

Electives

Nine hours of upper-division electives in anthropology	9
Total Credit Hours	18

The three introductory courses will provide all minors with an appreciation of the range of scholarship encompassed by contemporary anthropology.

Students are recommended to select upper-division course work to best complete their majors. For example, the following subjects work well with the majors listed:

- cultural anthropology: Asian studies, communications, economics, ethnic studies, film studies, international affairs, Jewish studies, linguistics, media studies, political science, religious studies, sociology or women and gender studies majors
- archaeology: art history, classics or environmental design majors
- physical anthropology: ecology and evolutionary biology, integrated physiology or molecular, cellular and developmental biology majors
- archaeology or physical anthropology: history or humanities majors
- any of the anthropology subdisciplines: environmental studies or geography majors

Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers courses that focus on providing students with the mathematical tools and problem-solving strategies that are useful in science and engineering. The department offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics and probability and statistics. Each of these areas is described below.

The undergraduate Bachelor of Science degree (p. 632) is offered through the College of Engineering and Applied Science.

Course code for this program is APPM.

Computational Mathematics

The study of computational mathematics has grown rapidly in recent years and has allowed scientists and engineers to answer questions and to develop insights not possible just a decade or two ago. Modern computational methods require in-depth knowledge of a variety of mathematical subjects including linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis and nonlinear equations. Since computers are invaluable tools for an applied mathematician, students are expected to attain a high level of computer literacy and to gain a substantial knowledge of operating systems and hardware. Computational mathematics courses include the study of computational linear algebra, optimization, numerical solution of ordinary and partial differential equations, solution of nonlinear equations and advanced seminars in wavelet and multiresolution analysis and in multigrid methods, radial basis functions and algorithm design and development, more generally.

Mathematical Biosciences

Advances in our ability to quantitatively study biological phenomena have provided a number of exciting opportunities for applied mathematicians. The careful modeling, analysis and simulation of these systems using the standard and state-of-the-art tools of applied mathematics has led to novel and non-intuitive insights into biology. Furthermore, deeper understanding of the inherently complex and multiscale nature of biological systems, in many cases, requires the development of new mathematical tools, techniques and methodologies (a challenge to which applied mathematics is particularly well suited). For students interested in pursuing research in mathematical biology, good preparatory classes would include differential equations, advanced calculus, numerical analysis and probability and statistics, as well as supplemental courses in the appropriate biological, biomedical or bioengineering fields. Research areas at CU encompass immunology, virology, bacteriology, population genetics and cardiac nonlinear dynamics. Specifically, current topics of interest include model selection and control of in vivo HIV pathogenesis dynamics, modeling of intracellular calcium dynamics, the analysis of heart rhythm instabilities, the role of aggregation and fragmentation in bacteremia and bacterial pneumonia, inverse problems arising in the use of population genetics and bioinformatics to identify geographic features and the analysis of patterns in biological sequences such as DNA and RNA.

Dynamical Systems and Nonlinear Phenomena

In recent years, there has been an explosion of interest in the study of nonlinear waves and dynamical systems with analytical results, often motivated by the use of computers. The faculty in the Department of Applied Mathematics are actively and intensively involved in this growing field. Research areas include qualitative analysis and computational dynamics, conservative and dissipative systems, bifurcation theory, the onset and development of chaos, wavelets and multiresolution analysis, integrable systems, solitons, cellular automata, analytic dynamics, pattern formation and symmetry, synchronization, dynamics on networks, fluid dynamics, transport and mixing and the study of nonlinear phenomena arising from the interactions of many interconnected dynamical units. Department courses in this field include dynamical systems, nonlinear wave motion and many advanced seminars. Suitable background courses are analysis, computation and methods in applied

mathematics. Valuable supplemental courses include mechanics and fluid dynamics.

Physical Applied Mathematics

Physical applied mathematics is a term that generally refers to the study of mathematical problems with direct physical application. This area of research is intrinsically interdisciplinary. In addition to mathematical analysis, it requires an in-depth understanding of the underlying applications area, and usually requires knowledge and experience in numerical computation. The department has approximately 40 affiliated faculty who can direct thesis research in areas such as atmospheric and fluid dynamics, theoretical physics, plasma physics, genetic structure, parallel computation, etc. The department's course requirements are designed to provide students with a foundation for their study (analysis and computation). The department also requires supplemental courses in one of the sciences or engineering fields necessary for thesis research in physical applied mathematics.

Statistics and Applied Probability

Almost all natural phenomena in the technological, biological, physical and social sciences have random components with complex levels of interactions, part stochastic, part deterministic. Applied probability is the application of probabilistic and analytic methods to model, understand and predict the behavior of real-life problems that involve random elements. Statistics is the science of using data that typically arise from the randomness inherent in nature to gain new knowledge. Areas of current interest by applied math and their affiliated faculty include optimization of stochastic networks; the study of stochastic processes, and stochastic differential equations in hydrology and telecommunications; probabilistic models, nonparametric regression methods, shrinkage estimation, gene expression microarray data analysis, false discovery rate control, classification methods and statistical tests based on these models, in genetics and RNA sequencing; and extreme value theory in estimation of maximal wind speeds. Appropriate course work includes analysis, stochastic processes, simulation techniques and mathematical statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

For details on the range of courses and research opportunities available through the Department of Applied Mathematics, visit www.colorado.edu/amath.

The undergraduate Bachelor of Science degree (p. 637) is offered through the College of Engineering and Applied Science.

Minors

- Applied Mathematics - Minor (p. 158)
- Statistics - Minor (p. 159)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ablowitz, Mark J (https://experts.colorado.edu/display/fisid_100691)
Professor; PhD, Massachusetts Institute of Technology

Bebernes, Jerrold
Professor Emeritus

Becker, Stephen R (https://experts.colorado.edu/display/fisid_154263)
Assistant Professor; PhD, California Institute of Technology

Beylkin, Gregory (https://experts.colorado.edu/display/fisid_100437)

APPM 1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1021 or MATH 1150

Requisites: Restricted to College of Engineering or Pre-Engineering Arts and Sciences majors only. Requires or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

APPM 1340 (4) Calculus 1 with Algebra, Part A

Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

APPM 1345 (4) Calculus 1 with Algebra, Part B

Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1340 (minimum grade C-).

APPM 1350 (4) Calculus 1 for Engineers

Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills

APPM 1360 (4) Calculus 2 for Engineers

Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2300
Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

APPM 2350 (4) Calculus 3 for Engineers

Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2400
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2360 (4) Introduction to Differential Equations with Linear Algebra

Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations.

Equivalent - Duplicate Degree Credit Not Granted: both MATH 2130 and MATH 3430
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2450 (1) Calculus 3 Computer Lab

Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.

Requisites: Requires a corequisite course of APPM 2350.
Grading Basis: Pass/Fail

APPM 2460 (1) Differential Equations Computer Lab

Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.

Requisites: Requires enrollment in a corequisite course of APPM 2360.
Grading Basis: Pass/Fail

APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics

Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students. These topics have the potential to be incorporated into the core APPM curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

Grading Basis: Letter Grade

APPM 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps

Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

APPM 3010 (3) Chaos in Dynamical Systems

Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.

Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APPM 3050 (3) Scientific Computing in Matlab

Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.

Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APPM 3170 (3) Discrete Applied Mathematics

Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruencies; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.

Requisites: Requires a prerequisite or corequisite course of APPM 2350 or APPM 2360 or MATH 2400 (prereq minimum grade C-).

APPM 3310 (3) Matrix Methods and Applications

Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 and MATH 2135

Requisites: Requires prerequisite course of APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).

APPM 3350 (3) Advanced Engineering Calculus

Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

APPM 3570 (3) Applied Probability

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3810 or MATH 4510

Requisites: Requires a prerequisite or corequisite course of APPM 2350 or MATH 2400 (prereq minimum grade C-).

APPM 4120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5120 and MATH 4120 and MATH 5120

Requisites: Requires a prerequisite course of APPM 3310 or MATH 2130 or MATH 2135 (minimum grade C-).

APPM 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5350

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 2130 or MATH 2135 (prereq minimum grade C-).

APPM 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5360

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 2130 or MATH 2135 (prereq minimum grade C-).

APPM 4380 (3) Modeling in Applied Mathematics

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5380

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

APPM 4390 (3) Modeling in Mathematical Biology

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5390

Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 (all minimum grade C-).

APPM 4440 (3) Undergraduate Applied Analysis 1

Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 2130 or MATH 2135 (prereq minimum grade C-).

APPM 4450 (3) Undergraduate Applied Analysis 2

Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.

Requisites: Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

APPM 4500 (3) Statistical Collaboration

Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5500

Requisites: Requires a prerequisite course of APPM 4520 (minimum grade C-).

Grading Basis: Letter Grade

APPM 4505 (2) Advanced Statistical Collaboration

Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5505

Requisites: Requires prerequisite course of APPM 4500 or APPM 5500 (minimum grade C-).

Grading Basis: Letter Grade

APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5510

Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 (all minimum grade C-).

Grading Basis: Letter Grade

APPM 4520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5520 and MATH 4520 and MATH 5520

Requisites: Requires prerequisite course of APPM 3570 or MATH 4510 (minimum grade C-).

APPM 4530 (3) Stochastic Analysis for Finance

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5530

Requisites: Requires prerequisite courses of APPM 3570 and APPM 3310 (all minimum grade C-). Requires prerequisite or corequisite course of APPM 4350 (minimum grade C-).

Grading Basis: Letter Grade

APPM 4540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5540 and MATH 4540 and MATH 5540

Requisites: Requires prerequisite course of APPM 4520 or MATH 4520 (minimum grade C-).

APPM 4550 (3) Spatial Statistics

Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to spines.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5550

Requisites: Requires prerequisite course of APPM 4520 or APPM 5520 or MATH 4520 or MATH 5520 (minimum grade C-).

Grading Basis: Letter Grade

APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5560

Requisites: Requires prerequisite course of APPM 3570 or MATH 4510 (minimum grade C-).

APPM 4570 (3) Statistical Methods

Covers basic statistical concepts with accompanying introduction to the R programming language. Topics include discrete and continuous probability laws, random variables, expectation and variance, central limit theorem, testing hypothesis and confidence intervals, linear regression analysis, simulations for validation of statistical methods and applications of methods in R.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5570

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 4580 (3) Introduction to Statistical Learning

Consists of applications and methods of statistical learning. Covers multiple linear regression, classification, regularization, splines, tree-based methods, support vector machines and unsupervised learning.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5580

Requisites: Requires prerequisite course of APPM 4570 or APPM 5570 (minimum grade C-).

APPM 4590 (3) Statistical Modeling

Introduces methods, theory and applications of statistical models, from linear models (simple and multiple linear regression), to hierarchical linear models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples and exercises will be demonstrated using statistical software.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5590

Requisites: Requires prerequisite course of APPM 4520 or APPM 4570 or MATH 4520 (minimum grade C-).

APPM 4650 (3) Intermediate Numerical Analysis 1

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4650

Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

APPM 4660 (3) Intermediate Numerical Analysis 2

Continuation of APPM 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations. Department enforced prerequisite: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4660

Requisites: Requires prerequisite course of APPM 4650 or MATH 4650 (minimum grade C-).

APPM 4720 (1-3) Open Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5720

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

APPM 4840 (1-3) Reading and Research in Applied Mathematics

Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.

Repeatable: Repeatable for up to 9.00 total credit hours.

APPM 4950 (1-3) Seminar in Applied Mathematics

Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Applied Mathematics - Minor

A minor is offered in applied mathematics. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

The minor in applied mathematics was developed to provide in-depth training in mathematical techniques and computational methods well beyond the training usually received by science and engineering majors. The minor currently offers three tracks: general emphasis, scientific computing and mathematical software, or probability and statistics. The goals of each track are to introduce students to more advanced mathematical techniques and problem-solving strategies. Such skills are becoming increasingly important for students who expect to participate in areas requiring analysis or modeling of real world situations.

The department also offers a minor in statistics (p. 159) which was developed to provide in-depth training in statistical methods and techniques well beyond the training usually received by science and engineering majors. The ability to understand, visualize and analyze data is becoming an increasingly important skill in many disparate fields. This minor offers undergraduate students from any major the opportunity to develop their statistical knowledge.

Requirements

Prerequisites

Prerequisites for the applied math minor are two semesters of calculus and computing experience, as provided by CSCI 1300, CSCI 1310, or CHEN 1310.

Residency

A minimum of 20 credits at the 2000-level and above is required. At least three applied mathematics courses, two of which must be at the 3000-level or above, need to be taken on the Boulder campus. No more than nine credit hours may be applied from transfer work; of those nine, no more than six may be 3000-level or above.

Minimum Grades

A cumulative GPA of 2.00 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a grade of C- or better.

Required Courses and Semester Credit Hours

Course Requirements	20
APPM 2350 Calculus 3 for Engineers	4
or MATH 2400 Calculus 3	
APPM 2360 Introduction to Differential Equations with Linear Algebra	4
APPM 3310 Matrix Methods and Applications	3

Choose one area of emphasis:

General Emphasis:

Choose two of the following three courses:

APPM 4650	Intermediate Numerical Analysis 1	
APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	
APPM 4360	Methods in Applied Mathematics: Complex Variables and Applications	

One 3-credit upper division applied math course at the 3000 or 4000 level

Scientific Computation Emphasis:

APPM 3050	Scientific Computing in Matlab ¹	3
APPM 4650 & APPM 4660	Intermediate Numerical Analysis 1 and Intermediate Numerical Analysis 2	6

Probability and Statistics Emphasis: ²

APPM 3570	Applied Probability	3
-----------	---------------------	---

One of the following sequences:

APPM 4570 & APPM 4580	Statistical Methods and Introduction to Statistical Learning	
APPM 4560 & APPM 4520	Markov Processes, Queues, and Monte Carlo Simulations and Introduction to Mathematical Statistics	

¹ APPM 3050 is not appropriate for junior or senior aerospace engineering sciences majors. These students should substitute another upper divisions applied math course.

² A student cannot earn a minor in statistics (p. 159) and a minor in applied mathematics with probability and statistics emphasis.

Statistics - Minor

A Department of Applied Mathematics offers a minor in statistics. Declaration of a minor is open to any student enrolled at CU-Boulder, regardless of college or school. For more information, see minor requirements. (p. 127)

The minor in statistics was developed to provide in-depth training in statistical methods and techniques well beyond the training usually received by science and engineering majors. The ability to understand, visualize, and analyze data is becoming an increasingly important skill in many disparate fields. This minor offers undergraduate students from any major the opportunity to develop their statistical knowledge.

Prerequisites for the Statistics minor are two semesters of calculus and computing experiences such as provided by CSCI 1300, CSCI 1310, or CHEN 1310.

Residency

A *minimum* of 19 credits at the 2000-level and above is required. At least three applied mathematics courses, two of which must be at the 3000-level or above, need to be taken on the Boulder campus. No more than nine credit hours may be applied from transfer work; of those nine, no more than six may be 3000-level or above.

Minimum Grades

A cumulative GPA of 2.00 or better is required in the courses that are used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a grade of C- or better.

Course Requirements	19
APPM 2350 Calculus 3 for Engineers or MATH 2400 Calculus 3	4

APPM 3310	Matrix Methods and Applications	3
APPM 3570	Applied Probability	3
APPM 4520	Introduction to Mathematical Statistics	3
APPM 4590	Statistical Modeling	3

And *ONE* of the following courses:

APPM 4560	Markov Processes, Queues, and Monte Carlo Simulations	3
APPM 4540	Introduction to Time Series	3
APPM 4580	Introduction to Statistical Learning ¹	3

Any one of APPM's 3-credit special topic courses on Probability or Statistics may also be used to meet this requirement ²

¹ APPM 4580 has a prerequisite of APPM 4570, or APPM 3570 **AND** APPM 4520

² A student cannot earn a minor in Statistics and a minor in Applied Mathematics (p. 158) with the probability and statistics emphasis.

Art and Art History

The Department of Art and Art History offers the bachelor of arts in art history and in art practices and the bachelor of fine arts in art practices.

The undergraduate degree in art history emphasizes knowledge and awareness of:

- the major artistic movements of the world in a historical context;
- varied methodologies used to study art historically; and
- artistic media and techniques.

In addition, students completing the degree in art history are expected to acquire the ability and skills to:

- relate individual movements to their historical and cultural context by identifying technique, style and subject matter;
- interpret historical and critical information about works of art, artists and related issues; and
- organize and communicate concepts and data pertaining to the history of art effectively in written and oral form.

The undergraduate degree in art practices emphasizes knowledge and awareness of:

- the significance of the major movements in art history, with an emphasis on contemporary art;
- at least one discipline of studio art;
- related critical issues in studio practice; and
- a wide range of stylistic approaches.

In addition, students completing a degree in art practices are expected to acquire the ability and skills to:

- analyze their own works of art in terms of form and content;
- interpret the work of others;
- execute ideas in one or more artistic media;
- demonstrate artistic ability and technical proficiency in one chosen medium; and
- communicate in verbal and written form the particular conceptual and perceptual attitudes and stances of their own artistic production.

Course codes for these programs are ARTS, ARTF and ARTH.

Honors

Students may graduate with departmental honors. Those interested in pursuing this program should contact the Honors Department and/or the Department of Art and Art History honors representative as early as possible. The minimum GPA requirement is 3.300 overall and 3.500 in the major. Students may take Art Practices or Art History Honors Thesis to complete individual work.

Program Fees

Each course in the department has a program fee calculated at \$75 per art history course and \$225 per art practices course.

Special Programs

The CU Art Museum

The CU Art Museum is a cultural gateway to the University of Colorado Boulder, facilitating engagement with larger societal issues through a greater understanding of the arts in a global context. The CU Art Museum is committed to enhancing understanding and appreciation of the visual arts within the academic community and among regional, national and international audiences. It provides access to art of the highest quality through exhibitions, publications and related educational events that reflect diversity, critical thinking and creative research. The museum also facilitates student training in museum practices. As a collecting institution, the CU Art Museum promotes the excellence, preservation, scholarly interpretation, exhibition and growth of its comprehensive permanent collection, which includes artworks from numerous time periods, artistic traditions and cultures. The new 25,000-square-foot CU Art Museum contains five galleries including permanent collection galleries, changing exhibition galleries and a video gallery. The CU Art Museum also includes a collections study center, allowing students, faculty and researchers the opportunity to schedule appointments to view, research and study works in its permanent collection.

The CU Art Museum's Permanent Collection

The Permanent Collection of the CU Art Museum contains over 6,000 works of art. The collection includes works from numerous time periods and cultures including ancient Greek pottery, Roman Glass, ancient Iranian pottery, Southwestern and South American santos, Southeast Asian pottery, African sculpture, Old Master works on paper, British 18th century prints, 19th and 20th century American prints and paintings, Japanese *ukiyo-e* prints, 19th century photography, Pop art, Minimalist works on paper and modern and contemporary ceramics, sculpture, works on paper, paintings, photography, video and new media art.

Visiting Scholar Program

This program is organized to explore the discipline of art history—its cultural connections, methodological pursuits and its changing nature—by focusing extensively on the research and insights of individual academic experts. Three to five highly regarded art historians and/or art critics speak at a public lecture, presenting current research and published papers. During their week-long visit they work closely with students enrolled in the Visiting Scholar Seminar.

Visiting Artist Program

Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

Visual Resources Center (VRC)

The mission of the VRC is to provide and facilitate access to images, imaging and related information resources for teaching and research in the Department of Art and Art History. This includes:

1. a departmental image collection and support for other important image resources;
2. resources, training and support in digital imaging and image presentation software; and
3. equipment for use in creative work, documentation and classrooms within the department.

The digital image collection contains works by faculty, MFA thesis recipients, visiting artists and other contemporary and historical works. Digital imaging resources include slide and flatbed scanning stations, with training available in digitization standards and best practices. VRC equipment includes laptops, data projectors, digital SLR cameras, video cameras, tripods and other equipment for use in the department. The VRC also circulates its collection of DVDs containing lectures and interviews from the department's Visiting Artist Program. More information is available at cuart.colorado.edu/resources/vrc (<http://cuart.colorado.edu/resources/vrc>).

Bachelor's Degrees

- Art Practices - Bachelor of Fine Arts (BFA) (p. 178)
- Art History - Bachelor of Arts (BA) (p. 176)
- Art Practices - Bachelor of Arts (BA) (p. 177)

Minor

- Art History - Minor (p. 177)

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

ARTH 1300 (3) History of World Art 1

Surveys major art styles from the Paleolithic period through the Renaissance, including European, Asian, and the Pre-Columbian/Islamic world. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art History

ARTH 1400 (3) History of World Art 2

Surveys major art styles from about 1600 to the present, including Europe, Asia, the Islamic world, the Americas and Africa. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art History

ARTH 1509 (4) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1509

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Core Curr: Historical Context
Departmental Category: Art History

ARTH 1709 (3) Freshmen Seminar: Critical Introduction to Art History

Provides a broad introduction to understanding and appreciating art and art history within a critical lecture seminar and discussion format. The focus of this course is a selected Particularity directed to nonmajors.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art History

ARTH 2029 (3) Art and Archaeology of Ancient Egypt

Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2029

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Art History

ARTH 2039 (3) Greek Art and Archaeology

Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture, and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2039

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art History

ARTH 2049 (3) Introduction to Roman Art and Architecture

Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2049

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art History

ARTH 2409 (3) Intro to Asian Art

Designed for those having no previous experience in the study of Asian art. Traces development of sculpture, painting, architecture, and the other visual arts of South Asia, the Far East, and Southeast Asia, with a synopsis of developments from 1453 through the 18th century.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3009 (3) Critical Thinking in Art History

Through structured discussions, selected readings, and written assignments provides an understanding of how art history has evolved as an academic discipline and how art historians evaluate complex issues of style, form, content, and theory in the visual arts.

Additional Information: Departmental Category: Art History

ARTH 3019 (3) Pompeii and the Cities of Vesuvius

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 3019

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Art History

ARTH 3029 (3) Medieval and Early Modern Visual Culture, A.D. 400 to A.D. 1750

Introduces students to the literature, history, culture and art of Europe and the Mediterranean basin from late antiquity through the early modern period. Interdisciplinary approach to visual culture focuses on uses of sacred religious practices and lay devotion.

Additional Information: Departmental Category: Art History

ARTH 3079 (3) Medieval Art Survey

Surveys the history of Western art from Constantine to around the year 1300, including Carolingian, Ottonian, Anglo-Saxon, Romanesque, and Gothic. Considers "Barbarian," Byzantine, and Islamic influences.

Additional Information: Departmental Category: Art History

ARTH 3109 (3) Art in Contemporary Society

Examines writings by philosophers and art critics as they address the question: What is art for? Readings focus on the 19th and 20th centuries, including current theories and some non-Western theories. Students are encouraged to develop their own responses to the question.

Additional Information: Departmental Category: Art History

ARTH 3209 (3) Art, Culture, and Gender Diversity, 1400--1600: Renaissance Art Out of the Canon

Studies the rising status of painting, sculpture, and architecture in Europe and how Europeans perceived non-Western art during the early modern period. Introduces history of race/ethnicity, gender, and class concerns embodied in the European category visual arts. Emphasizes new methods for interpreting history without imposing Eurocentric viewpoints.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Art History

ARTH 3210 (3) The Art of Renaissance Cities and Courts

Surveys the development and spread of humanist culture associated with the modern term "Renaissance Art" from c. 1400-1600, organized by location, artist, and patron. Presents significant works of paintings, sculpture and architecture at a number of major artistic centers including Florence, Rome, Venice, Fontainebleau, and Prague.

Additional Information: Departmental Category: Art History

ARTH 3241 (3) Art in Islam

Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ARAB 3241

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art History

ARTH 3329 (3) Art in France: Revolution to 1870

Covers major art movements and theories in France from 1793 to 1870 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.

Recommended: Prerequisites ARTH 1300 and second semester sophomore, junior or senior standing.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Art History

ARTH 3339 (3) Art in France: 1870-1970

Covers major art movements and theories in France from the Paris Commune through 1970 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.

Recommended: Prerequisite ARTH 1300 and second semester sophomore, junior or senior standing.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Art History

ARTH 3359 (3) Art in Spain: Goya to 1900

Explores the scope of Goya's works in context of his contemporaries and antecedent, Velazquez; Moorish influences, genre painting costumbrismo, Romanticism and historical narratives are considered in relation to Enlightenment ideals, French Neoclassicism, Romanticism, Orientalism and the Napoleonic invasion. Teaching occurs mostly on site: Alhambra, Prado, Bellas Artes, Palacio Real, Museo de Romanticismo; seminars and tests are in Madrid classrooms.

Recommended: Prerequisite ARTH 1300.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Art History

ARTH 3369 (3) Art in Spain: 1900-1990

Covers Gaudi, Picasso and artists of Modernismo movement as well as Dali are studied in Barcelona; Dada and Surrealism are explored through works of Picasso, Gonzalez, Gris, Varo, Dali, Bunuel and others. Photography and film of Spanish Civil War and thereafter are studied in seminar in Madrid classroom; students experience flamenco performances and Q&A with performers. Tests administered in class.

Recommended: Prerequisite ARTH 1300.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Art History

ARTH 3419 (3) Modern Art Survey

Surveys the loss of beauty in art and discusses whether or not that loss is regrettable. Questions the function and historical meaning of modern and postmodern art: is it all hype and strategic positioning by artists for fame and fortune? Is it serious? Are the fine arts still fine?

Additional Information: Departmental Category: Art History

ARTH 3509 (3) American Art

Surveys American art and material culture from the precolonial era to the present day. Considers cultural and artistic interaction, ethnic expressions, patronage, European and non-Western influences, and the struggle to develop a uniquely American artistic identity.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: Art History

ARTH 3519 (3) Modern Architecture, 1780--1960

Introduces the major movements and developments in European and American architecture from Neoclassicism to Postmodernism. Considers the impact of exhibitions, expositions, and vernacular architecture.

Additional Information: Departmental Category: Art History

ARTH 3539 (3) Contemporary Art

Examines contemporary art and theory in the transition from modern to postmodern expression. Discusses painting, sculpture, installations, performance, video, photography, and architecture with attention to historical context and criticism. Considers neoexpressionist, feminist, minority, political, and public art.

Additional Information: Departmental Category: Art History

ARTH 3619 (3) The Arts of China

Surveys Chinese painting, sculpture, architecture, and other arts from neolithic to modern times.

Additional Information: Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3629 (3) The Arts of Japan

Offers an appreciation and chronological development of the arts of Japan. Emphasizes the arts of Shintoism and Buddhism as well as the particular Japanese aesthetic from prehistoric times to the present.

Additional Information: Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3719 (3) History of Media Arts

Surveys the development of technological media both as sources of information and as art. Photography and related media, film, video, holography, and electronic imaging systems are surveyed as art and as technologies, emphasizing major artists, movements, exhibitions, and other productions in the 19th and 20th centuries.

Additional Information: Departmental Category: Art History

ARTH 3729 (3) Foundations in Latin American Art

Examines Latin America's cultural pluralism and art production beginning in pre-Columbian times and following through to the present. Considers the various functions of art as well as the relationship between objects, artists, and the cultures from which they come. Provides students with a broad frame of reference for many historical periods and equips students to evaluate art objects and their cultural contexts.

Additional Information: Departmental Category: Art History

ARTH 3929 (1-3) Special Topics in Art History

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 4029 (1) Art History Research Methods

Learn to expertly navigate art scholarship and be prepared to do thesis-level research. An introduction to the vast array of art historical resources and their uses. Explore advanced techniques for searching both online and offline sources of art information. Master the various modes of art historical research, including finding iconographic, historical, or technical information.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5029 and LIBR 4029

Additional Information: Departmental Category: Art History

ARTH 4069 (3) Medieval Manuscripts

Surveys decorated books from late antiquity to the advent of the printing press. Examines the various roles manuscripts played within different medieval communities.

Additional Information: Departmental Category: Art History

ARTH 4089 (3) Romanesque and Gothic Art

Examines major artistic trends in Europe between the years 1000 and 1300, a period that witnessed, among others, the development of gothic cathedrals and the rise of the professional artist. Particular attention will be given to exchange with other cultures.

Additional Information: Departmental Category: Art History

ARTH 4109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5109 and CLAS 4109 and CLAS 5109

Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

Additional Information: Departmental Category: Art History

ARTH 4119 (3) Roman Sculpture

Examines ancient Roman sculpture with emphasis on the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5119 and CLAS 4119 and CLAS 5119

Recommended: Prerequisite ARTH 1300 or CLAS 2049.

Additional Information: Departmental Category: Art History

ARTH 4129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and ANTH 5129 and CLAS 4129 and CLAS 5129

Additional Information: Departmental Category: Art History

ARTH 4139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5139 and CLAS 4139 and CLAS 5139

Additional Information: Departmental Category: Art History

ARTH 4149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and CLAS 5149

Additional Information: Departmental Category: Art History

ARTH 4169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5169 and CLAS 4169 and CLAS 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 4189 (3) Medieval Art

Focuses on one area of medieval art. Topics vary, but may include Carolingian, Ottonian, Romanesque, or Gothic art. Emphasizes critical thinking, methods of scholarly research, and development of writing skills.

Additional Information: Departmental Category: Art History

ARTH 4199 (3) Roman Architecture

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and CLAS 5199

Additional Information: Departmental Category: Art History

ARTH 4209 (6) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and CLAS 5209

Recommended: Prerequisites CLAS 1509 or ARTH 1509 or ARTH 2039 and ARTH 2049.

Additional Information: Departmental Category: Art History

ARTH 4229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5229 and CLAS 4229 and CLAS 5229

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Art History

ARTH 4269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5269 and CLAS 4269 and CLAS 5269

Recommended: Prerequisite CLAS 1509 or ARTH 1509.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Art History

Departmental Category: Asia Content

ARTH 4279 (3) Michelangelo (1475-1564)

Focuses on Michelangelo's long career, marked by outstanding achievements in sculpture, painting, architecture and poetry. Emphasizes his projects and achievements in light of 16th century artistic theory, including relationships to his contemporaries in the arts and literature.

Additional Information: Departmental Category: Art History

ARTH 4309 (3) Neoclassicism and Romanticism: 1760-1840

Surveys painting and sculpture in England and France from the last quarter of the 18th century through the first half of the 19th century.

Additional Information: Departmental Category: Art History

ARTH 4319 (3) European Art from 1830 to 1886

Surveys the major movements in painting in France and England from the Revolution of 1830 to the impressionist crisis of 1886. Emphasizes and discusses painting and major expressions in sculpture and architecture.

Additional Information: Departmental Category: Art History

ARTH 4329 (3) Modern Art 1

Provides an in-depth study of the fin de siècle, stressing postimpressionism, art nouveau and symbolism. Concludes with fauvism in France and the expressionist movement in Germany.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Art History

ARTH 4339 (3) Modern Art 2

Begins with early Picasso and cubism, including analytic and synthetic cubism and emphasizing the various isms of the 20th century. Also studies Italian futurism, de Stijl and the Bauhaus, dada and surrealism.

Additional Information: Departmental Category: Art History

ARTH 4419 (3) The Arts of Colonial Mexico and Peru

Examines important works, artists, and themes that comprise the artistic production of colonial Latin America. Focuses on the intermingling, convergence, and at times the clash of European, Amerindian, and African cultures, which established the foundation of Latin America's pluralism.

Recommended: Prerequisite ARTH 3729.

Additional Information: Departmental Category: Art History

ARTH 4449 (3) Arts of India and Southeast Asia

Surveys Indian painting, sculpture and architecture from its earliest phases in the Indus Valley through the Mughal Empire. Encompasses Hindu, Buddhist and Islamic art of the subcontinent and Southeast Asia, as well as Himalayan cultures directly impacted by India's artistic legacies. Department enforced prerequisite: one 3000-level art history course (minimum grade D-).

Additional Information: Departmental Category: Art History

ARTH 4459 (3) Precolumbian Art of Mesoamerica

Introduces students to the art, architecture, and cultures of Mesoamerica, a region that encompasses modern-day Mexico, Guatemala, Belize, and parts of El Salvador, and Honduras. Focuses on major Pre-Columbian art objects and monuments to learn about the societies and cultures from which they came. Also considers the various roles that the visual arts and architecture played in these societies. Covers Olmec through Aztec civilizations.

Recommended: Prerequisite ARTH 3729.

Additional Information: Departmental Category: Art History

ARTH 4559 (3) Twentieth-Century Architecture

Examines the major movements and development in European and American architecture, 1900-1960's. Considers the major styles, as well as cultural interactions, race/ethnicity, gender and class concerns as they relate to both the practice and profession of architecture.

Additional Information: Departmental Category: Art History

ARTH 4569 (3) United States Architecture

Examines architecture as it developed in the area now defined as the continental United States from early cultures to the present. Considers the major styles and issues of cultural interaction, race/ethnicity, gender and class concerns as they relate to the practice, theory, and profession of architecture.

Additional Information: Departmental Category: Art History

ARTH 4599 (3) Contemporary Architecture

Examines the history and theory of contemporary architecture. In the field of architecture, theory and history differ in that the former describes and analyzes past work, while theory offers alternative solutions or new strategies for approaching the discipline. Both of these components are key to understanding contemporary architecture, and this course will work between the two modes of understanding.

Additional Information: Departmental Category: Art History

ARTH 4609 (3) Critical Issues in Photography

Examines the history and theory of photography and the relationship of photography to the other arts, as well as to literary, political, social and philosophical issues. Analyzes the critical issues that inform photography through the writings of critics, historians, and photographers using both thematic and chronological approaches.

Additional Information: Departmental Category: Art History

ARTH 4629 (3) Degas Seminar

Introduces current Degas studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919, Capstone Seminar.

Additional Information: Departmental Category: Art History

ARTH 4639 (3) Manet Seminar

Introduces current Manet studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919, Capstone Seminar.

Additional Information: Departmental Category: Art History

ARTH 4649 (3) Impressionism & Post-Impressionism

Fosters creative study of the background and foundation in modern art. Considers 19th-century European painting and, to a lesser degree, sculpture, in relation to social, cultural, and political history from 1863 to 1900. Focuses on France, but gives attention to other countries as well.

Additional Information: Departmental Category: Art History

ARTH 4669 (3) Romanticism & Realism

Fosters creative study of the background and foundation of modern art. Considers 19th-century European (and, to a lesser degree, American) painting and sculpture in relation to social, cultural, and political history from 1789 (the French Revolution) to 1863 (the Salon des refusés). Focuses on France, but gives attention to other countries as well.

Additional Information: Departmental Category: Art History

ARTH 4679 (3) Romanticism Seminar

Introduces current Romanticism studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles.

Additional Information: Departmental Category: Art History

ARTH 4689 (3) Post-Impressionism Seminar

Introduces current Post-Impressionism studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles.

Additional Information: Departmental Category: Art History

ARTH 4699 (3) The Idea of Art

Studies contemporary critiques of historical ideas about the twin institutions of the university and the museum and the role of art history in the cultural mission of both. Explores fundamental questions about the role of art in society through weekly discussions of readings, a class presentation, and final research. Fulfills ARTH 4919 capstone seminar required for art history majors.

Additional Information: Departmental Category: Art History

ARTH 4739 (3) The Intellectual Roots of Italian Renaissance Art

Studies critical issues raised in the literature on art, focusing on Renaissance interpretations of key historical themes such as imitation and decorum. Carefully examines the language used in primary sources (available in English).

Additional Information: Departmental Category: Art History

ARTH 4749 (3) Italian Renaissance Art: Studies in the Exchange between Theory and Practice

Addresses how artists developed new compositional procedures, graphic techniques and audiences, and how these procedures were theorized in an age when artists' intellectual and social status rose dramatically. Explores reception of new graphic technology. Studies specific commissions and primary texts in depth.

Additional Information: Departmental Category: Art History

ARTH 4769 (3) Gender Studies in Early Modern Visual Culture

Examines 15th and 16th century European ideas about women from a variety of feminist perspectives. Focuses on recent contributions to history of women as they intersect with the visual arts.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4769

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Art History

ARTH 4779 (3) Multicultural Perspectives on New Mexican Santos

Reflects upon the question: in what sense were the regional variants of European devotional images the effects of meaningful cultural interaction? Evidence considered includes oral traditions, pueblo pottery and painting, emphasizing interpretations that respect rights of communities to maintain privacy.

Additional Information: Departmental Category: Art History

ARTH 4909 (1-3) Independent Study---Art History

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Art History

ARTH 4919 (3) Capstone Seminar: Topics in Art History

Seminar course dealing with selected areas or problems within the history of art. Consult current online Schedule Planner for seminar topic.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Art History (AAAH) majors only.

Additional Information: Departmental Category: Art History

ARTH 4929 (1-3) Special Topics in Art History

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5929

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 4939 (3-6) Art Museum Internship

Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5939

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 4959 (3) Art History Honors Thesis

May be elected during the final semester. Consists of a substantial, original written thesis. Requires faculty sponsorship. Does not guarantee a student will receive honors.

Additional Information: Arts Sciences Honors Course

Departmental Category: Art History

ARTS 1002 (3) Beginning Drawing 1

Formal visual elements are presented through a study of spatial relationship. Built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence and promote an understanding of the visual elements and their role in the development of pictorial space.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 1003 (3) Printmaking for Non-Majors

Emphasizes processes involved with both nonmultiple and multiple methods, including but not limited to metal plate etching (intaglio), lithography, collagraph, woodcut, linoleum cut, Xerox transfer, and monotype. Places equal emphases on developing drawing skills and understanding design principles.

Additional Information: Departmental Category: Printmaking

ARTS 1010 (3) Introduction to Studio Art

Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.

Requisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Foundations

ARTS 1012 (3) Drawing for Non-Majors

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.

Additional Information: Departmental Category: Painting/Drawing

ARTS 1020 (3) Introduction to Studio Art 2

Presents creative activity conceptually and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Art and art history majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Foundations

ARTS 1030 (3) Principles of Color

Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.

Additional Information: Departmental Category: Foundations

ARTS 1171 (3) Photography for Non-Majors

Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable film camera.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 2171

Additional Information: Departmental Category: Photography

ARTS 1202 (3) Basic Painting

The aim of this course is to develop the basic skills, techniques and processes of painting with an understanding of basic colour principles. This integration of paint application and colour principle will develop awareness that painting and colour are used, not only as mediums for representation, but also as mediums for expressive purposes. Demonstrations, lectures, group and individual critiques will be given throughout the course.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade D-). Requires a corequisite course of ARTS 1020. Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 1212 (3) Painting for Non-Majors

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.

Additional Information: Departmental Category: Painting/Drawing

ARTS 1514 (3) Sculpture for Non-Majors

Offers an orientation involving three-dimensional form and application. Studies expressive and conceptual problems based on non-objective form relationships in various sculptural materials. May not be repeated.

Additional Information: Departmental Category: Sculpture

ARTS 1875 (3) Ceramics for Non-Majors

Encompasses broad and fundamental uses of clay. Basic instruction and demonstration of throwing, hand building, and primitive clay forming methods. Investigates utility, function, and ceramics in the broader context of contemporary art. Slide presentations explore historical and contemporary attitudes involving ceramics.

Additional Information: Departmental Category: Ceramics

ARTS 2004 (3) Participatory Objects (Sculpture and Post-Studio Practice)

Looks at the tendency in contemporary sculpture to create interactive objects and experiences for the viewer. Students in this course are required to create hands-on projects, participate in group critiques and develop presentations and research projects.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Departmental Category: Sculpture

ARTS 2022 (3) Beginning Drawing

Emphasizes proportion and perspective through observation based drawing. Students are introduced to various drawing materials and learn to translate what they see into drawing media using two basic subjects: still-life and the figure.

Requisites: Requires prerequisite course of ARTS 1010 and prerequisite or corequisite course of ARTS 1020 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Painting/Drawing

ARTS 2085 (3) Ceramics 2: Handbuilding

Introduces techniques of hand-built clay forms as they relate to function and nonfunction. Various clay techniques, glazing and firing procedures are explored. Emphasizes ceramics in the broader context of contemporary art. May not be repeated.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Ceramics

ARTS 2095 (3) Ceramics 2: Wheelthrowing

Introduces techniques of wheel-thrown forms as they relate to function and nonfunction. Explores various glazing and firing methods. May not be repeated.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Ceramics

ARTS 2104 (3) Colossal Objects (Sculpture and Post-Studio Practice)

Focuses on the conception, design and production of art works that are larger than human scale. Each object will be the result of individual and team design collaboration. Primarily focuses on sculpture constructed and engineered from metal although other materials are welcome.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Departmental Category: Sculpture

ARTS 2126 (3) Digital Art 1

An introductory course in the use of the personal computer to create and process images in the visual arts.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Media Arts

ARTS 2171 (3) Photography 1

Introduces techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends. Students must have an adjustable camera.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 1171

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Photography

ARTS 2191 (3) Photography 2

Explores more sophisticated technical and conceptual skills to the creative process.

Requisites: Requires prerequisite course of ARTS 2171 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Photography

ARTS 2222 (3) Beginning Painting

Emphasizes color and descriptive mark making through observation based painting. Students are introduced to various painting materials and learn to translate what they see into painting media using two basic subjects: still-life and the figure.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Painting/Drawing

ARTS 2244 (3) Drawing for Sculpture (Sculpture and Post-Studio Practice)

Explores and examines many relationships between sculpture and drawing. Projects will explore 2-D drawing and mixed media projects through the lens of sculptural practice. Scale, materials and styles will be researched along with topics such as the artists proposal, investigative processes, drawing and sculptural installations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Departmental Category: Sculpture

ARTS 2303 (3) Beginning Relief

Emphasis on introductions to the concepts and techniques of relief processes, including white line, black line and four color reductive processes. Students will gain a working knowledge of fundamental relief processes, plus safe and appropriate use of all materials and equipment in the studio.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 2403 (3) Beginning Intaglio

Emphasizes an introduction to techniques of intaglio and a focus on working with copper and ferric chloride. Historical approaches and use through contemporary materials/concepts. Emphasizes interrelationship of process, materials and ideas/aesthetics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 2413 (3) Beginning Lithography

Exploration into stone lithography and aluminum plate is presented in this class. Individual direction and development of conceptual focus and studio techniques are important objectives in this class. Safer ways to make lithographs is highlighted and the toxic traditional methods are left behind.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 2423 (3) Beginning Screenprinting

Exploration into screenprinting at the basic level, using stencil-making processes for screenprinting with acrylic-based screenprinting inks. Emphasis is placed on exploring and developing challenging concepts, mastering basic techniques and creating compositions and visual images that successfully convey your concept and challenge the viewer. Course is focused on the art of fine art printing on paper.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 2433 (3) Beginning Alternative Printmaking

Presents creative development of concepts in printmaking beyond the traditional two-dimensional image on paper that is contained in a portfolio or frame. Focus will be made on expanding the concept of what is a print will be explored in relation to each student's studio practice and interests.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 2453 (3) Beginning Monotype

Introduces the monoprint and monotype methods. Students will learn the about making non-editioned prints using a variety of four or more technical approaches. These processes will be discussed and demonstrated in depth. Students will develop a portfolio of finished prints during the semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 2504 (3) Basic Sculpture: Materials and Techniques

Introduces the basic properties of metal, wood and mold making. Students will explore and demonstrate an understanding of basic fabrication methods involved in each element. Students will investigate both traditional and non-traditional working methods and will consider how materials and techniques inform sculptural concepts.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Sculpture

ARTS 2524 (3) Visual Thinking (Sculpture and Post-Studio Practice)

Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Investigates form in terms of the organizing principles of three-dimensional design and its application to contemporary sculpture. Includes lecture and studio projects.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Sculpture

ARTS 3002 (3) Drawing Alternative Process/Materials

Continuation of Drawing 2. Offers creative possibilities in drawing and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated once.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 2002 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 3004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)

Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3012 (3) Figure Drawing

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Formerly ARTS 2002.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 3014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)

Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, this course provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3017 (1-3) Special Topics in Studio Arts

Introduces timely subjects in studio arts courses that cannot be offered on a regular basis. Information concerning the topics in any given semester is available prior to pre-registration from the department of Art and Art History.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 3022 (3) Intermediate Drawing

In addition to being a continuation of Beginning Drawing, Intermediate Drawing will focus on a non-traditional approach to making images encouraging conceptual development, experimentation and research. Moving beyond observation based drawings multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.

Requisites: Requires prerequisite courses of ARTS 1010, 1020 and 2022 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Painting/Drawing

ARTS 3054 (3) Modules and Multiples (Sculpture and Post-Studio Practices)

Exposes students to the practice of creating large works through smaller multiples and modules. By learning about the practices of artists such as Andy Warhol, Joseph Beuys, Rachel Whiteread and Robert Gober, along with many others, students will generate an understanding and appreciation for the module and multiple in contemporary art practice. Students will learn to cast using plaster and other type of molds, will be introduced to jigs as a way to streamline production of multiple objects and will work with found objects. Students will be required to complete 3 projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Departmental Category: Sculpture

ARTS 3085 (3) Ceramics 3

Deals with further exploration of techniques approached in ARTH 2085 and ARTH 2095. Students are encouraged to develop personal concentration in relation to medium.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 2085 and ARTH 2095 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Ceramics

ARTS 3097 (1-3) Special Topics - Non-Studio

Introduces timely subjects in fine arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the Department of Art and Art History.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade D-). Restricted to Studio Arts (AASA) or Fine Arts-Studio (BASA and BFAS) or Fine Arts-Art History (BAAH) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 3124 (3) Intervention, Exchange, and Duration (Sculpture & Post-Studio Practice)

Focuses on the production of works of art outside of the traditional studio, museum and gallery. Projects will be designed to interrupt, intervene, co-opt, provide a service, exist for a defined amount of time, or engage a site, community or situation. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Departmental Category: Sculpture

ARTS 3184 (3) Nothing Flat: Project a Week (Sculpture & Post-Studio Practice)

Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks. Formerly ARTS 2184.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Departmental Category: Sculpture

ARTS 3191 (3) Photography 3

Continues the exploration of the possibility of individual photographic expression. Students are encouraged to discover and develop a personal position in relation to the medium.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 2191 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Photography

ARTS 3196 (3) Photo-Imaging

Introduces techniques, software, and related concepts of digital photography as art. Emphasizes digital photography as a means to formal and expressive ends.

Requisites: Requires prerequisite course of ARTS 1171 (minimum grade D-).

Additional Information: Departmental Category: Media Arts

ARTS 3202 (3) Painting Alternative Process/Materials

Continuation of Painting 2. Offers creative possibilities in painting and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3212 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 3212 (3) Figure Painting

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated. Formerly ARTS 2202.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 3222 (3) Intermediate Painting

In addition to being a continuation of Beginning Painting, this course focuses on a non-traditional approach to making paintings encouraging conceptual development, experimentation and research. Moving beyond observation based painting multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2222 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Painting/Drawing

ARTS 3224 (3) Picturing Sculpture

Explores the many ways photography and other forms of imagery have been utilized in the field of sculpture. Students will start from the sculptural, but those objects and installations will function as an intermediary to creating final work that will rest in the image. Include lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3236 (3) Electronic Arts Survey

Explores the development of video as an art form through tape screenings, readings, lectures, and discussions. Prerequisite for further studies in video production.

Additional Information: Departmental Category: Media Arts

ARTS 3303 (3) Relief 1

Continued exploration of relief processes: various techniques of the collage process in combination with the art and process of the collograph. Examining the collage aesthetic, creating collages and collograph prints from found materials and objects. Other skills to be focused on include registration methods, blend rolls and the experimentation with rubbings.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2303 (all minimum grade D-).

Additional Information: Departmental Category: Printmaking

ARTS 3354 (3) Bend, Build, Burn: Sculpture in Wood

Focuses on the production of works of art in wood. Class projects explore building, bending, and burning with wood. Focuses on sculptural constructed objects although possibilities of installation, site-specific and public art will also be explored.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade D-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3384 (3) Fleeting and Found: Ephemeral Sculpture

Focuses on creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy and degradation will be explored. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade D-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3403 (3) Intaglio 1

Exploration into techniques of Intaglio with a focus on working with copper and ferric chloride. Historical approaches and use through contemporary materials and concepts. Emphasis is placed on mastering basic techniques, creating compositions and visual images, and exploring and developing concepts that challenge the viewer.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2403 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 3413 (3) Lithography 1

Introduces the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Not available to freshmen. Taught with ARTS 4413 and ARTS 5413.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 3423 (3) Screen Printing 1

Introduces the study of silkscreen techniques, emphasizing creativity, individual development, and experimentation in contemporary silkscreen processes.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 3433 (3) Alternative Printmaking 1

Continued exploration into the development of alternative techniques and materials, methods of extending the print beyond 2-dimensions and expanding the concept of what is a print will be explored in relation to each student's studio practice and interests.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2433 (all minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 3434 (3) Collaboration: Art and Collective Action

Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3453 (3) Monotype 1

A continued exploration in the monoprint and monotype methods. Use of a varied grouping of matrixes will be the focus of this class. Students will develop a portfolio of finished prints during the semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2453 (all minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 3504 (3) Sculpture 3: Experiments 1

Explores materials, methods, and techniques through a series of assignments emphasizing individual ideas and their relationship to contemporary aesthetics.

Requisites: Requires prerequisite courses of ARTS 2504 and ARTS 2524 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Sculpture

ARTS 3514 (3) Sculpture 3: Experiments 2

Explores individual concepts and ideas and their relationship to contemporary issues and aesthetics. a series of assignments are worked out with the instructor based on individual interest.

Requisites: Requires prerequisite course of ARTS 3504 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Sculpture

ARTS 3604 (3) Beyond the Studio: Post-Studio Art Practice

Overview of post-studio art practice and covers the historical landscape of artists and projects that have pushed "beyond the studio" since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3614 (3) Lost in Space: Installation Art

Students learn how to develop ideas in relation to installation art, exhibition spaces, and explore practical skills to help carry out their ideas. Includes lectures, readings and discussion, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3702 (3) Special Focus in Painting and Drawing

Offers varied focus and special topics in painting, drawing, and related media to explore specialized directions and creative possibilities.

Emphasizes experimentation. Content varies by semester; contact individual instructor for more information.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ARTS 2002 or ARTS 2202 (minimum grade D-).

Recommended: Prerequisite ARTS 3002 or ARTS 3202.

Additional Information: Departmental Category: Painting/Drawing

ARTS 3714 (3) Experimental Structures (Sculpture and Post-Studio Practice)

Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 3841 (1-3) Undergraduate Independent Study---Photography

Reserved only for special projects in photography, not offered in the curriculum. Requires a detailed proposal, instructor's signature and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3191 or ARTS 4161 (minimum grade D-).

Additional Information: Departmental Category: Photography

ARTS 3842 (1-3) Undergraduate Independent Study---Painting

Reserved for special projects in painting not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3202 (minimum grade D-).

Additional Information: Departmental Category: Painting/Drawing

ARTS 3845 (1-3) Undergraduate Independent Study---Ceramics

Reserved for special projects in ceramics not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D-).

Additional Information: Departmental Category: Ceramics

ARTS 3847 (1-3) Independent Study

Reserved for special projects not offered in the curriculum. Department enforced prerequisite: detailed proposal, instructor sponsorship, and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 3906 (1-3) Undergraduate Independent Study---Video

Reserved for special projects in video not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 4246 (minimum grade D-).

Additional Information: Departmental Category: Media Arts

ARTS 3937 (1-6) Internship

Gives upper-division students the opportunity to work in public or private organizations on assignments relating to their career goals, and allows them to explore the relationship between theory and practice in their major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4002 (3) Advanced Drawing/Portfolio

Continuation of Drawing 3. Advanced studio class in drawing for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3002 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 4004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)

Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather, and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 4014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)

Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 4017 (1-3) Special Topics in Studio Arts

Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5017

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4024 (3) Public Art

Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5024

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524 and ARTS 3504.

Additional Information: Departmental Category: Sculpture

ARTS 4085 (3) Ceramics 4

Develop a personal creative practice through self-generated, independent projects. The focus is on developing an individual studio discipline through experimentation, research, reading and writing and examining the work in individual critiques.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Ceramics

ARTS 4087 (3) Selected Topics in Contemporary Art

Selectively studies significant areas of visual art of the last decade including major critical opinions.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5087

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite of 20 units of ARTS or ARTH coursework completed (minimum grade D-).

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4095 (3) Special Topics in Ceramics

Designed for students majoring in ceramics.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5095

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Ceramics

ARTS 4097 (1-3) Special Topics-Non-Studio

Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5097

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4104 (3) Performance/Installation

Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5104

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Sculpture

ARTS 4107 (1-3) Special Topics

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4117 (3) BFA Seminar

For students intending to pursue graduate work and/or a professional career in art. Emphasizes the development of a critical overview of their work and interests and how they relate to the problems of professional activity.

Requisites: Restricted to Studio Arts (AASF) majors only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4118 (3) Visiting Artist Program

Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. Department enforced prerequisite: portfolio review.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5118

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Visiting Artist Program

ARTS 4126 (3) Digital Art 2

Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5126

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 2126 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Media Arts

ARTS 4127 (3) Art from Nature

Provides an opportunity for advanced students to create nature based art. Studio work and/or appropriate on-site works will be generated through readings and individual and group experiences of nature.

Requisites: Requires prerequisite of one 4000-level ARTS course (minimum grade D-).

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4130 (3) Integrated Media

Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5130

Additional Information: Departmental Category: Integrated Arts

ARTS 4154 (3) Metalsmithing 1

Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5154

Requisites: Requires prerequisite courses of ARTS 1010, 1020, at least one 2000-level ARTS course, and at least one 3000-level ARTS course (all minimum grade D-).

Additional Information: Departmental Category: Sculpture

ARTS 4161 (3) Photography 4

Explores advanced techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3191 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Photography

ARTS 4171 (3) New Directions in Photography

Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5171

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ARTS 3191 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Photography

ARTS 4176 (3) New Directions in Digital Art

Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5176

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 2126 and ARTS 4316 or ARTS 5316 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Media Arts

ARTS 4196 (3) Advanced Photo-Imaging

Offers an in-depth exploration of digital imaging in the context of the history, aesthetics, and tradition of photography as contemporary art. Emphasis is on digital manipulation, output and individual growth and development.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5196

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 2191 (minimum grade D-).

Additional Information: Departmental Category: Media Arts

ARTS 4202 (3) Advanced Painting/Portfolio

Continuation of Painting 3. Advanced studio class in painting for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3202 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 4217 (3) Art and Race/Ethnicity

Examines the impact of race and ethnicity on the art world. Examines the art of Native Americans, Chicanos, Puerto Ricans, Cuban Americans, Latin Americans, African Americans, Asian Americans and ethnic and cultural mixing. Grounded in Critical Multicultural Theory and Postcolonial Theory.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5217

Recommended: Prerequisites ARTS 1300 and ARTS 1400 or instructor consent required.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4226 (3) Advanced Computer Imaging

Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5226

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 4126 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Media Arts

ARTS 4236 (3) Electronic Arts Survey 2

Continuation of electronic arts survey. Explores the development of video as an art form. Prerequisite for further studies in video production.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5236

Additional Information: Departmental Category: Media Arts

ARTS 4246 (3) Beginning Video Production

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5246 and FILM 4240

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Media Arts

ARTS 4303 (3) Relief 2

Continued exploration into the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3303 (all minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 4316 (3) History and Theory of Digital Art

Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5316

Requisites: Requires prerequisite course of ARTS 2126 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Media Arts

ARTS 4327 (3) Biennial Art

Covers art represented in the most current international biennials (Documenta, Venice Biennale, Sao Paulo Biennial, Havana Biennial, Gwanju Biennial and the Istanbul Biennial). Art will be analyzed by applying postmodern theory, postcolonial theory and international theoretical perspectives that have not yet been integrated into Western thought.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5327

Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade D-).

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4346 (3) Intermediate Video Production

Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5346 and FILM 4340

Requisites: Requires prerequisite course of ARTS 4246 (minimum grade D-).

Additional Information: Departmental Category: Media Arts

ARTS 4403 (3) Intaglio 2

Continued exploration of techniques of intaglio process, including non-acid and ferric chloride techniques with copper as the main matrix being used. Possible processes focused on include: photo etching using solar plates and introduction to printing ala poupee wiping, chine colle and basic color. Building a unified body of work is the main focus. .

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3403 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 4413 (3) Lithography 2

Continues the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Digital imaging and nontoxic processes are emphasized as much as possible. Taught with ARTS 3413 and ARTS 5413.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3413 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 4423 (3) Screen Printing 2

Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3423 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 4433 (3) Alternative Printmaking 2

Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5433

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3433 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 4434 (3) Collaboration: Art & Collective Action

Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade D-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 4444 (6) Art and Rural Environments Field School

Puts students in touch with various rural landscapes in Colorado. Takes place off campus each summer during Maymester. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5444

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade D-).

Recommended: Prerequisite ARTS 2504.

Additional Information: Departmental Category: Sculpture

ARTS 4446 (3) Advanced Video Production

Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5446 and FILM 4440

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 4346 (minimum grade D-).

Additional Information: Departmental Category: Media Arts

ARTS 4453 (3) Monotype 2

Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5453

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3453 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Printmaking

ARTS 4457 (3) Sound Art Seminar

Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5457

Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade D-).

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4504 (3) Advanced Sculpture Studio

Students in this course will be required to complete projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 3504 and ARTS 3514 (all minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Sculpture

ARTS 4604 (3) Beyond the Studio: Post-Studio Art Practice

Overview of Post-Studio art practice and covers the historical landscape of artists and projects that have pushed "beyond the studio" since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade D-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 4607 (3) Art and Social Change

Examines how art is used as an agent for social change. Among topics addressed by artists interested in social change are: immigration, HIV/AIDS, illness/disease, ecology/the environment, feminism, gay and lesbian issues, war, violence, racial and ethnic minorities, etc.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5607

Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade D-).

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4714 (3) Experimental Structures (Sculpture and Post Studio Practice)

Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade D-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Departmental Category: Sculpture

ARTS 4717 (1-3) Studio Critique

Consists of consultations with faculty on individual studio problems and projects. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Seminars/Special Topics

Art History - Bachelor of Arts (BA)

The Art History area encourages students to analyze art within many contexts, including historical, intellectual, political, social, and stylistic. In addition to examining diverse methodologies, introductory and upper division courses cover artistic production from a wide range of cultures and periods including: Western art and architecture—Ancient, Medieval, Early Modern (Renaissance, Baroque), Modern, and Contemporary; and Art and Architecture of Asia and the Americas (Pre-Columbian, Colonial Latin American, Native North American).

Concurrent Degree Program

BA/MA in Art History

This program is open only to students enrolled in the BA art history degree program at the University of Colorado Boulder.

It is expected that the BA/MA program be completed within five years. Both degrees, BA and MA, are awarded simultaneously upon meeting all the requirements for each degree. Six credit hours (two courses) may be shared between the two programs:

1. one course outside the Department of Art and Art History, at the 3000 level or above
2. ARTH 6929

There is a formal application process with letters of recommendation, statement of intent, transcripts, GRE scores and a writing sample, as required for the two-year MA program. Students must have a minimum overall GPA of 3.00 and a GPA of 3.60 or above in the major of art history at the time of application. They take the GRE and formally apply to the graduate program during the second semester of their third (junior) year and begin taking graduate courses in the first semester of their fourth

(senior) year. By the end of the fourth year, students must complete the language requirement of at least three progressive semesters at the college level or above, in a language appropriate to their studies.

During the second semester of their senior year, students should select a thesis advisor from among the art history faculty. This faculty member will direct the student’s thesis and chair the student’s mid-program review committee. Students will be evaluated through a mid-program review during the last two weeks of April of their senior year. This is the equivalent of the first year review in the two-year MA program. It focuses on a review of student course work and performance, on selecting the major and minor areas of study in preparation for the comprehensive exam (see below) and on selection of a thesis topic.

Students will register for thesis hours during the second semester of their fifth year, pending successful completion of the comprehensive exam and approval of their thesis abstract. They will take the comprehensive exam during the first week of the second semester of the fifth year. Upon the successful completion of their comprehensive exam, they will obtain approval of their thesis abstract from their thesis committee (“pre-thesis review”) by the end of the second week of the second semester of their fifth year.

In all other details, the graduate portion of the BA/MA program is identical to the two-year MA program, as stipulated above.

Requirements

Students must complete a total of 120 semester credit hours, 45 of which must be upper-division.

Required Courses and Credit Hours

Required Courses		
ARTS 1010 & ARTS 1020	Introduction to Studio Art and Introduction to Studio Art 2	6
ARTH 1300 & ARTH 1400	History of World Art 1 and History of World Art 2	6
ARTH 4919	Capstone Seminar: Topics in Art History	3
	3000-level art history courses	9
	4000-level art history courses	12
Electives		
	ARTS or ARTH electives; fourth semester or higher foreign language is also acceptable	6
Total Credit Hours		42

Distribution Requirements

Complete at least 6 hours at the 3000 or 4000 level in each of the following areas:

- **Area 1:** African, Asian, Colonial Latin American, Pre-Columbian, Native North American, Early Modern (1400-1750)
- **Area 2:** Ancient/Late Antiquity, Medieval
- **Area 3:** Modern and/or Contemporary

Students are strongly recommended to take at least one of the following **Area 1** courses at the 3000 or 4000 level: African, Asian, Latin American, Pre-Columbian, Native North American.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only

refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in art history, students should meet the following requirements:

- Declare the major by the beginning of the second semester.
- By the end of the third semester, complete lower-division studio courses, lower-division art history courses and two classes in upper-division art history.
- By the end of the sixth semester complete up to 32 credit hours in the major.

Art History - Minor

A minor is offered in art history. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. For more information, visit the Department of Art & Art History (<http://cuart.colorado.edu>) website.

Required Courses and Credit Hours

The minor in art history requires a minimum of 18 credit hours in art history course work, as follows:

Required Courses		
ARTH 1300	History of World Art 1	3
ARTH 1400	History of World Art 2	3
Electives		
12 credit hours of ARTH courses at the 3000- or 4000-level, with at least two courses at the 4000-level. At least one upper-division course must be completed in each of the following areas:		12
Ancient, Asian, Pre-Columbian or Native American		
Medieval, Early Modern (Renaissance/Baroque) or Colonial Latin American		
Modern, Contemporary or Theory		
Total Credit Hours		18

All course work applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree course work must be equal to 2.000 (C) or higher.

Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Art Practices - Bachelor of Arts (BA)

The undergraduate degree in art practices emphasizes knowledge and awareness of:

- the significance of the major monuments in art history, with an emphasis on contemporary art;
- at least one discipline of studio art;
- related critical issues in studio practice; and
- a wide range of approaches.

In addition, students completing a degree in studio art are expected to acquire the ability and skills to:

- analyze their own works of art in terms of form and content;
- interpret the work of others;
- execute ideas in one or more artistic media;

- demonstrate artistic ability and technical proficiency in one chosen medium; and communicate in verbal and written form the particular conceptual and perceptual attitudes and stances of their own artistic production.

The BA in Art Practices allows students to explore their interests and refine their skills in Art History, Ceramics, IMAP (photography, digital media, video, integrated arts), Painting and Drawing, Printmaking, and Sculpture and Post-Studio Practice. Students gain a broad understanding of the field of contemporary art and experience in contemporary art practices while pursuing a liberal arts degree at the university. **(Portfolio submission is NOT required to declare art practices as a major or minor).**

Students must complete 39 credit hours in the major. Admission to the BFA program requires a major in the Department of Art and Art History with a minimum of 30 credit hours of ARTS/ARTH and/or transfer credit hours and successful portfolio review.

Required Courses and Semester Credit Hours

Required Courses

ARTS 1010 & ARTS 1020	Introduction to Studio Art and Introduction to Studio Art 2	6
ARTH 1300 & ARTH 1400	History of World Art 1 and History of World Art 2	6
Two 2000- level courses in area of emphasis		6
Any two upper-division art history courses		6
Upper-division studio emphasis (minimum)		12
Electives		
ARTS or ARTH electives		3
Total Credit Hours		39

Graduating in Four Years with a BA in Art Practices

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in studio arts, students should meet the following requirements:

- Declare major by the beginning of the second semester.
- Complete ARTS 1010 and ARTS 1020, two level-1 studio classes and lower-division art history courses by the end of the third semester.
- Complete 30–36 credit hours in the major by the end of the sixth semester.

Art Practices - Bachelor of Fine Arts (BFA)

The BFA in Art Practices is a more in-depth degree intended for motivated students interested in and committed to pursuing a professional career in the arts. Students gain training in studio techniques and post-studio practice, an overview of historical and contemporary artists and movements, and an introduction to criticism. Additionally, students participate in the BFA Seminar, are eligible to enroll in the Visiting Artist Seminar, and present work in the culminating BFA exhibition. *This is a highly selective program. Only art majors may apply to the program with a portfolio and application materials, which are reviewed once in the fall and*

once in the spring. For application information please see below, or stop by the front office, room 330 in the VAC to pick up an application. Any BFA related questions can be directed to Anna Parsons (303) 492-3580.

For overall degree requirements run your degree audit and consult with your advisor.

You must have completed 30 semester hours in the major to apply for the BFA.

Click here to view current: BFA Application (<http://cuart.colorado.edu/wp-content/uploads/2015/10/BFA-Application-Fall-2015-Summer-20161.pdf>)

Notes and Suggestions for a Successful Application

We are looking for students who will be able to make excellent work, and work within the schedule required of a BFA student. Your track record as a student, therefore, is a very important consideration in our decision to accept you into the BFA program. To be a successful applicant, you should have:

- an excellent attendance record for your courses
- all assignments for courses completed on time
- ambitious projects: do more than what is asked for you for each assignment
- clear internal motivation. You shouldn't rely on external pressure or deadlines to make work in the studio

In the application, we are looking for:

- a thoughtful artist statement that demonstrates you have insight into your own work, and addresses the questions you are asking of yourself in your studio practice
- a body of work that goes beyond assignments completed as class work; we should start to see cohesion in the work you are making
- a high level of technical proficiency
- formal decisions in your work that support your ideas
- overall, a carefully constructed application, with good images of your work

Always feel free to consult with any of the faculty for advice on putting together your BFA application. We wish you the best of luck!

Students must complete 63 credit hours toward the major, of which at least 12 upper-division credit hours must have been completed at CU Boulder.

Students must present and pass a portfolio review to be eligible for the BFA degree (a minimum of 30 ARTS/ARTH credit hours are required to apply).

Required Courses and Credit Hours

Required Courses

ARTS 1010 & ARTS 1020	Introduction to Studio Art and Introduction to Studio Art 2	6
ARTH 1300 & ARTH 1400	History of World Art 1 and History of World Art 2	6
Two 2000-level studio courses in area of emphasis		6
Any two upper-division art history courses		6
Upper-division studio courses		18

Painting and drawing majors must take any sequence of courses culminating in ARTS 4002 or ARTS 4202.

Ceramics majors must take ARTS 4085 and ARTS 4095.

ARTS 4117	BFA Seminar	3
Electives		
Electives in ARTS or ARTH		18
Total Credit Hours		63

Note: Printmaking majors are not required to take ARTS 1003, and may register for ARTS 3403, ARTS 3413 and ARTS 3423 as sophomores.

Graduating in Four Years with a BFA in Art Practices

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in studio arts or divisional studio arts, students should meet the following requirements:

- Declare the major by the beginning of the first semester, freshman year.
- By the end of the third semester, complete ARTS 1010 and ARTS 1020, ARTH 1300 and ARTH 1400, 9 credit hours of lower-division studio, two 2000-level courses and one lower-division or upper-division studio or art history course (27 credit hours).
- Apply for the BFA in the fourth or fifth semester, with a minimum of 30 credit hours in the major.
- By the end of the sixth semester, complete up to 48 credit hours in the major.

Art Practices - Minor

The Department of Art and Art History offers a minor Art Practices for undergraduate students who are interested in studio arts but cannot undertake the Arts Practices major.

Requirements

The requirements for the minor in art practices include:

- a minimum of 21 credit hours in art practices coursework;
- all course work applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. The grade point average for all minor degree course work must be equal to 2.000 (C) or higher, and
- students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Art history majors may apply ARTS 1010 and ARTS 1020 (both major requirements) toward the completion of an art practices minor, but may not apply major electives toward completion of the minor.

Required Courses and Credit Hours

ARTS 1010	Introduction to Studio Art	3
ARTS 1020	Introduction to Studio Art 2	3
6 hrs of ARTS lower or upper division elective courses		6
At least 9 credit hours of ARTS courses at the 3000- or 4000-level		9
Total Credit Hours		21

Asian Languages and Civilizations

The Department of Asian Languages and Civilizations, founded in 1982, offers undergraduate majors in Chinese and Japanese, minors in Arabic, Chinese, Hindi/Urdu and Japanese, and certificates in Middle Eastern and Islamic Studies and South Asian Languages and Civilizations, as well as language, literature and culture courses in Arabic, Chinese, Farsi, Hindi/Urdu, Japanese and Korean.

Undergraduate students receive a thorough grounding in the modern language, an introduction to the classical language and literature and a broad familiarity with the literary and cultural history of their selected area.

Students interested in Chinese or Japanese (<https://www.colorado.edu/alc/undergraduate/majors>) are encouraged to broaden their academic horizon through a double major, combining either language with another field of interest. Likewise, students in all Asian Languages and Civilizations programs as well as programs outside the department can pursue one of the department's minors (<https://www.colorado.edu/alc/undergraduate/minors>) or certificates (<https://www.colorado.edu/alc/undergraduate/certificates>) as a way of broadening their career options.

Before registering for specific courses, students should consult with a departmental advisor (<https://www.colorado.edu/alc/undergraduate/advising>) concerning appropriate placement in language classes beyond the beginning level.

In addition to language instruction courses, the department offers several courses taught in English (<https://www.colorado.edu/alc/courses>). These courses provide an excellent introduction to the literary and cultural histories of the areas involved. They are open to all interested students and do not require previous study of the language or subjects addressed.

The department strongly encourages all students to participate in Study Abroad to enrich their studies in our programs. For information about programs throughout the world, contact the Education Abroad office (<http://abroad.colorado.edu>).

Recent graduates have found positions in such fields as government service, international business and secondary-school teaching; others have gone on to graduate study in Chinese or Japanese. Additional career opportunities can be found on the Career Services website (<http://www.colorado.edu/career>).

For more information about the Department of Asian Languages and Civilizations, please visit the department website (<https://www.colorado.edu/alc>).

Course codes for the department's six programs are ARAB, CHIN, FRSI, HIND, JPNS and KREN.

Bachelor's Degrees

- Chinese - Bachelor of Arts (BA) (p. 190)
- Japanese - Bachelor of Arts (BA) (p. 191)

Minors

- Arabic - Minor (p. 193)
- Chinese - Minor (p. 193)
- Hindi/Urdu - Minor (p. 193)

- Japanese - Minor (p. 194)

Certificates

- Middle Eastern and Islamic Studies - Certificate (p. 194)
- South Asian Languages and Civilizations - Certificate (p. 195)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

ARAB 1010 (5) Beginning Arabic 1

Introduces students to speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. This course is proficiency-based. All activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 1011 (3) Introduction to Arab and Islamic Civilizations

Provides an interdisciplinary overview of the cultures of the Arabic-speaking peoples of Southwest Asia and North Africa from the rise of Islam in the 7th century to the present. Readings include historical, religious, literary and cultural texts from both the medieval and modern eras. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 1020 (5) Beginning Arabic 2

Continuation of ARAB 1010.

Requisites: Requires prerequisite course of ARAB 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 2110 (5) Intermediate Arabic 1

Proficiency-based course emphasizes speaking, listening, reading, and writing. Covers a variety of topics. Students give classroom presentations and write short essays in Arabic. Speaking ability is assessed through an oral proficiency interview.

Requisites: Requires prerequisite course of ARAB 1020 (minimum grade C).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language
Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 2120 (5) Intermediate Arabic 2

Continuation of ARAB 2110.

Requisites: Requires prerequisite course of ARAB 2110 (minimum grade C).

Additional Information: Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 2231 (3) Love, Loss and Longing in Classical Arabic Literature

Surveys Arabic literature from the sixth through the eighteenth centuries. It offers an introduction to Arabic literature, namely prose and poetry, through its key texts as well as the range of themes and techniques found in this literature, and it lays the groundwork for contextualizing the literature in the framework of other literary traditions. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 2320 (3) The Muslim World, 600-1250

Focusing on the history of the Muslim World in the age of the caliphates, this course takes an interdisciplinary, comparative approach to the development of Islamic society, focusing on social structure, politics, economics and religion. Students will use primary and secondary sources to write a research paper, and make in-class presentations to cultivate critical thinking, research and writing skills. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2320

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3110 (3) Advanced Arabic 1

Designed to train students further in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.

Requisites: Requires prerequisite course of ARAB 2120 (minimum grade C).

Additional Information: Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 3120 (3) Advanced Arabic 2

Continues training in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.

Requisites: Requires prerequisite course of ARAB 3110 (minimum grade C).

Additional Information: Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 3230 (3) Islamic Culture and the Iberian Peninsula

Examines Islamic, especially Arab, culture and history as it relates to the Iberian Peninsula from 92 Ah/711 Ce to the present. Taught in English.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3231 (3) In the Footsteps of Travelers: Travel Writing in Arabic Lit

Offers an excursion into the role and significance of travel and travel writing in Arabic literature in translation. We will read and discuss a range of literary works written by, about, and for travelers. More broadly, this course will offer an opportunity for undergraduates to expand their understanding of literature and the arts. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3241 (3) Art in Islamic Cultures

Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 3241

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Arabic Courses in English

ARAB 3330 (3) The Arabic Novel

Focusing on the origins and development of the novel genre in the Arabic tradition, this course examines both the aesthetic qualities of the genre as an artistic form and the ways that it has depicted and intervened in the modern social, political, and cultural upheavals that have shaped the Arab world in the 20th century. Authors include Najib Mahfuz, Abd al Rahman Munif, Hanan al-Shaykh, and Ghassan Kanafani. Taught in English.

Additional Information: Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3340 (3) Representing Islam

Explores the cultural politics of representations of the Arab and Islamic worlds both with an emphasis on literary representations of the Islamic world in travel narratives and novels from both the West and the Arab world. Examines historical, anthropological, and visual texts to consider how Islam has been narrated in colonial European imaginings about the Islamic world as well as contemporary representations. Taught in English.

Additional Information: Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3350 (3) Narrating the City: Literary Mappings of the Urban Landscape

Examines literary narratives primarily from the Arabic tradition through focusing on the relationship of literature to the development and formations of cities and urban spaces in the modern period. Begins with readings of 19th century European narratives that chronicle the changing space of the modern city followed by urban narratives from the Arabic literary tradition in order to comparatively examine how "universal" processes of modernization, development, and globalization in the modern world have been narrated. Writers include Mahfouz, Munif, al-Takarli, al-Aswani, Celik, Abu Lughod. Taught in English.

Additional Information: Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 3410 (3) Gender, Sexuality and Culture in the Modern Middle East

Examines the issues of gender and sexuality in the modern Middle East and North Africa from the colonial period to the present, focusing on how feminist movements, Arab women's writing, and constructions of gender and sexuality have been shaped by local, national and international factors. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3410

Grading Basis: Letter Grade

Additional Information: Departmental Category: Arabic Courses in English
Departmental Category: Asia Content

ARAB 4200 (3) Advanced Readings in Arabic

Develops student proficiency and communication in modern standard Arabic at the advanced (4th year) level. Emphasis placed on developing reading comprehension, speaking, and writing skills.

Requisites: Requires prerequisite course of ARAB 3120 (minimum grade C).

Additional Information: Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 4250 (3) Arabic Media

Designed to provide students with advanced Arabic language skills for use in the media. By negotiating authentic materials in Arabic, students will gain a perspective on global issues in the Arab and Islamic world and will attain a better awareness of Arab and Islamic culture. Department enforced prerequisite: ARAB 3120 (minimum grade C) or equivalent.

Additional Information: Departmental Category: Arabic
Departmental Category: Asia Content

ARAB 4840 (1-3) Independent Study

Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Arabic
Departmental Category: Asia Content

CHIN 1010 (5) Beginning Chinese 1

Introduces modern Chinese (Mandarin), developing all four skills (speaking, listening, reading and writing) and communicative strategies. Students learn both traditional full-form characters and the principles for converting them into simplified characters.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 1012 (4) Introduction to Chinese Civilization

An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of China. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

Emphasizes reading, speaking, and writing modern Chinese, including continued study of both full-form and simplified characters. Introduces dictionaries and principles of character formation.

Requisites: Requires prerequisite course of CHIN 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 2120 (5) Intermediate Chinese 2

Continuation of CHIN 2110.

Requisites: Requires prerequisite course of CHIN 2110 (minimum grade C).

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 2441 (3) Film and the Dynamics of Chinese Culture

Through studying a group of Chinese films in light of modern Chinese history and literature, students examine a series of cultural dilemmas and issues in 20th century China and develop skills in analyzing literary and filmic texts. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3110 (5) Advanced Chinese 1

Surveys a variety of authentic-language materials, including films, plays, newspaper articles, essays, and short stories. Emphasizes proficiency-oriented approach to reading, writing, and oral communication.

Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 3120 (5) Advanced Chinese 2

Continuation of CHIN 3110.

Requisites: Requires prerequisite course of CHIN 3110 (minimum grade C).

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization

Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for Chinese majors and minors. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3200

Requisites: Restricted to students with a minimum of 45 units.

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

CHIN 3311 (3) The Dao and the World in Medieval China

An interdisciplinary examination of role of Daoist and Buddhist philosophical and religious concepts and images in medieval Chinese civilization, including literature and the arts. Focuses on the personal aspects of this period of religious and intellectual ferment, tracing the representation of these ideas in Chinese poetry, prose, painting and the plastic arts as well as their role in philosophical and religious speculation. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3321 (3) Culture and Literature of Ancient China

Focuses on the religious, cultural, philosophical and literary aspects of ancient Chinese civilization (1500 B.C.-A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English and taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3321

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3331 (3) Culture and Literature of Late Imperial China

The late imperial period was marked by growth of great metropolitan areas, expanded urban entertainments, and an extensive popular culture. Focuses on the literature and artifacts of this urban culture as well as the hegemonic culture of the state and of traditional social codes and their literary manifestations. Also considers growing contacts with the West and the transition to the modern period. All readings are in English. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3334 (3) Chinese Narrative Tradition

Examines the major works of Chinese narrative tradition from the fourth to the nineteenth century. Emphasizes the reading and analysis of selected texts and understanding of the cultural and social contexts of text production and circulation. Text selections vary from year to year. Taught in English.

Recommended: Prerequisite CHIN 1012.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3341 (3) Literature and Popular Culture in Modern China

Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3341

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3342 (3) Literary Culture in Contemporary China

Surveys the late 20th century Chinese and Taiwanese literature and popular culture against the historical background Market Reform in China and the lifting of Martial Law in Taiwan. Emphasizes close and critical reading skills and an understanding of how aesthetic texts critically engage within historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3351 (3) Reality and Dream in Traditional Chinese Literature

Explores the role of dreams in pre-modern Chinese literature from the beginnings in the 2nd millennium B.C.E. to the 19th century. The source texts will range from religious, philosophical, medical and historical writings to poetry to various genres of fictional prose and drama. Taught in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3361 (3) Women and the Supernatural in Chinese Literature

Explores the relationship between the worlds of women and the supernatural in Chinese literature, from ancient to modern times. Focuses on selected significant works of classical and vernacular fiction, religious texts, and poetry. Taught in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3371 (3) Topics in Chinese Film

Offers in-depth, critical analysis of key issues in Chinese culture as represented in Chinese film. Focuses on various topics, such as specific directors, regions, representation of gender in Chinese film, historical periods, etc. Varies from year to year. Requires no knowledge of Chinese. Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CHIN 1051 or CHIN 2441.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 4110 (3) Advanced Readings in Modern Chinese 1

Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.

Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4120 (3) Advanced Readings in Modern Chinese 2

Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.

Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4210 (3) Introduction to Classical Chinese

Introduces the classical language based on texts from the pre-Han and Han periods. Stresses precise knowledge of grammatical principles and exactitude in translation—the basis for all further work in classical Chinese.

Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4220 (3) Readings in Classical Chinese

Close reading of selected texts of ancient and medieval literature. Readings in both prose and poetry. Emphasizes a disciplined, philological approach to the texts, with proper attention to diction, tone, and nuance.

Requisites: Requires prerequisite course of CHIN 4210 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4300 (3) Open Topics: Readings in Chinese Literature

Studies selected texts on a particular topic taught by regular or visiting faculty. Topics change each term.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4750 (3) Daoism

Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 5750 and RLST 4750 and RLST 5750

Requisites: Requires prerequisite course of RLST 3800 (minimum grade C).

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4950 (3) Honors Thesis

Additional Information: Arts Sciences Honors Course
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4980 (1) Practical Issues in Chinese Language Pedagogy

Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Department enforced prerequisite: CHIN 4120 (minimum grade C) or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 5980

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

FRSI 1010 (5) Beginning Farsi 1

Provides a grounding in basic Persian Farsi grammar. The morphological and phonological nuances of the language will be introduced, along with Persian culture. Basic conversation is reinforced on a daily basis with strong emphasis and reiteration upon the homework and covered grammar.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 1011 (3) Introduction to Persian Civilization

An introduction to the history, literature and art of Iranian (Persian) civilization with a focus on the social and cultural aspects of contemporary Iran. Taught in English.

Additional Information: Departmental Category: Farsi Courses in English
Departmental Category: Asia Content

FRSI 1020 (5) Beginning Farsi 2

Continuation of FRSI 1010. Completes the presentation of basic structures of Farsi. Continued acquisition of vocabulary and practice of speaking, listening, reading, and writing. Class conducted largely in Farsi. The second half of the course will introduce authentic texts of Persian prose literature. Some poetry may be included.

Requisites: Requires prerequisite course of FRSI 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 1051 (3) Masterpieces of Persian Literature

Offers a broad introduction to Persian literature, one of the richest traditions in world literature. Students will read a selection of poetry by Rumi, Hafiz, Omar Khayyam, as well as a variety of works written by leading Iranian contemporary poets and writers. Through a close reading of literary texts, this course emphasizes their historical and cultural context.

Additional Information: Departmental Category: Farsi Courses in English

FRSI 2110 (4) Intermediate Farsi 1

Provides an intensive introduction to cultural and literary texts of Iran, along with an introduction of the grammatical and rhetorical complexities of Persian prose and poetry. Students continue to develop speaking, listening, and writing skills through activities based on the readings.

Requisites: Requires prerequisite course of FRSI 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 2120 (4) Intermediate Farsi 2

Continuation of FRSI 2110. Incorporates more readings in Persian literature, both poetry and prose, and cultural readings. Students continue developing speaking, listening and writing skills based on the readings.

Requisites: Requires prerequisite course of FRSI 2110 (minimum grade C).

Additional Information: Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 3110 (3) Advanced Farsi 1

An intensive introduction to both Persian philology and the contemporary novel. Textual analysis of texts ranging from complex to very complex will enable the students to gain a strong grounding in Persian literary texts. Students continue developing speaking, listening, and writing skills through activities based on the readings.

Requisites: Requires prerequisite course of FRSI 2120 (minimum grade C).

Additional Information: Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 3120 (3) Advanced Farsi 2

This course is the continuation of FRSI 3110. The focus will be on the reading and discussion of canonical literary texts as well as on language and media. Students continue developing speaking and listening skills through activities based on the readings and develop the ability to write short papers (3-5 pages) in Farsi.

Requisites: Requires prerequisite course of FRSI 3110 (minimum grade C).

Additional Information: Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 4900 (1-4) Independent Study

Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Farsi

Departmental Category: Asia Content

HIND 1010 (5) Beginning Hindi 1

Provides a thorough introduction to the modern Hindi language, emphasizing speaking, listening, reading, and writing skills. This course is proficiency-based. Activities aim to place the student in the context of the native-speaking environment from the very beginning. Students will be provided with opportunities to participate in local South Asian cultural events.

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Hindi

Departmental Category: Asia Content

HIND 1011 (3) Introduction to South Asian Civilizations

Survey of traditional and modern world views and experiences of people on the Indian subcontinent through literature and film, beginning with the Ramayana and including medieval tales, modern novels, and feature films. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Hindi Courses in English

Departmental Category: Asia Content

HIND 1020 (5) Beginning Hindi 2

Continuation of HIND 1010. Provides a thorough introduction to the modern Hindi language, emphasizing speaking, listening, reading and writing skills. Proficiency-based course aims to place the student in the context of the native-speaking environment from the beginning of the course. Provides opportunities to participate in local South Asian cultural activities and events.

Requisites: Requires prerequisite course of HIND 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Hindi

Departmental Category: Asia Content

HIND 2110 (5) Intermediate Hindi 1

Emphasizes speaking, listening, reading and writing skills and culturally appropriate language use.

Requisites: Requires prerequisite course of HIND 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Hindi

Departmental Category: Asia Content

HIND 2120 (5) Intermediate Hindi 2

Continuation of HIND 2110. Enhances students' speaking, listening, reading and writing skills and culturally appropriate language use.

Requisites: Requires prerequisite course of HIND 2110 (minimum grade C).

Additional Information: Departmental Category: Hindi

Departmental Category: Asia Content

HIND 3110 (3) Advanced Hindi 1

Emphasizes speaking, listening and conversational fluently in Hindi, with a focus on cultural appropriate expression and practical knowledge.

Requisites: Requires prerequisite course of HIND 2120 (minimum grade C).

Additional Information: Departmental Category: Hindi

Departmental Category: Asia Content

HIND 3120 (3) Advanced Hindi 2

Continuation of HIND 3110. Emphasizes reading, listening, and speaking fluency in Hindi-Urdu, with a focus on literary, cinematic and cultural themes in modern and contemporary Hindi-Urdu media and culture. Thematic focus of the course may change each semester. An effort will be made to encourage students to put their language skills into literary and cultural context.

Requisites: Requires prerequisite course of HIND 3110 (minimum grade C).

Additional Information: Departmental Category: Hindi

Departmental Category: Asia Content

HIND 3400 (3) Special Topics

Topics in Hindi. No prerequisites.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Hindi

Departmental Category: Asia Content

HIND 3441 (3) Screening India: A History of Bollywood Cinema

Provides a critical overview of one of the world's largest and most beloved film industries, the popular Hindi cinema produced in Bombay (Mumbai) and consumed around the world under the label "Bollywood". Focus on the post-Independence era to the present, with introduction to key films, directors, stars, genres, formal techniques, and themes, as well as critical analyses of these and other topics. Taught in English.

Additional Information: Departmental Category: Hindi Courses in English

Departmental Category: Asia Content

Departmental Category: Asia Content

JPNS 2441 (3) Japanese Culture through Film and Anime

Examines 20th century Japanese culture through cinematic and animated films. Studies films by Ozu, Kurosawa, Mizoguchi, and contemporary animators Tezuka, Miyazaki, and Kon Satoshi. Considers cultural issues raised in film and anime in light of modern Japanese history and literature. Requires no knowledge of Japanese. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 2811 (3) Heroes and the Supernatural: Word and Image in Old Japan

Examines the fusion of literary and visual arts in twelfth- to nineteenth-century Japan, focusing on illustrated handscrolls and narrative paintings. Students will explore tales of monsters, samurai, fantastic journeys to other worlds, anthropomorphic animals, and the eighteenth- and nineteenth-century precursors of contemporary Japanese comics. This course seeks to analyze visual-literary texts in their historical contexts as both literature and art. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 3110 (5) Advanced Japanese 1

Enhances student competence and performance in Japanese language in a holistic and integrative manner.

Requisites: Requires prerequisite course of JPNS 2120 (minimum grade C).

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 3120 (5) Advanced Japanese 2

Continuation of JPNS 3110. Enhances student competence and performance in Japanese language in a holistic and integrative manner.

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization

Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for Japanese majors and minors. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 3200

Requisites: Restricted to students with a minimum of 45 units.

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

JPNS 3311 (3) Japanese Colonial and Transnational Literature

Explores the development of Japanese and colonial identities in literature produced in and about Japan's colonies during the first half of the 20th century. We will read works written during and about the Japanese empire by Chinese, Japanese, Korean, Okinawan and Taiwanese writers looking at the different representations of empire. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English

JPNS 3321 (3) Fantasy and Sci-Fi in Japanese Literature, Film and Culture

Explores the development of Japanese science fiction and fantasy literature produced in the past century. We will read works written by writers such as Abe Kobo, Hoshi Shin'ichi, Kurahashi Yumiko, Ueda Sayuri and Project Ito. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English

JPNS 3331 (3) Business Japanese

Designed to teach Japanese with emphasis on using Japanese for professional purposes. The course aims to foster the skills and the knowledge of effective cross-cultural and interpersonal communication in Japanese and to develop intercultural competence in business contexts.

Requisites: Requires prerequisite course of JPNS 2120 (minimum grade C).

Recommended: Prerequisite JPNS 3110.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 3511 (3) From Rebellion to Calamity: Contemp Japanese Lit in Transl

Explores post-1945 Japanese literature through close reading of prose fiction (including SF, mystery, horror, e-novel and cell-phone novel genres), poetry, visual narratives (manga) and critical essays. Texts will be considered in historical and cultural contexts, with attention to their relationship to traditional arts and global trends. Taught in English.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese Courses in English

JPNS 3811 (3) Love, Death, and Desire: Classical Japanese Literature in Translation

Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784-1185). Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3811

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3821 (3) Monsters, Monks, and Mayhem: Medieval Japanese Literature in Translation

Surveys the major works and authors of medieval Japanese (poetry, prose, and drama) from the Kamakura and Muromachi periods (1185-1600). Taught in English.

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3831 (3) The Floating World of Play and Passion: Early Modern Japanese Literature in Translation

Surveys the major works, authors, and genres of literature from the Tokugawa through Meiji periods in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3841 (3) Tradition and Transgression: Modern Japanese Literature in Translation

Surveys the major works, authors and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3841

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

Explores the significance of the environment, nature and disaster in Japanese literature and culture through readings in a variety of genres, including fiction, essay, poetry, sci-fi, film and anime. Attention will also be given to environmental/ecological issues, such as conservation, pollution, biodiversity and industrial development. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr. Literature and the Arts

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3891 (3) Travel/Travel Writing in Japanese Literature and Culture

Explores selected Japanese literary and cultural texts that treat travel and travel writing, including short and long fiction, poetry, memoir, nonfiction, biography and travel commentary. Taught in English.

Recommended: Prerequisite JPNS 1051.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 4030 (3) Japanese Syntax

Deals with syntactic phenomena from five areas of Japanese grammar that cause the most difficulty for learners. Their characteristics are explored in forms and discursal functions that go beyond the explanations in basic, prescriptive grammars of Japanese. Department enforced prerequisite: JPNS 3120 or JPNS 4120 (minimum grade C) or instructor consent.

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4050 (3) Japanese Sociolinguistics: Japanese Language and Society

Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5050 and LING 4050

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4070 (3) Second Language Acquisition of Japanese

Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5070

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4080 (3) Kanji in Japanese Orthography

Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5080

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4110 (3) Advanced Readings in Modern Japanese 1

Surveys a variety of material written in modern Japanese, including texts from literature, the social sciences, religion, and cultural history. Emphasizes content and style. Texts and selections vary from year to year.

Requisites: Requires prerequisite course of JPNS 3120 (minimum grade C).

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4120 (3) Advanced Readings in Modern Japanese 2

Continuation of JPNS 4110. Texts and selections vary from year to year.

Requisites: Requires prerequisite course of JPNS 4110 (minimum grade C).

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4150 (3) Japanese to English Translation: Theory and Practice

Introduction to a range of translation tasks and approaches, as well as to professional translation practices, ethics, methods and resources. Emphasis is on application, through translation of representative texts from Japanese into English in the fields of social science, humanities and the arts, journalism, and commerce.

Recommended: Prerequisite JPNS 3110.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4210 (3) Contemporary Japanese 1: Current Issues

Offers intensive review of Japanese language skills beyond the first eight semesters and cultivates further proficiency. Readings will be selected from a wide range of contemporary writings that reflect and represent issues in Japanese as well as global communities. Emphasizes all skills: reading, listening, writing, speaking and translation. Instructional technology is extensively integrated into the curriculum.

Requisites: Requires prerequisite course of JPNS 4120 (minimum grade C).

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4300 (3) Open Topics: Readings in Japanese

Examines selected texts on a particular topic taught by regular or visiting faculty. Topics change each term. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4310 (3) Classical Japanese 1

Introduces reference tools for reading classical Japanese, and grammar, vocabulary, and use of scripts in premodern Japanese, focusing on the 10th century Taketori Monogatari and the 13th century Hojoki.

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Recommended: Prerequisites JPNS 3120 and JPNS 3811 and JPNS 3821.

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4320 (3) Classical Japanese 2

Continuation of JPNS 4310. Surveys changes in Japanese literary language from the Nara (eighth century) to Meiji (late 19th century) periods. Attention given to changes in grammar, vocabulary, and use of scripts in premodern Japanese. Introduces representative works of classical Japanese literature of all periods.

Requisites: Requires prerequisite course of JPNS 4310 (minimum grade C).

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4400 (3) Critical Theory and Japanese Literature and Culture

Examines Japanese literary and cultural texts through the lens of specific theoretical paradigms as developed by Japanese and non-Japanese thinkers and academicians. Taught in English.

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4950 (3) Honors Thesis

Additional Information: Arts Sciences Honors Course
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4980 (1) Practical Issues in Japanese Language Pedagogy

Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language class. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning. Department enforced prerequisite: JPNS 4120 (minimum grade C) or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5980

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

KREN 1010 (5) Beginning Korean 1

Trains students in elementary conversational and writing skills and provides grounding in the basic idiomatic and syntactical features of Korean, through lectures, drills, and language laboratory sessions based on set dialogues and readings.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Korean
Departmental Category: Asia Content

KREN 1011 (3) Introduction to Korean Civilization

Introduces the history of Korean culture within the context of political, social, and economic history. Covers the old Choson dynasty to present day Korea. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Korean Courses in English
Departmental Category: Asia Content

KREN 1020 (5) Beginning Korean 2

Continuation of KREN 1010.

Requisites: Requires prerequisite course of KREN 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Korean
Departmental Category: Asia Content

KREN 2110 (5) Intermediate Korean 1

Extends the conversational and written skills acquired at the elementary level. Although emphasis remains on spoken Korean, readings are increased, elementary writing skills are introduced gradually, and some Sino Korean characters are taught.

Requisites: Requires prerequisite course of KREN 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Korean
Departmental Category: Asia Content

KREN 2120 (5) Intermediate Korean 2

Continuation of KREN 2110.

Requisites: Requires prerequisite course of KREN 2110 (minimum grade C).

Additional Information: Departmental Category: Korean
Departmental Category: Asia Content

KREN 2441 (3) Film and Korean Culture

Introduces Korean/South Korean cinema from colonial period to the contemporary including old Korean black and white films, the earliest talkie films and contemporary art films. Considers cinema as a window to see the tumultuous and diverse culture of modern Korea. Taught in English. No prior knowledge of Korea, Korean film or film art is required.

Additional Information: Departmental Category: Korean Courses in English
Departmental Category: Asia Content

KREN 3110 (5) Advanced Korean 1

Promotes an advanced level of speaking, reading, and writing. Focuses on contemporary business Korean language as reflected in various Korean media such as newspapers, magazines, and television. The goal is to acquire Korean language skills at a level that allows students to conduct business activities.

Requisites: Requires prerequisite course of KREN 2120 (minimum grade C).

Additional Information: Departmental Category: Korean
Departmental Category: Asia Content

KREN 3120 (5) Advanced Korean 2

This second semester of Korean offers advanced level speaking and writing. Focuses on understanding contemporary Korean languages as reflected in various communication media, such as print, TV, and films to help students understand Korean in a variety of contexts.

Requisites: Requires prerequisite course of KREN 3110 (minimum grade C).

Additional Information: Departmental Category: Korean
Departmental Category: Asia Content

KREN 3841 (3) Modern Korean Literature in English Translation

Surveys masterpieces of modern Korean literature written by significant Korean/Korean American authors in English. Provides various literary and theoretical frameworks to understand Korean literature within the context of Asian global culture. Covers from colonial period to the present. Taught in English. No prior knowledge of Korea or Korean literature is required.

Additional Information: Departmental Category: Korean Courses in English

Departmental Category: Asia Content

KREN 4900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Korean
Departmental Category: Asia Content

Chinese - Bachelor of Arts (BA)

The undergraduate degree in Chinese emphasizes knowledge and awareness of:

- Chinese literary history, focusing on selected canonical or widely recognized works;
- the historical and cultural contexts in which particular works were written;
- critical approaches to the study of Chinese language and civilization; and
- the challenges, deficiencies and possible gains inherent in the process of translating from one language to another.

In addition, students completing the degree in Chinese are expected to acquire the ability and skills to:

- read modern Chinese at a level at which critical literary analysis can be performed;
- read classical Chinese, with the aid of appropriate reference works, at the level at which the text may begin to be appreciated for its literary value;
- speak and comprehend Mandarin sufficient for all situations in daily life and for a basic level of academic conversation;
- analyze and interpret literary texts in terms of style, structure, character, themes and use of allusion; and
- communicate such interpretations competently in standard written English.

With a Chinese major (<https://www.colorado.edu/alc/undergraduate/majors>), students will have skills, information and concepts that are relevant to careers in virtually every area. Competency in a foreign language is a highly desirable skill in all fields. A knowledge of Chinese is particularly beneficial and useful in business, engineering, industry, commerce, the civil or foreign service, law, library science, natural and social sciences, the media, economics, public administration, journalism, government and teaching at all levels. In addition, China is an increasing source of a wide variety of excellent careers, as it is among the world's largest economies (<http://databank.worldbank.org/data/download/GDP.pdf>) and trading partners with the U.S. (http://www.trade.gov/mas/ian/build/groups/public/@tg_ian/documents/webcontent/tg_ian_003364.pdf) and Colorado. Students are encouraged to consider combining their Chinese language training with courses in these or other fields. Additional career opportunities can be found on the Career Services website (<http://www.colorado.edu/career>).

Concurrent Degree Programs BA/MA in Chinese and Asian Languages and Civilizations

The concurrent BA/MA (Bachelor of Arts / Master of Arts) degree program in Chinese recognizes the need for master's-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the Chinese language, knowledge of the culture of China and its literature and the skills acquired by BA and MA graduates in the humanities: research, analysis, interpretation, translation and communication.

This degree offers a challenging and focused academic experience for exceptional students (particularly those who enter the university with significant preparation in Chinese studies from high school or with other backgrounds, or those who participate in study abroad opportunities at CU) who demonstrate the ability to express their ideas clearly, both orally and in written form, using standard English. Highly motivated students who are accepted into the program begin graduate work no later than the senior year and earn both the BA and MA in five years. Students must have a minimum 3.25 GPA for all courses taken at CU Boulder and should have completed all MAPS and core requirements by the end of the sophomore year.

The application is open only to CU Boulder students. Students must submit the written application for admission (<http://www.colorado.edu/graduateschool/academic-forms>), along with a statement of purpose, a writing sample and three letters of recommendation, at least one from a full-time member of the Chinese faculty, by September 1 of their junior year (or, in exceptional circumstances, during a student's senior year) to the director of graduate studies in Chinese (<https://www.colorado.edu/alc/graduate/advising>). Applications will be reviewed by the graduate faculty of Chinese. Students interested in applying for this option must consult with the department's undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising>) early in their career at CU to establish their program of study.

Specific information about the BA/MA requirements and curriculum (<https://www.colorado.edu/alc/graduate/chinese>) can be found on the department website.

BA/MSIB in Chinese

The Department of Asian Languages and Civilizations, in conjunction with the Business School at the University of Colorado Denver, offers a degree track in Chinese leading to accelerated admission to the CU Denver MSIB (Master of Science in International Business) program. Students complete the standard requirements for the Chinese major and the business minor in the Boulder Leeds School of Business. Business courses from the undergraduate degree count toward prerequisites for the MSIB program. For more information, see the CU Denver MSIB website (<http://www.ucdenver.edu/academics/colleges/business/degrees/ms/ib/Pages/International-Business.aspx>).

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. CHIN 1010, CHIN 1020 and CHIN 2110 do not count toward the maximum of 45 credit hours in the major department.

The major program for the BA degree in Chinese requires successful completion of 30 credit hours, of which at least 18 credit hours must be at the upper-division level.

Required Courses and Semester Credit Hours

Required Courses

CHIN 2120	Intermediate Chinese 2	5
CHIN 3110	Advanced Chinese 1	5
CHIN 3120	Advanced Chinese 2	5
CHIN 4210	Introduction to Classical Chinese ¹	3

Electives

The remaining 12 credit hours may be chosen from the courses listed below; 3 of these credit hours may be satisfied by courses focusing wholly or substantially on China offered in other departments, subject to approval by the Chinese undergraduate faculty advisor.

CHIN 1012	Introduction to Chinese Civilization	
CHIN 1051	Masterpieces of Chinese Literature in Translation	
CHIN 2441	Film and the Dynamics of Chinese Culture	
CHIN 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization	
CHIN 3311	The Dao and the World in Medieval China	
CHIN 3321	Culture and Literature of Ancient China	
CHIN 3331	Culture and Literature of Late Imperial China	
CHIN 3334	Chinese Narrative Tradition	
CHIN 3341	Literature and Popular Culture in Modern China	
CHIN 3342	Literary Culture in Contemporary China	
CHIN 3351	Reality and Dream in Traditional Chinese Literature	
CHIN 3361	Women and the Supernatural in Chinese Literature	
CHIN 3371	Topics in Chinese Film (taught in English)	
CHIN 4110	Advanced Readings in Modern Chinese 1 ¹	
CHIN 4120	Advanced Readings in Modern Chinese 2 ¹	
CHIN 4220	Readings in Classical Chinese ¹	
CHIN 4300	Open Topics: Readings in Chinese Literature	
CHIN 4750	Daoism	
CHIN 4900	Independent Study	
CHIN 4950	Honors Thesis	

Total Credit Hours 30

¹ Transfer credit for these courses, whether from universities in this country or abroad, will be considered only in exceptional cases; normally, no credit toward the major will be given for these courses unless taken in residence.

Graduating in Four Years with a BA in Chinese

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Chinese, students should meet the following requirements:

- Declare the major by the first semester of sophomore year.
- Students wishing to major in Chinese and who have no prior knowledge of the language should begin the required major courses no later than the sophomore year.
- Students must consult with the department’s undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/>

advising) to determine adequate progress toward completion of the major. An example four-year plan (<https://www.colorado.edu/alc/undergraduate/majors>) is available on the department website.

Japanese - Bachelor of Arts (BA)

The undergraduate degree in Japanese emphasizes knowledge and awareness of:

- the outlines of the history of Japanese literature from the Nara period to the present;
- the outlines of Japanese historical and cultural development; and
- appropriate research strategies for Japanese language, literature and culture.

In addition, students completing the degree in Japanese are expected to acquire the ability and skills to:

- speak and comprehend Japanese sufficiently for daily life;
- read, interpret and analyze modern written texts;
- compose letters and simple compositions;
- use cultural awareness and understanding to function appropriately in a range of social situations; and
- communicate the results of research in English.

In addition, students target one or more of the following goals:

- read and comprehend classical Japanese, with the aid of appropriate reference works;
- translate a range of Japanese texts into English; and
- understand and analyze the structure of the Japanese language and communication patterns in Japanese.

With a Japanese major (<https://www.colorado.edu/alc/undergraduate/majors>), students will have skills, information and concepts that are relevant to careers in virtually every area. Competency in a foreign language is a highly desirable skill in all fields. A knowledge of Japanese is particularly beneficial and useful in business, engineering, industry, commerce, the civil or foreign service, law, library science, natural and social sciences, the media, economics, public administration, journalism, government and teaching at all levels. In addition, Japan is an increasing source of a wide variety of excellent careers, as it is among the world’s largest economies (<http://databank.worldbank.org/data/download/GDP.pdf>) and trading partners with the U.S. (http://www.trade.gov/mas/ian/build/groups/public/@tg_ian/documents/webcontent/tg_ian_003364.pdf) and Colorado. Students are encouraged to consider combining their Japanese language training with courses in these or other fields. Additional career opportunities can be found on the Career Services website (<http://www.colorado.edu/career>).

Concurrent Degree Programs

BA/MA in Japanese and Asian Languages and Civilizations

The concurrent BA/MA (Bachelor of Arts / Master of Arts) degree program in Japanese recognizes the need for master’s-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the Japanese language, knowledge of the culture of Japan and its literature and the skills acquired by BA and MA graduates in the humanities: research, analysis, interpretation, translation and communication.

This degree offers a challenging and focused academic experience for exceptional students (particularly those who enter the university with significant preparation in Japanese studies from high school or with other backgrounds, or those who participate in study abroad opportunities at CU) who demonstrate the ability to express their ideas clearly, both orally and in written form, using standard English. Highly motivated students who are accepted into the program begin graduate work no later than the senior year and earn both the BA and MA in five years. Students must have a minimum 3.25 GPA for all courses taken at CU Boulder and should have completed all MAPS and core requirements by the end of the sophomore year.

The application is open only to CU Boulder students. Students must submit the written application for admission (<http://www.colorado.edu/graduateschool/academic-forms>), along with a statement of purpose, a writing sample and three letters of recommendation, at least one from a full-time member of the Japanese faculty, by September 1 of their junior year (or, in exceptional circumstances, during a student's senior year) to the director of graduate studies in Japanese (<https://www.colorado.edu/alc/graduate/advising>). Applications will be reviewed by the graduate faculty of Japanese. Students interested in applying for this option must consult with the department's undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising>) early in their career at CU to establish their program of study.

Specific information about the BA/MA requirements and curriculum (<https://www.colorado.edu/alc/graduate/japanese>) can be found on the department website.

BA/MSIB in Japanese

The Department of Asian Languages and Civilizations, in conjunction with the Business School at the University of Colorado Denver, offers a degree track in Japanese leading to accelerated admission to the CU Denver MSIB (Master of Science in International Business) program. Students complete the standard requirements for the Japanese major and the business minor in the Boulder Leeds School of Business. Business courses from the undergraduate degree count toward prerequisites for the MSIB program. For more information, see the CU Denver MSIB website (<http://www.ucdenver.edu/academics/colleges/colleges/business/degrees/ms/ib/Pages/International-Business.aspx>).

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. JPNS 1010, JPNS 1020 and JPNS 2110 do not count toward the maximum of 45 credit hours in the major department.

The major program for the BA degree in Japanese requires successful completion of 30 credit hours, of which at least 18 credit hours must be at the upper-division level.

Required Courses and Semester Credit Hours

Required Courses

JPNS 2120	Intermediate Japanese 2	5
JPNS 3110	Advanced Japanese 1	5
JPNS 3120	Advanced Japanese 2	5

Electives

The remaining 15 credit hours should be chosen from the courses listed below; 6 of these credit hours may be satisfied by courses focusing wholly or substantially on Japan offered in other departments, subject to approval by the Japanese undergraduate faculty advisor; and 9 of these credit hours must be at the upper-division level.

JPNS 1012	Introduction to Japanese Civilization (Core: Human Diversity)	15
JPNS 1051	Masterpieces of Japanese Literature in Translation (Core: Lit & Arts)	
JPNS 2441	Japanese Culture through Film and Anime	
JPNS 2811	Heroes and the Supernatural: Word and Image in Old Japan	
JPNS 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization (Core: Upper Division Written Communication)	
JPNS 3331	Business Japanese	
JPNS 3511	From Rebellion to Calamity: Contemp Japanese Lit in Transl	
JPNS 3811	Love, Death, and Desire: Classical Japanese Literature in Translation	
JPNS 3821	Monsters, Monks, and Mayhem: Medieval Japanese Literature in Translation	
JPNS 3831	The Floating World of Play and Passion: Early Modern Japanese Literature in Translation	
JPNS 3841	Tradition and Transgression: Modern Japanese Literature in Translation	
JPNS 3851	Studies in Japanese Popular Culture	
JPNS 3861	Imagining the Samurai in Japanese Literature and Culture	
JPNS 3871	Horror and the Macabre in Japanese Literature, Film, Culture	
JPNS 3881	Environment, Nature and Disaster in Japanese Literature and Culture	
JPNS 3891	Travel/Travel Writing in Japanese Literature and Culture	
JPNS 4030	Japanese Syntax	
JPNS 4050	Japanese Sociolinguistics: Japanese Language and Society	
JPNS 4070	Second Language Acquisition of Japanese	
JPNS 4080	Kanji in Japanese Orthography	
JPNS 4110	Advanced Readings in Modern Japanese 1 ¹	
JPNS 4120	Advanced Readings in Modern Japanese 2 ¹	
JPNS 4150	Japanese to English Translation: Theory and Practice	
JPNS 4210	Contemporary Japanese 1: Current Issues	
JPNS 4300	Open Topics: Readings in Japanese	
JPNS 4310	Classical Japanese 1 ¹	
JPNS 4320	Classical Japanese 2 ¹	
JPNS 4400	Critical Theory and Japanese Literature and Culture	
JPNS 4900	Independent Study	
JPNS 4950	Honors Thesis	

Total Credit Hours 30

¹ *Transfer credit for these courses, whether from universities in this country or abroad, will be considered only in exceptional cases; normally, no credit toward the major will be given for these courses unless taken in residence.*

Graduating in Four Years with a BA in Japanese

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of “adequate progress” as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Japanese, students should meet the following requirements:

- Declare the major by the first semester of sophomore year.
- Students wishing to major in Japanese and who have no prior knowledge of the language should begin the required major courses no later than the sophomore year.
- Students must consult with the department’s undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising>) to determine adequate progress toward completion of the major. An example four-year plan is available on the department website (<https://www.colorado.edu/alc/undergraduate/majors>).

Arabic - Minor

A minor in Arabic Studies can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of the Middle East and North Africa. Students cannot declare both the Certificate in Middle Eastern and Islamic Studies and the Minor in Arabic Studies.

For more information, visit the department’s Minors (<http://www.colorado.edu/alc/undergraduate/minors>) webpage or see the department’s undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising>).

Requirements

A minimum of 19 credit hours must be taken in Arabic language and literature courses, including a total of 9 upper-division credit hours.

Required Courses and Semester Credit Hours

Required Courses

ARAB 2110	Intermediate Arabic 1	5
ARAB 2120	Intermediate Arabic 2	5

Electives		9
------------------	--	----------

At least three additional upper-division, 3-credit-hour ARAB courses. At least one of the content courses must focus on the premodern period.

ARAB 3110	Advanced Arabic 1	
ARAB 3230	Islamic Culture and the Iberian Peninsula	
ARAB 3231	In the Footsteps of Travelers: Travel Writing in Arabic Lit	
ARAB 3241	Art in Islamic Cultures	
ARAB 3330	The Arabic Novel	
ARAB 3340	Representing Islam	
ARAB 3350	Narrating the City: Literary Mappings of the Urban Landscape	

ARAB 3410	Gender, Sexuality and Culture in the Modern Middle East	
Total Credit Hours		19

Pass/fail work will not apply to the minor. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Chinese - Minor

A minor in Chinese can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of China.

For more information, visit the department’s Minors (<http://www.colorado.edu/alc/undergraduate/minors>) webpage or see the department’s undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising>).

Requirements

A minimum of 18 credit hours must be taken in Chinese language and literature courses, including a total of 13 upper-division credit hours.

Required Courses and Semester Credit Hours

Required Courses

CHIN 2120	Intermediate Chinese 2	5
CHIN 3110	Advanced Chinese 1	5
CHIN 3120	Advanced Chinese 2	5

Electives

At least one additional upper-division, 3-credit-hour CHIN course.		3
Total Credit Hours		18

Pass/fail work and CHIN 3200 will not apply to the minor. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Hindi/Urdu - Minor

A minor in Hindi/Urdu Studies can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of South Asia. Students cannot declare both the Certificate in South Asian Languages and Civilizations and the Minor in Hindi/Urdu Studies.

For more information, visit the department’s Minors (<http://www.colorado.edu/alc/undergraduate/minors>) webpage or see the department’s undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising>).

Requirements

A minimum of 19 credit hours must be taken in Hindi/Urdu language and literature courses, including a total of 9 upper-division credit hours.

Required Courses and Semester Credit Hours

Required Courses

HIND 2110	Intermediate Hindi 1	5
HIND 2120	Intermediate Hindi 2	5

Electives		9
------------------	--	----------

At least three additional upper-division, 3-credit-hour HIND courses.

HIND 3110	Advanced Hindi 1	
HIND 3441	Screening India: A History of Bollywood Cinema	
HIND 3651	Living Indian Epics: The Ramayana and the Mahabharata in the Modern Political Imagination	
HIND 3661	South Asian Diasporas: Imagining Home Abroad	
HIND 3811	The Power of the Word: Subversive and Censored 20th Century Indo-Pakistani Literature	
HIND 3831	The Many Faces of Krishna in South Asia Literature and Culture	
HIND 3851	Devotional Literature in South Asia	
Total Credit Hours		19

Pass/fail work will not apply to the minor. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Japanese - Minor

A minor in Japanese can be selected by students who wish to gain a basic understanding of the language as well as history, culture and literary traditions of Japan.

For more information, visit the department's Minors (<http://www.colorado.edu/alc/undergraduate/minors>) webpage or see the department's undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising>).

Requirements

A minimum of 18 credit hours must be taken in Japanese language and literature courses, including a total of 13 upper-division credit hours.

Required Courses and Semester Credit Hours

Required Courses

JPNS 2120	Intermediate Japanese 2	5
JPNS 3110	Advanced Japanese 1	5
JPNS 3120	Advanced Japanese 2	5

Electives

At least one additional upper-division, 3-credit-hour JPNS course.		3
Total Credit Hours		18

Pass/fail work will not apply to the minor. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor.

Middle Eastern and Islamic Studies - Certificate

The Certificate in Middle Eastern and Islamic Studies provides students the opportunity to formally explore the cultural, political and religious diversity of the Middle East and the Islamic worlds.

The region commonly referred to as the Middle East includes over 20 Arabic speaking countries, as well as Iran, Turkey, and Israel and spans Southwest Asia and North Africa. A culturally, religiously and linguistically diverse region, the Middle East today is one of the most geopolitically critical regions in the world. It is the birthplace of the three major monotheistic faiths, Judaism, Christianity and Islam; the home of medieval Islamic civilizations; and home to rich literary, architectural and religious traditions. Islam, a monotheistic faith that began in the

Arabian Peninsula in the 7th century, is today practiced by over one billion people and is diversely expressed through a vast geographic, linguistic and cultural terrain, from West Africa to East Asia.

Students currently pursuing the requirements of the Certificate in Middle Eastern and Islamic Studies (MEIS) or interested in doing so should complete the Statement of Intent form (<https://www.colorado.edu/alc/undergraduate/certificates>) available on the department website. Students who have completed the requirements for the MEIS certificate and are graduating in December or May must complete the Program of Study form (<https://www.colorado.edu/alc/undergraduate/certificates>) and the Certificate Completion form (<https://www.colorado.edu/alc/undergraduate/certificates>), also available on the department website, and submit them to the MEIS certificate advisor (<https://www.colorado.edu/alc/undergraduate/advising>) two months prior to graduation.

Students cannot declare both the Certificate in Middle Eastern and Islamic Studies and the Minor in Arabic.

Requirements

The certificate requires a total of 19 credit hours, which include both language and content courses.

Required Courses: At least one year of either Arabic or Farsi language courses beginning at the intermediate level (2000 level) with a grade of C or better. A student who participates in an approved study abroad program may earn up to 10 credit hours for language study at an intermediate or advanced level.

Electives: Three courses, at least one of which must be a course designated ARAB and has a specific focus on Islam and the Islamic world. These nine credit hours may be selected from the list of approved content courses below and are to be completed with a grade of C- or better. Approval of study abroad credits for content courses will be reviewed on a case-by-case basis.

Possible Electives Include:

ANTH/JWST 4050	Anthropology of Jews and Judaism (Cultures of Israel & Palestine)
ANTH 4180	Anthropological Perspectives: Contemporary Issues (Global Islams)
ARAB 2231	Love, Loss and Longing in Classical Arabic Literature
ARAB/RLST 2320	The Muslim World, 600-1250
ARAB 3230	Islamic Culture and the Iberian Peninsula
ARAB 3231	In the Footsteps of Travelers: Travel Writing in Arabic Lit
ARAB 3241	Art in Islamic Cultures
ARAB 3330	The Arabic Novel
ARAB 3340	Representing Islam
ARAB 3350	Narrating the City: Literary Mappings of the Urban Landscape
ARAB 3410	Gender, Sexuality and Culture in the Modern Middle East
GEOG 3742	Place, Power, and Contemporary Culture
GEOG 4742	Topics in Environment and Society (Geographies of the Muslim World)

GEOG 4742	Topics in Environment and Society (Contemporary Islam: Empire/Terror/Revolution)
GEOG 4762	Geographies of Political Islam: Empire, Terror and Revolution
JWST 2350	Introduction to Jewish Culture
HEBR/JWST 4203	Israeli Literature: Exile, Nation, Home
HIST 3328	Seminar in Middle Eastern History
HIST 4328	The Modern Middle East, 1600 to the Present
HIST 4329	Islam in the Modern World: Revivalism, Modernism, and Fundamentalism, 1800-2001
HIST/JWST 4338	History of Modern Israel/Palestine
HIST/JWST 4348	Topics in Jewish History (Tel Aviv Urban History and Culture)
HIST/JWST 4378	History of Modern Jewish-Muslim Relations
HIST 4528	Islam in South and Southeast Asia (1000 to the Present)
HUMN 3850	The Mediterranean Religion Before Modernity
IAFS 3000	Special Topics in International Affairs (Arab / Israel Conflict)
IAFS 3000	Special Topics in International Affairs (Political Economy/Middle East)
IAFS 3000	Special Topics in International Affairs (Security in the Middle East)
IAFS 3000	Special Topics in International Affairs (Statebuilding in the 21st Century)
IAFS 3000	Special Topics in International Affairs (Turkey-Mediator/Arab Spring)
IAFS 3000	Special Topics in International Affairs (Gender, Geopolitics and Islam)
IAFS 4500	The Post-Cold War World (Afghanistan and Iraq)
IAFS 4500	The Post-Cold War World (Understanding 9/11: Causes, Events, Legacies)
IAFS 4500	The Post-Cold War World (The Geopolitics and Economics of Oil)
JWST/IAFS/RLST 3530	Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul
JWST 4302	Global Seminar: Justice, Human Rights and Democracy in Israel
RLST 2202	Islam
RLST 2600	Judaism, Christianity, and Islam
RLST 3040	The Quran
RLST 3060	Fundamentalism and Islam
RLST 3070	Sufism
RLST 4820/5820	Interdisciplinary Seminar on Religion: Topics
SOCY 4131	Advanced Topics in Sociology (Gender, Islam, and Modernity)

Students should consult with the MEIS certificate advisor (<https://www.colorado.edu/alc/undergraduate/advising>) annually and must fulfill the requirements for an undergraduate degree at CU Boulder.

South Asian Languages and Civilizations - Certificate

The Certificate in South Asian Languages and Civilizations is designed to help prepare CU students for careers with international companies and government agencies that are searching for employees with language skills in Hindi/Urdu and a broad understanding of South Asia.

South Asia—comprising India, Pakistan, Sri Lanka, Bangladesh, Nepal and Tibet—has emerged as a key center of economic, political and cultural power in the 21st century. South Asia in ancient times drove the economy of Central and Southeast Asia, exported a cosmopolitan Sanskrit literary culture and was the spiritual home of Hinduism and Buddhism. South Asia in medieval times was a major hub of global trade and the pride of a wide-ranging Persianate civilization. Its Mughal Empire was far more populous and wealthy than the Ottomans and Safavids combined. South Asia today is home to over 100 officially recognized languages and most of the world's major religious traditions. With some 500 million speakers, Hindi/Urdu is one of the most popular languages in the world, alongside Mandarin, English and Spanish. Hindi-Urdu boasts thriving contemporary literary and media cultures, and—with Bollywood—the world's largest and most influential film industry.

Students currently pursuing the requirements of the Certificate in South Asian Languages and Civilizations (SALC) or interested in doing so should complete the Statement of Intent form (<https://www.colorado.edu/alc/undergraduate/certificates>) available on the department website. Students who have completed the requirements for the SALC certificate and are graduating in December or May must complete the Program of Study form (<https://www.colorado.edu/alc/undergraduate/certificates>) and the Certificate Completion form (<https://www.colorado.edu/alc/undergraduate/certificates>), also available on the department website, and submit them to the SALC certificate advisor (<https://www.colorado.edu/alc/undergraduate/advising>) two months prior to graduation.

Students cannot declare both the Certificate in South Asian Languages and Civilizations and the Minor in Hindi/Urdu.

Requirements

The certificate requires a total of 19 credit hours, which include both language and content courses.

Required Courses: At least one year of Hindi/Urdu language courses beginning at the intermediate level (2000 level) with a grade of C or better. A student who participates in an approved study abroad program may earn up to 10 credit hours for language study at an intermediate or advanced level.

Electives: Three courses, at least one of which must be a course designated HIND. These nine credit hours may be selected from the list of approved content courses below and are to be completed with a grade of C- or better. Approval of study abroad credits for content courses will be reviewed on a case-by-case basis.

Possible Electives Include:

ANTH 4180	Anthropological Perspectives: Contemporary Issues (The Himalayas)
ANTH 4750	Culture and Society in South Asia
ANTH 4690	Anthropology of Tibet
HIND 3441	Screening India: A History of Bollywood Cinema

HIND 3811	The Power of the Word: Subversive and Censored 20th Century Indo-Pakistani Literature
HIND 3651	Living Indian Epics: The Ramayana and the Mahabharata in the Modern Political Imagination
HIND 3661	South Asian Diasporas: Imagining Home Abroad
HIND 3831	The Many Faces of Krishna in South Asia Literature and Culture
HIND 3851	Devotional Literature in South Asia
HIST 4329	Islam in the Modern World: Revivalism, Modernism, and Fundamentalism, 1800-2001
HIST 4339	Borderlands of the British Empire
HIST 4349	Decolonization of the British Empire
HIST 4528	Islam in South and Southeast Asia (1000 to the Present)
HIST 4538	History of Modern India
HIST 4548	Women in Modern India
HIST 4558	Buddha to Gandhi: A History of Indian Nonviolence
HIST 4820	Human Rights: Historical Perspectives
IAFS 4500	The Post-Cold War World (South Asia)
IAFS 4500	The Post-Cold War World (South Asia/Conflict/Resolution)
IAFS 4500	The Post-Cold War World (Conflict/Culture in South Asia)
RLST 2610	Religions of India
RLST 2612	Yoga: Ancient and Modern
RLST 3070	Sufism
RLST 3200	Hinduism
RLST 3300	Foundations of Buddhism
RLST 3550	Tibetan Buddhism
RLST 3820	Topics in Religious Studies (Tibetan Buddhism)
RLST 4200	Topics in Hinduism
RLST 4250	Topics in Buddhism
RLST 4280	Body and Magic in India
RLST 5210	Advanced Readings in Sanskrit

Students should consult with the SALC certificate advisor (<https://www.colorado.edu/alc/undergraduate/advising>) annually and must fulfill the requirements for an undergraduate degree at CU Boulder.

Asian Studies

The Center for Asian Studies offers a broad interdisciplinary undergraduate major in Asian Studies (including optional tracks for students wishing to focus on one of three specific areas: Middle East/West Asia, Korea, and South Asia) and a minor.

Students planning to major in Asian Studies may obtain credit when they participate in study abroad programs in Asia with prior approval from the Asian Studies Program and the Office of International Education.

For additional information on the major program, see the Bachelor's Degree in Asian Studies or contact Colleen Berry at colleen.berry@colorado.edu or 303-735-5224.

Course code for this program is ASIA.

Bachelor's Degree

- Asian Studies - Bachelor of Arts (BA) (p. 197)
 - Middle East/West Asia track (optional)
 - Korea track (optional)
 - South Asia track (optional)

Minor

- Asian Studies - Minor (p. 204)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Berry, J. Colleen (https://experts.colorado.edu/display/fisid_155491)
Instructor; PhD, Indiana University Bloomington

Jones, Carla Mae (https://experts.colorado.edu/display/fisid_134172)
PhD, University of North Carolina Chapel Hill

Oakes, Timothy S. (https://experts.colorado.edu/display/fisid_109269)
PhD, University of Washington

ASIA 2000 (3) Gateway to Modern Asia: Exploring Regional Connections
Introduces main themes, intellectual approaches used in Asian Studies through a transdisciplinary perspective that focuses on interactions and links between geographic regions and national boundaries. Presents Asia as a concept, a powerful imaginary geography, and historically dynamic construct that has shaped / been shaped by global patterns of economic development, nation building, war and diplomacy, colonialism and aspirations for better lives.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Asia Content

ASIA 2852 (3) Contemporary Southeast Asia: Environmental Politics
Examines globally pressing questions of environmental sustainability, regional inequality and development in the dynamic and heterogeneous landscapes of contemporary Southeast Asia. Focuses on interactions between histories of uneven development and contemporary debates over energy and infrastructure, food security, governance and access to land, forest and water-based resources.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 2852

Grading Basis: Letter Grade

ASIA 3300 (3) Sex and Gender in Asian Film and Literature

Explores issues of sex and gender in traditional and contemporary Asian cultures by looking at how sex and gendered roles are configured and play out in Asian cultures. Employs film and literary sources which reflect, subvert and act as agents of change in the dominant cultures.

Additional Information: Departmental Category: Asia Content

ASIA 3900 (3) Discovering Urban China: Tradition, Modernity, Nostalgia

Explores the ways Chinese cities, especially Beijing and Shanghai, are depicted in scholarly articles, films, literature and population culture in terms of tradition, modernity and nostalgia. Begins by defining the terms then discusses texts dealing with these themes. Discussions are linked to what the students observe first-hand as they explore the cities. Takes place in China.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Asia Content

ASIA 4300 (3) Open Topics in Asian Literature and Culture

Examines selected texts on a particular topic. Taught by regular or visiting faculty. Topics change each term.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Asia Content

ASIA 4830 (3) Capstone Seminar in Asian Studies

Participates in a discussion seminar on topics in Asian Studies, conducts research and writes a thesis or creates a project on an approved Asian topic, following guidelines established by the program director. Required for an Asian Studies major.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Asian Studies (ASIA) majors only.

Additional Information: Departmental Category: Asia Content

ASIA 4840 (1-3) Independent Study

Provides an independent study opportunity, by special arrangement with Asian Studies faculty, for students with particular Asian Studies interests.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Asian Studies (ASIA) majors only.

Additional Information: Departmental Category: Asia Content

ASIA 4930 (1-6) Engage Asia: Internship in Asian Studies

Matches students with supervised internships relevant to academic topics in Asian studies. Students work with CAS faculty and internship supervisors, i.e., intern with companies or non-profits doing Asia-related business or project.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Requisite Asian language and culture courses.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Asia Content

Asian Studies - Bachelor of Arts (BA)

The study of Asia is highly relevant and important in this global age. Its influences on the Western world can be seen in economics, politics, music, the arts, entertainment and religion.

The Asian Studies major at CU Boulder encompasses a diverse interdisciplinary study of Asia and gives students an opportunity to discover Asia through a wide variety of courses that reflect the astonishing diversity of the region. Many students choose Asian Studies as a second major to complement the study of such subjects as: history, international affairs, or geography. As part of your Asian Studies major requirements, you will receive a thorough grounding in the history of Asia and you will study an Asian language: Arabic, Chinese, Hindi, Farsi, Japanese, Korean, Sanskrit or Tibetan. All majors will complete their Asian Studies degree with the Senior Thesis or Project in Asian Studies, an in-depth exploration of broad issues that relate to a sub-region within Asia or the region as a whole.

Upon completion of this course of study, you will have received a highly individualized and broad education in the Asian region that will allow you to better understand its history and culture as well as its current dynamics.

NOTE: Students have several options when majoring in Asian Studies. One is the general Asian Studies Bachelor of Arts degree. However, if a student wishes to choose a particular area of emphasis that will appear on their transcript, there are three options below.

Optional Specific Areas Tracks

Korea Track

An option for students who want to make Korea their area of emphasis and who would like to see it shown on their transcripts.

South Asia Track

An option for students who want South Asia to be their focus and who would like to see it shown on their transcripts.

West Asia/Middle East Track

An option for students who want to focus on West Asia/Middle East and who would like to see it shown on their transcripts.

Contact Information

Please contact Faculty Advisor Colleen Berry at colleen.berry@colorado.edu. Her office is located in Room 202 in the Center for Asian Studies building at 1424 Broadway (two doors north of Starbucks on University and Broadway).

Contact the Undergraduate Advisor Allison Frey at Allison.Frey@Colorado.edu. To change your major to Asian Studies, please schedule an appointment through advising.colorado.edu (<http://advising.colorado.edu>)'s appointment system.

General Degree Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below: 42 credit hours minimum, 18 of which must be upper-division (College of Arts and Sciences minimum). Other courses not listed here including some study abroad courses and special topics courses may be applicable toward the Asian Studies major, but must first be approved by the Asian Studies Faculty Advisor.

Required Courses

ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections	3
ASIA 4830	Capstone Seminar in Asian Studies	3

Asian Language

4 semesters of a single Asian language: 12-20

Arabic (sequence of three years offered)

Chinese (sequence of four years offered)

Farsi (sequence of four years offered)

Hindi (sequence of three years offered)

Japanese (sequence of four years offered)

Korean (sequence of three years offered)

Sanskrit and Tibetan are also available through Continuing Education

Traditional Asian Civilizations

Students take any two introductory courses, focusing on two different civilizations (East Asia, South Asia, West Asia); 6 credit hours minimum, lower division (see Traditional Asian Civilizations below) 6

Modern Asian Civilizations

Students take one course; 3 credit hours, lower division or upper division (see Modern Asian Civilizations below) 3

Electives

Students take at least three courses; 9 credit hours, lower division or upper division (see Electives below) 9

Total Credit Hours 36-44

Traditional Asian Civilizations

Students take any two of the following introductory courses, focusing on two different civilizations (East Asia, South Asia, West Asia); 6 credit hours minimum, lower-division.

East Asian Civilization

CHIN 1012	Introduction to Chinese Civilization
HIST 1618	Introduction to Chinese History to 1644
HIST 1708	Introduction to Japanese History
JPNS 1012	Introduction to Japanese Civilization

Bachelor's Degree in Asian Studies--West Asia/Middle East Track

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below: 42 credit hours minimum, 18 of which must be upper-division (College of Arts and Sciences minimum). Other courses not listed here including some study abroad courses and special topics courses may be applicable toward the Asian Studies major, but must first be approved by the Asian Studies Faculty Advisor.

Required Courses

ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections
ASIA 4830	Capstone Seminar in Asian Studies (The Senior Thesis/Project should focus on a West Asian topic.)

Asian Language

4 semesters of a single West Asian language (14-20 credit hours). 12-20 Additional semesters can count as Asian Studies Electives.

Arabic (sequence of three years offered)	
Farsi (sequence of three years offered)	

Traditional Asian Civilizations

Students take two introductory courses, one on West Asia and one on South or East Asia; 6 credits minimum, lower division.

West Asian Civilization	
ANTH 1135	Exploring Cultural Diversity
ARAB 1011	Introduction to Arab and Islamic Civilizations
ARAB 2231	Love, Loss and Longing in Classical Arabic Literature
FRSI 1011	Introduction to Persian Civilization
HIST 1308	Introduction to Middle Eastern History
RLST 2202	Islam
East or South Asian Civilization	
East Asian Civilization	
CHIN 1012	Introduction to Chinese Civilization
HIST 1438	Introduction to Korean History
HIST 1618	Introduction to Chinese History to 1644
HIST 1708	Introduction to Japanese History
JPNS 1012	Introduction to Japanese Civilization
KREN 1011	Introduction to Korean Civilization
RLST 2620	Religions of East Asia
South Asian Civilization	
HIND 1011	Introduction to South Asian Civilizations
HIST 1518	Introduction to South Asian History to 1757
RLST 2610	Religions of India
<i>Modern Asian Civilizations</i>	

Students take one course; 3 credit hours, lower division or upper division.

Electives

Students take at least three additional courses (9 credit hours), two of which (6 credit hours) focus on West Asia, lower division or upper division.

Courses with a West Asian Focus

All ARAB and FRSI courses		
ANTH 1135	Exploring Cultural Diversity (Mesopotamia-2nd Millennium BC)	3

RLST 2600	Judaism, Christianity, and Islam	
RLST 3100	Judaism	
RLST 3600		
Total Credit Hours		30-38

Asian Studies - Minor

The minor in Asian studies allows students to engage in interdisciplinary study of Asia, adding an important global focus to their primary studies. While the minor does not grant credit for foreign language, students are encouraged to study abroad, and are able to gain a strong foundation in knowledge of the Asian world through a vast array of fascinating coursework. The Asian studies academic advisor and faculty advisor

strongly encourage thematic or regional concentration, and are available for help in customizing the minor.

For any questions, please email Dr. Colleen Berry (colleen.berry@colorado.edu) or call (303) 735-5224. Visit the Asian studies minor (<http://www.colorado.edu/cas/academics/asian-studies-minor>) webpage for additional information.

Required Courses and Credit Hours

Students must take a minimum of 21 credit hours, 12 of which must be upper-division (usually four 3-credit-hour courses). Up to, but no more than, 9 credit hours earned through study abroad can be counted toward the minor.

Required Courses

ASIA 2000	Gateway to Modern Asia: Exploring Regional Connections	3
Traditional Asian Civilizations: two courses (two different civilizations; see list below)		6
Modern Asian Civilizations: one course (see list below)		3
Electives		
The remaining credits are fulfilled through a variety of available electives (see list below)		9
Total Credit Hours		21

Traditional Asian Civilizations

Students take two of the following introductory courses, choosing one from each of two different civilizations (East Asia, South Asia, West Asia); 6 credit hours minimum, lower-division.

East Asian Civilization

CHIN 1012	Introduction to Chinese Civilization
HIST 1618	Introduction to Chinese History to 1644
HIST 1708	Introduction to Japanese History
JPNS 1012	Introduction to Japanese Civilization
HIST 1438	Introduction to Korean History
KREN 1011	Introduction to Korean Civilization
RLST 2620	Religions of East Asia

South Asian Civilization

HIND 1011	Introduction to South Asian Civilizations
HIST 1518	Introduction to South Asian History to 1757
RLST 2610	Religions of India

West Asian Civilization

ANTH 1135	Exploring Cultural Diversity (Mesopotamia 2nd Millennium BC)
ARAB 1011	Introduction to Arab and Islamic Civilizations
ARAB 2231	Love, Loss and Longing in Classical Arabic Literature
FRSI 1011	Introduction to Persian Civilization
HIST 1308	Introduction to Middle Eastern History
RLST 2202	Islam
RLST 2320	The Muslim World, 600-1250

Modern Asian Civilizations

Students take one course; 3 credit hours, lower-division or upper-division.

ANTH (all modern Asian anthropology courses)

ANTH 1100	Exploring a Non-Western Culture: The Tamils
ANTH 1105	Exploring a Non-Western Culture: Tibet
ANTH 1135	Exploring Cultural Diversity (Japan; Papua New Guinea)

Astrophysical and Planetary Sciences

The Department of Astrophysical and Planetary Sciences is one of the few programs that combines both astrophysics and planetary science, providing a unified view of space sciences, the solar system and comparative planetology, stellar and galactic astronomy, and cosmology. Students are given hands-on experience with telescopes, optics, instrumentation, and computer-image processing and modeling.

Course code for this program is ASTR.

Bachelor's Degree

ASTR 1000 (3) The Solar System

Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1010, but without lab ASTR 1010 or ASTR 1030

Requisites: Restricted to non- Astronomy (ASTR) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence
MAPS Course: Natural Science

ASTR 1010 (4) Introductory Astronomy 1

Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Requires nighttime observations at Sommers-Bausch Observatory.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1000, but with additional lab ASTR 1000 or ASTR 1030

Requisites: Restricted to non- Astronomy (ASTR) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab
MAPS Course: Natural Science Lab or Lab/Lec

ASTR 1020 (4) Introductory Astronomy 2

Non-science majors learn the nature and workings of the Sun, stars, neutron stars, black holes, galaxies, quasars, structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory. Includes recitation. Sequence link ASTR 1010.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1040 and ASTR 1200

Requisites: Requires a prerequisite course of ASTR 1000 or ASTR 1010 (minimum grade C-). Restricted to non- Astronomy (ASTR) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Non-Sequence

ASTR 1030 (4) Accelerated Introductory Astronomy 1

Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Like ASTR 1000 and 1010, but taught at a higher intellectual level, including a significant amount of quantitative analysis.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1000 or ASTR 1010

Requisites: Requires prerequisite or corequisite course of MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec
Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

ASTR 1040 (4) Accelerated Introductory Astronomy 2

Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observing sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Includes a recitation. Taught at a higher intellectual level including a significant amount of quantitative analysis.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1020 and ASTR 1200

Requisites: Requires prerequisite course of ASTR 1010 or ASTR 1030 and MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec
Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

ASTR 1200 (3) Stars and Galaxies

Non-science majors are introduced to the nature and workings of the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, plus structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1020 and ASTR 1040

Requisites: Restricted to non- Astronomy (ASTR) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ASTR 2000 (3) Ancient Astronomies of the World

Documents the numerous ways in which observational astronomy and cosmology have been features of ancient cultures. Includes naked eye astronomy, archaeoastronomy, ethnoastronomy, concepts of time, calendrics, cosmogony, and cosmology.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Natural Science Non-Sequence

ASTR 2010 (3) Modern Cosmology-Origin and Structure of the Universe

Introduces modern cosmology to nonscience majors. Covers the Big Bang; the age, size, and structure of the universe; and the origin of the elements and of stars, galaxies, the solar system, and life.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ASTR 2020 (3) Space Astronomy and Exploration

Covers physical principles of performing astronomy from space for science and exploration. The basic design of launch vehicles and spacecraft, orbital dynamics, and instruments will be described in the context of specific space missions (e.g. Hubble Telescope, Mars rovers) as well as prospects for future space observatories in orbit and on the Moon.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

ASTR 2030 (3) Black Holes

Black holes are one of the most bizarre phenomena of nature. Students are introduced to the predicted properties of black holes, astronomical evidence for their existence and formation, and modern ideas about space, time, and gravity.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

ASTR 2040 (3) The Search for Life in the Universe

Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, including Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars. Credit only for this course or ASTR 3300.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 2040

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

ASTR 2050 (3) The Sun and Society: Living with an Active Star

Introduces non-science majors to the many ways out Sun influences life and society. Covers how the Sun generates energy, how it evolves over billions of years, how it affects Earth's climate and biology, how it produces dangerous "space weather", how we can harness its power and how life in other solar systems would depend on the properties of their Suns.

Grading Basis: Letter Grade

ASTR 2500 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 1400

Requisites: Restricted to Astrophysics (ASTR) majors only.

ASTR 2600 (3) Introduction to Scientific Programming

Introduces principles, methods and tools of scientific programming commonly used in reach. Topics include an introduction to programming in Python, data structures, numerical methods for calculus and data manipulation/visualization. Techniques covered are relevant to many technical fields but emphasis is placed on application to problems in astronomy and planetary science. Class time is split between lectures and in-lab tutorials.

ASTR 2840 (1-3) Independent Study

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

ASTR 3300 (3) Extraterrestrial Life

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science. Credit only for this course or ASTR 2040.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3300

ASTR 3510 (4) Observations and Instrumentation 1

Lab course in astronomical observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, basic optical design and instrumentation and statistical analysis of data, with emphasis on imaging applications. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.

Requisites: Requires a prerequisite or corequisite core of APPM 1360 or MATH 2300 and ASTR 1020 or ASTR 1040 and PHYS 1120 (all minimum grade C-). Restricted to Astrophysics (ASTR) majors only.

ASTR 3520 (4) Observations and Instrumentation 2

Lab course in observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, optical design and instrumentation, and statistical analysis, with emphasis on spectroscopy. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.

Requisites: Requires a prerequisite course of ASTR 3510 (minimum grade C-). Restricted to Astrophysics (ASTR) majors only.

ASTR 3560 (3) Astronomical Instrumentation Laboratory

Teaches students aspects of astronomical instrument design in a hands-on setting. Students will learn elementary principles of geometrical optics, diffraction, light detection, signal conditioning, data acquisition and motion control, and mechanical design. Students will apply these principles working in groups to design and build optical spectrometers.

Requisites: Requires prerequisites courses of ASTR 1040 and MATH 2300 or APPM 1360 and PHYS 2170 (minimum grade C-).

Grading Basis: Letter Grade

ASTR 3710 (3) Formation & Dynamics of Planetary Systems

Covers the origin of planetary systems and their dynamical evolution. Topics include the physics and chemistry of planetary formation, orbital mechanics and extrasolar planets. This course and ASTR 3720 and ASTR 3750 may be taken in any order. Elective for APS major and minor.

Requisites: Requires prerequisite course of PHYS 1120 and MATH 2300 or APPM 1360 (all minimum grade C-).

ASTR 3720 (3) Planets and Their Atmospheres

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3720

Requisites: Requires prerequisite courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-).

ASTR 3730 (3) Astrophysics 1 - Stellar and Interstellar

Provides a quantitative introduction to the radiative and gravitational physics relevant to stellar and galactic astrophysics, as applied to understanding observations of stars, stellar evolution, stellar remnants and the structure of the Milky Way. Elective for APS major and minor.

Requisites: Requires prerequisite courses of PHYS 2130 or PHYS 2170 and APPM 2350 or MATH 2400 (all minimum grade C-).

ASTR 3740 (3) Cosmology and Relativity

Special and general relativity as applied to astrophysics, cosmological models, observational cosmology, experimental relativity and the early universe. Elective for APS major and minor.

Requisites: Requires prerequisite courses of PHYS 2130 or PHYS 2170 and APPM 2350 or MATH 2400 (all minimum grade C-).

ASTR 3750 (3) Planets, Moons, and Rings

Approaches the physics of planets, emphasizing their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. This course and ASTR 3720 may be taken for credit in any order. Elective for APS major and minor.

Requisites: Requires prerequisite courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-).

ASTR 3760 (3) Solar and Space Physics

Explores the physical processes linking the Sun and planets, emphasizing solar radiative and particulate variability and the response of planetary atmospheres and magnetospheres. Topics include the solar dynamo, solar wind, coronal mass ejections, cosmic ray modulation, magnetospheres, aurora, the space environment, and climate variability. Elective for APS major and minor.

Requisites: Requires prerequisite or corequisite courses of PHYS 2130 or PHYS 2170 and APPM 2350 or MATH 2400 (all minimum grade C-).

Recommended: Prerequisite PHYS 3310.

ASTR 3800 (3) Introduction to Scientific Data Analysis and Computing

Introduces scientific data analysis from a practical perspective. Covers statistical analysis, model fitting, error analysis, theoretical compliance and image analysis with examples from space-based and ground-based astronomy. Elective for APS major. Opened to qualified non-majors with instructor consent.

Requisites: Requires prerequisite course of ASTR 2600 and prerequisite or corequisite courses of ASTR 1020 or ASTR 1040 and PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-).

ASTR 3830 (3) Astrophysics 2 - Galactic and Extragalactic

The second semester of a year-long introduction to astrophysical processes. The physical processes developed in ASTR 3730 are applied to topics in extragalactic astronomy, including galaxies, supermassive black holes, galaxy clusters and cosmology. Elective for APS major and minor.

Requisites: Requires prerequisite courses of ASTR 3730 and PHYS 2130 or PHYS 2170 and APPM 2350 or MATH 2400 (all minimum grade C-).

ASTR 4330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: upper-division undergraduate standing in physical science and upper-division undergraduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5330 and GEOL 4330 and GEOL 5330

ASTR 4500 (1-3) Special Topics in Astrophysical and Planetary Sciences

Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

ASTR 4800 (3) Space Science: Practice and Policy

Exposes students to current controversies in science that illustrate the scientific method and the interplay of observation, theory, and science policy. Students research and debate both sides of the issues, which include strategies and spin-offs of space exploration, funding of science, big vs. small science, and scientific heresy and fraud.

Recommended: Prerequisite one year of college level astronomy or physics.

ASTR 4840 (1-3) Independent Study

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

ASTR 4841 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

Astronomy - Bachelor of Arts (BA)

The Department of Astrophysical & Planetary Sciences (APS) offers an astronomy degree with two tracks: general astronomy (APS only), and astrophysics/physics (supervised jointly by APS and the Department of Physics).

The specific goals of the astronomy major are:

- To provide both practical and theoretical knowledge of astronomy and astrophysics at a level comparable to the best programs at other major U.S. public institutions. The APS Department is one of the few programs that combines both astrophysics and planetary science. As a result, we avoid duplications of overlapping curricula, and provide a unified view of space sciences, the solar system and comparative planetology, stellar and galactic astronomy, and cosmology.
- To provide courses on, and significant hands-on experience with, telescopes, optics, instrumentation, computer image processing, and computer modeling. Such skills are useful for students wishing to pursue graduate degrees or careers in aerospace, technical or computer industries.
- To provide opportunities for faculty-advised research and senior (honors) theses.

We offer you the ability to graduate with honors. This requires you maintain a minimum GPA and that you write and defend an honors thesis. More information can be obtained from the APS department office and/or the Honors Council Representative (Erica Ellingson). For more general information about the honors thesis, visit the College of Arts and Sciences Honors Program (<http://www.colorado.edu/honors>) website.

For more information about the astronomy degree, visit the department's Undergraduate Studies (<http://www.colorado.edu/aps/undergraduate-students/prospective-students>) webpage.

Program Tracks

General Astronomy Track

The bachelor's degree in astronomy with a concentration in general astronomy is designed to meet student needs for basic, undergraduate training in space sciences (astronomy, astrophysics, planetary sciences and space physics). Undergraduates are prepared for both academic research assistant careers and the industrial market (aerospace, computer software, instrumentation and other technical areas) as well as for science education, science journalism and space policy. This track provides a broad program in the science of astronomy, observations and technology as well as core training in astronomical sciences and mathematics, applied physics and computational and instrumental technology for professions in the space sciences. The track can focus on observations (ground-based telescopes, rocket probes, space-borne observatories) or on K-12 science education, for which astronomy provides excellent science content for motivating young students. It also offers broad training for careers in science policy and science writing.

Astrophysics/Physics Track

This track is directed toward students interested in pursuing graduate studies in astrophysics. For these students, we require multidisciplinary work in physics and mathematics together with astronomy. This track offers a superior experience for students, with "value added" from the professional astrophysics and planetary science faculty in APS. Graduates will be provided with scientific and technological training in the space sciences, including mathematical, physical, computational, and instrumental expertise. An honors thesis or other research work is encouraged, but not required.

International Bachelor of Arts (IBA)

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in astronomy, in addition to completing all the current requirements for the BA with a major in astronomy at the home institution, students must complete one full-time semester of experiential, customized, international learning at the non-home institution.

Requirements

General Astronomy Track

This is appropriate for someone aiming for a career in K–12 education, science journalism, science policy, information technology, science management or technical work that does not require a graduate degree.

Students must complete a minimum of 32 credit hours in astronomy (this must include at least 18 upper-division credit hours) and a minimum of 9 credit hours in physics.

Required Courses and Credit Hours

Required Courses

ASTR 1030 & ASTR 1040	Accelerated Introductory Astronomy 1 and Accelerated Introductory Astronomy 2 ¹	8
PHYS 1110	General Physics 1	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1

Select one of the following: 3

ASTR 2500/ ASEN 1400	Gateway to Space	
ASTR 2600	Introduction to Scientific Programming	
PHYS 2130	General Physics 3	
PHYS 2170	Foundations of Modern Physics	

Select a minimum of two of the following: 6

ASTR 2000	Ancient Astronomies of the World	
ASTR 2010	Modern Cosmology-Origin and Structure of the Universe	
ASTR 2020	Space Astronomy and Exploration	
ASTR 2030	Black Holes	
ASTR 2040	The Search for Life in the Universe	
ASTR 2500	Gateway to Space	
ASTR 2600	Introduction to Scientific Programming	
ASTR 3300	Extraterrestrial Life	

Select one of the following upper-division course sequences: 6

ASTR 3720 & ASTR 3750	Planets and Their Atmospheres and Planets, Moons, and Rings	
--------------------------	--	--

ASTR 3730 & ASTR 3830	Astrophysics 1 - Stellar and Interstellar and Astrophysics 2 - Galactic and Extragalactic	
--------------------------	--	--

Electives

Select four additional courses from the following or from those sequence courses not used for the upper-division sequence requirement above: 12-15

ASEN 4010	Introduction to Space Dynamics	
ASTR 3510	Observations and Instrumentation 1	
ASTR 3520	Observations and Instrumentation 2	
ASTR 3710	Formation & Dynamics of Planetary Systems	
ASTR 3740	Cosmology and Relativity	
ASTR 3760	Solar and Space Physics	
ASTR 3800	Introduction to Scientific Data Analysis and Computing	
ASTR 4330	Cosmochemistry	
ASTR 4800	Space Science: Practice and Policy	
ASTR 5760	Astrophysical Instrumentation	
ATOC 4720	Introduction to Atmospheric Dynamics	

Required ancillary calculus course work:

Select one of the following sequences: 8-10

APPM 1350 & APPM 1360	Calculus 1 for Engineers and Calculus 2 for Engineers	
MATH 1300 & MATH 2300	Calculus 1 and Calculus 2	

Required ancillary science sequence with lab:

Select one other science sequence with lab. Can be satisfied by any sequence that satisfies arts and sciences core curriculum in natural sciences with lab, for example: ² 7-10

CHEM Sequence:		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	
EBIO Sequence:		
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
EBIO 1220 & EBIO 1240	General Biology 2 and General Biology Laboratory 2	
GEOL Sequence:		
GEOL 1010 & GEOL 1030	Introduction to Geology and Introduction to Geology Laboratory 1	
GEOL 1020	Introduction to Earth History	
ATOC Sequence:		
ATOC 1050 & ATOC 1070	Weather and the Atmosphere and Weather and the Atmosphere Laboratory	
ATOC 1060	Our Changing Environment: El Nino, Ozone, and Climate	

Total Credit Hours 59-67

¹ Or ASTR 1010 and ASTR 1020 with permission.

² Or equivalent.

Astrophysics/Physics Track (Jointly Supervised by the APS and Physics Departments)

For students aiming for a graduate program in astronomy or planetary sciences. Similar to Physics Plan 2 (Astrophysics), with additional astrophysics instrumentation labs and different electives.

Students must complete a minimum of 23 credit hours in astronomy and a minimum of 28 credit hours in physics (this must include at least 15 upper-division credit hours in astronomy and 12 in physics).

Required Courses and Credit Hours

Lower-Division Course Work

The following courses are required:

ASTR 1030 & ASTR 1040	Accelerated Introductory Astronomy 1 and Accelerated Introductory Astronomy 2	8
PHYS 1110 & PHYS 1120 & PHYS 1140	General Physics 1 and General Physics 2 and Experimental Physics 1	9
PHYS 2170 & PHYS 2150	Foundations of Modern Physics and Experimental Physics 2	4
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3

Upper-Division Course Work

The following physics courses are required:

PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3

Select one of the following two astronomy sequences (6-hour minimum): 6

ASTR 3720 & ASTR 3750	Planets and Their Atmospheres and Planets, Moons, and Rings	
ASTR 3730 & ASTR 3830	Astrophysics 1 - Stellar and Interstellar and Astrophysics 2 - Galactic and Extragalactic	

Select three additional courses from the following or from those sequence courses not used above (9-hour minimum): 9

ASTR 3510	Observations and Instrumentation 1	
ASTR 3520	Observations and Instrumentation 2	
ASTR 3710	Formation & Dynamics of Planetary Systems	
ASTR 3740	Cosmology and Relativity	
ASTR 3760	Solar and Space Physics	
ASTR 3800	Introduction to Scientific Data Analysis and Computing	
ASTR 4330	Cosmochemistry	
ATOC 4720	Introduction to Atmospheric Dynamics	
ASEN 4010	Introduction to Space Dynamics	
Any ASTR 5000- or 6000-level course with instructor's permission		

Suggested physics electives:

PHYS 4150	Plasma Physics	
PHYS 4230	Thermodynamics and Statistical Mechanics	
PHYS 4410	Quantum Mechanics 2	
PHYS 4420	Nuclear and Particle Physics	
PHYS 4510	Optics	

Required ancillary calculus course work: 16-18

Select one of the following sequence of courses:

APPM 1350 Calculus 1 for Engineers
& APPM 1360 and Calculus 2 for Engineers
& APPM 2350 and Calculus 3 for Engineers
& APPM 2360 and Introduction to Differential Equations with Linear Algebra

MATH 1300 Calculus 1
& MATH 2300 and Calculus 2
& MATH 2400 and Calculus 3
& APPM 2360 and Introduction to Differential Equations with Linear Algebra

Total Credit Hours

67-69

Astronomy - Minor

Declaration of a minor in astrophysical and planetary sciences is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

Course work applied to the minor may be applied to another major or toward core curriculum requirements. Minimum requirements for a minor include:

- a minimum of six ASTR courses (18 credit hours), including at least three advanced courses (numbered above 3500) (9 credit hours), and
- all course work applied to a minor must be completed with a grade of C- or better; no pass/fail work may be applied. The GPA for all minor degree course work must be equal to 2.00 (C) or higher, and
- students pursuing an individually structured major or a major in distributed studies are not eligible to earn a minor, and
- students are allowed to apply no more than three courses, including two advanced courses, of transfer work toward a minor.

Required Courses and Credit Hours

Elementary

Select a maximum of three courses from the following:

ASTR 1030 & ASTR 1040	Accelerated Introductory Astronomy 1 and Accelerated Introductory Astronomy 2 ¹
ASTR 2000	Ancient Astronomies of the World
ASTR 2010	Modern Cosmology-Origin and Structure of the Universe
ASTR 2020	Space Astronomy and Exploration
ASTR 2030	Black Holes
ASTR 2040	The Search for Life in the Universe
ASTR 2500/ ASEN 1400	Gateway to Space
ASTR 2600	Introduction to Scientific Programming
ASTR 3300	Extraterrestrial Life

Advanced

Select one of the following upper division course sequences:

Planetary Sequence:

ASTR 3720 Planets and Their Atmospheres
& ASTR 3750 and Planets, Moons, and Rings

Astrophysics Sequence:

ASTR 3730 Astrophysics 1 - Stellar and Interstellar
& ASTR 3830 and Astrophysics 2 - Galactic and Extragalactic

Select a minimum of one of the following:

ASTR 3510 Observations and Instrumentation 1

ASTR 3520	Observations and Instrumentation 2
ASTR 3710	Formation & Dynamics of Planetary Systems
ASTR 3720	Planets and Their Atmospheres
ASTR 3730	Astrophysics 1 - Stellar and Interstellar
ASTR 3740	Cosmology and Relativity
ASTR 3750	Planets, Moons, and Rings
ASTR 3760	Solar and Space Physics
ASTR 3830	Astrophysics 2 - Galactic and Extragalactic
ASTR 4330	Cosmochemistry
ASTR 4840	Independent Study
ATOC 4720	Introduction to Atmospheric Dynamics
Total Credit Hours	18

¹ Or ASTR 1010 and ASTR 1020 with permission.

Additional information is available from any faculty mentor. See http://aps.colorado.edu/undergrad_main.html.

Atmospheric and Oceanic Sciences

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

ATOC began offering an undergraduate major in fall 2016. This Bachelor of Arts degree is the first of its kind at CU Boulder for students interested in an in-depth understanding of the physical basis for the role of the atmosphere and oceans in Earth's climate system. In addition, ATOC offers a minor in atmospheric and oceanic sciences for students pursuing a bachelor's degree in another academic department. ATOC also offers many courses approved for the Natural Science requirement of the College of Arts & Sciences Core Curriculum.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit www.colorado.edu/atoc (<http://www.colorado.edu/atoc>).

Course code for this program is ATOC.

Bachelor's Degree

- Atmospheric and Oceanic Sciences - Bachelor of Arts (BA) (p. 217)

Minor

- Atmospheric and Oceanic Sciences - Minor (p. 220)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

ATOC 1050 (3) Weather and the Atmosphere

Introduces principles of modern meteorology for nonscience majors, with emphasis on scientific and human issues associated with severe weather events. Includes description, methods of prediction, and impacts of blizzards, hurricanes, thunderstorms, tornadoes, lightning, floods, and firestorms.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence
MAPS Course: Natural Science

ATOC 1060 (3) Our Changing Environment: El Nino, Ozone, and Climate

Discusses the Earth's climate for nonscience majors, focusing on the role of the atmosphere, oceans, cryosphere and land surface. Describes the water cycle, atmospheric circulations and ocean currents, and how they influence global climate, El Nino and the ozone hole. Discusses human impacts from climate change.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 1060

Recommended: Prerequisite ATOC 1050.

Additional Information: Arts Sci Core Curr: Natural Science Sequence

ATOC 1070 (1) Weather and the Atmosphere Laboratory

Illustrates fundamentals of meteorology with laboratory experiments. Covers collection, analysis and discussion of data related to local weather. Uses computers for retrieval and interpretation of weather data from Colorado and across the U.S. Optional lab for ATOC 1050.

Recommended: Prerequisite or corequisite ATOC 1050.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

ATOC 3050 (3) Principles of Weather

Explores the processes that influence middle latitude weather including atmospheric thermodynamics, cloud and precipitation processes, atmospheric dynamics, air masses and fronts, and mid-latitude cyclones. Recitations and homework assignments will allow students to apply these concepts to real weather data through analysis of weather maps, thermodynamics diagrams and conceptual models.

Recommended: Prerequisites ATOC 1050 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 3070 (3) Introduction to Oceanography

Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3070

Recommended: Prerequisite any 1000-level ATOC or GEOL course or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 3180 (3) Aviation Meteorology

Familiarizes students with a wide range of atmospheric behavior pertinent to air travel: rudiments of aerodynamics; aircraft stability and control; atmospheric circulation, vertical motion, turbulence and wind shear; fronts, clouds and storms.

Recommended: Prerequisite ATOC 1050 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 3300 (3) Analysis of Climate and Weather Observations

Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3301

Recommended: Prerequisites ATOC 1050 or ATOC 1060 or ATOC 3600 or GEOG 3601 or ENVS 3600 or GEOG 1001 and one semester calculus.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 3500 (3) Air Chemistry and Pollution

Examines the composition of the atmosphere and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3151

Recommended: Prerequisite one semester of college-level chemistry or one year of high school chemistry.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 3600 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3601 and ENVS 3600

Recommended: Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 3720 (3) Planets and Their Atmospheres

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 3720

Requisites: Requires prerequisite courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Astronomy (ASTR) or Atmospheric Oceanic Sciences (ATOC) majors only.

ATOC 4200 (3) Biogeochemical Oceanography

Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5200

Recommended: Prerequisites one semester of calculus and one semester of chemistry.

ATOC 4215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5215 and ASEN 4215 and ASEN 5215

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ATOC 4500 (1-3) Special Topics in Atmospheric and Oceanic Sciences

Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. May be repeated for a total of 9 total credit hours within the degree. Students may register for more than one section of this course in the same semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ATOC 4550 (3) Mountain Meteorology

Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5550

Recommended: Prerequisite ATOC 1050 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 4700 (3) Weather Analysis & Forecasting

Utilizing a range of operational weather observations to analyze current weather conditions, providing hands-on experience interpreting observations and relating those observations to the physical principles that govern atmospheric behavior is the course emphasis. It focuses on how to read weather reports, analyze observations, and how to prepare weather maps to analyze current conditions and how to interpret numerical weather forecasts.

Recommended: Prerequisite ATOC 1050 or ATOC 1060 or ATOC 4720 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 4710 (3) Introduction to Atmospheric Physics

Provides a fundamental overview of the physics of Earth's atmosphere. Topics include atmospheric composition and structure, atmospheric radiation and optics (rainbows, halos and other phenomena), atmospheric thermodynamics, cloud physics and atmospheric electricity and lightning. Including both descriptive and quantitative approaches to the subject material. Where applicable, observations from the ATOC Skywatch Observatory will be introduced.

Recommended: Prerequisite one year of calculus and one year of physics with calculus.

ATOC 4720 (3) Introduction to Atmospheric Dynamics

Introduces the fundamental physical principles that govern the atmospheric circulations across a range of spatial and temporal scales and provides a quantitative description and interpretation of a wide range of atmospheric phenomena. Topics include atmospheric forces, governing equations, balanced and unbalanced flows, atmospheric waves and mid-latitude cyclones.

Recommended: Prerequisite one year of calculus and one semester of physics with calculus.

ATOC 4730 (3) Physical Oceanography and Climate

Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Niño, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5730

Grading Basis: Letter Grade

ATOC 4750 (3) Desert Meteorology and Climate

Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5750

Recommended: Prerequisites one semester of calculus and ATOC 1050 or ATOC 1060 or ATOC 3600 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 4770 (3) Wind Energy Meteorology

Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5770

Recommended: Prerequisite ATOC 1050 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ATOC 4800 (3) Policy Implications of Climate Controversies

Examines controversial issues related to the environment, including climate change. Covers scientific theories and the intersection between science and governmental policy. Includes discussion, debate and critical reading of textual materials. Department enforced prerequisite: ATOC 1060 or ATOC 3600.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5000 and ENV5 5830

ATOC 4900 (1-3) Independent Study

Department enforced prerequisite: instructor consent.

Repeatable: Repeatable for up to 6.00 total credit hours.

ATOC 4950 (1-3) Honors Thesis

Students work independently on a research topic under the guidance of a faculty member. A written thesis and an oral presentation of the work are required. Registration by arrangement and with consent of faculty mentor. Department enforced prerequisite: minimum 3.00 GPA.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course

Atmospheric and Oceanic Sciences - Bachelor of Arts (BA)

The Atmospheric and Oceanic Sciences (ATOC) Bachelor of Arts degree is the first of its kind at the University of Colorado Boulder for students interested in an in-depth understanding of the physical basis for the role of the atmosphere and oceans in Earth's climate system. An ATOC degree will prepare students to pursue a wide range of careers in areas as diverse as the energy sector, insurance, military, air and water quality monitoring, weather, and aerospace industries. It will provide a solid foundation for advanced degrees in the atmospheric and oceanic sciences, and for professions in scientific research and academia.

ATOC's curriculum responds to demands of current students for more interactive learning opportunities and to demands of employers for graduates who have been trained to provide quantitative solutions to real-world problems. It is designed to provide students with a core set of knowledge and skills related to atmospheric and oceanic sciences, and to engage students in hands-on, interactive learning early and often.

To that end, it requires students to take several "methods" courses that emphasize quantitative problem-solving by focusing on some combination of data analysis, observations, and/or modeling; all of these courses will incorporate some level of computer programming or scientific computing. ATOC strongly recommends that every student have a laptop computer if it is financially feasible. Students who intend to purchase a computer and wish to have its cost included in their financial aid calculations are strongly encouraged to consult the Office of Financial Aid before purchase.

ATOC's curriculum is also designed to take advantage of our unique position as a university in the center of a world-renowned mecca for earth system science. Scientists from the local community contribute their expertise to the ATOC curriculum, particularly in the interactive methods courses, and mentor seniors in their thesis research.

Contact Information

The ATOC undergraduate advisor is:
Professor John Cassano
Office: SEEC C279
Email: john.cassano@colorado.edu

Academic Advising Center:
Jason Shelton
Email: jason.shelton@colorado.edu
Phone: 303-492-6508

For further information concerning undergraduate studies, contact ATOC's Graduate and Undergraduate Program Assistant Laurie Conway (laurie.conway@colorado.edu).

Requirements

Students receiving a BA in Atmospheric and Oceanic Sciences (ATOC) must satisfy the basic requirements of the College of Arts and Sciences (MAPS, Core Curriculum and credits) and fulfill the requirements listed below.

Students are required to complete 45 credit hours in lower and upper division ATOC coursework, including 21 hours of core ATOC courses, 12 hours of methods in ATOC, and 12 hours of designated upper-division ATOC electives. The requirements for the ATOC major also include 32-34 hours of ancillary science and mathematics. All required major courses and all required ancillary courses must be passed with a C- or better.

Under normal circumstances, no more than 45 credit hours in ATOC may be used toward a student's total University of Colorado graduation requirements. However, up to 6 hours of designated department honors courses are exempted from this credit hour maximum. Students must have a grade point average of at least 2.00 in the major in order to graduate.

Atmospheric and Oceanic Sciences major requirements

Ancillary Science and Math Requirements (C- or better required).

The field of atmospheric and oceanic sciences is highly interdisciplinary; therefore, students must develop a basic understanding of physics, chemistry, and mathematics to be successful. The required courses in the physical sciences and math departments outside of ATOC are a critical part of the major; they are needed to build a strong foundation upon which the remaining curriculum is based.

Atmospheric and Oceanic Sciences - Minor

The Department of Atmospheric and Oceanic Sciences (ATOC) offers an undergraduate minor for students pursuing a bachelor's degree in another academic department. Students who successfully complete a major at CU Boulder in a quantitative field, such as physics or chemistry, and a minor in ATOC, will be prepared for graduate work in atmospheric and oceanic sciences. The ATOC minor is offered through the College of Arts and Sciences and is noted on the official CU Boulder transcript.

Although the ATOC minor is primarily designed for students who are interested in developing a knowledge base in atmospheric and oceanic sciences with an emphasis on the earth's climate, there is considerable latitude within the minor program for students to design a course of study that is tailored to their individual interests.

Students who wish to declare the ATOC minor should contact the ATOC Undergraduate & Graduate Program Assistant by email at atocasst@colorado.edu or by phone at 303-492-6633. Questions regarding course work or advising should be directed to the ATOC minor advisor, Dr. John Cassano, at john.cassano@colorado.edu.

Requirements

A total of 18 credit hours is required for the minor, at least nine of which must be upper-division credit hours (see list below). The other 9 may be either lower-division, upper-division or a combination.

All course work applied to the minor must be completed with a grade of C- or better; no pass/fail work may be applied. Students must have at least a C (2.00) average for all attempted work in atmospheric and oceanic sciences.

Courses toward a minor may also be applied toward general requirements, like core and MAPS, as well as the major requirements for a non-ATOC major. Students are allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work to a minor.

Available Courses and Semester Credit Hours

Lower-Division

FYSM 1000	First Year Seminar (ATOC section)
ATOC 1050	Weather and the Atmosphere
ATOC 1060	Our Changing Environment: El Nino, Ozone, and Climate

Upper-Division

ATOC 3050	Principles of Weather
ATOC/GEOL 3070	Introduction to Oceanography
ATOC 3180	Aviation Meteorology
ATOC 3300	Analysis of Climate and Weather Observations
ATOC 3500/ CHEM 3151	Air Chemistry and Pollution
ATOC/ ENVS 3600/ GEOG 3601	Principles of Climate

ATOC 4200	Biogeochemical Oceanography
ATOC/ASEN 4215	Descriptive Physical Oceanography
ATOC 4500	Special Topics in Atmospheric and Oceanic Sciences
ATOC 4550	Mountain Meteorology
ATOC 4700	Weather Analysis & Forecasting
ATOC 4710	Introduction to Atmospheric Physics
ATOC 4720	Introduction to Atmospheric Dynamics
ATOC 4750	Desert Meteorology and Climate
ATOC 4770	Wind Energy Meteorology
ATOC 4800	Policy Implications of Climate Controversies
ATOC 4900	Independent Study

British and Irish Studies

The Center for British and Irish Studies encourages students to develop programs that include a focus on British and Irish culture, history and

contemporary life from a variety of disciplinary perspectives. The center offers a certificate in British and Irish studies for students who have taken 24 credit hours in British and Irish literature, history and/or other fields.

For more information, contact the Center for British and Irish Studies at katherine.eggert@colorado.edu. For more information, go to www.colorado.edu/artssciences/british (<http://www.colorado.edu/artssciences/british>).

Certificate

- British and Irish Studies - Certificate (p. 221)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Eggert, Katherine (https://experts.colorado.edu/display/fisid_103618)
PhD, University of California-Berkeley

British and Irish Studies - Certificate

Undergraduates interested in the literature, history and culture of Britain and Ireland are encouraged to develop an interdisciplinary concentration in British and Irish studies. Completed in addition to a regular departmental major, this work will lead to a certificate in British and Irish studies. The certificate demonstrates that the student has done serious work in several aspects of British and Irish studies and will be advantageous when applying to graduate school or for jobs. It is open to students in any school or college.

Students will gain a diverse perspective of Britain. Upon successful completion of requirements, students will be awarded an official certificate in British and Irish studies, signed by the Director of the Center for British Studies and the Dean of Arts and Sciences. The certificate may be used by the student in applying for graduate school or employment, as evidence of a sustained interdisciplinary concentration in British and Irish Studies.

Requirements

A total of 24 credit hours in British and Irish studies (normally eight courses of 3 credit hours each) with a grade of C- or better in all classes.

The courses should be distributed as follows:

- In the department of primary focus (either English or history, depending on the student's own interests), any four courses in British or Irish studies. CBIS will provide a list of possible courses (see below).
- In the secondary department (either history, English or political science, depending upon primary area), a minimum of two courses and a maximum of four courses. CBIS will provide a list of possible courses (see below). Topics courses may be substituted with approval of the director.
- Students may take one or two courses in departments other than English, history or political science, chosen from the list below, in place of courses in the secondary department. Students are encouraged to do some work of an explicitly interdisciplinary nature such as team-taught courses offered by two departments or an independent study or honors thesis spanning two disciplines.

- Studying in Britain or Ireland would be a fine addition to the certificate. Contact the Office of International Education, Center for Community S355, 303-492-6016, for information on CU's Study Abroad programs.

Central and East European Studies

The Central and East European Studies certificate offers students the opportunity for the integrated, interdisciplinary study of the history, politics, language, literature, and culture of Russia, Central and Eastern Europe.

The program serves to foster new knowledge and understanding of Central and Eastern Europe, and to train a new generation by providing the knowledge, tools, and experience necessary for understanding these societies and for playing productive roles in their reconstruction.

The program offers students a broad understanding of the cultures and societies of Central and Eastern Europe for which it draws upon the expertise of faculty from a variety of campus departments.

Course code for this program is CEES.

Certificate

- Central and East European Studies - Certificate (p. 222)

CEES 1626 (3) Introduction to Central and East European History since 1770

Examines major themes and events in the history of East-Central Europe from the late 1700s to the present. Themes include the impacts of nationalism, fascism, liberal democracy and communism in shaping the history of the region. Topics include World War I, World War II and the Holocaust, the Cold War, the fall of Communism, the Ukrainian revolution and more.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1626

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Arts Sciences Special Courses

Central and East European Studies - Certificate

Students who seek in-depth, interdisciplinary knowledge of the region are encouraged to pursue the certificate in central and east European studies (CEES). The certificate program offers students the opportunity to explore the culture, history and politics of the nations of central and eastern Europe from a variety of disciplinary perspectives.

The purpose of the certificate program is to enhance, rather than to replace, the department major. Students work with CEES faculty advisors to plan an appropriate certificate program. The certificate is awarded in addition to a bachelor's degree in another field.

Contact the director of Central and East European Studies, Professor Laura Osterman (laura.osterman@colorado.edu), at 303-492-7729 for additional information.

Requirements

The certificate program involves 24 credit hours, including an introductory course (CEES 1626/HIST 1626) and at least one course from each of three core clusters (historical, social science and literature/culture). Five (15 hours) of the eight courses (24 hours) must be at the

upper division level. Students pursuing the CEES certificate are strongly encouraged to take advantage of a recognized study abroad program in eastern Europe affiliated with CU Boulder. Courses taken in such a program, as approved by an advisor, count toward the certificate in CEES. Only 9 credits that apply to a student's major or minor can be used to fulfill requirements for the CEES certificate.

Chemistry and Biochemistry

The undergraduate degrees in chemistry and biochemistry emphasize knowledge and awareness of:

- the basic principles of chemistry—atomic and molecular theory, reactivities and properties of chemical substances and the states of matter;
- the basic subfields of chemistry—organic, physical, analytical and inorganic chemistry (and biochemistry for biochemistry majors);
- mathematics sufficient to facilitate the understanding and derivation of fundamental relationships and to analyze and manipulate experimental data;
- the basic principles of physics (and for biochemistry majors, knowledge of biology); and
- safe chemical practices, including waste handling and safety equipment.

In addition, students completing a degree in chemistry or biochemistry are expected to acquire the ability and skills to:

- read, evaluate and interpret information on a numerical, chemical and general scientific level;
- assemble experimental chemical apparatus, design experiments and use appropriate apparatus to measure chemical composition and properties (for biochemistry students, this includes properties of proteins, nucleic acids and other biochemical intermediates); and
- communicate results of scientific inquiries verbally and in writing.

Course code for this program is CHEM.

Bachelor's Degrees

- Biochemistry - Bachelor of Arts (BA) (p. 229)
- Chemistry - Bachelor of Arts (BA) (p. 231)

Minors

- Biochemistry - Minor (p. 231)
- Chemistry - Minor (p. 233)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

CHEM 1011 (3) Environmental Chemistry 1

Lect. Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Chemistry

MAPS Course: Physics

CHEM 1021 (4) Introductory Chemistry

Lect. and lab. For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113 and CHEM 1114.

No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Department enforced prerequisite: one year high school algebra or concurrent enrollment in MATH 1011.

Additional Information: GT Pathways: GT-SC1 - Natural Physicl Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science Lab or Lab/Lec

CHEM 1031 (4) Environmental Chemistry 2

Lect. and lab. Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors this course if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher.

Requisites: Requires prerequisite course of CHEM 1011 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

CHEM 1113 (4) General Chemistry 1

Lect., rec. Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021.

Department enforced corequisite: CHEM 1114. Not open to engineering students with exception of EPEN majors.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1400 or CHEM 1221 or CHEN 1211

Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

CHEM 1114 (1) Laboratory in General Chemistry 1

Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisites: CHEM 1113. Not open to engineering students with exception of EPEN majors.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1400 or CHEM 1221 or CHEN 1211

Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

Additional Information: GT Pathways: GT-SC1 - Natural Physicl Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

CHEM 1133 (4) General Chemistry 2

Lect., rec. Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Department enforced corequisite: CHEM 1134.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 2100

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (formerly CHEM 1251) or CHEN 1211 and CHEM 1221 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

CHEM 1134 (1) Laboratory in General Chemistry 2

Lab. Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Department enforced corequisite: CHEM 1133.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 2100

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (formerly CHEM 1251) or CHEN 1211 and CHEM 1221 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physicl Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

CHEM 1221 (1) Engineering General Chemistry Lab

Meets general chemistry laboratory requirement for engineering students. Designed to illustrate chemical concepts and introduce basic techniques in chemical measurement and synthesis. Department enforced prerequisites: one year of high school chemistry or CHEM 1021 (min. grade C-) and high school algebra; B- in CHEM 1021 recommended.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113 or CHEM 1114 or CHEM 1400

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1133 (minimum grade C-), or corequisite course of CHEN 1211 or CHEM 1133. Restricted to undergraduate engineering students only.

CHEM 1400 (4) Foundations of Chemistry

Covers core concepts in chemistry: nature of matter (atomic and molecular structure, bonding and macroscopic properties), transformations of matter (chemical reactivity), and quantifying chemical transformations (thermochemistry, thermodynamics and kinetics). Emphasizes critical thinking and cultivate core problem solving skills utilized by scientists. Intended for first semester CHEM/BCHM majors. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grade C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1401. Formerly CHEM 1251.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113

Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

CHEM 1401 (1) Foundations of Chemistry Lab

Coordinates with lecture topics in CHEM 1400. Intended for first-semester CHEM and BCHM majors. Emphasizes the development of hands-on practical laboratory skills, experimental design, data interpretation, problem solving and open inquiry. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grade C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1400.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1114 or CHEM 1400

Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Lab

CHEM 2100 (4) Chemical Energetics and Dynamics

Covers the energetic principles that determine when chemical reactions occur and the dynamic principles that determine how rapidly they will occur. Applications include ionic equilibria in solution (acids and bases, buffers and titrations), oxidation-reduction reactions, electrochemistry and chemical kinetics. These applications will be situated in a context of current research problems in areas such as renewable energy and atmospheric chemistry. Department enforced corequisite: CHEM 2101. Formerly CHEM 1271.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1133

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 (formerly CHEM 3371) or CHEM 3491 and MATH 2300 or APPM 1360 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab

CHEM 2101 (1) Laboratory for Chemical Energetics and Dynamics

Coordinates with the lectures topics in CHEM 2100. Required for fourth semester CHEM majors and an elective for BCHEM majors. Emphasizes the acquisition of more advanced laboratory skills, experimental design, data interpretation and analysis. Department enforced corequisite: CHEM 2100.

Requisites: Requires a prerequisite course of CHEM 3341 or CHEM 3381 (minimum grade C-).

Grading Basis: Letter Grade

CHEM 3151 (3) Air Chemistry and Pollution

Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion. Department enforced prerequisite: two semesters of chemistry.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3500

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

CHEM 3251 (3) Sustainable Energy from a Chemistry Perspective

Explores qualitative and quantitative chemical aspects of energy systems (production, transmission, storage, utilization) including fossil, wind, solar, nuclear and biomass energy. Applies chemical principles including composition, structure, bonding, physical properties, thermodynamics, equilibrium and kinetics to energy systems and sustainability, especially environmental implications. Describes the importance of energy to the chemical industries and society as a whole.

Requisites: Requires prerequisite course of CHEM 1133 and 1134 or CHEM 2100 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

CHEM 3311 (4) Organic Chemistry 1

Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkanes, alkenes, alkynes, alkyl halides, and aromatic molecules; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Department enforced corequisite: CHEM 3321 or CHEM 3361.

Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 1400 and CHEM 1401 or CHEM 2100 (formerly CHEM 1271) or CHEN 1211 and CHEM 1221 (all minimum grade C-).

CHEM 3321 (1) Laboratory in Organic Chemistry 1

Lab. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Department enforced corequisite: CHEM 3311 or CHEM 3451.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3361

Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 2100 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

CHEM 3331 (4) Organic Chemistry 2

Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkyl halides, alcohols, ethers, carboxylic acids, aldehydes, ketones, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; synthesis; and reaction mechanisms. Department enforced corequisite: CHEM 3341 or CHEM 3381.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 (formerly CHEM 3371) or CHEM 3491

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3351 and CHEM 3321 or CHEM 3361 (all minimum grade C-).

CHEM 3341 (1) Laboratory in Organic Chemistry 2

Lab. For biochemistry and nonchemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing reactions involving alcohols, ketones, carboxylic acids, and their derivatives. Multistep syntheses are also introduced. Department enforced corequisite: CHEM 3331 or CHEM 3471 or CHEM 3491.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-).

CHEM 3361 (2) Laboratory in Organic Chemistry 1 for Chemistry Majors

Lab. Required course for chemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, alcohols, ketones, and alkyl halides. Explores stereochemical modeling and the chemical identification of organic unknowns. Department enforced corequisite: CHEM 3351 or CHEM 3311 or CHEM 3451.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3321

Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 2100 or CHEM 1400 and CHEM 1401 or CHEM 1211 and CHEM 1221 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 3381 (2) Laboratory in Organic Chemistry 2 for Chemistry Majors

Lab. Required course for chemistry majors. Instruction in experimental techniques of modern chemistry, emphasizing reactions involving alcohols, ketones, carboxylic acids, aromatic compounds, and their derivatives. Multistep syntheses are also introduced. Department enforced corequisite: CHEM 3331 or CHEM 3471 or CHEM 3491.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 3451 (4) Organic Chemistry for Chemistry and Biochemistry Majors

Covers bonding, acidity, reaction mechanisms, nomenclature of organic compounds; stereochemistry; structure and reactions of aldehydes, ketones, and carboxylic acids and derivatives. Department enforced corequisite: CHEM 3361 or CHEM 3321.

Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1133 and CHEM 1134 (minimum grade B+). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

CHEM 3471 (4) Organic Chemistry 2 for Chemistry Majors

Covers Amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity, and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanisms. Department enforced corequisite: CHEM 3381 or CHEM 3341. Formerly CHEM 3371.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3331 and CHEM 3491

Requisites: Requires prerequisite courses of CHEM 3451 and CHEM 3361 or CHEM 3321 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 3491 (4) Organic Chemistry 2 for Biochemistry Majors

Covers amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanism. Department enforced corequisite: CHEM 3341 or CHEM 3381.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 (formerly CHEM 3371) and CHEM 3331

Requisites: Requires prerequisite courses of CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

CHEM 4011 (3) Modern Inorganic Chemistry

Lect. Required course for chemistry majors. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalyst, materials, bioinorganic, and organometallic systems.

Requisites: Requires a prerequisite course of CHEM 3331 or CHEM 3471 (formerly CHEM 3371) or CHEM 3491 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4021 (3) Inorganic Laboratory

One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern inorganic chemistry. Includes syntheses and spectroscopic characterizations of transition metal and main group compounds, experience in manipulation of air sensitive compounds, and techniques involving unusual conditions of pressure or temperature.

Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4131 (3) Chemistry of Global Health

Understanding the chemistry associated with health care in resource-poor countries is the objective of this course. Focuses on preventing, diagnosing and treating the world's deadliest infectious diseases with a particular emphasis on Africa and Central America.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and EBIO 1210 or MCDB 1150 (all minimum grade C-).

CHEM 4141 (3) Environmental Water and Soil Chemistry

Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5141

Requisites: Requires prerequisite course of CHEM 2100 or CHEM 1133 and CHEM 1134 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

CHEM 4171 (3) Instrumental Analysis - Lecture and Laboratory 1

Two Lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis to address problems in chemistry, biochemistry, industrial chemistry and environmental chemistry.

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 (formerly CHEM 3371) or CHEM 3491 and CHEM 3341 or CHEM 3381 and PHYS 1140 or CHEM 4400 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

CHEM 4181 (3) Instrumental Analysis - Lecture and Laboratory 2

Two lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis. Builds on material learned in CHEM 4171.

Requisites: Requires prerequisite course of CHEM 4171 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

CHEM 4251 (3) Materials Chemistry and Properties

Lect. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5251

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4521 or CHEM 4531 (all minimum grade C-).

CHEM 4261 (3) Organic Materials: Structures and Functions

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5261

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade C-).

CHEM 4271 (3) Chemistry of Solar Energy

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5271

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade C-).

CHEM 4400 (4) Core Concepts in Physical Chemistry for Biochemists

Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Department enforced prerequisite or corequisite: PHYS 1120 or PHYS 2020. Formerly CHEM 4411.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5400 and CHEM 4511

Requisites: Requires prerequisite courses CHEM 3331 or CHEM 3471 or CHEM 3491 and PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 (all minimum grade C-).

CHEM 4491 (3) Modern Biophysical Methods

Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic physical); physics; calculus.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5491

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 and CHEM 4400 (formerly CHEM 4411) or CHEM 4511 or corequisite of CHEM 4400 or CHEM 4511 (all minimum grade C).

Grading Basis: Letter Grade

CHEM 4511 (3) Physical Chemistry 1

Lect. Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermochemistry, entropy, free energy, chemical potential, chemical equilibria, and the rates and mechanisms of chemical reactions. Department enforced prereq or coreq., PHYS 1120 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4400 and CHEM 5400

Requisites: Requires prerequisite of courses CHEM 3311 or CHEM 3451 and MATH 2400 or APPM 2350 and PHYS 1110 or PHYS 2020 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4531 (3) Physical Chemistry 2

Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids.

Requisites: Requires prerequisite courses of CHEM 4511 and PHYS 1120 or PHYS 2020, and MATH 2400 or APPM 2350 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4555 (4) Theoretical and Computational Chemistry

Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations. Not recommended for students with a grade below B- in the prerequisite course.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5555

Requisites: Requires prerequisite course of CHEM 4531 (minimum grade C-).

Grading Basis: Letter Grade

CHEM 4581 (1) Physical Chemistry Lab 1

One 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry. Experiments illustrate the fundamental principles of thermodynamics and chemical kinetics. Illustrates the material discussed in CHEM 4511.

Requisites: Requires prerequisite or corequisite course of CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4591 (2) Physical Chemistry Lab 2

One lect. and one 3-hour laboratory every two weeks. a continuation of CHEM 4581, but may be taken concurrently with CHEM 4531. Experiments illustrate the principles of quantum chemistry and spectroscopy discussed in CHEM 4531.

Requisites: Requires prerequisite courses of CHEM 4511 and CHEM 4581 (all minimum grade C-). Requires prerequisite or corequisite course of CHEM 4531 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4611 (3) Survey of Biochemistry

Lect. One-semester survey of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting a survey of biochemistry.

Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-).

CHEM 4621 (3) Genome Databases: Mining and Management

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Department enforced corequisite: CSCI 2270.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4621 or MCDB 5621 CHEM 5621

Requisites: Requires prerequisite course of CHEM 4700 or CSCI 3104 or MCDB 3500 (minimum grade C-).

CHEM 4700 (4) Foundations of Biochemistry

Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of organic and physical chemistry will be required. Formerly CHEM 4711.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5700

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 (minimum grade C-).

Grading Basis: Letter Grade

CHEM 4720 (4) Metabolic Pathways and Human Disease

Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5720

Requisites: Requires a prerequisite course of CHEM 4700 (formerly CHEM 4711; minimum grade C-).

CHEM 4740 (4) Biochemistry of Gene Transmission, Expression and Regulation

Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5740

Requisites: Requires a prerequisite course of CHEM 4700 (formerly CHEM 4711; minimum grade C-).

CHEM 4751 (3) Current Topics in Biochemical Research

Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5751

Requisites: Requires prerequisite courses of CHEM 4700 and CHEM 4740 or MCDB 3135 (all minimum grade C-).

CHEM 4761 (4) Biochemistry Laboratory

Two 5-hour periods per week. The first hour of each period is lecture, the remainder is laboratory. Introduction to modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis affinity chromatography, radioisotopes, recombinant DNA, and molecular cloning.

Requisites: Requires a prerequisite course of CHEM 4700 (formerly CHEM 4711; minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4791 (3) Bioorganic Chemistry in Biotechnology

Lec. Explores examples of antibodies, peptides, proteins, RNA, DNA, carbohydrates and lipids. Uses the primary literature and requires student participation.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5791

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 (formerly CHEM 3371) or CHEM 3491 and CHEM 4700 (minimum grade C-).

Recommended: Prerequisite undergraduate molecular biology.

CHEM 4901 (1-6) Independent Study in Chemistry and Biochemistry

For undergraduate study. Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Biochemistry - Bachelor of Arts (BA)

Biochemistry major students are prepared for many different careers after graduation. Career Services (<http://www.colorado.edu/careerservices>) offers a number of programs and services designed to help students plan their career, including workshops, internships, and placement services after graduation. For an appointment with a career counselor or for more information call 303-492-6541, or stop by Center for Community, N352.

Announcements

See the undergraduate blog (<http://www.colorado.edu/chembio/undergraduate-blog>) and the second-floor Ekeley bulletin board for announcements and postings. Some examples of the information posted are:

- **Main page:** contact information and general announcements.
- **Student opportunities:** internship/job announcements, summer programs, events/programs offered by other campus offices and departments that may be of interest.
- **Scholarship announcements:** announcements of scholarships opportunities and information meetings.
- **Seminars and conferences:** seminar and conference announcements.
- **Academic support:** SASC workshop schedule, tutors, and other academic support opportunities.
- **Career services:** schedule of events offered by this office.
- **Study abroad:** announcements from study abroad about their programs and information meetings.
- **Courses:** information about new and/or interesting courses for core and elective credit.

Research Opportunities

Undergraduate Research Opportunities Program (UROP and other opportunities)

The Undergraduate Research Opportunities Program (UROP) offers students a chance to work alongside a faculty sponsor on original research. Learn to write proposals, conduct research, pursue creative work, analyze data and present the results. For more information, visit the UROP Website (<http://www.colorado.edu/suep/about-urop>).

Study Abroad

The experience of studying abroad can prove invaluable. For information about study abroad programs, visit the Office of International Education/ Study Abroad (<http://studyabroad.colorado.edu>) website.

Teaching Certification

Biochemistry majors can also earn certification as teachers through the School of Education. The program for a secondary school science-teaching certificate is challenging requiring a broad, strong background in science, as well as course work in education and practice teaching. It usually requires at least five years of study. Students interested in teacher certification are encouraged to contact the School of Education (<http://www.colorado.edu/education>).

International Bachelor of Arts (IBA)

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in Biochemistry, in addition to completing all the current requirements for the BA with a major in Biochemistry at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Requirements

The biochemistry major requires extensive course work, including courses in general, organic, physical and analytical/instrumental chemistry, as well as in biology, calculus and physics.

In addition to these requirements, students must fulfill the College of Arts and Sciences' core curriculum. The core curriculum covers three skills acquisition areas and seven content areas of study. Credits taken for the major may also apply toward these core hours.

Transfer students who plan to complete a BA degree in biochemistry must complete at the Boulder campus a minimum of 12 credit hours of upper-division courses in biochemistry covering at least 2 of the sub-disciplines in their major: organic, physical and biochemistry.

Students may want to consult each semester's Registration Handbook and Schedule of Courses (<http://www.colorado.edu/registrar>) as well as the Professor Performance Guide (<http://www.colorado.edu/pba/fcq>) for further information about course offerings and faculty.

Required Courses and Credit Hours

Required Major Courses

Select one of the following general chemistry sequence options: 5-10

Option 1

CHEM 1400 Foundations of Chemistry
& CHEM 1401 and Foundations of Chemistry Lab

Option 2

CHEM 1113 General Chemistry 1
& CHEM 1114 and Laboratory in General Chemistry 1

CHEM 1133 General Chemistry 2
& CHEM 1134 and Laboratory in General Chemistry 2

Select one of the following organic chemistry options: 10-12

Option 1

CHEM 3451 Organic Chemistry for Chemistry and Biochemistry
& CHEM 3361 Majors
and Laboratory in Organic Chemistry 1 for
Chemistry Majors

CHEM 3491 Organic Chemistry 2 for Biochemistry Majors
& CHEM 3381 and Laboratory in Organic Chemistry 2 for
Chemistry Majors

Option 2

CHEM 3451 Organic Chemistry for Chemistry and Biochemistry
& CHEM 3361 Majors
and Laboratory in Organic Chemistry 1 for
Chemistry Majors

CHEM 3471 Organic Chemistry 2 for Chemistry Majors
& CHEM 3381 and Laboratory in Organic Chemistry 2 for
Chemistry Majors

Option 3

CHEM 3311 Organic Chemistry 1
& CHEM 3321 and Laboratory in Organic Chemistry 1

CHEM 3331 Organic Chemistry 2
& CHEM 3341 and Laboratory in Organic Chemistry 2

Select one of the following physical chemistry options: 4-6

Option 1

CHEM 4400 Core Concepts in Physical Chemistry for
Biochemists

Option 2

CHEM 4511 Physical Chemistry 1
& CHEM 4531 and Physical Chemistry 2

Other required chemistry course work:

CHEM 4700 Foundations of Biochemistry 4

CHEM 4720 Metabolic Pathways and Human Disease 4
or CHEM 4740 Biochemistry of Gene Transmission, Expression and
Regulation

CHEM 4761 Biochemistry Laboratory 4

Select three of the following elective courses: 9-12

CHEM 4720 Metabolic Pathways and Human Disease (if not
taken as a required major course)

CHEM 4740 Biochemistry of Gene Transmission, Expression
and Regulation (if not taken as a required major
course; cannot also count MCDB 3135 as a
required ancillary course)

CHEM 4751 Current Topics in Biochemical Research

CHEM 4791 Bioorganic Chemistry in Biotechnology

CHEM 4011 Modern Inorganic Chemistry

CHEM 4171 Instrumental Analysis - Lecture and Laboratory 1

CHEM 4181 Instrumental Analysis - Lecture and Laboratory 2

CHEM 5341 Chemical Biology and Drug Design

MCDB 3135 Molecular Cell Biology I (cannot also count
CHEM 4740 as a required ancillary course)

MCDB 3145 Molecular Cell Biology II

MCDB 3150 Biology of the Cancer Cell

MCDB 3501 Structural Methods for Biological Macromolecules

MCDB 3650 The Brain - From Molecules to Behavior

MCDB 3990 Introduction to Systems Biology for Biologists

MCDB 4310 Microbial Genetics and Physiology

MCDB 4410 Human Molecular Genetics

MCDB 4471 Mechanisms of Gene Regulation in Eukaryotes

MCDB 4520 Bioinformatics and Genomics

EBIO 2070 Genetics: Molecules to Populations (cannot also
count MCDB 2150 as a required ancillary course)

EBIO 3400 Microbiology

EBIO 4530 Functional Plant Biology

IPHY 3430 Introduction to Human Physiology

IPHY 3470 Human Physiology 1

IPHY 3480	Human Physiology 2	
Required ancillary course work from outside chemistry:		
<i>Required physics courses:</i>		
PHYS 1110 & PHYS 1120	General Physics 1 and General Physics 2	8
PHYS 1140	Experimental Physics 1	1
<i>Select one of the following calculus sequences:</i>		8-10
MATH 1300 & MATH 2300	Calculus 1 and Calculus 2	
APPM 1350 & APPM 1360	Calculus 1 for Engineers and Calculus 2 for Engineers	
<i>Select one of the following biology sequence options:</i>		8
<i>Option 1</i>		
MCDB 1150 & MCDB 1151	Introduction to Cellular and Molecular Biology and Introduction to Cell and Molecular Biology Lab	
MCDB 2150 & MCDB 2151	Principles of Genetics and Principles of Genetics Laboratory	
<i>Option 2</i>		
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
EBIO 1220 & EBIO 1240	General Biology 2 and General Biology Laboratory 2	
Total Credit Hours		65-79

All students, and especially those intending to go onto graduate school in biochemistry, will benefit from additional advanced courses. Recommended electives include graduate courses in various fields of chemistry, or advanced courses in biology or mathematics.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain progress in chemistry and biochemistry, students should meet the following requirements:

- In the first semester, declare the biochemistry major.

Students must consult with a major advisor to determine adequate progress toward completion of the major.

Biochemistry - Minor

Minors are offered in chemistry and in biochemistry. Declaration of a biochemistry minor is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

The College of Arts and Sciences will allow a maximum of 9 hours of transfer credit, including 6 upper-division credit hours to count toward a minor. Students may transfer courses through organic chemistry only. All courses required for the minor must be completed with a grade of C- or better, and the overall GPA in all CHEM courses taken must be a 2.00.

Students who have taken CHEN 1211 and CHEM 1221 may substitute them for CHEM 1113. Engineering students who have taken CHEN 4521 may NOT use this to satisfy the physical chemistry requirement.

Select one of the following two options: 5-10

Option 1:

CHEM 1113 General Chemistry 1
& CHEM 1114 and Laboratory in General Chemistry 1

CHEM 1133 General Chemistry 2
& CHEM 1134 and Laboratory in General Chemistry 2

Option 2:

CHEM 1400 Foundations of Chemistry
& CHEM 1401 and Foundations of Chemistry Lab

Select one of the following three options: 10-12

Option 1:

CHEM 3311 Organic Chemistry 1
& CHEM 3321 and Laboratory in Organic Chemistry 1

CHEM 3331 Organic Chemistry 2
& CHEM 3341 and Laboratory in Organic Chemistry 2

Option 2:

CHEM 3451 Organic Chemistry for Chemistry and Biochemistry
Majors (and CHEM 3321 or CHEM 3361)

CHEM 3471 Organic Chemistry 2 for Chemistry Majors (and
CHEM 3341 or CHEM 3381)

Option 3:

CHEM 3451 Organic Chemistry for Chemistry and Biochemistry
Majors (and CHEM 3321 or CHEM 3361)

CHEM 3491 Organic Chemistry 2 for Biochemistry Majors (and
CHEM 3341 or CHEM 3381)

Select one of the following: 3-4

CHEM 4400 Core Concepts in Physical Chemistry for
Biochemists

CHEM 4511 Physical Chemistry 1

Select one of the following: 3-8

CHEM 4611 Survey of Biochemistry

CHEM 4700 Foundations of Biochemistry
& CHEM 4720 and Metabolic Pathways and Human Disease

CHEM 4700 Foundations of Biochemistry
& CHEM 4740 and Biochemistry of Gene Transmission,
Expression and Regulation

Total Credit Hours

21-34

Chemistry - Bachelor of Arts (BA)

Chemistry major students are prepared for many different careers after graduation. About 50 percent of chemistry majors enter directly into industry or government positions that require scientific expertise, such as chemical, oil, electronics, mining and manufacturing industries, water districts, crime laboratories, biotechnology, health and safety, atmospheric science and environmental quality.

Approximately 25 percent of chemistry graduates are attracted by specialized graduate education in chemistry and biochemistry. Graduate work is often in one of the traditional areas of biochemistry or analytical, inorganic, organic or physical chemistry and, increasingly, in interdisciplinary areas such as atmospheric, bio-organic or organo-metallic chemistry, molecular biology, biotechnology and chemical physics for their advanced work. Another 25 percent of a typical graduating class goes on to professional school, pursuing advanced degrees in medicine, dentistry, pharmacy, law, business, engineering and computer science.

Career Services (<http://www.colorado.edu/careerservices>) offers a number of programs and services designed to help students plan their career, including workshops, internships, and placement services after graduation. For an appointment with a career counselor or for more information call 303 492 6541, or stop by Center for Community, N352.

Announcements

See the undergraduate blog (<http://www.colorado.edu/chembio/undergraduate-blog>) and second-floor Ekeley bulletin board for announcements and postings. Some examples of the information posted are:

- **Main page:** contact information and general announcements.
- **Student opportunities:** internship/job announcements, summer programs, events/programs offered by other campus offices and departments that may be of interest.
- **Scholarship announcements:** announcements of scholarships opportunities and information meetings.
- **Seminars and conferences:** seminar and conference announcements.
- **Academic support:** SASC workshop schedule, tutors, and other academic support opportunities.
- **Career services:** schedule of events offered by this office.
- **Study abroad:** announcements from study abroad about their programs and information meetings.
- **Courses:** information about new and/or interesting courses for core and elective credit.

Chemistry Honors Program

Opportunity is provided for qualified chemistry and biochemistry majors to participate in the departmental honors program and graduate with honors (*cum laude*, *magna cum laude*, or *summa cum laude*) in chemistry. Students interested in the honors program should contact the departmental honors advisor during their junior year.

American Chemical Society Certification

The American Chemical Society maintains a certification program in which a student graduating with a specified minimum program is certified to the society upon graduation. To be certified, a graduate must satisfy requirements in addition to the minimum for graduation. The department offers this certificate for the chemistry or chemistry/biochemistry double majors only. A list of these requirements may be obtained from the undergraduate chemistry and biochemistry advising office.

Research Opportunities

Undergraduate Research Opportunities Program

The Undergraduate Research Opportunities Program (UROP) offers students a chance to work alongside a faculty sponsor on original research. Learn to write proposals, conduct research, pursue creative work, analyze data, and present the results. For more information please visit the Undergraduate Research Opportunities Program (<http://www.colorado.edu/suep/about-urop>) website. Visit Other Funding Opportunities (<http://www.colorado.edu/suep/urop/other-funding>) for a list of other funding opportunities for undergraduate students.

Independent Study

Independent study (CHEM 4901), provides an opportunity for a student to work on a research project with an individual faculty member outside of the regular class structure. This generally provides an experience much

more like real-life chemistry or biochemistry, where new results are being sought and the outcome of the research is not known in advance. The student may have a totally independent project or may become part of a research team working at the forefront of science. In favorable cases the project may result in publication of the results of the independent study in the scientific literature. As part of the research team in a particular group the student will usually participate in group seminars and informal discussions with other members of the group.

Study Abroad

The experience of studying abroad can prove invaluable. For information about study abroad programs, visit the Office of International Education/Study Abroad (<http://studyabroad.colorado.edu>) website.

Teaching Certification

Chemistry or biochemistry majors can also earn certification as teachers through the School of Education. The program for a secondary school science-teaching certificate is challenging requiring a broad, strong background in science, as well as course work in education and practice teaching. It usually requires at least five years of study. Students interested in teacher certification are encouraged to contact the School of Education (<http://www.colorado.edu/education>).

International Bachelor of Arts (IBA)

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in chemistry, in addition to completing all the current requirements for the BA with a major in chemistry at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Requirements

The chemistry major requires 30 credit hours of upper-division chemistry course work, including courses in general, organic, physical and analytical/instrumental chemistry, as well as an introductory general chemistry sequence and ancillary work in calculus and physics.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Transfer students who plan to take a chemistry major must complete at the Boulder campus a minimum of 12 credit hours of upper-division work covering at least two subdisciplines: organic, physical, analytical and inorganic for chemistry majors.

Students may want to consult each semester's Registration Handbook and Schedule of Courses (<http://www.colorado.edu/registrar>) as well as the Professor Performance Guide (<http://www.colorado.edu/pba/fcq>) for further information about course offerings and faculty.

Required Courses and Credit Hours

Required chemistry major courses

Select one of the following general chemistry sequence options: 10

Option 1:

CHEM 1400 & CHEM 1401	Foundations of Chemistry and Foundations of Chemistry Lab
CHEM 2100 & CHEM 2101	Chemical Energetics and Dynamics and Laboratory for Chemical Energetics and Dynamics

Option 2:CHEM 1113 General Chemistry 1
& CHEM 1114 and Laboratory in General Chemistry 1CHEM 1133 General Chemistry 2
& CHEM 1134 and Laboratory in General Chemistry 2*Select one of the following organic chemistry options:* 8**Option 1**CHEM 3451 Organic Chemistry for Chemistry and Biochemistry
& CHEM 3471 Majors
and Organic Chemistry 2 for Chemistry Majors**Option 2**CHEM 3451 Organic Chemistry for Chemistry and Biochemistry
& CHEM 3491 Majors
and Organic Chemistry 2 for Biochemistry Majors**Option 3**CHEM 3311 Organic Chemistry 1
& CHEM 3331 and Organic Chemistry 2**Other required chemistry course work:**CHEM 3361 Laboratory in Organic Chemistry 1 for Chemistry
& CHEM 3381 Majors
and Laboratory in Organic Chemistry 2 for
Chemistry Majors 4

CHEM 4011 Modern Inorganic Chemistry 3

CHEM 4171 Instrumental Analysis - Lecture and Laboratory 1 3

CHEM 4181 Instrumental Analysis - Lecture and Laboratory 2 3

CHEM 4511 Physical Chemistry 1
& CHEM 4581 and Physical Chemistry Lab 1 4CHEM 4531 Physical Chemistry 2
& CHEM 4591 and Physical Chemistry Lab 2 5**Chemistry electives**

All students, and especially those intending to go on to graduate school in chemistry, will benefit from additional advanced courses.

Recommended electives include the following:

CHEM 3151 Air Chemistry and Pollution

CHEM 3251 Sustainable Energy from a Chemistry Perspective

CHEM 4021 Inorganic Laboratory

CHEM 4141 Environmental Water and Soil Chemistry

CHEM 4251 Materials Chemistry and Properties

CHEM 4261 Organic Materials: Structures and Functions

CHEM 4271 Chemistry of Solar Energy

CHEM 4611 Survey of Biochemistry

CHEM 4700 Foundations of Biochemistry

CHEM 4720 Metabolic Pathways and Human Disease

CHEM 4740 Biochemistry of Gene Transmission, Expression
and Regulation

CHEM 4901 Independent Study in Chemistry and Biochemistry

Graduate courses in various fields of chemistry

Advanced courses in mathematics or physics

Required ancillary course work from outside chemistry:**Required physics courses:**PHYS 1110 General Physics 1
& PHYS 1120 and General Physics 2 8

PHYS 1140 Experimental Physics 1 1

Select one of the following calculus sequences: 12-14**Option 1:**

MATH 1300 Calculus 1

MATH 2300 Calculus 2

MATH 2400 Calculus 3

Option 2:

APPM 1350 Calculus 1 for Engineers

APPM 1360 Calculus 2 for Engineers

APPM 2350 Calculus 3 for Engineers

Total Credit Hours 61-63

Total Credit Hours		21-29

Classics

Through consultation with the undergraduate advisor, the bachelor's degree in classics is tailored to the student's interests in the field. Major and minor programs can be arranged with a concentration in either Latin or Greek or a combination of the two, with a focus on classical literature, culture and thought (including mythology, literature, philosophy, religion, art, archaeology and history) or with a particular emphasis on classical history, art and archaeology. Prospective majors and minors should consult with the undergraduate advisor.

The undergraduate degree in classics emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Greek and Roman literature, from Homer to the end of classical antiquity;
- the historical and cultural contexts of particular works; and
- the art, religion and philosophy of ancient Greece and Rome and their roles in world cultural history.

In addition, students completing the degree in classics are expected to acquire the ability and skills to:

- read, understand and interpret written documents and works of literature in ancient Greek or Latin where relevant, as well as in translation;
 - communicate in spoken and written form with adequate clarity and complexity for the relevant audience; and
 - read and think critically.
- Interested students are encouraged to consult colorado.edu/classics/undergraduate (<http://classics.colorado.edu/undergraduate>) for more information.

Course codes for this program are CLAS, GREK and LATN.

Bachelor's Degree

- Classics - Bachelor of Arts (BA) (p. 240)

Minor

- Classics - Minor (p. 242)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ambrose, Kirk T (https://experts.colorado.edu/display/fisid_115914)
Professor; PhD, University of Michigan Ann Arbor

CLAS 1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: LING 1010

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 1020 (3) Argument from Evidence: Critical Writing about the Ancient World

Introduces students to writing about the ancient world, with special attention to the possibilities and the limitations of ancient source-material. Taught as a writing workshop, with emphasis on critical thinking, analysis, argument and inquiry. While the course reads foundational ancient texts, the skills acquired will be broadly useful among humanities disciplines.

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Literature, Culture, and Thought
MAPS Course: English

CLAS 1030 (3) Introduction to Western Philosophy: Ancient

Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 1010

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Literature, Culture, and Thought

CLAS 1051 (3) The World of the Ancient Greeks

Surveys of the emergence, major accomplishments, failures and the decline of the ancient Greeks, from the Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000-30 B.C.). No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1051

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Ancient History

CLAS 1061 (3) The Rise and Fall of Ancient Rome

Surveys the rise of ancient Rome in the eighth century B.C. to its fall in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1061

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Ancient History

CLAS 1071 (3) Ancient Sport and Spectacle

Surveys the development, evolution and impact of sport and spectacle in the Greco-Roman world through the deconstruction of games during the Christian era of the Roman Empire. Examines, among other relevant topics, games in the Homeric tradition, the development of the Greek Olympics and Roman spectacles including the circus, amphitheatres and gladiators.

CLAS 1100 (3) Greek Mythology

Covers the Greek myths as documents of early human religious experience and imagination, the source of Greek culture, and part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. No Greek or Latin required.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 1110 (3) Gods, Monsters and Mortals: Literature of Ancient Greece

Read about mythological heroes and historical individuals from Achilles to Socrates. Explore why Greek authors told stories the way they did and what those stories might have meant to them and might mean to us. Ancient texts in English translation.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 1115 (3) Masterpieces of Greek Literature in Translation

Students read about mythological heroes and historical individuals from Achilles to Socrates in Greek literature. Class discusses why the Greeks told stories the way they did and what those stories might have meant to them and might mean to us.

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Honors

CLAS 1120 (3) Power and Passion in Ancient Rome

Read about mythological heroes and historical individuals from Romulus to Catiline and the emperors Augustus and Nero. Explore why Roman authors told stories the way they did and what those stories might have meant and might mean to us. Ancient texts in English translation.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 1140 (3) Bread and Circuses: Society and Culture in the Roman World

Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Historical Context
Departmental Category: Literature, Culture, and Thought

CLAS 1509 (4) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 1509

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art and Archaeology

CLAS 2020 (3) Science in the Ancient World

Covers the development of scientific modes of thought, theory, and research from mythological origins (e.g., Hesiod's poetry) through pre-Socratic philosophers. Culminates in theories and research of Plato and Aristotle, including the Roman Empire. Students read original sources in translation. No Greek or Latin required.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 2029 (3) Art and Archaeology of Ancient Egypt

Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 2029

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Art and Archaeology

CLAS 2039 (3) Greek Art and Archaeology

Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Formerly CLAS 3039.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 2039

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art and Archaeology

CLAS 2041 (3) War and Society in Ancient Greece

Studies Greek warfare in its cultural, social and economic contexts, in the light of anthropological comparisons and modern theories. No Greek or Latin required.

Additional Information: Departmental Category: Ancient History

CLAS 2049 (3) Introduction to Roman Art and Architecture

Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Formerly CLAS 3049.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 2049

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art and Archaeology

CLAS 2100 (3) Gender and Sexuality in Ancient Greece

Examines evidence of art, archaeology, and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature, and daily life. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2100

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Literature, Culture, and Thought

CLAS 2110 (3) Gender and Sexuality in Ancient Rome

Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2110

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Human Diversity
Departmental Category: Literature, Culture, and Thought

CLAS 2610 (3) Paganism to Christianity

Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2614

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Literature, Culture, and Thought

CLAS 3009 (3) Modern Issues, Ancient Times

Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life. Formerly CLAS 2009.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 3009

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Art and Archaeology

CLAS 3019 (3) Pompeii and the Cities of Vesuvius

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 3019

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Art and Archaeology

CLAS 3400 (3) Special Topics in Classics

Topics in Greek, Latin or Classical civilization.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5021 and HIST 4021

Additional Information: Departmental Category: Ancient History

CLAS 4031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5031 and HIST 4031

Recommended: Prerequisite one of the following CLAS 1051, 1509, 2041, 2039, 4021, 4041, 4139, 4149, GREK 3113, HIST 1051, 4021, 4041.

Additional Information: Departmental Category: Ancient History

CLAS 4040 (3) Seminar in Classical Antiquity

Examines an advanced topic in classical language, literature, history, philosophy, art, or culture. Combines the techniques of philology with a critical approach to the literary and material legacy of the past.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Requisite second-year proficiency in Greek or Latin.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5041 and HIST 4041 and PHIL 4210

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite CLAS 1051 or CLAS 1061 or HIST 1011 or HIST 1051 or HIST 1061 or PSCI 2004 or PHIL 3000.

Additional Information: Departmental Category: Ancient History

CLAS 4061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5061 and HIST 4061 and HIST 5061

Additional Information: Departmental Category: Ancient History

CLAS 4071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5071 and HIST 4071

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Ancient History

CLAS 4081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5081 and HIST 4081

Additional Information: Departmental Category: Ancient History

CLAS 4091 (3) The Roman Empire

Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5091 and HIST 4091

Additional Information: Departmental Category: Ancient History

CLAS 4109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous course work on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and ARTH 4109 and ARTH 5109

Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

Additional Information: Departmental Category: Art and Archaeology

CLAS 4110 (3) Greek and Roman Epic

Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5110 and HUMN 4110

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 4119 (3) Roman Sculpture

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5119 and ARTH 4119 and ARTH 5119

Additional Information: Departmental Category: Art and Archaeology

CLAS 4120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5120 and HUMN 4120

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 4129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5129 and ANTH 4129 and ANTH 5129 and ARTH 4129

Additional Information: Departmental Category: Art and Archaeology

CLAS 4130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5130 and HUMN 4130

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 4139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5139 and ARTH 4139 and ARTH 5139

Additional Information: Departmental Category: Art and Archaeology

CLAS 4140 (3) The Greek and Roman Novel

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5140 and HUMN 4131

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5149 and ARTH 4149

Additional Information: Departmental Category: Art and Archaeology

CLAS 4169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5169 and ARTH 4169 and ARTH 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art and Archaeology

CLAS 4199 (3) Roman Architecture

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures, including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5199 and ARTH 4199

Additional Information: Departmental Category: Art and Archaeology

CLAS 4209 (6) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4209 and CLAS 5209

Recommended: Prerequisites CLAS 1509 or ARTH 1509 or ARTH 2039 and ARTH 2049.

Additional Information: Departmental Category: Art and Archaeology

CLAS 4229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5229 and ARTH 4229 and ARTH 5229

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Art and Archaeology

CLAS 4269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5269 and ARTH 4269 and ARTH 5269

Recommended: Prerequisite CLAS 1509 or ARTH 1509.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Art and Archaeology

Departmental Category: Asia Content

CLAS 4761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5761 and HIST 4761 and HIST 5761

Additional Information: Departmental Category: Ancient History

CLAS 4840 (1-4) Independent Study

No Greek or Latin required.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4849 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Art and Archaeology

CLAS 4852 (1-6) Honors Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sciences Honors Course
Departmental Category: Classical Philology

GREK 1013 (4) Beginning Classical Greek 1

For students with no previous knowledge of Greek. Introduces basic grammar and vocabulary.

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Greek

GREK 1023 (4) Beginning Classical Greek 2

Completes the presentation of grammar and introduces reading of literature.

Recommended: Prerequisite GREK 1013.

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Greek

GREK 3013 (1) Readings in the Greek New Testament and Septuagint

Readings in ancient (koine) Greek from the New Testament and the Septuagint. Students aim to achieve fluency in reading and to enrich their knowledge of key terms and ideas borrowed from the Greek past in the early Christian tradition. Formerly CLAS 3013.

Repeatable: Repeatable for up to 4.00 total credit hours.

Recommended: Prerequisites GREK 1013 and GREK 1023.

Additional Information: Departmental Category: Greek

GREK 3113 (3) Intermediate Classical Greek 1

Reading of selected prose texts of authors in ancient Greek such as Plato, Xenophon, Lysias, and selections from the Greek New Testament. Incorporates review of grammar.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites GREK 1013 and GREK 1023.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Greek

GREK 3123 (3) Intermediate Classical Greek 2

Reading of selections from Homer or a Greek tragedy in ancient Greek, with attention to literary form and context as well as advanced grammar and syntax.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites GREK 1013 and GREK 1023 and GREK 3113.

Additional Information: Departmental Category: Greek

GREK 4013 (3) Topics in Greek Prose

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).

Equivalent - Duplicate Degree Credit Not Granted: GREK 5013

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Greek

GREK 4023 (3) Topics in Greek Poetry

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).

Equivalent - Duplicate Degree Credit Not Granted: GREK 5023

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Greek

GREK 4093 (3) Survey of Greek Literature

Greek literary history in ancient Greek from Homer to the Hellenistic age.

Equivalent - Duplicate Degree Credit Not Granted: GREK 5093

Recommended: Prerequisites GREK 3113 and GREK 3123.

Additional Information: Departmental Category: Greek

GREK 4843 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Greek

LATN 1014 (4) Beginning Latin 1

Introduces basic grammar and vocabulary. For students with no previous knowledge of Latin.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Latin

LATN 1024 (4) Beginning Latin 2

Completes the presentation of grammar, incorporates review of fundamentals, and introduces reading of literature. For students with previous experience of Latin.

Recommended: Prerequisite LATN 1014.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Latin

LATN 2004 (3) Accelerated Latin 1

Intensive introductory course in Latin including a survey of grammar and practice reading and writing. No previous knowledge of Latin is required.

Additional Information: Departmental Category: Latin

LATN 2044 (3) Accelerated Latin 2

Continuation of LATN 2004. Reading of advanced texts: Caesar, Cicero, Ovid and others.

Recommended: Prerequisite LATN 2004.

Additional Information: Departmental Category: Latin

LATN 2114 (4) Intermediate Latin 1

Readings from Caesar and/or Cicero, with review of grammar.

Recommended: Prerequisite LATN 1024.

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: Latin

LATN 2124 (3) Intermediate Latin 2

Selections from Virgil's Aeneid with attention to literary form and context as well as advanced grammar and syntax.

Recommended: Prerequisite LATN 2114.

Additional Information: Departmental Category: Latin

LATN 3014 (3) Introduction to Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Cicero, Livy, Pliny). Formerly CLAS 3014.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Latin

LATN 3024 (3) Introduction to Latin Poetry

Author or topic in Latin specified in the online Schedule Planner (e.g., Virgil, Ovid, Catullus, Horace).

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Latin

LATN 4014 (3) Topics in Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).

Equivalent - Duplicate Degree Credit Not Granted: LATN 5014

Repeatable: Repeatable for up to 9.00 total credit hours.

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4024 (3) Latin Prose Composition

Reviews grammar and syntax. Introduces Latin prose style and composition.

Equivalent - Duplicate Degree Credit Not Granted: LATN 5024

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4044 (3) Topics in Latin Poetry

Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).

Equivalent - Duplicate Degree Credit Not Granted: LATN 5044

Repeatable: Repeatable for up to 9.00 total credit hours.

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4084 (3) Survey of Roman Literature Part 2: Imperial

Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 5084

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4094 (3) Survey of Roman Literature Part 1: Republican to Augustan

Introduces Roman literary history from its origins to the 30s BCE. Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 5094

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4824 (3) Latin Teaching Methods: Open Topics

Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.

Equivalent - Duplicate Degree Credit Not Granted: LATN 5824

Additional Information: Departmental Category: Latin

LATN 4844 (1-3) Independent Study

Formerly CLAS 4844.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Latin

Classics - Bachelor of Arts (BA)

Through consultation with the undergraduate advisor, the bachelor's degree in classics is tailored to the student's interests in the field. Major and minor programs can be arranged with a concentration in either Latin or Greek or a combination of the two, with a focus on classical literature, culture and thought (including mythology, literature, philosophy, religion, art, archaeology and history) or with a particular emphasis on classical history, art and archaeology. Prospective majors and minors should consult with the undergraduate advisor.

The undergraduate degree in classics emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Greek and Roman literature, from Homer to the end of classical antiquity;
- the historical and cultural contexts of particular works; and
- the art, religion and philosophy of ancient Greece and Rome and their roles in world cultural history.

In addition, students completing the degree in classics are expected to acquire the ability and skills to:

- read, understand and interpret written documents and works of literature in ancient Greek or Latin where relevant, as well as in translation;
- communicate in spoken and written form with adequate clarity and complexity for the relevant audience; and
- read and think critically.

Interested students are encouraged to consult colorado.edu/classics/undergraduate (<http://classics.colorado.edu/undergraduate>) for more information.

Concurrent Degree Program

BA/MA in Classics

The five-year BA/MA concurrent degree program in classics is designed for students who enter the University of Colorado ready to take courses in Latin or Greek at the 3000-level or above, and who wish to prepare themselves for application to competitive PhD programs in classics. Students without adequate preparation in at least one language would find it difficult to complete two degrees in five years, since proficiency in the languages comes largely from practice and experience. Students will

normally need to study both Latin and Greek in order to meet their course requirements within five years: course offerings in just one language will normally not be sufficient. The five-year degree combines the BA in Greek and/or Latin (Track I) with the MA in classics with concentration in Greek or Latin (Program I), Plan II (no thesis). Students with strong research interests may be able to complete the BA with honors or the MA with concentration in Greek or Latin, Plan I (with thesis). Graduates of the BA/MA program who have completed their work in excellent fashion will be well prepared to apply for PhD programs in classics. Students who enter CU with an already strong knowledge of Latin or Greek may be eligible to pursue a five-year concurrent bachelor's/master's degree (BA/MA).

Here is a guide to the concurrent degree program (<http://www.colorado.edu/classics/bama-guide>); for more information, contact the Associate Chair for Undergraduate Studies.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Students must complete the College of Arts and Sciences major requirements, including: a minimum of 36 credit hours, all with a grade of a C- or better, in the major; a minimum 2.00 GPA for courses in the major; and a minimum of 18 upper-division credit hours in the major.

Track I: Greek, Latin or Greek and Latin

Required Courses and Credit Hours

Greek and/or Latin ¹	30
Select 6 elective credit hours from either of the following groups:	6
Classical Literature, Culture and Thought Group:	
CLAS 1010	The Study of Words
CLAS 1020	Argument from Evidence: Critical Writing about the Ancient World
CLAS 1030	Introduction to Western Philosophy: Ancient
CLAS 1100	Greek Mythology
CLAS 1110	Gods, Monsters and Mortals: Literature of Ancient Greece
CLAS 1115	Masterpieces of Greek Literature in Translation
CLAS 1120	Power and Passion in Ancient Rome
CLAS 1140	Bread and Circuses: Society and Culture in the Roman World
CLAS 2020	Science in the Ancient World
CLAS 2100	Gender and Sexuality in Ancient Greece
CLAS 2110	Gender and Sexuality in Ancient Rome
CLAS 2610	Paganism to Christianity
CLAS 3400	Special Topics in Classics
CLAS 4040	Seminar in Classical Antiquity
CLAS 4110	Greek and Roman Epic
CLAS 4120	Greek and Roman Tragedy
CLAS 4130	Greek and Roman Comedy
CLAS 4140	The Greek and Roman Novel
CLAS 4840	Independent Study
HEBR 1030	Beginning Biblical Hebrew, First Semester
PHIL 3000	History of Ancient Philosophy
Ancient History, Art, and Archaeology Group:	
CLAS 1051	The World of the Ancient Greeks
CLAS 1061	The Rise and Fall of Ancient Rome

CLAS 1509	Trash and Treasure,Temples and Tombs: Art and Archaeology of the Ancient World
CLAS 2029	Art and Archaeology of Ancient Egypt
CLAS 2039	Greek Art and Archaeology
CLAS 2041	War and Society in Ancient Greece
CLAS 2049	Introduction to Roman Art and Architecture
CLAS 3009	Modern Issues, Ancient Times
CLAS 3019	Pompeii and the Cities of Vesuvius
CLAS 4021	Athens and Greek Democracy
CLAS 4031	Alexander the Great and the Rise of Macedonia
CLAS 4041	Classical Greek Political Thought
CLAS 4061	Twilight of Antiquity

Greek and/or Latin ¹		6
Total Credit Hours		36

¹ Students should designate either Greek or Latin as the primary field of language study. The introductory sequence, GREK 1013-GREK 1023 or LATN 1014-LATN 1024, of the primary language does not count toward the major. If a student also takes the second language, all credit hours taken in that language as well as any Greek and Latin credit hours above the 1000-level count toward the major. If a student has learned the equivalent of the introductory sequence in the primary language before beginning language study at CU and begins language instruction in the department at the 2000-level or above, all credit hours in both languages immediately count toward the major.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in classics, students should meet the following requirements:

- Declare the classics major by the beginning of the second semester.
- Students must consult frequently with a major advisor to determine adequate progress toward completion of the major.

Classics - Minor

The department offers courses in language and literature, ancient history, art and archaeology, and philosophy within several programs of study. Classics ranks among the most vibrant programs in humanistic studies at the University of Colorado, a department in which students at every level are challenged to integrate the world of scholarship into their daily lives. The department offers a minor in classics that can satisfy your needs.

Requirements

The department offers a minor in classics for students who would like to study the world of antiquity but don't have the time to devote to a major. Students are subject to the College of Arts and Sciences minor requirements, including:

- a minimum of 18 credit hours, all with a grade of C- or better, in the minor,
- a minimum of 9 upper-division credit hours in the minor, and
- a minimum 2.00 GPA for courses in the minor.

The specific requirements for completion of the classics minor are as follows:

Required Courses and Credit Hours

Track I: Greek and/or Latin Language and Literature

Greek and/or Latin¹ 12

Select 6 elective credit hours from either of the following groups: 6

Classical Literature, Culture and Thought Group:

CLAS 1010	The Study of Words

Cognitive Science

Cognitive science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of cognitive science concerns how knowledge is understood, remembered, communicated and used in the performance of activities,

including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets.

Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education and multimedia services.

The undergraduate program includes courses in the seven core departments, with basic courses and two of five possible advanced skill sequences of courses. For more information, visit the Institute of Cognitive Science's Undergraduate Program (<http://www.colorado.edu/ics/undergraduate-program>) webpage.

Certificate

- Cognitive Science - Certificate (p. 244)

Cognitive Science - Certificate

Undergraduate students majoring in Psychology and Neuroscience; Philosophy; Linguistics; Computer Science; Speech, Language, and Hearing Sciences; Education; Integrative Physiology; Information Science; or Architecture and Planning may be interested in extending the breadth of their undergraduate studies to earn a certificate in cognitive science.

Training in cognitive science prepares students admirably well for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education, and multimedia. As the world is enveloped by the information age, cognitive scientists will be uniquely positioned to deal with this information.

Students interested in the program can learn more on the ICS website (<https://www.colorado.edu/ics/undergraduate-program>).

Requirements

To earn the certificate, students must take at least six courses for a minimum of 18 credit hours. Students must receive a grade of C or better in all courses for the certificate and must have an overall grade point average of 3.0 or better.

Additional credit hours may be required as prerequisites to classes chosen to fulfill the certificate plan of study, but these courses usually also fulfill degree requirements. Proposed substitute courses must be preapproved by the ICS Academic Director.

Required Courses and Credit Hours

Required Courses

PSYC 2145	Introductory Cognitive Psychology	3
CSCI 3702/ PHIL 3310/ LING 3005/PSYC 3005	Cognitive Science	3

Advanced Skills Requirements 12-14

Take a two-course advanced skills sequence from two of the following five areas, one sequence may be in the student's major.

Psychology

Taking classes in the psychology focus area would require a minimum of 7 units, and an additional minimum of 4 units for prerequisites.

PSYC 4145	Advanced Cognitive Psychology
NRSC 4032	Neurobiology of Learning and Memory
PSYC 4155	Cognitive Neuroscience/Neuropsychology
PSYC 4165	Psychology of Perception
PSYC 4175	Computational Cognitive Neuroscience
PSYC 4220	Language and Mind

Linguistics

Taking classes in the linguistics focus area would require a minimum of 6 units, and an additional minimum of 3 units for prerequisites.

LING 3100	Language Sound Structures
LING 3430	Semantics
LING 4220	Language and Mind
LING 4420	Morphology and Syntax
LING 4560	Language Development

Computer Science

Taking classes in the computer science focus area would require a minimum of 6 units and an additional minimum of 4 units for prerequisites. Choose two of the following:

CSCI 3002	HCC Foundations/User-Centered Design and Development 1
CSCI 3202	Introduction to Artificial Intelligence
CSCI 4830	Special Topics in Computer Science

Philosophy

Taking classes in the Philosophy focus area would require a minimum of 6 units, and an additional minimum of 3 units for prerequisites. Two of the following six courses in Philosophy:

PHIL 4300	Philosophy of Mind
PHIL 4340	Epistemology
PHIL 4400	Philosophy of Science
PHIL 4460	Modal Logic
PHIL 4490	Philosophy of Language

Speech, Language and Hearing Sciences

Taking classes in the speech, language and hearing Sciences focus area would require a minimum of 6 units, and an additional 3 units for prerequisites.

SLHS 3006	Phonetics
SLHS 3106	Hearing Science
SLHS 3116	Speech Science
SLHS 4502	Language Disorders: Child and Adult
SLHS 4560	Language Development

Total Credit Hours

18-20

Computer Science

Computer science is an exciting and challenging field with impact on much of modern life. Computer scientists craft the technologies enabling the digital devices used every day. They develop the large-scale software powering business and industry, and they advance the computational techniques and write the software that supports scientists in their study of the world around us. They create the software that social scientists use to identify and analyze patterns in the behavior of social groups and human behavior in social networks and the applications

humanists and linguists use to research language development. Many new applications of computing technology remain to be discovered and computing will be at the heart of future revolutions in business, science and society. Students who study computer science now will be at the forefront of those important advances.

Computer science is concerned with how computers are constructed, how they are used to store and process data, how they are used in problem-solving, and how they are used to assess the quality of solutions to problems.

Creating software for a variety of users requires understanding how software interacts with the hardware on which it runs. Computer science goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

The course code for this program is CSCI.

Career Possibilities

Computer science graduates from CU Boulder are engaged in a variety of jobs with organizations worldwide in fields such as communications, finance, publishing and research. They are software developers, teachers, writers, doctors, lawyers, scientists, military leaders and entrepreneurs. Many computer science graduates lead highly successful companies that they themselves have founded.

Facilities, Programs and Opportunities

The Department of Computer Science utilizes a modern computing infrastructure facilitating its research and educational missions. The department has a variety of computing facilities for use by faculty, staff and students including general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department and specialized labs for individual research groups. The variety of computing resources provides students the opportunity to learn about and use cutting-edge equipment and software.

The Undergraduate Research Opportunities Program (UROP) offers students a chance to work alongside a faculty sponsor on original research. Students learn to write proposals, conduct research, pursue creative work, analyze data and present the results. For more information, call UROP at 303-492-2596 or visit the UROP website (<http://www.colorado.edu/suep/urop>).

There are many networking opportunities with companies offering paid internships. CU's location near Boulder's tech start-up community, national research labs and traditional tech companies such as Google, IBM, Oracle and Microsoft, gives students with computer science skills many employment opportunities while earning their degrees.

Bachelor's Degree

- Computer Science - Bachelor of Arts (BA) (p. 253)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Assistant Professor; PhD, California Institute of Technology

Clauset, Aaron Julian (https://experts.colorado.edu/display/fisid_147554)
Assistant Professor; PhD, University of New Mexico

Colunga, Eliana (https://experts.colorado.edu/display/fisid_129477)
Associate Professor; PhD, Indiana University Bloomington

Correll, Nicolaus J (https://experts.colorado.edu/display/fisid_147555)
Assistant Professor; PhD, Ecole Polytech Federale de Lausanne (Switzerland)

Dowell-Deen, Robin DeAnne (https://experts.colorado.edu/display/fisid_147779)
Assistant Professor; DSc, Washington University

Ehrenfeucht, Andrzej
Professor Emeritus

Eisenberg, Michael A (https://experts.colorado.edu/display/fisid_100427)
Professor; PhD, Massachusetts Institute of Technology

Ellis, Clarence A.
Professor Emeritus

Fischer, Gerhard
Professor Emeritus; PhD, University of Hamburg

Fosdick, Lloyd D.
Professor Emeritus

Frew, Eric W (https://experts.colorado.edu/display/fisid_134685)
Associate Professor; PhD, Stanford University

Frongillo, Rafael M (https://experts.colorado.edu/display/fisid_156416)
Assistant Professor; PhD, University of California-Berkeley

Gabow, Harold
Professor Emeritus; PhD, Stanford University

Gross, Mark D (https://experts.colorado.edu/display/fisid_100095)
Professor; PhD, Massachusetts Institute of Technology

Grunwald, Dirk C (https://experts.colorado.edu/display/fisid_102261)
Professor; PhD, University of Illinois at Urbana-Champaign

Ha, Sangtae (https://experts.colorado.edu/display/fisid_153246)
Assistant Professor; PhD, North Carolina State University at Raleigh

Hall, David Matthew (https://experts.colorado.edu/display/fisid_147474)
Asst Research Professor

Hammer, Matthew A (https://experts.colorado.edu/display/fisid_156066)
Assistant Professor; PhD, University of Chicago

Han, Richard Yehwei (https://experts.colorado.edu/display/fisid_122947)
Associate Professor; PhD, University of California-Berkeley

Hoenigman, Rhonda Olcott (https://experts.colorado.edu/display/fisid_152997)
Instructor; PhD, University of Colorado Boulder

Hunter, Lawrence E (https://experts.colorado.edu/display/fisid_143568)
Professor

Jansen, Kenneth E (https://experts.colorado.edu/display/fisid_147360)
Professor; PhD, Stanford University

Jessup, Elizabeth R (https://experts.colorado.edu/display/fisid_102065)
Professor; PhD, Yale University

Kallen-Brown, Jedediah A (https://experts.colorado.edu/display/fisid_153965)
Assistant Professor; DSc, ETH Zurich (Switzerland)

Kane, Shaun Kevin (https://experts.colorado.edu/display/fisid_154603)
Assistant Professor; PhD, University of Washington

Keegan, Brian (https://experts.colorado.edu/display/fisid_158122)
Assistant Professor; PhD, Northwestern University

Keller, Eric Robert (https://experts.colorado.edu/display/fisid_151647)
Assistant Professor; PhD, Princeton University

Ketelsen, Christian W (https://experts.colorado.edu/display/fisid_147863)
Instructor; PhD, University of Colorado Boulder

King, Roger A.
Professor Emeritus

Knox, David Allen (https://experts.colorado.edu/display/fisid_158054)
Instructor; PhD, University of Colorado Health Sciences Center

Lewis, Clayton H (https://experts.colorado.edu/display/fisid_100307)
Professor; PhD, University of Michigan Ann Arbor

Lv, Qin (https://experts.colorado.edu/display/fisid_145832)
Associate Professor; PhD, Princeton University

Main, Michael G.
Professor Emeritus; PhD, Washington State University

Martin, James H (https://experts.colorado.edu/display/fisid_100495)
Professor; PhD, University of California-Berkeley

McBryan, Oliver
Professor Emeritus

Mishra, Shivakant (https://experts.colorado.edu/display/fisid_118376)
Professor; PhD, University of Arizona

Mozer, Michael C (https://experts.colorado.edu/display/fisid_105922)
Professor; PhD, University of California-San Diego

Assistant Professor; PhD, Massachusetts Institute of Technology

Ying, Jordan Boyd-Graber (https://experts.colorado.edu/display/fisid_154406)
Assistant Professor; PhD, Princeton University

CSCI 1000 (1) Computer Science as a Field of Work and Study

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

Requisites: Restricted to students with 0-26 credits (Freshmen) Computer Science (CSEN-BS, CSEN-ADL, CSCI-BA or CSCI-ADL) majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 1200 (3) The Art of Computational Thinking and Computer Programming

Teaches computational thinking and techniques for writing computer programs using the Python programming language. Intended for students who realize that obtaining computational skills is beneficial to all fields of study, but who have little or no experience in programming or are not Computer Science majors. Students will be expected to create computer programs to solve problems in a range of disciplines.

Additional Information: Departmental Category: General Computer Science

CSCI 1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 1220

Additional Information: Departmental Category: General Computer Science

CSCI 1240 (3) The Computational World

Introduces and explores the "computational style of thinking" and its influence in science, mathematics, engineering and the arts. Does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 1240

Additional Information: Departmental Category: General Computer Science

CSCI 1300 (4) Computer Science 1: Starting Computing

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Intended for students with little to no experience in computing or programming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1310 or CSCI 1320 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 1310 (4) Computer Science 1: Starting Computing - Experienced

Intended for students with some prior experience in programming and basic knowledge of variables, conditionals, and loops. Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1320 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 1320 (4) Computer Science 1: Starting Computing-Engineering Applications

Intended for students with no prior experience in programming. Class outcomes and goals are identical to CSCI 1300, but uses problems and tools from Engineering. Teaching techniques for writing computer programs in higher level programming languages to solve problems of interest in Engineering and other domains.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1310 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Restricted to College of Engineering or Pre-Engineering Arts and Science (PREN) majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.

Requisites: Requires prerequisite courses of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1030 or ECEN 1310 and APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2400 (4) Computer Systems

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.

Requisites: Requires prerequisite course of CSCI 2270 and a prerequisite or corequisite course of CSCI 2824 or ECEN 2703 or a prerequisite course of MATH 2001 or APPM 3170 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2820 (3) Linear Algebra with Computer Science Applications

Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2824 (3) Discrete Structures

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.

Requisites: Requires prerequisite courses of CSCI 1200 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1030 or ECEN 1310 and APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 2830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Computer Science

CSCI 2900 (1-3) Lower Division, Undergraduate Level Independent Study

Offers selected topics at the elementary level for students with little or no previous computing experience.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Computer Science

CSCI 3002 (3) HCC Foundations/User-Centered Design and Development 1

Introduces the practice and research of human-centered computing, including the evolution of human-computer interaction to its forms today and the techniques of user-centered design. Surveys topics that include social computing; tangible computing; mobility; and more. It will cover computing in society at large with respect to domains such as health, education, assistive technology, emergency response and environment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3010 (3) Programming Project Workshop

A semester-long projects course guided by an instructor to help design and develop a programming project.

Requisites: Requires a prerequisite course of CSCI 2270 (minimum grade C-).

CSCI 3022 (3) Introduction to Data Science Algorithms

Introduces students to the tools methods and theory behind extracting insights from data using computer science algorithms. Covers algorithms that maximize likelihood objective functions; linear prediction algorithms; making decisions based on data assembled from large datasets; discovering and quantifying connections between observations in real-world data such as text and images; representing and manipulating data on a computer.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3100 (1) Software and Society

Provides students with an understanding of the professional, ethical, legal and social issues and responsibilities of software developers, as well as providing them with the ability to analyze the local and global impacts of computing on individuals, organizations and society.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308 and CSCI 4328 and CSCI 4338 and CSCI 4348

Requisites: Requires prerequisite course of CSCI 3308 (minimum grade C-). Restricted to Computer Science (CSEN-BS, CSEN-ADL, CSCI-BA, CSCI-ADL) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Computer Science

CSCI 3104 (4) Algorithms

Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 and one of the following: CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 3112 (1-3) Human-Centered Computing Professional Development

Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections and gaming.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 3112

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3155 (4) Principles of Programming Languages

Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a language and to adapt to a new language.

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Programming Languages

CSCI 3202 (3) Introduction to Artificial Intelligence

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170 and one of the following: APPM 3570, 4570, 4520, CSCI 3022, MATH 3510, 4510, CVEN 3227, ECEN 3810, MCEN 4120 or ECON 3818 (all minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3287 (3) Design and Analysis of Data Systems

Analyzes design of data systems, including data stored in file systems, database management systems and physical data organizations. Studies calculus of data models, query languages, concurrency and data privacy and security.

Requisites: Requires prerequisite course of CSCI 3104 (minimum grade C-).

Additional Information: Departmental Category: Database Systems

CSCI 3302 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3303

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3308 (3) Software Development Methods and Tools

Covers tools and practices for software development with a strong focus on best practices used in industry and professional development, such as agile methodologies, pair-programming and test-driven design. Students develop web services and applications while learning these methods and tools.

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions.

Requisites: Requires prerequisite courses of CSCI 3104 and CSCI 3155 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 3656 (3) Numerical Computation

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration.

Requisites: Requires prerequisite courses of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 1360 or MATH 2300 and MATH 2130 or APPM 2360 or APPM 3310 or CSCI 2820 (all minimum grade C-).

Additional Information: Departmental Category: Numerical Computation

CSCI 3702 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3753 (4) Design and Analysis of Operating Systems

Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.

Requisites: Requires prerequisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (all minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3832 (3) Machine Translation

Provides a comprehensive overview of current techniques in statistical machine translation of natural language, e., automatically translating from Spanish to English. Covers language models, reordering, hierarchical translation and evaluating whether a translation is effective.

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4229 (3) Computer Graphics

Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation and projection. Involves removal of hidden edges, shading and color. Knowledge of basic linear algebra is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5229

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Graphics

CSCI 4239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5239

Requisites: Requires prerequisite course of CSCI 4229 (minimum grade C-).

Additional Information: Departmental Category: Graphics

CSCI 4250 (3) Computer Science: The Canon

Explores the "great works" of computer science through intensive reading and discussion. Readings include works by Babbage, Turing, Von Neumann, Goedel, Shannon and Minsky, among others. Does not count as CS credit for the Computer Science BA, BS or minor.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5250

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Computer Science

CSCI 4253 (3) Datacenter Scale Computing - Methods, Systems and Techniques

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5253

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CSCI 4273.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5273 and ECEN 5273

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5302

Requisites: Requires prerequisite course of CSCI 3302 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4308 (4) Software Engineering Project 1

Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the development process. Department enforced prerequisite: successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 4448.

Additional Information: Departmental Category: Software Engineering

CSCI 4314 (3) Algorithms for Molecular Biology

Surveys molecular biology and combinatorial algorithms used to understand DNA, RNA and proteins. Students work in groups to define and tackle meaningful biological problems and learn to collaborate effectively with scientists in other disciplines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5314

Requisites: Requires a prerequisite course of CSCI 3104 (minimum grade C-).

Recommended: Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.

Additional Information: Departmental Category: Theory of Computation

CSCI 4318 (4) Software Engineering Project 2

Second semester of an advanced practicum in computer science. Students must take this course and CSCI 4308 contiguously as the project spans the entire academic year.

Requisites: Requires prerequisite course of CSCI 4308 (minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 4328 (4) Software Project Management and Mentoring

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing and prototype goals. Study project risk management and cost estimation approaches. Experience mentoring Senior Software Project Team. Intended for professional software developers. Department consent required, see Senior Project Director for permission.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Software Engineering

CSCI 4338 (2) Software Project Management

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Intended for double majors doing interdisciplinary projects in other departments.

Department consent required, see Senior Project Director for permission.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Software Engineering

CSCI 4348 (4) Startup Essentials: Entrepreneurial Projects in Computing

Provide students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept, and be evaluated on product/market fit. Department enforced restriction, successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG. Formerly CSCI 4000.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5340

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 4358 (4) Entrepreneurial Projects II

Follows CSCI 4348. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5350

Requisites: Requires a prerequisite course of CSCI 4348 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4413 (3) Computer Security and Ethical Hacking

Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5413

Requisites: Requires prerequisite course of CSCI 4273 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and ECEN 4423 and ECEN 5423

Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 2350 or MATH 2400 (all minimum grade C-).

Recommended: Prerequisites PHYS 1120 and CSCI 3656 and MATH 2130.

Additional Information: Departmental Category: Numerical Computation

CSCI 4448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5448

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 4502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4555 (3) Compiler Construction

Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5525 and ECEN 4553 and ECEN 5523

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 2400 or ECEN 3350 (all minimum grade C-).

Additional Information: Departmental Category: Programming Languages

CSCI 4576 (4) High-Performance Scientific Computing

Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5576

Recommended: Prerequisite CSCI 3656.

Additional Information: Departmental Category: Numerical Computation

CSCI 4586 (4) High-Performance Scientific Computing 2

Introduces computing systems, software, and methods to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. Second course in a two-semester sequence.

Requisites: Requires prerequisite course of CSCI 4576 (minimum grade C-).

Additional Information: Departmental Category: Numerical Computation

CSCI 4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4593

Requisites: Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and ECEN 4753 and ECEN 5753

Requisites: Requires prerequisite course of CSCI 3753 and MATH 2300 or APPM 1360 (all minimum grade C-).

Recommended: Requisite a course in statistics.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4802 (1) Data Science Team Companion Course

Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5802

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of APPM 3310 or APPM 3570 or APPM 4520 or APPM 4570 or MATH 2130 or MATH 3510 or MATH 4510 or CSCI 2820 or CSCI 3022 or CVEN 3227 or ECEN 3810 or MCEN 4120 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5809 and ATLS 4809 and ATLS 5809

Additional Information: Departmental Category: Graphics

CSCI 4810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6810

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Computer Science

CSCI 4830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 2400 or ECEN 3350 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4831 (1-3) Special Topics in Algorithms

Covers topics of interest in computer science at the upper-division undergraduate level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of CSCI 3104 and CSCI 2820 or MATH 2130 or APPM 3310 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4900 (1-3) Upper Division, Undergraduate Level Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4950 (2-4) Senior Thesis

Provides an opportunity for senior computer science majors to conduct exploratory research in computer science. Department enforced restriction, successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of CSCI 3100 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: General Computer Science

CSCI 4960 (2-4) Computer Science Honors Thesis

Provides an opportunity for senior Computer Science majors to complete an honors thesis by conducting exploratory research in computer science. Department enforced prerequisites: successful completion of a minimum of 36 credit hours of Computer Science foundation and Computer Science electives and a writing requirement.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Computer Science

Computer Science - Bachelor of Arts (BA)

Overview of the Major

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, and they advance the computational techniques and write the software that supports scientists in their study of the world around us. They create the software that social scientists use to identify and analyze patterns in the behavior of social groups and human behavior in social networks and the applications that humanists and linguists use to research language development. Many new applications of computing technology remain to be discovered.

Indeed, computing will be at the heart of future revolutions in business,

science, and society. Students who study computer science now will be at the forefront of those important advances.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem solving, and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users. It is about understanding how that software interacts with the hardware on which it is run. Computer science goes well beyond the machine to the study of how people interact with the technologies around them. Applications of computer science reach far and wide.

Career Possibilities

Computer science graduates from the University of Colorado Boulder are engaged in a wide variety of jobs with many different companies in locations all over the world. They produce the software and systems that touch lives every day in fields ranging from communications to finance to publishing. They are, of course, software developers, but also have become teachers, writers, doctors, lawyers, scientists, military leaders, and entrepreneurs. They work at some of the largest, most influential companies in the world, at research institutions, non-profits, and at the smallest start-ups of every type imaginable. And many lead highly successful companies that they themselves have founded.

Career Services offers a number of programs and services designed to help you plan your career, including workshops, internships, and placement services after graduation. For an appointment with a career counselor or for more information, call 303-492-6541, or stop by the Center for Community. Find more information at Career Services (<http://www.colorado.edu/career>).

Facilities, Programs, and Opportunities

The Department of Computer Science uses a modern computing infrastructure that supports its research and educational missions. The department has a variety of computing facilities for use by faculty, staff, and students. These include general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department, and specialized labs dedicated to the work of individual research groups. A wide variety of computing resources are available so that students have the opportunity to learn about and use cutting-edge equipment and software.

The Undergraduate Research Opportunities Program (UROP) offers students a chance to work alongside a faculty sponsor on original research. Learn to write proposals, conduct research, pursue creative work, analyze data, and present the results. For more information, call UROP at 303-492-2596 or visit the UROP website (<http://www.colorado.edu/suep/urop>). The Department provides networking opportunities throughout the year for students to meet with companies looking to hire students for paid internships. CU's location near Boulder's tech startup community, national research labs, and traditional tech companies such as Google, IBM, Oracle, Microsoft, and the like provide students with computer science skills a wide range of employment opportunities while working on earning their degrees.

Advising

If you would like to speak to an advisor about the BA in CS degree program Eva Lacy (eva.lacy@colorado.edu). Current A&S students may

also use the A&S advising website (<http://advising.colorado.edu>) to schedule an appointment with Eva.

A student may not earn both the BS in computer science from the College of Engineering and Applied Science and the BA in computer science from the College of Arts and Sciences. A student may not earn both a bachelor's degree in computer science and the minor in computer science from CU Boulder.

Required Courses and Credit Hours

Students must complete the general requirements of the College of Arts and Sciences, including approximately 46 credit hours in the core curriculum and the required courses listed below. Credit hours in the major may also apply toward these core courses.

Foundation

CSCI 1300	Computer Science 1: Starting Computing	4
or CSCI 1310	Computer Science 1: Starting Computing - Experienced	
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems	4
CSCI 2824	Discrete Structures (or other CS department approved Discrete Math course)	3

Core Courses

Select four of the following: 12-15

CSCI 3002	HCC Foundations/User-Centered Design and Development 1
CSCI 3104	Algorithms
CSCI 3155	Principles of Programming Languages
CSCI 3202	Introduction to Artificial Intelligence
CSCI 3287	Design and Analysis of Data Systems
CSCI 3308	Software Development Methods and Tools
CSCI 3434	Theory of Computation
CSCI 3656	Numerical Computation
CSCI 3753	Design and Analysis of Operating Systems
CSCI 4448	Object-Oriented Analysis and Design

Upper Division CSCI Electives

Three or four additional upper-division CSCI courses 12-15

Acillary Mathematics

Select one of the following Calculus sequences: 8-12

Sequence 1:	
APPM 1350	Calculus 1 for Engineers
& APPM 1360	and Calculus 2 for Engineers
Sequence 2:	
APPM 1340	Calculus 1 with Algebra, Part A
APPM 1345	Calculus 1 with Algebra, Part B
APPM 1360	Calculus 2 for Engineers
Sequence 3:	
MATH 1300	Calculus 1
& MATH 2300	and Calculus 2

Select one of the following courses in either Linear Algebra or Probability/Statistics: 3-4

Linear Algebra:	
APPM 3310	Matrix Methods and Applications
CSCI 2820	Linear Algebra with Computer Science Applications

MATH 2130	Introduction to Linear Algebra for Non-Mathematics Majors
Probability/Statistics:	
APPM 3570	Applied Probability
APPM 4570	Statistical Methods
ECON 3818	Introduction to Statistics with Computer Applications
MATH 3510	Introduction to Probability and Statistics
MATH 4510	Introduction to Probability Theory
Total Credit Hours	50-61

Graduating in Four Years

In order for the Four-Year Guarantee to apply, an arts and sciences student would need to have:

- Enrolled in the BA in computer science major and have taken Calculus 1 and CSCI 1300 (or CSCI 1310) by their second semester.

For more information, visit the department in Engineering Center, ECOT 717 or visit the Computer Science department (<http://www.colorado.edu/cs>) website.

Distributed Studies Program

Admission to the disciplinary and divisional track of distributed studies major requires completion of 60 credit hours or more, a one year break in a student's academic career, and permission from the College of Arts & Sciences dean's office. The distributed studies major is intended for returning students who have accumulated a significant number of credit hours toward the completion of one or more arts and sciences majors, are not eligible to continue in those majors, and have taken a break in their academic career.

An individually structured track also is available in the distributed studies major. Students pursuing the individually structured track must write and defend a thesis based on original scholarly or creative work.

For more information, contact the College of Arts and Sciences Academic Advising Center in Woodbury 109.

Ecology and Evolutionary Biology

Ecology seeks to understand the processes that control the abundance and distribution of organisms and how they interact with one another in a changing environment. Evolutionary biology provides a unifying conceptual framework for all of biology, including the characteristics of organisms and biological diversity. Taken together, ecology and evolutionary biology form a fundamental, broad, diverse and interdisciplinary area of scientific inquiry. Study in both areas is necessary for understanding the complex biological issues of today, including fighting diseases, understanding of the responses of life and humankind to Earth's changing environment and learning how species develop, thrive and decline. Also, ecology and evolutionary biology are working toward solving some of the world's most demanding problems, including sustainability and the future of life on earth, human health and welfare and wise stewardship of our planet. Students majoring in Ecology and Evolutionary Biology (EBIO) apply scientific approaches to issues in ecology and evolution, with an emphasis on critical evaluation of the literature, generating and testing hypotheses, designing and carrying out

experiments to test predictions and articulating, in oral or written form, the results of investigations.

In light of the broad importance of ecology and evolution for fundamental understanding of living systems, the undergraduate EBIO degree emphasizes knowledge and problem-solving in areas of:

- the ecology of organisms, populations and communities
- the distribution and function of terrestrial, freshwater and marine ecosystems
- principles and patterns of evolution, including natural selection and the history of life on Earth
- comparative, systematic, evolutionary and environmental aspects of botany, microbiology and zoology
- adaptation of organisms to the physical and biotic environment
- animal behavior and emotion
- molecular evolution and population genetics
- developmental biology and the evolution of development
- conservation biology and management of ecosystems
- the relevance of mathematics, chemistry and physics to biology
- the development of biological thought
- infectious disease ecology
- landscape and ecosystem ecology
- sustainability and human-nature systems
- energy and biofuels
- Darwinian medicine
- health and population genetics
- genetically engineered organisms

EBIO majors include students who:

- have strong and compelling interests in the natural world and who are interested in making a difference
- are interested in pursuing advanced graduate degrees in science, especially biology
- want careers in the areas of natural resources management, environmental consulting, environmental law, environmental science, science teaching and scientific journalism, among other professions
- are passionate about making a difference in the lives of others by improving their physical and mental health
- are interested in many different areas of biology, from the molecular to ecosystem levels
- are fascinated with the complexity and diversity of nature

A bachelor of arts (BA) degree in EBIO provides excellent training, education and experience, preparing students for many successful careers and for admission to and success in graduate study or medical school and other health professions:

- because ecology and evolution are subjects of central importance for understanding the ways all organisms live, grow and survive—everything from microbes to humans
- because the department and its classes provide students a broad learning experience in the biological sciences
- because the department's faculty provide EBIO majors with excellent classes and research opportunities

Course code for this program is EBIO.

Bachelor's Degree

- Ecology and Evolutionary Biology - Bachelor of Arts (BA) (p. 262)

Minor

- Ecology and Evolutionary Biology - Minor (p. 263)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adams, William (https://experts.colorado.edu/display/fisid_103612)
Professor; PhD, Australian National Univ (Australia)

Armstrong, David M.
Professor Emeritus

EBIO 1010 (3) Introduction to Quantitative Thinking for Biologists

Focuses on the collection, visualization and analysis of data that are relevant for advancing critical thinking, student-directed learning, and the development of quantitative analysis skills, with an emphasis on using R and examples from ecology and evolutionary biology.

Grading Basis: Letter Grade

EBIO 1030 (3) Biology: A Human Approach 1

Lect. Studies the principles of biology and their implications. Central theme is humans and the environment, emphasizing ecology, natural resource conservation, and the interrelatedness of a growing human population. Recommended for nonscience majors.

Additional Information: Arts Sci Core Curr: Natural Science Sequence
MAPS Course: Natural Science

EBIO 1040 (3) Biology: A Human Approach 2

Lect. Continues EBIO 1030, focusing on the function of the human body, and maintenance of dynamic equilibrium in the internal environment in the face of a continually changing external environment. Discusses factors influencing these homeostatic conditions and how and why they change. Recommended for nonscience majors.

Recommended: Prerequisite EBIO 1030 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Sequence

EBIO 1050 (1) Biology: A Human Approach Laboratory

One two-hour lab per week. Provides experiments and exercises relating to concepts presented in EBIO 1030 and EBIO 1040. Uses animals and/or animal tissues. Recommended for nonscience majors. When taken with EBIO 1030, meets the MAPS requirement for natural science: lab.

Additional Information: Arts Sci Core Curr: Natural Science Lab
MAPS Course: Natural Science Lab or Lab/Lec

EBIO 1210 (3) General Biology 1

Lect. Provides a concentrated introduction to molecular, cellular, genetic, and evolutionary biology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

MAPS Course: Natural Science

EBIO 1220 (3) General Biology 2

Provides a concentrated introduction to organisms, homeostasis, development, behavior, and ecology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors.

Recommended: Prerequisite EBIO 1210 (minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

EBIO 1230 (1) General Biology Laboratory 1

One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 1. Intended for science majors.

Recommended: Prerequisite or corequisite EBIO 1210 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science

EBIO 1240 (1) General Biology Laboratory 2

One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 2. Intended for science majors.

Recommended: Prerequisite or corequisite EBIO 1220 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

EBIO 1300 (1-3) Topics in Biological Sciences

Covers special topics in biology for freshmen or nonmajors. Introduces scientific methods and principles in biology, as well as issues of current interest in biology. Does not count toward the major in EBIO.

EBIO 1940 (3) College Writing for Science Students

Introduces first year students to college writing, focusing on developing academic research and writing skills of particular interest to science students. Emphasizes habits of mind in topic invention, drafting, revision and writing style, as well as critical thinking and information literacy.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

Additional Information: Arts Sci Core Curr: Written Communication

EBIO 2010 (1-3) Environmental Issues and Biology

Lect. Describes how the natural environment is currently stressed by a variety of human actions. Examines the nature of these environmental problems and their impact on living organisms, both human and nonhuman species.

EBIO 2040 (4) Principles of Ecology

Lecture and laboratory. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 2640 and ENVS 2000

Recommended: Prerequisites EBIO 1030 and EBIO 1040 and EBIO 1050 or EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 2070 (4) Genetics: Molecules to Populations

Lect. and rec. Covers principles of genetics and developmental biology at levels of molecules, cellular organelles, individuals and populations; asexual and sexual life cycles; heredity. Recitations allow discussion of genetics problems and implications of genetic principles and provide demonstrations and simulations of genetic processes. Intended for sophomore majors in EBIO.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 2640

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Sequence

EBIO 2090 (3) Tropical Island and Marine Ecology

Examines fundamental concepts of marine ecology, emphasizing organismal diversity, species interactions, dispersal, colonization, physiology and adaptations. Includes study of beach and coral formation, island organisms and their population dynamics. Students may also register for an optional 1 credit, one week, tropical island and coral reef trip that complements the lecture portion of the class but has an additional cost.

Recommended: Prerequisite EBIO 1220 (minimum grade C-).

EBIO 2091 (3) Field Studies in Marine and Island Ecology and Oceanography

Investigates tropical island and marine ecology as well as all four disciplines of oceanography. A three-credit course focused on a tropical island ecology and oceanography field trip that complements the lecture portion of EBIO 2090 and ATOC 3070 with an additional cost. Examines fundamental concepts of marine ecology, emphasizing organismal diversity, species interactions, study of beach and coral formation, island formation, organisms and their population dynamics. The course consists of a one-week field trip to the Keys Marine Laboratory in the Florida Keys and once-weekly class room meeting (of variable duration from 1-4 hours) throughout the semester.

Requisites: Requires a corequisite course of EBIO 2090 or ATOC 3070 or GEOL 3070.

Grading Basis: Letter Grade

EBIO 2640 (5) Honors Principles of Ecology

Lect., lab, and rec. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 2040 and ENVS 2000

Recommended: Prerequisites EBIO 1030 and EBIO 1040 and EBIO 1050 or EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

Additional Information: Arts Sciences Honors Course

EBIO 2840 (1-6) Independent Study: Lower Division

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 3010 (1-2) Teaching Biology

Provides an opportunity to assist in teaching of specific lecture or laboratory section in EBIO under direct faculty supervision. Students must first make arrangements with the appropriate faculty member and turn in a form to the EBIO office.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

EBIO 3040 (4) Conservation Biology

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3040

Recommended: Prerequisite EBIO 2040 or EBIO 2640 or ENVS 2000 (minimum grade C-).

EBIO 3080 (4) Evolutionary Biology

Lect. and lab. Emphasizes the fundamental evolutionary concepts that provide explanations for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection, speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and processes. Recitations allow students to explore specific topics in more depth and smaller groups.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 3680

Recommended: Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

EBIO 3110 (3) Population and Community Ecology

Presents principles of ecology that relate to the niche, population growth, metapopulations, population interactions (within and between trophic levels), community structure and development, landscape ecology and species diversity.

Recommended: Prerequisite EBIO 1240 or EBIO 2640 (minimum grade C-).

EBIO 3170 (3) Mountain Ecology and Conservation

Focuses on the ecology of mountain environments around the world, including climatic gradients, plant and animal diversity and distributions, habitat zonation, evolutionary processes, and various aspects of montane conservation from habitat change to climate change.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 2040 (minimum grade C-).

EBIO 3180 (3) Global Ecology

Lect. Involves study of ecological principles and problems at the biosphere level. Presents a worldwide approach to populations, biotic resources, ecologic interactions, land use, deforestation, desertification, species extinctions, pollution, environmental quality, global change, and environmental ethics.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

EBIO 3190 (3) Tropical Marine Ecology

Lect. Examines the biology and ecology of marine ecosystems, emphasizing those occurring in tropical regions such as coral reefs. Studies how these ecosystems are changing and the future impact of human stress on the marine environment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite any two-semester introductory biology course.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

EBIO 3240 (4) Animal Behavior

Lect. and lab. Topics include basic concepts and history, methods of study, ethical issues, neurobiology, behavior, the development of behavior, predator-prey relationships, communication, aggression and dominance, mating systems, cognitive ethology, and parental care. When possible, life-history strategies, the evolution of behavior, and behavioral ecology are stressed. Uses animals and animal tissues.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 3270 (3) Ecosystem Ecology

Integrates information from physics (e.g., energetics), chemistry (the behavior of basic elements), and biology (evolutionary traits of species, multiple photosynthetic pathways, etc.) to understand the structure and functioning of ecosystems. Provides the background and necessary information to understand controls on photosynthesis, decomposition, and nutrient cycling across diverse terrestrial and aquatic landscapes.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 (minimum grade C-).

EBIO 3400 (3) Microbiology

Surveys distinguishing characteristics of microorganisms based on structural-functional relationships, taxonomy, growth and physical-chemical agents of control including antibiotics, metabolism and genetics. Introduces applied microbiology emphasizing infectious diseases, basic concepts of immunology and microbial ecology. Uses animals and/or animal tissues.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 3410 (1) Microbiology Lab

Accompanies EBIO 3400.

Requisites: Requires a prerequisite or corequisite course of EBIO 3400 (minimum grade D-).

Grading Basis: Letter Grade

EBIO 3590 (4) Plants and Society

A writing intensive course for majors and non-majors which acquaints students with the history of plant use in our society. Topics center on the evolving relationship between humans and plants as food sources, medicines, fuel, and other products, such as fibers and dyes.

Grading Basis: Letter Grade

EBIO 3630 (4) Parasitology

Lect. and lab. Surveys animal parasites, including life histories; emphasizes parasites of humans. Uses animals and/or animal tissues.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 3680 (5) Honors Evolutionary Biology

Lect., rec., and co-sem. Emphasizes the fundamental evolutionary concepts that provide explanation for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and process. Recitations allow students to explore specific topics in more depth and smaller groups.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 3080

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2070 (minimum grade C-).

Additional Information: Arts Sciences Honors Course

EBIO 3850 (4) Animal Diversity: Invertebrates

Lect. and lab. Offers a broad study of the biology of the most diverse group of organisms on Earth. Areas include ecology, physiology, evolution and morphology of aquatic and terrestrial forms. Uses animals and/or animal tissues.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 3930 (1-6) Internship

Provides an academically supervised opportunity for upper-division students to work in public or private organizations. Projects are usually related to students' career goals. Each project has both academic and work components. Pass/fail only.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

EBIO 3940 (3) Written Communication in the Sciences

Focuses upon communication commonly practiced by scientists, with special emphasis on writing. Directs attention to scientists' strategic use of written arguments, statistical data and visual representations. Prepares students for communication tasks within advanced study and professional work.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Written Communication

EBIO 3980 (1) Seminar: Introduction to EBIO Honors

Presents an introduction to the departmental Honors program. Consists of a lecture component on Honors research, thesis, and defense, as well as a seminar component where students present the findings of their library research, conducted under guidance of a faculty mentor, and hear presentations by graduating Honors candidates on their thesis research.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites minimum 3.2 GPA and a declared EBIO major and approval by departmental honors committee.

Additional Information: Arts Sciences Honors Course

EBIO 3990 (1-3) EBIO Honors Thesis Research

Provides an introduction to the departmental Honors program. Consists of individual library research on a potential Honors thesis topic under the guidance of a faculty mentor.

Requisites: Restricted to Ecology and Evolutionary Biology (EBIO) majors only.

Recommended: Prerequisites minimum 3.2 GPA and approval by departmental honors committee.

EBIO 4030 (3) Limnology

Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5030

Recommended: Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

EBIO 4060 (3) Landscape Ecology

Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5060

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

EBIO 4070 (3) DNA Methods in Ecology and Conservation Biology

Acquiring skill with molecular methods in ecology and conservation biology is most quickly accomplished with hands-on experience.

Combines classroom lectures with collecting in the field and laboratory exercises to provide experience extracting DNA, amplifying DNA with the Polymerase Chain Reaction (PCR), designing PCR primers, sequencing DNA and editing and aligning sequences with the Sequencher software.

Requisites: Requires prerequisite course of EBIO 2070 (minimum grade C).

Grading Basis: Letter Grade

EBIO 4080 (4) Freshwater Phycology

Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5080

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4090 (2) Coral Reef Ecology

Includes one week of lectures in Boulder and one week of field studies on one of the most complex and beautiful ecosystems in the world, the Caribbean reefs at Cozumel, Mexico. Two week, fall-semester course beginning after Christmas. Scuba certification required.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite any ecology course is a highly recommended.

EBIO 4100 (3) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5100

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

EBIO 4120 (2-4) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

EBIO 4140 (3) Plant Ecology

Examines the relationships between plants and their physical and biological environments, encompassing physiology, competition, plant-soil and plant-animal interactions, population dynamics, diversity, and influence on ecosystem function.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4150 (1-2) Techniques in Ecology

Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5150

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

EBIO 4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4160 and GEOL 4160

Recommended: Prerequisites GEOL 3320 or EBIO 3270 and CHEM 1011 (minimum grade C-).

EBIO 4175 (3) The Scientific Basis for Ecosystem Management of Public Lands

An advanced field ecology course emphasizing measurements, statistical procedures and biotic data information management relevant to land management issues. Develops concepts of adaptive ecosystem management using ongoing field studies on public land in the Colorado Front Range.

Recommended: Prerequisites EBIO 3270 and EBIO 4500 (minimum grade C-).

EBIO 4270 (3) Population Genetics

Provides an in-depth introduction to population genetics. Lectures and discussions will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. Following an introduction to population genetic theory, we will investigate current topics in the field.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5270

Requisites: Requires prerequisite courses of EBIO 2070 and EBIO 3080 (all minimum grade C-).

Grading Basis: Letter Grade

EBIO 4290 (4) Phylogenetics and Comparative Biology

Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5290

Recommended: Prerequisite EBIO 3080 (minimum grade C-) or instructor consent required.

Grading Basis: Letter Grade

EBIO 4340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5340 and ENVS 4340 and ENVS 5340

Recommended: Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

EBIO 4410 (4) Biometry

Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5410

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4420 (3) Computational Biology

Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5420

Grading Basis: Letter Grade

EBIO 4440 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5440 and MCDB 4441 and MCDB 5441

Recommended: Prerequisites MCDB 1150 or EBIO 1210 and MCDB 2150 or EBIO 2070 (minimum grade C-).

EBIO 4460 (1-5) Special Topics

Familiarizes students with specialized areas of biology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5460

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4500 (4) Plant Biodiversity and Evolution

Lect. and lab. Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4510 (4) Plant Anatomy and Development

Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant.

Recommended: Prerequisites, EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4520 (4) Plant Systematics

Lect. and lab. Studies the principles and techniques of modern systematics of organisms, illustrated with examples from the plant kingdom, usually the angiosperms. Framework of course is evolutionary and ecological, as well as taxonomic.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5520

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

EBIO 4530 (4) Functional Plant Biology

Lect. and lab. Explores mechanisms of plant functioning and how such functioning relates to the performance of the plant under different environmental conditions. Phenomena include water relations, growth and development, and metabolic processes including photosynthesis, respiration, and responses to stress.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4550 (4) Plant Eco-Evo-Devo

Explores the fundamental principles of plant form from the perspectives of ecological function, evolutionary origin, and developmental dynamics. Students are presented with conceptual and analytical tools to interpret the vast diversity of growth form-function relationships that exist among plants. Laboratory sessions apply concepts presented in lecture and students will engage in original research using light and scanning electron microscopy.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4600 (4) Evolutionary Ecology

Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5600

Requisites: Requires prerequisite courses of EBIO 2040 and EBIO 3080 (all minimum grade C-).

Grading Basis: Letter Grade

EBIO 4640 (2-4) Plant Field Studies

Includes field-oriented courses offered at irregular intervals during the academic year or during summer sessions.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 2040 and EBIO 2640 (minimum grade C-).

EBIO 4660 (4) Insect Biology

Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5660

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4740 (3) Biology of Amphibians and Reptiles

Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5740

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4750 (4) Ornithology

Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5750

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5760 and MUSM 5760

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 2040 and EBIO 2640 (minimum grade C-).

EBIO 4800 (3) Critical Thinking in Biology

Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5800

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite minimum of 14 hours of EBIO course work.

EBIO 4840 (1-6) Independent Study: Upper Division

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 4860 (1-2) Critical Thinking in Biology - Lab**EBIO 4870 (1-6) Independent Research: Upper Division**

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 4980 (1) Seminar: EBIO Honors Thesis

To be taken during the final academic year prior to graduation. Consists of a lecture component on Honors thesis writing and defense, as well as a seminar component where Honors candidates present their thesis research in a practice defense talk.

Recommended: Prerequisites minimum 3.3 GPA and a declared EBIO major and approval by departmental honors committee.

Additional Information: Arts Sciences Honors Course

EBIO 4990 (1-3) EBIO Honors Thesis Research

To be taken during the final academic year prior to graduation. Consists of the final phase of honors research and thesis preparation under the guidance of a faculty mentor.

Requisites: Restricted to Ecology and Evolutionary Biology (EBIO) majors only.

Recommended: Prerequisites minimum 3.3 GPA and a declared EBIO major and approval by departmental Honors program.

Additional Information: Arts Sciences Honors Course

Ecology and Evolutionary Biology - Bachelor of Arts (BA)

The undergraduate program in ecology and evolutionary biology offers a highly interactive, intellectual environment that prepares students for a career in the natural sciences.

Our program was specifically designed for students who are interested in a broad exposure to the concepts and methodologies of the biological sciences, as well as those interested in a more specific sub-discipline.

We offer a broad range of learning opportunities, including traditional classroom experiences, field and laboratory research opportunities, and independent study.

International Bachelor of Arts (IBA)

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in ecology and evolutionary biology, in addition to completing all the current requirements for the BA with a major in ecology and evolutionary biology at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Concurrent Degree Program

BA/MA in Ecology and Evolutionary Biology

A combined bachelor's (BA) and master's (MA) degree with thesis is offered for highly motivated undergraduate students. The BA/MA program allows students to take advanced courses at an accelerated pace, engage in an independent research project and obtain both degrees in five years. In addition to preparing graduates for additional graduate study or medical school, the program is expected to position them for employment in areas such as environmental consulting, teaching at the high school or community college level or by businesses with an environmental or biomedical emphasis. Applications from sophomores and juniors for the BA/MA degree are considered on a competitive basis. Applicants must have an overall GPA of 3.00 or higher in the EBIO major and the support of a faculty research advisor. Applications are available from the EBIO graduate coordinator, and are due on October 15 and March 15.

Candidates for this degree must complete all college core requirements by the end of the senior year. To be awarded both BA and MA degrees, a student must maintain a GPA of 3.00 or better and complete at least 144 credit hours. The BA/MA program requires 24 hours of graduate credit at the 5000-level or above and 4–6 hours of thesis credit. In addition to writing a thesis based on original research, students are examined by their thesis committee in the fifth year on general knowledge in ecology and/or evolutionary biology. The final examination consists of a defense of the thesis before the committee; it should be scheduled by the end of the fifth year.

Students interested in this program are encouraged to consult with the EBIO associate chair for graduate studies early in their undergraduate career. No financial support is available from the department for students enrolled in this program.

Required Courses and Credit Hours

In addition to the general College of Arts and Sciences requirements, students in EBIO must complete 12-15 credit hours selected from chemistry, physics and mathematics, plus a statistics course and 38 credit hours of course work in EBIO.

Up to 12 credit hours of courses taken in other departments may be counted toward the 38 credit hours required for the EBIO major. A list of acceptable courses can be obtained from the EBIO advisor. A maximum of 6 credit hours of Independent Study/Research may be applied toward the major. A maximum of 6 credit hours of internship may be applied toward the major.

Students with scores of 4 or 5 on the AP biology test receive 8 hours of credit and are exempt from the general biology sequence (EBIO 1210 and EBIO 1220, and EBIO 1230 and EBIO 1240). Students who score in the 66th percentile or higher on the CLEP test in biology receive 6 hours of credit and are exempt from EBIO 1210 and EBIO 1220.

EBIO majors with transfer credit in biology from other institutions or advanced placement credits must consult with the EBIO undergraduate advisor. Transfer students must complete at least 12 upper-division (3000-level or above) EBIO credit hours on the Boulder campus.

All required courses must be completed with a grade of C- or better.

Required Courses

EBIO 1210	General Biology 1	4
& EBIO 1230	and General Biology Laboratory 1	
EBIO 1220	General Biology 2	4
& EBIO 1240	and General Biology Laboratory 2	
EBIO 2040	Principles of Ecology	4
EBIO 2070	Genetics: Molecules to Populations	4
EBIO 3080	Evolutionary Biology	4
One EBIO laboratory or field course, 3000 level or above. Possible choices include:		3-4

EBIO 3170	Mountain Ecology and Conservation
EBIO 3240	Animal Behavior
EBIO 3400	Microbiology
EBIO 3630	Parasitology
EBIO 3850	Animal Diversity: Invertebrates
EBIO 4100	Advanced Ecology
EBIO 4500	Plant Biodiversity and Evolution
EBIO 4510	Plant Anatomy and Development
EBIO 4520	Plant Systematics
EBIO 4660	Insect Biology
EBIO 4750	Ornithology
EBIO 4760	Mammalogy

EBIO 4000-level or above (at least 6 credit hours). Possible choices include: ¹ 6

EBIO 4030	Limnology
EBIO 4060	Landscape Ecology
EBIO 4140	Plant Ecology
EBIO 4100	Advanced Ecology
EBIO 4160	Introduction to Biogeochemistry
EBIO 4175	The Scientific Basis for Ecosystem Management of Public Lands
EBIO 4290	Phylogenetics and Comparative Biology
EBIO 4410	Biometry
EBIO 4740	Biology of Amphibians and Reptiles
EBIO 4800	Critical Thinking in Biology
EBIO 4840	Independent Study: Upper Division
EBIO 4870	Independent Research: Upper Division

Electives

EBIO electives to bring total in major to 38 credit hours 8-9

Statistics: ²

EBIO 1010	Introduction to Quantitative Thinking for Biologists
MATH 2510	Introduction to Statistics
MATH 3510	Introduction to Probability and Statistics
IPHY 2800	Introduction to Statistics
PSYC 2111	Psychological Science I: Statistics
EBIO 4410	Biometry

Ancillary Course Work

Select three of the following: 12-15

CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1 ³
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2 ³
PHYS 1110	General Physics 1 (calculus-based)
PHYS 2010	General Physics 1 (algebra-based)
PHYS 1120 & PHYS 1140	General Physics 2 and Experimental Physics 1 (calculus-based) ³
PHYS 2020	General Physics 2 (algebra-based)
MATH 1300	Calculus 1
	or MATH 1310 Calculus, Systems, and Modeling
	or APPM 1300 Calculus 1 for Engineers
MATH 2300	Calculus 2
	or APPM 1360 Calculus 2 for Engineers

Total Credit Hours 49-54

¹ These 6 credit hours must include one course taken at the CU Boulder campus or Mountain Research Station and may include a maximum of 3 credit hours of independent study or independent research.

² Of these, only EBIO 4410 counts toward the 38 credit hours of EBIO required for the major.

³ Students must take the lecture and lab for these courses.

Ecology and Evolutionary Biology - Minor

A minor is offered in ecology and evolutionary biology. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

We offer a broad range of learning opportunities, including traditional classroom experiences, field and laboratory research opportunities, and independent study.

Required Courses and Credit Hours

Students must complete:

- A total of 20 credit hours in EBIO with grades of C- or better.
- A 2.00 GPA or higher for all course work attempted in EBIO.
- 9 hours of upper-division credit in EBIO.
- 6 hours of 4000-level credit in EBIO.
- A minimum of 12 credit hours must be taken on the Boulder campus, including a minimum of 6 of the 9 upper-division credit hours. Mountain Research Station is considered the Boulder campus.
- Up to 3 credit hours of any combination of the following can count toward the EBIO minor: Independent study, Independent research or internship credit.

All courses must have an EBIO prefix. EBIO 1030, EBIO 1040, EBIO 1050, EBIO 1300 and EBIO 3010 do not count toward the minor requirement.

Required Courses

EBIO 1210	General Biology 1	4
& EBIO 1230	and General Biology Laboratory 1

Economics

The undergraduate degree in economics emphasizes knowledge and awareness of:

- the conditions for efficiency in free market production and exchange;
- contemporary theories concerning economic growth, inflation, unemployment, distribution of income and international environment;
- specialized fields of economics, such as international economics and finance, natural resources and environment, the economics of gender and discrimination and public economics;
- the descriptive statistics commonly used by economists; and
- the institutional characteristics of the US economy, and how these differ from those in other economies.

In addition, students completing the degree in economics are expected to acquire the ability and skills to:

- apply the tools of microeconomic theory to reach sound conclusions for simple economic problems;
- follow arguments concerning macroeconomic theory to distinguish between sound and fallacious reasoning and to understand how differences in policy prescription may arise;
- perform statistical analysis such as multiple regression and understand similar analyses performed by others; and
- communicate economic reasoning in writing, understand similar writing by others and appreciate the diversity of views that may reasonably exist about economic problems.

Course code for this program is ECON.

Economics Honors Program

The honors program in economics provides an opportunity for highly motivated majors to undertake individualized research and to graduate with honors (*cum laude*, *magna cum laude*, *summa cum laude*) in economics. Economics majors with senior standing and both economics and overall GPAs of 3.40 or better are eligible to participate. Participants enroll in the economics honors seminars, which provide instruction in research methodology essential to the preparation of the honors thesis. Students interested in the economics honors program should contact the departmental honors advisor during their junior year.

Bachelor's Degree

- Economics - Bachelor of Arts (BA) (p. 270)

Minor

- Economics - Minor (p. 271)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Antman, Francisca Marie (https://experts.colorado.edu/display/fisid_144606)
Associate Professor; PhD, Stanford University

Baranov, Oleg Valeryevich (https://experts.colorado.edu/display/fisid_149617)
Assistant Professor; PhD, University of Maryland College Park Campus

Barham, Tania C.J. (https://experts.colorado.edu/display/fisid_140077)

Zhang, Shuang (https://experts.colorado.edu/display/fisid_151517)
Assistant Professor; PhD, Cornell University

ECON 1078 (3) Mathematical Tools for Economists 1

Teaches mathematical skills and logical thinking for use in economics. Topics include algebra, graphs, functions, and probability. Includes many "Real world" examples and some illustrative computer assignments.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Departmental Category: Quantitative Economics

ECON 1088 (3) Mathematical Tools for Economists 2

Continuation of ECON 1078. Teaches mathematical skills for use in economics. Topics include derivatives, optimization and integration. These skills are used on "real world" problems and illustrated with computer assignments. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admission data and/or CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Departmental Category: Quantitative Economics

ECON 2010 (4) Principles of Microeconomics

Examines basic concepts of microeconomics or the behavior and the interactions of individuals, firms and government. Topics include determining economic problems, how consumers and businesses make decisions, how markets work, and how they fail and how government actions affect markets.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Theory and History of Economic Thought
MAPS Course: Social Science

ECON 2020 (4) Principles of Macroeconomics

Provides an overview of the economy, examining the flows of resources and outputs and the factors determining the levels of income and prices. Explores policy problems of inflation, unemployment and economic growth.

Requisites: Requires prerequisite course of ECON 2010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Theory and History of Economic Thought
MAPS Course: Social Science

ECON 3070 (4) Intermediate Microeconomic Theory

Explores theory and application of models of consumer choice, firm and market organization, and general equilibrium. Extensions include intertemporal decisions, decisions under uncertainty, externalities, and strategic interaction.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or APPM 1350 (all min grade C-). Restricted to students with 22-180 units completed.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 3080 (3) Intermediate Macroeconomic Theory

Introduces theories of aggregate economic activity including the determination of income, employment, and prices; economic growth; and fluctuations. Macroeconomic policies are explored in both closed and open economy models. ECON 3070 and 3080 may be taken in any order; there is no recommended sequence.

Requisites: Requires prerequisite courses of ECON 2020 and ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or APPM 1350 (all min grade C-). Restricted to students with 22-180 units completed.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 3403 (3) International Economics and Policy

Examines national and supranational policies that affect the international economy, with attention to trade barriers, economic nationalism and regionalism, international political economy, exchange market intervention, and international transmission of economic perturbations. Credit given in this course is not included in the calculation of an economics major GPA. May not be taken after either ECON 4413 or ECON 4423.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 2020 (all minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: International Trade and Finance

ECON 3535 (3) Natural Resource Economics

Integrates economic analysis with life science aspects of natural resource systems to develop social policies for use of natural resources. Studies economists' approaches to resources policy analysis and applies them to energy, forestry, fisheries, mineral and water systems. Credit given in this course is not included in the calculation of an economics major GPA.

Equivalent - Duplicate Degree Credit Not Granted: ECON 4535

Requisites: Requires prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Natural Resources and Environmental Economics

ECON 3545 (3) Environmental Economics

Highlights causes of excessive environmental pollution and tools for controlling it through economic analysis, values of preservation and distribution of costs and benefits from environmental protection programs. Credit given in this course is not included in the calculation of an economics major GPA.

Equivalent - Duplicate Degree Credit Not Granted: ECON 4545

Requisites: Requires prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Natural Resources and Environmental Economics

ECON 3616 (3) Employment, Wages and the Future of Work

Examines how automation, globalization and information technology are changing which jobs get done, by whom and how much they pay. Illustrates how basic labor supply and demand theory helps predict the impact of technological progress on occupational composition, income inequality and the nature of work itself. These theoretical tools also guide our search for appropriate public policy responses. Credit given in this course is not included in the calculation of an economics major GPA.

Requisites: Requires a prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are excluded from taking this course. ECON minors are allowed to enrolled.

Additional Information: Departmental Category: Labor and Human Resources

ECON 3784 (3) Economic Development and Policy

Introductory course in Economic Development, designed for non-majors. Students are introduced to the major issues in development economics. Explores empirical, theoretical and policy issues in economic development. Emphasis is placed on the controversial issues in this literature, requiring students to explore competing, and often conflicting, perspectives of these issues.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 2020 (all minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Departmental Category: Economic Development

ECON 3818 (4) Introduction to Statistics with Computer Applications

Introduces statistical methods and their applications in quantitative economic analysis.

Requisites: Requires prerequisite courses of ECON 2010 and 2020 and either ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or APPM 1350 (all minimum grade C-). Restricted to students with 22-180 units completed.

Additional Information: Departmental Category: Quantitative Economics

ECON 4050 (3) Market Design

Develops foundations for the modern market design practices. Economists are increasingly involved in studying and designing practical market mechanisms. Includes topics such as designing efficient matching markets (students to schools, doctors to hospitals), designing auction mechanisms (Google, Facebook, government) and designing market platforms (eBay, Amazon).

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 4060 (3) Choice Theory and Economic Ethics: Good, Bad and Happiness

Critiques how economists model and judge behavior. How we judge is contrasted with other moral philosophies. Economists assume individuals behave in their own best interests. What does this mean and is it true? Looks at research from psychology and neuroscience. Quizzes and a multi-step research paper, designed for students who love to question, research, write and rewrite.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

Recommended: Prerequisite ECON 3080.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 4070 (3) Topics in Microeconomics

Studies utility maximization under uncertainty, risk, game theory, moral hazard, and adverse selection. Applications include insurance markets and the theory of contracts.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 4111 (3) Money and Banking Systems

Discusses money, financial institutions and the monetary-financial system in a modern economy.

Requisites: Requires prerequisite course of ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: Money and Banking

ECON 4211 (3) Public Economics: the Economics of the Government Sector

Focuses on taxation and public expenditures. Topics include economic rationale for government action, economic theory of government behavior, and effects of government policies on allocation of resources and distribution of income.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Public Economics

ECON 4221 (3) Political and Public Choice Economics

Explores decision-making in non-traditional market settings, specifically political market settings, using economic models. We investigate policy outcomes as the product of interactions among individuals in political markets, and analyze how governmental decisions are the result of rational optimizing behavior, even if they do not lead to policies that maximize national welfare.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Public Economics

ECON 4231 (3) Applied Economic Analysis and Public Policy

Applies economic analysis to current issues of public policy. Reviews basic public finance and economic justifications for government action. Examines structure and procedures of Colorado State Legislature. Chooses current legislative issues, reviews relevant economic literature and applies implications through briefing papers and testimony at legislative hearings. Explores the challenges of integrating informed economic analysis into legislative process.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Public Economics

ECON 4242 (3) Urban Economics: The Economics of Cities

Considers the economic forces which drive households and jobs to congregate in metropolitan areas. It then considers the forces within the city which determine how the established cities "look" - how rents vary with location, the distribution of jobs and households within a city, urban sprawl, and the sorting of households between neighborhoods. Finally it considers some government policies relating to land use and housing.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Urban and Regional Economics

ECON 4292 (3) Migration, Immigrant Adaptation, and Development

Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4292 and GEOG 5292

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Urban and Regional Economics

ECON 4309 (3) Economics Honors Seminar 1

For information consult the department's director of honors. Open only to qualified seniors.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course
Departmental Category: Independent Study and Other Courses

ECON 4339 (3) Economics Honors Seminar 2

For information consult the department's director of honors. This course does not count toward major requirements.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 4413 (3) International Trade

Focuses on theories of international trade and its impacts on economic welfare. Analyzes commercial policy, including tariffs, non-tariff barriers, retaliation, regional integration, and factor migration.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: International Trade and Finance

ECON 4423 (3) International Finance

Covers balance of payments; foreign exchange market, income, trade, and capital flows; asset markets adjustment mechanisms; stabilization policies in an open economy; and problems of international monetary systems.

Requisites: Requires prerequisite course of ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: International Trade and Finance

ECON 4504 (3) The New Institutional Economics: Institutions, Contracts and Economic Outcomes

Understand the conceptual tool kit of the New Institutional Economics. The concepts include transaction costs, property rights, credible commitment, and most importantly the roles of formal and informal institutions. We will examine the impact of institutions on contracting and organizations. The goal is to understand how the underlying institutions determine the degree to which societies improve their economic performance.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080, and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Economic History

ECON 4514 (3) Economic History of Europe

Covers evolution of modern economic growth and development in Europe, emphasizing institutional change.

Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Economic History

ECON 4524 (3) Economic History of the United States

Evolution of modern economic growth and development in the U.S. from colonial times to the present emphasizing institutional change.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 (all minimum grade C-).

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: Economic History

ECON 4534 (3) Chinese Economic History in Comparative Perspective

Surveys the economic history of China in a comparative perspective, to understand the history of economic development in China in terms of existing economic theories of growth. The approximate timeline is from the 18th century to the 20th century.

Recommended: Prerequisite ECON 3070.

Additional Information: Departmental Category: Economic History
Departmental Category: Asia Content

ECON 4535 (3) Natural Resource Economics

Analysis of problems associated with socially optimal use of renewable and nonrenewable natural resources over time. Problems of common property resources, irreversible forms of development, and preservation of natural areas.

Equivalent - Duplicate Degree Credit Not Granted: ECON 3535

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 4545 (3) Environmental Economics

Examines the effects of economic growth on the environment; application of economic theory of external diseconomies, cost-benefit analysis, program budgeting, and welfare economics to problems of the physical environment.

Equivalent - Duplicate Degree Credit Not Granted: ECON 3545

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 4555 (3) Transportation Economics and Policy

Provides an overview of the characteristics and structure of transportation markets including aggregate demand, vehicle and mode choice, surface freight and air travel. Explores market failures in the transportation sector including market power and externalities such as pollution, congestion and accidents as well as policies aimed at addressing these issues.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 4616 (3) Labor Economics

Examines the influence of markets, unions, and government on labor allocation and remuneration. Analyzes human capital, discrimination, mobility and migration, productivity, unemployment, and inflation. Compares outcomes under competition with those in a world marked by shared market power and bargaining.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Labor and Human Resources

ECON 4626 (3) The Economics of Inequality and Discrimination

Examines the unique insights available through economic analysis regarding the causes, mechanisms, and consequences of inequality and discrimination. Examines the extent of inequality, the varieties and extents of discrimination, and explores the economic models that suggest explanations.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Labor and Human Resources

ECON 4646 (3) Topics in Health Economics

Growth in health expenditures worldwide over the past three decades has led to an increase in research in health economics and its importance in public policy in developed and developing countries. The purpose of this course is to encourage students to read, think, and do research on issues in health economics. This course will cover issues that are pertinent to the US, other developed and developing countries. It will cover the basics of health economics such as health production functions and the role for government as well as touching on topical issues such as health care reform.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Recommended: Prerequisite ECON 3818.

Additional Information: Departmental Category: Labor and Human Resources

ECON 4697 (3) Industrial Organization and Regulation

Explores neoclassical theory of the firm, the determinants of industrial structure, and the purposes and institutions of public policy to control or maintain a competitive environment.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Industrial Organization

ECON 4717 (3) Economics of Entrepreneurship

Introduces economic analysis of entrepreneurship, its financing, performance and public policy issues. We will investigate in depth the business of venture capital and start-ups. Aims to understand both academic and practical implications from the burgeoning literature on economics of entrepreneurship and private equity.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 (all minimum grade C-).

Additional Information: Departmental Category: Industrial Organization

ECON 4774 (3) Economic Reform in Developing Countries

Explores competing paradigms of economic development, emphasizing the confrontation between the structuralist/dirigiste paradigm and the neoclassical public choice paradigm. Analyzes economic reforms under way in developing countries, including stabilization policy and structural adjustment. Also explores political reforms, including the pluralist revolution and the design of a constitutional framework in developing societies.

Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: Economic Development
Departmental Category: Asia Content

ECON 4784 (3) Economic Development

Explores empirical, theoretical, and policy issues in economic development. Examines topics with reference to the developing countries: income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade, and finance.

Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: Economic Development
Departmental Category: Asia Content

ECON 4794 (3) Economic Growth

Introduces theories explaining why differences in standards of living among countries are so large. Examines a variety of data on historical experiences of economic growth. Surveys recent research on why some countries are so rich and some are so poor, and why some countries grow so quickly and others grow so slowly.

Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: Economic Development

ECON 4797 (3) Antitrust and Regulation

Explores two major branches of Industrial Organization—antitrust and regulation. Focus is on developing qualitative and quantitative skills for the legal-economic analysis of issues and problems across a variety of industries. Case studies are used to illustrate concepts, including mergers, collusive agreements, monopolization, and networks. Individual and group projects help develop advocacy and public speaking skills.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Industrial Organization

ECON 4808 (3) Introduction to Mathematical Economics

Introduces the use of mathematics in economics. Topics include vectors and matrices, differential calculus, and optimization theory, with economic applications.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4818 (3) Introduction to Econometrics

Provides undergraduate economics majors with an introduction to econometric theory and practice. Develops the multiple regression model and problems encountered in its application in lecture and individual applied projects.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4838 (3) Microcomputer Applications in Economics

Teaches basic concepts in Java programming applied to economic models. Development of Web pages and dynamic modeling will be introduced. Students will gain a foundation that can be applied to creating advanced applications relating to analysis of statistical data and custom projects.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4848 (3) Applied Econometrics

Introduces students to the practice of applied regression analysis. Summarizes and reviews the regression technique, explores U.S. census data sources, introduces an advanced statistical software package and provides structured exercises in regression analysis of census data. Concludes with independent research projects analyzing social and economic issues using regression analysis and census data.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4858 (3) Financial Econometrics

Introduces statistical models, estimation and testing procedures used in analyzing financial data for advanced undergraduates. Topics include the modeling of returns, portfolio theory, the capital asset pricing model, options pricing and fixed income securities.

Requisites: Requires prerequisite course of ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (minimum grade C-).

Recommended: Prerequisite ECON 4818.

Additional Information: Departmental Category: Quantitative Economics

ECON 4868 (3) Simulation Modeling in Microeconomics

Computer simulation modeling translates theory into computer code to examine questions numerically; for example, the effects of taxes or emissions permits on welfare and income distribution. We use GAMS (general algebraic modeling system); a version may be downloaded for free. Students must have access to a computer (not needed in the classroom).

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4897 (3) Economics of Organizations

Introduces students to the economic analysis of relationship between firms and incentives within firms. The first part covers classical theories of firm boundaries and contractual relationship between firms. The second part focuses on compensation and incentive issues within firms.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Industrial Organization

ECON 4909 (3-4) Independent Study

Department enforced prerequisites: completion of at least 12 hours of ECON classes and a minimum GPA of 3.00. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 2020 and ECON 3070 or ECON 3080 (all minimum grade C-).

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 4929 (3) Special Topics In Economics

This course number is assigned to upper-level Economics electives that become available on an incidental basis. Refer to the Economics Department for a detailed description of current content. Formerly ECON 4999.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Independent Study and Other Courses
Departmental Category: Asia Content

ECON 4939 (2-6) Internship/Seminar

Offers students the opportunity to integrate theoretical concepts of economics with practical experience in economics-related institutions. The theoretical portion arises from seminars and readings, the practical from activities in organizations related to the economics field. A maximum of 3 credit hours counts toward major requirements. Department consent required.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Economic (ECON) majors or minors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Independent Study and Other Courses

Economics - Bachelor of Arts (BA)

The Department of Economics at University of Colorado at Boulder is recognized as a very high quality research and teaching department.

Economics is a quantitative, policy oriented social science with a highly developed body of theory and a wide range of real-world applications. Economists seek to describe the process by which societies use scarce resources to attain societal goals and predict the consequences of changes in those processes. Theoretical models, understanding of economic and policy making institutions, quantitative analysis, and the examination of data are all part of this field of knowledge.

In general, economists are interested in the economic behavior of individuals. Investigations of the daily decisions that consumers, workers, and firm managers make, as well as the interactions of such economic decisions in markets, is the subject of microeconomics.

Macroeconomics refers to the analysis of economic activity of individuals aggregated over many markets. Some of the specific issues of macroeconomics include economic growth, inflation, recession, and unemployment. Finally, international economics investigates the interrelationships among different economies, and in particular studies the pattern of trade and payments between countries.

Faculty fields of specialization include international trade/finance, natural resource and environmental economics, public economics, urban and regional economics, development economics, labor economics and demography, political economics, economic history, industrial organization/game theory, and econometrics.

Special Emphasis Options

The Economics Department offers four tracks for students who have a relatively high GPA and want to focus their upper-division course work in a specific area of interest. Interested students must have completed at least 6 credit hours of economics course work at CU in order to declare the special emphasis. Students must have completed two out of three intermediate-level courses (ECON 3070, ECON 3080 and/or ECON 3818)

with a minimum of 3.00 GPA in these courses, and must also have a minimum of 3.00 GPA in economics course work at CU by the time of declaration and completion of the special emphasis. Requirements are listed on the economics website at www.colorado.edu/economics (<http://www.colorado.edu/economics>).

Environmental and Natural Resources Emphasis

The environmental and natural resources emphasis is designed for economics majors who are considering careers in fields requiring a thorough understanding of a broad range of issues associated with business practices and public policies addressing natural resource use and environmental quality, including environmental regulation and compliance: energy production and consumption, development of energy transportation, urban, rural and regional infrastructures.

International Emphasis

The international emphasis is designed for students who have an interest in courses with an international perspective both within economics and outside the department. Courses in international trade and finance are combined with selections of international courses in related social science disciplines. This program may be of particular interest to students seeking careers in international business, international organizations, nongovernmental organizations and government agencies.

Public Economics Emphasis

The public economics emphasis is designed for students who have an interest in taking courses with a public policy perspective both within economics and outside the department. Courses in public economics are combined with selections of public policy oriented courses from various social sciences. This emphasis is recommended for students with interests in public policy seeking careers in local, state, national or international agencies.

Quantitative Emphasis

The quantitative emphasis is designed for well-qualified majors with an interest in theoretical and/or applied mathematics. Economics courses in quantitative methods are combined with courses from the Department of Mathematics and the Department of Applied Mathematics. This program may be of interest to students planning to pursue graduate studies in economics or those seeking a career in applied quantitative research.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below with total credit hours required for the major of 37–39.

Required Courses and Credit Hours

Economics Requirements

ECON 2010 & ECON 2020	Principles of Microeconomics and Principles of Macroeconomics	8
ECON 3070 & ECON 3080	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory	7
ECON 3818	Introduction to Statistics with Computer Applications	4
Select one of the following Econometrics:		3
ECON 4818	Introduction to Econometrics	
ECON 4848	Applied Econometrics	
ECON 4858	Financial Econometrics	
Electives in 4000-level ECON courses		12

Acillary Mathematics Requirement

Complete one of the following calculus courses: 3-5

APPM 1350	Calculus 1 for Engineers
ECON 1088	Mathematical Tools for Economists 2
MATH 1300	Calculus 1
MATH 1330	Calculus for Economics and the Social Sciences

Total Credit Hours 37-39

Note: Transfer students majoring in economics must complete at least 12 credit hours of upper-division economics courses at CU Boulder.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in economics, students should to the extent feasible and in consultation with their economics advisor, follow the "plan of study grid" and declare economics as a major by the beginning of the second semester.

Course	Title	Credit Hours
First Year		
Fall Semester		
ECON 2010	Principles of Microeconomics	4
Mathematics Requirement for Economics (3-5): Per ALEKS/AP results		3-5
CORE (3)		
CORE (3)		
Elective or MAPS (3): If needed		
		Credit Hours 7-9
Spring Semester		
ECON 2020	Principles of Macroeconomics	4
Mathematics Requirement for Economics (3-5): If needed		
CORE (3): Content area of study		
CORE (3): Content area of study		
Elective or MAPS (3): If needed		
		Credit Hours 4
Second Year		
Fall Semester		
ECON 3070	Intermediate Microeconomic Theory	4
ECON 3818	Introduction to Statistics with Computer Applications	4
CORE (3): Natural Science		
Elective (3)		
		Credit Hours 8

Economics - Minor

The Department of Economics at University of Colorado Boulder is recognized as a very high quality research and teaching department.

Economics is a quantitative, policy oriented social science with a highly developed body of theory and a wide range of real-world applications. Economists seek to describe the process by which societies use scarce resources to attain societal goals and predict the consequences of changes in those processes. Theoretical models, understanding of economic and policy making institutions, quantitative analysis, and the examination of data are all part of this field of knowledge.

In general, economists are interested in the economic behavior of individuals. Investigations of the daily decisions that consumers, workers, and firm managers make, as well as the interactions of

such economic decisions in markets, constitute the subject of microeconomics. Macroeconomics refers to the analysis of economic activity of individuals aggregated over many markets. Some of the specific issues of macroeconomics include economic growth, inflation, recession, and unemployment. Finally, international economics investigates the interrelationships among different economies and, in particular, studies the pattern of trade and payments between countries.

Faculty fields of specialization include international trade/finance, natural resource and environmental economics, public economics, urban and regional economics, development economics, labor economics and demography, political economics, economic history, industrial organization/game theory, and econometrics.

A minor is offered in economics. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students pursuing an individually structured major or who are pursuing a major in distributed studies will not be eligible to earn a minor in economics.

Required Courses and Semester Credit Hours

Completion of the minor requires a total of 20 credit hours in economics.

Required Courses

ECON 2010 & ECON 2020	Principles of Microeconomics and Principles of Macroeconomics	8
ECON 3070 & ECON 3080	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory	7

Electives

Electives in upper-division ECON courses		6
Total Credit Hours		21

NOTE: Students must complete at least one 4000-level course as an upper-division elective. ECON 3818 and equivalent substitutes are **not** allowed to count as an upper-division elective.

All course work applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA for all minor degree course work must equal 2.00 or higher.

Students will be allowed to apply no more than 9 credit hours, including 6 upper-division credit hours, of transfer work toward a minor. If transferred course work includes replacements for ECON 2010 or ECON 2020 that are fewer than a combined 7 credit hours for both courses, an additional upper-division elective will be added to the requirements for a minor.

Students may elect to take the 3000-level ECON courses that are designed for non-economics majors (e.g., ECON 3403, ECON 3535, ECON 3545, ECON 3616, and ECON 3784).

ECON 3070, ECON 3080 and all 4000-level ECON courses require a prerequisite of Calculus. Students may take the following courses to meet this prerequisite: ECON 1088; or MATH 1081; or MATH 1300; or APPM 1350.

English

The undergraduate degree in English emphasizes knowledge and awareness of:

- canonical and non-canonical works of English and American literature
- the history of British and American literature

- literary theories, including recent theoretical developments
- the social and historical contexts in which the traditions developed

In addition, students completing the degree in English are expected to acquire the ability and skills to:

- analyze literary texts;
- interpret texts on the basis of such analysis;
- relate analyses and interpretations of different texts to one another; and
- communicate such interpretations competently in written form.

The undergraduate degree in creative writing emphasizes knowledge and awareness of:

- literary works, including the genres of fiction, poetry, playwriting and screenwriting, and the major texts of contemporary writers
- literary history, including the origins and development of genres, major writers of the past and the role of the writer in society
- literary analysis, including theories of literary composition and critical theory

In addition, students completing the degree in creative writing are expected to acquire the ability and skills to:

- write in various poetic modes and styles
- write in various fictive styles
- write in various nonfiction styles
- evaluate other students' written work

Course code for this program is ENGL.

Advising

Upon declaring an English major, students are assigned an English advisor. The advisors are available to meet with students by appointment and on a drop-in basis. The advisors monitor and evaluate student progress in completing the arts and sciences core curriculum and major requirements, and certify students for graduation. The department encourages students to meet with their primary advisor at least once each semester to update their student file and ensure that they are making satisfactory progress in meeting the core and major requirements.

Departmental Honors

Students interested in pursuing a special program leading to graduation with departmental honors should confer with the associate chair for undergraduate studies as soon as possible, but definitely no later than the beginning of spring term in their junior year. For additional information on departmental honors, visit <http://www.colorado.edu/english/undergraduates>.

Students Who Contemplate Teaching

Sheets listing the curriculum required for a teaching license for secondary schools may be obtained in Education 151. Since fulfilling requirements for both education and English makes a very tight schedule, students should seek early advising to complete their college requirements. For additional information, visit teaching licensure (p. 575).

Undergraduate English Awards and Prizes

The Alex McGuiggan Scholarship

The Alex McGuiggan Scholarship was established in spring 2010 to recognize the achievement of an undergraduate English major studying creative writing with a preference for students whose strength is in writing poetry. The scholarship was established in memory of Alex McGuiggan, an English major at the University of Colorado Boulder.

The Curtis Michael Gimeno Memorial Scholarship

This scholarship benefits students with a creative writing emphasis who exemplify promise of talent in communicating through the written language. The scholarship was generously established by Donna Jorgenson Farrell in memory of and as a legacy to her son, Curtis Michael Gimeno, who enjoyed writing.

The Dick Shahan CU Boulder Undergraduate Writing Competition

Created by English alumnus Dick Shahan, this scholarship is open to all CU Boulder undergraduate students. Students can use their imaginations and demonstrate their writing skills in different genres while celebrating Boulder.

The Gentian Ascension Scholarship

This scholarship is a variable annual award established to benefit an undergraduate student who exhibits a past that demonstrates overcoming academic obstacles and shows budding talent as a writer.

The Harold D. Kelling Essay Prize

The Kelling prize is a variable cash award for the best essay on literature submitted by an undergraduate currently enrolled in the university. The essay must have been written for an English class at CU Boulder.

The Joanne Easley Arnold Award

The Joanne Easley Arnold English Scholars Fund is a two-year award designed to recognize and provide financial and intellectual support to a top English major in honor of the donor, Joanne Easley Arnold, who was a dean with the university.

The Jovanovich Imaginative Writing Prize

The Jovanovich prize is an annual award for excellence in poetry, fiction, playwriting or nonfiction prose.

The Katherine Lamont Scholarship

The Lamont scholarship is a variable annual award to a continuing English major in recognition of sustained excellence and exceptional scholarly performance in the major.

Bachelor's Degree

- English - Bachelor of Arts (BA) (p. 283)

Minors

- Creative Writing - Minor (p. 283)
- English - Minor (p. 283)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

ENGL 1001 (3) Freshman Writing Seminar

Provides training and practice in writing and critical thinking. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Arts and Sciences majors only.

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Undergraduate Writing
MAPS Course: English

ENGL 1191 (3) Introduction to Creative Writing

Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or ENGL 2051. May not be repeated. Not open to graduate students.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 1210 (3) The Novel

Explores the many possibilities of the novel, or, the novel as possibility, and emphasize that formal and aesthetic innovation is not peripheral to the novel's development but central to its influence and existence. Focuses on the elements of fiction in order to develop an aesthetic and literary appreciation of this complex art form.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Literature and Language

ENGL 1220 (3) From Gothic to Horror

Explores literature in the Gothic mode and aesthetic and critical theories related to modern "horror" genres or their precursors. Introduces literary-critical concepts (such as notions of abjection, repression and anxiety) that developed alongside this branch of literature. Students read canonical works in British and American traditions while reflecting on notions of popular or marginalized literature.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 1230 (3) Environmental Literature

Introduces students to the tradition of nature writing dating from Romanticism through realist and experimental contemporary literary texts. Students will study key terms and concepts related to the environment such as anthropocentrism, bioregionalism, eco-cosmopolitanism, environmental justice, deep ecology, and posthumanism. They will apply them to different literary genres toward developing critical analyses and environmental readings.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 1260 (3) Introduction to Women's Literature

Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution.

Equivalent - Duplicate Degree Credit Not Granted: WGST 1260

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: General Literature and Language

ENGL 1340 (3) Mysticism and the Jewish American Literary Tradition

Explores the mystical tradition within Judaism from ancient times to the present. With roots in the Hebrew Bible, Jewish mysticism is one of the oldest forms of mysticism and has had an influence on some of the greatest philosophical traditions of western civilization.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1234

Grading Basis: Letter Grade

Additional Information: Departmental Category: American Literature

ENGL 1420 (3) Poetry

Introduces students to how to read a poem by examining the great variety of poems written and composed in English from the very beginning of the English language until recently.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 1500 (3) Masterpieces of British Literature

Introduces students to a range of major works of British literature, including at least one play by Shakespeare, a pre-20th century English novel, and works by Chaucer and/or Milton.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 1600 (3) Masterpieces of American Literature

Enhances student understanding of the American literary and artistic heritage through an intensive study of a few centrally significant texts, emphasizing works written before the 20th century.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 1800 (3) American Ethnic Literatures

Introduces significant fiction by ethnic Americans. Explores both the literary and the cultural elements that distinguish work by these writers. Emphasizes materials from Native American, African American, and Chicano traditions.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: General Literature and Language

ENGL 2021 (3) Introductory Poetry Workshop

Introductory course in poetry writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B). Not open to graduate students.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 2036 (3) Introduction to Media Studies in the Humanities

Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant reading and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 2036

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 2051 (3) Introductory Fiction Workshop

Introductory course in fiction writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B).

Additional Information: Departmental Category: Undergraduate Writing

ENGL 2058 (3) Twentieth- and Twentyfirst-Century Literature

Surveys the major literary trends in prose and poetry from 1900 to the present in the Anglo-American tradition of modern, postmodern, and contemporary literature. Provides students with a grounding in the major authors and motifs of 20th- and 21st-century in literature in conjunction with political and cultural changes across the periods.

Additional Information: Departmental Category: Critical Studies in English

ENGL 2102 (3) Literary Analysis

Provides a basic skills course designed to equip students to handle the English major. Emphasizes critical writing and the acquisition of basic techniques and vocabulary of literary criticism through close attention to poetry and prose.

Requisites: Restricted to English (ENGL) majors and minors only.

Additional Information: Departmental Category: General Literature and Language

ENGL 2112 (3) Introduction to Literary Theory

Introduces students to a wide range of critical theories that English majors need to know. Covers major movements in modern literary/critical theory, from Matthew Arnold through new criticism to contemporary postmodern frameworks. Required for all English majors.

Requisites: Restricted to English (ENGL) majors and minors only.

Additional Information: Departmental Category: General Literature and Language

ENGL 2115 (3) American Frontiers

Considers the backdrop of the American West in literature, film, photography and computer gaming. Focuses on a range of narratives and images depicting this wide swathe of American geography while simultaneously cultivating close reading skills, digital media analysis and film analysis that will aid in deeper insights at the textual level.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American Literature

ENGL 2503 (3) British Literary History to 1660

Provides a chronological study of great figures and forces in English literature from Beowulf to 1660.

Additional Information: Departmental Category: British Literature to 1660

ENGL 2504 (3) British Literary History after 1660

Provides a chronological study of great figures and forces in English literature from 1660 to the present. Formerly ENGL 2512.

Additional Information: Departmental Category: British Literature after 1660

ENGL 2655 (3) Introduction to American Literature I

Chronological survey of the literature from Bradford to Whitman.

Additional Information: Departmental Category: American Literature

ENGL 2665 (3) Introduction to American Literature 2

Chronological survey of the literature from Whitman to Faulkner. Continuation of ENGL 2655.

Additional Information: Departmental Category: American Literature

ENGL 2707 (3) Introduction to Lesbian, Bisexual, and Gay Literature

Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, transgender and gay writing in English.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 2707

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2717 (3) American Indian Literature

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories and poetry.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2713

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2727 (3) Survey of African American Literature 1

Surveys African American literature from the 17th century through the Harlem Renaissance and Depression.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2737 (3) Survey of African American Literature 2

Surveys African American literature from the Depression to the present.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2732

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2747 (3) Chicana/Chicano and Mexican Literature

Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity and gender relations.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2746

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2767 (3) Survey of Post-Colonial Literature

Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2761

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3000 (3) Shakespeare for Nonmajors

Introduction to Shakespeare. Introduces students to 6-10 of Shakespeare's major plays. Comedies, histories, and tragedies will be studied. Some non-dramatic poetry may be included. Viewing of Shakespeare in performance is often required.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only. English (ENGL) and Humanities (HUMN) majors are excluded from taking this class.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 3005 (3) The Literature of New World Encounters

Explores American literature as a site of cultural intersection between European settlers and indigenous peoples.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3008 (3) Developments in the Novel, Post-1900

Introduces students to the major works, authors and formal trends of the 20th and 21st-century novel. Texts may be drawn from British, American and global literary traditions. Focuses on a specific movement, development, or transformation in the genre post-1900, for instance, modernism, postmodernism, naturalism, realism, postcolonial fiction, historical fiction.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Critical Studies in English

ENGL 3011 (3) Literary Forms and Styles in Post-1900 Literature

Studies special topics in literary forms and styles (e.g. magical realism, naturalism, language poetry, etc.) and also the development of genres (e.g. poetry, drama, digital media, novel) in the 20th- and 21st-centuries. Topics vary each semester. Specially design for English majors. May be repeated for a total of 6 units for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3021 (3) Intermediate Poetry Workshop

Intermediate course in poetry writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 2021 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3025 (3) American Nationalisms

Examines how literature participates in the creation of American national culture and identify. Surveys major political writing and a variety of literary genres, tropes, and themes from early native American tales to the 20th-century literature.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3041 (3) Studies in Fiction and Poetry

Examines literary forms and themes with special emphasis on issues related to the craft of poetry and fiction. This course is taught in conjunction with visiting lectures by practicing writers. Does not count as Creative Writing workshop credit.

Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B).

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3051 (3) Intermediate Fiction Workshop

Intermediate course in fiction writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course ENGL 2051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3060 (3) Modern and Contemporary Literature for Nonmajors

Close study of significant 20th-century poetry, drama, and prose works. Readings range from 1920s to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 3068 (3) Literature in English, 1900-1945

Surveys major literary trends from 1900-1945 in the Anglo-American tradition, including the characteristics of literary modernism. Covers both prose and poetry, as well as the relationship between literature and history to the close of World War II.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Critical Studies in English

ENGL 3078 (3) Literature in English, 1945-Present

Explores major literary and theoretical trends in the Anglo-American tradition after 1945.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Recommended: Prerequisites ENGL 2102 and ENGL 2058.

Additional Information: Departmental Category: Critical Studies in English

ENGL 3081 (3) Intermediate Nonfiction Workshop

Discussion and practical criticism of student work and discussion of relevant works of literary nonfiction.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 2021 or ENGL 2051 (minimum grade B). Restricted to English (ENGL), Humanities (HUMN), Theatre (THTR or TBFA) majors only or Creative Writing (CRW) minor students only.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3088 (3) Major Authors of Post-1900 Literature

Provides an in-depth study of the work of one or two major authors in the Anglo-American tradition after 1900. May be repeated for a total of 9 units for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Critical Studies in English

ENGL 3116 (3) Topics in Advanced Theory

Studies special topics in theory; specially designed for English majors. Topics vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 2112 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3164 (3) History and Literature of Georgian Britain

Provides an interdisciplinary study of England in one of its most vibrant cultural and historical periods. Topics include politics, religion, family life, and the ways contemporary authors understood their world.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: British Literature after 1660

ENGL 3204 (3) Developments in the Novel

Covers the development of the novel.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature after 1660

ENGL 3217 (3) Topics in Gender Studies

Studies special topics in gender studies; specially designed for English majors. Topics vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3226 (3) Folklore

Emphasizes formal study of folk traditions (including tales, songs, games, customs, beliefs, and crafts) within a theoretical framework, using examples from several cultures.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3235 (3) American Novel

Surveys the American novel. Covers the early development of the American novel, its rise in the 19th- and 20th-centuries, and its contemporary expressions. Students will be introduced to theories of the novel, the major movements and authors, as well as the characteristics that define the American novel as unique.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3245 (3) American Poetry

Surveys American poetry from the 17th- to the 21st-century. Includes training in poetic theory, form, and genre, as well as in poetic analysis.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3246 (1-3) Topics in Popular Culture

Studies special topics in popular culture; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3267 (3) Women Writers

Introduces literature by British and American women.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3267

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3300 (3) Literary London

Study the works of a major author, school or period of English literary history in London. Subject rotates each year, with possible topics ranging from medieval to contemporary literature. Course incorporates local sites, landmarks, museums, performances and scholars. Application through the Office of International Education required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 3310 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Formerly ENGL 3312.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3310 and JWST 3310

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Backgrounds to Literature in English

ENGL 3377 (3) Multicultural Literature

Studies special topics in multicultural literature; specially designed for English majors. Topics vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3523 (3) The Renaissance in England, 1500-1600

Selected prose and non-dramatic poetry from Skelton and More through Shakespeare and his contemporaries. Formerly ENGL 4523.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3533 (3) The Renaissance in England, 1600-1700

Selected prose and poetry by Donne, Jonson, Bacon and their successors. Formerly ENGL 4533.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3544 (3) The Restoration and the Eighteenth Century

Surveys main currents in the literature and culture of the long 18th century. Formerly ENGL 4544.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature after 1660

ENGL 3553 (3) Geoffrey Chaucer

Selection of Chaucer's works, including *The Canterbury Tales* and other shorter poems. Includes an introduction to Middle English.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3563 (3) Shakespeare

Shakespeare's poetry and drama.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3564 (3) Romanticism

Surveys British Romanticism, including Blake, Coleridge, Wordsworth, Keats, Shelley, and Byron.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature after 1660

ENGL 3573 (3) Shakespeare in Performance

Focuses on Shakespeare the dramatist through the study of the three Shakespeare plays produced in the summer by the Colorado Shakespeare Festival. In addition to exploring the text, the historical context and performance conventions c. 1600, students meet the CSF teams (professional directors, dramaturgs, designers and actors) of the three plays and the Producing Artistic Director of the CSF.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3583 (3) Milton

Milton's poetry and selected prose.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3593 (3) Major Authors in British Literature before 1660

Focuses on one major author of the medieval or early modern period, such as William Langland, John Lydgate, Edmund Spenser or Ben Jonson. Course content varies with instructor and may include literary influences, contemporary writers, and historical influences as necessary to understanding the writer. May be repeated for a total of 9 units for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3604 (3) The Victorian Era

Surveys main currents of Victorian thought in prose and poetry.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature after 1660

ENGL 3675 (3) Major Authors in American Literature

Provides an in-depth study of the work of one or two major American authors. Explores the range, influences, and development of a writer over his or her life.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3767 (3) Feminist Fictions

Examines a series of literary texts to consider how writers across the world have used fiction to creatively stage and reimagine gender and sexuality. Attends to the formal and narrative techniques by which these texts call attention to the fictionality—and thereby the creative malleability—of gender itself. Some cinematic and performance texts will also be included.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3767

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3796 (3) Queer Theory

Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, transgender and gay literature. Examines relationships among aesthetic, cultural and political agendas, and literary and visual texts of the 20th century.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 3796

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3856 (1-3) Topics in Genre Studies

Studies special topics in genre studies; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3930 (1-6) Internship

Provides academically supervised opportunity for upper-division students to work in public or private organizations on projects related to students' career goals and to relate classroom theory to practice. Department enforced prerequisite: 3.0 GPA and faculty supervision.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Literature and Language

ENGL 3940 (1-3) Service Learning Practicum

Under faculty supervision, students participate in a service project in conjunction with an academic course.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General Literature and Language

ENGL 4003 (3) Introduction to Old English

Introduces students to Old English, the ancient ancestor of Modern English (as Latin is the ancestor of Spanish and Italian, distinct from both). Course will focus on reading knowledge through grammar study and translation, and to a lesser extent on pronunciation. Provides basic parsing and translation skills and an introduction to the history, culture, and literature of Anglo-Saxon England.

Additional Information: Departmental Category: British Literature to 1660

ENGL 4013 (3) Intermediate Old English

Continues development of skills in Old English reading and translation. Translation and literary study of one longer work and a number of shorter related works. Repeatable course rotates on a three-year basis, for instance, year one may focus on Beowulf and shorter heroic elegies; year two may involve prose such as legends and saints' lives; year three may involve religious poetry.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 4003 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: British Literature to 1660

ENGL 4018 (3) Global, Transnational and Postcolonial Approaches to Post-1600 Literature

Studies special topics that focus on transnational and global issues in the 20th- and 21st-century literature. For instance, the emergence of globalization, the impact of cross-cultural exchanges, the increase of migration, or the legacies of imperialism. Topics vary each semester. Specially designed for English majors. May be repeated for a total of 6 units for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4021 (3) Advanced Poetry Workshop

Advanced course in poetry writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course ENGL 3021 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4026 (3) Special Topics in Genre, Media, and Advanced Writing

Studies theoretical and historical approaches to genre, media, and writing at the advanced level.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 4039 (3) Critical Thinking in English Studies

Concerned with developments in the study of literature that have significantly influenced our conception of the theoretical bases for study and expanded our understanding of appropriate subject matter.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite courses of ENGL 2102 and ENGL 2112 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

Additional Information: Departmental Category: Critical Studies in English

ENGL 4048 (3) Modern British and Irish Novel

Studies major figures and trends in the 20th century. Formerly ENGL 4224.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4051 (3) Advanced Fiction Workshop

Advanced course in fiction writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4071 (3) Screenwriting Workshop

Designed to give students practical criticism of their script writing and technical format requirements. Either stage plays or screenplays are studied, as announced.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 3021 or ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4081 (3) Playwriting Workshop

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 3021 or ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4098 (3) Special Topics in the Novel, Post-1900

Explores a special topic in literature written in, or translated into English, post-1900.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Critical Studies in English

ENGL 4113 (3) History and Culture of Medieval England

Explores the major historical, literary, and cultural developments in England from the Anglo-Saxon period through the 15th-century.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: British Literature to 1660

ENGL 4116 (3) Advanced Topics in Media Studies

Studies specialized topics in the history, theory, and practice of media, such as the history of the book, the theory of digital media, and the theory and practice of multimedia forms. Specially designed for English majors. Topics vary year to year.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 4250 (3) Modern and Contemporary Novel

Close study of masterpieces by such novelists as Proust, Joyce, Woolf, Lawrence, Mann, Kafka, and Faulkner.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Literature and Language

ENGL 4277 (3) Topics in Women's Literature

Focuses on areas of research interest in the study of women's literature, such as selected themes or critical issues. Students are expected to contribute original research to the topic under consideration.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4277

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 4286 (3) Folklore 2

Upper-division studies of folk groups, events, texts, and contexts as they reflect traditional knowing-folk perceptions and teachings about the structure and purpose of the universe.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 4287 (3) Special Topics in LGBT Literature

Examines a special topic in LGBT literature, foregrounding an approach that focuses on how same-sex desire is represented in literature.

May explore the rhetorical and ideological depiction of masculinity and femininity; literary representations of inversion, bisexuality, and transgenderism; the social construction of homosexuality and heterosexuality. Specific topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 4287 and WGST 4287

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 4360 (3) Modern Drama

Explores continental, British, and American drama since Ibsen.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Literature and Language

ENGL 4460 (3) Modern Poetry

Selects works of British and American poets from 1900 to the present.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Literature and Language

ENGL 4503 (3) Continental Medieval Literature

Intensive study of the major literary works of the Middle Ages in Europe.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature to 1660

ENGL 4513 (3) British Medieval Literature

Intensive study of the major literary works of the Middle Ages in Britain.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature to 1660

ENGL 4514 (3) Advanced Topics: The Restoration and the Eighteenth Century

Covers advanced topics in the Restoration and Eighteenth-century.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4524 (3) Advanced Topics: Romanticism

Covers advanced topics in British Romanticism. Formerly ENGL 4574.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4583 (3) Elizabeth I and Her Times

Interdisciplinary course explores different aspects of the reign of Elizabeth I: social and political history; literature; theater; music. Explores the role and impact of a female ruler on English culture.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature to 1660

ENGL 4624 (3) Transnational/Historic/Interdiscipline Approaches 1660-1900

Explores a special topic in British literature written between 1660-1900 that crosses traditional divisions of nationality, history, and discipline.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4634 (3) Advanced Topics: The Victorian Era

Covers advanced topics in Victorian literature. Formerly ENGL 4614.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4655 (3) Studies in American Literature to 1900

Extensive study of particular periods and movements in American literature.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 4665 (3) Studies in American Literature after 1900

Extensive study of particular periods and movements in American literature.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 4677 (3) Jewish-American Literature

Explores the Jewish-American experience from the 19th-century to the present through writers such as Sholom Aleichem, Peretz, Babel, Singer, Malamud, Miller, Ginsberg and Ozick. The Jewish experience ranges from the travails of immigration to the loss of identity through assimilation. Formerly ENGL 3677.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4677

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Multicultural and Gender Studies

ENGL 4685 (3) Special Topics in American Literature

Explores a special topic in American literature. May be repeated for a total of 9 units for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 4693 (3) Advanced Topics in British Literature to 1660

Explores a special topic in medieval or early modern literature. May be repeated for a total of 9 units for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature to 1660

ENGL 4697 (3) Special Topics in Multicultural and Ethnic American Literature

Provides advanced in-depth study of literatures written by ethnic American authors. Texts may be drawn from a range of African-American, Chicano/a, Latino/a, Asian American, Native American or Indigenous literature traditions. Topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4692

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 4717 (3) Native American and Indigenous Studies Capstone Seminar

Engages a wide range of NAIS methodologies with a series of case studies. Focuses on print, visual, and digital texts encompassing wide swathe of Eurowestern disciplines, while seeking to recuperate and restore Indigenous epistemic practices within our scholarship. Refines students' skills in intellectual debate in the spirit of shared inquiry and challenges research and writing skills.

Requisites: Requires prerequisite course of ETHN 1023 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 4820 (3) Honors Seminar

Prepares prospective honors students to write honors theses. Focuses on sharpening the skills needed to write a successful thesis, including research techniques and the ability to evaluate and respond to secondary materials. Required for Honors in English Literature.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course
Departmental Category: General Literature and Language

ENGL 4830 (3) Honors Thesis

Students accepted to English Departmental Honors are enrolled in this course.

Additional Information: Arts Sciences Honors Course
Departmental Category: General Literature and Language

ENGL 4840 (1-3) Independent Study---Upper Division

Creative writing.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: General Literature and Language

ENGL 4850 (1-3) Independent Study---Upper Division

Literature/language.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: General Literature and Language

Creative Writing - Minor

Minor Program in Creative Writing

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students majoring in English, literature or creative writing track, cannot declare a creative writing minor. Students are subject to those minor requirements in effect at the time they formally declare the minor.

Completion of the minor requires 18 credit hours, at least 9 of which must be upper-division.

Required Courses and Credit Hours

Required Courses

ENGL 1191	Introduction to Creative Writing	3
ENGL 3041	Studies in Fiction and Poetry	3
Four creative writing workshops, taken in progressive order		12
Total Credit Hours		18

Students declare the creative writing minor with the help of an academic advisor. Three hours of transfer workshop credits can be applied with department approval. Students should ideally declare no later than the second semester of their junior year.

In order to take workshops beyond the 2000-level, students must declare the creative writing minor or the creative writing major track. Each workshop may be taken three times for credit, except for ENGL 1191. All students completing the creative writing track must take and complete a 4000-level writing workshop. Students may not take two poetry or two fiction writing workshops in the department in the same semester. Students must satisfy all prerequisites in sequence with a grade of B or better before moving on to the workshop at the next level.

English - Minor

Minor Program in English Literature

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students majoring in English, literature or creative writing track, cannot declare a literature minor. Students are subject to those minor requirements in effect at the time they formally declare the minor.

Completion of the minor requires 18 credit hours with grades of C- or better, at least 12 of which must be upper-division.

Required Courses and Credit Hours

Required Courses

ENGL 2102	Literary Analysis	3
One additional ENGL course at the 2000-level or above		3
Two ENGL courses at the 3000-level or above		6
Two ENGL courses at the 4000-level or above		6
Total Credit Hours		18

Students may not apply creative writing courses toward the literature minor, and this includes ENGL 3041 Studies in Fiction and Poetry. Students must maintain at least a 2.00 (C) GPA in all CU Boulder ENGL courses.

Students may apply no more than 9 credit hours of transfer work, including no more than 6 upper-division credit hours, towards a minor. This is a college residency rule for an 18-credit-hour minor.

English - Bachelor of Arts (BA)

The English department offers two undergraduate major concentrations culminating in the English Bachelor of Arts (BA). These programs overlap so that all English majors learn the skills of literary criticism and the art of excellent writing.

Honors Program

Students interested in pursuing a special program leading to graduation with departmental honors should confer with the associate chair for undergraduate studies as soon as possible, but definitely no later than the beginning of spring term in their junior year.

Requirements

The English department offers two undergraduate major tracks culminating in the English Bachelor of Arts (BA). Students must complete the general requirements of the College of Arts and Sciences and one of the two tracks listed below.

A minimum of 12 credit hours of upper-division course work for the English major must be completed on the Boulder campus. English courses taken at other colleges must be evaluated by the Department of English. Courses taken in other departments (except approved cross-listed courses) normally do not count toward the English major. English courses taken on a pass/fail basis do not fulfill major requirements. Independent study credit hours cannot fulfill a major requirement unless that requirement is not being offered or available within the year that the student graduates.

Note: For the Advanced Placement examination in English literature and composition, students will receive credit for ENGL 1500 for an exam score of 4 or 5.

Literature

Students must complete the major requirements in effect at the time they formally declare the major. A minimum of 36 credit hours must be earned in the Department of English, 18 of which must be upper division. Requirements may be fulfilled by taking specific courses designated by the Department of English.

Required Courses and Credit Hours

Required Courses

ENGL 2102	Literary Analysis	3
ENGL 2112	Introduction to Literary Theory	3
One course from each of the following:		15
British Literature to 1660		
British Literature, 1660-1900		
American Literature		
Studies in Ethnicity, Race, Disability, Gender and Sexuality		
Literatures in English, 1900 to Present		
Two courses from: Genre, Media and Advanced Writing		6
ENGL 4039	Critical Thinking in English Studies	3
Two required elective courses in English		6

Optional Electives

In addition to the 36 credit hours required for the major, another 9 credit hours may be taken, for a maximum of 45 credit hours in English	9
Total Credit Hours	45

Creative Writing

Students are subject to those major requirements in effect at the time they formally declare the major.

A minimum of 36 credit hours must be earned in the Department of English, 18 of which must be upper division.

Required Courses and Credit Hours

Required Courses

ENGL 2102	Literary Analysis	3
ENGL 2112	Introduction to Literary Theory	3
One course from either of the following:		3
British Literature to 1660		
British Literature, 1660-1900		
One course from one of the following:		3
American Literature		
Studies in Ethnicity, Race, Disability, Gender and Sexuality		
Literatures in English, 1900 to the Present		
One course from: Genre, Media and Advanced Writing		3
ENGL 4039	Critical Thinking in English Studies	3
Six creative writing workshops taken in progressive order, three of which must be upper division, including one at the 4000-level ¹		18
Optional Electives		
In addition to the 36 credit hours required for the major, another 9 credit hours may be taken, for a maximum of 45 credit hours in English		9
Total Credit Hours		45

¹ The sequence of creative writing workshops must begin with ENGL 1191 and proceed through the 2000-level, 3000-level and 4000-level workshops.

Students declare the creative writing track when declaring their English major with the help of an academic advisor. Students should declare no later than the second semester of their junior year. In order to take workshops beyond the 2000-level, students must declare the creative writing track or the creative writing minor. Each workshop may be taken three times for credit, except for ENGL 1191. All students completing the creative writing track must take and complete a 4000-level writing workshop. Students may not take two poetry or two fiction workshops in the department in the same semester. Students must satisfy all prerequisites in sequence with a grade of B or better before moving on to the workshop at the next level.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in English, students should meet the following requirements:

- No later than the beginning of the second semester, declare the English major and begin course work in the major.

- By the end of the fourth semester, successfully complete one-third of the credit hour requirements for the major. For literature track majors, this includes ENGL 2102, an English elective and any 2000-level course for the major. For creative writing track majors, this includes ENGL 2102, ENGL 1191, and ENGL 2021 or ENGL 2051, as well as formal declaration of the Creative Writing track.
- By the end of the sixth semester, successfully complete two-thirds of the credit hour requirements for the major, including ENGL 2112.
- By the end of the eighth semester, successfully complete the remaining major requirements, including ENGL 4039.

Environmental Studies

The Environmental Studies program at CU Boulder is a hub for facilitating interdisciplinary collaboration in environment and sustainability. The program nurtures interdisciplinary academic training for undergraduate and graduate students, provides guidance for students with career aspirations in environment and sustainability venues, promotes diverse professional education experiences, fosters fundamental and applied research, forms meaningful connections with communities beyond the university, and integrates innovative, interdisciplinary programs unified by the themes of environment and sustainability.

Course code for this program is ENV5.

Bachelor's Degree

- Environmental Studies - Bachelor of Arts (BA) (p. 288)

Certificate

- Renewable and Sustainable Energy - Certificate (p. 290)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bhattacharya, Atrayee (https://experts.colorado.edu/display/fisid_156320)

Instructor; PhD, Harvard University

Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562)

Associate Professor; PhD, University of California-Santa Cruz

Carrico, Amanda R. (https://experts.colorado.edu/display/fisid_153054)

Assistant Professor; PhD, Vanderbilt University

Ciplet, David (https://experts.colorado.edu/display/fisid_156064)

Assistant Professor; PhD, Brown University

Collinge, Sharon Kay (https://experts.colorado.edu/display/fisid_107088)

Professor; PhD, Harvard University

Dilling, Lisa (https://experts.colorado.edu/display/fisid_138024)

Associate Professor; PhD, University of California-Santa Barbara

Doak, Daniel Forest (https://experts.colorado.edu/display/fisid_151963)

Professor; PhD, University of Washington

Hale, Benjamin Slater (https://experts.colorado.edu/display/fisid_141456)

Associate Professor; PhD, SUNY at Stony Brook

Hartter, Joel N (https://experts.colorado.edu/display/fisid_154043)
Associate Professor; PhD, University of Florida

Hinckley, Eve-Lyn (https://experts.colorado.edu/display/fisid_147806)
Assistant Professor

Litt, Jill S. (https://experts.colorado.edu/display/fisid_140636)
Associate Professor; PhD, Johns Hopkins University

Miller, Dale Lee (https://experts.colorado.edu/display/fisid_115748)
Senior Instructor; MA, University of Colorado Denver

Neff, Jason C (https://experts.colorado.edu/display/fisid_117652)
Professor; PhD, Stanford University

Newton, Peter (https://experts.colorado.edu/display/fisid_154466)
Assistant Professor; PhD, University of East Anglia (England)

Pielke, Roger A (https://experts.colorado.edu/display/fisid_104166)
Professor; PhD, University of Colorado Boulder

Ritchie, Liesel A. (https://experts.colorado.edu/display/fisid_145347)
Assoc Research Professor

Rogers, Sarah (https://experts.colorado.edu/display/fisid_142221)
Lecturer

Stockton, Keith Michael (https://experts.colorado.edu/display/fisid_143887)
Instructor; PhD, University of Colorado Boulder

Townsend, Alan Ronald (https://experts.colorado.edu/display/fisid_107584)
Professor; PhD, Stanford University

Wessman, Carol A (https://experts.colorado.edu/display/fisid_100909)
PhD, University of Wisconsin-Madison

White, James (https://experts.colorado.edu/display/fisid_102726)
Professor; PhD, Columbia University In the City of New York

Courses

ENVS 1000 (4) Introduction to Environmental Studies

Surveys environmental studies, examining ecological, socioeconomic, political, aesthetic, and technological factors that influence the quality of life on Earth. Required for ENVS majors.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ENVS 1001 (4) Introduction to Developing Environmental Solutions

Builds on ENVS 1000 to give students greater understanding of how to approach environmental issues and work toward solutions. Integrates all focal areas of ENVS - sciences, policy, values - with greatest emphasis on learning science, data analysis and critical thinking fundamentals. Uses case studies of local issues to provide context for skill building and synthesis.

Requisites: Requires a prerequisite course of ENVS 1000 (minimum grade C-).

Grading Basis: Letter Grade

ENVS 1150 (3) First-Year Writing in Energy, Environment and Sustainability

Provides development of effective writing skills, knowledge and habits for success in the campus culture using topics related to the environmental sciences, energy, sustainability and academic/career interests. Focuses on the processes in rhetoric, emphasizing skills in creative, analytical and critical thinking, as well as research and presentation using digital and "old fashioned" methods and materials.

Requisites: Restricted to Environmental Studies (ENVS) or Environmental Design (ENVD) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Written Communication

ENVS 2000 (4) Applied Ecology for Environmental Studies

Covers how ecological ideas and principles underlie both the problems and solutions of multiple environmental issues. Ecology of environmental concerns ranging from endangered species to global carbon cycling will be reviewed, including perspectives from physiological, behavioral, population, community and ecosystem ecology. Fulfills intermediate natural science requirement for Environmental Studies major.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 2040 and EBIO 2640

Recommended: Prerequisites ENVS 1000 and a course in introductory statistics and two courses in introductory biology or physical geography.

ENVS 2001 (3) Topical Seminar in Environmental Studies

Serves as an introductory seminar to topics in environmental studies. Topics are diverse and include such areas as climate and conflict, food production, land use change, and other emerging areas in environmental studies.

Grading Basis: Letter Grade

ENVS 2100 (2-4) Topics in Applied Environmental Studies

Covers a variety of topics not currently offered in the curriculum: offered depending on instructor availability and student demand. Fulfills application requirement in Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 2840 (1-6) Independent Study

Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum.

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 3001 (3) Sustainable Solutions Consulting

Introduces students to green design, industrial ecology, and life cycle analysis. Students use basic techniques of environmental auditing to analyze the CU Boulder campus. Fulfills application requirement for Environmental Studies major.

Requisites: Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

Recommended: Requisite any two-semester science sequence.

ENVS 3020 (3) Advanced Writing in Environmental Studies

Offers training in critical thinking and analytical writing skills appropriate to upper-division classes. Writing assignments integrate the subject matter of different topical areas. Fulfills writing requirement for Environmental Studies major.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

Recommended: Prerequisite ENVS 1000.

Additional Information: Arts Sci Core Curr: Written Communication

ENVS 3022 (3) Climate Politics and Policy

Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics and develop their own sense of how to judge the success of climate policies. Fulfills intermediate social science requirement in Environmental Studies Major.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3022

Recommended: Prerequisite ENVS 1000 or GEOG 1972.

ENVS 3030 (3-4) Topics in Environmental Social Sciences

Covers a variety of topics that may include human ecology, environment and society, and quantitative environmental social science. Offered depending upon instructor availability and student demand. Fulfills intermediate social science requirement for Environmental Studies major. Not repeatable for credit.

Recommended: Prerequisite ENVS 1000.

ENVS 3031 (3) Energy and Human Behavior

Examines why people behave the way they do as it relates to energy use and support for energy/climate policy. Addresses questions such as: what motivates people to conserve energy? Why don't people invest in energy efficiency, even when it saves them money? How do you promote pro-environmental behavior? Fulfills intermediate social science requirement for ENVS major.

Recommended: Prerequisite ENVS 1000.

Grading Basis: Letter Grade

ENVS 3032 (3) Environment, Media and Society

Examines how mass media influence our society, specifically with regard to environmental issues and outcomes. Focuses on media influence over environmental politics and policy, environmental public opinion, popular culture, and environmental/scientific knowledge. Fulfills intermediate social science requirement for Environmental Studies major.

Recommended: Prerequisite ENVS 1000.

ENVS 3040 (4) Conservation Biology

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 3040

Recommended: Prerequisite EBIO 2040 or EBIO 2640.

ENVS 3064 (3) Environmental Political Theory

Examines environmental discourses as conceptual means for theorizing environmental politics, and applies normative political theories to contemporary environmental policy issues. Considers the roles of political actors (individuals, groups, the state) in defining and addressing environmental problems on local, national, and global levels.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3064

Additional Information: Arts Sci Core Curr: Ideals and Values

ENVS 3070 (3) Energy and the Environment

Examines contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Includes some basic physical concepts and principles that often constrain choices. No background in physics is required.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 3070

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ENVS 3100 (2-4) Topics in Applied Environmental Studies

Covers a variety of topics not currently offered in the curriculum; offered depending upon instructor availability and student demand. Fulfills application requirement for Environmental Studies major.

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 3103 (3) Applied Environmental Studies: Mining in Four Corners

Explores mining related issues that have pronounced impact on the environment, economy and politics of the Four Corners region. Students apply their basic knowledge of environmental science, policy and values toward the understanding of and productive discourse about the conflicts and opportunities brought about by the mining industry in the Four Corners region. Course includes a seven day field trip, visiting mining and reclamation sites in New Mexico, Utah and Colorado. Fulfills application requirement for Environmental Studies majors.

Recommended: Prerequisite ENVS 1000 and one year natural science.

ENVS 3140 (3) Environmental Ethics

Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 3140

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

ENVS 3173 (3) Creative Climate Communication

We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 3173 and THTR 4173

Recommended: Prerequisite ENVS 1000.

ENVS 3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 3434

Requisites: Requires prerequisite courses of CHEM 1113 or CHEN 1211 and CHEM 1221 (all minimum grade D-).

ENVS 3520 (3) Energy and Climate Change: An Interdisciplinary Approach

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3520

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite a two-course sequence in any natural science.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ENVS 3525 (3) Intermediate Environmental Problem Analysis: Topical Cornerstones

Engages students in in-depth study of a topic such as climate change, energy, natural resources or sustainability. Through lectures, discussions, readings and activities, students will become conversant with how science, policy and values are integrated in environmental problem solving, and develop their own sense of how to critically engage with proposed solutions. Fulfills cornerstone requirement for Environmental Studies Major. Recommended corequisite: ENVS 3020.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 3600 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3601 and ATOC 3600

Recommended: Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ENVS 3621 (3) Energy Policy and Society

Examines how society makes decisions about energy, and how these decisions affect the environment and the economy. Uses tools from policy analysis, economics, and other disciplines to build an in-depth understanding of energy's role in U.S. contemporary society. Fulfills Cornerstone requirement of ENVS majors. Recommended corequisite: ENVS 3020.

Recommended: Prerequisites ENVS 1000 and ENVS 3070 or PHYS 3070.

ENVS 3640 (3) Data Analysis for Global Environmental Affairs

Develops data analysis techniques for global environmental data including demographic, economic, agricultural, fisheries and energy sectors. Designed to support the development of basic and intermediate data analysis skills for students in the Global Environmental Affairs certificate program. Includes hands-on exploration of up-to-date global data sets from a variety of sources. Fulfills the application requirement for the ENVS major.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3640

Grading Basis: Letter Grade

ENVS 3800 (3) The Art of Research: The Essential Elements of Research in Environmental Studies

Introduces students to the practice of doing research in environmental studies. Examines how to define a research problem, select methods, design research, construct arguments and evaluate others' research. Aims to familiarize students with the process of doing research and enable them to proceed with confidence in pursuing their own research topics. Recommended for juniors planning to write ENVS honors theses. Fulfills capstone requirement in Environmental Studies major.

Requisites: Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) majors only.

Recommended: Prerequisite ENVS 3020.

ENVS 3930 (1-3) Internship

Relates classroom theory to practice. Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to students' career goals. Fulfills application requirement in Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ENVS 1000.

ENVS 4027 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. The course also focuses on the role that global inequality plays in fostering environmental degradation.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4027

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENVS 4030 (3) Sociology of Climate Change

Examines the human drivers and causes of climate change, the health and security risks it creates and the efforts of societies to mitigate and adapt to its effects.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4030

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENVS 4050 (2-4) Field Methods in Ecosystem Science

Studying the relationships among organisms, physical features, biogeochemistry and humans in ecological communities - this is ecosystem science. This course provides conceptual understanding and practical experience conducting research. Students will pose their own scientific questions, learn several field and lab methods, analyze data and design a project. Upon completion, they will have useful skills for internships, jobs and graduate school. Fulfills application requirement in ENVS major. Department enforced prerequisite: ENVS 1000 or two semesters of natural sciences; such as chemistry, geology or biology.

Grading Basis: Letter Grade

ENVS 4100 (3) Special Topics in Environmental Studies

Various topics not normally covered in the curriculum: offered depending on student demand and specialties of faculty. Applied to specialization requirement for Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ENVS 4120 (4) Special Topics in Environmental Studies

Various topics not normally covered in the curriculum; offered depending on student demand and specialties of faculty. Applies to specialization requirement for Environmental Studies major.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

ENVS 4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4160 and GEOL 4160

Requisites: Requires prerequisite courses of GEOL 3320 or EBIO 3270 and CHEM 1011 (all minimum grade D-).

ENVS 4201 (3) Biometeorology

Introduces this interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4201

Requisites: Requires a prereq course of GEOG 1001 and APPM1340 and 1345 or APPM1350 or ECON1088 or MATH1081 or 1300 or 1310 or 2510 or ANTH4000 or APPM4570 or BCOR1020 or ECON3818 or GEOG3023 or GEOL3023 or PSCI2075 or PSYC3101 or SOCY2061 or 4061 (min grade D-).

ENVS 4340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5340, EBIO 4340 and EBIO 5340

Recommended: Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

ENVS 4795 (3) Field Methods in Zoology and Botany

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4795 and MUSM 5795

ENVS 4800 (3) Capstone: Critical Thinking in Environmental Studies

Examines a specific environmental topic in depth, synthesizing information from complex and controversial issues. Different course sections present different topics. Fulfills capstone requirement for Environmental Studies major.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) or Geography (GEOG) majors only.

Recommended: Prerequisites ENVS 1000 and ENVS 3020.

ENVS 4840 (1-6) Independent Study

Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum.

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 4990 (3) Senior Thesis

Supervised project involving original research. Thesis proposal must be accepted by honors chairman. Open only to Environmental Studies majors with at least a 3.30 GPA. Fulfills capstone requirement in Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

Recommended: Prerequisite ENVS 3020.

Environmental Studies - Bachelor of Arts (BA)

The interdisciplinary environmental studies major is administered through the Environmental Studies Program and draws courses from 16 departments and four colleges on the CU Boulder campus.

The major teaches the integration of science, policy and values as applied to environmental issues. Students acquire an awareness of the complexity of factors relating to human interaction with the environment. They become acutely aware that environmental problems have both human and biophysical components, and gain knowledge of the general principles of human-environmental interaction, global habitability, environmental change and sustainable human societies.

International Bachelor of Arts

The International Bachelor of Arts (IBA) is a joint degree between CU Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in environmental studies, in addition to completing all the current requirements for the BA with a major in environmental studies at the home institution, students must complete one full-time semester of an experiential, customized, international learning experience at the non-home institution.

Requirements

Students must complete:

- the general requirements of the College of Arts and Sciences
- foundational courses in sciences, policy, ethics, economics, writing and math
- 12 credit hours of upper-division course work to specialize in an area of interest
- an internship or field course
- a cornerstone course
- a capstone course

Approved courses that fulfill the major requirements are listed on the program's Curriculum (<http://www.colorado.edu/envs/undergraduate-students/curriculum>) webpage. To explore suggested focus areas and learn how to select courses that align with specific interests, visit the ENVS Guidance Documents (<http://www.colorado.edu/envs/undergraduate-students/curriculum/guidance-documents>) webpage.

Four-Year Plan of Study

Course	Title	Credit Hours
Year One		
ENVS 1000	Introduction to Environmental Studies	4
ENVS 1001	Introduction to Developing Environment Solutions	4
ENVS 1150	First-Year Writing in Energy, Environment and Sustainability	3

One mathematics course, such as MATH 1150, in preparation for statistics or calculus.	3-5
One course to fulfill the Foreign Language or Geography MAPS requirement.	3-5
One course from the A&S Core Curriculum: Literature & Arts, Historical Context, U.S. Context or Human Diversity.	3
Exploratory courses for other interests.	3-6
Credit Hours	23-30

Year Two

Complete one biology or earth science sequence: 7-8

EBIO 1210 & EBIO 1230 & EBIO 1220 & EBIO 1240	General Biology 1 and General Biology Laboratory 1 and General Biology 2 and General Biology Laboratory 2
---	---

ATOC 1050 & ATOC 1060 & ATOC 1070	Weather and the Atmosphere and Our Changing Environment: El Nino, Ozone, and Climate and Weather and the Atmosphere Laboratory
-----------------------------------	--

GEOG 1001 & GEOG 1011	Environment Systems: Climate and Vegetation and Environment Systems: Landscapes and Water
-----------------------	---

GEOL 1010 & GEOL 1030 & GEOL 1020	Introduction to Geology and Introduction to Geology Laboratory 1 and Introduction to Earth History (or another approved GEOL sequence)
-----------------------------------	--

CHEM 1113 or CHEM 1011 or PHYS 1110 or PHYS 2010	General Chemistry 1 (and lab, if required) or Environn Chemistr 1 or General Physics 1 or General Physics 1	3-5
--	---	-----

PSCI 2106 or PSCI 2116 or PSCI 3206	Introduction to Public Policy Analysis or Introduction to Environmental Policy and Policy Analysis or The Environment and Public Policy	3
-------------------------------------	---	---

ECON 2010	Principles of Microeconor	4
-----------	---------------------------	---

Complete one of the following courses in statistics or calculus: 3-5

EBIO 1010	Introduction to Quantitative Thinking for Biologists
-----------	--

EBIO 4410	Biometry
-----------	----------

GEOG 3023	Statistics for Geography
-----------	--------------------------

MATH 2510	Introduction to Statistics (Fulfills Core: QRMS)
-----------	--

PSCI 2075	Quantitative Research Methods (Fulfills Core: QRMS)
-----------	---

PSYC 2111	Psychological Science I: Statistics
-----------	-------------------------------------

SOCY 2061	Introduction to Social Statistics
-----------	-----------------------------------

MATH 1300	Calculus 1 (Fulfills Core: QRMS)
-----------	----------------------------------

MATH 1310	Calculus, Systems, and Modeling (Fulfills Core: QRMS)	
APPM 1350	Calculus 1 for Engineers (Fulfills Core: QRMS)	
One course from the A&S Core Curriculum: Literature & Arts, Historical Context, U.S. Context or Human Diversity.		3
Exploratory courses for other interests.		3

Credit Hours 26-31

Year Three

ENVS 2000 or EBIO 2040 or CVEN 3434	Applied Ecology for Environmental Studies or Principles of Ecology or Introduction to Applied Ecology	3-4
ENVS 3020	Advanced Writing in Environment Studies	3
ECON 3535 or ECON 3545	Natural Resource Economics or Environmental Economics	3

ENVS 3525 or ENVS 3520 or ENVS 3022 or ENVS 3621	Intermediate Environment Problem Analysis: Topical Cornerstone or Energy and Climate Change: An Interdisc Approach or Climate Politics and Policy or Energy Policy and Society	3
---	---	---

ENVS 3140 or ENVS 3064	Environmental Ethics or Environmental Political Theory	3
---------------------------	---	---

ENVS 3030 or ENVS 3031 or ENVS 3032	Topics in Environment Social Sciences or Energy and Human Behavior or Environn Media and Society	3
One application course. Options include internship or study abroad.		3
1-3 specialization courses.		3-9
Upper-division Literature & Arts course.		3
Courses for other interests: electives, minors, certificates, second majors.		3-6

Credit Hours 30-40

Year Four

Complete one of the following capstones:		3
ENVS 4800	Capstone: Critical Thinking in Environmental Studies	
ENVS 4990	Senior Thesis	
ENST 4150	Energy Policy Project	
1-3 specialization courses		3-9
Complete the A&S Core Requirements.		3-6
Courses for other interests: electives, minors, certificates, second majors.		3-6

Credit Hours 12-24

Total Credit Hours 91-125

Renewable and Sustainable Energy - Certificate

CU Boulder's undergraduate renewable and sustainable energy certificate equips students with skills and knowledge that transcend traditional disciplines and prepare them for careers in this rapidly growing industry. Open to all majors and all colleges, the certificate combines a broad understanding of the business, policy, economic and institutional aspects of energy with students' own strengths and disciplinary skill sets to foster the critical thinkers and problem solvers who will shoulder the monumental challenge of transforming the global energy system.

Requirements

Similar to a minor but spanning multiple departments, the certificate consists of 18 credit hours (9 credits required, 9 credits electives) and culminates in a senior projects course where students work in groups on semester-long energy policy projects, often with outside organizations, government agencies or energy companies.

Applications for the undergraduate certificate program are only accepted in the spring of each academic year, and are due by March 1.

Required Courses and Credit Hours

Required Courses

ENVS 3070	Energy and the Environment	3
or ECEN 1500	Sustainable Energy	
ENVS 3621	Energy Policy and Society	3
ENST 4150	Energy Policy Project	3

Electives

Students must take 9 credits of qualifying electives. Any of the energy-related courses listed on the RASEI website can count as an elective, and students may petition for other relevant courses, such as independent study courses, to count. In addition, the following courses can also count as electives:

ATOC 3500	Air Chemistry and Pollution	3
ATOC 4800	Policy Implications of Climate Controversies	3
ENVS 3100	Topics in Applied Environmental Studies	2-4

This list will be modified when new energy-relevant courses are offered.

See the RASEI web site (<http://www.colorado.edu/rasei/education/undergraduate-energy-certificate>) for more information.

Ethnic Studies

The field of ethnic studies was born of, and is dedicated to, the struggles for social justice for all people. The Department of Ethnic Studies at CU Boulder draws on this tradition of engaged scholarship to examine how race and the interrelated categories of ethnicity, gender, class and sexuality impact the lives of people in the United States and around the globe.

Our interdisciplinary department offers an undergraduate major and minor in ethnic studies. Faculty members engage in a wide variety of research on the cultures, histories, epistemologies, and experiences in African American, Asian American, Chicana and Chicano, and Native American/indigenous peoples in the U.S. and beyond. Their research and teaching address these topics through critical, transnational, queer, decolonial and comparative perspectives.

Course code for this program is **ETHN**.

Study Abroad

The Department of Ethnic Studies encourages students to participate in the study abroad programs offered through the Office of International Education. These programs give students a deeper understanding of culture and attitudes of people of color in other parts of the world and their carryover into the United States. CU-Boulder partners with several study abroad organizations that offer summer, semester and full year programs in many locations around the world, most notably in Africa, Asia and Latin America. Programs of special interest include study abroad in Australia, Bolivia, Cuba, Dominican Republic, Ecuador, Ghana, Japan, Mexico, Morocco, Peru, South Africa, Spain and Taiwan.

For additional information, contact the Office of International Education. Students should always consult with their academic advisor prior to choosing their study abroad program.

Bachelor's Degree

- Ethnic Studies - Bachelor of Arts (BA) (p. 297)

Minor

- Ethnic Studies - Minor (p. 299)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

ETHN 1022 (3) Introduction to Africana Studies

Overview of Africana studies as a field of investigation, its origins and history.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Africana Studies

ETHN 1023 (3) Introduction to Native American and Indigenous Studies

Introduces critical terms, issues, and questions that inform the discipline of American Indian Studies. Examines "historical silences" and highlights how American Indian scholars, poets, and filmmakers use their work to address/redress historical subjects, and represent their Native communities.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: American Indian Studies

ETHN 1025 (3) Introduction to Asian American Studies

Examines the various factors that define minority groups and their positions in American society using Asian Americans as a case study. Emphasizes the perspectives and methodologies of the discipline of ethnic studies.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Departmental Category: Asian American Studies

ETHN 1123 (3) Exploring a Non-Western Culture: Hopi and Navajo

Explores two American Indian cultures, Hopi and Navajo and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic and humanistic viewpoint.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 1120
Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: American Indian Studies

ETHN 2001 (3) Foundations: Race and Ethnicity in the United States

Introduction to race, ethnicity and gender in the United States. Focuses on the five major racialized groups (African Americans, Asian Americans, Chicanas and Chicanos, European Americans and Indigenous peoples) in the U.S. The course design centers on historical and contemporary ideologies and systems that have constructed and continue to define, shape, and impact the significance of race and ethnicity in our economic, political and social lives.

Additional Information: Departmental Category: Crosscultural/
Comparative Studies

ETHN 2004 (3) Themes in American Culture 1

Enables students to explore various themes in pre-1865 American culture. Examines these themes, which vary each year, in their social context.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American Studies

ETHN 2013 (3) Critical Issues in Native North America

Explores a series of issues including regulations of population, land and resource holdings, water rights, education, religious freedom, military obligations, the sociopolitical role of men and women, self-governance, and legal standing as these pertain to American Indian life.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: United States Context
Departmental Category: American Indian Studies

ETHN 2014 (3) Themes in American Culture 2

Enables students to explore various themes in post-1865 American culture. Examines these themes, which vary each year, in their social context.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American Studies

ETHN 2044 (3) Crime and Society

Explores issues related to crime, the criminal justice system, and crime-related public policy. It addresses what we know about crime and how we know it, how our society responds to crime, and how the institutions designed to address crime (police, courts, corrections) function.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 2044

Additional Information: Departmental Category: Crosscultural/
Comparative Studies

ETHN 2203 (3) American Indians in Film

Examines images of American Indians in films produced by, and about, Native peoples. Follows the creation of "the Hollywood Indian" from still-photography to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large and Native communities in particular.

Additional Information: Departmental Category: American Indian Studies

ETHN 2215 (3) The Japanese American Experience

Surveys the Japanese American experience, emphasizing post-WWII developments. Gives attention to intragroup diversity having to do with generation, ethnicity, ecology, and gender.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Asian American Studies

ETHN 2232 (3) Contemporary African American Social Movements

Examines selected case studies of African American collective behavior in a historical context. Emphasizes an in-depth investigation of the continuing African American struggle for social/democratic rights.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Departmental Category: Africana Studies

ETHN 2242 (3) African American Social and Political Thought

Introductory course designed to acquaint students with historical and contemporary thinking, writings, and speeches of African Americans.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav,
Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Contemporary Societies
Departmental Category: Africana Studies

ETHN 2304 (3-4) Introduction to Social Justice

Provides undergraduate students with an understanding of how social systems, primarily the educational and health care systems, are key to understanding injustices and criminalization. Topics covered will include trauma and victimization, food and housing justice, educational justice, physical and mental health justice, mass incarceration, #BlackLivesMatter and restorative justice.

Additional Information: Departmental Category: American Studies

ETHN 2432 (3) African American History

Surveys African American history. Studies, interprets and analyzes major problems, issues and trends affecting African Americans from about 1600 to the present.

Equivalent - Duplicate Degree Credit Not Granted: HIST 2437

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: United States Context
Departmental Category: Africana Studies

ETHN 2536 (3) Survey of Chicana/o History and Culture

Through historical and social scientific studies, novels, autobiographies, testimonies, films, music, and art, this course will provide students a survey of Chicana/o history and culture. Historical overviews of Chicana/o peoples from Mesoamerica; the Spanish Conquest; the historical presence of Chicana/o peoples in the Southwest; the rise of the Chicana/o student and community movements; immigration issues; and the gender, sexuality, and criminalization issues.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: United States Context
Departmental Category: Chicana/o Studies

ETHN 2546 (3) Chicana and Chicano Fine Arts and Humanities

Provides foundation for study of Chicano literature, music, the plastic arts, theatre and film. Also introduces aesthetic and critical concepts and their applications in Chicana and Chicano studies.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Chicana/o Studies

ETHN 2703 (3) American Indian Religious Traditions

Introduces religions of the peoples indigenous to the Americas. Concerns include ritual, mythology and symbolism occurring throughout these cultures in such areas as art, architecture, cosmology, shamanism, sustenance modes, trade and history.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2700
Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Ideals and Values
Departmental Category: American Indian Studies

ETHN 2713 (3) American Indian Literature

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories and poetry.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2717
Additional Information: Departmental Category: American Indian Studies

ETHN 2732 (3) Survey of African American Literature 2

Surveys African American literature from the Deprssion to the present.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2737
Additional Information: Departmental Category: Africana Studies

ETHN 2746 (3) Chicana/Chicano and Mexican Literature

Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity and gender relations.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2747
Additional Information: Departmental Category: Chicana/o Studies

ETHN 2761 (3) Survey of Post-Colonial Literature

Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2767
Additional Information: Departmental Category: Crosscultural/
Comparative Studies

ETHN 3015 (3) Asian Pacific American Communities

Covers the concepts, methods, and theories commonly used in community research, as well as substantive information on selected Asian/Pacific American communities. Emphasizes the ethical/political dimensions of community studies.

Recommended: Prerequisite ETHN 1025 or ETHN 2001.
Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Core Curr: United States Context
Departmental Category: Asian American Studies

ETHN 3024 (3) Introduction to Critical Sports Studies

Learn to think in an informed and critical way about sports in society. Examine the socio-cultural significance of sports as it relates to topics such as youth, social class, race/ethnicity, gender, identity, and intercollegiate athletics. Readings, class discussions, videos, and guest speakers will help expand our understanding of this important social phenomenon.

Additional Information: Departmental Category: Crosscultural/
Comparative Studies

ETHN 3026 (3) Women of Color: Chicanas in U.S. Society

Critically explores the Chicana experience and identity. Examines issues arising from the intersection of class, race, and gender. Focuses on controversies surrounding culture and gender through an analysis of feminism and feminismo.

Recommended: Prerequisite ETHN 2001 or ETHN 2536.
Additional Information: Departmental Category: Chicana/o Studies

ETHN 3044 (3) Race, Class, Gender, and Crime

Overview of race, class, gender and ethnicity issues in offending, victimization and processing by the justice system. Examines women and people of color employed in the justice system.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3044 and
WGST 3044

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/
Comparative Studies

ETHN 3101 (3) Selected Topics in Ethnic Studies

Intensive examination of a particular topic, theme, issue, or problem in ethnic studies as chosen by the instructor.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/
Comparative Studies

ETHN 3102 (3) Selected Topics in African American Studies

Intensive examination of a particular topic, theme, issue, or problem concerning the African American presence, as chosen by the instructor. Sample offerings could include African American Pop Culture, the Civil Rights Movement, or other African American issues.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 1022 or ETHN 2001.

Additional Information: Departmental Category: Africana Studies

ETHN 3103 (3) Selected Topics in American Indian Studies

Examines a particular topic, theme, issue, or problem in American Indian Studies.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001 or ETHN 2203.

Additional Information: Departmental Category: American Indian Studies

ETHN 3104 (3) Selected Topics in American Studies

Critically examines American identity and experiences, past and present, focusing on ethnicity, gender, popular culture, and political culture.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: American Studies

ETHN 3105 (3) Selected Topics in Asian American Studies

Intensive examination of a topic or issue affecting Asian Americans, such as the Japanese American internment during World War II, or Asian American social movements or community organizations.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 1025 or ETHN 2001.

Additional Information: Departmental Category: Asian American Studies

ETHN 3106 (3-6) Selected Topics in Chicana and Chicano Studies

Intensive examination of a particular topic, theme, issue, or problem in Chicana and Chicano studies as chosen by the instructor.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001 or ETHN 2536.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 3136 (3) Chicana Feminisms and Knowledges

Provides insight into the present socioeconomic condition of Chicanas and the concept of feminismo through interdisciplinary study of history, sociology, literary images, and film portrayals.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3135

Recommended: Prerequisite ETHN 2001 or ETHN 2536.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Chicana/o Studies

ETHN 3201 (3-4) Multicultural Leadership: Theories, Principles and Practices

Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of western and non-western theories and practices. Community service required.

Equivalent - Duplicate Degree Credit Not Granted: INVS 3100

Recommended: Prerequisite ETHN 2001.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Crosscultural/Comparative Studies

ETHN 3212 (3) Introduction to Hip Hop Studies

Examines critical questions posed by hip hop culture. Accentuated in this course are hip hop's contributions to the political-economic, philosophical, and sociological study of race, racism, sexism and sexuality. Examines the ways in which hip hop, as a new social phenomenon, cultural force and aesthetic form, have influenced contemporary American and global culture.

Recommended: Prerequisite ETHN 1022 or ETHN 2001.

Additional Information: Departmental Category: Africana Studies

ETHN 3213 (3) American Indian Women

Explores the experiences, perspectives, and status of American Indian women in historical and contemporary contexts. Examines representations of Indigenous women in mainstream culture. Emphasizes the agency of American Indian women-their persistence, creativity, and activism, especially in maintaining Indigenous traditions.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3210

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite ETHN 1023 or ETHN 2001 or WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: American Indian Studies

ETHN 3252 (3) African American Urban History

Fosters a better understanding and appreciation of the role African Americans have played in the evolution and shaping of urban America. Employs techniques of urban studies to more effectively assess the many dimensions, subtleties, and insensitivities of life in the city. S. and Afro-American history.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 1022 or ETHN 2001 and a working knowledge of U.

Additional Information: Departmental Category: Africana Studies

ETHN 3301 (3) Elements of Religion

Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 3300

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3314 (3) Violence Against Women and Girls

Focuses on aspects of the victimization of women and girls that are "Gendered" - namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class, and sexuality in gendered violence.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3314 and WGST 3314

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3403 (3) Indigenous Rights and Red Power Movement

Deals with historical events involving conflicts between the U.S. government and American Indians. Examples include the role of the FBI in the Pine Ridge Sioux Reservation (1972-76) or the 1864 massacre of the Cheyenne and Arapaho Indians in Colorado territory. Additional courses may relate to tribal governments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 1023 or ETHN 2001.

Additional Information: Departmental Category: American Indian Studies

ETHN 3501 (3) Theory/Methods/Writing in Ethnic Studies

Preparation for empirical inquiry in Ethnic Studies. Emphasizes philosophy of social science and cultural studies. Students engage rigorous, theoretical concepts to understand research methods. Prepares students for writing a lengthy, cogent research paper.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Ethnic Studies (ETHN) majors only.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3575 (3) Japanese American Internment: Critical Thinking in Sociocultural Diversity

Offers a historical overview of the Japanese American experience in the United States. Introduces and explores fundamental issues inherent in the study of human beings from the perspective of cultural social difference.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 1025 or ETHN 2001.

Additional Information: Departmental Category: Asian American Studies

ETHN 3671 (3) People of Color and Social Movements

People of color the world over are struggling for sovereignty, independence, civil and human rights, food security, decent wages and working conditions, healthy housing, and freedom from environmental racism and other forms of imperialism. Course analyzes and brings alive these struggles.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 2001.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Crosscultural/Comparative Studies

ETHN 3692 (3) African Am Music: Fr Spirituals and the Blues to Rap/Hip Hop Soul

Offers an overview of the origins and evolution of African American music. Guides students through the musical history, as well as the social, political and cultural history, of the spirituals, blues, ragtime, jazz, gospel, freedom songs, rhythm and blues, rock and roll, soul, funk, disco, techno, house, rap and hip hop soul.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites ETHN 1022 and ETHN 2001 and ETHN 3212.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Africana Studies

ETHN 3701 (3) Gender, Sport and Culture

Critically examines the experiences of girls and women in American sport from a psycho-socio-cultural perspective with a particular emphasis on the constructs of gender, race, class and sexuality and how these constructs both independently and collectively mediate the female sport experience. Explores theories and interpretive frameworks from sport studies, feminist studies, race studies, psychology and cultural studies.

Recommended: Prerequisite ETHN 3024.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3702 (3) African American Sport Experience

Provides a socio-cultural and historical overview of the contributions of African Americans (men and women) to sport in America. Focus is on the macro (patterns of behavior related to large-scale social structures and processes) and micro (behaviors we observe in society, often readily observable in the context of sport and exercise) level of sport analysis.

Recommended: Prerequisite ETHN 3024.

Additional Information: Departmental Category: Africana Studies

ETHN 3704 (3) Athlete as a National Symbol: Nationhood/Nationalism, Sport

Explores the nationalistic terrain of US sport as a way to understand how athletes became a symbol of nationhood and how they are influenced by, and themselves influence, other aspects of US society and culture. Using historical and contemporary examples, this course examines how race, gender, sexuality, economics and the media constructed the nationalistic world of sports today.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3841 (1-6) Undergraduate Independent Study

Consult the Department of Ethnic Studies for information. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5001 and FILM 4001

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4006 (3) Chicana/Chicano Native American Cultures of the U.S.

Theoretically engaged seminar considers intersections of Chicana/o and Native American studies to shape our scholarly understanding of the U.S. and Mexico borderlands. Ethnographies, historical studies, novels, film, and music will be used to understand the processes of Spanish and Euro-American colonization, neocolonialism, identity formation, gender, syncretism, and mestizaje.

Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chicana/o Studies

ETHN 4084 (3) Punishment, Law and Society

Places the current state of punishment in the U.S. in historical and cross national context. Examines key features of penal systems and key sociological theories about the relationship between punishment and society. Department enforced prerequisite: SOCY 1001 or SOCY 1004.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4084

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4102 (3) Special Topics in Africana Studies

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5102

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Africana Studies

ETHN 4106 (3) Special Topics in Chicana and Chicano Studies

Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4106

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chicana/o Studies

ETHN 4116 (3) Spoken Word Latino Poetics and Poetry

This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics-specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizaje of Chicano/a and Latina/o peoples.

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Requisite 6 credits in any ETHN class.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 4213 (3) Indigenous Futurisms: Speculative Genres and Native Tomorrows

Examines how Indigenous authors, artists and filmmakers have recently begun exploring the genres of Horror, Science Fiction and Fantasy. Considers this shift in light of past and present Native realities. Explores why this shift is happening now, how it helps communities and individuals make political statements, address/redress historical subjects and help to build better futures for us all.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: American Indian Studies

ETHN 4232 (3) The Life and Thought of Martin Luther King Jr

An intensive exploration and examination of the life and thought of the Rev. Dr. Martin Luther King Jr. Special emphasis on the stages of his life and their corresponding productions.

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Africana Studies

ETHN 4272 (3) W.E.B. Du Bois Seminar

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5272

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.

Additional Information: Departmental Category: Africana Studies

ETHN 4306 (3) The Chicana and Chicano and U.S. Social Systems

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5306

Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chicana/o Studies

ETHN 4353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5353 and RLST 4353 and RLST 5353

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4504 (3) Ethnic-American Autobiography

Investigates the genre of autobiography in America from its inception to the present. American autobiography has been associated with the invention of national character and, thus, is a site of cultural contestation and identity formation. Its changing form crosses disciplinary lines and provides a site for discourses on ethnicity, class, gender, sexuality, age, family, religion and other American cultural conflicts.

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American Studies

ETHN 4552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4552 and ETHN 5552

Requisites: Requires prerequisite course of ETHN 1022 or ETHN 2001 or ETHN 3212 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Africana Studies

ETHN 4553 (3) Indigenous Representations in the United States

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5553

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 1023.

Additional Information: Departmental Category: American Indian Studies

ETHN 4632 (3) Frantz Fanon Seminar

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5632

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.

Additional Information: Departmental Category: Africana Studies

ETHN 4672 (3) Seminar on the Civil Rights and Black Power Movements

A review of the ideas, events, persons, organizations oriented to the quest for African American social justice in the decade of the sixties.

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Africana Studies

ETHN 4692 (3) Special Topics in Multicultural and Ethnic American Literature

Provides advanced in-depth study of literatures written by ethnic American authors. Texts may be drawn from a range of African-American, Chicano/a, Latino/a, Asian American, Native American or Indigenous literature traditions. Topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4697

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Africana Studies

ETHN 4714 (3) Sport and Social Justice

Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5714

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Recommended: Prerequisite ETHN 3024.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4841 (1-6) Independent Study

Work with an approved faculty sponsor to explore a topic in greater depth. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4951 (3) Senior/Graduate Seminar in Ethnic Studies

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5951

Requisites: Requires prerequisite courses of ETHN 2001 and ETHN 3501 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4961 (3) Honors Thesis 1

Supervised original research project in the field of ethnic studies. The goal is to make substantial progress on a written honors thesis that will be orally defended and submitted to the Honors Program of the College of Arts and Sciences. Department enforced restriction: application and acceptance into the ETHN Honors Program.

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.

Additional Information: Arts Sciences Honors Course

Departmental Category: Crosscultural/Comparative Studies

ETHN 4971 (3) Honors Thesis 2

Supervised original research project in the field of ethnic studies. The goal is to complete progress on a written honors thesis that will be orally defended and submitted to the Honors Program of the College of Arts and Sciences. Department enforced prerequisite: application and acceptance into the ETHN Honors Program.

Requisites: Requires prerequisite courses of ETHN 2001 and ETHN 4961 (all minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.

Additional Information: Arts Sciences Honors Course

Departmental Category: Crosscultural/Comparative Studies

Ethnic Studies - Bachelor of Arts (BA)

The department offers an undergraduate major and minor in ethnic studies.

The department offers courses in five areas of concentration: Africana Studies, American Indian Studies, Asian American Studies, Chicana

and Chicano Studies, and Comparative Ethnic Studies. In addition, they can take classes in the area of Critical Sports Studies (<http://www.colorado.edu/ethnicstudies/undergrad/css.html>).

Concurrent Degree Program BA/MA in Ethnic Studies and Education

The School of Education and Department of Ethnic Studies have partnered to support the 4+1 degree program that reflects each unit's commitment to educational opportunity, diversity, and engaged scholarship examining how race and the interrelated categories of ethnicity, disabilities, language, gender, class, and sexuality impact the lives of people locally and globally.

The new 4+1 Ethnic Studies and Education Concurrent Degree Program offers you an efficient and rigorous path toward earning a Bachelor's Degree in Ethnic Studies and a Master's Degree in Education in five years.

The program invites highly focused ethnic studies students who are interested in applying their critical thinking skills and dedication to social justice to transformative careers in education.

This new program offers two distinct Bachelor and Master's degree pathways:

- BA in Ethnic Studies and an MA in Curriculum & Instruction + teacher licensure for those students in Ethnic Studies who are interested in becoming licensed teachers at either the Secondary English, Social Studies, or Elementary levels.
- BA in Ethnic Studies and an MA in Educational Foundations, Policy and Practice for those interested in policy and curricular issues and developing an interdisciplinary lens in graduate level research.

Admissions

You may apply at the beginning of your junior year or at anytime thereafter prior to completion of your undergraduate studies. Applications are submitted to and reviewed by the School of Education.

Applicants must:

- Have declared Ethnic Studies as a major
- Have completed all MAPS requirements
- Have a minimum GPA of 3.0.

Applications

- Three letters of reference. Two letters must come from professors with whom you have taken Ethnic Studies or Education courses. The third letter may be from a professor, instructor, or supervisor in a community or educational setting
- Personal Statement
- 25 Hours of Youth Experience (for the MA in Curriculum & Instruction + teacher licensure only)

Continuation in the Program

Once admitted, students must:

- Maintain a cumulative GPA of 3.0.
- Complete 6 credits of graduate-level coursework by the second semester of senior year.

The BA/MA has a required 5-year time limit. You must complete all requirements for the BA by the end of your 8th semester and complete all requirements for the MA by the end of your final 5th year.

Contact Us

Completing the 4+1 program requires careful planning. Consult your advisor early to help chart your degree plan.

Contact education advisors at edadvise@colorado.edu or 303-492-6555

Contact ethnic studies advisors at ethnicst@colorado.edu or 303-492-8852

Requirements

In addition to the general requirements of the College of Arts and Sciences, students must complete 33 credit hours of ethnic studies requirements: 12 credit hours of required ethnic studies core classes and an additional 21 credit hours in ethnic studies, 15 credit hours of which must be upper division for a total of 24 upper-division credit hours in the major (required courses mentioned below are included). The 21 credit hours in ethnic studies can be selected from the current ethnic studies course offerings; they may include courses that are cross-listed with the Department of Ethnic Studies, as listed in this catalog.

A grade of C- or better must be received in all courses used to satisfy the major requirements, with an overall average of 2.00 in the major. No more than 6 credit hours may be taken in independent study. No *pass/fail* graded courses may satisfy the 33-credit-hour minimum requirement.

Required Courses and Credit Hours

Required Courses

ETHN 2001	Foundations: Race and Ethnicity in the United States	3
ETHN 3501	Theory/Methods/Writing in Ethnic Studies	3
ETHN 4951	Senior/Graduate Seminar in Ethnic Studies	3
Select one of the following:		3
ETHN 3101	Selected Topics in Ethnic Studies	
ETHN 3102	Selected Topics in African American Studies	
ETHN 3103	Selected Topics in American Indian Studies	
ETHN 3105	Selected Topics in Asian American Studies	
ETHN 3106	Selected Topics in Chicana and Chicano Studies	

Elective Courses

21

A minimum of 21 credit hours in ETHN electives, 15 credit hours of which must be upper division courses in the major. The 21 credit hours in electives can be selected from the current ETHN course offerings; they may also include coursework from outside the department, as approved by the department's curriculum committee and advisor.

Total Credit Hours 33

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in ethnic studies, students should meet the following requirements:

- Declare ethnic studies as their major.
- Complete at least 12 credit hours toward the ethnic studies major requirements by the fourth semester.
- Complete at least 21 credit hours toward the ethnic studies major requirements by the end of the sixth semester.
- Complete ETHN 2001 no later than the fourth semester.
- Complete ETHN 3501 not later than the seventh semester.

- Complete at least one ethnic studies selected topics course selected from the following: ETHN 3101, ETHN 3102, ETHN 3103, ETHN 3105 or ETHN 3106 no later than the eighth semester.
- Complete ETHN 4951 no later than the eighth semester.

Ethnic Studies - Minor

The minor emphasizes engaged scholarship that examines how race and the interrelated categories of ethnicity, gender, class, and sexuality impact the lives of people in the United States and around the globe.

Declaring a Minor

To declare a minor, please pick up the required form in the Ethnic Studies office in Ketchum 184. Alternately, you may schedule an appointment with our advisor (<http://www.colorado.edu/ethnicstudies/undergrad/advisor.html>).

Requirements

A minor is offered in ethnic studies. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. To obtain the ethnic studies minor, students must:

- Declare a minor in ethnic studies
- Complete 18 credits hours in ethnic studies course work

Required Courses and Semester Credit Hours

ETHN 2001	Foundations: Race and Ethnicity in the United States	3
Complete 15 credit hours from elective courses in the Department of Ethnic Studies. Nine credit hours of the elective courses must be at the upper-division (3000-4000) level		15
Total Credit Hours		18

Film Studies

The Film Studies Program educates students in the history and development of film as an art form and contemporary medium. The curriculum instills an informed analytic awareness of the ways in which film has been used and provides the resources for significant creative exploration of the medium.

The undergraduate degrees in film studies emphasize knowledge and awareness of:

- the major artistic contributions to the evolution of film, from the advent of the moving image to the present;
- the general outlines of world film from the silent period to the present, with emphasis on the historical contributions of major national cinemas; and
- film criticism and film theory.

Students completing either the BA or the BFA degree in film studies are expected to acquire the ability and skills to:

- analyze and interpret films critically;
- communicate such interpretations competently in essay form; and
- make a short creative film or video work (BA Production and BFA only).

NOTE: Admission to any class after the third meeting of the class is contingent on professor permission. The department may drop a student from a class if the student misses the first two classes of the semester.

Course code for this program is FILM.

Bachelor's Degrees

- Film Studies - Bachelor of Arts (BA) (p. 306)
- Film Studies - Bachelor of Fine Arts (BFA) (p. 309)

Minor

- Film Studies - Minor (p. 311)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

FILM 1002 (3) Film Analysis for Non-Majors

Introduces the critical study of film, exploring theoretical, historical and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis, and writing skills. Covers a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture.

Additional Information: Departmental Category: Genre and Movements

FILM 1502 (3) Introduction to Film Studies

Introduces basic media literacy by exploring the technical and aesthetic principles behind the production, analysis and interpretation of films. Explores comprehension and thinking about movies critically as technological, cultural and artistic products. Study of films in different social and historical contexts and discussion of the importance of movies as cultural products.

Additional Information: Departmental Category: Genre and Movements

FILM 2000 (3) Moving Image Foundations I

Introduces students to basic image making technology, aesthetics and methods. Fundamentals of film/video production in Super 8mm film, Digital ProRes 422 and other analog and digital image making, editing and management formats. May emphasize personal, experimental or narrative approaches with individual exercises, according to instructor. Basic competencies include composition, lighting, basic audio, basic editing, studio critique, file management, web upload, etc.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Production

FILM 2002 (3) Recent International Cinema

Familiarizes students with current trends and major directors in international cinema. Students attend specific films screened in class and/or offered in the International Film Series, and read and write about these films.

Recommended: Prerequisite FILM 1502 or 6 hours humanities courses involving critical writing.

Additional Information: Departmental Category: Genre and Movements

FILM 2003 (3) Film Topics

Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Topics

FILM 2004 (3) CU Film Studies Seminar: The Telluride Film Festival

Offers students a unique first-hand understanding of the significance of the film festival circuit in the context of global film culture and scholarship. Students will attend Telluride Film Festival screenings, discussions and Q&A sessions. After the festival, weekly screenings of select films from the previous year's festival offer insight into the festival's influence on box-office and the industry's award season.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intensive and Small Courses

FILM 2005 (3) Form, Structure, and Narrative Analysis

Analyzes the form and structure of narrative, experimental non-narrative, and documentary films. Familiarizes students with the general characteristics of the classic three-act structure, principles of adaptation, form and content of experimental films, structural approaches, and the basic formal, narrative, and rhetorical strategies of documentary filmmaking.

Requisites: Requires prerequisite or corequisite course of FILM 1502 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Workshops

FILM 2010 (3) Moving Image Computer Foundations

Provides students with artistic foundational hands-on experience in integrated use of media software in both the PC and Mac creative imaging making digital working environments. Includes fundamentals in general computer maintenance, creative and practical audio editing, image management and manipulation, and creative moving image practice.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 2105 (3) Introduction to the Screenplay

Explores, through close reading and original student work, the form and structure of the screenplay from the writer's perspective. Students will begin by analyzing structural and character elements of such screenplays as *Chinatown* and *Witness*, then analyze screenplays of their choosing. Students will learn the basics of screenwriting form, then develop and write 10 minutes of an original screenplay. Non-majors admitted with instructor's consent.

Requisites: Requires prerequisite or corequisite course of FILM 1502 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Workshops

FILM 2300 (3) Beginning/Intermediate Filmmaking

Covers basic camera, editing, and splicing techniques for Super-8 film. Equipment is available at the film studies office for a modest rental fee.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Additional Information: Departmental Category: Production

FILM 2312 (3) Film Trilogies

Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's *Apu Trilogy* (India), Krzysztof Kieslowski's *Three Colors Trilogy* (Poland), Francois Truffaut's *Antoine Doinel cycle* (France), and Abbas Kiarostami's *Iran Trilogy* (Iran). Non-majors will need instructor's consent.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Genre and Movements

FILM 2500 (3) Moving Image Foundations II

Instructs students in developing a technical and aesthetic understanding of the principles of analog and digital cinematography. Technical, creative and studio critique emphasis on the Bolex 16mm RX and Black Magic Pocket Cinema cameras, advanced composition, grammar and mechanics of cinema editing, film/digital lighting (exposure, latitude) multi-format origination and file management, non-sync sound techniques, etc.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 2000 or FILM 2300 (all minimum grade C). Restricted to FILM (FILM or FMST) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Production

FILM 2513 (3) Major Asian Filmmakers

Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Non-majors will need instructor's consent.

Requisites: Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: Topics
Departmental Category: Asia Content

FILM 2521 (3) Classics of the Foreign Film: 1960s to Present

Surveys the classics of international cinema from the 1960s to the present. Non-majors will need instructor's consent.

Requisites: Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: History

FILM 2610 (3) Animation Production

Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, cameraless, pixellation, etc.). Students produce exercise films and a final film exploring these techniques.

Requisites: Requires prerequisite course of FILM 2000 or FILM 2300 (minimum grade D-).

Additional Information: Departmental Category: Production

FILM 2900 (3) Lighting

Covers the basics of "why you need lighting", color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory.

Requisites: Requires prerequisite course of FILM 2000 or FILM 2300 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: Production

FILM 3002 (3) Major Film Movements

Historical-aesthetic survey dealing with various styles, movements, genres or national cinemas. Can be taught in conjunction with the appropriate language department. Typical offers are in the French, the German or the Russian films, etc. Also offers detailed approaches to specific styles, subjects or genres: film comedy, melodrama, the Western, women filmmakers, German expressionist cinema, Italian neorealism, etc. Non-majors will need instructor's consent.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Genre and Movements

FILM 3003 (3) Major Film Directors

Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. Non-majors need instructor consent.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Topics

FILM 3004 (3) Alfred Hitchcock: The American Films

Intensive survey of Hitchcock's American films from 1940 (Rebecca) to 1964 (Marnie). We will concentrate on in-depth analysis of the most influential and significant films made by the most important movie director of the Hollywood era. We will pay special attention to Hitchcock's deep understanding of the intricacies of film language, style and form in relation to the themes and subjects that interested him: guilt, sex, gender relations, crime and punishment, "mothers". Non-majors will need instructor's consent.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 3010 (1-3) Film Production Topics

Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of FILM 2000 or FILM 2300 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 3012 (3) Documentary Film

Provides a historical and theoretical introduction to the documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Genre and Movements

FILM 3013 (3) Women and Film

Examines the representation of women both in mainstream movies and in women's counter-cinema that resists traditional form, content, and spectator-text relationships of Hollywood models. Emphasizes work by key women filmmakers such as Margarethe Von Trotta, Lizzy Borden, and Yvonne Rainer, as well as readings in feminist film theory.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Topics

FILM 3030 (3) Cinema Alternative Process

Explores alternative methods of film processing and filmic image manipulation. Through projects, film screenings, lectures and discussions students will learn fine arts approaches to creative control for the moving image. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 2000 or FILM 2300 (all minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite FILM 2500.

Additional Information: Departmental Category: Production

FILM 3032 (3) Stage Tragedy and Film

Presents an aerial survey of the history of Western drama as represented in film: Greek drama, the Elizabethans, Ibsen/Strindberg to O'Neill/Williams, Beckett, etc.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Genre and Movements

FILM 3033 (3) Color and Cinema

Examines color and cinema from historical, technological, aesthetic and theoretical perspectives. Students will be required to complete both creative and scholarly assignments.

Additional Information: Departmental Category: Topics

FILM 3041 (3) Environmental Cinema

Interrogates how fiction and nonfiction filmmakers, writers, cinematographers, and moving-image editors have creatively responded to discoveries made in the field of environmental science. Using books by Rachel Carson and Scott MacDonald as a framework, we will examine a broad spectrum of filmmakers (e.g. Wes Anderson, Todd Haynes, Jennifer Baichwal, Bruce Conner, Percy Smith) alongside the most pressing environmental issues.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Film (FILM or FMST) or Environmental Studies (ENVS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: History

FILM 3042 (3) Horror Film

Serious investigation of the horror film genre as well as its origins in, and relation to, works of romanticist literature (e.g., Poe, Shelley). Issues include: the relation of fantasy and reality; gender in horror film; psychological issues raised by the films; historical issues generated by the genre.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Genre and Movements

FILM 3043 (3) Topics in Critical Film Studies

Prepares students for advanced Film Critical Studies work. Subject matter varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Topics

FILM 3051 (4) Film History 1

Intensive introduction to film history from 1895 to 1945. Topics covered include the beginnings of motion picture photography, the growth of narrative complexity from Lumiere to Griffith, American silent comedy, Soviet theories of montage, German expressionist films, and the transition to sound.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Additional Information: Departmental Category: History

FILM 3061 (4) Film History 2

Starts in 1945 and follows the historical growth and evolution of film aesthetics to the present. Studies Italian neorealist, French new wave, and recent experimental films, as well as the films of major auteur figures such as Bergman, Kurosawa, Fellini, Hitchcock, Bunuel, Antonioni, and Coppola.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 3051 (all minimum grade D-).

Additional Information: Departmental Category: History

FILM 3081 (3) Contemporary American Cinema: 1980 to Present

Examines the relationship between American films from 1980 to the present and their cultural and historical context. Includes films by Bigelow, Fincher, Hardwicke, Lee, Linklater, Lynch, Portillo, Stone and Scorsese. Assumes some film knowledge but is not restricted to majors.

Recommended: Prerequisites FILM 1502 and FILM 3051 and FILM 3061.

Additional Information: Departmental Category: Production

FILM 3104 (3) Film Criticism and Theory

Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3104

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) or Humanities (HUMN) majors only.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 3211 (3) History of Russian Cinema

Surveys Russian cinema in historical and cultural context from early 20th century to the present.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 3211

Requisites: Requires prerequisite course of FILM 1502 or RUSS 3211 (minimum grade D-).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Production

FILM 3301 (3) Contemporary Issues in Russian Film

Examines the representation of contemporary Russian society in noteworthy Russian films of the last 20 years. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 3301

Additional Information: Departmental Category: History

FILM 3400 (3) Cinema Production I

Exploration of creative cinema production through short production and post-production projects. A short final project will be required.

Focuses on the tactics and strategies of independent cinema production, examining a variety of approaches to genre. Explores a range of film and digital technologies.

Requisites: Requires prerequisites courses of FILM 1502 (minimum grade C) and FILM 2000 and FILM 2500 (both minimum grade of B-). Requires corequisite courses of FILM 3515 and FILM 3525. Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 3402 (3) European Film and Culture

Studies the relationships between European film, art and culture. Offered each summer in a different European city (Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips and on-site teaching.

Repeatable: Repeatable for up to 12.00 total credit hours.

Recommended: Prerequisite introductory film and art history courses.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Genre and Movements

FILM 3422 (3) The Hollywood Musical

Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. Proposes a historical, formal and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre's form, structure, and ideology in the context of America's changing social, political and religious values.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Genre and Movements

FILM 3503 (3) German Film Through World War II

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3503

Additional Information: Departmental Category: Topics

FILM 3504 (3) Topics in German Film

Analyzes key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women and the Holocaust. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3504

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 3513 (3) German Film and Society 1945-1989

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3513

Additional Information: Departmental Category: Topics

FILM 3514 (3) German Film & Society After 1989

Introduces post-1989 German culture through film. Emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3514

Additional Information: Departmental Category: Intensive and Small Courses

FILM 3515 (3) Camera Workshop

Focuses on the development of independent cinema production and post-production skills. The instructor must certify students in order to continue with their BFA studies.

Requisites: Requires prerequisites courses of FILM 1502 (minimum grade C) and FILM 2000 and FILM 2500 (both minimum grade of B-). Requires corequisite courses of FILM 3400 and FILM 3525. Restricted to Film (FILM or FMST) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Workshops

FILM 3525 (3) Cinema Editing Workshop

Focuses on the development of independent cinema post-production skills. The instructor must certify students in order to continue with their BFA studies.

Requisites: Requires prerequisites courses of FILM 1502 (minimum grade C) and FILM 2000 and FILM 2500 (both minimum grade of B-). Requires corequisite courses of FILM 3515 and FILM 3400. Restricted to Film (FILM or FMST) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Workshops

FILM 3563 (3) Producing the Film

Focuses on the production process of movie making from idea through distribution, analyzing each of the five phases involved, including the major players, function and problems inherent in each. Emphasizes the critical role the script plays in this process. Designed to give students a "map of the minefield" before venturing out on their own. Offered through Continuing Education.

Additional Information: Departmental Category: Topics

FILM 3603 (3) Sound and Vision

Historical and aesthetic overview of sound in relation to film, ranging from Hitchcock's *Blackmail* to Mailick's *The Thin Red Line*. Pursues issues in sound design, mixing film scores, voiceovers, and film/sound theory in narrative, experimental, and documentary films. Among the filmmakers to be studied are Vertov, Welles, Altman, Brakhage, Lipsett, Eisenstein, Coppola, Scorsese, Stone, Leone, Godard, Nelson. Also explores a limited practicum using Pro Tools for sound design.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Topics

FILM 3620 (3) Experimental Digital Animation

Explores boundaries of traditional animation construction and delve into contemporary animation history. Small projects will involve experimentation with animation techniques that integrate with analog animation, frame-by-frame digital processes and live-action footage. Ideal for students who have taken FILM 2010 or FILM 2610 or FILM 3525. Students familiar with animation and digital imaging or those eager to explore the process are encouraged to enroll.

Additional Information: Departmental Category: Production

FILM 3660 (3) The Postmodern

Analyzes the cultural and critical practices as well as the thought that defines the postmodern period at the end of 20th century.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3660

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: History

FILM 3700 (3) Digital Audio Design

Studies and applies Pro Tools as a post-production audio toolbox. Applied techniques include sound recording, field recording, foley, vocal recording and editing, plug-in generated sound creation, MIDI, basic scoring principles, audio sweetening and audio mixing. Students will be required to complete regular editing assignments in addition to a final soundscape project.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 3900 (1-3) Independent Study (Production)

Limit of 3 credit hours per semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Production

FILM 3901 (1-3) Independent Study (Critical Study)

Limit of 3 credit hours per semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: History

FILM 3920 (3) Professional Seminar

Learning aspects of professional development in the field of cinema. Through workshops and assignments students will learn of the many opportunities found within all areas of production. Guests will help inform the students of professional options and expectations. Topics will include: crew work, fund raising, marketing festivals, low budget filmmaking, and alternative venues. Students may have an internship concurrently with this course.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 2500 (minimum grade D-).

Recommended: Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 3940 (1-6) Film Studies Internship

Provides students with professional internship experiences with film, video, new media production companies, governmental agencies, production units, audio recording studios and new media industries. Students will be responsible for securing their own internship position.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite CU GPA of at least 2.00 and upper-division standing and a 3.00 GPA as a BA or BFA film studies major.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Production

FILM 3990 (1) Film Practicum

Offers creative and technical experience in aspects of film, video and media production for students in the BFA track and BA production emphasis. Students earn credit by working in any number of "crew" positions for Upper Division Production, MFA productions or faculty projects under the supervision of the course instructor.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Production

FILM 4000 (3) Advanced Digital Postproduction

Through projects, discussions and screenings, explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio, and optical effects treatments. Cannot be taken simultaneously with FILM 3400 or FILM 4400.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5000

Requisites: Requires prerequisite courses FILM 1502 and FILM 2000 or FILM 2300 and FILM 2500 and FILM 3400 or FILM 4400 (all minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and ETHN 5001

Requisites: Requires prerequisite course of ETHN 2001 (minimum grade D-).

Additional Information: Departmental Category: History

FILM 4003 (3) Film and Literature

Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5003

Additional Information: Departmental Category: Topics

FILM 4004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4004 and ARTF 5004

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) or Humanities (HUMN) majors only.

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 4005 (3) Screenwriting Workshop: Short Form

A writing intensive course that focuses on the art of the short form screenplay. Students will complete regular writing exercises, presentations, and several short scripts.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 2005 or FILM 2105 (all minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Workshops

FILM 4010 (1-3) Topics in Film Studies-Production

Prepares students for advanced Film Studies production courses. Subject matter varies each semester.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5010

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 2000 or FILM 2300 and FILM 2500 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4013 (3) Film, Photography and Modernism

Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5013

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Topics

FILM 4021 (3) Directing/Acting for the Camera

Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research and papers required.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5021

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: History

FILM 4023 (3) Topics in International Cinema

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5023

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-). Restricted to Film (FILM or FMST) or Fine Arts - Creative Arts (ARTC) majors only.

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Topics

FILM 4024 (3) Advanced Research Seminar

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. Department enforced requisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5024

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites FILM 3051 and FILM 3061.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 4043 (1-3) Topics in Film Studies-Critical Studies

Prepares students for advanced Film Studies critical studies courses. Subject matter varies each semester.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5043

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Topics

FILM 4105 (3) Advanced Screenwriting

Introduces professional screenwriting in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5105

Requisites: Requires prerequisite course of FILM 4005 (minimum grade D-).

Recommended: Prerequisites FILM 3051 and FILM 3061 and an approved writing sample.

Additional Information: Departmental Category: Workshops

FILM 4135 (3) Art and Psychoanalysis

Explores psychoanalytic theory as it relates to our understanding of literature, film and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/libido, dreamwork, etc.), students apply these ideas to works by several artists (e.g., Flaubert, James, Kafka, Hoffmann and Hitchcock).

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4135

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Topics

FILM 4200 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5200 and MCEN 4151 and MCEN 5151

Additional Information: Departmental Category: Production

FILM 4240 (3) Beginning Video Production

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4246 and ARTS 5246

Requisites: Requires prerequisite courses of FILM 2000 and FILM 2500 (all minimum grade D-).

Additional Information: Departmental Category: Production

FILM 4340 (3) Intermediate Video Production

Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4346 and ARTS 5346

Requisites: Requires prerequisite course of FILM 4240 (minimum grade D-).

Additional Information: Departmental Category: Production

FILM 4400 (3) Digital Post-Production Process

Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing. Formerly FILM 3600.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5400

Requisites: Requires prerequisite course of FILM 3525 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4440 (3) Advanced Video Production

Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4446 and ARTS 5446

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of FILM 4340 (minimum grade D-).

Additional Information: Departmental Category: Production

FILM 4453 (3) Elective Affinities: Avant-Garde Film and the Arts

Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music, and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5453

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Additional Information: Departmental Category: Topics

FILM 4500 (3) Cinema Production 2

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production leading to the completion of a BFA thesis project exploring either documentary, experimental, or narrative genres.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5500

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FILM 3400 and FILM 3515 and FILM 3525 (all minimum grade C). Restricted to Film (FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4505 (3) Screenwriting Workshop: Long Form

Creative writing workshop in which students plan and write a feature-length screenplay with emphasis on format, dialogue, characterization, and story.

Requisites: Requires prerequisite course of FILM 1502 and FILM 2000 (all minimum grade D-).

Additional Information: Departmental Category: Workshops

FILM 4600 (3) Creative Digital Cinematography

Explores creative approaches to single camera digital cinematography through short projects, discussions and screenings. Relates creative photography and poetic approaches to the digital camera cinema.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5600

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 2000 or FILM 2300 and FILM 2500 and FILM 4400 or ARTS 4246 or ARTS 5346 (all minimum grade D-). Restricted to Film (FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4604 (3) Colloquium in Film Aesthetics

Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0 or instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5604

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 4959 (3-6) Honors Senior Thesis

For exceptional Film Studies majors who wish to write an honors thesis based on independent research or creative work under the direction of a faculty member.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sciences Honors Course

Departmental Category: Intensive and Small Courses

Film Studies - Bachelor of Arts (BA)

The BA in Film Studies at the University of Colorado Boulder emphasizes the critical study of film as an art form. The critical studies BA is designed to give students a solid knowledge of the history and aesthetics of international film, as well as exposure to the various methodological approaches of cinema studies as an academic discipline. Critical studies courses take a multi-faceted approach comprised of film screenings, readings, and lectures, while students are expected to practice their film analysis skills in writing assignments and class discussion. Like many programs in the Arts and Humanities, the BA Program in Film Studies aims more broadly to teach two fundamental skills: critical thinking and writing ability. These skills are developed in our program specifically through the examination of films, but they are also broadly useful well beyond the realm of film studies. The BA program enrolls approximately 425 majors.

Concurrent Degree Program

BA/MA in Film Studies

The film studies bachelor of arts/master of arts critical studies degree gives highly motivated BA students the opportunity to earn an MA degree using an accelerated undergraduate program in combination with a fifth year of study.

Program Description

The BA/MA degree in film studies is a critical studies track under the auspices of the art MA program. This collaboration between the Film Studies Program and the Department of Art and Art History is an extension of our common interests in visual art. The Film Studies tenured and tenure-track faculty also have graduate faculty standing within Art and Art History.

The BA/MA track prepares students for professional careers in teaching and criticism, from the perspective of innovative critical approaches and in preparation for a PhD track at another university. The aim of the BA/MA film program is to aid in the advancement of the scholarly understanding of film art, with emphasis on theoretical and research approaches and their role in academia. The BA/MA will, therefore, prepare its graduates to assume the responsibilities of the academic study of cinema as one of the fine arts and to pursue careers in teaching, research, curating and the overall advancement of the study of cinema as art.

The program offers studies leading to the MA in the areas of film criticism and theory. Advanced students are encouraged to explore interdisciplinary approaches as well as to enhance their program of study with cognate courses in other departments such as history, comparative literature, anthropology, English, women's studies, ethnic studies, Spanish and Portuguese, French and Italian, Germanic and Slavic languages and literature and others. Film studies offers a broad selection of seminar topics on their current faculty research interests and in response to student demand. The Visiting Film Artist program brings additional distinguished, innovative film and video artists and critics to campus and students are encouraged to register for their seminars.

Admission to the Program

- Admission to the program occurs during the second semester of the junior year. Applicant should have a cumulative GPA of 3.3 and have completed all MAPS deficiencies. All applicants will provide a copy of their (internal) CU transcript. (Please note: Applicant should specify on the on the form that they are applying for the spring term, BA/MA degree, major codes AS-FLM2 and GR-ART). After completing the top portion of the form, the student should make an appointment with the Director, Professor Ernesto Acevedo-Muñoz (www.colorado.edu/filmstudies/ernesto-acevedo-munoz) (<http://www.colorado.edu/filmstudies/ernesto-acevedo-munoz>).
- The sole application deadline is the second Monday in October. Please submit the standard BA/MA application form (http://www.colorado.edu/GraduateSchool/academics/_docs/Concurrentapplication.pdf) with your package. Note: Applicants should specify on the form that they are applying for the spring term, BA/MFA degree, major codes AS-FLM2 and GR-ART2.
- Students will secure the sponsorship and/or advisory commitment of a Film Studies faculty member at the rank of assistant professor or higher. The applicant will include a brief letter or statement from the faculty member attesting to the advisory relationship.
- Applicants will submit a one-page prospectus detailing a possible research topic for an MFA thesis. The prospectus must include a minimum bibliography of 10–15 items.
- "October Surprise": Applicants must successfully complete a writing assignment in the form of a 10–12 page analytical/theoretical or historical argument paper on a film determined by the faculty. Students will pick up a DVD and a "prompt" or question in the Film Studies office at 4 p.m. on the Friday before the application is due. Over the weekend, the applicants must watch the movie, do some research, make an argument, and write the paper, which will be handed in with the application Monday at 9 a.m. The "October Surprise" portion of the application process is designed to have students demonstrate their writing skills and their ability to find, define, and argue a topic in a fairly sophisticated manner for an aspiring master's student.
- Only currently enrolled, University of Colorado Boulder students, may be considered for admission to the program. Transfer students must complete at least 24 credit hours as a degree-seeking student before applying to the program.
- Student enrolled in the BA/MA track cannot pursue a double major or double degree of any kind.

Requirements

No more than 6 credit hours of independent study may be credited toward the major. Students must complete the required film courses with a grade

of C or better. The arts and sciences 18-credit-hour minimum of upper-division credit hours must be met with CU film studies courses.

The Film Studies Program strongly urges the purchase of film and sound media-capable Apple computing systems for those pursuing production classes in the BA degree program (see www.colorado.edu/filmstudies (<http://www.colorado.edu/filmstudies>)).

Required Courses and Credit Hours - Critical Studies

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. The Film Studies Critical Studies Program requires a minimum of 44 credit hours in support of the BA requirements, including film courses and courses taken in other departments.

Literature and the Arts Requirement

In addition to the 6-credit-hour literature and the arts core requirement, Film Studies majors must take an additional 6 credit hours (3 of them upper-division) of literature and the arts core courses to satisfy the degree requirements.	6

- ³ Course may be taken for credit more than once, provided that the topics vary.
- ⁴ Total number of independent study credit hours cannot exceed 6.

Graduating in Four Years with a BA

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in film studies, students should meet the following requirements:

- Declare a film studies major by the beginning of the second semester
- Complete the lower- or upper-division literature and the arts requirement (3 credit hours) and FILM 1502 by the end of the fourth semester.
- Complete the upper-division literature and the arts requirement (3 credit hours) and FILM 3051 and FILM 3061 by the end of the sixth semester.
- Complete 6 critical studies elective credit hours and 6 FILM elective credit hours by the end of the seventh semester (at least 3 of these credit hours must be upper-division credit hours).
- Complete an additional 12 credit hours of critical studies elective courses, including at least three upper-division courses (9 credit hours), and FILM 3104 by the eighth semester.

Film Studies - Bachelor of Fine Arts (BFA)

The BFA is a competitive degree program requiring an application and selection procedure. All students begin their Film Studies career declaring the Bachelor of Arts in Film as their major. Students wishing to declare a BFA in Film Studies—the Production track—as their major must first satisfy specific prerequisites. The mission of the BFA is to prepare artists who will be competitive as independent filmmakers. To that end, a central aim of our curriculum is to help prepare students for advanced graduate degrees beyond the BFA degree.

In addition to acquiring the skills to make creative films and video works, students completing the BFA degree will also acquire the ability to analyze and interpret films critically and to communicate such interpretations competently in essay form.

Admission to the BFA Program

The Film Studies Program educates students in the history and development of film as an art form and contemporary medium. The curriculum instills an informed analytic awareness of the ways in which

film has been used and provides the resources for significant creative exploration of the medium.

The BFA degree is competitive. In order to graduate with a BFA degree, students must first satisfy a number of prerequisites and then submit a formal application to the BFA program at the prescribed time (deadline will be posted each semester on the film studies website). Applicants must have a cumulative GPA at CU Boulder of 2.5 or higher, a FILM GPA of 3.3 or higher and have completed 15 credit hours of FILM coursework, including FILM 1502, FILM 2000 and FILM 2500. Applicants must submit a written application, a writing sample and a sample film. Applicants may also submit one additional "best" example of creative work (see specific admission guidelines for details). Admission into the BFA program is contingent upon approval of the application materials by the BFA committee. Students applying after their fourth semester may apply twice to the BFA; students applying subsequent semesters may only apply once. Complete details on the BFA application procedure are available on the film studies website. Students are required to attend a BFA orientation meeting prior to submitting their application. The program recommends that BFA students purchase film and sound media-capable Apple computing systems (see www.colorado.edu/filmstudies (<http://www.colorado.edu/filmstudies>)).

Students are encouraged to consult with the Film Studies advisor in order to obtain advice and current information.

Requirements

No more than 6 credit hours of independent study may be credited toward the major. Students must complete the required film courses with a grade of C or better.

Students must complete the general requirements of the College of Arts and Sciences as well as the required courses listed below. The Film Studies Program requires a minimum of 65 credit hours in support of the BFA degree requirements.

Required Courses and Credit Hours

Literature and the Arts Requirement

In addition to the 6-credit-hour literature and the arts core requirement, Film Studies majors must take an additional 6 credit hours (3 of them upper division) of literature and the arts core courses to satisfy the degree requirements.	6

Total Credit Hours 65

- ¹ This course is a prerequisite for FILM 2000 and FILM 3051.
- ² Must be taken in chronological order.
- ³ Must receive a B- or higher to continue to the next required production course.
- ⁴ Course may be taken for credit more than once, provided the topics vary.
- ⁵ Both are usually offered through Continuing Education; only one may count toward the film studies degree.
- ⁶ Total number of independent study credit hours cannot exceed 6, and they cannot be used to duplicate regular course offerings.
- ⁷ Course may be taken for credit more than once.
- ⁸ Total number of independent study credit hours cannot exceed 6.

Graduating in Four Years with a BFA

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in film studies, students should meet the following requirements:

- Declare and start the film studies major the first semester freshman year.
- Complete FILM 1502, FILM 2000, FILM 2005 or FILM 2105 and one lower- or upper-division critical studies course for 3 credit hours by the end of the third semester.
- Complete the Literature and the Arts lower- or upper-division requirement (3 credit hours), FILM Foundation Elective (3 credit hours) and FILM 2500 by the end of the fourth semester.
- Note: In order to graduate in four years, a student must apply and be accepted into the BFA program at the end of the fourth semester. See "Admission to the BFA Program" for details of the application process.
- Complete FILM 3051, FILM 3400, FILM 3515, and FILM 3525 by the end of the fifth semester.

- Complete FILM 3061, Digital Elective (3 credit hours), Production Elective (3 credit hours) and FILM 3990 by the end of the sixth semester.
- Complete FILM 4500, 3 credit hours upper division critical studies elective, FILM 3990 by the end of the seventh semester.
- Complete 3 additional credit hours of FILM 4500, FILM 4604, an additional 1 credit hour of FILM 3990 and 3 more credit hours of production electives by the end of the eighth semester.

Film Studies - Minor

The Film Studies minor helps students interested in the study of cinema history, culture and aesthetics, but who are too busy to pursue the full major, the opportunity to develop their interest by acquiring critical and comparative skills and understanding the place and importance of cinema as a cultural and social phenomenon. Students in the minor have access to lower and upper division courses on film history, aesthetics, criticism, social and historical contexts, classical genres and groundbreaking directors from the U.S. and International traditions, acquiring an edge in visual analysis and media literacy.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. To obtain the film studies minor, students must:

- Declare a minor in film studies
- Complete 20 credit hours in film studies course work; requirements including the following:

Required Courses and Semester Credit Hours

FILM 1502	Introduction to Film Studies	3
FILM 3051	Film History 1	4
FILM 3061	Film History 2	4
Complete 9 credit hours from elective courses in the Film Studies Program. Six credit hours of the elective courses must be at the upper-division (3000-4000) level.		9
Total Credit Hours		20

French and Italian

The Department of French and Italian provides instruction in the languages, literatures, cinema, and cultures of France, Italy, and other areas where these languages are spoken.

We offer a wide selection of undergraduate courses (<http://www.colorado.edu/frenchitalian/courses-0>), covering topics ranging from the Middle Ages to Italian-American culture and the Francophone literature of Africa, the Caribbean and the Middle East.

The department offers:

- Majors and Minors in French (<http://www.colorado.edu/frenchitalian/undergraduate/french>) and Italian (<http://www.colorado.edu/frenchitalian/undergraduate/italian>)
- Joint BA/MA (<http://www.colorado.edu/frenchitalian/undergraduate/french/bama>) in French

Study abroad opportunities in French (<http://www.colorado.edu/frenchitalian/study-abroad>) and Italian (<http://www.colorado.edu/>

[frenchitalian/study-abroad](http://www.colorado.edu/frenchitalian/study-abroad)) to help students complete their international experience

Course codes for these programs are FREN and ITAL.

Study Abroad

CU-Boulder offers French study abroad programs in Annecy, Paris, Rennes, Strasbourg and Toulouse, France. In addition, students may study in Quebec, Brussels, Geneva and in the Francophone African nations of Cameroon, Madagascar, Mali and Senegal. CU-Boulder offers Italian study abroad programs in Ferrara, Florence and Perugia, Italy. Students may obtain course-credit equivalences for work done while abroad. For further information about study abroad programs, students may visit departmental advisors or the Office of International Education. Credit hours earned on this program may be applied to the Italian major. Students may also take a summer film class in Rome and/or Paris (in alternate years). This class is taught in English. The Ayer Romance Language Scholarship is available for French and Italian majors who plan to study abroad. The Il Circolo Italiano is also available for Italian majors who will be studying abroad. Both of these scholarships are awarded by the Department of French and Italian.

Students have available courses in French and Italian language, literature and culture. The department has available undergraduate programs in the following:

Bachelor's Degrees

- French - Bachelor of Arts (BA) (p. 319)
- Italian - Bachelor of Arts (BA) (p. 320)

Minors

- French - Minor (p. 320)
- Italian - Minor (p. 322)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

FREN 1010 (5) Beginning French 1

For students with no previous knowledge of French. Presents basic grammar and most commonly used French vocabulary. Introduces students to Francophone culture.

Equivalent - Duplicate Degree Credit Not Granted: FREN 1050

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: French

FREN 1020 (5) Beginning French 2

Continuation of FREN 1010. Completes the presentation of most basic structures and French vocabulary.

Equivalent - Duplicate Degree Credit Not Granted: FREN 1050

Requisites: Requires a prerequisite course of FREN 1010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: French

FREN 1050 (5) Beginning French Review

Covers the material of FREN 1010 and 1020 in one accelerated semester. Intended for students who know some French (i.e., four to five semesters in high school) but do not have skills adequate for 2000-level courses.

Department enforced prerequisite: 2 years of high school French.

Equivalent - Duplicate Degree Credit Not Granted: FREN 1010 or FREN 1020

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: French

FREN 1200 (3) Medieval Epic Through Game of Thrones

Covers the most important works of medieval literature, in English translation. Among the texts studied are the Nibelungenlied, the Song of Roland, and Arthurian romances, including the stories of Lancelot and Guinevere and Tristan and Isolde. Offers a general introduction for nonmajors to medieval literature and society. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1400 (3) Medieval/Renaissance Women Writers in Italy and France

Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 1400

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Human Diversity
Departmental Category: French

FREN 1500 (3) Literature and Politics in the Age of Enlightenment

Introduces political dimensions of 18th century French literature. Surveys political and social preoccupations that manifest themselves across genres (novels, scientific treatises, dialogues, erotic literature, etc.). Examines contributions made by 18th century French writers to the sociological and political imagination of Western tradition. Taught in English.

Additional Information: Departmental Category: French

FREN 1610 (3) How to Be French, 1: The Ancien Regime

Explores medieval and early modern French culture in the widest sense, encompassing masterpieces of French literature, architecture, and visual art as a key to the habits, customs, and practices of everyday life. Major themes are "living and dying," "heroes, villains, and kings," "courtliness, civility, and the art of love," and "crafty little guys."

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1620 (3) How To Be French? 2: Modernity

Introduces students to French culture in its widest sense and in particular to reflect on major social and cultural contradictions inherited from the French Revolution, which still define "Frenchness" today. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1700 (3) Francophone Literature in Translation

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and Canada. Gives special attention to oral tradition, identity, question, and cultural conflict. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Departmental Category: French

FREN 1750 (3) French Colonialism: North Africa and the Middle East

Offers a general introduction to French and Francophone literature and visual arts (painting, photography, film) from the nineteenth century to the present depicting cultures and societies of the Middle East and North Africa. In English with English translations of French texts.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities Arts Sci Core Curr: Human Diversity
Departmental Category: French

FREN 1800 (3) Contemporary French Literature in Translation

Reviews the major philosophical, political, and aesthetic issues in the 20th century French novel and drama. Beginning with existentialist literature, discussion focuses subsequently on the Theatre of the Absurd, the new novel, World War II and the Holocaust, and recent women writers. Taught in English.

Additional Information: Departmental Category: French

FREN 1850 (3) Introduction to French Society and Culture through Cinema

Introduces students to French society and culture through French cinema through films that focus thematically on major historical events (e.g., World War II; student revolts of 1968) and cultural constants of French society (e.g., feminism; colonialism and its aftermath). Taught in English.

Additional Information: Departmental Category: French

FREN 1880 (3) The Zombie in History and Popular Culture

Discusses the emergence of the zombie figure in the Caribbean and its evolution from colonial Haiti to present-day popular culture having passed through Hollywood. Through movies and literary, historical, and scientific documents, students will study critically how this mass-media icon came to represent deep-rooted anxieties about the modern world.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1900 (3) Modern Paris in Literature, Photographs, Paintings and Movies

Introduces the rise of modern Paris from the French Revolution (1789) to today. Studies the physical and sociological changes of the city in terms of architecture and industrialization through French literature, movies, paintings and photographs. Addresses problems due to the magnitude of the city, the growing fear of urban vices, and the dilemma of controlling massive urban populations. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1950 (3) French Feminisms

Introduces students to the central problematics that have defined French feminist studies. This course focuses on the various literary and historical contexts in which core concepts such as female subjectivity and agency, feminist writing and political engagement have arisen and developed in Early Modern and Modern France by looking at multiple media (literary text, film, painting). Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: French

FREN 2110 (3) Second-Year French Grammar Review and Reading 1

A film based curriculum will expand the knowledge of francophone culture and will continue the development of communication skills begun in the first year. This third semester course will review essential beginning grammar before introducing intermediate structures, vocabulary, and cultural/literary readings. Satisfies arts and sciences foreign language requirement.

Requisites: Requires a prerequisite course of FREN 1020 or FREN 1050 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: French

FREN 2120 (3) Second-Year French Grammar Review and Reading 2

Completes the film-based study of intermediate grammar begun in FREN 2110. Continued reading in French literature and culture, with considerable practice in writing and speaking French. Fulfills the Graduate School language requirement for the Ph.D.

Requisites: Requires a prerequisite course of FREN 2110 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 2500 (3) Conversation in French

Puts into practice all that has been learned in the first four semesters of college French. Builds conversational skills and confidence through acquisition of new vocabulary and a review of grammar essential to discussing different aspects of French culture. All work is in French.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3010 (3) French Phonetics and Pronunciation

Improves students' ability to pronounce French correctly. Coursework involves the International Phonetic Alphabet, understanding the differences between pairs of sounds, and recognizing the relationship between spelling and pronunciation. Required of all FREN majors.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3020 (3) French Phonetics Through Musical Performance

Advanced oral practice and interpretation of a French Musical. This course of applied and corrective phonetics concentrates on developing good pronunciation and fluency through song. The course culminates with a public presentation of the musical studied in class.

Requisites: Requires a prerequisite course of FREN 3010 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 3050 (3) French Composition 1

French third-year level composition course. Students practice and write different forms of formal French writing. They also hone their grammar skills and analytical reading of short literature pieces. This course or FREN 3060 is required for all French majors.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3060 (3) French Composition 2

French third year level composition course. Students build on their previous knowledge of formal writing in French and more emphasis is given to argumentative and analytical style of writing. This course or FREN 3050 is required for all French majors.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3100 (3) Introduction to Critical Reading and Writing in French Literature

Study of French literature through close readings of representative examples of major literary forms (poetry, fiction, drama, essay) and through the composition of critical writings in French. Required for French majors.

Requisites: Requires a prerequisite or corequisite course of FREN 3050 or a prerequisite or corequisite course of FREN 3060 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 3110 (3) Main Currents of French Literature 1

Surveys 19th and 20th century French literature. Close reading of selected texts and the principal writers and schools. This course or FREN 3120 are required for all majors.

Requisites: Requires a prerequisite or corequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 3120 (3) Main Currents of French Literature 2

Surveys 19th and 20th century French literature. Close reading of selected texts of the principal writers and schools. This course or FREN 3110 are required for all majors.

Requisites: Requires a prerequisite or corequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 3200 (3) Introduction to Literary Theory and Advanced Critical Analysis

Introduces important aspects of both classical and modern literary theory as an aid to reading and understanding literary texts. Covers theoretical works by figures ranging from Plato and Aristotle to modern French critics such as Barthes, Foucault, and Derrida in conjunction with selected literary works. Offers students more sophisticated means of understanding issues like gender, ethnicity, the roles of both author and reader in constructing meaning, the nature and functions of signs, and the relationship between literature and the larger society. Conducted in English, though French majors are required to read the texts in the original language. Required for students taking honors in French or Italian.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 3500 (3) French Current Events: Conversation and Composition

For students who have spent fewer than four months in a French-speaking environment. Focuses on presentations, debates, discussions, readings and written work.

Requisites: Requires a prerequisite or corequisite course of FREN 3050 or a prerequisite or corequisite course of FREN 3060 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3600 (3) Business French 1

Gives students the tools needed to function in a French-speaking work environment. A culminating project involves creating a business in a francophone country.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3700 (3) French-American Cultural Differences

Through readings, films, discussion and activities, students learn the defining values of their own country, those of France, and key differences between the two cultures. Taught in French.

Requisites: Requires a prerequisite or corequisite course of FREN 3050 or a prerequisite or corequisite course of FREN 3060 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3800 (3) France and the Muslim World

Introduces students to the polemic colonial, social, and cultural interactions of France and Islam. Close attention will be paid to paradigms of identities of one of the major European nations and the Islamic world. Readings and discussion topics for this course cover the social, cultural, and literary depictions of Islamic and French interactions, negotiations, and contradictions. Taught in English. Cannot be used for French major or minor credit.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: French

FREN 4030 (3) Advanced Oral Practice and Interpreting

Concentrates on developing (or preserving) speaking fluency, correct pronunciation, and a good working vocabulary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4110 (3) French Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4120.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of FREN 3110 or FREN 3120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 4120 (3) French Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4110.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: French

FREN 4170 (3) Francophone Literature

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and French Canada. Gives special attention to oral tradition, identity question, and cultural conflict.

Requisites: Requires prerequisite courses of FREN 3100 and FREN 3110 and FREN 3120 (all minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 4250 (3) Medieval and Renaissance Readings

Explores the complex and evolving cultural and historical contexts of medieval and Renaissance French. Introduces the masterpieces of French medieval and Renaissance literature, including the Chanson de Roland and Arthurian romance. Also focuses on the work of Marie de France, Guillaume de Lorris and Jean de Meun, Christine de Pisan, Machaut, Villon, Louise Labe, and the poets of the Pleiade, Rabelais, and Montaigne.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4300 (3) Theatre and Modernity in 17th Century France

Readings of plays by Corneille, Moliere and Racine introduce students to theatre's role as a mirror of the multifarious tensions shaping modern Western experience. Taught in English with English translations.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 4330 (3) Moliere and 17th Century French Comedy

Close readings of farces and comedies of Moliere in context with selected comedies by Corneille, Rotrou and Cyrano de Bergerac and selected satires by Boileau and La Fontaine. Themes include comedy as a form of social criticism and the sociocultural significance of such episodes of Moliere's career as the scandalous quarrels of *L'ecole des Femmes* and *Tartuffe*.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4350 (3) French Enlightenment

Studies fiction, essays, theatre, and philosophical tales. Emphasizes the Enlightenment in France through the texts of its major representatives: Montesquieu, Voltaire, Marivaux, Diderot, and Rousseau.

Requisites: Requires prerequisite courses of FREN 3100 and FREN 3110 and FREN 3120 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4430 (3) Survey of 19th Century French Literature

Examines fiction, poetry and theatre in 19th century France. Focuses on developing and changing literary styles and subject matter throughout the century in historical, philosophical and social context.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3120 (all minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 4470 (3) 20th Century French Theatre and Poetry

Close readings of plays from the turn of the century to the contemporary period introduce the principal themes and techniques of modernist and postmodernist French theatre. Students are encouraged to consider problems commonly evoked by these texts and to compare the positions that each text takes on such problems as the status and uses of language, the function and limits of the theatre and the dialectic of appearance and reality.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4480 (3) 20th Century French Novel

Close readings of novels from the 1930s to the contemporary period introduce the principal themes and techniques of the modernist and postmodernist French novel. Students are encouraged to analyze a variety of questions commonly evoked in these texts, such as the problem of representation, the uses and abuses of writing, the relation of fiction and history and the status of the subject in the world.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4600 (3) Topics in French Film

Covers various topics in the French and some other Francophone cinemas (Belgian, Swiss, Quebecois) from 1895 to the present. Focuses on periods, schools, themes, and directors from Melies to Duras, and the critical approaches by which they are studied. Varies from year to year.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4700 (3) Encountering Animals: contemporary Discourse and the Dialog of Species

Explores Western philosophy and literature recent challenges to species' differences and human privileges and includes contemporary theory, novels as well as movies and other cultural artifacts. Themes include animal representations in today's culture, animal and human bond, animal welfare, post-humanism. Taught in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: French

FREN 4750 (3) Methods of Teaching French and Professional Orientation

Presents current methodology and techniques for teaching foreign language for proficiency. Areas of study include ACTFL guidelines, National Standards, assessment, classroom activities, curriculum, and syllabus design.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: French

FREN 4800 (3) Postmodernist French Novel in Translation

Focuses upon recent innovations in the French novel, and upon the postmodernist literary aesthetic. Students will examine a variety of avant-garde novels, and analyze the kinds of literary experimentation that those novels propose. They will be asked to consider a series of questions concerning the changing nature of literary representation and the status of the novel as a cultural form. Taught in English. Cannot be used for major or minor credit.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: French

FREN 4840 (1-6) Independent Study: Language

Upon consultation only and at the undergraduate level.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: French

FREN 4860 (3) War, Trauma, and Memory: Amnesias, Revisions, and Representations of Traumatic History

Attempts to investigate how extreme historical events (war, genocides, terror attacks) function as "trauma" and how these extreme events are dealt with by personal and collective memory in historical narratives, literary and cinematic fiction, and memorials. Amnesia and other types of historical negations or revisions will be analyzed, along with representations of trauma and the difficulties raised by this memorializing. Taught in English. Cannot be used for major or minor credit.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: French

FREN 4960 (6) High School French Teaching

Offered as part of the supervised student teaching in a secondary school required for state licensure to teach French. These hours do not count toward student hours in the major nor in the maximum departmental hours allowed. Pass/fail only.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: French

FREN 4980 (3) French Senior Honors Thesis

The senior honor thesis is a 40 to 45 page original research paper, written in French, and constitutes a requirement for graduating with departmental honors.

Requisites: Requires a prerequisite course of FREN 3200 (minimum grade D-).

Additional Information: Arts Sciences Honors Course
Departmental Category: French

FREN 4990 (3) Senior Seminar

Preparation of a 15-page research paper in French presented to two members of the department faculty and defended orally in class.

Recommended: Prerequisite at least one course numbered FREN 4100 or above and all third-year requirements and advisor consent.

Additional Information: Departmental Category: French

ITAL 1010 (5) Beginning Italian 1

The four skills of listening, speaking, reading, and writing are progressively developed in a predominantly oral presentation. Grammatical concepts are explained and practiced through dialogues, written exercises, and conversations. The cultural focus is on the personal world and life of students.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 1050

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Italian

ITAL 1020 (5) Beginning Italian 2

Continuation of ITAL 1010, with more difficult grammatical concepts explored. The cultural focus shifts to social and civic areas.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 1050

Requisites: Requires a prerequisite course of ITAL 1010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Italian

ITAL 1050 (5) Fast-Track Italian

Two semesters of beginning Italian in one, for students who have studied other languages or have had previous exposure to Italian.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 1010 or ITAL 1020
Grading Basis: Letter Grade

Additional Information: Departmental Category: Italian

ITAL 1300 (3) La Dolce Vita: Why the Humanities Matter, Italian Style

Introduces students to a critical appraisal of the Humanities in their world. Because the Humanities were rediscovered in the late Middle Ages in Italy, the course explores the Humanities from an Italian-centered perspective, though it broadens the scope of its analysis to make this perspective relevant for students who come from a variety of cultures and backgrounds.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Italian

ITAL 1400 (3) Medieval/Renaissance Women Writers in Italy and France

Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FREN 1400

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Human Diversity
Departmental Category: Italian

ITAL 1500 (3) That's Amore: Introduction to Italian Culture

Introduces students to representations of Italian society that have persisted through the ages. The course readings allow students to better understand how certain stereotypes about Italian society (e.g., Latin lover, Mafia) were born and persist in the present. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Contemporary Societies
Departmental Category: Italian

ITAL 1600 (3) Strategies of Fear: Introduction to Italian Fantastic Literature

Traces the development of the fantastic theme in Italian Literature from its origins (late nineteenth century) to contemporary times. Analyzes the modes of reception and appropriation of non-Italian gothic and fantastic narrative traditions through which Italian writers have subverted the national literary model proposed by realist narrative. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 2110 (3) Intermediate Italian Reading, Grammar, and Composition 1

Enhances the skills learned in the first-year course and develops greater fluency in understanding and speaking. More emphasis is placed on reading and writing through the use of activities featuring cultural themes that present a realistic portrait of contemporary Italy. Taught in Italian.

Requisites: Requires a prerequisite course of ITAL 1020 or ITAL 1050 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language
Departmental Category: Italian

ITAL 2120 (3) Intermediate Italian Reading, Grammar, and Composition 2

Continuation of ITAL 2110. Some reading in Italian literature and culture with considerable practice in writing and speaking Italian. Fulfills the Graduate School language requirement for the Ph.D.

Requisites: Requires a prerequisite course of ITAL 2110 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 2130 (3) Introduction to Literary Analysis

Increases student's ability to read and analyze literary texts by improving vocabulary and terminology. Students read short stories, essays, short plays, and poems to acquire critical skills and improve expression of opinions and arguments in Italian. Taught in Italian.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3015 (3) Advanced Composition 1

Teaches students to write in Italian in a variety of genres, focusing on the creative aspects of writing. Exercises and themes are drawn primarily from current events and culture (i.e., blogging, journaling, essays and films), but also allows students to develop their critical skills in other areas.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3025 (3) Advanced Composition 2: Introduction to Literary Writing

Introduces students to complex forms of writing within Italian studies. Focuses on the analysis of literary genres (e.g., autobiography, essays, short stories) through a step-by-step process that allows students to craft advanced arguments in Italian. Studies will read Italian literary texts and write and revise in workshop format (e.g., peer review, collaborative assignments).

Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Italian

ITAL 3030 (3) Storia dell'arte: Advanced Composition/Conversation 3

Improves vocabulary and fluency in spoken Italian, and competence and confidence in correct and more sophisticated written Italian through the study of the history of Italian art. Exercises and themes focus on Italian Classical, Medieval, Renaissance, and Modern Art.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3040 (3) Italian Conversation Through Cinema

Taught in Italian, the course covers various topics of Italian Cinema from WWII to the present. Focus is on periods, genres, themes, and auteur/directors. Emphasis on review of language structures previously learned and acquisition of new vocabulary to enable students to discuss different aspects of Italian culture, in Italian.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3140 (3) Readings in Italian Literature-20th and 21st Century

Covers a selected reading of major texts, prose, and poetry of 20th and 21st-century literature. Emphasizes critical reading and analysis of modern and contemporary Italian literature in its literary and historical context. Taught in Italian.

Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3150 (3) Readings in Italian Literature-19th Century

Introduces students to 19th century literary history through a selected reading of major texts, prose, and poetry. Emphasizes critical reading and analysis of Italian literature in its literary and historical context. Taught in Italian.

Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3160 (3) Readings in Italian Literature--Medieval and Renaissance

Covers a selected reading of major texts, prose, and poetry of Medieval and Renaissance literature. Emphasizes critical reading and analysis of texts in their literary and historical context. Taught in Italian.

Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4010 (3) Problems in Translation, Advanced Grammar, and Stylistics 1

Emphasizes practice in translating varying types of prose from Italian into English and English into Italian.

Requisites: Requires a prerequisite course of ITAL 2130 or ITAL 3015 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4030 (3) Contemporary Italian Culture, Politics, and the Media

Serves as an introduction to the study of the effect that politics and the media have in shaping Italian culture. Makes use of the World Wide Web for instruction. Taught in Italian. Familiarity with Internet helpful.

Requisites: Requires a prerequisite course of ITAL 2130 or ITAL 3015 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4040 (3) Business Italian Style

Provides an introduction to the Italian way of conducting business, with a close view on the company and its world through learning marketing and producing a real company project for the market. Analyzes topics of international marketing and trade using Italian and American economics websites. Focuses on building cross-cultural bridges between the U.S. and Italy to have smoother business relationships and enable students to participate more easily in joint international working teams.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4140 (3) The Age of Dante: Readings from The Divine Comedy

Focuses on close reading of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4145 or ITAL 4147 or HUMN 4140

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4145 (3) The Age of Dante in Italian

Focuses on close readings of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in Italian.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or ITAL 4147 or HUMN 4140

Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4147 (3) Visualizing Dante's Inferno: A Global Seminar in Florence Italy

Focuses on close reading of Dante's *Inferno*. Examines the specific sites and art in Florence and nearby cities that Dante references in the *Inferno*, as well as visual representations of Hell created both before and after Dante's poem. Taught in English. Offered through the CU Study Abroad Program.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or ITAL 4145 or HUMN 4140

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4150 (3) Boccaccio's Decameron: Tales of Sex and Death in the Middle Ages

Studies Boccaccio's masterpiece, the *Decameron*, as emblematic of the post-Black Plague era in the late Middle Ages. Focuses on the art of storytelling through gendered perspectives to portray the complexity of the Middle Ages. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4150

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4160 (3-5) Italian Literature Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Italian

ITAL 4170 (3) Italian Literature Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Italian

ITAL 4200 (3) Topics in Italian Culture and Civilization from the Origins through the Renaissance

Taught in English. Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Italian

ITAL 4250 (3) History of Modern Italy

Examines the major historical, economic and social factors that have shaped the identity of modern Italy, from the enthusiasm of young patriots during Italy's unification in the 1860s to the discontent and domestic terrorism of the 1960s-1980s. Focuses on Mussolini, the Fascist movement and on World War II, as well as the changing role of women. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4313

Additional Information: Departmental Category: Italian

ITAL 4280 (3) Topics in Italian Cinema

Examines different aspects of Italian cinema from the origins of neorealism to the present. May focus on a particular director, the culture of a specific period, or certain themes (e.g., the representation of women, the relationship between cinema and literature, or socio-aesthetic movements like Futurism or Fascism). Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Italian

ITAL 4290 (3) Italian Culture Through Cinema

Examines the representations of Italian culture through its cinema. Focusing especially on post-World War II cinema, examines how Italian filmmakers have portrayed Italian history and specific aspects of its culture (i.e., Fascism, post-war reconstruction, the Mafia, patriarchy) in the past 50 years. Taught in English.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Italian

ITAL 4300 (3) Multiculturalism in Italy

Focuses on multiculturalism and difference in contemporary Italian society. Readings assigned explore the experience and co-existence of ethnic and religious minorities in Italy. Students will study how specific minorities live in a major Western-European country and will investigate the connotations that the concept of 'multiculturalism' takes in the Italian context.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Italian

ITAL 4350 (3) From Wops to Dons to Movers and Shakers: The Italian-American Experience

Exposes students to the history of Italian immigration to the United States. By studying how Italians and Americans negotiated different ideas concerning identity, traditions and community, it helps students understand how Italians transformed themselves from a despised and marginalized minority into active participants in the success of the United States in the 20th and 21st centuries. Taught in English.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: Italian

ITAL 4500 (4) Italian Theatre

Using theatre as a medium, this course helps students attain a higher level of proficiency in spoken and written Italian. Study of Italian theatre is integrated with acting activities and pronunciation exercises. Culminates in the production of a play. Performance is in Italian and the students participate in the writing of the script. Taught in Italian.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4600 (3) Once Upon a Time in Italy

Examines the evolution of the Italian fairy tale from the 1500s to the 2000s in literature, theater, and film. Considers the tales and their authors in their social-historical context.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4730 (3) Italian Feminisms: Culture, Theory, and Narratives of Difference

Studies Italian women writers, artists and filmmakers. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4730

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Italian

ITAL 4840 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Italian

ITAL 4930 (1-3) Languages Internship for Professions

Offers opportunities to use Italian skills in service to various sectors of the community, including private industry, government, and education.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4980 (3) Italian Senior Honors Thesis

The senior honors thesis is a 40 to 45 page original research paper, written in Italian, and constitutes a requirement for graduating with departmental honors.

Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C-).

Additional Information: Arts Sciences Honors Course
Departmental Category: Italian

ITAL 4990 (3) Senior Seminar

Preparation of a 15-page research paper in Italian presented to two members of the faculty and defended orally in class.

Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C-).

Additional Information: Departmental Category: Italian

French - Bachelor of Arts (BA)

Beyond providing mastery of the language skills (listening, speaking, reading, writing) of modern French needed for all purposes of daily life, the major introduces students to a central tradition of western and world culture. Since the Middle Ages, French literature, thought, taste and art have helped shape the essential experience and self-understanding of humanity at large. Survey courses and upper-division seminars offer a range of exposures to the French cultural past and the far-flung ethnic and national diversity of the French-speaking present. The major explores distinctively French contributions to world culture, such as Arthurian romance, troubadour poetry and Gothic architecture; the love sonnets of the *Pléiade*, the comic novels of Rabelais and the essays of Montaigne; the neoclassical theatre of Corneille, Molière and Racine and the critical philosophy of Descartes and Pascal; the Enlightenment philosophies of Voltaire, Diderot and Rousseau; the psychological refinements of French fiction from Mme de La Fayette to Proust; artistic revolutions like impressionism and surrealism; the renewal of artistic conventions in the Theatre of the Absurd, the New Novel and the cinema of the New Wave; the French-language literature of Africa, Canada and the Caribbean; and the vital presence of French writers in major movements of 20th century thought like existentialism, structuralism, feminism, psychoanalysis and contemporary cultural studies and multiculturalism.

The undergraduate degree in French emphasizes knowledge and awareness of:

- the fundamental outlines of the history of French literature from the Middle Ages to the present;
- significant works of French literature and the literary culture of the French-speaking world;
- the historical context in which particular works were written and the relation between literature and other forms of cultural expression (e.g., art, philosophy, politics, religion);
- contemporary French culture, politics and current events;
- a range of literary genres, their development and reception and relevant critical methodologies; and
- the grammatical structure of modern standard French.

In addition, students completing the degree in French are expected to acquire the ability and skills to:

- speak and understand modern, spoken standard French sufficient for all purposes of daily life and for intellectual discussion in academic settings;
- read and write modern standard French with sufficient fluency and correctness for successful literary or linguistic analysis of French texts;
- analyze and interpret literary texts in terms of style, plot, structure, characters, themes and the use of literary devices;
- communicate such analyses and interpretations simply in French or at a more sophisticated level in English, and discuss a wide range of topics concerning French culture, civilization and current events; and
- follow with reasonable comprehension French broadcasts or film.

Concurrent Degree Program

BA/MA in French

The department also administers a concurrent undergraduate and graduate degree program in French, offering students the opportunity to graduate with a BA and an MA in French in five years. Students interested in this program should consult a college advisor and the associate chair for graduate studies for details. Students should also read the relevant guidelines available in the main department office.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Students wishing to pursue an Honors major should also consult the Honors requirements listed below.

Note: Students undertaking a major in French should expect to have regular conferences with a college advisor to ensure that they are making adequate progress and that requirements are being met in a timely way. The department will not certify majors for graduation when a failure to satisfy requirements is the fault of the student.

A minimum of 30 upper-division credit hours in French must be completed (see below for specific courses). FREN 2120 or its equivalent is the prerequisite for admission to courses required for the major.

Required Courses and Semester Credit Hours

FREN 3010	French Phonetics and Pronunciation	3
FREN 3050	French Composition 1	3

or FREN 3060	French Composition 2	
FREN 3100	Introduction to Critical Reading and Writing in French Literature	3
FREN 3110	Main Currents of French Literature 1	3
or FREN 3120	Main Currents of French Literature 2	
Six or more other courses at the 3000 or 4000 level, of which 9 credit hours must be at the 4100 level or above (6 of which must be completed at CU)		18
FREN 4990	Senior Seminar ¹	
Total Credit Hours		30

¹ Note: The seminar runs concurrently with one of the three courses taken at the 4100 level or above. See departmental brochure for details.

Honors Requirements

Honors candidates must meet all of the regular requirements for the major plus the following:

FREN 3200	Introduction to Literary Theory and Advanced Critical Analysis	3
One semester of independent study ¹		3
Total Credit Hours		6

¹ NOTE: The semester of independent study is taken concurrently with FREN 4980, and is devoted to one-on-one work on the senior honors thesis with a faculty advisor. See department for details.

Graduating in Four Years with a BA in French

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in French, students should meet the following requirements (one option):

- **First Year - Fall semester** FREN 1010 Beginning French I (5 cr) (if needed, does not fulfill French major course requirements)
- **First Year - Spring semester** FREN 1020 Beginning French II (5 cr) (if needed, does not fulfill French major course requirements)
- **Second Year - Fall semester** FREN 2110 2nd Year French I (3 cr) (if needed, does not fulfill French major course requirements)
- **Second Year - Spring semester** FREN 2120 2nd Year French II (Prereq for courses required for French major but does not fulfill major course requirements); FREN 3010 French Phonetics and Pronunciation (3 cr), 3 cr total required.
- **Third Year - Fall semester** FREN 3050 OR FREN 3060 French Composition I or II (3 cr); Upper division (3000 level and up) course, 6 cr total required
- **Third Year - Spring semester** FREN 3100 Intro to Critical Reading and Writing in French Literature (3 cr); FREN 3110 OR FREN 3120 Main Currents in French Literature (3cr); Upper division (3000 level and up) FREN course, 9 cr. total required.
- **Fourth Year - Fall semester** FREN 4990 Senior Seminar (3cr); Upper division (3000 level and up) FREN course, 6 cr. total required.
- **Fourth Year - Spring semester** FREN course 4100 or higher (3 cr required); Upper division (3000 level and up) FREN course, 6 cr. total required.

Note: Completion of French requirements includes the successful written and oral presentation of a senior essay (FREN 4990) by the end of the fourth (senior) year.

French - Minor

We offer undergraduate courses in French language, literature and culture.

The language courses make use of CU's ALTEC language lab (<http://www.colorado.edu/frenchitalian/altec-facilities>) to provide maximum flexibility in language learning, with rich audio-visual content. Courses cover spoken and written language, composition, conversation, and Business French.

Culture courses focus on current events, differences between the US and France, and the culture of the larger Francophone world.

Literature courses cover topics ranging from the Middle Ages to the twenty-first-century novel. We also offer study abroad programs (<http://www.colorado.edu/frenchitalian/study-abroad>) in a number of French-speaking locations.

To declare a French minor, please go to www.colorado.edu/advising (<http://www.colorado.edu/advising>).

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

All courses for minor credit hours must be taken for a grade. The only exception to this rule is course credit, which although taken for a grade, is recorded pass/fail on the student's transcript (this includes transfer credit from accredited universities and courses taken on CU study abroad programs).

Students must earn a minimum grade of C- in all courses counted for the minor.

Required Courses and Semester Credit Hours

A total of 18 upper-division credit hours is required for the minor. All courses counted for the minor must be numbered 3000 or above. Courses taught by the department in English, do not, in general, apply to the minor, with the exception of FREN 3200.

Prerequisite for admission to courses for the minor is completion of Level IV French, second-year college French (FREN 2120) or equivalent.

A maximum of 6 credit hours upper-division credit may be transferred from other universities or non-CU Boulder study abroad programs. Courses taken on CU Boulder study abroad programs are considered to be CU credit hours, and not subject to this limitation.

Italian - Bachelor of Arts (BA)

The major provides the language skills (listening, speaking, reading, writing) of modern Italian needed for all purposes of daily life. Moreover, by combining courses offered by the faculty of the Department of French and Italian with courses of Italian interest taught in other units, including film studies, fine arts and history, the program promotes an understanding of the role of the Italian literary and cultural tradition within western civilization at large. As the birthplace of Dante, Petrarca, Boccaccio, Ariosto, Tasso, Marino, Michelangelo, Raphael and Da Vinci,

Italy is the cradle of the Renaissance. Italy projects a powerful, formative influence into our own day through the work of 19th and 20th century writers like Leopardi, Manzoni, Pirandello, Levi and Calvino; operatic composers like Rossini, Puccini and Verdi; philosophers and critics like Croce, d'Annunzio, Gramsci and Ginzburg; and filmmakers like Fellini, Pasolini and Bertolucci. Thus, in addition to supplying the necessary background for advanced professional study and specialization, the Italian major introduces students to a rich literary, artistic and intellectual history at the roots of the modern world.

Students wishing to major in Italian are required to have a thorough advising session with the Italian program advisor. In this session the student program of study is outlined in detail. Students are required to see the advisor in the event that any of their major courses are canceled so that substitutions and revisions in their programs can be made. The department will not approve a major in Italian unless the student has been advised by the program advisor.

For courses in other departments with an Italian emphasis (e.g., comparative literature, fine arts, history, honors, etc.), see those sections.

The undergraduate degree in Italian emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Italian literature from the Middle Ages to the present;
- significant works of Italian literature and the contribution to world literature of Italian letters;
- the historical context in which particular works were written;
- contemporary Italian culture, politics and current events;
- a range of literary genres, their development and reception and relevant critical methodologies; and
- the grammatical structure of modern standard Italian.

In addition, students completing the degree in Italian are expected to acquire the ability and skills to:

- speak and understand modern, spoken, standard Italian sufficient for all purposes of daily life and for intellectual discussion in academic settings;
- read and write modern standard Italian with sufficient fluency and correctness for successful literary or linguistic analysis of Italian texts;
- analyze and interpret literary texts in terms of style, plot structure, characters, themes and the use of literary devices;
- communicate such analyses and interpretations simply in Italian or at a more sophisticated level in English, and discuss a wide range of topics concerning Italian culture, civilization, and current events; and
- follow with reasonable comprehension authentic Italian broadcasts or film.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Thirty-six credit hours beyond the first year with a 2.00 (C) grade point average or better are required, as listed below.

Required Courses and Semester Credit Hours

Italian Lower-Division

ITAL 2110	Intermediate Italian Reading, Grammar, and Composition 1	3
-----------	--	---

ITAL 2120	Intermediate Italian Reading, Grammar, and Composition 2	3
ITAL 2130	Introduction to Literary Analysis	3

Italian 3000-Level

ITAL 3015	Advanced Composition 1	3
-----------	------------------------	---

Select one of the following: 3

ITAL 3025	Advanced Composition 2: Introduction to Literary Writing	
-----------	--	--

ITAL 3030	Storia dell'arte: Advanced Composition/Conversation 3	
-----------	---	--

ITAL 3040	Italian Conversation Through Cinema	
-----------	-------------------------------------	--

Select two of the following (prereq. ITAL 2130): 6

ITAL 3140	Readings in Italian Literature-20th and 21st Century	
-----------	--	--

ITAL 3150	Readings in Italian Literature-19th Century	
-----------	---	--

ITAL 3160	Readings in Italian Literature—Medieval and Renaissance	
-----------	---	--

Italian 4000-Level

Students must take at least three 4000-level courses in the Italian department, of which one will be: 9

ITAL 4990	Senior Seminar ¹	
-----------	-----------------------------	--

Upper-Division Electives

Electives may be chosen from courses outside the Department of French and Italian, the content of which is consistent with the goals of the Italian major, and always in consultation with the major advisor. It is recommended that students select courses in diverse disciplines and time periods. 6

Total Credit Hours 36

¹ Before registering for ITAL 4990, students must meet with the Italian advisor.

Honors Requirements

Honors candidates must meet all of the regular requirements for the major plus the following:

FREN 3200	Introduction to Literary Theory and Advanced Critical Analysis ¹	3
-----------	---	---

One semester of independent study or research

ITAL 4840	Independent Study	3
-----------	-------------------	---

Total Credit Hours 6

¹ NOTE: FREN 3200 is taught in English and presupposes no knowledge of French.

Graduating in Four Years with a BA in Italian

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Italian, students should meet the following requirements:

- **First Year Fall semester** - ITAL 1010 (5 cr) Beginning Italian I (if needed, does not fulfill Italian major course requirements)

- **First Year Spring semester** - ITAL 1020 (5 cr) Beginning Italian II (if needed, does not fulfill Italian major course requirements); OR begin with ITAL 1050* (5 cr) Fast Track Italian
- **Second Year Fall semester** - ITAL 2110 (3 cr) Intermediate Italian I, total 3 cr.
- **Second Year Spring semester** - ITAL 2120 (3 cr) Intermediate Italian II; ITAL 2130 (3 cr) Introduction to Literary Analysis (ITAL 2120 and ITAL 2130 MAY be taken concurrently), total 6 cr.
- **Third Year Fall semester** - ITAL 3015** (3 cr) Advanced Composition I; plus ITAL 3140 (3 cr) Readings in Italian Literature - 20th and 21st c., OR ITAL 3150 (3 cr) Readings in Italian Literature - 19th c., OR ITAL 3160 (3 cr) Readings in Italian Literature - Medieval/Renaissance, total 6 cr.
- **Third Year Spring semester** - ITAL 3025 (3 cr) Advanced Composition II, OR ITAL 3030 (3 cr) Storia dell'arte, OR ITAL 3040 (3 cr) Italian Conversation through Cinema; plus ITAL 3140 (3 cr) OR ITAL 3150 (3 cr), OR ITAL 3160 (3 cr), total 6 cr.
- **Fourth Year Fall semester** - Two ITAL 4000 level courses, one of which must be ITAL 4990; and 1 upper division elective, total 9 cr.
- **Fourth Year Spring semester** - Remaining ITAL 4000 level course, and 1 upper division elective, total 6 cr.

*Credit not granted for this course AND ITAL 1010 and ITAL 1020.

**ITAL 3025 requires the prereq of ITAL 3015.

Italian - Minor

A minor program is offered in Italian. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

- All courses must carry an ITAL Subject Code.
- Students may apply credit hours to the Italian minor which are earned through a CU Boulder Study Abroad program in Italy. Specific course equivalencies must be determined by the Italian advisor.
- Students may apply a maximum of 9 transfer credit hours to the Italian minor, and a maximum of 6 credit hours at the upper-division level. Specific course equivalencies must be determined by the Italian advisor.
- Students may apply a maximum of 3 credit hours from Italian courses taught in English.
- Students must consult with the Italian advisor during each registration period and before a study abroad program.
- Students must maintain an overall and Italian grade point average of 2.000 (C). They must earn a grade of C- or higher in ALL courses required for the Italian minor and may not take minor requirement courses pass/fail.

To declare an Italian minor, go to www.colorado.edu/advising (<http://www.colorado.edu/advising>) and make an appointment with the Italian advisor.

Required Courses and Credit Hours

A total of 18 credit hours beyond the first year level is to be earned for the minor, as follows:

Lower-division

ITAL 2110	Intermediate Italian Reading, Grammar, and Composition 1	3
-----------	--	---

ITAL 2120	Intermediate Italian Reading, Grammar, and Composition 2 ¹	3
ITAL 2130	Introduction to Literary Analysis ¹	3

Upper-Division

Select one of the following (prereq. of ITAL 2130 must be met):

ITAL 3015	Advanced Composition 1	3
or ITAL 3030	Storia dell'arte: Advanced Composition/Conversation 3	
or ITAL 3040	Italian Conversation Through Cinema	

Select one of the following (prereq ITAL 2120 must be met)

ITAL 3140	Readings in Italian Literature-20th and 21st Century	3
or ITAL 3150	Readings in Italian Literature-19th Century	
or ITAL 3160	Readings in Italian Literature-Medieval and Renaissance	

Italian upper-division elective		3
---------------------------------	--	---

Total Credit Hours		18
--------------------	--	----

¹ ITAL 2120 and ITAL 2130 may be taken concurrently; see Italian advisor.

Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography, and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population and urban geography. Environment and society geography includes political ecology, natural hazards and conservation practice. Physical geography includes climatology, geomorphology, hydrology and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing and cartography. The Department also offers regionally focused courses on mountain geography and geographies of China, Latin America, Africa and South Asia. To complement its curriculum, the department also offers internship opportunities for geography majors.

The undergraduate degree in geography emphasizes knowledge and awareness of:

- the unique contributions of the discipline to understanding the spatial components of problems and the diverse factors relating to human interaction with the environment;
- the spatial distributions of physical and human characteristics on the Earth surface, the general patterns these form and the processes that have created and are changing these patterns;
- major themes of geographical analysis, including human and physical characteristics of place; human-environmental relations; movement of people, ideas and products; and regionalization; and
- the general geographical principles of human-environment interaction, global change and human spatial organization.

In addition, students completing the degree in geography are expected to acquire proficiency in:

- one or more of the specific geographic skill areas of cartography, remote sensing and geographic information systems;
- writing, quantitative methods, computer literacy, and library and field methods of data collection; and

- identifying the geographic dimensions of a problem and analyzing, synthesizing and evaluating relevant data and applying geographic principles offering a geographic perspective on that problem.

The course code for this program is GEOG.

Minimum Academic Preparation Standards (MAPS)

To fulfill a MAPS deficiency in geography, students may take one of the following courses: GEOG 1962, GEOG 1972, GEOG 1982, GEOG 1992 or pass the Geography Exemption Exam. Declared majors or minors with junior standing (57 credit hours minimum) or transfers with junior standing may take GEOG 3682, GEOG 3742 or GEOG 4712 to fulfill the MAPS deficiency.

For more information on the exemption exam, contact Testing Services at 303-492-5854 or www.colorado.edu/career/testing-services (<http://www.colorado.edu/career/testing-services>).

Geography Honors Program

Students interested in earning honors with their work in geography should contact the departmental honors advisor during their junior year.

Geography Internship Program

To complement its curriculum, the department offers geography majors internship opportunities that can be used to earn credit towards their degree. Students interested in pursuing an internship should contact the Department for information on eligibility and terms.

Residential Academic Program

Geography students specializing in environmental issues may want to contact the Baker Residential Academic Program. Students may visit the Geography Department office or refer to the Residential Academic Programs (catalog.colorado.edu/undergraduate/colleges-schools/academic-enrichment-programs/raps) section.

Bachelor's Degree

- Geography - Bachelor of Arts (BA) (p. 330)

Minor

- Geography - Minor (p. 333)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

GEOG 1001 (4) Environmental Systems: Climate and Vegetation

Lect. and lab. Introduces the atmospheric environment of the Earth: elements and controls of climate and their implications for hydrology, vegetation, and soils. Emphasizes distribution of physical features across the Earth's surface and interactions between humans and their environment, especially those leading to global change on the decade to century time scale.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Departmental Category: Physical Geography

MAPS Course: Natural Science

MAPS Course: Natural Science Lab or Lab/Lec

GEOG 1011 (4) Environmental Systems: Landscapes and Water

Lect. and lab. Introduces landscapes and flowing water, emphasizing the formation and geographic distribution of mountains, volcanoes, valleys, and deserts, and their shaping by rivers and glaciers. Includes field trips.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Departmental Category: Physical Geography

MAPS Course: Natural Science

MAPS Course: Natural Science Lab or Lab/Lec

GEOG 1962 (3) Geographies of Global Change

Familiarizes students with a geographic understanding of conflicts around the globe and of economic, political and cultural globalization. Analyzes the relationship between global forces, regions and local interests in contemporary territorial and geopolitical tensions and conflicts, emphasizing issues such as nationalism, migration, labor and natural resources. Formerly GEOG 2002.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

MAPS Course: Geography

GEOG 1972 (3) Environment-Society Geography

Examines interactions between humans and the environment across the globe from a geographical perspective. Introduces different analytical perspectives through which to understand nature-society relationships, with a focus on social, cultural and political-economic dimensions, and examples from different natural resource sectors (e.g., water, agriculture) and countries. Formerly GEOG 2412.

Additional Information: Departmental Category: Human and Cultural Geography

MAPS Course: Geography

GEOG 1982 (3) World Regional Geography

Introduces a comparative framework for recognizing and understanding world regions. Units combine historical understanding with discussion of problems and challenges that face them, including discussion of economic growth, inequality, political conflict, colonialism, race and climate change.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

MAPS Course: Geography

GEOG 1992 (3) Human Geographies

Examines social, political, economic, and cultural processes creating the geographical worlds in which we live, and how these spatial relationships shape our everyday lives. Studies urban growth, geopolitics, agricultural development and change, economic growth and decline, population dynamics, and migration exploring both how these processes work at global scale as well as shape geographies of particular places.

Additional Information: Departmental Category: Human and Cultural Geography

MAPS Course: Geography

GEOG 2053 (3) Mapping a Changing World

Examines roles that maps, geospatial data and technology play in understanding and explaining our world. Topics introduce map reading, GPS, drones, web mapping and spatial data in social networks. Class discussions and assignments include critical thinking about maps as propaganda and as tools of social and political power. Hands-on exercises demonstrate skills for map exploration of natural and societal worlds.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 2271 (3) Introduction to the Arctic Environment

Rising temperatures and shrinking sea ice are only the most visible indications of a rapidly changing Arctic. This course addresses the climate of the Arctic and the changes being observed at a non-mathematical level. It is intended to provide students with a basic understanding of the Arctic physical environment.

Additional Information: Departmental Category: Physical Geography

GEOG 2852 (3) Contemporary Southeast Asia: Environmental Politics

Examines globally pressing questions of environmental sustainability, regional inequality and development in the dynamic and heterogeneous landscapes of contemporary Southeast Asia. Focuses on interactions between histories of uneven development and contemporary debates over energy and infrastructure, food security, governance and access to land, forest and water-based resources.

Equivalent - Duplicate Degree Credit Not Granted: ASIA 2852

Grading Basis: Letter Grade

GEOG 3022 (3) Climate Politics and Policy

Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics and develop their own sense of how to judge the success of climate policies. Fulfills intermediate social science requirement in Environmental Studies Major.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3022

Recommended: Prerequisite ENVS 1000 or GEOG 1972.

GEOG 3023 (4) Statistics for Geography

Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3023

Additional Information: Departmental Category: Techniques (Skills)

GEOG 3053 (4) Cartography: Visualization and Information Design

Introduction to the fundamentals of cartography, the science and art of map design. Emphasis on map projections, symbolization and the design of maps with computers. Students produce series of thematic maps with modern computer-assisted techniques.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite basic familiarity with computers and an introductory course in statistics (may be taken concurrently).

Additional Information: Departmental Category: Techniques (Skills)

GEOG 3251 (3) Mountain Geography

Surveys mountain environments and their human use with illustrations from temperate and tropical mountain areas.

Additional Information: Departmental Category: Physical Geography

GEOG 3301 (3) Analysis of Climate and Weather Observations

Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3300

Requisites: Requires prerequisite courses of APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 and ATOC 1050 and ATOC 1060 or GEOG 3601 or ATOC 3600 or ENV 3600 or GEOG 1011 (all minimum grade D-).

Recommended: Prerequisites ATOC 1050 or ATOC 1060 or ATOC 3600 or GEOG 3601 or ENV 3600 or GEOG 1001 and one semester calculus.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Physical Geography

GEOG 3351 (3) Biogeography

Surveys and analyzes plant and animal distributions on a world scale from ecological and historical perspectives. Emphasizes human impact on species.

Requisites: Requires prerequisite course of GEOG 1001 (minimum grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 3402 (3) Natural Hazards

Explores the impacts of extreme geophysical events on human society. Emphasizes adaptations to extreme events and ways of reducing vulnerability and damage.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3412 (3) Conservation Practice and Resource Management

Studies policy and management of natural resources. Emphasizes practical approaches to the conservation and management of soil, land, water and air resources.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3422 (3) Political Ecology

Introduces students to political ecology, an influential approach to understanding society-environment relationships. Explores issues including different philosophies of nature and wilderness, the politics of conservation, causes of environmental degradation, environmental conflict and indigenous ecological knowledge.

Recommended: Prerequisite GEOG 1972.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3511 (4) Introduction to Hydrology

Examines hydrologic processes in the surface environment, emphasizing the environment of the western United States. Emphasizes natural processes and their management to augment water resources.

Requisites: Requires a prerequisite course of GEOG 1011 or GEOL 1010 (minimum grade D-).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Physical Geography

GEOG 3601 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3600 and ENV 3600

Requisites: Restricted to Geography (GEOG) or Environmental Studies (ENV 3600) majors or Atmospheric Oceanic Sciences (ATOC) minors only.

Recommended: Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Physical Geography

GEOG 3612 (3) Geography of American Cities

Introduces geography of American cities. Includes demographic and ideological contexts of urban development, emergence of the city system, location theory and rent models, and urban-economic problems.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3662 (3) Economic Geography

Presents theories of the spatial organization of economic production, consumption and exchange systems. Geographical dynamics of industrialization, urbanization and economic growth. Examination of property, labor and social conflict, with a focus on political economy.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3672 (3) Gender and the Global Economy

Examines the role of gender in global economy. Explores the impacts of colonialism and modern global economy on gender relations, with particular emphasis on Third World societies. Also focuses on related issues of population politics, environmental crisis, women's sexual exploitation, and women's social movements worldwide.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3672

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Human and Cultural Geography

GEOG 3682 (3) Geography of International Development

Compares and contrasts global characteristics and processes of development, emphasizing the developing countries of the world. Integrates theories of development, specific development topics, and case studies to explore the problems of development.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 3692 (3) Introduction to Global Public Health

Introduces global health by putting its contemporary definition, determinants, development and direction as a field into a broad global context. The course is divided into four core topics: 1) the burden and distribution of disease and mortality; 2) the determinants of global health disparities; 3) the development of global health policies; and 4) the outcomes of global health interventions. Required for the Public Health Certificate.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3742 (3) Place, Power, and Contemporary Culture

Presents a radical reexamination of the geography of culture. Examines the relationship between places, power, and the dynamics of culture. Explores how the globalization of economics, politics, and culture shapes local cultural change. Looks at how place-based cultural politics both assist and resist processes of globalization.

Recommended: Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Human and Cultural Geography

GEOG 3812 (3) Mexico, Central America, and the Caribbean

Introduces the geography of Latin America, focusing on the lands and peoples of Mexico, Central America, and the Caribbean. Examines regional and national culture, history, environment, and population, as well as ongoing environmental and socioeconomic changes.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3822 (3) Geography of China

Surveys the world's most populous country, examining physical and historical geography, urbanization and regional development, agriculture, population, energy, and the environment. Seeks to situate China's development in a broader Asian and global context.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 3832 (3) Geographies of South Asia

Examine the geographies of South Asia through four interrelated themes: Territory, Trade, Transportation, and Tributaries. Learn about territory including physical features, political conflicts and changing borders. Explore trade, transportation routes, and tributaries to understand economic, social/cultural and political geographies. Investigate culture and society through analyses of gender roles/relations.

Recommended: Prerequisites GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 3840 (1-6) Undergraduate Independent Study

Provides an independent study opportunity, by special arrangement with faculty, for students presenting strong geography preparation. Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Geography (GEOG) majors only.

GEOG 3842 (3) Human Geography of Czechia: Political, Economic and Social Transitions

Excursions in Prague will begin with an understanding of Czech history through various imprints on the landscape, such as city planning, design, architecture and culture. This will be followed by a discussion of Prague in the 20th century and the various political, economic and social transitions. These transitions will be explored through field based study in and outside of Prague.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3862 (3) Geography of Africa

Studies physical and cultural regions of Africa. Analyzes and compares the development of present nation-states and contemporary geographic issues including globalization, conservation, public health and food security.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3882 (3) Geography of the Former Soviet Union

Examines the contemporary social, political, population, cultural, ethnic and resource geography of the former Soviet Union. Relations between Russia and neighboring countries are also considered. Historical and physical geography are introduced as background to understanding post-Soviet developments and challenges.

Grading Basis: Letter Grade

GEOG 3930 (3) Internship

Provides an academically supervised opportunity for advanced geography or environmental studies majors to work in public and private organizations on projects related to the student's career goals and to relate classroom theory to practice. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Geography (GEOG) or Environmental Studies (ENVS) majors only.

GEOG 4023 (4) Introduction to Quantitative Methods in Human Geography

Introduces fundamental statistical and quantitative modeling techniques widely used in geography today. Emphasizes geographic examples and spatial problems, as are statistical routines now available on most computers.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5023

Requisites: Requires prerequisite course of GEOG 3023 (minimum grade D-).

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4043 (4) Cartography 2: Interactive and Multimedia Mapping

An advanced course in interactive, multimedia, animated and Web-based cartography stressing the important role digital cartography plays in cyberspace. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5043

Requisites: Requires prerequisite course of GEOG 3053 (minimum grade C-).

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5093 and GEOL 4093 and GEOL 5093

Requisites: Requires prerequisite course of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (minimum grade D-).

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4100 (1-3) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4110 and GEOG 4120.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

GEOG 4103 (4) Introduction to Geographic Information Science

Examines construction and use of an information system and its data specifically designed for representing and manipulating geographical data. Emphasizes modern geographical information systems including computer hardware/software with a collection of methods/procedures for recording, transforming, storing/retrieving, analyzing, and mapping geographic data.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5103

Requisites: Requires prereq crs of GEOG3053 ANTH4000 or APPM4570 or BCOR1020 or ECON3818 or GEOG3023 or GEOL3023 or MATH2510 or PSCI2075 or PSYC2111 or SOCY2061 or 4061 (all min grade C-).

Restricted to students with 57-180 credits (JR/SR) ENVS or GEOG mjrs only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4110 (1-4) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and GEOG 4120.

Repeatable: Repeatable for up to 8.00 total credit hours.

GEOG 4120 (1-3) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and GEOG 4110.

Repeatable: Repeatable for up to 6.00 total credit hours.

GEOG 4173 (3) Research Seminar

Examines the nature of research and develops pregraduate skills for geographic research, emphasizing problem definition, methods, sources, data interpretation, and writing. Recommended for students pursuing honors.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Geography (GEOG) or Environmental Studies (ENVS) majors only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4201 (3) Biometeorology

Interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans).

Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4201

Requisites: Requires prereq of GEOG 1001 any of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (min grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 4203 (4) Geographic Information Science: Modeling Applications

Extends basic GIS concepts and mechanics. Develop GIS models for human and environmental applications. Grid and vector data models, tessellated and hierarchical data structures, terrain representation, interpolation and kriging, spatial regression. Small group projects design, implement and run GIS models.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5203

Requisites: Requires prerequisite course of GEOG 4103 (minimum grade C-).

Recommended: Requisite working knowledge of GIS software.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4241 (4) Principles of Geomorphology

Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4241

Requisites: Requires prereq crs GEOG 1011 or GEOL 1010 or 1020 or 1030 or 1040 or 1060 and APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or 1300 or 1310 (min grade D-). Restricted to students with 57-180 credits (Jr/Sr) EVOC, GEOG, GEOL, ENVS mjrs only

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Departmental Category: Physical Geography

GEOG 4251 (4) Fluvial Geomorphology

Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5251

Requisites: Requires prerequisite courses of GEOG 1011 and GEOG 3511 (minimum grade D-).

Recommended: Prerequisite GEOG 3023.

Additional Information: Departmental Category: Physical Geography

GEOG 4261 (3) Glaciers and Permafrost

Surveys the major terrestrial components of the cryosphere, including permafrost, glaciers and ice sheets. Emphasizes physical processes involving ice, including thermal behavior, ice deformation and mass balance, but also considers biogeochemical processes and landforms associated with ice. The climate context, including human interactions and recent climate history, will be considered. Taught in a combination lecture-seminar format.

Requisites: Requires prerequisite course of GEOG 1011 or GEOL 1010 (minimum grade D-).

Recommended: Prerequisite GEOG 4241.

Additional Information: Departmental Category: Physical Geography

GEOG 4271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5271

Requisites: Requires prerequisite course of GEOG 1001 or ATOC 1050 or ATOC 1060 (minimum grade D-).

Recommended: Prerequisites GEOG 3511 or GEOG 3601 or ATOC 3600 or ENVS 3600 and statistics.

Additional Information: Departmental Category: Physical Geography

GEOG 4292 (3) Migration, Immigrant Adaptation, and Development

Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5292 and ECON 4292

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4303 (4) GIS Programming for Spatial Analysis

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data. Covers concepts, principles and techniques of programming and solving spatial problems in physical and human geography.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5303

Requisites: Requires prerequisite course of GEOG 4103 (minimum grade C-).

Recommended: Prerequisite GEOG 4203.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4311 (3) Watershed Biogeochemistry

Emphasizes terrestrial-aquatic linkages in headwater catchments, focusing on hydrologic pathways, isotopic and geochemical tracers, nutrient cycling, water quality, experimental manipulations, and modeling.

Requisites: Requires prerequisite courses of GEOG 1011 and GEOG 3511 (minimum grade D-).

Recommended: Requisite parametric statistics.

Additional Information: Departmental Category: Physical Geography

GEOG 4321 (3-4) Snow Hydrology

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5321

Requisites: Requires prerequisite course of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (minimum grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 4331 (3-4) Mountain Climatology

Surveys and analyzes climatic characteristics of mountain environments worldwide.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5331

Requisites: Requires prerequisite course of GEOG 1001 or ATOC 1050 or ATOC 1060 (minimum grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 4371 (3) Forest Geography: Principles and Dynamics

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5371

Requisites: Requires prerequisite course of GEOG 1001 (minimum grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 4401 (3) Soils Geography

Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5401

Requisites: Requires prerequisite course of GEOG 1011 (minimum grade D-).

Recommended: Prerequisite inorganic chemistry.

Additional Information: Departmental Category: Physical Geography

GEOG 4403 (3) Space Time Analytics

Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands on, flipped classroom approach with in-class development of technical skills.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5403

Requisites: Requires a prerequisite course of GEOG 3023 or GEOG 4023 (minimum grade C-).

GEOG 4430 (3) Seminar: Conservation Trends

Provides environmental studies or geography majors with an undergraduate format for interdisciplinary discussion and research into current and future directions of conservation.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEOG 4463 (3) Earth Analytics Data Science Bootcamp

Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5463

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

GEOG 4501 (3) Water Resources and Water Management of Western United States

Interprets and analyzes hydroclimatic data, surface and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5501

Additional Information: Departmental Category: Physical Geography

GEOG 4503 (3) GIS and Geospatial Project Management

Managing a geospatial project encompasses problem design, analysis and team dynamics. The class mixes lectures and class exercises with student-selected projects. Lectures run concurrent with projects, working through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5503

Requisites: Requires prerequisite course of GEOG 3053 or GEOG 4103 (minimum grade C-).

GEOG 4563 (3) Earth Analytics

Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (<http://www.colorado.edu/grandchallenges/>) to use our expertise in space-based observation to address our world's most pressing problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5563

Requisites: Requires prereq course of APPM 1340 and 1345 or one of following: GEOG 4023, 4103, 3023, APPM 1350, 4570, ECON 1088, 3818, MATH 1081, 1300, 1310, 2510, 3510, ANTH 4000, BCOR 1020, GEOL 3023, PSCI 2075, PSYC 2111, SOCY 2061 or EBIO 4410 (min grade C).

Grading Basis: Letter Grade

GEOG 4603 (3) GIS in the Social and Natural Sciences

Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5603

GEOG 4622 (3) City Life

Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5622

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4632 (3) Development Geography

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5632

Requisites: Requires prerequisite course of GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 (minimum grade D-).

Recommended: Prerequisite GEOG 3682.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4712 (3) Political Geography

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5712

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or IAFS 1000 or PSCI 2012 or PSCI 2223.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4722 (3) Field Methods in Human Geography

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5722

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4732 (3) Population Geography

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5732

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4742 (3) Topics in Environment and Society

Studies peoples and their environments, including human modification of nature and cultural interpretation and construction of rural and urban landscapes.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4762 (3) Geographies of Political Islam: Empire, Terror and Revolution

Explores the postcolonial landscape of political Islam through the lens of political and cultural geography. Develops a critical anti-essentialist framework for understanding the political crisis of the Muslim world in relation to broader questions of empire, nationalism, democracy, revolution, security, terrorism, globalization and modernity. Focuses on the post-1979 period, several key Muslim nation-states (Saudi-Arabia, Egypt, Iran, Turkey, Pakistan) and movements (Taliban, ISIS).

Recommended: Prerequisite GEOG 1982 or GEOG 1992 or GEOG 3742.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4812 (3) Environment and Development in South America

Presents theoretical approaches to the links between environment and development in Latin America and focuses on analytical discussion of contemporary (and controversial) issues in sustainable development in South America. Examines social, ecological, economic, and political forces influencing the use of natural resources.

Recommended: Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or GEOG 3812 or GEOG 3422 or ANTH 3110 or PSCI 3032.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4822 (3) Environment and Development in China

Examines key environmental problems in relation to China's rapid modernization and development.

Recommended: Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or HIST 1618.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 4832 (3) Geography of Tibet

Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5832

Recommended: Prerequisite GEOG 3822 or other classes on China.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 4852 (3) Health and Medical Geography

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5852

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites GEOG 1001 or GEOG 1011 and GEOG 1962 or GEOG 1972 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4892 (3) Geography of Western Europe

Provides a regional survey of cultural, political, economic, social, and physical geography of Western Europe, emphasizing the distinctive character and problems of each major area and the relationship of the region to the world.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4990 (3) Senior Thesis

Offers thesis research under faculty supervision. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Geography (GEOG) majors only.

Geography - Bachelor of Arts (BA)

The Department of Geography offers a bachelor of arts (BA) degree in geography. The geography BA emphasizes knowledge and awareness of:

- the unique contributions of the discipline to understanding the spatial components of problems and the diverse factors relating to human interaction with the environment;
- the spatial distributions of physical and human characteristics on the Earth surface, the general patterns these form, and the processes that have created and are changing these patterns;
- the major themes of geographical analysis, including absolute and relative location; human and physical characteristics of place; human and environmental relations; movement of people, ideas, and products; and regionalization; and
- the general geographical principles of human-environment interaction, global change, and human spatial organization.

International Bachelor of Arts (IBA)

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in Geography, in addition to completing all the current requirements for the BA with a major in Geography at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses below.

In addition to a standard degree in Geography, the Department offers transcribed concentrations in Geographic Information Science, Human Geography, Environment-Society Geography and Physical Geography. Coursework required for each concentration is listed below.

Students must complete at least 37 and no more than 45 credit hours in Geography with grades of C- or better (23 credit hours must be upper-division). No pass/fail grades are allowed in the major. Transfer students majoring in Geography must complete at least 12 credit hours of upper-division geography courses at CU Boulder. No course may be used to fulfill more than one requirement for the major.

All courses that can be used to meet College of Arts and Sciences core curriculum requirements are indicated with a footnote.

Required Courses and Credit Hours (all concentrations)

Certain course selections are better preparation for certain concentrations.

GEOG 1982	World Regional Geography	
GEOG 1992	Human Geographies	
Select one of the following mapping courses:		3-4
GEOG 2053	Mapping a Changing World	
or GEOG 305 Cartography: Visualization and Information Design		
Select at least one of the following methods courses:		3-4
GEOG 4023	Introduction to Quantitative Methods in Human Geography	
GEOG 4043	Cartography 2: Interactive and Multimedia Mapping	
GEOG 4093	Remote Sensing of the Environment	
GEOG 4103	Introduction to Geographic Information Science	
GEOG 4173	Research Seminar	
GEOG 4722	Field Methods in Human Geography	
Total Credit Hours		21-23

¹ Core curriculum course.

General Geography Concentration

In addition to the courses required of all concentrations complete the following:

Select at least one of the following:		3-4
GEOG 3351	Biogeography	
GEOG 3402	Natural Hazards	
GEOG 3422	Political Ecology	
GEOG 3511	Introduction to Hydrology	
GEOG 3601	Principles of Climate	
GEOG 3672	Gender and the Global Economy ¹	
GEOG 3682	Geography of International Development	
GEOG 3692	Introduction to Global Public Health	
GEOG 3742	Place, Power, and Contemporary Culture	
Take upper division electives within Geography to reach 23 upper division credit hours in the major.		10-13
Total Credit Hours		13-17

Human Geography Concentration

In addition to the courses required of all concentrations complete the following:

GEOG 3742	Place, Power, and Contemporary Culture	3
or GEOG 3682 Geography of International Development		
A third-year university-level proficiency in a foreign language appropriate to the geographic concentration is required. ¹		
Select three of the following electives: ²		9

GEOG 3422	Political Ecology	
GEOG 3672	Gender and the Global Economy ³	
GEOG 3682	Geography of International Development	
GEOG 3692	Introduction to Global Public Health	
GEOG 3742	Place, Power, and Contemporary Culture	
GEOG 3812	Mexico, Central America, and the Caribbean	
GEOG 3822	Geography of China ³	
GEOG 3832	Geographies of South Asia ³	
GEOG 3862	Geography of Africa	
GEOG 4173	Research Seminar	
GEOG 4292	Migration, Immigrant Adaptation, and Development	
GEOG 4622	City Life	
GEOG 4632	Development Geography	
GEOG 4712	Political Geography	
GEOG 4852	Health and Medical Geography	
GEOG 3930	Internship (may be applied to the concentration on a case-by-case basis)	
GEOG 4990	Senior Thesis (may be applied to the concentration on a case-by-case basis)	

Take one upper division elective in Geographic Information Science, Environment and Society, or Physical Geography. 3-4

Total Credit Hours 15-16

¹ This requirement may be met by completion of one or two semester-long, third year, university-level grammar courses (depending on the language) with a grade of C- or better, while also satisfying language department requirements for advancement through the sequence.

² Unless noted, Department enforced prereq. for all courses is GEOG 1962, GEOG 1972, GEOG 1982, or GEOG 1992.

³ Core curriculum course.

Environment and Society Geography Concentration

In addition to the courses required of all concentrations complete the following:

GEOG 3402	Natural Hazards	3
or GEOG 3422 Political Ecology		
ENVS 2000	Applied Ecology for Environmental Studies	4
Select three of the following electives: ¹		9
GEOG 3402	Natural Hazards	
GEOG 3422	Political Ecology	
GEOG 3682	Geography of International Development	
GEOG 3672	Gender and the Global Economy ²	
GEOG 3692	Introduction to Global Public Health	
GEOG 3812	Mexico, Central America, and the Caribbean	
GEOG 3822	Geography of China	
GEOG 3862	Geography of Africa	
GEOG 4173	Research Seminar	
GEOG 4501	Water Resources and Water Management of Western United States	
GEOG 4742	Topics in Environment and Society ²	
GEOG 4812	Environment and Development in South America ²	
GEOG 4822	Environment and Development in China ²	

GEOG 3930	Internship (may be applied to the concentration on a case-by-case basis)	
GEOG 4990	Senior Thesis (may be applied to the concentration on a case-by-case basis)	
Take one upper division elective from either the Geographic Information Science, Human Geography, or Physical Geography list.		3-4
Total Credit Hours		19-20

¹ Unless noted, Department enforced prereq. for all courses is GEOG 1962, GEOG 1972, GEOG 1982, or GEOG 1992.

² Core curriculum course.

Physical Geography Concentration

In addition to the courses required of all concentrations complete the following:

Required GEOG course work:

Select at least two of the following:		6-8
GEOG 3351	Biogeography	
GEOG 3511	Introduction to Hydrology	
GEOG 3601	Principles of Climate	
GEOG 4241	Principles of Geomorphology ¹	
Select at least two of the following electives:		6-8
GEOG 3251	Mountain Geography	
GEOG 3301	Analysis of Climate and Weather Observations ¹	
GEOG 3351	Biogeography	
GEOG 3511	Introduction to Hydrology	
GEOG 3601	Principles of Climate	
GEOG 4120	Special Topics in Geography	
GEOG 4173	Research Seminar	
GEOG 4201	Biometeorology	
GEOG 4241	Principles of Geomorphology ¹	
GEOG 4251	Fluvial Geomorphology	
GEOG 4261	Glaciers and Permafrost	
GEOG 4271	The Arctic Climate System	
GEOG 4311	Watershed Biogeochemistry	
GEOG 4321	Snow Hydrology	
GEOG 4331	Mountain Climatology	
GEOG 4371	Forest Geography: Principles and Dynamics	
GEOG 4401	Soils Geography	
GEOG 3930	Internship (may be applied to the concentration on a case-by-case basis)	
GEOG 4990	Senior Thesis (may be applied to the concentration on a case-by-case basis)	

Take one upper division elective from either the Geographic Information Science, Human Geography, or Environment and Society Geography list.

Ancillary mathematics and science course work:

Two semester sequence in calculus		
Select one of the following sequences:		8-10
MATH 1300 & MATH 2300	Calculus 1 and Calculus 2	
APPM 1350 & APPM 1360	Calculus 1 for Engineers and Calculus 2 for Engineers	

Three semesters of physics and chemistry, including related labs

Select three of the following:		14-15
PHYS 1110	General Physics 1	
PHYS 1120 & PHYS 1140	General Physics 2 and Experimental Physics 1	
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	
Total Credit Hours		37-45

¹ Core curriculum course.

Geographic Information Science Concentration

In addition to the courses required of all concentrations complete the following:

GEOG 4103	Introduction to Geographic Information Science	4
Select three of the following electives:		9-12
GEOG 4043	Cartography 2: Interactive and Multimedia Mapping	
GEOG 4093	Remote Sensing of the Environment	
GEOG 4110	Special Topics in Geography	
GEOG 4120	Special Topics in Geography	
GEOG 4173	Research Seminar	
GEOG 4203	Geographic Information Science: Modeling Applications	
GEOG 4303	GIS Programming for Spatial Analysis	
GEOG 3930	Internship (may be applied to the concentration on a case-by-case basis)	
GEOG 4990	Senior Thesis (may be applied to the concentration on a case-by-case basis)	
Take one upper division elective from either the Human Geography, Environment and Society Geography, or Physical Geography list.		3-4
Total Credit Hours		16-20

Graduating in Four Years

This applies only to the "General Geography" degree. Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee: it is not a requirement for the major. To maintain adequate progress in geography, students should meet the following requirements:

- By the end of the third semester, complete GEOG 1001, GEOG 1011, and one of the following: GEOG 1962, GEOG 1972, GEOG 1982 or GEOG 1992.
- By the end of the sixth semester, complete GEOG 1962, GEOG 1972, GEOG 1982, or GEOG 1992 or an approved upper-division human geography course (must be different than the course used to complete the previous requirement) and 9 credit hours of upper-division geography courses.
- By the end of the sixth semester, complete GEOG 2053 or GEOG 3053 and GEOG 3023.
- By the eighth semester, complete the remaining upper-division credit hours.

Geography - Minor

Information on earning a minor in Geography can be found here (http://geography.colorado.edu/undergrad_program/minor_and_certificates).

The department offers a certificate in hydrology (<http://snobear.colorado.edu/IntroHydro/certificate.html>) for undergraduate students majoring or minoring in Geography.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school affiliation.

- Participation in the minor program is optional on the part of the student.
- A minimum of 18 credit hours must be taken in the minor area, including a minimum of 9 upper-division credit hours.
- All course work applied to the minor must be completed with a grade of C- or better. No pass/fail work may be applied. The GPA of all minor degree course work must equal 2.00 (C) or greater.
- Student pursuing an individually structured major, or who are pursuing a major in distributed studies, will not be eligible to earn a minor.
- Students will be allowed to apply no more than 9 credit hours (including 6 upper-division) of transfer work toward a minor.
- Course work applied toward a minor may also be applied toward Core Curriculum and major requirements.

No specific concentration is required. However, students who do wish to focus on one area of geography should see the suggested course lists below. The list of courses may change at the department's discretion.

Physical Geography Focus

The following two courses are prerequisites to all upper-division courses listed further below.

GEOG 1001	Environmental Systems: Climate and Vegetation ¹	4
GEOG 1011	Environmental Systems: Landscapes and Water ¹	4

Among upper-division courses, the following sequences are suggested:

Climatology

GEOG 3301	Analysis of Climate and Weather Observations	3
GEOG 3601	Principles of Climate	3
GEOG 4331	Mountain Climatology	3-4

Biogeography

GEOG 3351	Biogeography	3
GEOG 4371	Forest Geography: Principles and Dynamics	3
GEOG 4401	Soils Geography	3

Hydrology and Geomorphology

GEOG 3511	Introduction to Hydrology ¹	4
GEOG 4241	Principles of Geomorphology	4
GEOG 4321	Snow Hydrology	3-4
GEOG 4401	Soils Geography	3

In addition, you will find it important to complete one course in statistics at the time you commence upper-division work in physical geography. Students considering graduate school in physical geography are strongly

encouraged to complete a year of course work in general chemistry, physics, calculus and statistics.

Upper-Division Courses

GEOG 3301	Analysis of Climate and Weather Observations ¹	3
GEOG 3601	Principles of Climate ¹	3
GEOG 3351	Biogeography	3
GEOG 3511	Introduction to Hydrology ¹	4
GEOG 4241	Principles of Geomorphology ¹	4
GEOG 4261	Glaciers and Permafrost	3
GEOG 4271	The Arctic Climate System	3
GEOG 4311	Watershed Biogeochemistry	3
GEOG 4321	Snow Hydrology	3-4
GEOG 4331	Mountain Climatology	3-4
GEOG 4371	Forest Geography: Principles and Dynamics	3
GEOG 4401	Soils Geography	3

¹ Core curriculum course.

Human Geography Focus

One of the following four courses are prerequisites to all upper-division courses listed further below.

GEOG 1962	Geographies of Global Change	3
GEOG 1972	Environment-Society Geography	3
GEOG 1982	World Regional Geography	3
GEOG 1992	Human Geographies	3

Upper-Division Courses

Additional prerequisites are listed.

GEOG 3672	Gender and the Global Economy ¹	3
GEOG 3682	Geography of International Development	3
GEOG 3742	Place, Power, and Contemporary Culture ¹	3
GEOG 3812	Mexico, Central America, and the Caribbean	3
GEOG 3822	Geography of China ¹	3
GEOG 3832	Geographies of South Asia	3
GEOG 3862	Geography of Africa	3
GEOG 4023	Introduction to Quantitative Methods in Human Geography	4
GEOG 4292	Migration, Immigrant Adaptation, and Development	3
GEOG 4622	City Life	3
GEOG 4712	Political Geography	3
GEOG 4732	Population Geography	3
GEOG 4742	Topics in Environment and Society	3
GEOG 4812	Environment and Development in South America	3
GEOG 4822	Environment and Development in China	3
GEOG 4832	Geography of Tibet	3

¹ Core curriculum course.

Environment-Society Geography Focus

The following two courses are prerequisites to all upper-division physical geography courses listed further below.

GEOG 1001	Environmental Systems: Climate and Vegetation ¹	4
-----------	--	---

GEOG 1011	Environmental Systems: Landscapes and Water ¹	4
-----------	--	---

GEOG 1972 is a prerequisite for all upper division human and environment society geography courses.

Upper-Division Courses

Additional prerequisites may be listed.

GEOG 3251	Mountain Geography	3
GEOG 3301	Analysis of Climate and Weather Observations ¹	3
GEOG 3351	Biogeography	3
GEOG 3402	Natural Hazards	3
GEOG 3412	Conservation Practice and Resource Management	3
GEOG 3422	Political Ecology	3
GEOG 3511	Introduction to Hydrology ¹	4
GEOG 3601	Principles of Climate ¹	3
GEOG 3612	Geography of American Cities	3
GEOG 3682	Geography of International Development	3
GEOG 3692	Introduction to Global Public Health	3
GEOG 3812	Mexico, Central America, and the Caribbean	3
GEOG 3822	Geography of China ¹	3
GEOG 3862	Geography of Africa	3
GEOG 4401	Soils Geography	3
GEOG 4430	Seminar: Conservation Trends	3
GEOG 4501	Water Resources and Water Management of Western United States	3
GEOG 4742	Topics in Environment and Society	3
GEOG 4632	Development Geography	3
GEOG 4812	Environment and Development in South America	3
GEOG 4822	Environment and Development in China	3
GEOG 4852	Health and Medical Geography	3

¹ Core curriculum course.

Geographic Information Science Focus

Students undertaking the GIS Certificate as well as a GEOG minor must take at least 9 credits of non-GIS GEOG classes to satisfy the minor requirements.

The following are prereqs for all upper division courses, unless otherwise noted.

GEOG 3023	Statistics for Geography	4
GEOG 3053	Cartography: Visualization and Information Design	4

Upper-Division Courses

GEOG 4023	Introduction to Quantitative Methods in Human Geography	4
GEOG 4043	Cartography 2: Interactive and Multimedia Mapping	4
GEOG 4093	Remote Sensing of the Environment	4
GEOG 4103	Introduction to Geographic Information Science	4
GEOG 4203	Geographic Information Science: Modeling Applications	4
GEOG 4173	Research Seminar	3
GEOG 4303	GIS Programming for Spatial Analysis	4

¹ Core curriculum course.

Geological Sciences

The options available in the undergraduate program in geological sciences are geology and geophysics and lead to the BA degree. Both options provide a strong basis for understanding the functioning of the Earth system. Students who are uncertain as to which option best suits their needs should contact a departmental advisor or faculty member. In each option, the undergraduate program emphasizes course work in theoretical, laboratory and field-oriented aspects of the geological sciences. The nearby Rocky Mountains provide a natural laboratory for many of these courses.

Students interested in the geological sciences may also wish to consider the Baker Residential Academic Program (see the Undergraduate Residential Programs section). Students who do not wish to pursue a career in the geosciences, or who would like to combine a basic knowledge of geologic sciences with that of some other field, should consider using geological sciences as one subject in a distributed studies major or as a minor. Students who intend to pursue graduate study in the geological sciences are encouraged to consider developing an honors thesis as part of their undergraduate studies.

The two options available in the undergraduate major offer different focus areas of instruction. Both options offer excellent preparation for students interested in pursuing professional careers, or graduate study, in the geological sciences.

Each option emphasizes knowledge in:

- the ways in which Earth responds to internal and external forces; the physical, chemical and biological evolution of Earth; and the nature of the materials of which the Earth is made
- the role of physics, chemistry, mathematics and biology in understanding geological processes
- the history of discoveries and ideas that have contributed to our current knowledge of Earth and the planetary system

Course code for this program is GEOL.

Geology Honors Program

Opportunity is provided for qualified geology majors to participate in the geology honors program and graduate with honors (cum laude, magna cum laude or summa cum laude) in geology. Students interested in the honors program should contact the departmental honors advisor during their junior year.

Bachelor's Degree

- Geology - Bachelor of Arts (BA) (p. 340)

Minor

- Geology - Minor (p. 342)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

GEOL 1010 (3) Introduction to Geology

Introductory geology for majors and non-majors. Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. Separate lab (GEOL 1030) is recommended.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Natural Science

GEOL 1020 (3) Introduction to Earth History

Examines how Earth's interior and surface, the atmosphere and climate, the oceans, and life interact and have changed over the immensity of geologic time. For majors and non-majors. Separate lab (GEOL 1030) is recommended.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 1040

Requisites: Requires prerequisite course of GEOL 1010 (minimum grade D-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 1030 (1) Introduction to Geology Laboratory 1

Features field trips to local points of geologic interest. Studies rocks and topographic and geologic maps. Meets the MAPS requirement for natural science lab, if taken with GEOL 1010.

Recommended: Requisite prior or current registration in 1000-level geology course.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science Lab or Lab/Lec

GEOL 1040 (3) Geology of Colorado

Reviews the geologic evolution and history of Colorado. It first develops the basic concepts needed to interpret the geology and then systematically shows how the state evolved through geologic time. Designed for those who enjoy understanding the beauty and splendor of the state.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 1020

Additional Information: Arts Sci Core Curr: Natural Science Sequence

GEOL 1060 (3) Global Change: An Earth Science Perspective

Focuses on evidence for planetary warming, climate change, glacier and ice-sheet melting and sea level rise both now and in the recent past. Attempts to develop understanding of the interactions within the coupled Earth system that regulate such changes. Utilizes examples from the geological and instrumental records, and evaluates the global warming forecast. Department enforced prerequisite: GEOL 1010 (minimum grade D-).

Equivalent - Duplicate Degree Credit Not Granted: ATOC 1060

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Natural Science

GEOL 2001 (4) Planet Earth

Explores the dynamics of planet Earth with particular emphasis on the factors that make the planet habitable. Includes examination of heat balance, hydrology, geomorphology, biogeochemistry and climate history through both lecture and lab-based activities. Required for the Geology major, introduces students to the major concepts in contemporary Earth system science.

Requisites: Requires prerequisite course of GEOL 1010 or GEOL 2100 or ENVS 1000 (minimum grade D-).

GEOL 2005 (4) Introduction to Earth Materials

Provides introduction to the classification, composition and properties of the materials that compose the Earth, how these materials are studied, and how they are used to interpret Earth history and processes. Required for the Geology major.

Requisites: Requires prerequisite courses of GEOL 1010 or GEOL 2100 and CHEM 1113 and CHEM 1114 (all minimum grade D-).

GEOL 2040 (3) The Search for Life in the Universe

Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, including Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 2040

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 2100 (3) Environmental Geology

Introduces the influences of geologic processes on human lives and the changes human actions cause in geologic systems. Uses examples and case studies from Colorado and the West.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 2700 (2) Introduction to Field Geology

Introduces basic field techniques necessary to collect geologic data and samples, and necessary to map geologic units.

Requisites: Requires prerequisite courses of GEOL 1010 and GEOL 1030 and GEOL 2005 (all minimum grade D-).

GEOL 3010 (3) Introduction to Mineralogy

Covers origin, occurrence, identification, classification, and uses of minerals with emphasis on applications of mineralogy to economic geology and petrology. Two lectures and one lab per week.

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 and GEOL 2005 and MATH 1300 or APPM 1350 (all minimum grade D-).

Recommended: Prerequisite GEOL 2005.

GEOL 3020 (3) Petrology

Studies field relations, petrography, petrology, chemistry, and origins of igneous and metamorphic rocks by means of lectures, reading, and lab and field experience. Labs include instruction in the fundamentals of optical petrography and the study of rocks in thin section.

Requisites: Requires prerequisite course of GEOL 2005 or GEOL 3010 (minimum grade D-).

GEOL 3023 (4) Statistics for Geography

Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3023

GEOL 3030 (3) Introduction to Hydrogeology

Introduces groundwater flow concepts, hydrologic cycle, physical and chemical properties, flow net, hydraulic potential, geologic controls on heterogeneity and anisotropy, aquifers and aquitards in a geologic system, saturated and unsaturated flow, flow to a well, pumping tests, and role of groundwater in geologic processes.

Requisites: Requires prerequisite courses of GEOL 1010 and MATH 1300 or APPM 1350 (all minimum grade D-).

GEOL 3040 (3) Global Change: The Recent Geological Record

Geological records in lakes, oceans, deserts, and around glaciers indicate the significant changes in the global systems that have taken place over the last few hundred or thousand years. Explores the timing and nature of these changes. Department enforced prerequisites: any two-course sequence of natural science core courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4070

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

GEOL 3050 (2) GIS for Geologists

Provides an introduction to Geographic Information Systems (GIS) techniques focused on geological applications. Covers GIS analyzing, mapping and GPS use. Basic computer skills are a plus before entering the class.

GEOL 3070 (3) Introduction to Oceanography

Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3070

Recommended: Prerequisite any 1000-level ATOC or GEOL course or ATOC major.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

GEOL 3090 (3) Developing Scientific Writing Skills

Focuses on the development of scientific writing skills. Enhances student ability to write professionally, revise text and review the work of others. Writing assignments integrate the subject matter of different topics in earth science. Department enforced prerequisites: a lower division writing course and one of the following: GEOL 2001 or GEOL 2005 or GEOL 2700 or GEOL 3010 or GEOL 3030 or GEOL 3120 or GEOL 3320 or GEOL 3430 or GEOL 3820.

Additional Information: Arts Sci Core Curr. Written Communication

GEOL 3120 (4) Structural Geology

Introduces the basic principles and processes involved in deformation of natural rocks and minerals and the techniques used to analyze a variety of common geological structures (e.g., fractures, folds, fault zones).

Requisites: Requires prerequisite course of GEOL 1010 and GEOL 2005 (minimum grade D-).

Recommended: Prerequisite GEOL 2001.

GEOL 3130 (3) Global Warming: Understanding the Forecast

Uses the example of man-made climate change to develop an analytical understanding of the Earth system (solid, fluid, and living) that can be used to interpret the complex and uncertain forecast. Emphasis is given to the concepts of forcing, feedback and response in order to examine natural vs. man-made environmental changes and climate change mitigation strategies.

GEOL 3300 (3) Extraterrestrial Life

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; the possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 3300

GEOL 3320 (3) Introduction to Geochemistry

Introduces chemical principles as applied to geologic processes. Includes an introductory discussion of mineral and rock chemistry, aqueous geochemistry, and organic geochemistry.

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 and MATH 1300 or APPM 1350 (all minimum grade D-).

GEOL 3410 (3) Paleobiology

Surveys morphology, ecology and evolution of ancient animal and plant life and their interactions on Earth. Fossils used to solve geological and biological problems. Department enforced prerequisites: GEOL 1010 and GEOL 1020 or GEOL 2005 or EBIO 1030 and EBIO 1040 or EBIO 1210 and EBIO 1220.

GEOL 3430 (4) Sedimentology and Stratigraphy

Introduces the study of sedimentary rocks emphasizing their origin, characteristics, and interpretation; and the principles and techniques for establishing the temporal order and spatial distribution of sedimentary layers.

Requisites: Requires prerequisite course of GEOL 2005 or GEOL 3010 (minimum grade D-).

Additional Information: Departmental Category: Geology

GEOL 3520 (3) Energy & Climate Change: An Interdisciplinary Approach

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics. Department enforced prerequisite: a two-course sequence in any natural science.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3520

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

GEOL 3540 (3) Introduction to Petroleum Geology

Discusses the origin and distribution of conventional and unconventional petroleum resources, source rocks, types of traps and seals, reservoir rock properties, exploration methods (seismic data analysis and interpretation, formation evaluation, subsurface mapping), reservoir characterization and modeling, reserves calculations. Department enforced prerequisite: GEOL 1010.

Recommended: Corequisite GEOL 3430.

Additional Information: Departmental Category: Geology

GEOL 3720 (3) Evolution of Life: The Geological Record

Discusses the evolution of life on Earth, beginning with the earliest origins and surveying the major steps that led to the rise of higher plants and animals. Covers modern ideas on the causes of periodic mass extinctions in both the marine and terrestrial realms. Emphasizes geologic evidence for the pathways of evolution, using examples from the ordinary to the bizarre.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

GEOL 3820 (4) The Fluid Earth

Examines the myriad forms of fluid behavior found on Earth, from the atmosphere to the inner core. Explores how basic principles of fluid physics may be used to understand a broad range of earth processes, including mantle convection, atmosphere and ocean dynamics, stream flow, lava spreading, and glacier motion, among others. Covers fundamental fluid concepts such as viscosity, pressure, convection, friction, and free-surface flow. Department enforced prerequisites: MATH 1300 or APPM 1340 and APPM 1345 or APPM 1350.

Recommended: Prerequisites GEOL 1010 and PHYS 1110.

GEOL 3930 (1-6) Internship

Offers an academically supervised opportunity for geological sciences majors to work with public or private organizations. Projects are usually associated with students' career goals; each project has an academic emphasis. Department enforced prerequisites: restricted to students with 57-180 credits (Juniors or Seniors) and completion of at least two courses (minimum grade B) for geology majors.

GEOL 3950 (3) Natural Catastrophes and Geologic Hazards

Surveys historic and prehistoric natural disasters, their cause and potential for recurrence. Meteorite impact, earthquakes, volcanic eruptions, tsunamis, landslides, floods, magnetic reversals and major extinction events. Department enforced prerequisite: one year of science.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 4060 (4) Oceanography

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data. Department enforced prerequisite: one semester chemistry or physics or geology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5060

GEOL 4070 (3) Paleoclimatology

Covers the primary forcings and feedbacks that determine Earth's energy balance and the resultant climate system on decadal to millennial time scales. Covers ocean/atmosphere circulation, the role of ice sheets in the climate system, monsoons, Holocene climate change and 20th Century warming. Includes coverage of the proxies available to reconstruct climates of the past and the archives that contain these proxies. Department enforced prerequisite: environmental science or geology introduction sequence courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3040

Recommended: Prerequisite natural science majors only.

GEOL 4093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors, as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5093 and GEOG 4093 and GEOG 5093

GEOL 4130 (3) Principles of Geophysics

Provides an introduction to fundamental geophysics including seismology, geomagnetism, gravity, radiometric dating, and heat flow with applications to plate tectonics and exploration of the subsurface.

Requisites: Requires prerequisite courses of MATH 1300 or APPM 1350 and PHYS 1110 and GEOL 1010 (all minimum grade D-).

GEOL 4150 (2) Planetary Field Geology

Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5150

GEOL 4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments. Department enforced prerequisites: GEOL 3320 or EBIO 3270 and CHEM 1011.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4160 and ENVS 4160

GEOL 4215 (3) Geochronology and Thermochronology

Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5215

GEOL 4241 (4) Principles of Geomorphology

Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4241

Requisites: Requires prerequisite course of GEOG 1011 or GEOL 1010 and MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade D-).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 4270 (3) Marine Chemistry and Geochemistry

Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO₂; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5270

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites introductory chemistry, introductory geology, introductory oceanography.

GEOL 4330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: upper-division undergraduate standing in physical science and upper-division undergraduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5330 and ASTR 4330 and ASTR 5330

GEOL 4474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups. Department enforced prerequisites: GEOL 1010 and GEOL 1020 and GEOL 3410.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5474

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEOL 4500 (3) Critical Thinking in the Earth Sciences

Deals with controversies within the broad realm of geological sciences, including planetary geology, evolution, paleobiology, global change, environmental issues, plate tectonics, resources, other societal problems, or geologic thought in general. Students are provided the opportunity to analyze and debate scientific issues in the earth sciences. Department enforced prerequisites: GEOL 1010 and GEOL 1030 and GEOL 2001 or GEOL 2005 or GEOL 2700 (minimum grade D-).

Repeatable: Repeatable for up to 6.00 total credit hours.

GEOL 4550 (3) Petroleum Reservoir Characterization and Modeling

Introduces concepts and methods of petroleum reservoir analysis and 3-D reservoir modeling using subsurface data (cores, well logs, 3-D seismic) and outcrop analogs. Examines petroleum system, petrophysics (lithology, porosity, permeability, capillary pressure, flow units), and sequence-stratigraphic, facies, and structural controls on reservoir properties, heterogeneity and recovery efficiency. Deterministic and stochastic reservoir modeling methods are addressed. Department enforced prerequisites: GEOL 1010 and GEOL 3430.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5550

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEOL 4670 (3) Isotope Geology

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5670

Requisites: Requires prerequisite a course of MATH 1300 or APPM 1350 (minimum grade D-).

GEOL 4675 (3) Stable Isotopes in Paleoclimate and Paleoecology

Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5675

Grading Basis: Letter Grade

GEOL 4700 (1-4) Special Geological Topics

Studies in selected geological subjects of special current interest (for undergraduates).

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEOL 4711 (2) Igneous and Metamorphic Field Geology

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units.

Requisites: Requires prerequisite courses of GEOL 3020 and GEOL 2001 or GEOL 2700 (all minimum grade D-).

GEOL 4712 (2) Structural Field Geology

Explores methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape.

Requisites: Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D-).

GEOL 4714 (2) Field Geophysics

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic, and electrical measurements.

Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110 (all minimum grade D-).

GEOL 4715 (2) Field Techniques in Hydrogeology

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography, and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring stream flows, interpreting aquifer parameters from geophysical measurements, and using field data for water budget analysis.

Requisites: Requires prerequisite courses of GEOL 3030 and GEOL 2001 or GEOL 2700 (all minimum grade D-).

GEOL 4716 (2) Environmental Field Geochemistry

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters, and atmospheric particulates.

Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3320 and CHEM 1011 and CHEM 1031 or CHEM 1113 and CHEM 1133 (all minimum grade D-).

GEOL 4717 (2) Field Seminar in Geology and Tectonics

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S.

Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3120 or GEOL 3320 or GEOL 3430 or GEOL 4241 (all minimum grade D-).

GEOL 4721 (2) Field Methods in Active Tectonics

Analysis of active geologic structures, including strike slip fault systems, secondary structures in stepovers and related eruptive centers. Includes the use of digital imagery, elevation models, offset geomorphic features and Quaternary deposits to determine local deformation rates and their relation to plate motions.

Requisites: Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D-).

Recommended: Prerequisite GEOL 4712.

GEOL 4725 (1-4) Field Based Special Topics in Geoscience

Explores selected geological subjects of special interest in a field setting.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5725

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

GEOL 4840 (1-3) Independent Study in Geology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4841 (1-3) Independent Study-Economic Geology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4842 (1-3) Independent Study-Petrology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4843 (1-3) Independent Study-Sedimentology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4844 (1-3) Independent Study-Structure/Tectonics

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4845 (1-3) Ind Stdy-Geochemistry

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4846 (1-3) Independent Study-Geophysics

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4847 (1-3) Independent Study-Hydrology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4849 (1-3) Independent Study-Paleontology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4851 (1-3) Independent Study in Geoscience Education

Repeatable: Repeatable for up to 3.00 total credit hours.

GEOL 4990 (1-3) Honors Thesis

Supervised project involving original research in any area of the geological sciences. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended. Must be accepted by the departmental honors committee. Department enforced prerequisite: minimum cumulative GPA of 3.30.

Additional Information: Arts Sciences Honors Course

Geology - Bachelor of Arts (BA)

The options available in the undergraduate program in geological sciences are geology and geophysics and lead to the BA degree. Both options provide a strong basis for understanding the functioning of the Earth system. Students who are uncertain as to which option best suits their needs should contact a departmental advisor or faculty member. In each option, the undergraduate program emphasizes course work

in theoretical, laboratory and field-oriented aspects of the geological sciences. The nearby Rocky Mountains provide a natural laboratory for many of these courses.

Students interested in the geological sciences may also wish to consider the Baker Residential Academic Program. Students who do not wish to pursue a career in the geosciences, or who would like to combine a basic knowledge of geologic sciences with that of some other field, should consider using geological sciences as one subject in a distributed studies major or as a minor. Students who intend to pursue graduate study in the geological sciences are encouraged to consider developing an honors thesis as part of their undergraduate studies.

The two options available in the undergraduate major offer different focus areas of instruction. Both options offer excellent preparation for students interested in pursuing professional careers, or graduate study, in the geological sciences.

Each option emphasizes knowledge in:

- the ways in which Earth responds to internal and external forces; the physical, chemical and biological evolution of Earth; and the nature of the materials of which the Earth is made
- the role of physics, chemistry, mathematics and biology in understanding geological processes
- the history of discoveries and ideas that have contributed to our current knowledge of Earth and the planetary system

Geology Track

The geology option emphasizes processes that function both in the solid earth and at Earth's surface:

- the mineralogy and petrology of igneous, metamorphic and sedimentary rocks
- the processes of sedimentation and the applications of stratigraphy and paleobiology in the reconstruction of Earth history
- the role of geophysics and geochemistry in understanding the nature of Earth and its history
- the study of faults, folds and other rock structures and the tectonic processes that create those structures
- the methods used in the field to map and interpret the diverse variety of rock types and structures
- the function of the integrated Earth system including the atmosphere, hydrosphere, biosphere and geosphere
- the fundamental controls on surface Earth processes including energy balance, hydrology, geomorphology, geochemistry and biogeochemistry
- the role of humans in the Earth system

Geophysics Track

The geophysics option emphasizes:

- applications of fundamental mathematical formulations and physical principles to an understanding of the Earth
- methods utilized to map and characterize those portions of the planet that lie below the surface, from just beneath our feet down to the core

International Bachelor of Arts

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong,

Wollongong, Australia. To earn an IBA in geology, in addition to completing all the current requirements for the BA with a major in geology at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Required Courses and Credit Hours

Students in either the geology option or the geophysics option must take the following course work in GEOL.

GEOL 1010	Introduction to Geology	3
or GEOL 2100	Environmental Geology	
GEOL 1030	Introduction to Geology Laboratory 1	1
GEOL 2001	Planet Earth	4
GEOL 2005	Introduction to Earth Materials	4
GEOL 2700	Introduction to Field Geology	2
Total Credit Hours		14

Ancillary Course Work

Students in either the geology option or the geophysics option must take the following course work from outside GEOL.

Complete a general chemistry sequence:

CHEM 1113	General Chemistry 1	
& CHEM 1114	and Laboratory in General Chemistry 1	
CHEM 1133	General Chemistry 2	
& CHEM 1134	and Laboratory in General Chemistry 2	
Select one of the following Calculus 1 & 2 sequences:		8-10
MATH 1300	Calculus 1	
& MATH 2300	and Calculus 2	
APPM 1350	Calculus 1 for Engineers	
& APPM 1360	and Calculus 2 for Engineers	

Complete a calculus-based general physics sequence:

PHYS 1110	General Physics 1	
PHYS 1120	General Physics 2	
PHYS 1140	Experimental Physics 1	
Total Credit Hours		8-10

Geology Option

Students electing the geology option are required to take the following additional courses:

Select one of the following solid earth courses:		3-4
GEOL 3010	Introduction to Mineralogy	
GEOL 3020	Petrology	
GEOL 3120	Structural Geology	
GEOL 3320	Introduction to Geochemistry	
GEOL 3430	Sedimentology and Stratigraphy	
GEOL 4130	Principles of Geophysics	
Select one of the following surface processes courses:		3-4
GEOL 3030	Introduction to Hydrogeology	
GEOL 3320	Introduction to Geochemistry	
GEOL 3410	Paleobiology	
GEOL 3430	Sedimentology and Stratigraphy	
GEOL 3820	The Fluid Earth	
GEOL 4060	Oceanography	

GEOL 4160	Introduction to Biogeochemistry	
GEOL 4241	Principles of Geomorphology	
Select one of the following quantitative geoscience courses:		3
GEOL 3010	Introduction to Mineralogy	
GEOL 3030	Introduction to Hydrogeology	
GEOL 3820	The Fluid Earth	
GEOL 4130	Principles of Geophysics	
GEOL 4241	Principles of Geomorphology	
Select two of the following advanced-field modules:		4-5
GEOL 4711	Igneous and Metamorphic Field Geology	
GEOL 4712	Structural Field Geology	
GEOL 4714	Field Geophysics	
GEOL 4715	Field Techniques in Hydrogeology	
GEOL 4716	Environmental Field Geochemistry	
GEOL 4717	Field Seminar in Geology and Tectonics	
GEOL 4721	Field Methods in Active Tectonics	
EVEN 4100	Environmental Sampling and Analysis	

Upper-division electives

Sufficient additional upper-division course work from following list to total 27 upper-division credits. (Of these, a minimum of 18 upper division credits must be GEOL.)¹

Any GEOL 3000- to 4000-level course (with exceptions, see footnote) ²		
Or approved non-GEOL courses from following list:		
APPM 3050	Scientific Computing in Matlab	
ASTR 3710	Formation & Dynamics of Planetary Systems	
ASTR 3720	Planets and Their Atmospheres	
ASTR 3750	Planets, Moons, and Rings	
ASTR 4800	Space Science: Practice and Policy ¹	
ATOC 4720	Introduction to Atmospheric Dynamics	
ATOC 4800	Policy Implications of Climate Controversies ¹	
CHEM 4511	Physical Chemistry 1	
CVEN 4404	Water Chemistry	
CVEN 4718	Mechanics and Dynamics of Glaciers	
EBIO 3080	Evolutionary Biology	
EBIO 3270	Ecosystem Ecology	
EBIO 3850	Animal Diversity: Invertebrates	
EBIO 4030	Limnology	
EBIO 4060	Landscape Ecology	
EBIO 4410	Biometry	
EBIO 4500	Plant Biodiversity and Evolution	
ECON 3403	International Economics and Policy ¹	
ENVD 4023	Environmental Impact Assessment ¹	
ENVS 3434	Introduction to Applied Ecology	
EVEN 4100	Environmental Sampling and Analysis	
GEOG/ENVS 4201	Biometeorology	
GEOL 4251	Fluvial Geomorphology	
GEOL 4261	Glaciers and Permafrost	
GEOL 4321	Snow Hydrology	
GEOL 4401	Soils Geography	
MCDB 4350	Microbial Diversity and the Biosphere	
MUSM 4914	Museum Practicum in Geology	

PSCI 4183	International Law ¹
Total Credit Hours	
	27-30

¹ Note: A maximum of 3 of these credit hours may consist of a policy course from the following list:

- ASTR 4800 Space Science: Practice and Policy
- ATOC 4800 Policy Implications of Climate Controversies
- ECON 3403 International Economics and Policy
- ENVD 4023 Environmental Impact Assessment
- PSCI 4183 International Law

² GEOL 3040, GEOL 3070, GEOL 3520, GEOL 3720, GEOL 3950, and GEOL 4500 cannot be used to fulfill the upper division elective requirements.

Geophysics Option

Students electing the geophysics option are required to take the following additional courses:

The following solid earth, surface processes and quantitative geoscience courses:

GEOL 3010	Introduction to Mineralogy	3
GEOL 3020	Petrology	3
or GEOL 3320	Introduction to Geochemistry	
GEOL 3120	Structural Geology	4
GEOL 4130	Principles of Geophysics	3
GEOL 4714	Field Geophysics	2

Ancillary non-GEOL courses:

APPM 2350	Calculus 3 for Engineers	4
or MATH 2400	Calculus 3	
APPM 2360	Introduction to Differential Equations with Linear Algebra	4

PHYS 2130	General Physics 3	3
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3

Select two of the following non-GEOL courses: 6

APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	
MATH 4470	Partial Differential Equations	
PHYS 3210	Classical Mechanics and Mathematical Methods 2	
PHYS 3310	Principles of Electricity and Magnetism 1	

Total Credit Hours 35

Additional information on required courses and other departmental requirements may be obtained from the departmental office. Students should contact the department for a list of current major requirements.

Transfer students must satisfactorily complete a minimum of 12 credit hours of advanced work (3000-level or above) in the Department of Geological Sciences in Boulder if they wish to obtain a degree in geology from CU-Boulder. Before registering for the first time, or within the first week of the semester, such students must see a geological sciences department undergraduate advisor to have previous course work in geology, math and allied sciences evaluated.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a

requirement for the major. To maintain adequate progress in geology, students should meet all college requirements plus specific departmental requirements. These departmental requirements vary slightly between the two major options. Detailed information is available from the department office, but in general these requirements include:

- Declare a geology major and begin course work in the major during the first semester freshman year.
- Meet with a departmental advisor prior to the second and fifth semesters and during the seventh semester.
- Complete at least 33 credit hours (geology option; 44 credit hours for geophysics option) required for the major by the end of the fourth semester.
- Complete at least 47 credit hours (geology option; 63 credit hours for geophysics option) required for the major by the end of the sixth semester.
- Complete the remaining requirements for the major by the end of the eighth semester.

Geology - Minor

The minor program in geological sciences is meant for students who would like to acquire a basic knowledge of geology in addition to their major area of study.

Requirements

The College of Arts and Sciences' requirements for a minor include a minimum of 18 credit hours in the minor area, including a minimum of 9 upper-division credit hours. The departmental requirements for the minor are listed below. The department strongly urges students interested in pursuing a minor in geology to consult a departmental advisor.

Required Courses and Semester Credit Hours

Select one of the following 1000-level introductory sequence: 6

GEOL 1010 & GEOL 1020	Introduction to Geology and Introduction to Earth History	
GEOL 1010 & GEOL 1040	Introduction to Geology and Geology of Colorado	
GEOL 1010 & GEOL 1060	Introduction to Geology and Global Change: An Earth Science Perspective	
GEOL 1030	Introduction to Geology Laboratory 1	1

Select at least one of the following laboratory or field-oriented courses: 2-4

GEOL 2001	Planet Earth	
GEOL 2700	Introduction to Field Geology	
GEOL 3010	Introduction to Mineralogy	
GEOL 3023	Statistics for Geography	
GEOL 3120	Structural Geology	
GEOL 3410	Paleobiology	
GEOL 3430	Sedimentology and Stratigraphy	
GEOL 4060	Oceanography	
GEOL 4093	Remote Sensing of the Environment	
GEOL 4130	Principles of Geophysics	
GEOL 4241	Principles of Geomorphology	

Additional geology coursework to bring the total upper division credit hours to 9 and total credit hours in geology to 18

Total Credit Hours 18-20

Germanic and Slavic Languages and Literatures

Undergraduate students may choose to major in either German studies or Russian studies; minors are offered in both. The department also offers a minor in Nordic studies.

Course codes for these programs are DANE, FINN, GRMN, GSLL, NORW, RUSS, SCAN and SWED.

Bachelor's Degrees

- German Studies - Bachelor of Arts (BA) (p. 355)
- Russian Studies - Bachelor of Arts (BA) (p. 358)

Minors

- German Studies - Minor (p. 357)
- Nordic Studies - Minor (p. 357)
- Russian Studies - Minor (p. 362)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

DANE 1010 (4) Beginning Danish I-DILS

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Danish history and contemporary culture and society.

Additional Information: Departmental Category: Danish Courses

DANE 1020 (4) Beginning Danish II-DILS

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Danish history and contemporary culture and society. Department enforce prerequisite: DANE 1010 (min grade C-).

Additional Information: Departmental Category: Danish Courses

DANE 2010 (4) Intermediate Danish I - DILS

Building on the skills that the students have acquired in Beginners Danish I-II, this course offers additional reading, writing, speaking and verbal comprehension. Students will learn to conduct business at a government office, talk about holidays and festivals and discuss conservation and environmental protection. They will read and write small texts, becoming exposed to differences between written and spoken Danish.

Requisites: Requires prerequisite course of DANE 1020 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Danish Courses

DANE 2020 (4) Intermediate Danish II - DILS

Offers extensive reading, writing, speaking and verbal comprehension skills in Danish. The students will discuss Danish history, cultural differences and stereotypes, politics, social groups, learn how to write letters and email in Danish, read short texts and write short essays on the above topics.

Requisites: Requires prerequisite course of DANE 2010 (minimum grade C-).

Additional Information: Departmental Category: Danish Courses

FINN 1010 (4) Beginning Finnish 1 - DILS

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class.

Additional Information: Departmental Category: Finnish Courses

FINN 1020 (4) Beginning Finnish 2- DILS

Continuation of Beginning Finnish I. Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 1010 (minimum grade C-).

Additional Information: Departmental Category: Finnish Courses

FINN 2010 (4) Intermediate Finnish 1 - DILS

Continuation of Beginning Finnish 2. Provides practical, communicative language skills for use in a variety of situations. Examines intermediate language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 1020 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Finnish Courses

FINN 2020 (4) Intermediate Finnish 2 - DILS

Continuation of Intermediate Finnish I. Provides practical, communicative language skills for use in a variety of situations. Examines intermediate language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 2010 (minimum grade C-).

Additional Information: Departmental Category: Finnish Courses

GRMN 1010 (4) Beginning German 1

Introduction to language and culture of the German-speaking world, with emphasis on the acquisition of basic communication skills in cultural context. For students with no previous training in German.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1030

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: German

GRMN 1020 (4) Beginning German 2

Continued development of German-language skills and cultural knowledge for effective communication. Emphasis on more complex language structures and sustained interactions. Department enforced prerequisite: GRMN 1010 (min grade of C-).

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1030

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: German

GRMN 1030 (5) Intensive Beginning German

Covers the same material as GRMN 1010 and GRMN 1020 in one course. Focuses on acquiring ability to understand and speak everyday German; on developing reading and writing skills; and on learning about the cultures of the German-speaking countries.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1010 and GRMN 1020

Additional Information: Departmental Category: German

GRMN 1500 (3) German for Reading Knowledge

Designed especially for graduate students. Emphasizes analytical skills for acquiring reading proficiency in specialized and technical German in one's field of research. Recommended for pass/fail registration. Does not satisfy the arts and sciences foreign language requirement. Does not count towards the German major.

Additional Information: Departmental Category: German

GRMN 1601 (3) Germany Today

Introduces the culture of contemporary German-speaking central Europe, examining historical processes, social and political patterns, and the intellectual and artistic responses to problems of the 20th and 21st centuries. Taught in English.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: German Courses Taught in English

GRMN 1602 (3) Metropolis and Modernity

An interdisciplinary introduction to the modern industrial city in Europe and the USA, with particular attention to the representation of urbanism in the visual arts. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 1701 (3) Nature and Environment in German Literature and Thought

Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green Party. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 1701

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 2010 (4) Intermediate German 1

Development of skills for independent use of German. Discussions, writing and listening/viewing activities that address topics of the contemporary German-speaking world. Department enforced prerequisite: GRMN 1020 or 1030 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2030

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: German

GRMN 2020 (4) Intermediate German 2

Development of communication skills and knowledge about recent social, cultural and political developments in German speaking countries through texts, media and film. Department enforced prerequisite: GRMN 2010 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2030

Additional Information: Departmental Category: German

GRMN 2030 (5) Intensive Intermediate German

Covers the same material as GRMN 2010 and GRMN 2020 in one semester. Offers review and continuation of basic skills begun in the first year: reading, writing, speaking and oral comprehensive. Department enforced prerequisite: GRMN 1020 or GRMN 1030 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2010 and GRMN 2020

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: German

GRMN 2301 (3) Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich

Examines social culture and everyday life in Nazi Germany. Topics include the role of propaganda in the media and entertainment industries, anti-Semitism and suppression of ethnic, social and religious minorities, the role of education and youth organizations, as well as the role of women, the churches, and the effects of a controlled economy before and during World War II. Taught in English.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: German Courses Taught in English

GRMN 2501 (3) Miniatures of Modern Life: Introduction to Short Fiction

Introduces students to short fiction from the 20th century. Focuses on issues and themes of modern life, such as: alienation and anxiety; cultures of spectatorship; gender roles, sexuality and social life; memory and nostalgia; technology, industry and capitalism; state power and revolution. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 2502 (3) Representing the Holocaust

Examines representations of the Holocaust in film, memoirs, poetry, novels, graphic novels, memorials. Considers questions such as: How to depict an event that resists representation? How does the memory of the Holocaust transform over generations? How do representations of the Holocaust inform our understanding of other experiences of racism and genocide? What ethical issues are at stake? Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 2502

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 2503 (3) Fairy Tales of Germany

Explores the origins, cultural significance, stylistic and thematic features of the German fairy tale, with emphasis on the Brothers Grimm; on artistic fairy tales by Goethe, Tieck, Brentano, and others; and, on modern retellings in literature and popular culture. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 2601 (3) Kafka and the Kafkaesque

Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque by looking not only for traces of Kafka's influence in the verbal and visual arts, but also for traces left in Kafka's own work by his precursors in the literary tradition. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 2601

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 2603 (3) Moral Dilemmas in Philosophy and Literature

Examines the moral dilemmas that arise when opportunities afforded by basic freedoms or advances in technology clash with the ethical imperatives that issue from the Enlightenment and the social contract. Guiding questions include: When does the quest for knowledge legitimate transgression of prevailing morality? By what standard do we adjudicate the ambitions of the individual when they compete with the interests of the state? Taught in English.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 3010 (3) Advanced German 1

Focuses on cultural topics and reviews grammatical topics, expands vocabulary and provides practice in reading, writing, listening and conversation skills. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B1 after GRMN 3010. Department enforced prerequisite: four semesters of college German or equivalent. Open to freshmen with instructor consent.

Additional Information: Departmental Category: German

GRMN 3020 (3) Advanced German 2

Expands and refines skills acquired in GRMN 3010. Improves overall fluency and deepens cultural understanding of the German-speaking countries. Develops an advanced skill level in the areas of listening, speaking, reading and writing. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B1 or B2 after GRMN 3020. Department enforced prereq., GRMN 3010 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 3030 (3) Business German

Introduces students to the language and culture of German business and economic life. Provides insights into everyday business practices and institutions, including Germany's position in the European and world markets. Improves all language skills with an emphasis on Business German. Familiarizes students with current aspects of German society, professional life and business culture. Students will have the option of taking the internationally recognized exam Goethe-Zertifikat B1 or B2 after GRMN 3030. Department enforced prereq., GRMN 2020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 3110 (3) German Literature from the Avant-garde to the Postmodern

Examines selected literary texts. Emphasizes longer unedited texts as well as critical skills. May be taken either before or after GRMN 3120. Department enforced prereq., GRMN 2020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 3120 (3) German Literature from the Enlightenment to Expressionism

Examines selected literary texts of various periods. Emphasizes longer texts and critical skills. May be taken either before or after GRMN 3110. Department enforced prereq., GRMN 2020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 3130 (3) Issues in German Philosophy and Literature

Examines selected interdisciplinary texts from the German literary and philosophical tradition. Topics address issues central to philosophical inquiry, and may include knowledge and its limits, mind and body, determinism and free will, reason and religious belief, and ethical problems. Department enforced prereq., GRMN 2020 or 2030 (minimum grade C-).

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 3140 (3) Current Issues in German Literature

Examines issues pervading contemporary German literature, such as concerns of youth, gender, stereotyping as it affects women and men in their relations with one another, loneliness and sexual frustration, work experiences, and other issues. Department enforced restriction: ability to read unedited German and to speak German.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 3150 (3) Issues in German Politics and Literature

Examines literary and theoretical texts in German about the relationship between literature and politics. Topics may include history and revolution, political theater, feminist aesthetics or terrorism. Readings and discussion in German. Department enforced prereq., GRMN 2020 or GRMN 2030 (minimum grade C-).

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 3501 (3) German-Jewish Writers: From the Enlightenment to the Present

Provides insight into the German-Jewish identity through essays, autobiographies, fiction and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3501

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: German Courses Taught in English

GRMN 3502 (3) Literature in the Age of Goethe

Features the writings of Germany's major literary figures from 1749 to 1832. Special attention is paid to the formation of literary periods, genres, aesthetic, and socio-historical developments contributing to the birth of modernism in German intellectual history and literature. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: German Courses Taught in English

GRMN 3503 (3) German Film Through World War II

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3503

Additional Information: Departmental Category: German Courses Taught in English

GRMN 3504 (3) Topics in German Film

Analyzes key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women and the Holocaust. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3504 FILM 3504

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German Courses Taught in English

GRMN 3505 (3) The Enlightenment: Tolerance and Emancipation

Examines Enlightenment notions of reason, humanity and social progress. Topics include 18th century views on government, science, education, religion, slavery and gender roles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3505

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 3506 (3) Tracing the Criminal: Crime in 19th C Society and Culture

Examines cultural and literary representations of crime from the Enlightenment to the early 20th century and contextualizes them within the history of judicial and medical approaches to criminality. Focusing on representations of the criminal as an object of knowledge, this survey of intellectual history introduces students to critical approaches in the humanities and the study of social phenomena in their historical context.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: German Courses Taught in English

GRMN 3513 (3) German Film and Society 1945-1989

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3513

Additional Information: Departmental Category: German Courses Taught in English

GRMN 3514 (3) German Film & Society After 1989

Introduces post-1989 German culture through film. Emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3514

Additional Information: Departmental Category: German Courses Taught in English

GRMN 3520 (3) Open Topics in the Cultural Context

Examines topics in the cultures of German-speaking central Europe.

Contact the departmental office for specific course offerings. Department enforced prereq., GRMN 3020 (minimum grade C-)

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 3601 (3) German Women Writers

Explores writing by German/Austrian women from 1945 to the present, with special attention to the representation of the Holocaust, the continuation of avant-garde traditions, innovations in literary form, and feminism. Visual arts, film, and feminist theory will also be considered in their relation to literature. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3601

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: German Courses Taught in English

GRMN 3702 (3) Dada and Surrealist Literature

Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3702

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: German Courses Taught in English

GRMN 3802 (3) Politics and Culture in Berlin 1900-1933

Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. Offered through CU Study Abroad Program.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3802

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 3900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: German

GRMN 3930 (1-6) Internship

Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) German Studies (GRMN) majors only.

Additional Information: Departmental Category: German

GRMN 4010 (3) Advanced Grammar and Stylistics

Emphasizes idiomatically correct spoken and written German in a variety of genres and culturally relevant contexts. Offers a comprehensive review of the more complex grammatical problems and syntactic structures of the German language. Grammar exercises alternate with readings, discussions and writing on topics related to current cultural, social and political issues in the German-speaking countries. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B2 after GRMN 4010. Department enforced prereq., GRMN 3020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 4051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 5051

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4231 (3) Sex, Love and Marriage in Literature and Philosophy

Traces notions of love, sex and marriage in 19th-20th century philosophy and literature. Considered will be whether/how these representations reflect or challenge ideas of human agency, dignity and happiness. Examined will be shifting views of gender and other social configurations (e.g., friendship, adultery, same-sex desire) to understand their influence on modern attitudes towards sexuality and fidelity.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 5231

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4251 (3) Marxism

Historical and systematic study of principal themes of Marxist thought, from its Hegelian origins to its contemporary varieties, emphasizing the works of Marx and Engels. Taught in English. Department enforced prerequisite: 12 hours of GRMN or PHIL course work or instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4250

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4253 (3) Philosophy of Language

Surveys seminal essays from Frege to the present on the philosophy of language. Taught in English.

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4301 (3) Gender, Race and Immigration in Germany and Europe

Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4301 and GRMN 5301

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: German Courses Taught in English

GRMN 4330 (3) The Age of Goethe

German literature from 1770 to 1830. Close examination of representative texts from the periods of Sturm und Drang, classicism, and romanticism. Emphasizes philosophical and social background. Department enforced prereq., GRMN 3020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 4340 (3) Seminar in German Literature

Intensive study of a particular literary period, author, or genre. Secondary sources are used. Course content differs each time. Department enforced prereq., GRMN 3020 (minimum grade C-).

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 4450 (3) Methods of Teaching German

Required of students who desire the recommendation of the department for secondary school teaching positions. For student teaching in German, see EDUC 4712 under the School of Education.

Requisites: Restricted to School of Education (EDUC) undergraduates only

Additional Information: Departmental Category: German

GRMN 4460 (6) High School German Teaching

Part of the supervised student teaching in a secondary school required for state certification to teach German.

Requisites: Restricted to School of Education (EDUC) undergraduates only

Grading Basis: Pass/Fail

Additional Information: Departmental Category: German

GRMN 4501 (3) Seminar: Literature in Cultural Context

Provides a broader basis for the work of literature, viewing it from various cultural perspectives. Specific content of course is defined by the instructor. Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4502 (3) Nietzsche: Literature and Values

Emphasis is placed on Nietzsche's major writings spanning the years 1872-1888, with particular attention to the critique of Western values. A systematic exploration of doctrines, concepts and ideas leading to the values of creativity. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4502

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 4503 (3) Issues in German Thought

Provides the opportunity to examine major issues in German philosophical, social, and religious thought from the end of German idealism to existentialism and critical theory. Emphasizes the relationship between ideas and social and political action. Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 5504 and HUMN 4504

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 4550 (3) Senior Seminar: The Roles of Intellectuals and Academics in German Culture

Examines the articulation of the German bourgeoisie during critical periods in German history. Looks at specific groups and their participation in German public culture, e.g., writers, artists, journalists, academics, and political figures. Students work closely with a faculty advisor during the semester and are expected to produce a major research paper. Department enforced prereq., GRMN 3020 (minimum grade C-).

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) German (GRMN) or School of Education (EDUC) majors only.

Additional Information: Departmental Category: German

GRMN 4900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: German

GSLI 2350 (3) Introduction to Jewish Culture

Explores the development and expressions of Jewish cultures across the chronological and geographical map of the Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes, including such issues as sexuality and foodways. Sets the discussion in relevant contexts and looks at cultural representations that include literary, religious and visual texts.

Equivalent - Duplicate Degree Credit Not Granted: JWST 2350

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Germanic and Slavic Courses

GSLI 2401 (3) The German Experience in North America

Discusses the history, culture and literature of German immigrants from the 17th to the 21st century. Investigates reasons for migration and the Diaspora of Germans in Russia to the United States and Canada. Studies individual settlements and stores of German pioneer authors and introduces course participants to archival research.

Additional Information: Departmental Category: German Courses Taught in English

GSLI 2551 (3) Modern Jewish Literature

Examines Jewish experience through the study of literary texts from around the world, mainly from the 20th and 21st centuries. Discusses issues pertaining to secularism and tradition; diasporas and homelands; modernity and questions of identity raised by the intellectual transitions brought about by political and social emancipation; sexualities; enormous changes wrought by population redistributions, world wars and rapid cultural transformations. Formerly HEBR 2551.

Equivalent - Duplicate Degree Credit Not Granted: JWST 2551

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Germanic and Slavic Courses

GSLI 3401 (3) The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe

Surveys the major works of 20th century central and central east European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the "Cold War." Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3401

Additional Information: Departmental Category: Germanic and Slavic Courses

GSLI 3600 (3) Contemporary Jewish Societies

Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3600 and IAFS 3600

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Germanic and Slavic Courses

NORW 1010 (4) Beginning Norwegian 1

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Norwegian

NORW 1020 (4) Beginning Norwegian 2

Department enforced prerequisite: NORW 1010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Norwegian

NORW 1900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Norwegian

NORW 2110 (4) Second-Year Norwegian Reading and Conversation 1

Department enforced prerequisite: NORW 1020 (minimum grade C-).

Fulfills the arts and sciences language requirement for the BA and BFA degrees.

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: Norwegian

NORW 2120 (4) Second-Year Norwegian Reading and Conversation 2

Continuation of NORW 2110, with focus on Norwegian culture and society. Small group work and class discussions. Department enforced prerequisite: NORW 2110 (minimum grade C-).

Additional Information: Departmental Category: Norwegian

NORW 3900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Norwegian

RUSS 1010 (4) Beginning Russian 1

For students with no previous training in Russian.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 1050

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Russian

RUSS 1020 (4) Beginning Russian 2

Continuation of RUSS 1010. Department enforced prerequisite: RUSS 1010 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: RUSS 1050

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Russian

RUSS 1050 (5) Intensive Beginning Russian

Covers same material as RUSS 1010 and RUSS 1020 combined in one course. Focuses on acquiring basic grammar (all cases for nouns, adjectives and possessives, verb conjugations, in all three tenses), and ability to understand and speak basic everyday Russian. Develops basic reading and writing skills and provides exposure to the fundamentals of the Russian culture.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 1010 or RUSS 1020

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Russian

RUSS 1900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Russian

RUSS 2010 (4) Second-Year Russian 1

Review and continuation of basic skills learned in the first year: reading, writing, speaking, and oral comprehension. Department enforced prerequisite: RUSS 1020 or RUSS 1050 (minimum grade C-). Satisfies arts and sciences language requirement.

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: Russian

RUSS 2020 (4) Second-Year Russian 2

Continuation of RUSS 2010. Department enforced prerequisite: RUSS 2010 (minimum grade C-).

Additional Information: Departmental Category: Russian

RUSS 2211 (3) Introduction to Russian Culture

Provides a chronological overview of civilization in the area now known as Russia, from its beginnings to the end of the Romanov dynasty, paying particular attention to the geographic, social, artistic, economic, and political forces that have combined to give the Russian people and their culture their unique characteristics. Taught in English.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Russian Courses Taught in English

RUSS 2221 (3) Introduction to Modern Russian Culture

Introduces students to major trends in Russian culture from the 1890's to the present, through the study of literature, art, architecture, music and film in an historical context. Addresses such questions as: how have past events affected Russian society? How can we use knowledge about Russia's past to understand social and cultural forces today? Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: LIBB 2100

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Russian Courses Taught in English

RUSS 2222 (3) Sports and the Cold War

Explores the multiple connections between sports and international politics during the Cold War in the Post-War period. Examines how the issues of class, nation, ethnicity, and gender intersect with sports and international politics by studying cases from various sport events since 1945.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Russian

RUSS 2231 (3) Fairy Tales of Russia

Provides a general introduction to fairy tales including various theoretical approaches to classifying and interpreting them; introduces students to a wide selection of Russian folk and fairy tales. Examines the cultural, social and political values they reflect, as well as the continuing influence of fairy tales and folk beliefs in Russian literature, music, folk art, and film, and in the political propaganda of the 20th century. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Literature and the Arts

Departmental Category: Russian Courses Taught in English

RUSS 2241 (3) The Vampire in Literature and the Visual Arts

Introduces students to the folkloric and historic origins of the vampire of contemporary culture. Students will read both Russian and Western literary works, analyzing the image of the vampire as represented in folk narrative, popular fiction and film. Students will learn to apply critical approaches to understanding the vampire metaphorically, symbolically and as a demonized "other". Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Russian Courses Taught in English

RUSS 2251 (3) Knights and Amazons: Superheroes in Russian Epics and Film

Immerses students in the mythological past of medieval Russia and introduces them to the legendary warrior heroes and heroines through epic narratives, fairy tales, literature, art, film and animation. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Russian Courses Taught in English

RUSS 2261 (3) The Russian Short Story

Introduces students to the short story as a unique literary form, emphasizing the significant contributions of Russian writers to both the short story genre and its criticism. Familiarizes students with various styles and subgenres of the short story, including the romantic, psychological, and supernatural tale, and allegorical and satirical tale. A good introduction to further literary or Russian studies. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Russian Courses Taught in English

RUSS 2471 (3) Women in Russian Culture: From Folklore to the Nineteenth Century

Explores the changing role and cultural images of women as reflected in Russian folklore, historical documents, costumes, icons, paintings and literature from medieval times to 19th century. Focuses on the way Russian women have transgressed boundaries of patriarchy and secured powerful positions in society and culture. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Historical Context

Departmental Category: Russian Courses Taught in English

RUSS 2501 (3) Russia Today

Introduces students to post-communist Russia, its politics, values and ideologies. Neither totalitarian nor liberal, contemporary Russia raises numerous questions about such ideological and cultural constructions as neo-liberalism and capitalism, nationalism, globalization, state power and popular vs. high cultures. Taught in English.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Russian Courses Taught in English

RUSS 3000 (3) Advanced Conversation

Enables students to speak and understand contemporary Russian. Discussion topics and source materials vary. Department enforced prerequisite: RUSS 2010 (minimum grade C-).

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Russian

RUSS 3010 (4) Third-Year Russian I

Review of Russian grammar coordinated with reading, speaking, writing and understanding modern Russian. Uses some texts from modern Russian literature. Department enforced prerequisite: RUSS 2020 (minimum grade C-).

Additional Information: Departmental Category: Russian

RUSS 3020 (4) Third-Year Russian II

Continuation of RUSS 3010. Department enforced prerequisite: RUSS 3010 (minimum grade C-).

Additional Information: Departmental Category: Russian

RUSS 3060 (4) Advanced Russian for Heritage Speakers (Part 1)

Enhances heritage student competence and performance in Russian language. Offers intensive review of Russian grammar and focuses on developing advanced reading, writing and translation skills. Readings are selected from a wide range of contemporary writings that reflect current issues in Russia.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4010 or RUSS 5010

Additional Information: Departmental Category: Russian

RUSS 3211 (3) History of Russian Cinema

Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3211

Recommended: Prerequisite RUSS 2221 or FILM 1502.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Russian Courses Taught in English

RUSS 3231 (3) Laughter in Slavic Cultures

Examines forms, genres and social functions of laughter in Slavic cultures (Russian, Polish, Czech, Serbian and others) and provides an introduction to literature and film of Eastern Europe. All readings are in English. Taught in English.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 3241 (3) Red Star Trek: Russian Science Fiction Between Utopia and Dystopia

Examines Russo-Soviet science fiction in literature and film. Within this popular genre, writers conceive and criticize social utopias, thus creating works situated between the poles of utopia and dystopia. Through discussions of Soviet and post-Soviet science fiction the course introduces a Russo-Soviet "alternative modernity" and studies its historical development. All readings are in English. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Russian Courses Taught in English

RUSS 3301 (3) Contemporary Issues in Russian Film

Examines the representation of contemporary Russian society in noteworthy Russian films of the last 20 years. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3301

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 3333 (3) Spies Like Us: Espionage in the Culture of the Cold War and Beyond

Explores the figure of the spy in Western and Soviet/post-Soviet imagination of the Cold War period and after. Focuses on the constructions and transformations of the "enemy" concept in modern and post-modern societies.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Russian Courses Taught in English

RUSS 3601 (3) Russian Culture Past and Present

Russian culture from the ninth century to the present. Focuses on interdisciplinary exploration of literature, folklore, art, architecture and music through study in St. Petersburg. Offered abroad only.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Russian Courses Taught in English

RUSS 3701 (3) Slavic Folk Culture: Ideals and Values in the Contemporary World

Explores contemporary Slavic and American folk practices and investigates the possible origins and consequences of such practices. Focuses upon the value systems these practices represent, and ways that core values help to define identities and cultures. Topics include folk religion, magic, healing, life cycle and calendar rituals and folk music. Taught in English.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Russian Courses Taught in English

RUSS 3705 (3) Crimes of Passion: Gender and Sexual Politics in Tolstoy's Russia

Examines the historical evolution of gender and sexual politics and the status of women in the late Imperial Russian culture, with particular attention to the writings of Leo Tolstoy and his masterpiece *Anna Karenina*. Topics-based survey considers debates around marriage, sexuality and gender equality through analysis of primary text by Tolstoy and his contemporaries, as well as secondary materials in gender studies, literary criticism and intellectual history.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Russian Courses Taught in English

RUSS 3900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Russian

RUSS 3930 (1-6) Russian Internship

Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Russian (RUSS) majors only.

Additional Information: Departmental Category: Russian

RUSS 4010 (4) Advanced Conversation and Composition 1

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency. Department enforced prerequisite: RUSS 3020 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: RUSS 3060 RUSS 5010

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Russian

RUSS 4020 (4) Advanced Conversation and Composition 2

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency. Department enforced prerequisite: RUSS 4010 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4060 RUSS 5020

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Russian

RUSS 4050 (3) Professional Russian

Introduces stylistic and idiomatic forms of Russian used in business, politics, media and the Internet. Develops new vocabulary with a special focus on fluency of speech and written communication skills. Offers immersion into the world of contemporary Russian media, politics and culture. Formerly RUSS 3050.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5050

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite RUSS 3020.

Additional Information: Departmental Category: Russian

RUSS 4060 (4) Advanced Russian for Heritage Speakers (Part 2)

Enhances heritage student competence and performance in Russian language. Offers intensive review of Russian grammar and focuses on developing advanced reading, writing and translation skills. Readings are selected from a wide range of contemporary writings that reflect current issues in Russia. Department enforced prerequisite: RUSS 3060 or RUSS 4010 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4020 or RUSS 5020

Additional Information: Departmental Category: Russian

RUSS 4120 (3) Russia after Communism: Post-Soviet Politics and Culture

Explores the process of the re-invention and re-shaping of the Russian national identity after the collapse of the communist society. Topics will include the formation of neoconservative and neo-imperialist agenda (Ukraine crisis), growth of the anti-western attitudes and the protest movement against Putin's politics. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5120

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 4210 (3) Topics in Russian Culture

Selected topics in Russian literature, film, art and music. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5210

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 4221 (3) Stalinism: Society and Culture

Examines Soviet society and culture of Stalin period (1929-1953). The Great Terror, communist ideology, shady, commercial practice, political intrigues and show trials, as well as many other aspects of Stalinism will be discussed. Course materials include historical studies, documents, memoirs, diaries, novels and films of or about the period. Taught in English.

Additional Information: Arts Sci Core Curr: Ideals and Values

Departmental Category: Russian Courses Taught in English

RUSS 4230 (3) Russian Cultural Idioms

Focuses on the critical analysis of the Russian cultural discourse through Russian idioms. Taught in Russian. Department enforced prerequisite: RUSS 2020 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5230

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Russian

RUSS 4301 (3) American-Russian Cultural Relations

Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English. S. context.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: United States Context
Departmental Category: Russian Courses Taught in English

RUSS 4401 (3) The Russian Jewish Experience

Examines the experience of Russian Jews from the late 19th century to the present through fiction and films dealing with challenges of co-existence of Jews and their neighbors; Bolshevik Revolution, Stalinism, Holocaust, post-Stalin period; place of Jews as individuals and a minority within Russian and Soviet society; and emigration to America and elsewhere at the turn of the century. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5401 and JWST 4401

Recommended: Prerequisite any 1000 or 2000-level undergraduate literature course.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Russian Courses Taught in English

RUSS 4431 (3) Dostoevsky

Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker and the greatest crime novelist in the world. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5431

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 4441 (3) Tolstoy

Examines the development of Tolstoy's thought and literary style through study of one of his novels and short works from different periods of Tolstoy's writing. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5441

Recommended: Prerequisite lower division literature course.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 4451 (3) Chekhov

Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5451

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 4471 (3) Women in 20th-21st Century Russian Culture

Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4471 and RUSS 5471

Recommended: Prerequisite lower level literature or culture course.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Russian Courses Taught in English

RUSS 4481 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present

Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5481 and IAFS 3621

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Russian Courses Taught in English

RUSS 4811 (3) 19th Century Russian Literature

Surveys background of Russian literature from 1800 to 1900. Russian writers and literary problems in the 19th century emphasizing major authors: Pushkin, Lermontov, Gogol, Dostoevsky, Turgenev, Tolstoy, and Chekhov. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4811

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Russian Courses Taught in English

RUSS 4821 (3) 20th Century Russian Literature and Art

Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4821

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Russian Courses Taught in English

RUSS 4831 (3) Contemporary Russian Literature

Acquaints students with the most representative works of Russian writers after the collapse of the Soviet regime. Examines the relationships between ideological concepts and aesthetics, and the treatment of moral and social issues in recent literary works. All readings are provided in translation. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Core Curr: Contemporary Societies

Departmental Category: Russian Courses Taught in English

RUSS 4841 (3) History of Modern Russian Drama

Examines Russian plays of the 20th and 21st centuries (from Chekhov to contemporary authors) in the context of the Western theatre theory. Surveys most influential directorial styles from Stanislavsky's "method" to contemporary verbatim theatre. All readings are in English. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5841

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 4851 (3) Critical Thinking: Russian Film and Society

Through structured discussions, selected readings and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5851

Recommended: Prerequisite RUSS 2221 or RUSS 3301 or FILM 3301.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 4861 (3) Absurd and Supernatural in Russian Literature

Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharmis, Bulgakov, Siniavskii, Petrushevskaiia and Pelevin, within contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams and Romanticism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 5861

Recommended: Prerequisite one lower level literature or culture course.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 4900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Russian

SCAN 1202 (3) Tolkien's Nordic Sources and the Lord of the Rings

Examines the Nordic aspect of J.R.R. Tolkien's work, especially *The Lord of the Rings*. Concentrates on the Nordic saga tradition, mythology, folklore and fairy tales Tolkien used as his sources. Students will explore the transformations of these sources from prehistoric times to contemporary cinematic adaptations, while paying special attention to cultural appropriations, national revisions and political alterations. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Nordic Studies Courses Taught in English

SCAN 1900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SCAN 2201 (3) Introduction to Modern Nordic Culture and Society

Provides a comprehensive introduction to modern Nordic culture and society. Surveys the history of Nordic countries and examines their culture using art, architecture, literature, and film. Studies social issues, environmental concerns, and political patterns. In profiling aspects of culture and society unique to Nordic countries, students arrive at a conception of a collective Nordic identity. Taught in English.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Nordic Studies Courses Taught in English

SCAN 2202 (3) The Vikings

Examines the social, cultural, technological, and artistic backgrounds of the Viking experience, charting the history of the period both within the Nordic region and Europe as well as North America. Additionally, looks at some of the lasting influences of the Vikings on Western civilization. Taught in English.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Nordic Studies Courses Taught in English

SCAN 2900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SCAN 3020 (3) Advanced Readings in Scandinavian

Develops the type of advanced reading knowledge of the four closely related Scandinavian languages (Swedish, Danish and the two Norwegian standards) that will prepare students for their senior thesis and for possible graduate work. Readings will help students see relationships and connections operating across national and linguistic borders within the Nordic region. Department enforced prerequisites: NORW 2120 and NORW 3900 or SWED 3900 (all minimum grade C-).

Additional Information: Departmental Category: Norwegian
Departmental Category: Swedish

SCAN 3110 (3) Topics in Contemporary Nordic Society and Culture

Provides insight into cultural adaptations, political struggles and social transformations taking place in the contemporary Nordic world. Subjects treated vary according to current developments in the region, student interest and faculty availability.

Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SCAN 3201 (3) Contemporary Nordic Society and Culture

Explores contemporary Nordic culture and society with special focus on Iceland. Emphasis is on the relationship between historical, geographic, artistic, and political forces in Iceland and their effects on culture and society. Provides insight into the life and attitudes of contemporary Icelanders and stresses their place in the global culture of today. Taught in English.

Recommended: Prerequisite SCAN 2201.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3202 (3) Old Norse Mythology

Surveys the mythology and heathen cult practices of the Old Norse world. Students learn to read mythological texts and study the major gods (Odin, Thor, Frey and Freyja, among others), along with other mythological beings. Examines and evaluates evidence for beliefs and cult practices in texts, art, archeological finds and other sources. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3203 (3) 19th & 20th Century Nordic Literature

Examines the Nordic region's influence on social realism, expressionism, and postwar literature, including such themes as women in society, nature and industrialization, and identity and angst. May include works by Ibsen, Strindberg, Dinesen, and Nobel Prize winners Lagerlof, Hamsun, Undset, and Lagerkvist. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3204 (3) Medieval Icelandic Sagas

Advanced introduction to medieval Icelandic saga with readings in the family, outlaw, skald, and legendary sagas as well as the main scholarly approaches to this unique literature. Topics include honor, blood feud, fate, sexuality/gender, oral composition, and legend. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3205 (3) Scandinavian Folk Narrative

Introduces the rich tradition of Scandinavian oral narrative. Looks at relationships between the various genres of oral narrative and their historical, social, and cultural contexts. Genres studied may include ballad, fairy tale, rural legend, and urban legend. Explores various interpretive methodologies. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3206 (3) Nordic Colonialisms

Examines Nordic colonial enterprise and the relationship between the Scandinavian center and colonial peripheries from the Arctic to the Caribbean, Africa, and India. Studies colonial and postcolonial cultures, and postcolonial criticism and theory. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3208 (3) Women in Nordic Society: Modern States of Welfare

Examines the role and status of women and marginalized social classes in the Nordic countries, whose societies have been heralded as egalitarian models since the twentieth century. Texts include a variety of media, from literature to sociological works to artifacts of political and popular culture. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3208
Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3209 (3) Contemporary Nordic Literature and Film

Advanced introduction to contemporary Nordic literature and film. Readings/screenings of recent translated Nordic texts and films, presenting a broad spectrum of contemporary issues, along with current critique and theoretical approaches. Topics: history, culture, translation, gender/sexuality, national identity, minority issues, etc. Taught in English.

Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SCAN 3301 (3) Radical Nationalism in Contemporary Northern Europe

Examines the current rise of National Socialists, white supremacists, ethnic separatists, anti-Islam activists and social and cultural ultraconservatives in northern Europe. Treats extremist nationalism as a social, cultural, aesthetic, intellectual and political movement. Consults scholarship from sociology, criminology and political science, as well as music, literature, art and film. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3630
Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3506 (3) Scandinavian Drama

Examines the many contributions of Scandinavian dramatists to world theater from the 18th century to the present. With emphasis on Holberg, Bjornson, Ibsen, Strindberg, and Bjorneboe, surveys Enlightenment comedy, national romanticism, realism, naturalism, symbolism, expressionism, and Brechtian epic theater. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Nordic Studies Courses Taught in English

SCAN 3631 (3) Arctic Society and Culture

Investigates representations of the Arctic in literature, art, cinema, media and scientific, and geographical writing over the past century and a half, spanning material from North America, Britain, continental Europe and the Nordic region. Interpretive approaches include ecocriticism; post-colonialism; literary studies; indigenous studies; visual, film and media theory; Cold War studies.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3631
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SCAN 3900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Nordic Studies Courses Taught in English

SWED 1010 (4) Beginning Swedish 1

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Swedish

SWED 1020 (4) Beginning Swedish 2

Department enforced prerequisite: SWED 1010 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: SWED 1120

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Swedish

SWED 1110 (4) Beginning Swedish 1 - Directed Independent Language Study

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Swedish history and contemporary culture and society.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Swedish

SWED 1120 (4) Beginning Swedish 2 - DILS

Continuation of SWED 1110 DILS. Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Swedish history and contemporary culture and society. Department enforced prerequisite: SWED 1110 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: SWED 1020

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Swedish

SWED 1900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Swedish

SWED 2010 (4) Intermediate Swedish 1 -DILS

Continuation of SWED 1120 DILS. Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Swedish history and contemporary culture and society. Department enforced prerequisite: SWED 1120 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Swedish

SWED 2020 (4) Intermediate Swedish 2 - DILS

Develops intermediate reading, writing, speaking and verbal comprehension skills. Uses the Directed Independent Language Study (DILS) model that combines in-class exercises and lectures with independent study. Reviews and continues content of SWED 2010. Directed independent language study course requires work outside of class. Department enforced prerequisite: SWED 2010 (minimum grade C-).

Additional Information: Departmental Category: Swedish

SWED 3010 (3) Advanced Swedish 1-DILS

Continuation of Intermediate Swedish 2. Provides advanced language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Exposes students to historical and modern Swedish culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: SWED 2020 - DILS (minimum grade C-).

Additional Information: Departmental Category: Swedish

SWED 3020 (3) Advanced Swedish 2 - DILS

Continuation of Advanced Swedish 1. Provides advanced language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Exposes students to historical and modern Swedish culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: SWED 3010 - DILS (minimum grade C-).

Additional Information: Departmental Category: Swedish

SWED 3900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Swedish

German Studies - Bachelor of Arts (BA)

The major in German studies is an interdisciplinary program focusing on study of the German language, its manifestations in history and its usage in the current cultural and social context; the literary, artistic and philosophical aspects of German culture in the past and the present; the major historical events and developments in Germany and its neighboring countries, and the current political institutions and dynamics in Germany within the broader European framework.

The following areas of knowledge are central to the undergraduate degree in German Studies:

- an awareness of the fundamental outlines of German history and culture;
- familiarity with the history of modern German literature from 1750 to the present;
- familiarity with developments in modern German-speaking Central Europe in art, cinema, architecture, law, science, and technology and
- the ability to critically examine such issues as the Nazi era and the Holocaust, migration, gender, disability, racial and ethnic difference, and Germany's place in the European Union.

In addition, students completing the degree in German Studies are expected to acquire:

- the ability to read German at a level at which critical literary and cultural analyses can be performed;
- the ability to write and speak German sufficiently to participate in critical discussions and write critical essays;
- the ability to speak and comprehend German well enough to participate in all situations in daily life, including cultural, educational, business, and professional sectors of German life.

Study Abroad

The department strongly recommends that all majors take part in study abroad. The university offers study abroad programs in Regensburg (academic year or spring semester) and Berlin (academic year or summer semester). Please consult with the major advisor. For more information on study abroad programs, see studyabroad.colorado.edu (<http://studyabroad.colorado.edu>).

Concurrent Degree Program BA/MA in German Studies

The concurrent BA/MA degree in German Studies recognizes the need for master's-level training upon entering the job market in a variety of

sectors that call for highly advanced proficiency in the German language, knowledge of the German-speaking central Europe and its cultures, and the skills afforded to BA and MA graduates in the Humanities (research, analysis, interpretation, translation, communication).

The degree gives highly motivated BA students the opportunity to earn an MA degree using an accelerated undergraduate program in combination with a fifth year of study. Applications can be obtained in the Germanic and Slavic office (McKenna 129). It is recommended that applications be turned in by the spring semester of the sophomore year.

Students must have an overall 3.25 GPA to apply to the program, and should have completed most of their MAPS/core requirements by the end of their sophomore year. No GRE is required.

For more information, see www.colorado.edu/gssl/german/undergraduate/concurrent-bama-degree-german-studies. (<http://www.colorado.edu/gssl/german/undergraduate/concurrent-bama-degree-german-studies>)

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

The major requirement in German Studies is 32 hours beyond GRMN 1020 (with grades of C- or above). Students design their own major in consultation with the undergraduate advisor and a faculty mentor. At least 18 hours taken toward the major must be completed at the 3000 or 4000 level. **GRMN 4550 MUST BE TAKEN AT CU BOULDER.**

Required Courses and Credit Hours

German Language Courses 14-17

14-17 credit hours above 1020, must include either GRMN 3020 or GRMN 3030, may include both GRMN 3020 and GRMN 3030

GRMN 2010	Intermediate German 1
GRMN 2020	Intermediate German 2 or GRMN 20: Intensive Intermediate German
GRMN 3010	Advanced German 1
GRMN 3020	Advanced German 2 ¹
GRMN 3030	Business German
GRMN 4010	Advanced Grammar and Stylistics ¹

German Culture, Literature and Other Electives (15-18 credit hours) 15-18

GRMN 4550	Senior Seminar: The Roles of Intellectuals and Academics in German Culture (required and must be taken at CU Boulder)
-----------	---

Take at least four German literature/culture courses from Group I and II (five if taking 14 language credits in Section A). At least two courses must be upper-division, and at least two must be in German: ²

Group I - Courses Taught in German:	
GRMN 3110	German Literature from the Avant-garde to the Postmodern
GRMN 3120	German Literature from the Enlightenment to Expressionism
GRMN 3130	Issues in German Philosophy and Literature
GRMN 3140	Current Issues in German Literature
GRMN 3150	Issues in German Politics and Literature
GRMN 3520	Open Topics in the Cultural Context
GRMN 3900	Independent Study

GRMN 3930	Internship
GRMN 4330	The Age of Goethe
GRMN 4340	Seminar in German Literature
GRMN 4450	Methods of Teaching German
Group II - Courses Taught in English:	
GRMN 1601	Germany Today (core: contemporary societies)
GRMN 1602	Metropolis and Modernity (core: literature and the arts)
GRMN 1701	Nature and Environment in German Literature and Thought (core: ideals and values)
GRMN 2301	Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich (core: historical context)
GRMN 2501	Miniatures of Modern Life: Introduction to Short Fiction (core: literature and the arts)
GRMN 2502	Representing the Holocaust (core: ideals and values)
GRMN 2503	Fairy Tales of Germany (core: literature and the arts)
GRMN 2601	Kafka and the Kafkaesque (core: literature and the arts)
GRMN 2603	Moral Dilemmas in Philosophy and Literature (core: ideals and values)
GRMN 3501	German-Jewish Writers: From the Enlightenment to the Present (core: human diversity)
GRMN 3502	Literature in the Age of Goethe (core: literature and the arts)
GRMN 3503	German Film Through World War II
GRMN 3504	Topics in German Film
GRMN 3505	The Enlightenment: Tolerance and Emancipation (core: ideals and values)
GRMN 3506	Tracing the Criminal: Crime in 19th C Society and Culture (core: historical context)
GRMN 3513	German Film and Society 1945-1989
GRMN 3514	German Film & Society After 1989
GRMN 3601	German Women Writers (core: human diversity)
GRMN 3702	Dada and Surrealist Literature (core: literature and the arts)
GRMN 4231	Sex, Love and Marriage in Literature and Philosophy
GRMN 4251	Marxism
GRMN 4253	Philosophy of Language
GRMN 4301	Gender, Race and Immigration in Germany and Europe (core: human diversity)
GRMN 4501	Seminar: Literature in Cultural Context
GRMN 4502	Nietzsche: Literature and Values (core: ideals and values)
GRMN 4503	Issues in German Thought
GRMN 4504	Goethe's Faust (core: literature and the arts)
JWST 4544	History of Yiddish Culture

Secondary Teacher Certification Program

Required for Students in the Secondary Teacher Certification Program:

GRMN 4450	Methods of Teaching German ³
GRMN 4460	High School German Teaching ³

Plus other requirements as stated by the School of Education

Total Credit Hours	32-35
---------------------------	--------------

- Students have the option of taking the exam *Zertifikat Deutsch als Fremdsprache* in GRMN 3020 and the Goethe-Zertifikat C1 in GRMN 4010.
- With the approval of the German program faculty advisor, one course from another department may be taken in lieu of one of the four courses, provided that the course has a direct link to German studies.
- GRMN 4450 and GRMN 4460 can be taken only after full admission to the teacher education program in the School of Education.

Study Abroad

The department recommends that all majors take part in study abroad. The university's program in Regensburg provides an academic year and spring semester study abroad program. The Berlin program offers an academic year and a summer study abroad opportunity. Please consult with a faculty advisor and visit the study abroad website at studyabroad.colorado.edu (<http://studyabroad.colorado.edu>) for program-specific information. Scholarships are available to help cover the costs of study abroad.

Graduating in Four Years

Course	Title	Credit Hours
Year One		
During the first year, students typically take GRMN 1010 and GRMN 1020 (8 credit hours) or GRMN 1030 (5 credit hours) which does not count toward their majors ³		
One lower level literature or culture course		3
	Credit Hours	3
Year Two		
GRMN 2010 & GRMN 2020 or GRMN 2030	Intermediate German 1, 2, 3 or Intensive Intermed German	5-8
One lower level literature or culture course		3
	Credit Hours	8-11
Year Three		
Study Abroad recommended		
GRMN 3010 & GRMN 3020 or GRMN 3030	Advanced German 1 or Business German	5-6
Upper level literature or culture course taught in German or English		3
	Credit Hours	8-9
Year Four		
GRMN 4550	Senior Seminar: The Roles of Intellectuals and Academics in German Culture	3

Two upper level literature or culture courses taught in German	6
Credit Hours	9
Total Credit Hours	28-32

- ¹ or placement credit - Students who place out of beginning and intermediate language requirements should see the Major requirements for further flexible options
- ² or placement credit - Students who place out of beginning and intermediate language requirements should see the Major requirements for further flexible options
- ³ Students who take intensive language courses (GRMN 1030 or GRMN 2030) may fulfill their additional language credits with GRMN 3030 or GRMN 4010.

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in German or Russian studies, students should meet the following requirements:

- Begin to study the language in the freshman year, or have received AP credit.
- In consultation with the major program advisor before the end of the drop/add period in the first semester, plan a tentative schedule of courses to be taken over eight semesters.
- Discuss progress toward the degree each semester with the major advisor.

Note: Although these requirements apply only in cases in which students are seeking to graduate under the terms of the four-year guarantee, they are good advice for all majors. Consult the program advisor about the major at any time.

German Studies - Minor

In German Studies, we focus on all areas of German culture and its crucial role in the formation of the modern world. A minor is offered in German Studies. Declaration of a minor is open to any student enrolled at CU-Boulder, regardless of college or school. A&S Policy on Enrollment in Undergraduate Language Courses (<http://www.colorado.edu/gsl/policy-enrollment-undergraduate-language-courses>)

Requirements

The requirements for a minor in German Studies are 20 hours (with grades of C- or above).

Required Courses and Credit Hours

GRMN 2010 & GRMN 2020 or GRMN 2030	Intermediate German 1 and Intermediate German 2 or Intensive Intermediate German	5-8
Students who take GRMN 2030 cannot also receive credit for GRMN 2010 and GRMN 2020, and must take one additional 3 credit GRMN course toward the minor, such that the total number of credits for the minor equals 20.		
GRMN 1601	Germany Today (core course)	3
GRMN 3010	Advanced German 1 (or any 3000-4000 level German literature, film, or culture course taught in German or English)	3

GRMN 3020	Advanced German 2 (or any 3000-4000 level GRMN literature, film, or culture course taught in German or English) ² or GRMN 3030 Business German	3
	One 3000-4000 level GRMN literature, film, or culture course taught in German	3
Students may not apply more than 9 hours of transfer credit (including 6 upper division credits) towards the minor. Transfer courses must be approved by the department.		
Total Credit Hours		20

NOTE: Students may not apply more than 9 hours of transfer credit (including 6 upper division credits) towards the minor. Transfer courses must be approved by the department.

NOTE: Students have the option of taking the exam *Zertifikat Deutsch als Fremdsprache* in GRMN 3020.

Nordic Studies - Minor

Courses are offered in English on Nordic culture and civilization. Courses are also offered in Finnish, Swedish and Danish language. In addition, there is an exchange program with Uppsala University in Sweden and with the University of Copenhagen in Denmark (DIS).

The language courses satisfy College of Arts and Sciences language requirements for the BA and BFA degrees.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

To declare a minor in Nordic Studies please meet with Christine Luft (christine.luft@colorado.edu) to start your application.

A minor in Nordic Studies requires the completion of 18 credit hours. A minimum of 9 credit hours must be taken in upper division courses. All courses used to fulfill requirements for the minor must receive a grade of C- or better; none may be taken pass/fail.

Required Courses and Semester Credit Hours

¹ NORW 2120 and NORW 3900 are not currently being offered by GSLL. SWED 1110, SWED 1120, SWED 2010 and SWED 2020 are currently being offered by GSLL.

² SCAN 3206, SCAN 3208 and SCAN 3209, may be counted either toward Language, Culture and Society or toward Literature, but not both.

Russian Studies - Bachelor of Arts (BA)

The major in Russian studies is an interdisciplinary program focusing on study of the current cultural and social context, and the literary, artistic, and historical aspects of Russian culture in the past and present. The aim of the language curriculum is to equip students to read, write, speak and understand Russian on a level allowing communication with natives and other users of the language. Before registering for a course, students should consult with a departmental advisor concerning appropriate placement.

Students interested in Russian studies should consider a double major in order to increase their career opportunities. Prospective teachers might combine Russian studies with a major in another foreign language, while those preparing for a career in government, business or social services should benefit from a combination of Russian studies and a social science or business major. Students structure their curriculum according to the departmental checklist for majors, in close consultation with a departmental advisor.

The following areas are central to the undergraduate degree in Russian:

- an awareness of the fundamental outlines of the history of Russian literature and culture from the Middle Ages to the present day;
- familiarity with the major Russian creative writers of the nineteenth and twentieth centuries;
- familiarity with the historical context of Russian literature and culture;

- an awareness of basic critical methodologies as they relate to the study of Russian literature.

In addition, students with a degree in Russian are expected to acquire:

- the ability to comprehend contemporary Russian, written or spoken, to a degree permitting sophisticated analysis of cultural texts;
- the ability to analyze Russian literary texts and give a reasoned response to them in literate English;
- the ability to write and converse in Russian at their own intellectual level.

Study Abroad

The department strongly recommends that all Russian majors take part in the university summer language program in St. Petersburg. For more information on CU Study Abroad programs, see studyabroad.colorado.edu (<http://studyabroad.colorado.edu>).

Courses Taught in English

A number of courses are offered in translation. These courses generally require no previous study in the language, history or culture of the area involved, and are open to all interested students, regardless of major.

Concurrent Degree Program

BA/MA in Russian Studies

Highly motivated undergraduates majoring in Russian studies at CU Boulder have the opportunity to enter a BA/MA program, thereby earning both the BA and the MA in five years. The concurrent degree program offers a unique academic credential designed to produce skilled graduates for a variety of occupations.

In most cases, students must make written application no later than April 1 of the sophomore year. A minimum GPA of 3.00 for all Russian Studies courses is required, as well as two letters of recommendation indicating strong potential for advanced, intensive work in Russian. BA/MA students are expected to take graduate courses in the fourth and fifth years only. Students should have completed most of their MAPS/ Core requirements by the end of the sophomore year. Only CU Boulder students may apply.

For more information, see www.colorado.edu/gsll/russian/undergraduate/concurrent-bama-degree-russian-studies (<http://www.colorado.edu/gsll/russian/undergraduate/concurrent-bama-degree-russian-studies>).

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

- Completion of at least 30 credit hours with grades of C- or better. (None may be taken as pass/fail.) At least 18 RUSS credit hours must be completed at the 3000 or 4000 level.
- Students may not receive credit for both RUSS 3060 and RUSS 4010 or RUSS 4020 and RUSS 4060. Choose either the RUSS 3060, RUSS 4060 sequence OR the RUSS 4010, RUSS 4020 sequence.
- Students are required to structure their curriculum for the major in close consultation with a departmental advisor. Students with advanced Russian language skills are strongly encouraged to meet with a departmental faculty advisor to discuss language placement.

Students who have Russian language transfer credit and/or students who are Russian language native or heritage speakers may enter the program at the upper-division level, up to RUSS 4010, with faculty permission.

- In the case of advanced language placement, students will be required to meet with the Russian faculty advisor for Russian course substitutions and recommendations. Students who place out of Russian language courses required for the major must replace the credits with additional coursework in Russian Studies. Any substitutions to major coursework must be pre-approved by the Russian faculty advisor.
- Graduating Russian Studies majors are asked to participate in an annual assessment exercise during their last (spring) semester at the university. We ask you to take the language and literature-culture exams to help evaluate the quality of the Russian Studies major. (You may also be interested in learning your level of language competence from the standardized online test.) You cannot study for the exams and they do not affect your course grades or graduation in any way.

NOTE: RUSS 1010 and RUSS 1020 do NOT count toward the 30 credit hours required for the major in Russian Studies.

NOTE: Study abroad is recommended after the second year of language study.

NOTE: Beginning or middle-level language course requirements may be met by transfer credit or by testing out of the course. Students who enter the program at the third-year level must complete at least 18 credit hours in residence in courses numbered 3000 or above with grades of C- or better. (None may be taken pass/fail.) Students who enter at and enroll in Russian language courses at the 3000- or 4000-level may not receive credit for lower-division Russian language courses, unless lower-division language course work was completed prior to registration for 3000- and 4000-level Russian language courses. Students may not receive credit for both RUSS 3060 and RUSS 4010 or RUSS 4020 and RUSS 4060.

Required Courses and Credit Hours

Track A: Russian Language and Culture

Required Russian Language	16
RUSS 2010 Second-Year Russian 1	
RUSS 2020 Second-Year Russian 2	
RUSS 3010 Third-Year Russian I	
RUSS 3020 Third-Year Russian II	
One of the following (19th century and earlier periods)	3

RUSS 4221	Stalinism: Society and Culture	
RUSS 4301	American-Russian Cultural Relations	
RUSS 4401	The Russian Jewish Experience	
RUSS 4471	Women in 20th-21st Century Russian Culture	
RUSS 4481	Rogues to Revolutionaries: Russian Rebels, Past and Present	
RUSS 4831	Contemporary Russian Literature	
Select one of the following:		3
RUSS 4431	Dostoevsky	
RUSS 4441	Tolstoy	
RUSS 4451	Chekhov	
RUSS 4841	History of Modern Russian Drama	
RUSS 4861	Absurd and Supernatural in Russian Literature	
One other 3000-4000 level Russian or GSLL culture/literature or language course, or course in another department pertaining to Russia, upon consent of advisor		3
Total Credit Hours		31-32

¹ Students may not receive credit for both RUSS 3060 and RUSS 4010 or RUSS 4020 and RUSS 4060.

Graduating in Four Years

TRACK A - RUSSIAN LANGUAGE AND CULTURE (36)

Course	Title	Credit Hours
Year One		
During the first year, students typically take RUSS 1010 and 1020 (8 credit hours) which does not count toward their majors.		0
One of the courses on 19th century or earlier periods		3
		Credit Hours 3
Year Two		
RUSS 2010 & RUSS 2020	Second-Year Russian 1 and Second-Year Russian 2 (or Study Abroad)	8
One of the courses on 20th-21st centuries		3
		Credit Hours 11
Year Three		
RUSS 3010 & RUSS 3020	Third-Year Russian 1 and Third-Year Russian II (or Study Abroad)	8

Elective 2000-4000 level RUSS or GSSL course	3
Credit Hours	11

Year Four

RUSS 4010 & RUSS 4020 or RUSS 3060 and RUSS 4060	Advanced Conversation and Composition 1 (or Study Abroad) or Advance Russian for Heritage Speakers (Part 1) and Advance Russian for Heritage Speakers (Part 2)	8
RUSS 4210 or RUSS 4230 or RUSS 4851 or RUSS 4050	Topics in Russian Culture or Russian Cultural Idioms or Critical Thinking: Russian Film and Society or Professional Russian	3
Credit Hours		11
Total Credit Hours		36

TRACK B - RUSSIAN LITERATURE AND CULTURE (32)

Course	Title	Credit Hours
Year One		
One 2000 level course on the aspects of Russian Culture		3
Credit Hours		3
Year Two		
RUSS 2010 & RUSS 2020	Second-Year Russian 1 and Second-Year Russian 2 (or Study Abroad)	8
One 2000 level Russian literature or film course		3
Credit Hours		11

Year Three

RUSS 4811	19th Century Russian Literature	3
RUSS 4821	20th Century Russian Literature and Art	3
One 3000-4000 level course on the aspects of Russian culture		3
Credit Hours		9

Year Four

Two 3000-4000 level RUSS literature or film courses		6
Elective 3000-4000 level RUSS or GSSL culture, literature or language course		3
Credit Hours		9
Total Credit Hours		32

TRACK C - HERITAGE SPEAKERS (32)

Course	Title	Credit Hours
Year One		
RUSS 3060 & RUSS 4060	Advanced Russian for Heritage Speakers (Part 1) and Advanced Russian for Heritage Speakers (Part 2)	8
One of the RUSS courses on 19th century or earlier periods OR Study Abroad		3
Credit Hours		11
Year Two		
One of the RUSS courses on 20th-21st centuries		3
One of the 2000-level RUSS culture courses		3
Credit Hours		6
Year Three		
One 4000 level RUSS literature course		3
Two 3000-4000 level RUSS culture courses		6
Credit Hours		9
Year Four		
One 3000-4000 level RUSS culture course		3
One elective 3000-4000 level RUSS or GSSL culture, literature or language course		3
Credit Hours		6
Total Credit Hours		32

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in Germanic or Russian studies, students should meet the following requirements:

- Begin to study the language in the freshman year, or have received AP credit.

- In consultation with the major program advisor before the end of the drop/add period in the first semester, plan a tentative schedule of courses to be taken over eight semesters.
- Discuss progress toward the degree each semester with the major advisor.

Note: Although these requirements apply only in cases in which students are seeking to graduate under the terms of the four-year guarantee, they are good advice for all majors. Consult the program advisor about the major at any time.

Russian Studies - Minor

The Russian minor introduces students to the basics of Russian Studies. Students fulfilling requirements for Russian minor have to take two years of Russian language and a number of survey courses in culture and literature.

Requirements

Declaration of a minor in Russian studies is open to any student enrolled at CU Boulder, regardless of college or school.

A minor in Russian requires the completion of 20 credit hours. All courses used to fulfill requirements for the minor must receive a grade of C- or better. (None may be taken pass/fail.) Students may not apply more than 9 hours of transfer credit (including 6 upper-division credit hours) toward the minor. Transfer courses must be approved by the department.

Required Courses and Semester Credit Hours

RUSS 2010	Second-Year Russian 1 ¹	4
RUSS 2020	Second-Year Russian 2 ¹	4
RUSS 3010	Third-Year Russian 1 (or any 3000-4000 level Russian literature, film or culture course)	4
One additional 2000-4000 level RUSS course		3
Select one of the following:		3
RUSS 2211	Introduction to Russian Culture	
RUSS 2221	Introduction to Modern Russian Culture	
RUSS 3601	Russian Culture Past and Present	
Select one of the following:		3
RUSS 4811	19th Century Russian Literature	
RUSS 4821	20th Century Russian Literature and Art	
Total Credit Hours		21

¹ Heritage speakers should take RUSS 3060 and RUSS 4060 as well as any other 4000-level Russian language course in lieu of RUSS 2010 and RUSS 2020. In this case, 18 credit hours will be sufficient for the minor if other requirements are fulfilled.

History

The history major is defined in such a way as to allow each student to structure a set of courses which is consistent with his or her individual interests and goals. A successful program in history will be one which has been thought through in advance rather than being a random array of classes which happen to fit into each semester's schedule. For more information, please see our sample schedule in a typical progression through the major (<http://www.colorado.edu/history/node/58/attachment>).

Once you have decided upon your area of interest, consider what courses in departments other than history might contribute to a rich yet integrated program. Thus, if you are interested in the history of England, courses in English literature, philosophy, and political science might be helpful. A person focusing on economic history might want to do some work in economics, math, and possibly geography. If you have not yet fulfilled your language requirement and are interested in Latin American History, Spanish might be the ideal language to take.

Bachelor's Degree

- History - Bachelor of Arts (BA) (p. 382)

Minor

- History - Minor (p. 384)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

MAPS Course: Social Science US Context

HIST 1018 (3) Introduction to Early Latin American History to 1810

Introduces students to the history of what is now called Latin America from about 1450 to the wars of independence in the nineteenth century. Examines pertinent aspects of the societies and cultures of indigenous people, the history of European conquest, and the most salient features of the Spanish and Portuguese colonial empires in America.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

HIST 1025 (3) American History since 1865

Explores political, social and cultural changes in American life since Reconstruction. Focuses on shifting social and political relations as the U.S. changed from a nation of farmers and small-town dwellers to an urban, industrial society; the changing meaning of American identity in a society divided by ethnicity, race and class; and the emergence of the U.S. as a world power.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: United States Context

Departmental Category: United States: Chronological Periods

MAPS Course: Social Science

MAPS Course: Social Science US Context

HIST 1028 (3) Introduction to Modern Latin American History since 1800

Introduces students to the history of Latin America from independence to the present. Investigates the social implications of various models of economic development, the opportunities and difficulties resulting from economic ties with wealthier countries, the consequences of ethnic, gender and class divisions, and the struggles of Latin Americans to construct equitable political systems.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

HIST 1051 (3) The World of the Ancient Greeks

Surveys the emergence, major accomplishments, failures and decline of the world of the ancient Greeks, from Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000-30 B.C.)

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1051

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: Europe: Ancient and Medieval

HIST 1061 (3) The Rise and Fall of Ancient Rome

Surveys the rise of ancient Rome in the eighth century B.C. to its fall in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1061

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: Europe: Ancient and Medieval

HIST 1113 (3) Introduction to British History to 1660

Deals with Roman, medieval and early modern periods. Covers the demographic, economic, social patterns, political and religious developments, and cultural changes that contributed to the formation of the English nation.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Europe: Specific Countries

HIST 1123 (3) Introduction to British History Since 1660

Deals with the period from the 17th century to the present. Political, economic, social and imperial developments that contributed to creation of the modern industrial and democratic state are the major issues covered.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: Europe: Specific Countries

HIST 1218 (3) Introduction to Sub-Saharan African History to 1800

Provides an introduction to African history, beginning with early man and ending in 1800. Moves rapidly through civilizations as different as Ancient Egypt, Mali, Oyo and the Cape Colony, touching on important developments and highlighting themes relevant to the history of Africa as a whole. Including migration, technology, environment, trade, gender, religion, slavery and more.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

HIST 1228 (3) Introduction to Sub-Saharan African History Since 1800

Introduces students to the history of Sub-Saharan Africa from 1800 to the present. Major topics of study included the trans-Atlantic slave trade, African state-building, European colonialism, African responses to colonialism and issues facing independent African nations, ranging from debt to HIV/AIDS.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

HIST 1308 (3) Introduction to Middle Eastern History

Interdisciplinary course that focuses on medieval and modern history of the Middle East (A.D. 600 to the present). Introduces the Islamic civilization of the Middle East and the historical evolution of the region from the traditional to the modern eras. Covers social patterns, economic life, and intellectual trends, as well as political development.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 1438 (3) Introduction to Korean History

Surveys the history of Korea from the ancient period to the early twenty-first century. Topics will include: transnational political and cultural origins of Korea, transformation of gender relations, and effects of wars and colonial experience. Special attention given to the transnational character of historical developments in Korea, as well as historical debates involving neighboring countries in East Asia.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 1518 (3) Introduction to South Asian History to 1757

Introduces the history of South Asia, providing a general acquaintance with the narratives and interpretations of ancient and medieval history of the Indian subcontinent from the rise of the Indus Valley Civilization in 3500 BCE to the end of the Mughal Empire in 1757 CE. Intended for students with little or no prior knowledge of the region.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 1528 (3) Introduction to South Asian History since 1757

Introduces the history of modern South Asia from 1757 to the present. Examines themes such as the nature of British colonial state formation in South Asia, social transformation under British rule, modes of anticolonial resistance movements, particularly Mahatma Gandhi's nonviolent civil disobedience movement, Muslim nationalism and the formation of Pakistan, and current political conflicts involving India, Pakistan and Afghanistan.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 1618 (3) Introduction to Chinese History to 1644

Introduces students to the history of China from Neolithic period to Ming period (1368-1644). Investigates the social patterns, gender relations, economic structure, intellectual trends, and political developments of China. Pays special attention to China's long-standing interaction with the rest of the world, which played a crucial role in the historical development of Chinese society.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 1626 (3) Introduction to Central and East European History since 1770

Examines major themes and events in the history of East-Central Europe from the late 1700s to the present. Themes include the impacts of nationalism, fascism, liberal democracy and communism in shaping the history of the region. Topics include World War I, World War II and the Holocaust, the Cold War, the fall of Communism, the Ukrainian revolution and more.

Equivalent - Duplicate Degree Credit Not Granted: CEES 1626

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Europe: Specific Countries

HIST 1628 (3) Introduction to Chinese History since 1644

Introduces students to modern Chinese history and culture, from the 17th century to the present. Considers the pertinent aspects of modern China, focusing on its social patterns, economic structure, intellectual trends and political developments.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 1708 (3) Introduction to Japanese History

A broad interdisciplinary survey of the history of Japan from earliest times to the 20th century. Explores the development of political institutions, social structures, cultural and religious life, economic development, and foreign relations in an historical perspective.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 1800 (3) Introduction to Global History

Applies a broad perspective to the global past in order to illuminate how common historical patterns and processes as well as unique elements shaped the human experience. Using a thematic approach, introduces highlights cross-cultural interactions among societies, and, when relevant, how historical processes that began centuries ago still impact the contemporary world. Topic will vary by semester. Department enforced prerequisite: 3 hours of any history coursework.

Requisites: Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) History (HIST) majors and minors only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 1818 (3) Introduction to Jewish History: Bible to 1492

Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1818 and RLST 1818

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 1828 (3) Introduction to Jewish History since 1492

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and anti-semitism.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1828 and RLST 1828

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context
Departmental Category: World Areas: Specific Regions

HIST 1830 (3) Global History of Holocaust and Genocide

Examines the interplay of politics, culture, psychology and sociology to try to understand why the great philosopher Isaiah Berlin called the 20th century, "The most terrible century in Western history." Our focus will be on the Holocaust as the event that defined the concept of genocide, but we will locate this event that has come to define the 20th century within ideas such as racism, imperialism, violence, and most important, the dehumanization of individuals in the modern world.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1830 and RLST 1830

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Methodological, Comparative, and Global

HIST 2015 (3) Themes in Early American History

Examines major themes in the development of colonial societies in North America from the 15th to the early 19th centuries. Explores intercultural relations, economic development, labor systems, religion and society, and family life. Specific course focus may vary.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: United States Context

Departmental Category: United States: Chronological Periods

HIST 2100 (3) Revolution in History

Examines the causes, character, and significance of political revolution in world history. Concentrating on one of the major revolutions of modern history, it examines why revolutions occur, who participates in revolution, and to what effect. Specific course focus varies.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Methodological, Comparative, and Global

HIST 2110 (3) History of Early Modern Societies

Examines major themes in Early Modern history in a variety of global contexts. Issues to be explored could include intellectual developments, religion, popular culture, social history, economic and political changes, and states and warfare, usually in a specific region or nation (i.e. Europe, Latin America, the Atlantic World, Spain, Russia, China, Japan, etc.). Topics vary in any given semester.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Methodological, Comparative, and Global

HIST 2126 (3) Issues in Modern U.S. Politics and Foreign Relations

Traces the historical development of modern U.S. politics and foreign relations. Analyzes subjects such as the Cold War, the Vietnam War, the War on Terror, and the relationship between foreign and domestic politics, and the developing meaning of political conservatism, liberalism, and radicalism in the U.S. Explains the impact of race, gender, class, and immigration. Topics vary in any given semester.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 1

HIST 2166 (3) The Vietnam Wars

Traces the causes, course, and outcome of the wars in Vietnam from 1940 until 1975. Explains the successes of the revolutionaries and the failures of the French and Americans. Analyzes the development of Vietnamese nationalism, French colonialism, and U.S. intervention.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4166

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 1

Departmental Category: Asia Content

HIST 2170 (3) History of Christianity 1: To the Reformation

General introduction to the history of Christianity from its beginnings through the first period of the Protestant Reformation. Examines religious life and the church in relation to its social and cultural setting.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context

Departmental Category: Methodological, Comparative, and Global

HIST 2220 (3) History of War and Society

Focuses on war and society in a variety of global contexts. Explores the character, origins, and social, political, and intellectual impacts of war in contexts ranging from several centuries of international conflict to the experience of individual nations in specific wars. Topic varies in any given semester; contact Department of History for details.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context

Departmental Category: Methodological, Comparative, and Global

HIST 2326 (3) Issues in the History of U.S. Society and Culture

Examines the origins, development, and impacts (social, political, cultural, economic, etc.) of significant issues and themes in the cultural, intellectual, and/or social history of the United States from independence to the present day. Explains the impact of race, gender, ethnicity, and class on these issues. Topics vary in any given semester.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 1

HIST 2437 (3) African American History

Surveys African American history. Studies, interprets and analyzes major problems, issues and trends affecting African Americans from about 1600 to the present.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2432

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 2

HIST 2516 (3) America Through Baseball

Baseball could not have existed without America. Explains how the game fit into the larger context of social, cultural, economic and political history from the 19th century to the present. Studies the events and people who made baseball the national pastime.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4556

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 1

HIST 2616 (3) History of Gender in America

Introduces the social and cultural construction of femininity and masculinity in America from 1500 to the present. Explores gender as a status acquired and performed through tasks, clothing, adornment and bodily movement. Examines gender ideals, expression and practices such as gender crossing, gender bending and gender plan.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Human Diversity

Departmental Category: United States: Topical Courses 1

HIST 2629 (3) China in World History

Examines the multiple connections between Chinese history and other parts of the world over the course of China's long history. Specific course focus may vary by instructor/term.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 3012 (3) Seminar in Modern European History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Modern

HIST 3018 (3) Seminar in Latin American History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 3020 (3) Historical Thinking & Writing

Develops the research techniques and habits of mind required to succeed in the History major, honing students' critical, analytical, and synthetic skills while introducing them to History as a discipline and a way of understanding the world. Students practice the kinds of writing required in upper-division History classes. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prereq courses of HIST 1800 and ARSC 1080 or 1150 or CLAS 1020 or ENGL 1001 or PHIL 1500 or WRTG 1100 or 1150 or 1250 (all min grade C-). Restricted to students with 27-180 credits (Soph, Jr, or Sr) History (HIST) majors only.

Additional Information: Arts Sci Core Curr: Written Communication

Departmental Category: Methodological, Comparative, and Global

HIST 3109 (3) Seminar in Asian History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 3110 (3) Honors Seminar

Practical historiography for students who wish to write a senior honors thesis. Emphasizes choice of topic, critical methods, research, organization, argumentation, and writing.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Arts Sciences Honors Course

Departmental Category: Methodological, Comparative, and Global

HIST 3112 (3) Seminar in Renaissance and Reformation

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Modern

HIST 3113 (3) Seminar in Medieval and Early Modern English History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 3115 (3) Seminar in Early American History**Repeatable:** Repeatable for up to 6.00 total credit hours.**Requisites:** Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).**Recommended:** History GPA of 2.0 or higher.**Additional Information:** Departmental Category: United States: Chronological Periods**HIST 3116 (3) Seminar in American Diplomatic History****Repeatable:** Repeatable for up to 6.00 total credit hours.**Requisites:** Requires prerequisite course HIST 3020 (minimum grade C-). HIST 3516 (3) American Culture and Reform, 1880--1920

Addresses the issues of reform, religion, and culture that emerged as a 19th century world view confronted a 20th century America.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 3616 (3) Seminar in U.S. Women's History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 3628 (3) Seminar in Recent Chinese History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 3713 (3) Seminar in Russian History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 3718 (3) Seminar in Japanese History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 3800 (3) Seminar in Global History

Organized around themes that change year to year, this seminar allows students to explore and research processes, phenomena, and events of global significance in historical context. Stress will be upon subjects that span multiple world areas. Possible topics include: the international arms trade; slavery; health and disease; youth culture; women's rights; genocide. See department for current theme.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 3840 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 3841 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 3842 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Europe: Modern

HIST 3843 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Europe: Specific Countries

HIST 3844 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Europe: Topical

HIST 3845 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: United States: Chronological Periods

HIST 3846 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 3847 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 3848 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 3849 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 4013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5013

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4018 (3) Aztecs, Incas, and the Spanish Conquest of the Americas

Building upon contemporary texts and modern histories of both famous and ordinary people, this course examines the indigenous empires known as the Aztecs and the Incas. It also examines the encounter of Europeans and native people, following the history of exploration and conquest from the time of Columbus to about 1550. Equal consideration is given to the course's three components: Aztec, Inca and the Spanish conquest.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1018 or HIST 3020.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4020 (3) Topics in Comparative History

Explores historical themes from a comparative perspective. Encourages students to think more analytically about historical change. Consult current online schedule for specific topics. Often team-taught by more than one faculty.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite two 4000-level History courses in differing content areas.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and CLAS 5021

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and CLAS 5031

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite CLAS 1051 or CLAS 1509 or CLAS 2039 or CLAS 4139 or CLAS 4149 or CLAS 2041 or CLAS 4021 or CLAS 4041 or HIST 1051 or GREK 3113.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4040 (3) The History of Space Exploration and Defense

This course examines the development and impact of American, Soviet/Russian, and European civilian and military space activities from the dawn of the space age to the space challenges of the 21st century.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and CLAS 5041 and PHIL 4210

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite CLAS 1051 or CLAS 1061 or HIST 1011 or HIST 1051 or HIST 1061 or PSCI 2004 or PHIL 3000.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4048 (3) Latin American Revolutions

Examines the origins, development and continuing influence of 20th-Century Latin American revolutionary movements, with a focus on placing these struggles in comparative historical context. Explores various approaches to revolution and the general role of left political formations in Latin America. Specific focus can vary by semester with examples drawn from various Latin American countries, including Mexico, Guatemala, Cuba, Chile and Nicaragua.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5048

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1018 or HIST 1028 or HIST 3020.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4050 (3) A Global History of World War II

Examines World War II in a global perspective. This era witnessed transformations in the social, political and economic orders across the globe. Traces the domestic and international developments, including military issues, that shaped the period in Europe, Asia, Africa and North America and assesses the war's legacy.

Requisites: Requires prerequisite course of HIST 1012 or 1025 or 1028 or 1123 or 1228 or 1308 or 1528 or 1628 or 1708 or 1800 or 1828 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

Departmental Category: Asia Content

HIST 4053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5053

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the east as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5061 and CLAS 4061 and CLAS 5061

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence, and the selective use of comparisons with better known societies. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and CLAS 5071

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republic government. Readings are in the primary sources. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and CLAS 5081

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4083 (3) Revolution and Nationalism in Modern Ireland

Surveys Irish nationalist movements since the eighteenth century, treating constitutional nationalism, revolutionary republicanism and Gaelic cultural movements while also examining the development of Unionism in Ulster as a response to political and cultural nationalism. Emphasizes the political, religious and cultural roots of the current sectarian crisis in Northern Ireland and analyzes that crisis up to the present day.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4091 (3) The Roman Empire

Studies Imperial Roman history beginning with the Roman Revolution and ending with examination of the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the Empire.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and CLAS 5091

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4109 (3) World War II in Asia and the Pacific

For Asia, World War II began with the Mukden Incident (1931), resulting in the Japanese domination of Manchuria and leading to a full-scale war between China and Japan in 1937. Only after the Japanese attacked the U.S. Pacific fleet at Pearl Harbor four years later did the United States enter the war. Discusses the various socioeconomic and political factors leading to the war in Asia, examines the nature of the conflict on the Asian mainland and in the Pacific, and assesses legacy of the war on all those involved.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 4116 (3) History of U.S. Foreign Relations, 1865-1940

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5116

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4117 (3) Colorado History

Presents the story of the people, society, culture, and environment of Colorado from the earliest Native Americans, through the Spanish influx, the fur traders and mountain men, the gold rush, railroad builders, the cattlemen and farmers, the silver boom, the twentieth-century tourists, city-dwellers, workers and activists. Highlights the historical origins of twenty-first century institutions, problems, challenges, and opportunities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4118 (3) History of Mexico to 1821

Studies Mexican history beginning with roots and evolution of pre-Columbian civilizations and concluding with the events of Mexican independence in 1821. Emphasizes society and culture of the Aztecs and Mayans, the Spanish conquest of Mexico, and the colonial regime of New Spain.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4122 (3) Europe During the Renaissance

Explores the history and culture of Western Europe, 1300-1520. Comprehensive in scope, with analysis of political, economic, social, religious, intellectual and artistic matters. Discusses significance of the Renaissance for origins of modern civilization.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Departmental Category: Europe: Modern

HIST 4123 (3) Medieval England

Treats the major developments in English history from the Anglo-Saxon period through the 15th century. Emphasizes late medieval English society during the 13th and 14th centuries.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4125 (3) Early American History to 1763

Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5125

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4126 (3) History of U.S. Foreign Relations Since 1941

Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5126

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4128 (3) The History of Modern Mexico Since 1821

Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5128

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1028 or HIST 3020.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4131 (3) The Origins of Christianity

Surveys the sources for the development of ancient Christianity from the ministry of Jesus Christ to the conversion of the emperor Constantine in the early 4th century. Through lectures and a close reading of primary source materials in translation, students will examine the social activity and theological development of early Christians in their Roman and Jewish context.

Requisites: Requires prerequisite course of HIST 1011 or HIST 1061 or HIST 2170 or CLAS 1061 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4133 (3) The Tudors: British History 1485-1603

Deals with the history of England from 1485 to 1603. Examines patterns of daily life, the impact of the Reformation and the Renaissance and the development of Parliament and the monarchy under the Tudor rulers, especially Henry VIII and Elizabeth.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4143 (3) The Making of Great Britain: British History 1603-1714

Covers the history of the British Isles from 1603 to 1714, the era of the English Civil War and the Glorious Revolution. Traces economic and social relationships, cultural change and religious and political conflict under the Stuart monarchs.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1012 or HIST 1113 or HIST 1123.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4146 (3) U.S. Military History since 1898

Examines America's national defense and war efforts from the Spanish American War to the present, emphasizing causes and consequences of modern conflicts, and the impact of military activities on American society.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4153 (3) Emergence of Modern Britain, 1688-1851

Surveys British history from the Revolution of 1688 to the Great Exhibition in 1851. Topics include creation of the United Kingdom, traditional popular culture, birth of a consumer society, the British Enlightenment, the Evangelical Revival, loss of the American colonies, imperial expansion in Asia, war with Revolutionary and Napoleonic France, the Industrial Revolution, and the impact of utilitarianism and political radicalism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1113 or HIST 1123.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4158 (3) History of Modern Brazil

Surveys the post independence history of 19th and 20th century Brazil. Looks at the development of Brazilian nationalism and political institutions and focuses heavily on race, ethnicity, gender and sexuality in Brazil, understanding how different peoples have settled and accommodated themselves to the Brazilian environment. Finally, it will look at Brazilian economic development and its consequences at the beginning of the 21st century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4166 (3) The Vietnam War in Politics and Culture

Examines America's second-longest and most divisive war from the beginning of the U.S. involvement in the 1950s to the repercussions echoing into the 1980s. Considers the global context, motives, and evolution of U.S. involvement, support for and opposition to the war at home, the war's repercussions in international policy and domestic politics, and representations of the war in popular culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 2166

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

Departmental Category: Asia Content

HIST 4190 (3) French Connections: Contemporary France and America in Historical Context

Faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States. Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3500

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Methodological, Comparative, and Global

HIST 4205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5205

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4212 (3) The Age of Religious Wars: Reformation Europe, 1500-1648

Traces the history of Europe from the end of the Hundred Years War through the Thirty Years War. During this period Europe experienced tremendous changes including emerging religious heresies, the advent of the Spanish Inquisition, violent civil wars, the witch craze, and the Thirty Years War, a precursor to the World Wars of the 20th century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Departmental Category: Europe: Modern

HIST 4215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5215

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4217 (3) The American West in the 19th Century

Explores cultural, social and political interaction in the American West during the 19th century. Themes include environmental change; conflict and syncretism across race, class, and gender lines; mythic images, and their relationship to the "Real" West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4218 (3) Lost Kingdoms & Caliphates: West Africa to 1900

Investigates the formation and dissolution of West Africa's kingdoms, caliphates and stateless societies during the era of the trans-Atlantic and trans-Saharan slave trades. Through a survey of oral and written sources, this course examines West Africa's geopolitical transformation in warfare, jihad, trade and slavery, especially in relation to the African Diaspora to the Americas and Muslim world.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4222 (3) War and the European State, 1618-1793

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5222

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Modern

HIST 4223 (3) The French Revolution and Napoleon

Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades of revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5223

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4227 (3) The American West in the 20th Century

Explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental change, urbanization, immigration, and cultural formation.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4232 (3) From Absolutism to Revolution in Europe, 1648-1789

Studies the history of Europe from the end of the Thirty Years War through the outbreak of the French Revolution. Central themes include the establishment of more centralized, increasingly bureaucratic states; global expansion and economic commercialization; cultural developments such as the Scientific Revolution and the Enlightenment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123.

Additional Information: Departmental Category: Europe: Modern

HIST 4233 (3) History of France since 1815

Examines the ongoing struggle between the revolutionary and counter-revolutionary traditions of France and how it shaped the political history and affected the social, cultural and intellectual character of the nation from 1815 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4235 (3) Jacksonian America

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5235

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4238 (3) History of Southern Africa

Examines the history of southern Africa history from the earliest times to the present. Short background readings and lectures cover southern African's history and class discussions of novels are layered over these basics. Topics of study include Cecil Rhodes and the diamond/gold mines; Shaka and the Zulu "nation"; apartheid; Nelson Mandela and the anti-apartheid movement; issues facing South Africa today.

Requisites: Requires prerequisite course of HIST 1218 or HIST 1228 or HIST 3020 or ANTH 1150 or ANTH 3100 or ANTH 4630 or GEOG 3862 or PSCI 3082 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4258 (3) Africa under European Colonial Rule

Looks at the British, French, Portuguese and German empires that undertook the "Scramble for Africa" in the late 19th century. Themes include slavery and the slave trade; colonization and "pacification"; African resistance to European rule; missionaries and converts; decolonization and anti-colonial uprisings; issues facing Africa today, including oil, war and the Rwandan genocide.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1218 or HIST 1228 or HIST 3020 or ANTH 1150 or ANTH 3100 or ANTH 4630 or GEOG 3862 or PSCI 3082.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4303 (3) Venice and Florence during the Renaissance

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5303

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4312 (3) 19th Century Europe

Concerned with major social, political and cultural developments in Europe from circa 1800 to the outbreak of World War I. Special emphasis is placed upon the Napoleonic experience, the rise of modern nationalism, romanticism, Darwinism and its social applications, the Industrial Revolution, imperialism, the emergence of modern ideologies, and the background of World War I.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Modern

HIST 4313 (3) History of Modern Italy

Examines the major historical, economic and social factors that have shaped the identity of modern Italy, from the enthusiasm of young patriots during Italy's unification in the 1860s to the discontent and domestic terrorism of the 1960s-1980s. Focuses on Mussolini, the Fascist movement and on World War II, as well as the changing role of women. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4250

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4315 (3) Civil War and Reconstruction

Describes the forces at work in the antebellum period that led to sectional warfare; social, economic, and political changes effected by the war; the American agony of reconstruction; and the long-range results of that difficult era.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4320 (3) The History of the Mediterranean, 1000-1600

Familiarizes students with the Mediterranean ecumene covering concepts such as the Renaissance, the Crusades, traders and travelers, religions and cities. Explores both conflicts (military, confessional) and exchanges (commercial, artistic, scientific) thus helping students think cross culturally, comparatively and thematically. Emphasizes the Mediterranean contribution to historical developments of western Europe, the Middle East, and North Africa.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1061 or HIST 1308 or HIST 4061 or HIST 4071 or HIST 4081 or HIST 4091 or HIST 4711.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4326 (3) Epidemic Disease in US History

Focuses on the impact of infectious epidemic disease on American history, from smallpox and cholera to influenza, AIDS and Ebola. Addresses early depopulation of the Americas; contagion and social upheaval; interpretations of pestilence; social construction of disease; urbanization; doctors and alternative practitioners; public health; prejudice and infection; the ethics of quarantine; public versus individual interests; and the paradox of prevention.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4328 (3) The Modern Middle East, 1600 to the Present

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5328

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1308.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4329 (3) Islam in the Modern World: Revivalism, Modernism, and Fundamentalism, 1800-2001

Examines the more important movements of reform in Muslim world (including Africa, the Middle East and India) from the 18th century to the present, and their origins and intellectual import. Due to the trans-regional nature of this broad movement of reform, particular attention is paid to how these movements related to local political, economic and social contexts, and how they, in turn, moved across larger networks of oceanic commerce and trade. Concludes with extended case studies of Islamic reformism in modern Egypt and India, and their ultimate influence on the politics of contemporary Islamist movements, especially the intellectual position of Ussama B. Ladin.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1308.

Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 4336 (3) Nineteenth-Century American Thought and Culture

Examines the emergence of intellectual traditions and cultural trends in their social and political contexts from the early republic to the beginning of the modern era. Addresses developing arguments about democracy, religion, transcendentalism, gender, race, union/disunion, the Darwinian revolution, utopia/dystopia realism and naturalism in literature and the arts.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4338 (3) History of Modern Israel/Palestine

Explore the history culture, and politics of this crossroads of Europe and Asia from the late Ottoman period to the present. Topics include: nationalism and colonialism, development of Zionist ideology, Palestinian nationalism, the Jewish community (Yishuv) under British rule, the founding of the State of Israel, Arab-Israeli and Palestinian-Israeli relations, Israel's minorities, and the conflict of religion and state.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4338

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4339 (3) Borderlands of the British Empire

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5339

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123 or HIST 1228 or HIST 1308 or HIST 1528.

Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 4343 (3) Spain and Portugal during the Golden Age

Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 4064.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5343

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1018.

Additional Information: Departmental Category: Europe: Topical

HIST 4346 (3) Twentieth-Century American Thought and Culture

Examines the emergence of intellectual traditions and cultural trends in their social and political contexts from the beginning of the modern era through the onset of the postmodern. Addresses developing arguments about democracy, science, race, gender, faith, American identity, radicalism and conservatism, modernist thinking and artistic expression, and the role of intellectuals in society.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4348 (3) Topics in Jewish History

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4348

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4349 (3) Decolonization of the British Empire

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5349

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1123 or HIST 1228 or HIST 1308 or HIST 1528 or HIST 4053 or HIST 4238 or HIST 4258 or HIST 4328 or HIST 4329 or HIST 4338 or HIST 4339 or HIST 4538 or HIST 4548 or HIST 4558.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 4366 (3) Culture Wars: Modernism, Mass Culture, and the Modern U.S.

Examines how U.S. public moralists, intellectuals, and artists from the end of the nineteenth century to World War II both celebrated and attacked the rise of two characteristic features of modernity: mass culture (amusement parks, popular music, radio, movies), and modernist literary and artistic expression. Addresses how Americans both constructed and violated the line between "popular" and "high" culture.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4378 (3) History of Modern Jewish-Muslim Relations

Examines the modern history and culture of Jewish communities under Islamic rule in the Middle East and North Africa; Jews' and Muslims' encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, diaries, newspapers and films.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4378

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4412 (3) Europe, 1890-1945

Examines the origins, character and significance of the First and Second World Wars for the major nations of Europe during the first half of the 20th century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Modern

HIST 4414 (3) European Thought and Culture, 1750-1870

Explores major developments in European thought from the Enlightenment to Nietzsche. Special attention given to the individuals whose ideas have had the greatest influence on modern intellectual history, e.g., Rousseau, Hegel, Herder, Marx, Kierkegaard, Baudelaire, Darwin, and others.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Topical

HIST 4415 (3) Teddy Roosevelt's America - the U.S. from 1877 to 1917

Examines the social, economic, political, and cultural history of the United States from the end of Reconstruction to the eve of World War I. Topics include the struggles of labor and industry, race and immigration, western and environmental issues, city life and new technologies, feminism and Progressivism, and Indian wars and imperialism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025 or ENV5 1000.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4416 (3) Environmental History of North America

Examines how people of North America, from precolonial times to the present, interact with, altered, and thought about the natural world. Key themes include Native American land uses; colonization and ecological imperialism; environmental impacts of food and agriculture; industrialization, urbanization and pollution; energy transitions; cultures of environmental appreciation; the growth of the conservation and environmental movements.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4422 (3) World War I in Europe

Examines the origins of World War I; the military, social and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the 20th century world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5422

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Modern

HIST 4423 (3) German History Since 1849

Cultural, political and social history of Germany since 1849. Emphasizes German unification, Bismarckian foreign policy, the rise of neoromanticism, Weimar politics and the rise of national socialism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4424 (3) Modern European Thought and Culture, 1870-Present

Emphasizes Nietzsche and the youth revolt against middle class society, the literary and artistic avant garde (impressionism to existentialism), the psychoanalytic movement, the European right and left, and post-WWII European thought.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Topical

HIST 4425 (3) United States History, 1917-1945

Examines U.S. history from World War I through World War II. Key themes include: warfare; the rise of the modern state; consumer culture; the shift from conservative politics to the New Deal liberalism; the women's movement; immigration restriction; segregation; the Great Migration, and civil rights; conflicts between secular modernism and religious fundamentalism; and new technologies such as the automobile.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4433 (3) Nazi Germany

Focuses on the political, social, cultural, and psychological roots of national socialism, with the nature of the national socialist regime, and those politics and actions that came directly out of its challenge to values central to Western civilization. Studies how Nazism came out of this civilization.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4435 (3) United States History, 1945-1973

Examines the History of the United States during the Cold War, with an emphasis on social and cultural issues at home. Also addresses the economic and political evolution of the American people and the nation's role in world affairs.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4437 (3) African American History, 1619--1865

Explores the history of Africans in America from the first arrivals to emancipation, and their role in the social, cultural, economic, and political evolution of the United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4442 (3) Europe since 1945

Explores Europe from the end of World War II through the present day. Topics include postwar reconstruction; the cold war; anticommunist opposition and new social movements; consumer culture and punk music; the fall of communism; the Yugoslav wars; European unity.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Modern

HIST 4444 (3) Topics in Modern European Thought

Explores a selected theme in European thought since the Enlightenment. Topics vary each term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Topical

HIST 4445 (3) United States History since 1973

Traces political, diplomatic, economic, and social developments in the United States from 1973 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4454 (3) Jewish Intellectual History

Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4454

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Topical

HIST 4511 (3) Europe in the Dark Ages (400-1000 A.D.)

Examines the history of Europe from the fall of the Roman Empire to the turn of the first millennium. Treats social, political and religious transformations in the barbarian kingdoms, and considers the persistence of Roman institutions and culture and the impact of Christianity in northern Europe.

Requisites: Requires prerequisite course of HIST 1011 or HIST 2170 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4516 (3) U.S. Society in the 19th Century

Concerned with the American family and community in the changing social environments of the 19th century. Examines families of different ethnic and class backgrounds, observing how they are changed by new economic conditions, reform, or new political institutions.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4521 (3) Europe in the High Middle Ages (1000-1400 A.D.)

Examines the history of Europe from the emergence of feudal institutions to the rise of nation states, with specific attention to social, intellectual and religious change, the role of law and ritual, the crusades and European expansion, and urban growth and identity in the West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 2170.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4526 (3) Immigrants, Workers and the 1 percent - Recent U.S. Social History

In the 21st century we see a widely divided U.S. society, with a privileged "one percent" on one end, and a striking pattern of poverty on the other. How did the U.S. get this way? This course shows students how to explore social change through the people of the 20th century, their experiences, and the words they left behind.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4527 (3) Mexican-American History since 1848

Examines Mexican-origins people in the United States from the 19th century through the present. Focuses on Mexican-American history as both an integral part of American history and as a unique subject of historical investigation. Using primary and secondary sources, students will examine how Mexicans and Mexican-Americans have negotiated, influenced, and responded to political, social, cultural, and economic circumstances in the U.S.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4528 (3) Islam in South and Southeast Asia (1000 to the Present)

Examines the history of Muslim societies in South and Southeast Asia from 1000 to the present. Focuses on themes such as the rise of Islamic empires in South Asia, Sufism, trade and the spread of Islam in Southeast Asia, the rise of Muslim nationalism and religious fundamentalism, and the impact of modernization and globalization on Muslims of the region.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Requisite 6 hours of any history coursework.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4534 (3) Modern European Jewish History

Focus on the last 500 years of European Jewish history, from 1492 until the present, to examine Jews' place in European history and how Europe has functioned in Jewish history. Does not end with the Holocaust, since, although Hitler and the Nazis attempted to destroy European Jewish civilization, they did not succeed. Rather, this course will spend several weeks looking at European Jewish life in the past sixty year.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4534

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1012.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Topical

HIST 4538 (3) History of Modern India

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5538

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite 6 hours of any history coursework.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5544 and JWST 4544

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HEBR 2350 or JWST 2350.

Additional Information: Departmental Category: Europe: Topical

HIST 4546 (3) Popular Culture in the Modern United States

Traces the history of cultural expression in the United States since the late nineteenth century. From art, fiction, and music to the movies, amusement parks, shopping, and sports, popular culture offers clues to decipher shifting patterns of consumption, globalization, race, gender, politics, technology, and media. Includes instruction and practice interpreting cultural materials in historical context.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025 or ATLS 2000.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4548 (3) Women in Modern India

Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5548

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1528.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4556 (3) The History of America through Baseball

Baseball serves as a window to view the American experience. Covers U.S. history since 1830, addressing the major topics that reflect on American society, such as professionalization, labor management conflict, race, gender, culture, politics, economics and diplomacy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 2516

Requisites: Requires prerequisite course of HIST 1025 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4558 (3) Buddha to Gandhi: A History of Indian Nonviolence

Focuses on the intellectual history of nonviolence in India from the time of the Buddha to Mahatma Gandhi who led India to national independence from the British Empire in 1947. Pursues this history in light of the encounter between Indian and western cultural traditions in modern India.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities as served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5616 and WGST 4616

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4617 (3) Native North American History I: Human Settlement to 1815

Explores the establishment and development of human societies in North America prior to 1492; the varied experiences of contact; the crises, opportunities, and transformations that attended colonialism; Indians and the inter-imperial contests of the eighteenth century; and the struggles of native peoples confronting the newly-independent United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4618 (3) Early Modern China, 960-1842

Examines political, social, and cultural history of China from the Song Dynasty (960-1279) to the opium War (1839-1842). Topics covered include the development of imperial political institution and gentry society, Conquest Dynasties, Neo-Confucianism, China's "medieval economic revolution", Chinese world order in East Asia, Qing multiethnic empire, Chinese overseas migration, and the coming of the West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4619 and HIST 5619

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 4620 (3) A Global History of Sexuality: The Modern Era

Provides an introduction to the history of sexuality in the modern era through engagement with recent interdisciplinary research into what sexuality has meant in the everyday lives of individuals; in the imagined communities formed by the bonds of shared religion, ethnicity, language and national citizenship; on the global stage of cultural encounter, imperialist expansion, transnational migration and international commerce.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4620

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4623 (3) History of Eastern Europe Since 1914

Examines the struggle of nations of eastern Europe to assert their independence, from break-up of the imperial system at the end of World War I, through the Soviet bloc that emerged after World War II, to the establishment of democratic governments after the 1989 revolutions.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4626 (3) History of Gender and Sexuality in the United States from 1870

Examines the social history and cultural construction of genders and sexualities in America from 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities and served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4626

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4627 (3) Native North American History II: 1815 to Present

Explores the longevity and continuity of human history in North America by discussing pre-European social and cultural developments. By examining ways in which Indian societies west of the Mississippi River responded to Euro-Americans, the Indians' role in western North American history is demonstrated.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949

Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics as Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5628

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the United States through investigation of lesbian/gay identity formation, community development, politics, and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5636 and WGST 4636

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025 or LGBT 2000.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4638 (3) Contemporary China: Radicalism and Reform, 1949 to Present

Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5638

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4640 (3) Women, Gender and War

Study of how women experience war, how the structure, practice and memory of war, and the rights and obligations of military service (masculinity and femininity) are structured by the gender system.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4640

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1012 or HIST 1025 or HIST 1123 or HIST 1628 or HIST 1708.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4643 (3) Poland since the 16th Century: Democracy and Nation

Traces themes of democracy and nationalism in Polish history from the "Noble Republic" of the early modern era through the struggles with fascism and communism in the 20th century, to Poland's current position on the eastern edge of Western Europe.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4648 (3) Inventing Chinese Modernity, 1800 to Present

Examines the long and painful transformation, during the modern period of native Chinese concepts about the meaning of life, the proper order of politics and society, the role of the individual, the nature and role of human emotions, the place of the gods, the definition of nation, the proper relations between the sexes, and China's place in the global order.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4658 (3) China and Islam from the 7th Century to the 20th Century

Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5658

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4688 (3) Window on Modern China

Examines the relationship between China's recent history and its booming contemporary economy and society through on-location study in a Chinese city. The course makes use of a rich array of historical and other kinds of sites to teach students to think critically about themes and events that played a shaping role in the unfolding of modern Chinese history.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4711 (3) The Medieval Crusades: Holy War and Its History, 1095-1400

Studies the innovation, impact and meaning of holy war and the expansion of Christendom during the High Middle Ages. Topics include the definition of crusade and crusaders, religious persecution and tolerance, the expansion of European modes of government, war memory, colonization and its aftermath, the meaning of the Holy Land and the home front.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 2170.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4713 (3) History of Russia through the 17th Century

Introduces the history and culture of Russia from the 9th to the 17th century. Emphasizes selected topics in social, economic, religious and cultural history, including the formation of the Russian state conversion to Orthodox Christianity, the Mongol invasion and the reign of Ivan the Terrible.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4718 (3) Ancient, Classical, and Medieval Japanese History

Begins with the prehistoric and protohistoric periods. Explores the development of Japan's classical age and traces the rise and attenuation of an elite warrior government.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4723 (3) Imperial Russia

Surveys major cultural, social, and economic changes from the reign of Peter the Great through World War I.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4726 (3) A Nation of Immigrants: Immigration in American History

Examines the shifting kaleidoscope of immigration to the United States in the 19th and 20th centuries. Considers immigrant motives, cultures and experiences; changing cultural and political ideas about the value of immigration; the relationship of immigration and immigration policy to ideas about the American national project; the creation and consequences of immigration law.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4728 (3) Modern Japanese History

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5728

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4733 (3) The Russian Revolution and the Soviet Regime

Covers in detail the significant social, economic and political events of Soviet Russia from the February Revolution of 1917 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4738 (3) History of Early Modern Japan (1590-1868)

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5738

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4758 (3) The History of Postwar Japan, 1945 to Present

Explores political, economic, social and cultural factors in postwar Japan. Although the defeat in 1945 is often seen as "zero hour", a moment of near total disjunction, the outlines of postwar Japan emerged during World War II. Beginning with the 1930s, traces growth and development, social change, globalization, the quest for collective identity and other themes in the evolving Japanese nation-state.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5761 and CLAS 4761 and CLAS 5761

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4800 (3) Special Topics in Global History

Organized around themes that change yearly, this class allows students to study and research processes, phenomena, and events of global significance in historical context. Will stress historical subjects that span multiple geographic regions of the globe. Topics could include the global history of: the arms trade; slavery; health and disease; youth culture; women's rights; genocide, the environment, migration, economic trade, warfare exploration etc...

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4803 (3) Special Topics in European History

Covers specialized topics in European history, usually focusing on a specific country or theme.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4808 (3) Special Topics in World Areas History

Covers specialized topics in the history of World Areas outside of Europe and/or North America, usually focusing on one country or region.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4820 (3) Human Rights: Historical Perspectives

Examines the history of modern ideas of human rights. Focuses on themes such as the universalism/cultural relativism debate, colonialism, nationalism, refugees and stateless peoples, the United Nations and humanitarianism, ethnic genocide in Rwanda, and human rights abuses by the Taliban regime in Afghanistan.

Requisites: Requires a prerequisite of 6 hours of credit in any History course. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4827 (3) Modern U.S. Jewish History since 1880

Explores the experience of Jews in the United States from the 1880's when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4827

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4930 (1-6) History Internship

Matches selected students with supervised internships in professional archives research libraries, historical associations, and special projects. Interns apply their academic area specialty to their work in the field.

Internships have a work and academic (reading and writing) component. **Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) History (HIST) majors and minors only.

Recommended: Prerequisite completion of lower-level history coursework (for example HIST 1015 or HIST 1025).

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Methodological, Comparative, and Global

History - Bachelor of Arts (BA)

As a history major studying the past, you will gain an awareness of the variety of past human achievement, as well as a perspective on how the world operates. With this knowledge, you will have a better understanding of the present. In the course of exposing you to the intellectual, political, economic, cultural, and social forces that have influenced today's world, the study of history also develops your ability to read critically, to ask intelligent questions, and to express ideas orally and in writing. In its broadest sense, the study of history provides you with an intellectual framework and practical skills that will serve all your future pursuits.

The bachelor of arts (BA) program for history majors is structured so that while you are required to receive a broad education in various fields of historical inquiry, you have the freedom to design a program particularly suited to your own interests, provided you choose your classes wisely.

At the lower-division level, you are required to take one introductory course on the history of the United States, on the history of Europe, on the history of another area of the world outside of the U.S. or Europe, and on global history. At the upper-division level you have greater flexibility because you take more courses, but you also have to take one class on U.S. history, on European history, on the history of another area of the world outside of the U.S. or Europe, and on comparative or global history.

In addition, when choosing courses to fulfill your major requirements, you need to make sure that you take at least two pre-modern history courses and two modern history courses.

While you are required to acquire both geographical and chronological breadth in your major, the requirements are flexible enough that you can concentrate your studies in a specific geographic area (for example Britain, China, Latin America, or the U.S.) or a historical period (for example the Ancient world, the Medieval period, or the twentieth century) or on a single theme (for example intellectual history, the history of revolution, the history of women, imperialism and colonialism, the history of Islam, or Jewish history). Within these areas, you are free to plan your program around a diverse set of rotating course offerings.

An objective of the program is to provide as broad a base as possible for the curriculum. The following historical areas are among those represented: ancient and medieval history; early modern & modern European history; European national histories (Britain, France, Germany, Russia); the history of world areas (Latin America, Africa, the Middle East, South Asia & East Asia); American history considered both by periods and by topics (such as diplomatic, social, African-American); Western U.S. history; women's history; global history, and different historical methodologies.

All majors are required to take a specific historical thinking & writing course, but in all coursework, special attention is paid to skills in critical reading and writing. You are expected to work with source materials, acquire methodical research techniques, and submit clearly written papers and essays. The department encourages students with great interest and ability in history to take part in the departmental honors program. Qualified students usually complete the honors program during their senior year but, some start their history honors work during their junior year.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Total Credit Hours

Students must complete 42 credit hours in history courses with grades of C- or better. Of those 42 credit hours, 24 must be at the upper division. Students should complete the required 1000-level survey courses, HIST 1800 (or an equivalent 1000-level Global Comparative Course) and HIST 3020, before the end of their sophomore year and before they enroll in any 4000-level history courses.

Required Courses and Semester Credit Hours

Lower-division Requirements

One 1000-level United States history course - 3 credits	3
One 1000-level Europe history course - 3 credits	3
One 1000-level world areas history course - 3 credits	3
HIST 1800 Introduction to Global History (Or an equivalent 1000-level Global Comparative Course.)	3

Upper-division Requirements

HIST 3020 Historical Thinking & Writing	3
One 4000-level United States history course	3
One 4000-level Europe history course	3
One 4000-level world areas history course	3
One 4000-level comparative or global history class	3
Two 4000-level HIST electives	6
One 3000-level Senior Seminar ¹	3

Lower- or Upper-division Elective Requirement

6 credit hours in any other HIST courses	6
--	---

Historical Period Requirement ²

6 credit hours in courses whose focus falls primarily before 1800	6
6 credit hours in courses whose focus falls primarily after 1800	6

Ancillary Written Communication Requirement ³

Select one of the following lower-division written communication courses:

ARSC 1080 College Writing and Research	3-4
ARSC 1150 Writing in Arts and Sciences	
CLAS 1020 Argument from Evidence: Critical Writing about the Ancient World	
ENGL 1001 Freshman Writing Seminar	
PHIL 1500 Reading, Writing and Reasoning	
WRTG 1100 Extended First-Year Writing and Rhetoric	
WRTG 1150 First-Year Writing and Rhetoric	
WRTG 1250 Advanced First-Year Writing and Rhetoric	

Total Credit Hours

57-58

- ¹ Any additional 3000-level seminars can fulfill requirements that normally are fulfilled by 4000-level courses.
- ² 2000-level non-major HIST courses cannot be used to fulfill this requirement. (The department maintains a list of courses broken down by geographic areas and historical periods.)
- ³ Complete with a grade of C- or better.

NOTE: Under normal circumstances, no more than 45 credit hours in history may be used toward a student's total University of Colorado Boulder graduation requirements. Students must have a grade point average of at least 2.00 in the major in order to graduate. Students may receive credit for HIST 1012 and/or HIST 1025 and/or 3 lower-division elective HIST credit hours by obtaining a score of 4 or better on the high school Advanced Placement history test(s). Some types of International Baccalaureate credit are acceptable; consult one of the major advisors to determine individual applicability. The CLEP test is not accepted for credit.

All students majoring in history must complete at least 12 credit hours of upper-division history in courses taught by the CU Boulder faculty. In addition, HIST 3020 and the 3000-level Senior Seminar must be successfully completed on the CU Boulder campus with a C- or better.

Graduating in Four Years

Students should consult the Four-Year Guarantee Requirements for further information on eligibility for the four-year guarantee. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in history, students must consult a history advisor each semester, but the following plan provides a rough outline of acceptable progress:

- Declare the major no later than the second semester of the freshman year.

Recommended Sequence of Courses

Course	Title	Credit Hours
Year One		
Any two of the required 1000-level HIST survey courses		6
Ancillary lower-division written communication course		3
	Credit Hours	9
Year Two		
The third required 1000-level HIST survey course		3
A 1000- or 2000-level HIST elective		3
HIST 1800	Introduction to Global History	3
HIST 3020	Historical Thinking & Writing	3
	Credit Hours	12
Year Three		
Four 4000-level HIST lecture courses		12
	Credit Hours	12
Year Four		
Three 4000-level HIST lecture courses		9

One 3000-level Senior Seminar	3
Credit Hours	12
Total Credit Hours	45

History - Minor

Students who wish to take several history courses may want to consider becoming either a History Major or a Minor. In general the Major requires a more in-depth commitment from students whereas the Minor offers students an opportunity for some specialization in History without all the obligations of the Major.

For those students already pursuing a Major in another field, a History Minor might be the more viable option because the Minor requires the completion of fewer overall history courses.

Requirements

2000-level HIST courses and courses taken for core curriculum credit are applicable to the minor. 4000-level courses may be used to fulfill both upper-division credit hours and geographic area credit hours.

HIST 3020 and all 3000-level Senior Seminars are restricted to history majors. 3000-level courses may occasionally be taken by minors if the course is not full as of the second week of drop-add and/or you have written permission from the instructor.

Required Courses and Semester Credit Hours

A total of 21 credit hours in history, of which at least 12 credit hours must be upper-division. Courses intended to count for the minor may not be taken on a pass/fail basis, and students must earn a C- or better in any course to be counted toward the 21-credit-hour minor requirement.

At least 3 credit hours (one course each) must be taken in each of the four following geographical areas: the United States, Europe, World Areas (specific areas outside of Europe and North America) and Global or Comparative.

Humanities

Humanities is an interdisciplinary program that allows students to combine different fields of study from all the disciplines of the humanities as well as from the social sciences (in particular, Anthropology, Ethnic Studies, Political Science, Psychology, Sociology, Women and Gender Studies). This major especially encourages students to develop their interdisciplinary interests in fields of cultural and humanistic expression such as literature, art, music, film, philosophy, history, modern media, religion and contemporary critical practice and theory.

The undergraduate degree in humanities emphasizes knowledge and awareness of:

- the ways cultures and traditions define both themselves and each other;
- the formal, rhetorical and ideological properties of cultural texts in a variety of forms and media (literature, history, philosophy, film, music, visual arts, architecture, dance, theatre, performance);
- the dynamic relationships between texts and their social and historical contexts;

- the genres and modes of texts and their production, transformation and reception; and
- the theoretical and ideological underpinnings and implications of one's own and others' interpretive approaches and assumptions.

In addition, students completing the degree in humanities are expected to acquire the ability and skills to:

- analyze and interpret texts in a variety of forms and media;
- articulate such analyses and interpretations at a sophisticated level in both written and oral forms;
- discern similarities and differences among individual works, artistic media, historical periods and cultural traditions;
- reason critically; and
- explore the connections between contemporary issues and academic work.

Course code for this program is HUMN.

Bachelor's Degree

- Humanities - Bachelor of Arts (BA) (p. 389)

Minor

- Humanities - Minor (p. 390)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bernardini, Giulia (https://experts.colorado.edu/display/fisid_143777)
Instructor

Carnahan, Shirley E (https://experts.colorado.edu/display/fisid_105936)
Senior Instructor; PhD, University of Colorado Boulder

Cox, Jeffrey N (https://experts.colorado.edu/display/fisid_113253)
Professor; PhD, University of Virginia

Eddy, Marjorie Alexandra (https://experts.colorado.edu/display/fisid_111634)
Lecturer

Ferris, David S (https://experts.colorado.edu/display/fisid_116817)
Professor; PhD, SUNY at Buffalo

Gordon, Paul (https://experts.colorado.edu/display/fisid_100661)
Professor; PhD, Yale University

HUMN 1110 (3) Introduction to Humanities: Literature 1

Introduces students to works from the major Western literary periods (Classical, Medieval, Renaissance, Baroque) from the 8th c. BC to the early 17th c. AD comparatively, i.e., outside their national literary boundaries. Theorizes interdisciplinary, genre studies, periodization, comparativism, thematology, hermeneutics, criticism, etc.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 1120 (3) Introduction to Humanities: Literature 2

Introduces students to works from the major Western literary periods (Baroque, Enlightenment, Romanticism, Realism, Modernism) from the 17th- through the 20th-centuries comparatively, i.e., outside their national literary boundaries. Theorizes interdisciplinarity, genre studies, periodization, comparativism, thematology, hermeneutics, criticism.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 1210 (3) Introduction to Humanities: Art and Music 1

Examines the major artistic and musical works in the Western tradition from ancient Greece through the 16th century in their larger historical, interdisciplinary, and theoretical ("aesthetic") contexts.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 1220 (3) Introduction to Humanities: Art and Music 2

Examines the major artistic and musical works in the Western tradition from the 17th century to 21st-century post-modernism in their larger historical, interdisciplinary, and theoretical ("aesthetic") contexts.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 1400 (3) Mediterranean Foundations

Examines the pre-Modern Mediterranean as the foundational zone of Western Humanism and culture, beginning with Classical Antiquity and through to the dawn of Modernity. Through history, art, literature and thought, it studies the region's role as the crucible of Helleno-Persian culture, Roman society, of Judaism, Christianity and Islam, the intersection of Europe, Africa and Asia in the development of Modernity.

Grading Basis: Letter Grade

HUMN 1701 (3) Nature and Environment in German Literature and Thought

Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green party.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1701

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 2000 (3) Methods and Approaches to the Humanities

Provides a transition from the introductory courses to the upper-division courses. Introduces the various technical methods and topics encountered in the department's comparative, interdisciplinary upper-division courses, including cultural studies, rhetoric, translation, hermeneutics, word/image studies.

Requisites: Restricted to Humanities (HUMN) majors and minors only.

HUMN 2100 (3) Arts, Culture and Media

Promotes a better understanding of fundamental aesthetic and cultural issues by exploring competing definitions of art and culture. Sharpens critical and analytical abilities by asking students to read and compare different theories about arts, culture, media, and identity, and then to apply and assess those theories in relation to a selection of visual and verbal texts from a range of cultural and linguistic traditions.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 2145 (3) African America in the Arts

Introduces interrelationships in the arts of African Americans and the African American contribution to American culture as a whole.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: United States Context

HUMN 2601 (3) Kafka and the Kafkaesque

Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque by looking not only for traces of Kafka's influence in the verbal and visual arts, but also for traces left in Kafka's own work by his precursors in the literary tradition.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2601
