All undergraduates enrolled in CMCI take as part of their experience a core curriculum designed to provide the broad intellectual framework common to each of the individual disciplines in which students eventually major. In addition to conveying the conceptual tools and perspectives all students in the college need, the core curriculum supplies the shared body of knowledge, exemplars and ideas required to build a coherent intellectual and creative community. Each academic unit within the college offers a unique curriculum determined by its faculty and expressed as a set of major requirements. Completion of the major requirements within a discipline provides students with depth of knowledge and expertise appropriate to earning a BA or BS as designated by their discipline.

Additionally, undergraduates enrolled in CMCI acquire the technical and computational skills needed to thrive in today's networked media environment. Training in these skills is provided through CMCI 1010, CMCI 1020 (required of all first-year students) and the core computing requirement, and is integrated into each student's chosen field of study. Finally, students in CMCI complete a secondary area of study outside of their major in order to build the intellectual versatility necessary for successful study and work in the field of media, communication and information.

Graduate Study

Curricula leading to advanced degrees are offered by all of the departments in the College of Media, Communication and Information. Students should consult the Graduate Catalog's Admissions (p. 864) section for admission and degree requirements. Curricula for graduate programs are listed under each department.

Policies & Requirements

Dean's List

Students in the College of Media, Communication and Information who have completed at least 12 credit hours of CU Boulder course work for a letter grade in any single semester with a term grade point average of 3.75 or better are included on the dean's list and receive a notation on their transcript and a letter from the dean.

Graduation with Honors

CMCI students may graduate with the honors designations of cum laude, magna cum laude or summa cum laude by completing the CMCI honors program, which involves completing a senior honors project within the major. Students interested in graduating with honors should contact the associate chair for their major department to learn more about this opportunity. Students in CMCI may also take honors courses through the College of Arts & Sciences Honors Program (<http://www.colorado.edu/honors>).

Graduation with Distinction

Students will graduate with CMCI Distinction if they have at least 60 credit hours completed at CU Boulder and have a grade point average of 3.75 or higher for all course work completed at the University of Colorado.

Program Awards and Scholarships

Alumni and friends of CMCI have made possible more than 30 annual scholarship and awards to officially admitted students in CMCI. The deadline for application is Feb. 15. For more information and applications instructions, visit the university's Scholarships (<http://www.colorado.edu/scholarships>) website. Incoming first-year students who have received a CU Boulder Esteemed Scholarship or Presidential Scholarship are automatically considered for a CMCI Merit Scholarship. For more information, visit CMCI's Financial Aid and Scholarships (<http://www.colorado.edu/cmci/life-at-cmci/financial-aid-and-scholarships>) webpage.

Academic Standards

Good Academic Standing

Good academic standing in the college requires a cumulative grade point average of 2.00 or above in University of Colorado work and a 2.00 grade point average for all CMCI major coursework. Grades earned at another institution are not used in calculating the grade point average at the University of Colorado. However, grades earned in another school or college within the University of Colorado system are used in determining a student's scholastic standing and progress toward the degree.

Probation

Students whose cumulative grade point average falls below 2.00 overall or 2.00 in CMCI major coursework are placed on probation. Those students who enroll in any term in the calendar year, excluding summers, after being placed on probation are expected to raise their grade point

to the minimum or above by the end of the term. Neither CU Boulder's summer session nor enrollment through Boulder evening courses counts as a probationary semester. Students are not dismissed at the end of the summer term.

Students placed on academic probation who elect to remain out of school for a full calendar year can return to the university with a two-semester window to achieve the required cumulative GPA or CMCI major GPA. Students on probation who return after a hiatus of one year are placed on a second probation at the end of the semester in which they return if their cumulative GPA or CMCI major GPA remain below the minimums and are dismissed from the university if they do not achieve the minimums by the end of the semester following the imposition of the second probation.

Scholastic Suspension

CMCI students are subject to suspension if they do not maintain a cumulative university GPA of 2.00 and a cumulative CMCI major GPA of 2.00.

Students whose GPA's fall below either of these levels are normally placed on probation for one semester, during which they have an opportunity to raise their averages to the required levels. Students who still have a cumulative average below 2.00 or a CMCI major GPA below 2.0 after their semester of probation will be suspended and will not be able to register for University of Colorado daytime courses on any campus during any academic year. Students suspended are eligible for readmission when they have achieved a cumulative 2.00 average or a 2.00 average in CMCI major courses by virtue of work done during the University of Colorado's summer term (any of the three campuses) and/or through the Division of Continuing Education and Professional Studies (Boulder evening or correspondence courses). Students who choose to enroll in continuing education courses to restore their good standing must maintain a 2.5 GPA or above in each term or be suspended from both day and continuing education classes. They also may return as transfer students when they have overcome their academic deficiencies by enrolling at another institution (i.e., by achieving an overall 2.00 average in the University of Colorado work plus all work taken elsewhere since suspension). These transfer grades are used only for the purpose of readmission and do not remain in the University of Colorado cumulative grade-point average. Suspended students pursuing this latter option have two semesters after readmission to bring their University of Colorado and/or CMCI major grade point average up to 2.00 or they are suspended again.

Academic Ethics

The College of Media, Communication and Information maintains the highest standards of intellectual honesty. Cheating; plagiarism; illegal possession and distribution of examinations or answers to specific question; alterations, forgery, or falsification of official records; presenting someone else's work as one's own or performing work or taking an examination for another student are examples of acts that may lead to suspension or expulsion. Reported acts of academic dishonesty are referred to the Honor Council. For more information, see the Academic Integrity (p. 15) section.

Policy on Grade Appeals

The following shall be the official policy of the College of Media, Communication and Information regarding grade appeals.

When a student believes that a grade has been improperly assigned, and discussions between the instructor and the student have not led to any resolution of the problem, then:

1. The student shall have the option of making a formal written appeal to the chair/associate chair of his/her department. The appeal must specify the remedy desired by the student, and it must be submitted within 45 days of the end of the academic term in which the course was taken.
2. The chair/associate chair will meet with the student and with the faculty member who taught the course. The instructor will be asked to submit a formal, written response to the student's written appeal. If the chair/associate chair is unable to broker a solution mutually acceptable to both student and instructor, then the chair shall appoint an ad hoc student ethics committee, which will review the dispute. The committee shall consist of two impartial faculty members competent in the subject matter of the course in question.
3. The department chair will convene the committee and provide the committee with the student's written appeal and the written response from the faculty member. Within 45 days, the committee will submit a report and recommendation to the chair, and the chair will recommend to the instructor either:
 - a. that the originally assigned grade stand; or
 - b. that a new grade be assigned.

In cases where a change of grade is recommended and the instructor does not wish to accept the recommendation of his/her colleagues, the materials will be submitted to the dean of CMCI who will review the materials and make a final decision.

Policy on Waiver of Degree Requirements

The College of Media, Communication and Information does not waive degree requirements or excuse students from completing degree requirements. Petitions for exceptions to the academic policies stated here may be submitted to the ad hoc Committee on Academic Rules and Policies. Such petitions will be considered only if they meet all three of the following conditions:

- The student must document that she/he has made every effort to fulfill the policy or requirement as defined and must demonstrate that no other options exist for fulfilling the requirement as defined in this catalog.
- The student must document that she/he is prevented from fulfilling the policy or meeting the requirement as defined here for compelling reasons beyond the student's control.
- The student must demonstrate to the satisfaction of the faculty committee that she/he has fulfilled or will fulfill the intent of the policy or the requirement through an appropriate alternative.

Students who believe that their circumstances meet the conditions to submit a petition must first consult with their academic advisor. If the advisor offers options for meeting the requirement or policy as defined here, the student must pursue those options and should not submit a petition.

Credit and Enrollment Requirements for Admission

Students will apply to the College of Media, Communication and Information in one of the six undergraduate majors. Students who are

not eligible for admission directly into the major may be admitted to the College of Arts and Sciences.

Transfer Students

Students applying to transfer into the College of Media, Communication and Information from another institution must have 24 credit hours of college credit and must have completed the equivalent of the introductory courses in the specific major with a GPA of at least 3.00, both overall and in the major courses. Students without 24 credit hours or the prerequisite courses should apply to the College of Arts and Sciences. For more information, see the undergraduate Transfer of College-Level Credit (p. 111) section. (catalog.colorado.edu/catalog/node/462)

Attendance Regulations

Students are expected to attend classes regularly and to comply with the attendance policies specified by their instructors at the beginning of each semester. A student who does not attend the equivalent of the first week's sessions of a class during a term may be administratively dropped from the class.

Credit Policies

Major Requirements

All coursework taken for major requirements must have a grade of C- or better in order to be counted toward the major requirements.

Pass/Fail

In addition to the university's general policies, majors in the CMCI may not take any MAPS, core requirements, certificate or minor courses, business, additional field of study or CMCI courses pass/fail, but any other course may be taken pass/fail. Up to six credit hours may be taken pass/fail, except for transfer students, for whom the limit is one credit hour in every eight attempted at the University of Colorado, up to the maximum of six credit hours.

Transfer Credits

Credit in subjects transferred from other institutions to the University of Colorado is limited to the amount of credit given for similar work at the University of Colorado. Transfer credits in CMCI courses are limited to 12 credits hours from four-year institutions and six credits hours from two-year institutions. All transfer credit is subject to approval of the assistant dean of CMCI. Work from another accredited institution of higher education that has been completed with a grade of C- (1.70) or better may be transferred to the University of Colorado. Categories of transfer course work not accepted by the university are described in the undergraduate Transfer of College-Level Credit (p. 111) section. All courses transferred from junior and community colleges carry lower-division credit. Courses transferred from four-year institutions generally carry credits at the level at which they were taught at the previous institution, but can be subject to review on a course-by-course basis.

Residence Requirement

CMCI students must complete a minimum of 45 credit hours in University of Colorado Boulder courses. Of these 45 credit hours, a minimum of 30 credit hours must be in upper-division credit hours completed as a matriculated student in the College of Media, Communication and Information at the University of Colorado Boulder and at least 15 of these upper-division credit hours must be in the major. A maximum of 6 credit hours taken at other University of Colorado campuses (CU Denver and UCCS) can be counted toward the minimum 45 credit hours required on the Boulder campus. Courses taken while on CU Boulder study abroad

programs, through CU Boulder Continuing Education or CU Boulder correspondence courses are considered to be in residence.

Senior Requirement

Seniors must file to graduate through the online system in the portal by November 1 of the semester prior to May and August graduation and March 1 of the semester prior to December graduation. All CMCI students should meet with their advisor the semester prior to graduation to complete the graduation check-out form.

Advising

Majors are encouraged to consult an advisor each registration period. Advising is available from faculty and staff throughout the academic year, and major advising sheets are provided for each sequence. However, students are ultimately responsible for fulfilling all degree requirements.

Dual Degree/Double Major Programs

Students may complete requirements in two fields and receive two degrees from the university. Such double-degree programs are available combining CMCI with business, engineering, music or disciplines in the College of Arts and Sciences. Students must make application for a double degree program in both CMCI and the Leeds School of Business, the College of Arts and Sciences, the School of Engineering and Applied Sciences or the College of Music. Any other combined program must be arranged by consulting both programs. All double degrees shall consist of a degree within CMCI and a degree outside CMCI.

Students may double major within CMCI. The primary major will determine whether the degree is a BA or BS. Students may not get a double degree within CMCI.

Colorado Student Bill of Rights

In the interests of promoting timely graduation and facilitating the transfer of students among the institutions of higher education in the state of Colorado, the College of Media, Communication and Information and the University of Colorado Boulder adhere to the Student Bill of Rights as presented in Colorado Statute 23-1-125.

- 23-1-125. Commission directive - student bill of rights - degree requirements - implementation of core courses - competency test - prior learning
 - a. Student bill of rights. The general assembly hereby finds that students enrolled in public institutions of higher education shall have the following rights:
 - i Students should be able to complete their Associate of Arts and Associate of Science degree programs in no more than 60 credit hours or their baccalaureate programs in no more than 120 credit hours unless there are additional degree requirements recognized by the commission;
 - ii A student can sign a two-year or four-year graduation agreement that formalizes a plan for that student to obtain a degree in two or four years, unless there are additional degree requirements recognized by the commission;
 - iii Students have a right to clear and concise information concerning which courses must be completed successfully to complete their degrees;
 - iv Students have a right to know which courses are transferable among the state public two-year and four-year institutions of higher education;
 - v Students, upon completion of core general education courses, regardless of the delivery method, should have those courses

satisfy the core course requirements of all Colorado public institutions of higher education;

- vi Students have a right to know if courses from one or more public higher education institutions satisfy the students' degree requirements;
- vii A student's credit for the completion of the core requirements and core courses shall not expire for ten years from the date of initial enrollment and shall be transferable.

Statewide Guaranteed Transfer of General Education Courses

As of fall 2003, the two-year and four-year transfer articulation agreements among Colorado institutions of higher education were replaced by a statewide guaranteed transfer of approved general education courses taken at any Colorado public institution of higher education. Under the statewide guaranteed transfer program, up to 31–33 credit hours of successfully (C- or better) completed course work will automatically transfer and apply towards graduation requirements at the receiving institution. The course work must be drawn from the list of approved guaranteed transfer courses and must meet the distribution requirements of the guaranteed transfer program. Further information about the statewide transfer program, including the list of approved courses and distribution requirements, can be found on the Colorado Department of Higher Education's Complete College Colorado! (<http://higher.ed.colorado.gov/Academics/Transfers/Students.html>) webpage.

As of fall 2006, a student graduating with an Associate of Arts or an Associate of Science degree from a Colorado community college and entering the College of Media, Communication and Information is exempt from the written communication requirement and the lower-division component of the core curriculum, with the exception of CMCI 1010 and CMCI 1020. Note that students are still subject to the MAPS requirements. Additional information on the evaluation of transfer credit of Colorado community college course work and its application in select arts and sciences major programs can also be found on the College of Arts & Sciences' Student Resources (<http://www.colorado.edu/artsandsocieties/student-resources>) webpage.

Students are required to follow the graduation requirements listed in this catalog at the time of their initial entry onto the Boulder campus.

Credit Policies

Advanced Placement Program

See the undergraduate Credit by Examination (p. 106) section.

International Baccalaureate

Any student admitted to a University of Colorado campus after June 30, 2003, who has graduated from high school having successfully completed an International Baccalaureate (IB) diploma, program will be granted 24 credit hours of college credit. No tuition will be charged for these credit hours. These credit hours will be granted, however, only if the student receives a score of 4 or better on an examination administered as part of the IB diploma program.

In addition, college credit is granted for International Baccalaureate examinations at the higher level with a score of 4 or better. For specific equivalencies, contact the Office of Admissions at 303-492-2458 or visit the International Baccalaureate (<http://www.ibo.org>) website.

Credit/No Credit

Credit/no credit changes must occur during the schedule adjustment periods each semester as outlined in the Registrar's academic calendar.

Credit Taken as a Nondegree Student

Once a student has been admitted to a degree program, credits from the Division of Continuing Education such as ACCESS, Boulder evening credit courses and CU Boulder correspondence classes may be eligible to be applied toward the degree. Students will receive initial advising during orientation once they have been accepted to a degree program in the College of Media, Communication and Information.

Cross-Listed Courses

Courses that are cross-listed in two or more departments are credited in the department in which the student has the most credit hours, irrespective of the department in which the student formally enrolled for the course.

Incomplete Grades

An I grade is given at the discretion of the course instructor only when a student has satisfactorily completed a substantial portion of a course and, for reasons beyond the student's control, is prevented from completing all work for the course within the term. Incomplete grades must be requested by the student and should not be awarded by the instructor for non-attendance. (In the case of nonattendance, the instructor should award the student the grade(s) earned.) If an incomplete grade is given, the instructor is required to document the reasons/grounds for the awarding of the incomplete grade, the specific work and conditions for completion of the course and the time frame within which the course work must be completed. The maximum time the instructor can allow for the completion of the course work and subsequent award of a course grade is one year from the end of the term the course was taken. After one year, if no final grade is awarded, the I will change to the grade of F. A copy of the Incomplete Agreement (forms are available from the dean's office) signed by the student and instructor and accompanied by documentation of the extenuating circumstances that resulted in the awarding of an incomplete should be filed with the Director of Advising's Office and a copy should be given to the student.

Independent Learning

A maximum of 30 credit hours of correspondence/online learning work may count toward the degree. CMCI and Arts and Sciences courses offered by the CU Boulder Division of Continuing Education carry resident credit.

Independent Study

With departmental approval, students may register for independent study during the normal registration periods for each semester. Students may not register for more than 6 credit hours of independent study credit during any term. No more than 8 credit hours of independent study taken in a single department or program can be applied toward the total credit hours needed for graduation. A maximum of 16 credit hours of independent study may count toward the degree. The minimum expectation for each hour of credit is 25 hours of work.

A student may not use independent study projects to fulfill the college's general education requirements. Some departments further restrict the use of independent study hours toward meeting major requirements.

Repetition of Courses

If a student takes a course for credit more than once, all grades are calculated into the grade point average. However, the course is only

counted toward graduation once, unless a course description specifically states that it can be taken more than once for credit.

ROTC Credit

The ROTC courses listed below have been certified as acceptable college-level course work by the faculty of the College of Arts and Sciences or by other colleges and schools on the Boulder campus. These courses are counted as elective credit toward the degree. Courses not included on this list do not count toward any degree requirements. Transfer ROTC course work must be evaluated as equivalent to course work on this list to count toward degree requirements.

AIRR 3010 & AIRR 3020	Air Force Leadership Studies I and Air Force Leadership Studies II	6
AIRR 4010 & AIRR 4020	National Security Affairs/Preparation for Active Duty and National Security Forces in Contemporary American Society 2	6
MILR 1011 & MILR 1021	Adventures in Leadership 1 and Adventures in Leadership 2	4
MILR 2031 & MILR 2041	Methods of Leadership and Management 1 and Methods of Leadership and Management 2 (students may not receive credit for either course if they have credit in OPMG 3000)	6
MILR 4072 & MILR 4082	Leadership 1: Adaptive Leadership and Leadership 2: Leadership in a Complex World	6
NAVR 2020	Seapower and Maritime Affairs	3
NAVR 3030	Naval Engineering Systems	3
NAVR 3040	Weapons and Systems Analysis	3
NAVR 3101	Evolution of Warfare	3
NAVR 4010 & NAVR 4020	Leadership and Management and Leadership and Ethics	6
NAVR 4030	Navigation	3
NAVR 4101	Amphibious Warfare	3

Withdrawal

See the Registration & Enrollment (p. 22) section for campuswide policies and withdrawal procedures.

Students in the College of Media, Communication and Information who withdraw two semesters in a row will have a dean's stop placed on their registration. Summer session is not counted as a regular semester. They will not be permitted to return to CU Boulder before one full academic year has elapsed (not including their semester of withdrawal). CMCI students may withdraw from all classes for a term until the last day that classes are taught by requesting withdrawal through the Office of the Registrar. Students cannot withdraw after classes have ended for a term except through the retroactive withdrawal process outlined in the Registration & Enrollment (p. 22) section.

These policies also apply to CMCI students who are enrolled in Continuing Education courses.

Students are encouraged to apply for leave of absence benefits with the Office of the Registrar when their withdrawal from the university is temporary. For more information, see the Registration & Enrollment (p. 22) section.

Readmission

CMCI students who request readmission to the college are always readmitted to their major of record at the time they last attended the

university. Readmitted students who desire to pursue a major different from their major of record must follow the new college's process for declaring a major after they have been readmitted.

Core Curriculum

Mission Statement

The Core Curriculum blends liberal arts learning with skills necessary for success in careers involving media, communication and information. It aims to cultivate ways of thinking and doing that serve the educational, vocational and citizenship needs of CMCI students. To these ends, the curriculum promotes expression, collaboration and critical literacy across multiple forms of communication—from speech and writing to computing and visual media. Those skills underwrite learning across the humanities, the arts and the social and natural sciences, insuring educational breadth. The Core Curriculum matches that breadth with focus through a secondary area of study that students choose to supplement their major—a double degree, a double major, a minor, or academic certificate. Through designated history and diversity courses, the curriculum equips students to live in globalizing worlds, consider issues from multiple perspectives and engage in long-term thinking beyond the contemporary moment. Finally, the curriculum promotes both intellectual cohesion and independent learning through an introductory Common Experience course for all students and specialized Capstone Experiences tailored to particular majors and interests.

Educational Goals

The Core Curriculum is designed to help CMCI students master ways of doing, thinking and investigating essential to studying and working in media, communication and information fields. These competencies may be studied and practiced in course work either within or outside the college. Graduates of the college are expected to be able to demonstrate competence in the following:

- Multi-modal composition and expression: being able to use written, spoken, visual and digital media for effective expression, argumentation and communication of ideas and sentiments to audiences.
- Collaboration, design and creative problem solving: being able to work effectively and inventively with others in complex problem solving and design tasks.
- Communicative interaction: being able to look at phenomena from the perspective of symbolic and material interchanges among individuals, collectives and institutions.
- Media literacies: being able to interpret and critically analyze messages and formal conventions (genres, grammars, logics) in multiple modes and media of communication (visual, sonic, discursive) and to consider them from the perspectives of their audiences, political economies and histories.
- Quantitative and computational thinking: being able to approach and solve problems quantitatively and algorithmically, and to apply and utilize computing models and resources when advantageous.
- Institutional and organizational understanding: being able to consider problems, policies and collective action from the perspectives of different institutions and organizations—e.g., political, legal, economic and religious.
- Cultural understanding: being able to consider problems and social experiences comparatively, considering different global and domestic cultures, with attention to categories of race, class, ethnicity, religion, gender and sexuality.

- Historical understanding: being able to consider social, cultural, intellectual, technological and/or institutional phenomena in historical perspective.
- Ethical action: being able to recognize moral issues, deliberate intelligently about them and uphold the ethical standards of particular disciplines and practices.

Design of the Core Curriculum

The Core Curriculum is designed to be both flexible and comprehensive. While promoting a shared mission and identity for CMCI students through a set of college requirements, the Core Curriculum also promotes breadth and porosity of learning across all the schools and colleges of the CU Boulder campus. Most of the core requirements may be taken either within or outside the college, and many are covered by a student's major. Students who wish to double degree in a CMCI discipline and a discipline outside CMCI will find that the CMCI Core Curriculum dovetails almost entirely with the core or breadth requirements of other CU Boulder colleges and schools.

Core Curriculum at a Glance

College Requirements

Common Experience: 2 courses + 2 labs/studios	8
Capstone Experience: 1 course	3
Secondary Area of Study outside the major	variable

Breadth Requirements

Composition and Expression: 2 courses:	6
Lower-division writing	
Upper-division composition	
Quantitative Thinking: 1 course	3
Computing: 1 course	3
Foreign Language: third-year high school or third-semester college proficiency	0-3
The Natural World: 2 courses + a lab	7
People and Society: 2 courses	6
Humanities and the Arts: 2 courses	6

Point-of-View Requirements

Historical Views: 2 "H" designated courses (0–6 additional credit hours)	0-6
Diversity and Global Cultures: 2 "D" designated courses (0–6 additional credit hours)	0-6

Total Credit Hours	42-57
--------------------	-------

College Requirements

1. A **Common Experience** course sequence—CMCI 1010 and CMCI 1020: lectures + lab/studio (2 courses). This course sequence introduces shared themes, values, ethical issues and competencies across the college and emphasizes the marriage of study and practice that will be the hallmark of CMCI as a whole. Each course is structured as a lecture plus a lab/studio in which students create projects putting the lecture's ideas into practice by means of writing, speaking, design, visual presentation and other modes of expression, and by means of collaborative and active learning.
2. An upper-division **Capstone Experience**: scholarly, lab-based or studio-based (1 course, 3–4 credit hours). This course fosters students' research, creative work, service learning and/or invention, and may include teamwork as well as individual achievement. This course may

be taken within the major, or it may be offered as an interdisciplinary option.

3. An **Secondary Area of Study** outside the major (variable credit hours). Defined as a double degree, second major, a minor, or an academic certificate, this sequence of courses helps students develop the intellectual versatility necessary for successful study and work in media, communication and information fields.

Breadth Requirements

NB: Breadth requirements may be satisfied either within or outside the college. They may also overlap with requirements for individual majors.

1. **Composition and Expression** (2 courses, 6 credit hours):
 - a. Lower-division writing (3 credit hours). This course develops the foundational skills in written expression expected of every CU Boulder graduate.
 - b. Upper-division visual, digital, verbal, written and/or media composition (3 credit hours). This course requirement emphasizes the many alternative forms of composition and expression that CMCI students cultivate.
2. **Quantitative Thinking** (1 course, 3 credit hours): This course provides students with the ability to think at a certain level of abstraction, to manipulate symbols and to assess adequately the data that will confront them in their course work and in their daily lives.
3. **Computing** (1 course, 3 credit hours): This course introduces students to the basic principles of computing, including computational architectures and logic, coding and scripting, issues in technical project management and issues in human-centered technology design.
4. **Foreign Language** (3 credit hours): This requirement encourages students to comprehend the structure and vocabulary of a language other than their native one, to read significant and difficult works in that language and to understand aspects of the culture(s) lived in that language. This requirement may be met at the time of matriculation by fulfilling the MAPS requirement of high school, third-level proficiency in a single language. Students who lack the MAPS requirement must pass an appropriate third-semester college course or a CU Boulder–approved proficiency examination.
5. **The Natural World** (2 courses + lab, 7 credit hours): These courses study the nature of matter, life and the universe. They enhance literacy and knowledge of one or more disciplines in the natural or physical sciences, and enhance the reasoning and observing skills necessary to evaluate issues with scientific content. A laboratory or field experience helps students gain hands-on experience with scientific research, develop observational skills of measurement and data interpretation and learn the relevance of these skills to the formation and testing of scientific hypotheses.
6. **People and Society** (2 courses, 6 credit hours): These courses introduce students to the study of social groups, including social institutions and processes and the forces that mold and shape social groups, including values, beliefs, communication processes and organizational principles. They prepare students to approach social phenomena of all kinds in an informed and critical way; to describe, analyze, compare and contrast social phenomena; and to analyze their own sociocultural assumptions and traditions.
7. **Humanities and the Arts** (2 courses, 6 credit hours): These courses foster students' understanding of fundamental aesthetic, cultural, literary, philosophical and theological issues. They sharpen critical and analytical abilities so that students may develop a deeper

appreciation of works of art and literature and of philosophical, ethical and religious ideas and belief systems.

Point-of-View Requirements

NB: Point-of-view requirements may be satisfied either within or outside the college, but at a minimum three of the 12 credit hours must be within CMCI. They may also overlap with breadth requirements and/or major requirements. In addition, a single course may be designated both "H" and "D."

1. **Historical Views** (2 "H" designated courses, 0–6 additional credit hours). This requirement enables students to understand that every contemporary issue has a history, and that an understanding of historical context and change is essential to an understanding of the contemporary moment. "H" designated courses emphasize longitudinal thinking and the investigation of the processes and the meanings of change over time.
2. **Diversity and Global Cultures** (2 "D" designated courses, 0–6 additional credit hours). This requirement increases students' understanding of the world's diversity and pluralism. "D" designated courses study some aspect of two broad and interrelated areas:
 - a. the nature and meaning of diversity and the experience of groups marginalized because of their race, ethnicity, gender, sexuality or other characteristics; and
 - b. cultures other than those of Europe and the United States.

Academic Advising and Responsibilities

Students in the college are expected to assume responsibility for planning their academic program in conjunction with their academic advisor in accordance with college rules and policies and with departmental major requirements. Any questions concerning these provisions are to be directed to the student's academic advisor. The college cannot assume responsibility for problems resulting from students failing to follow the policies stated in the catalog or from incorrect advice given by someone other than an appropriate staff member of the college.

All new students are required to attend a special orientation, advising and registration program on campus before enrolling.

Advising

Academic advising is an integral part of undergraduate education. The goal of all academic advising is to help students make responsible decisions as they develop educational plans compatible with their potential and with their career and life goals. Advising is more than the sharing of information about academic courses and programs; it includes encouraging students to formulate important questions about the nature and direction of their education and working with them to find answers to those questions. Advisors confer with students about alternative course schedules and other educational experiences, but students themselves are responsible for selecting the content of their academic program and making progress toward an academic degree.

As students progress through their academic program, their questions and concerns change. CU Boulder offers a system of faculty, professional academic advisors and peer advisors to address these ongoing and multifaceted concerns.

Students are ultimately responsible for choosing appropriate courses, for registering accurately and for meeting all degree requirements. Academic advisors assist students in clarifying their interests, values and goals

and help students relate these to academic programs and educational opportunities. As students work with their advisors, the advisors help students develop a coherent and balanced program of study that fulfills graduation requirements and assist students in identifying and integrating into their programs educational experiences outside the classroom that enhance their personal, intellectual and professional development. Academic advisors also assist students in understanding academic policies, requirements, procedures and deadlines.

Responsibilities of Students and Advisors

Within the advising system on the Boulder campus, both students and advisors have responsibilities.

Students are responsible for:

1. knowing the requirements of their particular academic program, selecting courses that meet those requirements in an appropriate time frame, registering accurately and monitoring their progress toward graduation;
2. consulting with their academic advisor several times every term;
3. scheduling and keeping academic advising appointments in a timely manner throughout their academic career, so as to avoid seeking advising only during busy registration periods;
4. being prepared for advising sessions (for example, by bringing in a list of questions or concerns, having a tentative schedule in mind and/or being prepared to discuss interests and goals with their advisor);
5. knowing and adhering to published academic deadlines;
6. monitoring their position on registration waitlists; and
7. reading their CU email on a weekly basis.

Advisors are responsible for:

1. helping students clarify their values, goals and abilities;
2. helping students understand the nature and purpose of a college education;
3. providing accurate information about educational options, requirements, policies and procedures;
4. helping students plan educational programs consistent with the requirements of their degree program and with their goals, interests and abilities;
5. assisting students in the continual monitoring and evaluation of their educational progress; and
6. helping students locate and integrate the many resources of the university to meet their unique educational needs and aspirations.

General Graduation Requirements

CMCI students must fulfill the following requirements for graduation:

1. Pass a total of 120 credit hours.
2. Maintain a 2.00 overall grade point average and a 2.00 grade point average in CMCI major coursework.
3. All courses taken for the major requirements must be passed with a C- or better.
4. Pass 45 credit hours of upper-division work.
5. Complete a minimum of 45 credit hours in University of Colorado courses on the Boulder campus. Of these 45 credit hours, a minimum of 30 credit hours must be upper division credit hours completed as a matriculated student in CMCI. Six of the 45 credit hours may be taken at other University of Colorado campuses. Courses taken while on CU Boulder study abroad programs, through CU Boulder continuing

education or CU Boulder correspondence courses are considered to be in residence.

6. Complete a major offered by the College of Media, Communication and Information. Students are subject to the major requirements in force when they declare the major.
7. Complete the CMCI core and MAPS requirements.

Programs of Study Advertising, Public Relations and Media Design

Advertising, Public Relations and Media Design (APRD) strives to produce leaders in the area of strategic communication who have mastered a design-thinking process grounded in analytical and creative thought. We believe in amplifying our students' curiosity, increasing their tolerance for risk and encouraging them to look at life and a career with an entrepreneur's eye for opportunity. APRD is committed to providing students the necessary tools and techniques to think critically, adapt, create and above all lead in a rapidly changing media world.

Our goal is to help students acquire the kind of in-depth expertise in at least one area of strategic communication and design that will enable them to generate ideas and solve problems for a variety of organizations, including but not limited to ad agencies, PR firms, publishing and design firms, nonprofits, start-ups and personal ventures. We produce graduates who are forward-looking and have a deep interest in and knowledge of diverse cultures both within the United States and throughout the world.

Advertising, Public Relations and Media Design actively encourages students to enroll in courses offered both within and outside CMCI. Similarly, many of our courses are open to students in other units on the grounds that the design-thinking process can be used to solve problems in a wide variety of disciplines.

Course code for this program is APRD.

Bachelor's Degree

- Strategic Communication - Bachelor of Science (BS) (p. 774)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

APRD 1000 (3) Creative Industries

Explores creative and strategic thinking and the many industries involved in creating brand communication as well as these industries growing interdependence in a changing media landscape. Considers technology's impact and the effect of commercial culture on an increasingly diverse society.

APRD 1001 (3) Creative Concepts

Introduces students to a disciplined process that is used to create innovative solutions across commercial communication fields. Emphasizes approaches to problem identification and solution that combine research and human insight with a variety of creative thinking techniques. Topics include need finding, structured brainstorming, rapid sketching, storytelling and visual communication.

Requisites: Requires a prerequisite course of APRD 1000 or JOUR 2403 (minimum grade C-). Restricted to Strategic Communication (STCM) or Advertising (JADV) majors only.

APRD 1002 (3) Introduction to Branding

Designed to help students acquire a basic understanding of brand and brand culture. Emphasis on theories and practical problems to learn effective ways of building a strong brand strategy. Encompasses every facet of making strategic decisions for a brand. Involves understanding the content a consumer requires, how the consumer will come in contact with the brand and what is the goal of the relationship between consumer and content.

Requisites: Requires a prerequisite course of APRD 1000 (minimum grade C-). Restricted to Strategic Communication (STCM) or Advertising (JADV) majors only.

APRD 1050 (3) Digital Media Production for Strategic Communicators

Provides intensive training in the theory and skills necessary to create compelling strategic communication content for a variety of digital media platforms and channels. Students will gain hands-on experience writing and producing content for the web, including video, infographics, podcasts, blogs and social media.

Requisites: Requires a prerequisite course of APRD 1000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 2000 (3) Principles of Advertising

Explores the practice of advertising from a variety of viewpoints including advertisers, agencies and the public. Students will examine advertising via successful campaigns for some of the world's most iconic brands. Topics include history and evolution of the industry, the process of creating ideas in a multi-disciplinary world and challenge of advertising to act ethically and responsibly within society. Cannot be taken concurrently with APRD 2002 or APRD 2003.

Requisites: Requires prerequisite courses of APRD 1001 and APRD 1002 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 2002 (3) Principles of Public Relations

Overview of public relations practice and theory including history, media channels and relations, legal and ethical concerns, international and diverse perspectives, and career options. Cannot be taken concurrently with APRD 2000 or APRD 2003.

Requisites: Requires prerequisite courses of APRD 1001 and APRD 1002 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 2003 (3) Principles of Design

Provides a comprehensive survey of the ideas, events, and individuals that determined the design of information, objects, culture, and commerce across societies. Students will examine the social, political and cultural contexts that have shaped media design and the ideologies and relationships of similar movements in art and architecture. Cannot be taken concurrently with APRD 2000 or APRD 2002.

Requisites: Requires prerequisite courses of APRD 1001 and APRD 1002 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 3000 (3) Intermediate Creative Concepts

Explores both strategic and creative thinking and examines approaches to narrative storytelling as a tool for telling overarching brand stories. Students use the foundation to develop creative briefs and advertising campaigns. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of APRD 2003 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 3001 (3) Intermediate Design Concepts

Students are introduced to design elements and principles, research and visual storytelling. They are challenged to communicate intellectual, sensory and emotional concepts by learning a visual vocabulary of type, color, and form expressed in a variety of mediums and dimensions.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of APRD 2003 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 3002 (3) Communication Platforms

Explores cross-channel media consumption (television, print, radio, Internet, product placement, word-of-mouth, etc.) and developing evaluative techniques to choose media that will most effectively implement a brand strategy; allows students to learn how to utilize different forms of media in the context of integrated brand communication.

Requisites: Requires a prerequisite course of APRD 2000 or JOUR 2403 (minimum grade C-). Restricted to Strategic Communication (STCM) or Advertising (JADV) majors only.

APRD 3003 (3) Strategic Communication Research Methods

Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the target relationship with specific product categories and identify the emotional and practical needs that create brand relationships.

Requisites: Requires a prerequisite course of APRD 2000 or APRD 2002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 3004 (3) Account Management

Examines managerial and decision making processes of advertising and related brand communication functions. Emphasis on determining opportunities, integrating with other elements of the promotion mix, setting objectives, establishing budgets, and measuring advertising and communication effectiveness.

Requisites: Requires a prerequisite course of APRD 2000 or JOUR 2403 (minimum grade C-). Restricted to Strategic Communication (STCM) or Advertising (JADV) majors only.

APRD 3005 (3) Content Strategy and User Engagement

Explore and understand the importance of content as a brand building tool. Students will gain the ability to use analytics to create strategy that allows the brand to have meaningful and cohesive conversation with its community.

Requisites: Requires a prerequisite course of APRD 2000 or APRD 2002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3006 (3) History of Advertising

Explores the critical moments in advertising history from the start of the Industrial Revolution through the current post digital era.

Requisites: Requires a prerequisite course of APRD 2000 (minimum grade C-).

Grading Basis: Letter Grade

APRD 3007 (3) Curiosity for Strategists

Introduces students to the practice of curiosity as the basis of creative problem solving. Students will participate in exercises and exploration based projects to increase productive curiosity, critical thinking and creative products, which will inform the development of integrated marketing communication campaigns.

Requisites: Requires a prerequisite course of APRD 2000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3008 (3) Qualitative Research Methods

Exposes students to the principles and methods of qualitative methodology including interviews, focus groups and ethnography. Explores how these methods inform the practice of strategic communication.

Requisites: Requires a prerequisite course of APRD 2000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3100 (3) Design for Digital Media

Explores how to create and produce effective and engaging designs for dynamic information across a variety of screens while maintaining brand identity. Extending the design principles learned in previous classes, the student will concept for user interfaces (UI) and navigational frameworks that optimize usability, accessibility.

Requisites: Requires prerequisite course of APRD APRD 3001 or JOUR 3503 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 3102 (3) Story Design I

Explores the development of interactive concepts that meet the strategic brief's brand objectives. Emphasis is placed first on developing strong digital ideals. Students also master the styles appropriate for different digital media and then use those skills.

Requisites: Requires prerequisite course of APRD 2000 or APRD 2002 or APRD 2003 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 3103 (3) Strategic Writing for Public Relations

Emphasis on communication tactics; plan, write and execute public relation tools; audience segmentation; media selection; application of social media channels.

Requisites: Requires a prerequisite course of APRD 2002 (minimum grade C-).

APRD 3112 (3) International Public Relations

Introduces students to the cultural, social and economic issues relevant to strategic communication in the global arena. Provides students with the foundational tools necessary to both understand and effectively navigate the often complex world of strategic intercultural communication. Specific topics will include exploration of the contextual factors that influence public relations practice in different nations/ regions, discussion of the various theoretical models that govern global PR practice and critical evaluation of international PR case studies/ campaigns.

Requisites: Requires a prerequisite course of APRD 2002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3300 (3) Crisis Communication in Public Relations

Explores theories and research related to public relations communication before, during and after a crisis; examines the fundamentals of organizational communication, crisis management and strategic planning.

Requisites: Requires prerequisite course of APRD 3103 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3301 (3) Social Media Strategies for Public Relations

Emphasis on how social media and internet marketing influence public relations; understand the fundamentals and best practices in social media management, visual communication and mobile applications.

Requisites: Requires prerequisite course of APRD 2000 or APRD 2002 or APRD 2003 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3302 (3) Case Studies in Public Relations

Designed to help develop and refine critical thinking in selecting, creating and applying tools, techniques and principles of public relations to a variety of managerial cases and problem situations.

Requisites: Requires a prerequisite course of APRD 2002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3304 (3) History of Advertising

Explores the critical moments in advertising history from the start of the Industrial Revolution through the current post digital era.

Requisites: Requires a prerequisite course of APRD 2000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3500 (3) Story Design II

Explores the uses of story and how the design of story must adapt to different platforms and genres, including both short- and long-form narratives, visual narrative, film, personal essay and advertising copy writing.

Requisites: Requires a prerequisite course of APRD 3102 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3700 (1-3) Field Study in Strategic Communication

Creates an immersive experience for students in regards to the history, business practices and current thinking of top industry companies. Students will first complete course work at CU Boulder and then travel to major industry hubs to visit advertising, design, PR and other marketing communication companies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of APRD 1000 (minimum grade C-). Restricted to College of Media, Communication Information (CMCI) or Business (BUSN) majors only with 60-180 units completed.

APRD 4000 (3) Public Relations Event Planning

Introduces students to the planning and execution of special events. Specifically, the course will locate special event planning within the broader context of organizational strategy and will introduce students to project management through proposal development, scheduling, budgeting and evaluation components that underlie successful event production. Will culminate in the execution of a full-scale event near the end of the semester.

Requisites: Requires a prerequisite course of APRD 3103 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 4010 (3) Strategic Health Communication

Introduces students to theory, research and contemporary concerns in health communication. Focuses on strategic communication for public service and public education campaigns related to health. Includes advertising and health promotion, community relations, public service programs, advocacy, online communities and social media management.

Requisites: Requires a prerequisite course of APRD 3103 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 4100 (3) Brands and Culture

Explores the intersection between culture and marketing communication. Students will examine brand communities, brand and category culture as well as popular culture and the impact on and within marketing communication. The goal is for students to become more aware of the importance of culture in the ability of communication to disrupt the status quo within a market.

Requisites: Requires a prerequisite course of APRD 2000 or APRD 2002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 70 hours.

Grading Basis: Letter Grade

APRD 4101 (3) Advertising Media Planning

Examine how owned, earned and paid (or traditional and non-traditional) media campaigns are planned, budgeted, executed and evaluated.

Requisites: Requires a prerequisite course of APRD 2000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 70 hours.

Grading Basis: Letter Grade

APRD 4102 (3) Sustainable Brand Practices: Ethics Cases in Advertising and PR

Explore contemporary issues and ethics cases in advertising and public relations and how these practices impact the long-term success of a brand. Students will explore branding concepts and theories of ethics to examine some of the current controversies in which advertising and public relation campaigns are involved and how these issues can be dealt with in an ethical and socially responsible manner.

Requisites: Requires a prerequisite course of APRD 2000 or APRD 2002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 70 hours.

Grading Basis: Letter Grade

APRD 4300 (3) Strategic Communication Analytics and Metrics

Provide students with a base knowledge of analytics and metrics used in strategic communication. Students will learn how to obtain and clean big data, how to analyze and turn it into insights and how to present and communicate insights into actionable recommendations.

Requisites: Requires a prerequisite course of APRD 2000 or APRD 2002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 70 hours.

Grading Basis: Letter Grade

APRD 4403 (4) Strategic Communication Campaigns

Gives students the opportunity to work in small groups to develop material for an actual client. Examines basic principles of group dynamics and effective teamwork while conducting research, developing strategies and creating a multimedia campaign. All work is presented to the client.

Requisites: Requires prerequisite course of APRD 3000 or APRD 3001 or APRD 3002 or APRD 3003 or APRD 3004 or JOUR 3503 or JOUR 3463 (minimum grade C-). Restricted to Strategic Communication (STCM) or Advertising (JADV) majors only with a minimum of 85 hours.

Additional Information: Departmental Category: Advertising Media Design

APRD 4404 (3) Advanced Ad Campaigns NSAC

Work and design an ad campaign for a real world client through the National Student Advertising Competition (NSAC).

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of APRD 3000 or APRD 3001 or APRD 3002 or APRD 3003 or APRD 3004 (minimum grade C-).

Restricted to Strategic Communication (STCM) majors only with a minimum of 80 hours completed.

Grading Basis: Letter Grade

APRD 4453 (3) Advertising and Society

Examines criticisms and contributions of advertising in society and the economy.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) students with a minimum of 73 hours taken.

Additional Information: Departmental Category: Advertising Media Design

APRD 4501 (3) Design for Social Innovation

Provides an introduction to design thinking as a means to drive social change and solve real-world problems. This studio class is project based and asks students to experiment with new behaviors of work and learning, including: collaboration, iteration, prototyping, empathizing, craft and inference. Field work and collaboration with teammates are required.

Requisites: Requires a prerequisite course of APRD 2000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 70 hours.

Grading Basis: Letter Grade

APRD 4503 (3) Portfolio 1

Enhances student conceptual abilities and generates both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals. Instructor consent required.

Requisites: Requires a prerequisite course of APRD 3000 or JOUR 3503 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Additional Information: Departmental Category: Advertising Media Design

APRD 4523 (3) Portfolio 2

Gives students an opportunity to develop an extensive body of work. Students create integrated campaigns, which include print, digital and guerilla ideas. Final portfolios are critiqued by both faculty and outside reviewers. Instructor consent required.

Requisites: Requires a prerequisite course of APRD 4503/JOUR 4503 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Additional Information: Departmental Category: Advertising Media Design

APRD 4543 (3) Strategic Brand Management

Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication.

Requisites: Requires a prerequisite course of APRD 3002 or APRD 3103 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 70 hours.

Additional Information: Departmental Category: Advertising Media Design

APRD 4600 (3) Design Portfolio I

Develop a variety of design concepts and execute them at a professional level. Students are assigned projects typical of those handled by design firms to demonstrate their ability in areas such as branding, product design, interaction design, etc. Students will also design their own online portfolio. Creative work is presented in a juried show at the end of the semester. Department requisite: students must apply with a portfolio, the quality will determine enrollment.

Requisites: Requires a prerequisite course of APRD 3001 (minimum grade C-).

Grading Basis: Letter Grade

APRD 4601 (3) Design Portfolio II

Refine the skills learned in APRD 4600 and further development of work at a professional level. With help from visiting professionals, students continue to develop a body of work that provides their mastery of user-centered design and branding across a variety of real-world assignments. The final portfolio is judged in the student creative show, juried by design professionals. Department prerequisite: students must apply with a portfolio, the quality will determine enrollment.

Requisites: Requires a prerequisite course of APRD 3001 (minimum grade C-).

Grading Basis: Letter Grade

APRD 4700 (3) Advertising Intensive

Immerses students in the process of creating successful communication and deepens their understanding of current industry standards and practices. Students will learn, develop and execute all aspects of the communication process under the guidance of professionals. Offered Maymester only.

Requisites: Requires a prerequisite course of APRD 1000 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 4841 (1-4) Undergraduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

APRD 4873 (1-3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Media, Communication, and Information (CMCIU), Program in Journalism Mass Communication (JOURU) or Strategic Communication (STCM) majors only.

Additional Information: Departmental Category: Advertising Media Design

APRD 4931 (1-6) Internship

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Strategic Communication - Bachelor of Science (BS)

Strategic communication is an umbrella term covering all three undergraduate tracks offered by the department. The tracks from which students may choose are:

1. Advertising
2. Public Relations
3. Media Design

Requirements

Each degree track requires 34 credit hours, comprised of the 19-credit-hour departmental Core Curriculum and 15 credit hours of specialized course work. The courses of specialized studies include Strategic Communication Campaigns (APRD 4403), a 4-credit-hour capstone course completed in the student's final year.

Core Curriculum

Students must take the following courses to complete the department core requirement.

Required Courses and Semester Credit Hours

1st Semester		
APRD 1000	Creative Industries	3
2nd Semester		
APRD 1001	Creative Concepts	3
APRD 1002	Introduction to Branding	3
Anytime after 2nd Semester		
JRNL 3651	Media Law and Ethics	3
APRD 4931	Internship (anytime after 3rd semester: at least 3 credit hours)	3
7th and 8th Semesters		
APRD 4403	Strategic Communication Campaigns (plus 1 credit hour of lab/workshop)	4
Total Credit Hours		19

Media Design and Creative Advertising Track

The media design and creative advertising track consists of two required courses and three electives totaling 15 credit hours. All media design students are also required to maintain an online portfolio of their work. A portfolio review is required for graduation.

Required Courses and Semester Credit Hours

3rd Semester

APRD 2003	Principles of Design	3
-----------	----------------------	---

4th Semester

Select one of the following:		3
------------------------------	--	---

APRD 3000	Intermediate Creative Concepts (suggested for all creative advertising majors)	
APRD 3001	Intermediate Design Concepts (suggested for design majors)	

4th through 8th Semesters

EITHER three required electives offered by APRD under the Media Design track, OR one of three suggested pathways:		9
---	--	---

1. Creative Advertising - Copywriting:

APRD 3500	Story Design II	
APRD 3102	Story Design I	
APRD 4503	Portfolio 1	
APRD 4523	Portfolio 2	

2. Creative Advertising – Art Direction:

APRD 3001	Intermediate Design Concepts	
APRD 3100	Design for Digital Media	
APRD 4503	Portfolio 1	
APRD 4523	Portfolio 2	

3. Media Design:

APRD 3100	Design for Digital Media	
Branding and Identity Systems		
APRD 4600	Design Portfolio I	
APRD 4601	Design Portfolio II	

General Electives:

APRD 2000	Principles of Advertising	
APRD 2002	Principles of Public Relations	
APRD 3001	Intermediate Design Concepts	
APRD 3100	Design for Digital Media	
APRD 3102	Story Design I	
APRD 3500	Story Design II	
APRD 4503	Portfolio 1	
APRD 4523	Portfolio 2	
APRD 3700	Field Study in Strategic Communication	
APRD 4501	Design for Social Innovation	
APRD 4600	Design Portfolio I	
APRD 4601	Design Portfolio II	
APRD 4700	Advertising Intensive

Social Media Strategies

PR Law and Ethics

Total Credit Hours		15
--------------------	--	----

Secondary Area of Study

In addition to coursework required for the major, all students in STCM must complete a secondary area of study outside of STCM. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree, or any credit-based certificate program of at least 12 credit hours.

Communication

The Bachelor of Arts in communication provides analytic work from both humanistic and social-scientific perspectives, and practical work to improve communication performance in various kinds of situations.

The undergraduate degree in communication emphasizes knowledge and awareness of:

- the basic contexts in which communication is enacted (e.g., interpersonal, group, organizational and public contexts);
- the various processes of interaction within these contexts;
- the basic methods of investigating questions about communication;
- the ethical issues and responsibilities of communication practice;

- the diversity of communication styles associated with gender and cultural differences;
- the uses and implications of communication technology; and
- the history and development of communication as an object of scholarly study, including both the humanistic and social-scientific traditions.

In addition, students completing the degree in communication are expected to acquire the ability and skills to:

- express ideas in an informed, coherent and effective manner, particularly the ability to articulate and develop a sustained argument, both orally and in writing;
- analyze, criticize and evaluate messages and interactions in a variety of practical contexts, both orally and in writing; and
- adapt messages and negotiate interactions responsibly in diverse and changing situations.

There are optional programs in which students are encouraged to participate such as study abroad, internships and graduating with honors.

Course code for this program is COMM.

COMM 1210 (3) Perspectives on Human Communication

Surveys communication in a variety of contexts and applications. Topics include basic concepts and general models of communication, ethics, language and nonverbal communication, personal relationships, group decision making, organizational communication, and impact of technological developments on communication. Required for COMM majors.

Additional Information: Arts Sci Core Curr: Contemporary Societies
MAPS Course: Social Science

COMM 1300 (3) Public Speaking

Covers theory and skills of speaking in various public settings. Examines fundamental principles from rhetorical and communication theory and applies them to oral presentations. Required for COMM or COMN majors.

COMM 1600 (3) Group Interaction

Covers basic theories, concepts, and characteristics that underlie face-to-face interactions in interpersonal, small group, and organizational settings. Activities stress the development of both task and relational skills in these settings. Required for COMM or COMN majors.

COMM 2000 (3) Topics in Communication

Investigates select topics in communication. Does not count toward the 2000-level courses required for the major, unless explicitly stated in the course schedule.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2360 (3) Campaigns and Revolutions

Introduces concepts in rhetoric and argumentation that are used to explain significant social and political changes in our society. The goal is to show how social actors use rhetoric to promote some social goals and hinder others.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2400 (3) Discourse, Culture and Identities

Examines how aspects of talk (e.g., turn-taking, speech acts, narratives, dialect, and stance indicators) link with identities (e.g., ethnic and racial, age, gender, work-related, and personal). Considers how communication is central to constructing who people are and examines social controversies related to talk and identities.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

COMM 2500 (3) Interpersonal Communication

Focuses on basic processes in face-to-face interaction, including verbal and nonverbal messages, coordination in conversation, messages about self and others, and communication in personal relationships. Emphasizes theory and concepts rather than skills.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2600 (3) Organizational Communication

Provides a communicatively based definition of formal organization and deals with individual-organizational relationships. Addresses topics such as organizational theory, organizational culture, power, technology, decision making, teamwork, leadership, diversity, gender, socialization, and ethics.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3000 (3) Issues in Communication

Explores select issues in communication.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3210 (3) Human Communication Theory

Acquaints students with general, thematic, and contextual theories of human communication. Gives attention to criteria for evaluating theories.

Requisites: Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

COMM 3300 (3) Rhetorical Foundations of Communication

Provides the rhetorical foundations of communication through study of the humanistic traditions of rhetorical theory, with applications to social interaction and message analysis.

Requisites: Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

COMM 3310 (3) Principles and Practices of Argumentation

Focuses on principles of argument, the process of critical decision making, and uses and limitations of logic and evidence. Contemporary issues (personal, social, political, or philosophical) are analyzed and debated.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3320 (3) Persuasion in Society

Explores how persuasion influences decision making. Focuses on different definitions and models of persuasion, ethical perspectives on persuasion, qualitative and quantitative research on persuasion, and the tools of motivation, as well as how to create effective and ethical persuasive messages.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3340 (3) Political Communication

Provides an overview of the role of communication in contemporary political life. Topics include political communication theories, political campaign communication, media and political communication, and the role of political communication in promoting democracy and public policy.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3370 (3) Environmental Communication

Introduces the growing field of environmental communication, including historical events, key concepts, legal landmarks, technological developments and public controversies at the intersection of the environment, economics and social justice. Focuses on persuasive communication in the public sphere, as well as the constitutive power of communication to name and redefine what has been and might become possible in our environmental imaginations.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

COMM 3410 (3) Intercultural Communication

Explores complex relationships between culture and communication processes from various conceptual perspectives, such as social, psychological, interpretive, and critical. Considers the important role of context (e.g., social, historical, and cultural) in intercultural interactions.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

Additional Information: Arts Sci Core Curr: Human Diversity

COMM 3420 (3) Gender and Communication

Examines gender as a social practice that remains vital to identities, relationships, and institutions in contemporary society. Treats gender as something we do or enact through communication, rather than as something we are or have, and explores the implications of this shift in perspective. Investigates how gender interacts with sexuality, race, class, nation, age, ability, and other aspects of identity.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

COMM 3510 (3) Family Communication

Explores communication in families from various theoretical perspectives, such as social constructionism, systems theory, and dialectical theory. Communication patterns and processes created and sustained by family members are examined, including rules, roles, stories, rituals, myths, metaphors, themes, and cycles.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3610 (3) Communication, Technology, and Society

Presents theory, research, and exploration into computer-based technologies; studies implications for communication, interaction, and social relationships.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3700 (3) Communication and Conflict Management

Examines interdisciplinary concepts and theories enabling students to better understand different types of conflict, sources of conflict, and communication patterns that serve to create, maintain and transform conflict. Teaches practical skills in conflict management areas such as bargaining, facilitation, mediation and negotiation.

Equivalent - Duplicate Degree Credit Not Granted: PACS 3700

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

COMM 3740 (3) Qualitative Communication Research Methods

Provides an understanding of methods associated with the study of communication in natural settings. Focuses on strategies of collecting, analyzing, and reporting qualitative data, including participant observation, in-depth interviewing, textual analysis, and ethnographic narrative.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3750 (3) Quantitative Research Methods

Introduces empirically oriented research methods in communication, critical review of the logic of social-scientific principles in communication, and analysis of quantitative data.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3760 (3) Rhetorical Criticism

Applies key concepts from rhetorical theory to the analysis of specific speeches, written texts, and social situations within the humanistic tradition. Students read a variety of types of criticism and are encouraged to develop their own strategies for critical analysis.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

Recommended: Prerequisites COMM 1210 and COMM 1600 and COMM 3300.

COMM 4000 (1-6) Advanced Topics in Communication

Analyzes special interest areas of communication theory, research, and practice. Course format involves lecture, discussion, investigative analysis, and practical application. May be repeated twice for credit on different topics.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 3210 and COMM 3300.

COMM 4100 (3) Seminar in Honors Thesis Writing and Research

Provides the opportunity for students writing an honors thesis to develop their understanding of the research process and to improve their research and writing skills.

Requisites: Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

Additional Information: Arts Sciences Honors Course

COMM 4220 (3) Senior Seminar: Functions of Communication

Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.

Equivalent - Duplicate Degree Credit Not Granted: COMM 5220

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4300 (3) Senior Seminar: Rhetoric

Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.

Equivalent - Duplicate Degree Credit Not Granted: COMM 5300

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of COMM 3300 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4510 (3) Senior Seminar: Interpersonal Communication

Reviews current theory and research on topics such as strategic interaction, relationship formation and maintenance, and identity and self-presentation. May be taken twice for credit on different topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4600 (3) Senior Seminar: Organizational Communication

Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.

Equivalent - Duplicate Degree Credit Not Granted: COMM 5600

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4610 (3) Communication Studies of Science and Technology

Reviews current theory and research associated with science, technology, and medicine. Topics include new communication technologies in organizations and society, discourses of scientific theory and science policy, and interaction in clinical setting. May be taken twice for credit on different topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4840 (1-6) Undergraduate Independent Study

Note that the 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 33 credit hours required for the major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only.

Recommended: Prerequisites COMM 3210 and COMM 3300.

COMM 4930 (1-6) Internship

Studies are pursued in communication-related work experience projects that generally require 40 hours on the job per credit hour and evidence (e.g., journal, paper and employer evaluation) of significant learning. The 14-hour limit in the major applies to any combination of independent study and internship credit and does not count toward the 33 hours required for the major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only.

Recommended: Prerequisite 57 hours of overall course work, 18 hours of communication course work completed, 2.50 overall GPA and a faculty sponsor.

Grading Basis: Pass/Fail

COMM 4950 (1-6) Senior Thesis: Honors

For exceptional communication majors who wish to graduate with department honors and receive credit for writing an honors thesis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite COMM 4100 and overall GPA of 3.35 or higher and a COMM or COMN GPA of 3.50 or higher.

Additional Information: Arts Sciences Honors Course

Communication - Bachelor of Arts (BA)

The BA in communication provides a broad-based liberal arts degree designed to foster students' abilities to understand, analyze, and effectively engage in a wide range of communication practices. It fosters critical thinking about the ways that symbols and interactions contribute

to social problems and solutions to them, to identities and differences, to organizations and work, to personal relationships and groups and to experience and meaning across cultural settings.

At the same time, the major provides instruction and practice in the skills of effective communication and collaborative problem-solving that employers are looking for—speaking, writing, reading, listening, asking good questions, utilizing media and working in groups. The mix of theory and practice gives students the tools to improve communication performance and critical awareness of it across many situations.

Requirements

Majors must complete a minimum of 36 credit hours of course work in communication, at least 18 of which must be upper division (3000 level or higher). Only courses with grades of C- or better count toward the major, and the overall major GPA must be 2.000 (a C- is 1.700).

Required Courses and Semester Credit Hours

Required Courses

COMM 1210	Perspectives on Human Communication	3
COMM 1300	Public Speaking	3
COMM 1600	Group Interaction	3
COMM 3210	Human Communication Theory	3
COMM 3300	Rhetorical Foundations of Communication	3
Select at least two of the following:		6
COMM 2360	Campaigns and Revolutions	
COMM 2400	Discourse, Culture and Identities	
COMM 2500	Interpersonal Communication	
COMM 2600	Organizational Communication	
Select one of the following methods courses:		3
COMM 3740	Qualitative Communication Research Methods	
COMM 3750	Quantitative Research Methods	
COMM 3760	Rhetorical Criticism	
Select one of the following senior seminars:		
COMM 4220	Senior Seminar: Functions of Communication	
COMM 4300	Senior Seminar: Rhetoric	
COMM 4400		
COMM 4510	Senior Seminar: Interpersonal Communication	
COMM 4600	Senior Seminar: Organizational Communication	
COMM 4610	Communication Studies of Science and Technology	

At least two additional upper-division electives (3000- or 4000-level courses): 4000-level courses may be taken twice (only twice) with different topics 6-9

Total Credit Hours 30-33

Up to 8 credit hours of independent study and 6 credit hours of internships may be taken. These are upper-division elective hours but do not count toward major requirements. Eligible students interested in graduating with department honors should contact the department's honors coordinator as soon as possible.

Secondary Area of Study

In addition to coursework required for the major, all students in COMM must complete a secondary area of study outside of COMM. This secondary area of study can be met by any of the following: a minor,

a second major within CMCI, a double degree, or any credit-based certificate program of at least 12 credit hours.

The department encourages its majors to take related courses in other departments in CMCI as well anthropology; business; English; ethnic studies; history; linguistics; philosophy; political science; sociology; speech, language and hearing sciences; and theatre and dance.

The department also encourages participation in optional programs such as study abroad, internships and graduating with honors.

Students who wish to major in communication should meet with a department advisor, where they will be advised of any changes in this list of requirements.

Communication - Minor

Communication is essential in our lives. Employers consistently rank communication skills among the most important qualities they look for in potential employees. Relationships of all sorts are built upon communication. Change at the personal, local and societal levels is advanced through advocacy and other forms of purposeful communication.

A minor in communication allows you to explore how communication shapes everything we do in society. Your classes will introduce you to theories that allow you to understand how communication creates the worlds we live in. They will provide you the tools to analyze and potentially change real-world processes and problems. They will offer you the chance to develop practical skills to apply in your professional, personal and civic life. In the process, you will get a broad exposure to the study of communication as it occurs in interpersonal, group, organizational and public settings.

To declare the communications minor, visit COMM advisors Bevin Gumm (Armory 1B12) or Debbie J. O'Neill (Armory 1B15) during advising walk-in hours on Mondays from 1 to 3 p.m.

Requirements

Students pursuing the minor must complete a minimum of 18 credit hours of course work in communication, at least 9 of which must be upper division (3000 level or higher). Only courses with grades of C- or better count toward the major, and the overall major GPA must be 2.000 (a C- is 1.700). They may apply no more than 6 credit hours of transfer work, including 3 credit hours of upper-division credit.

Required Courses and Semester Credit Hours

COMM 1210	Perspectives on Human Communication	3
COMM 1300	Public Speaking	3
	or COMM 1600 Group Interaction	
One 2000-level course		3
Three upper-division courses (3000 level or higher)		9
Total Credit Hours		18

Students who wish to minor in communication should meet with a department advisor, where they will be advised of any changes in this list of requirements.

Critical Media Practices

Critical media practices addresses the changing landscape of electronic media making by developing student analytical and production skills

across a wide range of platforms, practices and technologies. The department explores the creative potential of cross-platform media production, as well as time-based media arts practices, such as immersive media production, sound practices and performance media. Our convergent approach to media spans a variety of media tools including digital photography, audio/video editing and single camera video production, computational media, open source programming and emergent tools under development. Our students acquire the skills and perspective to critically understand and actively contribute to this new constellation of audio-visual media making possibilities. The Department of Critical Media practices aims to prepare students to pursue careers as media art creators and critical citizens for the 21st century.

Production coursework encourages the development of personal style as students explore the expressive potential of emergent media practices, with a particular emphasis on the documentary impulse and making the “invisible” visible. Our program explores media art from a critical perspective: its nature, its history and its place in the contemporary world. Students are required to analyze not only existing media but also their own work. In this way the program presents media art as a way of engaging and knowing the world. At the graduate level, our department features an MFA degree in Interdisciplinary Documentary Media Practices and a Graduate Certificate in Interdisciplinary Documentary Media Practices. The department also offers a practice-led Ph.D. in Emergent Technologies and Media Art Practices. The Center for Documentary and Ethnographic Media is affiliated with our program. Our department collaborators include faculty and students from Anthropology, Art and Art History, Center for the American West, Center for Asian Studies, Dance, English, Film Studies, Geography, Music and programs within the College of Media Communication and Information.

Course code for this program is CMDP.

CMDP 1400 (4) Introduction to Contemporary Media Cultures

Prepares students for critical practices in contemporary media cultures in a global context. Explores the diversity of media practices, including narrative and non-narrative forms, emphasizing aesthetics and visual studies. In lectures and labs students will explore video, sound, the internet and other multi-media platforms of expression.

CMDP 2010 (3) Information, Media and Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission and retrieval. Equips students with an understanding of technological transformations in interpersonal, organizational and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society.

Grading Basis: Letter Grade

CMDP 2100 (3) Approaches to Historical Media Practices

Investigate historical and cultural discourses in the formation of media practices. Examines practices such as performance media; cinematic media, media art, and their aesthetic alignment to cognate movements throughout history.

CMDP 2400 (3) Media Aesthetics

Builds students' ability to watch, reflect on, and write about media images. The course will be grounded in the analysis of media practices with special focus on media style and storytelling techniques. Explores media aesthetics from formal, cultural, and theoretical perspectives.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 2500 (3) Introduction to Media Practices

Working in design groups, students will explore the expressive potential of media through the production of short projects, discussions, readings, formal analysis, and critique. Provide a basic introduction to media practices as an extension of "visual thinking" and through approaches to storytelling, and hybrid media forms.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 2510 (1-3) Critical Media Practices Workshop 1

Training in narrow topics of media practices.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Media, Communication and Information (CMCI) or Arts and Sciences (ARSC) majors only.

CMDP 2600 (3) Creative Media Making

Focus on developing an understanding of the principles, forms and aesthetics of media production. Working in design groups on small-scale media preproduction and production exercises, screenings and critiques, students learn creative solutions to problems in realizing expressive media projects.

Requisites: Requires prerequisite courses of CMDP 1400 and CMDP 2500 (all minimum grade B-).

Grading Basis: Letter Grade

CMDP 2710 (3) Media Production Methods and Ideas

Explores creative approaches to idea formation, conceptualization, and organization for the moving image employing critical thinking, improvisation and visual storytelling techniques. Includes forms of creative writing, storytelling and preproduction techniques and strategies.

Requisites: Restricted to College of Media, Communication and Information (CMCI) or Arts and Sciences (ARSC) majors only.

CMDP 2720 (3) Animation

Explore computer animation in the making of short projects that may address topics such as: nonfiction, immersive environments and digital compositing. Designed to develop the student's understanding of movement, timing, scripting, editing and color composition. Through screenings and discussions students will gain an appreciation of history and practices of animation.

Requisites: Requires a prerequisite course of CMDP 2500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 2810 (3) Documentary Media Poetics

Investigates documentary cinema and media practices through class discussions, research papers, hands on exercises and the screenings. Cross-references documentary photography and moving-image documentary in the production of short digital projects. Explores the distinctive contributions of digital technologies to documentary image making.

Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C-).

CMDP 2820 (3) Exploring Culture and Gender Through Film

Explores the concepts of culture and gender from an anthropological perspective through media. By experiencing texts, images and sounds about other ways of life, students will learn the basic concepts of cultural anthropology and learn to think critically about documentary and ethnographic media material.

Grading Basis: Letter Grade

CMDP 2860 (2) Performance Audio Recording

Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering, addressing contemporary issues in technology, web, and performance media. Uses recorded material from in-class sessions. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2081

Requisites: Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 2870 (2) Recording Design

Provides hands-on instruction in various sound recording techniques. Addresses acoustics, sound reinforcement, studio maintenance and troubleshooting. Taught through labs and individual recording projects. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2091

Requisites: Requires prerequisite course of CMDP 2860 or MUSC 2081 (minimum grade D-). Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3110 (3) Electronic Arts Survey

Explores the development of electronic media art through screenings, readings, lectures and discussions.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3210 (3) Interactive Digital Cultures

Examines how the uses of interactive media have changed the classical dynamics of human communication, allowing multidirectional, non-linear and multimedia practices. In this course, students will study the various aesthetic, narrative, emotional and cultural elements of the interface in areas such as non-linear video, the web, games and hypermedia.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3310 (3) Performance Media Cultures

Reflect on the cultural construction of old and new performance media through the lens of emerging practices and contemporary discourse. From ancient theatre to cinema, interactive television to YouTube, and multi-media dance performances to computer games, this course explores how media shape, and are shaped by, various historical and contemporary audiences and contexts.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3350 (3) Modes of Documentary Media History

Introduces students to the variety of practices by examining their emergence, evolution and cultural impact in the global sphere. Students discover the major themes and genres in documentary work from photography, cinema, audio, hypermedia and the public debates they have engendered. Through lectures, screenings and research, develop critical perspectives on the international and transcultural dimensions of documentary media history.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 3450 (3) Critical Perspectives in Media Practices

Examines the contemporary landscape of media practices across platforms, such as film, social media, painting, video, and web art. This integrative exploration focuses on production contexts, circulation and reception through the lens of critical and interpretive frameworks. Drawing from key texts by major scholars and the works of media practitioners, students develop globally informed, critical perspectives for understanding.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 3500 (3) Digital Photographic Practices

Explores the creative possibilities of photography; students work on projects that combine concepts and techniques with contemporary practice and current modalities of exhibition and social distribution. Emphasis is placed on the student's personal growth through aesthetic and intellectual development in relation to current technologies.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3510 (1-3) Critical Media Practices Workshop II

Training in narrow topics of media practices. Open to CMCI students and by permission of the instructor.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3610 (3) Contemporary Image Making Practices

Provides students the technical skills for in depth exploration of the evolving principles and strategies of digital image making. Students will create small-scale projects with the primary emphasis on cinematographic experimentation and innovative visual techniques.

Requisites: Requires prerequisite course of CMDP 3500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3620 (3) Images and Stories

Learn and apply innovative non-traditional approaches to scripting and storytelling, including automatic thinking, idea sketches, visual notes, outlines and storyboards, serials, aleatoric methods, diagrams, locations, photographs and short stories. Focuses on methods of exploring scripting methods outside of the fixed and rule-bound traditional model of storytelling as a means of introducing students to discover their own scripting techniques.

Requisites: Requires a prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3710 (3) Digital Design

Introduces techniques, software and related concepts of digital design and image making through individual and group projects. Emphasizes digital animation, digital audio, digital video and website design and development as a means to formal and expressive ends. Introduces students to critical readings and theories related to digital media practice.

Requisites: Requires prerequisite course of CMDP 2010 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3720 (3) Multimedia Composition

Combine writing with media such as video, music, animation and podcasting on the computer. Includes a unit on web-site design and ends with each student creating their own website and positing on it the project they created for the course.

CMDP 3810 (3) Engaged Documentary Media Practices

Combining research, scripting methods and field trips, students produce short media non-fiction storytelling projects emerging from an engagement with historical events, contemporary issues and the world around us.

Requisites: Requires prerequisite courses of CMDP 2600 and CMDP 2810 (all minimum grade C-).

Grading Basis: Letter Grade

CMDP 3820 (3) Performance Media Practices

Develop a performance vocabulary within the context of various media platforms. Through creating individual and collaborative performance projects, students will explore performance design issues such as movement, blocking and staging with projection, sensors, sound and other media tools.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3830 (3) Advanced Performance Media Workshop

Study practical, technical and theoretical strategies of performing with and through media. This is an in-depth course that investigates a narrow scope drawn from topics that may include dance/movement, the illustrated lecture, projection environments, digital sensing, responsive lighting or acoustic strategies for performance.

Requisites: Requires prerequisite course of CMDP 3820 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3840 (3) Sound Practices

Explores the aesthetics of sound through the study of sound art and sound culture. Reading and discussion covers theories, technologies, and histories that drive the medium. Students apply concepts by designing and building their own soundscapes. Classes will be organized around hands-on activities, lecture, and discussion of readings. Instructor consent required.

Requisites: Requires prerequisite course of CMDP 2500 or CMDP 2860 or MUSC 2081 (minimum grade C-). Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3860 (3) Introduction to Music Technology

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4081 and MUEL 4081

Requisites: Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3910 (3) Media Production Topics

Rotating topics in media production techniques.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of CMDP 2500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3990 (3) Media Professional Seminar

Learn aspects of professional development in media production. Through workshops, class trips and assignments students will learn of the many opportunities found within media production.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4110 (3) Cultures of Digital Sound

Introduces students to a variety of critical scholarship and debates about our sonic environment through an examination of how sound interfaces with different facets of media production. Consisting of listening, analyzing and differentiating sound in different contexts, students will deepen their understanding of the relationship between sight and sound in cultural production.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4220 (3) Digital Archives in Media Practices

Examine the theories and methods underpinning the use of archival materials in non-fiction media production while simultaneously exploring questions of ethics, truth and representation that the use and manipulation of archives raises. Through weekly lectures, seminars, readings and screenings, students will discover the theories and interpretive approaches to understanding the archive and its uses.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4310 (3) Screen Culture and Globalization

Examine the formation of screen cultures (narrative, experimental, documentaries and multi-media video art) in the context of the cultural globalization of the moving image. Through lectures, seminars and research projects students explore the formation and evolution of screen cultures on various platforms such as digital cinema, web environments, video art, multi-channel installations and the moving image on mobile interfaces.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4320 (3) Media Engagement in Digital Diasporas

Offers students critical and interpretive frameworks for understanding the cultural and historical significance of digital diasporas and these communities' use of digital technologies for communication, community building and the creation of digital documents about migration and connectivity with the homeland.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4410 (3) Topics in Contemporary Media Technologies

Focus on the development and application of media technologies in moving image aesthetics and emergent media practices. Topics rotate according to faculty expertise, but may include new imaging technologies for small screen and mobile devices, web-specific media or emerging modes of production. Through lectures, screenings and seminar, students explore the work of contemporary thinkers and practitioners in the field.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4450 (3) Topics in Contemporary Media Technologies

Focus on the development and application of media technologies in moving image aesthetics and emergent media practices. Topics rotate according to faculty expertise, but may include new imaging technologies for small screen and mobile devices, web-specific media or emerging modes of production. Through lectures, screenings and seminars, students explore the work of contemporary thinkers and practitioners in the field.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4610 (3) Small Screen Storytelling

Shoot footage on or for mobile screens including narratives, microdocumentaries, music videos, short stories and collaborative exquisite corpse projects. Students will complete work and distribute through various outlets on the internet.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4620 (3) Media Environments

Explore the design and implementation of multimedia environments. Students will develop strategies for creating media exhibitions and/or performance environments with projection and sounds activated by sensors. This course is ideal for performers, dancers and media artists as well as those desiring to present information in novel ways, such as working with archival or non-fiction materials.

Requisites: Requires prerequisite course of CMDP 3830 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4630 (3) Introduction to Computational Media

Develop the technical and conceptual skills for computational media practices. Through individual and collaborative projects, students will explore the creative use of electronics and microcontrollers (including wearable and other embedded systems) through relevant programming environments. Introduces visual programming with a focus on signal processing for image and sound.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4640 (3) Multimedia Sound

Learn what sound is and where it comes from; how to create, analyze, alter, mix, and record it digitally in the studio and in the field; and how it can interact creatively with other media. In addition to analyzing how professionals use sound, students will create five sound-based projects of their own.

CMDP 4710 (3) Projection Practices

Design and implement projection-based media projects and explore projection practice as a distinct field. Through individual and collaborative projects, this course explores projection for live events, installation, moving images and site-specific or community-based projects. Students will be introduced to emergent software and hardware for projection design.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4720 (3) Installation and Performance Media

Focusing on live image and sound processing in constructed or natural environments, students will work individually or collaboratively on an installation project that engages with the intersection of performance and media. Potential models include site specific work, illustrated lecture, gallery installation, movement and dance with projection mapping, participatory media and virtual environments.

Requisites: Requires prerequisite course of CMDP 4620 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4730 (3) Digital Art and Emergent Technologies

Explores digital artistic practices across contexts and disciplines in various contexts. Emphasizes web and networked media as it applies to digital practices in sound, image, language, spatial and time-based arts.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4810 (3) Advanced Documentary Practices

Combine research and production to produce short documentary media projects, which explore the world we live in. Focusing on practice, this course explores stylistic options employed on documentaries that give voice to different perspectives on the world. Students will be able to identify the tactics and strategies of documentaries in a variety of media, and will include visits with professional documentary makers. Students will complete a final documentary project.

Requisites: Requires prerequisite course of CMDP 3810 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4820 (3) Ethnographic Media

Explores emerging creative documentary practices through visual research, fieldwork, oral histories and the construction of innovative ethnographies. Through ethno-fiction, eco-ethnography, photography, indigenous media and cinema, students explore the development of ethnographic documentary and visual anthropology in both traditional and experimental forms. Projects are developed with an emphasis on the ethical and political challenges of representation through media technologies.

Requisites: Requires prerequisite course of CMDP 4810 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4841 (1-4) Undergraduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

CMDP 4860 (2) Computer Composition

Learn strategies and techniques for generating and manipulating sound with computer-specific tools. Students' projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia and performance projects.

Equivalent - Duplicate Degree Credit Not Granted: MUEL 4111

Requisites: Requires prerequisite course of CMDP 3860 or MUEL 4081 (minimum grade D-).

Grading Basis: Letter Grade

CMDP 4870 (3) Sound and Technology Topics

Exploration of issues, techniques and tools of music and sound technology. Topics vary and may include: interactive systems for performance; music and mobile media; electronic music instrument design; digital synthesis and signal processing; music in multimedia; sound practices and analysis. Lecture during work sessions will support student projects.

Requisites: Requires prerequisite course of CMDP 3860 or MUEL 4081 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4900 (3) Concepts and Practices of Contemporary Media

Explores the application of new media technologies in depth, and engages students in an ongoing dialogue about the cultural context of new media technologies and their own work. Students will produce a major media project that synthesizes methods of media making into modes of communication and expression. This is the capstone course for undergraduates in Media Production.

Requisites: Requires prerequisite course of CMDP 3500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4931 (1-6) Internship

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Media Production - Bachelor of Arts (BA)

For the Bachelor of Arts in media production, students will first complete the foundational courses in theory and practice before proceeding to advanced courses in media production and critical studies.

Students from within or outside the College of Media, Communication and Information (CMCI) can pursue course work within the Department of Critical Media Practices (DCMP), provided they meet course prerequisites, though seating priority is given to declared majors. With advisor and faculty guidance, DCMP majors may elect to design a 12-credit-hour concentration derived from areas within CMCI.

Program Tracks

Once the basic requirements are completed, students in this major may elect to focus on one of four areas of concentration:

- digital cultures concentration
- documentary concentration
- sound practices concentration
- performance media concentration

Students may also elect to follow a comprehensive approach to media production provided by a 9-credit-hour elective structure.

Requirements

Students will take the foundational courses in theory and practice, CMDP 1400 and CMDP 2500, before proceeding to advanced courses in media production. Critical studies courses require that students take CMDP 1400.

In addition to the basic requirements, students in this major may elect to focus on a specific area of concentration. Students may also elect to follow a comprehensive approach to media production provided by a 9-credit-hour elective structure. Students from within or outside the

college may pursue course work within CMDP, provided they meet course prerequisites, though seating priority is given to declared majors. With advisor and faculty guidance, CMDP majors may elect to design a 12-credit-hour concentration derived from areas within the college.

All students will be required to take the capstone course Concepts and Practices of Contemporary Media (CMDP 4900, 3) in their final year.

Required Courses and Semester Credit Hours

Required Studio Courses

CMDP 2500	Introduction to Media Practices	3
CMDP 2600	Creative Media Making	3
CMDP 3500	Digital Photographic Practices	3
CMDP 4900	Concepts and Practices of Contemporary Media	3

Studio Electives Courses (Rotating Electives)

Select 9 credit hours from the following or a CMDP concentration: 9

CMDP 2510	Critical Media Practices Workshop 1	
CMDP 2710	Media Production Methods and Ideas	
CMDP 2720	Animation	
CMDP 2810	Documentary Media Poetics	
CMDP 2860/ MUSC 2081	Performance Audio Recording	
CMDP 2870/ MUSC 2091	Recording Design	
CMDP 3510	Critical Media Practices Workshop II	
CMDP 3610	Contemporary Image Making Practices	
CMDP 3620	Images and Stories	
CMDP 3720/ ENGL 3856/ ATLS 3519	Multimedia Composition	
CMDP 3810	Engaged Documentary Media Practices	
CMDP 3820	Performance Media Practices	
CMDP 3830	Advanced Performance Media Workshop	
CMDP 3840	Sound Practices

Total Credit Hours		40-49

Program Tracks

Digital Cultures Track

Students follow the basic major requirements, but instead of taking electives they complete the 12-credit-hour certificate offered through the ATLAS technology, art and media program. This provides students with an opportunity for an in-depth exploration of contemporary digital media cultures.

Documentary Track

Students follow the basic major requirements, but instead of taking electives they complete 12 credit hours of prescribed course work within CMDP focusing on documentary storytelling.

Sound Practices Track

Students follow the basic major requirements, but instead of taking electives they complete 18 credit hours of prescribed course work within CMDP focusing on Music Technology.

Performance Media Track

Students follow the basic major requirements, but instead of taking electives they complete courses that develop a performance vocabulary and explore the historical and cultural contexts of performance through project-based courses exploring the design and implementation of media installations. The capstone project will be a large-scale performance or installation.

Secondary Area of Study

In addition to course work required for the major, all students in MDPD must complete a secondary area of study outside of MDPD. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree, or any credit-based certificate program of at least 12 credit hours.

Media Production - Minor

Students majoring in any discipline may pursue a minor in media production.

Requirements

The minor consists of a total of 19 credit hours, with three required media production courses that combine theory with technical skill in order to prepare students for upper division study.

Students must complete all classes for the minor with a grade of C- or better and an overall GPA in the minor of 2.0.

Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Required Courses and Semester Credit Hours

Required Lower-Division Foundation Courses

CMDP 1400	Introduction to Contemporary Media Cultures	4
CMDP 2500	Introduction to Media Practices	3
CMDP 2600	Creative Media Making	3

Electives

Choose three upper-division media production courses:		9
CMDP 3510	Critical Media Practices Workshop II	
CMDP 3620	Images and Stories	
CMDP 3720	Multimedia Composition	
CMDP 3820	Performance Media Practices	
CMDP 3810	Engaged Documentary Media Practices	
CMDP 3840	Sound Practices

Total Credit Hours 19

Information Science

Information science considers the relationships between people, places and technology—as well as the information or data those interactions yield. It unites a number of interdisciplinary approaches for understanding and shaping human-data interaction. Drawing on knowledge from social science, computing, data science and the humanities, information scientists support the study and innovation of “socio-technical systems.”

Students will acquire broad skills in information science, including:

- multiple forms of information analysis, from small data to big data, from quantitative to qualitative, from data exploration to information exposition;
- skills in communicating information to different audiences;
- understanding social and ethical contexts of information and technology;
- human-centered design of data and artifacts;
- data curation;

- computing to support information-analytic skills and prototype building.

Course code for this program is INFO.

Bachelor's Degree

- Information Science - Bachelor of Science (BS) (p. 791)

Minor

- Information Science - Minor (p. 792)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

INFO 1101 (3) Computation in Society

Introduces students to modern information and communication technology, the basic principles of software and programming, the fundamental role of algorithms in modern society, computational reasoning, the major organizations in the information sector and fundamental interactions between humans and information technology. Appropriate for students with limited prior experience with computing. Fulfills the CMCI computing requirement.

Grading Basis: Letter Grade

INFO 1111 (4) Representations Seminar and Studio

Expands students' perspectives on fundamental categories of human experience and helps them develop critical perspectives on how that experience is constructed. Focuses on the ways in which experiences and world views reflect cultural and social differences. Studio format enables students to directly understand how systems of convention live in the simplest of representations.

Grading Basis: Letter Grade

INFO 1112 (4) Representations Seminar and Studio

Expands students' perspectives on fundamental categories of human experience and helps them develop critical perspectives on how that experience is constructed. Focuses on the ways in which experiences and worldviews reflect cultural and social differences. Studio format enables students to directly understand how systems of convention live in the simplest of representations.

Requisites: Requires enrollment in corequisite course of INFO 1111.

Grading Basis: Letter Grade

INFO 1121 (4) Interactions Seminar and Studio

Provides an introduction to thinking about human-centered design and the universal requirements of interactions with data, information and technologies. Studio experiences challenge students to consider the impact that design choices in information and computing technologies have on a) enabling diverse audiences to access, manipulate and experience information, and b) how differences get encoded by data structures, ultimately reflecting biases.

Requisites: Requires enrollment in corequisite course of INFO 1122.

Grading Basis: Letter Grade

INFO 1122 (3) Interactions Seminar

Surveys key concepts and theories in Information Science, focusing on the ways information enables new ways of living, working and thinking. Students will critically examine texts, systems and interpretations of data from a variety of disciplinary perspectives that speak to how people, infrastructures and contexts constrain and enable uses of information.

Requisites: Requires enrollment in corequisite course of INFO 1121.

Grading Basis: Letter Grade

INFO 1201 (3) Computational Reasoning 1: Expression and Media Transformation

Introduces principles of computational thinking through the manipulation, transformation and creation of media artifacts, such as images, sound and web pages. Students will be exposed to a high-level overview of algorithms, functions, data structures, recursion and object-oriented computer programming through a series of assignments that emphasize the use of computation as a means of creative expression.

Grading Basis: Letter Grade

INFO 1301 (3) Quantitative Reasoning 1: Intuitions and Evidence

Surveys concepts and techniques for characterizing and quantifying data. Students will learn to use different types of quantitative data, to summarize data with descriptive statistics, to measure similarity of different datasets, to interpret probabilities and statistical significance and to quantify and predict changes in data.

Grading Basis: Letter Grade

INFO 2001 (1) Information Science Portfolio and Professional Development

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in their chosen field.

Grading Basis: Letter Grade

INFO 2131 (4) Ecosystems Seminar and Studio

Provides direct experience analyzing complex social systems of systems and develops students' ability to learn to listen for (and mediate among) diverse, discordant voices and values within larger communities, organizations and institutions. Employs a variety of qualitative research techniques in the studio, including interviewing, participant observation and ethnographic reflections on differences in communities of practice.

Requisites: Requires enrollment in corequisite course of INFO 2132.

Grading Basis: Letter Grade

INFO 2132 (3) Information Science Ecosystems Seminar

Surveys key concepts and theories in Information Science, focusing on the ways that communities, organizations and institutions influence the design and use of information. Students will critically examine texts, systems and interpretations of data from multiple disciplinary perspectives that speak to the complex interactions among the people and technologies that surround us and the ecosystems form by and through data.

Requisites: Requires enrollment in corequisite course of INFO 2131.

Grading Basis: Letter Grade

INFO 2201 (3) Computational Reasoning 2: Representations of Data

Surveys techniques for representing data and expressing relationships among data, both at small scales (for example, via programmatic data structures) and at large scales (for example, in various kinds of database systems). Introduces fundamentals of algorithm analysis and the trade-offs involved in managing data using different approaches, tools and organizing principles.

Requisites: Requires prerequisite course of INFO 1201 or CSCI 1300 or CSCI 1310 (minimum grade C-).

Grading Basis: Letter Grade

INFO 2301 (3) Quantitative Reasoning 2: Uncertainty and Inference

Introduces intermediate-level methods for quantitative data analysis, focusing on foundational concepts in probability and statistical inference along with complementary computational skills and tools. The course will cover basic probability concepts, common probability distributions and methods for estimating their parameters, multivariate regression with applications to forecasting and classification and a variety of methods of statistical significance testing.

Requisites: Requires prerequisite course of INFO 1201 and INFO 1301 (all minimum grade C-).

Grading Basis: Letter Grade

INFO 3001 (1) Information Science Portfolio and Professional Development

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in their chosen fields.

Grading Basis: Letter Grade

INFO 3101 (3) History of Information, Science and Society

Focusing on two topics: the changing role of information in everyday life over time and the increasing role of information in disciplinary studies such as social science, engineering, computer science, mathematics, digital humanities. Examines information related academic disciplines, businesses, industries and technologies from multiple perspectives from the 17th century to the present.

Grading Basis: Letter Grade

INFO 3401 (3) Information Exploration

Teaches students how to use information to identify interesting real world problems and to generate insight. Students will learn to find, collect, assemble and organize data to inspire new questions, make predictions and work towards solutions. They will learn to appropriately apply different methods (including computational, statistical and qualitative) for exploratory data analysis in a variety of domains.

Requisites: Requires prerequisite course of INFO 2201 and INFO 2301 and INFO 1121 or INFO 2131 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 3402 (3) Information Exposition

Teaches students to communicate information to a wider audience and construct stories with data across a variety of domains. Students will learn to use data for rhetorical purposes, applying visual, statistical and interpretative methods. Students will learn to think critically about ethical and social implications of using data in expository media, including identification of bias.

Requisites: Requires prerequisite course of INFO 1301 or INFO 2301 (minimum grade C). Restricted to students with 57-180 credits (Junior or Senior) Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 3501 (3) Problems in Information Science: Peer Production and Crowdsourcing

Analyzes the mechanisms of peer production and crowdsourcing systems like Wikipedia and OpenStreetMap. Students will investigate how these crowdsourced platforms work socially and technically, develop skills using tools for their analysis and critically evaluate platform and community limitations. Problems in Information Sciences is a series that brings contemporary research to the classroom in the form of progressive, project-based inquiry.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5501

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 3502 (3) Problems in Information Science: Online Communities

Explores practical and theoretical topics in online communities through inquiry into one or more particular online communities. Student projects will explore online communities as social and technical systems, including their alignment with conceptualizations of community, expressed and apparent interests, nature of membership and participation, history, participants' motivations for involvement, and explicit, implicit, and infrastructural features that enable and constrain behaviors.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5502

Grading Basis: Letter Grade

INFO 3503 (3) Problems in Information Science: Everyday Information Behavior

Familiarizes students with practical and theoretical topics in the discipline of information behavior and its application to everyday events, activities and environments. Explores the information dimension of various everyday activities such as buying a car, playing a game or looking up health information on line. Students learn to analyze the informational dimensions that occur in their everyday lives.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5503

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 3504 (3) Problems in Information Science: Digital Identity

Explores and analyzes identity in a digital era. Through applied research, students investigate both social and technical aspects of how identity is captured, represented and experienced through technology using theoretical, empirical and design-based inquiry. Methods and platforms studied vary by semester. "Problems in Information Science" is a series that brings contemporary research to the classroom in the form of progress, project-based inquiry.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5504

Grading Basis: Letter Grade

INFO 3505 (3) Problems in Information Science: Designing for Creativity and Learning

Analyzes learning technologies, discusses learning theories and develops prototypes to investigate strategies for engaging people in creative and inclusive learning experiences. Students explore design, learning and technology by examining sociotechnical systems like construction kits, online communities and makerspaces with a critical lens on equity and inclusion. Studio format enables students to apply constructionist ideas into the design of technology-enabled environments.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5505

Grading Basis: Letter Grade

INFO 4001 (1) Information Science Portfolio and Professional Development

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in their chosen field.

Grading Basis: Letter Grade

INFO 4601 (3) Ethical and Policy Dimensions of Information, Technology and New Media

Explores ethical and legal complexities of information and communication technology. By combining real-world inquiry with creative speculation, students will probe everyday ethical dilemmas they face as digital consumers, creators and coders, as well as relevant policy. Explores themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5601

Requisites: Restricted to students with 55 or more hours.

Grading Basis: Letter Grade

INFO 4602 (3) Mastery in Information Science: Information Visualization

Explores the design, development and evaluation of information visualizations. Covers visual representations of data and provides hands-on experience with using and building exploratory tools and data narratives. Students create visualizations for a variety of domains and applications, working with stakeholders and their data. Covers interactive systems, user-centered and graphic design, perception, data storytelling and analysis, and insight generation. Programming knowledge is strongly encouraged.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5602

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 4603 (3) Mastery in Information Science: Survey Research Design

Familiarizes students with practical and theoretical topics in using survey methods for conducting information science research. Through discussion and real world assignments, students will learn when and why to use surveys for collecting data; effective, efficient and ethical approaches to maximizing response; sampling issues; development of valid items and scales; and how to implement, analyze and report on survey data collection.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5603

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 4604 (3) Applied Machine Learning

Introduces algorithms and tools for building intelligent computational systems. Methods will be surveyed for classification, regression and clustering in the context of applications such as document filtering and image recognition. Students will learn the theoretical underpinnings of common algorithms (drawing from mathematical disciplines including statistics and optimization) as well as the skills to apply machine learning in practice.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5604

Requisites: Requires prerequisite courses of INFO 2201 and INFO 2301 (all minimum grade D-).

Grading Basis: Letter Grade

INFO 4605 (3) Mastery: Ethnographic Research in Applied Settings

Familiarizes students with ethnography as a research tool as it is used in corporate and consulting research. Systematically explores issues and topics in research for the purposes of product design and development.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5605

Requisites: Requires a minimum of 45 hours taken.

Grading Basis: Letter Grade

INFO 4611 (3) Mastery in Information Science: Ubiquitous Computer Experience Design

Introduces the field of ubiquitous computing, including sensors, ambient displays, tangibles, mobility, location awareness and context awareness. These topics are explored from a user-centered design perspectives, focusing on how a situated models of computing affect requirements gathering, interaction design, prototyping and evaluation. Students gain mastery with contemporary "UbiComp" technologies and learn to incorporate them into a user-centered design process.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5611

Requisites: Restricted to students with a minimum of 45 units.

Grading Basis: Letter Grade

INFO 4700 (3) Senior Capstone

Provides senior level INFO students an opportunity to demonstrate the culmination of their learning in the major by designing and implementing a significant information system or developing a research question, typically in response to a problem of personal interest related to or informed by their secondary area of specialization. Reinforces project planning, public presentation and ethic skills.

Requisites: Restricted to Information Science (INFO) majors only with a minimum of 90 hours.

Grading Basis: Letter Grade

INFO 4800 (1-3) Leadership Practicum in Information Science

Equips students for taking on leadership roles in the interdisciplinary context of information science. Students will learn to facilitate learning among students with diverse backgrounds and expertise, developing communication and mentoring skills and gaining exposure to a variety of learner-centered design strategies and pedagogical approaches. Enrollment is by invitation and at the discretion of the instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 4841 (1-4) Undergraduate Independent Study

Undergraduate independent study.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 4871 (3) Special Topics

Special topics.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 4900 (1-6) Research Experience in Information Science

Provides research experience in information science. Students will contribute to the construction of new knowledge of novel systems, helping to answer current research questions or to solve contemporary problems in the domain. Enrollment is by invitation and discretion of the advising faculty member.

Repeatable: Repeatable for up to 12.00 total credit hours.

Grading Basis: Letter Grade

INFO 4931 (1-6) Undergraduate Internship

Undergraduate internship.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Information Science (INFO) majors only.

Grading Basis: Letter Grade

Information Science - Bachelor of Science (BS)

Undergraduate students in the Department of Information Science will learn to collect, analyze and interpret many different information sources to understand our world. They will study how we interact with all things digital, including software, devices and algorithms. By the time students graduate, they'll be able to create social and technological solutions that are truly engaging for those who use them, apply those solutions to real problems and evaluate their effectiveness.

Students will also apply information science to the topics that matter to them. From journalism to music to healthcare, students will gain tools that can address many problems. By applying their new knowledge, they'll address real problems and create an impact on our society.

Requirements

The BS in information science requires 54 credit hours within the major. Students will also complete the CMCI Core as part of their general education. A secondary area of study, which is also part of the CMCI Core, will be used to synthesize knowledge of information science with an application domain.

The Portfolio & Professionalization as well as the Capstone courses are a critical part of cohort-building in the major, and are designed to create a community of learners who are prepared to tackle ambitious projects together, individually, and in preparation for internship and post-baccalaureate opportunities.

Information Science Courses in the CMCI Core

INFO 1201	Computational Reasoning 1: Expression and Media Transformation	3
INFO 1301	Quantitative Reasoning 1: Intuitions and Evidence	3
Total Credit Hours		6

Foundations

INFO 1111	Representations Seminar and Studio	3
INFO 1121	Interactions Seminar and Studio	4
INFO 1201	Computational Reasoning 1: Expression and Media Transformation	3
INFO 1301	Quantitative Reasoning 1: Intuitions and Evidence	3
INFO 2131	Ecosystems Seminar and Studio	4
INFO 2201	Computational Reasoning 2: Representations of Data	3
INFO 2301	Quantitative Reasoning 2: Uncertainty and Inference	3
Total Credit Hours		23

Digital Landscapes

Information science majors are required to take three courses (a total of at least nine credit hours) from a list of approved courses that meet the "digital landscapes" requirement. These may come from inside or outside Information Science. An example course from within the department would be INFO 3101. Courses from other majors within CMCI that would satisfy the Digital Landscapes requirement would include MDST 3002 or JRNL 1000, among others.

Information Exploration & Exposition Series

Information Science students will take both Information Exploration and Information Exposition. Though not required, we highly recommend that Information Science majors take these courses in sequence.

INFO 3401	Information Exploration	3
INFO 3402	Information Exposition	3
Total Credit Hours		6

Portfolio/Profession and Capstone Series

The Department of Information Science values project-based learning, team-based learning, the development of good professional practice, and the development of specializations at the undergraduate level. The Portfolio & Professional Development as well as the Capstone courses are a critical part of cohort-building in the major, and are designed to create a community of learners who are prepared to tackle ambitious projects together, individually, and in preparation for internship and post-baccalaureate opportunities.

INFO 2001	Information Science Portfolio and Professional Development	2
INFO 3001	Information Science Portfolio and Professional Development	1
INFO 4001	Information Science Portfolio and Professional Development	1
Total Credit Hours		4

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in their chosen field.

Senior Capstone

The senior capstone is under development.

Problems in Information Science and Mastery

Information Science students will take a total of 5 Problems in Information Science and Mastery courses, with a minimum of 2 courses in each category.

Problems in Information Science (multiple)

A series of different courses will be offered in which students deeply engage in specific domains, applying the skills that have been learned in the foundation courses through instructor-guided research of a progressive series of timely problems about the domain. Problems in Information Science are domain-guided versions of Information Exploration and Information Exposition combined in one course. Examples of Problems in Information Science courses include: Digital Identity, Kids and Creative Learning, Information Behavior in Everyday Environments, Crisis Informatics, Digital Humanities, Health Informatics, Philanthropic Informatics, Online Communities.

Information Science Mastery (multiple)

A series of different courses will offer deep dives into theory and methods in different areas of Information Science. Examples of mastery topics that may be taught include: Applied Machine Learning, Applied Ethnography, Survey research Design, Information Visualization,

Experience Design of Ubiquitous Computing Technology, Crowdsourcing, Information Ethics and Policy.

Secondary Area of Study

In addition to the coursework required for the major, all students in INFO must complete a secondary area of study outside of INFO. This can be met by any of the following: a minor, a second major within CMCI, a double degree, or a credit-based certificate program of at least 12 credit hours offered by a department in any school or college at CU.

Students are encouraged to select one of the programs of study described above, since these have been officially approved by experts who can either provide a formal certificate or list the minor on a student's official transcript upon graduation. In exceptional circumstances, however, students may apply to complete an individualized secondary area of study equal to or greater than 18 credit hours. Application for an individualized secondary area of study must be submitted and approved before the student has earned 50 credit hours.

Information Science - Minor

The minor in information science will draw from courses in Foundations, Exploration and Exposition, Digital Landscapes, Problems in Information Science and Mastery. The minor is currently under formal review; details of the requirements will be available on the CMCI website once it is approved.

Total Credit Hours 17

¹ Optimal path includes at least one of Exploration, Exposition or Problems.

Journalism

The Department of Journalism is founded on the principle that a well-informed and engaged public is essential to democracy—perhaps more

so now, at a time of dizzying change, than it has ever been; and that, in the face of this change, journalism retains a unique role in contributing to civic life and to the quality of public discourse.

We put this principle to work by helping students become constructive participants in an ever-evolving global media landscape, where distinctions between producers and consumers of content have blurred. More specifically, we prepare them, at both the undergraduate and graduate levels, for careers in journalism and other fields of public communication. We train students to gather information from a diversity of sources, to analyze it critically, and to report what is significant, through stories and other media forms across multiple media platforms. We encourage ethical awareness so that students will think independently, being prepared to reflect on and to help shape media practices and norms rather than take them at face value.

We believe in the integration of classroom instruction with practical experience. Many of our students work for, and manage, campus online news and entertainment sites, television programs and a radio station. They intern at broadcast stations, newspapers, magazines, websites and social media companies. Lastly, as a faculty, and with the help of colleagues elsewhere in our College who are working on new and innovative forms of human communication, we are committed to improving journalism through pioneering research and creative work.

Course code for this program is JRNL.

Bachelor's Degree

- Journalism - Bachelor of Arts (BA) (p. 796)

Minor

- Journalism - Minor (p. 797)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

JRNL 1000 (3) Principles of Journalism and Networked Communication

Surveys the history, practices and responsibilities of journalism in a democracy. Examines ethics, best practices in institutional and network settings, reporting and writing, international news systems, personal branding, and strategies for creating and distributing content across media platforms. Promotes the highest professional values and encourages students to be leaders who recognize the possibilities of journalism in a democratic society.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) or Program in Journalism Mass Communication (JOUR) undergraduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 1871 (1-3) Special Topics for First-Year Students

Special studies in media that are specific for first-year students. May be repeated for a maximum of three credit hours.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 2001 (3) Fundamentals of Reporting

Develops basic news-gathering skills for work in news enterprises. Students learn techniques central to research, reporting, writing and producing stories for various media formats.

Requisites: Requires prerequisite course of JRNL 1000 (formerly JOUR/JRNL 2601) (minimum grade C-). Restricted to Journalism (JRNL) majors only.

JRNL 2401 (3) Media Coverage of Diverse Populations

Explores the ways in which issues of gender, gender expression, sexual orientation, race, ethnicity and religion play out in news coverage and how news organizations approach coverage of marginalized groups in society.

Grading Basis: Letter Grade

JRNL 3102 (3) Photojournalism I

Introduces the basic elements of visual communication. Covers the use of camera systems, digital imaging techniques and other aspects of photojournalism including law, ethics, history and critical decision-making.

Requisites: Requires a prerequisite course of JRNL 1000 or (formerly JOUR/JRNL 2601) (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Journalism (JRNL) majors or Program in Journalism Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 3112 (3) Concepts in Visual Culture

Studies the principles, theories and language of visual communication, emphasizing the evaluation and use of images in mass media. Designed to help students build theories and practices learned in previous classes and perfect their skills integrating words and pictures in communication to gain a greater appreciation of the visual world.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3201 (3) Critical Perspectives on Journalism

Introduces students to the critical perspectives most often employed in qualitative analysis of journalistic texts and practice: Marxism, psychoanalytical criticism, semiology, sociological criticism, structuralism, etc. Emphasis is upon texts from contemporary print and broadcast media, although students may also explore documentary film and literary journalism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3202 (3) Covering Political Campaigns

Provides a blend of theoretical understanding and on the ground experience for students interested in learning about the forces that shape election coverage and the practicalities of reporting on the local and national races for public office.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3211 (3) History of Broadcasting

Offers a broad overview of significant broadcast programs, the institutions and sociocultural and economic influences that have steered the course of radio, television and electronic media history in the United States.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3221 (3) History of Digital Journalism

Explores the history, economics and traditions of digital technologies. Addresses the interaction between digital technologies, culture and economy with particular emphasis on the effects on digital journalism. Concludes with a focus on how these concepts are embraced by new journalism market models.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3231 (3) History of Documentary Film

Explores the evolution of the documentary, both in feature films and on television, to understand how the genre offers both historical context and an understanding of the world in which we live.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3241 (3) History of Journalism

Explores the foundations of journalism practice in a historical context. Students study the evolution of the news industry and analyze examples of contemporary broadcasting, photography, online and print media in light of the past.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3401 (3) Sociology of News

Provides students with an introduction to the factors that shape news reporting and production, including gatekeeping, intermedia agenda setting, pack journalism, beat structures, news values and issues unique to the various platforms on which news is delivered.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3402 (3) Social Media Storytelling

Investigates the theory, ethics and best practices in storytelling across a variety of social media platforms including, but not limited to, Facebook, Twitter, Instagram, Snapchat, Medium and YouTube. Examines best practices for social media engagement. Students develop a story for multiple platforms and analyze the story performance on the sites and make recommendations for best practices.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3552 (3) Editing and Presentation

Explores copy editing, graphic principles and processes, new media technology.

Requisites: Requires prerequisite course of JOUR/JRNL 2001 or JRNL 1000 (formerly JOUR/JRNL 2601) (minimum grade C-). Restricted to Journalism (JRNL) or News Editorial (NSED-BSJR or JNED-BSJR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 3614 (3) Principles of Audio Production

Introduces audio production techniques using digital technologies. Students learn to apply fundamental principles to create professional radio and online programs including podcasting.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) or Program in Journalism and Mass Communication (JOUR) majors with a minimum of 45 hours taken.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 3644 (3) Principles of Television Production

Emphasizes the use of video technologies in both field and studio production, camera and editing work, producing and directing for professional program production.

Requisites: Requires prerequisite course of JRNL 2001 or JRNL 1000 (formerly JOUR/JRNL 260; min grade D-). Restricted to JRNL or BCNS-BSJR or JBCN-BSJR or BCPM-BSJR or JBCP-BSJR majors only with a min of 57 hours taken.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 3651 (3) Media Law and Ethics

Studies state and federal laws and court decisions that affect the media in order to develop knowledge of media rights and responsibilities and an understanding of the legal system. Provides students with an overview of the theory, ethics, codes, and analytical models that are used in journalism, and introduces students to a variety of ethical issues that can arise in journalism.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) or Program in Journalism Mass Communication (JOUR) undergraduate students only.

JRNL 3674 (3) Television Production 2

Covers studio productions for "Newsteam Boulder." Students also do field projects to sharpen their writing, video production, and editing skills.

Requisites: Requires prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted Journalism (JRNL) or Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 3704 (3) Sports Writing

Prepares students for the world of sport journalism. Combines the skills of a hard news reporter, the perspective of an entertainment reporter and the persuasive abilities of an editorial writer.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3804 (3) Sports, Media and Society

Examines how sports, culture and especially the media, with a specific focus on journalism, all come together to influence society. Explores how sports communication affects, and is affected by, the issues and tension that touch society at large, such as law and politics, race, gender, sexuality and disability.

Equivalent - Duplicate Degree Credit Not Granted: MDST 3331

Requisites: Restricted to students with a minimum of 29 credits completed.

Grading Basis: Letter Grade

JRNL 4002 (3) Reporting 2

Assumes mastery of basic reporting and writing skills. Students produce more sophisticated stories on a variety of topics.

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted Journalism (JRNL) or News Editorial (NSED-BSJR or JNED-BSJR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4011 (3) Principles of Media Relations

Provides students with information about the ethics, history and practice of media relations (community affairs, community relations, customer relations, government relations, industry relations, internal communications, public relations, press agency, public affairs, publicity, etc.). Introduces students from multiple academic disciplines to the genres of writing required for a media relations career.

Grading Basis: Letter Grade

JRNL 4102 (3) Photojournalism Portfolio

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5102

Requisites: Requires a prerequisite course of JOUR/JRNL 3102 (minimum grade C-).

Additional Information: Departmental Category: Print Online Journalism

JRNL 4311 (3) Literary Journalism

Studies the contributions of American literary journalists from Sara Davidson, Joan Didion, Normal Mailer, Hunter S. Thompson and Tom Wolfe; to established writers of nonfiction, including Annie Dillard, Jon Krakauer, Jane Kramer, Adrian Nichole LeBlanc and Terry Tempest Williams; to the newest wave of long-form journalists. Explores the boundaries between fiction and nonfiction and the literary techniques that distinguish creative nonfiction and literary journalism from other reportorial and storytelling forms.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4344 (3) Video Documentary Production

Designed to give students the experience of researching, writing, shooting and editing their own documentaries.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5344

Requisites: Requires a prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4351 (3) Reporting Wars, Conflict and Peace

Explores how journalists report international breaking news with a focus on war, disaster and peace and how these news events affect peoples' lives, governmental decisions and news media operations.

Requisites: Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 4354 (3) TV Reporting

Students learn basic broadcast reporting skills – where to find news and how to cover it, how to analyze and organize news stories. Skills are linked with advanced concepts of shooting and editing videotape in order to produce news stories on deadline.

Requisites: Requires a prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) or Broadcast News (BCNS-BSJR or JBCN-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4401 (3) News and Public Perception

Considers the impact that news and journalistic practice have on the public through processes like agenda setting and second-level agenda setting, as well as issues such as news avoidance, the spiral of silence and political cynicism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4411 (3) International Media and Global Crises

Investigates how media organizations, audiences and other international organizations function during various global crises, such as national disasters, climate change and health epidemics, due to imbalanced distribution of wealth and resources, ethnic tensions and diplomatic failures.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4502 (3) Reporting 3

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5502

Requisites: Requires prerequisite courses of JRNL 3552 and JRNL 4002 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) News Editorial (NSED or JNED) or Journalism (JRNL) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4562 (3) Digital Journalism

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture and society.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5562

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4572 (3) News Corps

CU News Corps provides students the opportunity to immerse themselves in a single project and then produce an in-depth text based or multimedia explanatory/investigative story for publication in professional media. Students spend several weeks studying the subject in question before reporting and producing their stories.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4602 (3) Opinion Writing

Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5602

Requisites: Requires a prerequisite course of JRNL 2001 (minimum grade C-).

Additional Information: Departmental Category: Print Online Journalism

JRNL 4614 (1-3) Advanced Audio Practices

Applies advanced skills in producing in-depth audio programming for radio stations in Colorado and for weekly discussion-critique sessions.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of JOUR/JRNL 3614 (minimum grade C-). Restricted to Journalism (JRNL) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4624 (4) News Team

Students participate in Newsteam Boulder a program broadcast live over the Boulder cable television system.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5624

Requisites: Requires prerequisite course of JOUR/JRNL 4354 (minimum grade D-). Restricted to Journalism (JRNL) or Broadcast News (BCNS - BSJR or JBCN-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4634 (1-3) Broadcast Projects

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5634

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4651 (3) Advanced Media Ethics

Examines the responsibilities, the power and the problems of news media through the lens of ethical inquiry. Applies the philosophical and other perspectives from humanities and social sciences to consider ethical frameworks for guiding journalism in an era of technological disruption. Examines issues including privacy, conflicts of interest, undercover reporting, use of graphic images, interviewing trauma victims and other concerns in journalism through the lens of moral philosophy, best practices and codes of ethics.

Requisites: Requires prerequisite course of JRNL 3651 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4674 (1-3) Television Production 3

Provides in-depth experience in directing and producing television programs.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of JOUR/JRNL 3674 (minimum grade C-). Restricted to Journalism (JRNL) or Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4684 (3) Advanced Camera and Editing

Emphasizes the advanced techniques in digital video camera usage and digital editing for professional broadcast video production.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5684

Requisites: Requires a prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) or Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4702 (3) Arts/Cultural Reporting and Criticism

Emphasizes composition of criticism for the performing arts and other areas of entertainment.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5702

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4704 (3) Athletic Media Relations

Offers the opportunity to both observe and experience what is required to work in the world of intercollegiate athletic media relations and professional sports public relations. Covers how to write and how to budget the vital components of publications, media bias and crisis management.

Requisites: Requires prerequisite course of JRNL 3704 (minimum grade C-).

Grading Basis: Letter Grade

JRNL 4714 (3) Sports Broadcasting

Teaches students how to do live sports television production. Students will learn the sports TV business from the ground up and be responsible for participating in the broadcasting of three to four live sporting events.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4724 (3) Sports Announcing

Teaches students about sports talk and sports announcing, how to interview sports celebrities and the legal considerations and ethics of the business. Students will be doing play-by-play and color of live sporting events.

Grading Basis: Letter Grade

JRNL 4802 (3) Feature Writing

Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5802

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4822 (3) Reporting on the Environment

Involves reporting and writing about the environment by taking into account the scientific, technological, political, economic and cultural dimensions of environmental subjects.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5822

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4841 (1-4) Undergraduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

JRNL 4872 (1-3) Special Topics: Print

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5872

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors with a minimum of 57 hours taken.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4874 (1-3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Journalism (JRNL or JOUR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4931 (1-6) Internship

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Journalism - Bachelor of Arts (BA)

Journalism majors develop skills in information gathering, storytelling and analysis across a variety of platforms—including television, social media, mobile devices, radio and print—using an ever-expanding variety of media tools and technologies. In addition to their professional preparation, students take courses in a core curriculum that provides a

range of conceptual and interdisciplinary options and, in consultation with a faculty member, develop an individualized secondary area of concentration (18 credit hours). Students complement their skill competencies with a study of ethics, history, international media, law, literary journalism, news and public perception, sociology of news, visual culture, and other conceptual courses offered in the department and elsewhere in the college and university.

We offer a curriculum with these learning goals:

- Communicate to various public audiences with clarity and precision, using the most effective combination of images, sounds and words, and applying the most appropriate contemporary technologies.
- Gather information, through research, observation and interviews, and evaluate what is gathered.
- Acquire expertise in a particular subject and use that expertise to communicate clearly to various public audiences.
- Base journalistic work on such enduring ethical principles as accountability, fairness, accuracy, responsibility and diversity.
- Think analytically, critically and creatively about the social, historical, economic and scientific forces that underlie daily events, in order to provide appropriate context in the reporting of daily events.
- Apply the laws of freedom of expression, in both the United States and in a global media setting.
- Blend entrepreneurial strategies with journalistic enterprise to enable success in a fast-changing economic environment.

Requirements

Within the college standard of 120 credit hours for the bachelor’s degree, the BA in journalism requires 36 credit hours as follows.

Required Courses and Semester Credit Hours

JRNL Core Curriculum		
JRNL 1000	Principles of Journalism and Networked Communication	3
JRNL 2001	Fundamentals of Reporting	3
JRNL 3651	Media Law and Ethics	3
One upper-division reporting course ¹		3
Two conceptual courses in journalism ²		6
Capstone		3
JRNL 4931	Internship	1-6
Other Courses in Journalism		
Electives ³		12
Total Credit Hours		34-39

¹ These include Advanced Reporting, TV Reporting, CU News Corps, Arts and Cultural Reporting, Feature Writing and others.

² These include Advanced Ethics, Media Coverage of Diverse Populations; Concepts in Visual Culture; Critical Perspectives on Journalism; History of Documentary Film; History of Journalism; History of Broadcasting; History of Digital Journalism; Sociology of News; Literary Journalism; International Media and Global Crises; Reporting Wars, Conflict and Peace; News and Public Perception and others.

³ Students choose from a variety of advanced journalism courses, including but not limited to the following: Covering Political Campaigns; Editing and Presentation; Advanced Reporting; TV Reporting; Opinion Writing; Broadcast Projects; Advanced Camera and Editing; Arts and Cultural Reporting; Feature Writing; Media Coverage of Diverse Populations; Concepts in Visual Culture; Critical Perspectives on Journalism; History of Documentary Film; History of Journalism; History of Broadcasting; History of Digital Journalism; Sociology of News; Literary Journalism; International Media and Global Crises; Reporting Wars, Conflict and Peace; News and Public Perception and others.

Secondary Area of Study (18 credit hours)

In addition to the coursework required for the major, all students in JRNL must complete a secondary area of study outside of JRNL. This can be met by any of the following: a minor, a double degree, a second major outside CMCI, or an approved minor substitute composed of at least 18 credit hours. Application for a minor substitute must be submitted and approved before the student has earned 50 credit hours.

Journalism - Minor

In consultation with their advisers, students who are majoring in another discipline may pursue a minor in journalism.

Requirements

Students must complete 18 credit hours of course work toward the minor with a grade of C- or better and an overall GPA in the minor of 2.0. Students may apply no more than six credit hours of transfer work, including three hours of upper-division credit.

Students will take only one required course, JRNL 1000, which will introduce them to a range of possible interests from broadcasting to print and online media to digital and emerging media. After successfully completing JRNL 1000, students should select one 2000-level course and four 3000- or 4000-level journalism courses.

Students may want to emphasize conceptual and theory courses, may select skills courses that help to prepare them for possible careers, or complete a combination of the two.

Required Courses and Semester Credit Hours

Required Course		
JRNL 1000	Principles of Journalism and Networked Communication	3
Electives		
Select one 2000-level JRNL course from the following:		3
JRNL 2001	Fundamentals of Reporting	
JRNL 2401	Media Coverage of Diverse Populations	
Select four 3000- or 4000-level JRNL courses from the following:		12
JRNL 3112	Concepts in Visual Culture	
JRNL 3201	Critical Perspectives on Journalism	
JRNL 3202	Covering Political Campaigns	
JRNL 3211	History of Broadcasting	
JRNL 3221	History of Digital Journalism	
JRNL 3231	History of Documentary Film	
JRNL 3241	History of Journalism	
JRNL 3401	Sociology of News	
JRNL 3552	Editing and Presentation	

JRNL 3644	Principles of Television Production

Total Credit Hours	18

Media Studies

The Department of Media Studies specializes in sophisticated, cutting-edge research on the media technologies that underlie contemporary culture, economy and politics. Students learn how media industries, practices, and narratives shape the way we think about and relate to the world around us. Enter our tight-knit community and participate in innovative media production work and research projects that engage emerging technology practices, seek to understand new digital cultures, and strive to change society in meaningful ways.

Media Studies students examine ways of thinking about and conducting research into the intersection of media, communication and cultural practices in both historical and contemporary perspectives. Encompassing humanistic, social scientific and artistic approaches to the study of media and culture, and interdisciplinary in its theoretical and methodological approaches, the media studies degrees span traditional boundaries between theory and practice. The program fosters media "literacy" in the broadest sense by providing students with critical skills to analyze contemporary media and culture, along with technical, aesthetic and intellectual principles that facilitate strong media practices.

Course code for this program is MDST.

Bachelor's Degree

- Media Studies - Bachelor of Arts (BA) (p. 801)

Minor

- Media Studies - Minor (p. 802)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor Emeritus

MDST 1001 (3) Foundations of Media Studies

Introduces students to key issues and debates and contemporary applications of critical media studies focusing on economic, social, political and cultural implications. Provides an understanding of the relationship between theory and practice and equips students with the tools to critically analyze various forms of textual transmission.

Grading Basis: Letter Grade

MDST 1002 (3) Introduction to Social Media

Introduces students to network structures and principles, the technology and infrastructures that allow them to flourish, and the cultures that grow up through and around them. Explores how social media enables community, how it assembles and empowers agents of change and how design informs individual and group behavior.

Grading Basis: Letter Grade

MDST 2001 (3) Global Media Literacy

Explores the expanding nature of literacy in a digital world and changes in the meanings and practices of literacy over time. Prepares students to access, analyze, evaluate, create and engage with media in a variety of forms. Acquire competencies in evolving multimedia environments by critically evaluating media messages.

MDST 2002 (3) Media and Communication History

Examines the historical development of communication forms, tools, technologies and institutions (orality, writing, printing, photography, film, radio, television, computers, internet); their influence on culture (forms of expression and social relationships); and their impact on social and individual experience. Applies knowledge of communication history to contemporary social issues and problems in media and society, domestically and internationally.

MDST 2010 (3) Media and Social Movements

Surveys the history and contemporary efforts of social activists to bring about democratic media reform and examines how media are used as tools for connecting and advancing social movements. Emphasis is given to media activism and social movements in the United States, as well as to similar and related transnational activism and movements.

Requisites: Requires a prerequisite course of MDST 1001 (minimum grade C-).

Grading Basis: Letter Grade

MDST 2011 (3) Disruptive Entrepreneurship in the Internet's New Economies

Grapples with the disruptive business models that drive the online economy: both the dominant ones and the alternatives vying to transform it. In addition to the Silicon Valley model, this course explores lesser known internet economies around the world and proposals for a more equitable online future.

Grading Basis: Letter Grade

MDST 2012 (3) Hacker Culture

Chronicles the evolution of hacker culture from its origins as a geeky subculture to a criminal underground to its adaptation by CEOs. Considers how hacker formations sometimes represent a new kind of politics, sometimes a rejection of politics. Explores the contested figure of the hacker in the past, present and science-fiction of the internet.

Grading Basis: Letter Grade

MDST 2021 (3) Comic Books: Culture and Industry

Explores practices of comic culture across a broad range of graphic stories. Using culture studies approaches to industry analysis and fan community discourses, students examine culture created through and around graphic texts, particularly representations of race, gender, sexuality, institutions and ideology. Considers the political economy of the comic industry, the struggles of independent producers and active fan practices.

Grading Basis: Letter Grade

MDST 2031 (3) Documentary and Social Change

Explores how local, national and international filmmakers use documentaries to provide cultural observation, education, entertainment and memories to making sense of and transform the realities of contemporary societies. Emphasizes contemporary issues and practices in the production of documentaries, including the participatory means such as the crowdsourcing of documentary footage and the use of newer, non-theatrical means of distribution.

Grading Basis: Letter Grade

MDST 3001 (3) Media Research

Introduces theoretical approaches and practices used to analyze the content, structure, influence and contexts of media. Explores factors shaping media, including: politics, economics, technology, cultural traditions. Studies concepts, theoretical approaches and research methods of media criticism, and adopts and adapts these frameworks in analyses of mediated communication.

MDST 3002 (3) Digital Culture and Politics

Examines issues at the intersection of digital media, culture and politics, such as regulation and network architecture, piracy and hacking, and grassroots activism. Engage with a range of theories about cultural politics, democracy, liberalism and neo-liberalism in relation to digital information and communication technologies.

MDST 3201 (3) Media, Culture and Globalization

Surveys the political and economic structures of media system in developed and developing countries and discusses the impact of privatization, ownership consolidation, and globalization on the flow of information across national borders. Also looks at how global media flows and counter-flows affect conceptions of nationhood and cultural identity.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Media, Communication, and Information (CMCI) or Program in Journalism Mass Communication (JOUR) or International Affairs (IAFS) majors only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 3321 (3) Media Industries and Economics

Focuses on the institutions and practices of the media industries. Surveys the histories, structures, and activities of these organizations and the contemporary issues surrounding them.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Media, Communication, and Information (CMCIU) or Program in Journalism Mass Communication (JOURU) majors only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 3331 (3) Sports-Media Complex

Explores the rich connections between the sports industry, spectating, the media complex and social life. Using theories of cultural studies and drawing on specific examples from the sports world, students focus on how sport shapes and reinforces understandings of gender, race, class and sexuality. Addresses major questions about the political economy, commodification, mediation and reception of the spectacle of the sports complex, as well as politics and cultural consequences of its transnational reach.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 3804

Grading Basis: Letter Grade

MDST 3341 (3) Designing Alternative Media Platforms

Explores alternative forms of media to exhibit student research and build connections with community leaders. Surveys alternative exhibition traditions such as Social Practice, Relational Aesthetics and Craftivism to expand the impact of student work, culminating in the design of a unique cultural event focusing on each individual's research. Software/digital presentation skills.

MDST 3401 (3) Media, Food and Culture

Explores the topic of food as a subject of popular culture: essential to life and the enter of local, national and transnational conflict and social movements. Students will examine media representations of food, what our food choices say about us and what the mediated politics of food mean for our collective future.

Requisites: Requires a prerequisite course of MDST 2002 (minimum grade C-).

Grading Basis: Letter Grade

MDST 3711 (3) Media and Popular Culture

Examines culture in the form of discourse, symbols, and texts transmitted through the media. Explores the relationship between such mediated culture and social myth and ideology.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 3791 (3) Media and the Public

Provides an overview of how publishing in print and electronic forms has been tied closely to democratic ideals for centuries. Explores how the idea of the public is central to the theory and practice of media politics, and how the contested concepts of "the public sphere" and "public opinion" have long been linked to debates about the proper relationship between media and democratic citizenship.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Media, Communication, and Information (CMCIU) or Program in Journalism Mass Communication (JOURU) majors only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4111 (3) Crime, Media and Contemporary Culture

Addressed in the course are a range of issues from within a variety of literatures that consider the ways in which the media cover crime. Those literatures are particularly drawn from sociology and the emergent, and increasingly dominant, field of cultural criminology. The focus of the class is to get students to think of "crime" as a constructed and mediated concept and set of narratives that often create problematic public "understandings".

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

MDST 4211 (3) Asian Media and Culture

Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world.

Equivalent - Duplicate Degree Credit Not Granted: MDST 5211

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Asia Content

MDST 4221 (3) Media Technology and Cultural Change

Explores how media technologies affect social orders and shape cultural practices across the globe. Compares and critically evaluates different theories of technology, emphasizes the social construction of technology, asks how media technologies inform conceptions of social reality and individual identity and considers how media technologies can be understood across a range of academic disciplines.

Requisites: Requires prerequisite courses of MDST 2002 and MDST 3001 and MDST 3002 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Grading Basis: Letter Grade

MDST 4231 (3) Youth Media: Culture and Politics

Emphasizes the sociological understandings of youth cultures, identities and practices in relation to media and politics. Topics include the influences of consumer branding, participatory culture, youth media production and representation, use of social media, mobile phones, gaming, and other digital media, and integrating them around themes of youth styles, gender, ethic, political identities, consumer culture, social behavior and other trends.

Requisites: Requires prerequisite course of MDST 3711 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

MDST 4311 (3) Mass Communication Criticism

Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism. Texts from contemporary print and broadcast media.

Equivalent - Duplicate Degree Credit Not Granted: MDST 5311

MDST 4331 (3) Gender, Race, Class, and Sexuality in Popular Culture

Studies the construction, interconnections, and replications of gender, race, class, and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4341 (3) International Media and Global Crises

Examines strengths and limits on media's role in globalized crises (e.g. financial, climate change, health) in light of changing distribution of global power. Introduction to current crises; context-analytical approach to media technologies, financing and uses; application to national cases.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Media Studies (MDST) or International Affairs (IAFS) majors only.

Additional Information: Departmental Category: Asia Content

MDST 4361 (3) TV and the Family in American Culture and Society

Examines the history and character of two central institutions in American society—the family and television—to gain deeper understanding of their formative and enduring roles. Topics include: intersecting histories of the family and television; economic logic of the TV industry and programming; representations of the family in television programming; how families use and interact with television.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4371 (3) Media and Religion

Examines the way religion uses media as a social and political force. Introduces the major themes and trends in the mediation of religion and the religious inflection of the media in professional, popular, and emerging media contexts.

MDST 4372 (3) Islam, Pop Culture and Media

Explores the shifting boundaries of cultural and religious Muslim identities through media representation and production in Muslim-majority countries and in the West. Using popular culture as a complex site of struggle, this course examines how Muslims address questions of gender, ethnicity, class, democracy, sexuality, religion, and modernity in a variety of media forms and practices.

Grading Basis: Letter Grade

MDST 4401 (3) Fan and Audience Studies

Considers how audiences and fans are conceptualized, how they are constructed by media enterprises and how they operate within their cultural ecosystems. While media shape the sociocultural, political and economic dimensions of the social world, fan studies suggest a more active set of practices form sites of resistance and enable a greater degree of influence over cultural production.

Requisites: Requires prerequisite courses of MDST 2002 and MDST 3001 and MDST 3002 (all minimum grade C-).

Grading Basis: Letter Grade

MDST 4601 (3) Media Law, Policy and Ethics

Explores ethical and legal complexities of information and communication technology. Combines real-world inquiry with creative speculation to probe everyday ethical dilemmas faced by digital consumers, creators and coders, as well as policy-makers. Explore themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.

Grading Basis: Letter Grade

MDST 4841 (1-4) Undergraduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4871 (1-3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with a minimum of 75 hours taken.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 4931 (1-6) Internship

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Media Studies (MDST) majors only.

Additional Information: Departmental Category: Core Curriculum and General Electives

Media Studies - Bachelor of Arts (BA)

The Bachelor of Arts in Media Studies emphasizes the creative and analytical skills needed to make sense of current and future trends in media, and to gain a deep understanding of the history and development of various means and forms of communication.

Explorations of media theory, history, criticism, practices, popular culture, technology and emerging cultures are enhanced by practical training in media design, storytelling, digital art, online community engagement, documentary filmmaking and social media.

Requirements

Students pursuing the BA in media studies complete 12 courses, for 36 credit hours. MDST requires an internship (3 credit hours—MDST 4931) in a field of the student's choice, and a capstone course (3 credit hours—MDST 4221 or MDST 4401), both usually completed in the senior year.

Required Courses and Semester Credit Hours

MDST Core**Required Courses**

MDST 1001	Foundations of Media Studies	3
MDST 1002	Introduction to Social Media	3
MDST 2002	Media and Communication History	3
MDST 3001	Media Research	3
MDST 3002	Digital Culture and Politics	3

Students would then take six hours of Media Practice courses offered by MDST, other departments or programs in CMCI or departments outside CMCI.¹

Area of Concentration

Select three courses in one of the following:² 9

Media, Technology & Society

MDST 2010	Media and Social Movements
MDST 2011	Disruptive Entrepreneurship in the Internet's New Economies
MDST 2012	Hacker Culture
MDST 2021	Comic Books: Culture and Industry
MDST 3331	Sports-Media Complex
MDST 3341	Designing Alternative Media Platforms
MDST 3401	Media, Food and Culture

Self-Designed Concentration³

Total Credit Hours 30

¹ The Media Practice component consists of courses involving hands-on work in the CMCI Departments of Advertising, Public Relations and Media Design; Journalism; Information Science or Critical Media Practices; or in the Technology, Arts and Media program in ATLAS.

² Courses meeting this requirement could come from anywhere within CMCI or across the CU Boulder campus curriculum.

³ The concentrations represent the priorities of the MDST curriculum, but students work with faculty to develop their own concentrated emphasis (to help determine which courses may or may not need to be available). Degree requirements will continue to be consistent: students must complete the core curriculum of courses, must meet the mandated numbers of hours, MDST requires an internship (3 hours) in a field of the student's choice, and a 3 hour capstone course, both usually completed in the senior year. The concentrations represent the priorities of the MDST curriculum, but students work with faculty to develop their own concentrated emphasis (to help determine which courses may or may not need to be available). Degree requirements will continue to be consistent: students must complete the core curriculum of courses, must meet the mandated numbers of hours, MDST requires an internship (3 hours) in a field of the student's choice, and a 3 hour capstone course, both usually completed in the senior year.

Secondary Area of Study

In addition to coursework required for the major, all student in MDST must complete a secondary area of study outside of MDST. This secondary area of study can be met by any of the following: a minor, a second major within CMCI, a double degree, or any credit-based certificate program of at least 12 credit hours.

Media Studies - Minor

The minor in media studies (MDST) allows students to choose from among a wide array of course offerings, which focus on contemporary media topics in one of three recommended concentrations: 1) Global Media Industries & Culture; 2) Media, Technology & Society; and 3) Advocacy, Entrepreneurship & Social Change.

A minimum of 18 credit hours is required for the minor. 9 hours must be courses numbered 3000 or above. All Courses counted toward the minor must be completed with a grade of C- or better. No pass/fail work may be applied. No more than six credit hours of transfer work may be applied to the minor, including 3 hours of upper-division credit. The grade point average for minor degree coursework must be equal to 2.00 or higher.

Track #1: Global Media Industries & Culture

Required Courses

MDST 1001	Foundations of Media Studies	3
MDST 1002	Introduction to Social Media	3

Music

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers three undergraduate degrees, three certificate programs and four graduate degrees; numerous performance opportunities are also available.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

Mission

The mission of the College of Music at CU Boulder is to promote excellence in music through distinguished instruction in performance, composition, musicology, theory and teacher preparation, and to provide opportunities for performance, creative activities, research and scholarship, and teaching.

The college is dedicated to:

- providing music majors and non-majors the opportunity to develop their knowledge, understanding and ability in the various aspects of music at a level appropriate to their needs and interests;
- preparing students for careers as performers, composers, scholars, teachers, administrators and other professionals in the field of music;
- broadening and deepening the knowledge and understanding of music through research, teaching, creative activities and publication; and
- enriching the lives of students and faculty as well as the community, state, nation and the world with performances of a wide variety of music presentations and publications.

The College of Music is an academic community committed to maintaining a climate of mutual respect and collegiality.

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship.

The college maintains a ratio of approximately one tenure-track faculty member for every 10 students. This enables students to benefit from dynamic, personal interaction with their professors. The college also offers students regular academic advising to ensure that they complete their degrees without unnecessary delay.

In addition to training in the various professions of music, the college provides general music studies and activities for the non-major; broad cultural programs (concerts, recitals, lectures) for the university and Boulder communities; favorable conditions for research in music; and service activities to the state and nation.

The Bachelor of Arts in Music, Bachelor of Music and Bachelor of Music Education degrees are granted by the university, upon recommendation of the faculty of the College of Music, to those who have successfully completed prescribed requirements.

Students must complete an online graduation application and schedule a final checkout appointment by December 15 for May/August graduation and by October 1 for December graduation.

The Entrepreneurship Center for Music is a national leader in professional development for musicians. The ECM equips today's music students with the skills and tools they need to create sustainable careers in the arts. ECM students are encouraged to develop entrepreneurial skills to explore the vast opportunities inherent in a changing marketplace, and to develop plans to implement career-enhancing ventures across the artistic spectrum. Offerings include courses for credit, an undergraduate certificate in music entrepreneurship, workshops and internships with a wide range of arts organizations and businesses nationwide.

The College of Music has several beautiful performance halls, including the 2,000-seat Macky Auditorium, the 500-seat Grusin Music Hall, the 270-seat Music Theatre and the 120-seat Chamber Hall. The college is located primarily in the Warner Imig Music Building, a large complex of practice rooms, faculty studios, offices, ensemble rehearsal areas,

seminar facilities and classrooms. An addition to the east side of the building features a 4,300 square foot rehearsal space with a 35-foot ceiling and acoustical draping. Additional rehearsal and classroom facilities are located in Macky.

The college's outstanding Howard B. Waltz Music Library is considered to be among the nation's most comprehensive. The library contains over 150,000 volumes, scores, recordings and periodicals. Computerized facilities are provided for listening to recordings and work stations are available for computer-based reference searching.

The college also features extensive facilities for music technology and electronic music study. The Computer-Assisted Music Laboratories (I and II) are multi-purpose labs designed primarily for classroom instruction. They feature numerous workstations, each with a Musical Instrument Digital Interface, sampling keyboard and a computer. The CRUNCH Lab is a fully-featured electronic music project studio. This lab is optimized for computer music research (including live interactive performance systems), as well as sound recording and editing projects and audio/video production. The Class Piano Laboratory is equipped with 12 digital pianos.

Each year the College of Music presents over 400 concerts by students, faculty and guests. In addition to individual musical pursuits, students at all levels have the opportunity to perform in a variety of outstanding ensembles including orchestras, choirs, bands, world music ensembles, chamber and early music groups, jazz ensembles and combos, opera productions and musicals. Many of these groups have been invited to perform at prestigious national and international events. Recitals by students and faculty are supplemented by visits from world-class guest artists, all of which provide the Boulder community with the chance to hear some of the finest music being performed today. The vast majority of these excellent performances are free and open to the public.

Other music programs presented by CU Presents include:

- Artist Series
- Eklund Opera Program
- Takács Quartet Series
- Holiday Festival

For a schedule of all College of Music performances, visit the college's Events (<http://www.colorado.edu/music/events>) webpage.

Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

The student body of the College of Music has its own government, represented by the College of Music Student Government and the Graduate Music Student Council. Honorary music fraternities are Sigma Alpha Iota, Mu Phi Epsilon and Kappa Kappa Psi. Pi Kappa Lambda, a national music honor society, and the Music Teachers National Association both have active chapters within the College of Music. Music education majors are eligible for membership in student chapters of the National Association for Music Educators, the American Choral Directors Association and the American String Teachers Association. Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Major Fields & Degrees

Undergraduate degrees include the bachelor of music (BM), the bachelor of arts in music (BA) and the bachelor of music education (BME). Students may also elect to earn a certificate in jazz studies, music

technology or music entrepreneurship in conjunction with their degree. In addition to a substantial core of studies in music, the BA in music program allows a wide choice of study in areas outside of music. BM areas of concentration include: composition, musicology, performance and jazz studies. The major emphasis areas in the BME program are: choral, choral-general, instrumental and instrumental-general.

Incoming freshmen and transfer students in the College of Music are declared as music majors at the beginning of their first semester. There is no minor in music.

Students may pursue double degrees in music and an outside field such as engineering, business, etc. Questions may be directed to the associate dean for undergraduate studies, College of Music, 303-492-8468, or ugradmus@colorado.edu.

Policies & Requirements

Honors at Graduation

Students achieving a cumulative GPA of 3.70–3.79 graduate with honors, 3.80–3.89 with high honors and 3.90–4.00 with highest honors. These students are recognized at commencement.

Scholarships and Awards

A number of scholarships and awards are designed specifically for students in the College of Music. Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory degree progress by:

1. demonstrating adequate performance in weekly applied lessons, ensemble and scholarship auditions, applied proficiencies/juries, and recitals/previews,
2. maintaining at least a 3.0 cumulative grade point average in those classes that count toward the music degree and
3. successfully completing at least two-thirds of the credit hours attempted while a music major at CU Boulder.

Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery or falsification of official records, and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as their own. It is recommended that students consult with their instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Students are expected to be acquainted with and abide by provisions of the CU Boulder Honor Code (see the Academic Integrity (p. 15) section).

Scholastic Requirements

To remain in good academic standing, a student must maintain at least a 2.00 cumulative grade point average (GPA) and make satisfactory progress toward the degree as defined by the College of Music and area faculty.

First semester freshmen or transfer students are given a grace semester and will be placed on academic alert if the cumulative GPA is below

2.00. After the second semester, if the semester GPA is above 2.00 but the cumulative is below 2.00 then the student is placed on academic recovery. If the second semester and cumulative GPAs remain below 2.00 then the student is placed on academic suspension.

Academic probation is an official notification that a student's grades are unsatisfactory. Any undergraduate student who has a cumulative or semester grade point average below 2.00 is automatically placed on academic probation for the following three semesters. (Cumulative GPA is calculated on grades earned at this university). Students placed on academic probation will be limited to one ensemble and 15 credit hours. If a probationary student's GPA (semester and/or cumulative) at the end of any probationary semester is not 2.00 or above it will result in automatic suspension. Any undergraduate student who has a cumulative or semester GPA below 1.00 is automatically suspended without a probationary period.

While on suspension, students may not register for regular day classes during the fall or spring semester on any CU campus and are not considered eligible for graduation. To regain good academic standing, suspended students must earn a semester GPA of 2.00 or higher and raise their cumulative GPA to 2.00 or above during the following term by successfully completing at least 12 credit hours (with no withdrawals, no incomplete grades, and no courses taken pass/fail) through the Division of Continuing Education and Professional Studies or summer session.

Courses taken at other campuses or institutions will not be used for purposes of reinstatement, but credits earned may be transferred according to normal procedures and policies after reinstatement and readmission. Suspended students who raise their cumulative GPA to 2.00 or above may then petition for readmission and receive a personal hearing before the associate dean. Suspended students who do not raise their cumulative GPA to 2.00 or above are dismissed from the college and university. Students who have been dismissed must reapply for admission to the university after being reinstated by the college.

Undergraduate music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory progress in their major (as determined by the faculty), demonstrate satisfactory proficiency in jury exams and auditions, enroll in ensemble and maintain a minimum cumulative GPA of 3.00. Students who have a cumulative GPA below 3.00 will be placed on scholarship probation for a maximum of two semesters (consecutive or cumulative), provided the GPA improves each semester. Students on scholarship probation who do not earn a cumulative GPA of 3.00 or higher by the end of the probationary period will have their scholarships revoked.

Appeals

Students have the right to appeal decisions of academic dishonesty and to petition for exceptions to the academic policies stated in this catalog. Appeals should be directed to the Associate Dean for Undergraduate Studies. College of Music policies are in addition to the campus policies.

Admission Requirements

In addition to the entrance requirements of the university outlined in Undergraduate Admission in the General Information section, freshman and transfer students must meet College of Music entrance requirements. Successful College of Music applicants have extensive prior experience in music (including private study), the ability to read and sight-read music notation, an understanding of music fundamentals or basic music theory and elementary piano skills. Students with appropriate skill in piano sight reading and keyboard harmony may be

able to test out of all or part of the keyboard musicianship requirement included in their degree plan. Students with an AP Music Theory test score of 4 are credited with one semester of music theory and aural skills, and those with a test score of 5 are credited with two semesters.

Auditions

An audition is required for all prospective undergraduate music majors. Undergraduate auditions are held in Boulder on selected Saturdays in February. Alternate audition dates may also be scheduled if necessary. If travel distance is prohibitive, prospective students may substitute a high-quality recording. Applicants should identify themselves by name and list selections and titles at the beginning of the recording. In order for students to be fully considered for financial assistance, live auditions should be completed during the general audition weekends in February or recordings should be received by Feb. 15. Students should prepare a 10–20 minute audition program in accordance with the audition requirements listed on the college's Auditions (<http://www.colorado.edu/music/admissions/prospective-undergraduates/auditions>) webpage.

Contact the undergraduate office at 303-492-8468 or ugradmus@colorado.edu for more information.

Admissions decisions for music composition applicants are based on a review of scores and sound recordings for at least three contrasting works. If the portfolio of scores and recordings is considered acceptable for admission to the music composition program, applicants are then invited to schedule an instrumental/voice audition.

Admissions decisions for music education applicants are based on academic qualifications, audition results and an interview conducted by two or more music education faculty members. Interviews address written and verbal communication skills, motivation and goals related to music teaching, prior music teaching experiences and affective characteristics associated with effective music teachers. For more information about music education interviews, visit the college's Music Education (<http://www.colorado.edu/music/departments/music-education>) webpage and contact the music education chair.

Transfer Students

Transfer students from within the university and from other universities must meet the general requirements of the university and the specific requirements of the College of Music, including the audition. A minimum GPA of 2.0 for students transferring from within the university and 2.75 for students transferring from other universities is required. See the undergraduate Admissions (p. 97) section for specific requirements.

Attendance Requirements

Successful work in the College of Music is dependent on regular attendance in all classes. At the beginning of each semester, instructors will inform students of policies governing grading and attendance in each class. Students are expected to attend classes and comply with the attendance requirements specified by their instructors. For ensembles and other performance classes, attendance at dress rehearsals, major concerts and other approved/sanctioned performances, as listed in the course syllabus, also is required.

New Student Convocation

New Student Convocation is an extension of the CU Boulder campus and College of Music orientation programming. Convocation sessions are designed to provide new undergraduate music majors with the knowledge and skills necessary to be successful in making progress toward a music degree. Freshman music majors are required to attend all 10 convocation

sessions. Transfer student attendance is not required, but individuals are strongly encouraged to attend and participate in any convocation sessions that may be particularly interesting or relevant to their future success.

Ensembles

All undergraduate students enrolled in applied music must participate in a university ensemble appropriate to and required by their degree program. (Students enrolled in conducting courses must concurrently be enrolled in a conducted ensemble.) Voice performance majors are not required to be in ensembles during the semester of their senior recital, and bachelor of music education students are exempt from ensemble participation during the student teaching semester. Any student who studies applied music beyond degree requirements must participate concurrently in a university ensemble. Double majors need be in only one ensemble at a time.

Sophomore Proficiency

Students must pass a variety of jury tests and proficiency exams during their degree work. Each applied area has different requirements, so students need to consult the chair of their area and/or studio professor. However, all students must pass a sophomore proficiency exam. Students who cannot pass this exam receive an incomplete grade and cannot progress to the junior level of applied study until the proficiency is achieved. Studio professors provide students with proficiency and repertoire requirements.

Course Load

The normal academic load for an undergraduate student in the College of Music is 15–17 credit hours. Schedules of fewer than 12 or more than 19 credit hours must have approval of the associate dean for undergraduate studies of the College of Music.

Dropping a Course

Students should adhere to the deadlines posted on the Office of the Registrar website for dropping a course each semester. After a certain date each semester, a special action form signed by the instructor and associate dean for undergraduate studies is required to drop a course.

Pass/Fail Option

The pass/fail option for 12 credit hours is open only to Bachelor of Music and Bachelor of Arts in Music students. Music education students may only use the pass/fail option for student teaching. Pass/fail credit hours are to be selected from nonmusic courses and are in addition to those that may be taken in honors. Courses so elected are taken according to the pass/fail policies of the college or school concerned.

Pass/fail credit hours that transfer students can apply toward degree requirements from departments within the university are limited to 1 in every 8 credit hours earned in the College of Music.

Residence Requirement

Of the credit hours required for an undergraduate degree, the last 56 credit hours must be completed in residence in the College of Music. This may be reduced by the associate dean for undergraduate studies for excellent work done in this university and for high scholarship exhibited at previous institutions attended. In no case shall the minimum be fewer than 40 credit hours distributed over three semesters. At least 9 credit hours in applied music (private instruction) must be earned in this college

for the degrees bachelor of music and bachelor of music education, and 6 credit hours for the bachelor of arts in music.

Student Work

Any recital required for graduation is recorded. Arrangements are to be made through the College of Music Operations Office, and a recording fee is charged. The original recording is placed in the Music Library.

Programs of Study

Music

Undergraduate degrees include the Bachelor of Music (BMus) and the Bachelor of Arts in music (BAMus). Students may also elect to earn a certificate in jazz studies, music entrepreneurship or music technology in conjunction with their degree.

In addition to a substantial core of studies in music, the BAMus in music program allows a wide choice of study in areas outside of music.

BMus areas of concentration include: composition, musicology, performance and jazz studies.

Bachelor's Degrees

- Music - Bachelor of Music (BMus) (p. 817)
- Music - Bachelor of Arts in Music (BAMus) (p. 832)

Certificates

- Jazz Studies - Certificate (p. 834)
- Music Entrepreneurship - Certificate (p. 834)
- Music Technology - Certificate (p. 835)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor Emeritus

Courses

MUSC 1081 (3) Intensive Music Theory

Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.

Requisites: Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1101 (2) Semester 1 Theory

Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1103 (1) Becoming a Music Teacher

Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade

MUSC 1111 (2) Semester 2 Theory

Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.

Requisites: Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1121 (1) Aural Skills Lab, Semester 1

Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1131 (1) Aural Skills Lab, Semester 2

Continuation of MUSC 1121. Focuses on sight singing, rhythm and dictation of diatonic melodies; adds chromatic elements, more complex rhythms and two-part dictation. Includes harmonic dictation using vocabulary from MUSC 1111. Includes individual and group improvisation within harmonic contexts. Offered spring only.

Requisites: Requires prerequisite course of MUSC 1121 (minimum grade D-). Restricted to College of Music undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1325 (1) Piano Sight Reading

Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 1326 (1) Guitar Musicianship

Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to students with an emphasis on guitar performance in their degree plan.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 1544 (1) Italian Diction

Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Voice

MUSC 1554 (1) English Diction

Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Required for Freshmen BM voice majors.

Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Voice

MUSC 1802 (3) Introduction to Musical Styles and Ideas

Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 2071 (2) Instrumentation

Introduces the instruments in the orchestra by studying their ranges, idioms, histories and performance practices. Assignments center around hands-on scoring for instruments. Student arrangements will be performed in class during the semester. Offered spring only.

Requisites: Requires prerequisite courses of MUSC 2101 and MUSC 2121 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2081 (2) Prepared for the Soundcheck

Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.

Equivalent - Duplicate Degree Credit Not Granted: CMDP 2860

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2091 (2) Recording Techniques

Provides hands-on training in various audio recording techniques, acoustics and sound reinforcement, studio maintenance and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events.

Equivalent - Duplicate Degree Credit Not Granted: CMDP 2870

Requisites: Requires prerequisite course of MUSC 2081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2101 (2) Semester 3 Theory

Continuation of MUSC 1111. Reviews harmonic and formal concepts from MUSC 1111. Introduces advanced chromatic concepts such as modal mixture, seventh chords with added dissonance, Neapolitan sixth chord and augmented-sixth chords. Explores in-depth structural analysis of musical works. Offered fall only.

Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2103 (3) Introduction to Music Education

Provides an overview of basic principles and practices of the music education profession. Explores public school music teaching through class discussions, directed observations, and a supervised field experience. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 2111 (2) Semester 4 Theory

Continuation of MUSC 2101. Builds on and synthesizes harmonic, melodic and formal concepts from semesters 1-3. Includes writing about musical structure and analyzing relationships of musical structure to extramusical elements (such as text, performance technique, dance, staging, etc.). Introduces 20th century compositional techniques. Offered spring only.

Requisites: Requires prerequisite course of MUSC 2101 (minimum grade D-). Restricted to College of Music (MUSC) majors only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2121 (1) Aural Skills Lab, Semester 3

Continuation of MUSC 1131. Applies concepts from MUSC 2101 in performance (prepared, from sight and improvised) and analytical listening (transcription, diction and aural analysis). Offered fall only.

Requisites: Requires prerequisite course of MUSC 1131 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2131 (1) Aural Skills Lab, Semester 4

Continuation of MUSC 2121. Applies concepts from MUSC 2111 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis). Offered spring only.

Requisites: Requires prerequisite course of MUSC 2121 (minimum grade D-). Restricted to College of Music (MUSC) majors only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2325 (2) Applied Harmony for the Keyboard

Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis and playing by ear. Offered spring only.

Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 1325 (all minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 2365 (2) Introduction to Accompanying

An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Offered spring only.

Requisites: Requires prerequisite course of MUSC 1325 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 2366 (2) Guitar Accompanying

Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo, playing/improvising from chord charts, and arranging accompaniments from musical scores.

Requisites: Requires prerequisite course of MUSC 1326 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 2608 (1) Alexander Technique

Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception, physical coordination and mind-body awareness. Applies these contexts to specific musical activities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5608

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2772 (3) World Musics: Asia and Oceania

Highlights music in Asia and Oceania using current ethnomusicological materials.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Musicology

MUSC 2782 (3) World Musics: Africa, Europe, and the Americas

Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, focuses on music cultures of Africa, Europe and the Americas.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Musicology

MUSC 2918 (2) Building Your Music Career

Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5918

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 2988 (1) Introduction to Music Research

Introduces music research tools and basic writing skills to provide information fluency and skills necessary for successful composition of formal music research papers. Applies curricular goals to specific topics of students' choice.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2997 (1) Sophomore Proficiency

To be completed by the second semester of the sophomore year.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Theses and Recitals

MUSC 3013 (1) String Class

For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3023 (1) Woodwind Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3033 (1) Brass Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3051 (2) Beginning Composition

Covers issues relating to the craft of musical composition with analysis and writing in various styles. This introductory course is designed for music majors who are not composition majors. Some of the assignments will be read in class. Offered spring term of even-numbered years.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 3061 (2) Jazz Improvisation I

Develops skills in jazz improvisation through practical application of harmonic concepts, melodic construction, rhythmic awareness, transcription, repertoire and analysis. Open to all instruments. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite for non-jazz majors MUSC 2111.

Additional Information: Departmental Category: Theory and Composition

MUSC 3071 (2) Jazz Improvisation II

Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Offered spring only.

Requisites: Requires prerequisite course of MUSC 3061 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 3081 (3) Jazz Theory and Aural Foundations 1

Presents the grammar and syntax of jazz. Helps to gain a greater understanding of the inner workings and application of chord progressions as they relate to the jazz idiom including major key harmony, secondary dominants, modal interchange and modulation. Students will demonstrate their understanding of these components through written assignments, singing, aural recognition, transcription and keyboard demonstration.

Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 3071 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 3133 (2) Teaching General Music I

Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Offered spring only.

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3153 (2) Teaching Woodwind Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3163 (2) Teaching String Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3176 (2) Conducting I

Introduces conducting and rehearsal techniques. Performance participation in the appropriate ensemble (band, choir or orchestra). Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3186 (2) Conducting II

Introduces conducting and rehearsal techniques. Department enforced corequisite: performance participation in the appropriate ensemble (band, choir, or orchestra). Offered spring only.

Requisites: Requires prerequisite course of MUSC 3176 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3193 (2) Vocal Pedagogy and Literature for Young Voices

Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3223 (2) Teaching Brass Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3253 (2) Jazz Techniques for the Music Educator

Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisites MUSC 1111 and MUSC 2103.

Additional Information: Departmental Category: Music Education

MUSC 3273 (2) String Pedagogy and Literature

Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisites MUSC 2103 and MUSC 3163.

Additional Information: Departmental Category: Music Education

MUSC 3345 (2) Piano Pedagogy 1

Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. Offered fall of even-numbered years.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 3355 (2) Piano Pedagogy 2

Materials and techniques for teaching piano with a focus on the intermediate level student. Offered only in spring of odd-numbered years.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 3363 (2) Marching Band Techniques

Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Offered fall only.

Requisites: Requires prerequisite course of MUSC 2103 and EMUS 1287 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3444 (1) French Diction

Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Required of Junior BM voice majors.

Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.

Recommended: Prerequisite MUSC 3464.

Additional Information: Departmental Category: Voice

MUSC 3464 (1) German Diction

Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Required of sophomore BM voice majors.

Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Voice

MUSC 3642 (3) History of Jazz 1

Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from its origins up to the 1950's, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Musicology

MUSC 3772 (3) West African Music and Culture in Ghana

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums.

Equivalent - Duplicate Degree Credit Not Granted: MUEL 3772

Requisites: Requires prerequisite courses of MUSC 2782 and MUEL 2772 (all minimum grade D-). Restricted to students with 27-56 credits (Sophomore) non-College of Music majors only.

Additional Information: Departmental Category: Musicology

MUSC 3802 (3) History of Music 1

Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812.

Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Musicology

MUSC 3812 (3) History of Music 2

Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802.

Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Musicology

MUSC 3997 (1) Junior Recital

To be completed by the second semester of the junior year.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 2997. Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Theses and Recitals

MUSC 4001 (2) New Musical Styles and Practices

Explores a variety of music from the 20th and 21st centuries beginning with Stravinsky and moving through current trends. Involves a mix an analysis/exploration of this music with short composition assignments imitating the different styles. Offered spring of odd-numbered years.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4011 (2) 16th Century Counterpoint

Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5011

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4012 (3) African Music

Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

Equivalent - Duplicate Degree Credit Not Granted: MUEL 4012 and MUSC 5012

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4031 (2) Jazz Arranging 1

Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Offered fall semester only.

Requisites: Requires prerequisite course of MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4041 (2) Orchestration

Studies advanced orchestration techniques through score analysis and student projects. Offered fall of odd-numbered years.

Requisites: Requires prerequisite course of MUSC 2071 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4061 (2) Tonal Analysis

Surveys tonal analytical techniques and forms of tonal music, including binary forms, ternary forms, rondo (and others) through study of selected works. Offered spring only.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4071 (2) Post-Tonal Theory and Analysis

Focuses on theory and analysis of post-tonal literature pre-1945. Offered fall of odd-numbered years.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4078 (1) Piano Technician for Pianists

Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5078

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite piano majors.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4081 (3) Introduction to Music Technology

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.

Equivalent - Duplicate Degree Credit Not Granted: MUEL 4081 and CMDP 3860

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4091 (2) Jazz Arranging 2

Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a jazz ensembles. Offered spring of odd-numbered years.

Requisites: Requires prerequisite course of MUSC 4031 (minimum grade D-). Restricted to College of Music undergraduate students only.

Recommended: Prerequisite MUSC 3081.

Additional Information: Departmental Category: Theory and Composition

MUSC 4101 (1-3) Theory and Aural Skills Review

Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits) or both theory and aural skills (3 credits). May not be taken pass/fail. Aural skills section offered fall and spring. Theory section offered spring.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4103 (1) Introduction to Student Teaching

Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school.

Requisites: Requires a prerequisite course of MUSC 4113 or MUSC 4313 or MUSC 4443 (minimum grade C-). Restricted to College of Music undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5106

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4111 (2) Composing at the Computer

Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Offered fall of odd-numbered years.

Requisites: Requires prerequisite course of MUSC 4081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4112 (3) Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4113 (3) Teaching General Music 2

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental and speech-based arrangements. Offered fall only.

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4121 (3) Topics in Music Technology

Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia, sound design and analysis. Lectures on work sessions will support student projects.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 4081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4122 (3) Music in Jewish Culture

Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4122

Grading Basis: Letter Grade

Additional Information: Departmental Category: Musicology

MUSC 4133 (3) Student Teaching Practicum

Offers practice teaching under the guidance of a master music teacher.

Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4142 (3) American Indian Music

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5142

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4143 (2) Developing Children's Choirs

Examines the musical skills, teaching techniques and administrative procedures necessary for developing a children's choir. Offered fall term of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5143

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4151 (3) Topics in Music Analysis

Examines critically a specific topic or repertory, such as Song Analysis or Music of Brahms. Uses readings and analyses, with grades to be determined from reading responses, analytical assignments and writing. Offered fall of even-numbered years.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade B).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Theory and Composition

MUSC 4152 (3) East Asian Music

Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre.

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

Departmental Category: Asia Content

MUSC 4153 (1) Percussion Class and Pedagogy

Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4163 (2) Choral Literature for School Ensembles

Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years.

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4168 (3) World Music Theories

Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5168

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Recommended: Prerequisite MUSC 1802 or MUSC 2772 or MUSC 2782 or MUSC 4112.

Additional Information: Departmental Category: Theory and Composition

MUSC 4191 (2) Advanced Recording

Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Offered spring of even-numbered years.

Requisites: Requires prerequisite course of MUSC 2091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4193 (1) Student Teaching Seminar

Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies and capstone project development.

Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4202 (3) Special Topic in Musicology: Current and Critical Issues

Examination of a specific topic of current or critical interest within areas of music history, ethnomusicology, critical theory and practice across the spectrum of Western, Popular and World Music traditions. Designed as a capstone course for music majors who have completed a full complement of musicology courses. Topics vary from term to term. Instructor consent is required for non-music majors.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Musicology

MUSC 4203 (1) Music Methods Practicum

Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools.

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Requires corequisite course of MUSC 4313 or MUSC 4443. Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4255 (2) Service Playing Techniques

Study of church music for liturgical and non-liturgical denominations; includes hymn playing, anthem accompaniments, basics of conducting from the organ console and improvisation and selection of organ music appropriate to the requirements of the church year and other special services.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5255

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4285 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the 16th century to the present. See also MUSC 4295.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5285

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4295 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the 16th century to the present. See also MUSC 4285.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5295

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4313 (3) Teaching Choral Music

Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5313

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite MUSC 2103.

Additional Information: Departmental Category: Music Education

MUSC 4325 (2) Keyboard Literature 1

Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4335 (2) Keyboard Literature 2

Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4405 (2) Basso-Continuo Accompaniment

Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5405

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4443 (3) Teaching Instrumental Music

Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5443

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4583 (2) Inclusive Music Classroom

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5583

Requisites: Requires prerequisite courses of MUSC 2103 and MUSC 3133 (all minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite MUSC 4113.

Additional Information: Departmental Category: Music Education

MUSC 4608 (1) Advanced Studies in the Alexander Technique

Continues investigation of the benefits of Alexander's principles regarding mind-body awareness begun in MUSC 2608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5808

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 2608 (minimum grade C-). Restricted to College of Music undergraduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4666 (3) Chamber Music Lit WW/Prc

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4712 (3) Renaissance Music

Provides a repertory and analysis of polyphonic music, 1400-1600.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5712

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4752 (3) Women in Music

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5752

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4772 (3) History of Opera

Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5772

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 or MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4802 (3) Studies in 20th Century Music

Offers intensified work in history of music in the 20th century. Topics vary from year to year.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5802

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4852 (3) 17th and Early 18th Century Music

Examines music and writings about music from the Baroque era.

Emphasizes cultural and musical analysis and surveys current musicological literature.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5852

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4862 (3) African American Music

Examines the sacred and secular genres of Black American music from folk spirituals to contemporary gospel and hip-hop in their cultural and historical contexts. Examines individual composers and performers in specific historical contexts in order to understand the meanings behind certain Black musical stylistics, sound ideals and aesthetic preferences. Formerly MUSC 2802.

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4872 (3) Late 18th and 19th Century Music

Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5872

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4892 (3) Latin American Music

Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5892

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5908

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4957 (1-4) Senior Thesis

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theses and Recitals

MUSC 4958 (2) Community Performances

Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5958

Requisites: Requires prerequisite course of MUSC 2918 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4978 (3) Arts Administration & Management

Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5978

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5988

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite MUSC 2918.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4997 (1) Senior Recital

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite class of MUSC 3997 (minimum grade D-). Restricted to College of Music undergraduate students only.

Additional Information: Departmental Category: Theses and Recitals

Music - Bachelor of Music (BMus)

The undergraduate degrees in music emphasize knowledge and awareness of:

- solo performance and technique, including the various musical styles used in compositions for students' musical instruments or voice;
- each composition performed, notation and editorial signs used in the compositions performed, and repertoire for the students' performance medium;
- ensemble performance, including familiarity with major composers in the student's performance medium and the techniques necessary to blend a number of individual musicians into an ensemble;
- concert and recital opportunities, including literature composed for different performance forces;
- theoretical studies, including tonal harmony, counterpoint, voice-leading and notation; formal principles and analytical techniques for

tonal music; and instruments in score, including the concert pitch of transposing instruments and nomenclature used in scores; and

- historical studies, including representative works in the canon of musical literature from chant to the present, the general outlines of the history of music from the Middle Ages to the present, music in the United States and musical cultures other than those of Europe.

In addition, students completing any of the degrees in music are expected to acquire the ability to:

- perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency and stylistic understanding;
- demonstrate an understanding of theoretical studies, including sight-reading and ear training; and
- demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

Concentration Areas

The four-year professional curriculum leading to the Bachelor of Music degree emphasizes creative skill, academic achievement and artistic performance in music. Concentration areas are offered in performance, composition, musicology and jazz studies.

Performance Concentration

Performance areas include voice, piano, jazz piano, organ, harpsichord, string instruments, harp, classical guitar, woodwinds, brass and percussion.

Dual Degree Programs

Double Major in Music Performance

Eligible students in the College of Music, with approval of faculty in the relevant areas or departments, may complete a double major in music performance. Normally, such programs take at least five years to complete. Students pursuing a double major in music performance must complete at least 15 additional credit hours beyond the 120 credit hours required for a single performance major. Requirements pertaining to applied study, chamber music, sophomore proficiency, junior recital and senior recital must be fulfilled separately for each degree; up to four credit hours of university ensemble can be applied to both majors when appropriate and with faculty/advisor approval. Students completing all requirements are awarded a single bachelor of music degree with two majors.

The decision to earn more than one degree or major in the College of Music should be carefully weighed, as it may be more advantageous for a student to complete a single degree/major and then begin work on a graduate degree in music.

BMus/BMusEd in Music Performance and Music Education

Qualified music majors who have been approved by the relevant major departments may elect to complete a dual major in music performance (woodwinds, brass and percussion, strings, voice, or jazz emphasis) and music education (instrumental or choral tracks). Requirements for these dual degree program range from 139 to 148 credit hours, and a minimum of 10 semesters of study (including one semester of full-time student teaching) is typically necessary to complete all requirements.

Double Degree in Music and an Outside Major

Students may complete requirements in two fields and receive two degrees from the university. Approximately 20 percent of music majors are studying a second major outside of music.

Requirements

A half recital in the junior year and a full recital in the senior year are required of students in the performance concentration areas, except voice theatre. Students should check with their advisor about preview policies.

A senior thesis is required of students in musicology. Music composition students must complete a senior project, as must voice students with an emphasis in musical theatre (senior recital, major role or direction/design of a major show). Student advisors must approve senior thesis and senior project plans.

Ensemble and chamber music requirements are specified in the degree plan for each concentration as approved by applied area faculty. Exceptions to these requirements must be approved by the major advisor and associate dean in consultation with area chairs and ensemble conductors.

Students pursuing the bachelor of music degree will be required to take one 3-credit-hour course in English composition through the Program for Writing and Rhetoric or the English department. Courses such as First-Year Writing and Rhetoric (WRTG 1150), Freshman Writing Seminar (ENGL 1001) or Introduction to Creative Writing (ENGL 1191) fulfill the requirement. The credit hours are applied in the liberal arts electives category. Students are strongly encouraged to complete this requirement by the end of their freshman year.

Music - Bachelor of Arts in Music (BAMus)

The bachelor of arts in music degree has as its goal a broad education in music within a liberal arts context. Although students may elect to pursue special interests, the primary emphasis is on the development of basic musicianship, an ability to perform music and a broad knowledge of the foundations and principles of music as an art. The bachelor of arts in music may be completed with or without an emphasis in musicology and world musics.

The undergraduate degrees in music emphasize knowledge and awareness of:

- solo performance and technique, including the various musical styles used in compositions for students' musical instruments or voice;
- each composition performed, notation and editorial signs used in the compositions performed, and repertoire for the students' performance medium;
- ensemble performance, including familiarity with major composers in the student's performance medium and the techniques necessary to blend a number of individual musicians into an ensemble;
- concert and recital opportunities, including literature composed for different performance forces;
- theoretical studies, including tonal harmony, counterpoint, voice-leading and notation; formal principles and analytical techniques for tonal music; and instruments in score, including the concert pitch of transposing instruments and nomenclature used in scores; and
- historical studies, including representative works in the canon of musical literature from chant to the present, the general outlines of the history of music from the Middle Ages to the present, music in the United States and musical cultures other than those of Europe.

In addition, students completing any of the degrees in music are expected to acquire the ability to:

- perform solo and ensemble repertoire demonstrating musical artistry, technical proficiency and stylistic understanding;

- demonstrate an understanding of theoretical studies, including sight-reading and ear training; and
- demonstrate an understanding of historical studies including the analysis of stylistic periods and music of non-Western cultures.

Requirements

A minimum of 120 credit hours with an overall GPA of 2.00 must be earned for the BA in music degree. Of these credit hours, at least 68 (66 for musicology emphasis) must be in non-music courses. Thirty must be at the 3000 or 4000 level. A minimum of 44 credit hours (50 for musicology emphasis) is required in music courses.

The normal pattern for private applied instruction in this degree is one half-hour lesson per week for 2 credit hours. Not more than 16 credit hours (12 for musicology emphasis) in private instruction may be used toward the degree.

Students registered for applied music must participate in an ensemble as recommended by their applied faculty. A maximum of 4 credit hours (6 for musicology emphasis) in ensemble can apply to the BA in music degree.

A recital may be given with permission of the chair of the applied faculty area and the student's advisor.

Required Courses and Semester Credit Hours

In addition to the general requirements listed above, the following specific requirements must be met:

- Three credit hours of English composition.
- Basic proficiency in one foreign language equal to three semesters at the university level. This requirement also may be fulfilled by three years of study in high school in one language or by passing a university proficiency examination.
- Non-music electives to fulfill the minimum requirement of 68 credit hours. Of the non-music electives, 37 credit hours must be fulfilled through the College of Arts and Sciences core curriculum.

Jazz Studies - Certificate

The Jazz Program offers a certificate in jazz studies for undergraduate music majors.

Requirements

The certificate program consists of an intense 18-credit-hour curriculum in both academic and performance areas, concluding with a jazz recital. Courses include jazz theory and aural foundations, improvisation, history of jazz, scoring and arranging, jazz piano, jazz techniques for the music educator, jazz combo and jazz ensemble.

MUSC 3061	Jazz Improvisation I	2
MUSC 3081	Jazz Theory and Aural Foundations I	3
PMUS 1515	Jazz Piano Class	2
MUSC 4031	Jazz Arranging I	2
MUSC 3253	Jazz Techniques for the Music Educator	2
MUSC 3071	Jazz Improvisation II (BM or BA)	2
MUSC 3642	History of Jazz I	3
EMUS 3427	Jazz Ensemble (Required to enroll in course twice.)	1
EMUS 3437	Jazz Combo	1

Music Entrepreneurship - Certificate

The Certificate in Music Entrepreneurship is an innovative program administered by The Entrepreneurship Center for Music ("ECM") in partnership with the Leeds School of Business. The certificate, open to music majors only, will include a *Minor in Business* plus academic and experiential credits within the College of Music. This robust curriculum positions the College of Music among the nation's leading programs in arts entrepreneurship. To qualify for the certificate, MUSC 2918 – *Building Your Music Career* must be successfully completed. For more information, contact Jeff Nytch at jeff.nytch@colorado.edu.

Requirements

The undergraduate in music entrepreneurship requires a minor in business (12 credit hours), plus six academic and experiential credit hours within the College of Music.

Interested students should elect participation in the certificate program by no later than the end of the sophomore year.

Overview Courses	6
MUSC 2918 Building Your Music Career	
MUSC 4988 The Entrepreneurial Artist	
TMUS 4493 Special Studies Omnibus	
Business Minor Courses	12
BUSM 2001 Principles of Marketing and Management	
BUSM 2002 Financial Accounting and Finance

Business Track Courses (choose one)	
BUSM 3001 Managing Innovation in Organizations	
BUSM 3002 Business and Financial Analytics	
BUSM 3003 New Venture Creation: Intro to Entrepreneurship	
BUSM 3004 Global Business for Business Minors	

Music Technology - Certificate

The College of music is pleased to offer an 18 credit Certificate in Music Technology. The certificate is available to all undergraduates in good standing with the university. Music majors should enroll under the MUSC heading and non-majors should use the MUEL heading. For those courses that do not have an MUEL prefix non-majors will need instructor permission to enroll in the class. To qualify for the certificate, the 4081 introductory course must be successfully completed.

The curriculum consists of a variety of courses designed to provide a strong background in using technology to compose and produce music. The courses range from an introductory survey of music software and hardware to in depth studies of DSP, synthesis, algorithmic composition, recording and post-production techniques, film scoring, and many other topics. The software used in many of the classes includes Logic Pro, ProTools, Ableton Live, Finale, Lilypond, MAX, PD, SuperCollider, CSound, Final Cut Pro, Audacity, SoundHack, and Spear.

For more information, contact John Drumheller at drumhell@colorado.edu.

Requirements

This certificate program requires 18 credit hours, including five music technology courses.

ARSC 4040 Arts and Sciences Special Topics

TMUS 4423 Special Study Music Theory

MUSC 4121 Topics in Music Technology¹

¹ May be repeated up to three times as topics vary.

Music Education

The Music Education Department's experienced educators teach courses aimed at preparing students for a career in music education, combined with unique programs and opportunities for involvement. The CU Music Education program has resulted in 100 percent job placement for our graduates.

Because of the varying challenges and opportunities associated with teaching music in K–12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and generalization. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra or band instructor.

Admission to the Teacher Education Program

Teacher education is a campuswide function at the University of Colorado. Admission to the music education program in the College of Music does not constitute admission to the teacher education program. Students must apply to the School of Education through the music education chair no later than the second semester of the junior year or by the time 65 credit hours have been completed toward the BME degree (including approved transfer credits). Students may not register for certain education courses and student teaching until they are admitted to the teacher education program.

Requirements for recommended admission to the teacher education program are:

- Minimum GPA of 3.00 in music and music education, and a minimum cumulative GPA of 2.75.
- Minimum grade of C- in MUSC 2103.
- Twenty-five hours of documented, supervised field experience.
- Satisfactory functional piano ability as demonstrated by passing the proficiency examination or completing prescribed course work.
- Satisfactory performance ability as demonstrated by meeting the sophomore proficiency requirements in an applied area of study.
- Recommendation by the music education faculty. An interview with each student is held by the members of the music education faculty during the first semester of the sophomore year to review the student's progress and qualifications for admission to the teacher education program.

For further information, please refer to the *Handbook for Undergraduate Studies in Music Education*.

Student Teaching

Students wishing to receive a student teaching assignment must complete an application and submit it to the School of Education through

the chair of the music education faculty early in the semester preceding the student teaching semester. Prerequisites for student teaching are:

- Admission to the teacher education program.
- A minimum GPA of 3.00 in music and music education, and a minimum cumulative GPA of 2.75.
- Completion of all required music education and education courses in the music education curriculum.
- Satisfactory performance ability as demonstrated by passing the junior recital.
- Passing score on the PLACE Music Assessment.
- Recommendation by the music education faculty.

Bachelor's Degree

- Bachelor of Music Education (BMusEd) (p. 844)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Austin, James R (https://experts.colorado.edu/display/fisid_103455)

MUSC 1081 (3) Intensive Music Theory

Introduces diatonic harmony and voice leading with intensive work on fundamentals (keys, intervals, triads, seventh chords and four-voice writing). The study of theoretical concepts is closely coordinated with aural skills. Feeds into the intensive section of MUSC 1111. Offered fall only.

Requisites: Requires corequisite course of MUSC 1121. Restricted to College of Music (MUSCU) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1101 (2) Semester 1 Theory

Introduces the fundamentals of diatonic harmony and voice leading, focusing on model composition (including one-, two- and four-voice writing) and analysis of excerpts from music literature. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1103 (1) Becoming a Music Teacher

Provides an introduction to basic principles and practices of the music education profession. Explores contexts and methods of public school music teaching through class discussions, practice teaching and directed observations. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade

MUSC 1111 (2) Semester 2 Theory

Continuation of MUSC 1101. Explores principles of harmony, voice leading and form. Continues emphasis on both model composition and analysis. Introduces chromatic elements (such as applied dominants and modulation), harmonic syntax and structural analysis of excerpts from music literature. Offered spring only.

Requisites: Requires prerequisite course of MUSC 1101 or MUSC 1081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1121 (1) Aural Skills Lab, Semester 1

Focuses on sight singing, rhythm and dictation of diatonic melodies in major and minor keys (treble, alto and bass clefs). Covers identification of scale types, intervals, triads and dominant seventh chords. Includes individual and group improvisation. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1131 (1) Aural Skills Lab, Semester 2

Continuation of MUSC 1121. Focuses on sight singing, rhythm and dictation of diatonic melodies; adds chromatic elements, more complex rhythms and two-part dictation. Includes harmonic dictation using vocabulary from MUSC 1111. Includes individual and group improvisation within harmonic contexts. Offered spring only.

Requisites: Requires prerequisite course of MUSC 1121 (minimum grade D-). Restricted to College of Music undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 1325 (1) Piano Sight Reading

Studies techniques for improving sight-reading skills at the keyboard, with practical work in solo, ensemble and choral literature. Also covers score reading and transposition. Restricted to piano majors or instructor consent required. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 1326 (1) Guitar Musicianship

Activities in sight-reading, fretboard harmony and comprehension of harmony and texture. Some work will be tied to the repertoire being studied in studio lessons. Open only to students with an emphasis on guitar performance in their degree plan.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 1544 (1) Italian Diction

Designed for the understanding of lyric Italian diction, the international phonetic alphabet, and its application to classical singing. Required for freshmen BM voice majors. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Voice

MUSC 1554 (1) English Diction

Designed for the understanding of lyric English diction, the international phonetic alphabet, and its application to classical singing as well as various musical styles of English classical voice literature. Required for Freshmen BM voice majors.

Requisites: Requires prerequisite course of MUSC 1544 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Voice

MUSC 1802 (3) Introduction to Musical Styles and Ideas

Introduces the study of musical traditions of the world; equips students with requisite skills for understanding and analyzing music as an art in historical and cultural contexts using an integrative approach that includes selected styles and genres, critical reading and writing skills and mastery of conceptual issues related to the discipline of music. Satisfies the World Music requirement for undergraduate students in the College of Music.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 2071 (2) Instrumentation

Introduces the instruments in the orchestra by studying their ranges, idioms, histories and performance practices. Assignments center around hands-on scoring for instruments. Student arrangements will be performed in class during the semester. Offered spring only.

Requisites: Requires prerequisite courses of MUSC 2101 and MUSC 2121 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2081 (2) Prepared for the Soundcheck

Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering. Uses recorded material from in-class sessions. Examines differing approaches to recording as well as current technologies.

Equivalent - Duplicate Degree Credit Not Granted: CMDP 2860

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2091 (2) Recording Techniques

Provides hands-on training in various audio recording techniques, acoustics and sound reinforcement, studio maintenance and troubleshooting. Real-world experience is gained through individual recording projects and College of Music events.

Equivalent - Duplicate Degree Credit Not Granted: CMDP 2870

Requisites: Requires prerequisite course of MUSC 2081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2101 (2) Semester 3 Theory

Continuation of MUSC 1111. Reviews harmonic and formal concepts from MUSC 1111. Introduces advanced chromatic concepts such as modal mixture, seventh chords with added dissonance, Neapolitan sixth chord and augmented-sixth chords. Explores in-depth structural analysis of musical works. Offered fall only.

Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2103 (3) Introduction to Music Education

Provides an overview of basic principles and practices of the music education profession. Explores public school music teaching through class discussions, directed observations, and a supervised field experience. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 2111 (2) Semester 4 Theory

Continuation of MUSC 2101. Builds on and synthesizes harmonic, melodic and formal concepts from semesters 1-3. Includes writing about musical structure and analyzing relationships of musical structure to extramusical elements (such as text, performance technique, dance, staging, etc.). Introduces 20th century compositional techniques. Offered spring only.

Requisites: Requires prerequisite course of MUSC 2101 (minimum grade D-). Restricted to College of Music (MUSC) majors only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2121 (1) Aural Skills Lab, Semester 3

Continuation of MUSC 1131. Applies concepts from MUSC 2101 in performance (prepared, from sight and improvised) and analytical listening (transcription, diction and aural analysis). Offered fall only.

Requisites: Requires prerequisite course of MUSC 1131 (minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2131 (1) Aural Skills Lab, Semester 4

Continuation of MUSC 2121. Applies concepts from MUSC 2111 in performance (prepared, from sight and improvised) and analytical listening (transcription, dictation and aural analysis). Offered spring only.

Requisites: Requires prerequisite course of MUSC 2121 (minimum grade D-). Restricted to College of Music (MUSC) majors only.

Additional Information: Departmental Category: Theory and Composition

MUSC 2325 (2) Applied Harmony for the Keyboard

Provides an intensive study and application of the harmonic structure of music in a variety of keyboard skills: figured bass realization, chord progressions, harmonization, improvisation, transposition, on-sight harmonic analysis and playing by ear. Offered spring only.

Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 1325 (all minimum grade D-). Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 2365 (2) Introduction to Accompanying

An overall study in the art of working with instrumentalists and singers including repertoire and orchestral reductions. Requires performance with a student instrumentalist or singer to be critiqued and coached by class and instructor. Offered spring only.

Requisites: Requires prerequisite course of MUSC 1325 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 2366 (2) Guitar Accompanying

Survey of accompanying repertoire for guitar with solo instruments (flute, violin, voice, etc.), including introductory work in basso continuo, playing/improvising from chord charts, and arranging accompaniments from musical scores.

Requisites: Requires prerequisite course of MUSC 1326 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 2608 (1) Alexander Technique

Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception, physical coordination and mind-body awareness. Applies these contexts to specific musical activities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5608

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2772 (3) World Musics: Asia and Oceania

Highlights music in Asia and Oceania using current ethnomusicological materials.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Musicology

MUSC 2782 (3) World Musics: Africa, Europe, and the Americas

Use current ethnomusicological materials and methods in the study of music outside the Western art tradition. Usually taught in the spring, focuses on music cultures of Africa, Europe and the Americas.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Musicology

MUSC 2918 (2) Building Your Music Career

Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5918

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 2988 (1) Introduction to Music Research

Introduces music research tools and basic writing skills to provide information fluency and skills necessary for successful composition of formal music research papers. Applies curricular goals to specific topics of students' choice.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 2997 (1) Sophomore Proficiency

To be completed by the second semester of the sophomore year.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Theses and Recitals

MUSC 3013 (1) String Class

For music education majors with choral/general emphasis. Develops basic performance skills on two or more string instruments. Addresses teaching strategies and other specialized topics related to string instruction. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3023 (1) Woodwind Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3033 (1) Brass Class

For music education majors with choral or choral/general emphasis. Develops basic performance skills on two or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3051 (2) Beginning Composition

Covers issues relating to the craft of musical composition with analysis and writing in various styles. This introductory course is designed for music majors who are not composition majors. Some of the assignments will be read in class. Offered spring term of even-numbered years.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 3061 (2) Jazz Improvisation I

Develops skills in jazz improvisation through practical application of harmonic concepts, melodic construction, rhythmic awareness, transcription, repertoire and analysis. Open to all instruments. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite for non-jazz majors MUSC 2111.

Additional Information: Departmental Category: Theory and Composition

MUSC 3071 (2) Jazz Improvisation II

Continues and expands upon the material presented in MUSC 3061. Reinforcement of ability to create an improvised melody in a range of harmonic contexts including blues, bebop, modal jazz, free jazz, and other styles. Offered spring only.

Requisites: Requires prerequisite course of MUSC 3061 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 3081 (3) Jazz Theory and Aural Foundations 1

Presents the grammar and syntax of jazz. Helps to gain a greater understanding of the inner workings and application of chord progressions as they relate to the jazz idiom including major key harmony, secondary dominants, modal interchange and modulation. Students will demonstrate their understanding of these components through written assignments, singing, aural recognition, transcription and keyboard demonstration.

Requisites: Requires prerequisite courses of MUSC 1111 and MUSC 1131 and MUSC 3071 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 3133 (2) Teaching General Music I

Provides an overview of general music teaching with emphasis on developmentally appropriate strategies and materials. Required for all music education majors as partial fulfillment of course work leading to K-12 music licensure. Offered spring only.

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3153 (2) Teaching Woodwind Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more woodwind instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate woodwind instruction. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3163 (2) Teaching String Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more string instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate string instruction. Offered fall only.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3176 (2) Conducting I

Introduces conducting and rehearsal techniques. Performance participation in the appropriate ensemble (band, choir or orchestra). Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3186 (2) Conducting II

Introduces conducting and rehearsal techniques. Department enforced corequisite: performance participation in the appropriate ensemble (band, choir, or orchestra). Offered spring only.

Requisites: Requires prerequisite course of MUSC 3176 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 3193 (2) Vocal Pedagogy and Literature for Young Voices

Provides an overview of vocal anatomy/function, care of the voice, vocal repertoire, teaching strategies, and other specialized topics related to singing instruction in both private studio and public school choral settings. Fall section for instrumentalists; spring section for vocalists.

Requisites: Restricted to College of Music (MUSC) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3223 (2) Teaching Brass Instruments

For music education majors with instrumental or instrumental/general emphasis. Develops basic performance skills on three or more brass instruments. Addresses teaching strategies and other specialized topics related to beginning and intermediate brass instruction. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3253 (2) Jazz Techniques for the Music Educator

Prepares the music educator for successful experiences teaching jazz at the secondary level. Students gain insights into performance and rehearsal techniques for the instrumental jazz ensemble. Explores approaches for teaching jazz theory, improvisation, and selecting literature for young students. Own instrument required for certain classes. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisites MUSC 1111 and MUSC 2103.

Additional Information: Departmental Category: Music Education

MUSC 3273 (2) String Pedagogy and Literature

Examines instructional methods/materials and pedagogical approaches appropriate for beginning to advanced string students in private studio, small ensemble, or large ensemble contexts. Topics may include group teaching strategies, as well as contemporary approaches including Rolland and Suzuki. Offered spring only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisites MUSC 2103 and MUSC 3163.

Additional Information: Departmental Category: Music Education

MUSC 3345 (2) Piano Pedagogy 1

Discusses teaching philosophies, objectives, and procedures. Examines and evaluates methods and materials. Studies practical aspects with which the private teacher is concerned. Offered fall of even-numbered years.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 3355 (2) Piano Pedagogy 2

Materials and techniques for teaching piano with a focus on the intermediate level student. Offered only in spring of odd-numbered years.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 3363 (2) Marching Band Techniques

Helps develop the skills needed to administer and teach all aspects of a contemporary high school marching band. Includes drill conception and design, instruction, organization, and administration. Offered fall only.

Requisites: Requires prerequisite course of MUSC 2103 and EMUS 1287 (all minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 3444 (1) French Diction

Designed for the understanding of lyric French diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of French classical vocal literature. Required of Junior BM voice majors.

Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) majors or graduate students only.

Recommended: Prerequisite MUSC 3464.

Additional Information: Departmental Category: Voice

MUSC 3464 (1) German Diction

Designed for the understanding of lyric German diction, the international phonetic alphabet, and its application to classical singing, as well as various musical styles of German classical vocal literature. Required of sophomore BM voice majors.

Requisites: Requires prerequisite course of MUSC 1554 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Voice

MUSC 3642 (3) History of Jazz 1

Utilizing musical examples and analysis, this course studies the distinctly American art form of jazz music from its origins up to the 1950's, including the various traditions, practices, historical events and people most important to its evolution. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Musicology

MUSC 3772 (3) West African Music and Culture in Ghana

Provides hands-on and experiential enrichment for students to interact at several levels with a local community in Ghana. Classroom lectures will be combined with direct participation in drumming and dancing, field trips to participate in festivals and court ceremonies, field trips to kente weaving village, adinkra cloth making, wood carving villages, and museums.

Equivalent - Duplicate Degree Credit Not Granted: MUEL 3772

Requisites: Requires prerequisite courses of MUSC 2782 and MUEL 2772 (all minimum grade D-). Restricted to students with 27-56 credits (Sophomore) non-College of Music majors only.

Additional Information: Departmental Category: Musicology

MUSC 3802 (3) History of Music 1

Surveys Western art music with stylistic analysis of representative works from all major periods through the Baroque. See also MUSC 3812.

Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Musicology

MUSC 3812 (3) History of Music 2

Surveys Western art music with stylistic analysis of representative works from all major periods after the Baroque. See also MUSC 3802.

Requisites: Requires prerequisite course of MUSC 1111 (minimum grade D-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Musicology

MUSC 3997 (1) Junior Recital

To be completed by the second semester of the junior year.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 2997. Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Theses and Recitals

MUSC 4001 (2) New Musical Styles and Practices

Explores a variety of music from the 20th and 21st centuries beginning with Stravinsky and moving through current trends. Involves a mix an analysis/exploration of this music with short composition assignments imitating the different styles. Offered spring of odd-numbered years.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4011 (2) 16th Century Counterpoint

Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5011

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4012 (3) African Music

Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

Equivalent - Duplicate Degree Credit Not Granted: MUEL 4012 and MUSC 5012

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the style. Offered fall only.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4031 (2) Jazz Arranging 1

Study of notation, score layout, transpositions, basic harmonic and melodic analysis, basic chord voicings, and composition for a small and large jazz ensemble. Use of notation software such as Finale or Sibelius. Offered fall semester only.

Requisites: Requires prerequisite course of MUSC 3091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4041 (2) Orchestration

Studies advanced orchestration techniques through score analysis and student projects. Offered fall of odd-numbered years.

Requisites: Requires prerequisite course of MUSC 2071 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4061 (2) Tonal Analysis

Surveys tonal analytical techniques and forms of tonal music, including binary forms, ternary forms, rondo (and others) through study of selected works. Offered spring only.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4071 (2) Post-Tonal Theory and Analysis

Focuses on theory and analysis of post-tonal literature pre-1945. Offered fall of odd-numbered years.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4078 (1) Piano Technician for Pianists

Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5078

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite piano majors.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4081 (3) Introduction to Music Technology

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music.

Equivalent - Duplicate Degree Credit Not Granted: MUEL 4081 and CMDP 3860

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4091 (2) Jazz Arranging 2

Continuation and expansion of studies in MUSC 4031. Survey and analysis of major composers and arrangers of the idiom. Course focuses on creating several arranging projects for a jazz ensembles. Offered spring of odd-numbered years.

Requisites: Requires prerequisite course of MUSC 4031 (minimum grade D-). Restricted to College of Music undergraduate students only.

Recommended: Prerequisite MUSC 3081.

Additional Information: Departmental Category: Theory and Composition

MUSC 4101 (1-3) Theory and Aural Skills Review

Reviews tonal harmony, voice leading, and essential aural skills. Prepares graduate students for more advanced work in music theory. Students may register for aural skills only (1 credit), theory only (2 credits) or both theory and aural skills (3 credits). May not be taken pass/fail. Aural skills section offered fall and spring. Theory section offered spring.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4103 (1) Introduction to Student Teaching

Represents the first half of the professional internship year. Familiarizes students with the schools and music programs in which they plan to student teach. Music placements may consist of elementary and high school, elementary and middle school, or middle school and high school.

Requisites: Requires a prerequisite course of MUSC 4113 or MUSC 4313 or MUSC 4443 (minimum grade C-). Restricted to College of Music undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4106 (2) Guitar Literature

An analytical and historical survey of the repertory of the guitar and its antecedents from the renaissance to the present day.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5106

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4111 (2) Composing at the Computer

Discover strategies and techniques for generating and manipulating sound at the computer. Student projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia. Available to students without prior experience with computer music or composition. Offered fall of odd-numbered years.

Requisites: Requires prerequisite course of MUSC 4081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4112 (3) Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4113 (3) Teaching General Music 2

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental and speech-based arrangements. Offered fall only.

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4121 (3) Topics in Music Technology

Exploration of issues, techniques, and tools of music technology. Topics vary from term to term and may include: interactive systems for performance; teaching and learning; computer music instrument design; digital synthesis and signal processing; music in intermedia, sound design and analysis. Lectures on work sessions will support student projects.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 4081 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4122 (3) Music in Jewish Culture

Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4122

Grading Basis: Letter Grade

Additional Information: Departmental Category: Musicology

MUSC 4133 (3) Student Teaching Practicum

Offers practice teaching under the guidance of a master music teacher.

Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4142 (3) American Indian Music

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5142

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4143 (2) Developing Children's Choirs

Examines the musical skills, teaching techniques and administrative procedures necessary for developing a children's choir. Offered fall term of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5143

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4151 (3) Topics in Music Analysis

Examines critically a specific topic or repertory, such as Song Analysis or Music of Brahms. Uses readings and analyses, with grades to be determined from reading responses, analytical assignments and writing. Offered fall of even-numbered years.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of MUSC 2111 and MUSC 2131 (all minimum grade B).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Theory and Composition

MUSC 4152 (3) East Asian Music

Surveys the development of music in Japan, China and Korea through the in-depth study of particular styles of traditional music. The course emphasizes the study of music and culture, particularly music's relationship to religion, politics, language, literature, dance and theatre.

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology
Departmental Category: Asia Content

MUSC 4153 (1) Percussion Class and Pedagogy

Required of all music education majors. Presents knowledge and skills necessary for music educators to teach young students, including a general understanding of the techniques used in playing and teaching percussion instruments in the school music program. Offered fall only.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4163 (2) Choral Literature for School Ensembles

Examination of literature, materials, and methods appropriate for teaching choral music in secondary schools. Offered fall of odd-numbered years.

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4168 (3) World Music Theories

Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5168

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Recommended: Prerequisite MUSC 1802 or MUSC 2772 or MUSC 2782 or MUSC 4112.

Additional Information: Departmental Category: Theory and Composition

MUSC 4191 (2) Advanced Recording

Study of advanced recording techniques and concepts beyond those covered in MUSC 2091 involving multiple microphones for ensemble concerts and recording sessions within and outside of the College of Music. Offered spring of even-numbered years.

Requisites: Requires prerequisite course of MUSC 2091 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 4193 (1) Student Teaching Seminar

Required for all music student teachers. Addresses topics of concern to beginning teachers including classroom management, interpersonal skills, legal issues, job search strategies and capstone project development.

Requisites: Requires prerequisite course of MUSC 4103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4202 (3) Special Topic in Musicology: Current and Critical Issues

Examination of a specific topic of current or critical interest within areas of music history, ethnomusicology, critical theory and practice across the spectrum of Western, Popular and World Music traditions. Designed as a capstone course for music majors who have completed a full complement of musicology courses. Topics vary from term to term. Instructor consent is required for non-music majors.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Musicology

MUSC 4203 (1) Music Methods Practicum

Provides students with opportunities to observe and practice the use of various teaching techniques and relate them to concepts presented in the methods course. Students consult with the instructor to determine appropriate placements in schools.

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Requires corequisite course of MUSC 4313 or MUSC 4443. Restricted to College of Music (MUSC) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4255 (2) Service Playing Techniques

Study of church music for liturgical and non-liturgical denominations; includes hymn playing, anthem accompaniments, basics of conducting from the organ console and improvisation and selection of organ music appropriate to the requirements of the church year and other special services.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5255

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4285 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the 16th century to the present. See also MUSC 4295.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5285

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4295 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the 16th century to the present. See also MUSC 4285.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5295

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4313 (3) Teaching Choral Music

Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5313

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite MUSC 2103.

Additional Information: Departmental Category: Music Education

MUSC 4325 (2) Keyboard Literature 1

Surveys keyboard music from 1600 to 1830. Offered fall semester of even-numbered years.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4335 (2) Keyboard Literature 2

Surveys keyboard music from 1830 to the present. Offered spring semester of even-numbered years.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4405 (2) Basso-Continuo Accompaniment

Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5405

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 4443 (3) Teaching Instrumental Music

Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5443

Requisites: Requires prerequisite course of MUSC 2103 (minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Education

MUSC 4583 (2) Inclusive Music Classroom

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5583

Requisites: Requires prerequisite courses of MUSC 2103 and MUSC 3133 (all minimum grade C-). Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite MUSC 4113.

Additional Information: Departmental Category: Music Education

MUSC 4608 (1) Advanced Studies in the Alexander Technique

Continues investigation of the benefits of Alexander's principles regarding mind-body awareness begun in MUSC 2608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5808

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 2608 (minimum grade C-). Restricted to College of Music undergraduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 4666 (3) Chamber Music Lit WW/Prc

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 4712 (3) Renaissance Music

Provides a repertory and analysis of polyphonic music, 1400-1600.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5712

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4752 (3) Women in Music

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5752

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4772 (3) History of Opera

Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5772

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 or MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4802 (3) Studies in 20th Century Music

Offers intensified work in history of music in the 20th century. Topics vary from year to year.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5802

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4852 (3) 17th and Early 18th Century Music

Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5852

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3802 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4862 (3) African American Music

Examines the sacred and secular genres of Black American music from folk spirituals to contemporary gospel and hip-hop in their cultural and historical contexts. Examines individual composers and performers in specific historical contexts in order to understand the meanings behind certain Black musical stylistics, sound ideals and aesthetic preferences. Formerly MUSC 2802.

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4872 (3) Late 18th and 19th Century Music

Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5872

Requisites: Requires prerequisite courses of MUSC 1802 and MUSC 3812 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4892 (3) Latin American Music

Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5892

Requisites: Requires prerequisite course of MUSC 1802 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Music (MUSC) majors only.

Additional Information: Departmental Category: Musicology

MUSC 4908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5908

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4957 (1-4) Senior Thesis

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Theses and Recitals

MUSC 4958 (2) Community Performances

Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5958

Requisites: Requires prerequisite course of MUSC 2918 (minimum grade D-). Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4978 (3) Arts Administration & Management

Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5978

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 5988

Requisites: Restricted to College of Music (MUSCU) undergraduate students only.

Recommended: Prerequisite MUSC 2918.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 4997 (1) Senior Recital

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite class of MUSC 3997 (minimum grade D-). Restricted to College of Music undergraduate students only.

Additional Information: Departmental Category: Theses and Recitals

NCMU 1172 (0.3-3) Body Mapping for Musicians

Repeatable: Repeatable for up to 3.00 total credit hours.

NCMU 1177 (0.3-3) Kabuki: A Musical Theater

Repeatable: Repeatable for up to 3.00 total credit hours.

NCMU 1178 (0.3-3) Getting Inside the Music of the Colorado Music Festival

Repeatable: Repeatable for up to 3.00 total credit hours.

Music Education - Bachelor of Music Education (BMusEd)

The Music Education Department's experienced educators teach courses aimed at preparing students for a career in music education, combined with unique programs and opportunities for involvement. The CU Music Education program has resulted in 100 percent job placement for our graduates.

Because of the varying challenges and opportunities associated with teaching music in K–12 school contexts, the undergraduate music education curriculum strikes a balance between specialization and generalization. BME students must demonstrate a sufficiently broad knowledge of the entire music program/curriculum, but also possess the specialized skills necessary to be a successful general music, choir, orchestra or band instructor.

Program Emphases

Four basic curricular options are provided for students pursuing the Bachelor of Music Education degree:

- choral
- choral—general
- instrumental
- instrumental—general

The choral-general and instrumental-general emphases include a larger concentration of course work and field experiences related to elementary general music teaching, while the choral and instrumental emphases involve more specialized course work and field experiences related to the teaching of choir, orchestra or band classes at the secondary level. Within each degree emphasis, students have a limited number of elective credits that may be used to further customize degree work according to their interests and needs.

As first-year students, BME students complete core studies in music and liberal arts. The first music education courses and early field experiences are completed during the sophomore year. During the junior year, students enroll in capstone methods courses and specialized electives that allow for more detailed and sustained study of curricular models, instructional materials, and teaching methods. Internships and full-time student teaching provide culminating experiences during the senior year, as students work in partnership with experienced public school teachers and assume the role and responsibilities of a professional music educator. Internship and student teaching placements are chosen in consultation with faculty advisors and the music education chair.

Dual Degree Program

BMus/BMusEd in Music Performance and Music Education

Qualified music majors who have been approved by the relevant major departments may elect to complete a dual degree in music performance (woodwinds, brass and percussion, strings, voice or jazz emphasis) and music education (instrumental or choral tracks). Requirements for these dual degree programs range from 139 to 148 credit hours, and a minimum of 10 semesters of study (including one semester of full-time student teaching) is typically necessary to complete all requirements.

Requirements

Program Requirements

A minimum of 126 credit hours with a cumulative GPA of 2.75 must be earned for the BME degree, with no grade below C- in a course. In addition to 40 credit hours of teacher education course work and 150 clock hours of early field experience, music education majors complete 24 credit hours in liberal arts disciplines (English composition, literature and arts, mathematics, social sciences, natural sciences) and 62 credit hours in music (music theory and aural skills, musicology and ethnomusicology, applied study, ensemble, keyboard and voice, and conducting). Core requirements in liberal arts and music are designated by the music

education faculty and approved by the College of Music curriculum committee.

Areas of Emphasis

Choral Music Emphasis

Students must take keyboard or voice as the primary applied area, or petition the music education faculty for an exception. A minimum of five of the seven semesters of required ensemble registration must be in a conducted choral ensemble (University Singers, University Choir, Collegiate Chorale or Women's Chorus). For keyboard majors, two semesters of independent accompanying may be applied to the ensemble requirement. Students must be enrolled in a conducted choral ensemble when concurrently enrolled in Conducting 1 (MUSC 3176) and Conducting II (MUSC 3186).

Sample Four-Year Plan of Study

Course	Title	Credit Hours
Year One

Academic Enrichment Programs Education Abroad

CU Boulder Education Abroad offers over 400 approved programs in more than 70 countries around the world. Program options exist for every major and are offered for every term including winter break and summer break (the latter has numerous options of varying lengths and credit amounts). Planning for study abroad varies by major, but it is recommended that you have an initial planning conversation with your Academic Advisor as early as possible. A growing list of over 10,000 pre-approved courses provides course options abroad for various degree requirements. Program costs vary widely and include over 30 programs that are comparable to semester costs for in-state students. Students can use existing financial aid and institutional scholarships for a semester/year abroad, and additional scholarship opportunities exist.

Please see the following links for additional information and resources:

- Click here (<http://abroad.colorado.edu/index.cfm?FuseAction=Programs.AdvancedSearch>) to search for programs by major, location, term, program type, cost and more.

Library Research

Several courses in information access and library research methods are offered to students who wish to explore the structure, organization, retrieval and evaluation of information for their study and career needs.

Course code for this program is LIBR.

LIBR 2000 (3) Research Strategies on the Electronic Campus

Critical examination and practical exploration of computer technologies, digital communication, and electronic information systems and services for new students.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

LIBR 3010 (3) Methods of Electronic Library Research

Exploration of the structure, organization, retrieval, and evaluation of electronic information sources through the formulation of search strategies useful for undergraduate research.

LIBR 3900 (1-3) Independent Library Research

In-depth library research project for upper-division students. Instructor consent required.

LIBR 4029 (1) Art History Research Methods

Learn to expertly navigate art scholarship and be prepared to do thesis-level research. An introduction to the vast array of art historical resources and their uses. Explore advanced techniques for searching both online and offline sources of art information. Master the various modes of art historical research, including finding iconographic, historical, or technical information.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4029 and ARTH 5029

LIBR 4900 (1-3) Independent Library Research

In-depth library research project for upper-division students. Instructor consent required.

Preprofessional Programs

Preprofessional advising resources have been developed at CU Boulder to help undergraduate students, and previously graduated students, prepare for further study at professional schools. CU Boulder does not offer preprofessional undergraduate majors or degrees. Completion

of preprofessional prerequisites does not guarantee admission to a professional school. However, preprofessional advisors are well-equipped to provide information about professional schools within Colorado, and beyond, and can help students to prepare well for further professional study.

Pre-Health Programs

Students can prepare to enter the undergraduate professional health science program in nursing at the Anschutz Medical Campus of the University of Colorado by taking courses on the Boulder campus.

Students whose goals include entering the medical, dentistry, physical therapy, physician assistant, pharmacy or public health programs and schools at the Anschutz Medical Campus, or the veterinary medicine or occupational therapy programs at Colorado State University in Fort Collins, can complete any undergraduate major at CU Boulder. In most cases, these students are required to complete a baccalaureate degree before entering professional school. In fact, a baccalaureate degree is recommended for most health professions.

At the time of application to a professional school, students are judged on several factors, including performance in undergraduate courses. For this reason, no required course may be taken on a pass/fail basis. Some fields require specific preprofessional examinations before application. For most fields, interviews are an essential part of the application process.

In all cases, admission committees are concerned with students' compassion, coping and decision-making abilities, intellectual capabilities, realistic self-appraisal, sensitivity in interpersonal relations and staying power (physical and motivational). In addition to formal course work, students should have experience in people-related activities (especially those related to their field of choice), so that they can be more certain of their motivation for health careers. Also, health-related activities expose premed and other health science hopefuls to various patients and illnesses. The health professions require, or strongly recommend, such experience.

Some of the professional programs at the Anschutz Medical Campus give preference to Colorado residents and residents of WICHE (Western Interstate Commission on Higher Education) states; interested students should check with individual programs for specific policies. Students from other states usually can obtain at CU Boulder the preprofessional courses required by their state schools, but should check with those schools in advance. Students are encouraged to apply to their state school, as well as to other public and private professional schools, to increase their chances of gaining acceptance to the professional program of their choice.

During the preprofessional years, personal intellectual development leads many students to change professional goals. Since there are usually more applicants for these programs than there are spaces available, many students need to pursue alternative goals. Therefore, students should plan college programs to give themselves the greatest flexibility in considering other vocations.

Advising for preprofessional study in the health sciences is conducted through the Preprofessional Advising Office in the University Club. Check the pre-health advising (<http://www.colorado.edu/advising/pre-health>) website for information on prerequisite courses, events, volunteer opportunities, student pre-health organizations, applications and many other useful resources. Students should attend a pre-health advising session at orientation, then begin to follow the Pre-Health Pathway

sequence of meetings early in their undergraduate careers to help plan course work and extracurricular experience in preparation for applying to programs of their choice. Current students and alumni may schedule pre-health meetings through MyCUHub (<http://www.colorado.edu/mycuhub>). The Preprofessional Advising Office offers an extensive array of workshops and informational meetings, as well as a spring Health Professions Information Day.

Pre-Law

Students who plan to apply to law school upon completing their baccalaureate degree do not have to complete any specific course requirements for admission to law school. Instead, they should major in the discipline that best suits their intellectual interests and talents. Pre-law students should seek a rigorous and broad-based education that will ensure them a fundamental understanding of American society and its institutions. Students should become familiar with mathematical analysis and scientific reasoning, and develop excellent oral and written communication skills.

Pre-law advising is available in the Preprofessional Advising Office. In addition, the Preprofessional Advising Office sponsors a fall Law Fair, spring Law Day and a year-long speaker series. Contact the Preprofessional Advising Office in University Club 111 for more information. Check the pre-law advising (<http://www.colorado.edu/advising/pre-law>) webpage for information on events, the student pre-law organization, applications and many other useful resources. Current students and alumni may schedule pre-law advising appointments through MyCUHub (<http://www.colorado.edu/mycuhub>). (<http://aacportal.colorado.edu>)

Presidents Leadership Class

The Presidents Leadership Class (PLC) is a specially designed, top scholar community with both academic and experiential curricula that focus on leadership development through an exploration and honing of our five domains of leadership development (<http://www.colorado.edu/plc/plc-advantage/how-we-develop-leadership>). Skills are developed in interdisciplinary, academic and experiential environments and through exposure to the key industries of Colorado. PLC students are from any school or college participate in the Presidents Leadership Class curriculum as part of their regular course work.

The Presidents Leadership Class is a program of CU Boulder and has a Board of Advocates representing Colorado business, educational, nonprofit and government communities.

Admission and Enrollment

Admission to the Presidents Leadership Class is considered one of the highest honors awarded to incoming University of Colorado Boulder students. Most Presidents Leadership Class students are admitted prior to the beginning of their first year at CU Boulder, however, a maximum of 10 spots are reserved for qualified rising sophomores in a second point of entry. Selection criteria include academic excellence, demonstrated commitment outside of self, leadership potential, uniqueness of contribution to the incoming cohort, humility and grit. Each year, 50 first-year students are enrolled, comprising both Colorado residents and nonresidents. Instructions on how to apply to PLC are available on the PLC website (<http://www.colorado.edu/plc>). The application is part of the University of Boulder Scholarships Application through the Office of Financial Aid and Scholarship Services. The application is due by

February 15th. To access the application, visit the Apply Now (<http://www.colorado.edu/plc/apply-now>) webpage.

Only students who are accepted into the Presidents Leadership Class are eligible to enroll in PLC courses (PRLC) with few exceptions for PRLC 2820 and 3810. Students receive Arts and Sciences core credit in *Ideals and Values* for PRLC 1810; and core credit in *Contemporary Societies* for PRLC 1820.

Academic Program

PLC provides students with unique academic courses, purposeful experiential education and real-life experiences that:

- Support academic and professional excellence
- Grow critical thinking and analytical capabilities
- Develop extraordinary creativity
- Hone abilities of thoughtful implementation
- Cultivate moral reasoning, and instill an ethic of service and character

PLC provides opportunities by uniting the support of the university, local and statewide leaders. The academic curriculum is supplemented by a substantial experiential learning curriculum and professional development opportunities.

For more information on the PLC Curriculum Strategy and the research behind it, visit the Presidents Leadership Class (<http://www.colorado.edu/plc>) website.

Required Courses

PRLC 1810	Ethical Leadership	3
PRLC 1820	Community Issues in Leadership	3
PRLC 2820	Multilevel Issues in Leadership	3
PRLC 3810	Global Issues in Leadership	3
LEAD 4000	Leadership in Context and Emerging Challenges: A Capstone (required for the Minor in Leadership Studies)	4

Total Credit Hours 16

Scholarship Programs and Opportunities

PLC offers many scholarships to fully participating students over the course of their undergraduate career. The first-year award is a merit award of \$1,000 that is awarded upon selection into the program. The first-year scholarship is non-renewable. However, PLC students have the opportunity to apply or be nominated for a number of other scholarships to substantially help fund their undergraduate education upon their second year in the program. Below is a list of available scholarships primary to PLC students. All PLC allocated scholarships are dispersed through the Office of Financial Aid, and are calculated directly against the cost of tuition.

- William A. Douglas Endowment
- FirstBank Scholars
- El Pomar-SLE
- Flanagan & Walker Scholarships
- Hoelscher Memorial Scholarship
- Annabelle K. Lutz Voss Scholars
- David A. Van Landschoot Family Scholarship
- Brian Watson Foundation Scholarship

- Tim Pestotnik Scholarship
- Leo Hill Endowment
- PLC Enrichment Fund Scholarship
- PLC Student Staff Fellowship

Courses

PRLC 1810 (3) Ethical Leadership

Introduces fundamental principles of leadership and ethics. Emphasizes application of the principles for self-development and organizational effectiveness.

Requisites: Restricted to students in the Presidents Leadership Class (PPLC) only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Ideals and Values

PRLC 1820 (3) Community Issues in Leadership

Explores challenges to leadership at the community level such as drug abuse, poverty, decline of infrastructure, care of the aged, etc. Gives particular attention to the development of effective leadership responses to community difficulties at university, city, state, and national levels.

Requisites: Restricted to students in the Presidents Leadership Class (PPLC) only.

Grading Basis: Letter Grade

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

PRLC 2820 (3) Multilevel Issues in Leadership

Studies multilevel issues that originate in organizational settings but carry community and global implications. Encourages students to fully explore the complexity and interrelatedness of issues with a special emphasis on leadership and ethical implications.

PRLC 2930 (1-3) Leadership Internship

Students analyze the leadership styles within a host organization, examine how successfully an organization fulfills its mission and further refine their own theories of what constitutes effective leadership. Students also complete a meaningful project over the course of the internship. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

PRLC 3800 (3) Global Inquiry for 21st Century Leadership

Introduces students to the ways in which leadership and sustainable development theory converge, challenges students to examine these issues in specific contexts around the world, and provides them with practical training in cross-cultural competency and leadership skills.

Recommended: Prerequisite PRLC 1810 or PRLC 1820 or PRLC 2820.

Grading Basis: Letter Grade

PRLC 3810 (3) Global Issues in Leadership

Examines the challenges to leadership posed by major global issues. Problems in the areas of human rights, hunger, disease, large-scale collective violence and environmental deterioration are explored with a special emphasis on the development of effective, long-term leadership strategies. Department enforced prerequisites: PRLC 1810 and PRLC 1820 and PRLC 2820.

PRLC 4010 (3-4) 21st Century Leadership

An advanced course that focuses on critical analysis of leadership principles and techniques. Designed to provide theoretical and hands-on experience for individuals who wish to function in leadership roles at high levels of competence in the workplace and in the civic arena.

Requisites: Requires prerequisite courses of PRLC 1810 and PRLC 1820 (all minimum grade D-). Restricted to students in the Presidents Leadership Class (PPLC) only.

PRLC 4081 (3) Icons of the American Republic

Examines the founding period of the United States through the events, political concepts and individuals depicted in the art exhibited in the U.S. Capitol Building in Washington, D.C. The course includes a visit to the U.S. Capitol Building, the floor of the U.S. House of Representatives, the floor of the U.S. Senate, and an exploration of the legislative process.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 1101 or PSCI 2012 or PSCI 2223 or PSCI 2004.

Additional Information: Departmental Category: American

Reserve Officers Training Corps (ROTC)

Enrollment in Reserve Officers Training Corps (ROTC) programs is open to both men and women, and ROTC lower-level leadership courses are open to all students whether or not they contract with ROTC.

All services provide undergraduate and selected graduate students with the opportunity to combine academic study with a military officer's educational program. The three services conduct courses in their respective areas leading to a regular or reserve commission upon graduation.

Military Programs

- Air Force Aerospace Studies (U.S. Air Force) (p. 854)
- Military Science (U.S. Army) (p. 855)
- Naval Science (U.S. Navy & U.S. Marine Corps) (p. 857)

Air Force Aerospace Studies (U.S. Air Force)

U.S. Air Force ROTC offers several programs leading to a commission in the U.S. Air Force upon receipt of at least a baccalaureate degree.

CU Boulder students who wish to register for AFROTC classes sign up for them through the normal course registration process. AFROTC credit for graduation varies with each college. Students should contact the appropriate college for credit determination.

Scholarship Programs

Air Force College Scholarship Program

Normally a scholarship board is held at the end of each semester for students who have at least one semester of full-time college credit. Prior participation in AFROTC may not be required to compete for these scholarships. Students can compete for scholarships in most academic majors. Students selected for this program receive scholarships that pay up to \$18,000 in tuition, a book allowance, nonrefundable educational

fees and subsistence each month, tax-free. These scholarships are available in all academic disciplines and are two to three years in length.

USAF Medical Programs

Qualified nursing students can compete for nursing scholarships. These scholarships can lead to a career as an Air Force officer, serving as a nurse. Students may also compete for a prehealth designator. If selected, they would receive a scholarship for medical school.

Requirements

Programs

Other programs are frequently available based on current Air Force needs. The unit administrative officer in Boulder (303-492-3128) can discuss the best alternatives. Interested students should make initial contact as early as possible to create the best selection opportunity, as selection is on a competitive basis. There is no obligation until a formal contract is entered.

Standard Four-Year Program

This standard program is designed for incoming freshmen, or any student with four years remaining until degree completion. It consists of three parts: the general military course (GMC) for lower-division (normally freshman and sophomore) students; the professional officer course (POC) for upper-division students (normally juniors and seniors); and the leadership laboratory (LLAB) attended by all cadets. Completion of a four-week summer field training program is required prior to commissioning.

Modified Four-Year Program

Certain undergraduate and graduate students may be eligible for this program. It is offered to full-time, regularly enrolled degree students and requires at least five semesters of full-time college work (undergraduate or graduate level, or a combination). May only be available to students pursuing academic majors in demand. Those selected for this program must complete the field training program during the summer months as a prerequisite for entry into the professional officer course the following fall semester.

Leadership Lab

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer.

Courses

AIRR 1010 (1) Foundations of the United States Air Force 1

One 1-hour lecture and one 2-hour lab per week. Introduces students to the U.S. Air Force and the USAF officer profession. Uses instructor lectures, films and videos, and group activities to examine Air Force issues, officership qualities, and military customs and courtesies. Emphasizes the communication skills necessary for an Air Force officer.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1020 (1) Foundations of the United States Air Force 2

One 1-hour lecture and one 2-hour lab per week. A continuation of AIRR 1010.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 2010 (1) The Evolution of USAF Air and Space Power 1

One 1-hour lecture and one 2-hour lab per week. Studies air power from balloons and dirigibles through the jet age and historically reviews air power employment in military and nonmilitary operations in support of national objectives. Looks at the evolution of air power concepts and doctrine and introduces the development of communicative skills.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 2020 (1) The Evolution of USAF Air and Space Power 2

One 1-hour lecture and one 2-hour lab per week. A continuation of AIRR 2010.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3010 (3) Air Force Leadership Studies I

Two 1 1/2-hour seminars plus one 2-hour lab per week. Provides an integrated management course emphasizing concepts and skills required by the successful manager and leader. Includes individual motivational and behavioral processes, leadership, communication, and group dynamics while providing foundation for the development of the junior officer's professional skills (officership). Emphasizes decision making and use of analytic aids in planning, organizing and controlling in a changing environment. Discusses organizational and personal values (ethics), management of change, organizational power, politics, managerial strategy, and tactics within the context of military organization. Uses actual Air Force case studies throughout the course to enhance the learning and communication process.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3020 (3) Air Force Leadership Studies II

Two 1 1/2-hour seminars and one 2-hour lab per week. Continuation of AIRR 3010. Emphasizes basic managerial processes while employing group discussions, case studies, and role playing as learning devices. Continues to emphasize the development of communicative skills.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4010 (3) National Security Affairs/Preparation for Active Duty

Two 1 1/2-hour seminars and one 2-hour lab per week. Studies U.S. national security policy which examines the formulation, organization, and implementation of national security policy; context of national security; evolution of strategy; management of conflict; and civil-military interaction. Also includes blocks of instruction on the military profession/officership, the military justice system, and communicative skills. Provides future Air Force officers with the background of U.S. national security policy so they can effectively function in today's Air Force.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4020 (3) National Security Forces in Contemporary American Society 2

Two 1 1/2-hour seminars and one 2-hour lab per week. A continuation of AIRR 4010. Includes defense strategy conflict management, formulation/implementation of U.S. defense policy, and organizational factors and case studies in policy making, military law, uniform code of military justice, and communication skills.

Additional Information: Departmental Category: Air Force Aerospace Studies

Military Science (U.S. Army)

The Department of Military Science is a leadership program leading to an officer's commission in the Active Army, Army Reserve or National

Guard in conjunction with an undergraduate or graduate degree. Military science courses supplement a regular degree program and offer practical leadership and management experience. Scholarships are available for those that qualify. Additionally, financial benefits may be available for enlisted soldiers.

The course code for this program is MILR.

Scholarship Programs

College freshmen, sophomores and juniors may be eligible for four-, three- and two-year scholarships, regardless of academic major. Interested students must enroll in Army ROTC and meet eligibility requirements, including an army physical fitness test.

High school scholarship applicants may be eligible for four- and three-year college scholarships. High school students can apply during their junior year and before January 10 of their senior year.

All scholarship recipients receive full tuition and fees, a \$1,200 book allowance and a stipend of \$300–500 per month during the academic year. Students interested in scholarships should contact the enrollment and scholarship officer at armyrotc@colorado.edu, 303-492-3549 or 303-492-6495.

Simultaneous Membership Program

College sophomore and juniors who want additional leadership training, may participate with an Army Reserve or Army National Guard unit as an officer trainee. Students participating in this program earn approximately \$240 in monthly drill pay, plus a monthly ROTC stipend of \$300–500. Additionally, SMP participants receive Army National Guard or reserve tuition benefits of up to \$4,500 per year. Enlisted and prior service students retain their authorized GI benefits.

Army ROTC Course Credit

ROTC is an elective credit in most departments. Individual academic advisors verify if ROTC classes count toward the student's degree.

Registration

Army ROTC classes begin with MILR prefix. Register for classes through the normal course registration process. For more information, visit the the Army ROTC (<http://www.colorado.edu/arotc>) website or contact the enrollment and scholarship officer at CU Boulder at armyrotc@colorado.edu, 303-492-3459 or 303-492-6495.

Requirements

Four-Year Program

For college freshmen, the four-year program consists of two phases: the basic course (freshman and sophomore years) and the advanced course (junior and senior years).

Basic Courses (MSI & MSII)

Basic courses (MSI & MSII) cover Army history and organization as well as military leadership and management. Labs provide the opportunity to develop leadership experience while learning basic military skills. Participating in the basic courses incur no military obligation, except for those receiving an Army scholarship.

Advanced Courses (MSIII & MSIV)

Advanced courses (MSIII & MSIV) cover leadership, tactics and unit operations, training techniques, military law and professional ethics.

Additionally, a four-week summer leadership camp at Fort Knox, Kentucky, is a requirement between the junior and senior year, and is a prerequisite for commissioning. Students enrolled in the advanced courses must have completed the basic courses (or the equivalent) and obtain permission from the professor of military science (PMS).

Two-Year Program

For college students entering as a sophomore, the two-year program consists of the advanced courses, preceded by a four-week summer ROTC cadet initial entry training (CIET) at Fort Knox, Kentucky. Inquiries into CIET should be directed to the Department of Military Science prior to completing the sophomore year. CIET is a paid internship and the academic equivalent to the MS1/MSII basic courses.

Prior service and enlisted soldiers who have completed basic training may be eligible to enroll in the advanced course without attending CIET or completion of the ROTC basic courses. Enlisted soldiers pursuing advanced placement must obtain permission from the PMS.

Courses

MILR 1011 (2) Adventures in Leadership 1

Introduces fundamentals of leadership and the United States Army. Examines its organization, customs, and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing techniques, and some basic military tactics.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 1021 (2) Adventures in Leadership 2

Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 2031 (3) Methods of Leadership and Management 1

Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 2041 (3) Methods of Leadership and Management 2

Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3052 (3) Military Operations and Training 1

Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs.

Recommended: Prerequisite instructor consent.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3062 (3) Military Operations and Training 2

Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience.

Recommended: Prerequisite instructor consent.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 3090 (1) Military Theory and Tactical Leadership

Application of military domain knowledge, small unit leadership skills and education on various subjects germane to military operations. Examination of military tactics, techniques and procedures to better understand how to successfully accomplish multiple military requirements. Instructor consent required.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a corequisite course of MILR 1011 or 1021 or 2031 or 2041 or 3052 or 3062 or 4072 or 4082.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4072 (3) Leadership 1: Adaptive Leadership

Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: discusses personal growth, effective communication, critical thinking, problem solving and ethical leadership.

Recommended: Prerequisite instructor consent.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4082 (3) Leadership 2: Leadership in a Complex World

Develops leaders of character that will excel in a complex, ambiguous and dynamic future operating environment: develops universal leadership attributes such as critical thinking and problem solving, understanding the contemporary operating environment and improved inter-personal dynamics/team building skills.

Recommended: Prerequisite instructor consent.

Additional Information: Departmental Category: Military Science (U.S. Army)

MILR 4840 (1-3) Independent Study

Additional Information: Departmental Category: Military Science (U.S. Army)

Naval Science (U.S. Navy & U.S. Marine Corps)

Scholarship Programs

NROTC offers two-, three- and four-year scholarship programs, and two-year and four-year college (non-scholarship) programs. Navy scholarships may be earned while students are enrolled in the college program. Scholarship students receive tuition and fees, a \$375 book allowance per semester and a \$250 per month subsistence allowance. This subsistence allowance gradually rises to \$400 by the student's senior year. College program students receive a \$350 per month subsistence allowance their junior year and \$400 per month subsistence allowance their senior year in the program.

Naval science (Navy option) scholarship students must complete one year of calculus, physics and English, one semester of American military history or national security policy and a cultural course. Students should check with their naval science instructor to determine specific course offerings that fulfill the above requirements.

Commissioned Service

Opportunities for commissioned service are presently available in the unrestricted line (surface, subsurface, aviation, special warfare and special operations) in the U.S. Navy. Opportunities in ground and aviation specialties are available in the U.S. Marine Corps. Students interested in other programs leading to commissions in either the U.S. Navy or U.S. Marine Corps are encouraged to contact the NROTC unit on campus. All commissioning programs require that the student be working toward, and receive, a college degree.

The Navy also offers a program leading to a regular commission in the Marine Corps.

The course code for this program is NAVR.

Requirements

The number of NROTC credit hours that may count toward degree requirements is determined by the individual colleges. Students should therefore consider their college's policy when formulating their degree plan.

Naval science course work is offered in the fall and spring semesters only.

Required Courses and Semester Credit Hours

Required Courses (11 credits)

NAVR 1010	Introduction to Naval Science	2
NAVR 2020	Seapower and Maritime Affairs	3
NAVR 4010	Leadership and Management	3
NAVR 4020	Leadership and Ethics	3

U.S. Navy Courses (12 credits)

NAVR 3020	Naval Operations and Seamanship	3
NAVR 3030	Naval Engineering Systems	3
NAVR 3040	Weapons and Systems Analysis	3
NAVR 4030	Navigation	3

U.S. Marine Corps Courses (6 credits)

NAVR 3101	Evolution of Warfare	3
-----------	----------------------	---

NAVR 4101 Amphibious Warfare

3

For additional information, visit the Naval Reserve Officers Training Corps (<http://www.colorado.edu/nrotc>) website.

Courses

NAVR 1010 (2) Introduction to Naval Science

Introduction to the naval profession. Instruction emphasizes the mission, organization and warfare components of the Navy and Marine Corps. Included is an overview of officer and enlisted ranks and rates, training, education, Naval customs and courtesies, military justice, leadership and nomenclature. Exposes the student to the professional competencies required to become a Naval/Marine Corps officer.

Additional Information: Departmental Category: Naval Science

NAVR 1840 (1-3) Independent Study

Additional Information: Departmental Category: Naval Science

NAVR 2020 (3) Seapower and Maritime Affairs

Surveys international maritime history and provides a review of American maritime history and policy. Examines American naval involvement in regional and global conflicts, evolution in technology and management, the role of the navies in foreign policy, and the influence of seapower on history.

Additional Information: Departmental Category: Naval Science

NAVR 3020 (3) Naval Operations and Seamanship

Examines the Inland and International Rules of the Nautical Road, including court interpretations, principles of relative motion and vector analysis with the maneuvering board, ship handling procedures, weather, communications, tactical operations, and maritime law.

Additional Information: Departmental Category: Naval Science

NAVR 3030 (3) Naval Engineering Systems

Studies in detail ship propulsion and related auxiliary systems. Emphasizes fossil fuel and nuclear steam and gas turbine systems. Stresses design constraints imposed by unique marine environment.

Additional Information: Departmental Category: Naval Science

NAVR 3040 (3) Weapons and Systems Analysis

Introduces theoretical concepts upon which modern naval weapons systems are designed and constructed. Specific areas of study include physics of underwater sound propagation, pulse radar theory, automatic tracking principles, and fundamentals of missile guidance.

Additional Information: Departmental Category: Naval Science

NAVR 3101 (3) Evolution of Warfare

Traces the development of warfare, focusing on the impact of military theorists and technical developments. Assists students to acquire a sense of strategy, develop an understanding of military alternatives, and see the impact of historical precedent on military actions.

Additional Information: Departmental Category: Naval Science

NAVR 3201 (3) Fundamentals of Maneuver Warfare

Prepares future military officers and other leaders for service by studying modern tactical principles, current military developments and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Naval Science

NAVR 4010 (3) Leadership and Management

Comprehensively studies organizational leadership. Emphasizes motivation, communication, empowerment, and needs of subordinates. Studies the role of professional and personal ethics in organizational leadership.

Additional Information: Departmental Category: Naval Science

NAVR 4020 (3) Leadership and Ethics

Studies the ethics and laws of armed conflict analyzing the leadership responsibilities of officers both in peace and in war. The curriculum focuses first on various moral, ethical and leadership philosophies followed by extensive use of case studies to reinforce the use of ethical decision-making tools. Defines the responsibilities of junior officers within the context of ethical leadership and decision making.

Additional Information: Departmental Category: Naval Science

NAVR 4030 (3) Navigation

Offers theory and practical application in the art of navigation: charts, publications, piloting, dead reckoning, navigation aids and instruments, time, electronic fixing, global positioning system, and voyage planning.

Additional Information: Departmental Category: Naval Science

NAVR 4101 (3) Amphibious Warfare

Surveys the development of amphibious doctrine. Emphasizes the evolution of amphibious warfare in the 20th century and beyond. Explores present-day potential and limitations on amphibious operations, including the rapid force deployment concept.

Additional Information: Departmental Category: Naval Science

Special Undergraduate Enrichment Programs

Special Undergraduate Enrichment Programs include:

- Boettcher Scholars
- Norlin Scholars
- Professional and Academic Conference Endowment (PACE)
- Undergraduate Research Opportunities Program (UROP)
- Top Scholarship Office

The programs offer actively engaged students an undergraduate education that in whole or in part:

- cultivates a deeper sense of interconnectedness and interdependence
- inspires intentional inquiry
- engages questions in academic, professional, public and global contexts
- nurtures students' personal and professional growth
- invites multiple ways of knowing and making meaning
- deepens personal, cultural and social awareness
- honors joy, play, empathy, humor, compassion, spirit, curiosity, and creativity as essential elements of knowing, learning, relating and being

Please see our website (<http://www.colorado.edu/suep>) for more information.

Boettcher Scholars

The Boettcher Scholarship is a merit-based, full-ride scholarship awarded annually to Colorado high school seniors who can apply those funds to any four-year institution in Colorado. With a history of scholars on campus dating from 1952, the University of Colorado Boulder has a large, vibrant Boettcher Scholar community housed in Special Undergraduate Enrichment Programs.

Benefits of Being a Boettcher Scholar

- An on-campus Boettcher Scholar Mentor
- The largest Boettcher Scholar peer community in the state
- The longest-standing Boettcher Scholar Alumni network in the state
- Individual, peer and group mentoring
- Academic, professional and personal support
- Social activities with Boettcher Scholars and SUEP members
- Access to enrichment, research and Top Scholarship advising
- A fifth-year tuition benefit for concurrent degree seekers

Apply

High school students apply for the scholarship directly through the Boettcher Foundation in the Fall of their senior year. Once selected, scholarship recipients have the opportunity to choose which campus they'll attend.

Norlin Scholars

The interdisciplinary Norlin Scholars Program is geared toward students interested in a liberal education. Norlin Scholars develop expertise in their chosen fields through research, deep engagement and self-reflection. Upon graduation, they're in a strong position for whatever comes next: the job market, graduate and professional schools or fellowships.

Benefits of Being a Norlin Scholar

Students can apply as high school seniors for a 4-year scholarship or as second-year college students for a 2-year scholarship. Norlin applicants must apply to CU first, though you needn't be an admitted student.

Benefits of being a Norlin Scholar include:

- a \$5000 scholarship per academic year
- additional funding for enrichment activities like research or study abroad
- small, invigorating courses (NRLN 2000 and NRLN 3500)
- research or creative projects with faculty
- individual, group and peer mentoring
- access to top scholarship advising and guidance
- opportunities for professional training and development
- a stimulating, interdisciplinary peer group

The Norlin Scholars program builds community through shared experiences and support. Explore what it means to be a Norlin Scholar and the scholar support system by looking at our website (<http://www.colorado.edu/suep/scholars/scholar-community>).

Apply

Visit the Norlin Scholars (<http://www.colorado.edu/suep/boettcher-norlin-scholars/norlin-scholars>) website for application information.

Professional and Academic Conference Endowment

PACE provides funding, support and mentoring to qualified undergraduates to present their work at conferences. Conference presentations may be oral presentations, poster sessions, roundtable discussions, or creative or performance pieces. Students from all majors, departments, colleges and schools are welcome to apply for PACE grants.

Aside from receiving funds toward conference expenses, recipients benefit from faculty and peer supported conference preparation and exposure to working professionals and cutting edge scholarship in the field. Additionally, conference presentations:

- Complement classroom learning
- Take undergraduate research to the next level
- Provide a range of professional credentials

Applying for PACE funding

To accommodate the year-round schedule of professional conferences, PACE deadlines are rolling. Consult the PACE website (<http://www.colorado.edu/suep/professional-and-academic-conference-endowment-pace>) for more information.

Undergraduate Research Opportunities Program

CU Boulder has a rich culture for cultivating undergraduates as emerging scholars, artists and practicing researchers. UROP provides consultation services, informational workshops and grants to promote undergraduate research as a high-impact learning practice for student success.

Each year UROP funds hundreds of students who produce new knowledge and creative work in partnership with CU's world-class faculty. We serve students and faculty whose learning and teaching goals include outside-the-classroom enrichment.

In a UROP project, you:

- Explore academic interests *beyond* the classroom
- Get hands-on experience with research or creative production
- Develop student-faculty relationships for professional references
- Acquire academic and professional skills and credentials
- Demonstrate successful grant-writing skills
- Refine your academic and career goals

Applying for a UROP Grant

From development of a research interest or question to completion of an application takes some time. UROP deadlines precede the academic year in which the research or creative work will be undertaken and students apply in partnership with the faculty mentor. Visit the UROP website (<http://www.colorado.edu/suep/about-urop>) for more information.

Top Scholarships

We're here to help you prepare a thoughtful application to some of the most prestigious, nationally competitive scholarships offered, like the Rhodes, Marshall, Truman, and Goldwater, among others. This office helps high-achieving students already enrolled at CU, usually in their sophomore, junior, or senior years. For help with scholarships for incoming freshmen, or to inquire about scholarships already awarded,

please contact The Office of Financial Aid (<http://www.colorado.edu/financialaid>).

What We Provide

- Guidance in selecting a fellowship or scholarship that fits your plans
- Expert advice on scholarship opportunities listed
- Individualized assistance preparing applications, essays, and proposals
- Practice interviews and interview strategies

Please see our website (<http://www.colorado.edu/suep/top-scholarships>) for more information, including benefits of making an application to Top Scholarships (<http://www.colorado.edu/suep/top-scholarships/why-apply>) and how to apply (<http://www.colorado.edu/suep/top-scholarships/applying-0>).

Undergraduate Residential Programs Residential Academic Programs (RAPs)

A number of the residence halls are home to residential academic programs (RAPs), whereby students live in and take special classes in their hall that meet core curriculum and/or other course requirements. All of these programs charge additional \$850 fees per academic year. For detailed information about each RAP, see the Residential Academic Programs (<http://living.colorado.edu/get-involved/raps>) section.

- **Baker RAP** (<http://living.colorado.edu/get-involved/raps-baker>) is designed for freshmen and sophomores in the College of Arts and Sciences interested in the natural sciences and environmental studies.
- **CMCI/Communication RAP** offers 200 first- and second-year students a program to explore many different areas of communication, ranging from processes of face-to-face interaction to the impact of media and technology on daily life.
- **Engineering Honors RAP** provides educational experiences that match the abilities and ambitions of some of the very best students at CU.
- **Farrand RAP** (<http://living.colorado.edu/get-involved/raps-farrand>) offers small seminar courses in the liberal arts taught by award-winning faculty selected to help create a close intellectual and social community. About 400 mostly first-year students from the College of Arts and Sciences participate. The program focuses on the study of the humanities within the larger frame of culture and society.
- **Global Engineering RAP** (<http://living.colorado.edu/get-involved/raps-global-engineering>) prepares engineering students for the new global conditions of the engineering professions through experiencing international culture, mastering a second language and gaining confidence with IT-driven international communication and collaboration.
- **Global Studies RAP** (<http://living.colorado.edu/get-involved/raps-global-studies>) promotes the recognition of global interdependence, encourages the study of foreign languages and international affairs and emphasizes the value of international education. This year-long program connects participants with a peer group of students who have similar interests and goals. The staff is knowledgeable about CU Boulder's many international resources, and the faculty incorporate international work into their teaching and research.
- **Health Professions RAP** accommodates approximately 225 students. This community is ideal for students interested in exploring coursework and career options in the health professions such as

practitioners, researchers or policymakers. Courses offered include a mix of natural science, social science and general education courses appropriate for first- and second-year students interested in study or careers related to health care or health care policy.

- **Honors RAP** (<http://living.colorado.edu/get-involved/raps-honors>) is the residential component of the Honors Program of the College of Arts and Sciences. It promotes and sustains academic excellence within a lively community setting. Students take one, onsite, seminar-style three-credit-hour course each semester. Beyond the classroom, Honors RAP offers a variety of co-curricular and student-led activities that enhance the learning experience. It is open to approximately 335 first-year and continuing honors-qualified students.
- **Leeds Business RAP** (Leeds RAP) is a targeted community that is comprised exclusively of students who are business majors. Leeds RAP seeks to build individuals who are well-rounded, prepared, engaged and equipped to succeed in 21st century workplaces and take roles as global leaders. Students in the program develop supportive relationships with faculty and staff, including an in-house academic advisor, as well as with peer mentors.
- **Libby Arts RAP** (<http://living.colorado.edu/get-involved/raps-libby>) (LRAP) is designed primarily for first- and second-year College of Arts and Sciences students interested in the arts. LRAP offers a curriculum in the arts, including visual arts, theatre and dance, film studies and writing. The program also offers a variety of courses that fulfill university core requirements from a number of disciplines including economics, art history and integrative physiology. In addition to small class sizes in a living and learning environment, co-curricular activities provide a sense of community and a unique opportunity to interact with faculty and LRAP advisors across art disciplines.
- **Pre-Business RAP** (<http://living.colorado.edu/get-involved/raps-pre-business>) is a community of first-year students pursuing a business degree, but have not yet been directly admitted into the Leeds School of Business. The program provides a supportive and preparatory path for students to transfer into Leeds their sophomore year.
- **Sewall RAP** is a co-educational program for first- and second-year students enrolled in the College of Arts and Sciences or the Leeds School of Business who have an interest in the study of history and culture. Its award-winning faculty offer small seminar-style courses and a variety of co-curricular activities and outreach opportunities that emphasize the connections between modern culture and its historical roots.

Living and Learning Communities

Living and Learning Communities (LLCs) (<http://living.colorado.edu/get-involved/llcs>) also enhance the learning environment. Several communities offer themed housing without the formal connection to faculty found with the RAPs.

- **Active Living LLC** offers students in Darley North a living community in which all participants strive to lead an intentionally active lifestyle. Events in the program inspire the holistic development of mind, body and spirit. Ultimately, Active Living participants aim to achieve academic success and fulfillment of their personal needs and goals.
- **Lucile Berkeley Buchanan LLC** provides a supportive, social and communal space for black-identified students and their community allies. Students gain access to artifacts, critical conversation and educational programming that create an inclusive and productive atmosphere within the residence hall.

- **Multicultural Perspective LLC** is a community that provides a safe space for students to talk and learn more about social justice issues through conferences, events and dialogue. This program partners with the Spectrum Living & Learning Community.
- **The Quadrangle Engineering LLC** (<http://living.colorado.edu/get-involved/llcs-quad-engineering>) is comprised of students studying engineering, applied science or mathematics who live in Aden, Brackett, Cockerell or Crosman halls. This program offers residents on-site tutoring, access to a computer lab configured to match that in engineering computer labs, enhanced academic support services, wireless computer access and calculus work groups in residence. An additional fee of \$130 per academic year was charged in 2016–17 to cover support activities (fee is subject to change).
- **Spectrum LLC**, part of the Multicultural Perspective LLC, offers a variety of social and educational activities including leadership opportunities. Spectrum is designed to provide a supportive place for individuals of all sexual identities including gay, lesbian, bisexual, transgender and queer people and their allies. The Spectrum living area has gender-neutral bathrooms.
- **Transfer WEST LLC** (Welcoming Exceptional Students in Transition) is a unique social, academic and resource community just for transfer students. Participants have previously attended other universities or colleges but are new to CU. The program hosts various social events and activities as well as academic advisement and career-oriented programs geared to help transfer students be successful at CU Boulder.

First-Year Interest Groups

During the 2017-18 academic year, CU Boulder will introduce four first-year interest groups (<https://living.colorado.edu/get-involved/figs>), or FIGs. Two programs will live in Libby Hall (<https://living.colorado.edu/content/libby-hall>) and the other two will live in Kittredge Central Hall (<https://living.colorado.edu/content/kittredge-central-hall>). There are no additional fees associated with participating in this program. If you are interested in participating in one of our four FIGs, please select that FIG(s) as your housing preference in the housing application. All housing assignments are done on a first-come, first-assigned process and are based on space availability at the time of application completion. Please note, preferencing a FIG in your housing application does not guarantee that you will be assigned to a FIG.

What is a FIG?

A FIG is an academic community made up of no more than 25 students with similar academic interests who live together in the same residence hall and work closely with a faculty director. FIG students take three courses together during the first semester on campus. FIGs are particularly appropriate for students who are College of Arts & Science Open Option, or interested in exploring several academic disciplines. The courses are anchored in an academic theme and include:

- First Year Seminar (<http://www.colorado.edu/FYS>)
- Two other courses available to all FIG students that fulfill degree requirements and are complementary to the all of the FIG's themes

In addition to taking courses together, students will also participate in co-curricular programs with faculty and peer mentors such as field trips, guest speakers and group meals.

What are the benefits?

FIGs provide both structured and ad hoc mentoring and support from faculty and upper-division peers, as well as focused academic study in an area of interest. Additionally, they aim to develop a community of support as students transition to the CU Boulder academic environment by creating a residential hub where students with similar academic interests can form study groups and maintain a relationship with their faculty director throughout their first year, and potentially throughout their time at CU.

FIG topics and Corresponding First Year Seminars for Fall 2017

1. Approaching Sustainability Through the Arts
 - FYSM 1000: Creative Storytelling of Issues Surrounding Climate Change
2. Social Justice & Media
 - FYSM 1000: Ethics and Social Responsibility
3. Developing Sustainable Communities & Cultures
 - FYSM 1000: Building Sustainable Communities Through Design
4. Sustainability & Environmental Science
 - FYSM 1000: Toxins in our Environment

Students will select two additional courses from a list available to all FIG students prior to building their fall semester schedules.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

GRADUATE CATALOG

Graduate education at the University of Colorado began in 1892. In 1909, the Graduate School was organized with a separate faculty. The mission of the Graduate School is to facilitate and enhance the educational experiences of all graduate students and to guarantee a standard of quality and cohesion across all disciplines, ensuring the continuing integrity and value of a CU Boulder graduate degree. Currently overseeing over 120 graduate programs, the Graduate School is responsible for planning, implementing, and evaluating graduate programs and graduate education policies and procedures.

The Graduate School along with the Graduate Faculty develops and administers programs according to the needs of the campus and in accord with the general standards of excellence and sound academic administration established by the Graduate School and the Graduate School Rules (http://www.colorado.edu/GraduateSchool/policies/_docs/GraduateSchoolRules.pdf). Academic policies governing graduate education are initiated by the faculty in accordance with the Laws of the Board of Regents. The Graduate School Executive Advisory Council, which consists of members of the Graduate Faculty, advises the Dean of the Graduate School and Vice Provost for Graduate Affairs on issues concerning Graduate School policies and programs. The Dean of the Graduate School and Vice Provost for Graduate Affairs reports to the Provost.

The Dean of the Graduate School and Vice Provost for Graduate Affairs also oversees a variety of centers and programs that are not affiliated with any single college. These include the Center for Humanities and the Arts, the Center for STEM Learning, the Center for Native American and Indigenous Studies, the Center for the Study of Origins, and the Program in Environmental Design. The Graduate Teacher Program is a division of the Graduate School.

Admissions

Graduate School admission is handled by individual academic departments; see the specific college, school and program sections for details. For more information, visit Graduate School Admissions (<http://www.colorado.edu/graduateschool/admissions>).

Application Procedures

Students seeking admission to a CU Boulder master's or doctoral program apply directly to the appropriate department. An applicant for admission must present complete application materials that include:

1. The graduate application, available online at Graduate School Admissions (<http://www.colorado.edu/graduateschool/admissions>).
2. Unofficial transcripts for all academic work completed to date.
3. A non-refundable application fee. The fee is currently \$60 for domestic applicants and \$80 for international applicants.
4. Three or four letters of recommendation. Please check with your program to obtain the required number of recommendations needed.
5. Test scores and other materials as required by specific departments.

A completed application must be submitted by the published deadline for the term for which admission is sought. Most departments have an application deadline that is several months before the start of the desired admission term.

Admission Requirements

Regular Degree Students

Qualified students may be recommended for admission to regular degree status by approved programs of the Graduate School provided they meet the following criteria:

1. They hold a baccalaureate degree from an accredited college or university or have done work equivalent to that required for such a degree.
2. They show promise of ability to pursue advanced study and research, as judged by their scholastic record.
3. They have had adequate preparation to enter graduate study in the chosen field.
4. They have at least a 2.75 (on a 4.00 scale) undergraduate GPA (for engineering, 3.00). (Note: Applicants who cannot meet criterion 4 may still secure regular admission if they have completed 9 credit hours of relevant graduate course work with at least a 3.25 average.)
5. They meet additional requirements for admission established by the major department.

Provisional Degree Students

Students who do not meet the requirements for admission as regular degree students may be recommended for provisional degree status by their major department. With the concurrence of the dean of the Graduate School, these students are admitted for a probationary term of either one or two semesters of full-time study (or the equivalent for part-time students). At the end of the specified probationary period, provisional degree students must be either admitted to regular degree status or dismissed from the graduate program. Provisional students are subject to the same standards of performance required of regular degree students, plus any other requirements imposed by the program faculty as conditions of admission.

Credit hours earned by persons in provisional degree status may count toward a degree at CU Boulder.

To meet the standard terms of provisional admission, the student must generally complete 12 credit hours in two semesters (or equivalent for part-time students) with a 3.00 cumulative GPA. Program faculty may recommend additional or alternative conditions as appropriate.

Concurrent Bachelor's/Master's Degree Program

A number of CU Boulder departments offer concurrent bachelor's/master's degrees, which enable CU undergraduate students to pursue undergraduate and graduate programs simultaneously and to receive both degrees in a shorter time period than it would take to pursue them separately.

Highly qualified undergraduate students may be recommended for admission to a concurrent bachelor's/master's degree program at the end of their sophomore year or the beginning of their junior year. Such students are not formally admitted to the Graduate School. Standards for admission as well as eligibility to remain in the program are specified by each department.

Dual Degree Program

The Graduate School, in conjunction with the faculty of each department and the deans of schools and colleges where appropriate, approves dual degree programs that combine previously approved graduate degree programs in two areas or departments.

Qualified graduate students may be recommended for admission to an approved dual degree program upon meeting the qualifications of each graduate program and any special qualifications as outlined by each program's approved guidelines. Minimum standards and qualifications for admission and continuation are specified by each department. Students wishing to complete degrees in more than one department that have no approved dual degree program or interdisciplinary major combination must complete all the requirements for both degrees with no shared or overlapping course work.

Nondegree Students to Regular Degree Status

Students with nondegree status applying to a graduate degree program must complete their application for admission before completing 9 credit hours as nondegree students at CU Boulder.

Former and Suspended Students

Students who were previously admitted to a graduate degree program but who did not complete that degree and who have not been continuously registered at CU Boulder must complete the following steps before being readmitted:

1. Clarify their status with the department to determine their eligibility to return and pursue the same degree.
2. Submit a Graduate Readmit application to the department (departmental approval is required) before enrollment levels are met or deadlines passed for the term in which they expect to return to CU Boulder.

A regular degree student who is dismissed for failure to maintain a 3.00 grade point average is eligible to apply for readmission after one year. Approval or rejection of this application rests jointly with the student's major department and the dean of the Graduate School. The final decision will be made by the dean based on the recommendations of the department.

Students Transferring from Other CU Campuses

Students transferring from another CU campus to CU Boulder must apply to and be accepted by the Boulder campus.

Students Changing Major Departments

Students who want to change major departments must apply to and be accepted by the new department. When adding a second major in an approved interdisciplinary major combination, students should contact their home department for instructions on this process.

Faculty Members

No member of the faculty above the rank of instructor may be working toward an advanced degree from CU Boulder.

Academic Standards & Advising

Academic Standards

Grade Point Average

A student is required to maintain at least a B (3.00) average in all work attempted while enrolled in the Graduate School, and must have at least a 3.00 cumulative average to receive a graduate degree.

Nonacceptable Grades

1. A student who receives a grade of C or below in a course may petition to repeat that course once, provided the course has not been previously applied toward a degree.
2. Courses in which grades below B- (2.70) are received are not accepted for doctoral programs.
3. Courses in which grades below C (2.00) are received are not accepted for master's degree programs or for the removal of academic deficiencies.
4. Courses taken toward the fulfillment of requirements for graduate degrees may not be taken pass/fail.

Student Ethics

Students are expected to adhere to the highest codes of personal and professional ethics. Students who do not adhere to written guidelines regarding academic honesty and/or academic or research ethics may be dealt with according to the appropriate policy documents. Students found guilty of misconduct in any of these areas may have sanctions imposed, or may be dismissed from CU Boulder.

Probation

A student whose cumulative GPA falls below 3.00 is placed on academic probation. The student generally has two semesters in which to raise the cumulative GPA to 3.00 or above. If the student's cumulative GPA is at or below 2.50, a dean's administrative stop is placed on the student's record, and the student may be withdrawn from course work for upcoming semesters. Individual departments may have specific probation requirements.

If, after the two-semester probationary period, the student's cumulative GPA is still below 3.00 or if other conditions placed by the major department or Graduate School are not met, a dean's administrative stop will be placed on the student's record and he or she may be subject to dismissal.

A provisionally admitted student whose GPA falls below 3.00 has a dean's administrative stop placed on his or her record pending a review by the major department and the Graduate School.

Graduate School Advising

Graduate students receive degree specific advising from their academic department. Faculty advisors are assigned to students according to departmental policies.

The Graduate School provides information and guidance to students, staff, and faculty on many issues. These may include general Graduate School rules and policies, registration requirements, committee and general examination requirements, general academic standards, degree requirements which apply to all students, and exceptions to general requirements.

The Graduate Student Services office can advise students regarding graduation requirements, deadlines, and degree conferral, and provides information and advice on other issues at the Dean's Office level.

For general inquiries, contact Graduate Student Services at gradinfo@colorado.edu or call 303-492-8220.

Degree Requirements

Master's Degree Requirements

A student enrolled in a master's program must satisfy the degree requirements of both the Graduate School and the major department. The requirements listed below are the minimum standards of the Graduate School; additional requirements are set forth by the major department.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the Dean of the Graduate School.

Minimum Registration Requirement

Master's degree minimum registration requirements can be met only by full-time registration at CU Boulder for at least two semesters, at least three summer sessions or a combination of at least one semester and two summer sessions/part-time semesters.

For purposes of deciding minimum registration credit hours toward a graduate degree, a student must be registered as a full-time student. One semester of minimum registration credit hours may be earned for full-time registration during the fall or spring semesters or two summer semesters/part-time semesters.

To be a full-time master's student, a student must carry one of the following course loads: a minimum of 5 credit hours of graduate course work, 8 credit hours of combined undergraduate and graduate course work, 12 credit hours of undergraduate course work, at least 1 master's thesis credit hour or at least 1 credit hour of "Master's Candidate for Degree." Full- and half-time standards may be different for students receiving federal or state financial aid. Students should contact the Office of Financial Aid to see if these standards apply. These different standards are for financial aid purposes only.

Degree Requirements

The minimum requirement for the master's degree is 30 credit hours. A student may complete a Plan I (thesis) option, or a Plan II (course work) option. At least 24 credit hours must be completed at the 5000 level or above; these 24 credit hours must include a minimum of 4, but not more than 6, thesis credit hours for those students completing a Plan I degree. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department.

Independent study course work cannot exceed 25 percent of the course work required for the master's degree.

Language Requirement

There is no campuswide foreign language requirement for the master's degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

Master's Thesis

A thesis, which may be research or expository, critical or creative work, is required of every master's degree candidate under Plan I. Every thesis presented in partial fulfillment of the requirements for an advanced degree must accomplish the following:

- represent the equivalent of 4–6 credit hours of work, and
- comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.

The final grade is withheld until the thesis is completed; if the thesis is not finished at the end of the term in which the student is registered, an in-progress (IP) grade is reported.

Candidacy and Graduation

To be granted a master's degree, a student must become a candidate for that degree by filing an Application for Admission to Candidacy with the Graduate School no later than the posted graduation deadlines during the semester in which he or she plans to have the degree conferred. Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

Time Limit

Master's degree students have four years (six years for students pursuing an ME) from the semester in which they are admitted and begin course work to complete all degree requirements. The phrase "all degree requirements" includes the filing of the thesis with the Graduate School if Plan I is followed. Students who fail to complete the degree in this four-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year.

Students who have not completed the degree within their time limit, and who have received approval for an extension, must have any course work completed more than five years prior to the completion of the degree requirements evaluated by their department for relevance and applicability. At the discretion of the department the student may be required to validate these courses as part of the completion of their degree requirements.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Taking a leave of absence does not extend the student's time limit, but may be used as a reason to request an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension.

Comprehensive-Final Examination

Each candidate for a master's degree is required to take a comprehensive-final examination/thesis defense after the requirements for the degree have been substantially completed or to present an approved degree plan which meets the requirements of the field and represents an intellectually coherent graduate education as determined by the major department. The examination/defense may be given near the end of the student's last semester while the candidate is still taking required courses for the degree, provided satisfactory progress is being made in those courses. For students pursuing a Degree Plan Approval option, a final exam is not required. The approved degree plan must be approved by the department chair, graduate director and major advisor on the Degree Plan Approval Form. The Degree Plan Approval option is available only in select departments.

The following rules apply to the comprehensive-final examination:

1. A student must be registered on the Boulder campus as a regular degree-seeking student during the semester the examination is passed.

2. Notice of the examination/defense must be filed by the major department in the Graduate School at least two weeks prior to the examination/defense. The examination/defense must be scheduled no later than the posted deadline for the semester in which the degree is to be conferred.
3. The exam is given by a committee of three graduate faculty members appointed by the department with approval of the dean of the Graduate School. The chair of the committee must have a regular or tenured graduate faculty appointment.
4. The examination, which may be oral, written or both, must cover the thesis (which should be essentially complete), other work completed in courses and seminars in the major field and all work presented for the degree.
5. A student must have an affirmative vote from the majority of the committee members to pass. A student who fails the comprehensive final examination may attempt it once more after a period of time determined by the examining committee.

Graduate Faculty Appointments for Courses and Exams

All courses, 5000-level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact your departmental graduate program assistant for questions concerning these appointments.

Doctoral Degree Requirements

The Doctor of Philosophy (PhD), Doctor of Musical Arts (DMusA) and Doctor of Audiology (AuD) are the highest academic degrees conferred by CU Boulder. The requirements stated below are minimal requirements for all candidates for the PhD degree; additional conditions are found in department announcements. Additional requirements for the Doctor of Musical Arts (p. 1336) are available from the College of Music. Additional requirements for the Doctor of Audiology (p. 1099) are available from the Department of Speech, Language and Hearing Sciences.

A graduate student is responsible for becoming informed about and observing all regulations and procedures required by the graduate program pursued. Ignorance of a rule does not constitute a basis for waiving that rule. Any exceptions to the policies stated in this catalog must be approved by the dean of the Graduate School.

Admission

If a student is admitted to a master's program and wants to continue on to a doctoral program in the same department, they should consult their home department on the proper procedure.

Minimum Registration Requirement

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit hours may be allowed for a master's degree from an accredited institution; however, at least four semesters of minimum registration credit hours, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder.

For purposes of deciding minimum registration credit hours toward a graduate degree, a student must be registered as a full-time student. One semester of minimum registration credit hours may be earned for full-time registration during the fall or spring semester or during two summer semesters. Doctoral students who have not passed the comprehensive examination are considered full time during the spring and fall semesters if they are enrolled for at least 5 credit hours of course work at the graduate level, 8 credit hours of combined undergraduate and graduate credit hours, 12 credit hours of course work at the undergraduate level or at least 1 doctoral dissertation credit hour. DMA students who have not passed their comprehensive exam may also be considered full time if they are taking 1 credit hour of course work numbered 8200–8399 or TMUS 8019. Doctoral students who have passed the comprehensive examination must register for at least 5 doctoral dissertation credit hours to be considered full-time students. DMA students who have passed their comprehensive examination must register for 1 credit hour of course work numbered 8200–8399 or TMUS 8029 to be considered full time. Doctor of audiology students are considered full-time students if they are enrolled for at least 5 credit hours of course work at the graduate level, 8 credit hours of course work of combined undergraduate and graduate credit hours or 12 credit hours of course work at the undergraduate level. Full- and half-time standards may be different for students receiving federal or state financial aid. Students should contact the Office of Financial Aid to see if these standards apply. These different standards are for financial aid purposes only.

Degree Requirements

The minimum requirements for the PhD or DMusA degree are 30 credit hours of course work at the 5000 level or above. Those students pursuing the PhD shall complete a minimum of 30 credit hours of dissertation work beyond the minimum course work requirement. The minimum requirements for the AuD degree are 97 credit hours of course work at the 5000 level or above.

Unless otherwise specified by departmental requirements, all courses taken at the 5000 level or above that were taken for the master's degree at CU Boulder may be applied toward the PhD degree. Course work taken in pursuit of a doctoral degree cannot be applied toward a subsequent master's degree.

Preliminary Examination

Each department determines for itself (by examination or other means) that students who wish to study for the doctoral degree are qualified. The means by which each department makes this evaluation are specified in departmental requirements. Students who are thus evaluated are notified immediately of the results.

Language Requirement

There is no campuswide foreign language requirement for the doctoral degree. The decision regarding the foreign language requirement for each graduate degree is the responsibility of the graduate program.

Dissertation Credit-Hour Requirement

To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. Distribution of those credit hours is as follows:

1. A student may not register for more than 10 dissertation credit hours in any one semester.

2. Not more than 10 dissertation credit hours taken in semesters prior to the semester in which the comprehensive examination is passed may be counted in the 30 dissertation credit hours required for the degree.
3. Not more than 10 dissertation credit hours taken the semester in which the comprehensive examination is passed may be included in the 30 dissertation credit hours required for the degree.

Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination in the field of concentration and related fields.

The following rules apply to the doctoral comprehensive examination.

1. Students must be registered (pass/fail or credit) on the Boulder campus as regular degree-seeking students when they pass the comprehensive examination.
2. Notice of the examination must be filed by the major department with the Graduate School at least two weeks before the examination.
3. The examination is conducted by an examining board appointed by the chair of the major department and approved by the dean of the Graduate School. The board consists of the major advisor and additional members as necessary to a minimum of five. The chair must have a regular or tenured graduate faculty appointment. Successful candidates must receive affirmative votes from a majority of the members of their examination board. A candidate who fails the examination may attempt it once more after a period of time determined by the examination board.
4. The examination, which may be oral, written or both, tests mastery of a broad field of knowledge, not merely formal course work. The oral part is open to members of the graduate faculty.

Admission to Candidacy

A student must formally apply for admission to candidacy for the doctoral degree on forms supplied by the Graduate School upon passing the comprehensive examination. Before being admitted to candidacy a student must earn at least three semesters toward the minimum registration requirement, and pass the comprehensive examination.

Graduation

Students must meet all posted graduation deadlines in order to receive a degree in any given semester.

Continuous Registration Requirement

A PhD student is required to register continuously for a minimum of 5 dissertation credit hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). DMusA students must maintain continuous registration for at least 1 credit hour of course work numbered 8200–8399 (or TMUS 8029). AuD students must maintain continuous registration for appropriate course work in the fall and spring semesters of each year through the semester in which the final exam is passed.

1. A student not required to maintain full-time status and not using campus facilities may claim off-campus status, which allows registration for 3 rather than the minimum of 5 dissertation credit hours. Off-campus status (3 credit hours of dissertation) is

considered part-time. All CU Boulder considerations for part-time status apply.

2. A student who fails to register continuously for dissertation credit hours after passing the comprehensive examination must retake and pass the comprehensive examination in order to regain status as a student in good standing in the Graduate School. The department may require that the student validate course work more than five years old. At its discretion, the department may petition the dean of the Graduate School for a time limit for completion of all degree requirements of up to one year after the retaking of the comprehensive exam. The department must petition the dean of the Graduate School to waive the requirement to retake the comprehensive exam.
3. A PhD student must be registered full time for a minimum of 5 dissertation credit hours during the semester (including summer session) in which the dissertation defense is passed. DMusA students must be registered full time in course work numbered 8200–8399 (or TMUS 8029) during the semester in which the dissertation defense is passed. AuD students must be registered full time for 5 credit hours of graduate level course work or 8 credit hours of combined undergraduate and graduate credit hours during the semester in which the final exam is passed.

Time Limit

Doctoral degree students are expected to complete all degree requirements within six years from the semester in which they are admitted and begin course work in the doctoral program. The phrase "all degree requirements" includes the filing of the dissertation and all accompanying forms with the Graduate School. Students who fail to complete the degree in this six-year period may be dismissed from their program with the concurrence of the major advisor and/or appropriate departmental personnel. To continue, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must be endorsed by the student's major advisor and/or other appropriate departmental personnel and may be granted for up to one year. If the dean of the Graduate School and the department chair/program director cannot agree on whether a student should continue, the Graduate School's executive advisory council makes the final decision.

Students who need to leave CU Boulder for a period of time may apply for a graduate leave of absence for up to one year. Doctoral students who are required to maintain continuous registration may petition for an exception in order to take a leave of absence due to extenuating circumstances. Requests for leave of absence for parental leave do not require a petition. Taking a leave of absence does not extend the student's time limit, but may be used as a reason if applying for an extension.

Students whose registration at CU Boulder is interrupted by military service may apply to the dean of the Graduate School for an extension of time.

Dissertation Defense/Final Exam

After the PhD dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted. For DMA and AuD students, a final examination is conducted in place of the dissertation defense.

The following rules apply to the dissertation defense.

1. A student must be registered as a full-time, regular, degree-seeking student at CU Boulder for a minimum of 5 dissertation credit hours during the semester in which the final examination is passed. DMusA students must be registered full time in course work numbered 8200–8399 (or TMUS 8029) during the semester in which the dissertation defense is passed. Doctor of audiology students should be registered during the final exam for 5 credit hours of course work at the graduate level or 8 credit hours of combined undergraduate and graduate credit hours.
2. Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date.
3. This examination is wholly or partly oral, the oral part being open to anyone.
4. The examination is conducted by a committee appointed by the chair of the major department and approved by the dean of the Graduate School, which consists of at least five persons, one of whom must be from outside the student's major department. Three of the members must be CU Boulder graduate faculty. The chair and outside member of the committee must have regular or tenured graduate faculty appointments. The other committee members must have either regular or special graduate faculty appointments. The chair and a majority of the committee must be present on the Boulder campus for the examination. More than one dissenting vote disqualifies the candidate in the final examination.
5. A student who fails the examination may attempt it once more after a period of time determined by the examining committee.

Dissertation Requirements

A PhD student must write a dissertation based upon original investigation, showing mature scholarship and critical judgment, as well as familiarity with tools and methods of research. The subject must be approved by the student's major department.

1. Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
2. The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
3. The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
4. After the dissertation defense, the student is responsible for submitting the dissertation and signature page on or before the posted deadline during the semester in which the doctoral degree is to be conferred.

The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation credit hours is submitted to the Graduate School.

Sequestration of Dissertations

Dissertations approved by the departments and the Graduate School are released to ProQuest/UMI and kept on file electronically at Norlin Library.

Occasionally, the primary academic advisor, after consultation with the student, may find it necessary to sequester the student's dissertation to protect university rights to intellectual property. The university accepts

the obligation to protect potentially publishable creative works and potentially patentable subject matter from premature public disclosure so as to preserve entitlement to patent protection while the technology is being evaluated. This sequestration should take place only when it is absolutely required and only for the minimum time necessary.

With just cause, the student may request that an embargo be placed on the publication/sale of the thesis for a reasonable amount of time. This request is made upon the electronic submission of the document.

Graduate Faculty Appointments for Courses and Exams

All courses, 5000 level or above, completed to fulfill graduate degree requirements must be taught by members of the graduate faculty. In addition, any faculty member serving on a master's or doctoral examination/defense committee must hold a current graduate faculty appointment. Membership on the university faculty does not automatically constitute an appointment to the graduate faculty. Contact the departmental graduate program assistant for questions concerning these appointments.

Distance Education

Distance Education

The University of Colorado Boulder offers master's degrees, graduate certificates, and individual graduate courses online in several disciplines, including:

- Aerospace Engineering Sciences
- Civil Engineering
- Computer Science
- Electrical, Computer, and Energy Engineering
- Engineering Management
- Interdisciplinary Telecom
- Education
- Applied Shakespeare

CU Boulder's distance technology enables online students to participate live in actual campus courses from afar or to take courses according to their own schedules. A virtual library of over 100 previously recorded graduate courses are accessible for students to take for academic credit with the professor's permission.

Students may enroll in a single course, in a graduate certificate, or in a full master's degree program. Students applying for admission to a degree program may enroll in courses before being accepted, but should apply for admission before finishing a third course. Courses taken before admission are considered transfer credit. A maximum of nine hours of transfer credit will be accepted toward degree requirements once a student is admitted into that program.

For more information, visit the Graduate School (<http://www.colorado.edu/graduateschool>) website, call 303-492-6331 or email cugrad@colorado.edu.

Enrollment & Records

Degrees

Graduate Degrees

The Graduate School of the University of Colorado Boulder offers instruction leading to the following advanced degrees:

- Master of Arts (MA)
- Master of Business Administration (MBA) (through Leeds School of Business)
- Master of Engineering (ME)
- Master of the Environment (MENV)
- Master of Fine Arts (MFA)
- Master of Music (MMus)
- Master of Music Education (MMEd)
- Master of Science (MS)
 - Professional Master of Science in Aerospace Engineering Sciences (MSAES)
 - Professional Master of Science in Civil Engineering (MSCVE)
 - Professional Master of Science in Computer Science (MSCPS)
 - Professional Master of Science in Electrical Engineering (MSEE)
 - Professional Master of Science in Environmental Engineering (MSENV)
 - Professional Master of Science in Mechanical Engineering (MSME)
- Master of Studies in Law (MSL) (through School of Law)
- Doctor of Audiology (AudD)
- Doctor of Musical Arts (DMA)
- Doctor of Philosophy (PhD)
- Juris Doctorate (JD) (through School of Law)

Concurrent Degrees

Concurrent BS/MS, BA/MA, and BA/MS degree programs are offered in several departments. These programs allow a student to receive both a bachelor's and master's degree in five years of study without compromising the academic integrity of either degree.

College of Arts and Sciences

Currently approved concurrent degree programs in the College of Arts and Sciences are offered in:

- Art and Art History
- Chinese/Asian Languages and Civilizations
- Classics
- Ecology and Evolutionary Biology
- Ethnic Studies/Education
- Film Studies/Art History
- French
- German Studies
- Integrative Physiology
- Japanese/Asian Languages and Civilizations
- Linguistics
- Mathematics
- Mathematics/Applied Mathematics
- Physics
- Psychology (cognitive)
- Religious Studies

- Russian Studies
- Theatre

Leeds School of Business

Currently approved concurrent degree programs:

- Accounting
- Finance/Accounting
- Management/Telecommunications

School of Education

Currently approved concurrent degree programs:

- Ethnic Studies/Education

College of Engineering and Applied Science

Currently approved concurrent degree programs:

- Aerospace Engineering
- Applied Mathematics
- Applied Mathematics/Telecommunications
- Architectural Engineering
- Architectural Engineering/Civil Engineering
- Chemical Engineering
- Chemical and Biological Engineering/Chemical Engineering
- Civil Engineering
- Civil Engineering/Architectural Engineering
- Computer Science
- Computer Science/Telecommunications
- Electrical Engineering
- Electrical and Computer Engineering/Electrical Engineering
- Electrical and Computer Engineering/Telecommunications
- Engineering Physics/Physics
- Environmental Engineering/Civil Engineering
- Management/Telecommunications
- Mechanical Engineering

These concurrent degree programs are open only to highly qualified CU Boulder undergraduates. Students are formally admitted at the end of their sophomore year or the beginning of their junior year. They are admitted through the admission procedure of their department and do not go through the normal process of admission to Graduate School. When students have completed the program requirements, they receive both a bachelor's and a master's degree simultaneously. Students wishing to continue studying toward a doctorate must formally apply for admission to the Graduate School. Students interested in a concurrent bachelor's/master's program should inquire in the department.

Dual Degrees

In an environment where there is a rapidly increasing desire for interdisciplinary and professional skills, receiving two master's degrees in complementary fields can be a real asset. Contact the individual departments for details.

Combinations within the Graduate School

- Applied Math/MCD Biology
- Audiology/Speech, Language and Hearing Sciences (both through the Department of SLHS)
- Engineering Management/Aerospace Engineering

- Engineering Management/Computer Science
- Engineering Management/Electrical Engineering
- Engineering Management/Mechanical Engineering
- Engineering Management/Telecommunications
- Music (two areas)
- Religious Studies/Asian Languages/History (any two)

Combinations with MBA

- Anthropology/MBA
- Art and Art History/MBA
- Computer Science/MBA
- Environmental Studies/MBA
- German Studies/MBA
- Telecommunications/MBA
- Theatre/MBA

Combinations with Law

- Business Administration/Law
- Environmental Studies/Law
- Juris Doctor/Bachelor of Laws with the University of Alberta faculty of Law, Canada
- Medicine/Law
- Public Administration/Law
- Telecommunications/Law
- Urban and Regional Planning/Law

Certificates

Graduate students may pursue formal certificates in a variety of academic or interdisciplinary subjects. Each certificate program has unique requirements. Degree-seeking students who have been verified to have completed certificate requirements will have the certificate/s posted to their academic records at the time of graduation. Non-degree students who are approved to pursue select certificate programs must be admitted through Continuing Education.

Registration

New Students

Registration procedures are sent to new graduate students when they confirm their intent to enroll. Please see the university's Registration & Enrollment (p. 20) section.

Late registration is held only if enrollment levels have not been reached. Graduate students (including candidates for degrees and students taking only thesis credit hours) who fail to complete registration and pay fees during regular registration may be charged a late registration fee.

Intercampus Registration

Boulder campus students unable to obtain courses required for their degree program on the Boulder campus may register for up to two courses or 6 credit hours, whichever is greater, on another University of Colorado campus. The course work must be required for their degree program; they must have their dean's permission; they must be enrolled for at least one course on the Boulder campus; and enrollment levels must not have been reached on the other campus. Contact the Office of the Registrar for additional information.

Reciprocal Exchange Agreement Program

Reciprocal registration enables University of Colorado graduate students to attend classes at other Colorado institutions, including Colorado School of Mines, Colorado State University and the University of Northern Colorado. For more information, contact the Office of the Registrar.

Withdrawal

Please see the university's Registration & Enrollment (p. 22) section.

Graduate Course Load

For financial aid full time and half time course-load requirements, which are different than those set by the Graduate School, graduate students should consult the Office of Financial Aid (<http://www.colorado.edu/financialaid>) website.

For enrollment verification and academic purposes, full-time status is determined by university policy. Typically in the fall and spring semesters, full time status is: 5 credit hours of graduate course work, 8 credit hours of combined graduate/undergraduate course work, 12 credit hours of undergraduate course work or a varying number of thesis/dissertation credit hours, depending upon the student's status. Summer course load requirements vary. For requirements, visit the Graduate School (<http://www.colorado.edu/GraduateSchool>) website.

Graduate students may register for a maximum of 15 credit hours per semester toward a degree during the fall and spring semesters.

Credit Policies

No Credit

Course work to be applied toward an advanced degree may not be taken for no credit (NC). Courses taken for no credit cannot be used toward the minimum credit load requirement for full-time or half-time status.

Pass/Fail

No course work to be applied toward an advanced degree may be taken pass/fail.

Transfer Credit

Transfer credits from accredited institutions are accepted by CU Boulder only after approval by the department chair/program director and the dean of the Graduate School, and under conditions outlined below. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system or credits earned as a nondegree student within the CU system. Students seeking a degree from CU Boulder must complete the majority of their course work while enrolled as degree-seeking students.

The following rules apply to transferring credit to CU Boulder graduate programs:

- The maximum amount of work that may be transferred to CU Boulder depends upon the graduate degree sought (see below; individual departments may have more restrictive limits).
- Work already applied toward a graduate degree received from CU Boulder or another institution cannot be accepted for transfer toward another graduate degree of the same level at CU Boulder. In addition, work completed for a doctoral degree may not be applied toward a subsequent master's degree. Extension work completed at another institution cannot be transferred, and correspondence work, except to make up deficiencies, is not recognized.

- All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer course work that is to be applied to a graduate degree at CU Boulder and was completed more than five years prior to being accepted to the program will be evaluated by the major department as to current relevance and applicability to the degree requirements. At the discretion of the department, a student may be asked to validate transfer credits prior to approval.
- Credit may not be transferred until the student has completed 6 credit hours of graduate course work as a regular, degree-seeking student at the Boulder campus with a 3.00 GPA. Transferred credits do not reduce the minimum registration requirement, but may reduce the amount of work to be done in formal courses.
- Excess undergraduate credits from another institution may not be transferred to the CU Boulder Graduate School.

Maximum Transfer Credits Accepted (By Degree)

MA, ME, MS, MMus or MMusEd	9
MFA	18
DMA, PhD, or AuD	21
AuD students with MA and audiology certification	30

Graduate Credit for CU Boulder Seniors

With the exception of students enrolled in a concurrent bachelor's/master's degree program, seniors at CU Boulder may earn graduate credit for a limited amount of graduate-level work (up to 9 credit hours), provided such work is completed with a grade of B or above in course work at CU Boulder; comes within the five-year course time limit; has not been applied toward another degree; and is recommended for transfer by the department concerned, and such transfer is approved by the dean of the Graduate School.

Student Finances

Expenses

Confirmation Deposit

All new students (in-state, out-of-state and international) must confirm their enrollment at the university by official notification and deposit of \$200. The deposit is nontransferable and must be paid by all students, regardless of financial aid awards. Students who have paid the deposit and who decide not to attend CU Boulder forfeit their deposit. Students who submit deposits after enrollment levels have been reached will not be accepted, and their deposits will be returned.

The confirmation deposit is not credited toward tuition and fees. It is refunded when a student graduates or officially withdraws from CU Boulder within established dates and guidelines after paying any outstanding university obligations. Students should update their direct deposit bank account information before they graduate or withdraw to be sure they receive their refund.

Estimated Expenses

Expenses for students attending the University of Colorado Boulder vary depending on program of study, state residency (tuition classification), personal needs and individual interests. The following estimates on the Bursar's Office website are based on 2017–18 rates:

University-billed Cost Estimates for Colorado Resident Graduate Students (<https://bursar.colorado.edu/tuition-fees/annual-cost-estimate/graduate-colorado-resident>)

University-billed Cost Estimates for Nonresident/International Graduate Students (<https://bursar.colorado.edu/tuition-fees/annual-cost-estimate/graduate-nonresident-international>)

Notes:

- Residency classification (<http://www.colorado.edu/registrar/students/state-residency>) for tuition is determined by Colorado state law.
- Does not include one-time new student fee or mandatory university-sponsored health insurance. See health insurance requirement (p. 24).
- For detailed descriptions of tuition and fees, visit the Bursar's Office (<https://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets>) website.
- Students planning to attend summer session can visit the Bursar's Office (<https://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets/#sum17>) website for summer rates.
- Zero or fractional credit is treated as one hour in assessing tuition and fees. Tuition for no-credit (NC) courses is the same as for courses taken for credit.
- Students simultaneously enrolled in programs leading to two different degrees will be assessed tuition for the college or school with the higher tuition rate.

Additional costs such as transportation, medical and personal are not charged on the university bill but should be considered for planning purposes. The Office of Financial Aid provides budget examples (<http://www.colorado.edu/financialaid/cost/example-aid>) which may help you plan for other costs.

Tuition and fees are approved annually by the Board of Regents. Visit the Bursar's Office (<https://bursar.colorado.edu>) website for current rates.

Online Bills

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (<https://bursar.colorado.edu/payments/payment-policies/tuition-fee-agreement-and-disclosure>).

The university bill includes tuition, mandatory fees, course and program fees, optional fees, student health insurance (see health insurance requirement (p. 24)) and other direct-university costs for one semester at a time. Textbooks and supplies up to \$1,500 from the CU Book Store can be charged to the bill. Adjustments made throughout the semester will appear immediately on the student account (e.g. health insurance waiver, dropping or adding courses, etc.). Additional costs such as transportation, medical and personal are not charged on the university bill but should be considered for planning purposes.

Bills for fall are available in mid-August. Spring bills are available in mid-January. Emails are sent to students' colorado.edu addresses and to authorized payers. Email is the official means of communication at CU Boulder. Failure to receive an email notification of the bill does not relieve any student of responsibility for payment by the published deadline. Students and authorized payers can log in to MyCUInfo (<https://mycuinfo.colorado.edu>) and CUBill&Pay (<https://quikpayasp.com/cu/boulder/tuition/authorized.do>) at anytime to view and pay the bill.

Authorized Payers

Bills are online only. Students access the bill through MyCUInfo. Family members (spouses, parents, etc.) do not automatically have access to see the bill due to federal privacy laws (<http://www.colorado.edu/registrar/students/records/ferpa>). Students must authorize payers (<https://bursar.colorado.edu/billing/cubillpay/parents>) in order to provide them with access to view and pay the bill. Students can authorize up to five people. Authorized payers access the bill through CUBill&Pay. Students are ultimately responsible for payment of the bill.

Authorized Payer access is separate and distinct from CU Guest Access. If someone is helping pay tuition and fees on your behalf, we recommend granting both.

Payments

Payment due dates are listed on the bill and on the Bursar's Office (<https://bursar.colorado.edu/billing/due-dates>) website. Payment is due by 5 p.m. Mountain Time on the due date or 11:59 p.m. if paying online. Learn about exceptions for weekends and holidays (<https://bursar.colorado.edu/billing/due-dates/#important>).

Payment Methods

We encourage online payment from a traditional U.S. checking or savings account (electronic check or eCheck) in order to avoid paying a nonrefundable 2.75 percent service fee charged by NelNet Business Solutions for all credit and debit card transactions. Paying by eCheck is secure, fast and free.

We accept American Express, MasterCard, Visa and DISCOVER. A nonrefundable 2.75 percent fee applies to all credit and debit card transactions.

International payments (bank and wire transfers) can be made using Flywire. For more information about Flywire, visit the International payment (<https://bursar.colorado.edu/payments/payment-methods/international>) webpage.

Learn about other payment methods on the Bursar's Office (<https://bursar.colorado.edu/payments>) website.

Payment Plans

Optional payment plans are available for students and authorized payers to pay tuition and fees over the course of the semester. For more information, visit the Payment Plans (<https://bursar.colorado.edu/payments/payment-plans>) webpage.

Also see the Policies (p. 873) section.

Tuition and Fee Policies

Add/Drop Tuition Adjustment

Adjustment of tuition and fees is made accordingly based on dates in the Add/Drop Calendar (<http://www.colorado.edu/registrar/students/academic-calendar/add-drop-calendar>).

Concurrent Bachelor's/Master's Degree Programs

The Graduate School, in cooperation with the other colleges and schools, has instituted a concurrent bachelor's/master's degree option.

Students should talk with specific departments regarding programs offered and verification of the following statements:

1. Students who complete the requirements for the concurrent bachelor's/master's degree receive both degrees simultaneously.

2. Students admitted to concurrent programs may register for graduate courses before they receive a bachelor's degree.
3. Students admitted to bachelor's/master's programs will pay tuition according to their undergraduate/graduate status throughout the five to six years required to complete the concurrent bachelor's/master's degrees. Graduate students are assessed graduate tuition and fee rates and if receiving financial aid are considered "independent" once reaching graduate status.
4. Students admitted to concurrent degree programs are regarded as undergraduate students for the purposes of receiving financial aid until they are advanced to graduate status. Students pursuing a concurrent bachelor's/master's degree are automatically changed to graduate status after the completion of 130 credit hours (or 145 credit hours for a student in the College of Engineering and Applied Science). All credits earned at CU (including incomplete or in-progress grades), as well as transfer and AP credit are included in the total credit-hour limit for undergraduate status.

Credit and Debit Card Service Fee

A nonrefundable 2.75 percent service fee charged by NelNet Business Solutions applies to all credit and debit card transactions. To avoid paying this fee, we encourage payment from a U.S. checking or savings accounts (electronic check or eCheck).

Dispute Rights

To dispute tuition and mandatory fee charges, you must make a formal appeal to the Tuition Dispute Committee by the end of the semester (last day of finals). Disputes will only be considered under extenuating circumstances, such as university error, recent medical condition, immediate family emergency, recent unanticipated financial problems and verified nonattendance. Official documentation must be provided to substantiate the circumstances. Complete a tuition dispute form and return the form, your statement and official documentation to the Bursar's Office Student Billing Department, Regent Administrative Center, 43 UCB, Boulder, CO 80309-0043, 303-492-5381 or bursar@colorado.edu. If you disagree with the charges and fail to avail yourself of the dispute process by the end of the semester, you will have been deemed to have waived your right to dispute the charges. For additional information on the dispute process, see Tuition Dispute (<https://bursar.colorado.edu/billing/tuition-dispute>).

Failure to Make Payment

Failure to make the required payment in accordance with the scheduled payment deadline may result in any or all of the actions described below.

A financial hold may be placed on your student record and remain until the balance is paid in full. You will not be able to:

- Adjust your current schedule (drop or add classes).
- Register for future classes.
- Receive transcripts.
- Receive a diploma or certification materials.
- Be re-admitted.

A late payment charge is assessed once per semester based on the amount due:

Balance Due and Late Charge

Balance Due	Late Charge
\$1.00-99.99	\$5.00
\$100.00-299.99	\$10.00

\$300.00-499.99	\$20.00
\$500.00-699.99	\$30.00
\$700.00-899.99	\$40.00
\$900.00 and over	\$50.00

In addition, finance charges of one percent (1%) per month are assessed on the unpaid principal balance. Finance charges are calculated by applying the periodic rate of one percent (1%) per month (annual percentage rate of 12%) to the unpaid principal balance less any payments or credits made.

After the end of the semester, past due accounts are referred to the university's Student Debt Management department (SDM) for collection. Students will have an opportunity to establish a university-approved repayment agreement. Establishing a repayment agreement does not result in release of financial holds.

If the balance is not paid or a university-approved repayment agreement does not exist after six months, Colorado law requires the university to place all delinquent accounts with a private collection agency at which time the delinquency is reported to national credit bureaus.

Student accounts referred to an outside collection agency may incur collection agency costs, expenses and fees. Such collection costs, expenses and fees may include percentage-based fees charged to the university by the collection agency, including percentage-based fees of up to 30 percent of the debt collected. Any collection costs stated above are charged in addition to the principal, fees and interest due on the student's account. The student may be responsible for reasonable attorneys' fees and court costs associated with collecting or enforcing payment on the past due account as allowed under Colorado law. Pursuant to Colorado Revised Statutes § 23-5-115, in the event the student defaults on the amount owed to the university, the university may certify to the Colorado Department of Revenue information required for the recovery of past due debt.

Nondegree Students

Nondegree students enrolled in undergraduate courses are assessed tuition at the undergraduate student rate. Nondegree students enrolled in graduate courses are assessed tuition at the graduate student rate. Nondegree students enrolled in both graduate and undergraduate courses are assessed tuition at the undergraduate student rate.

Returned Payments

A \$20 fee is charged for all payments returned due to insufficient funds, closed account, or payment stopped (regardless of the amount). A \$30 fee is charged by NelNet Business Solutions for returned payment plan payments. In addition, late and finance charges may be assessed and certified funds may be required when you make payment. A financial hold may also be placed on your account and you may be liable for collection costs and attorneys' fees as allowed by Colorado laws.

Payments are most often returned because deposits have been held. To avoid charges and penalties, call your bank to guarantee availability of funds.

Students Registered on More than One Campus

Students registering for courses on more than one campus of the university during a single semester pay tuition and fees to each campus at the rate appropriate to the number of credits for which they are registered on that campus. Students may be eligible to use the

concurrent registration option, in which case they pay the tuition rate of their home campus for the total hours enrolled at all campuses.

Tuition and Fee Agreement and Disclosure

Any student who completes registration agrees to pay CU Boulder according to the payment terms in the Tuition and Fee Agreement and Disclosure (<https://bursar.colorado.edu/payments/payment-policies/tuition-fee-agreement-and-disclosure>).

Tuition Classification

Students are classified as residents, nonresidents or international nonresidents for tuition purposes on the basis of answers provided on their application for admission and other relevant information. For more information, go to Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency>).

Withdrawal Policy Regarding Tuition and Fees

Students who pay the \$200 confirmation deposit and register for classes for any given semester are obligated to pay full tuition and fees for that semester, unless they officially withdraw from the university by published deadlines.

Tuition and fee obligations for students withdrawing from fall or spring semesters:

- Continuing students: Students who withdraw during the full-refund periods will have their confirmation deposit refunded unless there are any outstanding charges.
- New and readmitted students: New, readmitted and transfer students are not eligible for a refund of the confirmation deposit.

Deadlines to withdraw with no financial penalty vary by semester but occur about ten days before the first day of instruction. For the current refund and assessment schedule, visit the Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu>) webpage.

If students withdraw after the deadline to withdraw without being assessed a financial penalty, but before 11:59 p.m. on the third Wednesday of instruction, they are assessed a \$200 withdrawal processing fee. The confirmation deposit is automatically credited toward the withdrawal fee.

After the third Wednesday of instruction (the first drop deadline), there are three additional assessment periods.

- From the third Wednesday of instruction through the fifth Wednesday, students will be charged 40 percent of total tuition (not including the portion of tuition paid by College Opportunity Fund (COF) for in-state undergraduate students) and mandatory fees (CUSG student fees, athletic fee and capital construction fee).
- After the fifth Wednesday of instruction through the seventh Wednesday, students will be charged 60 percent of total tuition (not including the portion of tuition paid by COF for in-state undergraduate students) and mandatory fees (CUSG student fees, athletic fee and capital construction fee).
- After the seventh Wednesday of instruction, tuition will not be adjusted. In the case of extenuating circumstances (university error, recent medical condition, immediate family emergency, recent unanticipated financial problems or verification of non-attendance), students may dispute tuition and mandatory fee charges through the Bursar's Office. COF credit hours are expended and not refunded for withdrawals after the published deadline.

To comply with federal financial aid regulations, financial aid recipients' loan and scholarship awards may be adjusted.

Students should visit the Withdraw from CU (<http://www.colorado.edu/registrar/students/withdraw-cu>) webpage for the most recent information, as the Board of Regents reserves the right to revise this schedule at any time. Refer to the Summer Session (<http://www.colorado.edu/summer>) website for information on the withdrawal policy and refund schedule for summer terms.

Students who do not pay the full amount due the university at the time of withdrawal must make arrangements for payment with the Student Debt Management department in the Bursar's Office. All withdrawals are handled through the Office of the Registrar.

Funding for Graduate School

CU Boulder administers various forms of financial assistance for graduate students: fellowships, traineeships, scholarships, research and teaching assistantships and awards from outside agencies.

Financial Aid

The University of Colorado offers several types of financial assistance for graduate students who demonstrate financial need. Students apply for assistance by submitting a financial aid application (the FAFSA) as soon as possible after January 1.

Colorado residents may be eligible for the Colorado Graduate Grant program and the Graduate Fee Grant program. Both are automatically considered with the FAFSA application.

Graduate students may apply for long-term loans through the Stafford Loan (formerly GSL) program or the Perkins Loan program (formerly the National Direct Student Loan) and for part-time jobs through the college work-study program.

Graduate Part-Time Instructors and Teaching Assistants

Many departments employ graduate students as graduate part-time instructors (GPTIs) or as teaching assistants (TAs). GPTIs must possess a master's degree or the equivalent and have demonstrated competence in classroom teaching. Teaching assistants are not required to have previous teaching experience. In order to be eligible to be a GPTI or a TA, one must be a full-time enrolled graduate student, with a cumulative GPA of at least 3.00. Compensation is based on the percentage of time worked, and includes a tuition waiver and partial insurance benefit.

Research Assistants

In many departments, research activities provide opportunities for graduate students to work part time as research assistants. All research assistants must maintain a cumulative GPA of at least 3.00 and be full-time regularly enrolled graduate students. Compensation is based on percentage of time worked and includes a tuition waiver and partial insurance benefit.

Other Funding Opportunities

Graduate Students are encouraged to seek funding by applying for fellowships and awards. While there are a number of fellowships and grants that are funded through the University, the majority are awarded by governmental agencies, private foundations and corporations.

A partial list of extramural and University fellowships can be found on the Graduate School's website (<http://www.colorado.edu/graduateschool/graduate-student-funding>). Students should also consult

with directories of funding sources, such as the Annual Register of Grant Support and The Grants Register, both available in community or university libraries.

Colleges & Schools

Arts & Sciences

The College of Arts & Sciences is the liberal arts college at CU Boulder. Its mission is to provide an outstanding liberal arts education for its undergraduates, cutting-edge graduate education and world-class research, scholarship and creative work. In addition to gaining the knowledge and skills of their areas of study, students learn how new information is acquired and can participate in original research and creative work with individual faculty members.

The college offers a wide variety of fields of study, with nearly 50 undergraduate majors. The environment and advantages of a small liberal arts college are created through "academic neighborhoods" in which students can meet and interact with other students and faculty in small group settings. In addition, more than 60 percent of undergraduate classes are small, with 25 or fewer students.

As the liberal arts college of CU Boulder, the College of Arts and Sciences has several goals in the education of its students:

- Educate students for careers and a productive life. Arts and sciences students gain the most current knowledge and skills in their major fields of study. In addition, they learn how to acquire new skills to contend with-and lead-the changes that will occur in the decades to come. Education for a productive life also requires that students learn how to analyze situations, solve problems and speak and write effectively.
- Provide students with a well-rounded education. Arts and sciences students acquire a broad knowledge and an integrated understanding of art and music, great literary works, philosophy, history and politics, the social world, science and technology. They learn how to critically evaluate and think about morals, ethics and values. The core curriculum and breadth requirements give students a broad, liberal-arts education that develops the whole person, not just the specialist.
- Educate citizens who can think for themselves, understand the rapidly changing world and make wise choices within a democratic system.
- Impart a love of learning so that students can continue to grow throughout life.
- Teach ways of thinking about and approaching new problems. For some students, this will enable them to further advance knowledge and scholarship in the academy. For all students, this is important for enriching their lives.
- Prepare students to help enrich the lives of others. Arts and sciences graduates become lifelong resources for their families, neighbors, friends and coworkers.

The college is also dedicated to outstanding graduate education. Advanced degrees are offered by nearly every academic department in the college, and the PhD is offered in approximately 30 different disciplines. In addition, an increasing number of departments offer combined bachelor's/master's degrees that can be earned in five years. Graduate training focuses on teaching and research careers as well as on professional careers in the public and private sector.

The strength of the College of Arts and Sciences comes from its outstanding faculty. In addition to being dedicated teachers, they are active scholars in disciplines throughout the arts and humanities, social and behavioral sciences, biological sciences and physical and mathematical sciences. They are the recipients of numerous national awards and honors for their research, scholarship and creative work. Faculty and staff of the College of Arts and Sciences join together to create an intellectual community of students and scholars to discover, critically examine, integrate, preserve and transmit knowledge, wisdom and values.

Programs of Study

Anthropology

The Department of Anthropology offers graduate programs leading to the Master of Arts and Doctor of Philosophy degrees with specializations in the subdisciplines of archaeology, biological anthropology and cultural anthropology. Students who acquire an advanced degree are equipped to transmit to others the knowledge, central principles, theories and research methods that have been developed in the discipline of anthropology.

Successful candidates will have a reasonable knowledge of the historical development of general anthropological concepts and theory and of directly relevant concepts and knowledge from related disciplines. In addition, successful candidates for the doctoral degree are expected to carry out and report original anthropological research within a circumscribed area of specialization. They are also expected to be capable of teaching the precepts of their specialty and of guiding future candidates for the doctoral degree through a program of research training.

Course code for this program is ANTH.

Master's Degree

- Anthropology - Master of Arts (MA) (p. 880)

Doctoral Degree

- Anthropology - Doctor of Philosophy (PhD) (p. 883)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bamforth, Douglas (https://experts.colorado.edu/display/fisid_101027)
PhD, University of California-Santa Barbara

Bernstein, Robin Miriam (https://experts.colorado.edu/display/fisid_152968)
Associate Professor; PhD, University of Illinois at Urbana-Champaign

Cameron, Catherine M (https://experts.colorado.edu/display/fisid_108375)
Professor; PhD, University of Arizona

Cool, Alison Collier (https://experts.colorado.edu/display/fisid_154599)
Assistant Professor; PhD, New York University

Professor Emeritus

Williams, Bianca Christel (https://experts.colorado.edu/display/fisid_147342)
Associate Professor; PhD, Duke University

Courses

ANTH 5000 (3) Quantitative Methods in Anthropology

Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4000

Requisites: Restricted to graduate students only.

ANTH 5020 (3) Explorations in Anthropology

Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ANTH 5045 (3) Introduction to Museum Anthropology

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and MUSM 5045

Requisites: Restricted to graduate students only.

ANTH 5060 (3) Nutrition and Anthropology

Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4060

Requisites: Restricted to graduate students only.

ANTH 5070 (3) Methods in Biological Anthropology

Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4070

Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 5110 (3) Human Evolutionary Biology

Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4110

ANTH 5120 (3) Advanced Biological Anthropology

Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4120

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ANTH 5125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective

Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4125

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ANTH 5129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and

ARTH 4129 and CLAS 4129 and CLAS 5129

ANTH 5130 (3) Advanced Osteology

Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4130

ANTH 5150 (3) Human Ecology: Biological Aspects

Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems.

ANTH 5160 (3) Early Hominin Paleoecology

Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4160

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ANTH 5170 (3) Primate Evolutionary Biology

Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4170

ANTH 5210 (3) Southwestern Archaeology

Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4210

ANTH 5220 (3) From Olmec to Aztec: The Archaeology of Mexico

Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4220

Requisites: Restricted to graduate students only.

ANTH 5224 (3) Archaeology of the Maya and Their Neighbors

Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4224

Requisites: Restricted to graduate students only.

ANTH 5240 (3) Geoarchaeology

Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4240

Requisites: Restricted to graduate students only.

ANTH 5270 (3) Plains Archaeology

Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4270

ANTH 5330 (3) Human Ecology: Archaeological Aspects

Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4330

Requisites: Restricted to graduate students only.

ANTH 5345 (3) Archaeological Theory

Provides an advanced introduction to the history of archaeological theory from the late 19th century to the present. Topics include culture history, cultural evolution, systems ecology, behavioral archaeology, analogy and middle range theory, collective action, ecology, agency, practice, gender, identity, landscape, epistemology, materiality and memory.

Requisites: Restricted to graduate students only.

ANTH 5350 (2-6) Archaeological Field and Laboratory Research

Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4350

Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 5380 (3) Lithic Analysis and Replication

Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4380

Requisites: Restricted to graduate students only.

ANTH 5390 (3) Research Methods in Archaeology 1

Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4390

Requisites: Restricted to graduate students only.

ANTH 5400 (3) Research Methods in Archaeology 2

Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

ANTH 5460 (3) Archaeology and Contemporary Society

Explores the intellectual climate in which archaeology is practiced and how it influences archaeological research and reconstruction, laws, regulations, and ethical issues. Explores public use of and engagement with archaeology.

Requisites: Restricted to graduate students only.

ANTH 5470 (3) Collections Research Practicum in Cultural Anthropology

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4470 and MUSM 4912 and MUSM 5912

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

ANTH 5500 (3) Cross-Cultural Aspects of Socioeconomic Development

Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4500

Requisites: Restricted to graduate students only.

ANTH 5530 (3) Theoretical Foundations of Sociocultural Anthropology

Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4530

Requisites: Restricted to graduate students only.

ANTH 5570 (3) Anthropology of Fishing

Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4570

Requisites: Restricted to graduate students only.

ANTH 5610 (3) Medical Anthropology

Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4610

ANTH 5630 (3) Nomadic Peoples of East Africa

Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4630

Requisites: Restricted to graduate students only.

ANTH 5730 (3) Latin American Politics and Culture through Film and Text

Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4730

ANTH 5735 (3) Contemporary Cuban Culture: Race, Gender and Power

Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4735

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ANTH 5745 (3) Science, Technology and Society

Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4745

Grading Basis: Letter Grade

ANTH 5750 (3) Culture and Society in South Asia

Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4750

Additional Information: Departmental Category: Asia Content

ANTH 5755 (3) Cultures of Expertise: Science, Power and Knowledge

Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4755

Grading Basis: Letter Grade

ANTH 5760 (3) Ethnography of Southeast Asia and Indonesia

Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4760

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

ANTH 5770 (3) Core Course---Archaeology

Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5780 (3) Core Course-Cultural Anthropology

Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5785 (3) Advanced Seminar in Cultural Anthropology

Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5790 (3) Core Course---Biological Anthropology

Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5795 (3) Proseminar in Anthropology

Introduces incoming first-year graduate students to the history and current state of scholarship in anthropology from across the subdisciplines, through introduction to the research of individual faculty in the department. Required of all incoming graduate students.

Requisites: Restricted to graduate students only.

ANTH 5840 (1-6) Guided Study

Directed individual research based on a specific area of specialization.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ANTH 5930 (1-6) Anthropology Internship

Provides academically supervised opportunities graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4930

Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and HIST 6150 and ARTH 6150

Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-). Restricted to graduate students only.

ANTH 6320 (3) Linguistic Anthropology

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.

Equivalent - Duplicate Degree Credit Not Granted: LING 6320

Requisites: Restricted to graduate students only.

ANTH 6500 (3) Issues in Indigenous Languages

Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.

Equivalent - Duplicate Degree Credit Not Granted: LING 6500

Grading Basis: Letter Grade

ANTH 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

ANTH 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7000 (3) Seminar: Current Research Topics in Cultural Anthropology

Discusses current research and theoretical issues in the field of cultural anthropology.

Requisites: Restricted to graduate students only.

ANTH 7010 (3) Seminar: Contemporary Theory in Cultural Anthropology

Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and postmodernism. Includes the relationship between theory and method as well as the production of ethnography.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ANTH 7020 (3) Seminar: Physical Anthropology

In-depth discussion of selected topics in physical anthropology with emphasis on recent research.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ANTH 7030 (3) Seminar: Archaeology

Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ANTH 7140 (3) Seminar: Archaeology of Selected Areas

Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated upto 9 total credit hours.

Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 7300 (3) Seminar: Research Methods in Cultural Anthropology

Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7600 (3) Human Ecology: Cultural Aspects

Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment developed in the social sciences, especially anthropology, over the last 100 years. Formerly ANTH 5600.

ANTH 7620 (3) Seminar: Ethnography and Cultural Theory

Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

ANTH 7840 (1-6) Independent Research

Research aimed at developing a solution to an originally conceived research problem.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ANTH 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Anthropology - Master of Arts (MA)

Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. Of these, the first three are major curricular options available to graduate students in anthropology at CU Boulder. Although the three subdisciplines offered in our program require approximately the same minimum number of credit hours for their respective MA and PhD degrees, and all include ANTH 5795 Proseminar in Anthropology, plus a required cross-

subdisciplinary seminar on the list of classes required for this total, they differ substantially in the number of other specific requirements. Particularly at the MA level, there is much less flexibility in some subdisciplines than in others, and students should bear this in mind when choosing their specialty and in registering for classes.

Archaeology

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, agency and social theory, lithic and ceramic analyses, remote sensing, and geophysical applications in archaeology.

Archaeology links with biological anthropology in a number of ways. For instance, archaeologists encountering burials frequently turn to biological anthropologists for analyses of stature, health, and other topics. Many archaeologists and biological anthropologists share a deep interest in human ecology, the ways people have adapted to their environments and have affected those environments.

Archaeology also relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation, and the rise of multiethnic powers.

Biological Anthropology

Biological anthropology encompasses genetics (the study of gene structure, processes, and patterns of inheritance), paleoanthropology (the study of human and primate evolution in the fossil record), osteology (the study of the skeleton), paleopathology (the study of evidence of disease and trauma in skeletal and fossil remains), primatology (the study of the behavior and ecology of nonhuman primates), and human biology (biocultural study of biological variation in living human populations).

The biological anthropology faculty at CU have interests and research strengths that cross sub-disciplinary boundaries and foster collaboration with faculty and graduate students in other disciplines and sub-disciplines. We share an interest in human ecology, the broad integrative area of anthropology that focuses on the interactions of culture, biology and the environment. We also share an interest in the processes of globalization, which are rapidly changing many aspects of the modern world. As biological anthropologists, we are well positioned to analyze the impact of globalization on the interaction between biology and behavior, and to analyze human and primate adaptations to changing environments and declining biodiversity.

The department offers training in several different aspects of ecology: general ecology, early hominin paleoecology, nutritional, community, and evolutionary ecology. Our research foci also include anthropogenic and climatic effects on primate behavior and biology; conservation biology; primate evolution; feeding biology of humans and non-human primates; biogeochemical techniques for studying the diets and habitats of modern

and fossil fauna; life history; endocrinology; growth and development; and maternal and infant health.

We carry out research and offer training and research opportunities at a wide range of international sites, including: Bezà Mahafaly, Madagascar; Lajuma Research Centre and the Mokopane Conservation Centre, South Africa; The Cradle of Humankind World Heritage Site, South Africa; 12 museums in South Africa, Kenya, and Ethiopia; Kibale National Park, Uganda; Keneba, The Gambia; Cali, Colombia; Ta Kou Nature Reserve, Kien Luong Karst area, and Khau Ca Forest area, Vietnam. Our laboratories offer analytical capabilities and training in a broad range of methods, from measurement of human energy expenditure, to immunoassay and mid-infrared spectroscopy, to plant nutritional analysis. Our field sites offer training and research on primate health, community ecology, plant-animal interactions, forest ecology, nutritional ecology, conservation biology, dental ecology, and paleoecology.

Please note that we do not train students specifically in forensics.

Cultural Anthropology

Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities, and regions. The insights of cultural anthropology are typically derived from long-term fieldwork conducted in the local language of a community, with the goal of acquiring an integrated understanding of the interactions between individual actors and local, culturally diverse patterns of life. Among the topical interests of the cultural faculty are gender and sexuality, cultural theory, symbolic anthropology, religion and ritual, human ecology, pastoralism, political economy, applied anthropology, medical anthropology, science, technology and society studies, nationalism and ethnic identity, post-colonialism, tourism, history and memory, and visual anthropology. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia, and Western Europe, as well as their respective diasporas around the world.

Additionally, the cultural faculty are united in sharing an interest in globalization, bringing their ethnographic skills to bear on the contemporaneous but countervailing forces that paradoxically tend at once to global homogenization and local fragmentation. Processes related to globalization studied by cultural faculty and students include the increasingly planetary integration of the economy; the spread of human insecurity with the proliferation of ethnic conflict, violence, crime, disease, and financial volatility; the global depletion and degradation of environmental subsistence resources; the impact of tourism and large-scale development projects; the internationalization of environmental, feminist, religious, and human rights movements; the universalization of democratic structures; the rise of "world cities"; the invention of new information and communication technologies; and the increasingly global flows of advertising and consumer goods. The cultural faculty's interest in processes of globalization, human ecology, and applied anthropology also intersect with areas of specialization in archaeology and biological anthropology.

Dual Degree Program Anthropology (MA/MBA)

The MBA/MA in anthropology dual-degree program enables students to earn an MBA and an MA in anthropology simultaneously over three or four years depending on the student's subdiscipline in anthropology. Students in this MBA/MA program pursue careers in managing the business aspects of archaeological projects, working in the growing field of corporate cultural anthropology and ethnography or museum management.

Requirements

Prerequisites

To be considered for admission as a regular degree student, applicants should have a minimum undergraduate grade point average of 3.00 (4.00 = A) or a Master of Arts degree in anthropology. Graduate Record Examination scores for verbal and quantitative aptitude tests are required. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered. Students with fewer than 18 credit hours of previous course work in anthropology are considered deficient and may be asked to present a greater number of credit hours for a degree.

Application

Inquiries concerning applications should be directed to the main departmental office. Completed applications are reviewed once each year and are due by Jan. 15. Students with no previous graduate work should apply for entrance into the MA program, which if successfully completed will prepare them for the PhD program. Students who have or will have completed an MA degree in anthropology by the time of their admission may apply for direct admission into the PhD program, but they may be required to complete specific remedial requirements in some cases.

Course Requirements

Students may have a primary specialization in any of the major subfields of anthropology: archaeology, cultural or biological anthropology. The department expects graduate students to maintain a breadth of competence in general anthropology through the master's degree with specialization intensifying with progress toward the PhD degree.

All entering graduate students must have had the equivalent of ANTH 4000 Quantitative Methods in Anthropology or ANTH 5000 Quantitative Methods in Anthropology or take the course (or, in the case of cultural anthropology students, an appropriate "tool course") during their first year in residence.

As partial fulfillment towards a graduate degree, all students must complete ANTH 5795 Proseminar in Anthropology, which covers the three subdisciplines of anthropology (cultural, biological and archaeology). The proseminar should be taken during the first semester in residence, if possible. In addition, students are required to take one graduate seminar focusing on one of the two subdisciplines outside of their primary specialization. Other specific course requirements are established through a consultation with an academic advisor.

Additional information about other specific areas of specialization and other requirements for the degree may be obtained by writing directly to the Department of Anthropology, and by referencing the Master's Degree Requirements (p. 866) section. Information is also available on the Department of Anthropology (<http://www.colorado.edu/anthropology>) website.

Archaeology Subdiscipline

MA students in archeology must follow plan I and successfully write and defend a master's thesis. Minimum credit hours with thesis: 30 hours.

The graduate curriculum at CU is designed to progress from a general overview of anthropology (the core sequence) to an increasingly specific focus on the individual student's research interests. The faculty very strongly urges students to follow this sequence, beginning with ANTH 5795 Proseminar in Anthropology. Except in extremely unusual circumstances, students are expected to take the proseminar in their first year.

Note that, although graduate students carrying only 5 credits are considered to be full-time at CU Boulder, making timely progress through our program and taking elective classes in the first year generally requires students to carry three classes (9 credits). Students who choose to carry fewer than three courses per semester are still expected to complete the proseminar in the first year, regardless of what other classes might be offered, and should understand that such a choice may add significantly to the time it takes them to complete their course work.

Core Requirements

ANTH 5795	Proseminar in Anthropology	3
One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars)		3

ANTH 5000	Quantitative Methods in Anthropology	3
-----------	--------------------------------------	---

Other Required Courses

ANTH 5345	Archaeological Theory	3
ANTH 5390	Research Methods in Archaeology 1	3
ANTH 5460	Archaeology and Contemporary Society	3
One or two elective graduate courses chosen with advisor		3-6
ANTH 6950	Master's Thesis	4-6

Total Credit Hours		30
---------------------------	--	-----------

NOTE: Any transfer credit or other proposed substitutions for required course work should be addressed by petition to the Graduate Committee.

Recommended Course Work

The faculty strongly recommends students take one or more additional classes beyond the required minimum, particularly classes in regional culture histories, general anthropology, and relevant topics in other departments (such as geology and geography). Other classes can include any relevant to a student's program of study, including archaeological area and topical classes, ethnographic theory and area classes, and classes in related departments (such as geology, geography, biology, etc.). Elective classes should be chosen in consultation with each student's advisor.

Biological Anthropology Subdiscipline

Biological anthropology students normally follow plan I (thesis), and successfully write and defend a master's thesis. Biological anthropology students may follow plan II (non-thesis) and complete their degree with a comprehensive exam only if the MA is the final objective or the student has been trained outside of anthropology and requires a broader background. Plans will be individualized according to students' previous training and professional objectives.

Core Requirements

ANTH 5795	Proseminar in Anthropology	3
-----------	----------------------------	---

One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars) 3

ANTH 5000 Quantitative Methods in Anthropology 3

Electives/Thesis

Select one of the following plans:

Plan I

ANTH courses at the 5000 level or above

ANTH 6950 Master's Thesis

Plan II

ANTH courses at the 5000 level or above

Recommended Elective Course Work ¹

ANTH 5060 Nutrition and Anthropology

ANTH 5070 Methods in Biological Anthropology

ANTH 5110 Human Evolutionary Biology

ANTH 5170 Primate Evolutionary Biology

ANTH 5120 Advanced Biological Anthropology

Total Credit Hours 30

¹ Students are expected to select other classes in anthropology and related disciplines in consultation with their advisor. Depending on the number of master's thesis hours (4–6), a student will normally have 12–14 elective credit hours. A handout of potential courses in other departments can be obtained from the student's advisor. Students in Biological Anthropology are advised to take at least one class with each of the Biological Anthropology faculty, including but not limited to the courses above.

NOTE: Any transfer credit or other proposed substitutions for required course work should be addressed by petition to the Graduate Committee.

Cultural Anthropology Subdiscipline

MA students in cultural anthropology may follow Plan I (thesis option) or Plan II (non-thesis option). Minimum hours with or without thesis: 30 hours.

Required Course Work

Select Either: 3

ANTH 5840 Guided Study

An Ethnographic Area Course (ANTH 5565, 5630, 5690, 5730, 5750, 5760)

Core Requirements

ANTH 5780 Core Course-Cultural Anthropology 3

ANTH 5785 Advanced Seminar in Cultural Anthropology 3

ANTH 5795 Proseminar in Anthropology 3

ANTH 7300 Seminar: Research Methods in Cultural Anthropology 3

One graduate-level anthropology seminar not in the student's subdiscipline (any non-split-level graduate seminar, including bridging seminars) 3

Electives/Thesis

Select one of the following plans:

Plan I

ANTH courses at the 5000 level or above plus an MA thesis of 4-6 credit hours

Plan II

ANTH courses at the 5000 level or above

Total Credit Hours 30

NOTE: Any transfer credit or other proposed substitutions for required course work should be addressed by petition to the Graduate Committee.

Degree Plans

Plan I: Thesis

MA students in archaeology and biological anthropology are normally expected to write a thesis.

Plan II: Comprehensive Examination

In consultation with their advisor, students in cultural anthropology have the option of completing their MA degree by examination only.

Anthropology - Doctor of Philosophy (PhD)

Departmental Subdisciplines

Anthropology in the United States is traditionally divided into four subdisciplines: archaeology, biological, cultural and linguistic. Of these, the first three are major curricular options available to graduate students in anthropology at CU Boulder. Although the three subdisciplines offered in our program require approximately the same minimum number of credit hours for their respective MA and PhD degrees, and all include ANTH 5795 Proseminar in Anthropology plus a required cross-subdisciplinary seminar, they differ substantially in the number of other specific requirements. Particularly at the MA level, there is much less flexibility in some subdisciplines than in others, and students should bear this in mind when choosing their specialty and registering for classes.

Archaeology

The archaeology subdiscipline provides continuous geographic coverage of ancient societies from the Plains of North America through the Southwest and Mesoamerica to the Intermediate Area. The native societies range from egalitarian hunter-gatherers through middle range societies to city-states and empires. The faculty's theoretical and topical interests include human ecology, ethnoarchaeology, agency and social theory, lithic and ceramic analyses, remote sensing and geophysical applications in archaeology.

Archaeology links with biological anthropology in a number of ways. For instance, archaeologists encountering burials frequently turn to biological anthropologists for analyses of stature, health and other topics. Many archaeologists and biological anthropologists share a deep interest in human ecology, the ways people have adapted to their environments and have affected those environments.

Archaeology also relates to cultural anthropology in significant ways, since much archaeological theory is derived from cultural theory. Given the vast diachronic interests of archaeology, significant archaeological theory is also derived independently from ethnography. Ethnoarchaeology spans the two subdisciplines, as archaeologists study the material culture of functioning contemporary societies to learn how better to make inferences about past behavior. Both archaeology and cultural anthropology study ethnic and political groups in contact with each other, including topics of ethnohistory, migration, acculturation, trade and tribute, conquest, information sharing, elite emulation and the rise of multiethnic powers.

Biological Anthropology

Biological anthropology encompasses genetics (the study of gene structure, processes and patterns of inheritance), paleoanthropology (the study of human and primate evolution in the fossil record), osteology (the study of the skeleton), paleopathology (the study of evidence of disease and trauma in skeletal and fossil remains), primatology (the study of the behavior and ecology of nonhuman primates) and human biology (biocultural study of biological variation in living human populations).

The biological anthropology faculty at CU have interests and research strengths that cross sub-disciplinary boundaries and foster collaboration with faculty and graduate students in other disciplines and subdisciplines. We share an interest in human ecology, the broad integrative area of anthropology that focuses on the interactions of culture, biology and the environment. We also share an interest in the processes of globalization, which are rapidly changing many aspects of the modern world. As biological anthropologists, we are well positioned to analyze the impact of globalization on the interaction between biology and behavior, and to analyze human and primate adaptations to changing environments and declining biodiversity.

The department offers training in several different aspects of ecology: general ecology, early hominin paleoecology, nutritional, community and evolutionary ecology. Our research foci also include anthropogenic and climatic effects on primate behavior and biology; conservation biology; primate evolution; feeding biology of humans and non-human primates; biogeochemical techniques for studying the diets and habitats of modern and fossil fauna; life history; endocrinology; growth and development; and maternal and infant health.

We carry out research and offer training and research opportunities at a wide range of international sites, including: Beza Mahafaly, Madagascar; Lajuma Research Centre and the Mokopane Conservation Centre, South Africa; The Cradle of Humankind World Heritage Site, South Africa; 12 museums in South Africa, Kenya and Ethiopia; Kibale National Park, Uganda; Keneba, The Gambia; Cali, Colombia; Ta Kou Nature Reserve, Kien Luong Karst area and Khau Ca Forest area, Vietnam. Our laboratories offer analytical capabilities and training in a broad range of methods, from measurement of human energy expenditure, to immunoassay and mid-infrared spectroscopy, to plant nutritional analysis. Our field sites offer training and research on primate health, community ecology, plant-animal interactions, forest ecology, nutritional ecology, conservation biology, dental ecology and paleoecology.

Please note that we do not train students specifically in forensics.

Cultural Anthropology

Cultural anthropologists study the cultural patterns and social institutions that shape how people think and behave in human communities across the globe, including their own society. While their findings are frequently comparative or cross-cultural in scope, cultural anthropologists undertake ethnographic studies through intensive participant-observation in particular cultures, subcultures, communities and regions. The insights of cultural anthropology are typically derived from long-term fieldwork conducted in the local language of a community, with the goal of acquiring an integrated understanding of the interactions between individual actors and local, culturally diverse patterns of life. Among the topical interests of the cultural faculty are gender and sexuality, cultural theory, symbolic anthropology, religion and ritual, human ecology, pastoralism, political economy, applied anthropology, medical anthropology, science, technology and society studies, nationalism and ethnic identity, post-colonialism, tourism, history and

memory, and visual anthropology. Areas of regional expertise in the department include Latin America, Native America, Atlantic Canada, South Asia, Southeast Asia, Tibet, East Africa, the Caribbean, Polynesia and Western Europe, as well as their respective diasporas around the world.

Additionally, the cultural faculty are united in sharing an interest in globalization, bringing their ethnographic skills to bear on the contemporaneous but countervailing forces that paradoxically tend at once to global homogenization and local fragmentation. Processes related to globalization studied by cultural faculty and students include the increasingly planetary integration of the economy; the spread of human insecurity with the proliferation of ethnic conflict, violence, crime, disease and financial volatility; the global depletion and degradation of environmental subsistence resources; the impact of tourism and large-scale development projects; the internationalization of environmental, feminist, religious and human rights movements; the universalization of democratic structures; the rise of "world cities"; the invention of new information and communication technologies; and the increasingly global flows of advertising and consumer goods. The cultural faculty's interest in processes of globalization, human ecology and applied anthropology also intersect with areas of specialization in archaeology and biological anthropology.

Requirements

Prerequisites

To be considered for admission as a regular degree student, applicants should have a minimum undergraduate grade point average of 3.00 (4.00 = A) or a Master of Arts degree in anthropology. Graduate Record Examination scores for verbal and quantitative aptitude tests are required. Letters of recommendation and evidence of previous anthropologically oriented experience and work are carefully considered. Students with fewer than 18 credit hours of previous course work in anthropology are considered deficient and may be asked to present a greater number of credit hours for a degree.

Application

Inquiries concerning applications should be directed to the main departmental office. Completed applications are reviewed once each year and are due by January 15. Students with no previous graduate work should apply for entrance into the MA program, which will prepare them for the PhD program if successfully completed. Students who have or will have completed an MA degree in anthropology by the time of their admission may apply for direct admission into the PhD program, but they may be required to complete specific remedial requirements in some cases. Students with a master's degree in a closely related discipline may be considered for admission to the PhD program on a case-by-case basis, and should expect to meet all the core requirements of our graduate program. Students holding an MS in museum and field studies from CU Boulder may be admitted to the PhD program on condition of completing deficiencies in course work.

Course Requirements

Course work beyond the MA must include a minimum of 18 credit hours and 30 dissertation credit hours.

Archaeology Subdiscipline

Students entering the PhD program with an MA from another institution must complete the proseminar (ANTH 5795) in their first year of

residence and the additional Anthropology requirements (see Core Requirements for the MA) within the first two years.

Requirements

Four 7000-level seminars in the department, (in addition to any taken for the MA) at least one of which must be in another subdiscipline, or a team-taught bridging seminar.	12
Two other electives with advisor approval	6
ANTH 8990 Doctoral Dissertation	30
Total Credit Hours	48

NOTE: Any transfer credit or other proposed substitutions for required course work should be addressed by petition to the Graduate Committee.

Recommended Course Work

The faculty strongly recommends students take one or more additional classes beyond the required minimum, particularly classes in regional culture histories, general anthropology, and relevant topics in other departments (such as geology and geography). Other classes can include any relevant to a student's program of study, including archaeological area and topical classes, ethnographic theory and area classes, and classes in related departments (such as geology, geography, biology, etc.). Elective classes should be chosen in consultation with each student's advisor.

Biological Anthropology Subdiscipline

Students entering the PhD program with an MA from another institution must complete the Proseminar (ANTH 5795) in their first year of residence and the one 5000-level graduate class in Biological Anthropology (see Core Requirements in MA section for suggestions) within the first two years. They must also take Quantitative Methods (ANTH 5000) within the first four semesters if they do not have equivalent training on their record.

Requirements

Four 7000-level seminars in the department, (in addition to any taken for the MA) at least one of which must be in another subdiscipline, or a team-taught bridging seminar.	12
Two other electives with advisor approval	6
ANTH 8990 Doctoral Dissertation	30
Total Credit Hours	48

NOTE: Any transfer credit or other proposed substitutions for required coursework should be addressed by petition to the Graduate Committee.

Cultural Anthropology Subdiscipline

Students entering the PhD program with an MA from another institution must complete the proseminar (ANTH 5795) in their first year of residence. They are also expected to take the Core Seminar in Cultural Anthropology (ANTH 5780), the Advanced Seminar in Cultural Anthropology (ANTH 5785), and Research Methods (ANTH 7300) at their earliest opportunity, unless they demonstrate they have taken equivalent courses elsewhere (by petition to the Graduate Committee with advisor's endorsement). They must also complete an approved "tools" course if they have not already done so or do not have equivalent training on their record.

Foreign language requirement

Language proficiency is essential to research in cultural anthropology, so incoming graduate students are expected to identify and begin study of a foreign research language as soon as possible, preferably no later than

the first year. For languages not available at the University of Colorado, students are encouraged to begin or advance their language proficiency during the summer following their first year.

Requirements

An approved "Tools" course ¹	3
At least two 7000-level seminars in Cultural Anthropology.	6
Three classes or directed readings at the 5000 level or above (Limit: 6 credits of directed readings/Guided Study)	9
ANTH 8990 Doctoral Dissertation	30
Total Credit Hours	48

¹ The tools requirement is intended to provide a graduate student in cultural anthropology with a skill or set of skills that will enhance his or her research capabilities. Typically this involves training in a particular methodological technique or analytical process.

NOTE: Any transfer credit or other proposed substitutions for required course work should be addressed by petition to the Graduate Committee.

Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics. Each of these areas is described below.

Course code for this program is APPM.

Computational Mathematics

The study of computational mathematics has grown rapidly in recent years and has allowed scientists and engineers to answer questions and to develop insights not possible just a decade or two ago. Modern computational methods require in-depth knowledge of a variety of mathematical subjects including linear algebra, analysis, ordinary and partial differential equations, asymptotic analysis, elements of harmonic analysis and nonlinear equations. Since computers are invaluable tools for an applied mathematician, students are expected to attain a high level of computer literacy and to gain a substantial knowledge of operating systems and hardware. Computational mathematics courses include the study of computational linear algebra, optimization, numerical solution of ordinary and partial differential equations, solution of nonlinear equations and advanced seminars in wavelet and multiresolution analysis and in multigrid methods, radial basis functions and algorithm design and development, more generally.

Mathematical Biosciences

Advances in our ability to quantitatively study biological phenomena have provided a number of exciting opportunities for applied mathematicians. The careful modeling, analysis and simulation of these systems using the standard and state-of-the-art tools of applied mathematics has led to novel and non-intuitive insights into biology. Furthermore, deeper understanding of the inherently complex and multiscale nature of biological systems, in many cases, requires the development of new mathematical tools, techniques and methodologies (a challenge to which applied mathematics is particularly well suited). For students interested in pursuing research in mathematical biology, good preparatory classes would include differential equations, advanced calculus, numerical analysis and probability and statistics, as well as supplemental courses in the appropriate biological, biomedical or bioengineering fields.

Research areas at CU encompass immunology, virology, bacteriology, population genetics and cardiac nonlinear dynamics. Specifically, current topics of interest include model selection and control of in vivo HIV pathogenesis dynamics, modeling of intracellular calcium dynamics, the analysis of heart rhythm instabilities, the role of aggregation and fragmentation in bacteremia and bacterial pneumonia, inverse problems arising in the use of population genetics and bioinformatics to identify geographic features and the analysis of patterns in biological sequences such as DNA and RNA.

Dynamical Systems and Nonlinear Phenomena

In recent years, there has been an explosion of interest in the study of nonlinear waves and dynamical systems with analytical results, often motivated by the use of computers. The faculty in the Department of Applied Mathematics are actively and intensively involved in this growing field. Research areas include qualitative analysis and computational dynamics, conservative and dissipative systems, bifurcation theory, the onset and development of chaos, wavelets and multiresolution analysis, integrable systems, solitons, cellular automata, analytic dynamics, pattern formation and symmetry, synchronization, dynamics on networks, fluid dynamics, transport and mixing and the study of nonlinear phenomena arising from the interactions of many interconnected dynamical units. Department courses in this field include dynamical systems, nonlinear wave motion and many advanced seminars. Suitable background courses are analysis, computation and methods in applied mathematics. Valuable supplemental courses include mechanics and fluid dynamics.

Physical Applied Mathematics

Physical applied mathematics is a term that generally refers to the study of mathematical problems with direct physical application. This area of research is intrinsically interdisciplinary. In addition to mathematical analysis, it requires an in-depth understanding of the underlying applications area, and usually requires knowledge and experience in numerical computation. The department has approximately 40 affiliated faculty who can direct thesis research in areas such as atmospheric and fluid dynamics, theoretical physics, plasma physics, genetic structure, parallel computation, etc. The department's course requirements are designed to provide students with a foundation for their study (analysis and computation). The department also requires supplemental courses in one of the sciences or engineering fields necessary for thesis research in physical applied mathematics.

Statistics and Applied Probability

Almost all natural phenomena in the technological, biological, physical and social sciences have random components with complex levels of interactions, part stochastic, part deterministic. Applied probability is the application of probabilistic and analytic methods to model, understand and predict the behavior of real-life problems that involve random elements. Statistics is the science of using data that typically arise from the randomness inherent in nature to gain new knowledge. Areas of current interest by applied math and their affiliated faculty include optimization of stochastic networks; the study of stochastic processes, and stochastic differential equations in hydrology and telecommunications; probabilistic models, nonparametric regression methods, shrinkage estimation, gene expression microarray data analysis, false discovery rate control, classification methods and statistical tests based on these models, in genetics and RNA sequencing; and extreme value theory in estimation of maximal wind speeds.

Appropriate course work includes analysis, stochastic processes, simulation techniques and mathematical statistics, as well as background courses in one of the sciences or engineering fields in which one intends to do research.

For details on the range of courses and research opportunities available through the Department of Applied Mathematics, visit www.colorado.edu/amath.

Master's Degree

- Applied Mathematics - Master of Science (MS) (p. 890)

Doctoral Degree

- Applied Mathematics - Doctor of Philosophy (PhD) (p. 891)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ablowitz, Mark J (https://experts.colorado.edu/display/fisid_100691)
Professor; PhD, Massachusetts Institute of Technology

Bebernes, Jerrold
Professor Emeritus

Becker, Stephen R (https://experts.colorado.edu/display/fisid_154263)
Assistant Professor; PhD, California Institute of Technology

Instructor; MS, Colorado School of Mines

Courses

APPM 5120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits. Department enforced prerequisite: APPM 2130 or MATH 2135 or MATH 2135.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4120 and MATH 4120 and MATH 5120

Requisites: Restricted to graduate students only.

APPM 5350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Department enforced prerequisite courses: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course: APPM 3310 or MATH 2130 or MATH 2135.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4350

Requisites: Restricted to graduate students only.

APPM 5360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4360

Requisites: Restricted to graduate students only.

APPM 5380 (3) Modeling in Applied Mathematics

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4380

Requisites: Restricted to graduate students only.

Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

APPM 5390 (3) Modeling in Mathematical Biology

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering. Department enforced prerequisites: APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 or instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4390

Requisites: Restricted to graduate students only.

APPM 5430 (3) Methods in Applied Mathematics: Applications of Complex Variables

Reviews basic ideas of complex analysis, including solutions of ODEs and PDEs of physical interest via complex analysis; conformal mapping, including Schwarz-Christoffel transformations and generalizations; computational methods; Riemann-Hilbert problems; topics in asymptotic methods. Department enforced prerequisite: APPM 4360 or APPM 5360.

Requisites: Restricted to graduate students only.

APPM 5440 (3) Applied Analysis 1

Discusses the elements of basic real and complex analysis, Banach spaces, L_p spaces and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Department enforced prerequisites: APPM 4440 and APPM 4450.

Requisites: Restricted to graduate students only.

APPM 5450 (3) Applied Analysis 2

Continuation of APPM 5440. Department enforced prerequisite: APPM 5440.

Requisites: Restricted to graduate students only.

APPM 5460 (3) Methods in Applied Mathematics: Dynamical Systems and Differential Equations

Introduces the theory and applications of dynamical systems through solutions to differential equations. Covers existence and uniqueness theory, local stability properties, qualitative analysis, global phase portraits, perturbation theory and bifurcation theory. Special topics may include Melnikov methods, averaging methods, bifurcations to chaos and Hamiltonian systems. Department enforced prerequisites: APPM 2360 and APPM 3310 and APPM 4440.

Requisites: Restricted to graduate students only.

APPM 5470 (3) Methods of Applied Mathematics: Partial Differential and Integral Equations

Studies properties and solutions of partial differential equations. Covers methods of characteristics, well-posedness, wave, heat and Laplace equations, Green's functions and related integral equations. Department enforced prerequisites: APPM 4350 or MATH 4470 and APPM 4360 or MATH 3450.

Requisites: Restricted to graduate students only.

APPM 5480 (3) Methods of Applied Mathematics: Approximation Methods

Covers asymptotic evaluation of integrals (stationary phase and steepest descent), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods and applications to differential and integral equations. Department enforced prerequisite: APPM 5470.

Requisites: Restricted to graduate students only.

APPM 5500 (3) Statistical Collaboration

Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4500

Requisites: Requires a prerequisite course of APPM 5520 (minimum grade C-).

Grading Basis: Letter Grade

APPM 5505 (2) Advanced Statistical Collaboration

Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4505

Requisites: Requires prerequisite course of APPM 4500 or APPM 5500 (minimum grade C-).

Grading Basis: Letter Grade

APPM 5510 (3) Data Assimilation in High Dimensional Dynamical Systems

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4510

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 5520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4520 and MATH 4520 and MATH 5520

Requisites: Restricted to graduate students only.

APPM 5530 (3) Stochastic Analysis for Finance

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4530

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 5540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: APPM 5520 or MATH 5520.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4540 and MATH 4540 and MATH 5540

Requisites: Restricted to graduate students only.

APPM 5550 (3) Spatial Statistics

Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to spines.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4550

Requisites: Requires prerequisite course of APPM 4520 or APPM 5520 or MATH 4520 or MATH 5520 (minimum grade C-).

Grading Basis: Letter Grade

APPM 5560 (3) Markov Processes, Queues, and Monte Carlo Simulations

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4560

Requisites: Restricted to graduate students only.

APPM 5570 (3) Statistical Methods

Covers basic statistical concepts with accompanying introduction to the R programming language. Topics include discrete and continuous probability laws, random variables, expectation and variance, central limit theorem, testing hypothesis and confidence intervals, linear regression analysis, simulations for validation of statistical methods and applications of methods in R.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4570

Requisites: Restricted to graduate students only.

APPM 5580 (3) Introduction to Statistical Learning

Consists of applications and methods of statistical learning. Covers multiple linear regression, classification, regularization, splines, tree-based methods, support vector machines and unsupervised learning.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4580

Requisites: Requires prerequisite course of APPM 4570 or APPM 5570 (minimum grade C-). Restricted to graduate students only.

APPM 5590 (3) Statistical Modeling

Introduces methods, theory and applications of statistical models, from linear models (simple and multiple linear regression), to hierarchical linear models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples and exercises will be demonstrated using statistical software. Department enforced prerequisite: APPM 4570 or APPM 4520 or MATH 4520 or instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4590

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 5600 (3) Numerical Analysis 1

Solution of nonlinear algebraic equations, interpolation, integration, approximation, and numerical linear algebra. Department enforced prerequisite: APPM 3310 or MATH 2130 and experience with a scientific programming language.

Requisites: Restricted to graduate students only.

APPM 5610 (3) Numerical Analysis 2

Numerical linear algebra, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: APPM 5600 or MATH 5600.

Requisites: Restricted to graduate students only.

APPM 5720 (1-3) Open Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4720

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APPM 6470 (3) Advanced Partial Differential Equations

Continuation of APPM 5470. Advanced study of the properties and solutions of elliptic, parabolic, and hyperbolic partial differential equations. Topics include the study of Sobolev spaces and variational methods as they relate to PDEs, and other topics as time permits. Department enforced prerequisite: APPM 5470.

Requisites: Restricted to graduate students only.

APPM 6520 (3) Mathematical Statistics

Emphasizes mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference, all with emphasis on theory. Department enforced prerequisite: APPM 5520 or MATH 5520.

Requisites: Restricted to graduate students only.

APPM 6550 (3) Introduction to Stochastic Processes

Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences.

Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560 or instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: MATH 6550

Requisites: Restricted to graduate students only.

APPM 6610 (3) Introduction to Numerical Partial Differential Equations

Covers finite difference, finite element, finite volume, pseudo-spectral, and spectral methods for elliptic, parabolic, and hyperbolic partial differential equations. Department enforced prerequisite: APPM 5600.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite APPM 5610 or graduate numerical linear algebra.

APPM 6640 (3) Multigrid Methods

Develops a fundamental understanding of the principles and techniques of the multigrid methodology, which is a widely used numerical approach for solving many problems in such diverse areas as aerodynamics, astrophysics, chemistry, electromagnetics, hydrology, medical imaging, meteorology/oceanography, quantum mechanics, and statistical physics.

Requisites: Restricted to graduate students only.

APPM 6900 (1-6) Independent Study

Introduces graduate students to research foci of the Department of Applied Mathematics.

Requisites: Restricted to graduate students only.

APPM 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

APPM 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

APPM 7100 (3) Mathematical Methods in Dynamical Systems

Covers dynamical systems defined by mappings and differential equations. Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase plane analysis, Melnikov theory, strange attractors, chaos, etc.

Requisites: Requires prerequisite course of APPM 5460 (minimum grade D-). Restricted to graduate students only.

APPM 7300 (3) Nonlinear Waves and Integrable Equations

Includes basic results associated with linear dispersive wave systems, first-order nonlinear wave equations, nonlinear dispersive wave equations, solitons, and the methods of the inverse scattering transform. Department enforced prerequisites: APPM 4350 and APPM 4360.

Requisites: Restricted to graduate students only.

APPM 7400 (1-3) Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APPM 7900 (1-3) Independent Study

Introduces graduate students to research foci of the Department of Applied Mathematics.

Requisites: Restricted to graduate students only.

APPM 8000 (1) Colloquium in Applied Mathematics

Introduces graduate students to the major research foci of the Department of Applied Mathematics.

Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8100 (1) Seminar in Dynamical Systems

Introduces advanced topics and research in dynamical systems.

Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8300 (1-3) Nonlinear Waves Seminar

Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students.

Provides a vehicle for the development, presentation, and corporative research of new topics in PDE and analysis.

Requisites: Requires prerequisite course of APPM 5440 (minimum grade D-). Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8400 (1) Mathematical Biology Seminar

Introduces advanced topics and research in mathematical and computational biology. Instructor consent required.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 8500 (1) Statistics, Optimization and Machine Learning Seminar

Research-level seminar that explores the mathematical foundations of machine learning, in particular how statistics and optimization give rise to well-founded and efficient algorithms.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 8600 (1) Seminar in Computational Mathematics

Introduces advanced topics and research in computational mathematics.

Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. No more than 10 credit hours may be taken in any one semester.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Applied Mathematics - Master of Science (MS)

The MS degree can serve as a steppingstone for any student considering a PhD program at CU Boulder or elsewhere. However, the MS degree is unique and an important program in its own right. One of the principal advantages is in preparation for teaching or industry, which is the genesis

of the required numerical analysis and out-of-department sequences. It is also a flexible program that supports special interest directions.

Students should carefully read the Requirements for Advanced Degrees in the Graduate School section. What follows is an abbreviated summary of specific requirements for the department. A precise description of the degree requirements is available in the department's Applied Mathematics Graduate Student Supplement (<http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements>).

Optional Computational Science and Engineering Track

The purpose of this track is to meet the needs of students who want to learn the basic concepts and skills of computational science and engineering, and then to continue toward a PhD in a discipline outside applied mathematics. The program is designed to provide interested students with a foundation in computational mathematics and, at the same time, to allow sufficient latitude for the student to become proficient in an outside discipline. Approximately half of the credit hours for the master's degree will be taken from a department other than applied mathematics.

A student in the computational science and engineering track will be enrolled simultaneously in two graduate programs, one in applied mathematics and one in the department from which the student wishes to receive a PhD. An interested student may apply for admission to this track either when applying for graduate study at CU, or at any time in the student's first two years of graduate study. First-year and second-year graduate students in any of the participating departments may apply for admission to this program. A student who completes this program successfully will obtain a master's degree in applied mathematics in the computational science and engineering track.

Concurrent Degree Program BS/MS in Applied Mathematics

The concurrent BS/MS program in applied mathematics enables well-qualified and motivated students to experience graduate-level course work earlier in their education and to obtain an MS degree in a reduced time period. Applied math majors may apply for this program during their junior year. Minimum requirements for admission include completion of at least two APPM courses numbered 3000 or higher, an overall GPA of 3.40 or higher, an APPM and MATH GPA of 3.40 or higher, and two letters of recommendation from APPM faculty. Students interested in this program are encouraged to consult with an applied mathematics faculty advisor early in their undergraduate career.

Dual Degree Program MS/MA in Applied Mathematics and MCDB

This three-year interdisciplinary program offers two master's degrees: an MS in applied mathematics and an MA in molecular, cellular and developmental biology (MCDB). The goal of the program is to produce well-trained applied mathematics students who are capable of making serious contributions leading to advancements in molecular biology. Such students will be well educated in computational sciences, statistics, probability and molecular biology.

Students are expected to meet all requirements for admission to the graduate program in the Department of Applied Mathematics and to possess a basic science background suitable for pursuit of this dual

degree. Students also are expected to meet minimum requirements for admission to the graduate program in MCDB. Adequate undergraduate preparation consists of successful completion of basic courses on cell and molecular biology. Any student deemed deficient in either area will be required to take Molecular Cell Biology I and II (MCDB 3135 and MCDB 3145) after enrollment.

Students will be required to apply to both programs, with APPM the primary one. Subject to joint recommendation and approval by APPM and MCDB, incoming students will be admitted to this dual degree program as a regular part of the applied mathematics recruitment process.

Requirements

Prerequisites

Prerequisites for graduate study in applied mathematics include three semesters of calculus and a course in differential equations and linear algebra. The overall grade point average for mathematics and applied mathematics must be B or better.

Other strongly recommended courses are:

Strongly Recommended Prerequisites

APPM 4350 & APPM 4360	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems and Methods in Applied Mathematics: Complex Variables and Applications	6
APPM 4650 & APPM 4660	Intermediate Numerical Analysis 1 and Intermediate Numerical Analysis 2 (or MATH 4650 & MATH 4660)	6
APPM 4440	Undergraduate Applied Analysis 1	3
One of the following:		3
APPM 3310	Matrix Methods and Applications	
MATH 2130	Introduction to Linear Algebra for Non-Mathematics Majors	

Course Requirements

The department requires a master's degree candidate to complete an approved program of study consisting of at least 30 credit hours, at least 18 of which must be applied mathematics courses at the 5000 level or above. A grade of C (2.0) or higher must be attained in each course.

Generally, the following courses do not count toward the 30-credit-hour requirement: APPM 5350, APPM 5360, APPM 5570 and APPM 5720.

NOTE: The APPM 5720 course number is used for a variety of courses that are either run for the first time or on an ad hoc basis. When appropriate, the Graduate Committee may decide that a particular version of this course should count towards graduate credits. If a student would like to count credits from APPM 5720 toward an APPM graduate degree, advice should be sought from the chair of the graduate committee on whether this would be permissible.

All master's degree students must complete two yearlong 5000-level course sequences in applied mathematics:

- APPM 5600 & APPM 5610 (required; may be waived for students who obtain a pass on the numerical analysis preliminary exam) AND
- a sequence listed in the "Graduate Courses" section of the Applied Mathematics Graduate Student Supplement (<http://www.colorado.edu/amath/prospective-students/graduate/>)

supplement-course-catalog-degree-requirements) (other sequences require approval from the chair of the graduate committee).

MS candidates must take a yearlong 5000-level graduate sequence outside of applied mathematics in an area where mathematics has significant application. This sequence must be approved by the chair of the graduate committee.

Upon approval by petition to the graduate committee, up to 6 credit hours may be taken in 4000-level courses in other departments, provided members of the graduate faculty teach those courses.

Degree Plans

There are two courses of action for graduate students who are looking to graduate with a master's degree.

Plan I: Thesis Option

A student electing to do a thesis must enroll in 4–6 hours of thesis credit, which count toward the required 30 hours, and must take an oral comprehensive exam (also referred to as a defense) on that thesis work. A student can only enroll in a total of 6 thesis hours for the course of the degree program. This exam will be administered by a committee consisting of the faculty advisor, who serves as committee chair, and two other faculty members. Each committee member must hold a current graduate faculty appointment. The chair must have a regular graduate faculty appointment, and the remaining committee members must hold either regular or special membership. At least one committee member must hold a regular (tenure or tenure-track) faculty appointment in Applied Mathematics.

Plan II: Non-Thesis Option

A student choosing the non-thesis option must pass ("pass" or "PhD research pass") any one of four PhD preliminary exams. Details are provided in the Applied Mathematics Graduate Student Supplement (<http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements>).

Each MS student electing the non-thesis option must submit a completed MS degree audit form to the graduate chair upon submitting the Candidacy Application for an Advanced Degree.

A student who fails a written preliminary exam may, in a later semester, make one and only one more attempt to satisfy this requirement. In doing so, the student may switch between the thesis and the non-thesis option of the program, or between one preliminary exam area and another. Students who fail two preliminary exams are subject to dismissal from the program.

Applied Mathematics - Doctor of Philosophy (PhD)

The Department of Applied Mathematics offers course work and research leading to the PhD degree in applied mathematics. The aim of the department is to train graduate students to perform independent research on the methods and applications of applied mathematics. Research areas represented in the department include:

- physical applied mathematics
- dynamical systems
- nonlinear phenomena and analysis
- mathematical biology
- computational mathematics

- applied probability, statistics and data science

For more information on the department and degree requirements, download the supplement to the catalog (<http://www.colorado.edu/amath/prospective-students/graduate/supplement-course-catalog-degree-requirements>) or visit the Applied Mathematics (<http://www.colorado.edu/amath>) website.

PhD with Certificate in Interdisciplinary Quantitative Biology

Applied mathematicians interested in collaborations with bioscientists will need a breadth of knowledge in quantitative bioscience to be successful. The interdisciplinary quantitative biology (IQ biology) graduate certificate (p. 1278) program emphasizes training at the intersection of biochemistry, biology, computer science, engineering, applied mathematics and physics. The PhD in applied mathematics with a certificate in IQ biology will strengthen this training with additional foundations in numerical and mathematical analysis, probability and statistics, mathematical biology and network analysis.

Candidates interested in this program should apply directly to IQ biology and select applied mathematics as one of their graduate programs of interest. In addition to satisfying the requirements for the PhD in applied mathematics, students in this program must take 12 credit hours in three IQ biology core courses (Quantitative Biology Foundations, Statistics and Computations for Genomes and Meta-Genomes and Forces in Biology), which can serve as the out-of-department sequence for the PhD, as well as three 10-week rotations in labs associated with the IQ biology program.

For more information, visit the BioFrontiers Institute's IQ Biology PhD Program (<http://iqbiology.colorado.edu>) website.

Requirements

A minimum of 60 credit hours is required for the degree, including 30 credit hours in courses numbered 5000 or above (APPM 5350, APPM 5360, APPM 5570 and APPM 5720 generally do not count toward this requirement) and 30 credit hours of applied math dissertation credit.

A grade of B- or higher must be attained in each course. PhD students must maintain a grade point average of 3.0 or better each semester.

Required Courses and Semester Credit Hours

Required Courses

APPM 5440 & APPM 5450	Applied Analysis 1 and Applied Analysis 2 ¹	6
APPM 5600 & APPM 5610	Numerical Analysis 1 and Numerical Analysis 2 ¹	6
APPM 8990	Doctoral Dissertation	30

Electives

One sequence in applied mathematics; possibilities include:		6
APPM 5470 & APPM 5430	Methods of Applied Mathematics: Partial Differential and Integral Equations and Methods in Applied Mathematics: Applications of Complex Variables	
or APPM 5460	Methods in Applied Mathematics: Dynamical Systems and Differential Equations	
or APPM 5480	Methods of Applied Mathematics: Approximation Methods	

APPM 5520 & APPM 5540	Introduction to Mathematical Statistics and Introduction to Time Series	
or APPM 5560	Markov Processes, Queues, and Monte Carlo Simulations	
Two semesters of seminars: ²		2
APPM 8000	Colloquium in Applied Mathematics	
APPM 8100	Seminar in Dynamical Systems	
APPM 8300	Nonlinear Waves Seminar	
APPM 8400	Mathematical Biology Seminar	
APPM 8500	Statistics, Optimization and Machine Learning Seminar	
APPM 8600	Seminar in Computational Mathematics	
At least one 3-credit course per year (third and fourth years only) in applied mathematics at the 6000 level or above. ³		6
A yearlong graduate sequence outside of applied mathematics in an area where mathematics has significant application. Approval of the sequence from the graduate committee chair is required.		6
Total Credit Hours		62

¹ A student may opt out of either one of these two sequences only if they have demonstrated proficiency in the subject by passing the corresponding preliminary exam.

² To be taken no earlier than the second year of graduate study in the department.

Exams

Preliminary exams are offered in four areas: analysis, numerics, partial differential equations and probability/statistics. Students must take the numerics and analysis exams, and either one of the other two.

Art and Art History

The Department of Art and Art History offers two graduate degrees, the MA in Art History and the MFA in Art Practices, as well as the MFA/MBA in collaboration with the Leeds School of Business. The MA in Art History is intended to give students a broad general knowledge of Art History in a two-year program. Students who have achieved a distinguished record in this MA program should be well prepared for acceptance into a doctoral program in Art History.

The MFA in Art Practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares students for careers as practicing artists and arts professionals as well as teachers in colleges, universities, and art schools. During the two and half-year program, students focus on one of several fields including, Ceramics, IMA (photography, digital media, video, integrated arts), Painting and Drawing, Printmaking, Sculpture and Post-Studio Practice. Additionally, in collaboration with the Film Studies Program, the Department of Art and Art History offers a film track MFA. The MFA/MBA program requires candidates to submit separate applications to the Department of Art and Art History as well as the Leeds School of Business. In addition to the required coursework, MFA and MA students gain additional insights about their respective fields through the Visiting Artist Program and Visiting Scholars Program, both of which invite distinguished artists and scholars to CU for talks, seminars, and individual meetings with students.

The faculty are highly active in their respective fields, from publishing important articles and books on historical and contemporary art to exhibiting in galleries and museums to establishing non-traditional artist

venues and opportunities. The faculty are also committed teachers and mentors who work closely with graduate students, helping them to realize their individual visions as artists and historians.

Students who are accepted to the MA, MFA, and MFA/MBA programs join the University of Colorado-Boulder Graduate School, which serves the community of graduate students, faculty, and staff, one of the nation's premier comprehensive research universities. The Graduate School offers guidance on a wide array of academic, social, and financial issues, and can assist in navigating the often complex world of graduate education.

Serving as an umbrella organization since 1892, the Graduate School currently oversees 100 graduate and professional programs. The Graduate School works to guarantee a standard of quality and cohesion across all disciplines, ensuring the continuing integrity and value of a CU-Boulder graduate degree. The Graduate School also helps make possible the many connections between the campus and outside constituencies, in the state, the nation, and the world.

Course codes for these programs are ARTE, ARTH and ARTS.

Special Programs

The CU Art Museum

The CU Art Museum is a cultural gateway to the University of Colorado Boulder, facilitating engagement with larger societal issues through a greater understanding of the arts in a global context. The CU Art Museum is committed to enhancing understanding and appreciation of the visual arts within the academic community and among regional, national and international audiences. It provides access to art of the highest quality through exhibitions, publications and related educational events that reflect diversity, critical thinking and creative research. The museum also facilitates student training in museum practices. As a collecting institution, the CU Art Museum promotes the excellence, preservation, scholarly interpretation, exhibition and growth of its comprehensive permanent collection, which includes artworks from numerous time periods, artistic traditions and cultures. The new 25,000-square-foot CU Art Museum contains five galleries including permanent collection galleries, changing exhibition galleries and a video gallery. The CU Art Museum also includes a collections study center, allowing students, faculty and researchers the opportunity to schedule appointments to view, research and study works in its permanent collection.

The CU Art Museum's Permanent Collection

The Permanent Collection of the CU Art Museum contains over 6,000 works of art. The collection includes works from numerous time periods and cultures including ancient Greek pottery, Roman Glass, ancient Iranian pottery, Southwestern and South American santos, Southeast Asian pottery, African sculpture, Old Master works on paper, British 18th century prints, 19th and 20th century American prints and paintings, Japanese *ukiyo-e* prints, 19th century photography, Pop art, Minimalist works on paper and modern and contemporary ceramics, sculpture, works on paper, paintings, photography, video and new media art.

Visiting Scholar Program

This program is organized to explore the discipline of art history-its cultural connections, methodological pursuits and its changing nature-by focusing extensively on the research and insights of individual academic experts. Three to five highly regarded art historians and/or art critics speak at a public lecture, presenting current research and published papers. During their week-long visit they work closely with students enrolled in the Visiting Scholar Seminar.

Visiting Artist Program

Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

Visual Resources Center (VRC)

The mission of the VRC is to provide and facilitate access to images, imaging and related information resources for teaching and research in the Department of Art and Art History. This includes: 1) a departmental image collection and support for other important image resources; 2) resources, training and support in digital imaging and image presentation software; and 3) equipment for use in creative work, documentation and classrooms within the department. The digital image collection contains works by faculty, MFA thesis recipients, visiting artists and other contemporary and historical works. Digital imaging resources include slide and flatbed scanning stations, with training available in digitization standards and best practices. VRC equipment includes laptops, data projectors, digital SLR cameras, video cameras, tripods and other equipment for use in the department. The VRC also circulates its collection of DVDs containing lectures and interviews from the department's Visiting Artist Program. More information is available at cuart.colorado.edu/resources/vrc (<http://cuart.colorado.edu/resources/vrc>).

Master's Degrees

- Art History - Master of Arts (MA) (p. 901)
- Art Practices - Master of Fine Arts (MFA) (p. 903)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alhadeff, Albert (https://experts.colorado.edu/display/fisid_100711)
Associate Professor; PhD, New York University

Ambrose, Kirk T (https://experts.colorado.edu/display/fisid_115914)
Professor; PhD, University of Michigan Ann Arbor

Amerika, Mark (https://experts.colorado.edu/display/fisid_116523)
Professor; MFA, Brown University

Beitz, Michael D (https://experts.colorado.edu/display/fisid_156062)
Assistant Professor; MFA, SUNY at Buffalo

Brown, Marilyn Ruth (https://experts.colorado.edu/display/fisid_143782)
Professor; PhD, Yale University

Chamberlin, H Scott (https://experts.colorado.edu/display/fisid_105456)
Professor; MFA, New York State Col of Ceramics at Alfred Univ

Charteris, Frances (https://experts.colorado.edu/display/fisid_100730)
Lecturer; MFA, University of California-San Diego

Chong, Albert (https://experts.colorado.edu/display/fisid_100586)
Professor; MFA, University of California-San Diego

Cline, Clinton C.
Professor Emeritus

Cordova, James M. (https://experts.colorado.edu/display/fisid_146415)
Associate Professor; PhD, Tulane University of Louisiana

Day, Robert E.
Professor Emeritus

de Stecher, Annette W (https://experts.colorado.edu/display/fisid_155095)
Assistant Professor; PhD, Carleton University (Canada)

Dickey, Kimberly (https://experts.colorado.edu/display/fisid_115735)
Professor; MFA, New York State Col of Ceramics at Alfred Univ

Duresse-Stimilli, Françoise (https://experts.colorado.edu/display/fisid_144418)
Associate Professor; MFA, Temple University

Eades, Luis E.
Professor Emeritus

Ecker, Robert R.
Professor Emeritus

Farago, Claire Joan (https://experts.colorado.edu/display/fisid_101552)
Professor; PhD, University of Virginia

Forsman, Charles S.
Professor Emeritus

Foster, Suzanne R.
Professor Emeritus

Frost, Steven Earl (https://experts.colorado.edu/display/fisid_156502)
Instructor

Geck, Francis J.
Professor Emeritus

Gregorio, Alvin P (https://experts.colorado.edu/display/fisid_143596)
Associate Professor; MFA, Claremont Graduate School

Haynes, Deborah J.
Professor Emeritus

Iwamasa, Ken
Professor Emeritus

Kunkel, Jerry W.
Professor Emeritus

Miller, Kay
Professor Emeritus

Minor, Vernon H.
Professor Emeritus

Nauman, Robert (https://experts.colorado.edu/display/fisid_106835)
Senior Instructor; PhD, University of New Mexico

Potter, Thomas J.
Professor Emeritus

Qualley, Charles A.
Professor Emeritus

Quinn, Jeanne (https://experts.colorado.edu/display/fisid_111658)
Associate Professor; MFA, University of Washington

Rivera, George F (https://experts.colorado.edu/display/fisid_103055)
Professor; PhD, SUNY at Buffalo

Roth, Yumi J (https://experts.colorado.edu/display/fisid_126287)
Associate Professor; MFA, SUNY College at New Paltz

Sampson, John Franklin
Professor Emeritus

Saxton, Richard W (https://experts.colorado.edu/display/fisid_144756)
Associate Professor; MFA, Indiana University Bloomington

Stevens, Charlene (https://experts.colorado.edu/display/fisid_143589)
Associate Professor; MFA, Indiana University Bloomington

Sweetman, Alex John (https://experts.colorado.edu/display/fisid_100531)
Associate Professor; MFA, SUNY at Buffalo

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318)
Associate Professor; PhD, University of California-San Diego

Valdovino, Luis Hector (https://experts.colorado.edu/display/fisid_101863)
Professor; MFA, University of Illinois at Urbana-Champaign

van Lil, Kira (https://experts.colorado.edu/display/fisid_145210)
Assistant Professor; PhD, Ludwig-Maximilians Univ of Munich (Germany)

Vandersall, Amy L.
Professor Emeritus

Walker, Melanie (https://experts.colorado.edu/display/fisid_101750)
Associate Professor; MFA, Florida State University

Wilson, John B.
Professor Emeritus

Wolfe, Lynn Robert
Professor Emeritus

Womack, Mike Fitzgerald (https://experts.colorado.edu/display/fisid_148502)
Assistant Professor; MFA, Pratt Institute

Woodman, Elizabeth A.
Professor Emeritus

Professor Emeritus

Yazzie, Melanie A. (https://experts.colorado.edu/display/fisid_143620)
Professor; MFA, University of Colorado Boulder

Courses

ARTF 5000 (3) Advanced Digital Postproduction

Explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio and optical effects treatments. Cannot be taken simultaneously with FILM 3400 or FILM 3600.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4000

Requisites: Requires prerequisite courses of FILM 2500 and FILM 3400 or FILM 3600 and FILM 1502 and FILM 2000 or FILM 2300 (all minimum grade (D-)).

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5003 (3) Film and Literature

Explores similarities and differences between literature and film as narrative arts. Studies novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4003

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4004 and HUMN 4004

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 3051 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5010 (1-3) Topics in Film Studies-Production

Prepares students for advanced Film Studies production courses. Subject matter varies each semester.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4010

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5013 (3) Film, Photography and Modernism

Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4013

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5021 (3) Directing/Acting for the Camera

Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4021

Requisites: Restricted to graduate students only.

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5023 (3) Topics in International Cinema

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4023

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-). Restricted to graduate students only.

Recommended: Prerequisites FILM 3051 and FILM 3061.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5024 (3) Advanced Research Seminar

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4024

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites FILM 3051 and FILM 3061.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5030 (3) Visiting Filmmakers Seminar

Examines creative issues in contemporary cinema art. Graduate and advanced undergraduate students explore filmmaking ideas with guest artists within a seminar setting. Filmmakers, videographers and programmers of national and international reputation, with an emphasis on "experimental" practice, interact with graduate and advanced undergraduate students and discuss their work at seminar meetings, public lectures or events.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites FILM 1502 and FILM 4453 or instructor consent required.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5043 (1-3) Topics in Film Studies-Critical Studies

Prepares students for advanced Film Studies critical studies courses. Subject matter varies each semester.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4043

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5105 (3) Advanced Screenwriting

Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Department enforced prerequisite: approved writing sample.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4105

Recommended: Prerequisites FILM 3051 and FILM 3061.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5200 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4200 and MCEN 4151 and MCEN 5151

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5400 (3) Digital Post-Production

Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4400

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5453 (3) Elective Affinities: Avant-Garde Film and the Arts

Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4453

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5500 (3) Cinema Production 2

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4500

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of FILM 3400 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5600 (3) Creative Digital Cinematography

Explores creative approaches to single camera digital cinematography through short projects, discussions and screenings. Relates creative photography and poetic approaches to the digital camera cinema.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4600

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite courses of FILM 2000 and FILM 3600 or ARTS 4246 or ARTS 5346 (all minimum grade D-). Restricted to Film Studies (FILM) majors only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5604 (3) Colloquium in Film Aesthetics

Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4604

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5610 (3) Image-makers Graduate Seminar

Explores advanced graduate studio work in a seminar setting. Focuses on the development of ideas and activities which advance creative image making.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5717 (1-3) Graduate Studio Critique

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5846 (1-3) Graduate Independent Study-Video

Participate in graduate independent study.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5857 (1-3) Graduate Independent Study

Participate in graduate independent study.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 6959 (1-6) Master's Thesis Film

Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAMA in Film.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTF 5004 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTH 5029 (1) Art History Research Methods

Learn to expertly navigate art scholarship and be prepared to do thesis-level research. An introduction to the vast array of art historical resources and their uses. Explore advanced techniques for searching both online and offline sources of art information. Master the various modes of art historical research, including finding iconographic, historical, or technical information.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4029 and LIBR 4029

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and ARTH 4109 and ARTH 5109

Additional Information: Departmental Category: Art History

ARTH 5119 (3) Roman Sculpture

Examines ancient Roman sculpture with emphasis on the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4119 and CLAS 4119 and CLAS 5119

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4139 and CLAS 4139 and CLAS 5139

Additional Information: Departmental Category: Art History

ARTH 5159 (3) Hellenistic Art and Archaeology

Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5159

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4169 and CLAS 4169 and CLAS 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 5179 (3) City of Athens

Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periklean period, considering ways in which it developed from earlier times and influenced later ones in Athens.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5179

Additional Information: Departmental Category: Art History

ARTH 5189 (3) City of Rome

Explores in detail the architecture, sculptures, coins, frescos and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5189

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4229 and CLAS 4229 and CLAS 5229

Additional Information: Departmental Category: Art History

ARTH 5269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire', Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4269 CLAS 4269 and CLAS 5269

Additional Information: Departmental Category: Art History

Departmental Category: Asia Content

ARTH 5909 (1-3) Graduate Independent Study---Art History

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5929 (1-3) Special Topics in Art History

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4929

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

Additional Information: Departmental Category: Art History

ARTH 5939 (3-6) Art Museum Internship

Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4939

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 5949 (3) Visiting Scholars Seminar

Brings speakers to campus to work with seminar students, usually four guest scholars per semester, subjects vary. Students read scholar's work and discuss methodological issues. Focuses on the research and insight of scholars who are currently shaping the field and defining research agendas. Required for all MA art history students, open to others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5959 (3) Introduction to Critical Theory for Visual Studies

Provides overview for critical theory from Marx to contemporary writers with emphasis on their relevance to visual studies. Addresses issues that underlie a wide range of academic discussion in arts and sciences. Foucault, Derrida, Said, Lacan and other authors will be subject to weekly discussions leading to research papers, presentations, and projects. Class fulfills critical theory requirement for MFA and MA students.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and HIST 6150 and ANTH 6150

Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 6929 (3) Seminar: Theories of Art History

Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. Required for MA (art history) students.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

Additional Information: Departmental Category: Art History

ARTH 6939 (3) Graduate Seminar: Open Topics in Art History

Subjects and topics vary.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

Additional Information: Departmental Category: Art History

ARTH 6949 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Art History

ARTH 6959 (1-6) Master's Thesis (Art History)

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 6969 (1-6) Master's Project (Art History)

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Art History

ARTS 5017 (1-3) Special Topics in Studio Arts

Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4017

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5024 (3) Public Art

Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4024

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5075 (3) Graduate Ceramics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ceramics

ARTS 5087 (3) Selected Topics in Contemporary Art

Selectively studies significant areas of visual art of the last decade including major critical opinions.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4087

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5095 (3) Graduate Special Topics in Ceramics

Designed for students majoring in ceramics.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4095

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ceramics

ARTS 5097 (1-3) Special Topics-Non-Studio

Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4097

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5104 (3) Graduate Performance/Installation

Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4104

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5107 (1-3) Special Topics

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5117 (3) Graduate Art Seminar

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5118 (3) Graduate Visiting Artist Program

Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4118

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Visiting Artist Program

ARTS 5126 (3) Graduate Digital Art 2

Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4126

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5130 (3) Integrated Media

Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4130

Additional Information: Departmental Category: Integrated Arts

ARTS 5140 (3) Integrated Arts Studio

Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Integrated Arts

ARTS 5150 (3) Graduate Integrated Arts

Investigates the conjunction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. A curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.

Repeatable: Repeatable for up to 18.00 total credit hours.

Additional Information: Departmental Category: Integrated Arts

ARTS 5154 (3) Metalsmithing 1

Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4154

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5161 (3) Graduate Photography

Repeatable: Repeatable for up to 18.00 total credit hours.

Additional Information: Departmental Category: Photography

ARTS 5171 (3) New Directions in Photography

Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4171

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Photography

ARTS 5176 (3) Graduate New Directions in Digital Art

Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4176

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5196 (3) Graduate Advanced Photo-Imaging

Offers an in-depth exploration of digital imaging in the context of the history, aesthetics, and tradition of photography as contemporary art. Emphasis is on digital manipulation, output and individual growth and development.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4196

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Media Arts

ARTS 5202 (3) Graduate Painting

Repeatable: Repeatable for up to 18.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 5217 (3) Art and Race/Ethnicity

Examines the impact of race and ethnicity on the art world. Examines the art of Native Americans, Chicanos, Puerto Ricans, Cuban Americans, Latin Americans, African Americans, Asian Americans and ethnic and cultural mixing. Grounded in Critical Multicultural Theory and Postcolonial Theory.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4217

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5226 (3) Graduate Advanced Computer Imaging

Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4226

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 5126 (minimum grade D-).

Additional Information: Departmental Category: Media Arts

ARTS 5236 (3) Graduate Electronic Arts Survey 2

Continuation of electronic arts survey. Explores the development of video as an art form. Prerequisite for further studies in video production.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4236

Additional Information: Departmental Category: Media Arts

ARTS 5246 (3) Graduate Beginning Video Production

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4246 and FILM 4240

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5303 (3-18) Graduate Relief

Continues the study of the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages. Students with limited experience in relief processes will be given an overview in those practices.

Repeatable: Repeatable for up to 18.00 total credit hours.

Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 5316 (3) Graduate History and Theory of Digital Arts

Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4316

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5327 (3) Biennial Art

Covers art represented in the most current international biennials (Documenta, Venice Bienale, Sao Paulo Biennial, Havana Biennial, Gwanju Biennial and the Istanbul Biennial). Art will be analyzed by applying postmodern theory, postcolonial theory and international theoretical perspectives that have not yet been integrated into Western thought.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4327

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5346 (3) Graduate Intermediate Video Production

Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4346 and FILM 4340

Requisites: Requires prerequisite course of ARTS 4246 or ARTS 5246 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5403 (3) Graduate Intaglio

Continuation of the study of expressive and formal aesthetics of Intaglio processes. Studio practice and investigation of artistic attitudes as exemplified through historical perspectives, traditional, and contemporary usages. Building a body of work in this course is the goal. Taught with ARTS 3403 and ARTS 4403.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5413 (3) Graduate Lithography

Taught with ARTS 3413 and ARTS 4413.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5423 (3) Graduate Screen Printing

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5433 (3) Graduate Alternative Printmaking (Non-Toxic)

Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4433

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5444 (6) Art and Rural Environments Field School

Puts students in touch with various rural landscapes in Colorado. Takes place off campus each summer during Maymester. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place, and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4444

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5446 (3) Graduate Advanced Video Production

Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4446 and FILM 4440

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5453 (3) Graduate Monotype Printing

Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4453

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5457 (3) Sound Art Seminar

Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4457

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5504 (3) Graduate Sculpture

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5540 (3) Generative Art

Attends to the interdisciplinary pursuits of scientists, humanists and anyone interested in creating works of visual art according to step by step procedures as in musical compositions, mathematical formulae, linguistic rules, computer programs, etc. Includes collaborative and individual projects.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Integrated Arts

ARTS 5607 (3) Art and Social Change

Examines how art is used as an agent for social change. Among topics addressed by artists interested in social change are: immigration, HIV/AIDS, illness/disease, ecology/the environment, feminism, gay and lesbian issues, war, violence, racial and ethnic minorities, etc.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4607

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5717 (1-3) Graduate Studio Critique

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5857 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5901 (1-3) Graduate Independent Study---Photography

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Photography

ARTS 6957 (1-6) Master of Fine Arts Creative Thesis

Additional Information: Departmental Category: Seminars/Special Topics

Art History - Master of Arts (MA)

The art history program at CU Boulder gives students an interdisciplinary foundation in the history of art to prepare them for careers as scholars, museum professionals and related creative professions in the history of art. Its main objective – through graduate seminars, teaching

opportunities, museum internships and scholarly fieldwork – is to foster critical thinking about contemporary and historical forms of art as well as visual and material culture.

Students develop their specialized interests from a combination of individual mentoring and collaborative approaches to intellectual inquiry. The program offers a supportive environment committed to debate and experimentation applicable to a variety of career choices. Graduates typically regard their two years in the art history master's program as a formative period of intellectual growth and professional experience.

Our diverse faculty offers a constantly changing curriculum of seminar topics geared to highlight current research, and a strong foundation in critical historiography and contemporary critical theory. Students in our interdisciplinary program also take advantage of exciting course offerings in cultural anthropology, classics, history, a wide range of literature programs, ethnic studies, gender and women's studies, art practices, and new media.

Our intimate atmosphere offers exceptional opportunities to work with permanent faculty and distinguished art historians from other institutions through our Visiting Scholars program. This longstanding feature of our graduate curriculum brings four to six leading scholars to campus every year to present their current work in a graduate seminar, public lecture and informal events.

Areas of specialization include: medieval art, Renaissance art and art theory, Latin American, Native North American, modern art and architecture, contemporary art and critical theory.

Concurrent Degree Program BA/MA in Art History

This program is open only to students enrolled in the BA art history degree program at CU Boulder.

It is expected that the BA/MA program be completed within five years. Both degrees, BA and MA, are awarded simultaneously upon meeting all the requirements for each degree. Six credit hours (two courses) may be shared between the two programs:

1. one course outside the Department of Art and Art History at the 3000 level or above
2. ARTH 6929

There is a formal application process with letters of recommendation, statement of intent, transcripts, GRE scores and a writing sample, as required for the two-year MA program. Students must have a minimum overall GPA of 3.00 and a GPA of 3.60 or above in the major of art history at the time of application. They take the GRE and formally apply to the graduate program during the second semester of their third (junior) year and begin taking graduate courses in the first semester of their fourth (senior) year. By the end of the fourth year, students must complete the language requirement of at least three progressive semesters at the college level or above, in a language appropriate to their studies.

During the second semester of their senior year, students should select a thesis advisor from among the art history faculty. This faculty member will direct the student's thesis and chair the student's mid-program review committee. Students will be evaluated through a mid-program review during the last two weeks of April of their senior year. This is the equivalent of the first year review in the two-year MA program. It focuses on a review of student course work and performance, on selecting the

major and minor areas of study in preparation for the comprehensive exam (see below) and on selection of a thesis topic.

Students will register for thesis hours during the second semester of their fifth year, pending successful completion of the comprehensive exam and approval of their thesis abstract. They will take the comprehensive exam during the first week of the second semester of the fifth year. Upon the successful completion of their comprehensive exam, they will obtain approval of their thesis abstract from their thesis committee ("pre-thesis review") by the end of the second week of the second semester of their fifth year.

In all other details, the graduate portion of the BA/MA program is identical to the two-year MA program, as stipulated above.

Dual Degree Program

MA/MBA in Art History

To support the university's mission of advancing knowledge across disciplines, and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business and Department of Art and Art History endorse a dual degree program in which both a Master of Business Administration and a Master of Fine Arts (or Master of Arts in art history) is awarded to those students who satisfy the requirements outlined below. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially.

Admissions Process and Degree Requirements

Students must apply to and meet the application requirements for each program separately. Admitted students spend their first year in one of the two programs, the second year in the other program and the third year is a combination of the two. MFA students are required to complete 43 credit hours of MBA course work and 45 credit hours of AAH course work. MA (art history) students are required to complete 43 credit hours of MBA course work and 30 credit hours of art history course work. Both degrees must be awarded simultaneously.

Note: Residents of Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program. For more information, visit the "Western Regional Graduate Program" section on the Office of the Registrar's Exceptions to One-Year Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions>) webpage.

Requirements

Prerequisites

The following are required for admission to the graduate program:

1. A baccalaureate degree from an approved college with a cumulative grade point average of at least 3.00.
2. A score of 153 or higher on the verbal section and an above-average score (at least 60 percent below) on all other sections of the Graduate Record Examination.
3. A broad general background in history, literature and philosophy.
4. An extensive background in art history.
5. Applicants to the master's program in art history are asked to write a 750- to 1,000-word essay in Part II, number 6 on the application form. Applicants are also required to provide a writing sample of approximately 10–20 pages. Typically, this is a paper submitted for an undergraduate class.

Advisor

Upon admission, students are assigned a faculty advisor. Students should remain in close contact with the advisor as regards course registration and program requirements. At the end of the second semester of full time study, students should select a thesis advisor (or project advisor) from among the art history faculty.

Course Requirements

The candidate for the MA degree in art history is required to demonstrate an adequate reading knowledge of French, German or another appropriate language before receiving the degree by satisfactory course work equal to three progressive semesters at the college level or above, or by passing an approved language examination. Language examinations may be arranged with one of the art history faculty on an individual basis.

Students are encouraged and expected to attend undergraduate lecture courses as needed to prepare themselves for graduate seminars and for the comprehensive exam.

No more than 9 credit hours of independent study credit may be applied toward the MA degree. A limit of 9 credit hours of transfer credits may be applied toward the MA degree.

Degree Plans

Plan I: Thesis Option

A minimum of 30 credit hours must be completed, of which 21 must be completed in residence on the Boulder campus.

Required Courses

ARTH 6929	Seminar: Theories of Art History ¹	3
ARTH 5949	Visiting Scholars Seminar ²	3
ARTH 6959	Master's Thesis (Art History)	4-6

Electives

At least one 3-credit-hour, 5000- or 6000-level course in four of the following areas of art history: medieval, early modern and Renaissance, art of the Americas, Asian art, modern art, contemporary art and critical theory/museology. When available, ancient art may constitute an area.	12
---	----

At least one 3-credit-hour, 3000-level or above course in a department outside the Department of Art and Art History that supplements the major or minor areas of specialization.

Additional courses to meet the 30-credit hour minimum.	5-3
--	-----

Total Credit Hours	30
--------------------	----

¹ Must be taken during the first semester, and may be taken twice for up to 6 credit hours.

² Must be taken during the second semester when offered. Students are encouraged to repeat this course.

First-Year Review

During the last two weeks of April, students are evaluated during the first-year review. It focuses on a review of student course work and performance, on selecting the major and minor areas of study in preparation for the comprehensive exam (see below) and on selection of a thesis topic, if applicable.

Comprehensive Exam

This exam is given to measure the graduate student's knowledge of art history at the MA level. It consists of essay questions pertinent to the student's major and minor areas of study. It is given once per year during the second week of October. The comprehensive exam consists of two

essays: a two-hour essay in the major area and a 90-minute essay in the minor area. Students must pass the comprehensive exam in order to be eligible to register for thesis credit hours.

Thesis Abstract ("pre-thesis review")

By the end of the semester preceding the student's thesis semester, the student will prepare an abstract of approximately 1–2 typewritten pages, with attached bibliography, outlining the thesis topic and method of inquiry. The thesis abstract must be approved by the student's pre-thesis review committee in order for the student to register for thesis hours.

Thesis

This should demonstrate scholarly research and writing in art history, should be based on independent study and analysis and should represent the equivalent of 4–6 credit hours. In most cases, the master's thesis is the equivalent of a 40–50 page paper, exclusive of endnotes, bibliography and illustrations.

Thesis Defense

In consultation with the thesis advisor, the student will select a thesis committee that consists of not less than three members of the art history graduate faculty, including the thesis advisor. The student will then schedule the thesis defense and prepare all necessary paperwork. The thesis must be submitted to all members of the thesis committee at least one week before the thesis defense. Graduate School guidelines ("specifications") must be used to prepare the MA thesis. Upon successful defense, the thesis is submitted to the Graduate School in the electronic form specified by the Graduate School, in accordance with the Graduate School's deadlines. A hard copy of the signature page, complete with the thesis committee members' signatures, is submitted to, and remains in, the Graduate School.

Plan II: Project Option

A minimum of 36 credit hours must be completed, of which 21 must be completed in residence on the Boulder campus.

Required Courses

ARTH 6929	Seminar: Theories of Art History ¹	3
ARTH 5949	Visiting Scholars Seminar ²	3
ARTH 6969	Master's Project (Art History)	4-6

Electives

At least one 3-credit-hour, 5000- or 6000-level course in four of the following areas of art history: medieval, early modern and Renaissance, art of the Americas, Asian art, modern art, contemporary art and critical theory/museology. When available, ancient art may constitute an area. 12

At least one 3-credit-hour, 3000-level or above course in a department outside the Department of Art and Art History that supplements the major or minor areas of specialization. 3

Additional courses to meet the 36-credit hour minimum. 11-9

Total Credit Hours 36

¹ Must be taken during the first semester, and may be taken twice for up to 6 credit hours.

² Must be taken during the second semester when offered. Students are encouraged to repeat this course.

Time Limit

It is expected that the MA program be completed within two years.

Art Practices - Master of Fine Arts (MFA)

The art practices areas include ceramics, painting and drawing, IMAP (Interdisciplinary Media Arts Practice: photography, video, digital arts and integrated arts), film (in collaboration with the Film Studies Program), printmaking and sculpture.

Concurrent Degree Program

BA/MFA in Film Studies and Art Practices (Film Track)

The film studies/art practices bachelor of arts/master of fine arts critical studies degree gives highly motivated BA students the opportunity to earn an MFA degree using an accelerated undergraduate program in combination with a fifth year of study.

Program Description

The BA/MFA degree in film studies (FS) is a critical studies track under the auspices of the art practices MFA program. This collaboration between the Film Studies Program and the Department of Art and Art History is an extension of our common interests in visual art. The Film Studies tenured and tenure-track faculty also have graduate faculty standing within Art and Art History.

The BA/MFA track prepares students for professional careers in teaching and criticism, from the perspective of innovative critical approaches and in preparation for a PhD track at another university. The aim of the BA/MFA film program is to aid in the advancement of the scholarly understanding of film art, with emphasis on theoretical and research approaches and their role in academia. The BA/MFA will, therefore, prepare its graduates to assume the responsibilities of the academic study of cinema as one of the fine arts and to pursue careers in teaching, research, curating and the overall advancement of the study of cinema as art.

The program offers studies leading to the MFA in the areas of film criticism and theory. Advanced students are encouraged to explore interdisciplinary approaches as well as to enhance their program of study with cognate courses in other departments such as history, comparative literature, anthropology, English, women's studies, ethnic studies, Spanish and Portuguese, French and Italian, Germanic and Slavic languages and literatures and others. Film studies offers a broad selection of seminar topics on their current faculty research interests and in response to student demand. The Visiting Film Artist program brings additional distinguished, innovative film and video artists and critics to campus and students are encouraged to register for their seminars.

Admission to the Program

- Admission to the program occurs during the second semester of the junior year. Applicant should have a cumulative GPA of 3.3 and have completed all MAPS deficiencies. All applicants will provide a copy of their (internal) CU transcript. (Please note: Applicant should specify on the on the form that they are applying for the spring term, BA/MFA degree, major codes AS-FLM2 and GR-ART). After completing the top portion of the form, the student should make an appointment with the Director, Professor Ernesto Acevedo-Muñoz (www.colorado.edu/filmstudies/ernesto-acevedo-munoz (<http://www.colorado.edu/filmstudies/ernesto-acevedo-munoz>)).
- The sole application deadline is the second Monday in October. Please submit the standard BA/MA application form (http://www.colorado.edu/GraduateSchool/academics/_docs/Concurrentapplication.pdf) with your package. Note: Applicants

should specify on the form that they are applying for the spring term, BA/MFA degree, major codes AS-FLM2 and GR-ART2.

- Students will secure the sponsorship and/or advisory commitment of a Film Studies faculty member at the rank of assistant professor or higher. The applicant will include a brief letter or statement from the Faculty member attesting to the advisory relationship.
- Applicants will submit a one-page prospectus detailing a possible research topic for an MFA thesis. The prospectus must include a minimum bibliography of 10–15 items.
- "October Surprise": Applicants must successfully complete a writing assignment in the form of a 10–12 page analytical/theoretical or historical argument paper on a film determined by the faculty. Students will pick up a DVD and a "prompt" or question in the Film Studies office at 4 p.m. on the Friday before the application is due. Over the weekend, the applicants must watch the movie, do some research, make an argument, and write the paper, which will be handed in with the application Monday at 9 a.m. The "October Surprise" portion of the application process is designed to have students demonstrate their writing skills and their ability to find, define, and argue a topic in a fairly sophisticated manner for an aspiring master's student.
- Only currently enrolled, University of Colorado Boulder students, may be considered for admission to the program. Transfer students must complete at least 24 credit hours as a degree-seeking student before applying to the program.
- Student enrolled in the BA/MFA track cannot pursue a double major or double degree of any kind.

Requirements

Prerequisites

The following are required for admission to the graduate program:

- Bachelor's degree from an approved college or school of art with a minimum grade point average of 2.750.
- Minimum of 34 credit hours of acceptable work in art; 12 credit hours in fine arts history is preferred.
- Submission of a portfolio, including 20 images, representing creative work, a written statement of goals and objectives and an artist statement.
- Applicants interested in IMAP-Video or film track should submit their portfolios on DVDs, for screening by the IMAP and film committees.

Advisor

Upon admission, students are assigned a tenured or tenure-track faculty member to serve as an academic advisor in the student's area of purpose.

Course Requirements

A minimum of 54 credit hours (of which 36 credit hours must be taken in residence on the Boulder campus) of acceptable graduate work must be completed beyond the bachelor's degree.

Procedures for transferring credit from other graduate programs are governed by the regulations of the Graduate School. Transfer credit, not to exceed 18 credit hours for studio arts or nine credit hours for art history, must first be approved by the student's academic advisor, associate chair and the Graduate School.

Students who wish to change their area of concentration after admission must petition the art practices curriculum committee.

Required Courses and Semester Credit Hours

Home studio (major area)—min. 12	12
Electives (student and non-studio; up to 6 credit hours may be taken in an allied field, at the 3000 level and above)	21
Art history, theory or film critical studies	9
Visiting Artist Seminar	3
Graduate Art Seminar	3
Thesis	6
Total Credit Hours	54

Film Track

ARTF 5030 is allowed as a substitute for ARTS 5118.

Program Requirements

First-Semester and First-Year Reviews

In consultation with the advisor, the student will establish the membership of his or her committee, consisting of a minimum of three faculty members and one second-year graduate student, and schedule the first semester review; its purpose is to give feedback to the student with regard to progress toward the degree. At the end of the first year, the committee is convened for a first year review; its purpose is to evaluate the student's progress in the program and to determine if she or he will continue in the program.

Pre-Thesis Review

At the end of the semester preceding the graduating semester, the pre-thesis review takes place. Its purpose is for the graduate student to present the focus of his or her written thesis and exhibition, to review and evaluate the student's progress in the program, and to determine if the student is ready to register for thesis hours.

Thesis/Exhibition/Defense

The MFA thesis defense must be conducted while the student's work is on view during the MFA Exhibition. The MFA thesis must be submitted in its final draft form to all the thesis committee members two weeks prior to the scheduled thesis defense. After the defense, two copies of the thesis, with the required signatures on the signature sheet, must be turned into the Graduate Program Coordinator. One of these is catalogued in the Norlin Library.

Time Limit

It is expected that the MFA program be completed within two-and-a-half years.

Graduation

Before registering for ARTS 6957, students must have a pre-thesis review with their faculty advisor and thesis committee. Studio arts thesis work must take the form of original creative work of acceptable professional standards. The oral defense exam must be done in conjunction with the thesis exhibition, and the candidate must provide a critical written statement (creative thesis) concerning the work. The candidate's written creative thesis is housed with the Art and Architecture Collection in Norlin Library, and 10-15 digital images (representing work in the exhibition) become part of and are housed with the departmental Visual Resources Center. The committee may request a contribution of original work.

Asian Languages and Civilizations

The Department of Asian Languages and Civilizations offers BA/MA, MA, Dual MA and PhD graduate degrees with specializations in Chinese (<https://www.colorado.edu/alc/graduate/chinese>) or Japanese (<https://www.colorado.edu/alc/graduate/japanese>). Celebrating a history of over 30 years, the department offers small class sizes that allow ALC graduate students the opportunity to work closely with faculty who are noted scholars in their fields.

For more information about the Department of Asian Languages and Civilizations, please visit the department website (<https://www.colorado.edu/alc>).

Course codes for these programs are **CHIN** and **JPNS**.

Master's Degree

- Asian Languages and Civilizations - Master of Arts (MA) (p. 910)

Doctoral Degree

- Asian Languages and Civilizations - Doctor of Philosophy (PhD) (p. 911)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

CHIN 5010 (3) Sinological Methods

Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as leishu, congshu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5030 (3) Readings in Pre-Modern Chinese Literary Theory

Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5120 (3) History of Literature through the Ninth Century

Surveys, with readings in primary and secondary sources, major landmarks in various areas of ancient and medieval literature. Focuses on the classic and most influential works of the Zhou through Tang dynasties. Gives attention to matters of historical fact and actuality as well as to textual and interpretive history.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5130 (3) History of Chinese Literature from the Tenth to the Nineteenth Century

Survey of Chinese literature from the tenth to the nineteenth century, with readings in primary and secondary sources. Focuses on the major literary works, genres, figures, and movements of the Song through the Qing dynasties.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5210 (3) Ancient Prose

Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lun yu, Mengzi, Zhuangzi, Huainanzi, Shiji, Hanshu, and Lunheng. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5220 (3) Ancient Poetry

Studies selected pre-imperial and Han poetic works important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on the Shijing and the Chu ci, as well as the fu and shi of Han writers. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5230 (3) History of Early Chinese Thought

Introduces early Chinese philosophy, mostly "Masters' Literature" of the 5th–1st c. BCE, which is foundational for all later Chinese philosophy and political thought. Close reading of primary sources will be combined with an introduction to secondary scholarship in English and modern Chinese, both articles on individual texts/philosophers and comprehensive histories of early Chinese philosophy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5280 (3) Topics in Ancient Literature

Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5410 (3) Medieval Prose

Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) prose that played important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5420 (3) Medieval Poetry

Studies works of early medieval (ca. 200-600 AD) poetry. Writers and topics vary ranging from surveys of specific genre, shi or fu, or shared subject such as religious or commemorative verse, or specific periods, to focused studies of particular major figures Cao Zhi, Tao Qian, Li Bo, or Du Fu. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5430 (3) Medieval Thought and Religion

Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. Knowledge of Classical Chinese at the level of CHIN 4220 is required..

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5480 (3) Topics in Medieval Literature

Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5610 (3) Early Modern Prose

Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5620 (3) Early Modern Poetry

Studies Song, Yuan, Ming and Qing poetry. Stresses major figures, stylistic variations, various poetry schools, new directions in shi verse, and the rise and development of ci. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5630 (3) Early Modern Fiction

Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as *Xiyou ji*, *Sanguo yanyi*, *Shuihu zhuan*, *Jin Ping Mei*, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5680 (3) Topics in Early Modern Literature

Examines a specific problem or issue in early modern literature (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5750 (3) Daoism

Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 4750 and RLST 4750 and RLST 5750

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5810 (3) Modern Literature

Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5820 (3) Contemporary Literature

Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5830 (3) History of Chinese Film

Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5880 (3) Topics in 20th Century Literature

Examines a specific problem or issue in 20th century literature, e.g., feminist fiction in China, modernism in fiction and poetry, or the role of literary criticism in modern literature. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5890 (3) Topics in Chinese Film

Examines a specific problem or issue in Chinese film, e.g. 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5900 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5980 (1) Practical Issues in Chinese Language Pedagogy

Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 4980

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6900 (1-6) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

JPNS 5010 (3) Bibliography and Research Methods

Introduces research materials on Japan in Japanese and Western languages, including bibliographic tools, style sheets, and library resources. Overview of secondary sources and publication outlets/methods of disseminating research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5020 (3) Methods of Teaching Japanese

Surveys pedagogical theory and methods for the teaching of Japanese as a second language, including issues of presentation, interaction, and evaluation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5050 (3) Japanese Sociolinguistics: Japanese Language and Society

Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4050 and LING 4050

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5070 (3) Second Language Acquisition of Japanese

Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4070

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5080 (3) Kanji in Japanese Orthography

Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4080

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5150 (3) Japanese Literary Translation

Explores theories and practice of translation of literary texts as applied to Japanese-English translation; strategies for handling a variety of texts; and professional standards and ethics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5210 (3) Classical Prose Literature

Examines selected prose works and authors from the Classical, or Heian, period (784-1185). Texts may include selections from diaries, tale literature, and *zuihitsu* such as Izumi Shikibu *Nikki*, Genji Monogatari, and Makura no Soshi. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5220 (3) Waka, Renga, and Haiku

Studies the three most important poetic forms in Japanese literary history. Emphasizes the reading and analysis of selected texts and authors that best represent these genres. Readings include selections from the first eight imperial poetry anthologies (*hachidaishu*), famous renga sequences (Minase Sangin *Hyakuin*, for example), and the haiku of Basho. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5280 (3) Topics in Classical Japanese Literature

Studies a specific problem or issue in classical (eighth through twelfth century) Japanese literature, e.g., the development of specifically Japanese theories of literature or the concept of genre in the Japanese tradition. Topics vary from year to year.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5310 (3) Advanced Classical Japanese 1

Focuses on stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras. Department enforced: knowledge of Classical Japanese at the level of JPNS 4310 is required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5320 (3) Advanced Classical Japanese 2

Advanced analysis of stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras, including kanbun and hentaigana; translation and explication of texts.

Requisites: Requires prerequisite course of JPNS 5310 (minimum grade C). Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5410 (3) Medieval Prose Literature

Focuses on selected prose works and authors from the medieval, or Kamakura and Muromachi periods (1185-1600). Texts may include selections from a variety of war tales, histories, courtly fiction, diaries, memoirs, short prose narratives (otogi-zoshi), Noh plays, and Buddhist literature such as Heike Monogatari, Towazugatari, Izayoi Nikki, Tsurezuregusa, and Shasekishu. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5420 (3) Japanese Buddhism and Literature

Studies selected works from the Japanese literary tradition in which Buddhism plays a significant thematic role. Focuses on texts such as the Nihon Ryoiki, Buddhist poetry (Shakkyo-Ka) from the imperial poetry anthologies, Heike Monogatari, Hojoki, the poetry of Saigyō and Bashō, and selected Noh plays. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5480 (3) Topics in Medieval Literature

Focuses on a specific problem or issue in medieval literature, e.g., the spread of literary composition beyond the court. Topics vary from year to year.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5610 (3) Japanese Dramatic Literature

Examines major writers and texts of the no, kyogen, kabuki, and bunraku theaters, including the plays and critical writings of such authors as Kannami Kiyotsugu, Zeami Motokiyo, Konparu Zenchiku, and Chikamatsu Monzaemon. Texts and secondary readings vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5620 (3) Early Modern Japanese Literature and Culture

Examines the literature, arts, drama and culture of Japan's early modern period in the original language, as well as secondary scholarship and methodologies for pursuing work on early modern materials. Genres covered include kana-zoshi, uklyo-zoshi, dangibon, yomihon, sharebon, kibiyoshi, ninjobon, kokkelbon, gokan, halkai, senryo, kyoka, joruri, kabuki, and literary thought.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5810 (3) Modern Japanese Literature

Studies selected texts in Japanese literature from the Meiji Restoration (1868) to the end of the Pacific War. Surveys various literary genres, emphasizing the development of the modern novel as an aspect of Japan's response to Western cultural forms. The unique cultural politics of each of the periods (Meiji, Taisho, and Showa) are illuminated through the filter of both canonical and more marginalized texts. Specific selections vary from year to year.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5820 (3) Contemporary Japanese Literature

Covers developments in Japanese prose fiction and/or other literary genres from the end of the Pacific War in 1945 to the present.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5830 (3) Readings in Modern and Contemporary Japanese Thought and Culture

Examines central issues in Japanese culture and society since the Meiji Restoration (1868) through selected readings of the works of major writers in the fields of literature, anthropology, feminism, political science, and religion, among others. Provides a broad context for cultural studies in modern and contemporary Japan by positioning the most important commentators within their historical and social situations.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5920 (1-3) Topics in Modern Literature and Culture

Close study of a specific problem or issue in modern or contemporary literature or culture: e.g., transwar literary nationalism. Formerly JPNS 5880.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5980 (1) Practical Issues in Japanese Language Pedagogy

Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language class. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning. Department enforced prerequisite: knowledge of Modern Japanese at the level of JPNS 4120.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4980

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6900 (1-6) Japanese Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6940 (1) Japanese Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6950 (1-6) Japanese Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

Asian Languages and Civilizations - Master of Arts (MA)

The MA program in Chinese is designed to offer students maximum general exposure to the long sweep of Chinese literary and cultural history, as well as the opportunity to delve into the study of a particular period, field, topic or genre. With six professors covering literature and culture from early China through the medieval era to the early modern period and contemporary China, the program is truly comprehensive in scope. The program focuses especially on preparing students for PhD study and careers in sinology. Since 1991, more than 50 graduates of the Chinese MA program have gone on to doctoral study here or at other first-rank institutions in the U.S.

The MA program in Japanese is designed to provide advanced-level training in Japanese language, literature and civilization, with the aim of preparing students for both Japan-related professional careers and doctoral study in Japanese literature and culture. The program boasts four professors with specializations in the literature and performing arts of classical, medieval, early-modern and modern Japan. In recent years, our MA students have gone on to PhD programs in Japanese literature,

art history and religious studies at this and numerous other first-rank institutions in the U.S. and abroad.

For more information, visit the department's Prospective Students (<http://www.colorado.edu/alc/graduate>), Chinese (<http://www.colorado.edu/alc/graduate/chinese>) and Japanese (<http://www.colorado.edu/alc/graduate/japanese>) webpages.

Concurrent Degree Program BA/MA in Chinese or Japanese and Asian Languages and Civilizations

The concurrent BA/MA (Bachelor of Arts/Master of Arts) degree program in Chinese or Japanese recognizes the need for master's-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the Chinese or Japanese language, knowledge of the culture of China or Japan and its literature, and the skills acquired by BA and MA graduates in the humanities: research, analysis, interpretation, translation and communication.

This degree offers a challenging and focused academic experience for exceptional students (particularly those who enter the university with significant preparation in Chinese or Japanese studies from high school or with other backgrounds, or those who participate in study abroad opportunities at CU) who demonstrate the ability to express their ideas clearly, both orally and in written form, using standard English. Highly motivated students who are accepted into the program begin graduate work no later than the senior year and earn both the BA and MA in five years. Students must have a minimum 3.25 GPA for all courses taken at CU Boulder and should have completed all MAPS and core requirements by the end of the sophomore year.

The application is open only to CU Boulder students. Students must submit the written application for admission (<http://www.colorado.edu/graduateschool/academic-forms>), along with a statement of purpose, a writing sample and three letters of recommendation, at least one from a full-time member of the Chinese or Japanese faculty, by Sept. 1 of their junior year (or, in exceptional circumstances, during the student's senior year) to the director of graduate studies in Chinese or Japanese (<https://www.colorado.edu/alc/graduate/advising>). Applications will be reviewed by the graduate faculty of Chinese or Japanese. Students interested in applying for this option must consult with the department's undergraduate academic advisor (<https://www.colorado.edu/alc/undergraduate/advising>) early in their career at CU to establish their program of study.

Please refer to the Chinese BA/MA (<https://www.colorado.edu/alc/graduate/chinese>) and Japanese BA/MA (<https://www.colorado.edu/alc/graduate/japanese>) pages on the department website for specific information about requirements and curriculum.

Dual Degree Program Dual MA in Asian Languages and Civilizations and History or Religious Studies

The Department of Asian Languages and Civilizations participates in a dual master's program with the Departments of History (<http://www.colorado.edu/history/graduate-students/ma-programs/dual-ma-programs>) and Religious Studies (<http://www.colorado.edu/rilst/graduate/dual-ma>). Students admitted to the MA programs in these departments may apply to complete a second MA in one of the other programs. Such degrees serve the needs of students who seek a truly interdisciplinary experience among intellectually affiliated

departments. Students interested in exploring this option should contact the director of graduate studies in Chinese or Japanese (<https://www.colorado.edu/alc/graduate/advising>) for specific requirements.

Requirements

The MA in Asian languages and civilizations offers specializations in Chinese or Japanese.

All entering students in the Chinese program must take CHIN 5010 at the earliest opportunity. Students employed as teaching assistants also must take CHIN 5980 or JPNS 5980. Selection of courses beyond these is made in consultation with the director of graduate studies in Chinese or Japanese (<https://www.colorado.edu/alc/graduate/advising>).

Prospective graduates will be required to present either 24 hours of approved course work plus a master's thesis (Plan I), or 30 hours of approved course work without a thesis (Plan II). The 24 hours must be completed at the 5000 level or above. Up to six credits from other departments may be completed at the 3000 or 4000 level at the discretion of the department.

Specific requirements for the MA in Chinese (<https://www.colorado.edu/alc/graduate/chinese>) and MA in Japanese (<https://www.colorado.edu/alc/graduate/japanese>), as well as a full list and description of graduate courses (<https://www.colorado.edu/alc/courses>) offered, are available on the department website.

Asian Languages and Civilizations - Doctor of Philosophy (PhD)

The PhD programs in Chinese and Japanese offer extensive training in the modern and premodern literatures of China and Japan for students seeking to pursue research and teaching careers at the collegiate level.

For more information, visit the department's Prospective Students (<https://www.colorado.edu/alc/graduate>), Chinese (<https://www.colorado.edu/alc/graduate/chinese>) and Japanese (<https://www.colorado.edu/alc/graduate/japanese>) webpages.

Requirements

The PhD in Asian languages and civilizations offers specializations in Chinese or Japanese with concentrations in literary and/or cultural studies of either the premodern or modern periods.

The PhD requires a minimum of 45 credit hours in graduate courses numbered 5000 or above in Chinese or Japanese, and 30 credit hours of dissertation work beyond the required course work. Selection of courses should be made in consultation with the director of graduate studies in Chinese or Japanese (see the department's Graduate Advising (<https://www.colorado.edu/alc/graduate/advising>) webpage). Academic preparation is expected in both classical and modern language.

Some graduate or advanced undergraduate course work from related fields may also be included, in accordance with Graduate School rules. Additionally, some course work completed for the MA degree at CU or other similarly rigorous institutions may count toward the 45 credit hours required. PhD students may transfer to the department up to 21 hours of acceptable graduate-level credit.

Visit the department's PhD in Chinese (<http://www.colorado.edu/alc/graduate/chinese>) and PhD in Japanese (<http://www.colorado.edu/alc/graduate/japanese>) webpages for specific requirements, as well as a full

list and description of graduate courses (<https://www.colorado.edu/alc/courses>) offered.

Asian Studies

The Center for Asian Studies was established in 1999 to advance knowledge of Asia through undergraduate and graduate education, faculty research and outreach programs for the broader community. The Center for Asian Studies is pleased to offer the Graduate Certificate in Asian Studies. In addition, a number of department and schools allow the pursuit of the study of Asia including the Leeds School of Business, Global Business Certificate with a Global Experience in Asia.

The center is committed to managing and expanding the interdisciplinary major in Asian Studies by providing student fellowships, scholarships, and study opportunities; by investing in faculty research and professional development; by providing support for building Asia-related resources on the CU Boulder campus; by developing academic exchanges with Asia-based colleagues and students; and by engaging the local community with Asia-related programs and events.

The center also serves to promote the university's Flagship 2030 Initiative to "Build a Global Crossroads" by internationalizing education on campus and promoting Asia in the context of global studies.

Finally, the center serves as a link and community-building resource for faculty and students across the university.

Course code for this program is ASIA.

Certificate

- Asian Studies - Graduate Certificate (p. 911)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Berry, J. Colleen (https://experts.colorado.edu/display/fisid_155491)
Instructor; PhD, Indiana University Bloomington

Jones, Carla Mae (https://experts.colorado.edu/display/fisid_134172)
PhD, University of North Carolina Chapel Hill

Oakes, Timothy S. (https://experts.colorado.edu/display/fisid_109269)
PhD, University of Washington

Asian Studies - Graduate Certificate

The Center for Asian Studies is pleased to offer the Graduate Certificate in Asian Studies. The certificate is available to all graduate students and post-BA students in the professional schools currently enrolled at CU Boulder, and to non-degree-seeking ACCESS students with a bachelor's degree. It enables students with intellectual or professional interest in Asia who are not focused primarily on Asia within their own degree program to acquire an official credential indicating that they have expertise in some aspect of Asian knowledge or practice.

For more information, visit the Center for Asian Studies' Asian Studies Graduate Certificate (<http://www.colorado.edu/cas/academics/asian-studies-graduate-certificate>) webpage.

Requirements

How to Apply

- Write to the Certificate Director (colleen.berry@colorado.edu)
- Upon acceptance, meet with the Certificate Director to approve a plan for coursework and meeting the language requirement
- Upon completion, submit transcript to the Center for Asian Studies for review by the Certificate Director and Steering Committee

Course Requirements

Students must complete 12 credit hours of approved graduate courses with a grade of B or higher.

- Specialization allowed in East Asia, South Asia, Central Asia, Southeast Asia, or West Asia/Middle East
- 2 courses in a single discipline or department
- 2 courses from outside of that discipline or department
- Thematic courses that have at least 50% Asia content may also be counted, dependent on approval by the Certificate Director and Committee
- Up to 3 credits may be taken as independent study on an Asia-related topic at the 5000 level or higher with approval from the Certificate Director
- 9 credits must be at or above the 5000 level
- Two years' college-level proficiency in an Asian language relevant to specialization (does not count toward the certificate credit hours)

Note: Independent Study - Students may take 3 credits of independent study on an Asia-related topic at the 5000 level or higher with a CAS Faculty Affiliate from outside of their home department; students may not take both a theory class and an independent study for the certificate.

Approved Undergraduate Courses at 3000 or 4000 level

These courses must be outside the student's home department.

Anthropology

ANTH 4020	Explorations in Anthropology (Islam; Ethnography of Southeast Asia; Global Cultures: Islam; Global Islams)
ANTH 4050	Anthropology of Jews and Judaism (Cultures of Israel and Palestine)

Astrophysical and Planetary Sciences

The curriculum and research in the department emphasizes three major areas: astrophysics, planetary sciences, and solar and space physics.

Those wishing to pursue graduate work in APS leading to candidacy for an advanced degree should carefully read the Master's Degree Requirements (p. 866) and the Doctoral Degree Requirements (p. 867).

Course code for this program is ASTR.

Doctoral Degree

- Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD) (p. 919)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor Emeritus

Toomre, Juri (https://experts.colorado.edu/display/fisid_100767)
Professor; PhD, University of Cambridge (England)

Courses

ASTR 5110 (3) Atomic and Molecular Processes

Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules.

Requisites: Restricted to graduate students only.

ASTR 5120 (3) Radiative and Dynamical Processes

An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems.

Requisites: Restricted to graduate students only.

ASTR 5140 (3) Astrophysical and Space Plasmas

Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5141

Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

ASTR 5150 (3) Introductory Plasma Physics

Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzmann equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5150

Requisites: Restricted to graduate students only.

ASTR 5300 (3) Introduction to Magnetospheres

Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.

Requisites: Restricted to graduate students only.

ASTR 5330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 4330 and GEOL 4330 and GEOL 5330

Requisites: Restricted to graduate students only.

ASTR 5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5400

Requisites: Restricted to graduate students only.

ASTR 5410 (3) Fluid Instabilities, Waves, and Turbulence

Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary and astrophysical applications. Studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Department enforced prerequisite: ASTR 5400 or ATOC 5060.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5410

Requisites: Restricted to graduate students only.

ASTR 5540 (3) Mathematical Methods

Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5540

Requisites: Restricted to graduate students only.

ASTR 5550 (3) Observations, Data Analysis and Statistics

Introduces multi-wavelength observational techniques, their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.

Requisites: Restricted to graduate students only.

ASTR 5560 (3) Radiative Processes in Planetary Atmospheres

Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite or corequisite: ASTR 5110.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5560

Requisites: Restricted to graduate students only.

ASTR 5700 (3) Stellar Astrophysics

Explores stellar interiors, evolution and atmospheres, with the Sun and its heliosphere being used as the closest and best-studied example of a star. Covers energy generation, transport, principles of stellar structure, stellar rotation, pulsation and evolution to supernova and compact object stages. Includes radiation transport in stellar photospheres, chromospheres, coronas, winds. Department enforced prerequisite: senior level undergraduate physics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ASTR 5120.

ASTR 5710 (3) High-Energy Astrophysics

Studies astrophysics of UV, x-ray, gamma-ray and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Department enforced prerequisite: senior level undergraduate physics.

Requisites: Restricted to graduate students only.

ASTR 5720 (3) Galaxies

Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble's Law, the cosmic distance scale, and the intergalactic medium. Department enforced prerequisite: senior level undergraduate physics.

Requisites: Restricted to graduate students only.

ASTR 5730 (3) Stellar Atmospheres and Radiative Transfer

Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra and model atmospheres.

Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field and solar wind. Department enforced prerequisites: ASTR 5110 and undergraduate physics.

Requisites: Restricted to graduate students only.

ASTR 5740 (3) Interstellar Astrophysics

Highlights structure, dynamics and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization and dynamic state of the gas and dust; observations at all wavelengths; star formation; relation to external galaxies. Department enforced prerequisite: ASTR 5110.

Requisites: Restricted to graduate students only.

ASTR 5760 (3) Astrophysical Instrumentation

Covers the fundamentals underlying the design, construction and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Department enforced prerequisite: senior level undergraduate physics.

Requisites: Restricted to graduate students only.

ASTR 5770 (3) Cosmology

Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.

Requisites: Restricted to graduate students only.

ASTR 5780 (3) Mission Design and Development for Space Sciences

Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5440

Grading Basis: Letter Grade

ASTR 5800 (3) Planetary Surfaces and Interiors

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5800

Requisites: Restricted to graduate students only.

ASTR 5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres - past and future.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5810 and GEOL 5810

Requisites: Restricted to graduate students only.

ASTR 5820 (3) Origin and Evolution of Planetary Systems

Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5820 and GEOL 5820

Requisites: Restricted to graduate students only.

ASTR 5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and GEOL 5830

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ASTR 5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5835 and GEOL 5835

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

ASTR 5920 (1-6) Reading and Research in Astrophysical and Planetary Sciences

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ASTR 6000 (1) Seminar in Astrophysics

Studies current research and research literature on an astrophysical topic. Students and faculty give presentations. Subjects vary each semester. May be repeated for a total of 4 credit hours to meet candidacy requirements.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

ASTR 6050 (3) Space Instrumentation

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 6050 and GEOL 6050

Grading Basis: Letter Grade

ASTR 6610 (3) Earth and Planetary Physics 1

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6610 and PHYS 6610

Requisites: Restricted to graduate students only.

ASTR 6620 (3) Earth and Planetary Physics 2

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6620 and PHYS 6620

Requisites: Restricted to graduate students only.

ASTR 6630 (3) Earth and Planetary Physics 3

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and PHYS 6630

Requisites: Restricted to graduate students only.

ASTR 6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6650 and PHYS 6650

Requisites: Restricted to graduate students only.

ASTR 6940 (1) Master's Degree Candidate

Grading Basis: Pass/Fail

ASTR 6950 (1-6) Master's Thesis**ASTR 7160 (3) Intermediate Plasma Physics**

Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 7160

Recommended: Prerequisite PHYS 5150.

ASTR 7500 (1-3) Special Topics in Astrophysical and Planetary Sciences

Acquaints students with current research in astrophysical and planetary sciences. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ASTR 7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ASTR 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD)

Students pursuing a PhD from the Department of Astrophysical and Planetary Sciences generally specialize in the areas of astrophysics or planetary science.

The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree as they progress toward their PhD.

The program successfully integrates astrophysics, planetary science, solar physics and space instrumentation with strong observational and theoretical components. These assets facilitate interaction and collaboration between the disciplines and enable students to explore a wide variety of research areas.

The Sommers–Bausch Observatory, conveniently located on campus, provides excellent hands–on experience with telescopes and observing, while the world–class Fiske Planetarium, supported by our department, offers a unique opportunity for public outreach. These campus resources are complemented by other affiliated research organizations in Boulder.

For more information, visit the department's Prospective Students (<http://www.colorado.edu/aps/prospective-students>) webpage.

Requirements

A minimum of 37 credit hours of work (including 4 credit hours of graduate seminars) in courses numbered 5000 or above is required; however, the overall emphasis is on independent study and research. A minimum of 30 credit hours of PhD dissertation credit hours are required.

Students in the PhD program are required to remove any deficiencies identified at the preliminary interview, to pass a two-part comprehensive examination composed of a written test on graduate course material and an oral exam on a research paper based on a semi-independent research project, and satisfactorily defend the PhD thesis before a faculty committee.

During the first year of graduate study, students generally obtain a broad background in courses regarded as basic to all three areas in addition to more specialized studies. Many students take graduate-level courses in other departments (e.g., Departments of Physics, Atmospheric and Oceanic Sciences, Geological Sciences, Applied Mathematics or Aerospace Engineering), depending upon their particular interests or participation in interdisciplinary programs (see below).

Required Courses and Semester Credit Hours

ASTR 5110	Atomic and Molecular Processes	3
ASTR 5120	Radiative and Dynamical Processes	3
ASTR 5400	Introduction to Fluid Dynamics	3
ASTR 5540	Mathematical Methods	3

ASTR 5550	Observations, Data Analysis and Statistics	3
Total Credit Hours		15

Electives: Astrophysics Focus

The department offers a broad range of courses and research in this area, leading to the PhD degree. Graduate-level courses are offered in the following subjects:

ASTR 5140	Astrophysical and Space Plasmas	3
ASTR 5700	Stellar Astrophysics	3
ASTR 5710	High-Energy Astrophysics	3
ASTR 5720	Galaxies	3
ASTR 5730	Stellar Atmospheres and Radiative Transfer	3
ASTR 5760	Astrophysical Instrumentation	3
ASTR 5770	Cosmology	3
ASTR 6000	Seminar in Astrophysics	1

Electives: Planetary Sciences Focus

As planetary sciences is an interdisciplinary field, students can obtain degrees from the Departments of Astrophysical and Planetary Sciences, Atmospheric and Oceanic Sciences, Geological Sciences, Physics or Aerospace Engineering. Boulder is also home to a division of the Southwest Research Institute, with over 25 planetary scientists, many of whom work with CU students. Research and courses related to the physics and dynamics of the atmospheres of other planets, planetary surfaces and interiors, and other solar system studies are available.

Graduate-level courses related to the physics and dynamics of the Earth's atmosphere are offered in the following subjects:

ASTR 5140	Astrophysical and Space Plasmas	3
ASTR 5300	Introduction to Magnetospheres	3
ASTR 5330	Cosmochemistry	3
ASTR 5410	Fluid Instabilities, Waves, and Turbulence	3
ASTR 5800	Planetary Surfaces and Interiors	3
ASTR 5810	Planetary Atmospheres	3
ASTR 5820	Origin and Evolution of Planetary Systems	3
ASTR 5830	Topics in Planetary Science	3
ASTR 5835	Seminar in Planetary Science	1
ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5560	Radiative Processes in Planetary Atmospheres	3

Research Opportunities

Observational and Theoretical Astrophysics

Research in this field is conducted in the following areas:

- Stellar atmospheres, radiative transfer, stellar winds of hot/cool stars
- formation of stars and planetary systems
- solar physics
- interstellar and intergalactic medium
- cosmology and large-scale structure of the universe; galaxy formation
- stellar interiors, black holes and neutron stars
- gravitational physics
- cosmic X-ray sources, supernovae and their remnants and accretion phenomena, jets and clusters of galaxies
- galactic evolution, quasars and active galaxies

- radio and sub-millimeter astronomy, microwave background
- plasma astrophysics and MHD
- astrophysical fluid dynamics
- UV, optical, IR, submillimeter, radio and X-ray instrumentation
- instrument and detector development
- sounding rocket and balloon astronomy

Research is carried out with the ARC 3.5m Apache Point telescope, the Sloan Digital Sky Survey-IV and these national telescopes and laboratories and international collaborators: High Altitude Observatory (HAO) in Boulder (solar physics); National Optical Astronomical Observatories in Tucson and Chile (optical astronomy); National Radio Astronomy Observatory (NRAO); the Very Large Array (VLA); the Green Bank Telescope (GBT); the Hubble Space Telescope (HST); the Chandra, SWIFT and XMM X-ray telescopes; the Fermi Gamma-Ray Space Telescope; and the National Solar Observatory (NSO). CU Boulder also is involved with the Messenger (Mercury), MAVEN (Mars), JUNO (Jupiter), Cassini (Saturn) and New Horizons (Pluto) missions, as well as the HST Cosmic Origins Spectrograph.

Locally, APS operates a 24-inch Cassegrain-Coude and 16- and 18-inch Cassegrain telescopes through Sommers-Bausch Observatory. These are available for photographic, photometric and spectrographic observations, as well as for instrument and detector development. Opportunities for graduate research also are found with the university's Laboratory for Atmospheric and Space Physics (LASP), the Center for Astrophysics and Space Astronomy (CASA) and JILA.

Theoretical, Observational and Laboratory Atmospheric and Planetary Science

Research in this field is conducted in the following areas:

- planetary disks, Kuiper Belt objects, extra-solar planets
- dynamics and chemistry of planetary atmospheres, planetary clouds and planetary climates; evolution of planetary atmospheres; comparison of planetary and terrestrial atmospheres
- planetary aeronomy, airglow and aurora, UV and IR spectroscopy, noctilucent clouds, structure and composition of planetary atmospheres (Venus, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto), planetary magneto-spheres and cometary physics
- satellite monitoring of the Earth's atmosphere and environment, including remote sensing of mesospheric ozone, stratospheric trace species, convection, outgoing radiation, and magnetospheric dynamics
- planetary geology, planetary interiors and surfaces, and planetary geophysics.

Graduate research opportunities exist with individual faculty members, as well as jointly with academic and research units, such as the Departments of Geological Sciences, Physics and Aerospace Engineering, as well as the Department of Atmospheric and Oceanic Sciences (ATOC), the National Center for Atmospheric Research (NCAR), the National Oceanic and Atmospheric Administration (NOAA) and the Laboratory for Atmospheric and Space Physics (LASP). The latter is involved in space investigations of the Earth, Sun and planets. Financial support is available in connection with all of the above research activities.

Atmospheric and Oceanic Sciences

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research

environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Graduate students admitted to ATOC are eligible to receive an advanced degree in atmospheric and oceanic sciences. Graduate students outside of ATOC can pursue the graduate certificate in atmospheric and oceanic sciences while earning a graduate degree from another department at CU Boulder, or while taking course work as a non-degree-seeking student through Continuing Education's ACCESS Program provided they have already earned a bachelor's degree and meet the course prerequisites. In addition, students inside and outside the department may pursue a graduate certificate in oceanography. For more information on graduate certificate programs, see the Graduate School/Interdisciplinary Programs section.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the Atmospheric and Oceanic Sciences (<http://www.colorado.edu/atoc>) website.

Course code for this program is ATOC.

Master's Degree

- Atmospheric and Oceanic Sciences - Master of Science (MS) (p. 924)

Doctoral Degree

- Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD) (p. 925)

Certificates

- Atmospheric and Oceanic Sciences - Graduate Certificate (p. 926)
- Oceanography - Graduate Certificate (p. 926)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Brown, Derek Philip (https://experts.colorado.edu/display/fisid_150027)
Instructor; PhD, University of Colorado Boulder

Cassano, John J. (https://experts.colorado.edu/display/fisid_121781)
Associate Professor; PhD, University of Wyoming

Forrest, Betsy Carroll (https://experts.colorado.edu/display/fisid_101645)
Lecturer; PhD, University of Colorado Boulder

Friedrich, Katja (https://experts.colorado.edu/display/fisid_133607)
Associate Professor; PhD, Ludwig-Maximilians Univ of Munich (Germany)

Han, Weiqing (https://experts.colorado.edu/display/fisid_115493)
Professor; PhD, Nova University

Hart, John E.
Professor Emeritus

Jahn Hall, Alexandra (https://experts.colorado.edu/display/fisid_155096)
Assistant Professor; PhD, McGill Univ (Canada)

Karnauskas, Kristopher Benson (https://experts.colorado.edu/display/fisid_155094)

Assistant Professor; PhD, University of Maryland College Park Campus

Kay, Jennifer E. (https://experts.colorado.edu/display/fisid_153815)
Assistant Professor; PhD, University of Washington

Keen, Richard A.
Professor Emeritus

Lovenduski, Nicole Suzanne (https://experts.colorado.edu/display/fisid_147557)

Assistant Professor; PhD, University of California-Los Angeles

Lundquist, Julie Kay (https://experts.colorado.edu/display/fisid_147838)
Associate Professor; PhD, University of Colorado Boulder

Nigro, Melissa A (https://experts.colorado.edu/display/fisid_152154)
Instructor; PhD, University of Colorado Boulder

Pilewskie, Peter Andrew (https://experts.colorado.edu/display/fisid_134466)

Professor; PhD, University of Arizona

Randall, Cora Einterz (https://experts.colorado.edu/display/fisid_102010)
Professor; PhD, University of California-Santa Cruz

Toohey, Darin W (https://experts.colorado.edu/display/fisid_110652)
Professor; PhD, Harvard University

Toon, Owen Brian (https://experts.colorado.edu/display/fisid_110521)
Professor; PhD, Cornell University

Weiss, Jeffrey B (https://experts.colorado.edu/display/fisid_102145)
Associate Professor; PhD, University of California-Berkeley

Courses

ATOC 5000 (3) Critical Issues in Climate and the Environment

Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4800 and ENVS 5830

Requisites: Restricted to graduate students only.

ATOC 5050 (3) Atmospheric Thermodynamics and Dynamics

Covers atmospheric thermodynamics and dynamics and the underlying governing laws and mathematical and physical principles. Topics include atmospheric composition and thermodynamics, conservation laws and atmospheric governing equations, geostrophic balance and balanced flows, vorticity dynamics and boundary layers. ATOC graduate core course.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one year of calculus-based physics and math through differential equations.

ATOC 5051 (3) Introduction to Physical Oceanography

Provides fundamental knowledge of observations, theory, dynamics and modeling in physical oceanography. Promotes critical thinking and the development of skills for data analysis and interpretation. ATOC graduate core course.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites one year of calculus-based physics and math up through differential equations.

ATOC 5060 (3) Dynamics of the Atmosphere and Oceans

Examines large-scale motions in a stratified rotating atmosphere and ocean, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations and boundary layer processes. Ageostrophic motions, including Kelvin waves, internal gravity waves and the theory of frontogenesis are also considered. ATOC graduate core course.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ATOC 5050, one year of calculus-based physics and math up through differential equations.

ATOC 5061 (3) Dynamics of Oceans

Explores theories of the large-scale ocean, including quasigeostrophic, planetary geostrophic and shallow water equations. Topics may vary to focus on ocean climate (e.g. thermocline, westward intensification), ocean waves (e.g. gravity, Rossby, and Kelvin) or ocean models (toy, analytic and numerical).

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites ATOC 5400 and ATOC 5051 or ATOC 5060.

ATOC 5151 (3) Atmospheric Chemistry

Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere and global climate change. ATOC graduate core course.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5151

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one semester of college-level chemistry.

ATOC 5152 (3) Advanced Atmospheric Chemistry

Follows Graduate Atmospheric Chemistry (ATOC 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5152

Recommended: Prerequisite CHEM 5151 or ATOC 5151.

Grading Basis: Letter Grade

ATOC 5200 (3) Biogeochemical Oceanography

Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4200

Requisites: Restricted to graduate students only.

ATOC 5215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4215 and ASEN 4215 and ASEN 5215

Requisites: Restricted to graduate students only.

ATOC 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate core course. Department enforced prerequisites: one year of calculus-based physics, and math up through differential equations.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5235

Requisites: Restricted to graduate students only.

ATOC 5300 (3) The Global Carbon Cycle

Covers the role of the ocean, terrestrial biosphere, and atmosphere in the global carbon cycle. Specific topics include marine carbonate chemistry, biological production, terrestrial fluxes, anthropogenic emissions, and the evolution of the global carbon cycle in a changing climate.

Requisites: Restricted to graduate students only.

ATOC 5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5400

Requisites: Restricted to graduate students only.

ATOC 5410 (3) Fluid Instabilities, Waves, and Turbulence

Nonlinear waves and instabilities; wave-mean and wave-wave interactions, resonant triads; secondary instability and transition to turbulence; diagnosis, modeling, and parameterization of turbulent flows in geophysics and astrophysics. Department enforced prerequisite: ASTR 5120 or ATOC 5060 or ATOC 5400.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5410

Requisites: Restricted to graduate students only.

ATOC 5540 (3) Mathematical Methods

Applied mathematics course; provides necessary analytical background for courses in plasma physics, fluid dynamics, electromagnetism, and radiative transfer. Covers integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5540

Requisites: Restricted to graduate students only.

ATOC 5550 (3) Mountain Meteorology

Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4550

ATOC 5560 (3) Radiative Processes in Planetary Atmospheres

Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite: ATOC 5235.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5560

Requisites: Restricted to graduate students only.

ATOC 5600 (3) Physics and Chemistry of Clouds and Aerosols

Examines the physics and chemistry of clouds and aerosols in the planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing and weather. Applies basic microphysical, radiative and chemical processes affecting particles to issues in current literature. ATOC graduate core course.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one semester of college-level chemistry and calculus-based physics and math up through differential equations.

ATOC 5730 (3) Physical Oceanography and Climate

Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4730

Grading Basis: Letter Grade

ATOC 5750 (3) Desert Meteorology and Climate

Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4750

Requisites: Restricted to graduate students only.

ATOC 5760 (3) Astrophysical Instrumentation

Covers the fundamentals underlying the design, construction, and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include: Fourier transforms and their applications; optical design concepts; incoherent and coherent signal detection; electronics and applications; signal acquisition and processing.

Requisites: Restricted to graduate students only.

ATOC 5770 (3) Wind Energy Meteorology

Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4770

ATOC 5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Also includes origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres past and future.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5810 and GEOL 5810

Requisites: Restricted to graduate students only.

ATOC 5820 (3) Origin and Evolution of Planetary Systems

Reviews protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets and asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the orbital evolution of solar system bodies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5820 and GEOL 5820

Requisites: Restricted to graduate students only.

ATOC 5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5830 and GEOL 5830

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ATOC 5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5835 and GEOL 5835

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

ATOC 5900 (1-6) Independent Study

Students may register for more than one section of this course in the same semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATOC 6020 (1) Seminar in Atmospheric and Oceanic Sciences

Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATOC 6100 (3) Modeling Weather and Climate

Discusses background theory and procedures used for modeling climate on a variety of space and time scales. Includes numerical simulation of weather and climate with models in a hierarchy of complexity, assessments of error growth, prediction of circulations and impact of radiative and other influences. Explores various numerical methods, develops core computing skills and considers data handling and visualization. Consists of a combination of lectures and laboratory.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ATOC 5050 or calculus.

ATOC 6700 (1) Weather Forecasting and Discussion

Explores the techniques used to make short-term weather forecasts in the mid-latitudes using real-time weather observations, numerical forecast model output and conceptual models of mid-latitude weather phenomena. Students will be required to develop and defend conceptual models of the short-term evolution of the weather and will conduct detailed post-forecast analysis of successful and unsuccessful forecasts.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ATOC 5050.

ATOC 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

ATOC 7500 (1-3) Special Topics in Atmospheric and Oceanic Sciences

Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATOC 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to graduate students only.

Atmospheric and Oceanic Sciences - Master of Science (MS)

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Students can earn a master's degree with either a thesis or an exam. Students considering master's study in atmospheric and oceanic sciences should carefully read the Master's Degree Requirements (p. 866) section of this catalog, as well as the department's Prospective Graduate Students (<http://www.colorado.edu/atoc/academics/prospective-graduate-students>) and Current Graduate Students (<http://www.colorado.edu/atoc/academics/current-graduate-students>) webpages.

Requirements

Course Requirements

Students must complete at least 30 credit hours of course work, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including four of the core ATOC courses.

- Up to 6 credit hours of approved 3000- and 4000-level course work from engineering, math, physics, chemistry or biology may be applied toward the MS degree. No credit will be given toward the MS degree for ATOC course work below the 5000 level.
- A minimum of 15 credit hours from regular ATOC courses (independent study courses cannot be used to satisfy this requirement).
- Four courses within one of the two tracks of ATOC core courses:

Atmosphere Track (A-Track)

ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5051	Introduction to Physical Oceanography	3
ATOC 5060	Dynamics of the Atmosphere and Oceans	3
ATOC 5151	Atmospheric Chemistry	3
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3
ATOC 5600	Physics and Chemistry of Clouds and Aerosols	3

Oceanography Track (O-Track)

ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5051	Introduction to Physical Oceanography	3
ATOC 5060	Dynamics of the Atmosphere and Oceans	3
ATOC 5200	Biogeochemical Oceanography	3
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3

- Up to 3 credit hours of Independent Study (ATOC 5900), Weather Forecasting and Discussion (ATOC 6700) and/or Seminar in Atmospheric and Oceanic Sciences (ATOC 6020) may be used toward the 30 hours of regular course work in the degree requirements.
- Up to 9 credit hours may be transferred from another accredited institution and applied toward an MS degree. Transfer credit for ATOC core course work must be approved by the graduate advisor.
- A student is required to maintain at least a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the MS, a course mark below C is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

Degree Plans

The master's degree will be a Master of Science in atmospheric and oceanic sciences, regardless of track chosen. The master's thesis is not constrained by choice of track.

Plan I: Thesis Option

Students must complete a minimum of 4 (but no more than 6) thesis hours, which can be counted toward the total 30 hours of course work and the 15 hours of ATOC course work requirements. Students must successfully complete an MS thesis and oral final examination based on the thesis.

Note: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not requirement for advancement to the PhD program.

Thesis Guidelines

The MS thesis must consist of original and independent research conducted by the graduate student under the supervision of the research advisor. The thesis topic must be related to the major field, and:

- Represent the equivalent of 4 to 6 credit hours of course work.
- Receive the approval of the major department at least 30 days before commencement at which the degree is to be conferred.
- Be completed at the time the final examination is held.
- Comply with the University of Colorado Graduate School Thesis and Dissertation Specifications.
- Be filed with the Graduate School by posted deadlines for the semester for which the degree is to be conferred.

Thesis Exam Committee

The examination committee for the MS thesis final exam will consist of three graduate faculty members, at least two of whom must be ATOC core faculty members. The examination consists of a 30-minute oral presentation given by the candidate on the thesis subject, followed by a period of questions for the candidate by the committee. The oral presentation is open to anyone who wishes to attend. The full examination typically does not exceed two hours in duration.

Any student with a research advisor outside of ATOC (e.g., an advisor who is from another department or is a full-time employee at NCAR, NOAA, etc.), must also have an academic advisor who is an ATOC core faculty member. The academic advisor should be identified by the student in collaboration with their research advisor as soon as possible, and no later than one month after research begins. Once an ATOC faculty member agrees to act as academic advisor, it is their responsibility to communicate ATOC policies and requirements to the research advisor, and to ensure that the student is meeting all ATOC requirements and making good academic progress toward the degree.

Plan II: Non-Thesis/Final Exam Option

The requirements for an MS degree non-thesis/final exam option include the following:

- 30 semester hours of course work, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including four of the core ATOC courses.
- Successful completion of a written final examination based on ATOC regular course work. The ATOC Comprehensive Exam I is typically used to satisfy this requirement.

Note: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not a requirement for advancement to the PhD program.

Time Limit

Students are expected to complete all degree requirements within four years of the date of commencing course work, but normally in two years. Students may petition the Graduate School for extension(s).

Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD)

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

ATOC attracts many of the most outstanding graduate students in the field. Our students receive a significant number of fellowships and nationally recognized awards each year, provide excellent instruction to CU Boulder's undergraduates as teaching assistants, and make scientific advances while conducting innovative research. Our graduates go on to successful careers in academia, national research institutes and private industry.

Graduate students, research staff and faculty work together on a wide range of research themes:

- atmospheric & oceanic dynamics

- atmospheric chemistry & physics
- chemical & physical oceanography
- clouds & aerosols
- planetary atmospheres
- radiative transfer & remote sensing
- regional, boundary layer & wind energy meteorology

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the Atmospheric and Oceanic Sciences (<http://www.colorado.edu/atoc>) website.

Requirements

Academic Standards

A student is required to maintain a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the PhD, a course grade of C+ or below is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

Academic Preparation

An undergraduate degree in mathematics, physics, engineering, chemistry or another natural science is recommended. The general prerequisites expected of incoming graduate students include undergraduate courses in calculus, linear algebra, differential equations and computer programming, as well as one-year sequences of undergraduate calculus-based physics and chemistry. Upper-division undergraduate courses in physics, chemistry, engineering and mathematics are strongly recommended. Undergraduate courses in atmospheric and oceanic sciences are useful, but not expected, as part of the undergraduate background.

Course Requirements

A total of 36 credit hours are required, including 18 credit hours in ATOC core courses, as well as a graduate-level course in applied or computational mathematics. In addition, 30 dissertation hours are required. Other specific course requirements are covered in the *ATOC Graduate Handbook*.

All PhD students are required to take a total of six ATOC core courses, or their equivalent, from one of the two following ATOC core course tracks. Regardless of track chosen, the degree will be in atmospheric and oceanic sciences. The doctoral dissertation topic is not constrained by choice of track.

Atmosphere Track (A-Track)

ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5051	Introduction to Physical Oceanography	3
ATOC 5060	Dynamics of the Atmosphere and Oceans	3
ATOC 5151	Atmospheric Chemistry	3
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3
ATOC 5600	Physics and Chemistry of Clouds and Aerosols	3
Total Credit Hours		18

Oceanography Track (O-Track)

ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5051	Introduction to Physical Oceanography	3
ATOC 5060	Dynamics of the Atmosphere and Oceans	3
ATOC 5200	Biogeochemical Oceanography	3

ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3
Select one of the following:		3
ATOC/ASEN 5215	Descriptive Physical Oceanography	
ATOC/ASTR 5400	Introduction to Fluid Dynamics	
GEOL 5270	Marine Chemistry and Geochemistry	
GEOL 5430	Paleoceanography and Paleoclimatology	
MCEN 5021	Introduction to Fluid Dynamics	
Total Credit Hours		18

ATOC offers many graduate elective courses, and students are encouraged to take related electives offered by other departments.

Examinations

Students must pass a two-part comprehensive examination before admission into candidacy. Part I of the comprehensive examination is a written exam based on course material and is normally taken just prior to the second year. Part II of the comprehensive examination is normally taken in the third year and is an oral examination based on an original research paper prepared by the student. After a preliminary copy of the dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted.

Atmospheric and Oceanic Sciences - Graduate Certificate

Current CU Boulder graduate students and students with a bachelor's degree who are nondegree ACCESS students may pursue the graduate certificate in atmospheric and oceanic sciences.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the department's Certificate in Atmospheric and Oceanic Sciences (<http://www.colorado.edu/atoc/academics/graduate-certificate-programs/certificate-atmospheric-and-oceanic-sciences>) webpage.

Requirements

Students who wish to obtain the Graduate Certificate in Atmospheric and Oceanic Sciences (ATOC) must satisfactorily complete four ATOC graduate level courses* or their cross-listed equivalents (e.g., ATOC 5151 or CHEM 5151) provided the cross-listed equivalents are not offered through the student's home department(s). To satisfactorily complete a course, students must earn a grade of B or better.

*ATOC graduate level courses are considered those above the 5000 level. ATOC 5000 Critical Issues in Climate and the Environment cannot be applied towards the Graduate Certificate in Atmospheric and Oceanic Sciences requirements.

Students must meet course prerequisites prior to enrollment. Most of the ATOC Graduate Certificate courses require at least one year of calculus and one year of calculus-based physics.

Upon completion of the ATOC Graduate Certificate requirements, students must complete a Graduate Certificate Request Form and submit it, together with a copy of their unofficial CU-Boulder transcript, to the ATOC graduate program assistant (atocasst@colorado.edu).

Oceanography - Graduate Certificate

Graduate students can pursue the a graduate certificate while earning a normal graduate degree (MS or PhD) at CU Boulder or while taking course work as a nondegree seeking student through Continuing Education's ACCESS Program, provided they have already earned a bachelor's degree and meet the course prerequisites.

Graduate certificates are noted on the official CU Boulder transcript.

Requirements

Students who wish to obtain the graduate certificate in oceanography must complete at least three oceanography core courses (see below) passed with a letter grade of B or better. In addition, students may take an independent study course to replace one of the core courses.

Required Courses and Credit Hours

Complete at least three of the following courses:

ATOC 5051	Introduction to Physical Oceanography
ATOC 5061	Dynamics of Oceans
ATOC 5200	Biogeochemical Oceanography
ATOC/ASEN 5215	Descriptive Physical Oceanography
ATOC 5300	The Global Carbon Cycle
ATOC 7500	Special Topics in Atmospheric and Oceanic Sciences (Physical Oceanography and Climate)
ASEN 5307	Engineering Data Analysis Methods
ASTR/ATOC 5400	Introduction to Fluid Dynamics
ASTR/ATOC 5410	Fluid Instabilities, Waves, and Turbulence
GEOL 5060	Oceanography
GEOL 5270	Marine Chemistry and Geochemistry
GEOL 5430	Paleoceanography and Paleoclimatology

For additional information about the ATOC Certificate or the Oceanography Certificate, contact: atocasst@colorado.edu

Behavioral Genetics

The Institute for Behavioral Genetics (IBG) is an organized research unit of the CU Boulder Graduate School dedicated to conducting and facilitating research on the genetic and environmental bases of individual differences in behavior.

Founded in 1967, IBG is one of the top research facilities in the world for genetic research on behavior. Data collection and analysis are ongoing for several internationally renowned studies including the Colorado Adoption Project, the Colorado Twin Registry, the National Youth Survey Family Study, the Colorado Learning Disabilities Research Center, the National Longitudinal Study of Adolescent Health, and the Adolescent Brain and Cognitive Development Study. IBG is home to one of the nation's largest DNA repositories for research on human behavior, as well as housing a wide array of behaviorally and genetically defined lines of selected, recombinant inbred, transgenic and knockout-gene mice. Current research includes studies of aging, neurodegenerative disease, psychopathology, reading and learning disabilities, cognition, substance abuse, behavioral development and evolution.

Certificate

- Behavioral Genetics - Graduate Certificate (p. 927)

Behavioral Genetics - Graduate Certificate

The Institute for Behavioral Genetics (IBG) offers a training program in behavioral genetics. The goal of the program is to train scientists in the study of genetic contributions to individual differences in behavior. This is accomplished by requiring students to obtain strong training in a primary academic discipline, by providing training in the interdisciplinary field of behavioral genetics, and by providing an atmosphere in which close interactions among scholars with different perspectives may be established.

Requirements

Admission Requirements

To be considered for admission, the Graduate School requires an undergraduate GPA of at least 2.75. Additionally, the most competitive applicants should have verbal and math GREs >85th percentile. Subject GRE scores are not required but will be considered if they have been completed. We carefully consider all components of the application including undergraduate grades, letters of recommendation, previous research experience and GRE scores.

Required Courses

Deviations from the IBG certificate requirements may be requested by petition to the student's advisory committee. Specific requests for course substitution, resolution of an ambiguity, etc., should be made by written petition. A petition may be approved by a majority vote of both the advisory committee and the IBG Training Committee. Disapproval of a petition may be changed to approval by a majority vote of the IBG faculty. Students with sufficient backgrounds may also test out of required courses 1–2 (i.e., pass the final exam for the course).

Required Courses and Semester Credit Hours

Required Courses

PSYC/IPHY 5200	Physiological Genetics and Genomics	3
PSYC 5102	Intro to Behavioral Genetics	3
PSYC 5741	General Statistics ¹	4
or PSYC 5751	General Statistics	
or IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	
or PSYC 5541	Special Topics in Psychology	
PSYC 5112	Concepts in Behavioral Genetics (Required Course: Responsible Conduct in Research)	3

Electives

Complete two courses from the following: 6

PSYC 5122	Quantitative Genetics
IPHY 5102	Introduction to Physiology Genomics
PSYC 5242	Biometrical Methods in Behavioral Genetics
IPHY 5262	Application of Bioinformatics and Genomics
PSYC 7102	Seminar: Behavioral Genetics (Benchmark Papers in Behavioral Genetics)
NRSC 5100	Introduction to Neuroscience I
or NRSC 5110	Introduction to Neuroscience II

or NRSC 5052 Behavioral Neuroscience

or NRSC 5132 Neuropharmacology

Complete one course from the following:

IPHY 5300	Statistical Genetics for Complex Traits
MCDB 5230	Gene Expression (Lecture and Discussion)
MCDB 5471	Mechanisms of Gene Regulation in Eukaryotes
NRSC 5032	Neurobiology of Learning and Memory
NRSC 5072	Clinical Neuroscience: A Clinical and Pathological Perspective
NRSC 5092	Behavioral Neuroendocrinology
NRSC 5132	Neuropharmacology
IPHY 6010	Seminar (Molecular Genetics of Addiction)
NRSC 5545	Neurobiology of Addiction (neuropharmacology, or one of courses 2–4 is required of NIDA trainees)
PSYC 5453	Developmental Psychopathology
PSYC 7102	Seminar: Behavioral Genetics (Genetics of Psychopathology; this course is required for NIMH trainees)
PSYC 7102	Seminar: Behavioral Genetics (Population Genetics in the Modern Genomics Era)

Other approved seminar courses on topics relevant to behavioral genetics

¹ Or other graduate-level course in statistics (of at least one semester) approved by the student's advisory committee.

NOTE: As some courses can only be taught every other year, it is each student's responsibility to take relevant courses when offered. Some equivalent courses may be offered at the Health Sciences Center or other venues. Course substitutions may be requested.

Teaching Requirements

Each of the students in the IBG Training Program must TA for at least one semester in a course judged by their advisory committee to be relevant to their professional specialty. (As part of their general responsibilities for the development of the student, advisory committees may sometimes require additional teaching.)

General Requirements

IBG students are required to conduct their doctoral dissertation research on topics of direct relevance to animal or human behavioral genetics, under the supervision of an IBG faculty member. A training file for each student is maintained in the IBG office for tracking progress toward completion of program requirements. Each student is to assist in updating this file at least once per year.

Specific departmental and Graduate School requirements in addition to those listed here are the responsibility of each student, in consultation with his/her advisory committee.

Examinations

Each student in the training program is examined at least annually by an advisory committee. Examination results are to be incorporated into the student's training file by the Chairperson of each advisory committee.

Annual Presentations at IBG Orientation

All continuing students are required to present a poster describing their research activity of the past year at the annual IBG Orientation—held each year in August (the last Friday before the beginning of the fall semester).

Exit Colloquium

All students are expected to do an exit colloquium at the conclusion of their training program. This presentation should be modeled as a "job talk," not a repeat of the final defense.

Chemistry and Biochemistry

The Department of Chemistry and Biochemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry and biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, and Physics, and with research institutes and agencies such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA) and the National Oceanic and Atmospheric Administration (NOAA).

Course code for this program is CHEM.

Master's Degrees

- Biochemistry - Master of Science (MS) (p. 936)
- Chemistry - Master of Science (MS) (p. 936)

Doctoral Degrees

- Biochemistry - Doctor of Philosophy (PhD) (p. 937)
- Chemistry - Doctor of Philosophy (PhD) (p. 941)
- Chemical Physics - Doctor of Philosophy (PhD) (p. 939)

Certificate

- Molecular Biophysics - Graduate Certificate (p. 943)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahn, Natalie (https://experts.colorado.edu/display/fisid_106044)
Professor; PhD, University of California-Berkeley

Anseth, Kristi S (https://experts.colorado.edu/display/fisid_103471)

Associate Professor; PhD, Yale University
- Zhang, Wei (https://experts.colorado.edu/display/fisid_146429)
Associate Professor; PhD, University of Illinois at Urbana-Champaign
- Ziemann, Paul Jeffrey (https://experts.colorado.edu/display/fisid_153281)
Professor; PhD, Pennsylvania State University Central Office

Courses

CHEM 5011 (3) Advanced Inorganic Chemistry 1

Lect. Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds.

Requisites: Requires prerequisite courses of CHEM 4011 and CHEM 4531 (all minimum grade B-) or graduate standing.

CHEM 5061 (3) Advanced Inorganic Chemistry 2

Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation.

Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-) or graduate standing.

CHEM 5141 (3) Environmental Water and Soil Chemistry

Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4141

Requisites: Restricted to graduate students only.

CHEM 5151 (3) Atmospheric Chemistry

Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere and global climate change.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5151

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one semester of college-level chemistry.

CHEM 5152 (3) Advanced Atmospheric Chemistry

Follows Graduate Atmospheric Chemistry (CHEM 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5152

Recommended: Prerequisite CHEM 5151 or ATOC 5151.

CHEM 5161 (3) Analytical Atmospheric Spectroscopy

Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Department enforced prereq., undergraduate physical chemistry or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5171 (3) Electroanalytical Chemistry

Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Department enforced prerequisite: undergraduate physical chemistry or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5181 (3) Mass Spectrometry and Chromatography

Mass spectrometry, including instrumentation, ionization techniques and interpretation of mass spectra. Theory and practice of analytical separation processes including ion mobility, capillary electrophoresis and liquid gas chromatography. Introduction to applications in e.g. atmospheric and biological mass spectrometry. Introduction to computer simulation of instrumentation and physical processes. Department enforced prerequisite: undergraduate physical chemistry or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5201 (3) Atmospheric Aerosol Discussions

Discusses recent literature concerning atmospheric aerosols and their role in atmospheric problems, including global ozone depletion, air quality, regional haze, acid rain, and global climate change.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CHEM 5151 or ATOC 5151.

CHEM 5251 (3) Materials Chemistry and Properties

Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4251

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5261 (3) Organic Materials: Structures and Functions

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4261

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5271 (3) Chemistry of Solar Energy

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4271

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5281 (3) Semiconductor Processing and Device Fabrication

Understanding of semiconductor processing and device fabrication from chemistry perspective. Overview of processing steps used to fabricate inorganic semiconductor devices including deposition, patterning and etching techniques. Description of process integration during device fabrication. Discussion of key issues facing advanced semiconductor fabrication.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CHEM 5311 (3) Advanced Synthetic Organic Chemistry

Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students.

Department enforced prerequisite: one year of organic chemistry or graduate standing.

CHEM 5321 (3) Advanced Physical Organic Chemistry

Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry

Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5341 (3) Chemical Biology and Drug Design

Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical and other research-oriented industries as well as in academia. Department enforced prerequisites: introductory organic chemistry and general biochemistry.

Requisites: Restricted to graduate students only.

CHEM 5400 (4) Core Concepts in Physical Chemistry for Biochemists

Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 5411.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4400 and CHEM 4511

Requisites: Restricted to graduate students only.

CHEM 5491 (3) Modern Biophysical Methods

Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies.

Department enforced prerequisites: undergraduate chemistry (general, organic physical); physics; calculus.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4491

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CHEM 5501 (3) Advanced Topics in Physical Chemistry

Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Department enforced prerequisites: undergraduate physical chemistry, graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5531 (3) Statistical Mechanics

Lect. Fundamental concepts of quantum and classical statistical mechanics. Applications to properties of gases, liquids, solids, spin and polymer systems. Reaction, fluctuation, nucleation and relaxation phenomena. Department enforced prerequisite: undergraduate physical chemistry.

Requisites: Restricted to graduate students only.

CHEM 5541 (3) Chemical Dynamics

Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Department enforced prerequisite: undergraduate physical chemistry.

Requisites: Restricted to graduate students only.

CHEM 5555 (4) Theoretical and Computational Chemistry

Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4555

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CHEM 5571 (3) Surface Science

Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Department enforced prerequisites: undergraduate physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5581 (3) Introductory Quantum Chemistry

Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules and spin; electronic structure of atoms and molecules. Department enforced prerequisite: two semesters of physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5591 (3) Advanced Molecular Spectroscopy

Lect. Rotational, vibrational and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure.

Department enforced prerequisites: two semesters of physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5621 (3) Genome Databases: Mining and Management

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4621 or MCDB 5621 CHEM 4621

Requisites: Restricted to graduate students only.

CHEM 5700 (4) Foundations of Biochemistry

Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of organic and physical chemistry will be required. Formerly CHEM 5711.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4700

Requisites: Restricted to graduate students only.

CHEM 5720 (4) Metabolic Pathways and Human Disease

Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4720

Requisites: Restricted to graduate students only.

CHEM 5740 (4) Biochemistry of Gene Transmission, Expression and Regulation

Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4740

Requisites: Restricted to graduate students only.

CHEM 5751 (3) Current Topics in Biochemical Research

Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4751

Requisites: Restricted to graduate students only.

CHEM 5770 (3) Fundamentals of Biochemistry I

Analysis of topics in biochemistry including DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, and protein structure and dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5771 covering the same topics except for the requirement of a written research proposal.

CHEM 5771 (5) Advanced General Biochemistry 1

Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students.

CHEM 5776 (1) Scientific Ethics and Responsible Conduct in Research

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5776

Requisites: Requires prerequisite course of CHEM 5771 or CHEM 5271 (minimum grade B-). Restricted to graduate students only.

CHEM 5780 (3) Fundamentals of Biochemistry II

Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal.

Requisites: Requires prerequisite course of CHEM 5770 (minimum grade B-). Restricted to graduate students only.

CHEM 5781 (5) Advanced General Biochemistry 2

Lect. Detailed consideration of contemporary topics in biochemistry, including protein structure (primary, secondary, tertiary, and quaternary), methods of structure determination and prediction, protein folding (kinetics, thermodynamics, denaturation, and renaturation), and protein dynamics (internal motions and methods of analysis).

Requisites: Requires prerequisite course of CHEM 5771 (minimum grade B-). Restricted to graduate students only.

CHEM 5791 (3) Bioorganic Chemistry in Biotechnology

Lec. Explores examples of antibodies, peptides, proteins, RNA, DNA, carbohydrates and lipids. Uses the primary literature and requires student participation.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4791

Requisites: Restricted to graduate students only.

CHEM 5801 (3) Advanced Signal Transduction and Cell Cycle Regulation

Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210 or MCDB 5220.

CHEM 5811 (3) Advanced Methods in Protein Sequencing and Analysis

Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Department consent required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210.

CHEM 5821 (1) Special Topics in Signaling and Cell Regulation

Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. Department consent required.

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6001 (1) Seminar: Inorganic Chemistry

Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar.

Requisites: Restricted to graduate students only.

CHEM 6021 (1-3) Special Topics in Inorganic Chemistry

Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6031 (3) Special Topics in Nanoscience

Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applications in biotechnology and energy.

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4511 (all minimum grade B-) or graduate standing.

CHEM 6101 (1) Seminar: Analytical Chemistry

Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar.

Requisites: Restricted to graduate students only.

CHEM 6111 (1-3) Special Topics in Analytical Chemistry

Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6301 (1-3) Seminar in Organic Chemistry

Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students.

Requisites: Restricted to graduate students only.

CHEM 6311 (1-3) Special Topics in Synthetic Organic Chemistry

Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules.

Requisites: Requires prerequisite course of CHEM 5311 (minimum grade B-). Restricted to graduate students only.

CHEM 6321 (1-3) Special Topics in Physical Organic Chemistry

Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry.

Requisites: Requires prerequisite course of CHEM 5321 (minimum grade B-). Restricted to graduate students only.

CHEM 6401 (1-3) Seminar: Physical Chemistry

Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles.

Requisites: Restricted to graduate students only.

CHEM 6411 (1-3) Advanced Topics in Physical Chemistry

Lect.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6601 (1) Biochemistry Seminar

Required of all biochemistry graduate students. Credit is deferred until presentation of satisfactory seminar.

Requisites: Restricted to graduate students only.

CHEM 6621 (1) Special Topics in RNA

Reviews and evaluates recent scientific literature in the field of RNA chemistry and biology, including topics in structure, catalysis, bioinformatic approaches and control of gene expression. Primarily for graduate level presentation of special topics by students and research staff.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 6621

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6711 (3-6) Advanced Topics in Biochemistry

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6731 (3-6) Advanced Topics in Biochemistry

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6801 (0) Departmental Research Seminar

Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week. Required for all graduate students in chemistry.

Requisites: Restricted to graduate students only.

CHEM 6901 (1-6) Research in Chemistry

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6941 (1) Master's Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

CHEM 6951 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

CHEM 7021 (2) Seminar: Structural Inorganic Chemistry

Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7101 (2) Seminar: Chromatography and Trace Analysis

Student and faculty discussions and reports on research advances in chromatography, trace analysis and environmental chemistry.

Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7111 (2) Seminar: Electrochemistry

Student and faculty discussions and reports on research advances in electrochemistry. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7131 (1) Seminar in Atmospheric Aerosol Chemistry

Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5151 and CHEM 5181.

CHEM 7161 (1) Seminar: Heterogeneous Atmospheric Chemistry

Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7211 (1) Seminar: Topics in Synthetic Methodology and Natural Product Synthesis

Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.

Requisites: Restricted to graduate students only.

CHEM 7221 (1) Seminar: Photochemistry and Free Radical Chemistry

Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7231 (1) Seminar: Reactive Intermediates

Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7241 (1) Seminar: Synthetic Organic Chemistry

Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7251 (1) Selected Topics in Chemical Genetics

Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7271 (1) Seminar: Picosecond Dynamics of Reactions

Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7281 (1) Seminar: Molecular Self-Assembly

Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7291 (1) Seminar: Physical Organic Chemistry

Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7301 (1) Seminar: Synthetic and Mechanistic Chemistry

Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7311 (1) Selected Topics in Organic Materials

Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7401 (1) Seminar in Photochemical Reaction Control

Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7421 (2) Seminar: Negative Ion Chemistry

Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7431 (1) Seminar: Topics in Theoretical Chemical Physics

Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7441 (2) Research Seminar: Theoretical Chemistry

Studies theoretical description of molecular dynamics as related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7461 (1) Seminar: Gas Phase Ion Chemistry

Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications.

Requisites: Restricted to graduate students only.

CHEM 7471 (1) Seminar in Ultrafast Spectroscopy of Proteins

Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7481 (2) Seminar: Molecular Spectroscopy and Photochemistry

Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7491 (1) Seminar: Molecular Vibrational Dynamics

Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7501 (1) Seminar: Theoretical Molecular Dynamics

Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7511 (1) Seminar: Reaction Dynamics in Condensed Phases

Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7521 (1) Seminar: Atmospheric Kinetics and Photochemistry

Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7531 (1) Seminar: Surface Chemistry and Thin Film Growth

Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7551 (1) Selected Topics in Ion Spectroscopy

Treats current topics in the spectroscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7601 (2) Seminar: Nucleic Acid Chemistry

Topics in various aspects of current research; emphasizes student readings and presentations. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution

Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction

Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells.

Requisites: Restricted to graduate students only.

CHEM 7651 (2) Seminar: Environmental Biochemistry

Topics in various aspects of current biochemical and environmental research. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7661 (1) Structure/Function of Human Mediator Transcription Complexes

Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes.

Requisites: Restricted to graduate students only.

CHEM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered.

Requisites: Restricted to graduate students only.

CHEM 7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins

Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7701 (1) Seminar: Enzyme Mechanisms and Kinetics

Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7711 (1) RNA Mediated Inorganic and Organic Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered.

Requisites: Restricted to graduate students only.

CHEM 7741 (1) Seminar: Signal Transduction and Protein Phosphorylation

Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7751 (1) Seminar: Protein Structure and Folding

Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7761 (1) Seminar: Eukaryotic Transcriptional Regulation

Studies the regulation of transcription by RNA Polymerase II from human promoters. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7781 (1) Seminar: Topics in Structural Biology

Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation.

Requisites: Restricted to graduate students only.

CHEM 7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies

Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing.

Requisites: Restricted to graduate students only.

CHEM 8991 (1-10) Doctoral Dissertation

All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Biochemistry - Master of Science (MS)

Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

Requirements

Language Requirement

The department does not require foreign language proficiency for the master's degree.

Examinations

Administration of preliminary examinations varies, depending on the student's entering field. Candidates opting for MS Plan I must pass a master's thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

Required Courses and Semester Credit Hours

There are two methods of obtaining a master's degree from the Department of Chemistry and Biochemistry. Both plans are available only with departmental approval.

Plan I: Thesis

This plan requires 30 credit hours, including 15 credit hours of formal course work, 15 credit hours in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

Plan II: Research Report

This plan requires 30 credit hours including 21 credit hours of formal course work plus 9 credit hours of research/seminar and presentation of a research report, but no thesis.

Chemistry - Master of Science (MS)

Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

Requirements

Language Requirement

The department does not require foreign language proficiency for the master's degree.

Examinations

Administration of preliminary examinations varies, depending on students' entering field. Candidates opting for MS Plan I must pass a master's thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

Required Courses and Semester Credit Hours

There are two methods of obtaining a master's degree from the Department of Chemistry and Biochemistry. Both plans are available only with departmental approval.

Plan I: Thesis

This plan requires 30 credit hours, including 15 credit hours of formal course work, 15 credit hours in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

Plan II: Research Report

This plan requires 30 credit hours including 21 credit hours of formal course work plus 9 credit hours of research/seminar and presentation of a research report, but no thesis.

Biochemistry - Doctor of Philosophy (PhD)

The Department of Chemistry and Biochemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas, including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry and biochemistry faculty; with other departments, such as physics and molecular, cellular and developmental biology; and with research institutes and agencies, such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA) and the National Oceanic and Atmospheric Administration (NOAA).

The Biochemistry Division offers a world-class interdisciplinary research environment in a beautiful mountain setting. Established in 1986, the Biochemistry Division spans a wide range of fields, from bioinformatics and cellular and molecular biology to synthetic and biophysical chemistry. Current areas of focus involve:

- nucleic acid chemistry and biochemistry, including RNA structure and function and mechanisms of transcription and replication
- structural biology, including X-ray and NMR, proteomics and informatics
- molecular biophysics and signal transduction
- proteomics, genomics and bio-informatics

Requirements

Course Requirements

General Requirements

Sixty credit hours of course work is required, consisting of 30 hours of research in CHEM 8991, at least 15 hours in formal courses (see next section), and the remainder in other courses, such as summer courses, seminar courses, group meeting courses and research in CHEM 6901. All students are required to take a 1-credit course in Scientific Ethics and Responsible Conduct in Research (CHEM 5776).

A minimum grade of B- is required in all courses counting for the PhD degree; students should also be aware that they must maintain a cumulative grade point average of 3.0 in all formal courses and an overall grade point average of 3.0 or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Probationary status must be removed within two semesters or a student will become ineligible to receive a PhD degree from the Department of Chemistry and Biochemistry. Students on probation will not have a high priority for financial support.

A degree plan of courses taken and yet to be taken must be filed with the Graduate School by the end of the student's third semester.

Selection of Formal Courses

All students are required to take a minimum of 15 credit hours of formal courses. Formal courses are regularly scheduled, examined and graded; courses such as summer courses, seminar courses, group meeting courses and research in CHEM 6901 are not considered formal courses.

Each student's program plan for course work must be approved by the student's research advisor and the Biochemistry Graduate Committee. These formal courses must be approved prior to the end of the fourth semester, and students are encouraged to complete formal course requirements within their first four semesters. The Biochemistry Division recognizes that some formal courses of interest are only offered every two years, and the Biochemistry Graduate Committee takes this into account.

Transfer of Credit

Up to 10 credit hours of graduate-level, formal coursework may be transferred from another school subject to demonstrated proficiency in the subject(s) and written approval by the Biochemistry Graduate Committee. Students can obtain forms for this purpose from the graduate secretary.

Formal Application of Admission for Candidacy for the Biochemistry PhD Degree

All students must make formal application for admission to candidacy for the PhD degree before they take their comprehensive oral examination. Students can obtain the appropriate form from the graduate administrative assistant. This Graduate School requirement should be fulfilled even though students have not completed all their formal course work. After filling in the form, indicating graduate courses taken and to be taken, it should be approved and signed by the student's research advisor and then the Biochemistry Graduate Committee. A completed form needs to be in the student's file before they can take the comprehensive oral examination.

PhD students shall have passed their written cumulative exam and the oral comprehensive examination before being admitted to candidacy for the PhD degree. Students should note that the approved research proposal must be filed in order for a student to be advanced to candidacy.

Research Requirements

During the course of the PhD thesis work, students will arrange annual meetings with a thesis advisory committee composed of their research advisor and two other biochemistry faculty. The purpose of these advisory meetings is to ensure the student is making adequate progress on a suitable PhD thesis project. The final annual meeting should be scheduled about one year from the end of the thesis work. For this meeting, the advisory committee will be expanded to five faculty members: the thesis advisor, three biochemistry faculty and one faculty member from another department. This committee will become the examination committee that evaluates the results of a completed research program submitted as a thesis for the final examination as described above.

Examination Requirements

Each PhD student is required to satisfy a preliminary examination and pass a series of comprehensive examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

Preliminary Examinations

The Graduate School requires that the department administer preliminary examinations in order to "satisfy itself (by examination or other means) that students who signify intent to undertake the PhD degree are qualified to do so." The Biochemistry Division preliminary examination will be conducted at the end of the student's second semester by a committee of three or more members of the division. The record of

each student, including undergraduate preparation, performance in graduate course work, TA performance and performance in laboratory rotations will be reviewed, and a recommendation will be made on the qualification of the student to continue in the PhD program. Outcomes may include recommendation for additional course work, delay in joining a research lab or a recommendation to leave the program. Students who are considering interdivisional work should consult the Biochemistry Graduate Committee for advice on the preliminary examination requirement.

Language Requirements

The Graduate School rules state that "a student who is noticeably deficient in the written and/or oral use of the English language cannot obtain an advanced degree from CU Boulder." The department assesses the English language proficiency of each PhD student in the oral comprehensive examination.

The department does not require proficiency in a foreign language for the PhD degree.

Comprehensive Examinations

The comprehensive examinations are made up of three parts: a written examination, an oral examination and the evaluation of an original research proposal. The oral examination and the research proposition evaluation shall be conducted by a five member examining board, according to the rules of the Graduate School. One member of this board shall be the student's research advisor. The membership of this board shall be selected by the Biochemistry Graduate Committee, in consultation with other faculty members as necessary. The comprehensive examinations are considered passed when the requirements of all parts have been met.

Written Comprehensive Examination

All biochemistry PhD students will take a written comprehensive examination at the end of their first year. If a student fails the exam, they may be encouraged to take classes in fall semester of their second year to help make up for deficiencies, and they must take the written exam again. The student can still take their oral comprehensive exam, but they will not be able to advance to candidacy until they pass the written exam. The written comprehensive examination will remain in the student's folder, and will be available to the orals committee to help them determine whether the student is capable of PhD work.

The written comprehensive examination for the biochemistry PhD will be written and graded by a selection of faculty within the department. The Biochemistry Graduate Committee is responsible for the overall administration of the process, and will certify that each PhD candidate has satisfied the examination requirements as stated above.

Oral Comprehensive Examination

Students must take the oral comprehensive examination no later than the end of the fourth semester. This examination will include questioning on two topics: the student's research and general topics. Students are expected to demonstrate a clear understanding of their thesis research and fundamental knowledge in biochemistry, and show the ability to think creatively. Students are strongly advised to spend time reviewing material from chemistry and biochemistry courses they have taken as undergraduates and graduates, since this material is often the subject of questioning during the examination.

The oral examination committee consists of three of the five faculty members appointed to the examining board selected by the Biochemistry Graduate Committee. The student's research advisor, while a member of the examining board, may not be a member of this committee.

Students are responsible for arranging the examination date with their committee and should notify the graduate secretary two weeks prior to the scheduled date. At least one week before the exam date, students will present a short written overview (5 single-spaced pages) of their thesis research plan to each committee member. This overview will outline clearly the direction of the student's thesis, provide the committee with advance notice of the thesis research area, and will describe promising research results (if any).

The decision of the oral examining board shall be determined by a simple majority of the members. The committee shall determine whether the student is capable of PhD degree work or not. The possible outcomes of the examination are:

PASS: The student's performance on the examination was PhD caliber.

INCOMPLETE: The student's performance was PhD caliber in some areas, but was below what is expected for a PhD student in other important areas. In this case, the committee will give the student a set of specific requirements to fulfill and will reconvene in no more than three months to complete the examination. If the examination is not completed within the three-month period, it is considered a fail.

FAIL: The student's performance on the examination was not PhD caliber. By Graduate School rules, a student has the option of requesting a second attempt of this examination. This request should be made to the Biochemistry Graduate Committee. Before the student can take a second exam, the committee may require that the student completes class work to remediate deficiencies and/or completes a research master's degree. If the request for a second examination is granted, it will occur no later than a year from the first exam, but the committee may set an earlier date. For the second examination, the oral committee is expanded to five faculty, with at least two from the first examination. The result of this examination will be limited to pass or fail. If a student doesn't take this second examination by the date specified by the committee, they will not be able to continue in the PhD program.

Out-of-Field Research Proposal

Each graduate student in the department is required to write an out-of-field research proposal. Biochemistry students write and defend such a proposal in Advanced General Biochemistry 2 (CHEM 5781) (spring semester "core"). Biochemistry students should make note of critiques of the proposal, rewrite it and hand it in to the CORE instructor for final approval. The final copy of the approved proposal needs to be in the student's file before they can take the written comprehensive examination.

Upon satisfactory completion of all three examination requirements, the five members of the examination board shall recommend the student for advancement to candidacy for the PhD degree.

Final Examination

This examination is primarily a defense of the candidate's thesis. The examining committee consists of the student's thesis advisor as chair, and four other faculty members, at least one of whom is rostered outside of the department. These committee members are selected by the Biochemistry Graduate Committee upon request and after consultation with the student. The student must arrange for one of these other committee members to be the "second reader" of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date of the examination and notifying the graduate secretary at least two weeks prior to the date, and is responsible for distributing copies of the dissertation to the committee members — after it has been approved by the thesis advisor — at least two weeks

before the examination. Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the examination.

Time Limit

Students should note the time limit specified in the Graduate School rules: "All doctoral students are expected to complete all degree requirements within six years from the date of the start of course work in the program." Information on extensions is available in the Doctoral Degree Requirements (p. 868) section.

Petitions

With the approval of the thesis advisor, students may petition for exceptions to the above mentioned rules due to special circumstances. The petition should be addressed to the Biochemistry Graduate Committee, which may consult with other faculty before responding to the petition.

Chemical Physics - Doctor of Philosophy (PhD)

Chemical physics is a discipline at the interface between chemistry and physics. Chemical physics applies physical methods and theory to study molecular and collective properties of matter. The focus is on understanding complex phenomena from gas phase molecular dynamics, to nanoscale, mesoscale and biological phenomena, through model systems and fundamental physical principles.

The chemical physics program allows students to strike a balance between core courses and courses that are better suited to address the student's specific research goals and interests. Students must consult with the chemical physics graduate advisors in their parent departments, either chemistry and biochemistry or physics, to plan their formal course work.

This program is administered by an interdepartmental committee. For more information, contact the graduate program manager in either the Department of Chemistry and Biochemistry (chemgrad@colorado.edu) or the Department of Physics (Jeanne.nijhowne@colorado.edu).

Requirements

Program Admissions

Graduate students in good standing in either the chemistry or physics PhD program may declare their intent to work toward a PhD in chemical physics by notifying the chair of the chemical physics program. The department that originally admitted a student is referred to as their home department. Newly admitted students with an interest in the chemical physics PhD should consult with both their home departmental advisor and their chemical physics graduate advisor for advice on initial course selection. Advanced students must be in good standing in their home department and able to complete the chemical physics PhD within the time limit set by the Graduate School in order to declare their intent to work toward the chemical physics PhD. Once they have been accepted by the Graduate Advisor in chemical physics to enroll for candidacy in the PhD program in chemical physics, the graduate advisor will notify the graduate secretary in their home department to have their major code changed to CPHY.

Once a student has declared their intent to work toward a PhD in chemical physics, the preliminary examination shall be conducted by the chemical physics graduate advisor. The exam shall review all completed courses, undergraduate and graduate, related to chemical physics. The

student must also earn grades of B or better in at least six credit hours of University of Colorado graduate courses that have been approved for the PhD in chemical physics by the graduate advisor. Students must pass the preliminary examination within two semesters of declaring their intent to work toward a PhD in chemical physics. Students are formally admitted to the chemical physics PhD program when they pass the preliminary examination.

Courses

General Requirements

Students must complete a program of formal courses (see "Selection of Formal Courses" below) approved by their PhD thesis advisor and the Committee on Chemical Physics. Students must file an approved degree plan of courses already taken, in progress and planned for future semesters with the Graduate School by the end of their fourth semester. The 30 doctoral dissertation credit hours required by the Graduate School may be completed in either CHEM 8991 or PHYS 8990.

A minimum grade of B# is required in all courses counted for the PhD degree. Students must maintain both a cumulative grade point average of 3.0 in their program of formal courses and an overall grade point average of 3.0.

Selection of Formal Courses

The chemical physics program makes the distinction between formal and graduate level courses. All students will be required to complete an approved program of formal courses that contains at minimum 6 credit hours of formal course work. Formal courses are graded based on individual course work. Many graduate level courses are not considered formal courses in the context of the chemical physics PhD requirements, but may be counted toward Graduate School course requirements. Each student's degree plan for course work must be approved by the student's PhD thesis advisor and a chemical physics graduate advisor. The formal courses shall be chosen to develop the student's competency in classical mechanics, quantum mechanics, thermodynamics and statistical mechanics, electricity and magnetism, chemical kinetics, and in their area of thesis research.

Transfer of Credit

Up to 10 credit hours of graduate level, formal course work may be transferred from another school, subject to demonstrated proficiency in the subject(s), approval by the Chair of the Committee on Chemical Physics, and approval by the Graduate School. Forms for this purpose can be obtained from the graduate program manager.

Formal Application for Admission to Candidacy for the PhD Degree

All students must make formal application for admission to candidacy for the PhD degree by the fourth semester. The required forms can be obtained from the graduate program manager. This Graduate School requirement should be fulfilled even if the student has not completed all the courses required by their degree plan. To satisfy Graduate School requirements, the degree plan may include graduate-level courses that are not approved as formal courses in chemical physics, but the degree plan must include the student's approved program of formal courses in chemical physics. After filling in the form, indicating graduate courses taken and to be taken, it should be approved and signed by the student's PhD thesis advisor and then by the Chair of the Committee on Chemical Physics.

Examination Requirements

Each student is required to pass a preliminary examination before admission to the program. Each student in the program is required to pass a comprehensive examination to advance to candidacy. After completing all graduate school and course requirements, the candidate must then submit a dissertation and pass a final dissertation defense to be awarded the PhD in chemical physics.

Language Requirements

Foreign Language Requirement

The program does not require proficiency in a foreign language for the PhD degree.

English Language Proficiency

The English language proficiency required for an advanced degree by the Graduate School will be assessed for each student through written course work and in the oral portion of the comprehensive examination.

Advancement to Candidacy

Advancement to candidacy for the PhD in chemical physics requires that the student select a PhD thesis advisor, complete a program of courses approved by the PhD thesis advisor and the Committee on Chemical Physics, write a proposal describing their proposed PhD thesis research, and pass a comprehensive examination covering chemical physics and the proposed thesis research. The oral examination should normally be completed by the end of the second year.

The comprehensive examination shall be conducted by a five member Comprehensive Exam Committee (CEC), according to the rules of the Graduate School. The CEC shall consist of graduate faculty from the Department of Chemistry and Biochemistry and the Department of Physics; there must be at least one member from each department. One member of the CEC shall be the student's thesis advisor. The membership of the CEC shall be selected by the student, but must be approved by the PhD thesis advisor, the graduate advisor and the Graduate School.

In order to attempt the oral examination, the student must demonstrate satisfactory progress toward completing their approved program of courses and submit an application for candidacy to the Graduate School at least two weeks in advance of the scheduled oral examination. Students are responsible for arranging the examination date, time and place with their CEC and should notify the chemical physics program chair and their departmental graduate secretary at least two weeks prior to the scheduled date. The candidate must schedule the exam so that all members of the board are available for a full two hours.

One week in advance of the oral examination, the student should submit a written proposal to their CEC that demonstrates suitability of the project for a PhD thesis, adequate background knowledge of chemical physics, the field of research and the relevant literature. The oral examination will assess the student's competence in the core areas of chemical physics: elementary physics and chemistry, quantum mechanics, chemical kinetics, thermodynamics and statistical mechanics, electricity and magnetism, as well as the student's research plans. The research advisor is strongly encouraged to attend the oral examination, but is recused from final discussion and voting on the outcome. Three (out of four) passing votes are needed for the CEC to approve the written proposal and the oral examination. A pass may be conditional or unconditional.

If the student does not pass the oral examination, the committee may recommend additions to the approved program of courses in chemical physics or that the student complete the MS or PhD program

in their home department (note that there is no MS degree program in chemical physics). A student who does not pass has the right to attempt the examination once more after a period of time set by the CEC. Advancement to candidacy occurs when all examination requirements and conditions have been met.

Annual Progress Review

Students in chemical physics must complete the annual progress review required in the third year and beyond.

Dissertation Defense

This examination is primarily a defense of the candidate's thesis. The examining committee consists of the student's PhD thesis advisor as chair and four other faculty members, at least three of whom must be from the Department of Chemistry and Biochemistry and the Department of Physics, with at least one from each department. These committee members are selected by the program chair upon request by and after consultation with the student and must be approved by the Graduate School two weeks in advance.

The student must arrange for one of these other committee members to be the "second reader" of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date, time and location for the defense, notifying their home department's graduate program manager in time for the appropriate approvals by the Graduate School, and distributing copies of the dissertation to the committee members at least two weeks before the defense.

Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the dissertation defense. A passing defense requires an affirmative vote from at least four out of five committee members. A student who does not pass has the right to attempt to defend the dissertation once more after a period of time set by the examining committee.

Dissertation Requirements

A doctoral student writes a dissertation based upon their own original investigation. The dissertation must demonstrate mature scholarship, critical judgment and a familiarity with the tools and methods of research.

- Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
- The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
- The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
- The dissertation must be submitted electronically before the posted deadline in order to graduate in a given semester. It should be submitted to <http://www.etsadmin.com/colorado>. A signature page with at least two original signatures must also be turned in to the Graduate School office by the end of the business day on or before the dissertation deadline.
- The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed. The final copy of the dissertation is accepted by the examination committee, at which time the final

grade for all dissertation hours is submitted to the Graduate School on a final grade card.

Chemistry - Doctor of Philosophy (PhD)

The Department of Chemistry and Biochemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas, including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry and biochemistry faculty; with other departments, such as Physics and Molecular, Cellular and Developmental Biology; and with research institutes and agencies, such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA) and the National Oceanic and Atmospheric Administration (NOAA).

The course work for this program is tailored to the individual student's research interests and needs. Although course offerings vary each year, approximately 40 graduate-level courses are offered annually, covering topics of important and contemporary interest in all areas of chemistry and biochemistry. Students are also given the chance to familiarize themselves with faculty research by attending seminars by faculty on their research and research group meetings, and by individual meetings with faculty members.

PhD program students complete a number of other requirements, including a comprehensive examination, which consists of written cumulative examinations, and an oral examination. At some point later in the program, students complete an original research proposal and give a seminar to the department on a topic outside their own research. Most students graduate with their PhD in about five years.

Requirements

Examination Requirements

Each PhD student is required to satisfy divisional preliminary examinations and pass a series of comprehensive examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

Preliminary Examinations

The Graduate School requires that the department administer preliminary examinations in order to "satisfy itself (by examination or other means) that students who signify intent to undertake the PhD degree are qualified to do so." The format of the departmental preliminary examination of each student will be a responsibility of the division that admits them. The preliminary examination will be completed before the end of the second semester of study. Students will be required to follow the format of the preliminary examination of the division that admits them. Students who are uncertain of their division or who are considering an interdivisional major should consult the graduate advisor for advice on the preliminary examination requirement.

Language Requirements

The Graduate School rules state that "a student who is noticeably deficient in the written and/or oral use of the English language cannot obtain an advanced degree from CU Boulder." The department assesses the English language proficiency of each PhD student in the oral comprehensive examination.

The department does not require proficiency in a foreign language for the PhD degree.

Comprehensive Examinations

The comprehensive examinations are made up of three parts: a series of cumulative examinations, an oral examination and evaluation of an original research proposal. The oral examination and the research proposition evaluation shall be conducted by a five-member examining board, according to the rules of the Graduate School. One member of this board shall be the student's research advisor, and one member shall be from outside the primary field of study of the student. The membership of this board shall be selected by the Graduate Advisor, in consultation with other faculty members as necessary. The comprehensive examinations are considered passed when the requirements of all parts have been met.

Cumulative Examinations

The cumulative examinations are given in each division eight times a year from September through May on the first Saturday morning of each month except January. Students must take each examination from the beginning of their third semester and pass six before failing eleven. Students will usually take only the examinations offered in their division, but may elect to take up to three in other divisions; in these cases, students must inform the graduate program manager of their intentions prior to the examination date. Students in the atmospheric program will be advised on the selection of the appropriate examinations. An examination that is not taken counts as a failure unless the student has been excused *in writing* from the examination by the graduate advisor. During the first year, the student may elect to take one or more examinations with the advantage that only half of the failed exams are counted; half-failures are rounded to the lower number. Students should note that they are not allowed to read the exam(s) and then leave without taking the exam without penalty of a failure.

A student completing a master's degree in this department, either voluntarily or on the recommendation of the PhD oral examination committee, may wish to be considered for admission to the PhD program. Such students must take the cumulative examinations from the beginning of their third semester (voluntary MS) or continue with examinations (recommended MS), to assist the Graduate Scholastic Committee in deciding upon admission.

Oral Comprehensive Examination

Students must take the oral comprehensive examination no later than the end of the fourth semester. Master's degree students in this department who wish to continue for a PhD degree must take the oral examination no later than the end of the fifth semester even if they have not completed the master's degree.

This examination will include questioning on two topics: the student's research, and general topics. Students are expected to demonstrate a clear understanding of their thesis research and fundamental knowledge in chemistry, and show the ability to think creatively. Students are strongly advised to spend time reviewing material from chemistry and biochemistry courses they have taken as undergraduates and graduates, since this material is often the subject of questioning during the examination.

The oral examination committee consists of three of the five faculty members appointed to the examining board selected by the graduate advisor. The student's research advisor, while a member of the examining board, may not be a member of this committee. The decision of this committee shall be determined by a simple majority of the members. The committee shall determine whether the student is capable of PhD degree work, master's degree work or no advanced degree work. The committee may require that the student repeat the examination, and/or may require the student to take additional courses. The committee may require that the student complete a thesis master's degree before continuing on to the PhD; in this case, the committee will decide if it is necessary for the student to repeat the oral comprehensive examination at some time during the completion of the master's degree research. The committee may also require that a student complete a master's degree (thesis or course work MS), and then leave the graduate program. As described in the Graduate School rules, students who fail the examination have the right to request a second attempt; in this case, the student should contact the Graduate Scholastic Committee.

Students are responsible for arranging the examination date with their committee and should notify the graduate secretary two weeks prior to the scheduled date. At least one week before the exam date, students will present a short written overview (approximately 5 pages) of their thesis research plan to each committee member. This overview will outline clearly the direction of the student's thesis, provide the committee with advance notice of the thesis research area, and will describe promising research results (if any). Students might be asked at the time of the exam to describe and defend alternate experimental approaches to their research goals.

Research Proposal

Upon completion of the oral comprehensive examination, each student shall submit an original research proposal on a topic not related to the student's thesis research to the two members of the examination board who were not members of the oral examination committee. The proposal may be written as a part of any graduate course in the department where written proposals are required, or may be written as a part of an individual's group meeting activity. It is the thesis advisor's primary responsibility to assure that the proposal is original. The proposal must obtain the approval of both the members of the research proposition committee. In the event of a dispute between the two members, the proposal will be referred to the full examination board for a decision.

Upon satisfactory completion of all three examination requirements, the five members of the examination board shall recommend the student for advancement to candidacy for the PhD degree.

Final Examination

This examination is primarily a defense of the candidate's thesis. The examining committee consists of the student's thesis advisor as chair and four other faculty members, at least one of whom is rostered outside of the department. These committee members are selected by the graduate advisor upon request and after consultation with the student. The student must arrange for one of these other committee members to be the "second reader" of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date of the examination and notifying the graduate program manager at least two weeks prior to the date, and is responsible for distributing copies of the dissertation to the committee members — after it has been approved by the thesis advisor — at least two weeks before the examination. Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the examination.

Course Requirements

General Requirements

Sixty credit hours of courses are required, consisting of 30 hours of research in CHEM 8991, at least 15 hours in formal courses (see next section), and the remainder in other courses, such as summer courses, seminar courses, group meeting courses and research in CHEM 6901.

A minimum grade of B- is required in all courses counting for the PhD degree; students should also be aware that they must maintain a cumulative grade point average of 3.0 in all formal courses and an overall grade point average of 3.0 or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Probationary status must be removed within two semesters or a student will become ineligible to receive a PhD degree from the Department of Chemistry and Biochemistry. Students on probation will not have a high priority for financial support.

A degree plan of courses taken and yet to be taken must be filed with the Graduate School by the end of the student's third semester.

Selection of Formal Courses

All students will be required to take a minimum of 15 credit hours of formal courses. Formal courses are regularly scheduled, examined and graded; courses such as summer courses, seminar courses, group meeting courses and research in CHEM 6901 are not considered formal courses. Each student's program plan for course work must be approved by the student's research advisor and the departmental graduate advisor. These formal courses must be approved prior to the end of the second semester, and students are encouraged to complete formal course requirements within their first three semesters.

Transfer of Credit

Up to 10 credit hours of graduate-level, formal course work may be transferred from another school subject to demonstrated proficiency in the subject(s) and written approval by the graduate advisor. Forms for this purpose can be obtained from the graduate secretary.

Formal Application of Admission for Candidacy for the PhD Degree

All students must make formal application for admission to candidacy for the PhD degree by the end of the third semester on forms that can be obtained from the graduate secretary. This Graduate School requirement should be fulfilled even though students have not completed all their formal course work. After filling in the form indicating graduate courses taken and to be taken, it should be approved and signed by the student's research advisor and then the graduate advisor.

PhD students shall have passed their cumulative exams and the oral comprehensive examination before they may be admitted to candidacy for the PhD degree. Students should note that the approved research proposal must be filed in order for a student to be advanced to candidacy.

Research Requirements

The results of a completed research program are submitted as a thesis for the final examination described above. Some students may pursue their PhD research in a laboratory outside of the department (e.g., JILA, NOAA, etc.) with the approval of the graduate advisor. In this case, the student must find a surrogate advisor in the department who agrees to monitor the activity of the student. It is recommended that meetings

between the surrogate advisor, student and day-to-day advisor be frequent, perhaps in the form of a group meeting.

Time Limit

Students should note the time limit specified in the Graduate School rules: "All doctoral students are expected to complete all degree requirements within six years from the date of the start of course work in the program." Information on extensions is available in the Doctoral Degree Requirements (p. 868) section.

Molecular Biophysics - Graduate Certificate

This program introduces graduate students to the field of biophysics, its methodologies and the state-of-the-art biophysical research efforts being carried out in diverse laboratories and departments on the CU Boulder campus. It creates interdepartmental connections that provide the breadth of training needed to develop biophysical scholars.

Students must be admitted through the regular admissions process to a PhD program in one of the following departments:

- chemical and biological engineering;
- chemistry and biochemistry;
- molecular, cellular and developmental biology; or
- physics

They must satisfy all of their home department's requirements to receive a PhD as well as the additional requirements of the certificate program. For more information, visit the program's Molecular Biophysics Training Program: Certificate Option (<http://www.colorado.edu/biophysics/certificate>) webpage.

Requirements

Participation in one to three laboratory rotations outside the thesis lab, which provide experience with a range of biophysical methods. Subsequently the student joins one of the member laboratories of the training program for thesis work.

Completion of two courses chosen from a list of approved courses. Currently this list includes 15 courses in areas ranging from theoretical physics to molecular and cellular biophysics.

Annual meeting with a faculty advisory committee that provides helpful feedback on the thesis research.

Students are expected to take part in a seminar series, which presents internationally renowned speakers and their research. They also are required to participate in supergroup meetings and symposia, which provide forums for them to present their own research in front of their colleagues and advisory committee.

Classics

The Department of Classics is one of the most vibrant programs in humanistic studies at the University of Colorado. It is a department in which students at every level are challenged to integrate the world of scholarship into their daily lives.

We are multicultural, because we study the civilizations of ancient Greece and Rome, but also the many peoples with which the Greeks and Romans interacted in central and eastern Europe, north Africa, Egypt and the Middle East.

We are interdisciplinary because faculty and students in the department cross the boundaries of literature, philosophy, material culture, history and religion to study the world of antiquity. We also cover area studies because of the historical broad sweep that our field encompasses of the Mediterranean basin and the regions that border it. The department offers courses in language and literature, ancient history, art and archaeology, and philosophy within several programs of study at the undergraduate and graduate levels.

Course codes for this program are CLAS, GREK and LATN.

Master's Degree

- Classics - Master of Arts (MA) (p. 947)

Doctoral Degree

- Classics - Doctor of Philosophy (PhD) (p. 948)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

CLAS 5021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and HIST 4021

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and HIST 4031

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and HIST 4041 and PHIL 4210

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4061 and HIST 4061 and HIST 5061

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and HIST 4071

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and HIST 4081

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5091 (3) The Roman Empire

Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and HIST 4091

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4109 and ARTH 4109 and ARTH 5109

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5110 (3) Greek and Roman Epic

Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and HUMN 4110

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5119 (3) Roman Sculpture

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4119 and ARTH 4119 and ARTH 5119

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and HUMN 4120

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4129 and ANTH 4129 and ANTH 5129 and ARTH 4129

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and HUMN 4130

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4139 and ARTH 4139 and ARTH 5139

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5140 (3) The Greek and Roman Novel

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and HUMN 4131

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and ARTH 4149

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5159 (3) Hellenistic Art and Archaeology

Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5159

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture.

Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and ARTH 4169 and ARTH 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5179 (3) City of Athens

Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periclean period, considering ways in which it developed from earlier times and influenced later ones in Athens.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5179

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5189 (3) City of Rome

Explores in detail the architecture, sculptures, coins, frescoes and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5189

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5199 (3) Roman Architecture

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and ARTH 4199

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5209 (6) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and ARTH 4209

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4229 and ARTH 4229 and ARTH 5229

Additional Information: Departmental Category: Art and Archaeology

CLAS 5269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4269 and CLAS 4269 and ARTH 5269

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology
Departmental Category: Asia Content

CLAS 5761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4761 and HIST 4761 and HIST 5761

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5840 (1-3) Graduate Independent Study

No Greek or Latin required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 6109 (3) Topics in Critical Theory and Ancient Art and Archaeology

Topics will vary and may focus on a particular approach to ancient material culture or on a particular time period or artifact category. Emphasis is placed on reading and using theory in considering the ancient world.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 6119 (1-3) Graduate Independent Study in Classical Art and Archaeology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 6952 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Classical Philology

CLAS 7011 (3) Seminar in Ancient History

Examines topics in ancient Greek and Roman history at an advanced seminar level.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 7012 (3) Graduate Seminar

Topic specified in online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Classical Philology

CLAS 7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology

Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 7840 (1-3) Graduate Independent Study

No Greek or Latin required.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 8992 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Additional Information: Departmental Category: Classical Philology

GREK 5013 (3) Topics in Greek Prose

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).

Equivalent - Duplicate Degree Credit Not Granted: GREK 4013

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 5023 (3) Topics in Greek Poetry

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).

Equivalent - Duplicate Degree Credit Not Granted: GREK 4023

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 5093 (3) Survey of Greek Literature

Greek literary history in ancient Greek from Homer to the Hellenistic age.

Equivalent - Duplicate Degree Credit Not Granted: GREK 4093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 6003 (3) Graduate Reading

Author or topic specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 6843 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 7013 (3) Graduate Seminar in Greek Literature

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

LATN 5014 (3) Topics in Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).

Equivalent - Duplicate Degree Credit Not Granted: LATN 4014

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5024 (3) Latin Prose Composition

Reviews grammar and syntax. Introduces Latin prose style and composition. Formerly CLAS 5024.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4024

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5044 (3) Topics in Latin Poetry

Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).

Equivalent - Duplicate Degree Credit Not Granted: LATN 4044

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5084 (3) Survey of Roman Literature Part 2: Imperial

Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4084

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5094 (3) Survey of Roman Literature Part 1: Republican to Augustan

Introduces Roman literary history from its origins to the 30s BCE.

Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4094

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5404 (3) Special Project: Teaching

Trains students to prepare classroom-ready materials, which are then tested in the students' own classroom. Required of master's candidates (teaching of Latin option). Formerly CLAS 5404.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5824 (3) Latin Teaching Methods: Open Topics

Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4824

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 6004 (3) Graduate Reading

Author or topic specified in the online Schedule Planner. Formerly CLAS 6004.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 6844 (1-3) Graduate Independent Study

Formerly CLAS 6844.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 7014 (3) Graduate Seminar in Latin Literature

Formerly CLAS 7014.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

Classics - Master of Arts (MA)

Candidates may choose to emphasize in Greek or Latin, classical art and archaeology, classical antiquity or the teaching of Latin (MAT).

It is expected that students opting for the teaching of Latin either have achieved accreditation at the secondary level or are planning to do so through the School of Education. The MA degree alone does not satisfy the state requirements for certification.

For more information, visit the department's Graduate Degrees in Classics (<http://www.colorado.edu/classics/graduate/graduate-degrees-classics>) webpage.

Concurrent Degree Program BA/MA in Classics

The five-year BA/MA concurrent degree program in classics is designed for students who enter the University of Colorado ready to take courses in Latin or Greek at the 3000-level or above, and who wish to prepare themselves for application to competitive PhD programs in classics. Students without adequate preparation in at least one language would find it difficult to complete two degrees in five years, since proficiency in

the languages comes largely from practice and experience. Students will normally need to study both Latin and Greek in order to meet their course requirements within five years; course offerings in just one language will normally not be sufficient. The five-year degree combines the BA in Greek and/or Latin (Track I) with the MA in classics with concentration in Greek or Latin (Program I), Plan II (no thesis). Students with strong research interests may be able to complete the BA with honors or the MA with concentration in Greek or Latin, Plan I (with thesis). Graduates of the BA/MA program who have completed their work in excellent fashion will be well prepared to apply for PhD programs in classics. Students who enter CU with an already strong knowledge of Latin or Greek may be eligible to pursue a five-year concurrent bachelor's/master's degree (BA/MA).

Here is a guide to the concurrent degree program (<http://www.colorado.edu/classics/bama-guide>); for more information, contact the associate chair for undergraduate studies.

Requirements

Degree Emphases

Latin or Greek Emphasis

Candidates are required to complete at least six graduate-level courses (18 credit hours) in Greek and/or Latin, and to pass a three-hour written examination in translation and analysis of the major language. Students intending to pursue the PhD in classics are strongly advised to develop proficiency in both Latin and Greek, and to acquire a reading knowledge of German and at least one other modern foreign language (normally French or Italian).

Teaching of Latin Emphasis

Candidates must pass a three-hour written examination in Latin translation and a one-hour oral comprehensive examination on teaching methods and their own Latin teaching project. Thirty credit hours of course work, including one Latin workshop (3 credit hours) and a special project (3 credit hours), are required. Plan I is not offered for the MA degree with emphasis on teaching.

Classical Art and Archaeology Emphasis

Candidates are required to complete at least two graduate-level courses (6 credit hours) in Greek and/or Latin and five graduate-level courses (15 credit hours) in ancient and/or medieval art and archaeology. In addition, they must pass written examinations on Greek and Roman art and archaeology. Students intending to pursue the PhD in classical archaeology are strongly recommended to develop proficiency in both Latin and Greek and to acquire a reading knowledge of German and at least one other modern foreign language (normally French or Italian). With the approval of the associate chair for graduate studies, graduate-level classes in Greek or Latin may be substituted for classical archaeology or history.

Classical Antiquity Emphasis

Candidates are required to complete at least two graduate-level courses (6 credit hours) in Greek and/or Latin and must pass a written examination in two of the following fields: history, art and archaeology, religion and mythology, philosophy and political theory and Greek or Latin translation.

Degree Plans

Plan I: Thesis Option

Candidates for the MA plan I (24–27 credit hours of course work at the 5000 level or above, plus 3–6 credit hours of thesis) take a one-hour oral comprehensive examination in defense of the thesis.

Plan II: Comprehensive Examination Option

Candidates for the MA plan II (30 credit hours at the 5000 level or above, without a thesis) must have departmental approval and pass a one-hour oral comprehensive examination covering their course work and reading lists for their exams.

Classics - Doctor of Philosophy (PhD)

The PhD in classical languages and literatures is founded on mastery of Greek and Latin, develops the student's ability to pursue independent scholarly research through seminars and advanced work on special topics, and culminates with the dissertation.

Students take courses and seminars on major ancient authors and genres, Greek and/or Latin prose composition, and such special topics as literary criticism, epigraphy, paleography and numismatics.

In addition to Greek and Latin language and literature, the department has strengths in ancient history and historiography, late Antiquity, philosophy, and Greek and Roman archaeology.

For more information, visit the department's Doctor of Philosophy in Classics (<http://www.colorado.edu/classics/graduate/graduate-degrees-classics/phd>) webpage.

Candidates for the PhD in classics must meet the following requirements:

1. A minimum of 42 credit hours of course work at the 5000 level or above (excluding thesis and accelerated courses). Course work completed in the MA program at the University of Colorado, or up to 21 credit hours of graduate credit transferred from another institution, may be applied toward this requirement. Courses should be distributed as follows:
 - a. Four 7000-level graduate seminars (at least one each in Greek and Latin).
 - b. Two courses in ancient history and/or classical archaeology.
 - c. One course in either Greek or Latin prose composition.
 - d. Two courses in special fields such as epigraphy, law, linguistics, literary theory, medieval studies, palaeography, papyrology, philosophy or religion, as approved by the associate chair for graduate studies.
2. A minimum of 30 credit hours of doctoral dissertation with no more than 10 of these credit hours in any one semester. No more than 10 dissertation credit hours may be taken preceding the semester of taking the oral comprehensive examination. Up to 10 credit hours may be taken during the semester in which the student passes the comprehensive examination.
3. A reading knowledge of German and one other modern foreign language (normally Italian or French). Proficiency is tested by a one-hour written translation test using a dictionary. Students may take a foreign language exam at any time by arrangement with the associate chair for graduate studies. Students are encouraged to pass both modern language exams before the end of the third semester and required to do so before the end of the fourth semester in the PhD program.
4. **Preliminary Examinations in Greek and Latin.** Two written examinations of three hours each, each consisting of two hours of translation and one hour of analysis of texts. The translation portion of each exam will consist of two out of three prose passages and two out of three verse passages for a total of about 100 lines. All passages will be drawn from the PhD reading list. Each written

examination will be followed by a one-hour oral examination that covers the range of Greek or Latin literature represented by the reading list and tests the candidate's general knowledge of the primary sources and literary history. There will be two administrations of each exam per year, in the fall and spring. Students are required to pass both exams by the end of the second semester in the PhD program (or the second semester beyond the MA). Successful completion of the MA in Track I or the equivalent at another university, as determined by the graduate committee, will satisfy one of these examination requirements.

5. **Comprehensive Examination.** Two written examinations of three hours each on two topics or authors, chosen in consultation with faculty members selected by the student and approved by the graduate committee, to be chosen from the following broad areas: language and literature, ancient history, archaeology, philosophy or religion. In selecting the topics for these examinations, students are required to demonstrate balance in the fields of Greek and Roman culture, as determined by the graduate committee. The written comprehensive examinations will be administered twice per year, typically during the last two weeks of the term. Successful completion of the written examination is followed by a two-hour oral exam on Greek and Roman culture within the area of the student's chosen specialization, which should coincide with the student's intended dissertation topic. Students are required to complete these exams by the end of their fourth semester in the PhD program.
6. **Dissertation Prospectus.** To be circulated to the dissertation advisory committee for approval by the end of the fifth semester in the PhD program.
7. **Dissertation.** To be completed by the end of the eighth semester in the PhD program.
8. **Final Examination (upon submission of dissertation).** Two hours of oral defense of the dissertation.

Cognitive Science

Cognitive Science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored, and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of Cognitive Science concerns how knowledge is understood, remembered, communicated, and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets. Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education, and multimedia services.

The Institute of Cognitive Science (ICS) currently offers two graduate certificate programs: one has a general science focus, the other focuses on human language technology. The cognitive science academic certificate programs are interdisciplinary programs for graduate students in the following departments (see the undergraduate Cognitive Science (p. 244) page for certification at the undergraduate level):

- Psychology & Neuroscience
- Philosophy
- Linguistics
- Education
- Speech, Language and Hearing Sciences

- Computer Science
- Architecture, Planning and Design (Denver Campus)
- Information Science
- Integrative Physiology

For more information, visit the Institute of Cognitive Science (<https://www.colorado.edu/ics/graduate-programs>) website or call Donna Caccamise at 303-735-3602.

Doctoral Degree

- Cognitive Science - Doctor of Philosophy (PhD) (p. 950)

Certificates

- Cognitive Science - Graduate Certificate (p. 951)
- Human Language Technology - Graduate Certificate (p. 952)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Banich, Marie (https://experts.colorado.edu/display/fisid_120646)
Professor; PhD, University of Chicago

Bidwell Kovalev, Lorna Cinnamon (https://experts.colorado.edu/display/fisid_155117)

Research Professor; PhD, University of Colorado Boulder

Yaeger, Barbara Jean (https://experts.colorado.edu/display/fisid_151792)
Asst Research Professor; PhD, Oakland University

Cognitive Science - Doctor of Philosophy (PhD)

The cognitive science academic program includes a combined PhD degree between cognitive science and a core discipline, as well as a combined PhD plan of study tailored for students interested in cognitive neuroscience. These programs are administered by CU Boulder's Institute of Cognitive Science (ICS).

Graduate students in cognitive science are admitted to graduate programs in participating departments that have cognitive science faculty, and must meet the requirements for admission and degree completion in their home department.

Students wishing to attain a degree or certificate in cognitive science must formally apply to the director of academic programs of ICS. To be admitted, they must be a student affiliate of ICS, which requires being a graduate student in good standing in a member department, and they must be sponsored by an ICS faculty fellow. Students who enter the Graduate School without a master's degree may be admitted to the program upon completion of their first year of study; students with a master's degree may be admitted during their first year.

The degree and certificate programs in cognitive science require students to demonstrate acceptable performance in interdisciplinary course work and courses outside their home department. The courses must be offered by the following departments: Computer Science; Education; Integrative Physiology; Linguistics; Philosophy; Information Science; Psychology and Neuroscience; Speech, Language, Hearing Sciences; Architecture and Planning; or a department in which there is an ICS faculty fellow.

Details about requirements for the degree and certificate programs can be obtained through the director of academic programs for ICS or by contacting the ICS main office.

For further information, contact:

Donna Caccamise
Associate Director and Academic Program Director
Institute of Cognitive Science
Donna.Caccamise@Colorado.edu

Dual Degree Program Cognitive Science Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a degree can significantly enhance a student's academic knowledge and career choices. Review the course requirements,

application for admission and program completion checklist for further information.

For more information, visit the institute's Cognitive Science Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd>) webpage.

Triple Degree Program Cognitive Neuroscience Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science, neuroscience and their core discipline:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language and Hearing Sciences
- Education
- Architecture and Planning

Students interested in the combined PhD with cognitive science and neuroscience must meet course and thesis requirements. The student's thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. To enroll in this triple degree, you must enroll in the neuroscience program and the cognitive science program.

For more information, visit the institute's Cognitive Neuroscience Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd>) webpage.

Requirements Combined PhD Requirements

Students must complete 30 credit hours of cognitive science courses, including 9 credit hours of required core courses and 21 credit hours of elective courses.

For more program information, visit the institute's Cognitive Science Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd>) webpage.

Required Courses and Semester Credit Hours

Core Cognitive Science Courses

PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310	Issues and Methods in Cognitive Science	3
PSYC/LING 7775/CSCI 7772/ EDUC 7775/SLHS 7775/PHIL 7810	Topics in Cognitive Science (two semesters, 1 credit per semester)	2
PSYC 7415/ CSCI 7412/ EDUC 6506/ LING 7415/PHIL 7415	Cognitive Science Research Practicum	2

PSYC 7425/ Cognitive Science Research Practicum 2
 CSCI 7422/
 EDUC 6516/
 LING 7425/PHIL
 7425

Elective Cognitive Science Courses	
Twelve credit hours of courses outside the home department, including courses in at least two different departments outside the home department. Each course must be at least 2 credits.	12
Two interdisciplinary courses from the list of ICS-approved interdisciplinary courses during the semester the course was taken.	6
Additional elective courses to complete the 30-credit-hour requirement.	3
Total Credit Hours	30

For a list of available elective courses, visit the institute’s Course Catalog (<http://www.colorado.edu/ics/graduate-programs/course-catalog>) webpage.

Interdisciplinary Thesis

The original contributions of the dissertation research should exploit state-of-the-art methods from the perspective of at least two disciplines. Students are encouraged to have their doctoral research co-supervised by two ICS fellows representing different disciplines.

Dissertation

Students must complete 30 hours of dissertation research.

Triple PhD Requirements

Students must complete 28–34 credit hours, including 11–14 credit hours of required core courses, 6–9 credit hours of depth courses and at least 11 credit hours of courses in a related discipline specialization. For a list of specific available courses, visit the institute’s Course Catalog (<http://www.colorado.edu/ics/graduate-programs/course-catalog>) webpage.

For more information, visit the institute’s Cognitive Neuroscience Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd>) webpage.

Comprehensive Examination

In accordance with the graduate school requirements, students will be required to take a comprehensive exam, which they must pass in order to advance to doctoral candidacy status. Successful completion (grade of B- or better) of the Introduction to Neuroscience I (NRSC 5100) and Introduction to Neuroscience II (NRSC 5110) courses will fulfill the neuroscience component of the comprehensive exam.

In addition, the student must pass a comprehensive exam in their area of specialization. The format of this specialty comprehensive exam will be determined by the student’s advisor and will be appropriate for the advisor’s department/program of affiliation, but must also be interdisciplinary in nature to fulfill the cognitive science component of the comprehensive exam.

Thesis

All cognitive neuroscience PhD students will be required to complete a doctoral thesis with a primary cognitive neuroscience focus. The thesis/dissertation will represent original state-of-the art research of quality suitable for publication in a reputable scientific journal. The student’s thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. In addition, the student’s thesis committee must

include at least one additional neuroscience faculty member and one cognitive science faculty member from outside the student’s area of specialization. In accordance with the requirements of the Graduate School, the student’s committee must be comprised of a minimum of five faculty members that have graduate faculty appointments. The committee will be formed by the student’s advisor, upon approval of the slate of members by the academic directors of the neuroscience and cognitive science combined PhD programs.

Cognitive Science - Graduate Certificate

Tailored to the individual student’s area of interest, the cognitive science curriculum for this certificate is designed to provide broad as well as in-depth training in the cognitive sciences.

Graduate students in good standing in one of the following participating academic units may apply to earn a graduate certificate in cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a certificate can significantly enhance a student’s academic knowledge and career choices.

To learn more about the certificate, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate>).

Requirements

The graduate certificate consists of course requirements only.

Required Courses and Credit Hours

Required Courses		
PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310	Issues and Methods in Cognitive Science	3
PSYC/LING 7775/CSCI 7772/ EDUC 7775/SLHS 7775/PHIL 7810	Topics in Cognitive Science (2 semesters, 1 credit per semester)	2

Electives	
Three cognitive science courses of 2 credit hours or more	6
One interdisciplinary course	2-3
Additional courses to complete the credit-hour requirement from at least two different departments outside of the student’s home department	

To learn more about the program, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate>).

Human Language Technology - Graduate Certificate

The explosive growth of the web and the vast improvements in computing power in the last decade have led to a strong need for education and research in human language technology. Human language technology is an interdisciplinary field that includes the following key technological and scientific areas:

- Computer Speech Recognition and Understanding
- Natural Language Understanding and Generation
- Text-based Information Retrieval
- Web-Based Dialog Agents

CU Boulder's interdisciplinary certificate in human language technology, offered jointly by the Institute of Cognitive Science; the Department of Computer Science; the Department of Linguistics; and the Department of Speech, Language, and Hearing Sciences, provides a rich and broad background for students interested in computational tools for human language processing.

To learn more about the certificate, visit the Institute of Cognitive Science's website (<https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate>).

Curriculum

The curriculum for the certificate consists of **five** different courses:

- **One** semester of programming (CSCI 1300) (waived for those with programming background).
- **Three** courses from the core list; at least two of these three must be outside the student's home department and college.
- **One** course from the optional course list (or two from the optional list if programming was waived). Extra courses from the core list (beyond the required three) can also be counted as optional courses.

Three of these five required courses must be taken at the graduate level.

For a list of core and optional courses, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate>).

Ecology and Evolutionary Biology

The EBIO graduate program provides advanced training in a wide variety of biological disciplines ranging from biogeochemistry to community ecology to evolutionary genetics. The goal of the EBIO graduate program is to produce scientists, educators and citizens who are equipped with skills to build careers that advance knowledge about life on Earth. Graduates of the EBIO program are well-positioned to pursue a wide range of careers that include academia, science education, wildlife biology, conservation biology, resource management, environmental consulting and environmental law.

Our disciplinary strengths include behavior, ecology, genetics, morphology and systematics. Roughly half of the faculty focus on the adaptation and functioning of organisms in the context of environment, while the other half study higher levels of organization, including

populations, communities and ecosystems. Our research programs have relevance for global change, conservation biology, and revealing fundamental mechanisms underlying the structural and functional adaptations of organisms.

Please contact ebiograd@colorado.edu for additional information.

Course code for this program is EBIO.

Master's Degree

- Ecology and Evolutionary Biology - Master of Arts (MA) (p. 956)

Doctoral Degree

- Ecology and Evolutionary Biology - Doctor of Philosophy (PhD) (p. 957)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

EBIO 5000 (1) EBIO Colloquia

All first year EBIO graduate students are required to attend the EBIO Colloquia Series. Speakers from around the world and within the department cover topics in all areas of biology.

Repeatable: Repeatable for up to 2.00 total credit hours.

EBIO 5030 (3) Limnology

Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4030

Requisites: Restricted to graduate students only.

EBIO 5060 (3) Landscape Ecology

Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4060

Requisites: Restricted to graduate students only.

EBIO 5080 (4) Freshwater Phycology

Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4080

Requisites: Restricted to graduate students only.

EBIO 5100 (3) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4100

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 5120 (2-4) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 5150 (1-2) Techniques in Ecology

Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4150

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 5240 (3) Advanced Topics in Animal Behavior

Covers special areas of ethology such as sociobiology, animal communication, cognitive ethology, human ethology, moral and ethical issues.

Recommended: Prerequisite EBIO 3240.

EBIO 5270 (3) Population Genetics

Provides an in-depth introduction to population genetics. Lectures and discussions will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. Following an introduction to population genetic theory, we will investigate current topics in the field.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4270

Grading Basis: Letter Grade

EBIO 5290 (4) Phylogenetics and Comparative Biology

Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4290

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EBIO 5320 (3) Current Topics in Evolutionary Biology

Examines six major themes on contemporary evolutionary research: population genetics, natural selection and adaptation, molecular evolution, evolution and development, phylogenetic systematics, and macroevolution. Emphasizes recent primary literature and sophisticated mastery.

Requisites: Restricted to graduate students only.

EBIO 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4340 and ENVS 4340 and ENVS 5340

Recommended: Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

EBIO 5410 (4) Biometry

Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4410

Requisites: Restricted to graduate students only.

EBIO 5420 (3) Computational Biology

Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4420

Grading Basis: Letter Grade

EBIO 5440 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4440 and MCDB 4441 and MCDB 5441

Requisites: Restricted to graduate students only.

EBIO 5460 (1-5) Special Topics

Familiarizes students with specialized areas of biology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4460

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 5520 (4) Plant Systematics

Explores principles and techniques in modern plant systematics from lichens and non-vascular plants to lycophytes, ferns, gymnosperms and angiosperms. Framework is evolutionary and ecological, with emphasis on taxonomy of major lineages and families of plants. No prerequisites, but coursework in evolutionary biology, genetics, phylogenetics and/or other botany classes is strongly encouraged.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4520

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EBIO 5570 (3) Advanced Plant Physiology

Evaluates critically various concepts underlying the functioning of plants, including current controversial topics. Emphasizes the responses of plants to various environmental factors.

EBIO 5600 (4) Evolutionary Ecology

Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4600

Grading Basis: Letter Grade

EBIO 5660 (4) Insect Biology

Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4660

Requisites: Restricted to graduate students only.

EBIO 5740 (3) Biology of Amphibians and Reptiles

Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4740

EBIO 5750 (4) Ornithology

Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4750

EBIO 5760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4760 and MUSM 5760

Requisites: Restricted to graduate students only.

EBIO 5800 (3) Critical Thinking in Biology

Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4800

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite minimum of 14 hours of EBIO course work.

EBIO 5820 (1) Graduate Writing Seminar

Enhances writing proficiency, using graduate writing projects to implement the course concepts. Offers understanding of conventions and strategies used in scientific writing to prepare students for academic and professional communication. Department enforced requisite, basic proficiency in English as a written language.

Requisites: Restricted to graduate students only.

EBIO 5840 (1-6) Independent Study (Master's Level)

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6000 (1) Seminar: Introduction to Biological Research

Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.

Requisites: Restricted to graduate students only.

EBIO 6100 (1-3) Seminar in Environmental Biology

Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6120 (1-3) Seminar in Environmental Biology

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6100

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 6200 (1-3) Seminar in Population Biology

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6210

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6210 (1-3) Seminar in Population Biology

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6200

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 6300 (1-3) Seminar in Organismic Biology

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6440 (2) Remote Sensing Field Methods

Explores theory and practical field measurements for validation of airborne and spaceborne spectral image acquisition. Emphasizes radiative scattering properties of soil, vegetation, cryosphere, and atmosphere. Characterization and calibration of instrumentation used to measure these properties.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 6443

Requisites: Requires a prerequisite course of GEOL 4093 or GEOL 5093 (minimum grade D-).

Recommended: Prerequisite GEOL 5240.

EBIO 6840 (1-7) Independent Research (Master's Level)

Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6940 (1) Master's Degree Candidate - Plan II

Instructor consent required.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

EBIO 6950 (1-6) Master's Thesis

Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 7840 (1-6) Independent Study (Doctoral Level)

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 8840 (1-6) Independent Research (Doctoral Level)

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 8990 (1-10) Doctoral Dissertation

Instructor consent required.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Ecology and Evolutionary Biology - Master of Arts (MA)

The EBIO department offers programs leading to the Master of Arts (MA) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others. Modern laboratory facilities for graduate study are located in the Ramaley building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the Departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

Admission information is provided on the EBIO website (<http://www.colorado.edu/ebio/graduate/ma-phd-programs/#MASTERS>). Foreign applications are due by Dec. 1, and U.S. domestic applications by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test. Applicants are encouraged to communicate with potential faculty sponsors well before the application deadline. Applications for spring semester admission are not accepted. Students are required to have a bachelor's degree in biology or an equivalent.

Concurrent Degree Program

BA/MA in Ecology and Evolutionary Biology

A combined bachelor's (BA) and master's (MA) degree with thesis is offered for highly motivated undergraduate students. The BA/MA program allows students to take advanced courses at an accelerated pace, engage in an independent research project and obtain both degrees in five years. In addition to preparing graduates for additional graduate study or medical school, the program is expected to position them for employment in areas such as environmental consulting, teaching at the high school or community college level or by businesses with an environmental or biomedical emphasis. Applications from sophomores and juniors for the BA/MA degree are considered on a competitive basis. Applicants must have an overall GPA of 3.00 or higher in the EBIO major and the support of a faculty research advisor. Applications are available from the EBIO graduate coordinator, and are due on Oct. 15 and March 15.

Candidates for this degree must complete all college core requirements by the end of the senior year. To be awarded both BA and MA degrees, a student must maintain a GPA of 3.00 or better and complete at least 144 credit hours. The BA/MA program requires 24 hours of graduate credit at the 5000 level or above, and 4–6 hours of thesis credit. In addition to writing a thesis based on original research, students are examined by their thesis committee in the fifth year on general knowledge in ecology and/or evolutionary biology. The final examination consists of a defense of the thesis before the committee; it should be scheduled by the end of the fifth year.

Students interested in this program are encouraged to consult with the EBIO associate chair for graduate studies early in their undergraduate career. No financial support is available from the department for students enrolled in this program.

Requirements

Degree Plans

Plan I: Thesis Option

The EBIO MA I program (with thesis) is intended to be a two year course of study that prepares students for admission to PhD programs, teaching positions or a variety of forms of employment as professional biologists. MA I students' studies are focused on a research project culminating in a thesis. Prospective students are urged to consult with faculty advisors to determine whether application for the MA I or PhD program is more appropriate. Applications for the MA I program are considered on a competitive basis; the department only admits students for whom financial support is available. Thirty credit hours of course work are required for the degree, at least 24 of which must be at the 5000 level or above, including 4–6 hours of thesis credit. The thesis topic is presented to the thesis committee as a written research proposal in the second semester of the program, and the committee administers in the third semester an examination on general knowledge in ecology and/or evolutionary biology. The final examination consists of the thesis defense, which should be scheduled during the second year for full-time students.

Plan II: Non-Thesis Option

A non-thesis master's degree is offered through the EBIO department's MA II program for students interested in furthering their knowledge of ecology and/or evolutionary biology but not in graduate training beyond the MA. This program is suitable for secondary school teachers and others whose career choices do not require a research thesis. Applicants are required to attain sponsorship from a faculty member prior to submitting application materials. Applicants are considered

on a competitive basis; financial support is not guaranteed for MA II students. Thirty credit hours of course work are required for the degree, at least 24 of which must be at the 5000 level or above, including 4 credit hours of independent research leading to a paper to be presented to the faculty sponsor. An examination on general knowledge in ecology and/or evolutionary biology is administered by the advisory committee in the third semester, and this committee may also require a final oral examination.

Ecology and Evolutionary Biology - Doctor of Philosophy (PhD)

The EBIO department offers a doctor of philosophy (PhD) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others.

The PhD is a research degree, involving the production of a major piece of original research (the dissertation). The program is intended to be a five-year course of study that produces graduates who subsequently teach and conduct research at colleges or universities or hold research or leadership positions at other private or government institutions

Students are expected to form a dissertation committee of five faculty members (including one from outside EBIO) after beginning their studies. This committee aids the student in designing a research program and choosing relevant course work. In addition to the final examination upon completion of the dissertation, the dissertation committee administers an examination (typically in the third semester) on general knowledge in ecology and/or evolutionary biology and a comprehensive examination (typically in the fifth semester) on a written research proposal submitted by the student.

Modern laboratory facilities for graduate study are located in the Ramaley Biology building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

Requirements

Admissions

Foreign applications are due by Dec. 1, and U.S. domestic applications are due by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test.

Applicants are encouraged to communicate with potential faculty sponsors well before the application deadline. Applications are considered on a competitive basis and academic-year stipends (teaching or research assistantships) are provided to students in good standing. Applications for spring semester admission are not accepted. Students are required to have a bachelor's degree in biology or an equivalent.

For more information, visit the department's Admissions (<http://www.colorado.edu/ebio/graduate/admissions>) webpage.

Course Requirements

A total of 30 credit hours of course work must be taken, although independent study credit may be included in this total. In addition, a total of 30 credit hours of dissertation must also be taken. PhD students are required to teach for at least one academic year, typically as a teaching assistant for one of the many laboratory courses offered by the department.

Economics

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

Course code for this program is ECON.

Master's Degree in Economics

The Department of Economics does not currently offer a stand-alone MA degree program, although students enrolled in our PhD program will earn their MA degree as they progress toward their doctorate.

Doctoral Degree

- Economics - Doctor of Philosophy (PhD) (p. 961)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Antman, Francisca Marie (https://experts.colorado.edu/display/fisid_144606)
Associate Professor; PhD, Stanford University

Baranov, Oleg Valeryevich (https://experts.colorado.edu/display/fisid_149617)
Assistant Professor; PhD, University of Maryland College Park Campus

Courses

ECON 7010 (3) Microeconomic Theory 1

Analyzes recent and contemporary literature on fundamentals of economic theory. Considers value theory with particular emphasis on methodology, theory of demand, theory of the firm, game theory, theory of distribution, general equilibrium theory, and welfare economics. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7020 (3) Macroeconomic Theory 1

Discusses behavior of consumption, investment, employment, production, and interest rates in the context of dynamic optimization models. Also considers government, economic growth, and business cycles. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7030 (3) Microeconomic Theory 2

Continuation of ECON 7010. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7040 (3) Macroeconomic Theory 2

Presents the theoretical and empirical application of dynamic macro programming models. Topics include consumption, investment, labor, money, and credit theories. Covers the theory of economic fluctuations and business cycles employing dynamic general equilibrium models. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7050 (3) Advanced Economic Theory

Discusses advanced topics in game theory and general equilibrium. Department enforced prerequisites: ECON 7010 and ECON 7030 and ECON 7818 and ECON 7828.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7818 (3) Mathematical Statistics for Economists

Provides the mathematical foundation for Ph.D. level statistical inference in economic research. The primary topics of the course are probability theory and mathematical statistics including hypothesis testing and classical estimation with an emphasis on the method of maximum likelihood. Instructor consent required.

Additional Information: Departmental Category: Quantitative Economics

ECON 7828 (3) Econometrics

Continuation of ECON 7818. Topics include regression analysis and extensions of the linear regression model to generalized least squares, time series data, and systems of equations. Instructor consent required.

Additional Information: Departmental Category: Quantitative Economics

ECON 8010 (3) Economics of Risk and Time

Focuses on new techniques for analyzing behavior in relation to risk and time.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 8020 (3) Business Cycle Theory and Monetary and Fiscal Policy

Discusses monetary and non-monetary theories of business cycles in the light of empirical evidence and what those theories imply for monetary and fiscal policy. Emphasizes a deep understanding of the mechanisms within models, their comparative statics and comparative dynamics and the importance of, and evidence for, difference parameter values within business cycle models.

Requisites: Restricted to graduate students only.

ECON 8209 (3) Economics Research Methods Workshop 1

Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8211 (3) Public Economics: Fundamental Principles

Presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Economics

ECON 8219 (3) Economics Research Methods Workshop 2

Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8221 (3) Public Economics: Topics in Public Expenditures and Taxation

Explores advanced topics in public economics such as decentralization, state and local government, program analysis, taxation, international tax issues, political economy issues, and market failure.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Economics

ECON 8231 (3) Local Public Economics

Examines subnational governments and systems of governments, the effects of inter-governmental competition, appropriate tax and expenditure responsibilities, and variations in governing institutions. Covers congestible public goods, Tiebout mechanisms, and tax capitalization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Economics

ECON 8413 (3) Seminar: International Trade Theory

Covers theories of comparative advantage, including the classical, factor-proportions, fixed-factor, and noncompetitive markets models. Examines trade policy including trade barriers, market distortions, strategic policy, regional integration, political economy, and factor migration.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8423 (3) Seminar: International Finance

Highlights foreign exchange markets, past and current international monetary mechanisms, and processes of adjustment. Examines the role of international financial markets for the behavior of consumption, investment, saving, and production. Also considers international transmission of business cycles.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8433 (3) Seminar: Topics in Money and International Economics

Explores advanced work in various aspects of international economics, such as empirical trade analysis, public choice, and interactions between real and monetary phenomena in the world economy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8534 (3) Economic History of North America

Examines North America's past from the perspective of economics. Topics include growth and welfare in the colonial period; staple products, agricultural development, and the emerging industrialism in the antebellum period; transformation of the North American economy to 1914; the interwar years and the Great Depression; and economic integration since 1945.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic History

ECON 8535 (3) Environmental Economics I

Considers the allocation of society's scarce environmental resources and government attempts to achieve more efficient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 8545 (3) Environmental Economics II

Provides advanced study of recent advances in environmental economics and explores opportunities for new research. Topics vary with interests of instructor and students.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 8676 (3) Seminar: Labor Economics 1

Focuses on the demand side of labor markets. Topics include standard static and dynamic models of labor demand, labor market discrimination, composition of compensation, labor hierarchies within enterprises, unionization, efficient contracts, and macroeconomics of labor markets.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Labor and Human Resources

ECON 8686 (3) Seminar: Labor Economics 2

Focuses on special topics in labor economics: dynamic theories of labor supply, employment, and unemployment; labor supply in a household framework; and labor market activity and income distribution. Explores both theoretical models and empirical tests in each area.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Labor and Human Resources

ECON 8747 (3) Industrial Organization Theory

Highlights economics of regulation of industry and markets, industry studies, and the application of lab methods to industrial organization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Industrial Organization

ECON 8757 (3) Industrial Organization and Public Policy

Addresses the theory of interaction of firms within markets and industries, emphasizing importance of the number, relative size of firms, market institution, firm strategies and nature of consumer demand. Examines neoclassical and game theoretic models, empirical industry studies and laboratory tests of theoretical models and policies.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Industrial Organization

ECON 8764 (3) History of Economic Development

Covers in historical perspective the causes of economic development including why some areas develop faster than others and why development occurs more rapidly in some eras than others.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic History
Departmental Category: Asia Content

ECON 8774 (3) Seminar in Transition Economies

Focuses on the problems encountered in countries evolving from planned to market economies. Emphasizes applications of new and traditional models of economic growth and analysis of problems unique to formerly planned economies.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic Development

ECON 8784 (3) Economic Development

Explores empirical, theoretical and policy issues in economic development. Examines political economy, income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade and finance, stabilization policy and structural adjustment.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic Development

ECON 8828 (3) Seminar: Econometrics 1

First semester of two-semester sequence in econometrics for PhD students. Studies least squares and generalized least squares estimation of linear econometric models. Asymptotic (large sample) theory of inference. Some topics in the estimation of microdata.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8838 (3) Seminar: Econometrics 2

Teaches the advanced level of econometrics theory. Topics include asymptotic theory, maximum likelihood estimation, limited dependent variables analysis and other frontier areas of econometrics such as the method of moment estimation, semiparametric and nonparametric estimation procedure.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8848 (3) Applied Microeconometrics

Presents a "user's guide" to conducting empirical research in applied microeconomics. Begins with a primer on an industry-standard econometric software package including programming techniques and data management. Introduces advanced econometric techniques including panel data methods, IV, matching models, regression discontinuity and limited dependent variables models. Concludes with a research project requiring a replication and/or extension of an existing published paper

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8858 (3) Computational and Structural Estimation Methods

Teaches students to construct a variety of applied economic models, obtain parameter values through calibration or estimation techniques and uses the resulting models to conduct policy simulations.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8909 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

Economics - Doctor of Philosophy (PhD)

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

Master's Degree in Economics

The Department of Economics does not currently offer a stand-alone MA degree program, although students enrolled in our PhD program will earn their MA degree as they progress toward their doctorate.

Admission

An applicant for admission as a regular degree student must:

- Hold a baccalaureate degree from a college or university of recognized standing, or have done work equivalent to that required for such a degree and equivalent to the degree given at this university. The undergraduate GPA must be at least 2.75 (2.00=C).
- Have completed intermediate microeconomic and macroeconomic theory courses, 6 credit hours of calculus at the university level or equivalent, and statistics.
- Submit Graduate Record Examination (GRE) scores for aptitude (verbal and quantitative). International applicants whose native language is not English must also submit a TOEFL score with a speaking component, even if they have attended college in an English-speaking country.
- Arrange for the submission of three letters of recommendation.

Graduate study in economics is quantitative and analytical. Students should be comfortable with basic calculus (derivatives and integration), linear algebra, matrix algebra and basic statistics.

The university deadline for international applications is Dec. 1 for the following fall semester. The department encourages international applicants to comply with this deadline. Late applications may be considered; however, they may be at a disadvantage with respect to the award of financial aid. Domestic applicants who wish to be considered for financial assistance should apply by Jan. 10. Students must begin the program in a fall semester.

Degree Requirements

Full-time students are expected to complete all requirements for the PhD degree within five years of entering the program (the maximum time allowed by the Graduate School is six years). The schedule of required courses is centered on this expectation. Failure to make timely and satisfactory progress toward the degree may result in loss of financial assistance or dismissal from the program.

Course Requirements

1. Prior to beginning the program, students must demonstrate an acceptable degree of competence in differential and integral calculus and optimization techniques. (This requirement is in addition to the six credit hours of calculus required to apply to the program.) Such competence is normally demonstrated by taking ECON 7800 (an intensive, three-week preparatory course offered immediately prior to each fall semester) and passing its final examination with a grade

of B- or better. Students who fail this examination must enter into extensive consultation with the director of graduate studies (DGS). Other methods by which the required competence may be demonstrated:

- obtain written approval from the DGS to waive the requirement for ECON 7800 due to sufficient mathematical preparation in prior studies, or
 - pass the final examination in ECON 7800 at a level of B- without taking the course.
2. There are seven core courses in the PhD program: ECON 7010, ECON 7020, ECON 7030, ECON 7040, ECON 7050, ECON 7818 and ECON 7828. Course requirements beyond the core courses include:
 - Seven elective courses at the 8000 level. Basic fields are econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics. Ordinarily, a student would take two elective courses in a basic field of specialization in preparation for a dissertation.
 - 6 credit hours in a research colloquium.
 - At least 30 credit hours of dissertation.
 3. At least four of the core courses must be taken on the Boulder campus. Courses transferred for credit must be approved by the DGS. After entry into the PhD program, all remaining courses must be taken on the Boulder campus.
 4. All courses for PhD credit taken on the Boulder campus must be passed with a grade of B- or better. A student who receives a grade of C+ or lower in a core course must retake that course the following academic year.
 5. No more than 12 credit hours (exclusive of dissertation credit hours) from a single faculty member may be counted toward PhD requirements. Independent study is allowed only to satisfy elective requirements. No more than 6 credit hours of independent study may be applied to the PhD degree and no more than 3 credit hours of independent study may be taken from a single faculty member. In consultation with the DGS, students may choose to take up to two graduate offerings in other departments as elective courses.
 6. Course requirements include:

Course	Title	Credit Hours
First Year		
Fall Semester		
ECON 7010	Microeconomic Theory 1	3
ECON 7020	Macroeconomic Theory 1	3
ECON 7818	Mathematical Statistics for Economists	3
		Credit Hours
		9
Spring Semester		
ECON 7030	Microeconomic Theory 2	3
ECON 7040	Macroeconomic Theory 2	3
ECON 7828	Econometrics	3
		Credit Hours

	Credit Hours	8
Spring Semester		
Relevant dissertation credit hours		8
	Credit Hours	8
	Total Credit Hours	78

Preliminary Examinations

Written preliminary examinations in microeconomic theory, macroeconomic theory and econometrics must be taken in the examination period following the successful completion of core courses in these areas. Under most circumstances this period would be in August prior to the second year. An examination attempted and failed must be

taken again and passed in the next examination period. A second failure results in dismissal from the program, subject to appeal to the GCRC under extraordinary circumstances. In no case are attempts beyond the third granted.

Students who have failed any of the core courses are ineligible to take the preliminary examination in the area of failure. These students must retake the failed course(s) in the following year and attempt the relevant preliminary examination in the first scheduled examination period after they pass.

Students who fail to pass all three preliminary examinations within two-and-one-half years of beginning the PhD program must exit the program.

MA Degree

An MA degree will be awarded to students who have successfully completed all core courses in the PhD program, completed 30 hours of graduate credit with a 3.00 GPA and performed satisfactorily within two attempts on at least two out of three preliminary examinations.

Third-Year Research Colloquium

Third-year students are expected to register for 3 credit hours per semester in the research colloquium, which will meet weekly under the direction of a faculty member. The purpose of the colloquium is to provide students the opportunity and guidance to complete the required third-year paper and to facilitate progress toward the dissertation stage.

Under some circumstances, students may delay taking this colloquium until the fourth year with the approval of the DGS.

Comprehensive Examination

Students must take an oral comprehensive examination before admission to PhD candidacy. This examination may occur either at the time of the student's research presentation in ECON 8219 or at a later date, and will encompass the materials in the presentation and all relevant course work completed by the candidate. Students who fail this comprehensive examination will be given a second chance during the following semester. For those students for whom the presentation in ECON 8219 does not serve as the oral comprehensive examination, a separate oral examination must be scheduled before admission to candidacy. Students who do not pass this exam by the end of their fifth year must exit the program.

Admission to Candidacy and Dissertation Requirements

Students are formally admitted to candidacy for the PhD degree after completing all course requirements and all preliminary and comprehensive examinations and after earning four semesters of residency (see the Doctoral Degree Requirements (p. 867) section of this catalog for details). After admission to candidacy, students must register each fall and spring semester for dissertation credit (ECON 8999) until attaining the degree; the accumulated credit for the thesis must total at least 30 credit hours to attain the degree. A student must prepare a written dissertation and successfully pass an oral examination before a dissertation committee and other interested persons on its content before receiving the degree. The minimum residence requirement for the PhD degree is six semesters of scholarly work beyond the bachelor's degree.

Administration: Examining Committees for Examinations

Examining committees for preliminary examinations consist of three members of the economics department who teach in the relevant area.

Examining committees for comprehensive examinations consist of at least three members of the economics department.

Preliminary Examinations

1. Written examinations are numbered so that insofar as possible the identity of the student is unknown. Each faculty member grades independently and writes no comments in the examination booklet. A meeting of the graders is called by the chair of the examination committee and the committee grade is submitted to the graduate program coordinator. The possible grades include "High Pass," "Pass" and "Fail."
2. In cases where there is a question of pass or fail on any exam, if two of the members of the examination committee vote affirmatively, a grade of pass will be recorded; if two of the members of the grading committee vote negatively, a grade of fail will be recorded. If the vote of the grading committee is tied and the third member is absent (but will be available within seven days), the decision to pass or to fail is to be made by the reconvened grading committee. If fewer than two members of the grading committee are present and voting, or if the vote of the grading committee is tied and the third member is not available within seven days, the decision to pass or fail will be made by the Graduate Curriculum and Review Committee; in such circumstances the grade is reported as pass or fail, based on a majority vote.
3. When examination results are reported, a student who failed should have an opportunity to discuss his performance with a member of the examining committee.

Dissertation Guidelines

1. In January of the academic year following the research colloquium, each student must submit a written dissertation proposal and conduct an oral defense of that proposal before his or her basic committee. A dissertation proposal form must be signed by each member of the basic committee and submitted to the graduate program coordinator. The basic committee consists of the student's faculty supervisor and three other faculty members from the department. An acceptable proposal must include a statement of purpose and a justification for the importance of the work; a full literature review and a statement of how this research will contribute to the literature; and a detailed description of the methodologies to be used and of the data bases, if appropriate.
2. Normally students are expected to complete their dissertations by the end of their fifth academic year. The graduate program coordinator provides details on submission of the dissertation and arrangements for the oral defense. The final defense is conducted before a basic committee of four faculty members from the department plus one outside member. After the defense, minor changes are agreed upon between candidate and supervisor before the final dissertation is submitted.

English

The English Department offers a Master of Arts degree (MA) in literature, a Master of Fine Arts degree (MFA) in creative writing and a Doctor of Philosophy degree (PhD) in literature.

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/english/grad-studies>) webpage.

Course code for this program is ENGL.

Master's Degrees

- English - Master of Arts (MA) (p. 968)
- Creative Writing - Master of Fine Arts (MFA) (p. 967)

Doctoral Degree

- English - Doctor of Philosophy (PhD) (p. 969)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ENGL 5000 (3) Introduction to Applied Shakespeare

Provides an introduction to the life, work and world of William Shakespeare to prepare students for the Applied Shakespeare Professional Masters Certificate two-week intensive. Students will gain a background in the social, cultural and political context of Renaissance theater, will be introduced to the conventions of Shakespearean drama and will explore key concerns impacting our understanding of Shakespeare's works. Department consent required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Courses

ENGL 5019 (3) Survey of Contemporary Literary and Cultural Theory

Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5029 (3) British Literature and Culture Before 1800

Introduces graduate level study of medieval and early modern writing through the long eighteenth century. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5059 (3) British Literature and Culture After 1800

Introduces graduate level study of Romantic, Victorian, Modern and Postmodern writing. Emphasizes a wide range of genres, forms, historical background and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5109 (3) Literature and Culture of the United States

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5139 (3) Global Literature and Culture

Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5169 (3) Multicultural/Postcolonial Studies

Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5199 (3) Studies in Special Topics

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5229 (3) Poetry Workshop

Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5239 (3) Fiction Workshop

Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5259 (3) Nonfiction Workshop

Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5269 (3) Publishing Workshop

Provides practical experience in the editorial, design, and business procedures of desktop publishing.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5279 (3) Studies in Poetry

Addresses modern poetry, written since World War II.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5299 (3) Studies in Fiction

Addresses modern fiction written since World War II.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5309 (3) Playwriting

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5319 (3) Studies in Literary Movements

Studies styles, trends, innovations and major writers in significant literary movements, particularly those after 1900, such as modernism and postmodernism.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5459 (3) Introduction to the Profession

Introduces purposes, methods and techniques of professional scholarship in English. Provides an overview of the discipline, including traditional areas of research and recent developments. Teaches students how to use research, bibliographic, and reference tools to prepare papers for conferences and publication. Required of all MA students in English.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5529 (3) Studies in Special Topics 1

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: IAWP 6100

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5549 (3) Studies in Special Topics 2

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5559 (3) Studies in Special Topics 3

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5849 (1-6) Independent Study (Graduate Level 1)

Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the Associate Chair for Graduate Studies prior to the beginning of the semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 6949 (1) Master's Degree Candidate

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Graduate Courses

ENGL 6959 (1-9) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7019 (3) Advanced British Literature and Culture Before 1800

Studies special topics in medieval and early modern writing through the long 18th Century. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7059 (3) Advanced British Literature and Culture After 1800

Studies special topics in romantic, Victorian, modern and postmodern writing. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7119 (3) Advanced Literature and Culture of the United States

Studies special topics in writing of the United States.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7149 (3) Advanced Global Literature and Culture

Studies special topics in recent writing in English from around the world.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7179 (3) Advanced Multicultural/Postcolonial Studies

Studies special topics in ethnic American and/or postcolonial writing in English, including relevant theoretical discourses. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7489 (3) Advanced Special Topics

Studies special topics in theory, culture, and literature of any period. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7849 (1-3) Independent Study (Graduate Level 2)

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Courses

ENGL 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Graduate Courses

Creative Writing - Master of Fine Arts (MFA)

The MFA in creative writing is a three-year degree program that values literary study, innovation and writing that tests the limits of conventional forms.

The program challenges students to write in a variety of genres and to study literature from the point of view of a working writer. Recent graduates have become not only published authors of fiction, nonfiction, poetry, plays and screenplays, but also journalists, editors, publishers and college-level and secondary-level teachers.

The degree program culminates in the submission and oral defense of a creative thesis in poetry or fiction. Students may develop custom programs in nonfiction and scriptwriting with available faculty with secondary interests in those genres.

Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English should visit the department's Graduate Studies (<http://www.colorado.edu/english/grad-studies>) webpage for the most up-to-date degree requirements.

Admission

Applicants interested in creative writing must complete the verbal, analytic, and quantitative sections of the GRE General Test. A BA degree with an English major or at least 18 credits hours in English is normally required. Each applicant must submit a manuscript of at least 10 pages of poetry, or 25 pages of fiction or nonfiction prose (other than literary criticism).

Course Requirements

Students must take 45 hours of course work (15 courses) in the following areas:

Required Courses

4 courses of writing workshops (fiction, nonfiction, poetry, publishing)	12
4 courses in literature	12
2 courses in two of the following: Studies in Poetry; Studies in Fiction; Studies in Literary Movements	6
9 hours of credit for thesis writing (may not be taken the first year)	9

Electives

2 electives	6
Total Credit Hours	45

Language Requirement

Students earning the creative writing MFA must complete a foreign language requirement, either before or after enrolling at CU Boulder, in one of the following ways:

- Complete a fourth-semester (second-semester sophomore) college language course with a grade of C or better. Completion of only freshman-level language courses does not qualify as evidence of competence.
- Take the foreign language proficiency exam administered each semester by the English department. In some cases, students may be asked to make independent arrangements for such an exam.
- Present other evidence of competency in a foreign language to the associate chair for graduate studies. In most cases, this evidence consists of native or near-native command of a language; a written exam may be administered to confirm such fluency.

English - Master of Arts (MA)

The MA program combines courses in global literatures in English and literary theory with rigorous training in critical analysis. Applicants must complete the verbal, analytic and quantitative sections of the GRE General Test and hold a bachelor's degree by the time they enter the program.

Requirements

Program Requirements

Students earning a Master of Arts in English must take 30 hours of course work (10 courses), and at least 21 hours must be taken at CU Boulder. Subject to approval by the Associate Chair for Graduate Studies, up to 6 hours of course work may be taken in departments other than English. Students may earn the MA through course work alone; a thesis is optional.

The degree requirements listed below are subject to change. Students wishing to pursue graduate work in English should visit the department's Graduate Studies (<http://www.colorado.edu/english/grad-studies>) webpage for the most up-to-date degree requirements.

Distribution Requirement

The courses required for the MA should be distributed as follows:

1. Two courses before 1800 (in two different periods)
2. Two courses after 1800 (in two different periods)
3. One multicultural and/or postcolonial course (may overlap with req. 1 or 2)
4. One poetry intensive course (may overlap with req. 1 or 2)

Degree Plans

Plan I: Thesis Option

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

Required Courses

ENGL 5019	Survey of Contemporary Literary and Cultural Theory (first semester)	3
-----------	--	---

ENGL 5459	Introduction to the Profession (second semester)	3
One course from each of the following categories:		12
Formalisms		
Technologies/Epistemologies		
Bodies/Identities/Collectivities		
Cultures/Politics/Histories		
ENGL 6959	Master's Thesis	6
Electives		
Choose additional courses from English or other departments to fulfill 30-credit minimum (may include creative writing)		6
Total Credit Hours		30

A master's thesis is optional for the English MA. If the student wishes to write a thesis, the student works with an individual faculty member on an independent study basis. The master's thesis is about 50–75 pages in length, and represents an original work that is supported by extensive research into primary and secondary sources. It includes an abstract and a bibliography.

Developing a thesis takes two semesters to research and write. Students must register for a total of 3 hours of master's thesis credit during each of the two semesters they are producing their thesis. Students work with a committee of three faculty members: an advisor and two others. The advisor must be a member of the graduate faculty.

The thesis defense must take place before the semester's deadline for completing defenses. Students must give the completed thesis to the entire committee and file an examination report at least two weeks in advance of the defense. The defense is an oral examination of the thesis that lasts about an hour. All committee members must be present. A positive vote from at least two of three committee members is required to pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once.

The final copy of the thesis must be submitted to the Graduate School by the applicable deadline, and must comply with the Graduate School's specifications for theses and dissertations.

Plan II: Non-Thesis Option

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

Required Courses

ENGL 5019	Survey of Contemporary Literary and Cultural Theory (first semester)	3
ENGL 5459	Introduction to the Profession (second semester)	3
One course from each of the following categories:		12
Formalisms		
Technologies/Epistemologies		
Bodies/Identities/Collectivities		
Cultures/Politics/Histories		
Electives		
Choose additional courses from English or other departments to fulfill 30-credit minimum (may include creative writing)		12
Total Credit Hours		30

Language Requirement

Students earning the English MA must complete a foreign language requirement demonstrating proficiency in one foreign language by taking the appropriate exam administered each semester by the English department. In some cases, students may be asked to make independent arrangements for such an exam.

Advancement to Candidacy

Students must submit a Candidacy Application for an Advanced Degree in the semester they plan to graduate by the stipulated deadline, which is generally in the third or fourth week of classes. These forms are available from the graduate student program assistant. The Candidacy Application confirms that the student will have completed all their degree requirements by the end of the semester, and must be approved by the associate chair for graduate studies.

Time Limit

MA students have four years from the semester in which they are admitted and begin course work to complete all degree requirements. To continue past four years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must first be submitted for endorsement to the associate chair for graduate studies. Extensions may be granted for up to one year.

English - Doctor of Philosophy (PhD)

The PhD program is a five-year curriculum, including five years of funding, that comprises a language requirement and three basic components:

- course work
- a qualifying examination
- a dissertation

For more information, visit the English Department (<http://www.colorado.edu/english>) website.

Requirements

Admission

The PhD program offers rigorous training in critical analysis and research for professional placement. Applicants must complete the verbal, analytic and quantitative sections of the GRE General Test and hold either an MA or BA degree in English. Those with a BA who apply directly to the PhD program may also be considered for the MA program.

Program Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English should visit the department's Graduate Studies (<http://www.colorado.edu/english/grad-studies>) webpage for the most up-to-date degree requirements.

Course Work (Years 1 & 2)

Course work prepares PhD students to write a successful dissertation and to teach effectively in their area of specialty. Students should enroll in graduate seminars serving those ends in English or related fields.

The sole requirement for course work for the PhD is that students take a minimum of 30 credits of graduate study at the University of Colorado (up to 21 of which can be transfer credits). These courses must be at the 5000 level or above.

By the end of the second semester of study, the student should form an advisory committee consisting of three members of the graduate faculty. The advisory committee provides guidance in preparing for the qualifying exam and writing the dissertation.

Students should plan their course work in close consultation either with the associate chair for graduate studies or their advisory committee. A student's first and second years in the PhD program are usually dedicated to course work.

Language Requirement

PhD students must complete a foreign language requirement demonstrating proficiency in one foreign language by taking the appropriate exam administered each semester by the English Department. Work in some areas may require proficiency in more than one language, as determined by a student's advisory committee. In some cases, a student may be asked to make independent arrangements for such an exam.

Annual Reports

PhD students in their second year or beyond are required to submit an annual report on the progress of their PhD work by Oct. 31 of each year. These reports should be no more than one page in length and should describe both the student's dissertation project and the steps taken to advance it (e.g., courses, research, prospectus). Students without current reports on file cannot be considered in good standing. Forms are available from the graduate program assistant and should be submitted via email to either the graduate program assistant or the associate chair of graduate studies.

Qualifying/Comprehensive Examination (Year 3)

The qualifying examination is a two-hour oral exam on two reading lists and a dissertation prospectus produced in consultation with all members of the candidate's advisory committee.

Reading lists concern the following topics.

- Field: The broad context (e.g., historical, thematic, generic, technological) pertinent to the student's dissertation project
- Methods/texts: Methodological, literary and critical works germane to the project.

Each reading list should comprise between 25 and 40 titles, as well as a paragraph (about 300 words) providing a rationale for this content.

The prospectus describes a dissertation project in 8 to 10 pages and should include a methodological overview, an account of relevant scholarship, a brief chapter-by-chapter summary and a bibliography of 25 to 40 titles. It is due to the advisory committee for preliminary evaluation two weeks prior to the date of the qualifying exam. The dissertation project, which should be work of professionally viable scholarship, will typically take the form of a monograph, but it may also contain such innovative elements as practice-based research, curatorial or internet exhibition, fieldwork, etc.

The first chapter or equivalent of the dissertation project is due to the advisory committee no later than three months after passing the qualifying exam. The candidate and full committee then meet to discuss it and create a clear itinerary for completing the project. The graduate program offers an annual dissertation project workshop to assist PhD candidates in crafting their first chapters or equivalents.

Failure to either schedule and pass the qualifying exam or submit the first installment of the dissertation in a timely manner results in

withdrawal of teaching support and suspension from the PhD program. An unsuccessful exam may be retaken once only, within six months.

Students must complete the language requirement and any incomplete grades before scheduling the qualifying exam. At least two weeks before taking the exam, the student must submit the following documents (available on the Graduate School (<http://www.colorado.edu/graduateschool/academic-forms>) website) to the graduate program assistant:

- a candidacy application for an advanced degree
- the doctoral exam form listing the committee members, all of whom must be preapproved by the Graduate School before the exam.

Upon passing the qualifying exam, students advance to PhD candidacy, allowing them to apply for dissertation fellowships and other internal funding.

Dissertation (Years 4 & 5)

The dissertation project is a work of original scholarship that makes a significant contribution to a given field. It is written in close consultation with the student's advisory committee. It should be between 250 and 350 pages long, the length of a scholarly monograph. In some instances, it can combine critical and creative elements, but the finished dissertation should resemble the best work in its field. Students should plan to complete it during their fourth and fifth years in the PhD program.

A PhD student must complete at least 30 dissertation hours to receive the degree. Dissertation hours may be taken in any semester, including before the comprehensive examination is passed. However, no more than 10 credit hours taken before the semester in which the comprehensive examination is passed will count toward the 30 dissertation hours required for the degree.

Beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended, PhD students are required to register continuously as full-time students with a minimum of 5 dissertation hours in the spring and fall semester of each year.

PhD students who do not have to maintain full-time status and do not have to use campus facilities may claim off-campus status, which allows registration for 3 rather than the minimum of 5 dissertation credit hours. Off-campus status is considered part-time.

PhD students who fail to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School. The department must petition the dean of the Graduate School to waive this requirement.

PhD students must be registered for a minimum of 5 dissertation hours in the semester (including summer semester) in which the dissertation defense is held.

Dissertation Defense

In the spring of the fifth year, the student should schedule a dissertation defense: an oral examination and discussion lasting about 90 minutes. The student's advisory committee consists of four faculty members from within the department, along with one outside member chosen from the graduate faculty of another department. A positive vote of at least four examiners is required to pass the defense. If unsuccessful, the student may retake the defense once or complete changes or additions determined by the committee.

The student must deliver copies of the dissertation to their committee members at least one month prior to their defense date, and must also file a doctoral examination report and a doctoral defense leaflet (which includes a dissertation abstract) with the Graduate School at least two weeks prior to the defense. All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School (<http://www.colorado.edu/graduateschool/academics/graduation-requirements/doctoral-graduation-information>) website.

Submission & Format

The final copy of the dissertation must be submitted to the Graduate School by the applicable deadline for that semester, and must comply with the Graduate School's specifications for theses and dissertations. Thesis specifications and submission information can be found on the Graduate School (<http://www.colorado.edu/graduateschool/academics/graduation-requirements/doctoral-graduation-information>) website.

The student must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography). It is also suggested that the Graduate School precheck the format of the thesis before the student submits the final copy. The student should email a PDF of their dissertation to gradinfo@colorado.edu.

Time Limit

PhD students are expected to complete all degree requirements within five years from the semester in which they are admitted and begin course work in the doctoral program. To continue beyond five years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. The dissertation director and the associate chair for graduate studies must endorse such petitions. Extensions may be granted for up to one year. For additional time, the student must file another petition for extension.

Environmental Studies

Meeting the environmental challenges of the 21st century requires research, education and training that spans traditional disciplinary boundaries and emphasizes the interconnections of social and natural sciences, policy and the ethics and other social underpinnings of decision making.

With numerous focal areas and connections to research centers both in and out of the academic world, ENVS provides the resources and experiences needed by students seeking to contribute to environmental research and problem solving.

The Graduate Program in Environmental Studies awards three graduate degrees: MS, MENV and PhD.

Opportunities for interdisciplinary graduate studies and original research leading to the MS and PhD degrees are available with a variety of emphases, including sciences, policy and values, and theory. Particular programs of study are limited only by course offerings and faculty expertise. Several graduate certificates in the field are also available.

For updated information, visit the department's Graduate Students (<http://www.colorado.edu/envs/graduate-students>) webpage.

Course code for this program is ENV5.

Master's Degrees

- Environmental Studies - Master of Science (MS) (p. 974)

- Environment - Master of the Environment (MENV) (p. 973)

Doctoral Degree

- Environmental Studies - Doctor of Philosophy (PhD) (p. 975)

Certificates

- Environment, Policy and Society - Graduate Certificate (p. 978)
- Renewable and Sustainable Energy - Graduate Certificate (p. 979)
- Science and Technology Policy - Graduate Certificate (p. 979)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bhattacharya, Atreyee (https://experts.colorado.edu/display/fisid_156320)
Instructor; PhD, Harvard University

Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562)
Associate Professor; PhD, University of California-Santa Cruz

Carrico, Amanda R. (https://experts.colorado.edu/display/fisid_153054)
Assistant Professor; PhD, Vanderbilt University

Ciplet, David (https://experts.colorado.edu/display/fisid_156064)
Assistant Professor; PhD, Brown University

Professor; PhD, Stanford University

Wessman, Carol A (https://experts.colorado.edu/display/fisid_100909)
PhD, University of Wisconsin-Madison

White, James (https://experts.colorado.edu/display/fisid_102726)
Professor; PhD, Columbia University In the City of New York

Courses

ENVS 5000 (3) Policy, Science, and the Environment

Introduction to methodologies of the policy sciences with emphasis on applications to environmental issues; role of science in decision making; professional roles and responsibilities as a policy analyst.

Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

ENVS 5003 (3) Theory and Methods in Environmental Studies

Introduces students to theory and methods used in research on environmental science, values and policy. The goal of the course is to provide a broad overview of the conceptual background relevant to work and research in environmental studies, with an emphasis on understanding the similarities and differences in research methods used in different disciplines and in environmental research.

Grading Basis: Letter Grade

ENVS 5050 (3) Theories of the Policy Process

Examines the public policy process, including the influences and actors that shape policy outcomes. Focuses on the major theories, frameworks, and models of policy change, along with emerging scholarship that challenges, refines, and advances the theory.

Requisites: Restricted to graduate students only.

ENVS 5100 (1-3) Special Topics in Environmental Studies

A variety of topics not currently offered in curriculum; offered depending on instructor availability and student demand.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ENVS 5110 (1-3) Topics in Environmental Social Science and Humanities

Covers various topics in the social sciences and humanities in environmental studies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

ENVS 5120 (1-3) Topics in Quantitative Methods

Covers a wide range of quantitative methods used in policy research and their applications. Topics may include decision-making under uncertainty, fundamentals of microeconomics, mathematics of economic efficiency, cost-benefit analysis, system optimization, budgeting, fundamentals or probability, risk assessment, risk perception, risk communication, and decision analysis. Includes practical exercises, as well as readings and discussion, of various strengths and weaknesses of the different methods.

Repeatable: Repeatable for up to 9.00 total credit hours.

ENVS 5240 (3) Environmental Philosophy

A survey of the major philosophical issues in environmental studies, comprising key issues in environmental ethics, in environmental political philosophy and in the philosophy of biology and ecology.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5240

Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

ENVS 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4340, EBIO 4340 and EBIO 5340

Recommended: Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

ENVS 5510 (1) Environmental Studies Colloquia Series

All first year ENVS graduate students are required to attend the ENVS Colloquia Series. Speakers from around the world and within the department cover topics in all areas of Environmental Studies.

Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

ENVS 5520 (1-3) Seminar in Environmental Studies

Addresses current topics in Environmental Studies. Provides forum for students to critically evaluate the primary literature on a particular theme.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

ENVS 5701 (3) Policy, Politics and Management: Foundations

Examines concepts related to policy and regulatory processes, institutions and management of the environment and natural resources. Explores environmental laws at the international, national, state and local levels as well as how the processes and institutions at various levels of government help shape laws and their implementation. Focuses on policy tools including property rights, regulation, voluntary compliance and market-based mechanisms.

Grading Basis: Letter Grade

ENVS 5702 (3) Policy, Politics and Management: Theory and Practice

Provides an overview of the theoretical landscape for how policies are made, decisions are enacted and actors seek to influence policy and political outcomes. Students will learn tools of policy analysis and apply their understanding to cases of environmental, natural resource and related policies.

Grading Basis: Letter Grade

ENVS 5740 (3) Context-Sensitive Research Methods

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7116

Requisites: Restricted to graduate students only.

ENVS 5810 (3) Water Resources and Environmental Sustainability

Assesses impacts of climate variability and regional growth on western U.S. water resources, and examines successes and failures of different management strategies, as well as ways that science is used and misused in support of water management.

Requisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

ENVS 5820 (3) Energy Policy in the 21st Century

Examines energy policy and the problem of sustainability through a variety of disciplinary and topical perspectives: historical, political, behavioral, techno-economic and legal. A critical approach is applied to arguments about energy policy processes, systems and desired outcomes, with special emphasis on the role of renewable and sustainable energy in the changing global system.

Requisites: Restricted to graduate students only.

ENVS 5830 (3) Critical Issues in Climate and the Environment

Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4800 and ATOC 5000

ENVS 5840 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed, along with global-scale measurements of element fluxes from satellites, aircraft and measurement networks.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5305

Requisites: Restricted to graduate students only.

Recommended: Prerequisite general chemistry, some organic chemistry.

ENVS 5909 (1-3) Independent Study

Only 3 hours of independent study can be used towards degree requirements.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ENVS 5930 (2) Internship

Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to the students' research and career goals, and to relate classroom theory to practice.

ENVS 6007 (3) Foundations of Environmental Sociology

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 6007

ENVS 6201 (3) Qualitative Research Methods for Environmental Studies

Introduces students to research design, data collection and analysis methods. Exploration of the rationale underlying the use of various methods, the skills needed to employ qualitative method and the process of designing a research protocol will provide graduate students with a sound foundation to begin their own thesis research.

Grading Basis: Letter Grade

ENVS 6222 (2-3) Environmental Decision-Making

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7222

Grading Basis: Letter Grade

ENVS 6301 (3) Environmental and Energy Economics

Introduces non-economists to the study of energy markets, environmental externalities, economic regulation and public policy. This applied course uses examples from electricity generation, renewable energy, manufacturing, transportation and other energy intensive industries. A variety of policy instruments will be studied, including: technology standards, subsidies, environmental mandates, rate-based policies, emissions taxes and cap-and-trade systems.

Grading Basis: Letter Grade

ENVS 6302 (3) Sustainable Landscapes, Sustainable Livelihoods

Examine adaptation of rural and resource dependent regions and communities in response to cultural, economic and environmental change. Students will evaluate different approaches for sustainable management of forests, ranches, farms and wildlands and to balance diverse livelihood needs and environmental stewardship in a time of rapid change. Students will learn techniques to gather and synthesize data that support solution development.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6303 (3) Transportation and Sustainable Cities

Examines the problem of organizing transportation systems from a variety of perspectives and explores how transportation decisions get made at a variety of scales, from local to national. Covers some of the dramatic changes coming from technological innovation in arenas like vehicle electrification, autonomous vehicles and the potential shift from individual vehicle ownership to shared mobility.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6304 (3) Introduction to Food Systems Internationally

Introduces students to contemporary food system challenges at the global scale, the course will first identify key historic and projected trends, to set the scene for the remainder of this specialization. Second it will draw on international case studies to explore some of the institutional, technological and market responses to food system challenges across the globe.

Grading Basis: Letter Grade

ENVS 6305 (3) Food System Solutions? Evaluation of Food System Debates

Using the best available evidence, students will critically evaluate how food system sustainability may be enhanced by proposed solutions, such as genetically engineered food, organic foods, local food systems, dietary changes and reductions in food waste. Explores the environmental implications of these potential solutions and the opportunities for them to gain traction and become more mainstream.

Grading Basis: Letter Grade

ENVS 6940 (1) Master's Degree Candidacy

Grading Basis: Pass/Fail

ENVS 6950 (1-6) Master's Thesis**ENVS 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Environment - Master of the Environment (MENV)

The Masters of the Environment (MENV) professional master's degree program is administered by the Environmental Studies Program (p. 970), but partners with units and disciplines in the community and across the Boulder campus, including the Environmental Design Program, Colorado Law, Leeds School of Business and the Department of Economics.

The 17-month, cohort-based, in-residence professional degree program is designed for new or early career professionals, preparing leaders at the local, state, national and global levels to sustain the long-term health of the biosphere and pursue sustainable development. MENV graduates apply interdisciplinary knowledge and build community in ways that achieve fair and effective solutions to environmental and social problems and promote thriving human and natural communities, balancing concerns for environmental health, economic well-being and social equity.

The program focuses on applications and problem solving, and has five parts:

1. the core curriculum
2. a choice of topical specializations
3. skills and techniques courses
4. electives
5. a capstone project

Throughout the program, students develop and hone their skills and leadership capacities through workshops, peer-to-peer mentoring, professional skills courses, the capstone project and other "real-world" opportunities through partnerships with outside firms, agencies and organizations.

Students become conversant in the language, knowledge, techniques and methodologies of various disciplines while developing general analytical skills, problem-solving abilities and the adaptability that is indispensable to professional success.

MENV provides a foundation of multidisciplinary knowledge and communication and analytical skills that enable students to address increasingly complex environmental and related social problems in a

wide range of professional careers in the environment, energy and natural resources.

For more information, visit the Masters of the Environment (<http://www.colorado.edu/menv>) website.

Requirements

Application Requirements

To be considered for the Masters of the Environment graduate program, students must have a four-year bachelor's degree from an accredited college and some applicable training or professional experience. The MENV program at CU Boulder selects students who will achieve academic and professional success while adding value to the graduate community. The master's program selects the most talented and diverse candidates through a holistic review of the application materials. Decisions are based on academic and professional backgrounds and individual potential to contribute both inside and outside of the classroom.

Program Requirements

Students must complete at least 42 credit hours of course work during the 17-month program, to include:

- the core curriculum
- a specialization area
- two skills and techniques courses
- electives
- a capstone project

Capstone Project

All MENV students complete a year-long capstone project. These projects provide hands-on, learning-by-doing experiences embedded in the context of an organization's needs and capacities, while also providing client organizations with specific solutions to identified complex problems and useful projects. These might include management plans, models, analyses, prototypes or proof-of-concept projects. The capstone project is co-developed by students and the partner entity, whether industry, government or nonprofit.

Environmental Studies - Master of Science (MS)

The ENVS Master of Science degree is a research-based graduate program that allows students to conduct research and course work in a range of areas important for the environment and sustainability. For most students, the heart of the MS program is completion of a master's thesis. For the two dual degree programs (see below), there also is an option to complete an internship in lieu of a thesis.

Dual Degree Programs

MBA/MS in Environmental Studies

This is a dual degree program offered in conjunction with the Leeds School of Business. It requires 36 credit hours of graduate work in environmental studies and 43 credit hours of MBA course work (with 12 credit hours of environmental studies course work applying toward the required 55 credit hours for the MBA). The MBA program will be considered the student's primary program. For more information, visit the program's MS/MBA (<http://www.colorado.edu/envs/graduate-students/ms-phd-programs/masters-degree/msmba>) webpage.

JD/MS or PhD in Environmental Studies

This is a dual degree program offered in conjunction with the Law School. The Law School will grant credit for acceptable performance in graduate-level environmental studies courses toward the JD degree for up to 9 (for MS students) or 12 (for PhD students) credit hours of the required 89 credit hours for the JD degree. Environmental studies will grant up to 9 (for MS students) or 12 (for PhD students) credit hours of acceptable performance in law courses. The JD program will be considered the student's primary program. For more information, visit the program's MS/Juris Doctor and PhD/Juris Doctor (<http://www.colorado.edu/envs/graduate-students/ms-phd-programs/masters-degree/msjuris-doctor-and-phdjuris-doctor>) webpage.

Requirements

Course Requirements

The degree requires completion of 36 credit hours, as follows:

- a common core consisting of two broad, introductory 3-credit courses (ENVS 5000 Policy, Science, and the Environment and ENVS 5003 Theory and Methods in Environmental Studies)
- two semesters of ENVS Colloquium (2 course credits)

All MS students must complete a guidance committee meeting and either an MS thesis or an internship. For most students, the final requirement is a thesis worth 6 of the 36 credit hours required for the MS degree. All ENVS graduate students are encouraged to include a 2-credit internship as part of their degree plan, even if doing a thesis.

Independent study credits may be included in the student's MS degree plan with the approval of the faculty advisor.

Guidance Committee Meeting

During the first six weeks of each new student's first semester (typically in the fall), a guidance committee of three faculty members will examine the student's past course record (from undergraduate and past graduate work) and devise a program of course work for that student. Responsibility for convening these meetings falls on the advisor. However, the graduate director and graduate assistant will aid in the scheduling of these meetings and, if needed, intervene to ensure they occur on schedule. These committees and their meeting should be shaped by these considerations:

- The committee should be composed of the primary advisor and at least two other faculty members. To ensure breadth of viewpoints, one member of the committee will be assigned by the Graduate Committee and will be someone outside the student's specific areas of research interest. The Graduate Committee must approve the composition of each committee to ensure that appropriate knowledge of ENVS procedures and history are represented.
- Before the committee meeting, the student should provide a brief overview of their intellectual interests and provide an assessment of their own weaknesses and strengths in training.
- The committee, working with the student, should devise a list of both suggested and mandated courses. Course work can be specified as either a single course or a type of course (e.g., "a course covering the use of multivariate statistics," as opposed to a specific course number). In addition, the committee can suggest that the student TA certain classes as another way of exposing them to particular fields; any such suggestions should consider the feasibility of the student actually being able to TA such a course.

- The assigned course work should provide the student with depth of understanding in their research field(s) and ensure that the student has some breadth of training or experience in one or more other aspects of environmental studies.
- While the number of classes suggested or mandated will vary depending on each student's past training and research plans, a typical list of required classes for an MS student should generally not exceed four 3- or 4-credit classes.
- This first-semester guidance committee's work is finished after its one meeting, with no requirement that the members be on subsequent committees for a student.

MS Thesis or Internship

Thesis Requirements

Only students in the two dual degree programs (MS/MBA and MS/JD) may opt for the internship option (see below); all MS-only students must complete a thesis. The thesis is based on original research and written under the supervision of a faculty advisor.

There are several steps in conducting this research and then defending the thesis:

1. In conjunction with their advisor, the student must assemble a three-member thesis defense committee that normally will meet by the end of the student's second semester of study. This committee must consist of at least three CU Boulder graduate faculty members and must include at least one rostered or associate ENVS faculty member.
At least two weeks before this committee meets, the student will submit a five-page research proposal to the committee members. During the meeting, the committee will question the student on the proposal and review the student's progress on suggested and required course work and suggest changes.
For a student to continue on in the program, their committee must approve their proposal and may require additional written revisions prior to approval.
2. A successful thesis must be an original research paper or report that is presented to the student's thesis defense committee and defended in line with the deadlines posted each semester by the Graduate School in order to be considered for graduation.
The thesis represents 6 credit hours of work and must comply with the specifications for theses and dissertations available in the Graduate School.
The expectation is that a research-based master's thesis would, at a minimum, be equivalent to a viable manuscript that could be submitted as one peer-reviewed research paper. For a client-based thesis, the report should meet the requirements of the stakeholder, agreed to at the time of writing the MS proposal.
See the Grad Alumni (<http://www.colorado.edu/envs/people/alumni>) page for examples of past MS theses.
3. The candidate for the MS degree, with the approval of the faculty advisor, must assemble a three-member thesis defense committee that should include an outside member from the appropriate environmental field. The graduate coordinator reports the names of the committee members and the date of the thesis defense to the Graduate School on the master's examination report form (<http://www.colorado.edu/graduateschool/current-students>) at least two weeks prior to the defense date.
It is important to stay in touch with the graduate coordinator about the committee composition, since all committee members need to be

checked for graduate faculty appointments that take at least a month to process.

During the semester in which the student plans to complete the requirements for the MS degree, an admission to candidacy application must also be completed and approved by the advisor and graduate director, and submitted to the Graduate School by the posted deadline. A copy must be submitted to the graduate program assistant.

Dates and forms are available in the master's packets for the thesis and non-thesis programs.

4. At the thesis defense meeting, the committee will question the student and review their work. The committee will also review the student's completion of course work assigned in previous committee meetings.

A student may graduate without completing all the formally assigned course work, with the approval of the committee.

After the thesis has been successfully defended, the student must be sure that the signature page with the original signatures of the chair of the examining committee and at least one other committee member is submitted to the Graduate School. The student must also electronically submit the thesis to ProQuest (<http://www.etdadmin.com/cgi-bin/school?siteid=70>) according to the Graduate School instructions (<http://www.colorado.edu/graduateschool/current-students>).

Internship Options for MS/MBA & MS/JD Students

Students pursuing one of the dual degree programs may complete 36 graduate credit hours, including a 2-credit Internship for which a substantial internship report is written, with no thesis required (see the Internship (<http://www.colorado.edu/envs/graduate-students/ms-phd-programs/masters-degree/plan-ii-non-thesis-option/internships>) webpage for more information on internships).

Students who opt for this plan must be sure to complete a master's course plan approval form (<http://www.colorado.edu/graduateschool/current-students>) in addition to the candidacy application (<http://www.colorado.edu/graduateschool/current-students>) by the posted Graduate School deadline. These forms require the signatures of the student's advisor, graduate director and department chair. Copies of the forms must be filed with the graduate coordinator.

Environmental Studies - Doctor of Philosophy (PhD)

The Environmental Studies graduate program at CU Boulder provides in-depth, interdisciplinary training for students interested in making contributions to the understanding of various social and environmental systems, and to the solving of environmental problems. The program is flexibly structured, with the goal of supporting individual student interests and providing them with the ability to seek the best training possible for these interests.

The PhD degree is a research degree, involving the production of a major piece of original research (the dissertation). Students within the program conduct research in a variety of environmental fields, usually working closely with one or more faculty advisors and committee members.

While a student's research project shapes much of their graduate career, course work, colloquia and other activities are also key parts of the graduate experience, and in ENVS they're particularly important

in providing the breadth of knowledge that is key for those seeking to contribute to environmental research and management.

Among the knowledge and skills that we seek to provide to every student are:

- the ability to evaluate policy goals in the context of competing societal objectives
- fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information
- the ability to integrate knowledge from multiple disciplines in the context of complex environmental issues
- an understanding of the local, state, and federal decision processes that shape environmental issues
- the ability to think critically, creatively, and holistically about environmental issues
- the ability to work in interdisciplinary teams
- skill in communication with diverse audiences

For more information, visit the program's PhD (<http://www.colorado.edu/envs/graduate-students/ms-phd-programs/phd>) webpage.

Requirements

Required Courses

The PhD requires completion of 32 course credit hours, including two broad, introductory three-credit courses (ENVS 5000 Policy, Science, and the Environment and ENVS 5003 Theory and Methods in Environmental Studies). These courses, which are typically taken during a student's first year, are designed to expose students to the multiple fields of study that are strengths within the ENVS program and also to expose them to interdisciplinary approaches and methods to environmental problem solving.

All students must also take two semesters of ENVS Colloquium (2 course credits), a topical seminar series. Additional course work is designed to meet a student's individual needs and interests and is initially formulated during a student's Guidance Committee meeting at the beginning of their first semester.

The PhD also requires 30 hours of dissertation credits and successfully preparing and defending the doctoral dissertation.

There are five major meetings and examinations that a doctoral student must complete:

Guidance Committee Meeting

During the first six weeks of each new student's first semester (typically in the fall), a guidance committee of three faculty members will examine the student's past course record (from undergraduate and past graduate work) and devise a program of course work for that student. Responsibility for convening these meetings falls on the advisor. However, the graduate director and graduate assistant will aid in the scheduling of these meetings and, if needed, intervene to ensure they occur on schedule. These committees and their meeting should be shaped by these considerations:

- The committee should be composed of the primary advisor and at least two other faculty members. To ensure breadth of viewpoints, one member of the committee will be assigned by the Graduate Committee and will be someone outside the student's specific areas of research interest. The Graduate Committee must approve the

composition of each committee to ensure that appropriate knowledge of ENVS procedures and history are represented.

- Before the committee meeting, the student should provide a brief overview of their intellectual interests and provide an assessment of their own weaknesses and strengths in training.
- The committee, working with the student, should devise a list of both suggested and mandated courses. Course work can be specified as either a single course or a type of course (e.g., "a course covering the use of multivariate statistics," as opposed to a specific course number). In addition, the committee can suggest that the student TA certain classes as another way of exposing them to particular fields; any such suggestions should consider the feasibility of the student actually being able to TA such a course. For some areas of the program, groups of faculty have coordinated on a common set of classes for their students to take
- The assigned course work should provide the student with depth of understanding in their research field(s) and ensure that the student has some breadth of training or experience in one or more other aspects of environmental studies.
- While the number of classes suggested or mandated will vary depending on each student's past training and research plans, a typical list of required classes for a PhD student should generally not exceed six such classes.
- This first-semester guidance committee's work is finished after its one meeting, with no requirement that the members be on subsequent committees for a student.

Preliminary Examination

The first exam that a doctoral student must take is the preliminary exam, typically given in the second year of the student's program. This exam should test the student's understanding of material from the ENVS core classes, as well as the breadth and depth of their knowledge in their fields of inquiry. The ENVS preliminary exam consists of a written exam only, and must conform to the following rules:

- The committee must have at least three members and may have up to five. The Graduate Committee must approve the composition of each committee to ensure that appropriate knowledge of ENVS procedures and history are represented.
- By two months prior to the arranged exam date, committee members will provide the student with reading materials that cover both general and specific material upon which the exam will be based. It is the student's responsibility to meet with committee members and obtain these reading lists prior to the exam date, as well as to set a time for their exam. ENVS typically designates one weekend per semester as the standard dates for prelim exams, but depending on student and faculty schedules, the exam may be taken at another time if approved by the graduate director.
- The chair of the exam committee (usually the student's advisor) will assemble questions from the committee members and send them to the graduate assistant prior to the exam date. The graduate assistant will then deliver them to the student and to the graduate committee on the first day of the exam. Each committee member may mandate whether their questions are to be answered open book or closed book.
- The student will have four days to answer the questions.
- The student will deliver their answers to the graduate assistant and the committee members at the end of the exam. The committee will then have two weeks to read and score the answers. The committee will confer and decide whether the student receives a pass, fail

or conditional pass. If a fail or conditional pass is assigned, the committee may decide to allow the student to retake some or all of the exam, or to do additional work to prove sufficient competence in areas of concern.

For more information, visit the program's Preliminary Examination (<http://www.colorado.edu/envs/graduate-students/ms-phd-programs/phd/preliminary-examination>) webpage.

Prospectus Defense

The prospectus defense (also known officially as the comprehensive exam) is designed to assess a PhD student's knowledge of their research area and specifically to evaluate the student's dissertation research proposal. At the prospectus defense meeting, the committee also will review the student's completion of course work assigned in previous committee meetings. A student may advance to candidacy without completing all the formally assigned course work, with the approval of the committee.

The exam should be taken in the student's fifth semester, and no later than the sixth semester, of graduate study in ENVS. Any exceptions to this rule require the permission of the ENVS Graduate Committee. During the semester in which the student plans to defend the dissertation prospectus, an admission to candidacy application must be completed and approved by the faculty advisor and the graduate director, and submitted to the Graduate School *at least three weeks before the prospectus defense*. The Graduate Coordinator will also submit a doctoral exam report at this time to inform the Graduate School about the date of the exam and the composition of the committee.

The prospectus defense committee is made up of five people, including the student's primary advisor and four other members who are approved by the ENVS Graduate Committee and who are in a field related to the student's area of research. Three of the members must be CU Boulder graduate faculty, and one must be from outside the ENVS program. The primary advisor and outside member of the committee must have regular or tenured graduate faculty appointments. The other committee members must have either regular or special graduate faculty appointments. For committee members not on the CU Boulder faculty roster, students must submit a CV to the Graduate School and request a special appointment to the graduate faculty. Please consult the graduate coordinator (Envsgad@colorado.edu) for details.

At least two weeks before the scheduled meeting, the student must submit a research proposal to the dissertation committee on the dissertation topic. A copy of this proposal must be submitted to every member of the committee. Students are strongly encouraged to consult with committee members and particularly their advisors as they prepare this document. The research proposal should include the following categories:

- Abstract of proposed work.
- General introduction that puts the proposed project into perspective and reviews the relevant literature in the field.
- Rationale for and importance of the research.
- Relevant preliminary research already completed or in progress.
- Research design, including proposed methods and research plan.
- References (not included in page count).

This document must be limited to 15 single-spaced pages, including figures and tables, but excluding references.

The student should prepare a 20-minute formal presentation on their research progress and research plan for presentation at the exam meeting. The presentation should be of a format acceptable at a national professional meeting, highlight the questions addressed by the student's research and include sufficient details on methods to be analyzed by the committee.

At the exam meeting, the student will deliver their presentation, to be followed by a discussion of the research presented. Committee members will also probe the student's knowledge of the contemporary and historical literature related to the student's proposed research. Students are encouraged to seek advice from all prospectus defense committee members about their expectations concerning subject matter and level of knowledge for this exam. No restrictions are placed upon committee members with regard to subject matter relevant to the dissertation topic. The combination of the presentation and oral examination take approximately two hours.

Following the exam, the committee should complete the doctoral examination report, specify one of the three possible outcomes, and return it to the graduate coordinator.

- **Pass:** The student receives affirmative votes from a majority of the members of the committee. There are no additional requirements.
- **Conditional Pass:** The student is required to take additional requirements as required by the examining committee, and will not pass the exam until they complete these requirements. A conditional pass will be assigned if a student fails to demonstrate a sufficient understanding of the literature in their core research area and/or fails to articulate the motivation and design of their PhD research in either the proposal or the oral examination.
- **Fail:** The student is either asked to leave the program or to retake the prospectus defense. A student may only re-defend once.

Dissertation

A doctoral student writes a dissertation based upon original investigation, demonstrating mature scholarship and critical judgment, as well as familiarity with tools and methods of research. The subject must be approved by the student's major department.

- Generally, a PhD is comprised of main chapters that could together comprise a viable book manuscript or result in three independent papers in leading peer-reviewed journals in the student's field. Short introductory and concluding chapters that frame the work and speak to its intellectual unity and contributions are also expected of most PhD dissertations.
- Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
- The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
- The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School (http://www.colorado.edu/GraduateSchool/academics/doctoral_graduation_packet.html).

In addition, the following conditions must be met:

- The dissertation is filed electronically to ProQuest (<http://www.etdadmin.com/cgi-bin/school?siteId=70>) according to the Graduate School (<http://www.colorado.edu/graduateschool/current>

students) instructions by the posted deadlines in the doctoral packet (<http://www.colorado.edu/graduateschool/academics/graduation-requirements>) for the semester in which the degree is to be conferred.

- A signature page with original signatures from the chair of the student's committee and at least one other committee member must be submitted to the Graduate School by the same submission deadline.
- The survey of earned doctorates form is submitted to the National Science Foundation (<https://sed-ncses.org>) website.

The final grade for dissertation credits taken by a student is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed and the final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation hours is submitted to the Graduate School.

Dissertation Defense

The final step in a PhD is defense of the doctoral dissertation. Several steps must be followed for a valid dissertation defense meeting to be held:

- The student must be registered as a full-time, regular, degree-seeking student at CU Boulder for a minimum of 5 dissertation hours during the semester in which they pass the final examination.
- Students must notify the Graduate School of their final oral examination at least two weeks before their scheduled examination date. The examination must be scheduled no later than the posted deadline for the semester in which the degree is to be conferred. This information should be provided on the doctoral examination report and leaflet.
- This defense is wholly or partly oral, and consists of both a public presentation, open to anyone, and a closed-door meeting with the committee. This committee is appointed by the chair of the major department and approved by the dean of the Graduate School, and should consist of at least five persons, one of whom must be from outside the student's major department. Three of the members must be CU Boulder graduate faculty. The chair and outside member of the committee must have regular or tenured graduate faculty appointments. The other committee members must have either regular or special graduate faculty appointments.

Following the defense meeting, the committee votes on the outcome. More than one dissenting vote disqualifies the candidate. The committee chair and a majority of the committee must be present on the Boulder campus for the examination. A student who fails the examination may attempt it once more after a period of time determined by the examining committee.

Environment, Policy and Society - Graduate Certificate

In order to understand contemporary environmental issues, today's scholars must transcend historical academic disciplinary boundaries. Indeed, complex issues related to energy, climate change, species preservation and air and water quality are best addressed by valuing insights from multiple perspectives. The graduate certificate in environment, policy and society allows students the opportunity to engage in interdisciplinary exploration of these contemporary

environmental problems by drawing from courses across a wide range of social science disciplines.

The certificate curriculum incorporates courses from many departments in the College of Arts and Sciences, including anthropology, biology, economics, geography, philosophy, political science, psychology and sociology. In addition, pertinent courses are available in the Program in Environmental Design; the Leeds School of Business; the College of Engineering and Applied Science; the College of Media, Communications and Information; and the School of Law.

For more information, visit the Environmental Studies Program's Certificate Programs (<http://www.colorado.edu/envs/certificate-programs>) webpage.

Requirements Admission

The Graduate Certificate on Environment, Policy, and Society provides an interdisciplinary specialization for students in MA, PhD, JD, or other graduate degree programs at the University of Colorado. The program draws on courses in anthropology, economics, ecology and evolutionary biology, geography, philosophy, political science, psychology, sociology, as well as courses from other units are CU Boulder including: the Program in Environmental Design, the College of Engineering and Applied Science, the College of Media, Communications and Information, and the School of Law. The program requires 18 hours of approved courses, including a cornerstone and a capstone course.

Students must be admitted to the Certificate Program, but the only admission requirement is to be a graduate student in good standing at the University of Colorado Boulder. To be admitted, CU graduate students must complete an application form (<http://www.colorado.edu/envs/node/586/attachment>) and have it signed by an appropriate departmental representative.

A very limited number of students already holding graduate degrees from other institutions may be admitted to the program, through the Division of Continuing Education (<http://conted.colorado.edu>), by petition to the Director of the Environment, Policy and Society Program, provided their credentials are validated by one of the participating departments and meet the normal admission requirements of the department.

Program Requirements

The program requires 18 hours of approved courses, including a cornerstone and a capstone course.

To qualify for the certificate, students must complete at least 12 hours of course work from the more than 50 courses in environmental policy and policy sciences offered at CU Boulder. No more than 6 of the required 18 hours may be in the student's home department.

Of the 12 elective credit hours, nine elective credit hours must be drawn from one of four specialty areas, chosen by the student:

1. Society and the Environment
2. Environmental Policy
3. Energy and Society
4. Water and Society

The broad area of Society and the Environment has two recognized (but optional) clusters of courses, including Environment and Development and Social Dimensions of Hazards. Additional credit hours may be taken

from outside the student's area on consultation with, and approval from, the student's certificate advisor. Students who wish to incorporate a natural science course into their elective course work may also do so with the approval of the student's certificate advisor.

These degree requirements are subject to change. For updated information, visit the Environmental Studies Program's Certificate Programs (<http://www.colorado.edu/envs/certificate-programs>) webpage.

Renewable and Sustainable Energy - Graduate Certificate

The RASEI graduate renewable energy certificate equips students across graduate degree programs with skills and knowledge that transcend traditional disciplines and establish a firm grounding in the business, policy, economic, and institutional aspects of energy. We couple a required core of science and technology, policy, and business courses with electives specific to each student's degree program to produce experts with both depth in the energy aspects of their disciplines and the breadth to work across sectors and knowledge communities to drive transformation of the global energy system.

Solving the global challenge of energy transition is not just a technical challenge, and requires contributions from a variety of approaches.

Thus no specific disciplinary background is required, and our program draws from the business school, the humanities, journalism, the sciences, engineering, and law. This graduate certificate program is intended to supplement, not replace, graduate students' degree programs. Graduates from this certificate program - whether they have JDs, MBAs, masters degrees, or doctorates—will have a strong understanding of energy systems, energy alternatives, energy markets and business, and energy policy. Most importantly, the certificate program connects emerging experts in energy with one another, and creates a transdisciplinary community of energy students that reach across colleges and departments on campus.

Distance Education

Students can complete some requirements for this graduate certificate via distance education (online). For more information, connect with the graduate program advisor or visit the RASEI web site (<http://www.colorado.edu/rasei/education/programs-graduate-students/graduate-energy-certificate-program>).

Requirements

Students must earn a grade of C or higher in all required courses and complete three energy or climate-related elective classes. For a list of pre-approved electives, consult the RASEI web site (<http://www.colorado.edu/rasei/education/energy-related-courses-0>).

Required Courses

ENST 5000	Energy Systems and Technologies	3
ENST 5001	Energy Policy in the 21st Century	3
ENST 5002	The Business of Sustainable Energy	3

Science and Technology Policy - Graduate Certificate

The graduate certificate in science and technology policy is a rigorous educational program to prepare students pursuing graduate degrees

for careers at the interface of science, technology and decision making. Past recipients of the certificate have gone on to positions in the U.S. Congress, academia, NOAA and other policy relevant positions.

Students come from such graduate programs as:

- aerospace engineering
- atmospheric and oceanic sciences
- biological sciences
- chemistry
- civil engineering
- environmental studies
- geography
- journalism
- mechanical engineering

Students enrolled receive either a master's or doctoral degree in their department and a certificate in science and technology policy. Each year, the certificate program will begin with a capped enrollment of 18 students per cohort.

Requirements

Successful completion of the certificate program requires the completion of 18 credit hours of course work (or course work plus internship credit hours) to include three required courses and three additional courses selected from a list of approved electives.

Required Courses and Semester Credit Hours

Required Courses

ENVS 5100	Special Topics in Environmental Studies (Science and Technology Policy)	3
ENVS 5110	Topics in Environmental Social Science and Humanities (Science, Technology, and Society)	3
ENVS 5120	Topics in Quantitative Methods (Quantitative Methods of Policy Analysis)	3

Electives

Select three additional courses from the program's list of approved electives. ¹	9

Ethnic Studies

The field of Ethnic Studies was born out of, and is dedicated to, struggles for social justice for all people. The Department of Ethnic Studies at the University of Colorado Boulder draws on this tradition of engaged scholarship to examine how race and the interrelated categories of ethnicity, gender, class, and sexuality impact the lives of people in the United States and around the globe.

Our interdisciplinary department offers a doctoral degree and a graduate certificate in comparative ethnic studies. Faculty members engage in a wide variety of research on the cultures, histories, epistemologies, and

experiences in African American, Asian American, Chicana and Chicano, and Native American peoples in the U.S. and beyond. Their research and teaching address these topics through critical, transnational, queer, decolonial and comparative perspectives.

Course code for this program is ETHN.

Doctoral Degree

- Comparative Ethnic Studies - Doctor of Philosophy (PhD) (p. 982)

Certificate

- Comparative Ethnic Studies - Graduate Certificate (p. 983)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ETHN 5001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and FILM 4001

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5102 (3) Special Topics in Africana Studies

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4102

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5106 (3) Special Topics in Chicana and Chicano Studies

Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4106

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 5272 (3) W.E.B. Du Bois Seminar

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4272

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5306 (3) The Chicana and Chicano and U.S. Social Systems

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4306

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 5353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4353 and RLST 4353 and RLST 5353

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4552 and HUMN 4552

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Africana Studies

ETHN 5553 (3) Indigenous Representations in the United States

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4553

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American Indian Studies

ETHN 5632 (3) Frantz Fanon Seminar

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4632

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5714 (3) Sport and Social Justice

Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4714

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5951 (3) Senior/Graduate Seminar in Ethnic Studies

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4951

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6000 (3) Foundations of Comparative Ethnic Studies

Examines theories of race, ethnicity, gender, sexuality, colonialism and globalization, especially from the perspectives of communities most impacted by these categories and processes. This is the introductory course for graduate work in Comparative Ethnic Studies.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6001 (3) Research Methods in Comparative Ethnic Studies

Examines various humanistic and social science research methodologies and applies critical frameworks (including feminist, queer, Indigenous and decolonial theories) to research through an intersectional lens committed to analyzing race, class, gender and sexuality as interconnected, knowledge-producing systems of power. Examines how Ethnic Studies scholars can engage with social justice projects by producing knowledge in cutting edge ways.

Requisites: Requires prerequisite course of ETHN 6000 (minimum grade C). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6002 (1) Professionalization Seminar in Comparative Ethnic Studies

Provides graduate students with professionalization skills, including how to prepare a national fellowship application, how to give a successful job talk, how to publish refereed journals and book volumes and how to approach the academic job market.

Requisites: Restricted to Ethnic Studies (ETHN) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6011 (3) Race and Sexuality Studies

Examines primary texts in queer studies and queer theory while challenging colonial heteronormative and homonormative studies that exclude queers of color and their life experiences. Readings include works by Gloria Anzaldua, Jose Munoz, Audre Lorde, David Eng, Judith Butler, Judith Halberstam, and Michel Foucault. Topics such as queer borderlands, citizenship, racialized and transgender identities will be interrogated.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6014 (3) Gender, Race, Class, and Crime

Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 7014

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6100 (3) Race and Citizenship in U.S. History and Culture

Examines how the cultural and legal bounds of U.S. citizenship have been linked to race, gender, labor, class, and sexuality. Analyzes the experiences of racialized and gendered groups to explore the racial formations, exclusions and contradictions inherent with the institution of citizenship.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6101 (1-6) Topics: Specialized Comparative Studies

Focuses on a variety of advanced interdisciplinary studies. Themes include: Race and Sports, Critical Whiteness Studies, Race and Masculinity, Applied Community Engagement, Black Women in the Diaspora, US/Mexico Border Cultures, Criminalization and Latinas/os, Race, Violence and Film, and Cuba and Tourism.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Requisite ETHN coursework.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6103 (3) Indigenous Thought and Theory: Foundations in NAIS

Introduces the theoretical landscapes of Native American and Indigenous Studies. Explores debates, methodologies and concerns that ground the field and provides critical engagement with Indigenous communities and knowledges. Teaches standards for evaluating scholarly sources based on criteria derived from the most outstanding recent scholarship in the field. Requires writing and thinking critically about issues of concern for global indigenous communities.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American Indian Studies

ETHN 6110 (3) Adv. Tpcs. In Chicana/Chicano Studies: US/Mexico Borderlands

Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

Equivalent - Duplicate Degree Credit Not Granted: RLST 6110

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Chicana/o Studies

ETHN 6301 (3) Decolonial/Postcolonial Theory

Offers an overview of the origins and evolution of Decolonial/Postcolonial Theory. Critically compares and contrasts decolonial discourse with postcolonial theory. Exposes students to the ways in which decolonial and postcolonial theory conceptually interconnect via Cultural Studies, Critical Race Studies and Ethnic Studies-derived discourses such as racial colonialism, the critique of European imperialism, transnationalism feminism, Indigeneity/Indigenous Studies, Diaspora Studies and Subaltern Studies.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6501 (3) Critical Race Theory: Soc Scnc Explrtn/Intrvntn into Crit Race St

Offers an overview of the origins and evolution of Critical Race Theory (CRT). Critically compares and contrasts legal and extralegal social science approaches to CRT. Exposes students to the ways in which CRT and Critical Ethnic Studies conceptually interconnects via CRT-derived discourses such as Critical Race Feminism, Critical White Studies, TribalCrit, LatCrit, AsianCrit, DesiCriti, QueerCrit and Decolonial/Postcolonial Critical Race Theory.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6841 (1-6) Advanced Directed Readings in Ethnic Studies

This is a graduate level directed readings course designed to expand student knowledge in a particular area of concentration with a broad interdisciplinary and comparative framework. These areas of concentration include work in Africana, American Indian, Asian American, Chicana and Chicano and Transnational/Hemispheric ethnic studies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for a minimum of 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

Comparative Ethnic Studies - Doctor of Philosophy (PhD)

The PhD program in comparative ethnic studies offers an innovative and streamlined path to provide students with broad training to enable them to research and analyze the intersectional and relational workings of race, ethnicity, gender, class and sexuality in national and transnational contexts. It provides flexibility for students to pursue their individual research interests, while ensuring that they are grounded in both the foundational and cutting-edge theories in ethnic studies.

The department is dedicated to interrogating the relational nature of race and its attendant categories, particularly gender and sexuality, using frameworks that account for the increasingly transnational ways that these categories are constructed, resisted and inhabited. However, we believe that rigorous comparative and relational analyses can only grow out of deep groundings in the particular areas of Africana, Asian American, Chicana and Chicano, and Native American/Indigenous studies. Methodologically and theoretically, our faculty members possess training and expertise in interdisciplinary fields, including ethnic studies, women's and gender studies, cultural studies, literary and film studies, border studies and American studies, as well as traditional disciplines, including anthropology, history, philosophy and sociology.

Requirements

Doctoral students are expected to demonstrate an ability to independently carry out original field research, acquire original data, make

appropriate analyses and prepare reports of publishable caliber. Students must demonstrate proficiency in a broad subject of learning and the ability to critically evaluate work in ethnic studies. The PhD program is comprised of three basic components: course work, a comprehensive examination and the dissertation.

A master's degree in ethnic studies or a cognate field (e.g., American studies, English, history, sociology, women's and gender studies, or other related disciplines and interdisciplinary fields) from an accredited university is required for admission into the PhD program.

Transfer of Credit

The associate chair for graduate studies (ACGS), in consultation with the Graduate Committee (GC), will examine the academic transcripts of admitted students to determine transfer credits where appropriate.

Students will be permitted to transfer up to a maximum of 9 credit hours. Students must submit a syllabus for each course to be considered for transfer, and will require the approval of the ACGS.

Course and Credit Requirements

Students must complete 60 credit hours, with a minimum of 30 credit hours of graduate-level course work (including any transferred graduate credit from the completed master's degree referenced above). At least 18 of the 30 credit hours of graduate-level course work must come from the Department of Ethnic Studies.

The subfield requirement (see below) must be fulfilled by completing a minimum of 9 credits of coursework in a department outside of Ethnic Studies (transferred graduate credit may be used to satisfy this requirement).

In addition to the 30 credit hours of graduate-level course work, students must complete a minimum of 30 dissertation credits in total: 5–10 during comprehensive examination preparation and 5–10 per semester when defending the prospectus and writing the dissertation. Students must be registered for a minimum of five dissertation hours the semester (including summer semester) in which the comprehensive exam/dissertation defense is held. Students are not permitted to register for more than 10 credit hours of dissertation credit per semester, per Graduate School rules.

Continuous Registration

A PhD student is required to register continuously as a full-time, regular degree-seeking student at CU Boulder for a minimum of five credit hours in the fall and spring semesters of each year. Students must be registered for a minimum of 5 dissertation hours per semester beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student who fails to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School.

Course Requirements

All doctoral students are required to complete the fall and spring sequence, ETHN 6000/ETHN 6001: Foundations in Comparative Ethnic Studies and Methods in Comparative Ethnic Studies (6 credits total, 3 per semester). The introductory, two-semester course will prepare doctoral students for interdisciplinary studies on race, ethnicity, gender, class, indigeneity, sexuality, nation and culture. The first semester will be a

theoretical introduction, and the second semester will examine research methodologies and application of theories to research.

In addition to the two introductory courses, students will be required to enroll in a 1-credit professionalization seminar (ETHN 6002), which is a two-semester course offered by the Ethnic Studies Department that meets once a month during the academic year.

The remaining 23 credits will be selected in consultation with the student's advisor from among ETHN graduate offerings, graduate courses in other units, and approved transfer credit up to 9 credit hours.

Subfield Requirement

The subfield requirement entails completing a minimum of 9 credits of graduate-level course work in a department outside of Ethnic Studies (transferred credits may be used to satisfy this requirement). Depending on their research interests, students will select, in consultation with their advisor and the ACGS, either a *thematic* or *disciplinary* subfield. Disciplinary subfields can be chosen from cognate units including, but not limited to, history, sociology, economics, English, anthropology, religious studies, women's and gender studies, humanities, communication, film, philosophy, political science, geography and art history. Thematic subfields allow students to select courses from departments outside of Ethnic Studies that relate to a thematic framework (e.g. postcolonialism and empire, diaspora and labor migration, etc.). Students will be advised by their advisor and the ACGS about their subfields, which will be highly individualized to suit the student's particular research interests.

Language Requirement

The department encourages, but does not require, foreign language proficiency, especially for students conducting research in sources other than English. Proficiency will be demonstrated by passing (with a grade of C or better) the fourth semester of a foreign language course, earning a passing score on the Graduate School foreign language test, or by an alternative mode of assessment agreed to by the Graduate Committee. Credits earned for language proficiency will not apply toward the doctoral degree. The goals of the language requirement are to ensure that doctoral scholars can research materials in other languages besides English. The department will work with the Graduate School to ensure that the language requirements are in parity with other interdisciplinary doctoral programs at CU Boulder.

For additional details, visit the department's PhD Program (http://www.colorado.edu/ethnicstudies/grad/phd_program.html) webpage and download the Graduate Student Handbook.

Comparative Ethnic Studies - Graduate Certificate

The 12-credit graduate certificate in comparative ethnic studies is an interdisciplinary course of study designed to complement the MA or PhD curriculum required by the student's home department within CU Boulder. The Department of Ethnic Studies (DES) offers the certificate to provide specialized training in Africana studies, Chicana/o studies, decolonial feminist studies, comparative ethnic studies, race and sexuality studies, and transnational/hemispheric ethnic studies to students pursuing degrees in various disciplines on campus.

Requirements

Application Requirements

Students must submit an unofficial transcript and a two-page statement of purpose describing how their graduate interests will be enhanced by our course offerings and mentoring (in the statement of purpose, please identify classes already taken in DES).

To participate in the ethnic studies certificate program, applicants must maintain good academic standing with their home unit within the Graduate School. Their home unit must also indicate its support for the student enrolling in the certificate program.

Materials should be sent to grad.ethnst@colorado.edu.

Course Requirements

A total of 12 credit hours of graduate-level course work is required for this certificate, nine of which must be from courses in the Department of Ethnic Studies (ETHN 6000 and two electives). Certificate program students must maintain a minimum GPA of 3.3.

Required Courses and Semester Credit Hours

Required Course

ETHN 6000	Foundations of Comparative Ethnic Studies	3
-----------	---	---

Electives

Choose three graduate-level electives, at least two of which are from the Department of Ethnic Studies. Approved elective courses include:

ETHN 5001	Screening Race, Class & Gender in the U.S. and the Global Borderland	9
ETHN 5102	Special Topics in Africana Studies	
ETHN 5106	Special Topics in Chicana and Chicano Studies	
ETHN 5272	W.E.B. Du Bois Seminar	
ETHN 5306	The Chicana and Chicano and U.S. Social Systems

Total Credit Hours 12

French and Italian

The Department of French and Italian at the University of Colorado Boulder enjoys a national reputation, and is the only PhD granting department in the Rocky Mountain region. The department offers comprehensive coverage of all areas of French and Francophone literature, and has an outstanding record of placing its MA and PhD recipients in desirable positions of employment. The graduate program typically counts an enrollment of 20 to 25 students, drawn from both the U.S. and several foreign countries, pursuing interests from the Middle Ages to 20th c. and Francophone literatures.

Graduate Study in French

The Department of French and Italian at the University of Colorado Boulder offer master's and doctoral French graduate programs. Students wishing to pursue graduate work in French leading to candidacy for an advanced degree should read the Degree Requirements (p. 866) sections carefully.

Master's Degree

- French - Master of Arts (MA) (p. 986)

Doctoral Degree

- French - Doctor of Philosophy (PhD) (p. 987)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

No Italian courses are offered at the graduate level.

FREN 5110 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5120 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5170 (3) Francophone African Literature

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5250 (3) Medieval and Renaissance Readings

Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France. Readings in French. May be taught in English to accommodate students in other programs.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5310 (3) 17th Century French Tragedy and Poetry

Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama's role as a symptom and agent of early modern French social and intellectual history. Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5320 (3) 17th Century French Prose

Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honnetete and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchic absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5330 (3) Moliere and 17th Century French Comedy

Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy's role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding L'ecole des femmes and Tartuffe. Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5350 (3) French Enlightenment

Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d'Alembert's Encyclopedie, Voltaire and Diderot's philosophical tales and dialogues, Rousseau's Discours, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5360 (3) 18th Century French Literature

Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/ writer and their significance as representatives of the century's changing society and culture.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5420 (3) 19th Century French Literature

A survey of principal works and movements, intended as an introductory course.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5430 (3) Topics in 19th Century French Prose, Poetry, and Theatre

Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5440 (3) Literary Ludics

Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5470 (3) 20th Century French Theatre and Poetry

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5770 (2-3) Methods of Teaching French as a Foreign Language

Familiarizes students with current methodology and techniques in foreign language teaching.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 6840 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

French - Master of Arts (MA)

The MA program in French literature at CU Boulder consists of course work and a comprehensive examination.

Concurrent Degree Program

BA/MA in French

The department also administers a concurrent undergraduate and graduate degree program in French, offering students the opportunity to graduate with a BA and an MA in French in five years. Students interested in this program should consult a college advisor and the associate chair for graduate studies for details. Students should also read the relevant guidelines available in the main department office.

Requirements

Prerequisites

The following are prerequisite to graduate study in French: an undergraduate major in French or its equivalent with a grade average of at least B in all French courses; the ability to read, write, speak and understand spoken standard French; general knowledge of French literature and civilization; and ability to read one language in addition to English and French. This last requirement may be fulfilled by passing a reading examination offered by the department.

Program Requirements

Degree requirements are subject to change. Students wishing to pursue graduate work in French should visit the department's MA Guidelines (<http://www.colorado.edu/frenchitalian/graduate/ma-guidelines>) for the most up-to-date degree requirements.

Course Requirements

The following summary of minimum requirements is expressed in terms of courses. Each course represents a graduate seminar carrying two or three credit hours. Additional course work may be required by the director of graduate studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Master's Degree Requirements (p. 866) section of this catalog.

Required Courses

At least eight courses (5000-level or above) in French literature and culture. Students must take at least one course in seven of the eight major historical periods of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th centuries, Francophone literature, and film.	24
Up to two courses (4000-level or above) in a related field (e.g., comparative literature, English, Spanish, classics, linguistics, film studies, history, fine arts, education) to be determined in consultation with the director of graduate studies. ¹	6
FREN 5770 Methods of Teaching French as a Foreign Language	3
Total Credit Hours	33

¹ *Students planning to apply for the doctoral program should remember that PhD candidates are expected to take three courses in a related field at the 5000 level or above. Courses in a related field at the 4000 level will normally not count toward this total.*

Master's students are normally not allowed to take independent studies courses. However, in exceptional circumstances, and with the approval of the director of graduate studies, they may register for one and at the very most two such courses.

Language Requirement

All MA candidates must acquire a reading knowledge of a language other than French and English. The language should be related to the student's academic program. The requirement may be fulfilled by taking a translation exam offered by the department in the language in question or by passing course work either at CU or prior to arrival on campus equivalent to a fourth semester (2120 at CU) college course.

Early in their first semester in the MA program, each student should meet individually with the director of graduate studies to discuss their overall plan of study, including the ways in which they will satisfy the language requirement.

MA Comprehensive Examination

This examination will be based on a reading list in literature, culture and theory prepared by the graduate faculty. It will be administered by an examination committee composed of the director of graduate studies and two other members of the graduate faculty, appointed by the chair. The examination will consist of three essays of three hours each, based on questions formulated by the examination committee, and a one-hour oral examination designed to test the student's knowledge of the reading list. Normally the three essays will be written within a six-day period, and the one-hour oral exam will normally follow within two weeks. Two of the three essays must be written in French, but should students decide to exercise the option of writing one in English, they are entirely free to choose which one it shall be. The comprehensive examination must be taken during the fourth semester of the MA program.

Typical Two-Year MA Program Structure

The MA degree is intended to be completed in two years. The normal pattern of courses would be as follows:

Course	Title	Credit Hours
Year One		
Fall Semester		
Two seminars		6
FREN 5770	Methods of Teaching French as a Foreign Language	3
	Credit Hours	9
Spring Semester		
Three seminars		9
	Credit Hours	9
Year Two		
Fall Semester		
Three seminars		9
	Credit Hours	9
Spring Semester		
Two seminars		6
	Credit Hours	6
	Total Credit Hours	33

French - Doctor of Philosophy (PhD)

The Department of French and Italian at CU Boulder enjoys a national reputation and is the only PhD-granting department in the Rocky Mountain region. The department offers comprehensive coverage of all areas of French and Francophone literature, and has an outstanding record of placing its PhD recipients in desirable positions of employment. Our students pursue interests from the Middle Ages to 21st-century and Francophone literatures.

Requirements

Prerequisites

Doctoral candidates should possess excellence in reading, speaking, writing and understanding spoken standard French; general knowledge of French literature and civilization; and knowledge of one language other than English and French.

Program Requirements

The PhD program in French literature consists of a) course work, b) a comprehensive examination, c) a doctoral dissertation, and d) an oral defense of the doctoral dissertation.

Degree requirements are subject to change. Students should visit the department's PhD Guidelines (<http://www.colorado.edu/frenchitalian/graduate/phd-guidelines>) webpage for the most up-to-date degree requirements.

Required Courses and Semester Credit Hours

The following summary of minimum requirements is expressed in terms of courses. Additional course work may be required by the director of graduate studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Doctoral Degree Requirements (p. 867) section of this catalog.

Required Courses

At least 12 courses (5000-level and above) in French literature and culture.	36
--	----

Up to three courses (4000-level or above) in a related field (e.g., comparative literature, English, Spanish, classics, linguistics, Romance linguistics, film studies, history, fine arts, education) to be determined in consultation with the graduate advisor.	6-9
--	-----

Total Credit Hours	42-45
--------------------	-------

PhD students are normally allowed to take two independent studies courses, subject to the approval of the director of graduate studies. However, they may not take more than two (including any taken at the Master's level) except in exceptional circumstances and with the approval of the director of graduate studies.

Students must also have taken at least one course (5000-level and above) in seven of the eight major periods of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th centuries, Francophone literature, and film. Students continuing from the MA program at CU will normally have fulfilled this requirement as part of their MA degree.

Students entering the PhD program with an MA in French or equivalent from another university can count five of their previous MA courses toward the 15-course requirement; they must take 10 courses during the first two years of candidacy, up to two of which may be in a related field. Such students must take courses covering four of the eight periods of French literature. Previous course work will be evaluated, and if at least seven of the periods were not covered at the MA level, courses will be required to attain this coverage.

In summary, for students entering from other MA programs, the requirements are: 1) at least four courses within the department to cover four time periods, with these at the candidate's discretion except for the requirement to cover gaps from the MA program; 2) up to two courses in related fields; 3) four additional courses within the department at the discretion of the student.

Students entering the PhD program without an MA in French must consult with the director of graduate studies.

Language Requirement

A sound reading knowledge of one modern language other than English and French is required. Such reading knowledge must be certified by the student passing a reading examination in the language. The examination normally consists of a timed translation of a literary text or a text dealing with literature (e.g., literary criticism). A dictionary is permitted. This language should be relevant to the student's academic program.

Examination/PhD Comprehensive Examination

As students are finishing their required course work, they should have a good idea of the way their courses and ideas are coalescing around a given general field and a specific problem within that field. Courses taken

outside the department, as well as work in the related field, should fit into this pattern.

As this specification of interest toward the area of the dissertation takes place, the student should constitute a doctoral committee consisting of five graduate faculty members (one of whom must come from outside the student's department) who will guide the student's work. One of these faculty members will serve as the director and take responsibility for coordinating the work of this ad hoc doctoral committee.

Once the doctoral committee is formed and approved by the Graduate School, the student will begin to prepare for the PhD comprehensive examination. The examination will consist of one substantial essay (the equivalent of a 30-page seminar paper) followed by an oral. The subject of the essay is expected to evolve from one of three areas of concentration leading to the dissertation topic, or from a synthesis of these areas. A fairly common example of three such areas is: a major author (e.g., Flaubert), a major historical period (e.g., the second half of the 19th century) and a theoretical or thematic question (e.g., the realist novel). Normally, the question of the exam should have a theoretical or transhistorical orientation which extends beyond the immediate subjects of the two other areas. For each of the areas, the student will work with a member of the doctoral committee who will direct the development of a comprehensive reading list adequately preparing the student to undertake a significant original research project in the given dissertation area.

Once the student has completed the preparation for the examination by mastering the material contained in the three reading lists, the first part of the examination will consist of one extensive essay written in response to a question formulated by the doctoral committee on the three general areas. The student will have two weeks to write the essay. Once this essay is written, the doctoral committee will conduct the oral part of the examination as a discussion on material covered in the essay, as well as material not covered but related to the three areas of concentration leading to the dissertation topic.

Normally the PhD exams should be taken at the end of the student's second year in the program (for students continuing from CU's MA program) or at the end of the third year in the program (for students entering from other MA programs). In both cases, this allows the student a full year of independent study after the conclusion of course requirements.

Following successful completion of the comprehensive examination, working with the doctoral committee as a whole, the student will develop a dissertation prospectus setting forth the research subject. Upon successful completion of the PhD exams, students normally spend the next two years writing a dissertation (their third and fourth years in the PhD program, or fourth and fifth years for those entering with an external MA).

PhD Dissertation

The PhD dissertation must be based upon original investigation and demonstrate mature scholarship and critical judgment as well as familiarity with the tools and methods of research. It should be a worthwhile contribution to knowledge in the student's special field. Students are expected to have submitted an approved thesis prospectus by the end of the semester following their PhD comprehensive exams. Students are advised to familiarize themselves thoroughly with the various Graduate School rules governing the format and deadlines for the dissertation. The dissertation is normally written in English, and all departures from this norm must be approved by the student's committee.

Oral Defense of the Dissertation

After the dissertation has been accepted, a final oral examination on the dissertation and related topics will be held. The examination will be conducted by a five-member committee, appointed by the dean of the Graduate School, which will consist of representatives of areas in which the student has worked. At least one member of the committee will be from outside the student's field of study. The committee should be approved by the Graduate School at least two weeks prior to the oral defense. More than one negative vote will disqualify the candidate in the oral defense.

Graduate Program Structure

Typical Six-Year Structure for Entering MA Students

The PhD degree is intended to be completed in six years. The MA would normally be awarded after two years in the program. The standard sequence of courses is as follows:

Course	Title	Credit Hours
Year One		
Fall Semester		
Two seminars		6
Supervised teaching		
	Credit Hours	6
Spring Semester		
Three seminars		9
	Credit Hours	9
Year Two		
Fall Semester		
Three seminars		9
	Credit Hours	9
Spring Semester		
Two seminars		6
MA comprehensive exam		
	Credit Hours	6
Year Three		
Fall Semester		
Three seminars		9
	Credit Hours	9
Spring Semester		
Two to three seminars		6-9
	Credit Hours	6-9
Year Four		
Fall Semester		
Five hours of dissertation guidance		5
	Credit Hours	5
Spring Semester		
Five hours of dissertation guidance		5
PhD comprehensive exam		
	Credit Hours	5
Year Five		
Fall Semester		
At least five hours of dissertation guidance		5

Submission of dissertation prospectus	Credit Hours	5
Spring Semester		
At least five hours of dissertation guidance	Credit Hours	5
Year Six		
Fall Semester		
At least five hours of dissertation guidance	Credit Hours	5
Spring Semester		
At least five hours of dissertation guidance	Credit Hours	5
Submission and oral defense of dissertation	Credit Hours	5
		Total Credit Hours
		75-78

Typical Five-Year Structure for Students Who Hold an MA in French from Another Institution

The standard sequence of courses is as follows:

Course	Title	Credit Hours
Year One		
Fall Semester		
Two to three seminars		6-9
		Credit Hours
		6-9
Spring Semester		
Three seminars		9

Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography, and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population, and urban geography. Environment and society geography includes political ecology, natural hazards, and conservation practice. Physical geography includes climatology, geomorphology, hydrology, and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing, and cartography. The Department also offers regionally focused courses on mountain geography and geographies of China, Latin America, Africa, and South Asia. To complement its curriculum, the Department also offers internship opportunities for geography majors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read carefully the requirements for advanced degrees in the Graduate School section. Additional information should be obtained from the Department of Geography.

The course code for this program is GEOG.

Master's Degree

- Geography - Master of Arts (MA) (p. 994)

Doctoral Degree

- Geography - Doctor of Philosophy (PhD) (p. 995)

Certificates

- Development Studies - Graduate Certificate (p. 996)
- Population Studies - Graduate Certificate (p. 996)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abdalati, Waleed (https://experts.colorado.edu/display/fisid_145800)
Professor; PhD, University of Colorado Boulder

Anderson, Suzanne Prestrud (https://experts.colorado.edu/display/fisid_131099)
Professor; PhD, University of California-Berkeley

Balch, Jennifer Kakareka (https://experts.colorado.edu/display/fisid_154464)

Yeh, Emily Ting (https://experts.colorado.edu/display/fisid_130119)
Professor; PhD, University of California-Berkeley

Courses

GEOG 5003 (4) Elements of Geographic Information Systems

Discusses incorporating GIS methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite some experience with Mac or Windows.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5023 (4) Introduction to Quantitative Methods in Human Geography

Introduces fundamental statistical and quantitative modeling techniques widely used in geography today. Emphasizes geographic examples and spatial problems, as are statistical routines now available on most computers.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4023

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5043 (4) Cartography 2: Interactive and Multimedia Mapping

An advanced course in interactive, multimedia, animated and Web-based cartography stressing the important role digital cartography plays in cyberspace. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4043

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4093 and GEOL 4093 and GEOL 5093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5100 (1-4) Special Topics: Geography

Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty. **Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5103 (4) Geographic Information Systems

Examines construction and use of an information system and its data specifically designed for representing and manipulating geographical data. Emphasizes modern geographical information systems including computer hardware/software with a collection of methods/procedures for recording, transforming, storing/retrieving, analyzing, and mapping geographic data.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4103

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5113 (3) Seminar: Geographic Information Systems

Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4103 or GEOG 5103 or instructor consent required.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5152 (3) History and Theory of Geography

History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography.

Requisites: Restricted to Geography (GEOG) graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5161 (3) Research Design in Geography

The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas.

Requisites: Restricted to Geography (GEOG) graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5203 (4) Geographic Information Science: Modeling Applications

Extends basic GIS concepts and mechanics. Develop GIS models for human and environmental applications. Grid and vector data models, tessellated and hierarchical data structures, terrain representation, interpolation and kriging, spatial regression. Small group projects design, implement and run GIS models.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4203

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4103 or GEOG 5103 or working knowledge of GIS software or instructor consent required.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5211 (3) Seminar: Physical Climatology

Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5221 (3) Synoptic and Dynamic Climatology

Examines global climates from the standpoint of synoptic and dynamic climatology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5241 (1-3) Topics in Physical Geography

Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5251 (4) Fluvial Geomorphology

Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4251

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4271

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5292 (3) Migration, Immigrant Adaptation, and Development

historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4292 and ECON 4292

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5303 (4) GIS Programming for Spatial Analysis

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data. Covers concepts, principles and techniques of programming and solving spatial problems in physical and human geography.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4303

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5321 (3-4) Snow Hydrology

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4321

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5331 (3-4) Mountain Climatology

Surveys and analyzes climatic characteristics of mountain environments worldwide.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4331

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5371 (3) Forest Geography: Principles and Dynamics

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4371

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5391 (3) Seminar: Biogeography

Considers in detail current research themes in biogeography. Includes intensive reading of current research literature and preparation of research papers. Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5401 (3) Soils Geography

Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4401

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5403 (3) Space Time Analytics

Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands on, flipped classroom approach with in-class development of technical skills.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4403

Requisites: Restricted to graduate students only.

GEOG 5463 (3) Earth Analytics Data Science Bootcamp

Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4463

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5501 (3) Water Resources and Water Management of Western United States

Interprets and analyzes hydroclimatic data, surface and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4501

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5503 (3) GIS and Geospatial Project Management

Managing a geospatial project encompasses problem design, analysis and team dynamics. The class mixes lectures and class exercises with student-selected projects. Lectures run concurrent with projects, working through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4503

Requisites: Requires prerequisite course of GEOG 5103 (minimum grade C-).

GEOG 5563 (3) Earth Analytics

Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (<http://www.colorado.edu/grandchallenges/>) to use our expertise in space-based observation to address our world's most pressing problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4563

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5603 (3) GIS in the Social and Natural Sciences

Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4603

GEOG 5622 (3) City Life

Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4622

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5632 (3) Development Geography

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4632

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5642 (3) Seminar: Urban Geography

Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5652 (3) Introduction to Social Theory

Surveys theoretical paradigms in the social sciences. Includes canonical works from the history of the social sciences as well as contemporary theorists. Appropriate for beginning to advanced graduate students doing qualitative research.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5662 (3) Seminar: Topics in Economic Geography

Covers selected topics emphasizing faculty specialties. Topics vary with instructor. Check with department for semester offerings.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5663 (3) Earth Analytics Applications

Develop expertise in finding, organizing, managing and processing large, heterogeneous, spatio-temporal data to address a real-world problem.

Students will work collaboratively on semi-guided science project.

Students gain critical skills required to understand data structures, utilize APIs, extract insight from data and understand how uncertainty propagates. Culminates with a formal presentation of project results.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites GEOG 4463 or GEOG 4563 or GEOG 5463 or GEOG 5563.

Grading Basis: Letter Grade

GEOG 5712 (3) Political Geography

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4712

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5722 (3) Field Methods in Human Geography

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4722

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5732 (3) Population Geography

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4732

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5782 (3) Sustainable Development: Critique

Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5832 (3) Geography of Tibet

Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4832

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 5840 (1-3) Graduate Independent Study

Offers independent research for master's students only. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5852 (3) Health and Medical Geography

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4852

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5930 (3) Advanced Internship

Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5961 (3) Theories of Climate and Climate Variability

Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 6180 (1-3) Seminar: Geographic Problems

Applies research methods to selected problems. Topics vary with instructor.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6211 (1-3) Readings in Climatology

Discusses selected topics in current climatological literature. Specific themes vary.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 6402 (3) Seminar: Political Ecology

Critically examines the politics of human-environment relationships across cultures and societies. Focuses on environmental degradation, change and management from the perspectives including political economy, cultural politics, STS and post structural theory.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 6443 (2) Remote Sensing Field Methods

Theory and practical field measurements for validation of airborne and spaceborne spectral image acquisition. Emphasizes radiative scattering properties of soil, vegetation, cryosphere and atmosphere. Focuses on characterization and calibration of instrumentation to measure these properties.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6440

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 5093 or GEOL 5093.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 6712 (3) Seminar: Political Geography

Considers in detail history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 6732 (3) Formal Population Geography: Analysis and Forecasting

In-depth introduction to formal demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration and forecasting/projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 5023.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 6742 (3) Seminar: Cultural Geography

Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 6940 (1) Master's Degree Candidate

Instructor consent required.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

GEOG 6950 (1-6) Master's Thesis

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 7840 (1-3) Graduate Independent Study

Offers independent research for doctoral students only. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Instructor consent required.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Geography - Master of Arts (MA)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Master's Degree Requirements (p. 866) section carefully.

Requirements

Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

Students may acquire this knowledge in any way they choose: by formally taking the introductory courses, by auditing the courses, by reading the textbooks themselves or by other means. This knowledge will enable the student to perform at the level expected in the MA program's required core classes.

In addition to knowledge of basic geography, it is desirable that the student has course work in at least two areas outside geography in cognate fields in the social and natural sciences. Students are encouraged to have some background in college math, statistics and computer skills.

General Requirements

The minimum requirements for an MA in geography may be fulfilled by completing 30 credit hours of graduate work (5000 level or above), including 4 to 6 credit hours of thesis work. Master's students may, with the written approval of their advisor, use a maximum of 6 hours of 3000- or 4000-level course work to reach the required 30 hours.

Required Courses

GEOG 5152	History and Theory of Geography	3
GEOG 5161	Research Design in Geography	3
GEOG 5023	Introduction to Quantitative Methods in Human Geography	4
or GEOG 5722	Field Methods in Human Geography	
GEOG 6950	Master's Thesis	4-6
Electives		

Select at least 14 additional hours of course work at the 5000 level or above to meet the 30-credit minimum.

Total Credit Hours 30

Geography - Doctor of Philosophy (PhD)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Doctoral Degree Requirements (p. 867) section carefully.

Requirements

Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

Students may acquire this knowledge in any way they choose: by formally taking the introductory courses, by auditing the courses, by reading the textbooks themselves or by other means. This knowledge will enable the student to perform at the level expected in the PhD program's required core classes.

In addition to knowledge of basic geography, it is desirable that the student has course work in at least two areas outside geography in cognate fields in the social and natural sciences. Students are encouraged to have some background in college math, statistics and computer skills.

General Requirements

The PhD degree is not conferred merely upon the satisfactory completion of a course of study. The candidate must also demonstrate proficiency in some broad subject of learning, and be able to critically evaluate work in the field, show the ability to work independently in the chosen field and make an original contribution of significance to the advancement of knowledge.

The minimum requirements are 30 credit hours of course work numbered 5000 or above and 30 credit hours of dissertation. Ordinarily the number of course work hours and dissertation hours will be greater than 30 each. At least 20 of these hours must be taken at the University of Colorado; up to 10 credit hours from another institution may be transferred upon approval.

A 3.00 (B) average or higher must be maintained in all course work.

Six semesters of residence are required beyond the bachelor's degree, of which four must be at the University of Colorado; this may include two semesters for the master's degree. With department approval, students with a University of Colorado master's degree in geography may apply all credit hours from 5000-level courses or above (except thesis credits) to the PhD requirements.

Language Requirement

The department's minimum language requirement is a demonstration of proficiency in one foreign language. Ways in which this requirement may be satisfied are determined by the student's Advisory Committee and may include timed translation, publication in the language and/or course work. If more than the minimum proficiency is needed for library and/or field research, the choice and number of languages, as well as the required level of skill and methods of testing these skills, are determined and approved by the student's Advisory Committee. The language requirement must be satisfied before the comprehensive exam is taken.

Preliminary Exam

The Graduate School requires that all students in the doctoral program successfully pass a preliminary exam. In geography, this requirement is met by obtaining a grade of B or better in each of the three required courses:

Required Courses

GEOG 5152	History and Theory of Geography	3
GEOG 5161	Research Design in Geography	3
GEOG 5023	Introduction to Quantitative Methods in Human Geography	4
	or GEOG 5722 Field Methods in Human Geography	

Total Credit Hours 10

Following completion of the preliminary exam requirement, students undertake preparation for comprehensive exams.

Comprehensive Exams

Following successful completion of the preliminary exam, doctoral students must pass a comprehensive exam for advancement to candidacy for the doctoral degree. The comprehensive exam consists of two parts, including an exam on three subfields of geography with written and oral components, and completion of a written dissertation proposal and oral defense. Working together, the student and an Advisory Committee of three to five faculty set the subfield topics. The student creates a reading list for each subfield, and usually spends a semester reading and preparing for the subfields exam. The Advisory Committee sets the subfields exam questions and evaluates the written and oral responses, as well as the proposal defense. Upon successful completion of the comprehensive exam, a student can turn full attention to dissertation research and writing.

Dissertation

In addition to the minimum of 30 hours of course work required for the doctorate, a student must register for a total of at least 30 hours of dissertation credit, with a maximum of 10 hours in any one semester. Not more than 10 of these hours may be obtained before the student has been approved as a candidate for the doctorate (i.e., before the comprehensive exam is passed). Course work and work on the dissertation may proceed concurrently throughout the PhD program, but at no time shall a doctoral student register for more than 15 hours of 5000-level courses and above.

Following successful completion of comprehensives and admission to candidacy, students must register continuously. Students admitted to candidacy for degree will register for and be charged for a minimum of five dissertation hours each semester. Students may also register for classes in addition to the five dissertation hours.

After admission to candidacy, those not making use of campus facilities may register for three dissertation hours (part-time status). Continuous registration during the academic year will be required until completion of the dissertation defense. It is expected that the student and advisor will consult each semester as to the number of hours for which the student will register, consistent with the classifications described above.

Development Studies - Graduate Certificate

The Department of Geography offers a graduate certificate in development studies. Development studies is a well-established, interdisciplinary field of research with institutional centers at a number of major universities and several scholarly journals dedicated to its study. The certificate provides training in development studies to graduate students through a structured yet flexible program built around courses taught by CU faculty in a number of social science departments.

Because development issues such as agrarian change, labor migration, new social movements, industrial growth, urban planning and natural resource use cut across disciplinary divides, the study of development demands interdisciplinary approaches.

For more information, visit the department's Graduate Certificate in Development Studies (http://geography.colorado.edu/grad_program/certificates) webpage.

Requirements

Currently enrolled graduate students at CU and nondegree ACCESS students with bachelor's degrees may pursue the development studies certificate by completing the four required courses with a grade of B or higher.

The certificate requires the completion of 12 credits (four courses), at least two but not more than three of which should be taken in the Department of Geography.

For more information, please contact the certificate director, Jennifer Fluri (Jennifer.Fluri@colorado.edu).

Population Studies - Graduate Certificate

Offered through the Population Program of the Institute of Behavioral Science (IBS), the Graduate Certificate in Population Studies recognizes master's and doctoral degree students for interdisciplinary work in demography. The Population Program, which is international in scope and has an applied and policy-oriented focus, fosters research on population trends and patterns and provides training in population analysis. Students who are earning graduate degrees through the Departments of Economics, Geography or Sociology and are interested in majoring in demography are eligible to petition for admission to the program.

Questions about the certificate program in population studies should be directed to:

Population Program
Institute of Behavioral Science
University of Colorado Boulder
484 UCB
Boulder, CO 80309-0484
303-492-7986

www.colorado.edu/ibs/pop (<http://www.colorado.edu/ibs/pop>)
cupc@colorado.edu

Requirements

The Population Program emphasizes research training through direct faculty/student interaction and involvement in research projects.

Possible courses include:

GEOG 6732	Formal Population Geography: Analysis and Forecasting	3
SOCY 6012	Population Issues, Problems, and Policies	3

Students are granted a certificate on the basis of the three core courses, their independent research and their thesis or dissertation.

For more information please see here (<https://behavioralscience.colorado.edu/unit/population/graduate-certificate-in-demography>).

Geological Sciences

With one of the most successful graduate programs in the nation, the Department of Geological Sciences has enjoyed a reputation of excellence for more than 100 years. Our doctoral program is ranked among the top 10 percent of U.S. geology programs by the National Research Council and is ranked 9th by *U.S. News and World Report*.

Graduate students have an opportunity to work with approximately 30 tenure and tenure-track faculty who support a wide range of interdisciplinary research programs in biochemistry, economic resources, geodynamics, geophysics, glaciology, global climate change, hydrogeology, paleontology and surficial processes.

The graduate degrees offered include Master of Science (MS) and Doctor of Philosophy (PhD).

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the Geological Sciences (<http://www.cugeology.org>) website.

Course code for this program is GEOL.

Master's Degree

- Geology - Master of Science (MS) (p. 1002)

Doctoral Degrees

- Geology - Doctor of Philosophy (PhD) (p. 1002)
- Geophysics - Doctor of Philosophy (PhD) (p. 1002)

Certificates

- Geophysics - Graduate Certificate (p. 1003)
- Hydrologic Sciences - Graduate Certificate (p. 1004)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lon D (https://experts.colorado.edu/display/fisid_145044)
Senior Instructor

- Anderson, Robert S (https://experts.colorado.edu/display/fisid_130117)

Professor; PhD, Columbia University In the City of New York

Courses

GEOL 5001 (3) Physics and Chemistry of the Solid Earth

Reviews the physical and chemical characteristics of the solid earth, from the core to the crust, and the processes that govern behavior through the earth. Lectures are supplemented with readings from the recent literature. Topics include convection, phase transitions, melt generation, forces of plate tectonics, origin of continents and lithosphere, continental tectonics, and earthquakes.

Requisites: Restricted to graduate students only.

Recommended: Requisite a course in basic chemistry and a course in physics.

Additional Information: Departmental Category: Graduate Course

GEOL 5002 (3) Physics, Chemistry, and Biology of Sedimentary Systems

Reading and discussion of current issues and themes in the stratigraphic sciences, including stratigraphic and facies analysis, spatial heterogeneity and self-organization, numerical modeling; origin, evolution, mass extinctions, and megatrazjectories of life; and paleoceanographic and paleoclimatic signals in sedimentary rocks. Goal is to diversify students' understanding of the role of physics, chemistry, and biology in attacking research problems in sedimentary systems. Department enforced requisite, restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5060 (4) Oceanography

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4060

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5080 (3) Advanced Hydrogeology and Modeling Concepts

Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification and prediction. Department enforced prerequisite: MATH 2300 or Fortran.

Additional Information: Departmental Category: Graduate Course

GEOL 5093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4093 and GEOG 4093 and GEOG 5093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5110 (3) Geomechanics

Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth's surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Department enforced prerequisite: restricted to graduate students only and a course in calculus.

Additional Information: Departmental Category: Graduate Course

GEOL 5150 (2) Planetary Field Geology

Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4150

Additional Information: Departmental Category: Graduate Course

GEOL 5215 (3) Geochronology and Thermochronology

Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4215

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5270 (3) Marine Chemistry and Geochemistry

Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO₂; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4270

Recommended: Prerequisites introductory chemistry, introductory geology, introductory oceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5280 (3) Aqueous and Environmental Geochemistry

Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations and microbial geochemistry. Department enforced prerequisite: GEOL 3320 or 1 year of college chemistry.

Additional Information: Departmental Category: Graduate Course

GEOL 5305 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global scale measurements of element fluxes from satellites, aircraft and measurement networks. Department enforced prerequisite: restricted to graduate students only, general chemistry and some organic chemistry.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5840

Additional Information: Departmental Category: Graduate Course

GEOL 5330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4330 and ASTR 4330 and ASTR 5330

Additional Information: Departmental Category: Graduate Course

GEOL 5420 (3) Quaternary Dating Methods

Features in-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5430 (3) Paleoceanography and Paleoclimatology

Examines scientific tools, data and theories related to the dramatically varied past climate of Earth. Focus will be on marine records of climate change and ocean circulation, but ice core and continental archives will also be discussed. Covers the Cretaceous Period to the present, with particular emphasis on the past 150,000 years (the last ice age cycle). Department enforced prerequisite: restricted to graduate students only and introductory geology and introductory oceanography or atmospheric science.

Additional Information: Departmental Category: Graduate Course

GEOL 5474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and MUSM 5474

Additional Information: Departmental Category: Graduate Course

GEOL 5550 (3) Petroleum Reservoir Characterization and Modeling

Introduces concepts and methods of petroleum reservoir analysis and 3-D reservoir modeling using subsurface data (cores, well logs, 3-D seismic) and outcrop analogs. Examines petroleum system, petrophysics (lithology, porosity, permeability, capillary pressure, flow units), and sequence-stratigraphic, facies, and structural controls on reservoir properties, heterogeneity and recovery efficiency. Deterministic and stochastic reservoir modeling methods are addressed.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4550

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5670 (3) Isotope Geology

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4670

Additional Information: Departmental Category: Graduate Course

GEOL 5675 (3) Stable Isotopes in Paleoclimate and Paleoecology

Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4675

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5690 (3) Tectonic History of the Western United States

Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarometry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class.

Requisites: Requires prerequisite courses of GEOL 3120 and PHYS 1110 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Course

GEOL 5700 (1-4) Geological Topics Seminar

Offers seminar studies in geological subjects of special current interest. Primarily for graduate students, as departmental staff and facilities permit.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5701 (2) Super-Problems in Quaternary Climate

Investigates major problems in the study and understanding of Quaternary climate variation, in seminar format. Each year one major topic will be addressed, such as: the physics and chemistry of the Ice Age ocean circulation; the theory and mechanics of glacial/interglacial atmospheric CO₂ change; the origins of the 20, 40, and 100 kyr orbital (Milankovitch) climate cycles. Department enforced prerequisites: introduction geology and climatology or oceanography and paleoclimatology or paleoceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5702 (1) Geomorphology Seminar

Explores the dynamics and forms of the earth's surface through critical reading and discussion of both classical and modern literature.

Repeatable: Repeatable for up to 10.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5703 (1) Seminar in Tectonics

Focuses on a wide variety of topics related to crust, mantle and whole earth tectonics. Published papers from recent peer-reviewed literature are read and discussed. The format and specific topics will vary each semester (e.g., a relatively focused theme or open format) and will in part be determined by the makeup of enrolled students. Department enforced prerequisite: restricted to graduate students only.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5711 (1-3) Igneous and Metamorphic Field Geology

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and GEOL 3020.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5712 (1-3) Structural Field Geology

Methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and GEOL 3020.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5714 (2) Field Geophysics

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic and electrical measurements. Department enforced prerequisite: restricted to graduate students only and GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5715 (1-3) Field Techniques in Surficial Geology and Geohydrology

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring steam flows, interpreting aquifer parameters from geophysical measurements and using field data for water budget analysis. Department prerequisite: GEOL 2001 or GEOL 2700.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5716 (1-3) Environmental Field Geochemistry

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters and atmospheric particulates. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and CHEM 1011 and CHEM 1031 or CHEM 1113 or CHEM 1133 and GEOL 3320.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5717 (1-3) Field Seminar in Geology and Tectonics

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and at least one of the following: GEOL 3120 or GEOL 3320 or GEOL 3430.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5725 (1-4) Field Based Special Topics in Geoscience

Explores selected geological subjects of special interest in a field setting.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4725

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5800 (3) Planetary Surfaces and Interiors

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5800

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres - past and future.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5810 and ASTR 5810

Additional Information: Departmental Category: Graduate Course

GEOL 5820 (3) Origin and Evolution of Planetary Systems

Considers the origin and evolution of planetary systems, including protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5820 and ATOC 5820

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and ASTR 5830

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5835 and ATOC 5835

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5840 (1-3) Independent Study-Quaternary Geology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5841 (1-3) Independent Study-Economic Geology**Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5842 (1-3) Independent Study-Petrology****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5843 (1-3) Independent Study-Sedimentology****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5844 (1-3) Independent Study-Structure/Tectonics****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5845 (1-3) Independent Study-Geochemistry****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5846 (1-3) Independent Study-Geophysics****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5847 (1-3) Independent Study-Hydrology****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5849 (1-3) Independent Study-Paleontology****Repeatable:** Repeatable for up to 7.00 total credit hours.**Additional Information:** Departmental Category: Graduate Course**GEOL 5851 (1-3) Independent Study-Sediment Petrology****Repeatable:** Repeatable for up to 7.00 total credit hours.**Additional Information:** Departmental Category: Graduate Course**GEOL 5852 (1-3) Independent Study--GIS Applications in Quaternary Geosciences**

Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.

Additional Information: Departmental Category: Graduate Course**GEOL 6050 (3) Space Instrumentation**

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and ASEN 6050**Grading Basis:** Letter Grade**Additional Information:** Departmental Category: Graduate Course**GEOL 6060 (4) Petroleum Geology of Turbidite Systems**

Covers the exploration and production aspects of petroleum submarine fans and turbidite systems.

Requisites: Requires prerequisite course of GEOL 6330 (minimum grade B).**Additional Information:** Departmental Category: Graduate Course**GEOL 6310 (3) Sedimentary Petrology**

Covers interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Department enforced requisite, restricted to graduate students only. Department enforced prerequisites: GEOL 3010 and GEOL 3020 and GEOL 3430.

Additional Information: Departmental Category: Graduate Course**GEOL 6330 (4) Applied Sequence Stratigraphy and Basin Analysis**

Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop and their applications to basin analysis in petroleum exploration.

Department enforced prerequisite: restricted to graduate students only and introductory undergraduate physics and sedimentology/stratigraphy.

Additional Information: Departmental Category: Graduate Course**GEOL 6610 (3) Earth and Planetary Physics 1**

Offered alternate years. Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6610 and PHYS 6610**Additional Information:** Departmental Category: Graduate Course**GEOL 6620 (3) Earth and Planetary Physics 2**

Offered alternate years. Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6620 and PHYS 6620**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 6630 (3) Earth and Planetary Physics 3**

Offered alternate years. Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6630 and PHYS 6630**Additional Information:** Departmental Category: Graduate Course**GEOL 6650 (1-3) Seminar in Geophysics**

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6650 and PHYS 6650**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.**Additional Information:** Departmental Category: Graduate Course**GEOL 6670 (2) Geophysical Inverse Theory**

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations. Department enforced prerequisites: a course in calculus and a course in computer programming (any language).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6670**Additional Information:** Departmental Category: Graduate Course**GEOL 6940 (1) Master's Degree Candidate****Requisites:** Restricted to graduate students only.**Grading Basis:** Pass/Fail**Additional Information:** Departmental Category: Graduate Course

GEOL 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 6960 (3) Plan II Master's Research

Additional Information: Departmental Category: Graduate Course

GEOL 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

Geology - Master of Science (MS)

The department's research areas are categorized into four broad research interest groups:

- economic resources / stratigraphic sciences / paleontology
- geodynamics / geophysics / geochemistry / mineral physics / petrology
- global change / surficial processes / quaternary science
- hydrogeosciences

It is highly recommended that students locate a faculty member whose research interests most closely match their own.

Requirements

Admission & Prerequisites

All students applying for admission must take the Graduate Record Examination. Results of this examination are used both for determining admittance and for initial academic counseling. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

Entering students normally have completed at least 24 credit hours of basic courses in geological science and two semesters each of chemistry, physics and calculus. In some cases, exceptional undergraduate preparation in other fields of science, mathematics or engineering may substitute for part of the 24 hours in geological science.

Program Requirements

Candidates for the master's degree in geological sciences must complete at least 30 credit hours of graduate course work either with a thesis (Plan I) or without a thesis (Plan II).

A maximum of 6 credit hours may be completed at the 3000- or 4000-level at the discretion of the associate chair for graduate studies and the principle advisor.

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the department's Information for Prospective Graduate Students (<http://www.colorado.edu/GeolSci/geologygraduatestudents.htm>) webpage.

Plan I: Thesis Option

Students must complete least 24 credit hours at the 5000-level or above, including a minimum of 4, but no more than 6, master's thesis credit hours.

Plan II: Non-thesis Option

Students must complete least 24 credit hours at the 5000-level or above, including at least 3 credit hours of Plan II Master's Research (GEOL 6960) under the supervision of the advisory committee.

Geology - Doctor of Philosophy (PhD)

The department's research areas are categorized into four broad research interest groups:

- economic resources / stratigraphic sciences / paleontology
- geodynamics / geophysics / geochemistry / mineral physics / petrology
- global change / surficial processes / quaternary science
- hydrogeosciences

It is highly recommended that students locate a faculty member whose research interests most closely match their own.

The Department of Geological Sciences participates in the interdepartmental PhD program in geophysics and hydrologic sciences.

Requirements

Admission & Prerequisites

All students applying for admission must take the Graduate Record Examination. Results of this examination are used both for determining admittance and for initial academic counseling. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

Entering students normally have completed at least 24 credit hours of basic courses in geological science and two semesters each of chemistry, physics and calculus. In some cases, exceptional undergraduate preparation in other fields of science, mathematics or engineering may substitute for part of the 24 hours in geological science.

Program Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in course work numbered 5000 or above, of which at least 20 must be taken at CU Boulder. In addition to course work, candidates must take a total of at least 30 credit hours of doctoral dissertation (GEOL 8990), with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed.

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the department's Information for Prospective Graduate Students (<http://www.colorado.edu/GeolSci/geologygraduatestudents.htm>) webpage.

Geophysics - Doctor of Philosophy (PhD)

The interdisciplinary doctoral program in geophysics encourages students with a variety of undergraduate backgrounds to pursue graduate study in the physics of the Earth, with special emphasis on the interior of the planet. Students specialize in one of the subfields of geophysics while gaining a broad, general background in the discipline and in-depth

education in the relevant aspects of the parent fields of geology, physics and engineering.

Students enter the program by applying for admission to one of the following departments:

- aerospace engineering sciences
- astrophysical and planetary sciences
- civil, environmental and architectural engineering
- electrical and computer engineering
- geography
- geological sciences
- mechanical engineering
- physics

Upon satisfactory performance on the doctoral preliminary examination given by the home department, the student may formally apply for admission to the geophysics doctoral program.

The program is administered by the geophysics graduate program committee, which includes representatives from each of the participating departments. The comprehensive examination and the dissertation defense are directed by this committee, with a faculty member of the home department normally chairing these procedures.

For more information, visit the Geophysics Studies Program (<http://www.colorado.edu/geophysics>) website.

Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in course work numbered 5000 or above, of which at least 20 must be taken at CU Boulder.

In addition to course work, candidates must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed.

Required Courses and Semester Credit Hours

Required Courses

ASTR/GEOL/ PHYS 6610	Earth and Planetary Physics 1	3
ASTR/GEOL/ PHYS 6620	Earth and Planetary Physics 2	3
ASTR/GEOL/ PHYS 6630	Earth and Planetary Physics 3	3
ASTR 6650	Seminar in Geophysics	1-3
One semester of graduate-level applied mathematics from the following:		3
PHYS/MATH 5030	Intermediate Mathematical Physics 1	
APPM 5350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	
ASTR 5540	Mathematical Methods	
MCEN 5020	Methods of Engineering Analysis 1	
GEOL 8990	Doctoral Dissertation	30

Electives

Additional courses compatible with the student's research interests 17-15 to complete the 60-credit minimum.

Total Credit Hours 60

For a list of approved elective courses, visit the Geophysics PhD Program (<http://www.colorado.edu/geophysics/academics.html>) webpage.

Geophysics - Graduate Certificate

The geophysics graduate certificate offers a coherent curriculum in geophysics that can complement and supplement a student's regular degree program and encourages multi-disciplinary education in the area of geophysics. The geophysics certificate program allows students to obtain recognition for their accomplishments in geophysics without having to switch into the geophysics degree program. This program was approved by the CU-Boulder Graduate School in spring 2002.

Admission Requirements

A student wishing to be considered for a Certificate in Geophysics must first be admitted as a graduate student into one of the participating graduate departments (ASEN, APS, CEAE, ECEN, GEOG, GEOL, MCEN, PHYS). Students from outside the participating departments can apply for entry to the geophysics certificate program by submitting a letter addressed to the Geophysics Graduate Program Committee. A student must have a course background that includes mathematics through three semesters of calculus and four undergraduate science or engineering courses.

Requirements for Certificate

Completion with a grade of B or better of a total of three geophysics core courses (at least one from the EPP sequence) and one credit hour for the Seminar in Geophysics.

Completion of degree requirements for graduate degree within the student's home department, with a thesis on a topic that uses geophysics in some way, including the successful defense of this thesis before a committee that includes at least one of the geophysics certificate faculty members.

Curriculum

All students must take at least three geophysics core courses, and the Seminar in Geophysics, listed below. At least one of the three geophysics core courses must be from the earth and planetary physics (EPP) series, and at least one of the remaining core classes taken must be from outside the student's home department. Most geophysics core courses are offered once every two years.

A Certificate in Geophysics will be awarded upon the student's completion of degree requirements in their home department. Upon request from a student, the program director and the student's advisor will determine whether a student has met the requirements for the certificate and will generate a letter to the appropriate department head and dean. The certificate is not intended as a substitute for a degree and will be awarded only upon completion of a graduate degree.

Core Courses

Course List

ASTR/GEOL/ PHYS 6610	Earth and Planetary Physics 1
ASTR/GEOL/ PHYS 6620	Earth and Planetary Physics 2

ASTR/GEOL/ PHYS 6630	Earth and Planetary Physics 3
ASTR/GEOL/ PHYS 6650	Seminar in Geophysics
APPM 7300	Nonlinear Waves and Integrable Equations
ASEN 5050	Space Flight Dynamics
ASEN 5090	Introduction to Global Navigation Satellite Systems
ASEN 5245	Radar and Remote Sensing
ASEN 5307	Engineering Data Analysis Methods
ASEN 5335	Aerospace Environment
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications
ASEN 6519	Special Topics
ASTR 5140/ PHYS 5141	Astrophysical and Space Plasmas
ASTR/PHYS 5150	Introductory Plasma Physics
ASTR 5300	Introduction to Magnetospheres
ASTR 5400	Introduction to Fluid Dynamics
ASTR/GEOL 5800	Planetary Surfaces and Interiors
ASTR/ATOC/ GEOL 5820	Origin and Evolution of Planetary Systems
CVEN 5131	Continuum Mechanics and Elasticity
CVEN 5718	Mechanics and Dynamics of Glaciers
CVEN 5768	Introduction to Rock Mechanics
CVEN 6595	Earthquake Engineering
GEOL 5110	Geomechanics
GEOL 5550	Petroleum Reservoir Characterization and Modeling
GEOL 5690	Tectonic History of the Western United States
GEOL 5714	Field Geophysics
GEOL/PHYS 6670	Geophysical Inverse Theory
MCEN 5023	Solid Mechanics 1

Hydrologic Sciences - Graduate Certificate

The CU Boulder hydrologic sciences graduate program focuses on quantitative studies of water in the environment including its role in geologic and biogeochemical processes, ecosystem functions and global elemental cycling. The program is interdisciplinary and interdepartmental. It is intended for science and engineering graduate students, both currently enrolled and prospective. It allows students to obtain recognition for their accomplishments in hydrologic sciences and demonstrates the quantitative multidisciplinary education desired by many prospective employers.

Students can choose to enroll for a full hydrologic sciences PhD degree or obtain a hydrologic sciences graduate certificate while concurrently obtaining a master's or doctoral degree in an associated academic department. Prerequisites and course requirements are identical for the PhD degree and graduate certificate.

Students are members of the broader CU Boulder geophysical sciences program, which has two specialization options: solid-Earth geophysics and hydrologic sciences. All hydrologic sciences students are admitted through one of the participating departments: civil, environmental and architectural engineering; ecology and evolutionary biology; environmental studies; geography; or geological sciences.

Students may apply for admission either concurrently with their application to one of the participating departments or after admission by a department. The program is designed to encourage students with a variety of undergraduate backgrounds to enter the field. Nevertheless, all students in the program must have a substantial background in math and physics, including fluid dynamics. At the time of acceptance, the student will be informed of any undergraduate deficiencies that they will need to address within the first year in the program.

Most hydrologic sciences students conduct research with participating departments, research institutes and centers (e.g., INSTAAR), or partner government agency labs in the Boulder area (e.g., USGS and NOAA). Primary supervision of the student's research may be provided by any faculty member approved by the department.

Additional information is available on the program's About Us (<http://hydrosciences.colorado.edu/about>) webpage or by contacting:

Graduate Coordinator
Hydrologic Sciences Graduate Program
University of Colorado Boulder
450 UCB
Boulder, CO 80309-0450
hydrgrd@colorado.edu

Completion with a grade of B or better in all Hydrologic Sciences required courses (and any courses taken to remedy deficiencies)

Completion of degree requirements for graduate degree within the student's home department.

Additional requirements for Hydrologic Sciences Graduate Certificate:

Thesis topic includes substantial use of hydrologic science.
Thesis committee includes at least one Hydrologic Sciences faculty member.

Students are referred to the document "Graduate School Checklist for Graduation and Other Helpful Information" and the University Catalog for general information on requirements for their degree. In case of a conflict between those documents and the requirements stated here, the rules of the Graduate School apply.

Germanic and Slavic Languages and Literatures

As a department of foreign languages, literatures and cultural studies, the Department of Germanic and Slavic Languages and Literatures prepares students for life and careers in an increasingly global world. Our programs in German, Russian and Nordic Studies enable students to combine their language training with interdisciplinary study of the regions where their language is spoken. The cultural legacies of the Germanic and Slavic countries continue to shape fields such as literature, art, music, film, philosophy and political science.

Course codes for these programs are GRMN, GSSL and RUSS.

Master's Degrees

- German Studies - Master of Arts (MA) (p. 1007)
- Russian Studies - Master of Arts (MA) (p. 1008)

Doctoral Degree

- German Studies - Doctor of Philosophy (PhD) (p. 1009)

Certificate

- Critical Theory - Graduate Certificate (p. 1011)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

GSL 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Germanic and Slavic Courses

RUSS 5010 (4) Advanced Russian Seminar

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4010

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5020 (4) Advanced Russian Seminar 2

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4020

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5050 (3) Professional Russian

Introduces graduate and advanced undergraduate students to various stylistic registers of Russian (business, politics, the Internet, TV, etc.). Develops new vocabulary and idiomatics, with a special focus on fluency of speech and written communication skills. Along with language training, the course offers an immersion into the world of contemporary Russian media, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4050

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Russian

RUSS 5110 (3) Slavic Culture and Society

Examines important ideologies and myths in Slavic societies, with emphasis on contemporary movements and their reinterpretation of history. Acquaints students with major tools for study of cultures of Eastern Europe and the post-Soviet states: research methods, bibliography, transliteration, critical thinking and writing skills. Required for Russian MA.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5120 (3) Russia after Communism: Post-Soviet Politics and Culture

Explores the process of the re-invention and re-shaping of the Russian national identity after the collapse of the communist society. Topics will include the formation of neoconservative and neo-imperialist agenda (Ukraine crisis), growth of the anti-western attitudes and the protest movement against Putin's politics. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4120

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5210 (3) Topics in Russian Culture

Selected topics in Russian literature, film, art and music. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4210

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5230 (3) Russian Cultural Idioms

Focuses on the critical analysis of the Russian cultural discourse through Russian idioms. Taught in Russian. Formerly GSLL 5230.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4230

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5352 (3) Russian Novel: Theory and Practice

Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. Formerly GSLL 5352.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5401 (3) The Russian Jewish Experience

Examines the experience of Russian Jews from the late 19th century to the present through fiction and films dealing with challenges of co-existence of Jews and their neighbors; Bolshevik Revolution, Stalinism, Holocaust, post-Stalin period; place of Jews as individuals and a minority within Russian and Soviet society; and emigration to America and elsewhere at the turn of the century. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4401 and JWST 4401

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5431 (3) Dostoevsky

Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker and the greatest crime novelist in the world. Taught in English. Formerly GSLL 5431.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4431

RUSS 5441 (3) Tolstoy

Examines the development of Tolstoy's thought and literary style through study of one of his novels and short works from different periods of Tolstoy's writing. Taught in English. Formerly GSLL 5441.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4441

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5451 (3) Chekhov

Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Formerly GSLL 5451.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4451

RUSS 5471 (3) Women in 20th-21st Century Russian Culture

Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English. Formerly GSLL 5471.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4471 and WGST 4471

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5481 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present

Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English. Formerly GSLL 5481.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4481 and IAFS 3621

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5830 (3) Topics in Literature and History

Taught in English. Formerly GSLL 5830.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5841 (3) History of Modern Russian Drama

Examines Russian plays of the 20th and 21st centuries (from Chekhov to contemporary authors) in the context of the Western theatre theory. Surveys most influential directorial styles from Stanislavsky's "method" to contemporary verbatim theatre. All readings are in English. Taught in English. Formerly GSLL 5841.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4841

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5851 (3) Critical Thinking: Russian Film and Society

Through structured discussions, selected readings and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Taught in English. Formerly GSLL 5851.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4851

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5861 (3) Absurd and Supernatural in Russian Literature

Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharmis, Bulgakov, Siniavskii, Petrushevskaiia and Pelevin, within contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams and Romanticism. Taught in English. Formerly GSLL 5861.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4861

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5900 (1-6) Independent Study

See department for registration information. Department enforced requisite: graduate standing or instructor consent.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Russian

RUSS 6940 (1-3) Master's Degree Candidate

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Russian

RUSS 6950 (1-6) Master's Thesis in Russian

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Russian

German Studies - Master of Arts (MA)

Students wishing to pursue the interdisciplinary master's in German should read the Master's Degree Requirements (p. 866) section of this catalog carefully.

Concurrent Degree Program BA/MA in German Studies

The concurrent BA/MA degree in German Studies recognizes the need for master's-level training upon entering the job market in a variety of sectors that call for highly advanced proficiency in the German language, knowledge of German-speaking central Europe and its cultures, and the skills afforded to BA and MA graduates in the humanities (research, analysis, interpretation, translation, communication).

The degree gives highly motivated BA students the opportunity to earn an MA degree using an accelerated undergraduate program in combination with a fifth year of study. Applications can be obtained in the Germanic and Slavic office (McKenna 129). It is recommended that applications be turned in by the spring semester of the sophomore year.

Students must have an overall 3.25 GPA to apply to the program, and should have completed most of their MAPS/core requirements by the end of their sophomore year. No GRE is required.

For more information, visit the Concurrent BA/MA Degree in German Studies (<http://www.colorado.edu/gsl/german/undergraduate/concurrent-bama-degree-german-studies>) webpage. (<http://www.colorado.edu/gsl/german/undergraduate/concurrent-bama-degree-german-studies>)

Dual Degree Program MBA/MA in German Studies

To support the university's mission of advancing knowledge across disciplines, the Leeds School of Business and the Department of Germanic and Slavic Languages and Literatures offer a dual degree, Master of Business Administration and Master of Arts in German Studies. In most cases, students should be able to complete the dual degree in three years with a total of 70 credit hours.

Prospective students must apply to and meet the application and admission requirements for each program separately. See the Department of Germanic and Slavic Languages and Literatures (<http://www.colorado.edu/gsl/german/graduate>) website to apply to the German Studies MA program, and the Leeds School of Business (<http://www.colorado.edu/business/mba>) website to apply to the MBA program.

Requirements Program Requirements

Students applying to the MA degree are expected to have a BA or equivalent in German or BA-level proficiency in German with a BA in a related field, and should have a general knowledge of the German-speaking countries' literature, history and culture.

The master's degree requires either 24 credit hours of approved course work and a master's thesis (6 credit hours) or 30 credit hours of course work without thesis, and reading knowledge of one modern foreign language in addition to German and English.

All German MA students must take Theory and Practice of German Studies (GRMN 5010). All German teaching assistants must also take Applied Linguistics and Foreign Language Teaching Methodology (GRMN 5020). For specific requirements, visit the department's German MA (<http://www.colorado.edu/gsl/german/graduate/ma>) webpage.

Degree Plans

Plan I: Thesis Option (Standard Option)

The thesis option requires 30 credit hours, including 24 hours of course work and 6 thesis hours. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study course work may be taken with the approval of the associate chair of graduate studies.

Plan II: Non-Thesis Option

The non-thesis option requires 30 credit hours of course work. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study course work may be taken with the approval of the associate chair of graduate studies.

Language Requirement

Students must have reading knowledge of a second foreign language in order to receive their MA in German. This requirement may be fulfilled by two college-level semesters of a foreign language, an approved study abroad program or a course in reading knowledge of a foreign language. Students should consult with the associate chair of graduate studies at the beginning of their first semester to discuss procedures. The department recommends that this requirement be fulfilled in the first year of study.

Russian Studies - Master of Arts (MA)

The department offers an interdisciplinary professional MA in Russian studies focusing on Russian language proficiency, Russian culture and interrelations between Russian history, politics and culture in the 19th through the 21st centuries. The faculty's interdisciplinary strengths include literature, cinema, folklore, literary/cultural theory, cultural studies, gender studies, sociolinguistics, pedagogy, Jewish Studies, minority studies and nationalism.

The faculty works closely with students to design their own course of study. Some Russian MA students receive a teaching assistantship and tuition waiver.

For contact information and more general information on the MA in Russian studies, visit the Russian Program (<http://www.colorado.edu/gsl/russian-program>) website or email gsl@colorado.edu.

Concurrent Degree Program BA/MA in Russian Studies

Highly motivated undergraduates majoring in Russian studies at CU Boulder have the opportunity to enter a BA/MA program, thereby earning both the BA and the MA in five years. The concurrent degree program offers a unique academic credential designed to produce skilled graduates for a variety of occupations.

In most cases, students must make written application no later than April 1 of the sophomore year. A minimum GPA of 3.00 for all Russian

studies courses is required, as well as two letters of recommendation indicating strong potential for advanced, intensive work in Russian. BA/MA students are expected to take graduate courses in the fourth and fifth years only. Students should have completed most of their MAPS/core requirements by the end of the sophomore year. Only CU Boulder students may apply.

For more information, see the Concurrent BA/MA Degree in Russian Studies (<http://www.colorado.edu/gsl/russian/undergraduate/concurrent-bama-degree-russian-studies>) webpage.

Requirements

Course Requirements

Russian MA students may take up to 12 credit hours in an outside area. CU graduate students frequently choose business, political science, geography, education, history, linguistics, film studies, Jewish studies, religious studies, fine arts, and theater and dance, but students may pursue other options. All outside area courses must be approved by the associate chair of graduate studies.

Upon approval of the Associate Chair of Graduate Studies, students may take up to six credit hours of 3000- or 4000-level courses toward their MA degree.

Students interested in independent study should obtain an informational sheet and an Independent Study Contract from the department. Once the contract is approved by the chair, a staff member will enroll the student in the course. MA students may not take more than a total of 6 hours of independent study.

Transfer credit from accredited institutions is accepted by CU Boulder only after approval by the associate chair of graduate studies and the Graduate School. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. MA students are allowed a maximum of 9 hours of transfer credit.

Degree Plans

Plan I: Thesis Option

Students must complete at least 31 credit hours, including 27 hours of course work and 4 thesis hours. Students must submit a thesis and pass a one-hour oral defense.

Required Courses

RUSS 5010	Advanced Russian Seminar ¹	4
RUSS 5020	Advanced Russian Seminar 2 ¹	4
RUSS 5110	Slavic Culture and Society	3
RUSS 5120	Russia after Communism: Post-Soviet Politics and Culture	3
RUSS 6950	Master's Thesis in Russian	4

Electives

Complete additional courses to fulfill the 31-credit minimum. Options include:

RUSS 5050	Professional Russian ²	
RUSS 5230	Russian Cultural Idioms ²	
RUSS 5352	Russian Novel: Theory and Practice	
RUSS 5401	The Russian Jewish Experience	
RUSS 5431	Dostoevsky	
RUSS 5441	Tolstoy	

RUSS 5451	Chekhov	
RUSS 5471	Women in 20th-21st Century Russian Culture	
RUSS 5481	Rogues to Revolutionaries: Russian Rebels, Past and Present	
RUSS 5830	Topics in Literature and History	
RUSS 5841	History of Modern Russian Drama	
RUSS 5851	Critical Thinking: Russian Film and Society	
RUSS 5861	Absurd and Supernatural in Russian Literature	
RUSS 5900	Independent Study	
Total Credit Hours		31

¹ Native speakers are exempt from RUSS 5010 and RUSS 5020, and should contact the associate chair of graduate studies for alternate course work.

² These courses are strongly recommended. All students must pass the Russian language proficiency exam, consisting of written and oral components, during their final semester.

Plan II: Non-Thesis Option

Students must complete at least 30 credit hours of course work, then pass a written MA final exam and a one-hour oral defense.

Required Courses

RUSS 5010	Advanced Russian Seminar ¹	4
RUSS 5020	Advanced Russian Seminar 2 ¹	4
RUSS 5110	Slavic Culture and Society	3
RUSS 5120	Russia after Communism: Post-Soviet Politics and Culture	3

Electives

Complete additional courses to fulfill the 30-credit minimum. Options 16 include:

RUSS 5050	Professional Russian ²	
RUSS 5230	Russian Cultural Idioms ²	
RUSS 5352	Russian Novel: Theory and Practice	
RUSS 5401	The Russian Jewish Experience	
RUSS 5431	Dostoevsky	
RUSS 5441	Tolstoy	
RUSS 5451	Chekhov	
RUSS 5471	Women in 20th-21st Century Russian Culture	
RUSS 5481	Rogues to Revolutionaries: Russian Rebels, Past and Present	
RUSS 5830	Topics in Literature and History	
RUSS 5841	History of Modern Russian Drama	
RUSS 5851	Critical Thinking: Russian Film and Society	
RUSS 5861	Absurd and Supernatural in Russian Literature	
RUSS 5900	Independent Study	
Total Credit Hours		30

¹ Native speakers are exempt from RUSS 5010 and RUSS 5020, and should contact the associate chair of graduate studies for alternate course work.

² These courses are strongly recommended. All students must pass the Russian language proficiency exam, consisting of written and oral components, during their final semester.

German Studies - Doctor of Philosophy (PhD)

The interdisciplinary PhD in German studies is designed so that students can complete their course work and their dissertation in four years. The program welcomes applicants who wish to pursue careers in government, business and the nonprofit sector, in addition to applicants interested in an academic career.

In Germany, Austria, Switzerland and many other European countries, it is a strongly held conviction that a doctorate demonstrates to potential employers intellectual independence, superior research and writing skills, the perseverance and ingenuity to complete an original piece of scholarship and deep familiarity with a different culture. These qualities are equally valuable in the 21st-century American economy, and indeed in the global marketplace.

The German Studies PhD program provides intensive and personalized mentoring, directed reading advice and clinics devoted to dissertation and conference-paper writing, digital and archival research, oral presentation and interview preparation. Our PhD strongly emphasizes interdisciplinary work within a secondary concentration area of the student's choice, and includes one year spent abroad at CU Boulder's partner universities of Göttingen and Regensburg or at other leading institutions in the German-speaking world. A wide range of graduate-level course offerings is designed to ensure content coverage and to move research projects into publishable scholarship. The expanded graduate faculty includes scholars in disciplines such as political science, comparative literature, Jewish studies, business and library science.

For more information, contact the department at gsl@colorado.edu or visit the German Program (<http://www.colorado.edu/gsl/german-program>) webpage.

Requirements

Academic Preparation

If a student has gaps in their academic preparation, the department may require them to take additional courses.

Course Requirements

The PhD program requires 30 hours of course work at the 5000-level or above. Students who have completed an MA degree may be able to apply up to 21 hours toward this requirement.

In addition to course work, students must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed. Students must be enrolled in a minimum of 5 dissertation hours during the semester in which they defend their dissertation (including summer session, if the defense is held over the summer).

Transfer credit from accredited institutions may be accepted by CU Boulder after approval by the graduate associate chair. PhD students are allowed a maximum of 21 hours of transfer credit. Thesis hours may not be transferred. All courses accepted for transfer credit must be graduate-level courses and must have a grade of B or above. Course work completed more than five years prior to acceptance to the PhD program will be evaluated by the department with regard to current relevance and applicability to the degree requirements. Credit may not be transferred

until the student has completed at least six credits of CU graduate-level course work as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Thesis hours do not count toward the required 30 hours and cannot be used as transfer credit.

Required Courses and Semester Credit Hours

Required Courses

GRMN 5010	Theory and Practice of German Studies	3
GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology	3
GRMN 7010	Writing Colloquium	1-3

Electives

At least one course with a focus on pre-20th-century content:		3
GRMN 5210	Seminar: The Age of Enlightenment	
GRMN 5220	Seminar: Topics in the Age of Goethe	
GRMN 5310	Seminar: Topics in the 19th Century	
At least 6 credit hours in an interdisciplinary area of concentration. ¹		6
Additional courses to meet 30-credit minimum.		14-12
Total Credit Hours		30

¹ Students design this concentration in close consultation with their faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Examples of interdisciplinary concentrations include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics and international affairs.

Language Requirement

In addition to demonstrating a high level of proficiency in German, you must demonstrate moderate proficiency in an additional foreign language. You can do this by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

- completing a fourth-semester (second-semester sophomore) college language course with a grade of "pass,"
- completing a proficiency exam administered at CU, or
- presenting other evidence of moderate proficiency to the graduate associate chair.

Students should consult with the graduate associate chair at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before or during the semester in which the student advances to candidacy.

Comprehensive PhD Examination

The comprehensive exam tests a student's knowledge in areas of specialization appropriate for their anticipated dissertation topic. The exam takes place in the second or third year, depending on whether the student entered the program with a BA or MA and, if the latter, how many course work credits were applied from the MA. Students take the exam in the spring semester. The exam is based on a reading list the student assembles in close consultation with the members of their committee. It consists of a take-home written exam followed by a two-hour-long oral examination that concentrates on the written exam, but may also address texts and topics on the reading list that are not covered in the written exam. The composition of the comprehensive exam committee follows

the guidelines of the prospectus & dissertation committee composition below.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsl/ comprehensive-examination-and-dissertation>) webpage.

Prospectus & Dissertation Committee

After successful completion of the comprehensive examinations, the student forms a dissertation committee and prepares a dissertation prospectus, to be followed by its defense a week later. The dissertation committee should be finalized and a dissertation prospectus submitted no later than the end of the fifth week of the semester following the successful completion of the comprehensive examination.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsl/ comprehensive-examination-and-dissertation>) webpage.

Dissertation

The student formally begins to write their dissertation after successfully completing the comprehensive exam and defending the dissertation prospectus. The student should work closely with their dissertation advisor and committee members while writing the dissertation. In particular, students are advised to submit draft copies of each chapter to all members of their committee. Any subsequent changes to the student's "timeline for completion" need to be circulated to the committee for approval. A final draft must be submitted to the committee members at least three weeks before the defense.

Students are required to register continuously for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive exam and extending through the semester in which the student successfully defends their dissertation.

A student who fails to register continuously for dissertation credit hours after passing the comprehensive exam must retake and pass the exam, and validate any course work more than five years old, to regain status as a student in good standing with the graduate school.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsl/ comprehensive-examination-and-dissertation>) webpage.

Recommended Course Work

Internships

Students are strongly encouraged to complete at least one internship during their doctoral studies. Three hours of internship credit can count toward the 30 required hours of course work for the PhD. GSLL graduate students have completed internships with businesses, nonprofit agencies and schools, and at locations including Colorado, Germany and Washington, DC. Internship offerings vary by semester. To enroll in a graduate internship, see the associate chair for graduate studies.

Graduate Exchange Opportunities

Students are recommended to spend one academic year abroad during their doctoral studies, on either a CU graduate exchange or an exchange funded by an agency such as the German Academic Exchange Service (DAAD) or the Fulbright Commission. For more information concerning DAAD, Fulbright and other grants, see the department's Scholarships & Awards (<http://www.colorado.edu/gsl/scholarships-awards>) webpage.

In partnership with CU's Office of International Education, GSLL offers funded graduate exchanges at the University of Göttingen and the University of Regensburg. These exchanges offer matriculation at the host institution for one academic year (10 months), plus a monthly stipend for living expenses. One position is offered per year at each institution. To qualify for an exchange, the student must demonstrate fluency in German and evidence of superior academic work.

Students interested in either program should notify the graduate associate chair by Feb. 1 for study abroad the following academic year and formally apply by Feb. 15.

Graduate Certificate Programs

Students are also encouraged to consider completing a graduate certificate program at CU. GSLL offers a critical theory graduate certificate (p. 1011). Other graduate certificates include the women and gender studies graduate certificate (p. 1119) and the comparative ethnic studies graduate certificate (p. 983).

Critical Theory - Graduate Certificate

This certificate offers students a background in philosophical foundations of critical theory. Drawing on disciplines such as philosophy, psychoanalysis, Marxism, literary criticism and sociology, critical theory develops analytical tools for describing and evaluating modern society and cultural production.

Students who are currently enrolled in a graduate disciplinary degree or a professional degree program are encouraged to apply for the Graduate Certificate in Critical Theory early in their graduate career.

For more information, visit the Department of Germanic & Slavic Languages & Literatures (<http://www.colorado.edu/gssl>) website.

Requirements

A total of twelve credit hours are required for completion of the certificate.

Six credit hours of required course work, composed of these two core graduate courses:

GRMN 5030	Foundations of Critical Theory
GRMN 5051	Critical Theory of the Frankfurt School

This sequence of courses is designed to provide the intellectual history and philosophical foundations for contemporary research directions in critical theory. Neither of these courses may be taken as an independent study.

Two additional elective courses in theory. Some of the elective courses recognized by the program include:

ANTH 5785	Advanced Seminar in Cultural Anthropology	3
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology	3
ANTH 7620	Seminar: Ethnography and Cultural Theory	3
ARTF 5004	Topics in Film Theory	3
ARTF 5604	Colloquium in Film Aesthetics	3
ARTH 6929	Seminar: Theories of Art History	3
COMM 6010	Communication Research and Theory	3
COMM 6320	Rhetorical Theory	3
COMM 6360	Social and Cultural Theory	3
ENGL 5019	Survey of Contemporary Literary and Cultural Theory	3
ENGL 7489	Advanced Special Topics	3

GEOG 5100	Special Topics: Geography	1-4
GEOG 5632	Development Geography	3
GEOG 6742	Seminar: Cultural Geography	3
HIST 6414	Readings in European Intellectual History	3
HIST 6546	Readings in Cultural History and Theory	3
HIST 7326	Seminar: U.S. Intellectual History	3
MDST 6071	Critical Theories of Media and Culture	3
LING 6320	Linguistic Anthropology	3
LING 7320	Narrative and Identity	3
LING 7350	Language and Gender in Cultural Perspective	3
LING 7360	Language and Sexuality	3
LING 7420	Syntactic Theory	3
MDST 6071	Critical Theories of Media and Culture	3
PHIL 5110	Contemporary Moral Theory	3
PHIL 5200	Contemporary Political Philosophy	3
PHIL 5300	Philosophy of Mind	3
PHIL 5490	Philosophy of Language	3
PSCI 7004	Seminar: Political Theory	3
SOCY 5201	Graduate Seminar in Sociological Theory	3
SOCY 7036	Feminist Theory	3
SPAN 5130	Seminar: Critical Approaches to Hispanic Literature	1-3
WGST 6090	Feminist Theories	3

If you would like to substitute any other course for the electives, please contact the Director of the program. Except for under extraordinary circumstances, independent study courses will not count for the graduate certificate.

Note: Students must obtain a grade of B or above in each course taken toward the certificate.

History

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All history graduate students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

For more information, visit the department's Graduate Students (<http://www.colorado.edu/history/graduate-students>) webpage.

Course code for this program is HIST.

Master's Degree

- History - Master of Arts (MA) (p. 1020)

Doctoral Degree

- History - Doctor of Philosophy (PhD) (p. 1020)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

HIST 5000 (3) Historical Methods: Introduction to the Professional Study of History

Introduces purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5012 (3) Graduate Colloquium in European History

Acquaints students with key works in the literature of European history, and addresses matters of method and interpretation. Department enforced requisite: admission to the graduate program in history.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4013

Requisites: Restricted to graduate students only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5048 (3) Latin American Revolutions

Examines the origins, development and continuing influence of 20th century Latin American revolutionary movements, with a focus on placing these struggles in comparative historical context. Explores various approaches to revolution and the general role of left political formations in Latin America. Specific focus can vary by semester with examples drawn from various Latin American countries, including Mexico, Guatemala, Cuba, Chile and Nicaragua.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4048

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4053

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4061 and CLAS 4061 and CLAS 5061

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5106 (3) Graduate Colloquium in United States History

Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5116 (3) History of U.S. Foreign Relations, 1865-1940

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II. Instructor's permission required for non-history graduate students.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4116

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5125 (3) Early American History to 1763

Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4125

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5126 (3) History of U.S. Foreign Relations Since 1941

Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4126

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5128 (3) The History of Modern Mexico Since 1821

Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4128

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5129 (3) Colloquium in Modern Asian History

Introduces major topics and themes in Asian history. Analyzes readings relating to topics such as imperialism, cultural agency, gender, race, nationalism, decolonization, and revolution.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 5205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4205

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4215

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5222 (3) War and the European State, 1618-1793

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4222

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5223 (3) The French Revolution and Napoleon

Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades of revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4223

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5235 (3) Jacksonian America

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4235

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5248 (3) History of Anglo-American Criminal Justice

Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5303 (3) Venice and Florence during the Renaissance

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5303

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5328 (3) The Modern Middle East, 1600 to the Present

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4328

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5339 (3) Borderlands of the British Empire

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4339

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5343 (3) Spain and Portugal during the Golden Age

Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 5064.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4343

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 5349 (3) Decolonization of the British Empire

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4349

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 5422 (3) World War I in Europe

Examines the origins of World War I; the military, social, and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the twentieth-century world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4422

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5538 (3) History of Modern India

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4538

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of any history coursework.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4544 and JWST 4544

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Topical

HIST 5548 (3) Women in Modern India

Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4548

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities a served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4616 and WGST 4616

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4619 and WGST 4619

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949

Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics a Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4628

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics, and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4636 and WGST 4636

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5638 (3) Contemporary China: Radicalism and Reform, 1949 to Present

Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4638

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5658 (3) China and Islam from the 7th Century to the 20th Century

Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4658

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5728 (3) Modern Japanese History

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4728

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5738 (3) History of Early Modern Japan (1590-1868)

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4738

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4761 and CLAS 4761 and CLAS 5761

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5840 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5841 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5842 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5843 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5844 (1-3) Independent Study-Europe/Topical

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 5845 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5846 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5847 (1-3) Independent Study**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 2**HIST 5848 (1-3) Independent Study****Repeatable:** Repeatable for up to 3.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Specific Regions**HIST 5849 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Comparable and General**HIST 6012 (3) Readings in Modern European History****Requisites:** Restricted to History (HIST) graduate students only.**Additional Information:** Departmental Category: Europe: Modern**HIST 6019 (3) Readings in World History****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Comparable and General**HIST 6020 (3) Modern Empires: Readings in Imperial History**

Introduces major topics and themes in imperial history. Reviews central theories of modern colonial empire, ranging from economic and political motivations for expansion, to the cultural and social impact of empire, to post-colonialism.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 6028 (3) Readings in Modern Latin American History**

Examines major themes and topics in the social, political and economic history of Latin America. Possible topics include nationalism and state-building, neocolonialism, revolution and reaction, race, and gender.

Requisites: Restricted to graduate students only.**Recommended:** Prerequisite HIST 5128.**Additional Information:** Departmental Category: World Areas: Specific Regions**HIST 6030 (3) Readings: Frontiers and Borderlands in the Americas**

Introduces classic and recent scholarship on frontiers and borderlands in the Americas. Chronological focus will vary by semester, from contact through twentieth century. A hemispheric approach encourages comparative insights about topics such as colonialism and ecological change, war and violence, indigenous resistance, acculturation, ethnogenesis, and evolving ideas about race, gender, and identity at the margins of empires and nation-states.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 6109 (3) Readings in Asian History**

Explores a specific theme in Asian History in depth. Topic may vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.**Requisites:** Restricted to graduate students only.**Grading Basis:** Letter Grade**Additional Information:** Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 6113 (3) Readings in English History to 1714**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Specific Countries**HIST 6115 (3) Readings in American Colonial History****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Chronological Periods**HIST 6116 (3) Readings in American Diplomatic History****Requisites:** Restricted to graduate students only.**Recommended:** Requisite undergraduate work in American history.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 6123 (3) Readings in English History Since 1688****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Specific Countries**HIST 6150 (3) Critical and Theoretical Issues in Museums**

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and ARTH 6150 and ANTH 6150**Requisites:** Requires prerequisite course of MUSM 5011 (minimum grade D-).**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 6212 (3) Readings in 17th Century Europe****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Modern**HIST 6317 (3) Readings in the American West****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 2**HIST 6326 (3) Readings in United States Intellectual History**

Examines the history of ideas and the social history of intellectuals in American society during the 19th and 20th centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse.

Requisites: Restricted to History (HIST) graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 6329 (3) Readings in Comparative Ethnohistory****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Comparable and General**HIST 6330 (3) History of Sex and Sexuality**

Examines major historical trends in the study of meanings and practices of sex and sexuality. Focuses on emergence and negotiation of sexual matters in circumstances where sex and identity were not coterminous.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Methodological, Comparative, and Global

HIST 6349 (3) Decolonization in Transnational Perspective: The End of the British Empire in S Asia & Middle East

Examines Britain's withdrawal from South Asia and the Palestine mandate. Topics include collaboration, anticolonial resistance, Indian and Palestinian nationalisms, zionism, transcolonial connections, counter insurgency, and partition.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 6410 (3) Readings in Environmental History

Offers historical perspective on the complex and interdependent relationship between human social and cultural institutions and the natural world. Considers interdisciplinary methodologies incorporating history, biology, geography, law, and other disciplines. Formerly HIST 6417.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6413 (3) Readings in Modern German History

Requisites: Restricted to graduate students only.

Recommended: Requisite general background in European history.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 6414 (3) Readings in European Intellectual History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 6420 (3) Memory and History in Transnational Perspective

Engages in debates about historical methods and how the past is represented. Central topics will include memory and the forces of nationalism and war; commemoration and monuments; the role of memory in the construction of race and ethnicity; personal past and cultural remembrance; and the relationships between academic, public, and popular histories.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6427 (3) Readings in African American History

Introduces classic and recent scholarship, and critical issues in African American history, from slavery to the present.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 6511 (3) Readings in Medieval History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 6526 (3) Readings in U.S. Social History, 1880--1940

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6528 (3) Reading in South Asian History

Introduces major topics and themes in South Asian history. Reviews central theories relating to topics such as religion, nationalism, law, gender, colonialism, and literature.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 6546 (3) Readings in Cultural History and Theory

Introduces standard works and recent developments in cultural history. Explores structuralism and post-structuralism, semiotics, social construction, relativism, hegemony, and the idea of postmodernity in the uses of culture as an historical category.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6610 (3) Readings in Gender History

Examines the field of gender history that includes an understanding of women's and/or men's experience as lived and socially or culturally constructed. Regional or national focus and time period to be determined by the faculty member teaching the course in any given semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6616 (3) Readings in the History of American Women

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6756 (3) Race and Nationalism

Focuses on analytical, ideological, cultural, and political tensions between understandings of race and nationalism. Readings are interdisciplinary, but students identify and analyze tensions between race and nationalism at particular historical moments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6800 (3) Readings in Global History

Explores various topics, regions, and methods in history and historical writing by utilizing a global/thematic approach. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7052 (3) Seminar: Modern European History**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Modern**HIST 7110 (3) Research Seminar in Atlantic History 1500-1800**

Discusses the concepts and methods that inform the field of Atlantic history in the early modern era. Readings and research papers explore the interactions of peoples from Europe, Africa, and the Americas, including the exchange of ideas, peoples, commodities, and cultural practices.

Requisites: Restricted to graduate students only.**Grading Basis:** Letter Grade**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 7119 (3) Graduate Research Seminar in Asian History**

Prepares students for research in historical documents in Asian languages in order to write a substantial original research paper based on primary and secondary source materials.

Requisites: Restricted to graduate students only.**Recommended:** Requisite background in Asian history.**Additional Information:** Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 7153 (3) Seminar: English History, 800--1688**Requisites:** Restricted to graduate students only.**Recommended:** Requisite background in English or European history.**Additional Information:** Departmental Category: Europe: Specific Countries**HIST 7155 (3) Seminar: Early American History****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Chronological Periods**HIST 7156 (3) Seminar: American Diplomatic History****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 7252 (3) Seminar: Early Modern Europe, 16th to 18th Centuries****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Modern**HIST 7257 (3) Seminar: History of the American Frontier****Requisites:** Restricted to History (HIST) graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 2**HIST 7326 (3) Seminar: U.S. Intellectual History****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 7415 (3) Graduate Seminar in Modern United States History**

Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources.

Repeatable: Repeatable for up to 9.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Chronological Periods**HIST 7424 (3) Research Methods in Medieval/Early Modern European History**

Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU's microfilmed collections of manuscripts, and write a research paper based on the manuscript materials.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Topical**HIST 7485 (3) Seminar: United States History, 1948-Present****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Chronological Periods**HIST 7556 (3) Seminar: American Society and Thought****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 7581 (3) Latin Paleography**

Discusses the development of formal scripts from the late Roman Empire to the 15th century. Provides practice in identification, transliteration, and translation of medieval manuscripts.

Requisites: Restricted to graduate students only.**Recommended:** Requisite reading knowledge of Latin.**Additional Information:** Departmental Category: Europe: Ancient and Medieval**HIST 7840 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 7841 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Ancient and Medieval**HIST 7842 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Modern**HIST 7843 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Specific Countries**HIST 7844 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Topical**HIST 7845 (1-3) Independent Study****Repeatable:** Repeatable for up to 3.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Chronological Periods**HIST 7846 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 7847 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 2

HIST 7848 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 7849 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Methodological, Comparative, and Global

History - Master of Arts (MA)

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All MA students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should carefully read the Master's Degree Requirements (p. 866) section carefully. For more information, visit the department's Graduate Students webpage.

Requirements

Admission Requirements

For purposes of admission to the graduate program, the general Graduate Record Examination is required and a score in the 85th percentile or above on the verbal component is generally expected.

Prerequisites

As general preparation for graduate work in history, a broad liberal arts education, as well as a major in history, are desirable, though not specifically required. Candidates for graduate degrees may be required to pursue such fundamental courses in history as the department deems necessary to provide a suitable historical background.

Degree Requirements

The following are special departmental requirements. For more information, visit the department's Graduate Students (<http://www.colorado.edu/history/graduate-students>) webpage.

Most MA course work will be at the 5000, 6000 and 7000 levels. The History Department requires that any MA students interested in taking 4000-level courses for degree credit receive approval from their advisor and the director of graduate studies. All courses completed at CU Boulder must be taken in the Department of History, except for courses recommended by the advisor and approved by the director of graduate studies.

All MA students must complete the following:

Required Courses

HIST 5000	Historical Methods: Introduction to the Professional Study of History	3
A two-semester regional/national field colloquium sequence.		6
HIST 5106	Graduate Colloquium in United States History ("To 1865" and "Since 1865")	
HIST 5012	Graduate Colloquium in European History ("To 1789" and "Since 1789")	
HIST 5129	Colloquium in Modern Asian History ("South Asia" and "East Asia")	

Degree Plans

Plan I: Thesis Option

Thesis-track MA students must complete a total of 24 credit hours of course work, plus 6 credit hours of MA thesis credit (HIST 6950). Of those, a minimum of 12 credit hours must come in each of a student's two fields, regional/national and global/thematic. A comprehensive examination must be passed in the field of study before the degree is granted.

Plan II: Non-Thesis Option

Non-thesis track MA students must complete 30 credit hours of course work without a thesis, including six hours of 7000-level research seminars. Of those, a minimum of 12 credit hours must come in each of a student's two fields, regional/national and global/thematic. A comprehensive examination must be passed in the field of study before the degree is granted.

Language Requirement

For students working in fields of history that require the use of foreign languages, their advisory committees may require a demonstration of language proficiency.

History - Doctor of Philosophy (PhD)

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All PhD students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should read the Doctoral Degree Requirements (p. 867) section carefully. For more information, visit the department's Graduate Students (<http://www.colorado.edu/history/graduate-students>) webpage.

Requirements

Admission

For purposes of admission to the graduate program, the general Graduate Record Examination is required and a score in the 85th percentile or above on the verbal component is generally expected.

Prerequisites

Students who wish to work toward the PhD degree in history must indicate knowledge of certain fields of history, acquaintance with the fundamental tools of historical scholarship and the ability to do original work. The PhD program does not require the completion of a master's degree, but directly admits those qualified applicants who hold an undergraduate history degree or who have completed appropriate undergraduate history preparation and who have been recommended by the graduate admissions committee.

Residence

At least three years of graduate study, two of which must be spent in residence, are required for the PhD degree.

Degree Requirements

A total of 45 post-baccalaureate credit hours, at least 36 of which must be taken at this university, and a dissertation are required for the degree. A minimum of one foreign language is required; however, students must be able to use those languages essential to research and advanced study in their respective fields. In addition, as required by the Graduate School, those students pursuing a PhD should complete a minimum of 30 credit hours of dissertation work beyond the minimum course work requirement.

A comprehensive written and oral examination, a dissertation that is an original contribution to knowledge and an oral examination on the dissertation must be completed successfully.

Integrative Physiology

The Department of Integrative Physiology offers a variety of graduate study opportunities that range from a coursework-only option to a research-intensive option. To facilitate maximal flexibility in the design of a student's program, the Department has established a minimum number of required courses that must be completed by all graduate students and the remainder of the program can be individualized to meet the long-term goals of the student.

A graduate degree in integrative physiology provides opportunities for careers in academia, industry, and the health professions. The placement list of PhD and MS graduates (<http://www.colorado.edu/intphys/grad/placement.html>) indicates some of the jobs and educational programs that our graduate students have found after completion of the PhD or MS degree.

Course code for this program is IPHY.

Master's Degree

- Integrative Physiology - Master of Science (MS) (p. 1024)

Doctoral Degree

- Integrative Physiology - Doctor of Philosophy (PhD) (p. 1025)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Alaa Abdalla (https://experts.colorado.edu/display/fisid_144736)
Associate Professor; PhD, University of Michigan Ann Arbor

Bartlett, Jamie Lynn (https://experts.colorado.edu/display/fisid_156740)

Wright, Kenneth P (https://experts.colorado.edu/display/fisid_125586)
Professor; PhD, Bowling Green State University

Courses

IPHY 5010 (1) Graduate Student Research Forum

Special topics spanning the broad scope of integrative physiology are covered in a seminar-style format. Presentations by current IPHY faculty are augmented by graduate student presentations of thesis and dissertation work.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 5100 (2) Colloquium in Integrative Physiology

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5102 (2) Introduction to Physiology Genomics

Covers recent developments in genomics: a body of revolutionary new approaches that deal with the analysis of all the DNA sequence in the cell. Relies on a genomics text and student presentation/discussion aided by a study guide.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200.

IPHY 5200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and PSYC 5200

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5262 (3) Application of Bioinformatics and Genomics

Explore public websites, databases, and bioinformatic tools that can be used for analysis of genomic data. These include NCBI Resources, genome databases, gene expression databases, tools for nucleotide and algorithms analyses and protein databases. Students develop a mini-grant proposal that is required to incorporate use of some of the tools covered.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200 and IPHY 5102.

IPHY 5300 (3) Statistical Genetics for Complex Traits

Focuses on the methods of mapping complex disease genes in both population and family-based samples. Topics include both linkage and association analyses of qualitative and quantitative phenotypes.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5440 (4) Endocrinology

Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4440

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5550 (3) Exercise Biochemistry

Examines the underlying biochemical mechanisms that are responsible for the physiological adaptations to short- and long-term dynamic exercise including carbohydrate, fat, and protein metabolism. The interaction of key biochemical alterations as it relates to disease (diabetes, obesity, and aging) and exercise will be addressed.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650 and one year of general chemistry (lecture + lab).

IPHY 5580 (3) Sleep Physiology

Describes the physiology and neurobiology of sleep and impact of sleep, sleep deprivation, and sleep disorders on immune, endocrine, cardiovascular, respiratory, and neural systems, as well as examines changes in sleep across the life span. The integrative nature of sleep and circadian rhythms in normal

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5600 (3) Immunology

Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4600

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisites one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3470.

IPHY 5720 (4) Neurophysiology

Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4720

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Grading Basis: Letter Grade

IPHY 5730 (3) Integrative Motor Control

Investigates human motor control by integrating concepts from exercise physiology, biomechanics, and sport psychology. Applications are made to clinical and educational exercise contexts.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4730

Recommended: Prerequisites IPHY 3410 and IPHY 3470.

IPHY 5740 (3) Theory of Motor Skill Learning

Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4740

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5800 (4) Advanced Statistics and Research Methods in Integrative Physiology

Introduces advanced statistical techniques important for analyzing data rising in biomedical research, including physiology. Statistical reasoning will be emphasized through problem solving and applications using statistical software packages.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 2800.

IPHY 5840 (1-6) Graduate Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6010 (1-3) Seminar

Presents special topics in integrative physiology.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6650 (3) Cellular Cardiovascular Physiology

Focuses on the cellular control of cardiac and smooth muscle contraction, at rest and in response to acute and chronic exercise. Addresses certain pathophysiological and physiological adaptive mechanisms.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650.

IPHY 6660 (3) Locomotion Energetics and Biomechanics

Critiques and discusses both classic and cutting edge scientific research in the area of terrestrial locomotion.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisites IPHY 4540 and IPHY 4650.

IPHY 6670 (2) Hypothesis Testing in Locomotion Biomechanics

Focuses on the scientific process including formulating and testing hypotheses in studies of locomotion. Students analyze primary articles to determine whether the studies tested hypotheses and to generate new hypotheses that logically follow from previous studies.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 6680 (3) Matlab for Physiological and Biomechanical Research

Introduces Matlab programming skills needed to write and modify programs for data acquisition and analysis, statistics, plotting, and simulation.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6830 (3) Professional Skills for the Research Scientist

Discusses grant and manuscript writing, scientific presentations, peer-review, setting up/directing a research laboratory, research ethics, mentoring and other professional skills.

Requisites: Restricted to Integrative Physiology (IPHY) doctoral students only.

IPHY 6840 (1-3) Research Project

Involves a scholarly investigation of a selected topic using literature and/or experimental techniques. Advisor required.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6940 (1) Master's Degree Candidate

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Grading Basis: Pass/Fail

IPHY 6950 (1-6) Master's Thesis

Must have 4 credit hours and may be repeated up to 6 total credits.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to Integrative Physiology (IPHY) doctoral students only.

Integrative Physiology - Master of Science (MS)

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs and systems. A graduate degree in integrative physiology provides opportunities for careers in academia, industry and the health professions.

Concurrent Degree Program BA/MS in Integrative Physiology

The Department of Integrative Physiology has developed a curriculum that results in simultaneously conferring BA and MS degrees following a five-year course of study. The program has been designed to provide qualified undergraduate students with an opportunity to enhance their knowledge base in the discipline, engage in research, increase their opportunities for employment and make their applications to medical/allied health professional schools more competitive. Candidates for the program are recruited from the undergraduate population of declared integrative physiology majors during the beginning of their junior year. All interested candidates must apply by the second semester of their junior year. To apply, students must have a minimum GPA of 3.30, one letter of recommendation and a faculty mentor. Approximately 3–5 of the applicants will be selected on a competitive basis to begin the program.

Once accepted into the program, a student must maintain a GPA of 3.00 in all course work undertaken. By the completion of their senior year, students must have completed the 116 undergraduate credit hours as

outlined in the concurrent degree plan options. Continuing students must register for at least 5 graduate course credit hours per semester, beginning with the fall semester of their senior year. Students deciding to discontinue the program may do so at any time during their course of study. All credit hours completed toward the concurrent degree program will be counted toward the completion of the requirements for a BA degree in integrative physiology.

The curriculum for all students in the first year of the program is the same and is designed for students to complete their undergraduate requirements (116 credit hours) and 8 of their graduate credit hours. To complete the program in five years, students will be allowed to count 6 credit hours of their graduate work as electives for the undergraduate degree and 6 prespecified credit hours of undergraduate work toward the master's degree.

Requirements

Admission Requirements

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in integrative physiology at the University of Colorado or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human anatomy lecture and lab, as well as human physiology lecture and lab courses.

Satisfactory scores on the Graduate Record Examination (general) tests are also required for admission to the department. These scores should be submitted at the time of application.

Deficiencies

If the undergraduate preparation of a prospective graduate student is not adequate, the student may be allowed to pursue graduate study with the understanding that identified deficiencies will be completed. The graduate admissions committee will determine the nature and extent of these deficiencies.

Deficiencies in any area of the undergraduate major may be met by completing approved course work in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy at least one deficiency per semester until all deficiencies are satisfied. Graduate courses taken before removing deficiencies may be accepted for graduate degree credit only if prior approval of the graduate coordinator has been granted.

Course Requirements

Master's candidates entering the graduate program must complete 30 credits to graduate. They may select one of three options:

- Course work only
- Research project: Course work plus 3 research project hours
- Thesis: Course work plus 4 to 6 thesis hours

It is possible, however, to change from one option to another during the program of study.

Students must have a minimum cumulative grade point average of 3.0 in all graduate work taken, and must perform satisfactorily on the comprehensive exam.

Required Courses and Semester Credit Hours

Required Courses

IPHY 5100	Colloquium in Integrative Physiology	2
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	4

Degree Plan Option

Select the course work-only (0 credits), research project (3 credits) or 0-6 thesis (4-6 credits) option.

IPHY 6840	Research Project	
IPHY 6950	Master's Thesis	

Electives

Elective course work to fulfill the 30-credit minimum. 18-24

Total Credit Hours 30

Candidacy for Degree

Within the first semester of study, the student and mentor must prepare a program of study for the student. This program of study may be changed during the residence of the student with the approval of the mentor. It is the student's responsibility to transfer the program of study to the Application for Admission to Candidacy form required for graduation. The Application to Candidacy is due no later than ten weeks prior to defense of the thesis or research project. The original Application to Candidacy form should be submitted to the program assistant for review and approval.

Comprehensive Examination

All candidates are required to complete an examination (oral or written) covering the thesis or research project as well as course work leading to the degree.

Integrative Physiology - Doctor of Philosophy (PhD)

The objectives of the doctoral program are to:

- provide an academic foundation for understanding how humans and other animals function at the level of genes, cells, tissues, organs and systems, and
- develop the professional skills required to become a research scientist.

Requirements

Admission Requirements

To obtain materials for application and for any additional information, visit the Integrative Physiology (<http://www.colorado.edu/intphys/grad>) website.

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in integrative physiology at the University of Colorado or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human anatomy lecture and lab, as well as human physiology lecture and lab courses.

Satisfactory scores on the Graduate Record Examination (general) tests are also required for admission to the department. These scores should be submitted at the time of application.

Deficiencies

If the undergraduate preparation of a prospective graduate student is not adequate, the student may be allowed to pursue graduate study with the understanding that identified deficiencies will be completed. The graduate admissions committee will determine the nature and extent of these deficiencies.

Deficiencies in any area of the undergraduate major may be met by completing approved course work in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy at least one deficiency per semester until all deficiencies are satisfied. Graduate courses taken before removing deficiencies may be accepted for graduate degree credit only if prior approval of the graduate coordinator has been granted.

Course Requirements

Students must complete 30 semester hours of course work at or above the 5000 level.

Required Courses and Semester Credit Hours

Required Courses

IPHY 5100	Colloquium in Integrative Physiology (2 academic-year semesters)	4
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	4
IPHY 6830	Professional Skills for the Research Scientist	3
IPHY 8990	Doctoral Dissertation	30

Electives

30 hours of elective course work	30
Total Credit Hours	71

Advisory Committee

The student's advisory committee will consist of the student's mentor (chair of the committee), a faculty member in the student's interest area, and either the graduate coordinator or the chair of the department. The committee will assist the student in developing a program of study.

Preliminary Review

After the first academic year, which usually consists of 16 to 18 hours of course work, the student completes the preliminary review process. The student's advisory committee will perform this review. The preliminary evaluation includes an evaluation of the student's academic status (minimum GPA of 3.0 is required), a detailed proposal of the student's program of study, written input from the student's mentor, and other pertinent materials deemed necessary by the committee.

The outcome of the preliminary review process can be one of three judgments: pass, fail, or probation. A student who passes may continue to pursue the doctoral degree. A student who fails will be dismissed from the doctoral program. A student on probation must complete any deficiencies determined by the committee before continuing to pursue the doctoral degree. Regardless of the outcome, the committee will submit a written report to the graduate coordinator for filing.

Comprehensive Examination

The comprehensive exam will be administered to the student within four semesters of entry into the doctoral program. The format of the

exam, and the composition of the comprehensive exam committee will be determined by the mentor in consultation with the student. The examination will be based on a document that is about 25 pages in length and designed to demonstrate the student's comprehensive knowledge on a topic. The composition of the committee (a minimum of five members) is submitted to the Dean of the Graduate School for approval. Students are given two opportunities to pass the exam. The written portion of the exam is based on the student's course work and requires demonstration of a broad-based knowledge in integrative physiology. Specific areas to be examined are determined by the mentor and the student.

Dissertation

Successful completion of the exam advances the student to doctoral candidate status, and the student may then begin a dissertation. All students must complete a formal written dissertation that conforms to the requirements established by the Graduate School at CU Boulder.

Final Examination

After completion of the dissertation, a final examination is scheduled. The exam consists of a written submission of the dissertation work and an oral defense. The final examination committee consists of at least five members, one of whom must be from outside the department. Three of the members must be Boulder campus resident faculty.

Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible to transmit ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves and the way people's brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

Purpose of the MA Program

The goal of the MA program in Linguistics is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career and prepares students who decide to do so to apply to the PhD program at CU or at other institutions.

The main component of the MA program is 30 semester hours of courses (at least 24 of them in linguistics). Students may also choose to write an MA thesis. Students on both the thesis plan and non-thesis plan must take and pass the comprehensive exam in the third or fourth semester of study in order to receive the MA degree. By meeting additional requirements, MA students may also obtain the MA with a certificate in Cognitive Science, Human Language Technology or Culture, Language and Social Practice. Students enrolled in the MA Program for TESOL Professionals (Teaching English to Speakers of Other Languages) have a course of study divided between general linguistics and TESOL, including a practicum.

Purpose of the PhD Program

The goal of the Linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations. We encourage doctoral students to begin engaging in research projects early, as these will contribute to developing the research program that will lead to the thesis project. Early projects not only lead to preliminary exam topics and/or publishable papers but also enable students to pilot methods that will be usable for the dissertation project. Early projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Doctoral students complete a core of required courses that provide a firm foundation in linguistic theory and methods. These courses are supplemented by advanced courses and individual work related to an area of specialization in a field where this Department offers research strengths, e.g., description of Native American and Chadic (Central African) languages, sociolinguistics, interaction and grammar, computational semantics, psycholinguistics, first-language acquisition, phonetics, phonology, functionally-oriented syntax. Doctoral students may complete the CLASP or Human Language Technology certificates. Additionally, students may apply to pursue a joint PhD in Linguistics and Cognitive Science.

Course codes for this program are LING and ESLG.

Master's Degree

- Linguistics - Master of Arts (MA) (p. 1029)

Doctoral Degree

- Linguistics - Doctor of Philosophy (PhD) (p. 1030)

Certificate

- Culture, Language and Social Practice - Graduate Certificate (p. 1031)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Senior Instructor

Courses

LING 5030 (3) Linguistic Phonetics

Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, and instruction on fundamentals of articulatory, acoustic, and auditory phonetics.

Requisites: Restricted to graduate students only.

LING 5200 (3) Introduction to Computational Corpus Linguistics

Covers computer methods for doing linguistics with on-line corpora. Includes extensive introduction (with lab) to the Python programming language, UNIX corpus tools, concordance programs, syntactic treebanks, propbanks, and corpora for discourse and phonology research.

Requisites: Restricted to graduate students only.

LING 5300 (3) Research in Psycholinguistics

After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production and theories of brain specialization for language, are explored.

Recommended: Prerequisite at least one graduate-level course in LING, PSYC or CSCI.

LING 5410 (3) Phonology

Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis.

Recommended: Prerequisite LING 5030.

LING 5420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 4420

Requisites: Restricted to graduate students only.

LING 5430 (3) Semantics and Pragmatics

Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning, representation, conversational implications, speech acts, and discourse structure.

Recommended: Prerequisite LING 5420.

LING 5570 (3) Introduction to Diachronic Linguistics

Familiarizes students with terminology, methods, and theories dealing with phenomena of language change through time.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5410.

LING 5610 (3) English Structure for Teachers of English to Speakers of Other Languages

Description of morphological and syntactic categories and structures of English.

Equivalent - Duplicate Degree Credit Not Granted: LING 4610

Requisites: Restricted to graduate students only.

LING 5620 (3) Teaching ESL Pronunciation

Examines the phonetics and phonology of American English (including prosody) and explores techniques for teaching pronunciation skills to non-native speakers. Treats both general issues and specific problems for students from particular language backgrounds.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 3100 or LING 5030 and LING 5410.

LING 5630 (3) Methods and Materials for Teaching English as an Additional Language

Provides an overview of methods and materials for teaching English as an additional language, along with opportunities for students to observe, discuss and analyze these in relation to language teaching principles, linguistic considerations, and global and local contexts. Aimed primarily at the teaching of English to nonnative speaking adults, the course also addresses second and foreign language teaching generally.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5610 or LING 5620.

LING 5800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

LING 5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5832

Requisites: Restricted to graduate students only.

LING 5900 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

LING 5910 (1-3) TESOL Practicum

Provides observation and supervised teaching experiences in classroom and other contexts involving the teaching of English to speakers of other languages, especially adults and young adult learners in settings outside K-12. Meetings provide opportunities to debrief and to consult on teaching practice; help students connect theory, methods and practice; and support a professional teaching portfolio process.

Equivalent - Duplicate Degree Credit Not Granted: LING 4910

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 4610 or LING 5610.

LING 6200 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

LING 6300 (3) Topics in Language Use

Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and sociolinguistic variation.

Requisites: Restricted to graduate students only.

LING 6310 (3) Sociolinguistic Analysis

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary sociolinguistic analysis, with special emphasis on linguistic variation, diversity and change.

Requisites: Restricted to graduate students only.

LING 6320 (3) Linguistic Anthropology

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 6320

Requisites: Restricted to graduate students only.

LING 6450 (3) Syntactic Analysis

Introduces the major constructs used by formal theories of syntax to capture the relationship between meaning and syntactic form and uses data from diverse languages to explore the universality of these constructs.

Requisites: Restricted to graduate students only.

LING 6500 (3) Issues in Indigenous Languages

Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 6500

Grading Basis: Letter Grade

LING 6510 (3) Language Structures

Surveys the structure of one or more languages, emphasizing understanding how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 6520 (3) Topics in Comparative Linguistics

Students compare and contrast selected structures of languages treated from a typological, genetic, or a real perspective. No special prior knowledge of the subject language is required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 6560 (3) Language Acquisition

Theories and research methods in first-language acquisition of phonology, morphology, syntax, semantics, and pragmatics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5430.

LING 6940 (1) Master's Degree Candidate

Grading Basis: Pass/Fail

LING 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

LING 7030 (3) Phonetic Theory and Analysis

Provides students with the practical skills and the conceptual framework to do independent research in phonetics (or in other areas relying on phonetic data). Introduces current and traditional issues in phonetic research (both experimental and theoretical) and gives training in analytical methods.

Recommended: Prerequisites LING 5030 and LING 5410.

LING 7100 (3) Field Methods 1

Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features, and preliminary formulation using computational tools.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 7320 (3) Narrative and Identity

Examines the ways in which identities are constructed, contested, and negotiated through narrative practice.

LING 7350 (3) Language and Gender in Cultural Perspective

Examines organizations of language and gender in a variety of societies and cultures from the perspectives of sociolinguistics, linguistic anthropology, and socially-oriented discourse analysis.

LING 7360 (3) Language and Sexuality

Explores the role of language in the social construction and articulation of sexuality.

LING 7410 (3) Phonological Theory

Phonetic and morphophonological representations: distinctive features, segments, prosodic structures, morphological structures. Phonological processes and their interaction. Naturalness conditions.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5410.

LING 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Department enforced prerequisites: CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

LING 7420 (3) Syntactic Theory

Covers various topics in syntactic theory.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5420.

LING 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506.

LING 7430 (3) Semantic Theory

Current developments in the theory of linguistic semantics. Topics include truth-conditional theories, generative linguistic theories, semantic theories of communicative competence and integration of these theories in development of a combined theory of semantics and pragmatics.

Recommended: Prerequisite LING 5430.

LING 7570 (3) Advanced Diachronic Linguistics

Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items and its relation to theories of grammar and of language variation.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

LING 7800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

LING 7900 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

LING 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Linguistics - Master of Arts (MA)

The goal of this master's program is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career, and prepares students who decide to do so to apply to the PhD program at CU (p. 1030) or at other institutions.

Students wishing to pursue graduate work in linguistics should carefully read the Master's Degree Requirements (p. 866) section of this catalog, as well as the detailed degree requirements available from the department office.

Concurrent Degree Program

BA/MA in Linguistics

The department has a five-year concurrent bachelor's and master's degree program, which is recommended only for the most serious and able graduate students. For further information, see the graduate advisor in the spring of the sophomore year or during the first week of the fall semester of the junior year.

Requirements

Admission Requirements

Applicants should hold a recognized baccalaureate degree, and should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level.

GRE scores are required from United States residents; scores are also required from native speakers of English who wish to be considered for fellowship aid. TOEFL scores are normally required from foreign applicants.

Degree Requirements

The master's degree calls for a minimum of three semesters of study, though most students require four semesters. The remaining courses are normally taken at the 5000 level or above.

All students must pass a comprehensive written examination covering general topics in linguistics.

Degree Plans

Plan I: Thesis Option

Students in this plan must complete a total of 30 credit hours, at least 24 of which must be in linguistics, including 4–6 thesis credit hours.

Required Courses

LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3

Electives

Additional courses to fulfill the 30-credit minimum.		11-9
--	--	------

Thesis

LING 6950	Master's Thesis	4-6
-----------	-----------------	-----

Total Credit Hours		30
--------------------	--	----

Plan II: Comprehensive Examination Option

Students in this plan must complete a total of 30 credit hours of course work, at least 24 of which must be in linguistics.

Required Courses

LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3

Electives

Additional courses to fulfill the 30-credit minimum.		15
--	--	----

Total Credit Hours		30
--------------------	--	----

Requirements for TESOL Professionals

The MA in linguistics for TESOL professionals is a graduate program in linguistics. The MA will provide a cohesive, professionally oriented program addressing the increased demand for professionalization in the field of teaching English as a second language. The program requires completion of 30 credit hours: 12 in graduate linguistics course, 12 in required TESOL courses, a 3-credit practicum and a 3-credit elective course. A comprehensive examination and teaching portfolio are required.

Linguistics - Doctor of Philosophy (PhD)

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations.

We encourage doctoral students to begin engaging in research projects early, as these will contribute to developing the research program that will lead to the thesis project. Early projects not only lead to preliminary exam topics and/or publishable papers, but also enable students to pilot the methods they'll use for the dissertation project. Early projects may be extensions of course work and may involve a faculty advisor other than the thesis advisor.

Students should select a specialization and begin their own research as early as possible. In addition to phonology, syntax, semantics and pragmatics, the department offers specializations in:

- sociolinguistics
- conversation analysis

- historical linguistics
- typological comparison
- Amerindian linguistics
- African linguistics
- linguistic anthropology
- psycholinguistics
- neurolinguistics
- language development
- cognitive linguistics
- computational modeling of language knowledge

Students wishing to pursue graduate work in linguistics should carefully read the Doctoral Degree Requirements (p. 867) section of this catalog and the detailed degree requirements available from the department office.

Requirements

Admission Requirements

Applicants should hold a recognized baccalaureate degree. They should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level. GRE scores are required from United States residents; scores are also required from native speakers of English who wish to be considered for fellowship aid. TOEFL scores are normally required from foreign applicants.

To be admitted to the PhD program, students must have completed course work equivalent to:

LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3
LING 6450	Syntactic Analysis	3

Students who do not have this preparation may be admitted to the MA program. They may apply for admission to the PhD program when these requirements are close to completion. Students may be admitted to the PhD program before finishing the MA.

Degree Requirements

Thirty credit hours of course work are normally required for the PhD. Four linguistics courses are required at the 6000 level or above, and the remaining six courses may include up to four courses in other departments appropriate to the specialization.

Electives

Select four of the following linguistics courses:		12
---	--	----

LING 6450	Syntactic Analysis	
LING 7100	Field Methods 1	
LING 7030	Phonetic Theory and Analysis	
LING 7410	Phonological Theory	
LING 7420	Syntactic Theory	
LING 7430	Semantic Theory	

LING 7570	Advanced Diachronic Linguistics	
Select six courses appropriate to the specialization, up to four of which can be from other departments		18
Total Credit Hours		30

Language Requirement

All PhD students must demonstrate the ability to read linguistic literature in a language other than English.

Preliminary Examination

As a PhD preliminary examination, students submit a data-based research paper at the beginning of the second year in the PhD program.

Comprehensive Examination

The university comprehensive examination requirement is completed in two steps: the completion of a synthesis paper followed by the defense of a dissertation prospectus.

Doctoral Thesis Credits

To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. These are distinct from the 30 credit hours of course work that are required for the PhD. Distribution of those hours is as follows:

- A student may not register for more than 10 dissertation credit hours in any one semester.
- No more than 10 dissertation credit hours taken in semesters prior to the semester in which the proposal defense is passed may be counted in the 30 dissertation hours required for the PhD.
- No more than 10 dissertation hours of credit taken the semester in which the proposal defense is passed may be included in the 30 dissertation credit hours required for the degree.

Culture, Language and Social Practice - Graduate Certificate

CU Boulder is home to the program in culture, language and social practice (CLASP). This program provides an interdisciplinary forum on language and society for CU students and faculty. This is facilitated through regular colloquia on the subject of language and society, as well as a diverse curriculum of courses offered toward the CLASP graduate certificate.

The CLASP program brings cohesion to empirical and theoretical research currently conducted on campus in varied analytic traditions that focus on the study of culture, language and social practice. These traditions include sociolinguistics, linguistic anthropology, literacy, bilingualism, second language acquisition, language endangerment and revitalization, narrative studies, symbolic interactionism, language variation and change, ethnography of speaking and diverse forms of discourse analysis, such as conversation analysis, critical discourse analysis, interactional sociolinguistics and multimodal discourse analysis.

The program currently has over twenty affiliated faculty members from a variety of schools and departments, among them anthropology, communication, education, French and Italian, German and Slavic, linguistics, political science, Spanish and Portuguese, sociology and speech, language and hearing science.

For more information on the application process and program requirements, visit the CLASP: Culture, Language & Social Practice (<http://www.colorado.edu/clasp>) website.

Certificate Requirements

Twelve credit hours of graduate-level coursework are required for the Graduate Certificate in Culture, Language, and Social Practice. Three credit hours of coursework must come from the list of approved core courses (Group A); six credit hours of coursework must come from the list of elective courses (Group B); and the three remaining credit hours must come from a course in either social theory or research methods (Group C), subject to approval by the CLASP curriculum committee. The course chosen to fulfill the Group C requirement, while not necessarily language-related, should be a methodological or theoretical course that informs the student's research interests in the relationship between language and society. *At least one of the three selected courses from Lists A and B must be from **outside** the student's home department.*

A student may opt to substitute a University of Colorado Boulder MA thesis on the subject of culture, language, and social practice for one of the Group B courses, if approved by the curriculum committee, which is constituted by the CLASP faculty advisor and CLASP director. An independent study may also be substituted for a formal course, if approved by the committee.

A number of new and unlisted seminars on the subject of language and society are taught within individual departments each year. Students should check with the CLASP program director each semester for a list of additional courses that fulfill the requirements. Students wanting to substitute an unapproved course for one of the courses listed below must receive approval from the CLASP curriculum committee.

The acquisition of a CLASP Certificate is dependent on the successful completion of all courses in the academic curriculum with a grade of B or higher.

Group A: Core Courses

Students will choose one core course from the list below.

ANTH/LING 6320	Linguistic Anthropology	3
COMM 6410	Discourse Analysis	3
COMM 6445	Language, Ideology and Identity	3
LING 6310	Sociolinguistic Analysis	3
EDUC 5615	Second Language Acquisition	3
EDUC 5635	Education and Sociolinguistics	3
SPAN 5450	Introduction to Hispanic Linguistics	3

Group B: Elective Courses

Students will choose two elective courses.

Below is a sampling of courses fulfilling this category that have been offered at CU-Boulder in the recent past. These courses are not necessarily offered on a regular basis. They often have rotating faculty members and are subject to change. Students may also substitute an approved independent study with a CLASP faculty member as one of the required electives.

ANTH 6320	Linguistic Anthropology	3
COMM 5210	Readings in Communication Theory	3
COMM 6410	Discourse Analysis	3
COMM 6445	Language, Ideology and Identity	3
COMM 6440	Grounded Practical Theory	3
COMM 6470	Public Deliberation and Dialogue	3

COMM 6740	Theory and Philosophy of Organizing and Organizations	3	ANTH 5530	Theoretical Foundations of Sociocultural Anthropology	3
EDUC 5235	Language and Literacy Across the Curriculum	3	ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology	3
EDUC 5425	Introduction to Bilingual/Multicultural Education	3	PSCI 7004	Seminar: Political Theory	3
EDUC 5455	Literacy for Linguistically Different Learners	3	PSCI 7901	Independent Study	1-3
EDUC 5465	Introduction to ESL/Bilingual and Special Education	3	PSCI 7108	Special Topics	3
EDUC 5615	Second Language Acquisition	3	SOCY 5201	Graduate Seminar in Sociological Theory	3
EDUC 5635	Education and Sociolinguistics	3	SOCY 6041	Cultural Sociology	3
EDUC 5425	Introduction to Bilingual/Multicultural Education	3	SOCY 7006	Sociology of Sex and Gender	3
EDUC 5455	Literacy for Linguistically Different Learners	3	SOCY 7036	Feminist Theory	3
EDUC 5465	Introduction to ESL/Bilingual and Special Education	3	SOCY 7131	Seminar in Social Psychology	3
EDUC 5615	Second Language Acquisition	3	WGST 6090	Feminist Theories	3
EDUC 5635	Education and Sociolinguistics	3	WGST 6290	Special Topics in Gender and Sexuality Studies	3
EDUC 8615	Language Issues in Education Research	3	<i>Examples of seminars in methods:</i>		
LING 5900	Independent Study	1-3	ANTH 7300	Seminar: Research Methods in Cultural Anthropology	3
LING 6310	Sociolinguistic Analysis	3	COMM 6030	Qualitative Research Methods	3
LING 6320	Linguistic Anthropology	3	EDUC 7346	Ethnographic Methods in Educational Research	3
LING 6560	Language Acquisition	3	EDUC 8250	Qualitative Methods I	3
LING 7320	Narrative and Identity	3	EDUC 8260	Qualitative Methods II	3
LING 7350	Language and Gender in Cultural Perspective	3	LING 7800	Open Topics in Linguistics	3
LING 7360	Language and Sexuality	3	SOCY 5111	Data 1: Introduction to Social Statistics	3
LING 7800	Open Topics in Linguistics	3	SOCY 6111	Data 2: Data Analysis	3
LING 7900	Independent Study	1-3	SOCY 6121	Qualitative Methods	3
SLHS 4000	Multicultural Aspects of Communication Differences and Disorders	3	SOCY 7026	Feminist Research Methods	3
SLHS 4560	Language Development	3	SOCY 7121	Qualitative Analysis	3
SPAN 5450	Introduction to Hispanic Linguistics	3	WGST 6190	Feminist Methodology	3
SPAN 7130	Seminar: Critical Approaches to Hispanic Literature	1-3			

Group C: Courses in Social Theory and Research Methods

Students will choose one course in either social theory or research methods that is appropriate for their research goals, in consultation with their CLASP faculty advisor.

Below is a working list of possible courses offered in these areas at the University of Colorado, as listed in the catalog. Note that these are not CLASP-approved courses. Unlike the courses specified in Categories A and B, the courses below are listed here as suggestions only, to provide examples of the kinds of seminars that might be used to fulfill this requirement. Because many of these courses are taught by revolving faculty members who are not CLASP-affiliated, the course content is subject to change from semester to semester. In addition, some of these seminars have prerequisites or limit student enrollment on the basis of disciplinary background.

ANTH 5780	Core Course-Cultural Anthropology	3
ANTH 5785	Advanced Seminar in Cultural Anthropology	3
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology	3
ANTH 7620	Seminar: Ethnography and Cultural Theory	3
COMM 5210	Readings in Communication Theory	3
COMM 6360	Social and Cultural Theory	3
EDUC 5075	Sociology in Education	3
EDUC 6325	Culture and Ethnography in Education	3
GEOG 6742	Seminar: Cultural Geography	3
HIST 6330	History of Sex and Sexuality	3

Mathematics

PhD Program

The Department of Mathematics offers course work and research leading to the PhD degree in Mathematics. The Department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes, and topology. Further information on the Department and Graduate program may be found on the Department web site <http://math.colorado.edu>.

MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the concurrent bachelor's/master's degree program (see below) or as a graduate student.

As a rule, graduate students are admitted to the PhD program in Mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Course code for this program is MATH.

Master's Degree

- Mathematics - Master of Arts (MA) (p. 1038)

Doctoral Degree

- Mathematics - Doctor of Philosophy (PhD) (p. 1038)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Baggett, Lawrence W.
Professor Emeritus

Beaudry, Agnès (https://experts.colorado.edu/display/fisid_157677)
Assistant Professor; PhD, Northwestern University

Black, John (https://experts.colorado.edu/display/fisid_126540)
Associate Professor; PhD, University of California-Davis

Bronstein, Albert
Instructor; PhD, University of Kentucky Lexington

Brown, Gordon E.
Professor Emeritus

Casalaina-Martin, Sebastian Ben (https://experts.colorado.edu/display/fisid_145845)
Associate Professor; PhD, Columbia University In the City of New York

Clelland, Jeanne Nielsen (https://experts.colorado.edu/display/fisid_113103)
Professor; PhD, Duke University

Clements, George F.
Professor Emeritus

Czubak, Magdalena (https://experts.colorado.edu/display/fisid_157955)
Assistant Professor; PhD, University of Texas at Austin

Elliott, Peter D (https://experts.colorado.edu/display/fisid_105048)
Professor; PhD, University of Cambridge (England)

Englander, Janos (https://experts.colorado.edu/display/fisid_147333)
Associate Professor; PhD, Israel Instit of Tech (Israel)

Enoka, Roger M (https://experts.colorado.edu/display/fisid_110122)
PhD, University of Washington

Farsi, Carla Emilia (https://experts.colorado.edu/display/fisid_101437)
Professor; PhD, University of Maryland College Park Campus

Fox, Jeffrey S (https://experts.colorado.edu/display/fisid_105586)
Professor; PhD, University of California-Berkeley

Goodrich, Robert K.
Professor Emeritus

Gorokhovskiy, Alexander (https://experts.colorado.edu/display/fisid_126279)
Professor; PhD, Ohio State University

Grant, David R (https://experts.colorado.edu/display/fisid_100868)
Professor; PhD, Massachusetts Institute of Technology

Green, Richard Mutegeki (https://experts.colorado.edu/display/fisid_129800)
Professor; MA, Oxford Univ (England)

Gustafson, Karl E (https://experts.colorado.edu/display/fisid_104877)
Professor; PhD, University of Maryland College Park Campus

Hermes, Henry G.
Professor Emeritus

Holley, Richard A.
Professor Emeritus

Ih, Su-Ion (https://experts.colorado.edu/display/fisid_141091)
Associate Professor; PhD, Brown University

Jesudason, Judith Packer (https://experts.colorado.edu/display/fisid_100338)
Professor; PhD, Harvard University

Jones, William B.
Professor Emeritus

Kearnes, Keith (https://experts.colorado.edu/display/fisid_118457)
Professor; PhD, University of California-Berkeley

Kuznetsov, Sergei Eugenievitch (https://experts.colorado.edu/display/fisid_113246)
Associate Professor; DSc, Vilnius State Univ (Lithuania)

Liu, Faan Tone
Instructor; PhD, University of Colorado at Boulder

Lundell, Albert T.
Professor Emeritus

Macrae, Robert Eugene
Professor Emeritus

Malitz, Jerome I.
Professor Emeritus

Manley, Kevin W (https://experts.colorado.edu/display/fisid_142342)
Instructor; PhD, University of Colorado Boulder

Mayr, Peter (https://experts.colorado.edu/display/fisid_155858)
Assistant Professor; Dr habil, Johannes Kepler University Linz (Austria)

Monk, James Donald
Professor Emeritus

Mycielski, Jan
Professor Emeritus

O'Rourke, Sean Daniel (https://experts.colorado.edu/display/fisid_154418)
Assistant Professor; PhD, University of California-Davis

Pflaum, Markus Josef (https://experts.colorado.edu/display/fisid_144979)
Professor; Dr habil, Humboldt Univ of Berlin (Germany)

Ramsay, Arlan
Professor Emeritus

Rearick, David F.
Professor Emeritus

Roberson, Lee
Instructor; PhD, University of Northern Colorado

Roth, Richard L.
Professor Emeritus

Sather, Duane P.
Professor Emeritus

Schmidt, Wolfgang
Professor Emeritus

Spina, Alejandro (https://experts.colorado.edu/display/fisid_104240)
Senior Instructor; PhD, University of Colorado Boulder

Stade, Eric (https://experts.colorado.edu/display/fisid_100456)
Professor; PhD, Columbia University In the City of New York

Struik, Ruth Rebekka
Professor Emeritus

Szendrei, Agnes Erzsebet (https://experts.colorado.edu/display/fisid_130160)
Professor; DSc, Hungarian Academy of Sciences (Hungary)

Thiem, Franz Nathaniel (https://experts.colorado.edu/display/fisid_144618)
Associate Professor; PhD, University of Wisconsin-Madison

Tubbs, Robert (https://experts.colorado.edu/display/fisid_101761)
Associate Professor; PhD, Pennsylvania State University

Varanasi, Mahesh K (https://experts.colorado.edu/display/fisid_103090)
Professor; PhD, Rice University

Vernerey, Divya E. (https://experts.colorado.edu/display/fisid_145131)
Instructor; PhD, Northwestern University

Walter, Martin E (https://experts.colorado.edu/display/fisid_105263)
Professor; PhD, University of California-Irvine

Wise, Jonathan S (https://experts.colorado.edu/display/fisid_151516)
Assistant Professor; PhD, Brown University

Wolkowisky, Jay H.
Professor Emeritus

Courses

MATH 5000 (3) Foundations of Mathematics

Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation. Department enforced prerequisites: MATH 2130 and MATH 3140.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4000

Requisites: Restricted to graduate students only.

MATH 5001 (3) Analysis 2

Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).

Equivalent - Duplicate Degree Credit Not Granted: MATH 4001

Requisites: Restricted to graduate students only.

MATH 5030 (3) Intermediate Mathematical Physics 1

Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5030

Requisites: Restricted to graduate students only.

MATH 5040 (3) Intermediate Mathematical Physics 2

Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory and Fourier analysis. Department enforced prerequisite: MATH 5030.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5040

Requisites: Restricted to graduate students only.

MATH 5120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation, and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits. Department enforced prerequisite: MATH 2130 or MATH 2135 or APPM 3310. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4120 and APPM 4120 and APPM 5120

Requisites: Restricted to graduate students only.

MATH 5140 (3) Abstract Algebra 2

Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra. Department enforced prerequisite: MATH 3140.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4140

Requisites: Restricted to graduate students only.

MATH 5150 (3) Linear Algebra

Highlights vector spaces, linear transformations, eigenvalues and eigenvectors, and canonical forms. Department enforced prerequisite: MATH 2130 or MATH 2135. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5200 (3) Introduction to Topology

Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4200

MATH 5230 (3) Differential Geometry of Curves and Surfaces

Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4230

Requisites: Restricted to graduate students only.

MATH 5240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics

Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4240

Requisites: Restricted to graduate students only.

MATH 5330 (3) Fourier Analysis

The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics. Department enforced prerequisite: MATH 4001.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4330

Requisites: Restricted to graduate students only.

MATH 5430 (3) Ordinary Differential Equations

Introduces theory and applications of ordinary differential equations, including existence and uniqueness theorems, qualitative behavior, series solutions, and numerical methods, for scalar equations and systems.

Department enforced prerequisites: MATH 2130 and MATH 3001.

Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5440 (3) Mathematics of Coding and Cryptography

Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed; prepares students for the more advanced ECEN 5682.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4440

Requisites: Restricted to graduate students only.

MATH 5470 (3) Partial Differential Equations

Studies initial boundary and eigenvalue problems for the wave, heat and potential equations. Solution by separation of variables, Green's function, and variational methods. Department enforced prerequisite: MATH 3430 or MATH 5430. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4470

Requisites: Restricted to graduate students only.

MATH 5510 (3) Introduction to Probability Theory

Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4510

Requisites: Restricted to graduate students only.

MATH 5520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: MATH 4510 or MATH 5510 or APPM 3570.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4520 and APPM 4520 and APPM 5520

Requisites: Restricted to graduate students only.

MATH 5540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models, modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: MATH 4520 or MATH 5520 or APPM 4520 or APPM 5520.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4540 and APPM 4540 and APPM 5540

Requisites: Restricted to graduate students only.

MATH 5600 (3) Numerical Analysis 1

Solution of nonlinear algebraic equations, interpolation, approximation theory and numerical integration. Department enforced prerequisites: MATH 2130 or MATH 2135 or APPM 3310 and experience with a scientific programming language. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5610 (3) Numerical Analysis 2

Solution of linear systems, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: MATH 5600 or APPM 5600. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5730 (3) Set Theory

Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4730

MATH 5810 (1-3) Special Topics in Mathematics

Covers various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4810

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 5820 (3) History of Mathematical Ideas

Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4820

Requisites: Restricted to graduate students only.

Recommended: Requisite completion of upper division Written Communication requirement.

MATH 5905 (1) Mathematics Teacher Training

Designed to train students to become effective teachers. Students teach a mathematics course, meeting weekly with faculty to discuss problems particular to the teaching of mathematics. Department enforced prerequisite: current employment as a teaching assistant.

Requisites: Restricted to graduate students only.

MATH 6000 (3) Model Theory

Proves the compactness theorem, showing the essential finiteness of logical implication. Proves many basic properties of theories, showing how the syntactic form of statements influences their behavior w.r.t., different models. Finally, studies properties of elements that cannot be stated by a single formula (the type of the element) and shows it can be used to characterize certain models.

Requisites: Restricted to graduate students only.

MATH 6010 (3) Computability Theory

Studies the computable and uncomputable. Shows that there are undecidable problems and from there builds up the theory of sets of natural numbers under Turing reducibility. Studies Turing reducibility, the arithmetical hierarchy, oracle constructions and end with the finite injury priority method. Department enforced prerequisite: MATH 6000.

Requisites: Restricted to graduate students only.

MATH 6110 (3) Introduction to Number Theory

Examines divisibility properties of integers, congruences, diophantine equations, arithmetic functions, quadratic residues, distribution of primes and algebraic number fields. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6130 (3) Algebra 1

Studies group theory and ring theory. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6140 (3) Algebra 2

Studies modules, fields and Galois theory. Department enforced prerequisite: MATH 6130. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6150 (3) Commutative Algebra

Introduces topics used in number theory and algebraic geometry, including radicals of ideals, exact sequences of modules, tensor products, Ext, Tor, localization, primary decomposition of ideals and Noetherian rings. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6170 (3) Algebraic Geometry

Introduces algebraic geometry, including affine and projective varieties, rational maps and morphisms and differentials and divisors. Additional topics might include Bezout's Theorem, the Riemann-Roch Theorem, elliptic curves, and sheaves and schemes. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6180 (3) Algebraic Number Theory

Introduces number fields and completions, norms, discriminants and differentials, finiteness of the ideal class group, Dirichlet's unit theorem, decomposition of prime ideals in extension fields, decomposition and ramification groups. Department enforced prerequisites: MATH 6110 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6190 (3) Analytic Number Theory

Acquaints students with the Riemann Zeta-function and its meromorphic continuation, characters and Dirichlet series, Dirichlet's theorem on primes in arithmetic progressions, zero-free regions of the zeta function and the prime number theorem. Department enforced prerequisites: MATH 6110 and MATH 6350. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6210 (3) Introduction to Topology 1

Introduces elements of point-set topology and algebraic topology, including the fundamental group and elements of homology. Department enforced prerequisites: MATH 2130 and MATH 3140 and MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6220 (3) Introduction to Topology 2

Continuation of MATH 6210. Department enforced prerequisite: MATH 6210. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6230 (3) Introduction to Differential Geometry 1

Introduces topological and differential manifolds, vector bundles, differential forms, de Rham cohomology, integration, Riemannian metrics, connections and curvature. Department enforced prerequisites: MATH 2130 and MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6240 (3) Introduction to Differential Geometry 2

Continuation of MATH 6230. Department enforced prerequisite: MATH 6230. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6250 (3) Theory of Rings

Studies semi-simple Artinian rings, the Jacobson radical, group rings, representations of finite groups, central simple algebras, division rings and the Brauer group. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6260 (3) Geometry of Quantum Fields and Strings

Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories. Department enforced prerequisites: MATH 6230 and MATH 6240 and PHYS 5250 and PHYS 7280. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6260

Requisites: Restricted to graduate students only.

MATH 6270 (3) Theory of Groups

Studies nilpotent and solvable groups, simple linear groups, multiply transitive groups, extensions and cohomology, representations and character theory, and the transfer and its applications. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6280 (3) Advanced Algebraic Topology

Covers homotopy theory, spectral sequences, vector bundles, characteristic classes, K-theory and applications to geometry and physics. Department enforced prerequisite: MATH 6220. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6290 (3) Homological Algebra

Studies categories and functors, abelian categories, chain complexes, derived functors, Tor and Ext, homological dimension, group homology and cohomology. If time permits, the instructor may choose to cover additional topics such as spectral sequences or Lie algebra homology and cohomology. Department enforced prerequisites: MATH 6130 and MATH 6140.

Requisites: Restricted to graduate students only.

MATH 6310 (3) Introduction to Real Analysis 1

Develops the theory of Lebesgue measure and the Lebesgue integral on the line, emphasizing the various notions of convergence and the standard convergence theorems. Applications are made to the classical L^p spaces. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6320 (3) Introduction to Real Analysis 2

Covers general metric spaces, the Baire Category Theorem, and general measure theory, including the Radon-Nikodym and Fubini theorems. Presents the general theory of differentiation on the real line and the Fundamental Theorem of Lebesgue Calculus. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite MATH 6310.

MATH 6350 (3) Functions of a Complex Variable 1

Focuses on complex numbers and the complex plane. Includes Cauchy-Riemann equations, complex integration, Cauchy integral theory, infinite series and products, and residue theory. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6360 (3) Functions of a Complex Variable 2

Focuses on conformal mapping, analytic continuation, singularities and elementary special functions. Department enforced prerequisite: MATH 6350. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6534 (3) Topics in Mathematical Probability

Offers selected topics in probability such as sums of independent random variables, notions of convergence, characteristic functions, Central Limit Theorem, random walk, conditioning and martingales, Markov chains and Brownian motion. Department enforced prerequisite: MATH 6310. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6550 (3) Introduction to Stochastic Processes

Systematic study of Markov chains and some of the simpler Markov processes, including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: APPM 6550

Requisites: Restricted to graduate students only.

MATH 6730 (3) Set Theory

Presents cardinal and ordinal arithmetic, and basic combinatorial concepts, including stationary sets, generalization of Ramsey's theorem, and ultrafilters, consisting of the axiom of choice and the generalized continuum hypothesis. Department enforced prerequisites: MATH 4000 or MATH 5000 and MATH 4730 or MATH 5730. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6740 (3) Forcing

Presents independence of the axiom of choice and the continuum hypothesis, Souslin's hypothesis and other applications of the method of forcing. Introduces the theory of large cardinals. Department enforced prerequisite: MATH 6730. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6900 (1-3) Independent Study

Instructor consent required for undergraduates.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 6940 (1) Master's Degree Candidate

This course is for students preparing for the no-thesis option for a master's degree. The content is set by the students' advisors.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

MATH 6950 (1-6) Master's Thesis**MATH 8114 (3) Topics in Number Theory**

May include the theory of automorphic forms, elliptic curves, or any of a variety of advanced topics in analytic and algebraic number theory. Department enforced prerequisite: MATH 6110. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8174 (3) Topics in Algebra I

Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8250 (3) Mathematical Theory of Relativity 1

Focuses on Maxwell equations, Lorentz force, Minkowski space-time, Lorentz, Poincare, and conformal groups, metric manifolds, covariant differentiation, Einstein space-time, cosmologies, and unified field theories. Instructor consent required.

Requisites: Restricted to graduate students only.

MATH 8304 (3) Topics in Analysis 1

Presents advanced topics in analysis including Lie groups, Banach algebras, operator theory, ergodic theory, representation theory, etc. Department enforced prerequisites: MATH 8330 and MATH 8340. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8330 (3) Functional Analysis 1

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisites: MATH 6310 and MATH 6320. Instructor consent required for undergraduates. See also MATH 8340.

Requisites: Restricted to graduate students only.

MATH 8340 (3) Functional Analysis 2

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisite: MATH 8330. Instructor consent required for undergraduates. See also MATH 8330.

Requisites: Restricted to graduate students only.

MATH 8370 (3) Harmonic Analysis 1

Examines trigonometric series, periodic functions, diophantine approximation and Fourier series. Also covers Bohr and Stepanoff almost periodic functions, positive definite functions and the L^1 and L^2 theory of the Fourier integral. Applications to group theory and differential equations. Department enforced prerequisites: MATH 5150 and MATH 6320. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8714 (3) Topics in Logic 1 and 2

Requisites: Restricted to graduate students only.

MATH 8815 (1-3) Ulam Seminar

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MATH 8900 (1-3) Independent Study

Instructor consent required for undergraduates.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

Requisites: Restricted to graduate students only.

Mathematics - Master of Arts (MA)

MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the concurrent bachelor's/master's degree program (see below) or as a graduate student.

As a rule, graduate students are admitted to the PhD program in Mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Concurrent Degree Program

BA/MA in Mathematics

The Department of Mathematics Concurrent Bachelor's/Master's Program leads to both a BA in Mathematics and either an MA in Mathematics or an MS in Applied Mathematics. It allows highly motivated and successful students to experience graduate-level course work earlier in their education than would otherwise be possible, and also allows them to obtain a master's degree in a reduced time period. Students are allowed to count six hours of graduate-level Mathematics Department course work towards both their undergraduate and graduate degree requirements.

The earliest admission to the program is after the successful completion of at least total 45 credit hours and a minimum of two upper division courses from the Department of Mathematics. Students must have at least one year of coursework remaining towards the completion of their undergraduate degree in order to be admitted to the program. Students admitted to the program may not pursue a double degree or a double major; however, outside minors are allowed.

For more information, see http://www.colorado.edu/math/undergraduate/math_advising/documents/concurrentdegreeguidelines2015.pdf

Requirements

Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help

demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

Degree Requirements

Students must complete 30 hours of approved credit. At least 24 credit hours must be completed at the 5000 level or above. A maximum of six credit hours may be completed at the 3000 or 4000 level if approved by the department. Students must take two 2-semester sequences. For fulfillment of all course requirements, mathematics courses must be numbered 5000 or higher excluding MATH 5820.

For the MS degree in applied mathematics, 6–12 credit hours must be in an approved minor program outside the mathematics department, and at least 18 credit hours must be approved inside the mathematics department.

Students should read carefully the materials describing the university requirements in the Graduate School section. The student is responsible for satisfying these requirements at the proper time.

Examinations

To earn an MA degree, a student must pass a master's examination based on the particular program of the student.

Thesis

For the MA degree in mathematics, students can pursue a thesis option, which requires 4–6 credit hours of thesis work, and a thesis defense.

Mathematics - Doctor of Philosophy (PhD)

The Department of Mathematics offers course work and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes, and topology.

For more information, visit the Department of Mathematics (<http://www.colorado.edu/math>) website.

Requirements

Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

Degree Requirements

Students must complete at least 30 credit hours of approved graduate course work and 30 credit hours of thesis work.

Before being admitted to candidacy for the PhD degree in mathematics, a student must take two graduate courses each in algebra, real analysis and geometry/topology en route to passing two out of three preliminary exams in these fields. In addition, the student must take a course in complex analysis. The student must then pass a comprehensive exam.

Students should read the Doctoral Degree Requirements (p. 867) section carefully. The student is responsible for satisfying these requirements at the proper time.

Molecular, Cellular and Developmental Biology

In view of the strong research orientation of the fields involved, the department does not accept applications from students seeking the MA as a terminal degree. The master of arts degree, either with a thesis (Plan I) or without (Plan II), is awarded under special circumstances.

Course code for this program is MCDB.

Doctoral Degree

- Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD) (p. 1042)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MCDB 5210 (3) Cell Structure and Function (Lecture and Discussion)

MCDB 5220 (3) Molecular Genetics (Methods and Logic)

Requisites: Restricted to graduate students only.

MCDB 5230 (3) Gene Expression (Lecture and Discussion)

Requisites: Restricted to graduate students only.

MCDB 5250 (3) Topics in Developmental Genetics (Methods and Logic)

Repeatable: Repeatable for up to 6.00 total credit hours.

MCDB 5301 (3) Immunology

Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and malfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4300

Requisites: Restricted to graduate students only.

MCDB 5310 (3) Microbial Genetics and Physiology

Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism, regulation of gene expression and protein function, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4310

MCDB 5312 (3-4) Quantitative Optical Imaging

Explores the fundamentals of optical imaging in biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis. MATLAB will be taught throughout the course and used for image processing.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4312

Grading Basis: Letter Grade

MCDB 5350 (3) Microbial Diversity and the Biosphere

Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4350

Requisites: Restricted to graduate students only.

MCDB 5361 (3) Evolution and Development

Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. Reviews basic principles of molecular developmental biology and applies these concepts to critically discuss current research in the field of Evo-Devo (evolution and development).

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4361

MCDB 5425 (3) Topics in Membrane Biology: Cell Biology, Physiology and Disease

Students will apply their knowledge of basic biology to exploring several of the most exciting topics in biomedicine including protein folding and stress responses, nutrient sensing and balance and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes and cardiovascular disease.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4425

Requisites: Restricted to graduate students only.

MCDB 5426 (3) Cell Signaling and Developmental Regulation

Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4426

MCDB 5427 (3) Biology of the Visual System

Explores the neurobiology, cell biology, genetics and developmental biology of the visual system. Discusses neurodegenerative and vascular diseases that lead to blindness. Students read and analyze original research articles to train scientific reasoning. Involves student-organized presentations and classroom discussion.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4427

Requisites: Requires prerequisite courses of MCDB 3135 and MCDB 3145 (all minimum grade D-).

MCDB 5441 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4441 and EBIO 4440 and EBIO 5440

Requisites: Restricted to graduate students only.

MCDB 5471 (3) Mechanisms of Gene Regulation in Eukaryotes

Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing and translation. Is based on critical analysis of primary research papers. Written assignments and oral presentations are required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4471

MCDB 5520 (3) Bioinformatics and Genomics

Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics and pharmacogenomics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4520

Requisites: Restricted to graduate students only.

MCDB 5521 (1) Bioinformatics and Genomics Laboratory

Provides experience with, and exposure to, computational and experimental methods in bioinformatics and genomics. Meets once a week. Students are expected to read original research papers, discuss findings, plan and execute data analysis in selected areas.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4521

Grading Basis: Letter Grade

MCDB 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4550 and PHYS 4550 and PHYS 5550

MCDB 5560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4560 and PHYS 4560 and PHYS 5560

Grading Basis: Letter Grade

MCDB 5615 (3) Biology of Stem Cells

Stem cells have received considerable notice in both the scientific and social arena. Examines the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4615

Requisites: Restricted to graduate students only.

MCDB 5621 (3) Genome Databases: Mining and Management

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4621 or CHEM 5621 MCDB 4621

MCDB 5650 (1) Teaching and Learning in Undergraduate Science Courses

Discusses recent research on how students learn and applications to the teaching of undergraduate science courses. Conducted as an interactive workshop, in which active-engagement in learning approaches are modeled and experienced by participants. Open to undergraduate and graduate students. May be used to fulfill the pedagogical training requirement for undergraduate Learning Assistants in upper division science courses. Post-doctoral and faculty auditors are welcome to participate as regular auditors.

MCDB 5651 (3) Developmental Biology

Explores the development of invertebrate and vertebrate organisms, emphasizing cellular, molecular and genetic mechanisms. Focuses on conceptual understanding and experimental approaches to topics such as embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis and developmental genetics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4650

Requisites: Restricted to graduate students only.

MCDB 5680 (3) Mechanisms of Aging

Studies aging as a developmental process emphasizing genetic, cellular and molecular mechanisms.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4680

Requisites: Restricted to graduate students only.

MCDB 5776 (1) Scientific Ethics and Responsible Conduct in Research

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5776

Requisites: Requires a corequisite course of MCDB 5230 or CHEM 5771.

MCDB 5777 (3) Molecular Neurobiology

Introduces the functional anatomy of the nervous system and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4777

MCDB 5811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4811 and EDUC 4811 and EDUC 6811

Requisites: Restricted to graduate students only.

MCDB 6000 (3) Introduction to Laboratory Methods

Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to plan and execute experiments in selected areas. Open only to MCDB graduate students.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Biological Sciences (MCDB) graduate students only.

MCDB 6440 (1-3) Special Topics in MCD Biology

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MCDB 6621 (1) Special Topics in RNA

Reviews and evaluates recent scientific literature in the field of RNA chemistry and biology, including topics in structure, catalysis, bioinformatic approaches and control of gene expression. Primarily for graduate level presentation of special topics by students and research staff.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 6621

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

MCDB 6940 (1) Master's Degree Candidate

Grading Basis: Pass/Fail

MCDB 6950 (1-6) Master's Thesis

Students seeking a master's degree should consult a departmental advisor. Plan I or Plan II is offered.

MCDB 7840 (1-6) Graduate Independent Study

An independent study contract is required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

MCDB 7910 (1) Seminar Practicum

Designed for graduate students to give oral presentations on their thesis research, field questions, respond to critiques, and present background information.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

MCDB 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD)

Areas of Study

Opportunities for graduate study and original research leading to the PhD degree are available in a variety of areas. The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree if they decide to leave the program after completing 30 hours of graduate course work and the PhD oral and written comprehensive examination.

Molecular Biology

Includes gene regulation, virology, nucleic acid-protein interactions, chromosome structure and function, chromosome replication, microbial diversity, human genome structure, RNA structure and catalysis.

Cell Biology

Includes cytoskeleton, biophysical cytology, vacuole assembly, analysis of yeast spindle pole bodies and vertebrate centrosomes, synthesis and secretion of glycoproteins and polysaccharides, defense responses in plants and 3-D high resolution reconstruction, biogenesis of mitochondria and chloroplasts, energy metabolism, assembly of membrane protein complexes, cell cycle regulation and checkpoints and signal transduction.

Developmental Biology

Covers mechanisms and regulation of morphogenesis and cell growth, genetic control of development, molecular genetics of embryogenesis, sex determination, ras proteins and vulval development and programmed cell death in nematodes, molecular genetics of *Drosophila* neurobiology, developmental genetics of *Drosophila* and *Caenorhabditis*, neural development in mice, transgenic mice and muscle development and function.

Genetics

Includes genetics of human disease, complex traits, mouse development and invertebrate development.

Requirements

Admission Requirements

The graduate program of the Department of Molecular, Cellular and Developmental Biology is sufficiently flexible to accommodate students with a wide range of training. Students with bachelor's degrees in any of the biological, biochemical or physical sciences are encouraged to apply. Background necessary for the program includes the equivalent of undergraduate courses in cell biology, developmental biology, genetics, organic chemistry, biochemistry, chemical thermodynamics, differential and integral calculus and general physics.

Prerequisites

Students accepted with deficiencies may demonstrate mastery of the required areas by taking appropriate undergraduate courses, by passing advanced-standing examinations or by successfully completing graduate-level courses that require the undergraduate courses as prerequisites. Students admitted generally have independent research experience.

Degree Requirements

A minimum of 30 credit hours of courses numbered 5000 and above, plus 30 credit hours of doctoral thesis, are required. Specific courses depend on the student background and field of specialization.

The faculty of the department offers a variety of courses to help graduate students acquire knowledge in the various areas of study. Further, students are required to work in at least three different laboratories to broaden their education and to help them identify the field of greatest interest for their thesis work.

Advisory Committee

An advisory committee, appointed upon entrance, develops an appropriate curriculum based in part on the student's background. A written preliminary exam consists of a series of courses and exams administered during the first year.

Qualifying Exam

A comprehensive qualifying exam administered at the beginning of the spring semester of the second year includes a written research proposal and an oral defense of the proposal that emphasizes breadth and depth of knowledge as well as an ability to communicate and synthesize facts into a coherent scientific argument.

Thesis

The principal elements in graduate training are defining a thesis problem, investigating this problem with a coherent piece of research that constitutes a substantial contribution to knowledge, and writing a report on this work in the form of peer-reviewed journal articles and a thesis submitted to a departmental committee for approval. After completion of the thesis, each candidate for the PhD degree is required to take a final oral examination on the thesis and related topics, and to present a public seminar.

Teaching

Generally, each candidate for the PhD degree does two semesters of apprentice teaching. This obligation is usually met during the student's first year of graduate study.

Museum and Field Studies

Graduate training in anthropology, art history, history, botany, entomology, paleontology and zoology is provided under the direction of museum faculty in cooperation with cognate departments and the Museum and Field Studies Program. Areas of study include, but are not limited to:

- anthropological interpretation
- diatom taxonomy, systematics and ecology
- southwestern archaeology and ethnology
- plant taxonomy, evolution and phytogeography
- vertebrate paleontology and Cenozoic mammals
- biology of aquatic invertebrates
- systematics and population biology of insects of the Rocky Mountain Region

- plant–insect interactions
- mammalogy

Museum assistantships include support from the Walker Van Riper fund and research support from the Collie and William Henry Burt museum funds. Other financial assistance is available to selected students. Students interested in working toward advanced degrees under the direction of museum faculty may use the contact information above.

Course code for this program is MUSM.

Master's Degree

- Museum and Field Studies - Master of Science (MS) (p. 1045)

Certificate

- Museology - Graduate Certificate (p. 1047)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MUSM 5011 (4) Introduction to Museum Studies

Provides background in history and literature of museums, their objectives and methods, laboratory exercises in curatorship, exhibition theory, and administration.

Additional Information: Departmental Category: Museum Studies

MUSM 5021 (2-3) Selected Museum Topics

Additional Information: Departmental Category: Museum Studies

MUSM 5030 (3) Museum Education

Surveys and discusses the educational role of museums and informal learning centers. Issues include current trends, learning theories and styles, learning from objects, education programs, diverse audiences, museum/school partnerships, and the role of education in exhibit development.

Additional Information: Departmental Category: Museum Studies

MUSM 5031 (3) Museums and the Public: Exhibit Development

Covers elements of exhibition development and design, up to production and evaluation of exhibit prototypes. The team approach is emphasized. Department enforced prerequisite: restricted to graduate students.

Additional Information: Departmental Category: Museum Studies

MUSM 5041 (3) Museum Administration

Covers theory of organizations and how it applies to museums, application of small business management and nonprofit organizations to museums, marketing and development and grant writing and funding strategies. Department enforced prerequisite: restricted to graduate students.

Additional Information: Departmental Category: Museum Studies

MUSM 5045 (3) Introduction to Museum Anthropology

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and ANTH 5045

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Anthropology

MUSM 5051 (3) Museum Collections Management

Deals specifically with curation and data management. Topics include acquisition practices and problems; organization, management, use and preventive conservation of collections; computer data management of collections.

Additional Information: Departmental Category: Museum Studies

MUSM 5061 (3) Introduction to Scientific Illustration

Intended for students with little to no art background. Focus is on the accurate rendering of scientific subjects for publication and for public display. Course begins with basic drawing skills and sharpening of visual perception. Students progress to be able to produce realistic renderings of subjects. Students are exposed to a variety of black and white and color techniques and the standards for presenting illustrations for a variety of audiences. Course concludes with computer illustration tools and techniques.

Additional Information: Departmental Category: Museum Studies

MUSM 5474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and GEOL 5474

Additional Information: Departmental Category: Geology

MUSM 5484 (3) Museum Field Methods in Geology

Paleontological and paleoecological field techniques including collecting; recording of geographic, stratigraphic and quarry information; preservation; interpretation, including applicable readings. Designed for individuals who have some background in geology but little or no prior field experience. Offered summer only.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4484

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geology

MUSM 5760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4760 and EBIO 5760

Additional Information: Departmental Category: Zoology

MUSM 5795 (3) Field Methods in Zoology and Botany

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods, and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4795 and ENVS 4795

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Zoology

MUSM 5900 (1-6) Graduate Independent Study

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4900

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Independent Study

MUSM 5912 (3) Collections Research Practicum in Cultural Anthropology

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4912 and ANTH 4470 and ANTH 5470

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Anthropology

MUSM 5913 (3) Museum Practicum in Botany

Students take part in curatorial procedures of the botany section of the museum: specimen preparation, labeling, identification, cataloguing, conservation and collection management. Enrollment is limited therefore students should make arrangements during the previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4913

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Botany

MUSM 5914 (3) Museum Practicum in Geology

Students take part in curatorial procedures of the geology section of the museum: field collection, specimen preparation, cataloguing, collection management and a survey of current laws as they apply to specimens. Enrollment is limited therefore students should make arrangements during the previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4914

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Geology

MUSM 5915 (1-3) Museum Practicum in Zoology

Students take part in basic curatorial procedures of the zoology section of the museum: relaxing, fixing, positioning, preserving, cataloguing, storing and shipping. Also introduces students to the animal kingdom.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4915

Additional Information: Departmental Category: Zoology

MUSM 5916 (1-3) Museum Practicum in Entomology

Students take part in curatorial procedures of the entomology section of the museum: field collection, specimen preparation, labeling, identification, rearing techniques and exhibit preparation. Enrollment is limited, students should make arrangements during previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4916

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Entomology

MUSM 5917 (1-3) Museum Practicum in Techniques

Students participate in museum public education functions that may include researching, planning, developing, and producing exhibits, traveling trunks, booklets, and other materials. May involve writing labels, molding and casting, conservation, and restoration.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4917

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Museology

MUSM 5918 (3) Museum Practicum in Advanced Collections Management

Provides a hands-on environment for exploring issues in museum collections management. Through lecture, resource procurement, in-class activities and out-of-class projects, students will gain practical and professional experience in areas of policy, procedure, best practices, museum storage planning and legal issues.

Recommended: Prerequisite MUSM 5051.

Additional Information: Departmental Category: Museum Studies

MUSM 6110 (1-3) Seminar in Museum Issues

Offers a weekly seminar for museum and field study students that addresses one new topic each semester relevant to museum operations such as archival administration, museums, multiculturalism, repatriation and others. Department enforced prerequisite: MUSM 5011.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Museum Studies

MUSM 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Department enforced prerequisite: MUSM 5011.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 6150 and HIST 6150 and ANTH 6150

Additional Information: Departmental Category: Museum Studies

MUSM 6930 (2-4) Museum Internship

Provides experience in museums of different sizes, audiences, and subjects, including history, natural history, art, and children's museums. Each student is supervised individually by a faculty member as well as the appropriate person in the cooperating museum.

Additional Information: Departmental Category: Museum Studies

MUSM 6940 (1-4) Master's Degree Candidate

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Museum Studies

MUSM 6950 (1-6) Master's Thesis in Museum and Field Studies

A thesis, which may be of a research, expository, critical or creative type, is required of every master's degree candidate under the thesis option. Department enforced prerequisites: MUSM 5011 and MUSM 5051 and one of the following: MUSM 5030 or MUSM 5031 or MUSM 5041.

Additional Information: Departmental Category: Museum Studies

MUSM 6960 (1-4) Master's Project or Paper in Museum and Field Studies

A project or paper in the student's discipline and related to some aspect of museum studies is required of every master's degree candidate under the non-thesis-option plan. Department enforced prerequisites: MUSM 5011 and MUSM 5051. Students in collections/field track also need MUSM 5030 or MUSM 5031 or MUSM 5041.

Additional Information: Departmental Category: Museum Studies

Museum and Field Studies - Master of Science (MS)

The interdisciplinary museum and field studies program is administered by the University of Colorado Museum of Natural History, in conjunction with the departments of anthropology; history; art history; ecology and evolutionary biology; and geological sciences; as well as other departments. The program provides a strong background in a chosen field as well as theoretical and practical grounding in museology.

Internships are offered at a variety of museums in the region, including natural history, history and art museums. Students completing the MS are trained as collection managers, curatorial assistants, registrars, museum educators, exhibit technicians and administrators.

Program Tracks

Three tracks are available: a collections/field track, a public/administration track and an art history track.

Collections/Field Track

This track offers training for students interested in the curatorial and research aspects of museum work, such as floristic or faunistic studies of the past and present, material culture of the past and present and biological inventory. The curriculum gives students academic training

as well as experience in all areas of museum work. Field experience is offered through the curatorial and field practica.

Public/Administration Track

This track offers education for students interested in the public aspects of the museum such as program development and evaluation, exhibition planning and design, education and the organization and management of museums. The curriculum offers both academic training in a discipline and hands-on experience with all aspects of the public museum.

Art History Track

The art history track in the MFS program is open to applicants who hold a BA degree in the liberal arts, preferably with a major in art history. This track addresses issues specific to the research and curation of artworks. The curriculum provides students with academic training in art history and offers students firsthand museum experience in curatorial and collections work through exhibitions practica and collections research.

Requirements

Admission Requirements

Students must meet all university requirements for admission to graduate school and have a baccalaureate degree and at least a B (3.00) grade-point average in previous academic work. The baccalaureate degree should be in anthropology, biology, geology, geography, history (including archival studies), classics, fine arts or education, although other majors will be considered. Acceptance to the program is decided by the admissions committee of the University Museum in consultation with the student's department. The student must be accepted by an advisor in his or her discipline. Applicants accepted for graduate work by museum faculty must be admitted to the Graduate School.

Course Requirements

The degree in museum and field studies is a two-year program requiring a total of 32 credit hours, plus 150 hours of internship. Depending on the track and plan, students complete from 9 to 15 credit hours in a department and from 13 to 22 credit hours in museology courses.

Cognate hours may be taken in more than one department or school. Some Museum courses may count as cognate hours with advisor approval.

Internship

A museum internship of 150 hours is required.

Committee

A committee of at least three graduate faculty will be selected during the first semester in residence, by consultation between the student, the student's advisor, and the director of the MFS program. At least one member of the committee must be a tenured or tenure-track member of the museum faculty. The committee will serve as program advisors for the comprehensive exam and as the defense committee for the thesis or project. A student and advisor may apply for an exception in writing, which must be approved by the MFS program director.

Degree Plans

Students may choose either the thesis or non-thesis plan.

Plan I: Thesis Option

This plan requires the completion and successful defense of a thesis.

Plan II: Non-Thesis Option

This plan requires the completion of a project and paper.

Museology - Graduate Certificate

Providing professional museum training for CU Boulder graduate students and for museum professionals who seek to upgrade their skills and credentials, the Professional Certificate in Museology serves a range of disciplines in the arts and sciences, education and engineering, as well as the Colorado museum community.

CU Graduate Students

The Museum and Field Studies program offers a Graduate Professional Certificate in Museology for graduate students. This program provides professional training and certification for students at the University of Colorado Boulder whose primary enrollment is in a graduate program in another museum-related discipline (e.g., Anthropology, Art, Art History, Biology, Business Administration, Education, Geological Sciences, History, etc.). For graduate students in other university departments, the coursework in a cognate discipline is provided by MA/MS or PhD programs in their home department.

Museum Professionals

Additionally, the Professional Certificate program is open to museum professionals in Colorado and the surrounding Rocky Mountain region. The program provides an avenue for early and mid-career museum staff to upgrade their skills and credentials in order to better meet the challenges and opportunities that museum work affords in the 21st century. For museum professionals, additional disciplinary work is available as appropriate upper division undergraduate or graduate course work taken as electives under the nondegree study plan available in the ACCESS program through Continuing Education.

Requirements

The Professional Certificate in Museology requires a minimum of 12 credit hours and a 75-hour internship that may be waived if comparable professional experience is demonstrated.

Philosophy

Applicants for admission to the Graduate School for work toward a master's or doctoral degree with a major in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the master's and doctoral programs must satisfy a variety of requirements, including the completion of course work. The department has a diversified faculty that can supervise the writing of a master's theses and doctoral dissertations on a wide range of topics.

The department makes available a limited number of teaching assistantships and assists with job placement. Descriptions of all degree programs are available from the Department of Philosophy.

Students wishing to pursue graduate work in philosophy should note Master's Degree Requirements (p. 866) and Doctoral Degree Requirements (p. 867), and should obtain a copy of the *Graduate Program Rules* from the department.

Course code for this program is PHIL.

Master's Degree

- Philosophy - Master of Arts (MA) (p. 1051)

Doctoral Degree

- Philosophy - Doctor of Philosophy (PhD) (p. 1053)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

PHIL 5010 (3) Single Philosopher

Philosophers covered include, from year to year, Plato, Aristotle, Augustine, Aquinas, Descartes, Spinoza, Locke, Leibniz, Hume, and Kant. Includes at least one course per year on an ancient author and one course per year on a modern author.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4010

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5020 (3) Topics in the History of Philosophy

Examines a specific philosophical problem over an extended historical period.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5030 (1) Greek Philosophical Texts

Selected readings in classical philosophy, with a focus on achieving fluency in reading philosophical Greek. May enroll in multiple sections in the same term.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

PHIL 5040 (1) Latin Philosophical Texts

Selected readings in classical and medieval authors, in the original language. The focus is on achieving fluency in reading philosophical Latin.

Repeatable: Repeatable for up to 7.00 total credit hours.

PHIL 5100 (3) Ethics

Presents representative positions in normative ethics and metaethics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5110 (3) Contemporary Moral Theory

Provides an in-depth look at some recent work in moral theory. Topics covered, varying from year to year, include: consequentialism and its critics; virtue theory; moral psychology; impartiality and the personal point of view.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4110

Requisites: Restricted to graduate students only.

PHIL 5120 (3) Philosophy and Animals

Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5120

Requisites: Restricted to graduate students only.

PHIL 5200 (3) Contemporary Political Philosophy

Provides a survey of recent approaches to political philosophy: liberalism (Rawls, Dworkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); feminism (Jaggar). Topics and readings vary with the instructor.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5210 (3) Philosophy and Social Policy

Studies philosophical approaches to social and political issues such as abortion, bioethics, environmental preservation, human rights, and reverse discrimination. Gives attention to strengths and weaknesses of philosophical treatments of these issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5230 (3) Bioethics and Public Policy

Examines public policy implications of contemporary biological, genetic, biomedical, and behavioral science in light of ethics and human values. Considers theoretical and practical grounds for moral assessment of scientific research and possible applications of technology.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5240 (3) Seminar in Environmental Philosophy

Philosophical examination of several different approaches to environmental problems: economic, juridical, political and ecological. Discusses specific environmental problems, focusing on their moral dimensions, e.g., wilderness preservation, animal rights and land use and urban planning.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5240

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5260 (3) Philosophy of Law

Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4260

Requisites: Restricted to graduate students only.

PHIL 5290 (1-3) Topics in Values and Social Policy

Deals with topics in the area of philosophy and public policy and is often interdisciplinary in focus. Topics vary from one semester to another.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5300 (3) Philosophy of Mind

Discusses topics in the philosophy of mind, including the mind-body problem, consciousness, intentionality, rationality, mental causation and the nature of mental states.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4300

Requisites: Restricted to graduate students only.

PHIL 5340 (3) Epistemology

Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition.

Equivalent - Duplicate Degree Credit Not Granted: 4340

PHIL 5360 (3) Metaphysics

Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will and modality.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4360

Requisites: Restricted to graduate students only.

PHIL 5370 (3) Free Will and Determinism

Explores the full range of questions relating to the problem of free will and determinism. Topics may include; the scientific evidence for determinism, hard versus soft determinism, arguments for and against the compatibility of free will and determinism, moral responsibility and the principle of alternate possibilities, hierarchical motivation, the deep self, reactive attitudes, the intelligibility question for libertarianism, divine foreknowledge.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4370

PHIL 5400 (3) Philosophy of Science

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4400

Requisites: Restricted to graduate students only.

PHIL 5440 (3) Topics in Logic

Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4450 and PHYS 5450 and PHYS 5450

Requisites: Restricted to graduate students only.

PHIL 5460 (3) Modal Logic

Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4460

Requisites: Restricted to graduate students only.

PHIL 5470 (3) Probability and Rational Choice

Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons and Schelling points) and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4470

Requisites: Restricted to graduate students only.

PHIL 5490 (3) Philosophy of Language

Examines theories and problems regarding the nature of language and its relation to reality. Concepts discussed include sense, reference, conventions, intentions and their relation to science and social life. Relevant literature includes readings in Frege, Russell, Quine, Putnam, Kripke and Chomsky.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4490

Requisites: Restricted to graduate students only.

PHIL 5500 (3) Advanced Formal Semantics

Considers topics in the semantics of natural language not normally covered in first courses in philosophy of language. These include: natural deduction and sequent calculi for conditional logic; interpretation as logical inference; Lambek calculus and applicative categorial grammar; applications such as generalized coordination, plurals, higher-order intensional logic, generics, focus, and event-based semantics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHIL 5490.

PHIL 5550 (3) Metaphysics and Epistemology Proseminar

Covers seminal classic texts and/or fundamental topics in analytic metaphysics and epistemology.

Requisites: Restricted to Philosophy graduate students only.

PHIL 5600 (3) Philosophy of Religion

Studies topics falling under philosophy of religion, such as proofs for God's existence, religious language, mysticism, psychology of religion, modern theological movements, miracles, and study of individual theologians.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5700 (3) Aesthetics

Analyzes the principal topics of aesthetics, including such issues as formal structure of aesthetics, the nature of critical judgments, and the status of the work of art.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5800 (3) Open Topics in Philosophy

Variety of new courses at the 5000 level. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5810 (1-3) Special Topics in Philosophy

Instructor meets regularly with three or more students to discuss special topics in philosophy.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5840 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6000 (3-4) Seminar in the History of Philosophy

Studies advanced topics in the history of philosophy. Content varies by semester, but may extend to any period in the history of philosophy, from the Presocratics into the modern era.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6100 (3) Seminar in Ethics

Intensive study of selected topics in ethical theory.

Requisites: Restricted to graduate students only.

PHIL 6200 (3) Seminar in Social and Political Philosophy

Provides an in-depth look at some particular topic in social and political philosophy, such as rights, political freedom, political obligation, or democracy.

Requisites: Restricted to graduate students only.

PHIL 6300 (3) Seminar in Philosophy of Mind

Studies selected topics in philosophy of mind.

Requisites: Restricted to graduate students only.

PHIL 6310 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one course at the 3000 level or higher in computer science, linguistics, philosophy, or psychology.

PHIL 6340 (3) Seminar in Epistemology

Studies some of the main topics of epistemology, such as skepticism, foundations of knowledge, perception, introspection, belief, certainty, and analytic-synthetic distinctions.

Requisites: Restricted to graduate students only.

PHIL 6380 (3) Seminar in Metaphysics

Traditional and contemporary theories of the basic categories used to describe nature and the human relationship to it, including such concepts as substance, identity, space and time, causality, determination, and systematic ontology.

Requisites: Restricted to graduate students only.

PHIL 6400 (3) Seminar in Philosophy of Science

Topics connected with development of nature of science: the structure of scientific theories, the testing of hypotheses, the theory of decisions in science and the basic conceptions and models of abstraction in the history of science.

Requisites: Restricted to graduate students only.

PHIL 6490 (3) Seminar in Philosophy of Language

Studies some of the main topics in the philosophy of language, such as meaning and theories of meaning, translation, speech acts, rules of language, reference, relevance of psycholinguistics, language and thought, and language and ontology.

Requisites: Restricted to graduate students only.

PHIL 6940 (1) Master's Candidate for Degree

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

Grading Basis: Pass/Fail

PHIL 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

PHIL 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint PhD in an approved core discipline and cognitive

Requisites: Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

PHIL 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PSYC 7425 and SLHS 7428

Requisites: Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

Recommended: Prerequisite EDUC 6505 or PHIL 6310.

PHIL 7810 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

Philosophy - Master of Arts (MA)

Applicants for admission to the Graduate School for work toward a master's degree with a major in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the master's program must satisfy a variety of requirements, including the completion of course work. The department has a diversified faculty that can supervise the writing of a master's theses and doctoral dissertations on a wide range of topics. The department makes available a limited number of teaching assistantships and assists with job placement.

Students wishing to pursue graduate work in philosophy should note the Graduate School requirements in the Master's Degree Requirements (p. 866) section and obtain a copy of the *Graduate Program Rules* from the department.

Concurrent Degree Program BA/MA in Philosophy

The Philosophy Department offers a five-year program that leads to the concurrent awarding of both the BA and MA in philosophy. Students

who successfully complete this program receive the two degrees simultaneously, normally at the end of their fifth year of study.

To complete the concurrent BA/MA program, the student will fulfill separately all requirements for the BA and thesis-based MA, with the exception that two 4000-level courses can satisfy requirements for both the BA and the MA. In addition to these two overlapping 4000-level courses, the student must complete all of the remaining requirements for the general major in philosophy (p. 444), as well as all of the remaining requirements for the thesis-based MA in philosophy.

For more information, see the department's Concurrent BA/MA Program (<http://www.colorado.edu/philosophy/undergraduate/concurrent-ba-ma-program>) webpage.

Requirements

Degree Plans

Plan I: Thesis Option

The MA requires:

- 30 hours of approved graduate study at the 5000 level or above (philosophy courses taken below the 5000 level may be taken as PHIL 5810),
- demonstrated proficiency in the core areas of philosophy
- a successful thesis defense.

Four to six hours of the 30 credit hours must be thesis hours; the remaining 24 to 26 hours are for course work credit hours (roughly eight courses). At least 18 hours must be philosophy courses (PHIL 6940 and PHIL 6950 do not count).

No more than 9 hours of credit may be transferred into the program from other graduate programs. Students who enter the MA program already holding an MA degree may not transfer into the program any credits that applied toward the MA degree already held.

Students must demonstrate competence in the core areas of philosophy by passing, with a grade of B or better, one graduate or upper-division course in each of the following three areas: history of philosophy, metaphysics and epistemology, and ethics and social or political philosophy.

Required Courses and Credit Hours

Required Courses

PHIL 6950	Master's Thesis	4-6
-----------	-----------------	-----

Electives

One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Descartes to Kant).	3
---	---

PHIL 5010	Single Philosopher	
PHIL 5020	Topics in the History of Philosophy	
PHIL 6000	Seminar in the History of Philosophy	
One course in metaphysics and epistemology:	3	
PHIL 5300	Philosophy of Mind	
PHIL 5340	Epistemology	
PHIL 5360	Metaphysics	
PHIL 5400	Philosophy of Science	
PHIL 5490	Philosophy of Language	
PHIL 5550	Metaphysics and Epistemology Proseminar	

PHIL 6300	Seminar in Philosophy of Mind	
PHIL 6340	Seminar in Epistemology	
PHIL 6380	Seminar in Metaphysics	
PHIL 6400	Seminar in Philosophy of Science	
One course in ethics and social or political philosophy:	3	
PHIL 5100	Ethics	
Other course as approved by the graduate director.		
Other electives to fulfill the 30-credit minimum:	14-12	
PHIL 5810	Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement)	
PHIL 5840	Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement)	
Demonstrate proficiency in propositional and first-order logic by taking the following course, taking all the examinations of this course and earning the appropriate grade, or by earning the appropriate grade on a comprehensive final exam to be offered in that course each semester:	3	
PHIL 2440	Symbolic Logic	
Total Credit Hours	30	

Thesis and Oral Defense

Each student must prepare a thesis plan acceptable to the chair of his or her thesis committee and proceed to write the thesis, working as closely as necessary with the chair. At the appropriate time, the committee will convene to hold a final oral defense of the thesis. A copy of the thesis must be furnished to each committee member at least two weeks prior to the scheduled date of the defense.

Plan II: Non-Thesis Option

The department will award a non-thesis MA to any student who has completed 36 credits of graduate-level course work with a B+ average or better. Twenty-four hours of course work must be in philosophy.

The student must also meet the standard logic requirement and take six credits in each of our three general areas: history of philosophy, metaphysics and epistemology, and ethics and social or political philosophy.

Standard restrictions on the number of credits earned from special topics and from independent study apply.

Required Courses and Credit Hours

Electives

Two courses on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Descartes to Kant).	6

PHIL 6400	Seminar in Philosophy of Science	
Two courses in ethics and social or political philosophy:		6
PHIL 5100	Ethics	
Other course as approved by the graduate director.		
Other electives to fulfill the 36-credit minimum:		15
PHIL 5810	Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement)	
PHIL 5840	Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement)	
Demonstrate proficiency in propositional and first-order logic by taking the following course, taking all the examinations of this course and earning the appropriate grade, or by earning the appropriate grade on a comprehensive final exam to be offered in that course each semester:		3
PHIL 2440	Symbolic Logic	
Total Credit Hours		36

Philosophy - Doctor of Philosophy (PhD)

The philosophy PhD program at CU Boulder consists of approximately 2.5 years of course work and 2.5 years of dissertation work, with 5 years of guaranteed funding. We are both a research and a teaching department; teaching appointments are not only the principal means of supporting graduate students, but are also the way we train graduate students for a career of teaching as well as doing research in philosophy.

Applicants for admission to the Graduate School for work toward a doctoral degree with a major in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the doctoral programs must satisfy a variety of requirements, including the completion of course work. The department has a diversified faculty that can supervise the writing of doctoral dissertations on a wide range of topics. The department makes available a limited number of teaching assistantships and assists with job placement.

Students wishing to pursue graduate work in philosophy should note Graduate School requirements in the Doctoral Degree Requirements (p. 867) section and obtain a copy of the *Graduate Program Rules* from the department.

Requirements

The PhD requires 45 hours of approved graduate study, in addition to the 30 hours of dissertation credit hours required by the Graduate School. Twenty-seven of the 45 hours (equivalent to 9 courses) must satisfy departmental distribution requirements. Other requirements include a logic requirement, satisfactory completion of the third-semester diagnostic paper and fifth-semester qualifying paper, and successful prospectus oral and dissertation defense.

No more than 21 hours of credit may be transferred into the program from graduate programs outside CU Boulder, or taken through the ACCESS program at CU Boulder. Credits that applied toward another PhD may not

be transferred into this program. All credit transfers must be approved by the DGS. All philosophy courses taken at the 5000 level or above, if taken for the master's degree at CU Boulder, may be applied toward the doctoral degree if they otherwise satisfy the requirements of the PhD program.

No more than 9 hours of credit toward the graduation requirement may be taken in courses outside the department. These courses must be at the graduate level. They should be relevant to the student's main area of interest and approved by the student's advisor and/or the grad advisor.

Students must earn an average of A- (minimum 3.66 on a 4-point scale) over any 9 hours in each of the following three areas: history of philosophy, metaphysics and epistemology, and value theory. Graduate Independent Study (PHIL 5840) may not count toward the distribution requirements.

Required Courses and Semester Credit Hours

Required Courses

PHIL 8990	Doctoral Dissertation	30
-----------	-----------------------	----

Electives

Choose one course in classical philosophy. The topic must cover an ancient philosopher or subject in the period ranging from 5th century BC through Augustine.

PHIL 5010	Single Philosopher	
PHIL 5020	Topics in the History of Philosophy	
PHIL 6000	Seminar in the History of Philosophy	

Choose one course in modern philosophy. The topic must cover a philosopher or subject in the history of early modern philosophy (17th to 18th century).

PHIL 5010	Single Philosopher	3
PHIL 5020	Topics in the History of Philosophy	
PHIL 6000	Seminar in the History of Philosophy	

Choose one open course. The topic must cover a philosopher or subject in the period ranging from classical Greece through 1950 (including the history of early analytic philosophy and the history of early 20th-century continental philosophy).

PHIL 5010	Single Philosopher	3
PHIL 5020	Topics in the History of Philosophy	
PHIL 6000	Seminar in the History of Philosophy	

Three courses in metaphysics and epistemology:

PHIL 5300	Philosophy of Mind	9
PHIL 5340	Epistemology	
PHIL 5360	Metaphysics	

PHIL 5400	Philosophy of Science	
PHIL 5490	Philosophy of Language	
PHIL 5550	Metaphysics and Epistemology Proseminar	

PHIL 6300	Seminar in Philosophy of Mind	
PHIL 6340	Seminar in Epistemology	
PHIL 6380	Seminar in Metaphysics	

PHIL 6400	Seminar in Philosophy of Science	
PHIL 6490	Seminar in Philosophy of Language	

Three courses in value theory:

PHIL 5100	Ethics	9
PHIL 5110	Contemporary Moral Theory	
PHIL 5200	Contemporary Political Philosophy	
PHIL 5210	Philosophy and Social Policy	

PHIL 5230	Bioethics and Public Policy
PHIL 5240	Seminar in Environmental Philosophy
PHIL 5260	Philosophy of Law
PHIL 5290	Topics in Values and Social Policy
PHIL 6100	Seminar in Ethics
PHIL 6200	Seminar in Social and Political Philosophy

Total Credit Hours

57

Diagnostic Paper

During the first week of the third semester of study in the PhD program, each student who did not enter the program with two years of prior graduate work or with an MA degree in philosophy from elsewhere will submit a diagnostic paper in a core area of philosophy. It may be an expanded version of a paper written for a first-year class, and should be 4,500 to 7,000 words in length.

In the case of students who are entering the program with two years of prior graduate work or with an MA degree in philosophy from elsewhere, a 4,500- to 7,000-word diagnostic paper must be submitted during the student's first semester in the PhD program. This can be a paper produced for a course at CU Boulder.

In either case, a committee composed of three members specializing in the appropriate area and appointed by the graduate director will evaluate the work and alert students to any problems or difficulties.

Students entering our PhD program with an MA in philosophy from CU Boulder are exempt from this requirement.

Prospectus and Oral Examination

After passing the qualifying paper, students must assemble a prospectus committee of five members of the department, with a clearly designated chair. Students must submit a written prospectus to this committee, which, after judging the prospectus acceptable, will conduct an oral exam concerning this prospectus and related topics.

Dissertation and Oral Defense

Students must write a dissertation that is acceptable to the dissertation committee and defend the dissertation in a public, oral defense at a time deemed appropriate by the committee.

Recommended Plan of Study

Ideally, PhD students in their first two years will take and complete three courses per semester, for a total of 12 courses (36 credit hours) by the end of the second year. The minimum number of courses PhD students can take to make good progress in the first two years of the program is five courses per year.

At the beginning of the third semester in the program, students turn in a diagnostic paper, with feedback from three faculty members.

At the beginning of the fifth semester in the program, students turn in the fifth-semester qualifying paper, which will be evaluated anonymously; this is a qualifying event that the student must pass in order to be considered for advancement to candidacy in the PhD program.

In the fifth semester, students continue to take courses in order to complete the required 45 hours of course work (15 courses). Ideally, students should have completed course work by the end of their fifth semester and should begin work on the prospectus.

Students should defend their work in a prospectus oral exam sometime in their sixth semester. Students are eligible to sign up for up to 10 dissertation hours before they pass their prospectus exam.

The remainder of the required 30 dissertation hours are used in the fourth and fifth years in the program while completing the dissertation.

Physics

Graduate study and opportunities for basic research are offered in the areas of nuclear physics, theoretical physics, condensed matter physics, elementary particle physics, plasma physics, atomic and molecular physics, optical science and engineering, laser physics, fundamental measurements, liquid crystal science and technology, biophysics, and physics education research.

Doctoral programs in chemical physics and geophysics are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

Course code for this program is PHYS.

Master's Degree

- Physics - Master of Science (MS) (p. 1060)

Doctoral Degree

- Physics - Doctor of Philosophy (PhD) (p. 1061)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor; PhD, University of Chicago

Courses

PHYS 5030 (3) Intermediate Mathematical Physics 1

This course and its continuation, PHYS 5040, form a survey of classical mathematical physics. Studies complex variable theory and finite vector spaces, and includes topics in ordinary and partial differential equations, boundary value problems, potential theory, and Fourier analysis.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5030

Requisites: Restricted to graduate students only.

PHYS 5040 (3) Intermediate Mathematical Physics 2

Continuation of PHYS 5030. Includes group theory, special functions, integral transforms, integral equations and calculus of variations.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5040

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5030.

PHYS 5130 (3) Biological Electron Microscopy: Principles and Recent Advances

Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stm, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4130

PHYS 5141 (3) Astrophysical and Space Plasmas

Covers magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5140

Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

PHYS 5150 (3) Introductory Plasma Physics

Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory). Department enforced prerequisite: PHYS 3310. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5150

Requisites: Restricted to graduate students only.

PHYS 5160 (3) Fundamentals of Optics and Lasers

Covers the basic physics of lasers. Topics include basics of optical resonators and gaussian beam propagation, stimulated emission, laser threshold conditions, laser linewidth, q-switching and mode locking of lasers, tuning of Cw lasers, and specifics of various common lasers.

Requisites: Restricted to graduate students only.

PHYS 5210 (3) Theoretical Mechanics

Variational principles, Lagrange's equations, Hamilton's equations, motion of rigid body, relativistic mechanics, transformation theory, continuum mechanics, small oscillations, Hamilton-Jacobi theory.

Requisites: Restricted to graduate students only.

PHYS 5250 (3) Introduction to Quantum Mechanics 1

Quantum phenomena, Ehrenfest theorem and relation to classical physics, applications to one-dimensional problems, operator techniques, angular momentum and its representations, bound states and hydrogen atom, and Stern-Gerlach experiment and spin and spinor wave function. Department enforced prerequisite: advanced undergraduate quantum mechanics course.

Requisites: Restricted to graduate students only.

PHYS 5260 (3) Introduction to Quantum Mechanics 2

Symmetries and conservation laws, identical particle systems, approximation techniques (including time-dependent and time-independent perturbation theories and variational techniques) and their applications, scattering theory, radiative transitions, and helium atom.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5250.

PHYS 5430 (3) Advanced Laboratory

Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today. Department enforced prerequisites: PHYS 3330 and PHYS 3220 and PHYS 3320. Department enforced corequisites: PHYS 4410.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4430

Requisites: Restricted to graduate students only.

PHYS 5450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4450 and PHIL 4450 and PHIL 5450

Requisites: Restricted to graduate students only.

PHYS 5460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4460 and EDUC 4460 and EDUC 5460

Requisites: Restricted to graduate students only.

PHYS 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4550 and MCDB 4550 and MCDB 5500

PHYS 5560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4560 and MCDB 4560 and MCDB 5560

Grading Basis: Letter Grade

PHYS 5606 (3) Optics Laboratory

Consists of 13 optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers and holograms, and experimentation of fiber optics and Fourier optics.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5606

Recommended: Prerequisite undergraduate optics course such as PHYS 4510.

PHYS 5770 (3) Gravitational Theory (Theory of General Relativity)

Presents Einstein's relativistic theory of gravitation from geometric viewpoint; gives applications to astrophysical problems (gravitational waves, stellar collapse, etc.). Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 3220 and PHYS 3320.

PHYS 5840 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 5970 (3) Seminar: Physical Methods in Biology

Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, EELS, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, PET, CAT), Fourier analysis, synchrotron radiation, EXAFS, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4970

Requisites: Restricted to graduate students only.

PHYS 6260 (3) Geometry of Quantum Fields and Strings

Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories.

Equivalent - Duplicate Degree Credit Not Granted: MATH 6260

Recommended: Prerequisites MATH 6230 and PHYS 5250 and MATH 6240 and PHYS 7280.

PHYS 6610 (3) Earth and Planetary Physics 1

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6610 and ASTR 6610

Requisites: Restricted to graduate students only.

PHYS 6620 (3) Earth and Planetary Physics 2

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6620 and ASTR 6620

Requisites: Restricted to graduate students only.

PHYS 6630 (3) Earth and Planetary Physics 3

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and ASTR 6630

Requisites: Restricted to graduate students only.

PHYS 6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6650 and GEOL 6650

Requisites: Restricted to graduate students only.

PHYS 6670 (2) Geophysical Inverse Theory

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6670

Requisites: Restricted to graduate students only.

Recommended: Prerequisites a course in calculus and a course in computer programming (any language).

PHYS 6940 (1) Master's Degree Candidate

Grading Basis: Pass/Fail

PHYS 6950 (1-6) Master's Thesis

Approved problem in theoretical or experimental physics under the direction of staff members. Intended to introduce the student to procedures in research and development work. Work of an original nature expected.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHYS 7160 (3) Intermediate Plasma Physics

Continuation of PHYS 5150. Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 7160

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5150.

PHYS 7230 (3) Statistical Mechanics

Classical and quantum statistical theory, including study of both equilibrium and nonequilibrium systems. Topics covered include kinetic theory, degenerate gases, macrocanonical and grand canonical ensembles, and irreversible processes. Department enforced prerequisite: advanced undergraduate quantum mechanics course.

Requisites: Restricted to graduate students only.

PHYS 7240 (3) Advanced Statistical Mechanics

Introduces current research topics in statistical mechanics. Topics vary from year to year and may include phase transitions, critical phenomena, nonequilibrium phenomena, dense fluids, dynamical systems, plasma physics, or quantum statistical mechanics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7230.

PHYS 7250 (3) Quantum Many Body Theory

Theory of quantum many body systems, including methods based on Green's functions, Feynman diagrams, and coherent state path integral with applications to interacting quantum gases, superconductivity and superfluidity, quantum phase transitions, quantum magnetism, quantum motion in the presence of disorder, and topological states of matter.

Requisites: Restricted to graduate students only.

PHYS 7270 (3) Introduction to Quantum Mechanics 3

Radiation theory; relativistic wave equations with simple applications; introduction to field theory and second quantization.

Requisites: Restricted to graduate students only.

PHYS 7280 (3) Advanced Quantum Theory

Quantum theory of fields, elementary particles, symmetry laws, and topics of special interest.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7270 or instructor consent required.

PHYS 7310 (3) Electromagnetic Theory 1

Sophisticated approach to electrostatics, boundary value problems, magnetostatics, applications of Maxwell's equations to electromagnetic wave propagation, wave guides, and resonant cavities and magnetohydrodynamics.

Requisites: Restricted to graduate students only.

PHYS 7320 (3) Electromagnetic Theory 2

Continuation of PHYS 7310. Topics include relativistic particle dynamics; radiation by moving charges; multiple fields; radiation damping and self-fields of a particle; collisions between charged particles and energy loss; radiative processes; and classical field theory.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7310.

PHYS 7430 (3) Soften Condensed Matter Physics

Introduces the science of liquid crystals, polymers, biological membranes, biopolymers, block copolymers, molecular monolayers, colloids, nanoparticle suspensions, emulsions, foams, gels, elastomers and other soft materials. Topics vary from semester to semester and is geared toward graduate students with diverse preparation backgrounds, including students from the Department of Physics, as well as other science and engineering departments.

Requisites: Restricted to graduate students only.

PHYS 7440 (3) Theory of the Solid State

Stresses application to the solid state of physical concepts basic to much of modern physics, single-particle approximation, and the energy-band description of electron states in solids, pseudopotential theory applied to ordered and disordered systems, dynamical behavior of electrons in solids, lattice dynamics, Hartree-Fock and random-phase approximation in solids, many-body aspects of magnetism, and superconductivity.

Requisites: Restricted to graduate students only.

PHYS 7450 (3) Theory of Solid State 2

Second semester of condensed matter physics, covers topics in soft condensed matter physics, liquid crystals, semiconductors, Quantum Hall effect, Fractional Quantum Hall effect, superconductivity and other topics at the discretion of the instructor.

Requisites: Restricted to graduate students only.

PHYS 7550 (3) Atomic and Molecular Spectra

Covers theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.

Requisites: Restricted to graduate students only.

PHYS 7560 (3) Quantum Optics

Covers quantum optical and atomic systems including topics such as: coherent and squeezed states, theory of optical coherence, atom-radiation interaction, optical Bloch equations, open quantum systems, dynamics on the Bloch sphere, resonance fluorescence, beam-splitters and interferometry, entanglement and quantum information.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 3220 and PHYS 4410.

PHYS 7650 (3) Nonlinear and Nano-Optics

Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include: description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their integration, measurement and manipulation and their use in applications including spectroscopy.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 4510 or PHYS 5160.

Grading Basis: Letter Grade

PHYS 7660 (3) Ultrafast Optics

Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their generation, measurement and manipulation and their use in applications including spectroscopy. Department enforced prerequisite: PHYS 5160, or PHYS 4510, or ECEN 5645.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

PHYS 7730 (3) Theory of Elementary Particles

Systematics of elementary particles, leptons, quarks, gauge bosons, symmetries and symmetry breaking, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, gauge theories.

Requisites: Restricted to graduate students only.

PHYS 7810 (1-3) Special Topics in Physics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHYS 7820 (3) Topics in Scientific Writing

Teaches strategies used in scientific writing with emphasis on problem statement, audience analysis and principles of sound argument; reviews and reinforces essential writing skills, stressing the need for careful and strategic revision; provides experience in writing academic and professional communications; presentation skills and proposal writing. Most appropriate for students beginning to write journal articles, Comps II paper, or dissertation chapter.

Requisites: Restricted to graduate students only.

PHYS 7830 (1-3) Plasma Seminar

One credit 'journal club' style course covering current and significant historical advances in plasma physics research. Each week the class is assigned a journal article to read in advance of the meeting and one student is selected (on a rotating basis) to present a synopsis and lead a round-table discussion. Cannot be used for minimum credit hour requirements of graduate program. See also PHYS 7810 and PHYS 7820. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

PHYS 7840 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 7850 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 7915 (1) Seminar Topics in Physics

Various seminar topics not normally covered in the curriculum: offered intermittently depending on student demand and availability of instructors.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHYS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Physics - Master of Science (MS)

Students may obtain a master's degree as either an undergraduate student through the concurrent bachelor's/master's degree program or as a graduate student. Undergraduate students can apply to the concurrent bachelor's/master's degree program any time after completion of the typical first-semester junior physics classes and before graduation.

Graduate students are generally only admitted to the PhD program in physics. Therefore, graduate students who have completed their PhD comprehensive exam or who are unable to complete the PhD program may earn an MA degree en route to a PhD degree. In certain circumstances, students can be admitted to the graduate program for a terminal master's degree, in which case the prerequisites are the same as for the doctoral program.

Concurrent Degree Programs

BA/MS in Physics

The BA/MS program in physics aims to provide new opportunities for undergraduate physics majors. The program is specifically addressed to the students in the Plan 1 major program of the Department of Physics. The Plan 1 physics major gives students a thorough grounding in theoretical physics so that they are well prepared either to proceed with graduate work or with professional employment. For students interested in graduate studies, the BA/MS program in physics allows for participation in graduate course work and research in a broad range of areas. For students interested in immediate professional employment, the BA/MS program would serve as a terminal degree program that qualifies students for a higher level of employment.

For more information, see the Department of Physics Concurrent Bachelor's/Master's Degree (<http://www.colorado.edu/physics/academics/undergraduate-students/concurrent-bachelorsmasters-degree>) website.

BS/MS in Engineering Physics and Physics

The BS/MS program in engineering physics aims to provide new opportunities for undergraduate engineering physics majors. The program is specifically addressed to engineering physics majors in the Department of Physics. The engineering physics major gives students a thorough grounding in theoretical physics, applied mathematics, and broad exposure to engineering topics, so that they are well prepared

either to proceed with graduate work or with professional employment in either basic science or in applied fields. For students interested in graduate studies, the BS/MS program in engineering physics allows for participation in graduate course work and research in a broad range of areas. For students interested in immediate professional employment, the BS/MS program would serve as a terminal degree program that qualifies students for a higher level of employment.

For more information, see the Department of Physics Concurrent Bachelor's/Master's Degree (<http://www.colorado.edu/physics/academics/undergraduate-students/concurrent-bachelorsmasters-degree>) website.

Requirements

Qualifying Examination

The Graduate Record Examination (GRE) aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

Course Requirements

There are two separate plans for obtaining the master's degree, both of which require a total of 30 credit hours at the 5000 level or above (up to 6 credit hours may be at the 3000 or 4000 level if approved by the physics graduate chair). All but 3 credit hours must be in physics (more credit hours may be allowed with permission of the physics graduate chair). A minimum of a B average (GPA of 3.0) must be maintained.

Degree Plans

Plan I: Thesis Option

This plan requires 4–6 thesis credit hours and completion of five of the following courses with a grade of B- or better.

Required Courses

Select five of the following courses:	15
PHYS 5430	Advanced Laboratory
PHYS 5250	Introduction to Quantum Mechanics 1
PHYS 5260	Introduction to Quantum Mechanics 2
PHYS 7310	Electromagnetic Theory 1
PHYS 7320	Electromagnetic Theory 2
PHYS 5210	Theoretical Mechanics
PHYS 7230	Statistical Mechanics
Total Credit Hours	15

The student must write a thesis and present a talk to a three-member faculty committee.

Plan II: Non-Thesis Option

This plan requires completion of five of the following courses with a grade of B- or better.

Required Courses

Select five of the following courses:	15
PHYS 5250	Introduction to Quantum Mechanics 1
PHYS 5260	Introduction to Quantum Mechanics 2
PHYS 7310	Electromagnetic Theory 1
PHYS 7320	Electromagnetic Theory 2
PHYS 5210	Theoretical Mechanics

PHYS 7230	Statistical Mechanics
-----------	-----------------------

Total Credit Hours

15

The student must pass the comprehensive exam II, which is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question and answer oral session.

Physics - Doctor of Philosophy (PhD)

Graduate study and opportunities for basic research are offered in the areas of nuclear physics, theoretical physics, condensed matter physics, elementary particle physics, plasma physics, atomic and molecular physics, optical science and engineering, laser physics, fundamental measurements, liquid crystal science and technology, biophysics, and physics education research.

Doctoral programs in chemical physics (p. 939) and geophysics (p. 1002) are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

Requirements

Prerequisites

Entering graduate students must have a thorough undergraduate preparation in physics, equivalent to an undergraduate physics major at a recognized college or university. This preparation includes courses in general physics, analytical mechanics, electricity and magnetism, thermodynamics, quantum mechanics, atomic physics and mathematics through differential equations and complex variables.

Students wishing to pursue graduate work in physics leading to candidacy for an advanced degree should carefully read the Doctoral Degree Requirements (p. 867) section of this catalog.

Qualifying Examination

The Graduate Record Examination aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

Course Requirements

To earn a PhD, candidates must complete 30 credit hours of graduate courses and 30 hours of dissertation credit. At least 27 of the 30 credit hours of course work must be physics courses at the 5000 level or above; exceptions may be granted with the discretion of the associate chair of graduate studies. All courses, required or otherwise, must be passed with a grade of B- or better, and a course may be repeated only once.

Comprehensive Examination

The comprehensive examination is divided into three parts. Part I consists of passing any five of the following six courses with a B- or better:

PHYS 5210	Theoretical Mechanics	3
PHYS 7230	Statistical Mechanics	3
PHYS 5250 & PHYS 5260	Introduction to Quantum Mechanics 1 and Introduction to Quantum Mechanics 2	6
PHYS 7310 & PHYS 7320	Electromagnetic Theory 1 and Electromagnetic Theory 2	6

The associate chair may waive courses for students with graduate-level equivalents. Part II is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question-and-answer oral session. Part III consists of a thesis prospectus presented to the thesis committee.

Part II of the comprehensive examination must be taken after successful completion of Part I, but no later than the student's sixth enrolled regular semester. Part III will generally take place the semester following Part II. Parts II and III of the comprehensive examination may be taken a second time, no more than one semester after the first attempt.

Language Requirement

The department has no requirement in foreign languages.

Political Science

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative politics, international relations, public policy, political theory and empirical theory and methodology. The department's mission is to understand the political world and to equip students and their community with the skills for a lifetime of inquiry and engagement.

Course code for this program is PSCI.

Doctoral Degree

- Political Science - Doctor of Philosophy (PhD) (p. 1068)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Instructor

Courses

PSCI 6948 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

PSCI 7002 (3) Seminar in West European Politics

Examines West European politics in terms of general theories of comparative politics, including institutional, behavioral and political economy approaches.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7004 (3) Seminar: Political Theory

Allows for intensive research in and presentation of selected topics. Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Political Theory

PSCI 7008 (1) Teaching Political Science

Designed to prepare graduate student teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline-specific education.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Additional Information: Departmental Category: General

PSCI 7011 (3) Seminar: American Politics

Core field seminar for students of American politics. Course work emphasizes the diversity of contemporary research on American political history, political institutions, and political behavior.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7012 (3) Seminar: Comparative Political Systems

Discusses current literature on comparative politics including theoretical and methodological issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7013 (3) Seminar: International Relations

Reviews salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Allows students wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7021 (3) Latinos and U.S. Politics

Examines in depth the theoretical and empirical literature assessing the political situation and activities of Latinos (Mexican Americans, Puerto Ricans, Cuban Americans, and others) in the U.S. Stresses original research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7022 (3) Seminar in Political and Economic Development

Covers domestic political and economic development in Latin America, Africa, and Asia, as well as interactions with the global economy. Includes defining, explaining, and prescribing policies for successful development, and comparing the experiences of developing and industrialized countries.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7023 (1) Foreign Policy

Examines sources of foreign policy in terms of international pressures, economic interests, bureaucratic politics, cognitive process, public opinion, elections, congress, and presidential leadership. Examines uses and limitations of economic statecraft, military intervention, and current foreign policy issues.

Recommended: Prerequisite PSCI 7013.

Additional Information: Departmental Category: International Relations

PSCI 7024 (3) Seminar: Selected Political Theories

Familiarizes students with selected political philosophies or theories in classical or modern political thought.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Political Theory

PSCI 7028 (1) Teaching Political Science 2

Second course designed to train graduate teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline specific education.

Requisites: Requires prerequisite course of PSCI 7008 (minimum grade D-). Restricted to Political Science (PSCI) graduate students only.

Additional Information: Departmental Category: General

PSCI 7031 (3) Seminar: Political Attitudes and Behavior

Provides an intensive examination of topics in political attitudes and behavior such as political participation, ideology, voting, and elite behavior. Reviews methodology of behavioral research and introduces ICPSR data archive and computer-based research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7032 (3) Seminar: Latin American Politics

Stresses intensive study of the political process in Latin America with special emphasis on democratization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7043 (3) Seminar: Problems of International Organization

Studies selected problems concerning administration and operation of public international organizations, including the United Nations and its specialized agencies. Considers decision making, executive leadership, internal organization, personnel policies, coordination of activities, and financing.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7046 (3) Seminar: Urban Public Policy

Focuses on formulation, revision, and outcomes of public policy in American urban communities. Also uses some comparative Canadian and European literature.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Policy

PSCI 7051 (3) Seminar: The United States Congress

Comprehensively examines literature and selected research topics concerning the United States Congress.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7052 (3) Democracy & Authoritarianism

Examine differences between democracies and authoritarian regimes; the choices and the consequences of democratic institutions in authoritarian regimes; and the causes of authoritarian survival and demise and the subsequent political choice.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PSCI 7012.

Additional Information: Departmental Category: Comparative

PSCI 7053 (3) War and Peace

Explores the conditions that promote conflict between countries, focusing on broad and systemic explanations of war and peace. Investigates classical as well as current behavioral approaches to understanding why countries fight.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7055 (3) Introductory Game Theory

Develops competence in engaging formal theories of politics and in constructing and solving basic game-theoretic models of political behavior.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7056 (3) Readings in Public Policy

Explores diverse approaches to policy choice, change, and learning processes. Overviews literature on policy determinants and typologies, policy subsystems, innovation and diffusion, agenda setting, implementation, problem definition and social construction, policy design, institutional analysis, and policy and democratic values.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Policy

PSCI 7062 (3) The Politics of Ethnicity

Explores the political aspects of pluralism, ethnonationalism, separatism, and related phenomena. Examines theories of ethnic mobilization, conflict, and accommodation in the context of political development and nation building. Includes cross-polity comparisons and case studies of multiethnic societies in the developed and developing world.

Requisites: Restricted to graduate students only.

Recommended: Requisite at least one course in comparative politics.

Additional Information: Departmental Category: Comparative

PSCI 7071 (3) Seminar: An Introduction to the Rule of Law

Introduces students to debates about the role of institutions, particularly but not exclusively legal institutions, in placing limits on the state and fostering the rule of law. What is law? Why do courts exist and what is their role in the state? What institutions are necessary to establish the rule of law? Why are institutions successful in some contexts and not others? Considers these questions by surveying classic and current research from American and comparative politics literatures on topics such as judicial independence, credible commitments, separation of powers and constitutional design.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7073 (3) Seminar: Global Political Economy

Introduces graduate students to concepts, theories, and data used to study the global system from a political-economic framework. Examines world systems analysis, regime change theory, and dependency theory with respect to operation of the exchange and power relationship within the contemporary world system.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7075 (3) Scope and Methods of Political Science

Introduces students to research design, with a subsequent focus on professional development. Students learn about different styles of research, central methodological points surrounding (and differentiating) these styles, and standards for evaluating research, regardless of approach or content.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7085 (4) Introduction to Political Science Data Analysis

Provides intensive experience with quantitative techniques commonly employed in political science research, covering basic inferential and descriptive statistics through multiple regression. Students undertake substantive research projects, requiring lab instruction in the use of the computer in quantitative applications of political science research.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7091 (3) Politics of Social Movements

Examines theoretical and empirical research on American social movements. Emphasizes the role of movements as political actors and their ability to bring about changes in public policy and national political institutions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7095 (3) Advanced Political Data Analysis

Provides advanced training in the statistical modeling of political relationships. Focuses on the properties and assumptions of the ordinary least squares regression model, building on material covered in PSCI 7085: Introduction to Political Science Data Analysis.

Requisites: Requires prerequisite course of PSCI 7085 (minimum grade B-). Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7108 (3) Special Topics

Various topics not normally offered in the curriculum. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSCI 7111 (3) Seminar: American Political Institutions

Intensive examination of the structure and rules of different political institutions in the United States. Explores both the changing approaches to the study of American political institutions as well as many of the major research topics on the presidency, Congress, the judiciary, and the bureaucracy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7112 (3) Seminar: Comparative Political Parties and Interest Groups

Critically examines topics relating to social forces, parties, and interest groups. Analyzes concepts, theories, and case studies with particular emphasis on Western political systems. Also examines party systems in comparison and the role of groups and the determinants of group politics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7114 (3) Survey of Historical and Contemporary Political Theory

Examines major texts of Western political thought from the ancients through the 21st century. Introduces students to major schools of contemporary political theory, while situating these in their larger political context. Professionalizes students through presentations and research projects. Texts vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Requisite some previous coursework in political theory or philosophy.

Additional Information: Departmental Category: Political Theory

PSCI 7115 (3) Qualitative Methods

Develop proficiency in constructing research designs with qualitative methods. The goal is to understand and be able to justify research designs involving relatively small numbers of observations as good political science given the fact that such designs may limit our ability to generalize.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7116 (3) Context-Sensitive Research Methods

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5740

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Policy

PSCI 7123 (3) Seminar: Conflict Behavior - The Politics of Violence

Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including causes and consequences of riots, terrorism, revolution, international war, and intervention.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7124 (3) Contemporary Democratic Theory

Surveys major schools of contemporary democratic theory and introduces students to current scholarly debates about democracy and democratic politics. Professionalizes students through class presentations and research projects. Specific controversies and texts vary each semester.

Requisites: Restricted to graduate students only.

Recommended: Requisite some previous coursework in political theory or philosophy.

Additional Information: Departmental Category: Political Theory

PSCI 7126 (3) Introduction to Public Policy

Designed for graduate students specializing in the field of public policy in the political science program. Surveys a wide variety of approaches to the analysis and understanding of public policy. The course is not a survey of any particular set of substantive policy areas but instead is intended as an examination of the enduring puzzles that analysts of public policy commonly confront, the kinds of research methodologies that they employ, and a selection of the techniques that they bring to bear on their research questions.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7132 (3) Comparative Political Economy

Explores the relationship between economics and politics in developed and developing countries. Gives students an historical overview of 20th century economic trends and covers scholarly approaches to topics such as political and economic institutions, economic ideas and interests, the political causes of growth and equality, globalization and the welfare state, and varieties of capitalism.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PSCI 7012.

Additional Information: Departmental Category: Comparative

PSCI 7145 (3) Advanced Game Theory

Covers more advanced applications of game theory in political science. Equips students with the skills to design and solve models at a reasonably high level of complexity and generality, and to understand how to effectively make use of such models in their research.

Requisites: Requires prerequisite course of PSCI 7055 (minimum grade B-). Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7151 (3) American Subnational Politics and Government

Provides a comprehensive overview of the issues and literature concerning American "Subnational" politics. Considers three bodies of literature: American federalism and intergovernmental relations, state politics, and urban/local politics. Also examines a number of policy issues.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7155 (3) Maximum Likelihood Estimation and Generalized Linear Models

Introduces maximum likelihood estimation and extends the linear model to several "generalized linear models." Provides students with the skills to analyze and understand a broad class of outcome variables and data structures such as dichotomous outcomes, counts, ordered and unordered categorical outcomes and bounded variables. Also examines several special topics such as multilevel models, causal inference and missing data.

Requisites: Requires prerequisite courses of PSCI 7075 and PSCI 7085 and PSCI 7095 (all minimum grade B-). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7171 (3) Seminar: Law and Democratic Governance

Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8205

Recommended: Prerequisite PSCI 7011.

Additional Information: Departmental Category: American

PSCI 7173 (3) The Politics of International Factor Flows

Focuses on the second dimension of international trade: the politics of international factor flows. Economic globalization can be defined as the freer flow of (1) goods and services (i.e., international trade) and (2) factors of production (e.g., capital and labor) across national borders. Links these topics in International Political Economy to broader theories of International Relations, namely Institutionalism and Liberalism.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7175 (3) Dissertation Seminar

Help students make progress towards (1) in the short term: focusing in on a dissertation topic, crafting a dissertation prospectus, and identifying potential funding sources; and (2) in the long term: sending papers out for review, developing a package for the job market, and understanding the academic job market and the tenure process.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7181 (3) Immigration Law and Immigrants' Rights

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7615

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7183 (3) International Cooperation

Investigates the origins, forms and consequences of international cooperation. The course covers both theoretical material related to international cooperation and various related global issue areas; security, economy, environment and social welfare. For each issue area, the key theoretical debates, empirical findings, as well as central challenges and parameters that constrain international cooperation will be investigated.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7185 (3) Political Network Analysis

Explores all aspects of political network analysis including disciplinary background, theories and concepts, approaches and applications, data basics and measurement, and techniques of analysis. Data assignments use software such as UCINET and R. Introduces visualization software including NetDraw, NetworkX and Cytoscape.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7191 (3) Law and Politics Colloquium: Race in America

A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8645

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7206 (3) Public Policy and the Governance of Natural Resources

Addresses a basic empirical puzzle in comparative environmental policy: why are some governmental organizations able to create relatively functional governance arrangements for natural resources management, while many others fail to do so? More specifically, we will seek to understand the particular contextual conditions that make successful governance transformations more likely.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7302 (3) Political Economy of International Migration and Policy

Provides an overview of the seminal and cutting edge research on the political economy of international migration including both immigration and emigration. Covers a diverse set of international migration issues, including public attitudes toward immigration, special interest politics of immigration policy making and the dynamics between political institutions and international migration.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7901 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: American

PSCI 7902 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7903 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: International Relations

PSCI 7904 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Political Theory

PSCI 7905 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7906 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Public Policy

PSCI 7908 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSCI 8901 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 8902 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Comparative

PSCI 8903 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: International Relations

PSCI 8904 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Political Theory

PSCI 8905 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 8906 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Public Policy

PSCI 8908 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSCI 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: American

PSCI 8992 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Comparative

PSCI 8993 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: International Relations

PSCI 8994 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Political Theory

PSCI 8995 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 8996 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Public Policy

Political Science - Doctor of Philosophy (PhD)

The Department of Political Science at CU Boulder offers instruction and research in the art and science of politics. The department has a long tradition of excellence in training graduate students. A diverse faculty of nearly 30 professors trains graduate students to conduct original research in six areas of political science:

- American government and politics
- comparative politics
- international relations
- political theory
- public policy
- empirical theory and methodology

Admission is highly competitive, with approximately 10–12 new students enrolled each fall. This ensures a high faculty-to-student ratio and close mentoring opportunities. In addition, the department holds an outstanding placement record.

The department does not accept applications for a terminal MA in political science. Students in the PhD program earn an MA in political science after the completion of a successful qualifying paper and defense at the end of the second year in the program.

Requirements

The Department of Political Science PhD program includes course work in six fields of study, a qualifying research paper and oral defense, comprehensive written and oral examinations, doctoral prospectus defense, final dissertation defense, and minimum 30 dissertation credit hours.

While students take a wide range of courses, they must demonstrate mastery of two different fields: the major (first field) and the minor (second field). Students must complete a minimum of three seminars

in each field. Also, students are required to take at least three courses outside of their major and minor fields.

Students must complete a minimum of 42 credit hours of course work with a B average or better. Of these 42 credit hours, 39 must be at the 7000 level or higher and 35 credit hours must be taken in the Political Science Department. Students must also take a minimum of 30 dissertation credit hours.

Students must take additional course work with the consideration that they will fulfill all requirements needed to complete the program. During a student's first semester in residence they are required to take three introductory courses: PSCI 7008 Teaching Political Science, PSCI 7075 Scope and Methods of Political Science and PSCI 7085 Introduction to Political Science Data Analysis.

As a condition of funding, all students appointed as graduate assistants are required to enroll in a minimum of 9 credit hours per semester for their first five semesters or until they have passed comprehensive exams.

Students wishing to pursue graduate work toward the degree should carefully read the Doctoral Degree Requirements (p. 867) section and review the courses listed in this catalog. Requirements for the political science graduate program are clarified in more detail on the department's PhD Requirements and Handbook (<http://www.colorado.edu/polisci/graduate/phd>) webpage. (<http://www.colorado.edu/polisci/graduate>)

Time Limit

Full-time students are expected to complete all requirements for the PhD degree within five years of entering the program; the maximum time allowed by the Graduate School is six years.

Psychology and Neuroscience

The Department of Psychology and Neuroscience at CU Boulder offers PhD degrees in five programs:

- behavioral genetics
- behavioral neuroscience (including learning and motivation)
- clinical psychology
- cognitive psychology
- social psychology

Although we do not offer a graduate degree in developmental psychology, a substantial number of our faculty have related research interests. The department also participates in a number of interdisciplinary degree and certificate programs.

Students contemplating postgraduate education, either in professional or in graduate school, are encouraged to participate in the departmental honors program, which provides special opportunities for individualized attention.

CU Boulder's Department of Psychology and Neuroscience has been ranked by the National Academy of Sciences as one of the best in the country with respect to the quality of the faculty and their scholarly productivity. Moreover, the department offers undergraduates a wide range of opportunities for involvement in research.

Course codes for this program are PSYC and NRSC.

Doctoral Degrees

- Neuroscience - Doctor of Philosophy (PhD) (p. 1076)

- Psychology - Doctor of Philosophy (PhD) (p. 1077)

Certificate

- Neuroscience - Graduate Certificate (p. 1078)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

NRSC 5015 (3) Affective Neuroscience

Experiencing and learning from affect–emotional value—is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. Covers recent advances in understanding the emotional brain.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4015

Requisites: Restricted to graduate students only.

NRSC 5032 (3) Neurobiology of Learning and Memory

Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4032

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5052 (4) Behavioral Neuroscience

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4052 and PSYC 4052 and PSYC 5052

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective

Provides a review of the anatomy and physiology of the nervous system and then explores how alterations in these systems can result in neurologic or psychiatric disorders. Emphasizes pathological neuroanatomy, neurophysiology and neuropharmacology, which is essential for understanding problems related to health and disease.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4072

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5082 (3) Neural Circuits of Learning and Decision Making

Provides an in-depth survey of the neural mechanisms of learning, motivated behavior and decision making. Analysis will focus on the interaction of neural circuits underlying these processes with particular attention to the cellular, molecular and information-processing aspects of identified pathways and considered into the context learning-based and neuroeconomic models of choice.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4082

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

NRSC 5092 (4) Behavioral Neuroendocrinology

Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function. In addition to attending and meeting all the requirements for the lecture portion of the course, graduate students meet for an additional hour each week to discuss in depth behavioral neuroendocrinology relevant research articles.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4092

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5100 (2-5) Introduction to Neuroscience I

Provides an intensive introduction to the principles of neuroscience, initially covering the detailed neuroanatomy of human forebrain, hindbrain, and spinal cord. This is followed by neurophysiology with a concentration on the electrophysiology of neural systems. The basics of neuroanatomy and neurophysiology with a concentration on the electrophysiology are then applied to an examination of the structure and function of visual, auditory, and sensorimotor systems in animal and man.

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Requisite, restricted to Interdepartmental Neuroscience Program or instructor consent required.

NRSC 5110 (3) Introduction to Neuroscience II

Provides an intensive interdisciplinary introduction to the principles of neuroscience. It is a sequel to NRSC 5100. Provides a detailed overview of neurochemistry, neurodevelopment, neuromotor control, neurogenetics, and cognitive neuroscience. Open to undergraduates with instructor permission.

Requisites: Requires a prerequisite course of NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-).

NRSC 5132 (3) Neuropharmacology

Study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the neurobiological and neurochemical mechanisms of drug action. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) biochemical basis of psychiatric disorders and their pharmacological treatment.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4132

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5262 (3) Mammalian Neuroanatomy

Provides a detailed overview of peripheral and central nervous system connective neuroanatomy targeted at delineating functional sensory, motor and motivational systems and the control of behavior and cognition. Emphasizes histological, anatomical and functional techniques employed in investigations of the nervous system. Formerly PSYC 5262.

Requisites: Requires a prerequisite course of NRSC 2100 or NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-).

Additional Information: Departmental Category: Biological

NRSC 5545 (3) Neurobiology of Addiction

Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction.

Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4545

Requisites: Restricted to graduate students only.

NRSC 5911 (3) Teaching of Neuroscience

Offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. Offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Intro to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate with instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4911

Requisites: Restricted to graduate students only.

NRSC 6100 (2) Advances in Neuroscience Seminar

Designed for beginning graduate students interested in neuroscience. Students read, discuss, and evaluate the primary literature on a number of current topics in neuroscience as well as attend the seminar program in neuroscience.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

NRSC 6602 (1) Behavioral Neuroscience Professional Skills Development

Enrolled graduate students in the behavioral neuroscience program will be asked to prepare, present and receive feedback on scientific presentations of their own research or from review of a current research project.

Repeatable: Repeatable for up to 14.00 total credit hours.

Grading Basis: Letter Grade

NRSC 7102 (2-3) Topics in Neuroscience

Advanced seminar dealing with different specialized topics in neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-).

NRSC 7112 (3) Special Topics in Neuroscience I

Advanced seminar dealing with several different specialized topics in Neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-).

NRSC 7122 (3) Special Topics in Neuroscience II

Advanced seminar dealing with several different specialized topics in Neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-).

NRSC 7132 (3) Special Topics in Neuroscience III

Advanced seminar dealing with several different specialized topics in Neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-).

NRSC 7142 (3) Special Topics in Neuroscience IV

Advanced seminar dealing with several different specialized topics in Neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-).

NRSC 7152 (3) Special Topics in Neuroscience V

Advanced seminar dealing with several different specialized topics in Neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-).

PSYC 5052 (4) Behavioral Neuroscience

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4052 and NRSC 4052 and NRSC 5052

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 5082 (2-3) Seminar: Biological Psychology

Special topics concerning biological bases of behavior. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of PSYC 4052 (minimum grade D-).

Additional Information: Departmental Category: Biological

PSYC 5102 (3) Intro to Behavioral Genetics

Provides introduction to basic principles of genetics in the study of behavior, methods used to examine the influences of genes and environment on behavior, and interpretation of studies using these methods. Instructor consent required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 5112 (3) Concepts in Behavioral Genetics

Examines selected topics in greater detail than is possible in the comprehensive undergraduate course in behavioral genetics (PSYC 3102). Topics covered may include inheritance of behavioral characteristics from perspectives of pharmacogenetics, transmission genetics, biochemical genetics, and evolutionary genetics. Instructor consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Biological

PSYC 5122 (3) Quantitative Genetics

Surveys principles of genetics of quantitative characteristics. Topics include gene frequencies, effects of mutation, migration, and selection. Also looks at correlations among relatives, heritability, inbreeding, crossbreeding, and selective breeding.

Additional Information: Departmental Category: Biological

PSYC 5131 (3) Affective Science

Core graduate course on affective science and fulfills APA Cognitive and Affective Aspects of Behavior Requirement. Introduces students to a diverse array of theoretical and empirical issues related to the study of human emotion. Evolutionary theories of emotions; cognitive and behavioral aspects of emotion; neurobiological mechanisms; development of emotion; and psychopathology and emotion.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: General

PSYC 5145 (4) Advanced Cognitive Psychology

Advanced course in human cognitive processes. Covers key aspects of cognition, such as perception, attention, learning, memory, language and thinking. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week and a research project is required. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4145

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 5175 (4) Computational Cognitive Neuroscience

Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4175

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 5200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and IPHY 5200

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: General

PSYC 5232 (2) Molecular Genetics and Physiology

Covers fundamental mechanisms of gene action, including genome structure and regulation of gene expression. Discusses molecular techniques used to examine human genetic diseases. Emphasizes genetic diseases with behavioral, neurologic, and physiologic abnormalities.

Requisites: Requires a prerequisite course of PSYC 5200 or IPHY 5200 (minimum grade D-).

Additional Information: Departmental Category: Biological

PSYC 5242 (3) Biometrical Methods in Behavioral Genetics

Studies development of structural models appropriate to behavioral genetics and the estimation procedures necessary for their application. Instructor consent required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 5423 (3) Research Problems in Clinical Psychology

Provides an overview of fundamental research methods relevant to clinical psychology, including literature synthesis, hypothesis formulation and study design, measure selection, and data analysis. Students will gain specific experience writing scientific papers and funding proposals. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 5433 (3) Adult Psychopathology

Intensively surveys major theories, research findings, and behavioral characteristics associated with deviant reaction patterns. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 5453 (3) Developmental Psychopathology

Examines the development of psychopathology across the lifespan, including etiological influences, neurobiological correlates, symptom presentation, and clinical diagnosis and intervention. Instructor consent required.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 5541 (1-6) Special Topics in Psychology

Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4541

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 5606 (3) Proseminar: Social-Personality Psychology

Provides a thorough introduction to methods and theories in social psychology concerned with topics such as the self, social cognition, judgment and decision making, attitude formation and change, small group processes, inter-group relations, health and social psychology, and others. Instructor consent required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Social

PSYC 5656 (3) Advanced Graduate Research Methods

Provides training in the philosophical roots of empirical research, inference of causality, internal and external validity and reliability. These topics will be covered as they relate to a range of research designs including passive observational, experimental, quasi-experimental, meta-analytic and longitudinal. Additional topics include statistical inference and research ethics.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Social

PSYC 5665 (2) Perception and Attention Proseminar

Required proseminar for students in the Cognitive Psychology Ph.D. program. Provides an introduction to current thinking about sensory and perceptual processing, object recognition and attention. Students will read peer-reviewed journal articles and make class presentations on appropriate topics, including methods of data collection and analysis. Graduate students in all programs are welcome and advanced undergraduates are welcome with instructor consent.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Experimental

PSYC 5685 (2) Research Methods Proseminar

Main topic is research methods in cognitive psychology, with an emphasis on experimental methods. Skills and knowledge will be gained that are necessary to A) critically evaluate existing research and B) design, conduct, analyze and write up experimental studies. Required for graduate students in Cognitive Psychology; graduate students in all programs and advanced undergraduates welcome with instructor consent.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Experimental

PSYC 5695 (2) Memory Proseminar

Provides beginning Ph.D. students with a basic introduction to (primarily human) memory research. One of the six required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of experimental, theoretical, behavioral and cognitive neuroscience perspectives on memory. Graduate students in all programs are welcome and advanced undergraduates are welcome with instructor consent.

Additional Information: Departmental Category: Experimental

PSYC 5741 (4) General Statistics

Surveys probability and statistics in psychology. Instructor consent required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 5751 (4) General Statistics

Continuation of PSYC 5741. Instructor consent required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 5761 (3) Structural Equation Modeling

Provides training in the use of structural equation modeling, a class of analytic techniques that include the estimation of unobserved, or latent, constructs and an estimation of relationships among latent constructs.

Recommended: Prerequisite successful completion of graduate level statistics.

Additional Information: Departmental Category: General

PSYC 5815 (2) Language Proseminar

Introduction to research on human language. A required proseminar for Cognitive Psychology Ph.D. students. Covers research at the cognitive, neural, and computational levels. Addresses phenomena at the levels of phonology, grammar, and meaning. Emphasizes interrelationships between language and other domains of cognition (perception, memory, executive function). Graduate students in all programs and advanced undergraduates welcome with instructor consent.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Experimental

PSYC 5825 (2) Executive Function Proseminar

Provides beginning Ph.D. students with an introduction to the study of executive functions. Required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of working memory, inhibition, multi-tasking, monitoring, selection, lifespan changes and social/clinical applications at the cognitive, neural and computational levels. Graduate students in all programs are welcome and advanced undergraduates are welcome with instructor consent.

Additional Information: Departmental Category: Experimental

PSYC 5835 (2) Thinking Proseminar

Provides beginning Ph.D. students with a basic introduction to research on complex human cognition, including reasoning, problem solving, decision making, analogy, concept learning and knowledge representation. Includes consideration of theoretical, behavioral and cognitive neuroscience perspectives. One of six proseminar modules required of students in the Cognitive Psychology Ph.D. program. Graduate students in all programs and advanced undergraduates welcome with instructor consent.

Additional Information: Departmental Category: Experimental

PSYC 6200 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and SLHS 6402

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 6603 (1) Professional Issues in Clinical Psychology

Covers a range of topics important for professional development in clinical psychology, including preparation and delivery of research presentations, preparation of grant proposals/manuscripts and practicum experience (i.e., interviewing and assessment, treatment planning, intervention and documentation). Intended to prepare students for careers as research scientists and clinicians. Instructor consent required.

Repeatable: Repeatable for up to 10.00 total credit hours.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 6605 (1) Cognitive Psychology Research Update

Provides summaries of current research by graduate students and faculty members in the Cognitive Psychology program in the Department of Psychology and Neuroscience. Professional Development issues relevant to cognitive psychologists will also be discussed. Graduate students in all programs and advanced undergraduates welcome with instructor consent.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology (PSYC) and Neuroscience (NRSC) PhD Students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Experimental

PSYC 6606 (1) Professional Issues in Social Psychology

Covers a range of topics important for professional development in social psychology, including preparation and delivery of research presentations, preparation of grant proposals and manuscripts, and peer review of manuscripts. Intended to prepare students for careers as research scientists.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Social

PSYC 6761 (3) Topics in Advanced Structural Equations Modeling

Covers topics in advanced structural equation modeling, including modeling with nonlinear observed variables, latent variable interactions, longitudinal models, mixture models and transition analysis. Other topics will be covered by request.

Recommended: Prerequisite PSYC 5761.

Additional Information: Departmental Category: General

PSYC 6831 (2) Interdisciplinary Social Science Professional Socialization

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science.

Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 6851

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

PSYC 6841 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 6911 (1-3) Research Practicum

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: General

PSYC 6941 (1) Master's Degree Candidate

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

PSYC 6951 (1-6) Master's Thesis

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSYC 7012 (1-3) Research in Behavioral Genetics

Individual research projects.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 7102 (2) Seminar: Behavioral Genetics

Intensive study of selected topics in behavioral genetics. Emphasizes recent research. Attention to both human and animal studies. Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 7215 (3) Seminar: Experimental Psychology

Advanced seminar dealing with different specialized topics, at the discretion of the instructor, in different years. Topics chosen are within the broad range of experimental psychology. Instructor consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 7291 (3) Multivariate Analysis

Familiarizes students with scientific concepts, matrix theory, and computer techniques of multivariate analyses for psychological research. Topics include cluster and factor analysis, multiple regression, and discriminant functions. Emphasizes research technology rather than mathematical theory. Instructor consent required.

Additional Information: Departmental Category: General

PSYC 7315 (2) Advanced Research Seminar on Human Memory

Addresses topics in the experimental psychology of human memory. Specific content varies from semester to semester. Both theoretical issues and contemporary empirical work will be reviewed. Each student will be required to engage in laboratory work outside of class, which will include an original experiment. Graduate students in all programs and advanced undergraduates welcome with instructor consent.

Additional Information: Departmental Category: Experimental

PSYC 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and SLHS 7418

Requisites: Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

Additional Information: Departmental Category: Experimental

PSYC 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and SLHS 7428

Requisites: Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 7536 (1-3) Personality and Social Psychology

Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. These seminars may be on one of the following topics: stereotyping and prejudice, social neuroscience, person perception, social psychology and the self, health and social psychology, race and ethnic identity, or social cognition.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Social

PSYC 7663 (1) Intellectual Assessment Laboratory

Practice administration of common intellectual and neuropsychological tests.

Requisites: Requires corequisite courses of PSYC 7683. Restricted to graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7673 (3) Adult Psychotherapy

Provides an intensive introduction to the science and practice of psychological treatments for adult psychopathology. Will focus on selected treatments and address the relevant theoretical and empirical base for each approach and the specific principles and procedures utilized. Aim of course is for students to acquire both a scientific and applied knowledge of evidence-based practice in clinical psychology, with a focus on intervention for adult mental disorders. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 7683 (1-3) Intellectual Assessment, with Practicum, in Clinical Psychology

Focuses on administering and interpreting objective test commonly used in clinical psychology practice. Includes case study approach and direct clinical experience. Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7693 (3) Personality Measurement

Covers theory and basic applications of psychological assessment, with an emphasis on measurement theory and the assessment of psychopathology and personality. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 7703 (1-3) Seminar: Clinical Psychology

Selected topics in the area of clinical psychology. Instructor consent required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7713 (1-3) Practicum in Clinical Psychology

Provides direct clinical experience for clinical graduate students only. Instructor consent required.

Repeatable: Repeatable for up to 18.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the LCS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in LCS Cognitive Science Academic Programs.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Experimental

PSYC 7793 (1-3) Child Assessment Practicum

Allows students who have already learned adult assessment measures to broaden their knowledge and skills in order to complete psychoeducational evaluations with children. The course covers the background of common childhood disorders, general testing strategies with children, and specific test administration.

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisite PSYC 7683.

Additional Information: Departmental Category: Developmental

PSYC 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: General

Neuroscience - Doctor of Philosophy (PhD)

The neuroscience community at CU Boulder is made up of over 80 faculty and research associates rostered in 13 departments and institutes. Neuroscience activities on the campus are coordinated by the Center for Neuroscience.

The graduate PhD program in neuroscience is an interdepartmental program currently consisting of eight tracks to a PhD:

- Behavioral Genetics (Integrative Physiology, Psychology & Neuroscience);
- Behavioral Neuroscience (Psychology & Neuroscience);
- Clinical Neuroscience (Psychology & Neuroscience);
- Cognitive Neuroscience (Psychology & Neuroscience);
- Social Neuroscience (Psychology & Neuroscience);
- Integrative Physiological Neuroscience (Integrative Physiology);
- Molecular, Cellular and Developmental Neuroscience (Molecular, Cellular and Developmental Biology); or
- Speech, Language and Hearing Neurosciences (Speech, Language and Hearing Sciences).

Students apply for admission to one of the participating departments, which determines whether to admit the student to CU Boulder and provide financial support. Once in residence, students enter the neuroscience PhD program while still maintaining their "home" in the department to which they were admitted. They receive a PhD that lists both their home department and neuroscience.

The neuroscience curriculum includes a year-long intensive core course, graduate seminar courses linked to an invited speaker series and wide-ranging neuroscience courses offered by many departments and institutes across campus.

Potential applicants are encouraged to visit the Center for Neuroscience (<http://www.colorado.edu/neuroscienceprogram>) website, which provides detailed information on the program, application process, courses, faculty and current trainees.

Triple Degree Program Cognitive Neuroscience Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science, neuroscience and their core discipline:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language and Hearing Sciences
- Education
- Architecture and Planning

Students interested in the combined PhD with cognitive science and neuroscience must meet course and thesis requirements. The student's thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. To enroll in this triple degree, you must enroll in the neuroscience program and the cognitive science program.

For more information, visit the Institute of Cognitive Science's Cognitive Neuroscience Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd>) webpage.

Requirements

All students are admitted with the expectation that they will work toward the PhD degree. Many students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field; furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

In the first year of graduate study, all psychology graduate students enroll in a two-semester graduate statistical sequence. There is a first-year research requirement that starts the student on an active program of research. The student also must enroll in a sequence of courses designed to give exposure to various research topics and methods.

Required Courses and Semester Credit Hours

Required Neuroscience Core Courses

NRSC 5100	Introduction to Neuroscience I ¹	2-5
NRSC 5110	Introduction to Neuroscience II	3
NRSC 6100	Advances in Neuroscience Seminar (three semesters, 2 credits per semester)	6

Required Fundamentals of Neuroscience Depth Courses

Choose a minimum of 3 additional neuroscience-related courses (2-3 6-9 credit hours per course). ²

Neuroscience-Related Discipline Specialization

Choose a sequence of courses that provides an advanced graduate-level specialization in a discipline that contributes to the field of neuroscience. 11

Total Credit Hours 28-34

- ¹ Advanced students take this course for 2 credits; students without advanced preparation take it for 5 credit hours.
- ² For a list of approved neuroscience courses, visit the Neuroscience PhD Program (<http://www.colorado.edu/neuroscienceprogram/phdrequirements.html>) webpage.

Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal course work completed.

A variety of advanced research seminars are taught on a regular basis. Students are required to be enrolled in at least one substantive course in the department each semester until the comprehensive examinations have been successfully completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Potential applicants are encouraged to visit the Center for Neuroscience website, which provides detailed information on the program, application process, courses, faculty and current trainees.

Psychology - Doctor of Philosophy (PhD)

The behavioral genetics program focuses on the study of genetic contributions to individual differences in behavior. The fundamental tenet of the behavioral neuroscience program is that a complete understanding of behavior entails unraveling mechanisms and principles at any and all levels of organization (i.e., behavior, neuroanatomy, neurophysiology, neurochemistry, gene expression and epigenetics).

The major training goals of the clinical psychology program follow the Boulder model in that the preparation of scientist-practitioner is stressed.

Students are admitted for graduate studies leading to the PhD in one of five fields:

- behavioral genetics
- behavioral neuroscience (including learning and motivation)
- clinical psychology
- cognitive psychology
- social psychology

For detailed information about each field of study, visit the department's Graduate Program Areas (<http://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas>) webpage.

Note: The department does not offer a terminal master's degree program.

Requirements

All students are admitted with the expectation that they will work toward the PhD degree. Many students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad

subject of learning and that they can critically evaluate work in this field; furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

In the first year of graduate study, all psychology graduate students enroll in a two-semester graduate statistical sequence. There is a first-year research requirement that starts the student on an active program of research. The student also must enroll in a sequence of courses designed to give exposure to various research topics and methods.

Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal course work completed.

A variety of advanced research seminars are taught on a regular basis. Students are required to be enrolled in at least one substantive course in the department each semester until the comprehensive examinations have been successfully completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Neuroscience - Graduate Certificate

The graduate certificate in neuroscience and behavior focuses on understanding the nervous system and its relationship to disease and behavior. This understanding encompasses the molecular, cellular and behavioral aspects of neuroscience.

Students come from such graduate programs as ecology and evolutionary biology; behavioral genetics; molecular, cellular and developmental biology; psychology; and integrative physiology. They receive a PhD in their department and a certificate in neuroscience.

Potential applicants are encouraged to visit the center's Graduate Certificate in Neuroscience (<http://www.colorado.edu/neuroscienceprogram/gradcert.html>) webpage, which provides detailed information on the program, application process, courses, faculty and current trainees.

Requirements

The neuroscience core curriculum includes courses in the following areas:

- Neuroscience methods laboratory
- Neuroanatomy
- Neurochemistry or Neuropharmacology
- Neurophysiology or Systems Neuroscience
- Behavioral Neuroscience or Animal Behavior
- Molecular Neuroscience or Molecular Genetics or Developmental Neuroscience

Students are required to attend a weekly journal club or discussion group and neuroscience colloquia.

Religious Studies

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion, through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of

gaining deeper knowledge in one religious tradition, such as Buddhism, Christianity, Daoism, Hinduism, Islam and Native American traditions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Course codes for this program are RLST and SNSK.

Master's Degree

- Religious Studies - Master of Arts (MA) (p. 1080)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

RLST 5030 (3) Religions in America

Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion and Asian religions in America.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4030

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5045 (3) Ritual Art Dance Drama

Ritual Art Dance Drama as well as the common actions, gestures and objects of culture provide a foundation for cultural and individual concepts and values that may often be characterized as religious. Rich examples drawn from a variety of cultures around the world will be considered from a broad range of theoretical perspectives designed to help us gain the fullest understanding and appreciation of the lived and practiced aspects of culture and religion. Consistent with the fundamental proposition of the course, each student will also engage activities that will provide an experiential basis for learning.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4045

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 5050 (3) Topics in Christian Studies

Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4050

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

RLST 5170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4170 and JWST 4170

Requisites: Restricted to graduate students only.

RLST 5180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4180 and JWST 4180

Requisites: Restricted to graduate students only.

RLST 5200 (3) Topics in Hinduism

Examines in depth central themes, schools of thought and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, Tantra and Yoga.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4200

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

Additional Information: Departmental Category: Asia Content

RLST 5210 (3) Advanced Readings in Sanskrit

Requires at least two years of prior Sanskrit training. Students will read texts in the original. Class time is devoted to parsing out difficult grammatical structures, discussing the philosophical import of the readings and addressing the historical contexts that assist in interpreting the texts. The topic varies according to student interest.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 2120 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

RLST 5250 (3) Topics in Buddhism

Examines in depth central themes, schools of thought and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4250

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

RLST 5260 (3) Topics in Judaism

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4260 and JWST 4260

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

RLST 5280 (3) Body and Magic in India

Addresses ideas of the body and its use and functions within magic, particularly in Tantric traditions. Uses classical Hinduism and Tantra as a point of departure, focusing on subtle bodies and Tantric bodies and will also supplement this with writing about the body and its connection to mind in contemporary Western thought addressing the mind-body problem.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4280

Requisites: Restricted to graduate students only.

RLST 5300 (3) Topics in Native American Religions

Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology; shamanism and medicine; trickster, clown and fool; crisis cult movements.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4300

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 3 additional credit hours of RLST course work or instructor consent.

RLST 5350 (3) Native American Religions: Regional Studies

Studies religion(s) of a single native North American tribe or geographic region within context of history and culture of the tribe.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 additional credit hours of RLST course work or instructor consent.

RLST 5353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4353 and ETHN 4353 and ETHN 5353

Requisites: Restricted to graduate students only.

RLST 5650 (3) Islam in the Modern World

Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya and Pakistan; development and change; the status of women; media and academic stereotyping.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4650

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 credit hours of religious studies at any level or instructor consent.

Additional Information: Departmental Category: Asia Content

RLST 5750 (3) Daoism

Traces the development of Daoism from its origin as an organized, communal religion in the second century CE to the vibrant living religion of today, encompassing meditative monastics, martial exorcists, solemn ritual masters and lay practitioners of inner alchemy and other self-cultivation techniques. Focuses on the extensive Daoist ritual tradition and the community of believers who created and used it.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4750 and CHIN 4750 and CHIN 5750

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 5820 (3) Interdisciplinary Seminar on Religion

Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4820

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5840 (1-6) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5850 (3) Gender in Hagiography

Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources and also examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4850 and WGST 4850

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands

Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 6110

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 6830 (3) Introduction to the Academic Study of Religion

Introduction to the graduate academic study of religion through the exploration of contemporary models and issues that demonstrate the nature and future of the field. Students prepares a profile of intended area of research.

Requisites: Restricted to graduate students only.

RLST 6840 (1-6) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

RLST 6945 (1-4) Directed Readings: Non-Thesis Option

Course work finished or in the last semester.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

RLST 6950 (1-4) Master's Thesis

Requisites: Restricted to graduate students only.

Religious Studies - Master of Arts (MA)

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in one religious tradition, such as Buddhism, Christianity, Daoism, Hinduism, Islam and Native American traditions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions

with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Dual Degree Program

The Department of Religious Studies also participates in a dual master's degree program with the Departments of History and Asian Languages and Civilizations. Students interested in exploring this option should contact the graduate director of the department for specific requirements.

Requirements

Course Requirements

The student must successfully complete 31 credit hours of academic work, at least 24 of which must be completed at the 5000 level or above. Up to 9 credit hours of course work may be taken outside the department or transferred from another accredited institution, consistent with the student's special needs and interests and with the advisor's approval. Independent study credit hours shall not exceed six credit hours.

A graduate degree represents the mastery of a significant body of knowledge and interpretation within an academic discipline. A degree is not granted merely because a student completes a specific number of courses. The student is expected to acquire both breadth and depth in religious studies.

Breadth is achieved by satisfying two types of course requirements as set forth below, which include exposure to a diversity of approaches to the study of religion. Depth is achieved through three courses in a particular area or approach and by independent work related to the thesis or concentration.

A student who has not completed at least 12 credit hours, or the equivalent, of undergraduate academic course work directly related to the study of religion will be required to do remedial work to make up this deficit before beginning graduate study or, with the director of graduate studies' permission, after beginning the program. This can be done by attaining a grade of B or better in an appropriate 2000- or 3000-level course taken within the first year. Remedial courses may not be counted toward the degree.

Courses for each term must be approved by the student's faculty advisor and be in compliance with the requirements of the Graduate School where necessary. In order to register for any given term, the student must have the course of study for that term approved in writing by the advisor on the student's Record of Progress Toward the MA Degree Form. No changes can be made to registration without the advisor's approval.

Required Courses and Semester Credit Hours

Required Courses

RLST 6830	Introduction to the Academic Study of Religion (This course is offered every fall term and should be taken the first fall term the student is in residence.)
-----------	--

Electives

Complete three seminars in the academic study of religion. At least one seminar will be designated each semester.	9
---	---

Complete three research concentration courses (to be determined in consultation with one's advisor). These may be taken in or out of the department, as appropriate.	9
--	---

Total Credit Hours	18
--------------------	----

Foreign Language Requirement

In order to receive the degree a student must meet the foreign language requirement. The student must have a satisfactory reading knowledge of a language other than English, demonstrated by a B or better in the fourth semester of the language.

Residency Requirement

All students must fulfill the residency requirement. In general this can be fulfilled by either two full-time semesters or four part-time semesters of study. A full-time program is defined as 5 credit hours of course work at the 5000 level or higher, 8 credit hours of total course work or at least one credit hour of thesis research.

Degree Plans

In the final semester of graduate study, which must be taken in residence, students will select either a thesis or non-thesis research option.

Plan I: Thesis Option

Students selecting the thesis option will take a 4-credit thesis course (RLST 6950), which will culminate in the completion and defense of a thesis.

Plan II: Non-Thesis Option

Students selecting the non-thesis option will take a 4-credit directed readings course on secondary scholarship in a specific field (theoretical topic, geographic area or religious tradition) that will culminate with a written examination on the topic that the student must pass.

Comprehensive Examination

A final oral comprehensive examination, given by the student's research committee, will focus on three substantial term papers and either the thesis or the written examination in a specific field.

Sociology

The graduate program in the Department of Sociology at CU Boulder seeks to train creative and productive scholars and teachers. The department maintains a strong emphasis in the theories and methods of the discipline while specializing in the following areas:

- Criminology
- Cultural Sociology
- Environment, Hazards, and Disasters
- Gender and Sexuality
- Health and Medicine
- Life Course, Aging, and Youth
- Political Economy
- Population
- Race and Ethnicity
- Social Psychology and Emotions

The department offers a PhD program focusing on teaching, researching and training in theory and methods. It, however, does not offer a separate MA program. More information about program specifics can be found in the Graduate Handbook (<http://www.colorado.edu/sociology/students/graduate-students/resources>).

Graduate students will meet with faculty advisors during their time at CU Boulder to foster social integration at the university as well as research interests. Financial support is given to students serving as teaching assistants (TAs). A teaching assistantship is a fulfilling position that allows students to further their understanding of a specific area of study while gaining knowledge in instructing at the university level.

Additionally, advanced graduate students are encouraged to teach their own courses as graduate part-time instructors (GPTIs). The department encourages graduate students to pursue opportunities for funded research wherever possible and supports the efforts of other university units in which students may seek financial support for their research, such as the Institute of Behavioral Science. Aside from teaching and research, CU Boulder offers a wide array of courses for graduate students taught by a diverse and well-regarded faculty.

Course code for this program is SOCY.

Doctoral Degree

- Sociology - Doctor of Philosophy (PhD) (p. 1085)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adler, Patricia A.
Professor Emeritus; PhD, University of California, San Diego

Bailey Mollborn, Stefanie Faun (https://experts.colorado.edu/display/fisid_142921)
Associate Professor; PhD, Stanford University

Bartos, Otomar J.
Professor Emeritus

Belknap, Joanne Elizabeth (https://experts.colorado.edu/display/fisid_113617)
Professor; PhD, Michigan State University

Boardman, Jason D (https://experts.colorado.edu/display/fisid_125577)
Professor; PhD, University of Texas at Austin

Associate Professor; PhD, University of Massachusetts at Amherst

Courses

SOCY 5031 (3) Research Design

Principles and practice of social research, including the nature of scientific explanation, the relationship between theory and research, research design, measurement problems, sampling questionnaire construction, interviewing, ethnographic methods, and statistical analysis.

Additional Information: Departmental Category: General Sociology

SOCY 5037 (3) Hazards, Disasters and Society

Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, key issues in the sociological study of disasters, social vulnerability, the impacts of disasters in the U.S. and worldwide and the U.S. Emergency Management System.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4037

Additional Information: Departmental Category: Environment and Society

SOCY 5071 (3) Social Stratification

Studies theories of class, ethnic, sex, and age stratification. Examines social inequality in the United States and analyzes the resulting conflicts.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4071

Additional Information: Departmental Category: General Sociology

SOCY 5111 (3) Data 1: Introduction to Social Statistics

Introduces statistical analysis in the social sciences. Introduces basic techniques of inferential statistics and several bivariate statistical techniques including t-test for the difference in means, chi-square independence, analysis of variance (ANOVA), correlation, and simple regression (OLS). Prepares students for the required course on multivariate regression techniques (Data 2).

Requisites: Restricted to Sociology (SOCY) graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 5181 (3) Logics of Qualitative Inquiry

A required first-year seminar that introduces the logics of qualitative inquiry in sociology. Introduces the history of qualitative epistemology. Considers the logic of common qualitative methodologies and qualitative research representations. Engages with the logics of inquiry in classic and more recent well regarded qualitative sociological works.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Sociology

SOCY 5201 (3) Graduate Seminar in Sociological Theory

Examines theoretical approaches to core issues and problems in sociology, including the nature of society, the relationship between society and the individual, the role of culture and social structure, the sources of social power, and the conceptual structure of sociological knowledge itself.

Requisites: Restricted to Sociology (SOCY) graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 5611 (3) Teaching in Sociology

Learn how to teach sociology more effectively while developing a new content area and a clearer sense of the field. Choose a content area within sociology as the basis for planning a course and developing and practicing different teaching techniques. Department enforced prerequisite: enrollment in the Sociology graduate program.

Additional Information: Departmental Category: General Sociology

SOCY 5841 (1-6) Independent Study in Sociology

Graduate variable credit. Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Sociology

SOCY 5937 (1-6) Graduate Research Internship in Environmental Sociology

Offers the opportunity for sociology graduate students specializing in environmental sociology to work with local governmental or non-profit organizations on research assignments. The research topic, academic reading list, and expectations for the final project will be developed collaboratively with a faculty sponsor and organizational representative.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Environment and Society

SOCY 6004 (3) Topics in Criminology

Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 6007 (3) Foundations of Environmental Sociology

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 6007

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 6012 (3) Population Issues, Problems, and Policies

Presents contemporary perspectives on relations between population and society. Focuses on mortality, fertility, and migration, the major demographic areas, with reviews of specific demographic phenomena and controversies.

Additional Information: Departmental Category: Population and Health Issue

SOCY 6016 (3) Topics in Sex and Gender

Covers diverse specializations of faculty in the area of sex and gender. See current departmental announcements or online Schedule Planner for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sex and Gender

SOCY 6017 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between a) inequality and democratic decision making and b) undemocratic economic and political decision making, U.S. and corporate food and energy policy; and global environmental degradation. Focus will also be placed on the role that global inequality plays in fostering environmental degradation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 6041 (3) Cultural Sociology

Explores "the cultural turn" in sociology and related disciplines. Reviews basic themes in cultural studies: distinguishing "cultural" and "social"; narrative as catalyst between symbols and practices; cultural production processes; self as embodied; culture and power; methods and epistemological issues. Students present their own projects in class and as research papers.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6111 (3) Data 2: Data Analysis

Introduces students to mainstream multivariate regression techniques used in the social sciences. The majority of the course focuses on the Ordinary Least Square model and on the extension of this model to nominal, ordinal and count dependent variables. Students analyze data of their choosing with statistical software packages including SPSS, SAS, and STATA. Department prerequisite: SOCY 5111 or equivalent.

Additional Information: Departmental Category: General Sociology

SOCY 6121 (3) Qualitative Methods

Training in the systematic observation of people in situations, finding them where they are, staying with them in a role acceptable to them that allows intimate observations of behavior. Students report their findings in ways useful to social science but not harmful to those observed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6821 (1-2) Graduate Sociology Forum 1

Introduces first-year graduate students to the full range of substantive topics, research programs, and other projects in which graduate sociology faculty are engaged. Provides a forum in which issues of the discipline are presented and discussed. Features weekly presentations by graduate sociology faculty.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6831 (1) Graduate Professional Seminar

Offers guidance and instruction on topics related to advanced graduate study and academic life beyond graduation. Discussions will include writing journal articles; creating a vitae; writing dissertations; applying for grants and other sources of funding; the academic job search; and what to expect as a junior faculty member.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6841 (1-6) Guided Research in Sociology

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6851 (2) Interdisciplinary Social Science Professional Socialization

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science.

Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 6831

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Sociology

SOCY 6941 (1) Candidate for Degree for Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Sociology

SOCY 6951 (1-6) Master's Thesis

Additional Information: Departmental Category: General Sociology

SOCY 7002 (3) Social Disparities in Health

Presents social disparities in health in their social context. Includes the sociology of health behavior; links between health status and social statuses including gender, race, ethnicity, and socioeconomic status; fundamental causes and other explanations for social disparities in health; environment and health; health insurance disparities; the physician-patient interaction and its consequences.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Population and Health Issue

SOCY 7004 (3) Criminological Theory

Examines the major criminological theories of the 18th through 21st centuries in Europe, Australia, and the U.S. Emphasizes the historical contexts and paradigms of knowledge influencing these theories.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7006 (3) Sociology of Sex and Gender

Theoretical and empirical examination of sex stratification, sex role differentiation, and sex differences in socialization, personality, institutions, and culture.

Additional Information: Departmental Category: Sex and Gender

SOCY 7012 (3) The Social Demography of Race

Introduction to relevant, timely research within sociological and social demographic research on race and ethnicity. Specific areas will include conceptual/measurement issues; population size, growth, and migration; health and mortality; marriage, family, and fertility; socioeconomic context; and policy considerations. Course content will be structured around current empirical pieces in sociology literature with emphasis on methodological approach in analyses.

Additional Information: Departmental Category: Population and Health Issue

SOCY 7014 (3) Gender, Race, Class, and Crime

Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 6014

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7017 (3) Population and Environment

Reviews research on human-environment interactions, with a focus on ways in which demographic processes influence, and are influenced by, the environmental context. Specific topics include conceptual and analytical frameworks; methodologies; intervening factors shaping human dimensions of environmental change; and regionally-focused research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 7024 (3) Punishment and Social Control

Exploration of sociological perspectives on the criminal justice process. Considers organization of criminal law responses, including enforcing and sentencing. Race, class, gender, and age differences in treatment and sentencing are analyzed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7026 (3) Feminist Research Methods

Epistemological and methodological issues generated by feminist research and students' own projects.

Additional Information: Departmental Category: Sex and Gender

SOCY 7034 (3) Capital Punishment in the United States

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7036 (3) Feminist Theory

Examines the main schools of feminist thought and their impact upon sociological theories. Also examines current feminist theoretical debates and their relevance to feminist sociology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sex and Gender

SOCY 7111 (3) Data III--Advanced Data Analysis

Denotes third graduate course in sequence of quantitative methods. Following basic inferential statistics (SOCY 5111) and multivariate regression analysis (SOCY 6111), students study advanced statistical techniques such as event history analysis, multilevel modeling, structural equation modeling, and latent class analysis.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires a prerequisite course of SOCY 6111 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 7121 (3) Qualitative Analysis

Drawing on data gathered through participation, observation and in-depth interviewing, students focus on developing theoretical analyses and exploring classical and post-modern ethnographic writing formats. Students present and revise their papers as well as review journal articles. Department enforced prerequisite: SOCY 6121.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 7131 (3) Seminar in Social Psychology

Studies the individual in social context. Focuses on theoretical perspectives and substantive issues specific to sociological and social psychology, including socialization, the self, social roles, language, deviance, gender, collective behavior, group processes, attitudes and behavior, social norms, and conformity.

Additional Information: Departmental Category: General Sociology

SOCY 7141 (3) Third-year Paper Seminar

Guides graduate students through the creation of the required third-year paper and helps establish productive writing habits. Includes assigned readings, discussion, peer review, and specific tasks related to scholarly writing. Students will revise and defend the paper during the semester following the seminar. Department enforced prereqs., SOCY 5111 and SOCY 5201.

Requisites: Restricted to Sociology (SOCY) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Sociology

SOCY 7171 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: General Sociology

Sociology - Doctor of Philosophy (PhD)

Our program offers solid training in the foundational theories and methods of the discipline and allows students the flexibility to pursue interests in a variety of specialty areas. The Department of Sociology at CU Boulder is a well-respected center for teaching and research. Here students can work with award-winning faculty members who have been recognized for their research, teaching and service.

The Department of Sociology strives to maintain a diverse mix of graduate students, promote respect for and opportunities to learn from others with a broad range of backgrounds and experiences, and otherwise promote inclusive excellence. By providing a variety of perspectives, a diverse student body enhances students' educational experiences and strengthens our research and outreach endeavors.

We offer the following areas of specialization:

- criminology
- cultural sociology
- environment, hazards and disasters
- gender and sexuality
- health and medicine
- life course, aging and youth
- political economy
- population
- race and ethnicity
- social psychology and emotions

Community

The department views the recruitment and retention of an inclusive and diverse student body as an essential component of a successful graduate program. Besides enhancing the quality of our program by bringing a larger diversity of experience to it, recruitment and retention of students from many different backgrounds and experiences will increase the diversity in the profession of sociology overall. Our department is committed to improving the diversity of the student body and the graduate program experience.

Students are encouraged to become involved in CU Boulder's United Government of Graduate Students (UGGS) (<http://www.colorado.edu/uggs/about-uggs>). UGGS is committed to enhancing the graduate student experience by interacting with the university administration on matters such as financial aid, etc. UGGS has worked with the Graduate School to develop the Graduate Student Bill of Rights and Responsibilities (<http://www.colorado.edu/uggs/sites/default/files/attached-files/Graduate%20Student%20Bill%20of%20Rights%20and%20Responsibilities.pdf>).

Requirements

Students must complete a total of 45 credit hours of course work before taking the specialty area comprehensive exam. At least 24 hours must be in the Department of Sociology on the Boulder campus. All courses taken within the Department of Sociology must be numbered 5000 or above to qualify for graduate credit.

All first-year course work must be completed with at least a 3.50 GPA and no grade lower than a B to continue into the second year.

At the end of the first and second years, faculty members teaching required courses, faculty mentors/advisors and faculty supervising teaching assistants conduct a review of students' progress.

Required Courses and Semester Credit Hours

SOCY 5111	Data 1: Introduction to Social Statistics	3
SOCY 5181	Logics of Qualitative Inquiry	3

SOCY 5201	Graduate Seminar in Sociological Theory	3
SOCY 6111	Data 2: Data Analysis	3
Electives		
A second theory seminar of the student's choice.		3
Two 1-credit-hour graduate forums:		2
SOCY 6821	Graduate Sociology Forum 1	
Total Credit Hours		20

Master's Degree

The Department of Sociology does not have a master's degree program; however, students who are unable to meet the requirements for the doctoral degree may pursue an MA with Graduate Committee approval. In addition, PhD students may obtain the MA in the process of completing the doctoral degree. The department does not allow extra time for the completion of the MA degree while pursuing the PhD.

All MA students are required to complete a minimum of 30 credit hours of graduate course work. These 30 credit hours must include at least 6 credit hours in at least two seminars in the student's major fields. Students may take a maximum of 6 credit hours of independent study. Independent study may not be substituted for regular seminars. In addition, all students must take courses from at least four faculty members. Finally, all MA students must designate a master's advisory committee that consists of at least three regularly appointed graduate faculty members from the Department of Sociology.

For the MA degree, a student must complete 30 credit hours of course work at the 5000 level or above, including 4–6 thesis credit hours and the required Theory and Methods sequence with a B or higher in addition to the preparation of a written thesis and a successful oral defense of the thesis. Students must register for thesis credit hours in the semester of thesis defense.

Dissertation

Students must prepare a written dissertation proposal and orally defend it before the dissertation committee, and complete dissertation research and defend by the end of the sixth program year.

Recommended Plan of Study

Students enter the program in a cohort of approximately 12 students. Students typically focus on required courses during the first year. Graduate students are expected to take two or three seminars each semester. We encourage students to work with their faculty advisors to determine the course load for the first year based on prior course work, etc. Beyond the first year, we recommend that students take three courses each semester.

Each incoming student will be assigned an individual faculty advisor who will help guide the student through the first year of the program. Under the first-year advising system, students are encouraged to work with their first-year advisors to explore the program, the research specialties of the department and their own developing research interests while getting to know faculty members. Once a student has had an opportunity to meet and work with a variety of faculty, decisions regarding long-term advisors should be made. Beginning in year two of the program, graduate students are expected to seek their own faculty advisors.

Students in their first year are required to attend the graduate forum (SOCY 6821). Students will meet bimonthly throughout the academic year with the forum leader. The primary purposes of the forum are to introduce faculty and their research to the first-year cohort and to provide

a communal forum for the cohort to discuss issues of concern with the forum leader.

The department offers an ongoing professionalization seminar ("prosem") led by a group of elected graduate students.

During the first two years, a student's course work will focus on theory and methods. In the third and fourth years, the student will work with their advisor to develop a specialty area. Upon successful completion of the specialty comprehensive exam, the student will be admitted to candidacy and begin their dissertation research.

Spanish and Portuguese

Ranked as a top graduate program in the nation by the National Research Council, the Department of Spanish and Portuguese offers MA degrees in Peninsular and Latin American Literature as well as Hispanic Linguistics. It also offers PhD degrees in Peninsular and Latin American Literature, and Medieval and Early Modern Hispanic Literatures.

All students are eligible for graduate teaching assistantships. These appointments include a monthly stipend, tuition remission, and cover all student health insurance premiums. Grants and fellowships (summer, research, travel) are also available by application.

Course codes for this program are SPAN and PORT.

Master's Degree

- Spanish - Master of Arts (MA) (p. 1091)

Doctoral Degree

- Spanish - Doctor of Philosophy (PhD) (p. 1090)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Baena, Julio (https://experts.colorado.edu/display/fisid_101497)
Professor; PhD, Georgetown University

Instructor; BA, University of Wyoming

Courses

PORT 5110 (3) Brazilian Literature

Focuses on Brazilian literature through the lenses of literary and cultural studies. May address fiction, poetry or the relationship between literature and film. Besides reading literary texts, reading of academic essays is included.

Equivalent - Duplicate Degree Credit Not Granted: PORT 4110

Additional Information: Departmental Category: Portuguese

PORT 5150 (3) Literature of the Portuguese Speaking World

Examines major works of Portuguese literature and/or Portuguese speaking African literature through the lenses of cultural and literary studies. May address fiction, poetry, or the relationship between literature and cinema.

Equivalent - Duplicate Degree Credit Not Granted: PORT 4150

Additional Information: Departmental Category: Portuguese

SPAN 5120 (1-3) Seminar: Spanish Literature and/or Spanish American Literature

Selected topics in Spanish and/or Spanish American literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5130 (1-3) Seminar: Critical Approaches to Hispanic Literature

Treats various topics and genres as needs and resources dictate. Gives special attention to theoretical and critical analysis of Hispanic literature with greatest emphasis on contemporary trends. Genres might include narrative, poetry and theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7130

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5140 (3) Seminar: Spanish Literature, Medieval Period

Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7140

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of SPAN 5420 or SPAN 7420 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5200 (3) Seminar: Spanish Literature, Renaissance and Baroque

Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5210 (2-4) Seminar: Spanish Literature, 18th and/or 19th Centuries

Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7210

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5220 (1-3) Seminar: Spanish Literature, 20th Century

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7220

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5300 (2-4) Seminar: Spanish American Literature, Colonial Period and/or 19th Century

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7300

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5320 (1-3) Seminar: 20th Century Spanish American Literature

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7320

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5400 (2-4) Seminar: Spanish Phonology

Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7400

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5410 (2-4) Seminar: Spanish Syntax

Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7410

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5430 (1-3) Seminar: Hispanic Linguistics

Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7430

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5440 (3) Seminar: Trends in Hispanic Linguistics

Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5450 (3) Introduction to Hispanic Linguistics

Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation and Spanish spoken in the United States.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 4450

Additional Information: Departmental Category: Spanish

SPAN 5460 (3) Topics in Spanish Applied Linguistics

Treats topics within the scope of Spanish first and second language acquisition and the speech of bilinguals. Other topics include contrasting linguistics, interlingual stages of learning and code switching as they relate to language acquisition.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7460

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5650 (3) Methods of Teaching Spanish

Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 4650

Additional Information: Departmental Category: Spanish

SPAN 6840 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 6940 (1) Master's Degree Candidate

Requisites: Restricted to Spanish (SPAN) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Spanish

SPAN 6950 (1-6) Master's Thesis

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7120 (1-3) Seminar: Spanish Literature and/or Spanish American Literature

Selected topics in Spanish and/or Spanish American literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7130 (1-3) Seminar: Critical Approaches to Hispanic Literature

Treats various topics and genres as needs and resources dictate. Gives special attention to theoretical and critical analysis of Hispanic literature with greatest emphasis on contemporary trends. Genres might include narrative, poetry and theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5130

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7140 (3) Seminar: Spanish Literature, Medieval Period

Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5140

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 7200 (3) Seminar: Spanish Literature, Renaissance and Baroque

Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7210 (2-4) Seminar: Spanish Literature, 18th and/or 19th Centuries

Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5210

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7220 (1-3) Seminar: Spanish Literature, 20th Century

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5220

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7300 (2-4) Seminar: Spanish American Literature, Colonial Period and/or 19th Century

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5300

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7320 (1-3) Seminar: 20th Century Spanish American Literature

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5320

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7400 (2-4) Seminar: Spanish Phonology

Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5400

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 7410 (2-4) Seminar: Spanish Syntax

Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5410

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 7430 (1-3) Seminar: Hispanic Linguistics

Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5430

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 7440 (3) Seminar: Trends in Hispanic Linguistics

Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7460 (3) Topics in Spanish Language Acquisition and Applied Linguistics

Treats topics within the scope of Spanish first and second language acquisition and the speech of bilinguals. Other topics include contrasting linguistics, interlingual stages of learning and code switching as they relate to language acquisition.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5460

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Spanish

SPAN 8840 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

Spanish - Doctor of Philosophy (PhD)

Unique among other departments in the country, the Spanish and Portuguese Department at CU Boulder offers two distinct tracks to our PhD students:

- medieval and early modern Hispanic literatures
- Peninsular and Latin American literatures

Both PhD programs offer students a rigorous yet flexible plan of studies designed to deepen their knowledge of Peninsular and Latin American literatures and cultures.

Our faculty is actively engaged in research and publication in a variety of topics covering the whole range of peninsular and Latin American literatures and cultures, from the role of female leadership in the Peninsular Middle Ages to cultural histories of banditry in Latin America, from Cervantes to the work of contemporary authors like Roberto Bolaño.

At CU Boulder, students work closely with faculty members and are encouraged to pursue their own research interests.

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master's Degree Requirements section of this catalog.

Requirements

Residence Requirement

PhD students must complete a minimum of one academic year in residence on the Boulder campus (excluding summer) within the four years immediately preceding the date on which they present themselves for the PhD comprehensive examination.

Areas of Concentration

The PhD in Spanish is offered in six literary periods of concentration:

- medieval
- golden age
- 18th and/or 19th century peninsular
- 20th and 21st century peninsular
- colonial and 19th century Spanish American
- 20th and 21st century Spanish American

For further information on these options, contact the department.

Course Requirements

Prior to taking the PhD comprehensive exams, students must complete a minimum of 36 credit hours in graduate seminars in Spanish and/or related fields numbered 5000 or above. Students can take as many as 9 graduate credit hours outside the department. The student's advisor and the associate chair, in consultation with the chair of the department, must approve credit hours in excess of 9, provided that the student formally requests it and gives a compelling reason for the standard limit to be overridden. Approval of the MA degree must also be presented for the PhD. Each advisor, in consultation with the student, will determine which courses will be acceptable.

All PhD students must take at least 30 credit hours of graduate course work at CU Boulder. PhD students may transfer to the department a maximum of 6 hours of acceptable graduate-level credit. Transfer of credits will be considered only at the moment of admission into the program, not later on. Students may take no more than 3 credit hours of independent study courses. Additional independent study has to be approved by the graduate committee, which makes a recommendation to the associate chair of graduate studies or the chair of the department. Under no circumstances can independent study course work exceed 25 percent of the course work required for the PhD degree.

Doctoral students can only take up to 12 credits in course load that are not regular graduate seminars in the Spanish and Portuguese Department. These 12 credits are a combination of credits taken outside of the Spanish and Portuguese Department and independent studies offered by a faculty member of the Spanish and Portuguese Department. If a student decides to take one independent study with their advisor, then the student is allowed to take 9 credits outside the department; this is the recommended situation. If a student takes two independent studies, then they can only take 6 credits outside the department, and so on. No more than 9 credit hours can be used in independent studies, and no more than 9 credit hours can be taken outside the department.

PhD students who did not take a teaching methodology seminar, a literary theory seminar, or a Hispanic linguistics seminar as part of their MA program must do so as part of their PhD program. Those students who did not take a minimum of 3 graduate credit hours in each of the seven subject areas as part of their MA program, must make up course work in these areas as part of the PhD program. The associate chair for graduate studies makes the decision regarding this additional work during the

student's first semester in the program. If this additional work is not completed the semester prior to the PhD exam, students will not be able to take their comprehensive exams.

Language Requirement

The student must demonstrate as early as possible, but at least one full semester before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of one foreign language and a reading knowledge of a second language in addition to Spanish. The languages are chosen by the student in consultation with the advisory committee.

Spanish - Master of Arts (MA)

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master's Degree Requirements (p. 866) section of this catalog.

Areas of Concentration

Literature Concentration

Our MA in Peninsular and Latin American literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA students are required to take 30 hours of graduate course work.

Linguistics Concentration

Our MA in Hispanic linguistics is an interdisciplinary program that provides students with a solid foundation in linguistics through the course work taken in the Departments of Spanish and Portuguese, Linguistics, Communication, Anthropology and the School of Education. Students have the unique opportunity to work closely in collaboration with faculty to develop their areas of concentration and graduate as specialists in a wide range of topics (e.g., history of the Spanish language, Spanish in the United States, sociolinguistics, etc.)

All MA students in the Hispanic linguistics option are required to take 30 hours of graduate course work. They are required to have their course selections in linguistics approved by their advisor and the associate chair for graduate studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education can serve as important complements to linguistics courses taken in our department.

Requirements

General Course Requirements

The MA in Spanish is offered in two areas of concentration: one with an emphasis on literature and one with an emphasis on linguistics.

All MA students are required to complete at least 30 hours of graduate course work, at least 25 of which must be completed at CU Boulder. MA students may transfer to the department a maximum of 6 credit hours of acceptable graduate-level courses and may take no more than 6 credit hours of independent study courses.

Courses taken as part of the MA program must be offered by our department or by others upon having been approved by the student's MA supervisory committee (or the associate chair for graduate studies if the committee has not yet been formed). In addition, MA students may not take more than 9 hours of graduate course work in any given semester.

No graduate course in the department may be taken pass/fail by a graduate student in our program. This rule also applies to those courses taken in the Department of Linguistics by our MA students.

Students who are failing a course will not be allowed to drop the course, except under special circumstances. To do so, approval must be secured from the course instructor, the associate chair for graduate studies and the department chair.

Concentration Requirements

Literature Concentration

Required Courses

SPAN 5130	Seminar: Critical Approaches to Hispanic Literature	3
SPAN 4980	Methods Language Learn/Pedagogy	1

Electives

One Hispanic linguistics course:		3
SPAN 5400	Seminar: Spanish Phonology	
SPAN 5410	Seminar: Spanish Syntax	
SPAN 5430	Seminar: Hispanic Linguistics	
SPAN 5440	Seminar: Trends in Hispanic Linguistics	
SPAN 5450	Introduction to Hispanic Linguistics	
SPAN 5460	Topics in Spanish Applied Linguistics	

A minimum of 3 graduate credit hours in each of the following subject areas: 21

Medieval Iberian literature	
Early modern Spanish literature	
Colonial Spanish American literature	
19th-century Spanish American literature	
18th- and 19th-century Peninsular literature	
20th- and 21st-century Peninsular literature	
20th- and 21st-century Spanish American literature	

Additional courses to fulfill the 30-credit minimum. 2

Total Credit Hours 30

Linguistics Concentration

MA students in the Hispanic linguistics option are required to have their course selections in linguistics approved by their advisor and the associate chair for graduate studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education can serve as important complements to linguistics courses taken in our department.

Required Courses

LING 2000	Introduction to Linguistics	3
SPAN 4980	Methods Language Learn/Pedagogy	1

Electives

One Spanish graduate-level seminar.		3
Additional courses to fulfill the 30-credit minimum.		23
Total Credit Hours		30

¹ Required for students who did not take a similar course as part of their previous course of study. Students who must take LING 2000 are required to do so during their first semester in the program.

Language Requirement

Students must demonstrate, as early as possible and before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of a foreign language other than Spanish. They also must be able to speak, read and write English well.

Speech, Language and Hearing Sciences

The graduate curriculum in Speech, Language and Hearing Sciences (SLHS) leads to either a master's or a doctoral degree. The programs in speech-language pathology and audiology are accredited by the Council on Academic Accreditation (CAA) and the Colorado State Department of Education.

Prospective students should read the Master's Degree (p. 866) or Doctoral Degree Requirements (p. 867) sections of this catalog.

Course code for this program is SLHS.

Master's Degree

- Speech, Language and Hearing Sciences - Master of Arts (MA) (p. 1103)

Doctoral Degrees

- Audiology - Doctor of Audiology (AuD) (p. 1099)
- Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD) (p. 1102)

Certificate

- Speech-Language Pathology Assistant - Graduate Certificate (p. 1104)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

SLHS 5002 (2) Evidence-based Practice and Research Methods 1

Provides opportunities for students to acquire the knowledge of evidence-based practice (EBP) in the areas of speech, language and hearing sciences (SLHS). Covers topics about EBP in SLHS, levels of evidence and strategies for using scientific evidence in the process of making clinical decisions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5012 (2) Evidence-based Practice and Research Methods 2

Focuses on the knowledge of research methods and the application of research principles into clinical practice. In particular, covers quantitative research methods that are in speech-language pathology clinical settings. Will cover (1) clinical practice and research methods in speech, language and hearing sciences; (2) single-subject designs in clinical settings; (3) introduction to data collection, data organization and data analysis; (4) interpretation and presentation of clinical data. Formerly SLHS 5000.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5032 (3) Competencies and Strategies for the SLPA

Includes roles and responsibilities for the Speech Language Pathology Assistant (SLPA) working in the public schools, service delivery models, health and safety, screening assistive technology, intervention and self reflection and evaluation. Must be accepted in the SLPA certification program.

Requisites: Requires a prerequisite course of SLHS 4918 (minimum grade D-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5112 (2) Clinical Practice I

Provides entering graduate students a framework for beginning their clinical education and building the relationship of theory and research to current clinical practice in speech-language pathology. Key topics for exploration include contemporary professional issues, licensure, professionalism, ethics and ethical conduct, scope of practice, competency development, teaming and collaboration, accountability and multicultural issues. Formerly SLHS 5110.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5122 (1) Clinical Practice II: Assessment and Treatment Planning

Explores critical elements associated with assessment and treatment planning in speech-language pathology. Topic areas include assessment style, interviewing, test selection and techniques of test administration. Diagnosis and treatment planning section includes differential diagnoses, ethics of diagnoses, goal writing and treatment rationale.

Requisites: Requires a prerequisite course of SLHS 5112 (minimum grade B-). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5132 (1) Clinical Practice III: School Based Skills

Targeted skills for implementation in educationally-based settings for speech-language pathologists. Specific coursework will address writing IEPs/IFSPs, expanded work with service delivery models and implementation of state and federal requirements for school based services.

Requisites: Requires a prerequisite course of SLHS 5122 (minimum grade B-).

SLHS 5242 (3) Language Disorders in School Age Children

Addresses the nature, assessment, and treatment of developmental language disorders in school age children.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5252 (3) Acquired Language Disorders in Adults

Introduces the neural bases and medical etiologies of acquired language disorders in adults, explores the ways in which normal language processing may become disordered, and studies current methods of evaluation and treatment design.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5262 (3) Dysphagia

Provides students with background in the anatomical, physiological, and neurological bases of swallowing function and disorders across the lifespan. Etiological factors are presented, as well as various assessment tools and principles of treatment of swallowing disorders in children and adults.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5272 (1) Augmentative Alternative Communication: Theory and Use

Provides an overview of the application of current technology to alternative/augmentative communication. Emphasizes assessment and intervention with nonverbal children and adults with need for alternative/augmentative communication systems. Presents various technological devices and systems. Addresses system selection, programming, development and integration of use in environmental contexts.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5282 (3) Acquired Cognitive Disorders

Explores the theoretical and clinical management of acquired cognitive disorders that impact communication. Includes basic functional neuroanatomy.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5292 (3) Neurogenic Speech Disorders in Adults

Presents the neural bases of normal and disordered speech motor control, teaches assessment and treatment of motor speech disorders in adults, and applies motor control research to clinical problems.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5302 (3) Articulation and Phonological Disorders

Provides overview of phonological development, perception, and production. Presents factors related to articulation and focuses on critical evaluation of traditional and phonological based assessment and intervention procedures. Includes coverage of phonological awareness, metaphonological skills as related to literacy, as well as treatments and principles specific to children with motor speech disorders.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5312 (2) Aging and Communication

Examines normal age-related changes to communication systems. Anatomic and physiological changes to the mechanisms of speech production, audition and the brain will be included, with a focus on the functional impacts of such changes for speech production and perception, cognition, language and social communication.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

SLHS 5332 (3) Voice Disorders

Examines the anatomical and physiological bases for normal and disordered laryngeal function. Explores structural, neuropathologic, functional/behavior and idiopathic voice disorders. Emphasis on assessment and treatment of individuals with voice disorders, including special populations.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5362 (3) Fluency Disorders

Exploration of the nature, differential diagnosis and treatment of fluency disorders across the life-span. Students will develop the requisite skills and knowledge base to provide prevention, consultation, assessment and intervention for fluency disorders. Research bearing on affective, behavioral and cognitive components of stuttering will be reviewed, along with recent data on the neural bases of the disorder. A broad range of treatment approaches will be discussed and demonstrated.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5555 (2) Advanced Topics in Social Communication: Autism Spectrum Disorders

Students will acquire knowledge and skills in the appropriate selection, application and evaluation of interventions for children, adolescents and adults with autism spectrum disorders (ASD) and their families. Evaluation and diagnosis, including development of the IFSP and IEP, will be addressed.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5576 (3) Neuroanatomy and Neurophysiology of Communication

Provides an introduction to the neuroanatomy and neurophysiology that collectively give rise to human communication including speech perception and production. We will consider how speech, language and hearing are represented in and controlled by the central nervous system and how neuropathologies affect processes of communication.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 5602 (3) Communication Challenges in Children: Birth to Six

Emphasizes nature and profile of language and communication disorders affecting infants and young children. Facilitates integration of clinical and theoretical perspectives with specific approaches for family-centered assessment and intervention principles, models and techniques.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5612 (1) Language Learning Disabilities

Focuses on the nature, assessment and treatment of learning disabilities and the role of the speech-language pathologist in working with children, adolescents and adults with LLD.

Requisites: Requires a prerequisite course of SLHS 5242 (minimum grade D-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5674 (3) Signals and Systems in Audiology

Provides in-depth study of instrumentation used by audiologists for hearing aid evaluation and fitting, signal generation and modification, and signal measurement and calibration.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 5848 (1-4) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Practica

SLHS 5849 (1-4) Independent Study 1, M.A.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 5859 (1-4) Independent Study 2, M.A.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 5878 (1-3) Practicum 1: Speech-Language-Learning Appraisal

Provides a supervised clinical experience on campus in appraisal of speech, language, and learning disorders after training at the observational level.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5898 (1-4) Practicum 1: Speech-Language-Learning Intervention

Offers on-campus and off-campus supervised clinical practice in management of speech-language-hearing disorders in children and adults.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5918 (1-3) Audiology Clinical Practicum: Lab

Provides clinical training in the on site Speech, Language and Hearing Center in skills including audiology identification, evaluation and management for adults and children with hearing loss.

Repeatable: Repeatable for up to 16.00 total credit hours.

Requisites: Requires a prerequisite course of SLHS 6544 (minimum grade B-). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5928 (1-4) Audiology Clinical Practicum: Level 1

Provides clinical training in an off-campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Requires a prerequisite course of SLHS 5918 (minimum grade B-). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

SLHS 5930 (4) Speech Language Pathology Assistant Internship

Placement for a minimum of 12 hours per week for a total of 180 hours including 100 direct student contact hours under the supervision of a fully credentialed SLP, to fully develop requisite skills as an SLPA and become employed in a public school setting. Must be accepted into the SLPA certificate program.

Requisites: Requires a prerequisite course of SLHS 4918 (minimum grade D-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5938 (1-4) Audiology Clinic Practicum: Level 2 Educational

Provides clinical training in an off campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B-). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5948 (1-4) Audiology Clinic Practicum: Level 2 Medical

Provides clinical training in an off campus medical audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6000 (1-4) Problems in Speech, Language and Hearing Sciences

Studies selected topics related to the theory and management of communication disorders, and theoretical/scientific information related to speech, language, and hearing.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6006 (3) Advanced Hearing Science

Provides advanced study in hearing science, including physical, physiological, and psychological acoustics of both normal and impaired auditory systems. Department enforced prerequisite: graduate standing in SLHS; undergraduate course work in biology or anatomy.

Additional Information: Departmental Category: Didactic: Speech-Hearing Science

SLHS 6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and PSYC 6200

Requisites: Restricted to graduate students only.

SLHS 6504 (1) Professional Ethics in Audiology

Overview of ethics and ethical issues in the profession of audiology. Topics to be discussed include code of ethics by professions, approaches to analyzing ethical dilemmas, ethics in relationships with manufacturers, and ethical considerations in teaching, clinical practice and research.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6514 (1) Professional Issues in Audiology

Overview of professional issues related to the profession of audiology. Topics to be discussed include certification, licensure, professional associations, infection control, practice management, federal regulations related to audiology, professional communications and professional relationships.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6544 (3) Auditory Processes: Adult Assessment

Advanced study on the current science surrounding hearing assessment of adults across the age span. Includes theoretical foundations and clinical applications.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6554 (3) Auditory Processes: Child Assessment

Provides advanced study in hearing assessment and management of children across the age span. Topics include epidemiological, medical, audiological, developmental, and rehabilitative aspects of normal and impaired hearing in children.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6564 (3) Auditory Processes: Neurodiagnostics

Provides advanced study in the neural bases of hearing. Includes theoretical foundations and clinical assessment of neurological functioning in auditory systems with both normal and impaired function.

Requisites: Requires a prerequisite course of SLHS 6544 (minimum grade B-). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6614 (3) Fundamentals of Amplification

Discusses theoretical and clinical issues regarding the design, fitting, and evaluation of amplification technology for individuals with hearing loss. Includes the use of behavioral, psychological, electroacoustic, and physiological (real ear) measures in the selection and evaluation of digital and analog hearing aid technology.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6642 (3) Development and Intervention in Childhood Hearing Loss

Reviews development and intervention with children who are deaf and hard-of-hearing, birth through school age. Focuses on speech, auditory training, language, literacy and cognitive development. Formerly SLHS 6640.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 6650 (2) Counseling and Professional Ethics

Explores counseling theories and techniques following the diagnosis of a disability across the life span. Considers issues related to grieving and mourning, parenting, disability, cultural customs, attachment, and relationships. Covers professional ethics and ethical responsibilities.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6660 (1) Multicultural Issues in SLHS and Communication Theory

Provides an in-depth understanding and first-hand knowledge of different racial, ethnic and religious communities, which is necessary to develop and refine multicultural clinical competence. Incorporates scholarly readings and experiential learning in multicultural settings and fosters participants' qualitative research skills.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6670 (3) Adult Aural Rehabilitation

Provides an investigation of the impact of hearing loss on adults. Psychosocial aspects, communication challenges, assessment and intervention for adult hearing disorders including presbycusis, tinnitus, vestibular disorders, auditory central processing disorders and sudden hearing loss.

Requisites: Requires a prerequisite course of SLHS 6544 (minimum grade B-). Restricted to graduate students only.

Recommended: Prerequisites SLHS 7418 and SLHS 7540.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6918 (7) Practicum 2: Speech-Language-Learning Internship

Gives an off-campus experience in a clinical or hospital setting that provides in-depth practice in management of communication disorders of children and adults.

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6928 (1-7) Practicum 2: Public School Internship

Provides an off-campus supervised experience providing extended and in-depth practice involving school-age children in a school classroom.

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6938 (1-10) Audiology Clinic Externship Educational

Provides students with full time off campus experience in an educational audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.

Repeatable: Repeatable for up to 21.00 total credit hours.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6940 (1) Candidate for Degree

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6948 (1-10) Audiology Clinic Externship: Medical

Provides students with full time off campus experience in a medical audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.

Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6950 (1-7) Master's Thesis

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7000 (3) Research Designs in Human Communication Sciences and Disorders

Offers an advanced seminar in research designs for human behavior: efficacy, ethnographic, single-subject, quasi-experimental, and experimental designs. Designed to familiarize students with terminologies and research designs frequently used in speech-language-hearing areas.

Recommended: Prerequisite basic statistics.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7200 (3) Business, Management and Ethics in Audiology

Focuses on the business aspects of managing an audiology practice.

Addresses developing a business plan, contracting for services, legal issues, financial reporting, budgeting, pricing, billing and reimbursement, regulatory issues, marketing, personnel management, risk abatement, and business ethics.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7418 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

SLHS 7428 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425

Requisites: Restricted to graduate students only.

SLHS 7450 (3) Audiology Capstone Project

Provides an individualized project for AUD, completed prior to initiation of final clinical year. May be in the form of research-based investigation, an evidence-based position paper, a clinical protocol based on peer-reviewed literature, a grant proposal, or another format approved by AUD committee. Project requires approved proposal by AUD committee and focused study supervised by capstone advisor.

Requisites: Restricted to Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7520 (3) Auditory Processes: Medical and Genetic Bases

Discusses current developments in epidemiology, pathogenesis, and symptomatology of hearing loss. Investigates the genetic bases of hearing loss and deafness. Incorporates clinical decision theory in assessment and intervention. Explores cross-disciplinary topics from genetics, radiology, pharmacology, pathology, and otology.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7530 (3) Auditory Processes: Theory and Application in the School Environment

Focuses on application of routine audiological practices such as screening, assessment, rehabilitation, and instrumentation to children in educational settings. Emphasizes federal education regulations and pertinent case law.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7540 (3) Auditory Processes: Physiology, Assessment, and Management of the Vestibular System

Emphasizes current research on physiology of the vestibular system, including both structure and function. Considers the etiology of both peripheral and central pathologies of the vestibular system. Discusses ways to assess function of the vestibular system as well as theoretical and practical considerations of vestibular rehabilitation.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7550 (2) Mgmt and Prev of Noise and Noise Induced Hearing Loss

Discusses effects of noise and other damaging agents on the physiology of the auditory system. Highlights principles of hearing conservation programs. Focuses on prevention, identification, and management of occupational hearing loss and current legislation as it pertains to occupational safety and hazards.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7554 (1) Audiometric Instrumentation and Calibration

Introduces students to the basic concepts of electroacoustic transduction, and demonstrates the application of these concepts to the measurement and calibration of audiometric instrumentation. Students will become familiar with standard measurement equipment including multimeters, oscilloscopes, and sound level meters; and will become familiar with calibration standards for instruments including the audiometer, tympanometer, and electrophysiological amplifiers.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7614 (3) Implantable Devices: Technology and Clinical Application

Examines technological aspects and clinical applications of implantable prostheses such as cochlear implants, brainstem implants, hybrid cochlear implants, Baha devices and middle ear implants. Topics will include: history of implantable devices, anatomy and histopathology of the inner ear, speech processing in implants, mapping devices, candidacy criteria, behavioral and electrophysiologic techniques for assessment and outcomes in implanted children and adults.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7640 (3) Communication Processes and Hearing Loss: Birth through Six

Provides in-depth study of current research literature and its implications for clinical practice regarding development of communication processes in the first six years of life and impact of hearing loss. Investigates development of language, auditory perception, speech production, social-emotional abilities, and cognition.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7714 (3) Advanced Topics in Amplification

Discusses advanced issues in the design and fitting of hearing aid technology, including advanced signal processing, outcomes assessment, evidence-based practice and specialized fitting protocols for pediatric and geriatric populations. Current research is integrated with clinical case studies to guide the development of evidence-based practice in hearing aid fittings.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7849 (1-4) Independent Study 1, PhD

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 7859 (1-4) Independent Study 2, PhD

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 7918 (3) Practicum 3: Clinical Supervision

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8918 (3) Practicum 3: Classroom Instruction

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8928 (3) Practicum 3: Research Coordination

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

Audiology - Doctor of Audiology (AuD)

The AuD is the entry-level degree in clinical audiology that emphasizes both clinical competency development and evidence-based practice. Students in the AuD program complete a four-year curriculum that includes academic course work, clinical practicum and a capstone project. Students take advanced seminars in hearing science, clinical audiology and research methods.

Students have the opportunity to pursue clinical research in both laboratory and clinical settings, with faculty in a wide range of areas including electrophysiology, psychological acoustics, physiological acoustics, diagnostic evaluation and intervention procedures for newborns through geriatrics, advanced amplification, speech perception in noise, assistive technologies, cochlear implants, vestibular assessment techniques and aural habilitation and rehabilitation of individuals with hearing loss. Furthermore, students undertake clinical practica to develop competency across the scope of practice consistent with national clinical certification and/or licensure in audiology. They will have the opportunity to complete clinical rotations in several different settings including full use of laboratories and suites in the Department of Speech, Language & Hearing Sciences. Clinical rotations occur at sites such as University of Colorado Hospital (UCH) in Denver and the UCH outpatient Boulder clinic, Children's Hospital Colorado, local school districts, and other clinical settings throughout the metro Boulder and Denver area. Students complete fourth-year externships in Denver hospitals or clinical settings throughout the nation.

Dual Degree Program

AuD/PhD in Audiology and Speech, Language and Hearing Science

The department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the fields of audiology and hearing science. The PhD/AuD dual degree program trains students in both clinical research and clinical practice in audiology. Students in the program gain training that will prepare them to become independent scholars, teach in higher education, conduct research, become certified clinical audiologists and gain leadership skills. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program.

Requirements

Prerequisite Course Work

The AuD faculty recommends that students complete undergraduate courses covering the following six topics prior to beginning the graduate program in SLHS:

- audiological evaluation

- hearing science
- language development
- phonetics
- speech disorders
- language disorders

Courses covering speech science and audiological rehabilitation are also recommended, but are optional. That said, some students come in with non-SLHS backgrounds in which they have had some but not all of the background knowledge necessary for the program.

Students can work with faculty to test out of courses by successfully taking the exams from the undergraduate course work and demonstrating at least an 80 percent competency. This evaluation option is suggested only when students have already had significant work or educational experiences that have provided them with significant background options in specific areas.

See the department's AuD Prerequisites (<http://www.colorado.edu/slhs/node/442/attachment>) for requirements and course equivalencies.

Sample Four-Year Plan of Study

The following is an example of the course sequence of the AuD program.

Program Begins in an Even Year

Course	Title	Credit Hours
Year One		
Fall Semester		
SLHS 5576	Neuroanatomy and Neurophysiology of Communication	3
SLHS 5918	Audiology Clinical Practicum: Lab	1-3
SLHS 6544	Auditory Processes: Adult Assessment	3
SLHS 6564	Auditory Processes: Neurodiagnc	3
SLHS 6614	Fundamentals of Amplification	3
	Credit Hours	13-15
Spring Semester		
SLHS 5918	Audiology Clinical Practicum: Lab	1-3
SLHS 6006	Advanced Hearing Science	3
SLHS 6554	Auditory Processes: Child Assessment	3

SLHS 7000	Research Designs in Human Communicational Sciences and Disorders	3
-----------	--	---

Credit Hours 10-12

Summer

SLHS 5918	Audiology Clinical Practicum: Lab	1-3
-----------	-----------------------------------	-----

Credit Hours 1-3

Year Two

Spring Semester

SLHS 5918	Audiology Clinical Practicum: Lab	1-3
-----------	-----------------------------------	-----

SLHS 5938	Audiology Clinic Practicum: Level 2 Educational	1-4
-----------	---	-----

SLHS 6650	Counseling and Professional Ethics	2
-----------	------------------------------------	---

SLHS 7200	Business, Management and Ethics in Audiology	3
-----------	--	---

SLHS 7550	Mgmt and Prev of Noise and Noise Induced Hearing Loss	2
-----------	---	---

SLHS 7554	Audiometric Instrumentation and Calibration	1
-----------	---	---

Credit Hours 10-15

Summer

SLHS 5918	Audiology Clinical Practicum: Lab	1-3
-----------	-----------------------------------	-----

Credit Hours 1-3

Year Three

Fall Semester

SLHS 5674	Signals and Systems in Audiology	3
-----------	----------------------------------	---

SLHS 5918	Audiology Clinical Practicum: Lab	1-3
-----------	-----------------------------------	-----

SLHS 5938	Audiology Clinic Practicum: Level 2 Educational	1-4
-----------	---	-----

SLHS 6670	Adult Aural Rehabilitative	3
-----------	----------------------------	---

SLHS 7614	Implantable Devices: Technology and Clinical Application	3
-----------	--	---

Credit Hours 11-16

Spring Semester

SLHS 5918	Audiology Clinical Practicum: Lab	1-3
-----------	-----------------------------------	-----

SLHS 5938	Audiology Clinic Practicum: Level 2 Educational	1-4

SLHS 5918	Audiology Clinical Practicum: Lab	1-3		
SLHS 5938	Audiology Clinic Practicum: Level 2 Educational	1-4		
SLHS 7520	Auditory Processes: Medical and Genetic Bases	3		
SLHS 7530	Auditory Processes: Theory and Application in the School Environment	3		

SLHS 7640	Communication Processes and Hearing Loss: Birth through Six	3
<hr/>		
	Credit Hours	11-16
Spring Semester		
SLHS 5918	Audiology Clinical Practicum: Lab	1-3
SLHS 5938	Audiology Clinic Practicum: Level 2 Educational	1-4
SLHS 6650	Counseling and Professional Ethics	2
SLHS 7200	Business, Management and Ethics in Audiology	3
SLHS 7550	Mgmt and Prev of Noise and Noise Induced Hearing Loss	2
SLHS 7554	Audiometric Instrumenta and Calibration	1
<hr/>		
	Credit Hours	10-15
Summer		
SLHS 5918	Audiology Clinical Practicum: Lab	1-3
<hr/>		
	Credit Hours	1-3
Year Four		
Fall Semester		
SLHS 6938	Audiology Clinic Externship Educational	1-10
<hr/>		
	Credit Hours	1-10
Spring Semester		
SLHS 6938	Audiology Clinic Externship Educational	1-10
<hr/>		
	Credit Hours	1-10
<hr/>		
	Total Credit Hours	72-130

Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD)

The PhD program is grounded in research. Supervisory, administrative, instructional and research activities acquaint students with problems and concepts at a higher level of professional activity and responsibility. Students in the PhD program gain the knowledge and skills that will prepare them to become independent scholars, teach in higher education, conduct research, and become leaders within the discipline.

Wide latitude prevails in planning individual PhD programs. It is expected that students have some professional experience before entering the program and that they have specific academic or professional goals in mind. PhD students must take a four-course sequence in statistics, four core courses within Speech, Language and Hearing Sciences (SLHS), complete the preliminary and comprehensive examinations and successfully defend a dissertation research project. Beyond that, student degree plans are individually designed through the joint efforts of the student and an advisory committee.

Dual Degree Programs

Students may pursue a dual PhD with neuroscience (p. 1076) or cognitive science (p. 950). In addition, the department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the field of audiology and speech, language and hearing science. The PhD/AuD dual degree program trains students in clinical research and clinical practice in audiology. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program. Students may apply to both programs simultaneously, or may apply to the PhD portion after having been accepted into the AuD portion or may apply to the AuD portion after having been accepted into the PhD portion.

For more information, visit the department's Graduate Coursework (<http://www.colorado.edu/slhs/graduate-coursework>) webpage.

Requirements

The student will select an advisory committee during the first semester of his or her program. Then the student will develop a plan of study in conjunction with the advisory committee during the first year of doctoral study. The plan of study will detail the student's goals, course work to be completed to meet those goals and departmental and Graduate School requirements, and a proposed schedule for completion of doctoral work. The plan of study will become the student's blueprint for their doctoral work. The advisory committee must approve the plan of study, which may be amended later with the committee approval.

Departmental and Graduate School requirements for doctoral students are intended to allow maximum flexibility in developing a plan of study. All students take three SLHS doctoral seminars, at least 12 credit hours in statistics and research tools, and additional course work in their own research area. There is no foreign language requirement. The Graduate School specifies that not more than 25 percent of course work can be taken through independent study.

Required Course Work

Three doctoral-level SLHS seminars	9
At least 15 credit hours in the student's major content area.	15

One teaching practicum:	3
SLHS 8918 Practicum 3: Classroom Instruction	
One research practicum.	3
Two courses each in statistics and research tools.	12-15
Thirty hours of doctoral dissertation credit.	30
SLHS 8990 Doctoral Dissertation	
Total Credit Hours	72-75

Upon approval of the advisory committee, a maximum of 21 credit hours of course work may be transferred to fulfill the above requirements. This should be accomplished by the end of the first semester of doctoral study. Requests must be made to the Graduate School on a form, which they provide; an official transcript must accompany the request.

In order to continue in the program, a grade point average of 3.50 or better on course work every semester will be required as well as continued recommendation of the SLHS faculty advisory committee. Grades below B- will not count toward a doctoral degree.

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from an accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder.

Speech, Language and Hearing Sciences - Master of Arts (MA)

Focus Areas

There are two areas of focus available at the MA level:

1. MA leading to professional certification in speech-language pathology
2. research

Professional Certification Focus

The master's degree program leading to professional certification in speech-language pathology (MA-SLP) is designed to provide a theoretically and clinically rich path for students planning to work as speech-language pathologists in medical, educational, and private practice settings. Students in the MA-SLP program are provided with a strong foundation of theoretical and clinical knowledge through their course work and clinical experiences.

Students completing the MA-SLP program obtain a Master of Arts degree from the University of Colorado and are eligible to receive the Certificate of Clinical Competence in speech-language pathology from the American Speech-Language-Hearing Association (<http://www.asha.org>) (ASHA) upon successful completion of the clinical fellowship year and the national PRAXIS examination. Students can also apply for Colorado State Licensure to work in the public schools.

Research Focus

The master's program with a research focus allows students to design their own master's degree in SLHS in any topic related to speech, language or hearing sciences. This degree does not result in clinical certification. Working with an advisor, students design a plan of study,

with course work within SLHS and from other departments. A master's thesis is required.

Requirements

Program Requirements

Professional Certification Focus

The master's program with a professional certification focus is a two-year (24-month) program that culminates in one or two internships and either successful passage of the comprehensive exam or completion of a thesis. The program consists of an initial summer intensive session beginning in early August and ends in late July two years later. Students are enrolled for August intensive, fall year 1, spring year 1, summer year 1, fall year 2, spring year 2, and summer year 2.

Within departmental and ASHA guidelines, master's students with a focus in speech-language pathology complete a core set of seminars and clinical assignments that assure at least minimal competence in the full scope of practice for speech-language pathologists. In addition, students complete at least three of six electives that provide the opportunity to develop greater knowledge and skills in areas of specific interest. Clinical assignments are initiated in the on-site Speech, Language and Hearing Center; later, student input is obtained in making off-campus clinical assignments in educational and medical settings.

Students with an undergraduate degree in speech-language pathology and audiology can expect to complete the program in two calendar years (see the MA-SLP (<https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology>) webpage). Those without such a background are required to make up undergraduate deficiencies, which normally require at least an additional 18 credit hours of courses in speech, language and hearing sciences and related disciplines.

Students must meet standards for both academic and clinical competence, as well as professional conduct. Full-time graduate study is required.

Research Focus

The research focus is designed for students who are not seeking clinical certification.

Working with an advisor, students design a plan of study with course work from SLHS and other departments. A master's thesis is required. The non-clinical master's degree in SLHS requires 30 credit hours of graduate course work, with four to six credit hours devoted to the master's thesis. For more information, visit the Thesis Option (<http://www.colorado.edu/slhs/thesis-option>) webpage.

At least 24 hours must be completed at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department. Students may be able to transfer up to 9 credit hours of graduate credit towards this degree. The non-clinical master's degree requires close work with a faculty member of your choosing. Students interested in pursuing this degree option are encouraged to talk with SLHS faculty members who share their interests before applying (see the Meet Us (<http://www.colorado.edu/slhs/meet-us>) webpage).

Speech-Language Pathology Assistant - Graduate Certificate

Speech-Language Pathology Assistants (SLPAs) work directly with students with communication challenges in public school settings under the supervision of a fully qualified and nationally certified speech-language pathologist (SLP). SLPAs have a significant role in enhancing the quality of services for children and adolescents that need support for speech, communication, reading, and writing. This certificate program provides the opportunity to meet the requirements for SLPA authorization in the state of Colorado, through the Colorado Department of Education to work in Colorado public schools. Candidates develop the knowledge and skills to work under the supervision of a certified SLP in the public school setting with ages 0-21. This certificate is appropriate for individuals with a BA in speech, language, and hearing sciences (SLHS), those completing a BA in SLHS (enrolled in their last semester of senior year at CU), or individuals with a BA in another field, who have completed or are completing equivalent leveling coursework (24 hours) through an approved SLHS department. See coursework required as listed under Apply (<http://www.colorado.edu/slhs/online/slpa-certificate-program/requirements-admission>).

The Colorado Department of Education (<http://www.cde.state.co.us>) currently has an "authorization" credential for SLPAs who meet qualifications to work in Colorado public schools under the supervision of qualified MA-CCC-SLP speech-language pathologists. Please search for SLPA authorization.

The program at CU Boulder was developed to address shortages of qualified personnel to extend services to special education students, especially in high-need districts and rural areas in Colorado. This was accomplished through collaboration with our consortium partners at UNC and MSUD. The program is competitive and requires complete applications in electronic format. Preference for in-state students and especially qualified students in rural areas is given. A specific number of seats are reserved for Colorado students who qualify and are sponsored by BOCES to participate in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting with an MA CCC- SLP.

Deadline(s) for Completed Applications:

Spring 2017~ October 24, 2016

Fall 2017 ~ March 24, 2017

Students will register for two courses to be taken in the semester for which they have been admitted. These courses are as follows:

SLHS 5032: Competencies & Strategies for the SLPA (3 credits) Fall/Spring Semester. Includes Roles and Responsibilities of the SLPA, Working in the Public Schools, Service Delivery Models, Health and Safety, Screening, Assistive Technology, Introduction to Intervention, Documentation, Self Reflection and Evaluation.

SLHS 5930: SLPA Internship (4) Fall/Spring Semester. Placement for 12-15 hours per week for a total of 180 hours including a minimum of 100 hours of direct contact (face to face interaction with students) in a public school setting under the 50% supervision of an MA-CCC SLP.

Theatre & Dance

The Department of Theatre & Dance offers the following graduate degrees:

- MA in Theatre and Performance Studies
- MBA/MA in Theatre offered jointly with the CU Leeds School of Business
- PhD in Theatre and Performance Studies
- MFA in Dance
- Professional MFA in Experience Design

These programs combine traditional studies with practical training. Ambitious seasons of theatre productions and dance concerts feature student performers, designers, directors and choreographers. Guest artists of national and international fame often participate in curricular and extracurricular activities. Recent guests have included Millicent Johnnie, Ananya Chatterjea, Maria Bauman, Jane Hawley, Tim O'Donnel, Ms. Prissy, April Rose, Chris Aiken and Angie Hauser, Art Bridgman/Myrna Packer, Heidi Henderson, Kathleen Hermesdorf, Deborah Jowitt, Darrell Jones, Susan Marshall & Co., Bebe Miller, David Dorfman, Joe Goode, Kevin Wynn, John Scott, Teena Marie Custer and Shelley Senter in Dance; Jim Doyle, Lisa Wolfe, Chris Jones, Jennifer Hubbard, Geoffrey Kent, Eric Van Baars, Silvia Gregory, Gary John LaRosa, Ami Dayan, Terry Berliner, Lee Blessing, Jill Dolan, Elizabeth Dowd, Melanie Marnich, Jim Moody, Tim Miller, Holly Hughes, Jane Page, Joan Schirle, Karen Finley and Mark Medoff in Theatre.

Students interested in Theatre, Dance and Experience Design are urged to consult with an advisor in the appropriate field to obtain both advice and the most current information concerning program opportunities and expectations.

Departmental Requirements. Students wishing to pursue graduate work in Theatre, Dance or Experience Design should carefully read both requirements for advanced degrees in the Graduate School section and the individual degree handbooks published on the Theatre and Dance (<http://www.colorado.edu/theatredance>) website. Students should note that departmental requirements are sometimes more comprehensive than those minimums established by the Graduate School.

Prerequisites. Applicants are admitted to the graduate programs in Theatre, Dance and Experience Design on the basis of their academic records and recommendations. Students may be admitted provisionally but must expect a significant number of additional courses and credit hours that will be required of them to make up deficiencies.

Applications for Dance. Applicants are expected to show a high level of proficiency in dance performance and choreography. The deadline for all applications is December 1. Applicants who want to apply for program support in the form of Graduate Part-Time Instructor (GPTI) positions must apply by December 1. Applicants for the MFA program in Dance must audition in person; international students may audition in digital format. Auditions are held in January for admission the following fall. The specific audition dates can be found on the department website. The Dance program does not accept applications for spring admission.

Applications for Theatre. The deadline for applications from U.S. citizens and permanent residents is December 15. The deadline for applications from non-U.S. citizens is December 1. Both December deadlines are for admission the following fall. The Theatre program does not accept applications for spring admission.

Applications for Experience Design. The Professional MFA in Experience Design admits a new cohort of 8-12 students every other Fall semester. Applications will be accepted December 15, 2016 – April 1, 2017 for Fall

2017 entry. The next application cycle will begin December of 2018 for Fall 2019 entry.

Advising Meeting. Every student will have a meeting with faculty upon entering the program. Topics discussed in the meeting and other available information are employed to design the best possible course of study for the student. If the student has been admitted provisionally, this meeting will plot out the necessary coursework above and beyond the required hours for the degree.

All candidates for a degree have the responsibility of making certain that the appropriate persons or committees have been appointed to supervise the various steps in their graduate programs. Detailed instructions can be found in the handbook for each degree, available from the department website.

Course codes for this department are THTR, DNCE, TDXD and THDN.

Master's Degrees

- Dance - Master of Fine Arts (MFA) (p. 1112)
- Experience Design - Master of Fine Arts (MFA) (p. 1114)
- Theatre - Master of Arts (MA) (p. 1116)

Doctoral Degree

- Theatre - Doctor of Philosophy (PhD) (p. 1115)

Certificate

- Applied Shakespeare - Graduate Certificate (p. 1112)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bergner, Bruce Alan (https://experts.colorado.edu/display/fisid_113315)
Associate Professor; MFA, University of Illinois at Chicago

Cobin, Martin T.
Professor Emeritus

Coleman, Bertram E (https://experts.colorado.edu/display/fisid_103065)
Professor; PhD, University of Texas at Austin

Court, Iain Maxwell (https://experts.colorado.edu/display/fisid_156486)
Instructor; MEd, University of Wollongong (Australia)

Cripe, Kerry M (https://experts.colorado.edu/display/fisid_126542)
Senior Instructor; MFA, Florida State University

Devin, Richard
Professor Emeritus

Diachenko, Nada (https://experts.colorado.edu/display/fisid_101362)
Professor; MA, New York University

Ellsworth, Michelle (https://experts.colorado.edu/display/fisid_112060)
Professor; MFA, University of Colorado Boulder

Gerland, Oliver W (https://experts.colorado.edu/display/fisid_101092)
Associate Professor; PhD, Stanford University

Professor Emeritus

Stark, Theodore (https://experts.colorado.edu/display/fisid_118462)
Senior Instructor; MFA, Boston University

Symons, James M.
Professor Emeritus

Williams, Letitia S.
Professor Emeritus

Yang, Daniel
Professor Emeritus

Courses

DNCE 5001 (2) Graduate Technique

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5012 (1) Concert Production

Meets with DNCE 4012.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Production

DNCE 5014 (2) Graduate Rhythmic Skills

Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, poly-meter, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class. Meets with DNCE 3014.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5015 (3) Movement Analysis

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 4015.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Movement Awareness Injury Prevent for the Dancer

DNCE 5016 (3) Creative Dance for Children

Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4016 (with addition of readings and a paper)

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance

Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4017, with addition of graduate papers and/or a project

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5023 (2) Performance Improvisation Techniques

Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4023 (with the addition of written analysis and creative assignments)

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 5024 (2) Graduate Musical Resources

Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Meets with DNCE 3024.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction

Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialities of participants.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4036

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5038 (1-3) Dance Repertory

Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4038

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5047 (3) Hip-Hop Dance History

Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 4047.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5048 (1-4) Performance and Community Engagement

Engages students in harnessing the power of performance for effecting positive social change. Students work collaboratively to create performances and workshop experiences. Readings will provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations to internationally author the future they want. Open to all forms of performance - music, film, dance, theatre.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5052 (1-3) Studio Concert

Provides the opportunity for choreographic and performative synthesis and experimentation via the execution of a project related to the student's major area of creative research. Project must be approved by the student's first reader.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Production

DNCE 5053 (3) Advanced Dance Composition

Meets with DNCE 4053.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 5056 (2) Graduate Teaching Seminar

Examines practical, pedagogical, philosophical, and legal issues in current dance education. The goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. Provides practice in practical application of theoretical material. All genres of dance may be utilized.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5064 (2) Music and Dance Seminar: Collaboration

Investigates music in relation to dance performance, choreography, and teaching. Topics may include: a survey of musical styles and composers; direct experimentation with composition and recording techniques; enhancement of rhythmic versatility; work with accompanist/composers; and/or improvement of analytical listening and writing skills.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5101 (1) Intermediate Graduate Ballet

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5128 (1) Ballet Repertory

Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and Neo-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 4128.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5261 (1) Advanced Jazz Dance Technique

Refines advanced students' approach to the nuances and virtuosity of the jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 4261.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5301 (2) Graduate Hip-Hop

Students deepen their understanding of Hip-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. The course focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only. Meets with DNCE 3301.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 5601 (2) Alexander Technique for Graduate Students

Studies how human reaction, coordination, and movement play a role in all activities. Graduate students will explore direct application to dance training, performance, choreography, and teaching. Through in-depth class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 3601.

Requisites: Restricted to Dance (DNCE) or Theatre (THTR) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5701 (2) Contact Improvisation 2

Moves into rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 4701.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5801 (2) Grad Technique: Multiple Accompanists

Encompasses range of dance forms that require multiple accompanists.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 5901 (1-3) Graduate Technique Practicum

Offers special courses in the technique series. Course may meet at the same time with an undergraduate studio course and includes the practical movement experience with an additional scholarly study of specially chosen issues in dance.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 2909 and DNCE 4909

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 5919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4919

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6009 (1) Research Strategies and Techniques

Examines research methodologies appropriate to the performing arts, particularly theatre and dance. Projects are aimed at familiarizing graduate students with the library and other resources, and the development of thesis and dissertation prospectuses.

Equivalent - Duplicate Degree Credit Not Granted: THTR 6009

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6016 (2) Teaching Lab-Contemporary Dance

Provides opportunity to apply principles and skills introduced in DNCE 5056. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on development, analysis and evaluation of teaching skills.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 6017 (3) Readings in Dance

Serves to familiarize participants on a broad range of issues and artists influencing current dance production, performance, and practices. All genres of dance may be utilized to cultivate new capacities in critical thought, written expression, personal ethics, and artistic depth.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6047 (3) Seminar: Dance

Intensive study of selected topics related to the art of dance, dance criticism, dance aesthetics, and dance in relationship to historical, social, and cultural environments with an emphasis on contemporary American forms and their roots.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6056 (2) Professional Development

Examines current trends and issues in dance education and the professional dance world. Explores curriculum development, administration, and job opportunities along with other topics such as grant writing, community engagement, dance advocacy, and working as an independent artist.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 6073 (3) Choreography

Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 6101 (1) Advanced Graduate Ballet

Open only to graduate dance majors.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 6849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6919 (1-3) Directed Studies

Explores advanced topics in dance not regularly covered in the curriculum of the graduate program.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6949 (1) Candidate for Degree

Requisites: Restricted to Dance (DNCE) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Independent Study

DNCE 6959 (1-6) Master's Thesis

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6969 (1-6) The Graduate Project

Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student's major area of interest. Project must be approved by the graduate faculty advisor.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

TDXD 5005 (3) Design Technology 1: Visual Technology

Explores the established and cutting edge technologies employed to implement the visual elements of designed environments and experiences. Develops an understanding of the function of these areas, the ways in which they interact in a complete experience and the new directions of experimentation. Elicits research, analysis and development of new concepts in response to design problems as the core modality of this course.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5105 (3) Collaboratory in Experience Design 1

Addresses philosophies of storytelling through experience and the general concepts and aesthetics of Experience Design. The first in a two-part series, this course lays foundational principles focusing on the components of a live experience and how space, narrative and interaction affect the design from early conceptualization through implementation.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Process

TDXD 5500 (3) Experience Design Atelier 1: Design Evolution and Expression

Introduces students to various techniques for graphically representing design ideas using drawing and illustration techniques in order to augment and deepen the diverse skill sets of students in the class. The first in three-part sequence on graphic representation and expressive practices, students will learn how to work out design ideas through sketching, drawing, creating storyboards and collages.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5700 (3) Experience Design Atelier 2: Introduction to Design Graphics

Introduces students to advanced techniques for representing design ideas in graphic form including commonly used software applications (Sketchup, Vectorworks, AutoCAD), scale modeling, mechanical drawing and rendering. The second in a three-part class sequence on graphic representation and expressive practices, this atelier will offer a range of exercises tailored to the skill level of individual students.

Requisites: Requires a prerequisite course of TDXD 5500 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5805 (6) Professional Portfolio 1

Focuses on selecting, organizing and developing a plan for presenting material that will eventually culminate in the completion of a competitive professional portfolio, a vital tool for gaining employment in the Experience Design industry. The first of a two-part credited final project, students begin the process to prepare their professional portfolio under the guidance of faculty and industry professionals.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6105 (3) Collaboratory in Experience Design 2

Introduces students to professional models of working in the Experience Design industry. The second in a two-part class sequence, students work collaboratively on industry case studies focusing on entertainment, education and cultural destination genres with input from outside professionals in the field.

Requisites: Requires a prerequisite course of TDXD 5105 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Process

TDXD 6210 (3) Storytelling for XD

Explores multi-modal, expressive strategies for experimental storytelling and investigates the diverse languages of live experience. Students complete projects using varying modes of conveyance including physical and spatial action, filmic approaches, digital media and alternative methods. Students will discuss current trends in expressive methods and the nature of story.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

TDXD 6500 (3) Experience Design Atelier 3: Packaging the Design Presentation

Investigates strategies for visually communication and "selling" design ideas in a compelling and well composed visual/aural presentation. The third in a three-part sequence on graphic representation and expressive practices, this class culminates in a final, comprehensive design project portfolio that follows current professional standards.

Requisites: Requires a prerequisite course of TDXD 5700 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 6805 (6) Professional Portfolio 2

Through editing materials collected in TDXD 5805, students will complete adaptable versions (hard copy, digital, web-based and presentations) of their professional portfolios. In this second of a two-part credited project, a committee comprised of faculty and industry professionals guide the completion of XD portfolios.

Requisites: Requires a prerequisite course of TDXD 5805 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6901 (3) XD Implementation and Engineering

Explores the realities and challenges of implementing themed entertainment design. Within the framework of project based case studies and a real work project, this course analyzes aspects of construction management, client management and approvals, scheduling, budgeting, value engineering, architecture and design.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

TDXD 6910 (6) The Experience Design Center

Offers Experience Design students an opportunity to engage in and complete projects posed by industry professionals or non-profit partners seeking assistance with experiential projects in a professional, practicing lab/studio setting. The XD Center, housed in a campus "maker-space," accepts design challenges and assignments that provide a realistic field experience for students.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

THTR 5010 (3) Introduction to Performance Studies

Introduces students to the diverse genealogies of the field of performance studies by surveying foundational texts and key topics and by examining theoretical and methodological questions raised by particular performance practices. Provides students with vocabulary and references to continue to navigate the field of performance studies, as well as the many other academic fields that intersect with it.

Requisites: Restricted to graduate students only.

THTR 5011 (3) Seminar: Theory and Criticism

Studies theories and criticisms of drama and theatrical performances from Plato to post-modernism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 5025 (3) Costume Patterning and Construction

Includes techniques for the patterning and construction of contemporary and period costumes. Hands-on format covers techniques, materials and equipment particular to theatrical production.

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5031 (3) Russian Theatre

Studies Russian theatre history and the development of Russian drama from the 18th century to the present. Taught in translation.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 5039 (3) Musical Theatre Repertory

Developed around the learning of complete scenes, songs and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4039

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5041 (3) Women and Theatre of the 20th and 21st Centuries

Explores a body of 20th and 21st century dramatic literature central to the study of women and theatre as well as the study of 20th and 21st century cultural history from a cross-national and multiracial feminist perspective. Major playwrights, particularly women from Asia, Africa, and Europe, are read and discussed.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4041 and WGST 4041

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5045 (3) Costume Crafts

Covers basic and advanced techniques in casting/molding, mask making, dyeing, painting, jewelry making, ventilating and wig style and millinery via a series of projects. Culminates in a final project encompassing all techniques. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisite THTR 1115.

THTR 5049 (1-4) Special Topics in Theatre

Opportunity for students to explore, upon consultation with the instructor, areas in theatre that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4049

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5051 (3) Special Topics in Theatre History

Detailed study of a particular topic in theatre history (e.g., an era, a style, a country, or an organization). Topic specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5061 (3) On Stage Studies: Asian Performance

Study of live performance forms, theory, and literature throughout Asia: performance history, production styles, and social functions of performance.

Recommended: Prerequisite background in theatre, dance, or Asian studies.

Additional Information: Departmental Category: History/Dramaturgy/Directing

Departmental Category: Asia Content

THTR 5065 (3) Theatrical Tailoring

Explores classic and theatrical tailoring techniques and theories through the construction of classical men's wear: trousers, vest/waistcoats and coats. Student work with hand and machine sewing techniques, patterning skills and appropriate tailoring materials. Period of exploration will vary by semester. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite THTR 1115.

THTR 5071 (3) Advanced Directing

Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercises. Instructor consent required.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5085 (3) Theatre Management

Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions and season development. Includes practical experience.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4085

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5105 (3) Theatre Make-Up Design

Explores theatrical make-up styles and techniques from initial research through paper design to final make-up. Ranging from period styles to Byzantine mosaic, to clowns, to special effects (old age, wounds, stages of healing, zombies, etc.) Techniques include ombre blending, removing eyebrows, shrinking and enlarging features, creating 3D appliances and applying silicone and foam prosthetics.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4105

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5113 (3) Comedy: A Performance Study

Examines the role of comedy in performance within various cultures through readings, viewings and a participatory exploration. We will analyze comedy within various societies to understand the underlying ideals and values. Throughout this investigation we will seek to understand what makes something comedic, why, for whom, for what purpose, when and under what circumstances.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4113

Additional Information: Departmental Category: Performance

THTR 5125 (3) Watercolor Illustration and Rendering Techniques

Gain fluency in established techniques and styles of master illustrators and painters. Famous illustrations are technically analyzed and copied in this exploration of intent, process, technique and style. Other mediums incorporated include pastels, color pencils, pen and ink and gouache. Painting supplies must be supplied by the student.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4125

Grading Basis: Letter Grade

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5175 (3) Conceptualization

Fosters the student's creative and collaborative skills by introducing a variety of strategies and scenarios for conceiving live, theatrical productions, events and experiences. A project based curriculum offers several individual and team exercises in visualizing, documenting and communicating ideas for live performances, including their overall scope, aesthetic, style, audience relationship and mode of presentation.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4175

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6003 (1-3) Production Research and Practicum: Acting

Allows students to undertake an acting project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation. Students work under faculty supervision and prepare a written report and evaluation of the research, rehearsal, and performance process.

Recommended: advanced studies in acting and advisor approval.

Additional Information: Departmental Category: Performance

THTR 6005 (1-3) Production Research and Practicum: Designing

Allows students to undertake a design project, normally within the theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision, and prepare a documented written report and evaluation of the research, design, and realization process, as well as fully rendered designs and/or plots. Projects may be in costumes, lights, or scenery.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 6007 (3) Colorado Shakespeare Festival Dramaturgy

Students work as production dramaturgs for the Colorado Shakespeare Festival, developing detailed textual, historical, and critical research for CSF productions, participating in education and outreach programs, and writing production-related articles for publication.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Shakespearean Production

THTR 6009 (1) Research Strategies and Techniques

Examines research methodologies appropriate to the performing arts, particularly theatre and dance. Projects are aimed at familiarizing graduate students with the library and other resources, and the development of thesis and dissertation prospectuses.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 6009

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6011 (3) On-Stage Studies: Global Ancient and Classical Theatre

Studies classical and neoclassical drama in performance, with particular attention to 20th century productions and the critical and scholarly responses to these productions.

Additional Information: Departmental Category: History/Dramaturgy/Directing

Departmental Category: Asia Content

THTR 6021 (3) On-Stage Studies: English Renaissance Drama

Studies Elizabethan and Jacobean dramatic texts as playscripts for performance, with particular attention to contemporary Shakespeare criticism and landmark Shakespeare productions over the last two centuries.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6031 (3) On-Stage Studies: American Theatre

Studies American drama in performance, with particular attention to critical and scholarly responses to landmark productions of American classics.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6041 (3) On-Stage Studies: Global Modern Theatre

Studies global theatre from 1600 to 1950, with particular attention paid to critical and scholarly responses to landmark productions of classics from the period.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6051 (1-3) Production Research and Practicum: Directing

Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercise. Instructor consent required.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6071 (3) Seminar: Perspectives on Acting

Art of acting is examined through study of acting theories and practices developed during major periods of theatre history. Examines the variety of theories about acting that remain today.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6081 (3) Seminar in American Theatre: Lesbians and Gays

Studies the portrayal of lesbians and gays in mainstream American theatre during the 20th and 21st centuries, as well as the contributions of gay and lesbian theatre artists during the same period.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6091 (1-3) Production Research and Practicum: Dramaturgy

Students undertake a dramaturgical project, normally within the major season, requiring detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report of their project.

Recommended: advanced course work in dramatic literature and advisor approval.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6111 (3) Global Contemporary Theatre

Explores global theatre from the early 1960s to the present, with particular attention towards balancing the avant garde and popular theatre in recent world drama.

THTR 6849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6949 (1) Master's Candidate

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6959 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 7004 (6) Colorado Shakespeare Festival Summer Immersion

Immersive two-week summer intensive designed to provide an in-depth study of Shakespeare with the Colorado Shakespeare Festival (CSF). Students learn from and engage with CSF company members and faculty from English and Theatre and Dance departments in a small group, experiential setting. Students attend plays, rehearsals and lectures, and explore acting, directing and pedagogy.

Additional Information: Departmental Category: Shakespearean Production

THTR 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

Applied Shakespeare - Graduate Certificate

Come immerse yourself in Shakespeare! Get to know the Bard and his plays as never before by participating in this unique, cross-disciplinary graduate certificate program that combines courses from the Department of Theatre & Dance and the Department of English.

Experience a vital mix of performance and scholarship by taking an online (or on-campus) three-credit graduate-level Shakespeare survey course and then visiting campus for a two-week summer intensive during the Colorado Shakespeare Festival (CSF) to learn from the nationally recognized CSF company members and CU faculty in small experiential groups.

The six-credit summer intensive includes acting, directing, stage combat, Elizabethan culture, Shakespeare in film, rehearsal visits, play attendance, classes on how to teach Shakespeare, and more. Self-directed reading and a final paper are the conclusion of the certificate requirements.

Extend your Shakespeare experience by applying the earned certificate core requirements to the upcoming Master's Degree in Applied Shakespeare.

Distance Education

Students can complete some requirements for this graduate certificate via distance education (online). For more information, visit CU Boulder Connect's Certificate Programs (<http://www.colorado.edu/connect/certificate-programs>) webpage.

Requirements

ENGL 5000	Introduction to Applied Shakespeare	3
THTR 7004	Colorado Shakespeare Festival Summer Immersion	6
Within two months of completing the two-week summer intensive, students must submit their final paper.		
Total Credit Hours		9

Dance - Master of Fine Arts (MFA)

The MFA program at CU is designed to accommodate a variety of students, ranging from the practicing professional to the recent BA or

BFA graduate. The MFA will develop students' creative, performance, and scholarly work and position them for teaching careers in higher education as well as a variety of other careers in the field of dance. The program provides a well-rounded education that develops concrete skills in performance and choreography, and instills an appreciation of the role that dance plays in history and human culture. Our core training includes classes in modern, ballet, African, jazz, Hip-Hop and Transnational Fusion dance.

Goals

- To encourage the clarification and individuation of each student's artistic voice.
- To prepare and empower students to fulfill their chosen career paths, both in their graduate studies and in the professional world.
- To investigate traditional and innovative approaches to movement invention, choreography and performance.
- To deepen somatic awareness and increase fluency in dance technique, including Ballet, Improvisation, Jazz, Modern, Hip-Hop and West African.
- To actively engage in dance research, with particular attention to discovering relationships between scholarship and creative work.
- To examine pedagogical goals and strategies from aesthetic, cultural and anatomical perspectives.
- To present choreography/creative work on a regular basis and perform in the creative work of faculty, student peers and guest artists working in a variety of aesthetic and technical styles.

Curriculum

The core MFA curriculum focuses on the development of the individual artistic voice in both performance and choreography. The presentation of new creative work is bolstered, augmented and enriched by the study of theory and cultural history.

MFA candidates are required to choose at least one secondary area of study designed to give variety and professional clout to the student's training. The university setting is particularly well suited to broad educational goals, given the wide variety of subjects available for involvement. Possible secondary areas of emphasis study are:

- Aerial Dance
- Cultural Studies
- Dance Criticism
- Disability Studies
- Film/Video/Music
- History
- Kinesiology
- Multi-media Forms
- Non-concert Forms
- Outreach/Community Engagement
- Performance Art
- Site Specific work
- Somatics - includes Alexander Technique, Body Mind Centering, GYROTONICS/GYROKINESIS®, Pilates
- Women & Gender Studies
- Writing/Poetry/Literature

Performance and Choreography

All MFA students are expected to present choreographic work each semester, either as part of course-related events or in other departmentally-produced events. It is expected that students will seek not only to refine their established artistic practices, but also assiduously to stretch themselves in the creative process into less familiar movement, choreographic, aesthetic and expressive modes. Evaluation of artistic output will be based on articulateness, sophistication, theatrical and conceptual completeness and on the extent to which a student has deeply sought change and discovery.

Students are urged to seek a variety of performance opportunities with fellow students, faculty and guest artists. Produced performances are presented at least three times each semester, and informal showings occur regularly during the year. Extensive work with off-campus groups is normally extremely difficult to schedule.

Students are encouraged to think outside of the box both in terms of course choices and creative and scholarly activities. A large portion of the required credits are electives, allowing for a great deal of freedom and individualization of study. It is critical that a student work closely with his/her advisor in selecting electives in the dance curriculum, courses outside of the department, and creating independent studies and internships that will support the student's goals. The faculty encourages students to search far and wide through the university's catalog (<http://www.colorado.edu/catalog/2016-17>) offerings to discover courses and areas of study that are particularly suited to their individual interests.

Modified MFA Program for Professionals

Those students entering our program with extensive professional backgrounds including teaching, choreography and/or performance may be able to devise a modified degree plan. For such students, an interview with the Director of Dance and the Dance Graduate Director during the application/audition process is necessary. The interview will help determine if there is a good match between the student's goals and our MFA program. The goal of the modified program for professionals is to provide flexibility in the pursuit of individual goals and the filling of specific educational gaps.

The number of required credits (minimum 30) and semesters will be determined based on the individual's professional and life experience. To maximize flexibility and maintain rigor, the graduate faculty advisor and the student will collaborate to create the best course of study to round out the returning professional's educational experience and develop new areas of research and creative work.

Core Course Waivers

An MFA student who wishes to have a core course waived must present a written proposal to the faculty that includes:

1. The title of the course to be waived, credit hours and instructor (if known)
2. What course(s) the student would take in its place, the credit hours, and the instructor (if known)
3. A brief narrative as to why the student does not feel it is appropriate for him/her to take the core course. If the student has life experience comparable to the course content or has taken elsewhere what he/she believes to be a comparable course, documentation in the form of syllabus or course materials must be submitted. If the student has a medical condition that precludes taking a technique course,

a physician's documentation or other specific description of the condition must be submitted.

This proposal should be developed under the guidance of the student's advisor, and then submitted to the faculty at large. The proposal will be discussed at the next opportune faculty meeting, and approval or disapproval will be granted or revision suggested. Waiving of requirements does not necessarily mean a reduction of the total credit hours required.

For detailed information, visit the department's MFA in Dance (<http://www.colorado.edu/theatredance/admissions/degrees/mfa-dance>) webpage to download the *MFA Handbook*.

Requirements

Assessment Survey: Anatomy/History/Music/Production

Entering students will be sent a list of questions about their anatomy, dance history, music, and production training, both academic and experiential. Students will be asked to provide written answers and send the survey to the Graduate Assistant prior to arriving on campus. After the answers have been reviewed, secondary deficiencies in these curricular areas will be determined. Procedures for making up any deficiencies will be decided through discussion with the appropriate instructor. Deficiencies are determined early in fall semester so remedial courses or independent studies can be added to the degree plan if necessary. It is possible that an entire course will not be recommended but rather an individual will be asked to work with a faculty member in a specific area. Any deficiencies will be noted in your file that is in the Graduate Assistant's office. It will also be noted in your file when the deficiency is removed. Courses taken to make up deficiencies may not be counted towards the degree. The survey is also used to determine if strengths in certain areas warrant waiving specific core courses.

Required Courses and Semester Credit Hours

The three-year program requires a minimum of 60 credit hours, at least 30 of which must be taken in Dance at the 5000 level or above. The program focuses on performance/choreography and secondary areas of specialization. Grades lower than a B- cannot be applied towards graduation; a 3.0 GPA is needed to graduate.

Required Courses

DNCE 5001	Graduate Technique (to be taken four times) ¹	8
DNCE XXX1	Additional Technique Classes ¹	6
DNCE 5012	Concert Production ²	1
DNCE 5014	Graduate Rhythmic Skills	2
	or DNCE 5024 Graduate Musical Resources	
DNCE 5017	Dancing Histories: Sex, Gender and Race in U.S. Concert Dance	3
DNCE 5053	Advanced Dance Composition ²	3
DNCE 5056	Graduate Teaching Seminar	2
DNCE 5601	Alexander Technique for Graduate Students	2
DNCE 6009	Research Strategies and Techniques	1
DNCE 6047	Seminar: Dance (taken twice with different instructors)	6
DNCE 6073	Choreography (taken twice with different instructors) ²	6
DNCE 6969	The Graduate Project	4-6
<i>Total Required Coursework</i>		44
<i>Electives</i>		14-16

Total Hours for MFA Degree	60
-----------------------------------	-----------

- ¹ Minimum dance technique: 14 credit hours.
- ² Students must complete Advanced Composition, both Choreography courses, and Concert Production prior to concert semester.

Secondary Emphasis Guidelines

MFA candidates are required to choose at least one secondary area of study designed to give variety and professional clout to the student's training. Through collaboration with the student's academic advisor, the student's secondary emphasis should be selected no later than the second semester of study. The program is designed to be responsive to individual areas of interest and to ensure effective preparation for careers in academics and the professional arena. The university setting is particularly well-suited to these broad educational goals, given the wide variety of subjects available for involvement. See MFA in Dance (<http://www.colorado.edu/theatredance/admissions/degrees/mfa-dance>) for possible secondary areas of study.

Students may choose an emphasis that can be fulfilled by courses taken within the department and/or in other campus departments. We encourage students to search far and wide through CU's course catalog (<http://www.colorado.edu/catalog/2016-17>) to discover courses and areas of study that are particularly suited to their individual interests and career goals.

Students may also choose to complete a graduate certificate offered by another department as their secondary emphasis. The most common certificates earned by MFA students are:

- Women & Gender Studies Certificate – Women & Gender Studies Program
- Ethnic Studies Certificate – Department of Ethnic Studies
- TAM Certificate Technology Arts & Media - Alliance for Technology, Learning, & Society (ATLAS) (<http://www.colorado.edu/atoz/show/u40b4c44c55fa3edc67b5b4ca677584d0/#unit1>)
- Critical Theory Certificate – Department of Germanic & Slavic Languages & Literatures

Students also have two options for secondary emphases that involve off campus private lessons taken at special training schools/centers and subject to their requirements. The Somatic and Aerial Emphases are sponsored by the department, but require students to take some of the private lessons and training that occur at local specialty centers.

Aerial Dance Emphasis

Courses in the Aerial Dance Emphasis are offered for those students who have a serious interest in aerial dance and its application to dance training, performance and/or teacher training. Students can work towards the completion of the Professional Training Program at Frequent Flyers (<http://www.frequentflyers.org>)® while simultaneously pursuing their MFA degree. The Professional Training Program must be successfully completed before the MFA degree will be awarded. Before a student is eligible to begin work in the Aerial Dance Emphasis, he/she must be officially accepted by Frequent Flyers® Professional Training Program (located off-campus in Boulder) and have been approved by faculty member Nada Diachenko to follow the Aerial Dance Emphasis.

Somatic Emphasis

The Somatic Emphasis is offered by the Dance Division for those students who have a serious interest in somatic studies and their application to dance training, performance, choreography and dance medicine/injury prevention. Students can focus in the Alexander

Technique Intensive Study program (ATIS) and/or Body Mind Centering (BMC), work towards certification in GYROTONIC®/GYROKINESIS®, or work towards certification at the Pilates Center (<http://www.thepilatescenter.com>) in Boulder while simultaneously pursuing their MFA degree. Students may also combine Alexander and BMC for their intensive study. The ATIS and BMC intensive studies do not involve a certification but they do provide an in-depth theoretical and practical study. They also provide a solid foundation for the possibility of entering an Alexander Teacher Training program (a 3 year program) or a Body Mind Centering training (a 4 year training program) elsewhere.

Before a student is eligible to pursue certification in GYROTONIC®/GYROKINESIS®, Pilates, ATIC or BMC, they must be approved and accepted by the training course Directors of those programs, as well as the Director of the Somatic/Aerial Emphasis, Nada Diachenko. The certification program or intensive studies must be successfully completed before the MFA degree will be awarded.

MFA Project

The culmination of graduate study is a choreographic/creative project accompanied by a paper. In the second year of the degree program, a written proposal for the creative project must be presented and approved. Upon its completion, an oral defense of the project and paper is required. On rare occasions students undertake a scholarly thesis instead of artistic project and paper.

Graduate Comprehensive Portfolio

Prior to graduation, MFA candidates submit a collection of scholarly, pedagogical and creative work. The portfolio is intended to document and synthesize the graduate's reasoned personal philosophies, choreography and academic investigations. It includes creative and pedagogical statements, scholarly essays, a CV and digital documentation of teaching, performance and choreography.

Experience Design - Master of Fine Arts (MFA)

This unique, studio-centric MFA in Experience Design (XD) admits a cohort of eight to twelve talented students from varied backgrounds, including all areas of design, art, architecture, and engineering every other year. Students in the XD program form a studio collective to complete an array of XD projects under the direct guidance of CU faculty and professionals in the field, many who provide project content. As a result of this industry involvement, XD graduates are prepared to enter the field of experiential design.

In addition to preparing students for employment, the MFA in XD exposes students to new ways of seeing the reality around them, new ways of creating, resolving problems, expressing ideas and telling stories. Essentially, the MFA in XD is a course of study in using a new language.

The program also features a "design center" where students and faculty accept real-time XD problems posed by outside entities (including contracted projects with commercial firms) and solve them via a collaborative, studio approach. The work of this center provides a service to various communities and is a practical extension of learning for students.

While the MFA in XD advances a collaborative studio environment where teamwork is held in high regard, we consider it a mission of the program to foster the individual talents, visions, and interests of each student in the program. The program will make every effort to provide a vessel

where individual students may gestate their own concepts, allowing them room to explore, test, and innovate with the support of studio spaces, technology, cohort students, faculty, and industry professionals.

Connections to Industry

Some of the program's professional advisors, endorsers and participants include: Jim Doyle of WET Design (<https://www.wetdesign.com/default.html>), makers of the famed Bellagio Fountains in Las Vegas; Dave Cooperstein and Al Cross of PGAV Destinations (<http://pgavdestinations.com>), designers of Sea World and the NASA Space Museum, Electrosonic (<http://www.electrosonic.com>); makers of the live video projection technology for Disney's Magic Kingdom Castle; Adam Bezark (<http://bezark.com>), Phil Hettema (<http://www.thehettemagroup.com>), and Steve Ryan, commercial producers of live experiences with credits at Disney, Universal and Landmark Entertainment; Drew Campbell, Creative Director at International Resorts in Singapore; Baam Productions (<http://www.baamproductions.com>); Nassal (<http://www.nassal.com>); Super 78 (<http://www.super78.com>); Peter Exline, Architect and Themed Attraction Designer; and many others.

Theatre - Doctor of Philosophy (PhD)

The PhD program in theatre and performance studies is primarily designed for those who intend to be scholars working in an academic environment.

At CU Boulder, we believe that scholarship in the field of theatre should be premised on the fact that theatre is a performing art. This does not mean that the standards for theatre scholarship are any less rigorous than those in other disciplines, but it does mean that the theatre scholar must be prepared to use research methodologies and perspectives capable of illuminating drama in performance. To this end, the education of a theatre scholar should entail ongoing experiences in theatre productions.

The program is designed to be completed in four years for students entering with a master's degree. Conventionally, the first and second years focus on course work, the third year is spent preparing for and taking the comprehensive examination, and the fourth year is spent writing and defending the dissertation. While it is possible for a student entering the PhD program with a master's degree to finish in three years, it is not uncommon for students to take five years to finish.

Requirements

Program Overview

To complete the program, students must:

1. demonstrate proficiency in academic course work
2. demonstrate reading competency in at least one foreign language equivalent to the completion of a second-semester college-level course
3. pass a comprehensive exam
4. prepare and successfully defend a dissertation

Doctoral students in theatre and performance studies complete 30 credit hours of course work beyond the master's degree at the 5000 level or above. When approved by the student's advisor, credit hours from other departments on campus may count, provided the course is taught by a member of the graduate faculty in that department. In addition to the 30

credit hours of course work, 30 dissertation credit hours (THTR 8999) are required.

Required Courses

The PhD program is based upon a core of required courses which emphasize the interrelatedness of theory, history and practice.

The "on-stage studies" courses place dramatic texts and performance traditions in the context of contemporary performance. They are designed to pose questions like, "How might this play work on the stage today? What problems does it present the contemporary director/dramaturg? In what ways is it socially relevant? How have directors like Jonathan Miller, Ariane Mnouchkine, Peter Stein, Ivo van Hove, etc., staged them?" In a nutshell, the aim of the on-stage studies curriculum is to teach students to think as dramaturgs and directors, as well as scholars.

Required Courses and Semester Credit Hours

Dissertation	30
---------------------	----

THTR 8999	Doctoral Dissertation	
-----------	-----------------------	--

Total Credit Hours	60
--------------------	----

Elective Course Work

PhD students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, theatre for social change), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition). When approved by the student's advisor, PhD students are encouraged to take courses in other departments, especially as they relate to the anticipated dissertation topic. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements.

Graduate Independent Study

This may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Although there is no limit to the number of independent study credit hours a doctoral student may take, they should be held to a minimum. Independent study contract forms are available from the graduate program assistant and on the department website (<http://www.colorado.edu/theatredance/node/1026/attachment>).

Production Research and Practicum Courses

These courses in areas such as acting, directing, design, applied theatre, dramaturgy and production management/producer work may be taken for 1–3 credit hours. A limit of 3 credit hours in each category may

apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit hours are:

- one credit hour for successfully completing the project
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch)
- three credit hours for doing all of the above and writing a pertinent 15- to 25-page research paper, with the topic to be determined in consultation with the advisor

Language Requirement

Reading competency in a foreign language is an important skill for a scholar. It allows the student to consider a dissertation topic beyond the limits of English-speaking theatre, thereby significantly broadening his or her research and publishing possibilities. Doctoral students are required to demonstrate proficiency in a foreign language equivalent to the completion of a second-semester college-level course before taking the comprehensive exam. This requirement may be fulfilled by course work taken within five years previous to the exam or by testing.

Dissertation

The PhD program culminates in the dissertation, a research document that makes a significant and original contribution to the field of theatre studies.

Theatre - Master of Arts (MA)

At CU Boulder, we believe that scholarship in the field of theatre should be premised on the fact that theatre is a performing art. This does not mean that the standards for theatre scholarship are any less rigorous than those in other disciplines, but it does mean that the theatre scholar must be prepared to use research methodologies and perspectives capable of illuminating performance. To this end, the education of a theatre scholar should entail ongoing experiences in theatre productions.

Please note that successful completion of the MA program does not entail acceptance into the PhD program.

Dual Degree Program

MBA/MA in Theatre

The Leeds School of Business, in conjunction with the Department of Theatre & Dance, offers students the ability to earn an MBA and an MA in theatre through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums and arts presenters.

Admission for MBA/MA

Students may apply either to the Department of Theatre & Dance for the MA degree program or to the Leeds School of Business for the MBA degree program. Having been accepted, they will apply to the other degree program during their first semester.

Students may apply for both programs simultaneously, in which case:

1. Students must apply to each program separately

2. Students must meet the admissions standards for each program separately

Note: Residents of U.S. Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program, provided the student applies and is accepted to both programs in the same admissions cycle. For more information, visit the Western Regional Graduate Program (<http://wiche.edu/wrgp>) webpage.

Course of Study

Students in the MBA/MA in theatre spend the first year of their dual-degree program exclusively in either the Leeds School of Business or the Department of Theatre & Dance. This is the case even if the student was admitted to both programs simultaneously. In the second year, courses are taken exclusively in the other program. The third year offers students the opportunity to take both the MBA and theatre/dance elective courses.

Credit for Courses

Dual degree students are required to complete 43 credit hours of MBA course work and 24 credit hours of theatre/dance course work. A minimum of 67 approved credit hours must be completed to earn both degrees. See the "Requirements" tab for details.

Requirements

Required Courses

After any undergraduate deficiencies have been removed, students must earn 30 credit hours, at least 16 of which must be in THTR courses at the 5000 level or above. At least 24 of the 30 hours must be at the 5000 level or above.

A student may not receive graduate credit toward a degree for more than 15 hours per semester, fall or spring. A student may not receive graduate credit toward a degree for more than 6 credit hours in one five-week summer term or more than 10 credit hours in one summer session.

Undergraduate major courses taken to make up deficiencies may not be counted in the minimum number required for the degree; however, grades for any such courses taken will be included in the GPA. Students taking graduate or undergraduate coursework not applying toward their degree may do so for a letter grade, no credit, or pass/fail. If taken for a letter grade, the course will be calculated in the student's graduate GPA. If taken pass/fail, a failing grade will be calculated into the GPA. Note: courses taken for no credit are not covered by tuition remission.

Students must declare either the thesis or non-thesis option by the start of their third semester, and may apply 4–6 thesis credit hours toward the 30-credit-hour requirement.

Elective Course Work

MA students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, theatre for social change), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition). When approved by the student's advisor, MA students are encouraged to take courses in other departments, especially as they relate to the anticipated thesis topic. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements.

Graduate Independent Study

This may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Independent study course work cannot exceed 25 percent of the course

work required for the master's degree. Independent study contract forms are available from the graduate program assistant and on the department website (<http://www.colorado.edu/theatredance/node/1026/attachment>).

Production Research and Practicum Courses

These courses in areas such as acting, directing, design, applied theatre, dramaturgy and production management/producer work may be taken for 1-3 credits. A limit of 3 credits in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required. Practicum contract forms are available from the Graduate Program Assistant and on the department website.

Guidelines for flexible credit are:

- one credit hour for successfully completing the project
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch)
- three credits hours for doing all of the above and writing a pertinent 15- to 25-page research paper, with the topic to be determined in consultation with the advisor

Degree Plans

Plan I: Thesis Option

This plan prepares students to pursue a PhD degree at CU or elsewhere. Students must write a substantial research document demonstrating mature critical thought based on independent study and investigation (Graduate School Plan I). Students must demonstrate proficiency in three areas: academic course work, the thesis and the final exam (oral).

Required Courses and Semester Credit Hours

Required Courses

THTR 5010	Introduction to Performance Studies	3

Thesis Work

THTR 6849	Independent Study (prepare thesis prospectus)	3
THTR 6959	Master's Thesis (take in fourth semester for thesis completion) ²	4

Electives ¹		10
Total Credit Hours		30

¹ Students may take 4–6 thesis hours. The number of electives is adjusted accordingly.

² All course work applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments. Theatre courses below the 5000 level cannot be counted toward the degree. Courses in which grades below B- are received are not accepted for master's degree programs.

Plan II: Non-Thesis Option

Students who do not plan to pursue a PhD can elect the non-thesis option, which requires a three-hour written exam covering graduate coursework and a two hour oral exam. (Graduate School Plan II). To complete the non-thesis plan, students must demonstrate proficiency in two areas: academic coursework and the final exam (written and oral).

This option requires a three-hour written exam covering graduate course work (Graduate School Plan II). Students who do not plan to pursue a PhD can elect the non-thesis track. To complete the non-thesis track of the MA program, students must demonstrate proficiency in two areas: academic course work and the final exam (written and oral).

Total Credit Hours		30

¹ All course work applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments. Theatre courses below the 5000 level cannot be counted toward the degree. Courses in which grades below B- are received are not accepted for master's degree programs.

MBA/MA in Theatre Course Work

The MBA/MA is a dual degree program, and its curriculum is best conceived that way. A minimum of 67 approved credit hours must be completed to earn both degrees. Dual degree students will be required to complete 43 hours of MBA course work and 24 hours of Theatre/Dance course work. The dual degree agreement allows students to count 18 credit hours of courses towards both degrees.

Course work for the MBA portion of the Dual MBA/MA in Theatre (p. 1135) can be found on the Leeds School of Business catalog page. The MBA requires 55 credit hours. Twelve credit hours from the student's course work for the MA will count toward the MBA.

The MA in theatre requires 30 credit hours, 24 of which must be at the 5000 level or above. Six credit hours from the student's work in the Leeds School of Business will count toward the MA in theatre. Students are encouraged to explore classes outside the Department of Theatre & Dance for some of their electives.

Theatre courses below the 5000 level cannot be counted toward the degree. Courses in which grades below B are received are not accepted for master's degree programs.

² Students who elect the thesis plan will take 4–6 master's thesis credit hours. The number of electives will be adjusted accordingly.

Women and Gender Studies

The Department of Women and Gender Studies offers a graduate certificate program in women and gender studies, which offers CU graduate students a cutting-edge, interdisciplinary education in gender and sexuality studies. It provides a thorough grounding in feminist and/or queer theory and feminist methodology, as well as the opportunity to explore diverse special topics in gender and sexuality studies. The certificate is designed to help graduate students from a wide range of different CU departments and programs navigate the conceptual gap between discipline-specific studies and interdisciplinary work in gender and sexuality studies. On a practical level, the certificate has proven especially useful to graduate students seeking to demonstrate their expertise in gender and sexuality studies to prospective employers in academia, government and the private sector.

Course code for this program is WGST.

Certificate

- Women and Gender Studies - Graduate Certificate (p. 1119)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

WGST 5000 (3) Advanced Topics in Gender and Sexuality Studies

Provides an advanced interdisciplinary course organized around a specific topic, problem, or issue relating to gender and sexuality. Course work includes discussion, reading and written projects.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4000

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

WGST 5400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4400 and LGBT 4400 and LGBT 5400

Grading Basis: Letter Grade

Additional Information: Departmental Category: LGBT Studies

WGST 6090 (3) Feminist Theories

Explores how feminist theorists have understood gender and how it interrelates to our understandings of race, ethnicity, sexuality, embodiment and knowledge. Meets the requirements for the WGST certificate.

Requisites: Restricted to graduate students only.

WGST 6190 (3) Feminist Methodology

Explores feminist methodology across a range of disciplines. Themes include experience and interpretation, the social position of the researcher, language and argument structure, knowledge and power, bias and objectivity, and the ethics and politics of research. Meets the requirements for the WGST certificate.

Requisites: Restricted to graduate students only.

WGST 6290 (3) Special Topics in Gender and Sexuality Studies

Offers interdisciplinary feminist perspectives on different special topics such as gender and war, gender and globalization, women's social movements, gender and citizenship, gender and collective memory, and cultural representations of gender and sexuality. Meets the requirements for the WGST certificate.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

WGST 6796 (3) Queer Theories

Explores key concepts and debates in the field of queer theory with an interdisciplinary focus on crosscutting issues (aesthetic, cultural, legal, medical, political and social) that shape queer subjectivities, practices and relations.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

WGST 6840 (1-3) Independent Study

Provides course credit for a directed research project or reading program in women and gender studies, supervised by a WGST faculty member and approved by the WGST graduate director. Requires an independent study approval agreement form completed by the student and signed by the faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Women and Gender Studies - Graduate Certificate

The graduate certificate in women and gender studies is designed to complement a CU graduate disciplinary degree program—providing graduate students the opportunity to engage a variety of scholarly and methodological approaches to the study of gender and sexuality.

Students wishing to take part in the women and gender studies certificate program must be currently enrolled in a graduate disciplinary degree or professional degree program at CU Boulder. Students are encouraged to apply for the graduate certificate early in their course of graduate studies; students enrolled in the program will get priority if placed on a waitlist for a graduate-level women and gender studies course.

For more details including application instructions, visit the graduate certificate (<http://www.colorado.edu/wgst/graduates>) webpage, or email wgst@colorado.edu.

Requirements

Students must complete 9 credit hours of course work in women and gender studies and one additional course equaling 3 credit hours to be approved by the women and gender studies graduate advisor, for a total of 12 credit hours.

The minimum acceptable grade for courses submitted for the graduate certificate is a B. Minimum GPA for all courses submitted for the graduate certificate is a cumulative 3.5.

Required Courses and Semester Credit Hours

Required Courses

At least three of the following four courses:

WGST 6090 Feminist Theories

WGST 6190	Feminist Methodology	
WGST 6796	Queer Theories	
WGST 6290	Special Topics in Gender and Sexuality Studies	
Electives		
One additional 3-credit course approved by the women and gender studies graduate advisor. This course should focus on issues related to women, gender and/or sexuality; take an interdisciplinary approach; and ideally be taken either outside of the student's home department or as an additional course in women and gender studies.		3
Total Credit Hours		12

None of the three required women and gender studies courses may be taken as independent study.

Independent study courses taken with faculty not affiliated with the Department of Women and Gender Studies will not count for the graduate certificate. Independent study courses taken with department faculty members may count only in exceptional circumstances as determined by the graduate committee.

For more details, including application instructions, visit the WGST Graduate Certificate (<http://www.colorado.edu/wgst/graduates>) webpage or email wgst@colorado.edu.

Business

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and industry partners and our firm commitment to student support.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB-International), Leeds awards four types of degrees: Bachelor of Science (BS), Master of Science (MS), Master of Business Administration (MBA) and Doctor of Philosophy (PhD). Students can specialize in accounting, finance, management and entrepreneurship and marketing. Leeds further offers certificates in a variety of areas to provide opportunities for students to explore additional areas of interest and distinction.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the *Wall St. Journal*, the *New York Times*, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the

support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Graduation Recognition Ceremony

Every December and May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

Facilities & Research

The Leeds School of Business houses resources for the specific needs of business students. The facilities include:

- the Burrigge Center for Securities Analysis and Valuation
- the Business Research Division
- Career Development
- the Center for Education on Social Responsibility
- the Center for Research on Consumer Financial Decision Making
- the MBA Business Center
- the Office of Diversity Affairs
- the Real Estate Center
- the Robert H. and Beverly A. Deming Center for Entrepreneurship
- smart classrooms
- student lounges
- Undergraduate Student Services
- William M. White Business Library and Information Commons

The William M. White Business Library and Information Commons

The White Business Library (<http://www.colorado.edu/libraries/libraries/william-m-white-business-library>) and Information Commons provide students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases, both CD- and web-based, contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is

open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work, and are available for reservation through University of Colorado Scheduling (<https://vems1.colorado.edu>).

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms, and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international and state documents.

All classrooms in the Leeds School of Business are equipped up to campus "smart" classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable and both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

Business Research Division

Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic and market research that contributes to the efficient use of Colorado's resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance (TAA) Center (RMTAAC). Through its annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research and custom research projects. It also prepares a Colorado leading economic indicator series, the *Leeds Business Confidence Index*. Research results are distributed through presentations and reports; a quarterly newsletter, the *Colorado Business Review*; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Assistance for Firms Program, which helps import-impacted U.S. firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAA for Firms Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm's competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to \$75,000 in grant funds and 50/50 cost sharing for strategic projects.

Academic Centers

In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Center for Real Estate, the Burrige Center for Securities and Valuation, the

Center for Education on Social Responsibility (CESR) and the Center for Business Integration.

The Robert H. and Beverly A. Deming Center for Entrepreneurship

As part of the Leeds School of Business, the Deming Center for Entrepreneurship's mission is to inspire and empower students, community, alumni, faculty and staff through entrepreneurship education and partnership with the community. The Deming Center does this in part by educating, engaging and partnering and focusing on student experience.

Cutting-edge Curriculum. Our progressive curriculum and interdisciplinary programs include:

- courses in entrepreneurial finance, marketing and business planning
- interdisciplinary programs in engineering, business, law and environmental studies
- undergraduate business minor with a Certificate of Entrepreneurship for students across campus
- undergraduate Certificate of Entrepreneurship for Leeds students
- MBA concentration in entrepreneurship
- world renowned PhD program in entrepreneurship

The Deming Center supports the entrepreneurial curriculum and advances the Leeds School's leadership agenda through our collaborative initiatives across campus and in the business community in these key areas:

- **Education.** Our entrepreneurship students have access to a world class entrepreneurship faculty. The faculty are involved in collecting, curating and making available the latest research and thinking on entrepreneurship in the world. These faculty are inspiring and directing new research and thought leadership in entrepreneurship and constantly working with thought leaders to develop and stay ahead of the latest trends and tools for entrepreneurship education.
- **Real World Experience.** Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators serving as student mentors and advisors. The center helps connect students with projects, advisors and internships that challenge them to use their new skills creatively.
- **Student Experience.** Staff and faculty at Deming are focused on delivering an outstanding student experience. Deming promotes the development of entrepreneurial thinkers and doers. Entrepreneurial thinkers and doers are optimistic, resilient, resourceful, persistent, calculated risk-takers, efficient, creative problem solvers and effective workers. These are teachable skills any student is capable of learning.
- **The Community.** Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU-Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers and environmental science programs

Real Estate Center

The Real Estate Center, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate

education and scholarship. The center oversees the school's real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Course work is drawn from the law school, the colleges of architecture and engineering, construction management and others.

The center creates real-world experiences for students by providing project course work and being a resource for securing internships, mentors and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

Burridge Center for Securities Analysis and Valuation

The Burridge Center for Securities Analysis and Valuation is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers and the investing public;
- identifying critical research issues in the theory and practice of security analysis and valuation; and
- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts and finance academics.

Center for Education on Social Responsibility (CESR)

CESR's goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school's commitment to developing leaders of conscience. Although the Center's primary focus is on excellence in curriculum development and delivery, CESR also undertakes a broad spectrum of initiatives including a certificate program, student organizations, conferences and other extracurricular offerings as well as providing funding and administrative support for faculty research.

Courses

CESR is directly responsible for course development, staffing and coordination of the Business requisite introduction course World of Business, and collaborates on the design and delivery of the requisite 3000-level course Business Law, Ethics & Social Responsibility. CESR also offers leading edge electives such as CESR 4000, CESR 4005, CESR 4827/ACCT 4827, CESR 4828/MGMT 4828 and the Global Seminar *Social Entrepreneurship & Innovation* in Panama.

Certificate and Portfolio

CESR offers specialized recognition for students at the undergraduate and graduate levels. Undergraduates wishing to focus on CESR-related topics may earn the Certificate in Socially Responsible Enterprise (SRE). At the MBA level, CESR has formalized a Sustainability Portfolio of courses, including the MBA requisite Socially Responsible Enterprise course, and electives such as MBAX 6570 and MBAX 6140.

CESR Co-Curricular Activities

- **CESR Stampede at Leeds: A Week of Driving Values in Business.** This weeklong event showcases the values-driven and innovative curriculum developed by the CESR that is shaping tomorrow's

business leaders. Through class visits, expert panels and lectures student competitions and showcases, attendees will explore their own values and network with like-minded professionals about applying positive values in a business setting. Stampede Week also includes the fourth annual Conscious Capitalism Conference, a CESR flagship event.

CESR routinely hosts events aimed at our students, our local business community and educators and industry leaders throughout the academic year. Guest speakers change each semester, but recurring events are included here:

- **CESR Business Ethics Case Competition (BECC).** The CESR BECC is an interactive way to deepen the Leeds undergraduate students' understanding of the importance of creating ethical as well as profitable business cultures. Teams are provided with a business case in the weeks leading up to the competition which they will have to analyze, create recommendations for course of action and present their solutions to a panel of professional judges. Cash prizes are awarded to the top three teams.
- **Conscious Capitalism Conference.** An annual conference hosted by CESR featuring innovative executives and entrepreneurs who have used the traditional tools of capitalism to serve social needs.
- **Student Center for Social Entrepreneurship.** CESR provides faculty sponsorship for SCSE, the student branch of Social Entrepreneurship for Equitable Development, an interdisciplinary, inter-generational campus group that is involved in researching, teaching and generating student involvement in the areas of social entrepreneurship and sustainable community development.
- **Net Impact Club.** CESR is home to a graduate chapter of Net Impact, an international non-profit organization whose mission is to use the power of business to create a more socially and environmentally sustainable world.
- **New Venture Challenge Social Impact Track.** CESR developed and continues to support the Social Impact Track of the **CU New Venture Challenge**, a campus-wide initiative connecting students and faculty with teammates in a broad range of disciplines and with mentors from the business community. The goal is to provide knowledge and experience making entrepreneurship accessible to anyone on the CU-Boulder campus with the enthusiasm and creativity required to start a new business.

Programs & Leadership

Professional Mentorship Program

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program's mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities and a sense of connection and community among current students, Leeds alumni and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location or functional area. To ensure a quality experience for both students and mentors, the PMP provides workshops, training and additional support for participants throughout the program.

Program Benefits

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for graduate school, work-life balance and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- Advice and assistance on academic questions, career options, life beyond college and more
- Access to the PMP network and networking opportunities and the opportunity to start building the student's own professional network
- Opportunities to practice and strengthen professional communication and presentation skills
- Help in defining personal and professional goals, and the strategies to achieve them
- Unique internship and job opportunities
- Development of a life-long friend and connection in the business world

Study Abroad

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors and graduate students.

Student Organizations

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:

- Alpha Kappa Psi
- Athletic Business Club
- CU Fashion Club
- Beta Alpha Psi
- Collegiate DECA
- CU Energy Club
- CU Finance Club
- CU American Marketing Association
- CU Investment Club
- CU Society for Human Resources Management
- Delta Sigma Pi
- International Business Club
- Leeds Ambassadors
- Leeds Association of Information Systems
- Leeds Council (Undergraduate Student Government)
- Multicultural Business Student Alliance
- Music Industry Club
- Real Estate Club
- Women in Business Club

Leeds School of Business Student Government

Leeds Council is the governing body of the Leeds School of Business that strives to serve, support and represent the student body. The council also works to make Leeds a better business school through social, academic and professional programming. The council is made up of five primary committees and an executive board that control a significant portion of the Leeds student fees.

Two members of Leeds Council also serve as representatives on University of Colorado Student Government (CUSG) to voice the interests of business students at the main campus.

Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Programs of Study

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and industry partners and our firm commitment to student support.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through

teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the *Wall St. Journal*, the *New York Times*, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Master's Degrees

- Accounting - Master of Science (MS) (p. 1130)
- Business Analytics - Master of Science (MS) (p. 1139)
- Finance - Master of Science (MS) (p. 1139)
- Taxation - Master of Science (MS) (p. 1141)

See the Business Administration (p. 1131) section for those degrees.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

For business administration (BADM) courses, see the Business Administration (p. 1135) section.

Accounting

ACCT 5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240

Requisites: Requires prerequisite course of ACCT 3230 (minimum grade D-). Requires at least 90 credit hours of coursework. A minimum GPA of 3.00 is required. Restricted ACCT, ACTX or BUAD graduate students or FNCEACCT or ACCT Concurrent Degree students only.

ACCT 5250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity valuation and risk analysis.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250

Requisites: Requires prerequisite course of ACCT 3220 or ACCT 3225 (min grade D-). Restricted to Acct (ACCT), Accounting Taxation (ACTX) or Business Administration (BUAD) graduate students or Finance/Acct (FNCEACCT) or ACCT Concurrent Degree students only.

ACCT 5330 (3) Advanced Cost Management

Critically analyzes advanced topics in cost management. Uses cases and current readings.

Requisites: Requires prerequisite course of ACCT 3320 (minimum grade D-). Restricted to Acct (ACCT), Accounting Taxation (ACTX) or Business Administration (BUAD) graduate students or Finance/Acct (FNCEACCT) or ACCT Concurrent Degree students only.

ACCT 5410 (3) Income Tax Accounting

ACCT 5450 (3) Income Taxation of Business Entities

Examines the income tax consequences of business entities. Focuses on regular corporations, partnerships, limited liability companies and S corporations.

Requisites: Restricted to C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX or BUAD graduate students only.

Recommended: Prerequisite ACCT 3230.

ACCT 5540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540

Requisites: Requires prerequisite course of ACCT 3220 or 3225 (minimum grade D-). Restricted to Acct (ACCT), Accounting Taxation (ACTX) or Business Administration (BUAD) graduate students or Finance/Acct (FNCEACCT) or ACCT Concurrent Degree students only.

ACCT 5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4620

Requisites: Requires prerequisite course of ACCT 3230 (minimum grade D-). Requires at least 90 credit hours of coursework. A minimum GPA of 3.00 is required. Restricted ACCT, ACTX or BUAD graduate students or FNCEACCT or ACCT Concurrent Degree students only.

ACCT 5700 (3) International Accounting

Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.

Requisites: Requires prerequisite course of ACCT 3230 or ACCT 3225 (minimum grade D-). Restricted to Acct (ACCT), Accounting Taxation (ACTX) or Business Administration (BUAD) graduate students or Finance/Acct (FNCEACCT) or ACCT Concurrent Degree students only.

ACCT 5800 (3) Accounting for Government and Nonprofit Organizations
Reporting, planning and control of government and nonprofit organizations. Includes program budgets, responsibility accounting and fund accounting.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4800

Requisites: Requires prerequisite course of ACCT 3220 (minimum grade D-). Restricted to Acct (ACCT), Accounting Taxation (ACTX) or Business Administration (BUAD) graduate students or Finance/Acct (FNCEACCT) or ACCT Concurrent Degree students only.

ACCT 5820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4820

Requisites: Requires prerequisite course of ACCT 3230 (minimum grade D-). Requires at least 90 credit hours of coursework. A minimum GPA of 3.00 is required. Restricted ACCT, ACTX or BUAD graduate students or FNCEACCT or ACCT Concurrent Degree students only.

ACCT 5821 (3) Experimental Seminar. Financial Report for Complex Transactions

Focuses on topics related to major financial events in the life of an organization (IPOs, mergers and acquisitions). Enhance the ability to understand the economic essence of important complex business transactions as linked to the financial reporting and tax issues surrounding these deals. Many fascinating and recent transactions will be examined in depth.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4821

Requisites: Requires a prerequisite course of ACCT 3230 (minimum grade D-). Restricted to ACCT or ACTX or BUAD or or FNCEACCT or ACCTACTX students only.

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4827 and CESR 4827

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 5828 (3) Experimental Seminar. AIS Audit

Accounting Information Systems are pervasive in every organization, large or small, creating new risks for these organizations and their auditors. Teaches auditors techniques for understanding how these systems work, how the business uses them to improve business performance and how they impact the audit.

ACCT 5830 (3) Experimental Seminar. Recent Developments in Financial Reporting

Focuses on emerging financial reporting issues in the United States and Internationally.

Requisites: Requires prerequisite course of ACCT 3230 (min grade D-). Restricted to Accounting, Finance/Accounting, Info Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Admin (BUAD) grad students only

ACCT 6000 (1-4) Academic Internship in Accounting

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ACCT 3230 (minimum grade D-). Requires at least 90 credit hours of coursework. A minimum GPA of 3.00 is required. Restricted ACCT, ACTX or BUAD graduate students or FNCEACCT or ACCT Concurrent Degree students only.

Grading Basis: Pass/Fail

ACCT 6220 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6250 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers and auditors. Emphasizes equity analysis.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710

Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar. Managerial Accounting

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6270 (3) Seminar. Income Determination

Critical analysis of problems and theory of measurement and reporting of periodic net income of business organizations. Net income models, research efforts, and role of professional accounting organizations. Current issues and problems given special attention.

Requisites: Requires prerequisite course of ACCT 3230 (minimum grade D-).

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 6420 (3) Research and Writing in Income Taxation

Studies and applies the method used in tax research and tax planning, with the goal of developing tax research, technical writing and tax planning skills. Topics include examining primary and secondary sources of federal tax law, evaluating the hierarchy of these sources and developing technical writing skills using deductive legal reasoning.

Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167

Requisites: Requires prerequisite course of ACCT 5450 (min grade D-). Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6440 (2-3) Tax Policy

Offers a research seminar exploring policy issues of taxation including recent legislative proposals. Students prepare a publishable research paper on a tax policy topic agreed upon with the instructor.

Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 and 6700.

ACCT 6450 (3) Taxation of Corporations

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157

Requisites: Requires corequisite courses of ACCT 6420 and ACCT 6700. Restricted to Bus Admin, Acct, Acct-Tax, Acct-Info Syst, Mgt Sci-Info Syst, Fnce, Mktg or Master of Business Admin graduate students only.

ACCT 6460 (3) Civil/Criminal Tax Proc**ACCT 6470 (3) Frgn Source Income Tax****ACCT 6490 (3) Taxation of Natural Resources**

Concerned with tax problems encountered in acquisition, operation, and disposition of natural resource properties. Topics include depletion, lease bonuses, intangible drilling costs, depreciation, and financing arrangements. Department enforced requisite: admission to the graduate tax program.

Requisites: Requires a prerequisite course of ACCT 6700 (minimum grade D-).

ACCT 6500 (3) Special Topics in Taxation

Covers a diverse array of issues in taxation. Highlights areas of current interest and draws on the strengths of leading outside authorities as guest lecturers in various topic areas.

Requisites: Requires a prerequisite courses of ACCT 6420 and ACCT 6700 (all minimum grade D-).

ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.

Requisites: Requires a prereq course of ACCT 5620 (min grade D-). Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007

Requisites: Requires a prerequisites course of ACCT 5450 (minimum grade D-). Restricted to Accounting (ACCT), MS-ACTX or C-ACCTACTX or FNCEACTX students only.

ACCT 6710 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207

Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 6700. Restricted to ACCT, ACIS, ACTX, MBA or BUAD graduate students only.

ACCT 6720 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7217

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 6760 (2-3) State and Local Taxation

Examines the operation of the income, property and sales tax used to finance our state and local governments. Includes requirements of equal protection and due process. Covers jurisdiction to tax allocation of the tax base among different state and local governments.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7507

ACCT 6770 (3) Wills and Trusts**ACCT 6780 (3) International Taxation**

Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation of income derived by foreign persons from U.S. sources, including the implications of income tax treaties.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7617

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 6820 (1-3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in accounting. Department enforced prerequisites: varies

ACCT 6900 (1-6) Independent Study

Prior department consent required of instructor under whose direction study is taken. Departmental form required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 6940 (1) Master's Degree Candidacy

Departmental form required.

Requisites: Restricted to Business (BUSN) graduate students only.

Grading Basis: Pass/Fail

ACCT 6950 (1-4) Master's Thesis

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research

Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I

Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2

Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6) Graduate Seminar

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies

Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8900 (1-3) Independent Study

Instructor consent required and departmental form (taught as doctoral seminar).

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Thesis

Requisites: Restricted to Business (BUSN) graduate students only.

Business Environment & Policy**BPOL 6940 (1) Master's Candidate for Degree**

Grading Basis: Pass/Fail

BPOL 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

BPOL 7500 (3) Doctoral Seminar: Strategic Management 1

Provides an overview of the literature, including classic articles and books, in business strategy and policy (strategic management). Brings the student up to date on schools of thought, research issues, and practical applications in strategic management.

Repeatable: Repeatable for up to 6.00 total credit hours.

BPOL 7530 (3) Doctoral Seminar: Strategic Management 2

Continuation of BPOL 7500.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of BPOL 7500 (minimum grade D-). Restricted to Business Administration (BUAD) graduate students only.

BPOL 7560 (3) Entrepreneurship, International Business and Technology Management

Provides doctoral students with an understanding of strategic management and entrepreneurship theory, as applied to international business and technology management literatures. Additionally, students are exposed to research methods in the strategy and entrepreneurship arenas.

Requisites: Requires prerequisite courses of BPOL 7500 and BPOL 7530 (all minimum grade D-).

BPOL 8900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

BPOL 8990 (1-10) Doctoral Thesis**Business Law****BSLW 5120 (3) Advanced Business Law**

Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

Equivalent - Duplicate Degree Credit Not Granted: BSLW 4120
