CHEN 3200 (3) Chemical Engineering Fluid Mechanics

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 3313 and GEEN 3853 and MCEN 3021

Requisites: Requires prerequisite courses of APPM 2350 (min grade C-) or MATH 2400 (min grade C-) and CHEN 2120 (min grade C-) or MCEN 2023 (min grade C). Requires corequisite course of APPM 2360. Restricted to College of Engineering majors only.

CHEN 3210 (3) Chemical Engineering Heat Transfer

Examines conservation and transfer of thermal energy. Focuses on conduction and convection of heat in the context of chemical processes, with a special focus on heat exchangers. Also studies thermal radiation.

Requisites: Requires prerequisite course of either CHEN 3200 or MCEN 3021 (minimum grade C-). Restricted to College of Engineering majors only

CHEN 3220 (3) Chemical Engineering Separations and Mass Transfer

Studies separation methods including distillation, absorption, and extraction, and graphical and computer-based solutions to separation problems. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients. Applies mass transfer rate theory to packed and tray columns.

Requisites: Requires prerequisite courses of CHEN 3210 or MCEN 3022 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3320 (3) Chemical Engineering Thermodynamics

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes.

Requisites: Requires prerequisite courses of CHEN 2120 (minimum grade C) and CHEN 4521 or CHEM 4511 and CHEM 4531 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3660 (3) Energy Fundamentals

Explains the most important energy technologies and systems; provides tools to analyze performance using science and engineering principles. This course will investigate important energy concepts from sources and extraction to utilization, storage and efficiency. Topics include fossil fuels, hydropower, renewable energy, biofuels, carbon capture and waste disposal.

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 or MCEN 1024 and PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors only.

Grading Basis: Letter Grade

CHEN 3840 (1-4) Independent Study

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 3930 (6) Chemical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program. 00 GPA or higher.

Requisites: Requires prerequisite course of CHEN 2120 (minimum grade C). At least a 2.85 cumulative GPA is required. Restricted to College of Engineering majors only.

Recommended: Prerequisite 3.

CHEN 4010 (2) Chemical Engineering Senior Thesis 1

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4020 (2) Chemical Engineering Senior Thesis 2

Continuation of CHEN 4010. This course and CHEN 4020 can substitute for CHEN 4130.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4090 (1) Undergraduate Seminar

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4130 (3) Chemical Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations.

Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3220 and CHEN 3320 and CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4330 (3) Chemical Engineering Reaction Kinetics

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors.

Requisites: Requires prerequisite courses of CHEN 3320 and APPM 2360 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4440 (3) Chemical Engineering Materials

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes.

Requisites: Requires prerequisite courses of CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5450

Requisites: Requires prerequisite courses of CHEN 4830 or CHEN 4330 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5460

Requisites: Requires prerequisite courses of CHEM 3311 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4520 (3) Chemical Process Synthesis

Studies applied chemical process design including equipment specification and economic evaluation.

Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3210 or MCEN 3022 and CHEN 3220 and CHEN 4330 or CHEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4521 (3) Physical Chemistry for Engineers

Examines the laws of classical thermodynamics followed by physical transformations of pure substances, the thermodynamics of simple mixtures and chemical equilibrium. Applies quantum theory to atomic and molecular structure. Presents the concepts and applications of statistical thermodynamics. Introduces rates of chemical reactions, reaction dynamics and catalysis.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires a corequisite course of APPM 2360. Restricted to College of Engineering majors only.

CHEN 4530 (2) Chemical Engineering Design Project

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report.

Requisites: Requires prerequisite course of CHEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4570 (4) Instrumentation and Process Control

Examines principles of control theory and their application to chemical processes. Focuses on single-loop feedback and feedforward control. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment.

Requisites: Requires prerequisite courses of CHEN 3220 and CHEN 4330 or CHEN 4830 and APPM 2360 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5630

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5650

Requisites: Requires prerequisite courses of APPM 2360 and CHEN 3200 or MCEN 3021 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4801 (3) Pharmaceutical Biotechnology

Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients.

Requisites: Requires prerequisite courses of CHEN 3320 and prerequisite or corequisite courses of CHEN 4830 or CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4802 (3) Tissue Engineering and Medical Devices

The purpose of this course is to develop a basic understanding of quantitative and qualitative aspects of tissue engineering and medical devices. Particular emphasis will be placed on topics of potential importance and significance to chemical and biological engineers. Students will be introduced to important professional, societal and entrepreneurial issues in the field by examining case studies in which drugs and medical products have been developed or are being considered for FDA approval and clinical use.

Requisites: Requires prerequisite course of CHEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

CHEN 4803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5803

Requisites: Requires prerequisite course of CHEM 4700 or CHEM 4611 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4805 (3) Biomaterials

Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5805

Requisites: Requires a prerequisite course of CHEN 2810 or MCDB 1150 or EBIO 1220 and 1230 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4810 (3) Biological Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations.

Requisites: Requires prerequisite courses of CHEN 2810 or MCDB 1150 and CHEN 3010 and CHEN 4830 (all minimum grade C-). Requires a corequisite course of CHEN 4820. Restricted to College of Engineering majors only.

CHEN 4820 (3) Biochemical Separations

Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes.

Requisites: Requires prerequisite course of CHEN 3220 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4830 (3) Chemical Engineering Biokinetics

Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics.

Requisites: Requires prerequisite course of CHEN 3320 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5836

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4838 (1-3) Special Topics in Chemical Engineering

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4840 (1-4) Independent Study

Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 5090 (1) Seminar in Chemical Engineering

Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

CHEN 5127 (3) Applied Statistics for the Manufacturing and Process Industries

Discusses the concepts and techniques of applied statistics essential to quality control and product/process improvement. Includes computer control (SQC/SPC), sampling methods and time series analysis, and methods of experimental design.

Requisites: Requires prerequisite course of MCEN 4120 (minimum grade D-).

CHEN 5128 (3) Applied Statistics In Research and Development

Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Department enforced prereq.: one introductory probability/statistics course.

CHEN 5210 (3) Transport Phenomena

Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat transfer and their applications to engineering problems. Department enforced prerequisites: undergraduate courses in fluid mechanics, heat transfer, and differential equations.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5333 (3) Research Methods and Ethics

Prepares graduate students to carry out independent research. Research ethics, laboratory skills, experimental methods, critical thinking, presentations, proposal preparation and career planning are discussed. Independent research project carried out under direction of chemical engineering faculty.

Requisites: Restricted to graduate students only.

CHEN 5343 (1) Research Methods and Ethics Seminar

Prepares graduate students to carry out independent research. Focuses on topics such as safety, ethics, communication skills, data analysis, intellectual property considerations, and time management.

Requisites: Restricted to graduate students only.

CHEN 5360 (3) Catalysis and Kinetics

Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis.

Requisites: Requires corequisite course of CHEN 4330. Restricted to Chemistry (CHEM) or Chemical Engineering (CHEN) graduate students only.

CHEN 5370 (3) Intermediate Chemical Engineering Thermodynamics

Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures and solutions. Also looks at relations between thermodynamics and statistical mechanics. Department enforced prerequisite: an undergraduate course in chemical thermodynamics.

Requisites: Restricted to graduate students only.

CHEN 5390 (3) Chemical Reactor Engineering

Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution and diffusion effects. Department enforced prerequisite: undergraduate course in chemical reactor design/kinetics.

CHEN 5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces

Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena.

Requisites: Requires prerequisite course of CHEN 3200 (minimum grade D-).

CHEN 5450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4450

CHEN 5460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4460

CHEN 5630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4630

Requisites: Restricted to graduate students only.

CHEN 5650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Extra work required for graduate course.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4650

CHEN 5670 (3) Environmental Separations

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems.

CHEN 5740 (3) Analytical Methods in Chemical Engineering

Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Department enforced prerequisite: working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5750 (3) Numerical Methods in Chemical Engineering

Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers.

Requisites: Restricted to graduate students only.

CHEN 5800 (3) Bioprocess Engineering

Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes.

CHEN 5803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4803

Requisites: Requires prerequisite courses of APPM 2360 and CHEM 4731 or CHEM 4611 (all minimum grade C-).

CHEN 5805 (3) Biomaterials

Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4805

Requisites: Restricted to graduate students only.

CHEN 5830 (1) Introduction to Modern Biotechnology

Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

CHEN 5831 (2) Biotechnology Case Studies

Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan.

Requisites: Requires prerequisite course of CHEN 5830 (minimum grade D-).

CHEN 5835 (3) Colloids and Interfaces

Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others.

Requisites: Requires prerequisite course of CHEN 3320 (minimum grade C-).

CHEN 5836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4836

Requisites: Restricted to graduate students only.

CHEN 5838 (1-3) Special Topics in Chemical Engineering

Graduate-selected topics courses offered upon demand.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CHEN 5840 (1-4) Independent Study

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CHEN 5900 (3) Pharmaceutical Biotechnology

Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding.

Requisites: Restricted to graduate students only.

CHEN 5919 (1-5) Special Topics in CHBE

Repeatable: Repeatable for up to 10.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEN 6210 (3) Microhydrodynamics of Suspensions and Colloids

Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers.

Requisites: Requires prerequisite course of CHEN 5210 (minimum grade D-).

CHEN 6820 (3) Biochemical Engineering Fundamentals

Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing.

Requisites: Restricted to Chemistry (CHEM), Chemical Engineering (CHEN) or Biological Sciences (MCDB) graduate students only.

CHEN 6940 (1) Master's Candidate

Grading Basis: Pass/Fail

CHEN 6950 (1-6) Master's Thesis**CHEN 8990 (1-10) Doctoral Thesis**

Chemistry (CHEM)

Courses

CHEM 1011 (3) Environmental Chemistry 1

Lect. Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Chemistry

MAPS Course: Physics

CHEM 1021 (4) Introductory Chemistry

Lect. and lab. For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113 and CHEM 1114.

No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher. Department enforced prerequisite: one year high school algebra or concurrent enrollment in MATH 1011.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science Lab or Lab/Lec

CHEM 1031 (4) Environmental Chemistry 2

Lect. and lab. Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors this course if students already have credit in any college-level chemistry course numbered 1113/1114 (formerly 1111) or higher.

Requisites: Requires prerequisite course of CHEM 1011 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

CHEM 1113 (4) General Chemistry 1

Lect., rec. Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1114. Not open to engineering students with exception of EPEN majors.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1400 or CHEM 1221 or CHEN 1211

Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

CHEM 1114 (1) Laboratory in General Chemistry 1

Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisites: CHEM 1113. Not open to engineering students with exception of EPEN majors.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1400 or CHEM 1221 or CHEN 1211

Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

CHEM 1133 (4) General Chemistry 2

Lect., rec. Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Department enforced corequisite: CHEM 1134.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 2100

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (formerly CHEM 1251) or CHEN 1211 and CHEM 1221 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

CHEM 1134 (1) Laboratory in General Chemistry 2

Lab. Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Department enforced corequisite: CHEM 1133.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 2100

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 (formerly CHEM 1251) or CHEN 1211 and CHEM 1221 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

CHEM 1221 (1) Engineering General Chemistry Lab

Meets general chemistry laboratory requirement for engineering students. Designed to illustrate chemical concepts and introduce basic techniques in chemical measurement and synthesis. Department enforced prerequisites: one year of high school chemistry or CHEM 1021 (min. grade C-) and high school algebra; B- in CHEM 1021 recommended.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113 or CHEM 1114 or CHEM 1400

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1133 (minimum grade C-), or corequisite course of CHEN 1211 or CHEM 1133. Restricted to undergraduate engineering students only.

CHEM 1400 (4) Foundations of Chemistry

Covers core concepts in chemistry: nature of matter (atomic and molecular structure, bonding and macroscopic properties), transformations of matter (chemical reactivity), and quantifying chemical transformations (thermochemistry, thermodynamics and kinetics). Emphasizes critical thinking and cultivate core problem solving skills utilized by scientists. Intended for first semester CHEM/BCHM majors. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grad C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1401. Formerly CHEM 1251.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113

Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

CHEM 1401 (1) Foundations of Chemistry Lab

Coordinates with lecture topics in CHEM 1400. Intended for first-semester CHEM and BCHM majors. Emphasizes the development of hands-on practical laboratory skills, experimental design, data interpretation, problem solving and open inquiry. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grad C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1400.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1114 or CHEM 1400

Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Lab

CHEM 2100 (4) Chemical Energetics and Dynamics

Covers the energetic principles that determine when chemical reactions occur and the dynamic principles that determine how rapidly they will occur. Applications include ionic equilibria in solution (acids and bases, buffers and titrations), oxidation-reduction reactions, electrochemistry and chemical kinetics. These applications will be situated in a context of current research problems in areas such as renewable energy and atmospheric chemistry. Department enforced corequisite: CHEM 2101. Formerly CHEM 1271.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1133

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 (formerly CHEM 3371) or CHEM 3491 and MATH 2300 or APPM 1360 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab

CHEM 2101 (1) Laboratory for Chemical Energetics and Dynamics

Coordinates with the lectures topics in CHEM 2100. Required for fourth semester CHEM majors and an elective for BCHEM majors. Emphasizes the acquisition of more advanced laboratory skills, experimental design, data interpretation and analysis. Department enforced corequisite: CHEM 2100.

Requisites: Requires a prerequisite course of CHEM 3341 or CHEM 3381 (minimum grade C-).

Grading Basis: Letter Grade

CHEM 3151 (3) Air Chemistry and Pollution

Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion. Department enforced prerequisite: two semesters of chemistry.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3500

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

CHEM 3251 (3) Sustainable Energy from a Chemistry Perspective

Explores qualitative and quantitative chemical aspects of energy systems (production, transmission, storage, utilization) including fossil, wind, solar, nuclear and biomass energy. Applies chemical principles including composition, structure, bonding, physical properties, thermodynamics, equilibrium and kinetics to energy systems and sustainability, especially environmental implications. Describes the importance of energy to the chemical industries and society as a whole.

Requisites: Requires prerequisite course of CHEM 1133 and 1134 or CHEM 2100 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

CHEM 3311 (4) Organic Chemistry 1

Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkanes, alkenes, alkynes, alkyl halides, and aromatic molecules; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Department enforced corequisite: CHEM 3321 or CHEM 3361.

Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 1400 and CHEM 1401 or CHEM 2100 (formerly CHEM 1271) or CHEN 1211 and CHEM 1221 (all minimum grade C-).

CHEM 3321 (1) Laboratory in Organic Chemistry 1

Lab. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Department enforced corequisite: CHEM 3311 or CHEM 3451.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3361

Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 2100 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

CHEM 3331 (4) Organic Chemistry 2

Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkyl halides, alcohols, ethers, carboxylic acids, aldehydes, ketones, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; synthesis; and reaction mechanisms. Department enforced corequisite: CHEM 3341 or CHEM 3381.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 (formerly CHEM 3371) or CHEM 3491

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3351 and CHEM 3321 or CHEM 3361 (all minimum grade C-).

CHEM 3341 (1) Laboratory in Organic Chemistry 2

Lab. For biochemistry and nonchemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing reactions involving alcohols, ketones, carboxylic acids, and their derivatives. Multistep syntheses are also introduced. Department enforced corequisite: CHEM 3331 or CHEM 3471 or CHEM 3491.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-).

CHEM 3361 (2) Laboratory in Organic Chemistry 1 for Chemistry Majors

Lab. Required course for chemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, alcohols, ketones, and alkyl halides. Explores stereochemical modeling and the chemical identification of organic unknowns. Department enforced corequisite: CHEM 3351 or CHEM 3311 or CHEM 3451.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3321

Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 2100 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 3381 (2) Laboratory in Organic Chemistry 2 for Chemistry Majors

Lab. Required course for chemistry majors. Instruction in experimental techniques of modern chemistry, emphasizing reactions involving alcohols, ketones, carboxylic acids, aromatic compounds, and their derivatives. Multistep syntheses are also introduced. Department enforced corequisite: CHEM 3331 or CHEM 3471 or CHEM 3491.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 3451 (4) Organic Chemistry for Chemistry and Biochemistry Majors

Covers bonding, acidity, reaction mechanisms, nomenclature of organic compounds; stereochemistry; structure and reactions of aldehydes, ketones, and carboxylic acids and derivatives. Department enforced corequisite: CHEM 3361 or CHEM 3321.

Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1133 and CHEM 1134 (minimum grade B+). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

CHEM 3471 (4) Organic Chemistry 2 for Chemistry Majors

Covers Amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity, and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanisms. Department enforced corequisite: CHEM 3381 or CHEM 3341. Formerly CHEM 3371.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3331 and CHEM 3491

Requisites: Requires prerequisite courses of CHEM 3451 and CHEM 3361 or CHEM 3321 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 3491 (4) Organic Chemistry 2 for Biochemistry Majors

Covers amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanism. Department enforced corequisite: CHEM 3341 or CHEM 3381.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 (formerly CHEM 3371) and CHEM 3331

Requisites: Requires prerequisite courses of CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

CHEM 4011 (3) Modern Inorganic Chemistry

Lect. Required course for chemistry majors. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalyst, materials, bioinorganic, and organometallic systems.

Requisites: Requires a prerequisite course of CHEM 3331 or CHEM 3471 (formerly CHEM 3371) or CHEM 3491 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4021 (3) Inorganic Laboratory

One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern inorganic chemistry. Includes syntheses and spectroscopic characterizations of transition metal and main group compounds, experience in manipulation of air sensitive compounds, and techniques involving unusual conditions of pressure or temperature.

Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4131 (3) Chemistry of Global Health

Understanding the chemistry associated with health care in resource-poor countries is the objective of this course. Focuses on preventing, diagnosing and treating the world's deadliest infectious diseases with a particular emphasis on Africa and Central America.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and EBIO 1210 or MCDB 1150 (all minimum grade C-).

CHEM 4141 (3) Environmental Water and Soil Chemistry

Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5141

Requisites: Requires prerequisite course of CHEM 2100 or CHEM 1133 and CHEM 1134 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

CHEM 4171 (3) Instrumental Analysis - Lecture and Laboratory 1

Two Lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis to address problems in chemistry, biochemistry, industrial chemistry and environmental chemistry.

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 (formerly CHEM 3371) or CHEM 3491 and CHEM 3341 or CHEM 3381 and PHYS 1140 or CHEM 4400 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

CHEM 4181 (3) Instrumental Analysis - Lecture and Laboratory 2

Two lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis. Builds on material learned in CHEM 4171.

Requisites: Requires prerequisite course of CHEM 4171 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

CHEM 4251 (3) Materials Chemistry and Properties

Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5251

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4521 or CHEM 4531 (all minimum grade C-).

CHEM 4261 (3) Organic Materials: Structures and Functions

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5261

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade C-).

CHEM 4271 (3) Chemistry of Solar Energy

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5271

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade C-).

CHEM 4400 (4) Core Concepts in Physical Chemistry for Biochemists

Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Department enforced prerequisite or corequisite: PHYS 1120 or PHYS 2020. Formerly CHEM 4411.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5400 and CHEM 4511

Requisites: Requires prerequisite courses CHEM 3331 or CHEM 3471 or CHEM 3491 and PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 (all minimum grade C-).

CHEM 4491 (3) Modern Biophysical Methods

Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic physical); physics; calculus.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5491

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 and CHEM 4400 (formerly CHEM 4411) or CHEM 4511 or corequisite of CHEM 4400 or CHEM 4511 (all minimum grade C).

Grading Basis: Letter Grade

CHEM 4511 (3) Physical Chemistry 1

Lect. Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermochemistry, entropy, free energy, chemical potential, chemical equilibria, and the rates and mechanisms of chemical reactions. Department enforced prereq or coreq., PHYS 1120 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4400 and CHEM 5400

Requisites: Requires prerequisite of courses CHEM 3311 or CHEM 3451 and MATH 2400 or APPM 2350 and PHYS 1110 or PHYS 2020 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4531 (3) Physical Chemistry 2

Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids.

Requisites: Requires prerequisite courses of CHEM 4511 and PHYS 1120 or PHYS 2020, and MATH 2400 or APPM 2350 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4555 (4) Theoretical and Computational Chemistry

Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations. Not recommended for students with a grade below B- in the prerequisite course.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5555

Requisites: Requires prerequisite course of CHEM 4531 (minimum grade C-).

Grading Basis: Letter Grade

CHEM 4581 (1) Physical Chemistry Lab 1

One 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry. Experiments illustrate the fundamental principles of thermodynamics and chemical kinetics. Illustrates the material discussed in CHEM 4511.

Requisites: Requires prerequisite or corequisite course of CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4591 (2) Physical Chemistry Lab 2

One lect. and one 3-hour laboratory every two weeks. a continuation of CHEM 4581, but may be taken concurrently with CHEM 4531. Experiments illustrate the principles of quantum chemistry and spectroscopy discussed in CHEM 4531.

Requisites: Requires prerequisite courses of CHEM 4511 and CHEM 4581 (all minimum grade C-). Requires prerequisite or corequisite course of CHEM 4531 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4611 (3) Survey of Biochemistry

Lec. One-semester survey of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting a survey of biochemistry.

Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-).

CHEM 4621 (3) Genome Databases: Mining and Management

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. Department enforced corequisite: CSCI 2270.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4621 or MCDB 5621 CHEM 5621

Requisites: Requires prerequisite course of CHEM 4700 or CSCI 3104 or MCDB 3500 (minimum grade C-).

CHEM 4700 (4) Foundations of Biochemistry

Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of organic and physical chemistry will be required. Formerly CHEM 4711.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5700

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 (minimum grade C-).

Grading Basis: Letter Grade

CHEM 4720 (4) Metabolic Pathways and Human Disease

Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5720

Requisites: Requires a prerequisite course of CHEM 4700 (formerly CHEM 4711; minimum grade C-).

CHEM 4740 (4) Biochemistry of Gene Transmission, Expression and Regulation

Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5740

Requisites: Requires a prerequisite course of CHEM 4700 (formerly CHEM 4711; minimum grade C-).

CHEM 4751 (3) Current Topics in Biochemical Research

Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5751

Requisites: Requires prerequisite courses of CHEM 4700 and CHEM 4740 or MCDB 3135 (all minimum grade C-).

CHEM 4761 (4) Biochemistry Laboratory

Two 5-hour periods per week. The first hour of each period is lecture, the remainder is laboratory. Introduction to modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis affinity chromatography, radioisotopes, recombinant DNA, and molecular cloning.

Requisites: Requires a prerequisite course of CHEM 4700 (formerly CHEM 4711; minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

CHEM 4791 (3) Bioorganic Chemistry in Biotechnology

Lec. Explores examples of antibodies, peptides, proteins, RNA, DNA, carbohydrates and lipids. Uses the primary literature and requires student participation.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5791

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 (formerly CHEM 3371) or CHEM 3491 and CHEM 4700 (minimum grade C-).

Recommended: Prerequisite undergraduate molecular biology.

CHEM 4901 (1-6) Independent Study in Chemistry and Biochemistry

For undergraduate study. Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

CHEM 5011 (3) Advanced Inorganic Chemistry 1

Lect. Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds.

Requisites: Requires prerequisite courses of CHEM 4011 and CHEM 4531 (all minimum grade B-) or graduate standing.

CHEM 5061 (3) Advanced Inorganic Chemistry 2

Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation.

Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-) or graduate standing.

CHEM 5141 (3) Environmental Water and Soil Chemistry

Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4141

Requisites: Restricted to graduate students only.

CHEM 5151 (3) Atmospheric Chemistry

Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere and global climate change.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5151

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one semester of college-level chemistry.

CHEM 5152 (3) Advanced Atmospheric Chemistry

Follows Graduate Atmospheric Chemistry (CHEM 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5152

Recommended: Prerequisite CHEM 5151 or ATOC 5151.

CHEM 5161 (3) Analytical Atmospheric Spectroscopy

Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Department enforced prereq., undergraduate physical chemistry or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5171 (3) Electroanalytical Chemistry

Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Department enforced prerequisite: undergraduate physical chemistry or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5181 (3) Mass Spectrometry and Chromatography

Mass spectrometry, including instrumentation, ionization techniques and interpretation of mass spectra. Theory and practice of analytical separation processes including ion mobility, capillary electrophoresis and liquid gas chromatography. Introduction to applications in e.g. atmospheric and biological mass spectrometry. Introduction to computer simulation of instrumentation and physical processes. Department enforced prerequisite: undergraduate physical chemistry or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5201 (3) Atmospheric Aerosol Discussions

Discusses recent literature concerning atmospheric aerosols and their role in atmospheric problems, including global ozone depletion, air quality, regional haze, acid rain, and global climate change.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CHEM 5151 or ATOC 5151.

CHEM 5251 (3) Materials Chemistry and Properties

Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4251

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5261 (3) Organic Materials: Structures and Functions

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4261

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5271 (3) Chemistry of Solar Energy

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4271

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5281 (3) Semiconductor Processing and Device Fabrication

Understanding of semiconductor processing and device fabrication from chemistry perspective. Overview of processing steps used to fabricate inorganic semiconductor devices including deposition, patterning and etching techniques. Description of process integration during device fabrication. Discussion of key issues facing advanced semiconductor fabrication.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CHEM 5311 (3) Advanced Synthetic Organic Chemistry

Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students.

Department enforced prerequisite: one year of organic chemistry or graduate standing.

CHEM 5321 (3) Advanced Physical Organic Chemistry

Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry

Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5341 (3) Chemical Biology and Drug Design

Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical and other research-oriented industries as well as in academia. Department enforced prerequisites: introductory organic chemistry and general biochemistry.

Requisites: Restricted to graduate students only.

CHEM 5400 (4) Core Concepts in Physical Chemistry for Biochemists

Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 5411.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4400 and CHEM 4511

Requisites: Restricted to graduate students only.

CHEM 5491 (3) Modern Biophysical Methods

Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies.

Department enforced prerequisites: undergraduate chemistry (general, organic physical); physics; calculus.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4491

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CHEM 5501 (3) Advanced Topics in Physical Chemistry

Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Department enforced prerequisites: undergraduate physical chemistry, graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5531 (3) Statistical Mechanics

Lect. Fundamental concepts of quantum and classical statistical mechanics. Applications to properties of gases, liquids, solids, spin and polymer systems. Reaction, fluctuation, nucleation and relaxation phenomena. Department enforced prerequisite: undergraduate physical chemistry.

Requisites: Restricted to graduate students only.

CHEM 5541 (3) Chemical Dynamics

Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Department enforced prerequisite: undergraduate physical chemistry.

Requisites: Restricted to graduate students only.

CHEM 5555 (4) Theoretical and Computational Chemistry

Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4555

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CHEM 5571 (3) Surface Science

Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Department enforced prerequisites: undergraduate physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5581 (3) Introductory Quantum Chemistry

Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules and spin; electronic structure of atoms and molecules. Department enforced prerequisite: two semesters of physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5591 (3) Advanced Molecular Spectroscopy

Lect. Rotational, vibrational and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure.

Department enforced prerequisites: two semesters of physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5621 (3) Genome Databases: Mining and Management

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4621 or MCDB 5621 CHEM 4621

Requisites: Restricted to graduate students only.

CHEM 5700 (4) Foundations of Biochemistry

Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of organic and physical chemistry will be required. Formerly CHEM 5711.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4700

Requisites: Restricted to graduate students only.

CHEM 5720 (4) Metabolic Pathways and Human Disease

Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4720

Requisites: Restricted to graduate students only.

CHEM 5740 (4) Biochemistry of Gene Transmission, Expression and Regulation

Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4740

Requisites: Restricted to graduate students only.

CHEM 5751 (3) Current Topics in Biochemical Research

Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4751

Requisites: Restricted to graduate students only.

CHEM 5770 (3) Fundamentals of Biochemistry I

Analysis of topics in biochemistry including DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, and protein structure and dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5771 covering the same topics except for the requirement of a written research proposal.

CHEM 5771 (5) Advanced General Biochemistry 1

Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students.

CHEM 5776 (1) Scientific Ethics and Responsible Conduct in Research

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5776

Requisites: Requires prerequisite course of CHEM 5771 or CHEM 5271 (minimum grade B-). Restricted to graduate students only.

CHEM 5780 (3) Fundamentals of Biochemistry II

Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal.

Requisites: Requires prerequisite course of CHEM 5770 (minimum grade B-). Restricted to graduate students only.

CHEM 5781 (5) Advanced General Biochemistry 2

Lect. Detailed consideration of contemporary topics in biochemistry, including protein structure (primary, secondary, tertiary, and quaternary), methods of structure determination and prediction, protein folding (kinetics, thermodynamics, denaturation, and renaturation), and protein dynamics (internal motions and methods of analysis).

Requisites: Requires prerequisite course of CHEM 5771 (minimum grade B-). Restricted to graduate students only.

CHEM 5791 (3) Bioorganic Chemistry in Biotechnology

Lec. Explores examples of antibodies, peptides, proteins, RNA, DNA, carbohydrates and lipids. Uses the primary literature and requires student participation.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4791

Requisites: Restricted to graduate students only.

CHEM 5801 (3) Advanced Signal Transduction and Cell Cycle Regulation

Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210 or MCDB 5220.

CHEM 5811 (3) Advanced Methods in Protein Sequencing and Analysis

Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Department consent required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210.

CHEM 5821 (1) Special Topics in Signaling and Cell Regulation

Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. Department consent required.

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6001 (1) Seminar: Inorganic Chemistry

Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar.

Requisites: Restricted to graduate students only.

CHEM 6021 (1-3) Special Topics in Inorganic Chemistry

Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6031 (3) Special Topics in Nanoscience

Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applications in biotechnology and energy.

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4511 (all minimum grade B-) or graduate standing.

CHEM 6101 (1) Seminar: Analytical Chemistry

Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar.

Requisites: Restricted to graduate students only.

CHEM 6111 (1-3) Special Topics in Analytical Chemistry

Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6301 (1-3) Seminar in Organic Chemistry

Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students.

Requisites: Restricted to graduate students only.

CHEM 6311 (1-3) Special Topics in Synthetic Organic Chemistry

Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules.

Requisites: Requires prerequisite course of CHEM 5311 (minimum grade B-). Restricted to graduate students only.

CHEM 6321 (1-3) Special Topics in Physical Organic Chemistry

Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry.

Requisites: Requires prerequisite course of CHEM 5321 (minimum grade B-). Restricted to graduate students only.

CHEM 6401 (1-3) Seminar: Physical Chemistry

Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles.

Requisites: Restricted to graduate students only.

CHEM 6411 (1-3) Advanced Topics in Physical Chemistry

Lect.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6601 (1) Biochemistry Seminar

Required of all biochemistry graduate students. Credit is deferred until presentation of satisfactory seminar.

Requisites: Restricted to graduate students only.

CHEM 6621 (1) Special Topics in RNA

Reviews and evaluates recent scientific literature in the field of RNA chemistry and biology, including topics in structure, catalysis, bioinformatic approaches and control of gene expression. Primarily for graduate level presentation of special topics by students and research staff.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 6621

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6711 (3-6) Advanced Topics in Biochemistry

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6731 (3-6) Advanced Topics in Biochemistry

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6801 (0) Departmental Research Seminar

Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week.

Required for all graduate students in chemistry.

Requisites: Restricted to graduate students only.

CHEM 6901 (1-6) Research in Chemistry

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6941 (1) Master's Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

CHEM 6951 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

CHEM 7021 (2) Seminar: Structural Inorganic Chemistry

Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7101 (2) Seminar: Chromatography and Trace Analysis

Student and faculty discussions and reports on research advances in chromatography, trace analysis and environmental chemistry. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7111 (2) Seminar: Electrochemistry

Student and faculty discussions and reports on research advances in electrochemistry. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7131 (1) Seminar in Atmospheric Aerosol Chemistry

Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5151 and CHEM 5181.

CHEM 7161 (1) Seminar: Heterogeneous Atmospheric Chemistry

Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7211 (1) Seminar: Topics in Synthetic Methodology and Natural Product Synthesis

Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.

Requisites: Restricted to graduate students only.

CHEM 7221 (1) Seminar: Photochemistry and Free Radical Chemistry

Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7231 (1) Seminar: Reactive Intermediates

Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7241 (1) Seminar: Synthetic Organic Chemistry

Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7251 (1) Selected Topics in Chemical Genetics

Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7271 (1) Seminar: Picosecond Dynamics of Reactions

Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7281 (1) Seminar: Molecular Self-Assembly

Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7291 (1) Seminar: Physical Organic Chemistry

Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7301 (1) Seminar: Synthetic and Mechanistic Chemistry

Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7311 (1) Selected Topics in Organic Materials

Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7401 (1) Seminar in Photochemical Reaction Control

Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7421 (2) Seminar: Negative Ion Chemistry

Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7431 (1) Seminar: Topics in Theoretical Chemical Physics

Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7441 (2) Research Seminar: Theoretical Chemistry

Studies theoretical description of molecular dynamics as related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7461 (1) Seminar: Gas Phase Ion Chemistry

Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications.

Requisites: Restricted to graduate students only.

CHEM 7471 (1) Seminar in Ultrafast Spectroscopy of Proteins

Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7481 (2) Seminar: Molecular Spectroscopy and Photochemistry

Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7491 (1) Seminar: Molecular Vibrational Dynamics

Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7501 (1) Seminar: Theoretical Molecular Dynamics

Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7511 (1) Seminar: Reaction Dynamics in Condensed Phases

Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7521 (1) Seminar: Atmospheric Kinetics and Photochemistry

Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7531 (1) Seminar: Surface Chemistry and Thin Film Growth

Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7551 (1) Selected Topics in Ion Spectroscopy

Treats current topics in the spectroscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7601 (2) Seminar: Nucleic Acid Chemistry

Topics in various aspects of current research; emphasizes student readings and presentations. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution

Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction

Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells.

Requisites: Restricted to graduate students only.

CHEM 7651 (2) Seminar: Environmental Biochemistry

Topics in various aspects of current biochemical and environmental research. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7661 (1) Structure/Function of Human Mediator Transcription Complexes

Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes.

Requisites: Restricted to graduate students only.

CHEM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered.
Requisites: Restricted to graduate students only.

CHEM 7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins

Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7701 (1) Seminar: Enzyme Mechanisms and Kinetics

Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7711 (1) RNA Mediated Inorganic and Organic Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered.
Requisites: Restricted to graduate students only.

CHEM 7741 (1) Seminar: Signal Transduction and Protein Phosphorylation

Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7751 (1) Seminar: Protein Structure and Folding

Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7761 (1) Seminar: Eukaryotic Transcriptional Regulation

Studies the regulation of transcription by RNA Polymerase II from human promoters. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7781 (1) Seminar: Topics in Structural Biology

Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation.

Requisites: Restricted to graduate students only.

CHEM 7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies

Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing.

Requisites: Restricted to graduate students only.

CHEM 8991 (1-10) Doctoral Dissertation

All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.

Chinese (CHIN)

Courses

CHIN 1010 (5) Beginning Chinese 1

Introduces modern Chinese (Mandarin), developing all four skills (speaking, listening, reading and writing) and communicative strategies. Students learn both traditional full-form characters and the principles for converting them into simplified characters.

Additional Information: Arts Sci Core Curr: Foreign Language
 Departmental Category: Chinese
 Departmental Category: Asia Content

CHIN 1012 (4) Introduction to Chinese Civilization

An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of China. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
 Departmental Category: Chinese Courses in English
 Departmental Category: Asia Content

CHIN 1020 (5) Beginning Chinese 2

Continuation of CHIN 1010.

Requisites: Requires prerequisite course of CHIN 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
 Departmental Category: Chinese
 Departmental Category: Asia Content

CHIN 1051 (3) Masterpieces of Chinese Literature in Translation

Surveys Chinese thought and culture through close reading and discussion of selected masterworks of Chinese literature in translation. Texts include significant works of poetry, fiction, and drama, as well as philosophical and historical writings from various eras. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
 Departmental Category: Chinese Courses in English
 Departmental Category: Asia Content

CHIN 2110 (5) Intermediate Chinese 1

Emphasizes reading, speaking, and writing modern Chinese, including continued study of both full-form and simplified characters. Introduces dictionaries and principles of character formation.

Requisites: Requires prerequisite course of CHIN 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
 Departmental Category: Chinese
 Departmental Category: Asia Content

CHIN 2120 (5) Intermediate Chinese 2

Continuation of CHIN 2110.

Requisites: Requires prerequisite course of CHIN 2110 (minimum grade C).

Additional Information: Departmental Category: Chinese
 Departmental Category: Asia Content

CHIN 2441 (3) Film and the Dynamics of Chinese Culture

Through studying a group of Chinese films in light of modern Chinese history and literature, students examine a series of cultural dilemmas and issues in 20th century China and develop skills in analyzing literary and filmic texts. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities Arts Sci Core Curr: Literature and the Arts

Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3110 (5) Advanced Chinese 1

Surveys a variety of authentic-language materials, including films, plays, newspaper articles, essays, and short stories. Emphasizes proficiency-oriented approach to reading, writing, and oral communication.

Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 3120 (5) Advanced Chinese 2

Continuation of CHIN 3110.

Requisites: Requires prerequisite course of CHIN 3110 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization

Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for Chinese majors and minors. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3200

Requisites: Restricted to students with a minimum of 45 units.

Additional Information: Arts Sci Core Curr: Written Communication

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

CHIN 3311 (3) The Dao and the World in Medieval China

An interdisciplinary examination of role of Daoist and Buddhist philosophical and religious concepts and images in medieval Chinese civilization, including literature and the arts. Focuses on the personal aspects of this period of religious and intellectual ferment, tracing the representation of these ideas in Chinese poetry, prose, painting and the plastic arts as well as their role in philosophical and religious speculation. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3321 (3) Culture and Literature of Ancient China

Focuses on the religious, cultural, philosophical and literary aspects of ancient Chinese civilization (1500 B.C.-A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English and taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3321

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3331 (3) Culture and Literature of Late Imperial China

The late imperial period was marked by growth of great metropolitan areas, expanded urban entertainments, and an extensive popular culture.

Focuses on the literature and artifacts of this urban culture as well as the hegemonic culture of the state and of traditional social codes and their literary manifestations. Also considers growing contacts with the West and the transition to the modern period. All readings are in English. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3334 (3) Chinese Narrative Tradition

Examines the major works of Chinese narrative tradition from the fourth to the nineteenth century. Emphasizes the reading and analysis of selected texts and understanding of the cultural and social contexts of text production and circulation. Text selections vary from year to year. Taught in English.

Recommended: Prerequisite CHIN 1012.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3341 (3) Literature and Popular Culture in Modern China

Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3341

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3342 (3) Literary Culture in Contemporary China

Surveys the late 20th century Chinese and Taiwanese literature and popular culture against the historical background Market Reform in China and the lifting of Martial Law in Taiwan. Emphasizes close and critical reading skills and an understanding of how aesthetic texts critically engage within historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3351 (3) Reality and Dream in Traditional Chinese Literature

Explores the role of dreams in pre-modern Chinese literature from the beginnings in the 2nd millennium B.C.E. to the 19th century. The source texts will range from religious, philosophical, medical and historical writings to poetry to various genres of fictional prose and drama. Taught in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3361 (3) Women and the Supernatural in Chinese Literature

Explores the relationship between the worlds of women and the supernatural in Chinese literature, from ancient to modern times. Focuses on selected significant works of classical and vernacular fiction, religious texts, and poetry. Taught in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3371 (3) Topics in Chinese Film

Offers in-depth, critical analysis of key issues in Chinese culture as represented in Chinese film. Focuses on various topics, such as specific directors, regions, representation of gender in Chinese film, historical periods, etc. Varies from year to year. Requires no knowledge of Chinese. Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CHIN 1051 or CHIN 2441.

Additional Information: Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 4110 (3) Advanced Readings in Modern Chinese 1

Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.

Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4120 (3) Advanced Readings in Modern Chinese 2

Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.

Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4210 (3) Introduction to Classical Chinese

Introduces the classical language based on texts from the pre-Han and Han periods. Stresses precise knowledge of grammatical principles and exactitude in translation—the basis for all further work in classical Chinese.

Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4220 (3) Readings in Classical Chinese

Close reading of selected texts of ancient and medieval literature. Readings in both prose and poetry. Emphasizes a disciplined, philological approach to the texts, with proper attention to diction, tone, and nuance.

Requisites: Requires prerequisite course of CHIN 4210 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4300 (3) Open Topics: Readings in Chinese Literature

Studies selected texts on a particular topic taught by regular or visiting faculty. Topics change each term.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4750 (3) Daoism

Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 5750 and RLST 4750 and RLST 5750

Requisites: Requires prerequisite course of RLST 3800 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4950 (3) Honors Thesis

Additional Information: Arts Sciences Honors Course

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4980 (1) Practical Issues in Chinese Language Pedagogy

Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Department enforced prerequisite: CHIN 4120 (minimum grade C) or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 5980

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 5010 (3) Sinological Methods

Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as leishu, congshu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 5030 (3) Readings in Pre-Modern Chinese Literary Theory

Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 5120 (3) History of Literature through the Ninth Century

Surveys, with readings in primary and secondary sources, major landmarks in various areas of ancient and medieval literature. Focuses on the classic and most influential works of the Zhou through Tang dynasties. Gives attention to matters of historical fact and actuality as well as to textual and interpretive history.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5130 (3) History of Chinese Literature from the Tenth to the Nineteenth Century

Survey of Chinese literature from the tenth to the nineteenth century, with readings in primary and secondary sources. Focuses on the major literary works, genres, figures, and movements of the Song through the Qing dynasties.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5210 (3) Ancient Prose

Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lun yu, Mengzi, Zhuangzi, Huainanzi, Shiji, Hanshu, and Lunheng. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5220 (3) Ancient Poetry

Studies selected pre-imperial and Han poetic works important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on the Shijing and the Chu ci, as well as the fu and shi of Han writers. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5230 (3) History of Early Chinese Thought

Introduces early Chinese philosophy, mostly "Masters' Literature" of the 5th–1st c. BCE, which is foundational for all later Chinese philosophy and political thought. Close reading of primary sources will be combined with an introduction to secondary scholarship in English and modern Chinese, both articles on individual texts/philosophers and comprehensive histories of early Chinese philosophy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5280 (3) Topics in Ancient Literature

Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5410 (3) Medieval Prose

Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) prose that played important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5420 (3) Medieval Poetry

Studies works of early medieval (ca. 200-600 AD) poetry. Writers and topics vary ranging from surveys of specific genre, shi or fu, or shared subject such as religious or commemorative verse, or specific periods, to focused studies of particular major figures Cao Zhi, Tao Qian, Li Bo, or Du Fu. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5430 (3) Medieval Thought and Religion

Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. Knowledge of Classical Chinese at the level of CHIN 4220 is required..

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5480 (3) Topics in Medieval Literature

Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5610 (3) Early Modern Prose

Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5620 (3) Early Modern Poetry

Studies Song, Yuan, Ming and Qing poetry. Stresses major figures, stylistic variations, various poetry schools, new directions in shi verse, and the rise and development of ci. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5630 (3) Early Modern Fiction

Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as Xiyou ji, Sanguo yanyi, Shuihu zhuan, Jin Ping Mei, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5680 (3) Topics in Early Modern Literature

Examines a specific problem or issue in early modern literature (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5750 (3) Daoism

Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 4750 and RLST 4750 and RLST 5750

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5810 (3) Modern Literature

Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5820 (3) Contemporary Literature

Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5830 (3) History of Chinese Film

Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5880 (3) Topics in 20th Century Literature

Examines a specific problem or issue in 20th century literature, e.g., feminist fiction in China, modernism in fiction and poetry, or the role of literary criticism in modern literature. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5890 (3) Topics in Chinese Film

Examines a specific problem or issue in Chinese film, e.g. 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5900 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5980 (1) Practical Issues in Chinese Language Pedagogy

Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 4980

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6900 (1-6) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

Civil Engineering (CVEN)

Courses

CVEN 1317 (1) Introduction to Civil and Environmental Engineering

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 1837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 2012 (3) Introduction to Geomatics

Presents basic techniques of land and construction surveying, including measurement of position, elevation, orientation and length of lines, area, volume and layout calculations. Optical, GPS and GIS equipment and methods are included.

Requisites: Restricted to Architectural (AREN) or Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 2121 (3) Analytical Mechanics 1

Applies mechanics to the study of static equilibrium of rigid and elastic bodies. Includes composition/resolution of forces; moments/couples; equivalent force systems; free-body diagrams; equilibrium of particles and rigid bodies; forces in trusses/beams; frictional forces; first/second moments of area; moments and products of inertia.

Equivalent - Duplicate Degree Credit Not Granted: GEEN 2851 and MCEN 2023

Requisites: Requires a prereq course of PHYS 1110 (min grade C-).

Requires a prereq or coreq course of APPM 2350 or MATH 2400 (min grade C-). Restricted CVEN or EVEN or AREN or AMEN or EPEN or GEEN majors with a CIV, ENR or ARC subplan.

Additional Information: Departmental Category: Mechanics

CVEN 2837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 3022 (3) Construction Surveying

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data.

Requisites: Requires prerequisite course of CVEN 2012 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3032 (3) Photogrammetry

Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3111 (3) Analytical Mechanics 2

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions.

Requisites: Requires prerequisite courses of CVEN 2121 (minimum grade C-). Requires a co-requisite course of APPM 2360. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Mechanics

CVEN 3141 (2) Engineering Materials Lab

Additional Information: Departmental Category: Mechanics

CVEN 3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 2063

Requisites: Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or Engineering Management (EMEN) or General (GEEN) Engineering majors with a CIV, ENR or ARC subplan.

Additional Information: Departmental Category: Mechanics

CVEN 3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Miscellaneous

CVEN 3246 (3) Introduction to Construction

Provides a broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law and financial management. Students with a Business School Real Estate emphasis may be considered for this course.

Requisites: Restricted to students with 36+ units, Civil (CVEN) or Architectural (AREN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

CVEN 3256 (3) Construction Equipment and Methods

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction.

Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

CVEN 3313 (3) Theoretical Fluid Mechanics

Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude and flow in closed conduits.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and GEEN 3853 and MCEN 3021

Requisites: Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) majors, or General (GEEN) Engineering majors with a CIV or ENR subplan.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3323 (3) Hydraulic Engineering

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery.

Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or GEEN 3853 or AREN 2120 or CHEN 3200 (all minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.

Requisites: Requires prereq courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 or CHEM 1400 or CHEM 1351 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, GEEN or AMEN majors only.

Additional Information: Departmental Category: Environmental

CVEN 3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements.

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3434

Requisites: Prereq courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 or CHEM 1400 or CHEM 1351; (all min C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Environmental (EVEN) or Architectural Engineering (AREN) mjrs.

Additional Information: Departmental Category: Environmental

CVEN 3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force method.

Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), General (GEEN) or Applied Mathematic (AMEN) majors only.

Additional Information: Departmental Category: Structures

CVEN 3602 (3) Transportation Systems

Introduces technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems. Focuses on evaluation of urban transportation systems and recent transportation innovations.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; geologic hazards; mapping; and geology of underground excavations, slopes, reservoirs and dam sites.

Requisites: Requires a prerequisite or corequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3708 (3) Geotechnical Engineering 1

Covers basic engineering characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories.

Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), General (GEEN) or Applied Mathematic (AMEN) majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3718 (3) Geotechnical Engineering 2

Covers stress analysis and plastic equilibrium, shear strength of soil, bearing capacity, lateral earth pressures, slope stability and underground construction. Analysis and design of shallow and deep foundations, retaining walls and other earth and rock structures. Selected experimental and computational laboratories.

Requisites: Requires prerequisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 3930 (6) CEAE Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. Offered only through Continuing Education and cannot be used to fulfill any of CEAE's degree requirements. 00 GPA or higher.

Repeatable: Repeatable for up to 24.00 total credit hours.

Requisites: At least a 2.75 cumulative GPA is required. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Building Systems

CVEN 4147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5147

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 4161 (3) Mechanics of Materials 2

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5161

Requisites: Requires prerequisite course of CVEN 3161 (minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 4323 (3) Water Resource Engineering Design

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5423

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4333 (3) Engineering Hydrology

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing.

Requisites: Requires prerequisite course of CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 (all minimum grade C-).

Requires prerequisite or corequisite course of CVEN 3227 or APPM 4570 or MCEN 3047 or MCEN 3208 or CHEN 3010.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4353 (3) Groundwater Engineering

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or GEEN 3853 (minimum grade C-).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4383 (3) Groundwater Modeling

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5383

Recommended: Prerequisite CVEN 4353.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4404

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 and CVEN 3414 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN 4404 in laboratory experiments and reports.

Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4414

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 and CVEN 3414 (all minimum grade C-). Requires corequisite course of CVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4424

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1113 or CHEM 2100 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4434

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5464 and EVEN 4464

Requisites: Requires prerequisite or corequisite courses of CVEN 3414 and CVEN 3313 or CHEN 3200 or GEEN 3853 or MCEN 3021 or AREN 2120 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5474

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5484 and EVEN 4484

Requisites: Requires prerequisite courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 or CHEM 1400 or CHEM 1351 and APPM 2350 or MATH 2400 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4511 (3) Introduction to Finite Element Analysis

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5511

Requisites: Requires prerequisite courses of CVEN 3161, CVEN 3525, APPM 2360 or MATH 3130 and MATH 4430 (all minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 4525 (3) Matrix Structural Analysis

Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with Matlab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5525

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4535 (1-3) Construction Materials

Introduces material science of engineering materials, such as atomic and crystal structures, defects and phase diagrams; discusses in detail three construction materials: steel, Portland cement concrete and asphalt concrete including classification and composition, engineering properties and testing methods (with three lab sessions). Covers basic of three materials: wood, fiber reinforced polymers and masonry.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Structures

CVEN 4537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5537

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: Miscellaneous

CVEN 4545 (3) Steel Design

Applies basic principles of structural engineering and mechanics to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Elective for the EVEN air quality track or an environmental concentration course for CVEN.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5554

Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CVEN 3313 or CHEN 3200 or MCEN 3021 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4555 (3) Reinforced Concrete Design

Applies basic principles of structural engineering and mechanics to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4565 (3) Design of Wood Structures

Applies basic principles of structural engineering and mechanics to the design of wood structures, including the design and analysis of columns, trusses, beams and connections using dimensional lumber, glulam and cross-laminated timber.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4594 (3) Water Reuse and Reclamation

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5594

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 4718 (3) Mechanics and Dynamics of Glaciers

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5718

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 and AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 and CHEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 (all minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 4728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5728

Requisites: Requires prerequisite course of CVEN 3718 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 4830 (1-4) Special Topics

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Building Systems

CVEN 4833 (1-3) Special Topics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4834 (1-3) Special Topics

Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Environmental

CVEN 4835 (1-3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Structures

CVEN 4837 (1-3) Special Topics

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

CVEN 4838 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Geotechnical

CVEN 4839 (3-6) Special Topics for Seniors

Offers a supervised study of special topics, under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 4849 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 4878 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Additional Information: Departmental Category: Geotechnical

CVEN 4897 (2) Professional Issues in Civil Engineering

Educates students about the knowledge and skills required for professional civil engineers. Students learn about the path to a professional license, prepare for the FE exam, analyze a situation involving multiple conflicting ethical interests, identify aspects of sustainability in civil engineering projects, and understand the role of project management, public policy, business and public administration, and leadership in civil engineering.

Requisites: Restricted to students with 87-180 credits (Seniors) Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 4899 (4) Civil Engineering Senior Project Design

Provides a simulated real world design and construction planning experience where teams integrate across multiple civil engineering sub-disciplines to create a solution that satisfies multiple constraints, including design, client requirements, budget, schedule, technical, regulatory, and societal. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior) Civil (CVEN) or General (GEEN) engineering majors only.

Additional Information: Departmental Category: Special Topics

CVEN 5111 (3) Structural Dynamics

Focuses on the response of single- and multi-degree of freedom structures subjected to harmonic, impulsive and arbitrary loads (including earthquake base excitation). Sources and modeling of damping will be discussed. Analytical and numerical solutions will be considered for both linear and nonlinear structural systems. Elastic and inelastic response spectra will be discussed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 5131 (3) Continuum Mechanics and Elasticity

Provides foundation for advanced study of structural, mechanical and geo-material behavior and continuum theories in mechanics. Topics: Cartesian tensors, formulation of continuum mechanics for small and large deformation, constitutive laws for elastic solids, energy principles, methods of potentials, formulations and solutions of 2D and 3D elastostatic and elastodynamic problems, analytical and numerical formulations.

Recommended: Prerequisite CVEN 4161.

Additional Information: Departmental Category: Mechanics

CVEN 5147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4147

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5161 (3) Advanced Mechanics of Materials I

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4161

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 5206 (3) Design Development

Provides an overview of the development process and proforma, investigates the interrelationship between design decisions and building costs, and evaluates the impact of each major building system on the development budget and schedule. Provides a simulated development experience where students respond to a Request for Proposal, including proformas, design, estimates and outline specifications. Department consent required. Taught intermittently.

Additional Information: Departmental Category: Construction

CVEN 5216 (3) Applied Construction Financial Management

Teaches students to interpret commonly used financial reports in the construction engineering industry sector. Skills developed in this course will better prepare students to become competent consumers of financial information and influence future results the construction business. Models for financing public and private sector projects will also be explored. Taught intermittently.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5226 (3) Construction Safety

Comprehensively studies construction safety in the construction industry. Focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, predictive analytics and learning. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

Additional Information: Departmental Category: Construction

CVEN 5246 (3) Legal Aspects of Construction

Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Taught intermittently.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5276 (3) Engineering Risk and Decision Analysis

Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, and various types of multicriteria decision analyses. Culminates in a larger term project.

Recommended: Prerequisite CVEN 3227 and graduate standing or instructor consent required.

Additional Information: Departmental Category: Construction

CVEN 5286 (3) Design Construction Operations

Considers effective/efficient design of construction operations. Front end planning; construction labor relations; productivity management. Emphasizes construction productivity improvement by group field studies and discrete event simulation modeling. How overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5313 (3) Environmental Fluid Mechanics

Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites APPM 2350 and APPM 2360 and CVEN 3313.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5323 (3) Applied Stream Ecology

Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5333 (3) Physical Hydrology and Hydroclimatology

Introduces hydrology as a quantitative science describing the occurrence, distribution and movement of water at and near the surface of the earth. Develops a quantitative understanding of atmospheric water, infiltration, evapotranspiration and surface runoff. Studies global climatology and large scale climate drivers of regional hydrology at interannual time scales. Solves engineering problems related to water resources.

Requisites: Requires prerequisite courses of CVEN 5454 and CVEN 5537 (all minimum grade of C-). Restricted to graduate students only.

Recommended: Prerequisite CVEN 4333.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5343 (3) Transport and Dispersion in Surface Water

Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5346 (3) Managing Construction and Engineering Projects and Organizations

Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations.

Additional Information: Departmental Category: Construction

CVEN 5353 (3) Groundwater Hydrology

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 and APPM 2360.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5363 (3) Modeling of Hydrologic Systems

Introduces students to modeling techniques. Focus areas include physical hydrology and hydrometeorology; measurement and inference; climate change impacts; role of scale in hydrology; uncertainty analysis; and a case study project. Projects will examine hydrologic impacts of various drivers such as climate warming or land cover change, utilizing an assessment of historic conditions to better understand and model future disturbance scenarios.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5373 (3) Water Law, Policy, and Institutions

Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5383 (3) Applied Groundwater Modeling

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4383

Recommended: Prerequisites APPM 2360 and CVEN 4353 or CVEN 5353.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5393 (3) Water Resources System and Management

Introduces water resources planning and management as an integrated systems problem that satisfies multiple competing objectives under constraints and uncertainty. Includes problem formulation and solution using decision support systems, optimization with and without uncertainty, stochastic simulation, and multiobjective optimization. Introduces water resources economics and planning under uncertainties such as climate change and increasing urbanization.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5404 (3) Water Chemistry

Introduces chemical fundamentals governing the chemistry of natural and treated waters. Topics include thermodynamics and kinetics of acid and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption.

Requisites: Restricted to concurrent BS/MS (C-CVEN or C-EVENCVEN) or graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5414 (3) Water Chemistry Laboratory

Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters.

Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-). Requires corequisite course of CVEN 5424.

Additional Information: Departmental Category: Environmental

CVEN 5423 (3) Water Resources Engineering Design

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4323

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical processes that impact the fate and transport of organic contaminants in natural and engineered systems. Emphasizes both equilibrium and kinetic aspects, including solubility, vapor pressure, air-water exchange, sorption, abiotic redox reactions, and photodegradation.

Additional Information: Departmental Category: Environmental

CVEN 5434 (3) Environmental Engineering Design

Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Department consent required.

Recommended: Prerequisite CVEN 5524 or CVEN 5534 or CVEN 5474.

Additional Information: Departmental Category: Environmental

CVEN 5444 (3) Municipal Des Proj

Additional Information: Departmental Category: Environmental

CVEN 5454 (3) Statistical Methods for Natural and Engineered Systems

Applies traditional and modern probability and statistical methods to environmental, hydrological, climatological and engineering data analysis. Topics include: basic probability, data visualization, fitting univariate and multivariate distributions, Monte Carlo simulations, extreme value distributions, confidence intervals and hypothesis testing, nonparametric density estimators, linear regression, and Bayesian analysis. The data analysis tool, R, is used throughout the course.

Additional Information: Departmental Category: Environmental

CVEN 5464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and EVEN 4464

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4474

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5484 (3) Applied Microbiology and Toxicology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484 and EVEN 4484

Additional Information: Departmental Category: Environmental

CVEN 5494 (3) Surface Water Quality Modeling

Examines the relationships among air, water, and land pollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions. Department consent required.

Additional Information: Departmental Category: Environmental

CVEN 5511 (3) Introduction to Finite Element Analysis

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4511

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 5514 (3) Bioremediation

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation.

Recommended: Prerequisite CVEN 4484 or CVEN 5424 or CVEN 5484.

Additional Information: Departmental Category: Environmental

CVEN 5524 (3) Drinking Water Treatment

Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies.

Recommended: Prerequisite CVEN 4464 or CVEN 5464 or graduate standing or instructor consent required.

Additional Information: Departmental Category: Environmental

CVEN 5525 (3) Matrix Structural Analysis

Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with Matlab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4525

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 5534 (3) Wastewater Treatment

Covers the processes used to treat municipal wastewater, focusing on biological processes. Includes: design of aerobic, anoxic, anaerobic and suspended growth technologies to remove and transform pollutants; design and assessment of treatment approaches that recover energy, nutrients and water from wastewater; application of fundamental concepts of aquatic chemistry, environmental microbiology and computational models.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 5404 and CVEN 5484 and CVEN 5464.

Additional Information: Departmental Category: Environmental

CVEN 5537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4537

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5544 (3) Solid Waste Management and Resource Recovery

Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste.

Recommended: Prerequisite CVEN 3414.

Additional Information: Departmental Category: Environmental

CVEN 5554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Required for CVEN environmental engineering graduate students.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4554

Additional Information: Departmental Category: Environmental

CVEN 5555 (3) Structural Reliability

Explores principles and methods of structural reliability, and formulates bases for design to insure adequate safety and performance of elements and structural systems. Undergraduates may enroll with the permission of the instructor.

Requisites: Requires prerequisite course of CVEN 5525 (minimum grade of C-). Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 5564 (3) Water Profession: Leadership & Communication

Develops and improves the skills and tools needed for graduate students and young professionals. Focusing on highly effective leaders; leadership with impact; effective communication tools; and communicating with teams, city councils, governing boards, and the public.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

CVEN 5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems

Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Undergraduates may enroll with the permission of the instructor.

Recommended: Prerequisite CVEN 3227 or equivalent.

Additional Information: Departmental Category: Structures

CVEN 5574 (3) Water Utility Management: Current Issues and Future Challenges

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on management, leadership, communication and utility financial in the new water profession era. Undergraduate seniors may contact instructor for permission to enroll.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5575 (3) Advanced Topics in Steel Design

Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Undergraduate may enroll with permission of the instructor.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CVEN 4545.

Additional Information: Departmental Category: Structures

CVEN 5584 (3) Water Profession: Financial and Management

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on financing water services, capital planning, rates, management planning, staffing and organization and critical thinking. Undergraduates may request instructor permission to enroll.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5585 (3) Advanced Topics in Reinforced Concrete Design

Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Undergraduates may enroll with the permission of the instructor.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CVEN 4555.

Additional Information: Departmental Category: Structures

CVEN 5594 (3) Water Reuse and Reclamation

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4594

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3141 and CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 5604 (3) UV Processes in Environmental and Engineered Systems

Provides a fundamental basis for design of UV processes in water and wastewater treatment. Includes principles of photochemistry and photobiology. Applications to disinfection of water and degradation of chemical compounds in the environment. Design of UV disinfection systems and reactors and advanced oxidation processes. Environmental UV-based decay of pollutants.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3414 and CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 5614 (3) Bioenergy & Bioresource Recovery

Introduces fundamental theories and applied technologies used in production and conversion of renewable biomass including waste materials into bioenergy and other value-added products. Conducts quantitative evaluations on conversion processes such as renewable biogas production, electricity generation, liquid fuels, metal and nutrients recovery and organic chemical production.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CVEN 4484.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

CVEN 5628 (3) Seepage and Slopes

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems.

Recommended: Prerequisites CVEN 3708 and CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5678 (3) Soil Improvement and Reinforcement

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5688 (3) Environmental Geotechnics

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

Additional Information: Departmental Category: Geotechnical

CVEN 5708 (3) Soil Mechanics

Offers an advanced course in soil mechanics. Coverage includes basic principles of continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geotechnical

CVEN 5718 (3) Mechanics and Dynamics of Glaciers

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4718

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geotechnical

CVEN 5728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4728

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geotechnical

CVEN 5738 (3) Applied Geotechnical Analysis

Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures.

Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 5748 (3) Design of Earth Structures

Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems.

Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 5758 (3) Flow Processes in Soils

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5768 (3) Introduction to Rock Mechanics

Nature of rocks and rock masses; engineering properties rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations.

Recommended: Prerequisites CVEN 3708 and CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5788 (3) Computational Modeling in Geotechnical Engineering

Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis.

Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 5798 (3) Dynamics of Soils and Foundations

Covers fundamental characterization of soils, foundations and structures under general dynamic and earthquake loads. Principles of vibrations and wave propagation for 1D, 2D, 3D. In-situ and laboratory determination of dynamic soil properties; methods for site response analysis, foundation vibrations, dynamic soil-structure interaction and liquefaction problems.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5818 (3) Geotechnical Earthquake Engineering

Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CVEN 5798.

Additional Information: Departmental Category: Geotechnical

CVEN 5822 (3) Geographical Information Systems for Civil and Environmental Systems

Theory and use of geographical information systems in civil engineering, environmental studies, natural resources and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 5830 (3) Special Topics for Seniors/Grads

Department consent required.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Building Systems

CVEN 5831 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 5833 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5834 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5835 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 5836 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Construction

CVEN 5837 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Additional Information: Departmental Category: Miscellaneous

CVEN 5838 (3) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Geotechnical

CVEN 5849 (1-3) Independent Study

Available only through approval of graduate advisor. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 5919 (3) Sustainable Community Development 1

Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects.

Requisites: Restricted to students with sub-plan of Engineering Developing Communities (EDC).

Additional Information: Departmental Category: Special Topics

CVEN 5929 (3) Sustainable Community Development 2

Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development.

Requisites: Requires prerequisite course of CVEN 5919 (minimum grade C-). Restricted to students with EDC Sub-Plan.

Additional Information: Departmental Category: Special Topics

CVEN 5939 (3) Sustainable Community Development Field Practicum

Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in CVEN 5919 and CVEN 5929.

Requisites: Requires prerequisites courses of CVEN 5919 and CVEN 5929 (all minimum grade C-). Restricted to students with sub-plan of Engineering Developing Communities (EDC).

Additional Information: Departmental Category: Miscellaneous

CVEN 5969 (1-3) Water, Sanitation, and Hygiene

Studies the fundamentals behind effective hygiene and remediation processes and engineering solutions developed/ designed for specific international problems. Approaches to hygiene, clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3424 and CVEN 3414.

Additional Information: Departmental Category: Environmental

CVEN 6161 (3) Advanced Mechanics of Materials 2

Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques.

Recommended: Prerequisite CVEN 5161.

Additional Information: Departmental Category: Mechanics

CVEN 6323 (3) Urban Stormwater Infrastructure Systems

Evaluation and design of more sustainable urban stormwater infrastructure systems including street inlets, on-line and off-line surface storage and infiltration systems. Integrated design for major, minor, and micro storms to provide flood control and drainage as well as control of pollution from stormwater runoff. Simulation and optimization models will be used.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology

Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization.

Requisites: Requires a prerequisite course of CVEN 5333 (minimum grade C-).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6383 (3) Flow and Transport through Porous Media

Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar

Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers.

Requisites: Restricted to graduate student Civil (CVEN) Engineering students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6414 (3) Aquatic Surfaces and Particles

Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics.

Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media

Covers constitutive modeling, multiphase mechanics, and finite element implementation of constitutive models and coupled solid-fluid mechanical governing equations for inelastic porous media at small strain. Considers transient and steady state conditions. Analyzes structural, geotechnical, geological, mechanical, biomechanical, and other related modern engineering problems. Uses general purpose finite element software program for implementation and analysis.

Additional Information: Departmental Category: Mechanics

CVEN 6525 (3) Nonlinear Analysis of Framed Structures

Explores theoretical underpinnings of nonlinear static and dynamic analysis of framed structures, along with exposure to the corresponding programming techniques in Matlab. Topics covered are: flexibility and fiber based beam-column element formulation; structural, section and fiber plasticity; geometric and material nonlinearities; nonlinear pushover and transient analysis of framed structures.

Requisites: Requires prerequisite course of CVEN 5525 (minimum grade of C-). Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 6595 (3) Earthquake Engineering

Analyzes and designs structures for earthquake load covering: properties of earthquake ground motions, ground motion prediction equations, seismic hazard analysis, response spectra, response of linear and nonlinear structures, construction of design spectra, seismic design methods, and building code requirements.

Requisites: Requires prerequisite course of CVEN 5111 (minimum grade of C-). Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 6830 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Building Systems

CVEN 6831 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 6832 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 6833 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6834 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Environmental

CVEN 6835 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Structures

CVEN 6836 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Construction

CVEN 6837 (3) Sp Tpcs Comp Graphics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Miscellaneous

CVEN 6838 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Geotechnical

CVEN 6839 (1-3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Topics

CVEN 6943 (1) Master's Degree Cand

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6944 (1) Master's Degree Cand

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Environmental

CVEN 6945 (1) Master's Degree Cand

Grading Basis: Pass/Fail

CVEN 6967 (1-3) Master's Report

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Miscellaneous

CVEN 6968 (1-3) Master's Report

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Geotechnical

CVEN 6969 (1-3) Masters Report

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Topics

CVEN 7111 (3) Advanced Structural Dynamics

Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads.

Requisites: Requires prerequisite course of CVEN 5111 (minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 7141 (3) Plates and Shells

Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings.

Requisites: Requires prerequisite courses of CVEN 5131 or CVEN 5161 (minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 7161 (3) Fracture Mechanics

Includes three parts: 1) fundamentals through rigorous mathematical formulations of linear/nonlinear elastic fracture mechanics, 2) materials' theoretical strength, including metals, granular materials, polymers and steel, 3) numerical (finite element) methods in fracture mechanics. Heavy emphasis on project and independent work.

Requisites: Requires prerequisite courses of CVEN 5511 and CVEN 6161 (all minimum grade of C-).

Additional Information: Departmental Category: Mechanics

CVEN 7206 (1) CEM PhD Seminar

Provides an overview of the research process and research methods in construction engineering and management. Students will study and evaluate different research methods and designs in an aim to prepare students to conduct and evaluate research. Taught intermittently.

Additional Information: Departmental Category: Construction

CVEN 7511 (3) Computational Finite Inelasticity and Multiphase Mechanics

Covers kinematics, thermodynamics, coupled balance equations and constitutive models, numerical time integration, and finite element implementation of finite strain inelasticity and multiphase mechanics. Kinematics of multiplicative decomposition, and finite strain mixture theory. Linearization for global nonlinear Newton-Raphson and solution algorithm of nonlinear constitutive models and coupled balance equations.

Recommended: Prerequisites CVEN 5131 and CVEN 5511 and CVEN 6511.

Additional Information: Departmental Category: Mechanics

CVEN 7718 (3) Engineering Properties of Soils

Emphasizes engineering aspects of soil mechanics. Implications of soil strength, volume change, consolidation behavior in engineering problems such as slope stability, deformation of retaining walls, surface subsidence due to tunneling. Time effects in soil/long-term bearing capacity of piles. Laboratory determination of constitutive parameters of soils. Field tests/their correlations with soil properties. Case studies using finite element software.

Requisites: Requires prerequisite course of CVEN 5708 (minimum grade of C-).

Additional Information: Departmental Category: Geotechnical

CVEN 7788 (3) Soil Behavior

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 7831 (1-3) Sp Tpc-Constitutive Mech

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Mechanics

CVEN 7838 (3) Special Topics

Additional Information: Departmental Category: Geotechnical

CVEN 7849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Topics

CVEN 8849 (3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Topics

Classical Greek Language (GREK)

Courses

GREK 1013 (4) Beginning Classical Greek 1

For students with no previous knowledge of Greek. Introduces basic grammar and vocabulary.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Greek

GREK 1023 (4) Beginning Classical Greek 2

Completes the presentation of grammar and introduces reading of literature.

Recommended: Prerequisite GREK 1013.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Greek

GREK 3013 (1) Readings in the Greek New Testament and Septuagint

Readings in ancient (koine) Greek from the New Testament and the Septuagint. Students aim to achieve fluency in reading and to enrich their knowledge of key terms and ideas borrowed from the Greek past in the early Christian tradition. Formerly CLAS 3013.

Repeatable: Repeatable for up to 4.00 total credit hours.

Recommended: Prerequisites GREK 1013 and GREK 1023.

Additional Information: Departmental Category: Greek

GREK 3113 (3) Intermediate Classical Greek 1

Reading of selected prose texts of authors in ancient Greek such as Plato, Xenophon, Lysias, and selections from the Greek New Testament. Incorporates review of grammar.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites GREK 1013 and GREK 1023.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Greek

GREK 3123 (3) Intermediate Classical Greek 2

Reading of selections from Homer or a Greek tragedy in ancient Greek, with attention to literary form and context as well as advanced grammar and syntax.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites GREK 1013 and GREK 1023 and GREK 3113.

Additional Information: Departmental Category: Greek

GREK 4013 (3) Topics in Greek Prose

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).

Equivalent - Duplicate Degree Credit Not Granted: GREK 5013

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Greek

GREK 4023 (3) Topics in Greek Poetry

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).

Equivalent - Duplicate Degree Credit Not Granted: GREK 5023

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Greek

GREK 4093 (3) Survey of Greek Literature

Greek literary history in ancient Greek from Homer to the Hellenistic age.

Equivalent - Duplicate Degree Credit Not Granted: GREK 5093

Recommended: Prerequisites GREK 3113 and GREK 3123.

Additional Information: Departmental Category: Greek

GREK 4843 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Greek

GREK 5013 (3) Topics in Greek Prose

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).

Equivalent - Duplicate Degree Credit Not Granted: GREK 4013

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 5023 (3) Topics in Greek Poetry

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).

Equivalent - Duplicate Degree Credit Not Granted: GREK 4023

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 5093 (3) Survey of Greek Literature

Greek literary history in ancient Greek from Homer to the Hellenistic age.

Equivalent - Duplicate Degree Credit Not Granted: GREK 4093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 6003 (3) Graduate Reading

Author or topic specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 6843 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 7013 (3) Graduate Seminar in Greek Literature

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

Classics (CLAS)

Courses

CLAS 1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: LING 1010

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 1020 (3) Argument from Evidence: Critical Writing about the Ancient World

Introduces students to writing about the ancient world, with special attention to the possibilities and the limitations of ancient source-material. Taught as a writing workshop, with emphasis on critical thinking, analysis, argument and inquiry. While the course reads foundational ancient texts, the skills acquired will be broadly useful among humanities disciplines.

Additional Information: Arts Sci Core Curr: Written Communication

Departmental Category: Literature, Culture, and Thought

MAPS Course: English

CLAS 1030 (3) Introduction to Western Philosophy: Ancient

Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 1010

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Literature, Culture, and Thought

CLAS 1051 (3) The World of the Ancient Greeks

Surveys of the emergence, major accomplishments, failures and the decline of the ancient Greeks, from the Bronze Age civilizations of the Minoans and Mycenaeans through the Hellenistic Age (2000-30 B.C.). No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1051

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Ancient History

CLAS 1061 (3) The Rise and Fall of Ancient Rome

Surveys the rise of ancient Rome in the eighth century B.C. to its fall in the fifth century A.D. Emphasizes political institutions, foreign policy, leading personalities, and unique cultural accomplishments. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1061

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Ancient History

CLAS 1071 (3) Ancient Sport and Spectacle

Surveys the development, evolution and impact of sport and spectacle in the Greco-Roman world through the deconstruction of games during the Christian era of the Roman Empire. Examines, among other relevant topics, games in the Homeric tradition, the development of the Greek Olympics and Roman spectacles including the circus, amphitheaters and gladiators.

CLAS 1100 (3) Greek Mythology

Covers the Greek myths as documents of early human religious experience and imagination, the source of Greek culture, and part of the fabric of Western cultural tradition. Of particular interest to students of literature and the arts, psychology, anthropology, and history. No Greek or Latin required.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 1110 (3) Gods, Monsters and Mortals: Literature of Ancient Greece

Read about mythological heroes and historical individuals from Achilles to Socrates. Explore why Greek authors told stories the way they did and what those stories might have meant to them and might mean to us. Ancient texts in English translation.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 1115 (3) Masterpieces of Greek Literature in Translation

Students read about mythological heroes and historical individuals from Achilles to Socrates in Greek literature. Class discusses why the Greeks told stories the way they did and what those stories might have meant to them and might mean to us.

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Honors

CLAS 1120 (3) Power and Passion in Ancient Rome

Read about mythological heroes and historical individuals from Romulus to Catiline and the emperors Augustus and Nero. Explore why Roman authors told stories the way they did and what those stories might have meant and might mean to us. Ancient texts in English translation.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 1140 (3) Bread and Circuses: Society and Culture in the Roman World

Surveys the outstanding achievements of Roman culture and society as reflected in literature; philosophy and art; private and official religion; and legal and political thought. No Greek or Latin required.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Historical Context
Departmental Category: Literature, Culture, and Thought

CLAS 1509 (4) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 1509
Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.
Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art and Archaeology

CLAS 2020 (3) Science in the Ancient World

Covers the development of scientific modes of thought, theory, and research from mythological origins (e.g., Hesiod's poetry) through pre-Socratic philosophers. Culminates in theories and research of Plato and Aristotle, including the Roman Empire. Students read original sources in translation. No Greek or Latin required.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 2029 (3) Art and Archaeology of Ancient Egypt

Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 2029

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Art and Archaeology

CLAS 2039 (3) Greek Art and Archaeology

Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture. Formerly CLAS 3039.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 2039

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art and Archaeology

CLAS 2041 (3) War and Society in Ancient Greece

Studies Greek warfare in its cultural, social and economic contexts, in the light of anthropological comparisons and modern theories. No Greek or Latin required.

Additional Information: Departmental Category: Ancient History

CLAS 2049 (3) Introduction to Roman Art and Architecture

Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces. Formerly CLAS 3049.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 2049

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Art and Archaeology

CLAS 2100 (3) Gender and Sexuality in Ancient Greece

Examines evidence of art, archaeology, and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature, and daily life. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2100

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Literature, Culture, and Thought

CLAS 2110 (3) Gender and Sexuality in Ancient Rome

Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2110

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Human Diversity
Departmental Category: Literature, Culture, and Thought

CLAS 2610 (3) Paganism to Christianity

Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2614

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Literature, Culture, and Thought

CLAS 3009 (3) Modern Issues, Ancient Times

Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life. Formerly CLAS 2009.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 3009

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Art and Archaeology

CLAS 3019 (3) Pompeii and the Cities of Vesuvius

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 3019

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Art and Archaeology

CLAS 3400 (3) Special Topics in Classics

Topics in Greek, Latin or Classical civilization.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5021 and HIST 4021

Additional Information: Departmental Category: Ancient History

CLAS 4031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5031 and HIST 4031

Recommended: Prerequisite one of the following CLAS 1051, 1509, 2041, 2039, 4021, 4041, 4139, 4149, GREK 3113, HIST 1051, 4021, 4041.

Additional Information: Departmental Category: Ancient History

CLAS 4040 (3) Seminar in Classical Antiquity

Examines an advanced topic in classical language, literature, history, philosophy, art, or culture. Combines the techniques of philology with a critical approach to the literary and material legacy of the past.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Requisite second-year proficiency in Greek or Latin.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5041 and HIST 4041 and PHIL 4210

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite CLAS 1051 or CLAS 1061 or HIST 1011 or HIST 1051 or HIST 1061 or PSCI 2004 or PHIL 3000.

Additional Information: Departmental Category: Ancient History

CLAS 4061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5061 and HIST 4061 and HIST 5061

Additional Information: Departmental Category: Ancient History

CLAS 4071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5071 and HIST 4071

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Ancient History

CLAS 4081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5081 and HIST 4081

Additional Information: Departmental Category: Ancient History

CLAS 4091 (3) The Roman Empire

Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5091 and HIST 4091

Additional Information: Departmental Category: Ancient History

CLAS 4109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous course work on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and ARTH 4109 and ARTH 5109

Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

Additional Information: Departmental Category: Art and Archaeology

CLAS 4110 (3) Greek and Roman Epic

Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5110 and HUMN 4110

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 4119 (3) Roman Sculpture

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5119 and ARTH 4119 and ARTH 5119

Additional Information: Departmental Category: Art and Archaeology

CLAS 4120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5120 and HUMN 4120

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 4129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5129 and ANTH 4129 and ANTH 5129 and ARTH 4129

Additional Information: Departmental Category: Art and Archaeology

CLAS 4130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5130 and HUMN 4130

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Literature, Culture, and Thought

CLAS 4139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5139 and ARTH 4139 and ARTH 5139

Additional Information: Departmental Category: Art and Archaeology

CLAS 4140 (3) The Greek and Roman Novel

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5140 and HUMN 4131

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5149 and ARTH 4149

Additional Information: Departmental Category: Art and Archaeology

CLAS 4169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture.

Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5169 and ARTH 4169 and ARTH 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art and Archaeology

CLAS 4199 (3) Roman Architecture

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures, including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5199 and ARTH 4199

Additional Information: Departmental Category: Art and Archaeology

CLAS 4209 (6) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4209 and CLAS 5209

Recommended: Prerequisites CLAS 1509 or ARTH 1509 or ARTH 2039 and ARTH 2049.

Additional Information: Departmental Category: Art and Archaeology

CLAS 4229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5229 and ARTH 4229 and ARTH 5229

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Art and Archaeology

CLAS 4269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5269 and ARTH 4269 and ARTH 5269

Recommended: Prerequisite CLAS 1509 or ARTH 1509.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Art and Archaeology

Departmental Category: Asia Content

CLAS 4761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5761 and HIST 4761 and HIST 5761

Additional Information: Departmental Category: Ancient History

CLAS 4840 (1-4) Independent Study

No Greek or Latin required.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 4849 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Art and Archaeology

CLAS 4852 (1-6) Honors Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sciences Honors Course
Departmental Category: Classical Philology

CLAS 5021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and HIST 4021

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and HIST 4031

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and HIST 4041 and PHIL 4210

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4061 and HIST 4061 and HIST 5061

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and HIST 4071

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and HIST 4081

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5091 (3) The Roman Empire

Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and HIST 4091

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4109 and ARTH 4109 and ARTH 5109

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5110 (3) Greek and Roman Epic

Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and HUMN 4110

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5119 (3) Roman Sculpture

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4119 and ARTH 4119 and ARTH 5119

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and HUMN 4120

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4129 and ANTH 4129 and ANTH 5129 and ARTH 4129

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and HUMN 4130

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4139 and ARTH 4139 and ARTH 5139

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5140 (3) The Greek and Roman Novel

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and HUMN 4131

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and ARTH 4149

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5159 (3) Hellenistic Art and Archaeology

Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5159

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture.

Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and ARTH 4169 and ARTH 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5179 (3) City of Athens

Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periclean period, considering ways in which it developed from earlier times and influenced later ones in Athens.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5179

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5189 (3) City of Rome

Explores in detail the architecture, sculptures, coins, frescoes and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5189

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5199 (3) Roman Architecture

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and ARTH 4199

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5209 (6) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and ARTH 4209

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4229 and ARTH 4229 and ARTH 5229

Additional Information: Departmental Category: Art and Archaeology

CLAS 5269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4269 and CLAS 4269 and ARTH 5269

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology
Departmental Category: Asia Content

CLAS 5761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4761 and HIST 4761 and HIST 5761

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5840 (1-3) Graduate Independent Study

No Greek or Latin required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 6109 (3) Topics in Critical Theory and Ancient Art and Archaeology

Topics will vary and may focus on a particular approach to ancient material culture or on a particular time period or artifact category. Emphasis is placed on reading and using theory in considering the ancient world.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 6119 (1-3) Graduate Independent Study in Classical Art and Archaeology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 6952 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Classical Philology

CLAS 7011 (3) Seminar in Ancient History

Examines topics in ancient Greek and Roman history at an advanced seminar level.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 7012 (3) Graduate Seminar

Topic specified in online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Classical Philology

CLAS 7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology

Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 7840 (1-3) Graduate Independent Study

No Greek or Latin required.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 8992 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Additional Information: Departmental Category: Classical Philology

College of Engineering and Applied Science Admin (COEN)

Courses

COEN 1236 (1) Precalculus Work Group

Develops and enhances problem solving skills for students enrolled in APPM 1235. Course is conducted in a collaborative learning environment with students working in groups under the guide of a facilitator.

Requisites: Requires enrollment in corequisite course of APPM 1235.

Grading Basis: Pass/Fail

COEN 1350 (1) Calculus 1 Work Group

Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Requires enrollment in corequisite course of APPM 1350 or APPM 1345.

Grading Basis: Pass/Fail

COEN 1360 (1) Calculus 2 Work Group

Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator.

Requisites: Requires enrollment in corequisite course of APPM 1360.

Grading Basis: Pass/Fail

COEN 1400 (3) Project Design

Teams of first-year students solve real engineering design problems. Curriculum focuses on iterative design process, teamwork and team dynamics, supporting design with testing and analysis and technical writing.

Requisites: Restricted to students with 0-75 units completed and restricted to Pre-Engineering (PREN-COS) students only.

COEN 1500 (1) Introduction to Engineering

Provides an introduction to the engineering profession, including an examination of current discipline specializations and a focus on career paths for those trained in engineering. Provides sufficient knowledge of the engineering disciplines necessary to make an informed major choice.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering or Pre-Engineering Arts and Sciences majors only.

COEN 1510 (1) Self Management and Leadership Principles 1

Prepares freshmen in their transition to college. Focuses on academic success strategies, time and stress management, study skills, and S.M.A.R.T. goal setting. Students identify their strengths and participate in peer-to-peer interaction to foster collaboration and positive behavior. Leadership capabilities, professional development, and insights into career interests are explored. Speakers provide students with unique insights into being successful students and engineers.

Requisites: Restricted to Engineering Goldshirt (PENG) students only.

COEN 1520 (1) Self Management and Leadership Principles 2

Continuation of COEN 1510. Self-management and student development is reiterated. Includes time and stress management, study skills and S.M.A.R.T. goal setting for the "master" student. Leadership explored through group projects. Students complete professional development activities and assignments geared toward preparing students for engineering internships and research opportunities. Advising on different engineering department provided to support major selection and course scheduling.

Requisites: Requires prerequisite course of COEN 1510 (minimum grade C-). Restricted to Engineering Goldshirt (PENG) students only.

COEN 1550 (1) YOU'RE@CU: Undergraduate Career Seminar

Exposes first or second year undergraduate students to engineering research careers through a partner program (YOU'RE@CU), panel discussions with researchers in academics and industry, and exposure to research labs. Restricted to YOU'RE@CU participants. Department consent required.

Grading Basis: Pass/Fail

COEN 2050 (3) Engineering Leadership Gateway

Examines concepts of engineering leadership and the essential skills required to become an effective leader. Together students will explore leadership principles, creative and critical thinking, interpersonal skills (e.g. collaboration, conflict resolution, leading in diverse communities), intrapersonal development (e.g. self-appraisal, reflective practice, personal leadership philosophy), organizational competencies (e.g. planning, sustainability, climate), effective communication and ethical decision-making. Fulfills Engineering humanities/social science requirements.

Requisites: Restricted to Engineering Leadership Program (PENL) students only.

COEN 2350 (1) Calculus 3 Work Group

Provides problem solving assistance to students enrolled in APPM 2350. Conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator.

Requisites: Requires enrollment in corequisite course of APPM 2350.

Grading Basis: Pass/Fail

COEN 2500 (1) Industry 101: Technical Career and Professional Development

Connects students to the world of technical work, helping them gain an understanding of themselves and develop a unique, professional identity. Knowledge will be gained about how to research various industries and how to make an informed decision about career paths. Structured lessons will be incorporated that will cover resumes, interview preparation, communication skills, proper professional etiquette and employer expectations, self-exploration and connections with industries.

Grading Basis: Letter Grade

COEN 2830 (1-3) Special Topics

Explores topics of interest in engineering. Content varies by instructor and semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 2850 (1-3) Independent Study

Provides opportunities for independent study at the lower-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 3050 (3) Complex Leadership Challenges

Approaches leadership as a process of inquiry, empathy, and action, cultivating skills leaders need to understand, communicate about, and generate innovative approaches to complex issues. Each student conducts extensive, principled research about a complex social issue of their choice, investigating its multidimensionality by applying different analytic lenses. Instructor consent required for students not in Engineering Leadership.

Requisites: Restricted to Engineering Leadership Program (PENL) students only.

Grading Basis: Letter Grade

COEN 3051 (1) Leadership Seminar 1: Launching the Leadership Experience

Practicing needs assessment, decision-making and planning skills, students take this seminar to prepare for their Leadership Experience (required for completion of the Engineering Leadership Certificate). Students work in collaboration with each other, their Engineering Leadership Program mentors and campus/community organizations and leaders to lay the foundation for and launch their individually unique Leadership Experiences.

Requisites: Requires a prerequisite course of COEN 2050 (minimum grade C-). Restricted to Engineering Leadership Program (PENL) students only.

Grading Basis: Letter Grade

COEN 3052 (1) Leadership Seminar 2: Leadership Experience

Tackling a leadership experience of their own design, students undertake a key component of the Engineering Leadership Program experience and a requirement for the completion of the Engineering Leadership Certificate. Guides students through a process of planning, executing and evaluating their leadership experience and progress toward personalized leadership development goals. Coursework involves working with a mentor, collaborating with peers and conducting research.

Requisites: Requires a prerequisite course of COEN 2050 (minimum grade D-). Restricted to Engineering Leadership Program (PENL) students only.

Grading Basis: Letter Grade

COEN 3053 (1) Leadership Seminar 3: ELP Synthesis and Final ePortfolio

Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.

Requisites: Restricted to Engineering Leadership Program (PENL) students only.

Grading Basis: Letter Grade

COEN 3930 (6) Engineering Co-op

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. Offered only through Continuing Education. 00 GPA or higher.

Repeatable: Repeatable for up to 24.00 total credit hours.

Requisites: At least a 2.75 cumulative GPA is required. Restricted to College of Engineering majors only.

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

COEN 4830 (1-3) Special Topics

Explores topics of interest in engineering. Content varies by instructor and semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 4850 (1-3) Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 4950 (1-6) Global Engineering Internship

Gives students the opportunity to pursue studies in engineering-related work experience projects abroad that allow them to explore the relationship between theory and practice in their major. Internships generally require 40 hours on the job per credit hour and evidence of significant learning (e.g., paper, final project and employer evaluations). Does not count toward degree requirements.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

College of Media, Communication, & Information (CMCI)

Courses

CMCI 1000 (1-3) Special Introductory Topics in CMCI

Investigates special introductory topics in media, communication and information.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

CMCI 1010 (4) Concepts and Creativity 1: Media, Communication, Information

Engages key principles and practices in the fields of media, communication and information. Emphasizes the analyses of new and old media, information technologies, verbal and visual literacies, communicative interactions and cultural practices through process-based learning and hands-on projects utilizing multiple modes of expression. Two semester sequence required for all CMCI students; 4 credit hours each semester.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) undergraduate students only.

CMCI 1020 (4) Concepts and Creativity 2: Media, Communication, Information

Engages key principles and practices in the fields of media, communication and information. Emphasizes the analyses of new and old media, information technologies, verbal and visual literacies, communicative interactions and cultural practices through process-based learning and hands-on projects utilizing multiple modes of expression. Two semester sequence required for all CMCI students; 4 credit hours each semester.

Requisites: Requires prerequisite course of CMCI 1010 (minimum grade C-). Restricted to College of Media, Communication, and Information (CMCI) undergraduate students only.

CMCI 1030 (4) CMCI: Concepts and Culture

Engages key principles and practices in the fields of media, communication and information. Emphasizes the analyses of new and old media, information technologies, verbal and visual literacies, communicative interactions and cultural practices through process-based learning and hands-on projects utilizing multiple modes of expression. Accelerated, one-semester version of the introductory CMCI course for transfer students to CMCI.

Grading Basis: Letter Grade

CMCI 3000 (1-3) Special Topics in CMCI

Investigates special topics in media, communication and information at the upper-division level.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

CMCI 4841 (1-4) Undergraduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

CMCI 4931 (1-6) Internship

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

CMCI 6051 (3) Media Theories

Studies theories and perspectives of mass and networked communication and explores the role of media in society.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

CMCI 6061 (3) Media Research

Introduces concepts, theoretical approaches and research methods of media research. Students apply these frameworks in research on mediated communication. Covers qualitative and quantitative methods of gathering and analyzing data.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

CMCI 6311 (3) Freedom of Expression

Studies free-speech issues in the context of current and historical philosophical foundations for freedom of expression.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

CMCI 6331 (3) Political Communication

Explores the relationships involving media and politics. Incorporates normative and empirical perspectives on the media-politics complex. Areas covered include media effects on public opinion and policy, uses of media in governance, journalism sociology, coverage of elections, and implications of interactive media for governance and civic participation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

CMCI 6661 (3) Media Ethics and Responsibility

Develops a theoretical framework with which to recognize and analyze ethical issues as they arise in the media.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

CMCI 6861 (3) Visual Communication

Visual communication involves understanding both perception of messages and construction of them. Students analyze their visual thinking abilities and develop habits of visual analysis and criticism, as well as visual communication skills.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

CMCI 6871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMCI 7841 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMCI 7871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMCI 8991 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 40.00 total credit hours.

Requisites: Restricted to graduate students only.

Communication (COMM)

Courses

COMM 1210 (3) Perspectives on Human Communication

Surveys communication in a variety of contexts and applications.

Topics include basic concepts and general models of communication, ethics, language and nonverbal communication, personal relationships, group decision making, organizational communication, and impact of technological developments on communication. Required for COMM majors.

Additional Information: Arts Sci Core Curr: Contemporary Societies
MAPS Course: Social Science

COMM 1300 (3) Public Speaking

Covers theory and skills of speaking in various public settings. Examines fundamental principles from rhetorical and communication theory and applies them to oral presentations. Required for COMM or COMN majors.

COMM 1600 (3) Group Interaction

Covers basic theories, concepts, and characteristics that underlie face-to-face interactions in interpersonal, small group, and organizational settings. Activities stress the development of both task and relational skills in these settings. Required for COMM or COMN majors.

COMM 2000 (3) Topics in Communication

Investigates select topics in communication. Does not count toward the 2000-level courses required for the major, unless explicitly stated in the course schedule.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2360 (3) Campaigns and Revolutions

Introduces concepts in rhetoric and argumentation that are used to explain significant social and political changes in our society. The goal is to show how social actors use rhetoric to promote some social goals and hinder others.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2400 (3) Discourse, Culture and Identities

Examines how aspects of talk (e.g., turn-taking, speech acts, narratives, dialect, and stance indicators) link with identities (e.g., ethnic and racial, age, gender, work-related, and personal). Considers how communication is central to constructing who people are and examines social controversies related to talk and identities.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

COMM 2500 (3) Interpersonal Communication

Focuses on basic processes in face-to-face interaction, including verbal and nonverbal messages, coordination in conversation, messages about self and others, and communication in personal relationships. Emphasizes theory and concepts rather than skills.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 2600 (3) Organizational Communication

Provides a communicatively based definition of formal organization and deals with individual-organizational relationships. Addresses topics such as organizational theory, organizational culture, power, technology, decision making, teamwork, leadership, diversity, gender, socialization, and ethics.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3000 (3) Issues in Communication

Explores select issues in communication.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3210 (3) Human Communication Theory

Acquaints students with general, thematic, and contextual theories of human communication. Gives attention to criteria for evaluating theories.

Requisites: Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

COMM 3300 (3) Rhetorical Foundations of Communication

Provides the rhetorical foundations of communication through study of the humanistic traditions of rhetorical theory, with applications to social interaction and message analysis.

Requisites: Requires prerequisite courses of COMM 1210 and COMM 1600 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

COMM 3310 (3) Principles and Practices of Argumentation

Focuses on principles of argument, the process of critical decision making, and uses and limitations of logic and evidence. Contemporary issues (personal, social, political, or philosophical) are analyzed and debated.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3320 (3) Persuasion in Society

Explores how persuasion influences decision making. Focuses on different definitions and models of persuasion, ethical perspectives on persuasion, qualitative and quantitative research on persuasion, and the tools of motivation, as well as how to create effective and ethical persuasive messages.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3340 (3) Political Communication

Provides an overview of the role of communication in contemporary political life. Topics include political communication theories, political campaign communication, media and political communication, and the role of political communication in promoting democracy and public policy.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3370 (3) Environmental Communication

Introduces the growing field of environmental communication, including historical events, key concepts, legal landmarks, technological developments and public controversies at the intersection of the environment, economics and social justice. Focuses on persuasive communication in the public sphere, as well as the constitutive power of communication to name and redefine what has been and might become possible in our environmental imaginations.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

COMM 3410 (3) Intercultural Communication

Explores complex relationships between culture and communication processes from various conceptual perspectives, such as social, psychological, interpretive, and critical. Considers the important role of context (e.g., social, historical, and cultural) in intercultural interactions.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

Additional Information: Arts Sci Core Curr: Human Diversity

COMM 3420 (3) Gender and Communication

Examines gender as a social practice that remains vital to identities, relationships, and institutions in contemporary society. Treats gender as something we do or enact through communication, rather than as something we are or have, and explores the implications of this shift in perspective. Investigates how gender interacts with sexuality, race, class, nation, age, ability, and other aspects of identity.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

COMM 3510 (3) Family Communication

Explores communication in families from various theoretical perspectives, such as social constructionism, systems theory, and dialectical theory. Communication patterns and processes created and sustained by family members are examined, including rules, roles, stories, rituals, myths, metaphors, themes, and cycles.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3610 (3) Communication, Technology, and Society

Presents theory, research, and exploration into computer-based technologies; studies implications for communication, interaction, and social relationships.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3700 (3) Communication and Conflict Management

Examines interdisciplinary concepts and theories enabling students to better understand different types of conflict, sources of conflict, and communication patterns that serve to create, maintain and transform conflict. Teaches practical skills in conflict management areas such as bargaining, facilitation, mediation and negotiation.

Equivalent - Duplicate Degree Credit Not Granted: PACS 3700

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

COMM 3740 (3) Qualitative Communication Research Methods

Provides an understanding of methods associated with the study of communication in natural settings. Focuses on strategies of collecting, analyzing, and reporting qualitative data, including participant observation, in-depth interviewing, textual analysis, and ethnographic narrative.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3750 (3) Quantitative Research Methods

Introduces empirically oriented research methods in communication, critical review of the logic of social-scientific principles in communication, and analysis of quantitative data.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

Recommended: Prerequisites COMM 1210 and COMM 1600.

COMM 3760 (3) Rhetorical Criticism

Applies key concepts from rhetorical theory to the analysis of specific speeches, written texts, and social situations within the humanistic tradition. Students read a variety of types of criticism and are encouraged to develop their own strategies for critical analysis.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors or minors only.

Recommended: Prerequisites COMM 1210 and COMM 1600 and COMM 3300.

COMM 4000 (1-6) Advanced Topics in Communication

Analyzes special interest areas of communication theory, research, and practice. Course format involves lecture, discussion, investigative analysis, and practical application. May be repeated twice for credit on different topics.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites COMM 3210 and COMM 3300.

COMM 4100 (3) Seminar in Honors Thesis Writing and Research

Provides the opportunity for students writing an honors thesis to develop their understanding of the research process and to improve their research and writing skills.

Requisites: Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

Additional Information: Arts Sciences Honors Course

COMM 4220 (3) Senior Seminar: Functions of Communication

Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.

Equivalent - Duplicate Degree Credit Not Granted: COMM 5220

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4300 (3) Senior Seminar: Rhetoric

Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.

Equivalent - Duplicate Degree Credit Not Granted: COMM 5300

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of COMM 3300 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4510 (3) Senior Seminar: Interpersonal Communication

Reviews current theory and research on topics such as strategic interaction, relationship formation and maintenance, and identity and self-presentation. May be taken twice for credit on different topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4600 (3) Senior Seminar: Organizational Communication

Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.

Equivalent - Duplicate Degree Credit Not Granted: COMM 5600

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4610 (3) Communication Studies of Science and Technology

Reviews current theory and research associated with science, technology, and medicine. Topics include new communication technologies in organizations and society, discourses of scientific theory and science policy, and interaction in clinical setting. May be taken twice for credit on different topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of COMM 3210 (minimum grade C-). Restricted to students with 80-180 credits (Senior) Communication (COMM or COMN) majors only.

COMM 4840 (1-6) Undergraduate Independent Study

Note that the 14-hour limit in the major applies to any combination of independent study and internship credit. This course does not count toward the 33 credit hours required for the major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only.

Recommended: Prerequisites COMM 3210 and COMM 3300.

COMM 4930 (1-6) Internship

Studies are pursued in communication-related work experience projects that generally require 40 hours on the job per credit hour and evidence (e.g., journal, paper and employer evaluation) of significant learning. The 14-hour limit in the major applies to any combination of independent study and internship credit and does not count toward the 33 hours required for the major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Communication (COMM or COMN) majors only.

Recommended: Prerequisite 57 hours of overall course work, 18 hours of communication course work completed, 2.50 overall GPA and a faculty sponsor.

Grading Basis: Pass/Fail

COMM 4950 (1-6) Senior Thesis: Honors

For exceptional communication majors who wish to graduate with department honors and receive credit for writing an honors thesis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite COMM 4100 and overall GPA of 3.35 or higher and a COMM or COMN GPA of 3.50 or higher.

Additional Information: Arts Sciences Honors Course

COMM 5210 (3) Readings in Communication Theory

Critical overview of leading theoretical traditions in communication studies. Gives attention to metatheoretical issues, including epistemological foundations, the structure of communication theory as a field, and reflexivity between communication theory and cultural practice. Required for doctoral students in communication; optional for master's students.

Requisites: Restricted to graduate students only.

COMM 5220 (3) Seminar: Functions of Communication

Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.

Equivalent - Duplicate Degree Credit Not Granted: COMM 4220

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 5225 (3) Environmental Communication

Investigates key concepts in environmental communication and considers which theoretical frameworks and practical actions can inform the effects of various constituents to address environmental issues.

COMM 5230 (3) Applied Communication

Examines the study of applications of communication concepts, theories, methods, interventions, and other practices to address real-world issues and problems. Discusses conceptual issues framing applied communication, examines purposes and methods informing such scholarship, and provides opportunity to evaluate and propose research.

Requisites: Restricted to graduate students only.

COMM 5300 (3) Seminar: Rhetoric

Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.

Equivalent - Duplicate Degree Credit Not Granted: COMM 4300

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 5310 (3) Contemporary Rhetorical Criticism

Advanced critical analysis of rhetorical texts in terms of how they shape issues and appeals for judgment, create identities for speakers and their audiences, and construct perceptions of time, space, and the human condition.

Requisites: Restricted to graduate students only.

COMM 5320 (3) Readings in Rhetoric

Survey of classical and contemporary readings in rhetoric. Required for doctoral students in communication; optional for master's students.

Requisites: Restricted to graduate students only.

COMM 5425 (3) Readings in Discourse and Social Practices

Examines the way communicators' discourse expressions (language, talk, interactional devices, semiotic practices, written texts) reflect and construct interpersonal exchanges, societal activities, and institutional scenes, as well as how discourse expression varies across different speech communities.

Requisites: Restricted to graduate students only.

COMM 5435 (3) Readings in Community and Social Interaction

Focuses on how everyday communication practices shape and are shaped by community contexts. Contains theoretical and empirical readings that illustrate how interactions among group members negotiate and maintain distinct communities and how group communication practices reflect shared norms among community members. Also reviews methods to study everyday interactions among community members (e.g., discourse analysis, qualitative coding, surveys and applied approaches/methods).

Grading Basis: Letter Grade

COMM 5600 (3) Seminar: Organizational Communication

Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.

Equivalent - Duplicate Degree Credit Not Granted: COMM 4600

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 5610 (3) Organizational Culture and Symbolism

Focuses on relationship between ideological elements (e.g., norms, values, and beliefs) and symbolic practices (e.g., metaphor, ritual, and storytelling) of organizational culture. Analyzes topics from viewpoints of academic theory and managerial practice. Reviews interpretive methods of researching workplace culture and symbolism.

Requisites: Restricted to graduate students only.

COMM 5620 (3) Readings in Organizational Communication

Survey of historical and contemporary readings in organizational communication. Treats theory, research, and application from a variety of perspectives.

Requisites: Restricted to graduate students only.

COMM 5720 (3) Readings in Communication and Technology

Survey of multidisciplinary research that examines various relationships between communication and technology. Students are encouraged to develop critical skills in perceiving assumptions and perspectives that motivate major theories in this area, and to examine how these phenomena have changed over time.

Requisites: Restricted to graduate students only.

COMM 5930 (1-6) Graduate Internship

Offers opportunities for graduate-level communication related work projects. Limited to 3 hours in spring and fall semesters, 6 hours in summer. The 6-hour limit at MA level and 9-hour limit at PhD level applies to any combination of independent study and internship credit.

Repeatable: Repeatable for up to 9.00 total credit hours.

COMM 6010 (3) Communication Research and Theory

Provides an introduction to graduate study of communication, offering an overview of the discipline and its scholarship. Required for MA and Ph.D. communication students.

Requisites: Restricted to Communication (COMM or COMN) graduate students only.

COMM 6020 (3) Quantitative Research Methods

Introduces students to the practice of quantitative research in communication: conceptualization and critique of research projects, measurements, methods (e.g., experimental and survey), statistical data analysis, and written reports.

Requisites: Restricted to graduate students only.

COMM 6030 (3) Qualitative Research Methods

Introduction to the epistemology, methodology, and representational practices associated with qualitative communication research. Fieldwork methods emphasized include participant observation, interviewing, and document/artifact analysis.

Requisites: Restricted to graduate students only.

COMM 6200 (3) Seminar: Selected Topics

Facilitates understanding of current and past theory and research on a selected topic in communication and the ability to develop new theory and research on that topic.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 6310 (3) Advanced Rhetorical Criticism

Reviews current critical methods and issues related to rhetorical criticism and rhetorical field methods.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites COMM 5310 and COMM 5320.

COMM 6320 (3) Rhetorical Theory

Reviews current theory and research on topics such as contemporary rhetorical theory, rhetoric and public life, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6330 (3) Rhetoric of Inquiry

Surveys foundational texts and contemporary research in the rhetoric of inquiry. Focuses on the role of persuasion in the production of knowledge. Critical analysis of major theoretical and methodological traditions and topics, with an emphasis on social dimensions of inquiry.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6340 (3) Rhetoric and Civic Community

Considers performances of public life as rhetorical inducements of civitas. Topics include negotiation of self-regulation among interdependent partners, rhetorical exclusions and/or counterpublics, and dialectical tensions of public/private as these contribute to and have civic consequences for publicness, community, and social will.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6350 (3) Seminar in Argumentation

Surveys foundational texts and contemporary research in argumentation. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of argument.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6360 (3) Social and Cultural Theory

Traces select traditions in social and/or cultural theory, emphasizing how those traditions affect and are affected by the field of rhetoric studies.

Examines the origins and resolutions of major debates in social and/or cultural theory from a rhetorical perspective.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6410 (3) Discourse Analysis

Acquaints students with the main types of discourse analysis: conversation analysis, critical discourse analysis, and rhetorically informed discourse approaches. Teaches how to conduct discourse analysis, including transcribing, selecting excerpts, documenting inferences, and linking findings to scholarly controversies.

Requisites: Restricted to graduate students only.

COMM 6420 (3) Interaction Analysis

Educates students in one of a selected set of methodological specializations used in the study of human interaction.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

COMM 6440 (3) Grounded Practical Theory

Examines theory, method, and application of grounded practical theory, an approach to building normative theory through description, critique, and theoretical reconstruction of situated communicative practices. Semester project involves analysis of a sample of discourse from a public or field observation setting.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5210.

COMM 6445 (3) Language, Ideology and Identity

Focuses on cultural foundations of social interaction, with a special emphasis on ideology (including potentially contested cultural norms, values and premises) as a basic condition of meaningful interaction. Identities are discussed as culturally variable, historically embedded interactional accomplishments, constructed from communicative resources such as language and other types of signs, that serve the purpose of participation in communal life.

Requisites: Restricted to graduate students only.

COMM 6470 (3) Public Deliberation and Dialogue

Explores the theory, research and practices of deliberative democracy and dialogue. Considers "ideal" communicative conduct and common interactional troubles, cross-cultural differences and routine communication practices.

Requisites: Restricted to graduate students only.

COMM 6730 (3) Collaboration and Decision Making in Organizations

Explores theory and research on communication processes associated with collaboration and decision making in contemporary organizations, particularly as they are influenced by participation programs, technology, and team structures.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites COMM 5620 and COMM 6010.

COMM 6740 (3) Theory and Philosophy of Organizing and Organizations

Reviews theory and philosophy of organizations and organizing where communication processes are seen as constitutive. Focuses on discursive and material practices in the formation and change of organizational structure, culture, and operation.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5620.

COMM 6750 (3) Communication and Organizational Change

Addresses the role of communication in cultural change efforts in organizations. Topics include the nature and function of organizational cultures, role of leadership, ethical issues, and member involvement in change processes. Specific organizational cases are highlighted throughout.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5620.

COMM 6780 (3) Roles, Relationships, and Identities in Interaction

Examines how social roles influence communicative practices, the development of relationships, and the impact of relationships on identity. Considers these processes in contexts, such as personal relationships and institutional settings. Topic varies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

COMM 6840 (1-3) Master's Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 6940 (1) Master's Degree Candidate

Repeatable: Repeatable for up to 3.00 total credit hours.

Grading Basis: Pass/Fail

COMM 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

COMM 8840 (1-6) Doctoral Independent Study

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

COMM 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Communication Residential Academic Program (COMR)

Courses

COMR 1000 (1-2) Communication and Community

Introduction to how communication builds community by creating and sharing meaning. Examination of communication practices at the interpersonal level (friends and family), the group level (teams, classrooms and organizations) and the societal level (citizenship, social change, mass media).

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to students in the Communication and Society Residential Academic Program (PCMS).

COMR 1800 (3) Visual Literacy: Images and Ideologies

Explores the relationship between visual images and cultural values, including how we process visual information, the evolution of conventions in various media, common visual portrayals, and ethical issues.

Requisites: Restricted to students in the Communication and Society Residential Academic Program (PCMS).

Additional Information: Arts Sci Core Curr: Literature and the Arts

Comparative Literature (COML)

Courses

COML 8990 (1-10) Doctoral Dissertation

Requisites: Restricted to graduate students only.

Computer Science (CSCI)

Courses

CSCI 1000 (1) Computer Science as a Field of Work and Study

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

Requisites: Restricted to students with 0-26 credits (Freshmen) Computer Science (CSEN-BS, CSEN-ADL, CSCI-BA or CSCI-ADL) majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 1200 (3) The Art of Computational Thinking and Computer Programming

Teaches computational thinking and techniques for writing computer programs using the Python programming language. Intended for students who realize that obtaining computational skills is beneficial to all fields of study, but who have little or no experience in programming or are not Computer Science majors. Students will be expected to create computer programs to solve problems in a range of disciplines.

Additional Information: Departmental Category: General Computer Science

CSCI 1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 1220

Additional Information: Departmental Category: General Computer Science

CSCI 1240 (3) The Computational World

Introduces and explores the "computational style of thinking" and its influence in science, mathematics, engineering and the arts. Does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 1240

Additional Information: Departmental Category: General Computer Science

CSCI 1300 (4) Computer Science 1: Starting Computing

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Intended for students with little to no experience in computing or programming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1310 or CSCI 1320 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 1310 (4) Computer Science 1: Starting Computing - Experienced

Intended for students with some prior experience in programming and basic knowledge of variables, conditionals, and loops. Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1320 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 1320 (4) Computer Science 1: Starting Computing-Engineering Applications

Intended for students with no prior experience in programming. Class outcomes and goals are identical to CSCI 1300, but uses problems and tools from Engineering. Teaching techniques for writing computer programs in higher level programming languages to solve problems of interest in Engineering and other domains.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1310 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Restricted to College of Engineering or Pre-Engineering Arts and Science (PREN) majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.

Requisites: Requires prerequisite courses of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1030 or ECEN 1310 and APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2400 (4) Computer Systems

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.

Requisites: Requires prerequisite course of CSCI 2270 and a prerequisite or corequisite course of CSCI 2824 or ECEN 2703 or a prerequisite course of MATH 2001 or APPM 3170 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2820 (3) Linear Algebra with Computer Science Applications

Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2824 (3) Discrete Structures

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.

Requisites: Requires prerequisite courses of CSCI 1200 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1030 or ECEN 1310 and APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 2830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Computer Science

CSCI 2900 (1-3) Lower Division, Undergraduate Level Independent Study

Offers selected topics at the elementary level for students with little or no previous computing experience.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Computer Science

CSCI 3002 (3) HCC Foundations/User-Centered Design and Development 1

Introduces the practice and research of human-centered computing, including the evolution of human-computer interaction to its forms today and the techniques of user-centered design. Surveys topics that include social computing; tangible computing; mobility; and more. It will cover computing in society at large with respect to domains such as health, education, assistive technology, emergency response and environment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3010 (3) Programming Project Workshop

A semester-long projects course guided by an instructor to help design and develop a programming project.

Requisites: Requires a prerequisite course of CSCI 2270 (minimum grade C-).

CSCI 3022 (3) Introduction to Data Science Algorithms

Introduces students to the tools methods and theory behind extracting insights from data using computer science algorithms. Covers algorithms that maximize likelihood objective functions; linear prediction algorithms; making decisions based on data assembled from large datasets; discovering and quantifying connections between observations in real-world data such as text and images; representing and manipulating data on a computer.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3100 (1) Software and Society

Provides students with an understanding of the professional, ethical, legal and social issues and responsibilities of software developers, as well as providing them with the ability to analyze the local and global impacts of computing on individuals, organizations and society.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308 and CSCI 4328 and CSCI 4338 and CSCI 4348

Requisites: Requires prerequisite course of CSCI 3308 (minimum grade C-). Restricted to Computer Science (CSEN-BS, CSEN-ADL, CSCI-BA, CSCI-ADL) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Computer Science

CSCI 3104 (4) Algorithms

Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 and one of the following: CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 3112 (1-3) Human-Centered Computing Professional Development

Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections and gaming.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 3112

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3155 (4) Principles of Programming Languages

Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a language and to adapt to a new language.

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Programming Languages

CSCI 3202 (3) Introduction to Artificial Intelligence

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170 and one of the following: APPM 3570, 4570, 4520, CSCI 3022, MATH 3510, 4510, CVEN 3227, ECEN 3810, MCEN 4120 or ECON 3818 (all minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3287 (3) Design and Analysis of Data Systems

Analyzes design of data systems, including data stored in file systems, database management systems and physical data organizations. Studies calculus of data models, query languages, concurrency and data privacy and security.

Requisites: Requires prerequisite course of CSCI 3104 (minimum grade C-).

Additional Information: Departmental Category: Database Systems

CSCI 3302 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3303

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3308 (3) Software Development Methods and Tools

Covers tools and practices for software development with a strong focus on best practices used in industry and professional development, such as agile methodologies, pair-programming and test-driven design. Students develop web services and applications while learning these methods and tools.

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions.

Requisites: Requires prerequisite courses of CSCI 3104 and CSCI 3155 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 3656 (3) Numerical Computation

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration.

Requisites: Requires prerequisite courses of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 1360 or MATH 2300 and MATH 2130 or APPM 2360 or APPM 3310 or CSCI 2820 (all minimum grade C-).

Additional Information: Departmental Category: Numerical Computation

CSCI 3702 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3753 (4) Design and Analysis of Operating Systems

Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.

Requisites: Requires prerequisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (all minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3832 (3) Machine Translation

Provides a comprehensive overview of current techniques in statistical machine translation of natural language, e., automatically translating from Spanish to English. Covers language models, reordering, hierarchical translation and evaluating whether a translation is effective.

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4229 (3) Computer Graphics

Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation and projection. Involves removal of hidden edges, shading and color. Knowledge of basic linear algebra is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5229

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Graphics

CSCI 4239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5239

Requisites: Requires prerequisite course of CSCI 4229 (minimum grade C-).

Additional Information: Departmental Category: Graphics

CSCI 4250 (3) Computer Science: The Canon

Explores the "great works" of computer science through intensive reading and discussion. Readings include works by Babbage, Turing, Von Neumann, Goedel, Shannon and Minsky, among others. Does not count as CS credit for the Computer Science BA, BS or minor.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5250

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Computer Science

CSCI 4253 (3) Datacenter Scale Computing - Methods, Systems and Techniques

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5253

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CSCI 4273.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5273 and ECEN 5273

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5302

Requisites: Requires prerequisite course of CSCI 3302 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4308 (4) Software Engineering Project 1

Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the development process. Department enforced prerequisite: successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 4448.

Additional Information: Departmental Category: Software Engineering

CSCI 4314 (3) Algorithms for Molecular Biology

Surveys molecular biology and combinatorial algorithms used to understand DNA, RNA and proteins. Students work in groups to define and tackle meaningful biological problems and learn to collaborate effectively with scientists in other disciplines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5314

Requisites: Requires a prerequisite course of CSCI 3104 (minimum grade C-).

Recommended: Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.

Additional Information: Departmental Category: Theory of Computation

CSCI 4318 (4) Software Engineering Project 2

Second semester of an advanced practicum in computer science. Students must take this course and CSCI 4308 contiguously as the project spans the entire academic year.

Requisites: Requires prerequisite course of CSCI 4308 (minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 4328 (4) Software Project Management and Mentoring

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing and prototype goals. Study project risk management and cost estimation approaches. Experience mentoring Senior Software Project Team. Intended for professional software developers. Department consent required, see Senior Project Director for permission.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Software Engineering

CSCI 4338 (2) Software Project Management

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Intended for double majors doing interdisciplinary projects in other departments. Department consent required, see Senior Project Director for permission.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Software Engineering

CSCI 4348 (4) Startup Essentials: Entrepreneurial Projects in Computing

Provide students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept, and be evaluated on product/market fit. Department enforced restriction, successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG. Formerly CSCI 4000.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5340

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 4358 (4) Entrepreneurial Projects II

Follows CSCI 4348. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5350

Requisites: Requires a prerequisite course of CSCI 4348 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4413 (3) Computer Security and Ethical Hacking

Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5413

Requisites: Requires prerequisite course of CSCI 4273 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and ECEN 4423 and ECEN 5423

Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 2350 or MATH 2400 (all minimum grade C-).

Recommended: Prerequisites PHYS 1120 and CSCI 3656 and MATH 2130.

Additional Information: Departmental Category: Numerical Computation

CSCI 4448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5448

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 4502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4555 (3) Compiler Construction

Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5525 and ECEN 4553 and ECEN 5523

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 2400 or ECEN 3350 (all minimum grade C-).

Additional Information: Departmental Category: Programming Languages

CSCI 4576 (4) High-Performance Scientific Computing

Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5576

Recommended: Prerequisite CSCI 3656.

Additional Information: Departmental Category: Numerical Computation

CSCI 4586 (4) High-Performance Scientific Computing 2

Introduces computing systems, software, and methods to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. Second course in a two-semester sequence.

Requisites: Requires prerequisite course of CSCI 4576 (minimum grade C-).

Additional Information: Departmental Category: Numerical Computation

CSCI 4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4593

Requisites: Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and ECEN 4753 and ECEN 5753

Requisites: Requires prerequisite course of CSCI 3753 and MATH 2300 or APPM 1360 (all minimum grade C-).

Recommended: Requisite a course in statistics.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4802 (1) Data Science Team Companion Course

Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5802

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of APPM 3310 or APPM 3570 or APPM 4520 or APPM 4570 or MATH 2130 or MATH 3510 or MATH 4510 or CSCI 2820 or CSCI 3022 or CVEN 3227 or ECEN 3810 or MCEN 4120 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5809 and ATLS 4809 and ATLS 5809

Additional Information: Departmental Category: Graphics

CSCI 4810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6810

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Computer Science

CSCI 4830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 2400 or ECEN 3350 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4831 (1-3) Special Topics in Algorithms

Covers topics of interest in computer science at the upper-division undergraduate level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of CSCI 3104 and CSCI 2820 or MATH 2130 or APPM 3310 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4900 (1-3) Upper Division, Undergraduate Level Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4950 (2-4) Senior Thesis

Provides an opportunity for senior computer science majors to conduct exploratory research in computer science. Department enforced restriction, successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WR TG.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of CSCI 3100 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: General Computer Science

CSCI 4960 (2-4) Computer Science Honors Thesis

Provides an opportunity for senior Computer Science majors to complete an honors thesis by conducting exploratory research in computer science. Department enforced prerequisites: successful completion of a minimum of 36 credit hours of Computer Science foundation and Computer Science electives and a writing requirement.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Computer Science

CSCI 5135 (3) Computer-Aided Verification

Covers two-level and multilevel minimization, optimization via expert systems, algebraic and Boolean decomposition, layout methodologies, state assignment, encoding and minimization, silicon compilation.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5139

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisites ECEN 2703 and general proficiency in discrete mathematics and programming.

Additional Information: Departmental Category: Programming Languages

CSCI 5229 (3) Computer Graphics

Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation and projection. Involves removal of hidden edges, shading and color. Knowledge of basic linear algebra is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4229

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Graphics

CSCI 5239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4239

Requisites: Requires prerequisite course of CSCI 5229 (minimum grade B). Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Graphics

CSCI 5250 (3) Computer Science: The Canon

Explores the "great works" of computer science through intensive reading and discussion. Readings include works by Babbage, Turing, Von Neumann, Goedel, Shannon and Minsky, among others. Does not count toward breadth requirement for Computer Science MS/ME degree.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4250

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 5253 (3) Datacenter Scale Computing - Methods, Systems and Techniques

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4253

Requisites: Restricted to graduate student Computer Sciences (CSEN) students only.

Recommended: Prerequisite CSCI 5273.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5254 (3) Convex Optimization and Its Applications

Discuss basic convex analysis (convex sets, functions and optimization problems), optimization theory (linear, quadratic, semidefinite and geometric programming; optimality conditions and duality theory), some optimization algorithms (descent methods and interior-point methods), basic applications (in signal processing, control, communications, networks, statistics, machine learning, circuit design and mechanical engineering, etc.), and some advanced topics (distributed decomposition, exact convex relaxation, parsimonious recovery).

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4273 and ECEN 5273

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4302

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 3302 or instructor consent required.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5314 (3) Algorithms for Molecular Biology

Surveys molecular biology and combinatorial algorithms used to understand DNA, RNA, and proteins. Students work in groups to define and tackle meaningful biological problems and learn to collaborate effectively with scientists in other disciplines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4314

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5340 (3) Startup Essentials: Entrepreneurial Projects in Computing

Provides students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept and be evaluated on product/market fit. CS coding concepts relevant for startups, including potentially cloud programming, mobile programming and agile software engineering, will be taught. Does not satisfy breadth requirement.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4348

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 5350 (3) Entrepreneurial Projects II

Follows CSCI 5340. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept. Does not satisfy breadth requirement.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4358

Requisites: Requires a prerequisite course of CSCI 5340 (minimum grade B). Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 5352 (3) Network Analysis and Modeling

Examines modern techniques for analyzing and modeling the structure and dynamics of complex networks. Focuses on statistical algorithms and methods, and emphasizes model interpretability and understanding the processes that generate real data. Applications are drawn from computational biology and computational social science. No biological or social science training is required.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisites CSCI 3104 and APPM 3570.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5413 (3) Computer Security and Ethical Hacking

Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4413

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5417 (3) Information Retrieval Systems

Addresses practical issues in the design, implementation and analysis of modern information retrieval systems. The major focus is on Web-based applications including ad hoc retrieval, classification, and clustering. Introduces the use of open source retrieval systems, standard evaluation metrics and gold-standard evaluation collections.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Database Systems

CSCI 5444 (3) Introduction to Theory of Computation

Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4446 and ECEN 4423 and ECEN 5423

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4448

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Software Engineering

CSCI 5454 (3) Design and Analysis of Algorithms

Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, probabilistic methods, advanced data structures, graph algorithms, etc. Lower bounds, NP-completeness, intractability.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 2270 or equivalent.

Additional Information: Departmental Category: Theory of Computation

CSCI 5502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4502

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5525 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students will build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4555 and ECEN 4553 and ECEN 5523

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisites CSCI 3155 and CSCI 2400 or ECEN 3350.

Additional Information: Departmental Category: Programming Languages

CSCI 5535 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5533

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 3155 or instructor consent required.

Additional Information: Departmental Category: Programming Languages

CSCI 5548 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, implementation, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections and modeling. Includes relation to RTS and object-oriented programming.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5543

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisites CSCI 1300 and CSCI 2270 or instructor consent required.

Additional Information: Departmental Category: Software Engineering

CSCI 5551 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers and data flow machines.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5553

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite background in computer organization, introduction to programming languages, elementary numerical analysis, or instructor consent required.

Additional Information: Departmental Category: Parallel Processing

CSCI 5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5573

Requisites: Requires prerequisite course of CSCI 2400 and CSCI 3753 (all minimum grade C). Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5576 (4) High-Performance Scientific Computing

Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4576

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a machine and the design of cache memory systems. Also studies current and historically important computer architectures.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5593

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 4593 or instructor consent required.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5606 (3) Principles of Numerical Computation

Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisites CSCI 3656 and three semesters of calculus or equivalent.

Additional Information: Departmental Category: Numerical Computation

CSCI 5608 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management and legal issues. Gives special attention to problems unique to software projects.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5603 and EMEN 5031

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisites ECEN 4583 and CSCI 5548 and CSCI 4318 or equivalent industrial experience.

Additional Information: Departmental Category: Software Engineering

CSCI 5622 (3) Machine Learning

Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended.

Requisites: Requires prerequisite courses of CSCI 2400 and CSCI 3104 (all minimum grade C). Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5636 (3) Numerical Solution of Partial Differential Equations

Focuses on parallel algorithms for partial differential equations, iterative solvers such as Krylov subspace methods, domain decomposition and multilevel methods.

Requisites: Requires prerequisite course of CSCI 2820 or CSCI 3656 (minimum grade B). Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5646 (3) Numerical Linear Algebra

Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. A sound knowledge of basic linear algebra, experience with numerical computation, and programming experience is required.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5654 (3) Linear Programming

Presents algorithms, simplex and modifications. Examines theory-duality and complementary slackness. Involves network flow algorithms. Introduces integer programming.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite linear algebra.

Additional Information: Departmental Category: Theory of Computation

CSCI 5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5673

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 5573 or a course in computer networks.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5676 (3) Numerical Optimization

Focuses on computational methods for solution of unconstrained and some constrained optimization problems, nonlinear least-squares problems and systems of nonlinear equations. Formerly CSCI 6676.

Requisites: Requires prerequisite course of CSCI 2820 or CSCI 3656 (minimum grade B). Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5714 (3) Formal Languages

Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 5444 or instructor consent required.

Additional Information: Departmental Category: Theory of Computation

CSCI 5722 (3) Computer Vision

Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control and object recognition.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite probability, multivariate calculus and linear algebra.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4753 and ECEN 4753 and ECEN 5753

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5802 (1) Data Science Team Companion Course

Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4802

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4809 and ATLS 4809 and ATLS 5809

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Graphics

CSCI 5817 (3) Database Systems

Provides an advanced treatment of basic database concepts.

Requisites: Requires prerequisite course of CSCI 3287 (minimum grad C-). Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 3753.

Additional Information: Departmental Category: Database Systems

CSCI 5822 (3) Probabilistic Models of Human and Machine Learning

Introduces a set of modeling techniques that have become a mainstay of modern artificial intelligence, cognitive science and machine learning research. These models provide essential tools for interpreting the statistical structure of large data sets and for explaining how intelligent agents analyze the vast amount of experience that accumulates through interactions with an unfamiliar environment.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite undergraduate course in probability and statistics.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5828 (3) Foundations of Software Engineering

Provides an introduction to software engineering concepts and techniques. Topics include the history of software engineering, fundamental software engineering principles and theory, software life cycles, software testing, and the design and implementation of concurrent and large-scale software systems.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Software Engineering

CSCI 5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.

Equivalent - Duplicate Degree Credit Not Granted: LING 5832

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5839 (3) User-Centered Design and Development 1

Develops the skills and practices necessary to apply user-centered approaches to software requirements analysis, and the design and evaluation of computer applications.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Graphics

CSCI 5854 (3) Theoretical Foundations for Cyber-Physical Systems

Covers techniques for modeling, design and verification of Cyber-Physical Systems and application domains including automotive systems, robotics and medical devices. Modeling topics include timed systems, differential equations, switched systems, hybrid dynamical systems. Verification topics: reachability and stability verification. Temporal specifications. Synthesis of controllers. Applications: automotive systems, medical devices.

Requisites: Requires prerequisite course of CSCI 3434 or ECEN 3300 (minimum grade C). Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5900 (1-6) Master's Level Independent Study

Provides opportunities for independent study at the master's level.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 5919 (3) HCC Survey and Synthesis: Foundations and Trajectories

Examines interdisciplinary field of human-computer interaction through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. "Social computing" is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists; social scientists; and business and media arts students.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: Graphics

CSCI 5922 (3) Neural Networks and Deep Learning

Introduces modern approaches to machine learning using neural networks. Neural nets, popular in the early 1990s, have undergone a resurgence due to significant advances in computing power and the availability of very large data sets. Now rechristened 'deep learning', the field has produced state-of-the-art results in a range of artificial intelligence problems, including vision, speech and natural language processing.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5929 (3) HCC Survey and Synthesis: New Disciplinary Directions

Studies recent advances in human-computer interaction through critical analysis of influential papers and self-guided research. Examines new paradigms in input, output, and visualization for technology design and interaction. Considers innovative methods to assess various population design and technological needs. Studies in computer-related fields, social science, business, media arts and communications benefit learning about human-centered computing research.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 5919.

Additional Information: Departmental Category: Graphics

CSCI 6000 (1) Introduction to the Computer Science PhD Program

Instructs new Ph.D students in Computer Science how to obtain a Ph.D and how to become an effective member of the computer science research community. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CSCI 6268 (3) Foundations of Computer and Network Security

Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography and authentication protocols.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5550

Requisites: Requires prerequisite course of CSCI 5273 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Software Engineering

CSCI 6302 (3) Speech Recognition and Synthesis

Introduction to automatic speech recognition and understanding, conversational agents, dialogue systems, and speech synthesis/text-to-speech. Topics include the noisy channel model, Hidden Markov Models, A* and Viterbi decoding, language modeling (N-grams, entropy), concatenative synthesis, text normalization, dialogue and conversation modeling.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 5832 or LING 5200 or instructor consent required.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6504 and LING 6200 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 6454 (3) Advanced Algorithms

Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting.

Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 6622 (3) Advanced Machine Learning

Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5622 or instructor consent required.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 6686 (3) Numerical Methods for Constrained Optimization

Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems.

Requisites: Requires prerequisite course of CSCI 5606 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 6800 (1-6) Master of Engineering Project

Students seeking the master of engineering degree must complete a creative investigation project, including a written report, supervised by a member of the graduate faculty. Department enforced prerequisite: completion of 21 hours towards the ME degree.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate student Computer Sciences (CSEN) students only.

Additional Information: Departmental Category: General Computer Science

CSCI 6810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4810

Additional Information: Departmental Category: General Computer Science

CSCI 6940 (1) Master's Degree Candidacy

For students who need to be registered for the purpose of taking the master's comprehensive exam and who are not otherwise registered.

Credit does not count toward degree requirements.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Computer Science

CSCI 6950 (1-6) Master's Thesis

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 7000 (1-4) Current Topics in Computer Science

Covers research topics of current interest in computer science that do not fall into a standard subarea.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CSCI 7123 (3) Topics in Operating Systems

Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 5573 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 7135 (3) Topics in Programming Languages

Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Programming Languages

CSCI 7143 (3) Topics in Computer Systems

Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 7154 (3) Topics in Theory of Computation

Selected topics of current interest in theory of computation.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 7176 (3) Topics in Numerical Computation

Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 7222 (3) Topics in Nonsymbolic Artificial Intelligence

Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5622 or instructor consent required.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 7412 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 7422 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 7717 (3) Topics in Database Systems

Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 5817 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Database Systems

CSCI 7772 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 7818 (3) Topics in Software Engineering

Studies selected topics of current interest in software engineering. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Software Engineering

CSCI 7900 (1-6) Doctoral Level Independent Study

For doctoral students.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CSCI 8990 (1-10) Doctoral Dissertation

Investigates some specialized field of computer science. Approved and supervised by faculty members.

Repeatable: Repeatable for up to 30.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

Critical Media Practices (CMDP)

Courses

CMDP 1400 (4) Introduction to Contemporary Media Cultures

Prepares students for critical practices in contemporary media cultures in a global context. Explores the diversity of media practices, including narrative and non-narrative forms, emphasizing aesthetics and visual studies. In lectures and labs students will explore video, sound, the internet and other multi-media platforms of expression.

CMDP 2010 (3) Information, Media and Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission and retrieval. Equips students with an understanding of technological transformations in interpersonal, organizational and mass communication. Emphasis is on the technological, social and political changes that underlie the movement toward a digital society.

Grading Basis: Letter Grade

CMDP 2100 (3) Approaches to Historical Media Practices

Investigate historical and cultural discourses in the formation of media practices. Examines practices such as performance media; cinematic media, media art, and their aesthetic alignment to cognate movements throughout history.

CMDP 2400 (3) Media Aesthetics

Builds students' ability to watch, reflect on, and write about media images. The course will be grounded in the analysis of media practices with special focus on media style and storytelling techniques. Explores media aesthetics from formal, cultural, and theoretical perspectives.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 2500 (3) Introduction to Media Practices

Working in design groups, students will explore the expressive potential of media through the production of short projects, discussions, readings, formal analysis, and critique. Provide a basic introduction to media practices as an extension of "visual thinking" and through approaches to storytelling, and hybrid media forms.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 2510 (1-3) Critical Media Practices Workshop 1

Training in narrow topics of media practices.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Media, Communication and Information (CMCI) or Arts and Sciences (ARSC) majors only.

CMDP 2600 (3) Creative Media Making

Focus on developing an understanding of the principles, forms and aesthetics of media production. Working in design groups on small-scale media preproduction and production exercises, screenings and critiques, students learn creative solutions to problems in realizing expressive media projects.

Requisites: Requires prerequisite courses of CMDP 1400 and CMDP 2500 (all minimum grade B-).

Grading Basis: Letter Grade

CMDP 2710 (3) Media Production Methods and Ideas

Explores creative approaches to idea formation, conceptualization, and organization for the moving image employing critical thinking, improvisation and visual storytelling techniques. Includes forms of creative writing, storytelling and preproduction techniques and strategies.

Requisites: Restricted to College of Media, Communication and Information (CMCI) or Arts and Sciences (ARSC) majors only.

CMDP 2720 (3) Animation

Explore computer animation in the making of short projects that may address topics such as: nonfiction, immersive environments and digital compositing. Designed to develop the student's understanding of movement, timing, scripting, editing and color composition. Through screenings and discussions students will gain an appreciation of history and practices of animation.

Requisites: Requires a prerequisite course of CMDP 2500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 2810 (3) Documentary Media Poetics

Investigates documentary cinema and media practices through class discussions, research papers, hands on exercises and the screenings. Cross-references documentary photography and moving-image documentary in the production of short digital projects. Explores the distinctive contributions of digital technologies to documentary image making.

Requisites: Requires prerequisite course of CMDP 2500 (minimum grade C-).

CMDP 2820 (3) Exploring Culture and Gender Through Film

Explores the concepts of culture and gender from an anthropological perspective through media. By experiencing texts, images and sounds about other ways of life, students will learn the basic concepts of cultural anthropology and learn to think critically about documentary and ethnographic media material.

Grading Basis: Letter Grade

CMDP 2860 (2) Performance Audio Recording

Provides an overview of the recording process from the performer's perspective from soundcheck through final mastering, addressing contemporary issues in technology, web, and performance media. Uses recorded material from in-class sessions. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2081

Requisites: Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 2870 (2) Recording Design

Provides hands-on instruction in various sound recording techniques. Addresses acoustics, sound reinforcement, studio maintenance and troubleshooting. Taught through labs and individual recording projects. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2091

Requisites: Requires prerequisite course of CMDP 2860 or MUSC 2081 (minimum grade D-). Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3110 (3) Electronic Arts Survey

Explores the development of electronic media art through screenings, readings, lectures and discussions.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3210 (3) Interactive Digital Cultures

Examines how the uses of interactive media have changed the classical dynamics of human communication, allowing multidirectional, non-linear and multimedia practices. In this course, students will study the various aesthetic, narrative, emotional and cultural elements of the interface in areas such as non-linear video, the web, games and hypermedia.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3310 (3) Performance Media Cultures

Reflect on the cultural construction of old and new performance media through the lens of emerging practices and contemporary discourse. From ancient theatre to cinema, interactive television to YouTube, and multi-media dance performances to computer games, this course explores how media shape, and are shaped by, various historical and contemporary audiences and contexts.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3350 (3) Modes of Documentary Media History

Introduces students to the variety of practices by examining their emergence, evolution and cultural impact in the global sphere. Students discover the major themes and genres in documentary work from photography, cinema, audio, hypermedia and the public debates they have engendered. Through lectures, screenings and research, develop critical perspectives on the international and transcultural dimensions of documentary media history.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 3450 (3) Critical Perspectives in Media Practices

Examines the contemporary landscape of media practices across platforms, such as film, social media, painting, video, and web art. This integrative exploration focuses on production contexts, circulation and reception through the lens of critical and interpretive frameworks. Drawing from key texts by major scholars and the works of media practitioners, students develop globally informed, critical perspectives for understanding.

Requisites: Requires a prerequisite course of CMDP 1400 (minimum grade C-).

CMDP 3500 (3) Digital Photographic Practices

Explores the creative possibilities of photography; students work on projects that combine concepts and techniques with contemporary practice and current modalities of exhibition and social distribution. Emphasis is placed on the student's personal growth through aesthetic and intellectual development in relation to current technologies.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3510 (1-3) Critical Media Practices Workshop II

Training in narrow topics of media practices. Open to CMCI students and by permission of the instructor.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3610 (3) Contemporary Image Making Practices

Provides students the technical skills for in depth exploration of the evolving principles and strategies of digital image making. Students will create small-scale projects with the primary emphasis on cinematographic experimentation and innovative visual techniques.

Requisites: Requires prerequisite course of CMDP 3500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3620 (3) Images and Stories

Learn and apply innovative non-traditional approaches to scripting and storytelling, including automatic thinking, idea sketches, visual notes, outlines and storyboards, serials, aleatoric methods, diagrams, locations, photographs and short stories. Focuses on methods of exploring scripting methods outside of the fixed and rule-bound traditional model of storytelling as a means of introducing students to discover their own scripting techniques.

Requisites: Requires a prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3710 (3) Digital Design

Introduces techniques, software and related concepts of digital design and image making through individual and group projects. Emphasizes digital animation, digital audio, digital video and website design and development as a means to formal and expressive ends. Introduces students to critical readings and theories related to digital media practice.

Requisites: Requires prerequisite course of CMDP 2010 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3720 (3) Multimedia Composition

Combine writing with media such as video, music, animation and podcasting on the computer. Includes a unit on web-site design and ends with each student creating their own website and posting on it the project they created for the course.

CMDP 3810 (3) Engaged Documentary Media Practices

Combining research, scripting methods and field trips, students produce short media non-fiction storytelling projects emerging from an engagement with historical events, contemporary issues and the world around us.

Requisites: Requires prerequisite courses of CMDP 2600 and CMDP 2810 (all minimum grade C-).

Grading Basis: Letter Grade

CMDP 3820 (3) Performance Media Practices

Develop a performance vocabulary within the context of various media platforms. Through creating individual and collaborative performance projects, students will explore performance design issues such as movement, blocking and staging with projection, sensors, sound and other media tools.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3830 (3) Advanced Performance Media Workshop

Study practical, technical and theoretical strategies of performing with and through media. This is an in-depth course that investigates a narrow scope drawn from topics that may include dance/movement, the illustrated lecture, projection environments, digital sensing, responsive lighting or acoustic strategies for performance.

Requisites: Requires prerequisite course of CMDP 3820 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3840 (3) Sound Practices

Explores the aesthetics of sound through the study of sound art and sound culture. Reading and discussion covers theories, technologies, and histories that drive the medium. Students apply concepts by designing and building their own soundscapes. Classes will be organized around hands-on activities, lecture, and discussion of readings. Instructor consent required.

Requisites: Requires prerequisite course of CMDP 2500 or CMDP 2860 or MUSC 2081 (minimum grade C-). Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3860 (3) Introduction to Music Technology

Surveys the various tools and techniques in the field of music technology. Topics include an introduction to basic synthesis, digital signal processing, MIDI and audio sequencing, music notation and a historical perspective on electronic music. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4081 and MUEL 4081

Requisites: Restricted to College of Music (MUSCU) or Department of Critical Media Practices (DCMP) undergraduate students only.

CMDP 3910 (3) Media Production Topics

Rotating topics in media production techniques.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of CMDP 2500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 3990 (3) Media Professional Seminar

Learn aspects of professional development in media production. Through workshops, class trips and assignments students will learn of the many opportunities found within media production.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4110 (3) Cultures of Digital Sound

Introduces students to a variety of critical scholarship and debates about our sonic environment through an examination of how sound interfaces with different facets of media production. Consisting of listening, analyzing and differentiating sound in different contexts, students will deepen their understanding of the relationship between sight and sound in cultural production.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4220 (3) Digital Archives in Media Practices

Examine the theories and methods underpinning the use of archival materials in non-fiction media production while simultaneously exploring questions of ethics, truth and representation that the use and manipulation of archives raises. Through weekly lectures, seminars, readings and screenings, students will discover the theories and interpretive approaches to understanding the archive and its uses.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4310 (3) Screen Culture and Globalization

Examine the formation of screen cultures (narrative, experimental, documentaries and multi-media video art) in the context of the cultural globalization of the moving image. Through lectures, seminars and research projects students explore the formation and evolution of screen cultures on various platforms such as digital cinema, web environments, video art, multi-channel installations and the moving image on mobile interfaces.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4320 (3) Media Engagement in Digital Diasporas

Offers students critical and interpretive frameworks for understanding the cultural and historical significance of digital diasporas and these communities' use of digital technologies for communication, community building and the creation of digital documents about migration and connectivity with the homeland.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4410 (3) Topics in Contemporary Media Technologies

Focus on the development and application of media technologies in moving image aesthetics and emergent media practices. Topics rotate according to faculty expertise, but may include new imaging technologies for small screen and mobile devices, web-specific media or emerging modes of production. Through lectures, screenings and seminar, students explore the work of contemporary thinkers and practitioners in the field.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4450 (3) Topics in Contemporary Media Technologies

Focus on the development and application of media technologies in moving image aesthetics and emergent media practices. Topics rotate according to faculty expertise, but may include new imaging technologies for small screen and mobile devices, web-specific media or emerging modes of production. Through lectures, screenings and seminars, students explore the work of contemporary thinkers and practitioners in the field.

Requisites: Requires prerequisite course of CMDP 2400 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4610 (3) Small Screen Storytelling

Shoot footage on or for mobile screens including narratives, microdocumentaries, music videos, short stories and collaborative exquisite corpse projects. Students will complete work and distribute through various outlets on the internet.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4620 (3) Media Environments

Explore the design and implementation of multimedia environments. Students will develop strategies for creating media exhibitions and/or performance environments with projection and sounds activated by sensors. This course is ideal for performers, dancers and media artists as well as those desiring to present information in novel ways, such as working with archival or non-fiction materials.

Requisites: Requires prerequisite course of CMDP 3830 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4630 (3) Introduction to Computational Media

Develop the technical and conceptual skills for computational media practices. Through individual and collaborative projects, students will explore the creative use of electronics and microcontrollers (including wearable and other embedded systems) through relevant programming environments. Introduces visual programming with a focus on signal processing for image and sound.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4640 (3) Multimedia Sound

Learn what sound is and where it comes from; how to create, analyze, alter, mix, and record it digitally in the studio and in the field; and how it can interact creatively with other media. In addition to analyzing how professionals use sound, students will create five sound-based projects of their own.

CMDP 4710 (3) Projection Practices

Design and implement projection-based media projects and explore projection practice as a distinct field. Through individual and collaborative projects, this course explores projection for live events, installation, moving images and site-specific or community-based projects. Students will be introduced to emergent software and hardware for projection design.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4720 (3) Installation and Performance Media

Focusing on live image and sound processing in constructed or natural environments, students will work individually or collaboratively on an installation project that engages with the intersection of performance and media. Potential models include site specific work, illustrated lecture, gallery installation, movement and dance with projection mapping, participatory media and virtual environments.

Requisites: Requires prerequisite course of CMDP 4620 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4730 (3) Digital Art and Emergent Technologies

Explores digital artistic practices across contexts and disciplines in various contexts. Emphasizes web and networked media as it applies to digital practices in sound, image, language, spatial and time-based arts.

Requisites: Requires prerequisite course of CMDP 2600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4810 (3) Advanced Documentary Practices

Combine research and production to produce short documentary media projects, which explore the world we live in. Focusing on practice, this course explores stylistic options employed on documentaries that give voice to different perspectives on the world. Students will be able to identify the tactics and strategies of documentaries in a variety of media, and will include visits with professional documentary makers. Students will complete a final documentary project.

Requisites: Requires prerequisite course of CMDP 3810 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4820 (3) Ethnographic Media

Explores emerging creative documentary practices through visual research, fieldwork, oral histories and the construction of innovative ethnographies. Through ethno-fiction, eco-ethnography, photography, indigenous media and cinema, students explore the development of ethnographic documentary and visual anthropology in both traditional and experimental forms. Projects are developed with an emphasis on the ethical and political challenges of representation through media technologies.

Requisites: Requires prerequisite course of CMDP 4810 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4841 (1-4) Undergraduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

CMDP 4860 (2) Computer Composition

Learn strategies and techniques for generating and manipulating sound with computer-specific tools. Students' projects will include compositions, soundscapes, ambient environments and soundtracks for multimedia and performance projects.

Equivalent - Duplicate Degree Credit Not Granted: MUEL 4111

Requisites: Requires prerequisite course of CMDP 3860 or MUEL 4081 (minimum grade D-).

Grading Basis: Letter Grade

CMDP 4870 (3) Sound and Technology Topics

Exploration of issues, techniques and tools of music and sound technology. Topics vary and may include: interactive systems for performance; music and mobile media; electronic music instrument design; digital synthesis and signal processing; music in multimedia; sound practices and analysis. Lecture during work sessions will support student projects.

Requisites: Requires prerequisite course of CMDP 3860 or MUEL 4081 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4900 (3) Concepts and Practices of Contemporary Media

Explores the application of new media technologies in depth, and engages students in an ongoing dialogue about the cultural context of new media technologies and their own work. Students will produce a major media project that synthesizes methods of media making into modes of communication and expression. This is the capstone course for undergraduates in Media Production.

Requisites: Requires prerequisite course of CMDP 3500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 4931 (1-6) Internship

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

CMDP 5100 (3) Research and Methodologies Seminar

Explores documentary media preproduction tactics and strategies, including basic research approaches, planning, pre-visualization, stylistic approaches, scheduling, working with archive and documentary materials, and documentary ethics.

Requisites: Restricted to graduate students only.

CMDP 5370 (3) Choreography, Cinematograph: Writing in Motion

Examine media and moving image aesthetics, tactic and strategies by creating work involving movement and expanded notions of choreography. Within this course students compose images and sounds, structuring them temporally as they explore narrative and non-narrative forms.

Requisites: Restricted to graduate students only.

CMDP 5450 (3) Contemporary Documentary Media

Explores cross platform documentary media practices and contemporary debates in documentary through a study of documentary history, genre, ethics and changing forms. It develops skills in critically analyzing documentary media.

Requisites: Restricted to graduate students only.

CMDP 5500 (3) Documentary Production Workshops

Workshopping and developing technical skills in documentary media production.

Requisites: Restricted to graduate students only.

CMDP 5600 (3) Documentary Lab Seminar

Explores and workshops documentary media projects and ideas from a variety of disciplines. A team-taught course, with affiliated faculty working in design groups within the documentary lab in one or more areas, such as Art and Art History, Anthropology or Geography. A total of 12 hours are required for IDMP MFA candidates.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

CMDP 5650 (3) Documentary Field Work

Explores distinctive and varied approaches to documentary field work and the uses of media for creative ethnography and other nonfiction practices. A team-taught course, with affiliated faculty from one or more areas such as Art and Art History, Anthropology and Geography.

Requisites: Requires a prerequisite course of CMDP 5100 (minimum grade C-). Restricted to graduate students only.

CMDP 5900 (3) Documentary Production Topics

Incorporates reflective study and practice in a course that consists of rotating topics in contemporary documentary practices, such as media essays, observation and participation, personal histories and voices, emergent technologies and documentary media, and interpretive ethnography.

CMDP 5910 (3) Individual Project Study

Requires students to conduct self-directed research and production in a seminar setting. Topics relate to individual projects

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CMDP 6500 (5) Producing Practicum

Explores advanced producing principles through the preproduction of the MFA thesis project, including the development of a professional project proposal.

Requisites: Requires a prerequisite course of CMDP 5650 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 6600 (5) Documentary MFA Thesis Seminar I

Explores production of MFA thesis product. Focus is on production strategies, ethical challenges and other practical production issues.

Requisites: Requires a prerequisite course of CMDP 6500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 6650 (5) Documentary MFA Thesis Seminar II

Explores editing and post-production of the MFA thesis project.

Emphasizes aesthetic choices (structure, narration and music), distribution, contracts and audience.

Requisites: Requires a prerequisite course of CMDP 6600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 6841 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CMDP 6871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMDP 7100 (3) Historical Overview of Media Arts and Technology

Explores a survey of historical trends in art and technology from the Renaissance to the contemporary global scene. Students investigate how artistic disciplines inform one another and how parallel developments in technology have played a significant role in the history of the arts. This course locates media arts within this broader historical context.

Grading Basis: Letter Grade

CMDP 7150 (3) Theoretical Overview of Media Arts and Technology

Surveys major theories of art, culture and technology formulated by both practitioners and theoreticians and examines conversations among technology studies, media theory and artistic practice. Students will investigate a variety of approaches, locating media arts within a broad range of theoretical perspectives.

Grading Basis: Letter Grade

CMDP 7200 (3) Research and Methodologies I

Introduces students to modalities of research and methodological practices in the context of media arts and technology. Strategies from a variety of academic disciplines will be critically engaged to provide a foundation for future work. Must be taken in sequence with CMDP 7250.

Grading Basis: Letter Grade

CMDP 7250 (3) Research and Methodologies II

Continues a discussion on modalities of research and methodological practices in the context of art and technology. Specific strategies from disciplines relating to students' individual research topics will be critically engaged to provide a foundation for future work.

Requisites: Requires a prerequisite course of CMDP 7200 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 7300 (3) Theories of the Avant-Garde

Explores various manifestations of avant-garde and experimental literature, art and media performance in the 20th century such as Cubism, Futurism, Dada, Surrealism, Theatre of the Absurd, the Situationists, Fluxus, Oulipo and others. Media forms analyzed will include manifestos, sound poetry, theatre, the novel, happenings, cinema, installation and other forms of historical avant-garde art practices.

Grading Basis: Letter Grade

CMDP 7400 (3) Contemporary Practices

Provides students with access to contemporary practices and discourses in media art and culture. The class engages professional practitioners through performances, field work and workshop encounters that may be open to the public. Students research, coordinate and present on biweekly guest presentations, with alternating weeks for reflection and discussion. Readings complement guest presentations.

Grading Basis: Letter Grade

CMDP 7410 (3) Topics in Cultures of Arts and Technology

Rotating topics in critical studies of media arts and technology.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

CMDP 7450 (3) Comprehensive Exam Seminar

Designed in a seminar format, this course reviews literature and concepts in all prior coursework and guides studies in their preparation for comprehensive exams. All ETMAP students must demonstrate their understanding of the fundamental concepts explored and developed in prior coursework in relation to individual areas of research.

Requisites: Requires prerequisite courses of CMDP 7100 and CMDP 7150 and CMDP 7250 and CMDP 7550 (all minimum grade C-).

Grading Basis: Letter Grade

CMDP 7500 (3) Production Methods I

Provides technical resources for students to work with emergent technologies in a media arts context. This is a team-taught, practice-based course addressing various production methods, from moving image and video to web and network media to computational media.

Grading Basis: Letter Grade

CMDP 7550 (3) Production Methods II

Builds on CMDP 7500 in developing technical skills with advanced new media forms. Projects are designed around students' individual areas of practice.

Requisites: Requires a prerequisite course of CMDP 7500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 7560 (3) Emergent Technologies: Theory and Practice

Explores how discreet modalities of media arts practices and their underpinning theoretical perspectives inform each other through the use of technology. Students investigate and develop theoretical perspectives on the exchange between art, technology and theory within their own research and the broader context of the contemporary social and cultural landscape.

Requisites: Requires a prerequisite course of CMDP 7150 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 7841 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMDP 7871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMDP 7910 (3) Topics in Art and Technology: Methods and Ideas

Rotating topics on media arts practices.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

CMDP 8100 (3) Dissertation Development

Designed in a seminar format, this course guides students through the development of a practice-based dissertation in which constant critical thinking is required. Through intensive workshoping and close reading, this class guides students from the dissertation proposal to the opening stages of tangible, original research.

Grading Basis: Letter Grade

CMDP 8500 (3) Collaborative Studio Practice I

Explores approaches to media arts collaboration across disciplines. Through technological and social systems, students investigate the role of the artist. In analyzing contemporary work in an ongoing cycle of discussion, reading and art practice, students will respond to projects, texts and media in form of creative practice.

Requisites: Requires a prerequisite course of CMDP 7450 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 8510 (3) Collaborative Studio Practice II

Continues and expands the notions of collaboration across disciplines and media forms. Culminates in the public presentation of a collaborative project.

Requisites: Requires a prerequisite course of CMDP 8500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 8600 (1-6) Independent Studio Critique

Work under faculty supervision with individual and group critiques focusing on the development of a practice-based dissertation. Designed to be taken in conjunction with CMDP 8100.

Grading Basis: Letter Grade

CMDP 8991 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 40.00 total credit hours.

Requisites: Restricted to graduate students only.

Curriculum Emphasis in Social Responsibility (CESR)

Courses

CESR 3040 (3) Fundamentals of Socially Responsible Leadership

Designed to build on the learning from MGMT 3030 and the rest of the management track curriculum, while adding more depth and breadth around the context managers operate within. Techniques used by current business leaders and seminal leadership scholars to prepare students to handle various leadership situations will be explored. Students will engage in oral and written presentations.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 3040

Requisites: Requires a prerequisite course of BASE 2104 and prerequisite or corequisite course of MGMT 3030 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4000 (1) Leadership Challenges I: Exercises in Moral Courage

Part one of two in a year long course, focusing on values and leadership at all levels of an organization. High-level executive guest speakers share stories about critical business dilemmas faced in their careers and evaluate student prepared responses to an ethical dilemma they present.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4001 (2) Leadership Challenges II: Exercises in Moral Courage

Part two of a year-long course focusing on values and leadership at all levels of an organization. High level executive guest speakers share stories about critical business dilemmas faced in their careers and evaluate student-prepared responses to an ethical dilemma they present.

Requisites: Requires a prerequisite course of CESR 4000 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4005 (3) Business Solutions for the Developing World: Learning through Service

Explores business opportunities to meet the needs of those living at the base of the economic pyramid. By partnering with organizations such as the Peace Corps and businesses with a social mission, students will learn how business (for-profit, social business, NGOs, social entrepreneurs, etc.) can meet the needs of the poor and operate sustainably.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 3007

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 90-180 units completed.

CESR 4010 (3) Microfinance

In the last two decades, microfinance initiatives have provided the primary worldwide impetus to promote economic independence for the poor (1.4 billion). Microfinance links the financial markets with entrepreneurship to create a platform that facilitates financial inclusion to the poor. In a semester long project, students build a hypothetical financial institution that provides access to credit, saving, insurance and other services to a segmented poor population.

Equivalent - Duplicate Degree Credit Not Granted: FNCE 4832

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 90-180 units completed.

CESR 4130 (3) Sustainable Operations

Sustainable operations examines business strategies in response to environmental and social challenges. Grounded in resource efficiency, life-cycle thinking and a dose of investigative skepticism, the course assists students to thoroughly understand the scope of costs, benefits and risks associated with driving businesses toward sustainable operations.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 4130

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4430 (3) Corporate Boards in Action

Allows students from any functional area of business to appreciate the difficulties modern boards and management face. Issues addressed include financial strategy; board composition; executive succession, tenure and compensation; management through crisis; sustainability and corporate social responsibility; the challenges and opportunities presented by globalization and international governance issues.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 4430

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4440 (3) Privacy in the Age of Social Media

Privacy = the new currency. In a time where technology allows unprecedented aggregation of personal information use of "private" information is moving faster than social norms and laws can follow. We will dissect the technologies and social trends related primarily to privacy and use of information about individuals to reap profits. A good complement to business intelligence and analytics classes.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 4440

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4821 (3) Values & Power of the Consumer in Society

As a critical stakeholder group, consumers have substantial power to shape business behavior. Students will develop an understanding of the roles business can play in society and the options and limitations that consumers have to influence business by exerting their purchasing power. This class is restricted to non-business majors and will not count toward the business major or business minor.

Requisites: Open to Non Business and Non Sponsored Students.

CESR 4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Social Responsibility.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4826 (3) Exp. Sem-Social Entrepreneurship: Designing a Better World

See the future through the eyes of entrepreneurs who are addressing global and social environmental problems such as poverty and deforestation. Can the social ventures they create to solve these problems survive over time and will they achieve the impact they seek? We will meet some of these social entrepreneurs and, in teams, write case studies to tell their stories.

Equivalent - Duplicate Degree Credit Not Granted: ESBM 4826

Requisites: Restricted to non-Business majors with 60-180 units completed.

CESR 4827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4827 and ACCT 5827

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4828 (3) Experimental Seminar: Corporate Boards in Action

Explores the complexity of corporate boards and the need for values-driven leadership. Students will consider corporate governance topics including: financial strategy, international challenges, ethics, corporate social responsibility, board composition, compensation and crisis management. Throughout the course, students will evaluate their own leadership and decision making abilities as they work together in student-run boards to address issues presented in a variety of case studies.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 4828

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

CESR 4900 (1-3) Independent Study

Intended only for exceptionally well qualified business juniors and seniors. Departmental form required. Department enforced prerequisite: dean and instructor consent.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Dance (DNCE)

Courses

DNCE 1000 (2) Beginning Contemporary Dance Technique

Introduces students to the dynamic capabilities of the body as an articulate means of expression. Presents basic concepts and skills from contemporary dance forms that may include Afro-modern, floor work, inversion, classical modern and improvisation. Classwork develops efficient alignment, strength, flexibility, coordination, rhythm, dynamics and spatial awareness. No experience necessary.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1012 (2) Dance Production

Provides the dancer with an introduction to the types of performance venues available today, and their technical systems and equipment. It will also establish an awareness of how technical theatre design arts may be utilized by a choreographer.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Production

DNCE 1013 (2) Dance Improvisation

An opportunity for students to develop skills of dance improvisation through the exploration of structured movement problems. Students study selected contemporary dance artists whose work stresses improvisation in performance and/or as a training vehicle. Department consent required for dance minors.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Creative Process

DNCE 1017 (3) Dance in Popular Culture and Media

Explores and contextualizes contemporary popular culture and dance. Introduces methods of critical analysis that reveal the rich heritage hidden within and around the dances students commonly encounter at the club, on the street, on television, on the big screen and elsewhere in everyday life. Through watching, reading, and discussion, students discover new meaning in their lived cultural experience.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Dance and Cultural Studies

DNCE 1020 (1) Beginning Contemporary Dance with Experience

Invites students to deepen their somatic awareness, efficient athleticism, and creative voice through the medium of contemporary dance. Continues the investigation of contemporary dance forms that may include Afro-modern, floor work, inversions, classical modern, and improvisation. Classwork will deepen students' alignment, strength, flexibility, coordination, rhythm, dynamics and spatial awareness.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1000 or previous dance experience.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1027 (3) Dance in Cultural Perception and Expression

Explores how the practice of dance can reflect, disrupt, subvert, support, and reinforce cultural expectations, norms and practices. Introduces international and domestic dance traditions and provides context for an interdisciplinary examination. Comparative readings from sociology, anthropology, gender studies, history, post-colonial studies, and political science provide a foundation to understand how cultural identities are negotiated and represented through movement.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts

Departmental Category: Dance and Cultural Studies

Departmental Category: Asia Content

DNCE 1091 (1) Modern 1

Introduces basic skills of modern dance. In-class technique work increases muscle strength, flexibility, and coordination. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 1100 (1) Beginning Ballet

Introduces beginning students to fundamental aspects of classical ballet technique; no previous experience required. Basic principles of alignment, rotation, and movement quality are introduced as the building blocks for success in advanced material. Foundational movements and ballet vocabulary are learned and refined. Students work toward mastery of simple combinations and rhythmic patterns.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1120 (1) Beginning Ballet with Experience

Relies on a demonstrated comprehension of kinesthetic and conceptual principles mastered at the beginning level. New movements from the classical ballet vocabulary are introduced with continued emphasis on alignment, rotation, and movement quality. Ballet sequences are longer and more complex.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1100 or previous ballet experience.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1190 (1) Ballet 1

Beginning ballet covering the basic vocabulary of classical ballet technique. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1200 (1) Beginning Jazz Dance

Introduces various styles of movement unique to jazz dance including improvisation, isolations, and African-influenced polyrhythms. Working within a range of dynamic performance styles, students will learn fundamental dance skills and jazz vocabulary, from which more advanced skills can be developed. Designed for students with little or no dance experience.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1220 (1) Beginning Jazz with Experience

Digs deeper into syncopated movement style of the jazz vernacular by continuing the embodied investigation of the Africanist influence on the form. Demands a rigorous awareness of efficient alignment while engaging with complex movement and challenging rhythmic structures.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1200 or previous dance experience.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1290 (1) Jazz 1

Introduces jazz dance, consisting of a technique warm-up, locomotion across the floor, and a series of dance phrases developed into a short dance combination. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1301 (2) Hip-Hop Dance Technique 1

Introduces students to Hip-Hop dance as a culturally significant form. Students learn history, the social and political forces at work, and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Training addresses flexibility, sequencing, coordination, and performance skills.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 1401 (1) Transnational Fusion Dance: USA and Middle East/North Africa

Introduces a fusion form popularized in 2000: secular dance traditions of the Middle East/North African (MENA) communities in dialog with popular dances of the hip-hop and underground electronic dance music communities. Stretching, hip work, spinal undulations and poly-rhythmic orientations are covered. Educational highlights include discourse regarding cultural appropriation and gender coding in human movement.

Repeatable: Repeatable for up to 2.00 total credit hours.

DNCE 1849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Freshman level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 1901 (1-3) Technique Practicum

Broadens students' exposure to a range of diverse movement material.

Topical course in dance technique, see subtopic for specific form.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technique

DNCE 1908 (1) First Year Dance Seminar

Designed for new dance majors as an introduction to the place of dance within academia and the professional/public spheres. Through the practice of descriptive dance writing, theoretical and physical exploration of discrete pedagogical and choreographic procedures, and interactions with in-class guest artists of different disciplines, students will engage in independent research and physical experimentation, culminating in a final personal presentation and group performance.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Performance

DNCE 2005 (3) Movement Awareness and Injury Prevention for the Dancer

Focuses on safe and effective dance practices supporting longevity and wellness. Areas explored include: experiential anatomy, conditioning, alignment, nutrition, injury prevention, care of common dance injuries, and experience with various somatic practices.

Requisites: Requires a prerequisite course of DNCE 2021 or DNCE 3041 or DNCE 4061 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Somatic Awareness

DNCE 2021 (2) Major Technique

Designed for Dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 2091 (1) Modern 2

Continuation of Modern 1. a developmental sequence of modern dance technique designed to refine the technical/expressive skills required of the professional dancer. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 2098 (1) Performance/Repertory

Students learn and perform dances from the repertory of guest artists. Offered summers only.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Performance

DNCE 2101 (1) Pointe

Introduces the basic training for the art of dancing in pointe shoes. Includes enchainements in pointe shoes and additional conditioning exercises for the feet and legs. Students should be at an Intermediate/Advanced ballet level with a strong understanding of rotation and alignment. No previous pointe experience necessary. Audition required.

Repeatable: Repeatable for up to 4.00 total credit hours.

Recommended: Prerequisite DNCE 3161 or DNCE 4181.

Additional Information: Departmental Category: Major Technique

DNCE 2141 (1) Low Intermediate Ballet

Builds on an existing understanding of alignment, rotation, and movement quality to introduce more mentally and physically difficult movements and enchainements of the classical ballet vocabulary. Students must be able to demonstrate an embodied familiarity with all traditional barre exercises on the first day of class.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1120 or previous ballet experience.

Additional Information: Departmental Category: Technique

DNCE 2191 (1) Ballet 2

Intermediate ballet, covering the complete vocabulary of classical ballet technique. Enchainements are of complex structure. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 2290 (1) Jazz 2

Continuation of Jazz 1. Studies coordination, rhythm, style, and advanced body part isolation in depth. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 2501 (2) African Dance

Explores the technique, styles, and rhythms of regional and national cultures of Africa. Areas of concentration may vary each semester (e.g. Ghana, Mali, Guinea, etc.). Introduces signature attributes common to different countries' dance traditions and features discussions of the musical traditions, histories, cosmologies, philosophies and aesthetics to contextualize and increase familiarity.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technique

DNCE 2701 (2) Contact Improvisation 1

Investigates movement vocabulary and kinesthetic understanding through physical contact and weight-sharing between two or more dancers. Fundamental skills of contact will be introduced and employed in duets and larger group improvisations: rolling, falling, giving and receiving weight, and the use of momentum and gravity.

Additional Information: Departmental Category: Major Technique

DNCE 2849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Sophomore level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 2901 (1-3) Technique Practicum 2

Topical course (second level) in dance technique, see subtopic for specific form. May require an audition.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Major Technique

DNCE 2909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4909 and DNCE 5909

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 3001 (2) Intermediate/Advanced Contemporary Dance Technique

Challenges intermediate and advanced students to refine their understanding and personal approach to the study of international contemporary dance. Demands a deep sense of somatic awareness, efficient athleticism, and creative voice. Floor work, inversions, and improvisation may be included. No audition required.

Repeatable: Repeatable for up to 4.00 total credit hours.

Recommended: Prerequisite DNCE 1000 or DNCE 1020 or any major technique course ending in "1" or previous dance experience.

Additional Information: Departmental Category: Technique

DNCE 3014 (2) Rhythmic Skills for Dancers

Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class. Department consent required for dance minors.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Music

DNCE 3024 (2) Musical Resources for Dance

Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Department consent required for dance minors

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Music

DNCE 3033 (3) Choreographic Resources

Explores movement invention and strategies of choreographic manipulation of body, space and time. Students add to their toolbox of compositional resources through solo and duet studies. Class interrogates and supports the students' developing language for addressing, critiquing and comprehending compositional choices and structures through verbal and written feedback practice. Can be taken out of sequence with DNCE 3043. Formerly DNCE 2033.

Requisites: Requires a prerequisite course of DNCE 1013 and DNCE 2021 or DNCE 3041 or DNCE 4061 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Creative Process

DNCE 3035 (1) Production Practicum

Practical production activities and projects within a designated area of dance design, stage technology, or stage management, normally related to the department's season. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Production

DNCE 3041 (2) Major Technique

Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 3043 (3) Choreographic Process

Examines physical and spatial relationships via group and site specific work. New methods of creative problem solving unearth and mine one's imagination and inspiration, cultivating the individual's unique process of dance-making. Class interrogates and supports students' developing language for addressing, critiquing and comprehending compositional choices and structures through verbal and written feedback practice. Can be taken out of sequence with DNCE 3033.

Requisites: Requires prerequisite courses of DNCE 1013 and DNCE 2021 or DNCE 3041 or DNCE 4061 (all minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Creative Process

DNCE 3101 (1-3) Ballet Practicum

Practical studio training in ballet at the advanced/professional level with a professional company. Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of DNCE 2141 or DNCE 3161 or DNCE 4181 (minimum grade C-).

Additional Information: Departmental Category: Major Technique

DNCE 3161 (1) Intermediate Ballet

Surveys a wide range of the intermediate-level classical ballet vocabulary, focusing on an anatomically sound approach to the material. Students must work efficiently to execute the technique with rhythmic accuracy, clarity of line, propriety of style, and fluency in translating names of steps. Enrollment by audition only.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 3241 (1) Intermediate Jazz

Expands student's performance of the syncopated movement style of the jazz vernacular. Designed for the experienced jazz dancer. Includes dance techniques that further improves alignment, strength, flexibility, and coordination within the jazz idiom through an emphasis on style, rhythm, and more challenging dance combinations.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1220 or previous dance experience.

Additional Information: Departmental Category: Technique

DNCE 3301 (2) Hip-Hop Dance Technique 2

Builds on fundamentals established in Hip-Hop Dance Technique 1. Students deepen their understanding of Hip-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. The course focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 3601 (2) Alexander Technique for Actors and Dancers

Studies how human reaction, coordination, and movement play a role in all activities. Through in-depth class discussions, movement, exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 5601.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) or Theatre (THTR or TBFA, excludes THTR-MIN) majors only.

Additional Information: Departmental Category: Technique

DNCE 3801 (2) Major Technique: Multiple Accompanists

Designed for dance majors. Encompasses range of dance forms that require multiple accompanists. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 3849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Junior level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 3901 (1-3) Technique Practicum

Topical course (intermediate level) in dance technique. See subtopic for specific form. May require an audition.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technique

DNCE 4012 (1) Concert Production

Provides practical experience in producing formal and informal dance concerts. Introduces basic familiarity with production and promotional responsibilities, backstage and front-of-house duties and procedures. Meets with DNCE 5012.

Requisites: Requires a prerequisite course of DNCE 1012 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Major Technique

DNCE 4015 (3) Movement Analysis

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 5015.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Movement Awareness Injury Prevent for the Dancer

DNCE 4016 (3) Creative Dance for Children

Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5016

Requisites: Requires a prerequisite course of DNCE 2033 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Pedagogy

DNCE 4017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance

Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5017

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite or corequisite a Human Diversity core requirement course.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Dance and Cultural Studies

DNCE 4023 (2) Performance Improvisation Techniques

Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5023

Additional Information: Departmental Category: Creative Process

DNCE 4036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction

Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialties of participants.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5036

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Pedagogy

DNCE 4037 (3) Contemporary Concert Dance: Shifting Perspectives in Performance

Focuses on the development of perceptual, descriptive, and analytical skills as well as the ability to apply cultural and critical theory to 20th and 21st century concert dance. Specific pieces of choreography are looked at from a broad range of perspectives.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite or corequisite a Human Diversity core requirement course.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Dance and Cultural Studies

DNCE 4038 (1-3) Dance Repertory

Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5038

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Performance

DNCE 4046 (1) Teaching Practicum

Designed to give students supervised practical teaching skills through practice teaching, discussion, observation (in-person and video), reflection and feedback. Students will develop age appropriate lesson plans, define and refine principles of classroom management and understand the needs of diverse groups of students in a community, academic (K-12) and/or studio setting. All genres of dance are topic relevant.

Requisites: Requires a prerequisite course of DNCE 4036 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Pedagogy

DNCE 4047 (3) Hip-Hop Dance History

Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 5047.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 4053 (3) Advanced Dance Composition

Focuses on deepening the artistic voice and engaging with other art forms. Students explore the integration of technology and collaboration in creative projects and continue to engage in an objective critical process of their own work and the work of others. Meets with DNCE 5053.

Requisites: Requires a prerequisite course of DNCE 3043 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Creative Process

DNCE 4061 (2) Major Technique

Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Major Technique

DNCE 4128 (1) Ballet Repertory

Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and New-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 5128.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Performance

DNCE 4181 (1) Advanced Ballet

Investigates the full range of the advanced-level classical ballet vocabulary, focusing on an anatomically sound approach to the material. Exercises require strength and a deeply subtle understanding of principles of alignment, rotation, epaulement, and movement quality. Class moves quickly through enchainements of complex structure. Enrollment by audition only.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 4261 (1) Advanced Jazz Dance Technique

Refines advanced students' approach to the nuances and virtuosity of jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 5261.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 4701 (2) Contact Improvisation 2

Builds upon skills introduced in DNCE 2701 and moves into more rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 5701.

Requisites: Requires a prerequisite course of DNCE 2701 (minimum grade C-).

Additional Information: Departmental Category: Major Technique

DNCE 4849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Senior level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 4909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 2909 and DNCE 5909

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 4919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5919

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Independent Study

DNCE 4939 (1-3) Dance Internship

Provides an opportunity for upper-division dance majors to serve apprenticeships in the community in work areas related to their major interests and career goals. Internships are available in areas such as arts administration, dance therapy, and technical production. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Independent Study

DNCE 5001 (2) Graduate Technique

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5012 (1) Concert Production

Meets with DNCE 4012.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Production

DNCE 5014 (2) Graduate Rhythmic Skills

Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, poly-meter, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class. Meets with DNCE 3014.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5015 (3) Movement Analysis

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 4015.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Movement Awareness Injury Prevent for the Dancer

DNCE 5016 (3) Creative Dance for Children

Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4016 (with addition of readings and a paper)

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance

Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4017, with addition of graduate papers and/or a project

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5023 (2) Performance Improvisation Techniques

Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4023 (with the addition of written analysis and creative assignments)

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 5024 (2) Graduate Musical Resources

Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Meets with DNCE 3024.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction

Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialities of participants.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4036

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5038 (1-3) Dance Repertory

Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4038

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5047 (3) Hip-Hop Dance History

Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 4047.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5048 (1-4) Performance and Community Engagement

Engages students in harnessing the power of performance for effecting positive social change. Students work collaboratively to create performances and workshop experiences. Readings will provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations to internationally author the future they want. Open to all forms of performance - music, film, dance, theatre.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5052 (1-3) Studio Concert

Provides the opportunity for choreographic and performative synthesis and experimentation via the execution of a project related to the student's major area of creative research. Project must be approved by the student's first reader.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Production

DNCE 5053 (3) Advanced Dance Composition

Meets with DNCE 4053.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 5056 (2) Graduate Teaching Seminar

Examines practical, pedagogical, philosophical, and legal issues in current dance education. The goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. Provides practice in practical application of theoretical material. All genres of dance may be utilized.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5064 (2) Music and Dance Seminar: Collaboration

Investigates music in relation to dance performance, choreography, and teaching. Topics may include: a survey of musical styles and composers; direct experimentation with composition and recording techniques; enhancement of rhythmic versatility; work with accompanist/composers; and/or improvement of analytical listening and writing skills.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5101 (1) Intermediate Graduate Ballet

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5128 (1) Ballet Repertory

Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and Neo-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 4128.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5261 (1) Advanced Jazz Dance Technique

Refines advanced students' approach to the nuances and virtuosity of the jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 4261.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5301 (2) Graduate Hip-Hop

Students deepen their understanding of Hip-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. The course focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only. Meets with DNCE 3301.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 5601 (2) Alexander Technique for Graduate Students

Studies how human reaction, coordination, and movement play a role in all activities. Graduate students will explore direct application to dance training, performance, choreography, and teaching. Through in-depth class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 3601.

Requisites: Restricted to Dance (DNCE) or Theatre (THTR) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5701 (2) Contact Improvisation 2

Moves into rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 4701.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5801 (2) Grad Technique: Multiple Accompanists

Encompasses range of dance forms that require multiple accompanists.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 5901 (1-3) Graduate Technique Practicum

Offers special courses in the technique series. Course may meet at the same time with an undergraduate studio course and includes the practical movement experience with an additional scholarly study of specially chosen issues in dance.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 2909 and DNCE 4909

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 5919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4919

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6009 (1) Research Strategies and Techniques

Examines research methodologies appropriate to the performing arts, particularly theatre and dance. Projects are aimed at familiarizing graduate students with the library and other resources, and the development of thesis and dissertation prospectuses.

Equivalent - Duplicate Degree Credit Not Granted: THTR 6009

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6016 (2) Teaching Lab-Contemporary Dance

Provides opportunity to apply principles and skills introduced in DNCE 5056. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on development, analysis and evaluation of teaching skills.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 6017 (3) Readings in Dance

Serves to familiarize participants on a broad range of issues and artists influencing current dance production, performance, and practices. All genres of dance may be utilized to cultivate new capacities in critical thought, written expression, personal ethics, and artistic depth.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6047 (3) Seminar: Dance

Intensive study of selected topics related to the art of dance, dance criticism, dance aesthetics, and dance in relationship to historical, social, and cultural environments with an emphasis on contemporary American forms and their roots.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6056 (2) Professional Development

Examines current trends and issues in dance education and the professional dance world. Explores curriculum development, administration, and job opportunities along with other topics such as grant writing, community engagement, dance advocacy, and working as an independent artist.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 6073 (3) Choreography

Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 6101 (1) Advanced Graduate Ballet

Open only to graduate dance majors.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 6849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6919 (1-3) Directed Studies

Explores advanced topics in dance not regularly covered in the curriculum of the graduate program.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6949 (1) Candidate for Degree

Requisites: Restricted to Dance (DNCE) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Independent Study

DNCE 6959 (1-6) Master's Thesis

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6969 (1-6) The Graduate Project

Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student's major area of interest. Project must be approved by the graduate faculty advisor.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

Danish (DANE)

Courses

DANE 1010 (4) Beginning Danish I-DILS

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Danish history and contemporary culture and society.

Additional Information: Departmental Category: Danish Courses

DANE 1020 (4) Beginning Danish II-DILS

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Danish history and contemporary culture and society. Department enforce prerequisite: DANE 1010 (min grade C-).

Additional Information: Departmental Category: Danish Courses

DANE 2010 (4) Intermediate Danish I - DILS

Building on the skills that the students have acquired in Beginners Danish I-II, this course offers additional reading, writing, speaking and verbal comprehension. Students will learn to conduct business at a government office, talk about holidays and festivals and discuss conservation and environmental protection. They will read and write small texts, becoming exposed to differences between written and spoken Danish.

Requisites: Requires prerequisite course of DANE 1020 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Danish Courses

DANE 2020 (4) Intermediate Danish II - DILS

Offers extensive reading, writing, speaking and verbal comprehension skills in Danish. The students will discuss Danish history, cultural differences and stereotypes, politics, social groups, learn how to write letters and email in Danish, read short texts and write short essays on the above topics.

Requisites: Requires prerequisite course of DANE 2010 (minimum grade C-).

Additional Information: Departmental Category: Danish Courses

East Asian Languages & Civilizations (EALC)

Courses

EALC 4911 (3) Practicum in Asian Languages 1

Introduces elementary or intermediate East Asian language, culture, and language pedagogy. Department consent required.

Additional Information: Departmental Category: Asia Content

EALC 4912 (3) Practicum in Asian Languages 2

Introduces elementary or intermediate East Asian language, culture, and language pedagogy. Department consent required.

Additional Information: Departmental Category: Asia Content

EALC 4913 (3) Practicum in Asian Languages 3

Introduces elementary or intermediate East Asian language, culture, and language pedagogy. Department consent required.

Additional Information: Departmental Category: Asia Content

EALC 4914 (3) Practicum in Asian Languages 4

Introduces elementary or intermediate East Asian language, culture, and language pedagogy. Department consent required.

Additional Information: Departmental Category: Asia Content

EALC 4930 (1-6) Internship

Selected students are matched with supervised internships in business, public and private service organizations, and educational institutions. Internships focus on opportunities to apply language and cultural skills. Students meet regularly with instructor and supervisor, keep a journal, and submit a final paper.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of JPNS 2120 or CHIN 2120 (minimum grade C).

Recommended: Prerequisite JPNS 3120 or CHIN 3120.

Additional Information: Departmental Category: Asia Content

Ecology & Evolutionary Biology (EBIO)

Courses

EBIO 1010 (3) Introduction to Quantitative Thinking for Biologists

Focuses on the collection, visualization and analysis of data that are relevant for advancing critical thinking, student-directed learning, and the development of quantitative analysis skills, with an emphasis on using R and examples from ecology and evolutionary biology.

Grading Basis: Letter Grade

EBIO 1030 (3) Biology: A Human Approach 1

Lect. Studies the principles of biology and their implications. Central theme is humans and the environment, emphasizing ecology, natural resource conservation, and the interrelatedness of a growing human population. Recommended for nonscience majors.

Additional Information: Arts Sci Core Curr: Natural Science Sequence
MAPS Course: Natural Science

EBIO 1040 (3) Biology: A Human Approach 2

Lect. Continues EBIO 1030, focusing on the function of the human body, and maintenance of dynamic equilibrium in the internal environment in the face of a continually changing external environment. Discusses factors influencing these homeostatic conditions and how and why they change. Recommended for nonscience majors.

Recommended: Prerequisite EBIO 1030 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Sequence

EBIO 1050 (1) Biology: A Human Approach Laboratory

One two-hour lab per week. Provides experiments and exercises relating to concepts presented in EBIO 1030 and EBIO 1040. Uses animals and/or animal tissues. Recommended for nonscience majors. When taken with EBIO 1030, meets the MAPS requirement for natural science: lab.

Additional Information: Arts Sci Core Curr: Natural Science Lab
MAPS Course: Natural Science Lab or Lab/Lec

EBIO 1210 (3) General Biology 1

Lect. Provides a concentrated introduction to molecular, cellular, genetic, and evolutionary biology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec
Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

MAPS Course: Natural Science

EBIO 1220 (3) General Biology 2

Provides a concentrated introduction to organisms, homeostasis, development, behavior, and ecology. Emphasizes fundamental principles, concepts, facts, and questions. Intended for science majors.

Recommended: Prerequisite EBIO 1210 (minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

EBIO 1230 (1) General Biology Laboratory 1

One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 1. Intended for science majors.

Recommended: Prerequisite or corequisite EBIO 1210 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physicl Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science

EBIO 1240 (1) General Biology Laboratory 2

One 3-hour lab per week. Consists of experiments and exercises to provide an extension of basic concepts and scientific approaches presented in General Biology 2. Intended for science majors.

Recommended: Prerequisite or corequisite EBIO 1220 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physicl Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

EBIO 1300 (1-3) Topics in Biological Sciences

Covers special topics in biology for freshmen or nonmajors. Introduces scientific methods and principles in biology, as well as issues of current interest in biology. Does not count toward the major in EBIO.

EBIO 1940 (3) College Writing for Science Students

Introduces first year students to college writing, focusing on developing academic research and writing skills of particular interest to science students. Emphasizes habits of mind in topic invention, drafting, revision and writing style, as well as critical thinking and information literacy.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

Additional Information: Arts Sci Core Curr: Written Communication

EBIO 2010 (1-3) Environmental Issues and Biology

Lect. Describes how the natural environment is currently stressed by a variety of human actions. Examines the nature of these environmental problems and their impact on living organisms, both human and nonhuman species.

EBIO 2040 (4) Principles of Ecology

Lecture and laboratory. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 2640 and ENVS 2000

Recommended: Prerequisites EBIO 1030 and EBIO 1040 and EBIO 1050 or EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 2070 (4) Genetics: Molecules to Populations

Lect. and rec. Covers principles of genetics and developmental biology at levels of molecules, cellular organelles, individuals and populations; asexual and sexual life cycles; heredity. Recitations allow discussion of genetics problems and implications of genetic principles and provide demonstrations and simulations of genetic processes. Intended for sophomore majors in EBIO.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 2640

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Sequence

EBIO 2090 (3) Tropical Island and Marine Ecology

Examines fundamental concepts of marine ecology, emphasizing organismal diversity, species interactions, dispersal, colonization, physiology and adaptations. Includes study of beach and coral formation, island organisms and their population dynamics. Students may also register for an optional 1 credit, one week, tropical island and coral reef trip that complements the lecture portion of the class but has an additional cost.

Recommended: Prerequisite EBIO 1220 (minimum grade C-).

EBIO 2091 (3) Field Studies in Marine and Island Ecology and Oceanography

Investigates tropical island and marine ecology as well as all four disciplines of oceanography. A three-credit course focused on a tropical island ecology and oceanography field trip that complements the lecture portion of EBIO 2090 and ATOC 3070 with an additional cost. Examines fundamental concepts of marine ecology, emphasizing organismal diversity, species interactions, study of beach and coral formation, island formation, organisms and their population dynamics. The course consists of a one-week field trip to the Keys Marine Laboratory in the Florida Keys and once-weekly class room meeting (of variable duration from 1-4 hours) throughout the semester.

Requisites: Requires a corequisite course of EBIO 2090 or ATOC 3070 or GEOL 3070.

Grading Basis: Letter Grade

EBIO 2640 (5) Honors Principles of Ecology

Lect., lab, and rec. Introduces principles of ecology, emphasizing patterns and processes at various levels of biological organization. Scope global, but examples often from local environment. Laboratory emphasizes techniques of field biology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 2040 and ENVS 2000

Recommended: Prerequisites EBIO 1030 and EBIO 1040 and EBIO 1050 or EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

Additional Information: Arts Sciences Honors Course

EBIO 2840 (1-6) Independent Study: Lower Division

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 3010 (1-2) Teaching Biology

Provides an opportunity to assist in teaching of specific lecture or laboratory section in EBIO under direct faculty supervision. Students must first make arrangements with the appropriate faculty member and turn in a form to the EBIO office.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

EBIO 3040 (4) Conservation Biology

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3040

Recommended: Prerequisite EBIO 2040 or EBIO 2640 or ENVS 2000 (minimum grade C-).

EBIO 3080 (4) Evolutionary Biology

Lect. and lab. Emphasizes the fundamental evolutionary concepts that provide explanations for the diversification of life on Earth.

Specific topics include the evidence for evolution, adaptation by natural selection, speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and processes. Recitations allow students to explore specific topics in more depth and smaller groups.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 3680

Recommended: Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

EBIO 3110 (3) Population and Community Ecology

Presents principles of ecology that relate to the niche, population growth, metapopulations, population interactions (within and between trophic levels), community structure and development, landscape ecology and species diversity.

Recommended: Prerequisite EBIO 1240 or EBIO 2640 (minimum grade C-).

EBIO 3170 (3) Mountain Ecology and Conservation

Focuses on the ecology of mountain environments around the world, including climatic gradients, plant and animal diversity and distributions, habitat zonation, evolutionary processes, and various aspects of montane conservation from habitat change to climate change.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 2040 (minimum grade C-).

EBIO 3180 (3) Global Ecology

Lect. Involves study of ecological principles and problems at the biosphere level. Presents a worldwide approach to populations, biotic resources, ecologic interactions, land use, deforestation, desertification, species extinctions, pollution, environmental quality, global change, and environmental ethics.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

EBIO 3190 (3) Tropical Marine Ecology

Lect. Examines the biology and ecology of marine ecosystems, emphasizing those occurring in tropical regions such as coral reefs. Studies how these ecosystems are changing and the future impact of human stress on the marine environment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite any two-semester introductory biology course.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

EBIO 3240 (4) Animal Behavior

Lect. and lab. Topics include basic concepts and history, methods of study, ethical issues, neurobiology, behavior, the development of behavior, predator-prey relationships, communication, aggression and dominance, mating systems, cognitive ethology, and parental care. When possible, life-history strategies, the evolution of behavior, and behavioral ecology are stressed. Uses animals and animal tissues.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 3270 (3) Ecosystem Ecology

Integrates information from physics (e.g., energetics), chemistry (the behavior of basic elements), and biology (evolutionary traits of species, multiple photosynthetic pathways, etc.) to understand the structure and functioning of ecosystems. Provides the background and necessary information to understand controls on photosynthesis, decomposition, and nutrient cycling across diverse terrestrial and aquatic landscapes.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 (minimum grade C-).

EBIO 3400 (3) Microbiology

Surveys distinguishing characteristics of microorganisms based on structural-functional relationships, taxonomy, growth and physical-chemical agents of control including antibiotics, metabolism and genetics. Introduces applied microbiology emphasizing infectious diseases, basic concepts of immunology and microbial ecology. Uses animals and/or animal tissues.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 3410 (1) Microbiology Lab

Accompanies EBIO 3400.

Requisites: Requires a prerequisite or corequisite course of EBIO 3400 (minimum grade D-).

Grading Basis: Letter Grade

EBIO 3590 (4) Plants and Society

A writing intensive course for majors and non-majors which acquaints students with the history of plant use in our society. Topics center on the evolving relationship between humans and plants as food sources, medicines, fuel, and other products, such as fibers and dyes.

Grading Basis: Letter Grade

EBIO 3630 (4) Parasitology

Lect. and lab. Surveys animal parasites, including life histories; emphasizes parasites of humans. Uses animals and/or animal tissues.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 3680 (5) Honors Evolutionary Biology

Lect., rec., and co-sem. Emphasizes the fundamental evolutionary concepts that provide explanation for the diversification of life on Earth. Specific topics include the evidence for evolution, adaptation by natural selection speciation, systematics, molecular and genome evolution, and macroevolutionary patterns and process. Recitations allow students to explore specific topics in more depth and smaller groups.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 3080

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2070 (minimum grade C-).

Additional Information: Arts Sciences Honors Course

EBIO 3850 (4) Animal Diversity: Invertebrates

Lect. and lab. Offers a broad study of the biology of the most diverse group of organisms on Earth. Areas include ecology, physiology, evolution and morphology of aquatic and terrestrial forms. Uses animals and/or animal tissues.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 3930 (1-6) Internship

Provides an academically supervised opportunity for upper-division students to work in public or private organizations. Projects are usually related to students' career goals. Each project has both academic and work components. Pass/fail only.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

EBIO 3940 (3) Written Communication in the Sciences

Focuses upon communication commonly practiced by scientists, with special emphasis on writing. Directs attention to scientists' strategic use of written arguments, statistical data and visual representations. Prepares students for communication tasks within advanced study and professional work.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr. Written Communication

EBIO 3980 (1) Seminar: Introduction to EBIO Honors

Presents an introduction to the departmental Honors program. Consists of a lecture component on Honors research, thesis, and defense, as well as a seminar component where students present the findings of their library research, conducted under guidance of a faculty mentor, and hear presentations by graduating Honors candidates on their thesis research.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites minimum 3.2 GPA and a declared EBIO major and approval by departmental honors committee.

Additional Information: Arts Sciences Honors Course

EBIO 3990 (1-3) EBIO Honors Thesis Research

Provides an introduction to the departmental Honors program. Consists of individual library research on a potential Honors thesis topic under the guidance of a faculty mentor.

Requisites: Restricted to Ecology and Evolutionary Biology (EBIO) majors only.

Recommended: Prerequisites minimum 3.2 GPA and approval by departmental honors committee.

EBIO 4030 (3) Limnology

Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5030

Recommended: Prerequisites EBIO 1210 and EBIO 1220 (minimum grade C-).

EBIO 4060 (3) Landscape Ecology

Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5060

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

EBIO 4070 (3) DNA Methods in Ecology and Conservation Biology

Acquiring skill with molecular methods in ecology and conservation biology is most quickly accomplished with hands-on experience.

Combines classroom lectures with collecting in the field and laboratory exercises to provide experience extracting DNA, amplifying DNA with the Polymerase Chain Reaction (PCR), designing PCR primers, sequencing DNA and editing and aligning sequences with the Sequencher software.

Requisites: Requires prerequisite course of EBIO 2070 (minimum grade C).

Grading Basis: Letter Grade

EBIO 4080 (4) Freshwater Phycology

Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5080

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4090 (2) Coral Reef Ecology

Includes one week of lectures in Boulder and one week of field studies on one of the most complex and beautiful ecosystems in the world, the Caribbean reefs at Cozumel, Mexico. Two week, fall-semester course beginning after Christmas. Scuba certification required.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite any ecology course is a highly recommended.

EBIO 4100 (3) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5100

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

EBIO 4120 (2-4) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

EBIO 4140 (3) Plant Ecology

Examines the relationships between plants and their physical and biological environments, encompassing physiology, competition, plant-soil and plant-animal interactions, population dynamics, diversity, and influence on ecosystem function.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4150 (1-2) Techniques in Ecology

Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5150

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 and EBIO 2040 or EBIO 2640 (minimum grade C-).

EBIO 4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4160 and GEOL 4160

Recommended: Prerequisites GEOL 3320 or EBIO 3270 and CHEM 1011 (minimum grade C-).

EBIO 4175 (3) The Scientific Basis for Ecosystem Management of Public Lands

An advanced field ecology course emphasizing measurements, statistical procedures and biotic data information management relevant to land management issues. Develops concepts of adaptive ecosystem management using ongoing field studies on public land in the Colorado Front Range.

Recommended: Prerequisites EBIO 3270 and EBIO 4500 (minimum grade C-).

EBIO 4270 (3) Population Genetics

Provides an in-depth introduction to population genetics. Lectures and discussions will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. Following an introduction to population genetic theory, we will investigate current topics in the field.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5270

Requisites: Requires prerequisite courses of EBIO 2070 and EBIO 3080 (all minimum grade C-).

Grading Basis: Letter Grade

EBIO 4290 (4) Phylogenetics and Comparative Biology

Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5290

Recommended: Prerequisite EBIO 3080 (minimum grade C-) or instructor consent required.

Grading Basis: Letter Grade

EBIO 4340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5340 and ENVS 4340 and ENVS 5340

Recommended: Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

EBIO 4410 (4) Biometry

Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5410

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4420 (3) Computational Biology

Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5420

Grading Basis: Letter Grade

EBIO 4440 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5440 and MCDB 4441 and MCDB 5441

Recommended: Prerequisites MCDB 1150 or EBIO 1210 and MCDB 2150 or EBIO 2070 (minimum grade C-).

EBIO 4460 (1-5) Special Topics

Familiarizes students with specialized areas of biology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5460

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4500 (4) Plant Biodiversity and Evolution

Lect. and lab. Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4510 (4) Plant Anatomy and Development

Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant.

Recommended: Prerequisites, EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4520 (4) Plant Systematics

Lect. and lab. Studies the principles and techniques of modern systematics of organisms, illustrated with examples from the plant kingdom, usually the angiosperms. Framework of course is evolutionary and ecological, as well as taxonomic.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5520

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

EBIO 4530 (4) Functional Plant Biology

Lect. and lab. Explores mechanisms of plant functioning and how such functioning relates to the performance of the plant under different environmental conditions. Phenomena include water relations, growth and development, and metabolic processes including photosynthesis, respiration, and responses to stress.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4550 (4) Plant Eco-Evo-Devo

Explores the fundamental principles of plant form from the perspectives of ecological function, evolutionary origin, and developmental dynamics. Students are presented with conceptual and analytical tools to interpret the vast diversity of growth form-function relationships that exist among plants. Laboratory sessions apply concepts presented in lecture and students will engage in original research using light and scanning electron microscopy.

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4600 (4) Evolutionary Ecology

Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5600

Requisites: Requires prerequisite courses of EBIO 2040 and EBIO 3080 (all minimum grade C-).

Grading Basis: Letter Grade

EBIO 4640 (2-4) Plant Field Studies

Includes field-oriented courses offered at irregular intervals during the academic year or during summer sessions.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites EBIO 2040 and EBIO 2640 (minimum grade C-).

EBIO 4660 (4) Insect Biology

Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5660

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4740 (3) Biology of Amphibians and Reptiles

Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5740

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4750 (4) Ornithology

Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5750

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 1230 and EBIO 1240 (minimum grade C-).

EBIO 4760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5760 and MUSM 5760

Recommended: Prerequisites EBIO 1210 and EBIO 1220 and EBIO 2040 and EBIO 2640 (minimum grade C-).

EBIO 4800 (3) Critical Thinking in Biology

Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 5800

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite minimum of 14 hours of EBIO course work.

EBIO 4840 (1-6) Independent Study: Upper Division

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 4860 (1-2) Critical Thinking in Biology - Lab**EBIO 4870 (1-6) Independent Research: Upper Division**

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 4980 (1) Seminar: EBIO Honors Thesis

To be taken during the final academic year prior to graduation. Consists of a lecture component on Honors thesis writing and defense, as well as a seminar component where Honors candidates present their thesis research in a practice defense talk.

Recommended: Prerequisites minimum 3.3 GPA and a declared EBIO major and approval by departmental honors committee.

Additional Information: Arts Sciences Honors Course

EBIO 4990 (1-3) EBIO Honors Thesis Research

To be taken during the final academic year prior to graduation. Consists of the final phase of honors research and thesis preparation under the guidance of a faculty mentor.

Requisites: Restricted to Ecology and Evolutionary Biology (EBIO) majors only.

Recommended: Prerequisites minimum 3.3 GPA and a declared EBIO major and approval by departmental Honors program.

Additional Information: Arts Sciences Honors Course

EBIO 5000 (1) EBIO Colloquia

All first year EBIO graduate students are required to attend the EBIO Colloquia Series. Speakers from around the world and within the department cover topics in all areas of biology.

Repeatable: Repeatable for up to 2.00 total credit hours.

EBIO 5030 (3) Limnology

Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4030

Requisites: Restricted to graduate students only.

EBIO 5060 (3) Landscape Ecology

Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4060

Requisites: Restricted to graduate students only.

EBIO 5080 (4) Freshwater Phycology

Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4080

Requisites: Restricted to graduate students only.

EBIO 5100 (3) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4100

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 5120 (2-4) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 5150 (1-2) Techniques in Ecology

Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4150

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 5240 (3) Advanced Topics in Animal Behavior

Covers special areas of ethology such as sociobiology, animal communication, cognitive ethology, human ethology, moral and ethical issues.

Recommended: Prerequisite EBIO 3240.

EBIO 5270 (3) Population Genetics

Provides an in-depth introduction to population genetics. Lectures and discussions will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. Following an introduction to population genetic theory, we will investigate current topics in the field.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4270

Grading Basis: Letter Grade

EBIO 5290 (4) Phylogenetics and Comparative Biology

Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4290

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EBIO 5320 (3) Current Topics in Evolutionary Biology

Examines six major themes on contemporary evolutionary research: population genetics, natural selection and adaptation, molecular evolution, evolution and development, phylogenetic systematics, and macroevolution. Emphasizes recent primary literature and sophisticated mastery.

Requisites: Restricted to graduate students only.

EBIO 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4340 and ENVS 4340 and ENVS 5340

Recommended: Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

EBIO 5410 (4) Biometry

Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4410

Requisites: Restricted to graduate students only.

EBIO 5420 (3) Computational Biology

Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4420

Grading Basis: Letter Grade

EBIO 5440 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4440 and MCDB 4441 and MCDB 5441

Requisites: Restricted to graduate students only.

EBIO 5460 (1-5) Special Topics

Familiarizes students with specialized areas of biology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4460

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 5520 (4) Plant Systematics

Explores principles and techniques in modern plant systematics from lichens and non-vascular plants to lycophytes, ferns, gymnosperms and angiosperms. Framework is evolutionary and ecological, with emphasis on taxonomy of major lineages and families of plants. No prerequisites, but coursework in evolutionary biology, genetics, phylogenetics and/or other botany classes is strongly encouraged.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4520

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EBIO 5570 (3) Advanced Plant Physiology

Evaluates critically various concepts underlying the functioning of plants, including current controversial topics. Emphasizes the responses of plants to various environmental factors.

EBIO 5600 (4) Evolutionary Ecology

Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4600

Grading Basis: Letter Grade

EBIO 5660 (4) Insect Biology

Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4660

Requisites: Restricted to graduate students only.

EBIO 5740 (3) Biology of Amphibians and Reptiles

Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4740

EBIO 5750 (4) Ornithology

Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4750

EBIO 5760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4760 and MUSM 5760

Requisites: Restricted to graduate students only.

EBIO 5800 (3) Critical Thinking in Biology

Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4800

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite minimum of 14 hours of EBIO course work.

EBIO 5820 (1) Graduate Writing Seminar

Enhances writing proficiency, using graduate writing projects to implement the course concepts. Offers understanding of conventions and strategies used in scientific writing to prepare students for academic and professional communication. Department enforced requisite, basic proficiency in English as a written language.

Requisites: Restricted to graduate students only.

EBIO 5840 (1-6) Independent Study (Master's Level)

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6000 (1) Seminar: Introduction to Biological Research

Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.

Requisites: Restricted to graduate students only.

EBIO 6100 (1-3) Seminar in Environmental Biology

Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6120 (1-3) Seminar in Environmental Biology

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6100

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 6200 (1-3) Seminar in Population Biology

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6210

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6210 (1-3) Seminar in Population Biology

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6200

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 6300 (1-3) Seminar in Organismic Biology

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6440 (2) Remote Sensing Field Methods

Explores theory and practical field measurements for validation of airborne and spaceborne spectral image acquisition. Emphasizes radiative scattering properties of soil, vegetation, cryosphere, and atmosphere. Characterization and calibration of instrumentation used to measure these properties.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 6443

Requisites: Requires a prerequisite course of GEOL 4093 or GEOL 5093 (minimum grade D-).

Recommended: Prerequisite GEOL 5240.

EBIO 6840 (1-7) Independent Research (Master's Level)

Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6940 (1) Master's Degree Candidate - Plan II

Instructor consent required.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

EBIO 6950 (1-6) Master's Thesis

Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 7840 (1-6) Independent Study (Doctoral Level)

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 8840 (1-6) Independent Research (Doctoral Level)

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 8990 (1-10) Doctoral Dissertation

Instructor consent required.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Economics (ECON)

Courses

ECON 1078 (3) Mathematical Tools for Economists 1

Teaches mathematical skills and logical thinking for use in economics.

Topics include algebra, graphs, functions, and probability. Includes many "Real world" examples and some illustrative computer assignments.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Departmental Category: Quantitative Economics

ECON 1088 (3) Mathematical Tools for Economists 2

Continuation of ECON 1078. Teaches mathematical skills for use in economics.

Topics include derivatives, optimization and integration.

These skills are used on "real world" problems and illustrated with computer assignments. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admission data and/or CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Departmental Category: Quantitative Economics

ECON 2010 (4) Principles of Microeconomics

Examines basic concepts of microeconomics or the behavior and the interactions of individuals, firms and government. Topics include determining economic problems, how consumers and businesses make decisions, how markets work, and how they fail and how government actions affect markets.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Theory and History of Economic Thought
MAPS Course: Social Science

ECON 2020 (4) Principles of Macroeconomics

Provides an overview of the economy, examining the flows of resources and outputs and the factors determining the levels of income and prices. Explores policy problems of inflation, unemployment and economic growth.

Requisites: Requires prerequisite course of ECON 2010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Theory and History of Economic Thought
MAPS Course: Social Science

ECON 3070 (4) Intermediate Microeconomic Theory

Explores theory and application of models of consumer choice, firm and market organization, and general equilibrium. Extensions include intertemporal decisions, decisions under uncertainty, externalities, and strategic interaction.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or APPM 1350 (all min grade C-). Restricted to students with 22-180 units completed.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 3080 (3) Intermediate Macroeconomic Theory

Introduces theories of aggregate economic activity including the determination of income, employment, and prices; economic growth; and fluctuations. Macroeconomic policies are explored in both closed and open economy models. ECON 3070 and 3080 may be taken in any order; there is no recommended sequence.

Requisites: Requires prerequisite courses of ECON 2020 and ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or APPM 1350 (all min grade C-). Restricted to students with 22-180 units completed.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 3403 (3) International Economics and Policy

Examines national and supranational policies that affect the international economy, with attention to trade barriers, economic nationalism and regionalism, international political economy, exchange market intervention, and international transmission of economic perturbations. Credit given in this course is not included in the calculation of an economics major GPA. May not be taken after either ECON 4413 or ECON 4423.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 2020 (all minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: International Trade and Finance

ECON 3535 (3) Natural Resource Economics

Integrates economic analysis with life science aspects of natural resource systems to develop social policies for use of natural resources. Studies economists' approaches to resources policy analysis and applies them to energy, forestry, fisheries, mineral and water systems. Credit given in this course is not included in the calculation of an economics major GPA.

Equivalent - Duplicate Degree Credit Not Granted: ECON 4535

Requisites: Requires prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Natural Resources and Environmental Economics

ECON 3545 (3) Environmental Economics

Highlights causes of excessive environmental pollution and tools for controlling it through economic analysis, values of preservation and distribution of costs and benefits from environmental protection programs. Credit given in this course is not included in the calculation of an economics major GPA.

Equivalent - Duplicate Degree Credit Not Granted: ECON 4545

Requisites: Requires prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Natural Resources and Environmental Economics

ECON 3616 (3) Employment, Wages and the Future of Work

Examines how automation, globalization and information technology are changing which jobs get done, by whom and how much they pay. Illustrates how basic labor supply and demand theory helps predict the impact of technological progress on occupational composition, income inequality and the nature of work itself. These theoretical tools also guide our search for appropriate public policy responses. Credit given in this course is not included in the calculation of an economics major GPA.

Requisites: Requires a prerequisite course of ECON 2010 (minimum grade C-). Economic (ECON) majors are excluded from taking this course. ECON minors are allowed to enrolled.

Additional Information: Departmental Category: Labor and Human Resources

ECON 3784 (3) Economic Development and Policy

Introductory course in Economic Development, designed for non-majors. Students are introduced to the major issues in development economics. Explores empirical, theoretical and policy issues in economic development. Emphasis is placed on the controversial issues in this literature, requiring students to explore competing, and often conflicting, perspectives of these issues.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 2020 (all minimum grade C-). Economic (ECON) majors are restricted from taking this course. ECON minors are allowed to enrolled.

Additional Information: Departmental Category: Economic Development

ECON 3818 (4) Introduction to Statistics with Computer Applications

Introduces statistical methods and their applications in quantitative economic analysis.

Requisites: Requires prerequisite courses of ECON 2010 and 2020 and either ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or APPM 1350 (all minimum grade C-). Restricted to students with 22-180 units completed.

Additional Information: Departmental Category: Quantitative Economics

ECON 4050 (3) Market Design

Develops foundations for the modern market design practices. Economists are increasingly involved in studying and designing practical market mechanisms. Includes topics such as designing efficient matching markets (students to schools, doctors to hospitals), designing auction mechanisms (Google, Facebook, government) and designing market platforms (eBay, Amazon).

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 4060 (3) Choice Theory and Economic Ethics: Good, Bad and Happiness

Critiques how economists model and judge behavior. How we judge is contrasted with other moral philosophies. Economists assume individuals behave in their own best interests. What does this mean and is it true? Looks at research from psychology and neuroscience. Quizzes and a multi-step research paper, designed for students who love to question, research, write and rewrite.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

Recommended: Prerequisite ECON 3080.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 4070 (3) Topics in Microeconomics

Studies utility maximization under uncertainty, risk, game theory, moral hazard, and adverse selection. Applications include insurance markets and the theory of contracts.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 4111 (3) Money and Banking Systems

Discusses money, financial institutions and the monetary-financial system in a modern economy.

Requisites: Requires prerequisite course of ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: Money and Banking

ECON 4211 (3) Public Economics: the Economics of the Government Sector

Focuses on taxation and public expenditures. Topics include economic rationale for government action, economic theory of government behavior, and effects of government policies on allocation of resources and distribution of income.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Public Economics

ECON 4221 (3) Political and Public Choice Economics

Explores decision-making in non-traditional market settings, specifically political market settings, using economic models. We investigate policy outcomes as the product of interactions among individuals in political markets, and analyze how governmental decisions are the result of rational optimizing behavior, even if they do not lead to policies that maximize national welfare.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Public Economics

ECON 4231 (3) Applied Economic Analysis and Public Policy

Applies economic analysis to current issues of public policy. Reviews basic public finance and economic justifications for government action. Examines structure and procedures of Colorado State Legislature. Chooses current legislative issues, reviews relevant economic literature and applies implications through briefing papers and testimony at legislative hearings. Explores the challenges of integrating informed economic analysis into legislative process.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Public Economics

ECON 4242 (3) Urban Economics: The Economics of Cities

Considers the economic forces which drive households and jobs to congregate in metropolitan areas. It then considers the forces within the city which determine how the established cities "look" - how rents vary with location, the distribution of jobs and households within a city, urban sprawl, and the sorting of households between neighborhoods. Finally it considers some government policies relating to land use and housing.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Urban and Regional Economics

ECON 4292 (3) Migration, Immigrant Adaptation, and Development

Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4292 and GEOG 5292

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Urban and Regional Economics

ECON 4309 (3) Economics Honors Seminar 1

For information consult the department's director of honors. Open only to qualified seniors.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course
Departmental Category: Independent Study and Other Courses

ECON 4339 (3) Economics Honors Seminar 2

For information consult the department's director of honors. This course does not count toward major requirements.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 4413 (3) International Trade

Focuses on theories of international trade and its impacts on economic welfare. Analyzes commercial policy, including tariffs, non-tariff barriers, retaliation, regional integration, and factor migration.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: International Trade and Finance

ECON 4423 (3) International Finance

Covers balance of payments; foreign exchange market, income, trade, and capital flows; asset markets adjustment mechanisms; stabilization policies in an open economy; and problems of international monetary systems.

Requisites: Requires prerequisite course of ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: International Trade and Finance

ECON 4504 (3) The New Institutional Economics: Institutions, Contracts and Economic Outcomes

Understand the conceptual tool kit of the New Institutional Economics. The concepts include transaction costs, property rights, credible commitment, and most importantly the roles of formal and informal institutions. We will examine the impact of institutions on contracting and organizations. The goal is to understand how the underlying institutions determine the degree to which societies improve their economic performance.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080, and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Economic History

ECON 4514 (3) Economic History of Europe

Covers evolution of modern economic growth and development in Europe, emphasizing institutional change.

Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Economic History

ECON 4524 (3) Economic History of the United States

Evolution of modern economic growth and development in the U.S. from colonial times to the present emphasizing institutional change.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 (all minimum grade C-).

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: Economic History

ECON 4534 (3) Chinese Economic History in Comparative Perspective

Surveys the economic history of China in a comparative perspective, to understand the history of economic development in China in terms of existing economic theories of growth. The approximate timeline is from the 18th century to the 20th century.

Recommended: Prerequisite ECON 3070.

Additional Information: Departmental Category: Economic History
Departmental Category: Asia Content

ECON 4535 (3) Natural Resource Economics

Analysis of problems associated with socially optimal use of renewable and nonrenewable natural resources over time. Problems of common property resources, irreversible forms of development, and preservation of natural areas.

Equivalent - Duplicate Degree Credit Not Granted: ECON 3535

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 4545 (3) Environmental Economics

Examines the effects of economic growth on the environment; application of economic theory of external diseconomies, cost-benefit analysis, program budgeting, and welfare economics to problems of the physical environment.

Equivalent - Duplicate Degree Credit Not Granted: ECON 3545

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 4555 (3) Transportation Economics and Policy

Provides an overview of the characteristics and structure of transportation markets including aggregate demand, vehicle and mode choice, surface freight and air travel. Explores market failures in the transportation sector including market power and externalities such as pollution, congestion and accidents as well as policies aimed at addressing these issues.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 4616 (3) Labor Economics

Examines the influence of markets, unions, and government on labor allocation and remuneration. Analyzes human capital, discrimination, mobility and migration, productivity, unemployment, and inflation. Compares outcomes under competition with those in a world marked by shared market power and bargaining.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Labor and Human Resources

ECON 4626 (3) The Economics of Inequality and Discrimination

Examines the unique insights available through economic analysis regarding the causes, mechanisms, and consequences of inequality and discrimination. Examines the extent of inequality, the varieties and extents of discrimination, and explores the economic models that suggest explanations.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Labor and Human Resources

ECON 4646 (3) Topics in Health Economics

Growth in health expenditures worldwide over the past three decades has led to an increase in research in health economics and its importance in public policy in developed and developing countries. The purpose of this course is to encourage students to read, think, and do research on issues in health economics. This course will cover issues that are pertinent to the US, other developed and developing countries. It will cover the basics of health economics such as health production functions and the role for government as well as touching on topical issues such as health care reform.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Recommended: Prerequisite ECON 3818.

Additional Information: Departmental Category: Labor and Human Resources

ECON 4697 (3) Industrial Organization and Regulation

Explores neoclassical theory of the firm, the determinants of industrial structure, and the purposes and institutions of public policy to control or maintain a competitive environment.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Industrial Organization

ECON 4717 (3) Economics of Entrepreneurship

Introduces economic analysis of entrepreneurship, its financing, performance and public policy issues. We will investigate in depth the business of venture capital and start-ups. Aims to understand both academic and practical implications from the burgeoning literature on economics of entrepreneurship and private equity.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 (all minimum grade C-).

Additional Information: Departmental Category: Industrial Organization

ECON 4774 (3) Economic Reform in Developing Countries

Explores competing paradigms of economic development, emphasizing the confrontation between the structuralist/dirigiste paradigm and the neoclassical public choice paradigm. Analyzes economic reforms under way in developing countries, including stabilization policy and structural adjustment. Also explores political reforms, including the pluralist revolution and the design of a constitutional framework in developing societies.

Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: Economic Development
Departmental Category: Asia Content

ECON 4784 (3) Economic Development

Explores empirical, theoretical, and policy issues in economic development. Examines topics with reference to the developing countries: income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade, and finance.

Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: Economic Development
Departmental Category: Asia Content

ECON 4794 (3) Economic Growth

Introduces theories explaining why differences in standards of living among countries are so large. Examines a variety of data on historical experiences of economic growth. Surveys recent research on why some countries are so rich and some are so poor, and why some countries grow so quickly and others grow so slowly.

Requisites: Requires prerequisite course of ECON 3070 or ECON 3080 (minimum grade C-).

Additional Information: Departmental Category: Economic Development

ECON 4797 (3) Antitrust and Regulation

Explores two major branches of Industrial Organization—antitrust and regulation. Focus is on developing qualitative and quantitative skills for the legal-economic analysis of issues and problems across a variety of industries. Case studies are used to illustrate concepts, including mergers, collusive agreements, monopolization, and networks. Individual and group projects help develop advocacy and public speaking skills.

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Industrial Organization

ECON 4808 (3) Introduction to Mathematical Economics

Introduces the use of mathematics in economics. Topics include vectors and matrices, differential calculus, and optimization theory, with economic applications.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4818 (3) Introduction to Econometrics

Provides undergraduate economics majors with an introduction to econometric theory and practice. Develops the multiple regression model and problems encountered in its application in lecture and individual applied projects.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4838 (3) Microcomputer Applications in Economics

Teaches basic concepts in Java programming applied to economic models. Development of Web pages and dynamic modeling will be introduced. Students will gain a foundation that can be applied to creating advanced applications relating to analysis of statistical data and custom projects.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4848 (3) Applied Econometrics

Introduces students to the practice of applied regression analysis. Summarizes and reviews the regression technique, explores U.S. census data sources, introduces an advanced statistical software package and provides structured exercises in regression analysis of census data. Concludes with independent research projects analyzing social and economic issues using regression analysis and census data.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4858 (3) Financial Econometrics

Introduces statistical models, estimation and testing procedures used in analyzing financial data for advanced undergraduates. Topics include the modeling of returns, portfolio theory, the capital asset pricing model, options pricing and fixed income securities.

Requisites: Requires prerequisite course of ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (minimum grade C-).

Recommended: Prerequisite ECON 4818.

Additional Information: Departmental Category: Quantitative Economics

ECON 4868 (3) Simulation Modeling in Microeconomics

Computer simulation modeling translates theory into computer code to examine questions numerically; for example, the effects of taxes or emissions permits on welfare and income distribution. We use GAMS (general algebraic modeling system); a version may be downloaded for free. Students must have access to a computer (not needed in the classroom).

Requisites: Requires prerequisite course of ECON 3070 (minimum grade C-).

Additional Information: Departmental Category: Quantitative Economics

ECON 4897 (3) Economics of Organizations

Introduces students to the economic analysis of relationship between firms and incentives within firms. The first part covers classical theories of firm boundaries and contractual relationship between firms. The second part focuses on compensation and incentive issues within firms.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3818 or APPM 4520 or APPM 4570 or CHEN 3010 or CVEN 3227 or MATH 4520 (all minimum grade C-).

Additional Information: Departmental Category: Industrial Organization

ECON 4909 (3-4) Independent Study

Department enforced prerequisites: completion of at least 12 hours of ECON classes and a minimum GPA of 3.00. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of ECON 2010 and ECON 2020 and ECON 3070 or ECON 3080 (all minimum grade C-).

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 4929 (3) Special Topics In Economics

This course number is assigned to upper-level Economics electives that become available on an incidental basis. Refer to the Economics Department for a detailed description of current content. Formerly ECON 4999.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Independent Study and Other Courses

Departmental Category: Asia Content

ECON 4939 (2-6) Internship/Seminar

Offers students the opportunity to integrate theoretical concepts of economics with practical experience in economics-related institutions. The theoretical portion arises from seminars and readings, the practical from activities in organizations related to the economics field. A maximum of 3 credit hours counts toward major requirements. Department consent required.

Requisites: Requires prerequisite courses of ECON 3070 and ECON 3080 and ECON 3818 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Economic (ECON) majors or minors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 7010 (3) Microeconomic Theory 1

Analyzes recent and contemporary literature on fundamentals of economic theory. Considers value theory with particular emphasis on methodology, theory of demand, theory of the firm, game theory, theory of distribution, general equilibrium theory, and welfare economics. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7020 (3) Macroeconomic Theory 1

Discusses behavior of consumption, investment, employment, production, and interest rates in the context of dynamic optimization models. Also considers government, economic growth, and business cycles. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7030 (3) Microeconomic Theory 2

Continuation of ECON 7010. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7040 (3) Macroeconomic Theory 2

Presents the theoretical and empirical application of dynamic macro programming models. Topics include consumption, investment, labor, money, and credit theories. Covers the theory of economic fluctuations and business cycles employing dynamic general equilibrium models. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7050 (3) Advanced Economic Theory

Discusses advanced topics in game theory and general equilibrium. Department enforced prerequisites: ECON 7010 and ECON 7030 and ECON 7818 and ECON 7828.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7818 (3) Mathematical Statistics for Economists

Provides the mathematical foundation for Ph.D. level statistical inference in economic research. The primary topics of the course are probability theory and mathematical statistics including hypothesis testing and classical estimation with an emphasis on the method of maximum likelihood. Instructor consent required.

Additional Information: Departmental Category: Quantitative Economics

ECON 7828 (3) Econometrics

Continuation of ECON 7818. Topics include regression analysis and extensions of the linear regression model to generalized least squares, time series data, and systems of equations. Instructor consent required.

Additional Information: Departmental Category: Quantitative Economics

ECON 8010 (3) Economics of Risk and Time

Focuses on new techniques for analyzing behavior in relation to risk and time.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 8020 (3) Business Cycle Theory and Monetary and Fiscal Policy

Discusses monetary and non-monetary theories of business cycles in the light of empirical evidence and what those theories imply for monetary and fiscal policy. Emphasizes a deep understanding of the mechanisms within models, their comparative statics and comparative dynamics and the importance of, and evidence for, difference parameter values within business cycle models.

Requisites: Restricted to graduate students only.

ECON 8209 (3) Economics Research Methods Workshop 1

Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8211 (3) Public Economics: Fundamental Principles

Presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Economics

ECON 8219 (3) Economics Research Methods Workshop 2

Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8221 (3) Public Economics: Topics in Public Expenditures and Taxation

Explores advanced topics in public economics such as decentralization, state and local government, program analysis, taxation, international tax issues, political economy issues, and market failure.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Economics

ECON 8231 (3) Local Public Economics

Examines subnational governments and systems of governments, the effects of inter-governmental competition, appropriate tax and expenditure responsibilities, and variations in governing institutions. Covers congestible public goods, Tiebout mechanisms, and tax capitalization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Economics

ECON 8413 (3) Seminar: International Trade Theory

Covers theories of comparative advantage, including the classical, factor-proportions, fixed-factor, and noncompetitive markets models. Examines trade policy including trade barriers, market distortions, strategic policy, regional integration, political economy, and factor migration.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8423 (3) Seminar: International Finance

Highlights foreign exchange markets, past and current international monetary mechanisms, and processes of adjustment. Examines the role of international financial markets for the behavior of consumption, investment, saving, and production. Also considers international transmission of business cycles.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8433 (3) Seminar: Topics in Money and International Economics

Explores advanced work in various aspects of international economics, such as empirical trade analysis, public choice, and interactions between real and monetary phenomena in the world economy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8534 (3) Economic History of North America

Examines North America's past from the perspective of economics. Topics include growth and welfare in the colonial period; staple products, agricultural development, and the emerging industrialism in the antebellum period; transformation of the North American economy to 1914; the interwar years and the Great Depression; and economic integration since 1945.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic History

ECON 8535 (3) Environmental Economics I

Considers the allocation of society's scarce environmental resources and government attempts to achieve more efficient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 8545 (3) Environmental Economics II

Provides advanced study of recent advances in environmental economics and explores opportunities for new research. Topics vary with interests of instructor and students.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 8676 (3) Seminar: Labor Economics 1

Focuses on the demand side of labor markets. Topics include standard static and dynamic models of labor demand, labor market discrimination, composition of compensation, labor hierarchies within enterprises, unionization, efficient contracts, and macroeconomics of labor markets.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Labor and Human Resources

ECON 8686 (3) Seminar: Labor Economics 2

Focuses on special topics in labor economics: dynamic theories of labor supply, employment, and unemployment; labor supply in a household framework; and labor market activity and income distribution. Explores both theoretical models and empirical tests in each area.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Labor and Human Resources

ECON 8747 (3) Industrial Organization Theory

Highlights economics of regulation of industry and markets, industry studies, and the application of lab methods to industrial organization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Industrial Organization

ECON 8757 (3) Industrial Organization and Public Policy

Addresses the theory of interaction of firms within markets and industries, emphasizing importance of the number, relative size of firms, market institution, firm strategies and nature of consumer demand.

Examines neoclassical and game theoretic models, empirical industry studies and laboratory tests of theoretical models and policies.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Industrial Organization

ECON 8764 (3) History of Economic Development

Covers in historical perspective the causes of economic development including why some areas develop faster than others and why development occurs more rapidly in some eras than others.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic History
Departmental Category: Asia Content

ECON 8774 (3) Seminar in Transition Economies

Focuses on the problems encountered in countries evolving from planned to market economies. Emphasizes applications of new and traditional models of economic growth and analysis of problems unique to formerly planned economies.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic Development

ECON 8784 (3) Economic Development

Explores empirical, theoretical and policy issues in economic development. Examines political economy, income distribution and poverty, demographic change, labor force employment and migration, human capital, physical capital, natural resources and the environment, industrial structure, international trade and finance, stabilization policy and structural adjustment.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic Development

ECON 8828 (3) Seminar: Econometrics 1

First semester of two-semester sequence in econometrics for PhD students. Studies least squares and generalized least squares estimation of linear econometric models. Asymptotic (large sample) theory of inference. Some topics in the estimation of microdata.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8838 (3) Seminar: Econometrics 2

Teaches the advanced level of econometrics theory. Topics include asymptotic theory, maximum likelihood estimation, limited dependent variables analysis and other frontier areas of econometrics such as the method of moment estimation, semiparametric and nonparametric estimation procedure.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8848 (3) Applied Microeconometrics

Presents a "user's guide" to conducting empirical research in applied microeconomics. Begins with a primer on an industry-standard econometric software package including programming techniques and data management. Introduces advanced econometric techniques including panel data methods, IV, matching models, regression discontinuity and limited dependent variables models. Concludes with a research project requiring a replication and/or extension of an existing published paper

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8858 (3) Computational and Structural Estimation Methods

Teaches students to construct a variety of applied economic models, obtain parameter values through calibration or estimation techniques and uses the resulting models to conduct policy simulations.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8909 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

Education (EDUC)

Courses

EDUC 1500 (1) Success Strategies in Higher Education

Introduces students to learning theories and a range of college success strategies to deepen their engagement with their academic work.

Students will learn metacognitive practices to identify the values and aims driving their academic ambitions and craft their most successful path through their undergraduate experience.

Repeatable: Repeatable for up to 2.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 1580 (3) Energy and Interactions

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1580

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: General Education

EDUC 2020 (1) Step 1: Inquiry Approaches to Teaching

Invites science, mathematics and engineering students to explore teaching as a career by providing first-hand experiences teaching science/math lessons in local elementary classrooms. Introduces theory and practice necessary to design and deliver excellent instruction. Master teachers provide ongoing support and feedback. Meets weekly on CU campus (1.5 hours/week) and involves five visits to an elementary school.

Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, AS Open Option majors, College of Engineering majors, Education minors, EDEL, EDMU, EDEN, EDMA, EDSC, EDSS, EDFR, EDGR, EDLT, EDRO or EDSP majors only.

Additional Information: Departmental Category: General Education

EDUC 2025 (1) Step 1: Inquiry Approach to Teaching in Informal Settings

Invites science, mathematics and engineering students to explore teaching and learning in informal K-12 environments. Introduces theory and practice necessary to design and deliver excellent instruction. Meets weekly on CU campus (1.5 hours/week) and requires participants to work a minimum of five hours with K-12 students at STEM-related special events such as science fairs, after school programs, and science camps.

Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, Arts and Sciences Open Option majors, College of Engineering majors, or Education minors only.

Additional Information: Departmental Category: General Education

EDUC 2030 (1-2) Step 2: Inquiry-Based Lesson Design

Builds on EDUC 2020 and further develops lesson design and inquiry-based teaching practice. Offers opportunity to explore teaching career and learn about middle school culture. Master teacher provides support as students design and deliver lessons in middle school classrooms.

Emphasizes assessment of student learning. Meets weekly on CU campus (1.5 hours/week) and involves five visits to a local middle school.

Requisites: Prereq course of EDUC 2030 (min grade C-). Rstr to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, AS Open Option majors, ENGR majors, EDUC minors, EDEL, EDMU, EDEN, EDMA, EDSC, EDSS, EDFR, EDGR, EDLT, EDRO or EDSP.

Additional Information: Departmental Category: General Education

EDUC 2050 (1) Step into Humanities Teaching

Invites students in humanities and social sciences to explore teaching as a career by providing first-hand experiences working with children.

Introduces theory and practice for the design of text-based, equity-focused instruction. Students receive support and feedback from experienced educators. Meets weekly on CU campus (1.25 hours/week). Requires additional time at a practicum site.

Additional Information: Departmental Category: General Education

EDUC 2125 (3) History of American Public Education

Provides an overview of the history of American education by exploring major reforms efforts from the common school movement to "Nation at Risk." Examines what intellectuals were thinking about public schools and what ordinary people experienced in them. Assesses how differences in race/ethnicity, class, gender, and power shaped public schools.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: General Education

EDUC 2150 (3) Education in Film

Provides opportunities to view and analyze how facets of education are represented (or misrepresented) in film. Considers narratives constructed about education and how those stories fuel popular conceptions of and assumptions about students, teachers, and schools. Examines how issues of race, class, and gender are embedded in how films represent schools, teachers, students, and communities.

Additional Information: Departmental Category: General Education

EDUC 2400 (3) Cultural Diversity and Awareness

Enhances students' self-awareness in a variety of educational and cultural settings. Investigates self within a cultural context, inviting students to engage more deeply with their cultural assumptions and lenses, as well as the cultural practices and beliefs of other distinct groups. Explores themes relating to diversity through works of fiction, cultural contexts, contemplative practices, poetry, music and experiential activities.

Additional Information: Departmental Category: General Education

EDUC 2625 (3) Teaching English as a Second Language

Exposes students to strategies used to teach English as a second or foreign language. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English as a second language. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

Additional Information: Departmental Category: General Education

EDUC 2800 (1-3) Special Topics

Designed to meet needs of students with topics of interest.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: General Education

EDUC 2910 (1-3) Field Practicum 1

Offers supervised campus and off-campus experiences tied to course work in the INVST program. See also EDUC 2920.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 2919 (3) Renewing Democracy in Communities and Schools

Examines curriculum theory, K-12 reform, and the concepts of citizenship, democracy, power, and diversity through classroom discussion and participation in a school-based Public Achievement program. Students will dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions.

Equivalent - Duplicate Degree Credit Not Granted: INVS 2919

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: General Education

EDUC 2920 (1-3) Field Practicum 2

Offers supervised campus and off-campus experiences tied to course work in the INVST program. See also EDUC 2910.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 3013 (3) School and Society

Introduces students - both future teachers and those simply interested in education - to pressing issues surrounding education within the United States. The course reveals the complex relationship between schools and the larger society of which they are a part. Examines issues of diversity and equity from different disciplinary lenses, including history, philosophy, sociology and anthropology.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Contemporary Societies

Departmental Category: General Education

EDUC 3570 (3) Learning With Technology In and Out of School

Examines ways digital media are changing the way young people learn, play, make friends, and participate in civic life. Studies widely implemented digital tools intended to support literary, math, and science learning of children ages 4-18. Involves brief internship (5 hours outside class) and design projects that integrate these tools to transform in either a classroom or after-school program.

Additional Information: Departmental Category: General Education

EDUC 3621 (1-3) Art for the Elementary Teacher

Introduces elementary education students to art education. Introduces many visual art techniques, art media and processes used in art education. Includes hands-on studio art experiences in a format that supports subjects such as literature, writing, music and social studies. Emphasizes the role of art education and materials in supporting the artistic development and visual literacy of children. Department enforced prerequisite: completion of 30 hours of course work.

Requisites: Restricted to School of Education (EDUC) undergraduates only

Additional Information: Departmental Category: Elementary Education

EDUC 4015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace corps and Volunteer Agencies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5015

Additional Information: Departmental Category: General Education

EDUC 4023 (3) Differentiating Instruction in Diverse Secondary Classrooms

Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning. Includes practicum.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4351

Requisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4050 (3) Knowing and Learning in Mathematics and Science

Explores current theories of learning in mathematics and science at the secondary level. This course focuses on learners' opportunities to learn mathematics and science in a classroom context from the perspective of different theoretical orientations. Students examine their own assumptions about learning, and critically examine the needs of a diverse student population in the classroom.

Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, Arts and Sciences Open Option majors, College of Engineering majors, or Education minors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4060 (3) Classroom Interactions

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts.

Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5060

Requisites: Restricted to School of Education (EDUC), Mathematics-Secondary Education (EDMA) or Science-Secondary Education (EDSC) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4112 (3) Educational Psychology and Adolescent Development

Analyzes fundamental concepts from psychology and the learning sciences to understand how educators can support youth development in and out of school. Includes service learning requirement.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4114

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Secondary Education

EDUC 4125 (3) Secondary World Language Methods

Presents and discusses issues in secondary school curriculum, instruction, and classroom management as they play out in world language classroom. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experiences.

Requisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4135 (3) Story and Memoir

Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of "how one remembers one's own life." Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5135

Additional Information: Departmental Category: Secondary Education

EDUC 4161 (1-3) Children's Literature

Addresses reading and evaluation of books, children's, interests, authors and illustrators, folk literature, multicultural literature, modern fanciful tales, and trends.

Additional Information: Departmental Category: General Education

EDUC 4222 (3) Language Study for Educators

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5222

Additional Information: Departmental Category: General Education

EDUC 4232 (3) Language and Literacy across the Curriculum

Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5235

Requisites: Restricted to undergraduate Science-Secondary Education (EDSC) or Mathematics-Secondary Education (EDMA) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4295 (4) Reading and Literacy in the Secondary Classroom

Examines ways in which adolescents develop literacy through reading, writing, speaking, viewing, and listening. Students learn to plan and organize literacy instruction based on ongoing assessment, to draw on and develop learner's linguistic skills related to reading, to support learner's reading comprehension skills, and to support their learning through oral language development.

Requisites: Requires a corequisite course of EDUC 4342 or EDUC 5345.

Restricted to undergraduate English - Secondary Education (EDEN) or English - Secondary Education (EDSS) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4311 (3) Children's Literature and Literacy Engagement in Elementary Schools

Focuses on teaching children's literature in elementary schools & youth organizations. Participants will understand theoretical and developmental processes associated with literary learning, methods for teaching literature in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.

Requisites: Restricted to Elementary Education (EDEL) or Education (EDUC-MIN) students only.

Additional Information: Departmental Category: Elementary Education

EDUC 4312 (3) Perspectives on Science

Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5315

Additional Information: Departmental Category: General Education

EDUC 4318 (3) The Nature of "English Language Arts"

Considers historical and ongoing controversies concerning the nature of "English" as an academic field of study and of "English Language arts" as a school subject. Integrates understandings of subject-matter specialization, of approaches to teaching this contested subject, and of the diverse learners that teachers seek to prepare for 21st century literacies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5318

Additional Information: Departmental Category: General Education

EDUC 4320 (3) Reading Instruction for Elementary Schools

Participants will engage theories and processes of literacy learning, reading development, and equity-oriented teaching. Students will learn, develop, and enact instructional strategies and lessons to support all students' successful participation in a range of print and multimodal literacy practices embedded in reading instruction in elementary classrooms.

Requisites: Requires corequisite course of EDUC 4321. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4321 (3) Writing Instruction for Elementary Schools

Participants will engage theories and processes of literacy learning, writing development, and equity-oriented teaching. Students will learn, develop, and enact instructional strategies and lessons to support all students' successful participation in a range of multimodal literacy practices embedded in writing instruction in elementary classrooms.

Requisites: Requires corequisite course of EDUC 4320. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4331 (3) Elementary Social Studies Methods

Prepares teacher education candidates for teaching social studies in a social justice and equity context. Participants will understand theoretical and developmental processes associated with social studies learning, culturally responsive teaching pedagogy in social studies, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards.

Requisites: Requires corequisite courses of EDUC 5215 and EDUC 4341. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4341 (3) Elementary Reading Assessment and Instruction

Builds on knowledge and teaching practices introduced in EDUC 4320. Addresses five critical components of reading. Refines understanding of research-based practices for diagnostic assessments and intervention, and teaching strategies for elementary age learners. Prepares candidates to deliver a comprehensive reading curriculum in the elementary grades.

Requisites: Requires corequisite courses of EDUC 4331 and EDUC 5215. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4342 (3) Writing in Humanities Classrooms

Fosters understandings of diverse students' writing processes and the development of a repertoire of research-based teaching practices. Emphasizes writing as a tool for both developing and communicating understandings across a range of settings.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5345

Requisites: Requires a corequisite course of EDUC 4295 or EDUC 5295. Restricted to English - Secondary Education (EDEN) or English - Secondary Education (EDSS) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4351 (3) Differentiating Instruction in Diverse Elementary Classrooms

Focuses on differentiating and individualizing instruction for elementary school students including culturally, linguistically and ability diverse students. Includes theoretical and practical orientations to planning instruction and assessment as well as providing information regarding teachers' and families' legal rights and responsibilities. Includes hands-on experiences in elementary school settings.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4023

Requisites: Requires corequisite course of EDUC 5205. Restricted to Music (EDMU) Education majors or Elementary (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4411 (3-4) Educational Psychology for Elementary Schools

Integrates theories and ideas from elementary school child development, educational psychology and the learning sciences. Explores theories of learning and child development and considers implications for teaching, student engagement and the design of equitable and effective learning environments. Students are required to attend a practicum off-site for this class.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: General Education

EDUC 4425 (3) Introduction to Bilingual/Multicultural Education

Provides a comprehensive survey of bilingual-multicultural education programs for language minority students. Includes an overview of the history and legislation related to bilingual education and English as a second language. Presents various models, philosophies, and theoretical underpinnings of bilingual education and ESL.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5425

Additional Information: Departmental Category: General Education

EDUC 4460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5460 and PHYS 4460 and PHYS 5460

Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 4513 (2) Education and Practice

Meets during student teaching assignment. Includes topics of concern to teachers, such as classroom organization and management, lesson planning, assessment, preparation of edTPA, etc.

Requisites: Requires corequisite course of EDUC 4691 or 4712 or 4722. Restricted to EDEL, EDEN, EDFR, EDGR, EDJP, EDLT, EDMA, EDRU, EDSC, EDSP or EDSS majors only.

Additional Information: Departmental Category: General Teacher Education

EDUC 4610 (2-3) Math and Science Education

Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science and argumentation in mathematics and science. Department enforced prerequisite: students admitted to the Learning Assistant program.

Additional Information: Departmental Category: General Education

EDUC 4691 (10) Student Teaching: Elementary School 1

Kindergarten through sixth grades. Department enforced prerequisite: completion of all education and content-specific arts and sciences requirements, and passing required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to Elementary Education (EDEL-LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4712 (10) Student Teaching: Secondary School

Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science or social studies. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to EDEN, EDJP, EDLT, EDMA, EDRU, EDSC or EDSS (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4716 (3) Basic Statistical Methods

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.

Additional Information: Departmental Category: General Education

EDUC 4722 (5) Student Teaching: Secondary School 2

Student teacher apprentices in a middle/junior high or senior high school. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to EDFR, EDGR or EDSP (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4732 (4-12) Student Teaching K-12

Required experience for music students seeking education at both elementary and secondary levels. Department enforced prerequisites: completed all education and content-specific music courses and passed required licensure exam.

Requisites: Requires corequisite course of MUSC 4193. Restricted to EDMU (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4742 (9) Student Teaching: Secondary for Engineers

Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science or social studies. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires a prerequisite course of EDUC 4513 or EDUC 4050 (minimum grade C-). Restricted to EDMA or EDSC majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Secondary Education

EDUC 4800 (1-9) Special Topics

Designed to meet needs of students with topics of pertinent interest.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4810 (1-9) Special Topics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6811 and MCDB 4811 and MCDB 5811

Additional Information: Departmental Category: Graduate Education

EDUC 4822 (3) Teaching and Learning Chemistry

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology, and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

Requisites: Requires prerequisite course of CHEM 1133 or CHEM 2100 or CHEM 1371 (minimum grade C-).

Additional Information: Departmental Category: General Education

EDUC 4831 (3) Advanced Peer Education

Second semester of an academic year's training for students interested in peer counseling. Expand upon what you learned in ARSC 2274. Focus on presentations, leadership, and group facilitation. Basic group leadership, facilitation theory, and technique taught. Co-create and co-lead your own small groups/presentations for other CU students. Offered only spring semesters.

Requisites: Requires prerequisite course of ARSC 2274 (minimum grade D-).

Additional Information: Departmental Category: General Education

EDUC 4833 (3) Teaching and Learning Earth Systems

Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). Focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions, and developing effective discourse within and outside the classroom.

Requisites: Requires prerequisite course of ATOC 1060 or ENVS 1000 or GEOL 1010 or GEOL 1020 or GEOL 1060 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Teacher Education

EDUC 4840 (1-4) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4910 (3) Peer Counseling Practicum

Controlled enrollment. Credit given for peer counseling activities. Students are selected to participate in this class and act as peer counselors or TAs for the peer counseling training. Repeatable up to 9 total credit hours.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: General Education

EDUC 4912 (1) Practicum in Teacher Education

Provides in-school practicum experience.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 5005 (3) Advanced Social Foundations of Education

Critically examines the intellectual and political forces that shape the aims, policies, and practices of K-12 education in the United States.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace Corps and Volunteer Agencies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4015

Additional Information: Departmental Category: Graduate Education

EDUC 5035 (3) Proseminar: Parent and Community Involvement

Focuses on models and strategies for improving parent and community involvement in the schools. Discusses administrative concerns, such as parent advisory councils, and instructional concerns, such as helping children with school assignments.

Additional Information: Departmental Category: Graduate Education

EDUC 5060 (3) Classroom Interactions

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts.

Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4060

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5065 (3) Curriculum Theories

Examines four central curricular traditions: progressive; conservative; radical; and spiritual. Highlights the strengths and weaknesses of various writers within each tradition with attention paid to the conceptual features and the practical implications of each educational view.

Encourages students to examine their own educational assumptions.

Additional Information: Departmental Category: Graduate Education

EDUC 5070 (3) Spirituality and Religion in Education

Examines features of religion, spirituality, and a liberal arts education, so as to further understand the constitutional, historical and cultural constraints on, and acceptable approaches to the study of religion and spirituality in American education. Specifically explores aspects of a contemplative orientation and the degree to which such an orientation should/can be pursued in K-12 public and higher education.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5075 (3) Sociology in Education

In-depth analysis of theories and concepts in sociology and education. Evolution of curriculum, organization, and enrollment characteristics of American schools. Schooling, race, class, culture, gender, stratification, and educational reform in light of paradigmatic change in theories and concepts of sociology.

Additional Information: Departmental Category: Graduate Education

EDUC 5085 (3) History of American Education

Highlights social and intellectual history perspectives of American educational history, major reform movements from the 19th century to Dewey, and assessment of how differences of race, class, ethnicity, religion, power, and gender affected American education.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5105 (3) Teaching for Understanding and Equity

Addresses perspectives and evidence-based teaching practices that promote equity and access to conceptual understanding. Introduces the knowledge base on effective and socially just teaching practices, and the theories and research that support these practices. Explores the impact of theory and research on classroom instruction.

Additional Information: Departmental Category: Graduate Education

EDUC 5115 (3) Issues in School Change and Reform

Examines recent developments in teaching, and trends in the philosophy and practice of education. Focuses special attention on a variety of issues central to school reform.

Additional Information: Departmental Category: Graduate Education

EDUC 5135 (3) Story and Memoir

Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of "how one remembers one's own life." Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4135

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5145 (3) Gender, Literacy, and the K-12 Classroom

Explores and critiques various conceptions of gender within popular and scholarly publications that have influenced how gender and sexual diversity is approached in classrooms. Builds a theoretical stance toward gender and sexual diversity that supports equity, engagement and achievement for all children and youth. Discusses teaching strategies that thoughtfully take into account gender identities and equity.

Additional Information: Departmental Category: Graduate Education

EDUC 5165 (3) Children's Literature

Involves reading and evaluation of picture books, and emphasizes children's interests, authors and illustrators, multicultural literature, the components of narrative, and the features of illustrations. Examines connections between children's literature and children's development as writers.

Additional Information: Departmental Category: Graduate Education

EDUC 5205 (3) Elementary Mathematics Theory and Methods

Provides pre-service teachers opportunities to explore contemporary theories of learning, curriculum development, and pedagogical strategies pertaining to teaching elementary-level mathematics. Blends exploration in mathematical content with development of sophisticated mathematical models for teaching.

Requisites: Requires corequisite course of EDUC 4351. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 5215 (3) Elementary Science Theory and Methods

Provides pre-service elementary teachers opportunities to explore contemporary theories of learning, curriculum development, pedagogical strategies, and assessment. Blends scientific content, pedagogy, and practical applications.

Requisites: Requires corequisite courses of EDUC 4331 and 4341. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 5222 (3) Language Study for Educators

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4222

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5235 (3) Language and Literacy Across the Curriculum

Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4232

Requisites: Restricted to EDCI, EECD, EFPP, EPSY or REME graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5245 (3) Foundations of Reading Instruction K-12

Comparatively analyzes current and emerging philosophies and programs in K-12 with focus on teaching reading and thinking skills.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5255 (3) Digital Literacies and New Media

Engage in digital reading and writing experiences using tools for communication, collaboration, design and research. Students will discuss and critically reflect on the role of technology in literacy instruction, grounded on learning and literacy theories. Connections to English language arts include genre study of literary and nonfiction texts and using quality children's literature as mentor texts for multimodal craft.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5265 (3) Processes in Writing

Examines processes writers use from early ages to maturity by investigating current research related to writing curriculum, instruction, and policy. Includes opportunities for students to engage in inquiry related to writing curriculum and instruction in K-12 classrooms.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5275 (3) Assessment in Literacy

Assumes an interactive model of reading and supports the perspective of assessment as interrelated with curriculum and instruction; examines principles that guide the selection and interpretation of assessment strategies and tools, with a focus on students who are experiencing difficulties with literacy.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5285 (3) Reading Clinic Procedures K-12

Focuses learning on a select group of K-12 students to assess reading proficiency, develop appropriate instructional goals, and provide instruction that addresses these goals. Emphasis on interpreting assessment data, extending a repertoire of instructional strategies, and developing and implementing a strong instructional plan.

Requisites: Requires a prerequisite course of EDUC 5275 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5295 (4) Reading and Literacy in the Secondary Classroom

Examines ways in which adolescents develop literacy through reading, writing, speaking, viewing and listening. Students learn to plan and organize literacy instruction based on ongoing assessment, to draw on and develop learner's linguistic skills related to reading, to support learner's reading comprehension skills and to support their learning through oral language development. Includes a school-based practicum experience.

Requisites: Requires a corequisite course of EDUC 4342 or EDUC 5345. Restricted to EDCI majors only.

Additional Information: Departmental Category: Graduate Education

EDUC 5315 (3) Perspectives on Science

Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4312

Additional Information: Departmental Category: Graduate Education

EDUC 5316 (3) Nature of Social Studies and Social Studies Education

Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI), Social Studies-Secondary Educ. (EDSS), Anthropology (ANTH), Economics (ECON), Geography (GEOG), History (HIST) or International Affairs (IAFS) majors only.

Additional Information: Departmental Category: Graduate Education

EDUC 5317 (3) Perspectives on Mathematics

Explores the historical development of mathematics as a human construct, and the relationship between the discipline and the contemporary school mathematics curriculum. Focuses on the sociology of mathematics education and how cultural traditions and societal needs influence the school mathematics curriculum and educational practice.

Additional Information: Departmental Category: Graduate Education

EDUC 5318 (3) The Nature of "English Language Arts

Considers historical and ongoing controversies concerning the nature of "English" as an academic field of study and of "English Language arts" as a school subject. Integrates understandings of subject-matter specialization, of approaches to teaching this contested subject, and of the diverse learners that teachers seek to prepare for the 21st century literacies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4318

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5325 (3) Teaching Literature in Middle and Secondary Schools

Provides teachers of English with background and experiences relevant to using reading, writing, and a range of other classroom social languages to teach literature to a culturally and intellectually diverse population of students. Explores relevant literary theories, texts, and genres, and examines contemporary and historical perspectives on the meaning and function of stories in both personal and democratic public life.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI), English - Secondary Education (EDEN), or Social Studies-Secondary Educ.(EDSS) majors only.

Additional Information: Departmental Category: Graduate Education

EDUC 5345 (4) Writing in Humanities Classrooms

Fosters understandings of diverse students' writing processes and the development of a repertoire of research-based teaching practices. Emphasizes writing as a tool for both developing and communicating understandings across a range of settings.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4342

Requisites: Requires a corequisite course of EDUC 4295 or EDUC 5295. Restricted to EDCI majors only.

Additional Information: Departmental Category: Graduate Education

EDUC 5355 (3-4) Methods and Materials in Secondary Social Studies

Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching the social studies in middle and high schools. Examines the Colorado Academic Content Standards.

Requisites: Requires a prerequisite course of EDUC 4295 or EDUC 5295 and EDUC 5325 (all minimum grade C-). Restricted to Educ-Curriculum Instruction (EDCI) or Social Studies-Secondary Educ (EDSS) majors only.

Recommended: Corequisite EDUC 4023.

Additional Information: Departmental Category: Graduate Education

EDUC 5365 (3-4) Methods and Materials in Secondary English

Focuses on curriculum, materials, methods, and assessment. Introduces best practices in the teaching of English in middle and high schools. Examines the Colorado Academic Content Standards.

Requisites: Requires a prerequisite course of EDUC 4295 or EDUC 5295 and EDUC 5325 (all minimum grade C-). Restricted to Educ-Curriculum Instruction (EDCI) or English - Secondary Education (EDEN) majors only.

Recommended: Corequisite EDUC 4023.

Additional Information: Departmental Category: Graduate Education

EDUC 5375 (3-4) Problem-Based Math Instruction

Focuses on curriculum, materials, methods and assessment, and related aspects of instruction. Introduces best practices in teaching mathematics in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.

Requisites: Restricted to EDCI, EDSC, or EDMA majors only.

Recommended: Corequisite EDUC 4023.

Additional Information: Departmental Category: Graduate Education

EDUC 5385 (3-4) Problem-Based Science Instruction

Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching science in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.

Requisites: Restricted to EDCI, EDSC, or EDMA majors only.

Recommended: Corequisite EDUC 4023.

Additional Information: Departmental Category: Graduate Education

EDUC 5425 (3) Introduction to Bilingual/Multicultural Education

Provides a comprehensive survey of bilingual-multicultural education programs for language minority students. Includes an overview of the history and legislation related to bilingual education and English as a second language. Presents various models, philosophies, and theoretical underpinnings of bilingual education and ESL.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4425

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5435 (3) Materials and Methods in Bilingual/ Multicultural Education

Provides an in-depth study of the curriculum options available for bilingual and ESL programs. Presents, reviews, and critiques specific methods and strategies for teaching language to minority students. Gives the opportunity to develop and present teaching units in Spanish or in ESL methodology, as appropriate.

Requisites: Requires a prerequisite course of EDUC 5425 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5445 (3) Curriculum for Multicultural Education

Analyzes curriculum programs and examines principles that inform innovation for education of diverse students at all school levels. Includes topics of ethnic, racial, socio-economic, linguistic, and gender diversity.

Additional Information: Departmental Category: Graduate Education

EDUC 5455 (3) Literacy for Linguistically Different Learners

Presents current and emerging philosophies and methods on teaching reading to culturally diverse second-language learners. Includes review of materials, strategies for teaching reading and writing skills, and important considerations for transference from L1 to L2 reading.

Requisites: Requires a prerequisite course of EDUC 5425 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4460 and PHYS 4460 and PHYS 5460

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5465 (3) Introduction to ESL/Bilingual and Special Education

Provides students with the fundamental information of ESL, bilingual and special education, including theories, assumptions, philosophies, and paradigms of bilingual and special education. Discusses successful teaching techniques and instructional approaches, including individualization, least restrictive environment, transition, and career education.

Additional Information: Departmental Category: Graduate Education

EDUC 5485 (3) Differentiation in the Classroom

Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices, programmatic interventions that support student learning and using research to inform practice. Includes practicum. Department enforced prerequisite: restricted to MA+ students.

Additional Information: Departmental Category: Graduate Education

EDUC 5505 (3) Education of Students with Learning and Behavior Disorders

Discusses unique learning needs of students with learning and behavior disorders. Emphasizes development of a systems model for diagnosis, programming, and remediation. Stresses data-based individualization of instruction, with emphasis on intervention in inclusive learning environments and developing a culturally responsive system.

Additional Information: Departmental Category: Graduate Education

EDUC 5515 (3) Curriculum and Assessment for Special Learners

Emphasizes assessment of special education students from pre-referral through staffing and placement, including response to intervention, research-based assessment practices, analytic teaching and assessment, curriculum-based assessment and measurement. Selection, administration, and interpretation of formal and informal assessment devices are studied, with particular emphasis on cultural relevance and equity in assessment for special learners with mild to severe needs.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5525 (3) Research Issues in Special Education

Provides practical experience in the review, critique, conceptualization, and writing of research studies in special education. Also offers experience in design of evaluation systems for classroom practice.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5535 (3) Diagnostic Testing in ESL and Bilingual Education

Promotes critical uses of assessment instruments and information. Provides methods for educators to incorporate assessment as a meaningful activity in the classroom intended to support learning among bilingual students. Examines effectiveness, validity, and fairness in the testing of linguistically diverse populations. Provides first-hand experiences developing, selecting, reviewing, and adapting test materials as critical to making informed teaching decisions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5545 (3) Strategies for Teaching Students with Special Needs

Provides teachers with specific evidence-based methods and techniques for teaching students with a wide variety of high and low disabilities including learning and language disabilities, hearing and visual impairments, physical disabilities, and health impairments. Emphasizes different teaching methods, instructional materials, and learning strategies that have proven effective working students with cognitive learning needs.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5555 (3-4) Practicum in Bilingual/Special Education

Offers supervised field experience in elementary and secondary special education class settings. Each credit hour requires 50 contact hours.

Requisites: Requires prerequisite courses of EDUC 5465 and EDUC 5505 and EDUC 5515 or EDUC 5545 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5575 (1-4) Workshop in Curriculum and Instruction

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 5580 (3) Physics and Everyday Thinking

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.

Additional Information: Departmental Category: Graduate Education

EDUC 5595 (1-4) Practicum in Linguistically Different: English as a Second Language

University supervised, school-based field experience teaching linguistically different students, as well as assistance in the completion of EECD portfolio.

Requisites: Requires prerequisite courses of EDUC 5425 and EDUC 5435 and EDUC 5535 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5605 (3) Research Issues in Bilingual Education

Offers practical experience in the review, critique, conceptualization, and writing of research studies in bilingual/ESL education. Provides experience in the design of classroom evaluation systems.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5610 (1-3) Math and Science Education

Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science, and argumentation in mathematics and science.

Additional Information: Departmental Category: Graduate Education

EDUC 5615 (3) Second Language Acquisition

Presents a broad survey of second-language acquisition research. Stresses theoretical concerns and research findings and practical applications to teaching second languages. Gives special emphasis to second-language acquisition.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5625 (3) Methods of Teaching English as a Second Language

Exposes students to strategies used to teach English as a second or foreign language. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English as a second language. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

Recommended: Prerequisite EDUC 5615.

Additional Information: Departmental Category: Graduate Education

EDUC 5635 (3) Education and Sociolinguistics

Explores the discipline of sociolinguistics, the study of language variation and use, and its application within education settings. Not designed as an advanced sociology or linguistics course. Areas of study include language variation, speech communities, the ethnography of communication, speech and social identities, and sociolinguistic research related to teaching and learning.

Additional Information: Departmental Category: Graduate Education

EDUC 5706 (3) Assessment in Mathematics and Science Education

Examines purposes and practices of assessment in mathematics and science education. Particular attention is given to application of theoretical foundations and contemporary research in the design and use of assessment techniques and tools to support teaching for student understanding. Addresses the role of effective formative assessment in teaching and learning.

Additional Information: Departmental Category: Graduate Education

EDUC 5716 (3) Basic Statistical Methods

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5726 (3) Introduction to Disciplined Inquiry

Considers various research approaches and methodologies included in education including experimental and quasi-experimental methods; anthropological and case study methods; evaluative research and field studies; correlational; and sociological, historical, and philosophical research. Topics include library research, research criticism, research design, and proposal writing.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5810 (3) Teaching K-12 Mathematics: Number Sense

Provides teachers opportunity to explore fundamental mathematical theories and pedagogical perspectives pertaining to the teaching and learning of number and operation. Engages students in explorations of mathematical content underlying number and operations, while highlighting relevant problem solving, reasoning and proof, and mathematical connections. Explores implications of teachers' mathematical learning on their classroom teaching. Develops practices supporting learner's number sense development.

Additional Information: Departmental Category: Graduate Education

EDUC 5820 (3) Teaching K-12 Mathematics: Algebraic Thinking

Uses reform-based mathematics curricula to engage participants in algebraic thinking, to reflect on their own knowledge of algebraic concepts, and to examine pedagogical ideas that can foster K-12 students' algebraic thinking and learning. Algebraic topics include patterning, variable, functions, multiple representations, equality, and solving linear and systems of equations.

Additional Information: Departmental Category: Graduate Education

EDUC 5822 (3) Teaching and Learning Chemistry

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

Requisites: Requires prerequisite course of CHEM 1133 or CHEM 2100 or CHEM 1371 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5830 (3) Teaching K-12 Mathematics: Geometry & Measurement

Provides an opportunity to explore how to foster geometric thinking while examining fundamental mathematical theory underlying the content area of geometry and measurement. Emphasizes investigative approach involving problem solving, reasoning, connections, and communication as well as learning mathematics content in a flexible and conceptual way. Challenges participants to apply their understanding to teaching practices that foster geometric thinking in K-12 learners.

Additional Information: Departmental Category: Graduate Education

EDUC 5833 (3) Teaching and Learning Earth Systems

Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). The course focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions and developing effective discourse within and outside the classroom.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5840 (3) Teaching K-12 Mathematics: Probability & Statistics

Focuses on teaching probability, data analysis, and statistics in K-12 classrooms. Explores curriculum and assessment strategies in the areas of probability and statistics. Examines research on students' thinking on stochastic tasks and how this research informs teaching practice. Emphasizes deepening of one's conceptual understanding of probability and statistics and their importance in the current information age.

Additional Information: Departmental Category: Graduate Education

EDUC 6210 (3) Education Policy and the Law

Approaches education policy issues through the rich history of litigation and current legal challenges facing American K-12 schooling. Builds an understanding of the legal and policy development of the American schooling system, particularly in the 20th century. Laws and legal cases will be used as jumping-off points for broader discussions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6220 (3) Gender Issues in Education

Provides a strong foundation in the various issues of gender and sexual diversity in education. Stimulates explorations into the ways the construct of "gender" affects and is affected by the educational system and process. Presents theory and research about contemporary educational issues related to sexism and homophobia. Encourages development of well-considered views about the various issues, research, and theories.

Additional Information: Departmental Category: Graduate Education

EDUC 6230 (3) Ethics in Education

Investigates controversies in education from a self-consciously ethical perspective, drawing as appropriate from moral and political theory as well as law. Focuses on public education's role in fostering democratic citizenship and providing equal educational opportunity. Critically evaluates various education reform policies and curriculum policies. Applies method commonly used in medical ethics to make decisions regarding concrete ethically problematic cases.

Additional Information: Departmental Category: Graduate Education

EDUC 6250 (3) Higher Education in the United States

Examines major issues in higher education focusing on the sociopolitical contexts in which US universities operate as gatekeepers to opportunities. Topics include the purposes and history of higher education in the United States, college teaching and learning, finance and governance, issues of access and equity related to race, gender, sexual orientation, gender identity, immigration status and class, and student life.

Grading Basis: Letter Grade

EDUC 6318 (3) Psychological Foundations of Education

Introduces students to theoretical and empirical contributions of educational and developmental psychology and the learning sciences emphasizing applications to educational practices. Topics include learning, development, cognitive processes, social and cultural context, motivation, assessment and individual differences.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6325 (3) Culture and Ethnography in Education

Applies anthropological perspectives to research in educational settings. Focuses on theories of culture, cultural transmission and acquisition, and cultural reproduction and production for understanding schooling and its outcomes.

Additional Information: Departmental Category: Graduate Education

EDUC 6328 (3) Advanced Child Growth and Educational Development

Introduces students to recent theoretical and research advances in the study of children and adolescent's cognitive, social and emotional development, with an emphasis on implications for learning in and out of school.

Additional Information: Departmental Category: Graduate Education

EDUC 6368 (3) Adolescent Psychology and Development for Teachers

Examines current theory and research on adolescent development, learning, motivation, and academic achievement. Emphasizes how theory and research can inform instructional decisions in the secondary classroom.

Requisites: Restricted to English-Secondary Education (EDEN), Social Studies-Secondary Educ (EDSS), Mathematics-Secondary Educ (EDMA) or Science-Secondary Educ (EDSC) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6504 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Department enforced prerequisite: graduate standing or at least one upper-division course in computer science, linguistics, philosophy, or psychology.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and LING 6200 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6505 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6506 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Requires prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-). Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

Additional Information: Departmental Category: Graduate Education

EDUC 6516 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Requires prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6804 (1-4) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4811 and MCDB 4811 and MCDB 5811

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6844 (1-4) Master's Independent Study

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6855 (1-4) Independent Study in Curriculum and Instruction---Master's Level

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6877 (1-4) Independent Study in Educational Equity & Cultural Diversity: Master's Level

An independent study may be established between a student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6888 (1-4) Independent Study in Educational and Psychological Studies---Master's Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6899 (1-4) Independent Study in Educational Foundations Policy & Practice--Master's Level

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6915 (1-4) Practicum in Curriculum and Instruction

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6916 (1-4) Practicum in Research and Evaluation Methodology

Additional Information: Departmental Category: Graduate Education

EDUC 6917 (1-4) Practicum in Educational Equity and Cultural Diversity

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6918 (1-4) Practicum in Educational and Psychological Studies

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6919 (1-4) Practicum in Educational Foundations Policy and Practice

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6925 (1-4) Readings in Curriculum and Instruction

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6926 (1-4) Readings in Research and Evaluation Methodology

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6927 (1-4) Readings in Educational Equity and Cultural Diversity

Five times per semester our faculty and PhD students gather to explore topics that are relevant to becoming a scholar and researcher in our field. All EECDD PhD students are encouraged to attend; however, for first and second year PhD students attendance is required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6928 (1-4) Readings in Educational and Psychological Studies

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6929 (1-4) Readings in Educational Foundations Policy and Practice

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6944 (1-3) Master's Degree Candidate

Repeatable: Repeatable for up to 12.00 total credit hours.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Graduate Education

EDUC 6954 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 6964 (3) Capstone: Inquiry in the Content Areas

Supports students in using and building on the ideas and content encountered in previous coursework. Requires students to conceptualize, design and implement an original research project that will serve as exit requirement for the degree. Reads and engages in research and theory associated with Teacher Research (i.e. research conducted by teachers for professional purposes).

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7015 (3) Teaching Internship in Teacher Education

One-semester teaching internship in an undergraduate or graduate foundations course.

Additional Information: Departmental Category: Graduate Education

EDUC 7055 (3) Philosophy of Education

Examines exemplars of educational philosophy from ancient times to the present day, emphasizing their relevance and application to current controversies in education (e.g., free speech, multiculturalism, and affirmative action). Formerly EDUC 5055.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7105 (3) Collaboration to Meet Special Needs

Covers effective collaboration practices involving the special education teacher, other educational personnel, students, and parents. Bilingual special education considerations in collaboration will be described. Issues regarding inclusion will be explored. Practical application to teaching and learning will be made. Strategies for disseminating information and collaborative activities will be discussed.

Additional Information: Departmental Category: Graduate Education

EDUC 7316 (3) Intermediate Statistical Methods

Studies sampling theory and inferential statistics; advanced applications for testing of hypotheses regarding central tendency, variability, proportion, correlation, and normality; chi-square and the analysis of frequency data; multiple regression and prediction; introduction to the analysis of variance; and related computer programs for statistical analysis.

Requisites: Requires prerequisite course of EDUC 5716 (minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7326 (3) Quasi-Experimental Design in Causal Inference in Social Sciences

Focuses on experimental and quasi-experimental designs in educational research; applications of the general linear model; power and statistical efficiency; randomization and control; multiple comparisons; factorial experiments and interaction with fixed-factor and mixed design; analysis of covariance; effects of assumption violations; and related computer programs for statistical analysis.

Additional Information: Departmental Category: Graduate Education

EDUC 7336 (3) Methods of Survey Research and Assessments

Examines theory and techniques involved in each stage of survey research, including problem formulation, questionnaire development, interview and mailed surveys, assessing reliability and validity, sampling plans, data reduction (e.g., factor analysis), and analysis of continuous and categorical data.

Requisites: Requires prerequisite courses of EDUC 5726 and EDUC 7316 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7346 (3) Ethnographic Methods in Educational Research

Explores the history of ethnography and its translation into educational research. Students practice participant observation, interviewing, journal writing, artifact searches, qualitative analysis and interpretation, and styles of reporting.

Requisites: Requires a prerequisite course of EDUC 6325 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 7376 (3) Theory and Practice of Educational and Psychological Measurement

Introduces theories of measurement and applications, and presents classical test theory. Includes quantitative concepts, methods, and computational techniques for the development, application, and evaluation of measurement instruments in social/ behavioral science and education.

Requisites: Requires prerequisite course of EDUC 5716 (minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7386 (3) Educational Evaluation

Builds an understanding of the range of approaches taken by educational evaluators, focusing particularly on the evaluation of programs. Explores the nature of different evaluation perspectives and how these disparate views translate into methodological and conceptual models. Students develop a familiarity with the most common and influential approaches to evaluation.

Additional Information: Departmental Category: Graduate Education

EDUC 7396 (3) Categorical Data Analysis

Introduces contemporary advanced multivariate techniques and their application in social science research. Methods include multivariate regression and analysis of variance, structural equation models, and factor analysis. Prior experience with Anova and multiple regression is assumed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7416 (3) Seminar: Research Methodology

Presents selected topics for advanced study in educational research, statistics, measurement, and evaluation.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 7436 (3) Item Response Theory

Includes one-, two-, and three-parameter logistic models for dichotomously-scored items and partial credit models for polychotomously-scored items; applications of the models to problems such as equating of test forms, test design, computerized adaptive testing, and the detection of item bias.

Requisites: Requires prerequisite courses of EDUC 7316 and EDUC 7376 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7446 (3) Seminar: Policy Issues in Education

Explores major policy issues confronting U.S. education and examines the nature and undertaking of educational policy studies. Learn to approach policy issues from a contextual perspective that highlights systemic forces and analyzes and applies differing policy instruments. While a wide variety of policies are covered in the course, it particularly emphasizes issues of educational equity.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7456 (3) Multilevel Modeling

Covers in depth two advanced multivariate models common to social science research: latent variable (structural equation) models and multilevel (hierarchical) models. Topics may be taught with a particular analytic context, such as measurement of change (longitudinal analysis) or experimental design.

Additional Information: Departmental Category: Graduate Education

EDUC 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and LING 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8014 (3) Advanced Seminar in Democracy, Diversity and Social Justice

Addresses the sociopolitical context of multiculturalism and education, and the sociocultural context of learning. Examines critical issues involved in making schooling responsive to an increasingly multicultural and multilingual society.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of EDUC 8210 (minimum grade B-). Restricted to EDCl, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8025 (3) Seminar: Curriculum Theories

Examines in depth recent developments in curriculum theory highlighting conceptual, contextual, and normative issues. Substantially explores distinct curricular traditions, corresponding conceptions of the good life along with related approaches to reason and emotion. Focuses on the works of prominent curriculum theorists.

Additional Information: Departmental Category: Graduate Education

EDUC 8045 (3) Philosophical Issues in Educational Research

Familiarizes students with important concepts and issues from the philosophy of science and, to a lesser extent, political theory and ethics; grounds such concepts and issues in the literature (often in terms of primary philosophical sources); and stimulates students to apply this material to the field of educational research in an informed way.

Requisites: Restricted to PhD students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8055 (3) Theoretical Issues in Education Policy

Provides students with an examination of the theories behind education policy analysis. Takes a thematic approach to the study of policy in order to understand how policy agendas are set; how democratic deliberation should be linked with research and policy; and the relationship between politics, media, social structures, research and policies.

Requisites: Restricted to PhD students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8125 (3) Seminar: Radical Education Theories

Examines radical analyses of schooling, based on class, gender, sexual identity and race, through which U.S. public schooling is said to maintain dynamics of oppression and domination that undermines the schools' democratic premise. Scrutinizes the conceptual framework, interpretive and explanatory adequacy, and ethical justification of radical claims.

Additional Information: Departmental Category: Graduate Education

EDUC 8135 (3) Seminar: Research on Teaching

Provides an historical perspective of research on teaching, focusing on the evolution of conceptual frameworks, research methods, and research findings. Examines substantive and methodological issues that underlie contemporary research on teaching. Explores areas of research including teacher knowledge and beliefs, teaching for understanding, understanding student thinking, motivation and volition, and classroom assessment.

Additional Information: Departmental Category: Graduate Education

EDUC 8145 (3) Seminar: Research on Teacher Education and Learning to Teach

Explores substantive and methodological issues that underlie current research on learning to teach, teacher education, and teacher professional development. Considers the learning and development of experienced and novice teachers, with an emphasis on learning to teach in ways that conform to reform-based educational ideas.

Additional Information: Departmental Category: Graduate Education

EDUC 8155 (3) Advanced Topics in Literacy Education

Examines special topics in theory and research related to literacy and literacy education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8165 (3) Advanced Topics in Mathematics Education

Examines special topics in theory and research related to mathematics education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8175 (3) Advanced Topics in Science Education

Engages participants in the process of curriculum development. Principles that guide the development of curricula and learning environments are discussed as they integrate with learning theory. Participants develop and/or test specific activities in the classroom and modify them as a result. There is a particular focus on incorporating the practices of the discipline into each content-based activity.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8210 (3) Perspectives on Classroom Teaching and Learning

Introduces students to various theoretical perspectives informing educational research and how they are employed to study teaching, learning, and policy in K-12 classrooms. Includes reading and discussion related to the assumptions, questions, methods, and findings associated with theoretical traditions within and across disciplines.

Requisites: Restricted to EDCl, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8220 (3) Introduction to Educational Research and Policy

Introduces conceptual and empirical issues and controversies in educational research and policy. Complements other EDUC doctoral courses in quantitative and qualitative methodology.

Requisites: Restricted to PhD students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8230 (3) Quantitative Methods I

Explores the use of statistics to formalize research design in educational research. Introduces descriptive statistics, linear regression, probability, and the basics of statistical inference. Includes instruction in the use of statistical software, (e.g., SPSS.).

Requisites: Restricted to EDCl, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8240 (3) Quantitative Methods II

Continues the exploration of research design in the social sciences, especially the evaluation of the quantitative research reported in professional journals. Introduces instances of the general linear model (both multiple regression and ANOVA) and its application to educational research.

Requisites: Requires prerequisite course of EDUC 8230 (minimum grade D-). Restricted to EDCl, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8250 (3) Qualitative Methods I

Introduces students to the theory and practice of qualitative research in education. First of a two-course sequence covering research design, theoretical perspectives, and methods. Preference given to first-year doctoral students in education.

Requisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8260 (3) Qualitative Methods II

Builds on EDUC 8250 to develop knowledge and skills in ethnographic and case study research. Second of a two-course sequence covering qualitative research design, theoretical perspectives, and methods.

Requisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8348 (3) Seminar: Human Development

Intensive study of selected topics in human development. The focus of the seminar will vary depending on the instructor's expertise and students' interests. Recent topics include adolescent development in social context, Vygotsky and Cultural-Historical Activity Theory, and design-based research methods. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6318 or EDUC 8210 or instructor consent.

Additional Information: Departmental Category: Graduate Education

EDUC 8358 (3) Seminar: Human Learning

Intensive study of selected topics in human learning. The focus of the seminar will vary depending on the instructor's expertise and students' interest. Recent topics include sociocultural and social practice theories, STEM learning in and out of school. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite EDUC 6318 or EDUC 8210 or instructor consent.

Additional Information: Departmental Category: Graduate Education

EDUC 8605 (3) Research and Professional Ethics for Educational Researchers

Examines the central issues and venerable theories of philosophical ethics that have historically framed research ethics. Also examines contemporary ethical theory that emphasizes a greater attention to the social sciences. Focuses on research ethics (both research of human subjects and research misconduct), various issues of professional academic ethics, and the AERA ethical code.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8610 (3) Advanced Topics in Educational Equity and Cultural Diversity

Examines special topics in theory and research related to educational equity and cultural diversity in education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8615 (3) Language Issues in Education Research

Examines ways in which issues of language can affect the validity of educational research. Discusses how language can be properly addressed with a multidisciplinary perspective through different stages in the process of an investigation, including design, sampling, data collection, and data analysis. Provides the conceptual basis for addressing linguistic diversity from a multidisciplinary perspective.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8710 (3) Measurement in Survey Research

Introduces students to classical test theory and item response theory. Emphasizes the process of developing, analyzing and validating a survey instrument. Focuses on developing a survey instrument with items that derive from a clearly delineated theory for the construct to be measured. Analyzes item responses and put together a validity argument to support the proposed uses of the survey.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8720 (3) Advanced Topics in Measurement

Focuses on psychometric models for measurement and their applications in educational and psychological research. Emphasizes understanding and evaluating the utility of models from item response theory (IRT). Applies and compares measurement models in the context of simulated or empirical data sets.

Recommended: Prerequisite EDUC 8710.

Additional Information: Departmental Category: Graduate Education

EDUC 8730 (3) Advanced Qualitative Data Analysis

Requires students begin semester with qualitative data already collected (from class project, pilot study, dissertation). Instructors present diverse methods of analyzing data and writing about interpretations. Instructors customize part of course to address specific topic of expertise, e.g., discourse analysis, video analysis, textual analysis, ethnographic analysis.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8740 (3) Advances in the Assessment of Student Learning

Focuses on theories underlying traditional and contemporary proposals for assessment of student learning, and design and research of large-scale and classroom-based methods to assess student learning. Explores intersections between large-scale and classroom assessment, although greater attention is given to issues related to classroom assessment.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8804 (3) Special Topics

Designed to meet needs of graduate students with topics of pertinent interest.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8844 (1-4) Doctoral Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8855 (1-4) Independent Study in Curriculum and Instruction: Doctoral Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8866 (1-4) Independent Study in Research and Evaluation**Methodology: Doctoral Level**

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8877 (1-4) Independent Study in Educational Equity and Cultural**Diversity: Doctoral Level**

An independent study may be established between a doctoral student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8888 (1-4) Independent Study in Learning and Human**Development: Doctoral Level**

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8899 (1-4) Independent Study in Educational Foundations Policy**and Practice: Doctoral Level**

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8935 (1-6) Internship in Curriculum and Instruction

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8936 (1-6) Internship in Research and Evaluation Methodology

Repeatable: Repeatable for up to 36.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8937 (1-6) Internship in Educational Equity and Cultural Diversity

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8938 (1-6) Internship in Learning Sciences and Human**Development**

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8939 (1-6) Internship in Educational Foundations Policy and**Practice**

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8950 (3) Prospectus and Dissertation Writing

Provides students with ongoing opportunities to write social science research in the context of the design, analysis and data representation, development, and write-up of students' dissertation proposals and dissertations. Students will learn to expand how they think about and use evidence, clarify their ideas and arguments, and improve their writing. Students working on proposals and dissertations should enroll.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to EDCl, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8994 (1-10) PhD Doctoral Dissertation

Repeatable: Repeatable for up to 60.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

Electrical & Computer Engineering (ECEN)

Courses

ECEN 1030 (1-4) Special Topics

Special topics class.

ECEN 1100 (1) Freshman Seminar

Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers.

Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for freshmen to meet their classmates.

Additional Information: Departmental Category: General

ECEN 1310 (4) C Programming for ECE

Introduces fundamental programming concepts with engineering applications using C at a lower level of abstraction and MATLAB at a higher, application-focused level. Teaches the use of pointers, control flow, and data types. Example engineering applications include signal processing and the numerical computations. Includes a weekly computer lab session.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1310 or CSCI 1320

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Prerequisite APPM 1350.

Additional Information: Departmental Category: General

ECEN 1400 (3) Introduction to Digital and Analog Electronics

Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, LEDs and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed.

Additional Information: Departmental Category: General

ECEN 1500 (3) Sustainable Energy

Explores how energy is generated and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required.

Requisites: College of Engineering majors are excluded from this course.

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills
Departmental Category: General

ECEN 1840 (1-6) Independent Study

Provides an opportunity for freshmen to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2010 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2020 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2050 (1-5) Special Topics

Additional Information: Departmental Category: General

ECEN 2060 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2250 (3) Introduction to Circuits and Electronics

Introduces linear circuit analysis and design, including OP-Amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors.

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 and PHYS 1120 (all minimum grade C-), and corequisite course of APPM 2360. Restricted to College of Engineering majors only.

Recommended: Prerequisite ECEN 1310 or CSCI 1300.

Additional Information: Departmental Category: General

ECEN 2260 (3) Circuits as Systems

Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution.

Requisites: Requires prerequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

Recommended: Corequisite ECEN 2270.

Additional Information: Departmental Category: General

ECEN 2270 (3) Electronics Design Lab

Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, SPICE simulations, prototyping and testing of circuits necessary to drive and remotely control the robot.

Requisites: Requires prerequisite course of ECEN 2250 (minimum grade C-) and corequisite course of ECEN 2260. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2350 (3) Digital Logic

Covers the design and applications of digital logic circuits, including both combinational and sequential logic circuits. Introduces hardware descriptive language, simulating and synthesis software, and programming of field programmable arrays (FPGAs).

Requisites: Requires prerequisite course of ECEN 1310 or CSCI 1300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2410 (3) Renewable Sources and Efficient Electrical Energy Systems

Introduces electrical power generation and renewable energy, including solar, wind, micro, hydro, coal, nuclear and natural gas and some of the issues in integrating renewable energy sources in the grid.

Requisites: Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires corequisite course of ECEN 2250. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2420 (3) Electronics for Wireless Systems

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. Covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn lab exercises the operation principles behind components of a complete practical radio system.

Requisites: Requires prerequisite course of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-). Requires corequisite course of ECEN 2250. Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) majors only.

Additional Information: Departmental Category: General

ECEN 2440 (3) Application of Embedded Systems

Introduces embedded systems and key computer architecture concepts through a variety of projects involving programming a microcontroller in C. Provides students hands-on projects that combine the knowledge gained in their digital and analog coursework in order to engineer hardware, firmware and application software design solutions. Includes a weekly lecture and two weekly laboratory sessions.

Requisites: Requires a prerequisite course of ECEN 1310 (minimum grade C-). Requires corequisite course of ECEN 2250.

Additional Information: Departmental Category: General

ECEN 2703 (3) Discrete Mathematics for Computer Engineers

Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory.

Requisites: Requires prerequisite courses of ECEN 1310 or CSCI 1300 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering students only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 2830 (1-5) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 2840 (1-6) Independent Study

Offers an opportunity for sophomores to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2841 (1-6) Independent Study

Offers an opportunity for sophomores to do independent, creative work.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 3002 (3-5) Special Topics

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 3003 (3-5) Special Topics

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3004 (3-5) Special Topics

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3005 (2-3) Special Topics

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 3010 (3) Circuits and Electronics for Mechanical Engineers

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 3017

Requisites: Requires prereq course of PHYS 1120 (min grade C). Requires a prereq or coreq course of APPM 2360. Restricted to students with 57-180 credits (Jr or Sr) Mechanical Engr (MCEN) or Electrical Engr (ECEN) or Engineering Plus (GEEN) majors only.

Additional Information: Departmental Category: General

ECEN 3030 (3) Electrical/Electronic Circuits Non-Major

For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; superposition; node analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in AC circuits; transient response, operation of simple circuits; rectifiers; transformers; 3-phase circuits; motors and generators.

Requisites: Requires prereq course of APPM 2360 (min grade C-).

Electrical Computer Engineering (ECEN), Electrical Engineering (EEEN), Electrical Computer Engineering and Electrical Engineering Concurrent Degree (C-ECEN/EEEN) mjrs are excluded from this course

Additional Information: Departmental Category: General

ECEN 3070 (3) Edges of Science

Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors.

Requisites: Requires prerequisite course of MATH 1011 (minimum grade C-).

Additional Information: Departmental Category: General

ECEN 3170 (3) Electromagnetic Energy Conversion 1

Real and reactive power in single phase circuits, power triangle, balanced three-phase circuits, wye and delta connections, introduction to electromagnetic machines, transformers (single and three-phase) and their equivalent circuits, AC-machinery fundamentals, synchronous generator from a magnetic field point of view, synchronous motors and condensers, three-phase induction motors, DC machinery fundamentals, DC motors, single phase motors. Matlab/Simulink will be used.

Requisites: Requires prerequisite courses of ECEN 2260 and PHYS 1120 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 3250 (3) Microelectronics

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog applications.

Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3300 (3) Linear Systems

Characterization of linear time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems are analyzed using difference equations, Z-transforms and discrete time Fourier transforms. Sampling and reconstruction of signals using the sampling theorem. Applications of linear systems include communications, signal processing, and control systems.

Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3303 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3302

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3320 (3) Semiconductor Devices

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices.

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3350 (3) Programming Digital Systems

Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.

Requisites: Requires prerequisite course of ECEN 2350 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3360 (3) Digital Design Laboratory

Introduces digital system design, including system software and hardware building blocks, and system software-hardware integration. Emphasizes hands-on system development and debugging. Uses mainstream electronic system design platforms, including FPGAs, embedded and mobile computing platforms, and Assembly/C/Java/Verilog programming languages.

Requisites: Requires prerequisite course of ECEN 3350 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3400 (3) Electromagnetic Fields and Waves

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied.

Requisites: Requires prerequisite courses of APPM 2350, APPM 2360, PHYS 1120 and ECEN 2250 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3410 (3) Electromagnetic Waves and Transmission

Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, waveguides, and elements of antenna theory.

Requisites: Requires prerequisite course ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3810 (3) Introduction to Probability Theory

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, and optics.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4510 or APPM 3570

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3840 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 3841 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 3930 (6) ECE Co-op Education

Participate in a cooperative education program working with a corporate or government entity. Individual assignments are arranged between the department and the outside employer. Offered only through Continuing Education. Department enforced prerequisite: sophomore, junior or senior EEEN and ECEN majors and 2.85 GPA.

Repeatable: Repeatable for up to 24.00 total credit hours.

Requisites: Requires prerequisite courses of ECEN 2260 and ECEN 3350 (all minimum grade C-).

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

ECEN 4000 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 4001 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Bioengineering

ECEN 4002 (1-4) Special Topics

Credit and subject matter to be arranged. Department enforced prerequisite: varies

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4003 (1-4) Special Topics

Credit and subject matter to be arranged. Department enforced prerequisite: varies

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

ECEN 4004 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4005 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4006 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Optics

ECEN 4007 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4009 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 4011 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5011

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Bioengineering

ECEN 4012 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4013 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4016 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Optics

ECEN 4017 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Power

ECEN 4018 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4021 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.
Additional Information: Departmental Category: Bioengineering

ECEN 4022 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4024 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5024
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4026 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4028 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4031 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4033 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4043 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4049 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: VLSI CAD Methods

ECEN 4053 (1-4) Special Topics

Special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5053

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4106 (3) Photonics

Deals with the generation, transmission, modification and detection of light. Applications include fiber optics communications, data storage, sensing, and imaging. Leads to understanding of fundamental physical principles used in the analysis and design of modern photonic systems.
Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Requires a corequisite course of ECEN 3300. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Optics

ECEN 4116 (3) Introduction to Optical Communications

Given data rates, distance, reliability or bit error rates, the information required to specify the type of fiber, the source, the wave length, type of modulation, repeater or optical amplifiers, and detectors will be presented.

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Optics

ECEN 4120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them and application to practical problems such as pattern recognition, signal processing and control systems. Shows how to construct a network of "neurons" and train them to serve a useful function.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5120

Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and ECEN 1310 or CSCI 1300 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 4138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Department enforced prerequisite: background in Laplace transforms, linear algebra, and ordinary differential equations.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5138

Requisites: Requires prerequisite course of ECEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4167 (3) Electromagnetic Energy Conversion 2

Introduction to electric machine drives, basic electric machine mechanics, structure and modeling of electric machines (DC, Synchronous, Linear, Induction), reference frame theory using d-q modeling based on the complex space vector and on matrix transformation, transient and steady state analysis of three-phase machine, design of speed regulators, vector control. Matlab/Simulink will be used.

Requisites: Requires prerequisite course of ECEN 3170 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5224

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4242 (3) Communication Theory

Covers modern digital and analog communication systems. Analysis and design of communication signals, transmitters, channels, and receivers. Amplitude and angle modulation and demodulation are treated as well as theory and application of digital data transmission. Emphasis is also placed on the analysis and mitigation of the effects of noise through signal design at the transmitter and signal processing at the receiver.

Requisites: Requires prerequisite course of ECEN 3300 and ECEN 3810 or APPM 3570 or MATH 4510 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4313 (3) Concurrent Programming

Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).

Requisites: Requires a prerequisite course of ECEN 1310 or CSCI 1300 or CSCI 1310 (all minimum grade C-).

Grading Basis: Letter Grade

ECEN 4324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. A seminar style course which surveys topics in microsystem packaging such as electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5324

Requisites: Requires prerequisite course or corequisite course of ECEN 3410 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5341

Requisites: Requires prerequisite courses of ECEN 3400 and ECEN 3810 or APPM 3570 or MATH 4510 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including IC layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis and testing. Includes design project.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5375

Requisites: Requires prerequisite course of ECEN 3320 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 4423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5423 and CSCI 4446 and CSCI 5446

Requisites: Requires prerequisite courses of APPM 1360 or MATH 2300 and ECEN 1310 or CSCI 1300 and PHYS 1110 (all minimum grade C-). Restricted to College of Engineering majors only.

Recommended: Prerequisites PHYS 1120 and CSCI 3656 and MATH 2130.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5517

Requisites: Requires prerequisite course of ECEN 4797 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5532

Requisites: Requires prerequisite course of ECEN 4632 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4553 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5523 and CSCI 4555 and CSCI 5525

Requisites: Requires prerequisite courses of ECEN 2703 and ECEN 3350 (all minimum grade C). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4555 (3) Principles of Energy Systems and Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5555

Requisites: Requires prerequisite courses of ECEN 3810 or APPM 3570 or MATH 4510 and PHYS 2130 or PHYS 2170 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 4583 (3) Software System Development

Lectures deal with techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale (2-3000 line) systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to specification and schedule. Course project is written in C on a Unix look-alike system; prior knowledge of C or Unix is not required.

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4593

Requisites: Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4606 (3) Undergraduate Optics Laboratory

Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and Leds, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized.

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Optics

ECEN 4610 (3) Capstone Laboratory Part 1

Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. Results will be the prototype of a stand-alone analog/digital system. Must have completed all required Advanced Analog Core courses for major, except one course may be taken concurrently by petition. Must take ECEN 4620 to complete the sequence. Minimum required grade for this course and ECEN 4620 is C-.

Requisites: Requires prereq of ECEN 3360 either ECEN 3250 3300; or ECEN 3250 3400; or ECEN 3300 3400 (min grade C-). Restricted to Elect/Comp Engr (ECEN) or Elect Engr (EEEN) or Elect/Comp Engr or Elect Engr Concurrent Degree (C-EEEN or C-ECENEEN) mjrs only

Additional Information: Departmental Category: General

ECEN 4616 (3) Optoelectronic System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5616

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-).

Additional Information: Departmental Category: Optics

ECEN 4620 (3) Capstone Lab, Part 2

Hands-on laboratory experience for teams in the systematic proposal, design, build integration, test and documentation of an electronic/computer based system. Results will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Department enforced prerequisite: advanced analog core courses.

Requisites: Requires prerequisite course of ECEN 4610 (minimum grade C-). Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) or ECEE concurrent (C-EEEN or C-ECENEEN) majors only.

Additional Information: Departmental Category: General

ECEN 4632 (3) Introduction to Digital Filtering

Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications.

Requisites: Requires prerequisite course of ECEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development and debugging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5633

Requisites: Requires prerequisite courses of ECEN 3350 and ECEN 4593 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4634 (3) Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410: electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5634

Requisites: Requires prerequisite course of ECEN 3410 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4638 (3) Control Systems Laboratory

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.

Requisites: Requires prerequisite course of ECEN 4138 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5643

Requisites: Requires prerequisite course of ECEN 4583 or ECEN 5543 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4652 (3) Communication Laboratory

Analysis and design of realistic communication signals in a modern digital signal processing environment. Covers both analog and digital communication signals with and without noise and distortion. Pulse amplitude modulation is used initially at baseband and then combined with amplitude and phase/frequency modulation to produce the kind of bandpass signals that are used in cell phones and wireless data networks.

Requisites: Requires prerequisite course of ECEN 4242 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5653

Requisites: Requires prerequisite course of ECEN 1030 or ECEN 1310 or CSCI 1300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5743

Requisites: Requires prerequisite course of ECEN 4583 or ECEN 5543 or CSCI 5548 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5753 and CSCI 4753 and CSCI 5753

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-). Restricted to College of Engineering majors only.

Recommended: Prerequisite a course in statistics.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5797

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4811 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation and functional magnetic resonance imaging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5811 and ASEN 4216 and ASEN 5216

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 or ASEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5821 and ASEN 4426 and ASEN 5426

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 or ASEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5827

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4831 (3) Brains, Minds, and Computers

Provides background for the design of artificially intelligent systems based upon our present knowledge of the human brain. Includes similarities and differences between the brain and computers, robots and common computer models of brain and mind. Emphasizes the neuron as an information processor, and organization of natural as well as synthetic neural networks.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5831 and ASEN 5436

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4840 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 4841 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work.

Repeatable: Repeatable for up to 6.00 total credit hours.

ECEN 5000 (3) Graduate Professional Seminar

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

ECEN 5005 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5008 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5009 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5011 (1-4) Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4011

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Bioengineering

ECEN 5012 (3) Special Topics

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5013 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Electrical Engineering

(EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

ECEN 5016 (1-4) Special Topics

Additional Information: Departmental Category: Optics

ECEN 5018 (1-4) Special Topics

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5021 (1-4) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students in Electrical Engineering

(EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Bioengineering

ECEN 5023 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering, Embedded Systems.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5024 (1-4) Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4024

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5028 (1-4) Special Topics

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5032 (3) Special Topics

Additional Information: Departmental Category: Bioengineering

ECEN 5049 (1-4) Special Topics

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5053 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering - Embedded Engineering.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4053

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5104 (3) Computer-Aided Microwave Circuit Design

Emphasizes the design of strip-line and microstrip circuits, using a CAD package. Discusses design of impedance transformers, amplifiers, switches, phase-shifters, etc. Assignments include design of typical circuits and their analysis using a microwave circuit analysis program. Laboratory includes measurements using a network analyzer facility on a typical circuit designed and fabricated by students.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to EEEN or ECEN graduate students or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5107 (3) Electric Power Grid

Examines the electrical grid, including conventional generation, transmission/ distribution, and new renewable generation technologies. Issues including grid stability, the increase in variable generation on the grid, and how the electrical grid will change in the future will be addressed. Intended for students with an engineering background from outside electrical engineering who desire an introduction to the power grid.

Requisites: Excludes graduate students in Electrical Engineering or Electrical Engineering Concurrent degree plans.

Additional Information: Departmental Category: Power

ECEN 5114 (3) Waveguides and Transmission Lines

Intermediate course dealing with guided-wave systems at HF, microwave, and optical frequencies. Modern waveguiding structures, including circular metallic waveguides, microstrip transmission lines, and optical waveguides are treated. Additional material may include waveguide losses, excitation of waveguides, microwave network theory, coupled-mode theory, resonators, and pulse propagation in waveguides.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to EEEN or ECEN graduate students or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them and application to practical problems such as pattern recognition, signal processing and control systems. Shows how to construct a network of "neurons" and train them to serve a useful function.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4120

Additional Information: Departmental Category: General

ECEN 5122 (3) Wireless Local Area Networks

Examines small-scale wireless networks particularly personal and local area networks. Covers licensed and unlicensed spectrum, indoor and small-scale radio propagation, modulation techniques, network topologies, ad hoc and infrastructure networks, protocol design, TCP/IP-wireless interactions and protocol standards.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5520

Requisites: Requires prerequisite course of ECEN 3810 or APPM 3570 or MATH 4510 (minimum grade D-).

Recommended: Prerequisite TLEN 5430.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5128 (3) Game Theory and Multiagent Systems

Provides an overview of game theory with a special emphasis on its application to multiagent systems, i.e., systems that are comprised of a collection of interacting and possibly competing decision making entities. Examples drawn from engineered, economics and social models, including multivehicle robotics, data networks, sensor networks and electronic commerce.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5134 (3) Electromagnetic Radiation and Antennas

Covers elementary sources and antennas, cylindrical wire antennas, loop antennas, radiation patterns and antenna gain, aperture sources such as horns and dishes, specialized antennas such as microstrip patches, linear and circular arrays, mutual coupling and ground effects, ray and numerical formulations, transmission formulas, and antenna applications.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Topics covered in this course will be investigated in more depth, require external readings, additional homework will be assigned, and the exams will be more difficult.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4138

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3300.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5139 (3) Computer-Aided Verification

Covers theoretical and practical aspects of verification of finite-state systems (hardware) and infinite-state systems (programs). Model checking: temporal logics, explicit-state and symbolic search, BDDs. Constraint solvers: SAT solvers, decision procedures. Program verification: invariants, partial vs. total correctness, abstraction. Department enforced requisite: general proficiency in discrete mathematics and programming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5135

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite CSCI 2824.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5154 (3) Computational Electromagnetics

Provides a computational study of microwave circuits and antennas, using finite-difference, finite-element, and moment methods. Requires students to develop algorithms, write and execute programs, and prepare reports analyzing results. Circuits include waveguides, microstrip lines, and center-fed dipole antennas.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5156 (3) Physical Optics

Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction.

Recommended: Prerequisite ECEN 3410.

Additional Information: Departmental Category: Optics

ECEN 5166 (3) Guided Wave Optics

Builds up the concepts necessary to understand guided wave optical systems. Topics include slab wave-guides, semiconductor lasers, fiber optics, and integrated optics.

Requisites: Requires prerequisite courses of ECEN 5645 and ECEN 5156 (all minimum grade C-).

Additional Information: Departmental Category: Optics

ECEN 5224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4224

Requisites: Requires a prereq course of ECEN 3400 (min grade D-). Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5254 (3) Remote Sensing Signals and Systems

Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered.

Requisites: Requires prerequisite courses of ECEN 3300 and ECEN 3400. Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5264 (3) Electromagnetic Absorption, Scattering, and Propagation

Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prereqs are ECEN 3400 and ECEN 3410.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5273 (3) Network Systems

Focusing on the design and implementation of network protocols and algorithms. Topics covered include the internet's layered protocol stack, TCP/IP, Web/HTTP, email/SMTP, DNS, Ethernet, wireless networks, secure networking. Students will learn socket-based network programming. Familiarity with C and UNIX required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4273 and CSCI 5273

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5274 (3) Radar Science and Techniques

Studies atmospheric radar fundamentals. Examines scattering by precipitation and atmospheric turbulence; long-wavelength radars and the dynamics of the middle and upper atmosphere; design of meteorological and clear-air radars; profiling tropospheric winds, temperature, and humidity by radar and radiometry; and ionospheric sounding using ionosondes and incoherent-scatter radars.

Requisites: Requires prerequisite course of ECEN 5254 (minimum grade C-).

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5322 (3) Search Engine & Analysis of High-dimensional Dataset

Provides students with an exposition of the novel algorithmic methods for searching and analyzing big data. The class includes a project: students design a content-based music information retrieval system similar to those used by Gracenote, Shazam, or Pandora.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. A seminar style course which surveys topics in microsystem packaging such as electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4324

Requisites: Requires a prereq course of ECEN 3410 (min grade D-).

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4341

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Bioengineering

ECEN 5345 (3) Introduction to Solid State Physics

Provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons and electrooptical effects. Makes use of quantum mechanical methods. Department enforced prerequisite: basic quantum mechanics.

Requisites: Restricted to any graduate student or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5355 (3) Principles of Electronic Devices 1

Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3320.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5358 (3) Optimization and Optimal Control

Introduces the theory and practice of optimization and optimal control. Topics include basic theory, nonlinear system trajectories and regulation, function space operators and derivatives, optimality conditions, barrier functionals and Newton's method in function space.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 5448.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including Ic layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis and testing. Includes design project.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4375

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5418 (3) Automatic Control Systems 1

Coverage of principles of control systems with Multiple Inputs and Multiple Outputs (MIMO). Topics include Mimo state-space theory, applications of the singular value decomposition (SVD), coprime factorization methods, frequency domain topics, and an introduction to H-infinity design.

Requisites: Requires prerequisite course of ECEN 5448 (minimum grade C-).

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4423 and CSCI 4446 and CSCI 5446

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5438 (3) Robot Control

Provides a comprehensive treatment of the mathematical modeling of robot mechanisms and the analysis methods used to design control laws for these mechanisms.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites PHYS 1110 and ECEN 4138 (minimum grade C-).

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5448 (3) Advanced Linear Systems

Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5458 (3) Sampled Data and Digital Control Systems

Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transferfunction, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5503 (3) Computer Systems Design and Architecture

Covers digital logic circuits, assembly language programming, and gate-level computer design and architecture. Also discusses computer arithmetic algorithms, I/O, peripheral device performance, networking, and the Internet. Limited to graduate students. For ECE/CS majors with nontraditional backgrounds.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4517

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5523 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4553 and CSCI 4555 and CSCI 5525

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4532

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5533 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5535

Requisites: Requires prerequisite course CSCI 3155 (minimum grade D-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5543 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5548

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 1300 and CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5553 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers and data flow machines. Department enforced prerequisite: background in computer organization, introduction to programming languages and elementary numerical analysis.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5551

Recommended: Prerequisites ECEN 4593 and CSCI 3653.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5555 (3) Principles of Energy Systems and Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4555

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors) or Graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5573

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5583 (3) Artificial Intelligence

Surveys artificial intelligence methods, theories and applications. Studies the relationship between artificial intelligence and psychology, linguistics and philosophy. Introduces artificial intelligence programming.

Requisites: Requires prerequisite course CSCI 3245 (minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multicore processor designs. Also studies current and historically important computer architectures.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5593

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 4593.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5603 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management and legal issues. Gives special attention to problems unique to software projects.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5608 and EMEN 5031

Requisites: Requires prerequisite courses ECEN 4583 and ECEN 5543 and CSCI 4318 (all minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5606 (3) Optics Laboratory

Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms and experimentation of fiber optics and Fourier optics. Department enforced prerequisite: undergraduate optics course (e.g. PHYS 4510).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5606

Additional Information: Departmental Category: Optics

ECEN 5612 (3) Random Processes for Engineers

Deals with random time-varying functions and is therefore useful in the broad range of applications where they occur. Topics include review of probability, convergence of random sequences, random vectors, minimum mean-square error estimation, basic concepts of random processes, Markov processes, Poisson processes, Gaussian processes, linear systems with random inputs, and Wiener filtering. Applications range from communications, communication networks, and signal processing to random vibration/stress analysis, mathematical finance, physics, etc.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5613 (3) Embedded System Design

Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented and presented. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5616 (3) Optoelectric System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4616

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Optics

ECEN 5622 (3) Information Theory and Coding

Covers fundamental limits of data compression, reliable transmission of information and information storage. Topics include information measures, typicality, entropy rates of information sources, limits and algorithms for lossless data compression, mutual information, and limits of information transmission over noisy wired and wireless links. Optional topics include lossy data compression, limits of information transmission in multiple-access and broadcast networks, and limits and algorithms for information storage.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5623 (3) Real-Time Embedded Systems

Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5626 (3) Active Optical Devices

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance.

Recommended: Prerequisite ECEN 5355.

Additional Information: Departmental Category: Optics

ECEN 5632 (3) Theory and Application of Digital Filtering

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development and debugging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4633

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5634 (3) Graduate Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410: electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4634

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4643

Requisites: Requires prerequisite course of ECEN 5543 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5645 (3) Introduction to Optical Electronics

Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5652 (3) Detection and Extraction of Signals from Noise

Introduces detection, estimation, and related algorithms. Topics in detection include simple/composite hypothesis testing, repeated observations and asymptotic performance and sequential detection. Topics in estimation include Bayesian estimation including minimum mean-square estimation and non-random parameter estimation. Topics in algorithms vary. Examples include algorithms for state estimation and smoothing in Hidden Gauss-Markov models and the expectation-maximization algorithm. Applications include communications, radar/sonar/geophysical signal processing, image analysis, authentication, etc.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4653

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5672 (3) Digital Image Processing

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion).

Requisites: Requires prerequisite course ECEN 5632 (minimum grade C-).

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5673

Recommended: Prerequisite CSCI 5573 or a course in computer networks.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5682 (3) Theory and Practice of Error Control Codes

Introduces error control coding techniques for reliable transmission of digital data over noisy channels. Topics include algebraic characterizations of cyclic codes, convolutional codes, modern graph codes, decoding algorithms for block codes, Viterbi algorithm and iterative decoding on graphs. Applications include modern digital communication and storage systems including deep space communications, satellite broadcasting, cellular networks, and optical disk storage.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5683 (3) Programmable Logic Embedded System Design

Learn to design programmable systems on a chip for the purpose of creating prototypes or products for a variety of applications. Explores complexities, capabilities and trends of Field Programmable Gate Arrays (FPGA) and Complex Programmable Logic Devices (CPLD). Implement synchronization and timing closure in these devices. Projects will involve the latest software and FPGA development tools and hardware platforms.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5686 (3) Optical Communications Systems

Emphasizes the elements that optical communication systems have in common with other communication systems. Works from a general communication system model toward fiber optic applications. Emphasizes the statistical nature of electronic based communication. Topics include 1) general system models, 2) detectors and receivers, 3) optical channels with emphasis on the single mode fiber channel, 4) coherent and incoherent systems: a) sources, b) modulation and c) detection, 5) special topics ranging from optical sensing to quantum communications.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Optics

ECEN 5692 (3) Principles of Digital Communication

Introduces fundamental principles of efficient and reliable transmission of information used in wired and wireless digital communication systems including cable modems, smart phones/tablets, cellular networks, local area (wi-fi) networks, and deep-space communications. Topics include bandwidth and power constraints, digital modulation methods, optimum transmitter and receiver design principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5696 (3) Fourier Optics

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging.

Recommended: Prerequisites ECEN 3300 and ECEN 3410.

Additional Information: Departmental Category: Optics

ECEN 5737 (3) Adjustable-Speed AC Drives

Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine).

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3170.

Additional Information: Departmental Category: Power

ECEN 5743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4743

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Prerequisite ECEN 4583 or ECEN 5543 or CSCI 5548.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4753 and CSCI 4753 and CSCI 5753

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5763 (3) Embedded Machine Vision and Intelligent Automation

Introduces students to machine vision and machine learning methods used in automation, autopilots and security and inspection systems. Embedded and automation topics include implementation of algorithms with FPGA or GP-GPU embedded real time co-processing for autopilots (intelligent transportation), general automation and security including methods for detection, classification, recognition of targets for inspection, surveillance, search and rescue, and machine vision navigation applications.

Requisites: Requires prereq courses of ECEN 5613 and 5623 (all minimum grade of C). Restricted to EEEN or ECEN or C-ECENEEN or C-EEEN or CRTGE students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4797

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Power

ECEN 5803 (3) Mastering Embedded Systems Architecture

Acquire an understanding of embedded systems architectures for the purpose of creating prototypes or products for a variety of applications. The salient issues in the decision making process will be examined, including trade-offs between hardware and software implementations, processor and operating system selection and IP creation or acquisition. Projects will involve the latest software development and tools and hardware platforms.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5807 (3) Modeling and Control of Power Electronic Systems

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, nulldouble injection techniques in linear circuits, input filter design, and low-harmonic rectifiers.

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5811 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation and functional magnetic resonance imaging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4811 and ASEN 4216 and ASEN 5216

Additional Information: Departmental Category: Bioengineering

ECEN 5813 (3) Principles of Embedded Software

Introduces principles around embedded software elements and software development needed for the Embedded Systems Engineering core curriculum. Student will write C program applications that employ efficient, high performance and robust software design techniques. Topics include bare-metal firmware, C-programming optimization and introductions to underlying embedded architecture. Sound testing and debug practices will be instilled and utilized in several application projects.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5817 (3) Resonant and Soft-Switching Techniques in Power Electronics

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, LCC, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched PWM converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits.

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4821 and ASEN 4426 and ASEN 5426

Additional Information: Departmental Category: Bioengineering

ECEN 5823 (3) Internet of Things Embedded Firmware

Acquire firmware development skills to meet low energy and internet connectivity demands of embedded systems. Event-driven firmware techniques will be explored through programming assignments, transitioning to programming an Internet of Things RF Network Protocol such as Bluetooth Low Energy or Thread. The coursework will align with the latest industry firmware and embedded wireless protocol trends.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4827

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Power

ECEN 5830 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 5831 (3) Brains, Minds, and Computers

Provides background for the design of artificially intelligent systems based upon our present knowledge of the human brain. Includes similarities and differences between the brain and computers, robots and common computer models of brain and mind. Emphasizes the neuron as an information processor, and organization of natural as well as synthetic neural networks.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4831 and ASEN 5436

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Bioengineering

ECEN 5837 (3) Mixed-Signal IC Design Lab

Software laboratory course extends the concepts developed in ECEN 5827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application.

Requisites: Requires prerequisite course of ECEN 5827 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 5863 (3) Programmable Logic Embedded System Design

Learn to design programmable systems on a chip for the purpose of creating prototypes or products for a variety of applications. Explore complexities, capabilities and trends of Field Programmable Gate Arrays (FPGA) and Complex Programmable Logic Devices (CPLD). Implement synchronization and timing closure in these devices. Projects will involve the latest software and FPGA development tools and hardware platforms.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5907 (3) Special Topics

Special topics class.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

ECEN 6016 (1-3) Special Topics

Additional Information: Departmental Category: Optics

ECEN 6139 (3) Logic Synthesis of VLSI Systems

Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits.

Recommended: Prerequisites ECEN 5139 and CSCI 5454.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 6144 (3) Electromagnetic Boundary Problems

Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics.

Requisites: Requires prereq course of ECEN 5114 or 5134 (minimum grade C-). Restricted to graduate students in Electrical Engr (EEEN) or Electrical/Computer Engr (ECEN) or Electrical Engr Concurrent or Electrical/Computer Engr Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 6800 (3) Master of Engineering Report

Additional Information: Departmental Category: General

ECEN 6940 (1) Master's Degree Candidate

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

ECEN 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 6960 (3) Master of Engineering

Additional Information: Departmental Category: General

ECEN 7438 (3) Theory of Nonlinear Systems

Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications.

Requisites: Requires prerequisite course of ECEN 5448 (minimum grade C-). Restricted to graduate students in Electrical Engr (EEEN) or Electrical/Computer Engr (ECEN) or Electrical Engr Concurrent or Electrical/Computer Engr Concurrent Degree students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 7840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 7849 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 8990 (1-10) Doctoral Thesis

Repeatable: Repeatable for up to 10.00 total credit hours.

Additional Information: Departmental Category: General

Energy Engineering (ENEN)

Courses

ENEN 2820 (1-6) Special Topics

Explores topics related to energy engineering. Content will vary by semester and instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENEN 4321 (3) Oil and Gas Processing

Provides a foundation in the fundamentals of oil and gas processing, including discovery, extraction and refining. Due to the importance of oil and gas in the current energy infrastructure, this course provides a broad understanding of the industry to students interested in energy engineering.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

ENEN 4600 (3) Interdisciplinary Energy Engineering Projects

Prepares students to analyze energy systems from technical, economic, and policy perspectives, with project topics varying by semester.

Provides historical and contemporary context of the energy landscape. Emphasizes application of engineering fundamentals for the design and evaluation of real world energy systems. Projects will be completed in interdisciplinary teams.

Requisites: Requires prerequisite courses of ENVS 3621 and CHEN 3660 (all minimum grade C). Restricted to Energy Engineering Minor (ENMR-MIN) majors only.

Grading Basis: Letter Grade

ENEN 4840 (1-6) Special Topics

Explores topics related to energy engineering. Content will vary by semester and instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Engineering for Developing Communities (EDEN)

Courses

EDEN 5001 (3) Special Topics in Development Engineering

At the graduate level, covers topics of interest in development, for both domestic and international locations. Content varies by section and from semester to semester.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Engineering Honors (EHON)

Courses

EHON 1151 (3) Critical Encounters

Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Department restriction, honors standing or instructor consent required.

Requisites: Restricted to Engineering Honors Program (PEHN) students only.

EHON 1500 (1) Honors Reading Group

Faculty led reading seminars, focusing on specific text or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning.

Requisites: Restricted to Engineering Honors Program (PEHN) students only.

Additional Information: Engineering Honors Course

EHON 3843 (3) Special Topics

Explores different important themes relative to the Engineering Honors Program. Check with department for specific semester topics.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Engineering Honors Program (PEHN) students only.

Additional Information: Engineering Honors Course

EHON 4051 (1) Dimensions of Leadership

Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Department restriction, honors standing or instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Engineering Management (EMEN)

Courses

EMEN 3100 (3) Introduction to Engineering Management

Examines topics important to the management of engineering activities within organizations. Topics include the relationship of engineering to business and management disciplines, the functions of an engineering manager, principles and techniques for managing financial resource and business ownership. Explores best practices in global engineering management, process management, legal issues, ethics, organizational behavior and communications.

Grading Basis: Letter Grade

EMEN 4030 (3) Project Management Systems

Gain skills in project management, one of the fastest growing professions, using standard processes that fit into any industry, sector or geography. This interactive class provides students with the tools necessary to effectively initiate, execute, control and close any type of project for increased success. Students learn the skills to oversee projects to ensure it meets its goals, time line and budget.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4050 (3) Leadership and Professional Skills

Accelerate your personal and professional growth with the essential skills required to become an effective leader/manager. Conduct personal development through exercises in communication and leadership effectiveness. Explore leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics and business ethics.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4100 (3) Engineering Economics

Introduces engineering cost concepts, financial statements and the corporate economic environment. Includes concepts and methods of analysis of the time value of money, comparison of project alternatives before and after taxes, cash flow, replacement analysis, risk management and financial case statements.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4200 (3) Engineering and Entrepreneurship for the Developing World

Use your engineering and problem solving skills, combined with market/industry research, customer interviews, design for manufacturability, stakeholder management and financial modeling to promote entrepreneurship and sustainable change in the developing world. Explore alternative energy, medical devices, phones, internet, recycling, cook stoves, clean water, sanitation and infrastructure.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

EMEN 4400 (3) Process and Quality Systems

Introduces the concepts, tools and techniques used in the management and measurement of quality and productivity in a business environment. Associated topics include: statistics methods, design quality, measurement, control and process improvement. Discover the basics of performance excellence management including Baldrige Award criteria, strategic planning, leadership and daily quality management.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4405 (3) Systems Engineering

Introduces students to system engineering in terms of defining objectives, applications and the major steps in the systems engineering process. Learn to work effectively with diverse project teams. Industry standards are covered that lay out the steps of the classic Systems Engineering lifecycle. Real world engineering examples from concept exploration to hardware retirement are used.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

EMEN 4800 (3) Technology Ventures and Marketing

Learn marketing concepts, skills and tools to launch new products and ventures. Engage with faculty, classmates, guest speakers, industry professionals, potential customers and one's leadership team to help you launch your venture. Develop the necessary skills and tools to be successful colleagues, managers and leaders in industry. Gain valuable business acumen using a hands-on learning environment.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4825 (3) Entrepreneurial Business Plan Preparation

Instructs students in the necessary elements of a business plan and how to prepare a complete well-written plan for an entrepreneurial business venture. Students work in interdisciplinary business-engineering five-person teams to create a business concept and take it through to business plan completion.

Equivalent - Duplicate Degree Credit Not Granted: ESBM 4830

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4830 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

EMEN 4840 (1-3) Independent Study Project

Available only through approval of Engineering Management Program. Subjects arranged to fit the needs of the particular student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EMEN 5000 (3) Engineering Analysis

Provides an introduction to the logical and systematic thinking required to solve typical engineering problems in mechanics, electricity, thermodynamics, fluid mechanics, electricity, thermodynamics, fluid mechanics and renewable energy. Emphasizes understanding the physical behavior of systems and applying the principles and laws from the physical sciences to analyze these systems. Required for non-engineers seeking admission to the Engineering Management graduate degree program.

EMEN 5005 (3) Introduction to Applied Statistical Methods

Covers statistical reasoning and statistical analysis for applications related to business and engineering decision making. Topics include an introduction to engineering and applied research, descriptive statistical analysis and its foundations, inferential statistics to include estimation and hypothesis testing using both traditional parametric as well as nonparametric procedures for research situations involving one or two groups of treatment conditions.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) or graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5010 (3) Introduction to Engineering Management

Learn concept, methods, activities and philosophies of business and be encouraged to utilize them in your professional activities. Interact with engineering management faculty who share what works based upon their engineering management experiences. Engage with our classmates on their business experience, thereby preparing you to interact more thoughtfully and knowledgeably with your professional colleagues.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5020 (3) Finance and Accounting for Engineering Managers

Learn concepts and skills necessary to assess financial performance, including the analysis of income statements, balance sheets and cash flow statements. Apply the concepts and skills of corporate finance to your personal finance, including the creating of a diversified investment portfolio. Enhance your management credentials by being knowledgeable in corporate finance.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5030 (3) Fundamentals of Project Management

Provides an in-depth introduction to the project management discipline, including the concepts, tools and techniques used in the management and leadership of projects small and large alike. Key topics covered include the role of the project manager; project team selection and management; cost, schedule and risk management; quality in projects; introduction to creating and maintaining project plans through the project lifecycle.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5031 (3) Software Project Management

Introduces software project management as a critical element of software development activities throughout every area of human endeavor. Learn the software life cycle, software configuration management, code reviews, architectural influences and quality assurance with automated testing. Explore the impact on project success of the Capability Maturity Model (CMM) and United Modeling Language (UML).

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5608 and ECEN 5603

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

Recommended: Prerequisite software development experience.

EMEN 5032 (3) Advanced Topics in Project Management

Covers advanced topics in project management from a systems view based on the Project Management Body of Knowledge (PMBOK); spans the entire project life cycle. Non-EMP students require instructor consent.

Requisites: Requires prerequisite course of EMEN 5030 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5040 (3) Quality, Strategy, and Value Creation

Introduces the fundamentals of Business Performance Excellence (BPE including theories of leadership, theories of business, core competencies, Deming's theory of Profound Knowledge, strategic differentiation and all of the elements of strategy development.) Addresses strategic planning and policy deployment to map the company's strategy to all parts of the organization, a process strengthened through employee empowerment.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5041 (3) Advanced Topics in Value Creation

Focuses on the advanced study of methods designed to maximize excellence in business performance. Includes a model to understand process and product tradeoffs, interactions with supplies, integrated manufacturing systems and meeting customer requirements while maximizing profitability. These characteristics are addressed both strategically and tactically through the use of case analysis, field study and experiential learning for production and service sectors.

Requisites: Requires prerequisite courses of EMEN 5005 and EMEN 5040 (all minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5042 (3) Methods for Quality Improvement

Develop in-depth expertise in the concepts, tools and techniques used in the management and measurement of quality and productivity. Apply statistics and probability to the topics of process variation and statistical process control and capability analysis for process, product, and measurement systems. Explore an introduction to design of experiments (DOE) in business and industry to improve both quality and performance.

Requisites: Requires prerequisite course of EMEN 5005 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5043 (3) Advanced Topics in Quality Systems/ Engineering

Advanced study of methods, tools, techniques and systems associated with advanced quality applications. Includes a survey of advanced process control technologies, control schemes and measurement system analysis. Non-EMP students require instructor consent.

Requisites: Requires prerequisite course of EMEN 5042 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5050 (3) Leading Oneself

Provides working engineers a background in leadership concepts and methods and enables students to develop practical leadership skills through numerous in-class exercises and experimentation based assignments. Topics include authentic leadership, motivating self and others, cultivating emotional intelligence, personal mastery, creating accountability, conflict resolution, leading change and organizational culture. Required for all Engineering Management degree students.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5050

Requisites: Restricted to College of Engineering graduate students or to Graduate Certificate Engineering (CRTGE) students only.

EMEN 5080 (3) Ethical Decision-Making in Engineering Management

Learn how to recognize ethical issues and dilemmas affecting managers in the workplace. Understand various models and practices offering solutions to these issues and how to create a culture of ethics and integrity in supporting and/or building a profitable, healthy and responsible organization.

Requisites: Restricted to College of Engineering graduate students or to Graduate Certificate Engineering (CRTGE) students only.

EMEN 5090 (3) Marketing and Technology Ventures

Learn the basics of marketing for developing a technology innovation as a commercially successful product, including customer development as a part of product development. Designed to be of interest to engineers in existing companies and startups. The format includes in-depth discussions of real-world case studies and marketing strategies for the high tech environment. Non-EMP students require instructor consent.

Requisites: Requires prerequisite course of EMEN 5020 (minimum grade B). Restricted to College of Engineering graduate students or to Graduate Certificate Engineering (CRTGE) students only.

EMEN 5094 (3) Entrepreneurship for Engineers

Explores the concepts of entrepreneurship as it relates to forming an innovative and successful technology based venture. Takes a very practical approach to entrepreneurship with a semester long project that incorporates all the fundamental elements of new business creation. The objective is to enable engineering students to transform their own creative technical idea into a viable and sustainable business opportunity.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

Grading Basis: Letter Grade

EMEN 5400 (3) Product Development and Design

Provides state-of-the-art techniques for improving the identification and creation of new products, services and brands that provide an exceptional customer experience. Both proven and emerging management techniques in new product management are covered.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

Recommended: Prerequisites EMEN 5020 and EMEN 5090.

EMEN 5405 (3) Fundamentals of Systems Engineering

Examines the disciplined processes of designing and managing complex systems over their life cycle. Requirements engineering, reliability, logistics, team leadership, testing and evaluation, maintainability and other disciplines are examined with focus on the system engineering of small spacecraft.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5188

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5500 (3) Lean and Agile Management

Learn lean and agile concepts and tools to improve customer value, improve processes and reduce waste. Examine and apply lean and agile principles in diverse circumstances including hardware/software, product development/ongoing operations and manufacturing products/providing services. Apply your learning to improving performance in current responsibilities, whether as an individual contributor or as a manager.

Equivalent - Duplicate Degree Credit Not Granted: OPIM 6080

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5610 (3) Advanced Statistical Methods for Engineering Research

Combines intermediate and advanced statistical methods (Two- and Three-Way ANOVA and post hoc analyses for a large variety of specific designs). Real data sets are employed permitting a focus on engineering research in support of business decision making through the integration of cost benefit analysis and process performance. Parametric as well as nonparametric methods of analysis are included.

Requisites: Requires prerequisite course of EMEN 5900 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5620 (3) Data Mining and Screening Experiments for Engineering Research

Combines intermediate and advanced statistical methods with practical research applications. Develops commonly used statistical models such as Two and Three-Way Analysis of Variance and the analysis of Fractional Factorial Designs for the solution of common business and industrial research problems. The statistical models are implemented and interpreted in the context of actual data sets using available statistical software.

Requisites: Requires prerequisite course of EMEN 5610 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5710 (3) Applied Business Decisions

Team up with fellow classmates to launch a high-tech company as part of an eight quarter project in a competitive, simulated business environment. Make decisions in product development, marketing, operations and finance based on results of the previous quarter. Prepare a business pitch and executive summary to justify additional venture capital or a bank loan. Non-EMP students require instructor consent.

Requisites: Requires prerequisite course of EMEN 5020 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5825 (3) Intrapreneurship & Innovation

Learn a comprehensive set of business concepts, skills and tools to launch and manage intrapreneurial ventures. Engage with faculty, classmates, guest speakers, industry professionals, potential customers and one's leadership team to help you launch your venture. Develop the necessary skills, tools and awareness to be successful colleagues, managers and leaders in scientific and engineering industries. Gain valuable business acumen using a hands-on and learning environment.

EMEN 5830 (3) Special Topics

Non-EMP students require instructor consent.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering graduate students only.

EMEN 5840 (1-3) Independent Study Project

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Non-EMP students require instructor permission.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

EMEN 5900 (3) Research Methods and Experimental Design

Explores commonly used research methods including analytical, agreement, descriptive and relational methods; experimental design including incorporation, nesting, blocking and controlling; threats to the internal and external validity of research. Also reviewed are sampling procedures and considerations, measurement validity and reliability, and managing the research study.

Requisites: Requires prerequisite course of EMEN 5005 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 6805 (1) Capstone Preparation

Students determine capstone research question, conduct literature review, develop research methodology and project plan, write a proposal, and select capstone committee.

Requisites: Requires prerequisite course of EMEN 5825 or EMEN 5900 (minimum grade C+). Restricted to graduate students in Engineering Management Program (EMEN) only.

EMEN 6810 (2) Capstone Completion

Continues EMEN 6805 as the second half of a two-course sequence for the engineering management capstone project. Students conduct agreed-upon research, research and analyze results, develop recommendations, write a final report, and present the project to the committee for evaluation.

Requisites: Requires prerequisite course of EMEN 6805 (minimum grade C+). Restricted to graduate students in Engineering Management Program (EMEN) only.

EMEN 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

Grading Basis: Pass/Fail

English (ENGL)

Courses

ENGL 1001 (3) Freshman Writing Seminar

Provides training and practice in writing and critical thinking. Focuses on the writing process, the fundamentals of composition, and the structure of argument. Provides numerous and varied assignments with opportunity for revision.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Arts and Sciences majors only.

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Undergraduate Writing
MAPS Course: English

ENGL 1191 (3) Introduction to Creative Writing

Introduces techniques of fiction and poetry. Student work is scrutinized by the instructor and may be discussed in a workshop atmosphere with other students. May not be taken concurrently with ENGL 2021 or ENGL 2051. May not be repeated. Not open to graduate students.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 1210 (3) The Novel

Explores the many possibilities of the novel, or, the novel as possibility, and emphasize that formal and aesthetic innovation is not peripheral to the novel's development but central to its influence and existence. Focuses on the elements of fiction in order to develop an aesthetic and literary appreciation of this complex art form.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Literature and Language

ENGL 1220 (3) From Gothic to Horror

Explores literature in the Gothic mode and aesthetic and critical theories related to modern "horror" genres or their precursors. Introduces literary-critical concepts (such as notions of abjection, repression and anxiety) that developed alongside this branch of literature. Students read canonical works in British and American traditions while reflecting on notions of popular or marginalized literature.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 1230 (3) Environmental Literature

Introduces students to the tradition of nature writing dating from Romanticism through realist and experimental contemporary literary texts. Students will study key terms and concepts related to the environment such as anthropocentrism, bioregionalism, eco-cosmopolitanism, environmental justice, deep ecology, and posthumanism. They will apply them to different literary genres toward developing critical analyses and environmental readings.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 1260 (3) Introduction to Women's Literature

Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution.

Equivalent - Duplicate Degree Credit Not Granted: WGST 1260

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: General Literature and Language

ENGL 1340 (3) Mysticism and the Jewish American Literary Tradition

Explores the mystical tradition within Judaism from ancient times to the present. With roots in the Hebrew Bible, Jewish mysticism is one of the oldest forms of mysticism and has had an influence on some of the greatest philosophical traditions of western civilization.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1234

Grading Basis: Letter Grade

Additional Information: Departmental Category: American Literature

ENGL 1420 (3) Poetry

Introduces students to how to read a poem by examining the great variety of poems written and composed in English from the very beginning of the English language until recently.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: General Literature and Language

ENGL 1500 (3) Masterpieces of British Literature

Introduces students to a range of major works of British literature, including at least one play by Shakespeare, a pre-20th century English novel, and works by Chaucer and/or Milton.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: General Literature and Language

ENGL 1600 (3) Masterpieces of American Literature

Enhances student understanding of the American literary and artistic heritage through an intensive study of a few centrally significant texts, emphasizing works written before the 20th century.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: General Literature and Language

ENGL 1800 (3) American Ethnic Literatures

Introduces significant fiction by ethnic Americans. Explores both the literary and the cultural elements that distinguish work by these writers. Emphasizes materials from Native American, African American, and Chicano traditions.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: General Literature and Language

ENGL 2021 (3) Introductory Poetry Workshop

Introductory course in poetry writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B). Not open to graduate students.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 2036 (3) Introduction to Media Studies in the Humanities

Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant reading and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 2036

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 2051 (3) Introductory Fiction Workshop

Introductory course in fiction writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B).

Additional Information: Departmental Category: Undergraduate Writing

ENGL 2058 (3) Twentieth- and Twentyfirst-Century Literature

Surveys the major literary trends in prose and poetry from 1900 to the present in the Anglo-American tradition of modern, postmodern, and contemporary literature. Provides students with a grounding in the major authors and motifs of 20th- and 21st-century in literature in conjunction with political and cultural changes across the periods.

Additional Information: Departmental Category: Critical Studies in English

ENGL 2102 (3) Literary Analysis

Provides a basic skills course designed to equip students to handle the English major. Emphasizes critical writing and the acquisition of basic techniques and vocabulary of literary criticism through close attention to poetry and prose.

Requisites: Restricted to English (ENGL) majors and minors only.

Additional Information: Departmental Category: General Literature and Language

ENGL 2112 (3) Introduction to Literary Theory

Introduces students to a wide range of critical theories that English majors need to know. Covers major movements in modern literary/critical theory, from Matthew Arnold through new criticism to contemporary postmodern frameworks. Required for all English majors.

Requisites: Restricted to English (ENGL) majors and minors only.

Additional Information: Departmental Category: General Literature and Language

ENGL 2115 (3) American Frontiers

Considers the backdrop of the American West in literature, film, photography and computer gaming. Focuses on a range of narratives and images depicting this wide swathe of American geography while simultaneously cultivating close reading skills, digital media analysis and film analysis that will aid in deeper insights at the textual level.

Additional Information: Arts Sci Core Curr: United States Context

Departmental Category: American Literature

ENGL 2503 (3) British Literary History to 1660

Provides a chronological study of great figures and forces in English literature from Beowulf to 1660.

Additional Information: Departmental Category: British Literature to 1660

ENGL 2504 (3) British Literary History after 1660

Provides a chronological study of great figures and forces in English literature from 1660 to the present. Formerly ENGL 2512.

Additional Information: Departmental Category: British Literature after 1660

ENGL 2655 (3) Introduction to American Literature I

Chronological survey of the literature from Bradford to Whitman.

Additional Information: Departmental Category: American Literature

ENGL 2665 (3) Introduction to American Literature 2

Chronological survey of the literature from Whitman to Faulkner. Continuation of ENGL 2655.

Additional Information: Departmental Category: American Literature

ENGL 2707 (3) Introduction to Lesbian, Bisexual, and Gay Literature

Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, transgender and gay writing in English.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 2707

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2717 (3) American Indian Literature

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories and poetry.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2713

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2727 (3) Survey of African American Literature 1

Surveys African American literature from the 17th century through the Harlem Renaissance and Depression.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2737 (3) Survey of African American Literature 2

Surveys African American literature from the Depression to the present.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2732

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2747 (3) Chicana/Chicano and Mexican Literature

Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity and gender relations.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2746

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 2767 (3) Survey of Post-Colonial Literature

Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2761

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3000 (3) Shakespeare for Nonmajors

Introduction to Shakespeare. Introduces students to 6-10 of Shakespeare's major plays. Comedies, histories, and tragedies will be studied. Some non-dramatic poetry may be included. Viewing of Shakespeare in performance is often required.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only. English (ENGL) and Humanities (HUMN) majors are excluded from taking this class.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 3005 (3) The Literature of New World Encounters

Explores American literature as a site of cultural intersection between European settlers and indigenous peoples.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3008 (3) Developments in the Novel, Post-1900

Introduces students to the major works, authors and formal trends of the 20th and 21st-century novel. Texts may be drawn from British, American and global literary traditions. Focuses on a specific movement, development, or transformation in the genre post-1900, for instance, modernism, postmodernism, naturalism, realism, postcolonial fiction, historical fiction.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Critical Studies in English

ENGL 3011 (3) Literary Forms and Styles in Post-1900 Literature

Studies special topics in literary forms and styles (e.g. magical realism, naturalism, language poetry, etc.) and also the development of genres (e.g. poetry, drama, digital media, novel) in the 20th- and 21st-centuries. Topics vary each semester. Specially design for English majors. May be repeated for a total of 6 units for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3021 (3) Intermediate Poetry Workshop

Intermediate course in poetry writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 2021 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3025 (3) American Nationalisms

Examines how literature participates in the creation of American national culture and identity. Surveys major political writing and a variety of literary genres, tropes, and themes from early native American tales to the 20th-century literature.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3041 (3) Studies in Fiction and Poetry

Examines literary forms and themes with special emphasis on issues related to the craft of poetry and fiction. This course is taught in conjunction with visiting lectures by practicing writers. Does not count as Creative Writing workshop credit.

Requisites: Requires prerequisite course of ENGL 1191 (minimum grade B).

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3051 (3) Intermediate Fiction Workshop

Intermediate course in fiction writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course ENGL 2051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3060 (3) Modern and Contemporary Literature for Nonmajors

Close study of significant 20th-century poetry, drama, and prose works. Readings range from 1920s to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 3068 (3) Literature in English, 1900-1945

Surveys major literary trends from 1900-1945 in the Anglo-American tradition, including the characteristics of literary modernism. Covers both prose and poetry, as well as the relationship between literature and history to the close of World War II.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Critical Studies in English

ENGL 3078 (3) Literature in English, 1945-Present

Explores major literary and theoretical trends in the Anglo-American tradition after 1945.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Recommended: Prerequisites ENGL 2102 and ENGL 2058.

Additional Information: Departmental Category: Critical Studies in English

ENGL 3081 (3) Intermediate Nonfiction Workshop

Discussion and practical criticism of student work and discussion of relevant works of literary nonfiction.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 2021 or ENGL 2051 (minimum grade B). Restricted to English (ENGL), Humanities (HUMN), Theatre (THTR or TBFA) majors only or Creative Writing (CRW) minor students only.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 3088 (3) Major Authors of Post-1900 Literature

Provides an in-depth study of the work of one or two major authors in the Anglo-American tradition after 1900. May be repeated for a total of 9 units for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Critical Studies in English

ENGL 3116 (3) Topics in Advanced Theory

Studies special topics in theory; specially designed for English majors. Topics vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 2112 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3164 (3) History and Literature of Georgian Britain

Provides an interdisciplinary study of England in one of its most vibrant cultural and historical periods. Topics include politics, religion, family life, and the ways contemporary authors understood their world.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: British Literature after 1660

ENGL 3204 (3) Developments in the Novel

Covers the development of the novel.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature after 1660

ENGL 3217 (3) Topics in Gender Studies

Studies special topics in gender studies; specially designed for English majors. Topics vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3226 (3) Folklore

Emphasizes formal study of folk traditions (including tales, songs, games, customs, beliefs, and crafts) within a theoretical framework, using examples from several cultures.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3235 (3) American Novel

Surveys the American novel. Covers the early development of the American novel, its rise in the 19th- and 20th-centuries, and its contemporary expressions. Students will be introduced to theories of the novel, the major movements and authors, as well as the characteristics that define the American novel as unique.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3245 (3) American Poetry

Surveys American poetry from the 17th- to the 21st-century. Includes training in poetic theory, form, and genre, as well as in poetic analysis.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3246 (1-3) Topics in Popular Culture

Studies special topics in popular culture; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3267 (3) Women Writers

Introduces literature by British and American women.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3267

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3300 (3) Literary London

Study the works of a major author, school or period of English literary history in London. Subject rotates each year, with possible topics ranging from medieval to contemporary literature. Course incorporates local sites, landmarks, museums, performances and scholars. Application through the Office of International Education required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: General Literature and Language

ENGL 3310 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Formerly ENGL 3312.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3310 and JWST 3310

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Backgrounds to Literature in English

ENGL 3377 (3) Multicultural Literature

Studies special topics in multicultural literature; specially designed for English majors. Topics vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3523 (3) The Renaissance in England, 1500-1600

Selected prose and non-dramatic poetry from Skelton and More through Shakespeare and his contemporaries. Formerly ENGL 4523.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3533 (3) The Renaissance in England, 1600-1700

Selected prose and poetry by Donne, Jonson, Bacon and their successors. Formerly ENGL 4533.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3544 (3) The Restoration and the Eighteenth Century

Surveys main currents in the literature and culture of the long 18th century. Formerly ENGL 4544.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature after 1660

ENGL 3553 (3) Geoffrey Chaucer

Selection of Chaucer's works, including *The Canterbury Tales* and other shorter poems. Includes an introduction to Middle English.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3563 (3) Shakespeare

Shakespeare's poetry and drama.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3564 (3) Romanticism

Surveys British Romanticism, including Blake, Coleridge, Wordsworth, Keats, Shelley, and Byron.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature after 1660

ENGL 3573 (3) Shakespeare in Performance

Focuses on Shakespeare the dramatist through the study of the three Shakespeare plays produced in the summer by the Colorado Shakespeare Festival. In addition to exploring the text, the historical context and performance conventions c. 1600, students meet the CSF teams (professional directors, dramaturgs, designers and actors) of the three plays and the Producing Artistic Director of the CSF.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3583 (3) Milton

Milton's poetry and selected prose.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3593 (3) Major Authors in British Literature before 1660

Focuses on one major author of the medieval or early modern period, such as William Langland, John Lydgate, Edmund Spenser or Ben Jonson. Course content varies with instructor and may include literary influences, contemporary writers, and historical influences as necessary to understanding the writer. May be repeated for a total of 9 units for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature to 1660

ENGL 3604 (3) The Victorian Era

Surveys main currents of Victorian thought in prose and poetry.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: British Literature after 1660

ENGL 3675 (3) Major Authors in American Literature

Provides an in-depth study of the work of one or two major American authors. Explores the range, influences, and development of a writer over his or her life.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 3767 (3) Feminist Fictions

Examines a series of literary texts to consider how writers across the world have used fiction to creatively stage and reimagine gender and sexuality. Attends to the formal and narrative techniques by which these texts call attention to the fictionality—and thereby the creative malleability—of gender itself. Some cinematic and performance texts will also be included.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3767

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 3796 (3) Queer Theory

Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, transgender and gay literature. Examines relationships among aesthetic, cultural and political agendas, and literary and visual texts of the 20th century.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 3796

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3856 (1-3) Topics in Genre Studies

Studies special topics in genre studies; specially designed for English majors. Topics vary each semester. May be repeated for a total of 6 credit hours for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 3930 (1-6) Internship

Provides academically supervised opportunity for upper-division students to work in public or private organizations on projects related to students' career goals and to relate classroom theory to practice. Department enforced prerequisite: 3.0 GPA and faculty supervision.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Literature and Language

ENGL 3940 (1-3) Service Learning Practicum

Under faculty supervision, students participate in a service project in conjunction with an academic course.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General Literature and Language

ENGL 4003 (3) Introduction to Old English

Introduces students to Old English, the ancient ancestor of Modern English (as Latin is the ancestor of Spanish and Italian, distinct from both). Course will focus on reading knowledge through grammar study and translation, and to a lesser extent on pronunciation. Provides basic parsing and translation skills and an introduction to the history, culture, and literature of Anglo-Saxon England.

Additional Information: Departmental Category: British Literature to 1660

ENGL 4013 (3) Intermediate Old English

Continues development of skills in Old English reading and translation. Translation and literary study of one longer work and a number of shorter related works. Repeatable course rotates on a three-year basis, for instance, year one may focus on Beowulf and shorter heroic elegies; year two may involve prose such as legends and saints' lives; year three may involve religious poetry.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 4003 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: British Literature to 1660

ENGL 4018 (3) Global, Transnational and Postcolonial Approaches to Post-1600 Literature

Studies special topics that focus on transnational and global issues in the 20th- and 21st-century literature. For instance, the emergence of globalization, the impact of cross-cultural exchanges, the increase of migration, or the legacies of imperialism. Topics vary each semester. Specially designed for English majors. May be repeated for a total of 6 units for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4021 (3) Advanced Poetry Workshop

Advanced course in poetry writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course ENGL 3021 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4026 (3) Special Topics in Genre, Media, and Advanced Writing

Studies theoretical and historical approaches to genre, media, and writing at the advanced level.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 4039 (3) Critical Thinking in English Studies

Concerned with developments in the study of literature that have significantly influenced our conception of the theoretical bases for study and expanded our understanding of appropriate subject matter.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite courses of ENGL 2102 and ENGL 2112 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) English (ENGL) or Humanities (HUMN) majors only.

Additional Information: Departmental Category: Critical Studies in English

ENGL 4048 (3) Modern British and Irish Novel

Studies major figures and trends in the 20th century. Formerly ENGL 4224.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4051 (3) Advanced Fiction Workshop

Advanced course in fiction writing.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4071 (3) Screenwriting Workshop

Designed to give students practical criticism of their script writing and technical format requirements. Either stage plays or screenplays are studied, as announced.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 3021 or ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4081 (3) Playwriting Workshop

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ENGL 3021 or ENGL 3051 (minimum grade B). Restricted to Creative Writing minor students or students with a sub plan of Creative Writing.

Additional Information: Departmental Category: Undergraduate Writing

ENGL 4098 (3) Special Topics in the Novel, Post-1900

Explores a special topic in literature written in, or translated into English, post-1900.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Critical Studies in English

ENGL 4113 (3) History and Culture of Medieval England

Explores the major historical, literary, and cultural developments in England from the Anglo-Saxon period through the 15th-century.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: British Literature to 1660

ENGL 4116 (3) Advanced Topics in Media Studies

Studies specialized topics in the history, theory, and practice of media, such as the history of the book, the theory of digital media, and the theory and practice of multimedia forms. Specially designed for English majors. Topics vary year to year.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 4250 (3) Modern and Contemporary Novel

Close study of masterpieces by such novelists as Proust, Joyce, Woolf, Lawrence, Mann, Kafka, and Faulkner.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Literature and Language

ENGL 4277 (3) Topics in Women's Literature

Focuses on areas of research interest in the study of women's literature, such as selected themes or critical issues. Students are expected to contribute original research to the topic under consideration.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4277

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 4286 (3) Folklore 2

Upper-division studies of folk groups, events, texts, and contexts as they reflect traditional knowing-folk perceptions and teachings about the structure and purpose of the universe.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Advanced Theory, Genre Studies and Popular Culture

ENGL 4287 (3) Special Topics in LGBT Literature

Examines a special topic in LGBT literature, foregrounding an approach that focuses on how same-sex desire is represented in literature.

May explore the rhetorical and ideological depiction of masculinity and femininity; literary representations of inversion, bisexuality, and transgenderism; the social construction of homosexuality and heterosexuality. Specific topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 4287 and WGST 4287

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 4360 (3) Modern Drama

Explores continental, British, and American drama since Ibsen.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Literature and Language

ENGL 4460 (3) Modern Poetry

Selects works of British and American poets from 1900 to the present.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Literature and Language

ENGL 4503 (3) Continental Medieval Literature

Intensive study of the major literary works of the Middle Ages in Europe.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature to 1660

ENGL 4513 (3) British Medieval Literature

Intensive study of the major literary works of the Middle Ages in Britain.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature to 1660

ENGL 4514 (3) Advanced Topics: The Restoration and the Eighteenth Century

Covers advanced topics in the Restoration and Eighteenth-century.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4524 (3) Advanced Topics: Romanticism

Covers advanced topics in British Romanticism. Formerly ENGL 4574.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4583 (3) Elizabeth I and Her Times

Interdisciplinary course explores different aspects of the reign of Elizabeth I: social and political history; literature; theater; music. Explores the role and impact of a female ruler on English culture.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature to 1660

ENGL 4624 (3) Transnational/Historic/Interdiscipline Approaches 1660-1900

Explores a special topic in British literature written between 1660-1900 that crosses traditional divisions of nationality, history, and discipline.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4634 (3) Advanced Topics: The Victorian Era

Covers advanced topics in Victorian literature. Formerly ENGL 4614.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature after 1660

ENGL 4655 (3) Studies in American Literature to 1900

Extensive study of particular periods and movements in American literature.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 4665 (3) Studies in American Literature after 1900

Extensive study of particular periods and movements in American literature.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 4677 (3) Jewish-American Literature

Explores the Jewish-American experience from the 19th-century to the present through writers such as Sholom Aleichem, Peretz, Babel, Singer, Malamud, Miller, Ginsberg and Ozick. The Jewish experience ranges from the travails of immigration to the loss of identity through assimilation. Formerly ENGL 3677.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4677

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Multicultural and Gender Studies

ENGL 4685 (3) Special Topics in American Literature

Explores a special topic in American literature. May be repeated for a total of 9 units for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: American Literature

ENGL 4693 (3) Advanced Topics in British Literature to 1660

Explores a special topic in medieval or early modern literature. May be repeated for a total of 9 units for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: British Literature to 1660

ENGL 4697 (3) Special Topics in Multicultural and Ethnic American Literature

Provides advanced in-depth study of literatures written by ethnic American authors. Texts may be drawn from a range of African-American, Chicano/a, Latino/a, Asian American, Native American or Indigenous literature traditions. Topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4692

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 4717 (3) Native American and Indigenous Studies Capstone Seminar

Engages a wide range of NAIS methodologies with a series of case studies. Focuses on print, visual, and digital texts encompassing wide swathe of Eurowestern disciplines, while seeking to recuperate and restore Indigenous epistemic practices within our scholarship. Refines students' skills in intellectual debate in the spirit of shared inquiry and challenges research and writing skills.

Requisites: Requires prerequisite course of ETHN 1023 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Multicultural and Gender Studies

ENGL 4820 (3) Honors Seminar

Prepares prospective honors students to write honors theses. Focuses on sharpening the skills needed to write a successful thesis, including research techniques and the ability to evaluate and respond to secondary materials. Required for Honors in English Literature.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course
Departmental Category: General Literature and Language

ENGL 4830 (3) Honors Thesis

Students accepted to English Departmental Honors are enrolled in this course.

Additional Information: Arts Sciences Honors Course
Departmental Category: General Literature and Language

ENGL 4840 (1-3) Independent Study---Upper Division

Creative writing.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: General Literature and Language

ENGL 4850 (1-3) Independent Study---Upper Division

Literature/language.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: General Literature and Language

ENGL 5000 (3) Introduction to Applied Shakespeare

Provides an introduction to the life, work and world of William Shakespeare to prepare students for the Applied Shakespeare Professional Masters Certificate two-week intensive. Students will gain a background in the social, cultural and political context of Renaissance theater, will be introduced to the conventions of Shakespearean drama and will explore key concerns impacting our understanding of Shakespeare's works. Department consent required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Courses

ENGL 5019 (3) Survey of Contemporary Literary and Cultural Theory

Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5029 (3) British Literature and Culture Before 1800

Introduces graduate level study of medieval and early modern writing through the long eighteenth century. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5059 (3) British Literature and Culture After 1800

Introduces graduate level study of Romantic, Victorian, Modern and Postmodern writing. Emphasizes a wide range of genres, forms, historical background and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5109 (3) Literature and Culture of the United States

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5139 (3) Global Literature and Culture

Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5169 (3) Multicultural/Postcolonial Studies

Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5199 (3) Studies in Special Topics

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5229 (3) Poetry Workshop

Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5239 (3) Fiction Workshop

Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5259 (3) Nonfiction Workshop

Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5269 (3) Publishing Workshop

Provides practical experience in the editorial, design, and business procedures of desktop publishing.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5279 (3) Studies in Poetry

Addresses modern poetry, written since World War II.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5299 (3) Studies in Fiction

Addresses modern fiction written since World War II.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5309 (3) Playwriting

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5319 (3) Studies in Literary Movements

Studies styles, trends, innovations and major writers in significant literary movements, particularly those after 1900, such as modernism and postmodernism.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5459 (3) Introduction to the Profession

Introduces purposes, methods and techniques of professional scholarship in English. Provides an overview of the discipline, including traditional areas of research and recent developments. Teaches students how to use research, bibliographic, and reference tools to prepare papers for conferences and publication. Required of all MA students in English.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5529 (3) Studies in Special Topics 1

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: IAWP 6100

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5549 (3) Studies in Special Topics 2

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5559 (3) Studies in Special Topics 3

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5849 (1-6) Independent Study (Graduate Level 1)

Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the Associate Chair for Graduate Studies prior to the beginning of the semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 6949 (1) Master's Degree Candidate

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Graduate Courses

ENGL 6959 (1-9) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7019 (3) Advanced British Literature and Culture Before 1800

Studies special topics in medieval and early modern writing through the long 18th Century. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7059 (3) Advanced British Literature and Culture After 1800

Studies special topics in romantic, Victorian, modern and postmodern writing. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7119 (3) Advanced Literature and Culture of the United States

Studies special topics in writing of the United States.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7149 (3) Advanced Global Literature and Culture

Studies special topics in recent writing in English from around the world.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7179 (3) Advanced Multicultural/Postcolonial Studies

Studies special topics in ethnic American and/or postcolonial writing in English, including relevant theoretical discourses. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7489 (3) Advanced Special Topics

Studies special topics in theory, culture, and literature of any period. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7849 (1-3) Independent Study (Graduate Level 2)

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Courses

ENGL 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Graduate Courses

English as a Second Language (ESLG) Courses

ESLG 1130 (2) Accent Reduction for Foreign Students

Provides oral activities with authentic English materials to reduce accents and to increase intelligibility for U.S. academic situations. Evaluates individual problem areas and includes one-on-one meetings with the native-speaker instructor. Improves overall articulation and fluency. Does not fulfill humanities or major requirements.

Equivalent - Duplicate Degree Credit Not Granted: ESLG 1210 or ESLG 1410

ESLG 1140 (2) Presentation Skills for International Students

Provides instruction and practice to improve classroom oral communication skills necessary for effective participation in the U.S. academic setting, either as an international TA or RA, graduate or undergraduate student. Evaluates individual problem areas and includes digital audio and video recording with extensive feedback from the native-speaker instructor. Improves oral competence and listening comprehension in English for international students.

Recommended: Prerequisite ESLG 1130.

ESLG 1210 (2) Academic Writing for Foreign Students

Addresses the development of paragraphs and full-length essays. Focus areas include organization and style, grammar and vocabulary and conventions of academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Improves fluency and precision in academic writing. Does not fulfill humanities or major requirements.

Equivalent - Duplicate Degree Credit Not Granted: ESLG 1130 or ESLG 1410

ESLG 1222 (2) Advanced Written Composition for Foreign Students

Continued practice in academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Preparation, writing, and revising of a full-length academic term/research paper or work on chapters for a master's thesis or doctoral dissertation. Does not fulfill humanities or major requirements.

Recommended: Prerequisite ESLG 1210.

ESLG 1410 (3) Academic English Skills for International Students

Provides instruction and practice to improve academic speaking and writing skills for effective participation in U.S. universities. Speaking includes accent reduction and effective communication through oral activities and recordings. Writing addresses development of paragraphs and full-length papers, including organization, grammar, vocabulary, incorporating ideas of others and citing sources appropriately. Instructor feedback helps students improve fluency in both speaking and writing. Restricted to non-native speakers of English.

Equivalent - Duplicate Degree Credit Not Granted: ESLG 1130 or ESLG 1210

Entrepreneurial & Small Business Management (ESBM) Courses

ESBM 3100 (3) Introduction to Entrepreneurship

Introduces non-business students to the multiple facets of entrepreneurship and the entrepreneurial process. Entrepreneurship is a process of fundamental transformation: from innovative idea to enterprise and from enterprise to value, entrepreneurship is more than a business practice. Innovation is central to this process and students will be challenged to develop creative solutions to a problem or need.

Requisites: Restricted to non-Business majors with 60-180 units completed.

ESBM 3200 (3) Principles of Business for Entrepreneurs

Provides non-business students with a basic understanding of the business principles required to start and grow an entrepreneurial venture. It is intended for individuals who have not taken a marketing, accounting or finance course. This course will focus on two aspects of business that are critical to the success of any new venture: marketing and financial management.

Requisites: Restricted to non-Business majors with 60-180 units completed.

ESBM 3700 (3) Entrepreneurial Environments

Introduces entrepreneurship. Addresses opportunity recognition, target markets, industry analysis, business model identification, sources of funding, managing rapid growth and writing feasibility studies. Examines alternative forms of entrepreneurship such as franchising, corporate entrepreneurship, family business and social entrepreneurship.

Requisites: Requires prerequisite courses of BCOR 2000 and BCOR 2200 and BCOR 2300 and BCOR 2400 or BCOR 2001 and BASE 2104 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ESBM 4100 (3) Writing a Venture Plan

Requires non-business students to engage in a rigorous, thoughtful and challenging process essential to planning a new venture. Using their own concept, students will develop a strategy to start and grow a venture. Communicating the plan is an essential element of this course and students will learn when and how to write a plan and make effective presentations.

Requisites: Restricted to non-Business majors with 60-180 units completed.

ESBM 4570 (3) Entrepreneurial Finance

Focuses on the financial concepts, issues, methods and industry practices relevant to entrepreneurial decision makers. Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering. Provides an understanding of the segments of the capital markets specializing in start-ups and growth financing.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ESBM 4820 (3) Special Topics in Entrepreneurship**ESBM 4825 (3) Experimental Seminar**

Offered irregularly to provide opportunity for investigation of new frontiers in Entrepreneurship and Small Business Management.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ESBM 4826 (3) Exp. Sem-Social Entrepreneurship: Designing a Better World

See the future through the eyes of entrepreneurs who are addressing global and social environmental problems such as poverty and deforestation. Can the social ventures they create to solve these problems survive over time and will they achieve the impact they seek? We will meet some of these social entrepreneurs and, in teams, write case studies to tell their stories.

Equivalent - Duplicate Degree Credit Not Granted: CESR 4826

Requisites: Restricted to non-Business majors with 60-180 units completed.

ESBM 4830 (3) Entrepreneurship Business Planning and Preparation

Work as part of a small team, with the focus on the process of creating a plan from the business concept and model through all of the elements of a professionally written business plan document.

Equivalent - Duplicate Degree Credit Not Granted: EMEN 4825

Requisites: Requires prerequisite course of ESBM 3700 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ESBM 4900 (1-3) Projects in Entrepreneurial Companies

Complete projects in preselected entrepreneurial companies. Department consent required.

Environment and Sustainability (ENST)

Courses

ENST 4150 (3) Energy Policy Project

Provides students with an opportunity to apply their knowledge of energy technologies, systems and policies to energy policy issues. Specific topical coverage varies by semester. Example topics include natural gas fracking, automotive fuel economy standards and natural gas exports. Students work in teams to research, prepare and present a detailed and specific energy project proposal. Formerly RSEI 4150.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ENVS 3621.

ENST 5000 (3) Energy Systems and Technologies

Examines the basics of energy technologies and energy delivery systems. Covers both conventional energy sources (oil and gas, coal, nuclear and hydroelectric) and renewable/sustainable energy technologies (wind, solar, biomass, geothermal and end-use efficiency). Investigates individual technologies as well as integration of multiple technologies on energy systems such as the electricity grid and liquid and gas fuels infrastructures. Formerly RSEI 5000.

ENST 5001 (3) Energy Policy in the 21st Century

Examines energy policy and the problem of sustainability through a variety of disciplinary and topical perspectives: historical, political, behavioral, techno-economic and legal. A critical approach is applied to arguments about energy policy processes, systems, and desired outcomes, with special emphasis on the role of renewable and sustainable energy in the changing global energy system. Department enforced prerequisite: an introductory energy science and technology course. Formerly RSEI 5001.

ENST 5002 (3) The Business of Sustainable Energy

Addresses the business of renewable energy, including opportunities and challenges with renewable electricity, renewable transportation fuels and energy efficiency. Topics include energy markets, opportunity identification, life cycle analysis, economic analysis, policy impacts and project financing of sustainable renewable energy business models. Formerly RSEI 5002.

Equivalent - Duplicate Degree Credit Not Granted: BADM 6930

Requisites: Requires prerequisite courses of ENST 5000 and ENST 5001 (all minimum grade D-).

ENST 5100 (1) Renewable and Sustainable Energy Seminar

Examines a wide range of energy issues in seminar format. Students attend energy-related seminars and critique/evaluate the presented material. Open to graduate students from all disciplines. Formerly RSEI 5100.

ENST 5200 (3) Energy Topics Course

Covers timely topics related to renewable and sustainable energy. Specific offerings vary by semester. Formerly RSEI 5200.

Environmental Design (ENVD)

Courses

ENVD 1001 (1) ENVD First-Year Seminar

Transitions first-year ENVD students into college through the process of discovering their path to educational success. Provide opportunities to facilitate learning through peer support groups and curricular integration with the ENVD core classes.

Requisites: Restricted to Environmental Design (ENVD) major or minor students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Social Factors

ENVD 1004 (3) Introduction to Environmental Design Theory

Introduces students to the complexity of forces that interact to shape the designed environment. A lecture sequence and parallel set of design exercises exposes students to the theory and practice of environmental design, and to the important issues that guide the work of architects, landscape architects, urban designers, and urban planners. Open to nonmajors on a space available basis.

Recommended: Corequisites ENVD 1052 and ENVD 2001.

Additional Information: Departmental Category: History and Theory

ENVD 1010 (3) Design Appreciation

Designed for students who are interested in pursuing a degree in design. Provides a foundation for viewing the world through the "eyes" of a designer and gives a broad overview of various design professions including: Architecture, Planning, Landscape Architecture, and Industrial Design through a basic history of design and speculation concerning the future of these professions.

Requisites: Restricted to non-Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: History and Theory

ENVD 1012 (3) Digital Representation Methods for Environmental Design

Guides students through a process of exploration and expression using various digital design and representation techniques common to the disciplines of environmental design. This course seeks to demystify contemporary practices in digital design methods and propels students into this discourse with ongoing experimentation in digital design media. It will expose students to Adobe Creative Suite, AutoCAD and SketchUp.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Methods and Techniques

ENVD 1052 (3) Design and Communication 1

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by emerging digital techniques for the depiction of designed artifacts and environments, allowing students to extend and enhance their understandings of advanced practices for design visualization, representation and communication.

Recommended: Corequisites ENVD 1004 and ENVD 2001.

Additional Information: Departmental Category: Methods and Techniques

ENVD 1102 (3) Design and Communication 2

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by traditional techniques for the advanced practices for design visualization, representation, and communication.

Requisites: Requires prerequisite course of ENVD 1052 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Recommended: Corequisites ENVD 1104 and ENVD 2003.

Additional Information: Departmental Category: Methods and Techniques

ENVD 1104 (3) Introduction to Environmental Design Methods

Explores the forces and conditions that interact to shape the designed environment. It does so through a lecture sequence and parallel set of design exercises introducing students to the theory and practice of environmental design. It develops student understandings of the central role design thinking plays as the unique process used to effect appropriate change in the designed environment.

Recommended: Corequisites ENVD 1102 and ENVD 2003.

Additional Information: Departmental Category: History and Theory

ENVD 2001 (3) Human Behavior in Design and Planning

Examines reciprocal relationships between people and their built and natural environments, tracing major issues and approaches in design research to understand how people are influenced by the environment and how they can create healthy, just, and livable places.

Recommended: Corequisites ENVD 1004 and ENVD 1052.

Additional Information: Departmental Category: Social Factors

ENVD 2003 (3) Ecology and Design

Introduces basic principles and techniques of ecology as they relate to the design and understanding of the built environment. Includes a study of hazards and the impact of modern technology on the natural and built environments.

Recommended: Corequisites ENVD 1102 and ENVD 1104.

Additional Information: Departmental Category: Physical Factors

ENVD 2120 (6) Environmental Design Studio 1

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion.

The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.

Requisites: Requires prerequisite course of ENVD 1102 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Recommended: Corequisite ENVD 3115.

Additional Information: Departmental Category: Studios

ENVD 2130 (6) Environmental Design Studio 2

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion.

The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of architecture, urban design and landscape design - disciplines that share the responsibility for shaping the designed environment.

Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Recommended: Corequisite ENVD 3003.

Additional Information: Departmental Category: Studios

ENVD 3003 (3) Site Planning

Introduces the site planning process including: site analysis and its relationship to building program and site concept, and preparation of site plans. Emphasis is placed on the planning of the physical site through a thorough understanding of process, land use, site constraints and synthesis of ecological, functional and aesthetic considerations in the site planning process.

Recommended: Corequisite ENVD 2130.

Additional Information: Departmental Category: Physical Factors

ENVD 3009 (1-6) Special Topics in Environmental Design

Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topic class.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites ENVD 1004 and ENVD 1052.

Additional Information: Departmental Category: Miscellaneous

ENVD 3052 (3) Introduction to Computer Methods in Environmental Design

Surveys existing and emerging computer methods used in the environmental design professions, with an introduction to computer programming. Open to nonmajors with instructor consent.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3100 (6) Environmental Design Studio 3

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion.

The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.

Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Recommended: Corequisite ENVD 3122.

Additional Information: Departmental Category: Studios

ENVD 3114 (3) History and Theory of Environmental Design at the Small Scale: Buildings

Focusing on buildings, this class surveys the built environment from the beginning of time through the present day. Emphasizing developments in the western world, it develops students' recognition of major styles, influential people, and drivers of building form.

Additional Information: Departmental Category: History and Theory

ENVD 3115 (3) Introduction to Building Materials and Systems

Surveys building methods, materials and assemblies from the designer's perspective.

Recommended: Corequisite ENVD 2120.

Additional Information: Departmental Category: Technology and Practice

ENVD 3122 (3) Research Issues and Methods in Design and Planning

Explores topics of current interest in planning. Looks at the development and social consequences of the neighborhood movement, forms of municipal and regional governments, regional settlement patterns, and new communities. Introduces selected methods from the social sciences used by planners and urban designers.

Recommended: Corequisite ENVD 3100.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3134 (3) History and Theory of Environmental Design and the Medium Scale: Precincts

Focuses on design projects not in a building envelope, including landscapes, public and private urban spaces, complexes and similarly scaled design projects. Aspects of architectural and planning thinking are interwoven in a landscape concentration.

Additional Information: Departmental Category: History and Theory

ENVD 3144 (3) History and Theory of ENVD: Systems

Provides an introduction to the history of urban planning and design practices and processes. Examines the history of city-building using examples drawn from the United States as well as other countries.

Emphasis is on developing analytical methods and a critical approach in discussing and evaluating historical and contemporary planning issues, mechanisms and cases.

Additional Information: Departmental Category: History and Theory

ENVD 3152 (3) Introduction to Computer Graphics Applications

Explores principles and uses of computer graphics in design. Topics include creation and modification of complex two- and three-dimensional objects; orthographic and perspective views; use of color; input using mouse and digitizer; output using screen, plotter, matrix printer, and slides; automated aids for form generation and manipulation; and analysis of current and future trends of computer usage for design.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3200 (1-6) Advanced ENVD Studio

Design studio dealing with problems at an intermediate level of complexity: emphasis is on the interaction of form, use, and multiple values and technologies in conjunction with issues and techniques drawn from other content area courses of the curriculum.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Program in Environmental Design major or minor students only.

Recommended: Prerequisite ENVD 2130.

Additional Information: Departmental Category: Studios

ENVD 3212 (3) Color Theory

Illustrates color media techniques for the preparation, composition, and presentation of landscape and built environment drawings.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3252 (3) Computer Graphic Programming

Provides an introductory computer programming course designed to teach the capabilities of a computer in providing graphic representations of environments, including buildings. Open to nonmajors.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3300 (3-6) Special Topics: Intermediate Design Lab

Design lab exploring new and emerging themes in environmental design.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 3909 (1-6) Independent Study

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).

Recommended: Prerequisite 3.

Additional Information: Departmental Category: Miscellaneous

ENVD 3919 (1-6) Teaching Assistant

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Miscellaneous

ENVD 3929 (1) Peer Leadership and Mentorship and Transitioning Students

Designed to explore the student transition to university life and engage students in active leadership and mentoring capacity-building activities. Examines the role peers play in leading students through transitional development. Students will learn the theoretical basis for understanding student transition and develop their mentoring capacities as well as examine personal identity and values and its intersection with leadership and mentorship.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) Program in Environmental Design majors only.

Additional Information: Departmental Category: Miscellaneous

ENVD 3939 (3) Exploratory Internship

Offers professional experiences allowing students to discover a variety of design-related environments such as community engagement, non-profit work or assisting research. In addition to the internship experience, students attend four classroom sessions providing professional development exercises. 00 GPA.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENVD 1102 (minimum grade C-). Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) Program in Environmental Design majors only.

Recommended: Prerequisite 2.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

ENVD 4009 (1-6) Special Topics in Environmental Design

Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topics.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ENVD 2120.

Additional Information: Departmental Category: Miscellaneous

ENVD 4023 (3) Environmental Impact Assessment

Provides a field-oriented seminar in current environmental impact controversies. Gives attention to history, theory, and application of impact analysis at state levels for designers, land-use planners, and others involved in resource decision making. By instructor consent, open to nonmajors on a space available basis.

Additional Information: Departmental Category: Physical Factors

ENVD 4035 (3) Solar and Sustainable Design

Introduces aspects of solar technology relevant to the environmental design professions. Includes readings and lectures on the nature of energy limitations, energy needs, and the potential role of solar energy in meeting these needs.

Additional Information: Departmental Category: Technology and Practice

ENVD 4052 (3) Digital Presentation and Portfolio

Introductory course creating interactive web sites. Covers use of Hypertext Markup Language (HTML) and Flash to create linked pages containing text, images animations, menus, and buttons. Covers principles of site navigation, page layout, and graphic design for designers and planners.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4100 (3-6) Advanced Design Lab 1

Design lab exploring new and emerging themes in design.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3300 (minimum grade C-).

Additional Information: Departmental Category: Studios

ENVD 4112 (3) Architectural Graphics 1

Illustrates techniques of graphics communication and presentation for architectural design. Includes advanced delineation and use of color.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4122 (3) Digital Photo for Designers

Explores digital photographic workflow from capture to exhibition. Students gain the ability to document their projects and utilize photography as a means of creative expression. Topics include: using DSLRs, Adobe Lightroom, retouching with Adobe Photoshop, time-lapse photography, Adobe Premier, professional printing, landscape and architectural photography, sharing work through blogs and social media, and submitting work for publication and exhibition.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4152 (3) Computer Graphic Applications

Introduces the mechanics of entering 2-D images and 3-D objects into the computer. Once entered, graphics are interactively rotated in space, walked through, and displayed in perspective from any position. Also covers the mechanics of other computer programs allowing additional manipulation of images and objects.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4212 (3) Architectural Graphics 2

Covers development of an architectural set of construction documents combined with job administration, field observation, and guest speakers from related construction and architectural disciplines.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4300 (3-6) Advanced Design Lab 2

Design lab exploring new and emerging themes in design.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 4100 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 4311 (3) Housing Policies and Practices

A seminar providing students with a descriptive knowledge and analytical understanding of the use and development of residential settings in different political economies, globally divided into advanced capitalist nations, collectivist economies, and the third world.

Additional Information: Departmental Category: Social Factors

ENVD 4322 (1-6) Special Topics: Graphics

Provides an advanced seminar on special issues in design communications. May be repeated for credit by petition.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4340 (4-6) Landscape Design Studio

Studio in landscape design.

Requisites: Requires prerequisite course of ENVD 3300 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 4352 (1-6) Special Topics: Computer Methods

Topics include animation and environmental simulation, computational methods of technical evaluation and optimization, and computational mapping and analysis. May be repeated for credit by petition.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4361 (1-6) Special Topics: Social Factors in Design

Addresses variable topics in the relationship of human experience and behavior to the built environment, e.g., social research methods in environmental design.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Social Factors

ENVD 4363 (1-6) Special Topics: Physical Factors in Environmental Design

Includes such topics as appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Physical Factors

ENVD 4364 (1-6) Special Topics: History and Historiography of Environmental Design

Provides an advanced seminar on history and historiography of environmental design, e.g., American dwellings. May be repeated for credit by petition.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: History and Theory

ENVD 4365 (1-6) Special Topics: Technology and Practice

Provides an advanced seminar on new technologies and issues of professional practice in the environmental design professions.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technology and Practice

ENVD 4420 (3) Senior Capstone Seminar

Advanced seminar focuses on theoretical concerns and practical issues inherent in environmental design and planning. Views concerns and issues in terms of setting, processes, and planning and design outcomes. Provides a critical synthesis of the inherently interdisciplinary nature of planning and design education.

Requisites: Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 4440 (6) Landscape Design Studio 2

A preprofessional studio in landscape architecture.

Requisites: Requires prerequisite course of ENVD 4340 (minimum grade C-).

Additional Information: Departmental Category: Studios

ENVD 4764 (1-6) Special Topics: Theory and Criticism in Environmental Design

Provides an advanced seminar on theory and criticism in environmental design, e.g., architecture now and introduction to design theory and criticism. May be repeated for credit by petition.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: History and Theory

ENVD 4794 (3) History of Urban Design and Planning

Examines history of European and American planning and urban design in the late 19th and 20th centuries.

Requisites: Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: History and Theory

ENVD 4909 (1-6) Independent Study

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).

Recommended: Prerequisite 3.

Additional Information: Departmental Category: Miscellaneous

ENVD 4919 (1-6) Teaching Assistant

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Miscellaneous

ENVD 4929 (1-6) Research Assistant

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).

Recommended: Prerequisite 3.

Additional Information: Departmental Category: Miscellaneous

ENVD 4939 (3) Professional Design Internship

Allows students to develop design and professional skills outside of the curriculum while working for an architecture, landscape architecture or planning firm. In addition to the internship experience, students attend four classroom sessions providing professional development exercises. 00 GPA.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Program in Environmental Design majors only.

Recommended: Prerequisite 3.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

ENVD 4972 (3) Honors Research Methods and Thesis Preparation

To prepare students for undertaking an independent research or design project in Environmental Design, this asks students to engage with existing literature in the field. Students will understand how research and design projects are conducted, and how their own work fits within a long tradition of scholarship. Department consent required.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Miscellaneous

ENVD 4979 (3) Honors Thesis

Working with an advisor, students prepare, complete, and defend an honors thesis project, either written or creative.

Requisites: Restricted to students with 57-86 credits (Junior).

Additional Information: Departmental Category: Miscellaneous

ENVD 5346 (1-6) Spec Topics: Environmental Design

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

ENVD 7909 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

Environmental Engineering (EVEN) Courses

EVEN 1000 (1) Introduction to Environmental Engineering

Introduces first-year students to the environmental engineering program from an academic and a career perspective. Covers air quality, applied ecology, chemical processing, energy, engineering for developing communities, environmental remediation, and water resources and treatment. Includes reading and writing on the history of environmental engineering, major environmental issues, and professional ethics.

Requisites: Restricted to students with 0-60 units completed. Restricted to Environmental Engineering (EVEN) majors only.

EVEN 1001 (3) Environmental Engineering 101: An Introduction to Pollution Science

Surveys the science and engineering needed to understand the environmental and energy challenges which face urbanizing society: air and water pollution, climate change, and mining. Introduces how environmental engineers leverage basic science concepts to reduce pollution and optimize energy use. Analyzes how the mainstream media presents the environmental science of climate change and modern environmental disasters.

EVEN 2840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor.

EVEN 3350 (3) Sustainability Principles for Engineers

An introduction to sustainability principles in the field of environmental engineering. Students will apply these principles to engineering problems in order to evaluate the environmental, economic and social implications of engineering and design decisions. Topics include definitions of sustainability, main engineering sustainability challenges (e.g., water, climate and materials), pollution generation and prevention and sustainability assessment tools.

Requisites: Requires a corequisite course of CVEN 3414. Restricted to Environmental Engineering (EVEN) majors only.

Grading Basis: Letter Grade

EVEN 4100 (3) Environmental Sampling and Analysis

Introduces students to techniques for characterization of surface water, subsurface water, soils and sediments, and air and planning of sampling and analysis efforts. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling.

Requisites: Requires prerequisite courses of CVEN 4404 and CVEN 4424 (all minimum grade C-). Restricted to Environmental Engineering (EVEN) majors only.

EVEN 4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4404

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 and CVEN 3414 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Grading Basis: Letter Grade

EVEN 4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from EVEN 4404 in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4414

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of EVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Grading Basis: Letter Grade

EVEN 4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4424

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1113 or CHEM 1271 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4434

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and CVEN 5464

Requisites: Requires prerequisite courses of CVEN 3313 or CHEN 3200 or GEEN 3853 or MCEN 3021 or AREN 2120 and CVEN 3414 (all minimum grade C-).

Grading Basis: Letter Grade

EVEN 4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484

Requisites: Requires prerequisite course of CHEN 1211 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4830 (3) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

EVEN 4840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

EVEN 4980 (3) Senior Thesis 1

Provides faculty-supervised independent research in environmental engineering for students planning to complete a senior thesis. To be taken prior to EVEN 4990, during the final year before graduation. Department consent required.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Engineering (EVEN) majors only.

EVEN 4990 (3) Senior Thesis 2

Continuation of EVEN 4980. Consists of final phase of faculty-supervised research, the preparation of a written thesis, and an oral defense of the research to

Requisites: Requires prerequisite course of EVEN 4980 (minimum grade C-).

EVEN 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

EVEN 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

EVEN 8990 (1-10) Doctor's Thesis

Repeatable: Repeatable for up to 10.00 total credit hours.

Environmental Studies (ENVS) Courses

ENVS 1000 (4) Introduction to Environmental Studies

Surveys environmental studies, examining ecological, socioeconomic, political, aesthetic, and technological factors that influence the quality of life on Earth. Required for ENVS majors.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ENVS 1001 (4) Introduction to Developing Environmental Solutions

Builds on ENVS 1000 to give students greater understanding of how to approach environmental issues and work toward solutions. Integrates all focal areas of ENVS - sciences, policy, values - with greatest emphasis on learning science, data analysis and critical thinking fundamentals. Uses case studies of local issues to provide context for skill building and synthesis.

Requisites: Requires a prerequisite course of ENVS 1000 (minimum grade C-).

Grading Basis: Letter Grade

ENVS 1150 (3) First-Year Writing in Energy, Environment and Sustainability

Provides development of effective writing skills, knowledge and habits for success in the campus culture using topics related to the environmental sciences, energy, sustainability and academic/career interests. Focuses on the processes in rhetoric, emphasizing skills in creative, analytical and critical thinking, as well as research and presentation using digital and "old fashioned" methods and materials.

Requisites: Restricted to Environmental Studies (ENVS) or Environmental Design (ENVD) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Written Communication

ENVS 2000 (4) Applied Ecology for Environmental Studies

Covers how ecological ideas and principles underlie both the problems and solutions of multiple environmental issues. Ecology of environmental concerns ranging from endangered species to global carbon cycling will be reviewed, including perspectives from physiological, behavioral, population, community and ecosystem ecology. Fulfills intermediate natural science requirement for Environmental Studies major.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 2040 and EBIO 2640

Recommended: Prerequisites ENVS 1000 and a course in introductory statistics and two courses in introductory biology or physical geography.

ENVS 2001 (3) Topical Seminar in Environmental Studies

Serves as an introductory seminar to topics in environmental studies. Topics are diverse and include such areas as climate and conflict, food production, land use change, and other emerging areas in environmental studies.

Grading Basis: Letter Grade

ENVS 2100 (2-4) Topics in Applied Environmental Studies

Covers a variety of topics not currently offered in the curriculum: offered depending on instructor availability and student demand. Fulfills application requirement in Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 2840 (1-6) Independent Study

Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum.

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 3001 (3) Sustainable Solutions Consulting

Introduces students to green design, industrial ecology, and life cycle analysis. Students use basic techniques of environmental auditing to analyze the CU Boulder campus. Fulfills application requirement for Environmental Studies major.

Requisites: Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

Recommended: Requisite any two-semester science sequence.

ENVS 3020 (3) Advanced Writing in Environmental Studies

Offers training in critical thinking and analytical writing skills appropriate to upper-division classes. Writing assignments integrate the subject matter of different topical areas. Fulfills writing requirement for Environmental Studies major.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

Recommended: Prerequisite ENVS 1000.

Additional Information: Arts Sci Core Curr: Written Communication

ENVS 3022 (3) Climate Politics and Policy

Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics and develop their own sense of how to judge the success of climate policies. Fulfills intermediate social science requirement in Environmental Studies Major.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3022

Recommended: Prerequisite ENVS 1000 or GEOG 1972.

ENVS 3030 (3-4) Topics in Environmental Social Sciences

Covers a variety of topics that may include human ecology, environment and society, and quantitative environmental social science. Offered depending upon instructor availability and student demand. Fulfills intermediate social science requirement for Environmental Studies major. Not repeatable for credit.

Recommended: Prerequisite ENVS 1000.

ENVS 3031 (3) Energy and Human Behavior

Examines why people behave the way they do as it relates to energy use and support for energy/climate policy. Addresses questions such as: what motivates people to conserve energy? Why don't people invest in energy efficiency, even when it saves them money? How do you promote pro-environmental behavior? Fulfills intermediate social science requirement for ENVS major.

Recommended: Prerequisite ENVS 1000.

Grading Basis: Letter Grade

ENVS 3032 (3) Environment, Media and Society

Examines how mass media influence our society, specifically with regard to environmental issues and outcomes. Focuses on media influence over environmental politics and policy, environmental public opinion, popular culture, and environmental/scientific knowledge. Fulfills intermediate social science requirement for Environmental Studies major.

Recommended: Prerequisite ENVS 1000.

ENVS 3040 (4) Conservation Biology

Applies principles of population ecology, population genetics, biogeography, animal behavior, and paleobiology to the maintenance of biodiversity and natural systems. The resulting theory is then applied to conservation policy and management techniques.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 3040

Recommended: Prerequisite EBIO 2040 or EBIO 2640.

ENVS 3064 (3) Environmental Political Theory

Examines environmental discourses as conceptual means for theorizing environmental politics, and applies normative political theories to contemporary environmental policy issues. Considers the roles of political actors (individuals, groups, the state) in defining and addressing environmental problems on local, national, and global levels.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3064

Additional Information: Arts Sci Core Curr: Ideals and Values

ENVS 3070 (3) Energy and the Environment

Examines contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Includes some basic physical concepts and principles that often constrain choices. No background in physics is required.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 3070

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ENVS 3100 (2-4) Topics in Applied Environmental Studies

Covers a variety of topics not currently offered in the curriculum; offered depending upon instructor availability and student demand. Fulfills application requirement for Environmental Studies major.

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 3103 (3) Applied Environmental Studies: Mining in Four Corners

Explores mining related issues that have pronounced impact on the environment, economy and politics of the Four Corners region. Students apply their basic knowledge of environmental science, policy and values toward the understanding of and productive discourse about the conflicts and opportunities brought about by the mining industry in the Four Corners region. Course includes a seven day field trip, visiting mining and reclamation sites in New Mexico, Utah and Colorado. Fulfills application requirement for Environmental Studies majors.

Recommended: Prerequisite ENVS 1000 and one year natural science.

ENVS 3140 (3) Environmental Ethics

Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 3140

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

ENVS 3173 (3) Creative Climate Communication

We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 3173 and THTR 4173

Recommended: Prerequisite ENVS 1000.

ENVS 3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 3434

Requisites: Requires prerequisite courses of CHEM 1113 or CHEN 1211 and CHEM 1221 (all minimum grade D-).

ENVS 3520 (3) Energy and Climate Change: An Interdisciplinary Approach

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3520

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite a two-course sequence in any natural science.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ENVS 3525 (3) Intermediate Environmental Problem Analysis: Topical Cornerstones

Engages students in in-depth study of a topic such as climate change, energy, natural resources or sustainability. Through lectures, discussions, readings and activities, students will become conversant with how science, policy and values are integrated in environmental problem solving, and develop their own sense of how to critically engage with proposed solutions. Fulfills cornerstone requirement for Environmental Studies Major. Recommended corequisite: ENVS 3020.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 3600 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3601 and ATOC 3600

Recommended: Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

ENVS 3621 (3) Energy Policy and Society

Examines how society makes decisions about energy, and how these decisions affect the environment and the economy. Uses tools from policy analysis, economics, and other disciplines to build an in-depth understanding of energy's role in U.S. contemporary society. Fulfills Cornerstone requirement of ENVS majors. Recommended corequisite: ENVS 3020.

Recommended: Prerequisites ENVS 1000 and ENVS 3070 or PHYS 3070.

ENVS 3640 (3) Data Analysis for Global Environmental Affairs

Develops data analysis techniques for global environmental data including demographic, economic, agricultural, fisheries and energy sectors. Designed to support the development of basic and intermediate data analysis skills for students in the Global Environmental Affairs certificate program. Includes hands-on exploration of up-to-date global data sets from a variety of sources. Fulfills the application requirement for the ENVS major.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3640

Grading Basis: Letter Grade

ENVS 3800 (3) The Art of Research: The Essential Elements of Research in Environmental Studies

Introduces students to the practice of doing research in environmental studies. Examines how to define a research problem, select methods, design research, construct arguments and evaluate others' research. Aims to familiarize students with the process of doing research and enable them to proceed with confidence in pursuing their own research topics. Recommended for juniors planning to write ENVS honors theses. Fulfills capstone requirement in Environmental Studies major.

Requisites: Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) majors only.

Recommended: Prerequisite ENVS 3020.

ENVS 3930 (1-3) Internship

Relates classroom theory to practice. Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to students' career goals. Fulfills application requirement in Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ENVS 1000.

ENVS 4027 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. The course also focuses on the role that global inequality plays in fostering environmental degradation.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4027

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENVS 4030 (3) Sociology of Climate Change

Examines the human drivers and causes of climate change, the health and security risks it creates and the efforts of societies to mitigate and adapt to its effects.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4030

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENVS 4050 (2-4) Field Methods in Ecosystem Science

Studying the relationships among organisms, physical features, biogeochemistry and humans in ecological communities - this is ecosystem science. This course provides conceptual understanding and practical experience conducting research. Students will pose their own scientific questions, learn several field and lab methods, analyze data and design a project. Upon completion, they will have useful skills for internships, jobs and graduate school. Fulfills application requirement in ENVS major. Department enforced prerequisite: ENVS 1000 or two semesters of natural sciences; such as chemistry, geology or biology.

Grading Basis: Letter Grade

ENVS 4100 (3) Special Topics in Environmental Studies

Various topics not normally covered in the curriculum: offered depending on student demand and specialties of faculty. Applied to specialization requirement for Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ENVS 4120 (4) Special Topics in Environmental Studies

Various topics not normally covered in the curriculum; offered depending on student demand and specialties of faculty. Applies to specialization requirement for Environmental Studies major.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

ENVS 4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4160 and GEOL 4160

Requisites: Requires prerequisite courses of GEOL 3320 or EBIO 3270 and CHEM 1011 (all minimum grade D-).

ENVS 4201 (3) Biometeorology

Introduces this interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans). Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4201

Requisites: Requires a prereq course of GEOG 1001 and APPM1340 and 1345 or APPM1350 or ECON1088 or MATH1081 or 1300 or 1310 or 2510 or ANTH4000 or APPM4570 or BCOR1020 or ECON3818 or GEOG3023 or GEOL3023 or PSCI2075 or PSYC3101 or SOCY2061 or 4061 (min grade D-).

ENVS 4340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5340, EBIO 4340 and EBIO 5340

Recommended: Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

ENVS 4795 (3) Field Methods in Zoology and Botany

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4795 and MUSM 5795

ENVS 4800 (3) Capstone: Critical Thinking in Environmental Studies

Examines a specific environmental topic in depth, synthesizing information from complex and controversial issues. Different course sections present different topics. Fulfills capstone requirement for Environmental Studies major.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) or Geography (GEOG) majors only.

Recommended: Prerequisites ENVS 1000 and ENVS 3020.

ENVS 4840 (1-6) Independent Study

Students work with an approved faculty sponsor to explore a topic in greater depth and to pursue an interest that is not offered in the formal curriculum.

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisite ENVS 1000.

ENVS 4990 (3) Senior Thesis

Supervised project involving original research. Thesis proposal must be accepted by honors chairman. Open only to Environmental Studies majors with at least a 3.30 GPA. Fulfills capstone requirement in Environmental Studies major.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENVS 1000 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Environmental Studies (ENVS) majors only.

Recommended: Prerequisite ENVS 3020.

ENVS 5000 (3) Policy, Science, and the Environment

Introduction to methodologies of the policy sciences with emphasis on applications to environmental issues; role of science in decision making; professional roles and responsibilities as a policy analyst.

Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

ENVS 5003 (3) Theory and Methods in Environmental Studies

Introduces students to theory and methods used in research on environmental science, values and policy. The goal of the course is to provide a broad overview of the conceptual background relevant to work and research in environmental studies, with an emphasis on understanding the similarities and differences in research methods used in different disciplines and in environmental research.

Grading Basis: Letter Grade

ENVS 5050 (3) Theories of the Policy Process

Examines the public policy process, including the influences and actors that shape policy outcomes. Focuses on the major theories, frameworks, and models of policy change, along with emerging scholarship that challenges, refines, and advances the theory.

Requisites: Restricted to graduate students only.

ENVS 5100 (1-3) Special Topics in Environmental Studies

A variety of topics not currently offered in curriculum; offered depending on instructor availability and student demand.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ENVS 5110 (1-3) Topics in Environmental Social Science and Humanities

Covers various topics in the social sciences and humanities in environmental studies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

ENVS 5120 (1-3) Topics in Quantitative Methods

Covers a wide range of quantitative methods used in policy research and their applications. Topics may include decision-making under uncertainty, fundamentals of microeconomics, mathematics of economic efficiency, cost-benefit analysis, system optimization, budgeting, fundamentals or probability, risk assessment, risk perception, risk communication, and decision analysis. Includes practical exercises, as well as readings and discussion, of various strengths and weaknesses of the different methods.

Repeatable: Repeatable for up to 9.00 total credit hours.

ENVS 5240 (3) Environmental Philosophy

A survey of the major philosophical issues in environmental studies, comprising key issues in environmental ethics, in environmental political philosophy and in the philosophy of biology and ecology.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5240

Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

ENVS 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4340, EBIO 4340 and EBIO 5340

Recommended: Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

ENVS 5510 (1) Environmental Studies Colloquia Series

All first year ENVS graduate students are required to attend the ENVS Colloquia Series. Speakers from around the world and within the department cover topics in all areas of Environmental Studies.

Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

ENVS 5520 (1-3) Seminar in Environmental Studies

Addresses current topics in Environmental Studies. Provides forum for students to critically evaluate the primary literature on a particular theme.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

ENVS 5701 (3) Policy, Politics and Management: Foundations

Examines concepts related to policy and regulatory processes, institutions and management of the environment and natural resources. Explores environmental laws at the international, national, state and local levels as well as how the processes and institutions at various levels of government help shape laws and their implementation. Focuses on policy tools including property rights, regulation, voluntary compliance and market-based mechanisms.

Grading Basis: Letter Grade

ENVS 5702 (3) Policy, Politics and Management: Theory and Practice

Provides an overview of the theoretical landscape for how policies are made, decisions are enacted and actors seek to influence policy and political outcomes. Students will learn tools of policy analysis and apply their understanding to cases of environmental, natural resource and related policies.

Grading Basis: Letter Grade

ENVS 5740 (3) Context-Sensitive Research Methods

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7116

Requisites: Restricted to graduate students only.

ENVS 5810 (3) Water Resources and Environmental Sustainability

Assesses impacts of climate variability and regional growth on western U.S. water resources, and examines successes and failures of different management strategies, as well as ways that science is used and misused in support of water management.

Requisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

ENVS 5820 (3) Energy Policy in the 21st Century

Examines energy policy and the problem of sustainability through a variety of disciplinary and topical perspectives: historical, political, behavioral, techno-economic and legal. A critical approach is applied to arguments about energy policy processes, systems and desired outcomes, with special emphasis on the role of renewable and sustainable energy in the changing global system.

Requisites: Restricted to graduate students only.

ENVS 5830 (3) Critical Issues in Climate and the Environment

Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4800 and ATOC 5000

ENVS 5840 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed, along with global-scale measurements of element fluxes from satellites, aircraft and measurement networks.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5305

Requisites: Restricted to graduate students only.

Recommended: Prerequisite general chemistry, some organic chemistry.

ENVS 5909 (1-3) Independent Study

Only 3 hours of independent study can be used towards degree requirements.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ENVS 5930 (2) Internship

Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to the students' research and career goals, and to relate classroom theory to practice.

ENVS 6007 (3) Foundations of Environmental Sociology

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 6007

ENVS 6201 (3) Qualitative Research Methods for Environmental Studies

Introduces students to research design, data collection and analysis methods. Exploration of the rationale underlying the use of various methods, the skills needed to employ qualitative method and the process of designing a research protocol will provide graduate students with a sound foundation to begin their own thesis research.

Grading Basis: Letter Grade

ENVS 6222 (2-3) Environmental Decision-Making

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7222

Grading Basis: Letter Grade

ENVS 6301 (3) Environmental and Energy Economics

Introduces non-economists to the study of energy markets, environmental externalities, economic regulation and public policy. This applied course uses examples from electricity generation, renewable energy, manufacturing, transportation and other energy intensive industries. A variety of policy instruments will be studied, including: technology standards, subsidies, environmental mandates, rate-based policies, emissions taxes and cap-and-trade systems.

Grading Basis: Letter Grade

ENVS 6302 (3) Sustainable Landscapes, Sustainable Livelihoods

Examine adaptation of rural and resource dependent regions and communities in response to cultural, economic and environmental change. Students will evaluate different approaches for sustainable management of forests, ranches, farms and wildlands and to balance diverse livelihood needs and environmental stewardship in a time of rapid change. Students will learn techniques to gather and synthesize data that support solution development.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6303 (3) Transportation and Sustainable Cities

Examines the problem of organizing transportation systems from a variety of perspectives and explores how transportation decisions get made at a variety of scales, from local to national. Covers some of the dramatic changes coming from technological innovation in arenas like vehicle electrification, autonomous vehicles and the potential shift from individual vehicle ownership to shared mobility.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6304 (3) Introduction to Food Systems Internationally

Introduces students to contemporary food system challenges at the global scale, the course will first identify key historic and projected trends, to set the scene for the remainder of this specialization. Second it will draw on international case studies to explore some of the institutional, technological and market responses to food system challenges across the globe.

Grading Basis: Letter Grade

ENVS 6305 (3) Food System Solutions? Evaluation of Food System Debates

Using the best available evidence, students will critically evaluate how food system sustainability may be enhanced by proposed solutions, such as genetically engineered food, organic foods, local food systems, dietary changes and reductions in food waste. Explores the environmental implications of these potential solutions and the opportunities for them to gain traction and become more mainstream.

Grading Basis: Letter Grade

ENVS 6940 (1) Master's Degree Candidacy

Grading Basis: Pass/Fail

ENVS 6950 (1-6) Master's Thesis**ENVS 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Ethnic Studies (ETHN)

Courses

ETHN 1022 (3) Introduction to Africana Studies

Overview of Africana studies as a field of investigation, its origins and history.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Africana Studies

ETHN 1023 (3) Introduction to Native American and Indigenous Studies

Introduces critical terms, issues, and questions that inform the discipline of American Indian Studies. Examines "historical silences" and highlights how American Indian scholars, poets, and filmmakers use their work to address/redress historical subjects, and represent their Native communities.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: American Indian Studies

ETHN 1025 (3) Introduction to Asian American Studies

Examines the various factors that define minority groups and their positions in American society using Asian Americans as a case study. Emphasizes the perspectives and methodologies of the discipline of ethnic studies.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Departmental Category: Asian American Studies

ETHN 1123 (3) Exploring a Non-Western Culture: Hopi and Navajo

Explores two American Indian cultures, Hopi and Navajo and cultural interrelationships from the prehistoric through the contemporary period, using an integrated, holistic and humanistic viewpoint.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 1120

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: American Indian Studies

ETHN 2001 (3) Foundations: Race and Ethnicity in the United States

Introduction to race, ethnicity and gender in the United States. Focuses on the five major racialized groups (African Americans, Asian Americans, Chicanas and Chicanos, European Americans and Indigenous peoples) in the U.S. The course design centers on historical and contemporary ideologies and systems that have constructed and continue to define, shape, and impact the significance of race and ethnicity in our economic, political and social lives.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 2004 (3) Themes in American Culture 1

Enables students to explore various themes in pre-1865 American culture. Examines these themes, which vary each year, in their social context.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American Studies

ETHN 2013 (3) Critical Issues in Native North America

Explores a series of issues including regulations of population, land and resource holdings, water rights, education, religious freedom, military obligations, the sociopolitical role of men and women, self-governance, and legal standing as these pertain to American Indian life.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: United States Context
Departmental Category: American Indian Studies

ETHN 2014 (3) Themes in American Culture 2

Enables students to explore various themes in post-1865 American culture. Examines these themes, which vary each year, in their social context.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American Studies

ETHN 2044 (3) Crime and Society

Explores issues related to crime, the criminal justice system, and crime-related public policy. It addresses what we know about crime and how we know it, how our society responds to crime, and how the institutions designed to address crime (police, courts, corrections) function.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 2044
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 2203 (3) American Indians in Film

Examines images of American Indians in films produced by, and about, Native peoples. Follows the creation of "the Hollywood Indian" from still-photography to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large and Native communities in particular.

Additional Information: Departmental Category: American Indian Studies

ETHN 2215 (3) The Japanese American Experience

Surveys the Japanese American experience, emphasizing post-WWII developments. Gives attention to intragroup diversity having to do with generation, ethnicity, ecology, and gender.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Asian American Studies

ETHN 2232 (3) Contemporary African American Social Movements

Examines selected case studies of African American collective behavior in a historical context. Emphasizes an in-depth investigation of the continuing African American struggle for social/democratic rights.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Departmental Category: Africana Studies

ETHN 2242 (3) African American Social and Political Thought

Introductory course designed to acquaint students with historical and contemporary thinking, writings, and speeches of African Americans.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Departmental Category: Africana Studies

ETHN 2304 (3-4) Introduction to Social Justice

Provides undergraduate students with an understanding of how social systems, primarily the educational and health care systems, are key to understanding injustices and criminalization. Topics covered will include trauma and victimization, food and housing justice, educational justice, physical and mental health justice, mass incarceration, #BlackLivesMatter and restorative justice.

Additional Information: Departmental Category: American Studies

ETHN 2432 (3) African American History

Surveys African American history. Studies, interprets and analyzes major problems, issues and trends affecting African Americans from about 1600 to the present.

Equivalent - Duplicate Degree Credit Not Granted: HIST 2437

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: United States Context
Departmental Category: Africana Studies

ETHN 2536 (3) Survey of Chicana/o History and Culture

Through historical and social scientific studies, novels, autobiographies, testimonies, films, music, and art, this course will provide students a survey of Chicana/o history and culture. Historical overviews of Chicana/o peoples from Mesoamerica; the Spanish Conquest; the historical presence of Chicana/o peoples in the Southwest; the rise of the Chicana/o student and community movements; immigration issues; and the gender, sexuality, and criminalization issues.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: United States Context
Departmental Category: Chicana/o Studies

ETHN 2546 (3) Chicana and Chicano Fine Arts and Humanities

Provides foundation for study of Chicano literature, music, the plastic arts, theatre and film. Also introduces aesthetic and critical concepts and their applications in Chicana and Chicano studies.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Chicana/o Studies

ETHN 2703 (3) American Indian Religious Traditions

Introduces religions of the peoples indigenous to the Americas. Concerns include ritual, mythology and symbolism occurring throughout these cultures in such areas as art, architecture, cosmology, shamanism, sustenance modes, trade and history.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2700

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Ideals and Values
Departmental Category: American Indian Studies

ETHN 2713 (3) American Indian Literature

Surveys historical and contemporary North American Native American literature. Examines the continuity and incorporation of traditional stories and values in Native Literature, including novels, short stories and poetry.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2717

Additional Information: Departmental Category: American Indian Studies

ETHN 2732 (3) Survey of African American Literature 2

Surveys African American literature from the Depression to the present.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2737

Additional Information: Departmental Category: Africana Studies

ETHN 2746 (3) Chicana/Chicano and Mexican Literature

Introduces Chicana and Chicano and Mexican literary studies, focusing on narrative works by Chicana and Chicano writers. Examines diverse range of Mexican writing in Greater Mexico as it addresses recurring issues and themes, including language, race and class, questions of identity and gender relations.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2747

Additional Information: Departmental Category: Chicana/o Studies

ETHN 2761 (3) Survey of Post-Colonial Literature

Surveys the development of literatures in English in former British colonies. Topics include the spread and adaptation of English language literary forms in Asia, Africa, the Caribbean, and the far new world (Australia and New Zealand). Students learn the causes of the dispersion and the motivations for the clearly different uses of English literary forms in the ex-colonies.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2767

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3015 (3) Asian Pacific American Communities

Covers the concepts, methods, and theories commonly used in community research, as well as substantive information on selected Asian/Pacific American communities. Emphasizes the ethical/political dimensions of community studies.

Recommended: Prerequisite ETHN 1025 or ETHN 2001.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Arts Sci Core Curr: United States Context

Departmental Category: Asian American Studies

ETHN 3024 (3) Introduction to Critical Sports Studies

Learn to think in an informed and critical way about sports in society. Examine the socio-cultural significance of sports as it relates to topics such as youth, social class, race/ethnicity, gender, identity, and intercollegiate athletics. Readings, class discussions, videos, and guest speakers will help expand our understanding of this important social phenomenon.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3026 (3) Women of Color. Chicanas in U.S. Society

Critically explores the Chicana experience and identity. Examines issues arising from the intersection of class, race, and gender. Focuses on controversies surrounding culture and gender through an analysis of feminism and feminismo.

Recommended: Prerequisite ETHN 2001 or ETHN 2536.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 3044 (3) Race, Class, Gender, and Crime

Overview of race, class, gender and ethnicity issues in offending, victimization and processing by the justice system. Examines women and people of color employed in the justice system.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3044 and WGST 3044

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3101 (3) Selected Topics in Ethnic Studies

Intensive examination of a particular topic, theme, issue, or problem in ethnic studies as chosen by the instructor.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3102 (3) Selected Topics in African American Studies

Intensive examination of a particular topic, theme, issue, or problem concerning the African American presence, as chosen by the instructor. Sample offerings could include African American Pop Culture, the Civil Rights Movement, or other African American issues.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 1022 or ETHN 2001.

Additional Information: Departmental Category: Africana Studies

ETHN 3103 (3) Selected Topics in American Indian Studies

Examines a particular topic, theme, issue, or problem in American Indian Studies.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001 or ETHN 2203.

Additional Information: Departmental Category: American Indian Studies

ETHN 3104 (3) Selected Topics in American Studies

Critically examines American identity and experiences, past and present, focusing on ethnicity, gender, popular culture, and political culture.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: American Studies

ETHN 3105 (3) Selected Topics in Asian American Studies

Intensive examination of a topic or issue affecting Asian Americans, such as the Japanese American internment during World War II, or Asian American social movements or community organizations.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 1025 or ETHN 2001.

Additional Information: Departmental Category: Asian American Studies

ETHN 3106 (3-6) Selected Topics in Chicana and Chicano Studies

Intensive examination of a particular topic, theme, issue, or problem in Chicana and Chicano studies as chosen by the instructor.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001 or ETHN 2536.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 3136 (3) Chicana Feminisms and Knowledges

Provides insight into the present socioeconomic condition of Chicanas and the concept of feminismo through interdisciplinary study of history, sociology, literary images, and film portrayals.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3135

Recommended: Prerequisite ETHN 2001 or ETHN 2536.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Chicana/o Studies

ETHN 3201 (3-4) Multicultural Leadership: Theories, Principles and Practices

Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of western and non-western theories and practices. Community service required.

Equivalent - Duplicate Degree Credit Not Granted: INVS 3100

Recommended: Prerequisite ETHN 2001.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Crosscultural/Comparative Studies

ETHN 3212 (3) Introduction to Hip Hop Studies

Examines critical questions posed by hip hop culture. Accentuated in this course are hip hop's contributions to the political-economic, philosophical, and sociological study of race, racism, sexism and sexuality. Examines the ways in which hip hop, as a new social phenomenon, cultural force and aesthetic form, have influenced contemporary American and global culture.

Recommended: Prerequisite ETHN 1022 or ETHN 2001.

Additional Information: Departmental Category: Africana Studies

ETHN 3213 (3) American Indian Women

Explores the experiences, perspectives, and status of American Indian women in historical and contemporary contexts. Examines representations of Indigenous women in mainstream culture. Emphasizes the agency of American Indian women-their persistence, creativity, and activism, especially in maintaining Indigenous traditions.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3210

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite ETHN 1023 or ETHN 2001 or WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: American Indian Studies

ETHN 3252 (3) African American Urban History

Fosters a better understanding and appreciation of the role African Americans have played in the evolution and shaping of urban America. Employs techniques of urban studies to more effectively assess the many dimensions, subtleties, and insensitivities of life in the city. S. and Afro-American history.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 1022 or ETHN 2001 and a working knowledge of U.

Additional Information: Departmental Category: Africana Studies

ETHN 3301 (3) Elements of Religion

Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 3300

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3314 (3) Violence Against Women and Girls

Focuses on aspects of the victimization of women and girls that are "Gendered" - namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class, and sexuality in gendered violence.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3314 and WGST 3314

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3403 (3) Indigenous Rights and Red Power Movement

Deals with historical events involving conflicts between the U.S. government and American Indians. Examples include the role of the FBI in the Pine Ridge Sioux Reservation (1972-76) or the 1864 massacre of the Cheyenne and Arapaho Indians in Colorado territory. Additional courses may relate to tribal governments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 1023 or ETHN 2001.

Additional Information: Departmental Category: American Indian Studies

ETHN 3501 (3) Theory/Methods/Writing in Ethnic Studies

Preparation for empirical inquiry in Ethnic Studies. Emphasizes philosophy of social science and cultural studies. Students engage rigorous, theoretical concepts to understand research methods. Prepares students for writing a lengthy, cogent research paper.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Ethnic Studies (ETHN) majors only.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3575 (3) Japanese American Internment: Critical Thinking in Sociocultural Diversity

Offers a historical overview of the Japanese American experience in the United States. Introduces and explores fundamental issues inherent in the study of human beings from the perspective of cultural social difference.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 1025 or ETHN 2001.

Additional Information: Departmental Category: Asian American Studies

ETHN 3671 (3) People of Color and Social Movements

People of color the world over are struggling for sovereignty, independence, civil and human rights, food security, decent wages and working conditions, healthy housing, and freedom from environmental racism and other forms of imperialism. Course analyzes and brings alive these struggles.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 2001.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Crosscultural/Comparative Studies

ETHN 3692 (3) African Am Music: Fr Spirituals and the Blues to Rap/Hip Hop Soul

Offers an overview of the origins and evolution of African American music. Guides students through the musical history, as well as the social, political and cultural history, of the spirituals, blues, ragtime, jazz, gospel, freedom songs, rhythm and blues, rock and roll, soul, funk, disco, techno, house, rap and hip hop soul.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites ETHN 1022 and ETHN 2001 and ETHN 3212.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Africana Studies

ETHN 3701 (3) Gender, Sport and Culture

Critically examines the experiences of girls and women in American sport from a psycho-socio-cultural perspective with a particular emphasis on the constructs of gender, race, class and sexuality and how these constructs both independently and collectively mediate the female sport experience. Explores theories and interpretive frameworks from sport studies, feminist studies, race studies, psychology and cultural studies.

Recommended: Prerequisite ETHN 3024.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3702 (3) African American Sport Experience

Provides a socio-cultural and historical overview of the contributions of African Americans (men and women) to sport in America. Focus is on the macro (patterns of behavior related to large-scale social structures and processes) and micro (behaviors we observe in society, often readily observable in the context of sport and exercise) level of sport analysis.

Recommended: Prerequisite ETHN 3024.

Additional Information: Departmental Category: Africana Studies

ETHN 3704 (3) Athlete as a National Symbol: Nationhood/Nationalism, Sport

Explores the nationalistic terrain of US sport as a way to understand how athletes became a symbol of nationhood and how they are influenced by, and themselves influence, other aspects of US society and culture. Using historical and contemporary examples, this course examines how race, gender, sexuality, economics and the media constructed the nationalistic world of sports today.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 3841 (1-6) Undergraduate Independent Study

Consult the Department of Ethnic Studies for information. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5001 and FILM 4001

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4006 (3) Chicana/Chicano Native American Cultures of the U.S.

Theoretically engaged seminar considers intersections of Chicana/o and Native American studies to shape our scholarly understanding of the U.S. and Mexico borderlands. Ethnographies, historical studies, novels, film, and music will be used to understand the processes of Spanish and Euro-American colonization, neocolonialism, identity formation, gender, syncretism, and mestizaje.

Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chicana/o Studies

ETHN 4084 (3) Punishment, Law and Society

Places the current state of punishment in the U.S. in historical and cross national context. Examines key features of penal systems and key sociological theories about the relationship between punishment and society. Department enforced prerequisite: SOCY 1001 or SOCY 1004.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4084

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4102 (3) Special Topics in Africana Studies

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5102

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Africana Studies

ETHN 4106 (3) Special Topics in Chicana and Chicano Studies

Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4106

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chicana/o Studies

ETHN 4116 (3) Spoken Word Latino Poetics and Poetry

This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics-specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizaje of Chicano/a and Latina/o peoples.

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Requisite 6 credits in any ETHN class.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 4213 (3) Indigenous Futurisms: Speculative Genres and Native Tomorrows

Examines how Indigenous authors, artists and filmmakers have recently begun exploring the genres of Horror, Science Fiction and Fantasy. Considers this shift in light of past and present Native realities. Explores why this shift is happening now, how it helps communities and individuals make political statements, address/redress historical subjects and help to build better futures for us all.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: American Indian Studies

ETHN 4232 (3) The Life and Thought of Martin Luther King Jr

An intensive exploration and examination of the life and thought of the Rev. Dr. Martin Luther King Jr. Special emphasis on the stages of his life and their corresponding productions.

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Africana Studies

ETHN 4272 (3) W.E.B. Du Bois Seminar

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5272

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.

Additional Information: Departmental Category: Africana Studies

ETHN 4306 (3) The Chicana and Chicano and U.S. Social Systems

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5306

Requisites: Requires a prerequisite course of ETHN 2001 or ETHN 2536 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Chicana/o Studies

ETHN 4353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5353 and RLST 4353 and RLST 5353

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4504 (3) Ethnic-American Autobiography

Investigates the genre of autobiography in America from its inception to the present. American autobiography has been associated with the invention of national character and, thus, is a site of cultural contestation and identity formation. Its changing form crosses disciplinary lines and provides a site for discourses on ethnicity, class, gender, sexuality, age, family, religion and other American cultural conflicts.

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American Studies

ETHN 4552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4552 and ETHN 5552

Requisites: Requires prerequisite course of ETHN 1022 or ETHN 2001 or ETHN 3212 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Africana Studies

ETHN 4553 (3) Indigenous Representations in the United States

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5553

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ETHN 1023.

Additional Information: Departmental Category: American Indian Studies

ETHN 4632 (3) Frantz Fanon Seminar

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5632

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Ethnic Studies (ETHN) majors only.

Additional Information: Departmental Category: Africana Studies

ETHN 4672 (3) Seminar on the Civil Rights and Black Power Movements

A review of the ideas, events, persons, organizations oriented to the quest for African American social justice in the decade of the sixties.

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Africana Studies

ETHN 4692 (3) Special Topics in Multicultural and Ethnic American Literature

Provides advanced in-depth study of literatures written by ethnic American authors. Texts may be drawn from a range of African-American, Chicano/a, Latino/a, Asian American, Native American or Indigenous literature traditions. Topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4697

Requisites: Requires a prerequisite course of ETHN 1022 or ETHN 2001 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Africana Studies

ETHN 4714 (3) Sport and Social Justice

Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5714

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Recommended: Prerequisite ETHN 3024.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4841 (1-6) Independent Study

Work with an approved faculty sponsor to explore a topic in greater depth. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite ETHN 2001.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4951 (3) Senior/Graduate Seminar in Ethnic Studies

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 5951

Requisites: Requires prerequisite courses of ETHN 2001 and ETHN 3501 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 4961 (3) Honors Thesis 1

Supervised original research project in the field of ethnic studies. The goal is to make substantial progress on a written honors thesis that will be orally defended and submitted to the Honors Program of the College of Arts and Sciences. Department enforced restriction: application and acceptance into the ETHN Honors Program.

Requisites: Requires a prerequisite course of ETHN 2001 (minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.

Additional Information: Arts Sciences Honors Course
Departmental Category: Crosscultural/Comparative Studies

ETHN 4971 (3) Honors Thesis 2

Supervised original research project in the field of ethnic studies. The goal is to complete progress on a written honors thesis that will be orally defended and submitted to the Honors Program of the College of Arts and Sciences. Department enforced prerequisite: application and acceptance into the ETHN Honors Program.

Requisites: Requires prerequisite courses of ETHN 2001 and ETHN 4961 (all minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Ethnic Studies (ETHN) majors only.

Additional Information: Arts Sciences Honors Course
Departmental Category: Crosscultural/Comparative Studies

ETHN 5001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and FILM 4001

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5102 (3) Special Topics in Africana Studies

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4102

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5106 (3) Special Topics in Chicana and Chicano Studies

Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4106

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 5272 (3) W.E.B. Du Bois Seminar

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4272

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5306 (3) The Chicana and Chicano and U.S. Social Systems

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4306

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 5353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4353 and RLST 4353 and RLST 5353

Additional Information: Departmental Category: Crosscultural/Comparative Studies

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4552 and HUMN 4552

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Africana Studies

ETHN 5553 (3) Indigenous Representations in the United States

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4553

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American Indian Studies

ETHN 5632 (3) Frantz Fanon Seminar

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4632

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5714 (3) Sport and Social Justice

Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4714

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5951 (3) Senior/Graduate Seminar in Ethnic Studies

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4951

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6000 (3) Foundations of Comparative Ethnic Studies

Examines theories of race, ethnicity, gender, sexuality, colonialism and globalization, especially from the perspectives of communities most impacted by these categories and processes. This is the introductory course for graduate work in Comparative Ethnic Studies.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6001 (3) Research Methods in Comparative Ethnic Studies

Examines various humanistic and social science research methodologies and applies critical frameworks (including feminist, queer, Indigenous and decolonial theories) to research through an intersectional lens committed to analyzing race, class, gender and sexuality as interconnected, knowledge-producing systems of power. Examines how Ethnic Studies scholars can engage with social justice projects by producing knowledge in cutting edge ways.

Requisites: Requires prerequisite course of ETHN 6000 (minimum grade C). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6002 (1) Professionalization Seminar in Comparative Ethnic Studies

Provides graduate students with professionalization skills, including how to prepare a national fellowship application, how to give a successful job talk, how to publish refereed journals and book volumes and how to approach the academic job market.

Requisites: Restricted to Ethnic Studies (ETHN) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6011 (3) Race and Sexuality Studies

Examines primary texts in queer studies and queer theory while challenging colonial heteronormative and homonormative studies that exclude queers of color and their life experiences. Readings include works by Gloria Anzaldua, Jose Munoz, Audre Lorde, David Eng, Judith Butler, Judith Halberstam, and Michel Foucault. Topics such as queer borderlands, citizenship, racialized and transgender identities will be interrogated.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6014 (3) Gender, Race, Class, and Crime

Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 7014

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6100 (3) Race and Citizenship in U.S. History and Culture

Examines how the cultural and legal bounds of U.S. citizenship have been linked to race, gender, labor, class, and sexuality. Analyzes the experiences of racialized and gendered groups to explore the racial formations, exclusions and contradictions inherent with the institution of citizenship.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6101 (1-6) Topics: Specialized Comparative Studies

Focuses on a variety of advanced interdisciplinary studies. Themes include: Race and Sports, Critical Whiteness Studies, Race and Masculinity, Applied Community Engagement, Black Women in the Diaspora, US/Mexico Border Cultures, Criminalization and Latinas/os, Race, Violence and Film, and Cuba and Tourism.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Requisite ETHN coursework.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6103 (3) Indigenous Thought and Theory: Foundations in NAIS

Introduces the theoretical landscapes of Native American and Indigenous Studies. Explores debates, methodologies and concerns that ground the field and provides critical engagement with Indigenous communities and knowledges. Teaches standards for evaluating scholarly sources based on criteria derived from the most outstanding recent scholarship in the field. Requires writing and thinking critically about issues of concern for global indigenous communities.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American Indian Studies

ETHN 6110 (3) Adv. Tpcs. In Chicana/Chicano Studies: US/Mexico Borderlands

Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

Equivalent - Duplicate Degree Credit Not Granted: RLST 6110

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Chicana/o Studies

ETHN 6301 (3) Decolonial/Postcolonial Theory

Offers an overview of the origins and evolution of Decolonial/Postcolonial Theory. Critically compares and contrasts decolonial discourse with postcolonial theory. Exposes students to the ways in which decolonial and postcolonial theory conceptually interconnect via Cultural Studies, Critical Race Studies and Ethnic Studies-derived discourses such as racial colonialism, the critique of European imperialism, transnationalism feminism, Indigeneity/Indigenous Studies, Diaspora Studies and Subaltern Studies.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6501 (3) Critical Race Theory: Soc Scnc Explrtn/Intrvntn into Crit Race St

Offers an overview of the origins and evolution of Critical Race Theory (CRT). Critically compares and contrasts legal and extralegal social science approaches to CRT. Exposes students to the ways in which CRT and Critical Ethnic Studies conceptually interconnects via CRT-derived discourses such as Critical Race Feminism, Critical White Studies, TribalCrit, LatCrit, AsianCrit, DesiCriti, QueerCrit and Decolonial/Postcolonial Critical Race Theory.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6841 (1-6) Advanced Directed Readings in Ethnic Studies

This is a graduate level directed readings course designed to expand student knowledge in a particular area of concentration with a broad interdisciplinary and comparative framework. These areas of concentration include work in Africana, American Indian, Asian American, Chicana and Chicano and Transnational/Hemispheric ethnic studies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for a minimum of 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

Experience Design (TDXD)

Courses

TDXD 5005 (3) Design Technology 1: Visual Technology

Explores the established and cutting edge technologies employed to implement the visual elements of designed environments and experiences. Develops an understanding of the function of these areas, the ways in which they interact in a complete experience and the new directions of experimentation. Elicits research, analysis and development of new concepts in response to design problems as the core modality of this course.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5105 (3) Collaboratory in Experience Design 1

Addresses philosophies of storytelling through experience and the general concepts and aesthetics of Experience Design. The first in a two-part series, this course lays foundational principles focusing on the components of a live experience and how space, narrative and interaction affect the design from early conceptualization through implementation.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Process

TDXD 5500 (3) Experience Design Atelier 1: Design Evolution and Expression

Introduces students to various techniques for graphically representing design ideas using drawing and illustration techniques in order to augment and deepen the diverse skill sets of students in the class. The first in three-part sequence on graphic representation and expressive practices, students will learn how to work out design ideas through sketching, drawing, creating storyboards and collages.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5700 (3) Experience Design Atelier 2: Introduction to Design Graphics

Introduces students to advanced techniques for representing design ideas in graphic form including commonly used software applications (Sketchup, Vectorworks, AutoCAD), scale modeling, mechanical drawing and rendering. The second in a three-part class sequence on graphic representation and expressive practices, this atelier will offer a range of exercises tailored to the skill level of individual students.

Requisites: Requires a prerequisite course of TDXD 5500 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5805 (6) Professional Portfolio 1

Focuses on selecting, organizing and developing a plan for presenting material that will eventually culminate in the completion of a competitive professional portfolio, a vital tool for gaining employment in the Experience Design industry. The first of a two-part credited final project, students begin the process to prepare their professional portfolio under the guidance of faculty and industry professionals.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6105 (3) Collaboratory in Experience Design 2

Introduces students to professional models of working in the Experience Design industry. The second in a two-part class sequence, students work collaboratively on industry case studies focusing on entertainment, education and cultural destination genres with input from outside professionals in the field.

Requisites: Requires a prerequisite course of TDXD 5105 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Process

TDXD 6210 (3) Storytelling for XD

Explores multi-modal, expressive strategies for experimental storytelling and investigates the diverse languages of live experience. Students complete projects using varying modes of conveyance including physical and spatial action, filmic approaches, digital media and alternative methods. Students will discuss current trends in expressive methods and the nature of story.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

TDXD 6500 (3) Experience Design Atelier 3: Packaging the Design Presentation

Investigates strategies for visually communication and "selling" design ideas in a compelling and well composed visual/aural presentation. The third in a three-part sequence on graphic representation and expressive practices, this class culminates in a final, comprehensive design project portfolio that follows current professional standards.

Requisites: Requires a prerequisite course of TDXD 5700 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 6805 (6) Professional Portfolio 2

Through editing materials collected in TDXD 5805, students will complete adaptable versions (hard copy, digital, web-based and presentations) of their professional portfolios. In this second of a two-part credited project, a committee comprised of faculty and industry professionals guide the completion of XD portfolios.

Requisites: Requires a prerequisite course of TDXD 5805 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6901 (3) XD Implementation and Engineering

Explores the realities and challenges of implementing themed entertainment design. Within the framework of project based case studies and a real work project, this course analyzes aspects of construction management, client management and approvals, scheduling, budgeting, value engineering, architecture and design.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

TDXD 6910 (6) The Experience Design Center

Offers Experience Design students an opportunity to engage in and complete projects posed by industry professionals or non-profit partners seeking assistance with experiential projects in a professional, practicing lab/studio setting. The XD Center, housed in a campus "maker-space," accepts design challenges and assignments that provide a realistic field experience for students.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

Farrand Residential Acad Prgm (FARR)

Courses

FARR 1000 (1) Farrand Service-Learning Practicum: Special Topics

Offers a varying service-learning practicum experience as corequisite to a service-learning lecture course.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

FARR 1003 (1) Banned Books and the First Amendment

Focuses on a heated topic of discussion since the Constitution was drafted: the censorship of books. Looks at some classics in literature: *Catcher in the Rye*, *The Color Purple* and *Huck Finn*, and will explore the questions of why they were controversial and whether censorship of books is ever justified.

Grading Basis: Pass/Fail

FARR 1100 (1) Passport to Literature in the Humanities

Designed to build on Farrand's strength in the humanities, this course provides first-year students with the tools to think critically and independently and to engage in thoughtful discourse. It offers several short articles selected to provide a sense of community, and also one or two literary works chosen for more in-depth analysis and exploration.

Grading Basis: Letter Grade

FARR 1562 (3) Gandhi's Satyagraha: Love in Action for Humans and Other Creatures

Class texts and films explore social justice and structural violence in regard to humans, animals, and the environment in the light of a Gandhian approach to these issues. Outreach work in the community is included.

Additional Information: Departmental Category: Asia Content

FARR 2000 (3) Farrand Seminar in the Humanities and the Arts

Studies an aspect of the theme of the Center for Humanities Seminar Program each year, and will be taught by faculty participants in the Center's fellowship program.

Repeatable: Repeatable for up to 6.00 total credit hours.

FARR 2002 (3) Literature of Lifewriting

Examines how diverse writers have created unique personal narratives that shape memory within historical and social contexts. Works will exemplify a wide range of literary structures, themes, and strategies that enhance an understanding of the genre and provide models for students' own life writing assignments.

Additional Information: Arts Sci Core Curr: Literature and the Arts

FARR 2510 (3) Exploring Good and Evil through Film

Studies films that depict the best and worst sides of our nature and our capacities both good and evil. It considers how representations of zombies, aliens, cowboys, villains and bad girls reveal what society represses in order to believe in order and goodness. Investigates how the figure of the detective or the hero relies on the criminal or the villain to create his virtue, even as he tries to destroy evil. Topics addressed will be: forms of evil, monstrous women, cowboy heroes, detective evil.

Additional Information: Arts Sci Core Curr: Ideals and Values

FARR 2660 (3) Ethics of Ambition

Through selected readings in classical literature on ethics and through more contemporary readings and films, examines critical ethical issues relating to the competition of ambitions and the alternative styles of choosing between courses of action in a dangerous world. Uses biographies of those whose lives illustrate both the complexities of the struggles and the profundity of possibilities. Considers the unconscious metaphors of national visions and ambitions, the competing ethics of ends and means, the conflicting ambitions in a pluralistic society, and the transcendent ambitions of visionaries.

Equivalent - Duplicate Degree Credit Not Granted: HONR 2250

Additional Information: Arts Sci Core Curr: Ideals and Values

FARR 2820 (3) Future of the Spaceship Earth

Examines major ecological, political, economic, cultural, legal, and ethical issues that will shape the future. Students consider how their decisions influence the future, and reflect on fundamental values and ideals underlying the search for solutions to these complex problems.

Additional Information: Arts Sci Core Curr: Ideals and Values

Farsi (FRSI)

Courses

FRSI 1010 (5) Beginning Farsi 1

Provides a grounding in basic Persian Farsi grammar. The morphological and phonological nuances of the language will be introduced, along with Persian culture. Basic conversation is reinforced on a daily basis with strong emphasis and reiteration upon the homework and covered grammar.

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Farsi

Departmental Category: Asia Content

FRSI 1011 (3) Introduction to Persian Civilization

An introduction to the history, literature and art of Iranian (Persian) civilization with a focus on the social and cultural aspects of contemporary Iran. Taught in English.

Additional Information: Departmental Category: Farsi Courses in English

Departmental Category: Asia Content

FRSI 1020 (5) Beginning Farsi 2

Continuation of FRSI 1010. Completes the presentation of basic structures of Farsi. Continued acquisition of vocabulary and practice of speaking, listening, reading, and writing. Class conducted largely in Farsi. The second half of the course will introduce authentic texts of Persian prose literature. Some poetry may be included.

Requisites: Requires prerequisite course of FRSI 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Farsi

Departmental Category: Asia Content

FRSI 1051 (3) Masterpieces of Persian Literature

Offers a broad introduction to Persian literature, one of the richest traditions in world literature. Students will read a selection of poetry by Rumi, Hafiz, Omar Khayyam, as well as a variety of works written by leading Iranian contemporary poets and writers. Through a close reading of literary texts, this course emphasizes their historical and cultural context.

Additional Information: Departmental Category: Farsi Courses in English

FRSI 2110 (4) Intermediate Farsi 1

Provides an intensive introduction to cultural and literary texts of Iran, along with an introduction of the grammatical and rhetorical complexities of Persian prose and poetry. Students continue to develop speaking, listening, and writing skills through activities based on the readings.

Requisites: Requires prerequisite course of FRSI 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Farsi

Departmental Category: Asia Content

FRSI 2120 (4) Intermediate Farsi 2

Continuation of FRSI 2110. Incorporates more readings in Persian literature, both poetry and prose, and cultural readings. Students continue developing speaking, listening and writing skills based on the readings.

Requisites: Requires prerequisite course of FRSI 2110 (minimum grade C).

Additional Information: Departmental Category: Farsi

Departmental Category: Asia Content

FRSI 3110 (3) Advanced Farsi 1

An intensive introduction to both Persian philology and the contemporary novel. Textual analysis of texts ranging from complex to very complex will enable the students to gain a strong grounding in Persian literary texts. Students continue developing speaking, listening, and writing skills through activities based on the readings.

Requisites: Requires prerequisite course of FRSI 2120 (minimum grade C).

Additional Information: Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 3120 (3) Advanced Farsi 2

This course is the continuation of FRSI 3110. The focus will be on the reading and discussion of canonical literary texts as well as on language and media. Students continue developing speaking and listening skills through activities based on the readings and develop the ability to write short papers (3-5 pages) in Farsi.

Requisites: Requires prerequisite course of FRSI 3110 (minimum grade C).

Additional Information: Departmental Category: Farsi
Departmental Category: Asia Content

FRSI 4900 (1-4) Independent Study

Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Farsi
Departmental Category: Asia Content

Film Studies (FILM)

Courses

FILM 1002 (3) Film Analysis for Non-Majors

Introduces the critical study of film, exploring theoretical, historical and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis, and writing skills. Covers a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture.

Additional Information: Departmental Category: Genre and Movements

FILM 1502 (3) Introduction to Film Studies

Introduces basic media literacy by exploring the technical and aesthetic principles behind the production, analysis and interpretation of films. Explores comprehension and thinking about movies critically as technological, cultural and artistic products. Study of films in different social and historical contexts and discussion of the importance of movies as cultural products.

Additional Information: Departmental Category: Genre and Movements

FILM 2000 (3) Moving Image Foundations I

Introduces students to basic image making technology, aesthetics and methods. Fundamentals of film/video production in Super 8mm film, Digital ProRes 422 and other analog and digital image making, editing and management formats. May emphasize personal, experimental or narrative approaches with individual exercises, according to instructor. Basic competencies include composition, lighting, basic audio, basic editing, studio critique, file management, web upload, etc.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Production

FILM 2002 (3) Recent International Cinema

Familiarizes students with current trends and major directors in international cinema. Students attend specific films screened in class and/or offered in the International Film Series, and read and write about these films.

Recommended: Prerequisite FILM 1502 or 6 hours humanities courses involving critical writing.

Additional Information: Departmental Category: Genre and Movements

FILM 2003 (3) Film Topics

Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Topics

FILM 2004 (3) CU Film Studies Seminar: The Telluride Film Festival

Offers students a unique first-hand understanding of the significance of the film festival circuit in the context of global film culture and scholarship. Students will attend Telluride Film Festival screenings, discussions and Q&A sessions. After the festival, weekly screenings of select films from the previous year's festival offer insight into the festival's influence on box-office and the industry's award season.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intensive and Small Courses

FILM 2005 (3) Form, Structure, and Narrative Analysis

Analyzes the form and structure of narrative, experimental non-narrative, and documentary films. Familiarizes students with the general characteristics of the classic three-act structure, principles of adaptation, form and content of experimental films, structural approaches, and the basic formal, narrative, and rhetorical strategies of documentary filmmaking.

Requisites: Requires prerequisite or corequisite course of FILM 1502 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Workshops

FILM 2010 (3) Moving Image Computer Foundations

Provides students with artistic foundational hands-on experience in integrated use of media software in both the PC and Mac creative imaging making digital working environments. Includes fundamentals in general computer maintenance, creative and practical audio editing, image management and manipulation, and creative moving image practice.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 2105 (3) Introduction to the Screenplay

Explores, through close reading and original student work, the form and structure of the screenplay from the writer's perspective. Students will begin by analyzing structural and character elements of such screenplays as *Chinatown* and *Witness*, then analyze screenplays of their choosing. Students will learn the basics of screenwriting form, then develop and write 10 minutes of an original screenplay. Non-majors admitted with instructor's consent.

Requisites: Requires prerequisite or corequisite course of FILM 1502 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Workshops

FILM 2300 (3) Beginning/Intermediate Filmmaking

Covers basic camera, editing, and splicing techniques for Super-8 film. Equipment is available at the film studies office for a modest rental fee.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Additional Information: Departmental Category: Production

FILM 2312 (3) Film Trilogies

Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's Apu Trilogy (India), Krzysztof Kieslowski's Three Colors Trilogy (Poland), Francois Truffaut's Antoine Doinel cycle (France), and Abbas Kiarostami's Iran Trilogy (Iran). Non-majors will need instructor's consent.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Genre and Movements

FILM 2500 (3) Moving Image Foundations II

Instructs students in developing a technical and aesthetic understanding of the principles of analog and digital cinematography. Technical, creative and studio critique emphasis on the Bolex 16mm RX and Black Magic Pocket Cinema cameras, advanced composition, grammar and mechanics of cinema editing, film/digital lighting (exposure, latitude) multi-format origination and file management, non-sync sound techniques, etc.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 2000 or FILM 2300 (all minimum grade C). Restricted to FILM (FILM or FMST) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Production

FILM 2513 (3) Major Asian Filmmakers

Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Non-majors will need instructor's consent.

Requisites: Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: Topics
Departmental Category: Asia Content

FILM 2521 (3) Classics of the Foreign Film: 1960s to Present

Surveys the classics of international cinema from the 1960s to the present. Non-majors will need instructor's consent.

Requisites: Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: History

FILM 2610 (3) Animation Production

Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, cameraless, pixellation, etc.). Students produce exercise films and a final film exploring these techniques.

Requisites: Requires prerequisite course of FILM 2000 or FILM 2300 (minimum grade D-).

Additional Information: Departmental Category: Production

FILM 2900 (3) Lighting

Covers the basics of "why you need lighting", color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory.

Requisites: Requires prerequisite course of FILM 2000 or FILM 2300 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: Production

FILM 3002 (3) Major Film Movements

Historical-aesthetic survey dealing with various styles, movements, genres or national cinemas. Can be taught in conjunction with the appropriate language department. Typical offers are in the French, the German or the Russian films, etc. Also offers detailed approaches to specific styles, subjects or genres: film comedy, melodrama, the Western, women filmmakers, German expressionist cinema, Italian neorealism, etc. Non-majors will need instructor's consent.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Genre and Movements

FILM 3003 (3) Major Film Directors

Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. Non-majors need instructor consent.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Topics

FILM 3004 (3) Alfred Hitchcock: The American Films

Intensive survey of Hitchcock's American films from 1940 (Rebecca) to 1964 (Marnie). We will concentrate on in-depth analysis of the most influential and significant films made by the most important movie director of the Hollywood era. We will pay special attention to Hitchcock's deep understanding of the intricacies of film language, style and form in relation to the themes and subjects that interested him: guilt, sex, gender relations, crime and punishment, "mothers". Non-majors will need instructor's consent.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 3010 (1-3) Film Production Topics

Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of FILM 2000 or FILM 2300 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 3012 (3) Documentary Film

Provides a historical and theoretical introduction to the documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Genre and Movements

FILM 3013 (3) Women and Film

Examines the representation of women both in mainstream movies and in women's counter-cinema that resists traditional form, content, and spectator-text relationships of Hollywood models. Emphasizes work by key women filmmakers such as Margarethe Von Trotta, Lizzy Borden, and Yvonne Rainer, as well as readings in feminist film theory.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Topics

FILM 3030 (3) Cinema Alternative Process

Explores alternative methods of film processing and filmic image manipulation. Through projects, film screenings, lectures and discussions students will learn fine arts approaches to creative control for the moving image. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 2000 or FILM 2300 (all minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite FILM 2500.

Additional Information: Departmental Category: Production

FILM 3032 (3) Stage Tragedy and Film

Presents an aerial survey of the history of Western drama as represented in film: Greek drama, the Elizabethans, Ibsen/Strindberg to O'Neill/Williams, Beckett, etc.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Genre and Movements

FILM 3033 (3) Color and Cinema

Examines color and cinema from historical, technological, aesthetic and theoretical perspectives. Students will be required to complete both creative and scholarly assignments.

Additional Information: Departmental Category: Topics

FILM 3041 (3) Environmental Cinema

Interrogates how fiction and nonfiction filmmakers, writers, cinematographers, and moving-image editors have creatively responded to discoveries made in the field of environmental science. Using books by Rachel Carson and Scott MacDonald as a framework, we will examine a broad spectrum of filmmakers (e.g. Wes Anderson, Todd Haynes, Jennifer Baichwal, Bruce Conner, Percy Smith) alongside the most pressing environmental issues.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Film (FILM or FMST) or Environmental Studies (ENVS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: History

FILM 3042 (3) Horror Film

Serious investigation of the horror film genre as well as its origins in, and relation to, works of romanticist literature (e.g., Poe, Shelley). Issues include: the relation of fantasy and reality; gender in horror film; psychological issues raised by the films; historical issues generated by the genre.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Genre and Movements

FILM 3043 (3) Topics in Critical Film Studies

Prepares students for advanced Film Critical Studies work. Subject matter varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Topics

FILM 3051 (4) Film History 1

Intensive introduction to film history from 1895 to 1945. Topics covered include the beginnings of motion picture photography, the growth of narrative complexity from Lumiere to Griffith, American silent comedy, Soviet theories of montage, German expressionist films, and the transition to sound.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Additional Information: Departmental Category: History

FILM 3061 (4) Film History 2

Starts in 1945 and follows the historical growth and evolution of film aesthetics to the present. Studies Italian neorealist, French new wave, and recent experimental films, as well as the films of major auteur figures such as Bergman, Kurosawa, Fellini, Hitchcock, Bunuel, Antonioni, and Coppola.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 3051 (all minimum grade D-).

Additional Information: Departmental Category: History

FILM 3081 (3) Contemporary American Cinema: 1980 to Present

Examines the relationship between American films from 1980 to the present and their cultural and historical context. Includes films by Bigelow, Fincher, Hardwicke, Lee, Linklater, Lynch, Portillo, Stone and Scorsese. Assumes some film knowledge but is not restricted to majors.

Recommended: Prerequisites FILM 1502 and FILM 3051 and FILM 3061.

Additional Information: Departmental Category: Production

FILM 3104 (3) Film Criticism and Theory

Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3104

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) or Humanities (HUMN) majors only.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 3211 (3) History of Russian Cinema

Surveys Russian cinema in historical and cultural context from early 20th century to the present.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 3211

Requisites: Requires prerequisite course of FILM 1502 or RUSS 3211 (minimum grade D-).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Production

FILM 3301 (3) Contemporary Issues in Russian Film

Examines the representation of contemporary Russian society in noteworthy Russian films of the last 20 years. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 3301

Additional Information: Departmental Category: History

FILM 3400 (3) Cinema Production I

Exploration of creative cinema production through short production and post-production projects. A short final project will be required.

Focuses on the tactics and strategies of independent cinema production, examining a variety of approaches to genre. Explores a range of film and digital technologies.

Requisites: Requires prerequisites courses of FILM 1502 (minimum grade C) and FILM 2000 and FILM 2500 (both minimum grade of B-). Requires corequisite courses of FILM 3515 and FILM 3525. Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 3402 (3) European Film and Culture

Studies the relationships between European film, art and culture. Offered each summer in a different European city (Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips and on-site teaching.

Repeatable: Repeatable for up to 12.00 total credit hours.

Recommended: Prerequisite introductory film and art history courses.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Genre and Movements

FILM 3422 (3) The Hollywood Musical

Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. Proposes a historical, formal and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre's form, structure, and ideology in the context of America's changing social, political and religious values.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Genre and Movements

FILM 3503 (3) German Film Through World War II

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3503

Additional Information: Departmental Category: Topics

FILM 3504 (3) Topics in German Film

Analyzes key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women and the Holocaust. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3504

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 3513 (3) German Film and Society 1945-1989

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3513

Additional Information: Departmental Category: Topics

FILM 3514 (3) German Film & Society After 1989

Introduces post-1989 German culture through film. Emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3514

Additional Information: Departmental Category: Intensive and Small Courses

FILM 3515 (3) Camera Workshop

Focuses on the development of independent cinema production and post-production skills. The instructor must certify students in order to continue with their BFA studies.

Requisites: Requires prerequisites courses of FILM 1502 (minimum grade C) and FILM 2000 and FILM 2500 (both minimum grade of B-). Requires corequisite courses of FILM 3400 and FILM 3525. Restricted to Film (FILM or FMST) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Workshops

FILM 3525 (3) Cinema Editing Workshop

Focuses on the development of independent cinema post-production skills. The instructor must certify students in order to continue with their BFA studies.

Requisites: Requires prerequisites courses of FILM 1502 (minimum grade C) and FILM 2000 and FILM 2500 (both minimum grade of B-). Requires corequisite courses of FILM 3515 and FILM 3400. Restricted to Film (FILM or FMST) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Workshops

FILM 3563 (3) Producing the Film

Focuses on the production process of movie making from idea through distribution, analyzing each of the five phases involved, including the major players, function and problems inherent in each. Emphasizes the critical role the script plays in this process. Designed to give students a "map of the minefield" before venturing out on their own. Offered through Continuing Education.

Additional Information: Departmental Category: Topics

FILM 3603 (3) Sound and Vision

Historical and aesthetic overview of sound in relation to film, ranging from Hitchcock's *Blackmail* to Mailick's *The Thin Red Line*. Pursues issues in sound design, mixing film scores, voiceovers, and film/sound theory in narrative, experimental, and documentary films. Among the filmmakers to be studied are Vertov, Welles, Altman, Brakhage, Lipsett, Eisenstein, Coppola, Scorsese, Stone, Leone, Godard, Nelson. Also explores a limited practicum using Pro Tools for sound design.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Topics

FILM 3620 (3) Experimental Digital Animation

Explores boundaries of traditional animation construction and delve into contemporary animation history. Small projects will involve experimentation with animation techniques that integrate with analog animation, frame-by-frame digital processes and live-action footage. Ideal for students who have taken FILM 2010 or FILM 2610 or FILM 3525. Students familiar with animation and digital imaging or those eager to explore the process are encouraged to enroll.

Additional Information: Departmental Category: Production

FILM 3660 (3) The Postmodern

Analyzes the cultural and critical practices as well as the thought that defines the postmodern period at the end of 20th century.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3660

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: History

FILM 3700 (3) Digital Audio Design

Studies and applies Pro Tools as a post-production audio toolbox. Applied techniques include sound recording, field recording, foley, vocal recording and editing, plug-in generated sound creation, MIDI, basic scoring principles, audio sweetening and audio mixing. Students will be required to complete regular editing assignments in addition to a final soundscape project.

Requisites: Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 3900 (1-3) Independent Study (Production)

Limit of 3 credit hours per semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Production

FILM 3901 (1-3) Independent Study (Critical Study)

Limit of 3 credit hours per semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: History

FILM 3920 (3) Professional Seminar

Learning aspects of professional development in the field of cinema. Through workshops and assignments students will learn of the many opportunities found within all areas of production. Guests will help inform the students of professional options and expectations. Topics will include: crew work, fund raising, marketing festivals, low budget filmmaking, and alternative venues. Students may have an internship concurrently with this course.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 2500 (minimum grade D-).

Recommended: Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 3940 (1-6) Film Studies Internship

Provides students with professional internship experiences with film, video, new media production companies, governmental agencies, production units, audio recording studios and new media industries. Students will be responsible for securing their own internship position.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to Film (FILM or FMST) majors only.

Recommended: Prerequisite CU GPA of at least 2.00 and upper-division standing and a 3.00 GPA as a BA or BFA film studies major.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Production

FILM 3990 (1) Film Practicum

Offers creative and technical experience in aspects of film, video and media production for students in the BFA track and BA production emphasis. Students earn credit by working in any number of "crew" positions for Upper Division Production, MFA productions or faculty projects under the supervision of the course instructor.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Production

FILM 4000 (3) Advanced Digital Postproduction

Through projects, discussions and screenings, explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio, and optical effects treatments. Cannot be taken simultaneously with FILM 3400 or FILM 4400.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5000

Requisites: Requires prerequisite courses FILM 1502 and FILM 2000 or FILM 2300 and FILM 2500 and FILM 3400 or FILM 4400 (all minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and ETHN 5001

Requisites: Requires prerequisite course of ETHN 2001 (minimum grade D-).

Additional Information: Departmental Category: History

FILM 4003 (3) Film and Literature

Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5003

Additional Information: Departmental Category: Topics

FILM 4004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4004 and ARTF 5004

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) or Humanities (HUMN) majors only.

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 4005 (3) Screenwriting Workshop: Short Form

A writing intensive course that focuses on the art of the short form screenplay. Students will complete regular writing exercises, presentations, and several short scripts.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 2005 or FILM 2105 (all minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Workshops

FILM 4010 (1-3) Topics in Film Studies-Production

Prepares students for advanced Film Studies production courses. Subject matter varies each semester.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5010

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of FILM 1502 and FILM 2000 or FILM 2300 and FILM 2500 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) FILM (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4013 (3) Film, Photography and Modernism

Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5013

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Topics

FILM 4021 (3) Directing/Acting for the Camera

Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research and papers required.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5021

Recommended: Prerequisite FILM 1502.

Additional Information: Departmental Category: History

FILM 4023 (3) Topics in International Cinema

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5023

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-). Restricted to Film (FILM or FMST) or Fine Arts - Creative Arts (ARTC) majors only.

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Topics

FILM 4024 (3) Advanced Research Seminar

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. Department enforced requisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5024

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites FILM 3051 and FILM 3061.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 4043 (1-3) Topics in Film Studies-Critical Studies

Prepares students for advanced Film Studies critical studies courses. Subject matter varies each semester.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5043

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Topics

FILM 4105 (3) Advanced Screenwriting

Introduces professional screenwriting in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5105

Requisites: Requires prerequisite course of FILM 4005 (minimum grade D-).

Recommended: Prerequisites FILM 3051 and FILM 3061 and an approved writing sample.

Additional Information: Departmental Category: Workshops

FILM 4135 (3) Art and Psychoanalysis

Explores psychoanalytic theory as it relates to our understanding of literature, film and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/libido, dreamwork, etc.), students apply these ideas to works by several artists (e.g., Flaubert, James, Kafka, Hoffmann and Hitchcock).

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4135

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Topics

FILM 4200 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5200 and MCEN 4151 and MCEN 5151

Additional Information: Departmental Category: Production

FILM 4240 (3) Beginning Video Production

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4246 and ARTS 5246

Requisites: Requires prerequisite courses of FILM 2000 and FILM 2500 (all minimum grade D-).

Additional Information: Departmental Category: Production

FILM 4340 (3) Intermediate Video Production

Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4346 and ARTS 5346

Requisites: Requires prerequisite course of FILM 4240 (minimum grade D-).

Additional Information: Departmental Category: Production

FILM 4400 (3) Digital Post-Production Process

Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing. Formerly FILM 3600.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5400

Requisites: Requires prerequisite course of FILM 3525 (minimum grade D-). Restricted to Film (FILM or FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4440 (3) Advanced Video Production

Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4446 and ARTS 5446

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of FILM 4340 (minimum grade D-).

Additional Information: Departmental Category: Production

FILM 4453 (3) Elective Affinities: Avant-Garde Film and the Arts

Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music, and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5453

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Additional Information: Departmental Category: Topics

FILM 4500 (3) Cinema Production 2

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production leading to the completion of a BFA thesis project exploring either documentary, experimental, or narrative genres.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5500

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FILM 3400 and FILM 3515 and FILM 3525 (all minimum grade C). Restricted to Film (FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4505 (3) Screenwriting Workshop: Long Form

Creative writing workshop in which students plan and write a feature-length screenplay with emphasis on format, dialogue, characterization, and story.

Requisites: Requires prerequisite course of FILM 1502 and FILM 2000 (all minimum grade D-).

Additional Information: Departmental Category: Workshops

FILM 4600 (3) Creative Digital Cinematography

Explores creative approaches to single camera digital cinematography through short projects, discussions and screenings. Relates creative photography and poetic approaches to the digital camera cinema.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5600

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 2000 or FILM 2300 and FILM 2500 and FILM 4400 or ARTS 4246 or ARTS 5346 (all minimum grade D-). Restricted to Film (FMST) majors only.

Additional Information: Departmental Category: Production

FILM 4604 (3) Colloquium in Film Aesthetics

Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0 or instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5604

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Intensive and Small Courses

FILM 4959 (3-6) Honors Senior Thesis

For exceptional Film Studies majors who wish to write an honors thesis based on independent research or creative work under the direction of a faculty member.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sciences Honors Course
Departmental Category: Intensive and Small Courses

Finance (FNCE) Courses

FNCE 2010 (3) Fundamentals of Financial Analysis

Prepares students for financial analysis. Covers mathematical and statistical topics required for such analysis, including derivatives, optimization, integration, probability, inference and regression. Students will become proficient in using the tools and applying the to various financial contexts.

Requisites: Requires prerequisite course of BCOR 2002 (minimum grade D-). Restricted to Business (BUSN) majors with 26-180 units completed.

FNCE 2820 (3) Introduction to Personal Financial Planning

Introduces the concepts, tools, and applications of personal financial planning. Provides the students with tools and techniques for managing their personal finances. With these skills, students gain the ability to effectively deal with their ever-changing financial environment.

Requisites: Restricted Personal Financial Planning (PFP) students with 26-150 credits.

FNCE 3010 (3) Corporate Finance

Covers the theory and practices governing the management of capital in a business firm. Examines the determinants of capital requirements, methods of obtaining capital, problems of internal financial management and methods of financial analysis.

Requisites: Requires a prerequisite course of FNCE 2010 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 3030 (3) Investment and Portfolio Management

Develops modern portfolio theory and applies it to pricing both individual assets and portfolios of assets. Topics include Markowitz portfolio selection model, capital asset pricing model, arbitrage pricing theory, bonds, portfolio performance measurement, and issues of market efficiency. Formerly FNCE 4030.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

FNCE 3040 (3) Insurance, Risk Management and Retirement Planning

Part one of the course focuses on risk management and insurance concepts for personal financial planning. Topics include insurance for life, health, disability, property and liability risks, as well as annuities, group insurance and long term care. Part two of the course focuses on retirement planning and employee benefits in personal financial planning. Provides an understanding of the concepts of social security and Medicare benefits, retirement plan types, group insurance benefits and distribution options.

Requisites: Requires a prerequisite course of FNCE 2010 (minimum grade D-). Restricted to Business (BUSN) majors with the PFP subplan and with 52-180 units completed.

FNCE 3060 (3) Estate Planning

Basic estate planning principles and skills are presented that are necessary for the financial planner to successfully counsel clients and provide relevant advice as part of a comprehensive financial plan. Topics include wealth distribution strategies, transfer document, tax code, unified transfer tax system and the determination of an individual's estate tax liability.

Requisites: Requires a prerequisite course of FNCE 2010 (minimum grade D-). Restricted to Business (BUSN) majors with the PFP subplan and with 52-180 units completed.

FNCE 4000 (3) Financial Institutions Management

Analyzes the structure, markets, and regulations of financial institutions. Studies problems and policies of internal management of funds, loan practices and procedures, investment behavior, deposit and capital adequacy, liquidity, and solvency.

Requisites: Requires a prerequisite course of FNCE 3010 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4040 (3) Derivative Securities

Develops the modern theory of contingent claims in a mathematical framework oriented toward applications. Examines how to use derivatives for risk management and to tailor portfolio payoffs. Provides an in-depth analysis of the properties of options.

Requisites: Requires a prerequisite course of FNCE 3010 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4050 (3) Capital Investment Analysis

Focuses on capital budgeting and investment issues. Emphasizes issues relating to cash flows, capital rationing, the investment versus financing decision, leasing, fluctuating rates of output, investment timing, capital budgeting under uncertainty and investment decisions with additional information.

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 (all minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4060 (1-6) Special Topics in Finance

Presents new subject matter in finance. The summer offering is the London Seminar in International Finance and Business. Department enforced prereq.: varies, see advising office.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires a prerequisite course of FNCE 3010 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4070 (3) Financial Markets and Institutions

Examines the economics of financial markets and the management of financial institutions, both domestic and international. Topics include an overview of U.S. and international financial markets, pricing and risk factors, interest rates, markets for securities and financial services and markets for derivative financial instruments. For students planning to take FNCE 4000 and FNCE 4070, it is recommended that FNCE 4070 precede rather than follow FNCE 4000.

FNCE 4340 (3) Security Analysis

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4820 (3) Topics in Finance

Offered irregularly to provide opportunity for investigation into new frontiers in finance.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Finance.

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4826 (3) Experimental Seminar: Corporate Governance

What is the objective of corporate managers? Do they only think about their own benefit? Are they concerned about their shareholders? Are corporate managers concerned about their other stakeholders like employees, customers, and people that live in towns and cities they operate in? Corporate governance addresses the above questions. The objective of the course is to provide the student with a state-of-the-art understanding of corporate governance as it relates to: Corporate board structure, Executive and board compensation, Entrepreneurship and private equity, Corporate social responsibility.

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4830 (3) Seminar in Investment Banking

Introduces the student to a career in investment banking and provides specific modeling skills necessary and important during the first phase of such a career.

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4831 (3) Seminar in Investment Management

The purpose of this course is for students to understand the investment management profession. The course is designed to be a blend of theory and practice. Extends the basic principles of security analysis, asset pricing theory, portfolio construction, and portfolio performance evaluation. Students will apply these principles in determining, over the semester, how to manage the CU investment fund.

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 (minimum grade D-). Restricted to Business majors with 52-180 units completed.

FNCE 4832 (3) Microfinance

In the last two decades, microfinance initiatives have provided the primary worldwide impetus to promote economic independence for the poor (1.4 billion). Microfinance links the financial markets with entrepreneurship to create a platform that facilitates financial inclusion to the poor. In a semester long project, students build a hypothetical financial institution that provides access to credit, saving, insurance and other services to a segmented poor population.

Equivalent - Duplicate Degree Credit Not Granted: CESR 4010

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 90-180 units completed.

FNCE 4835 (3) Fixed Income Securities

Provides a working knowledge of fixed income securities, primary and secondary fixed income and interest rate markets, bond credit analysis, credit default swaps and bond portfolio management strategies. The institutional details of government, corporate and municipal fixed income securities and markets will be covered. Also covered will be corporate credit analysis and credit default swaps and, finally, bond portfolio management strategies.

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

FNCE 4840 (3) Personal Financial Plan Development Capstone

Reviews, integrates and applies personal financial planning concepts and skills. It builds on the previous PFP courses taken in the program. Students will prepare written financial plans based on comprehensive and integrative cases. The case method is a primary instructional tool. Individual and team written reports, as well as class presentations of cases, are required.

Requisites: Requires prerequisite courses of ACCT 3440 and FNCE 2820 and FNCE 3030 and FNCE 3040 and FNCE 3060 (all minimum grade D-). Restricted to Business (BUSN) majors with 102-180 units completed.

FNCE 4850 (3) Business Senior Seminar in Finance

Develops analytical and decision making skills necessary to address real-world business finance situations. Topics include financial analysis and forecasting, capital budgeting, valuation, capital structure policy, international finance, and financial ethics. Uses a combination of lecture and cases; team and individual work.

Requisites: Requires prerequisite courses of FNCE 3010 and FNCE 3030 and ACCT 3220 (all minimum grade D-). Restricted to senior Finance (FNCE) majors with 102 to 180 units completed.

FNCE 4900 (1-6) Independent Study

Intended only for exceptionally well qualified business seniors. Prior consent of dean and instructor under whose direction study is taken is required and departmental form.

FNCE 6820 (1-3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

FNCE 6900 (1-6) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

Repeatable: Repeatable for up to 6.00 total credit hours.

FNCE 6940 (1) Master's Degree Candidate

Repeatable: Repeatable for up to 3.00 total credit hours.

Grading Basis: Pass/Fail

FNCE 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

FNCE 7100 (3) Doctoral Seminar: Finance Theory

Develops the foundations for the study of modern financial economics by analyzing individuals' consumption and portfolio decisions in the context of risk and then traces the implications to market valuation of traded securities. Topics include the meaning and measurement of risk, portfolio theory, the Capital Asset Pricing Model, and arbitrage pricing arguments like those employed in Modigliani and Miller's capital structure theory and the Black-Scholes option pricing model.

Requisites: Restricted to Business Administration (BUAD) graduate students only.

FNCE 7200 (3) Doctoral Seminar: Empirical Research Methods in Finance

Develops an understanding of current empirical methods used to examine research issues related to corporate finance and the capital markets.

FNCE 7330 (3) Doctoral Seminar: Corporate Finance, Theoretical, and Empirical Issues

Develops and examines theories and issues in corporate finance. Topics may include corporate control, capital structure, financial signaling, and payout policy.

FNCE 7550 (3) Doctoral Seminar: Special Topics in Finance

Closely examines areas of specific interest to academic research in finance. Subjects vary and may include game theory, stochastic processes in finance, continuous-time modeling, derivative security pricing, the microstructure of securities markets and financial institutions, innovation, and engineering.

FNCE 7800 (3) Doctoral Proseminar: Finance

Provides finance doctoral students with an orientation to the finance field; introduces contemporary research perspectives and priorities. Students discuss papers that illustrate academic researchers' use of various disciplinary theoretical and empirical tools to address finance problems.

FNCE 7830 (1) Doctoral Seminar: Dissertation Research

Assists doctoral students in integrating courses and fields of study in order to apply their knowledge and skills to problems in finance. Gives special attention to development of thesis topics. Continuous enrollment required of all finance doctoral students while doing course work.

FNCE 8820 (3) Graduate Seminar

Experimental seminar offered irregularly to provide opportunity for investigation of new frontiers in finance.

FNCE 8900 (1-3) Independent Study

Instructor consent required and departmental form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

FNCE 8990 (1-10) Doctoral Thesis

Finnish (FINN)

Courses

FINN 1010 (4) Beginning Finnish 1 - DILS

Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class.

Additional Information: Departmental Category: Finnish Courses

FINN 1020 (4) Beginning Finnish 2- DILS

Continuation of Beginning Finnish I. Provides practical, communicative language skills for use in a variety of situations. Examines basic language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 1010 (minimum grade C-).

Additional Information: Departmental Category: Finnish Courses

FINN 2010 (4) Intermediate Finnish 1 - DILS

Continuation of Beginning Finnish 2. Provides practical, communicative language skills for use in a variety of situations. Examines intermediate language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 1020 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Finnish Courses

FINN 2020 (4) Intermediate Finnish 2 - DILS

Continuation of Intermediate Finnish I. Provides practical, communicative language skills for use in a variety of situations. Examines intermediate language structure and grammatical forms. Introduces students to Finnish history and contemporary culture and society. Directed independent language study course, requires work outside of class. Department enforced prerequisite: FINN 2010 (minimum grade C-).

Additional Information: Departmental Category: Finnish Courses

First Year Seminar (FYSM)

Courses

FYSM 1000 (3) First Year Seminar

Provide first year students with an immersive experience in an interdisciplinary topic that addresses current issues including social, technical and global topics. Taught by faculty from across campus, the course provides students with an opportunity to interact in small classes, have project based learning experiences and gain valuable communication skills. Seminar style classes focused on discussion and projects.

Requisites: Restricted to students with 0-26 credits (Freshmen) only.

French (FREN)

Courses

FREN 1010 (5) Beginning French 1

For students with no previous knowledge of French. Presents basic grammar and most commonly used French vocabulary. Introduces students to Francophone culture.

Equivalent - Duplicate Degree Credit Not Granted: FREN 1050

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: French

FREN 1020 (5) Beginning French 2

Continuation of FREN 1010. Completes the presentation of most basic structures and French vocabulary.

Equivalent - Duplicate Degree Credit Not Granted: FREN 1050

Requisites: Requires a prerequisite course of FREN 1010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: French

FREN 1050 (5) Beginning French Review

Covers the material of FREN 1010 and 1020 in one accelerated semester. Intended for students who know some French (i.e., four to five semesters in high school) but do not have skills adequate for 2000-level courses. Department enforced prerequisite: 2 years of high school French.

Equivalent - Duplicate Degree Credit Not Granted: FREN 1010 or FREN 1020

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: French

FREN 1200 (3) Medieval Epic Through Game of Thrones

Covers the most important works of medieval literature, in English translation. Among the texts studied are the Nibelungenlied, the Song of Roland, and Arthurian romances, including the stories of Lancelot and Guinevere and Tristan and Isolde. Offers a general introduction for nonmajors to medieval literature and society. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1400 (3) Medieval/Renaissance Women Writers in Italy and France

Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 1400

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Human Diversity
Departmental Category: French

FREN 1500 (3) Literature and Politics in the Age of Enlightenment

Introduces political dimensions of 18th century French literature. Surveys political and social preoccupations that manifest themselves across genres (novels, scientific treatises, dialogues, erotic literature, etc.). Examines contributions made by 18th century French writers to the sociological and political imagination of Western tradition. Taught in English.

Additional Information: Departmental Category: French

FREN 1610 (3) How to Be French, 1: The Ancien Regime

Explores medieval and early modern French culture in the widest sense, encompassing masterpieces of French literature, architecture, and visual art as a key to the habits, customs, and practices of everyday life. Major themes are "living and dying," "heroes, villains, and kings," "courtliness, civility, and the art of love," and "crafty little guys."

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1620 (3) How To Be French? 2: Modernity

Introduces students to French culture in its widest sense and in particular to reflect on major social and cultural contradictions inherited from the French Revolution, which still define "Frenchness" today. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1700 (3) Francophone Literature in Translation

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and Canada. Gives special attention to oral tradition, identity, question, and cultural conflict. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Departmental Category: French

FREN 1750 (3) French Colonialism: North Africa and the Middle East

Offers a general introduction to French and Francophone literature and visual arts (painting, photography, film) from the nineteenth century to the present depicting cultures and societies of the Middle East and North Africa. In English with English translations of French texts.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Human Diversity
Departmental Category: French

FREN 1800 (3) Contemporary French Literature in Translation

Reviews the major philosophical, political, and aesthetic issues in the 20th century French novel and drama. Beginning with existentialist literature, discussion focuses subsequently on the Theatre of the Absurd, the new novel, World War II and the Holocaust, and recent women writers. Taught in English.

Additional Information: Departmental Category: French

FREN 1850 (3) Introduction to French Society and Culture through Cinema

Introduces students to French society and culture through French cinema through films that focus thematically on major historical events (e.g., World War II; student revolts of 1968) and cultural constants of French society (e.g., feminism; colonialism and its aftermath). Taught in English.

Additional Information: Departmental Category: French

FREN 1880 (3) The Zombie in History and Popular Culture

Discusses the emergence of the zombie figure in the Caribbean and its evolution from colonial Haiti to present-day popular culture having passed through Hollywood. Through movies and literary, historical, and scientific documents, students will study critically how this mass-media icon came to represent deep-rooted anxieties about the modern world.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1900 (3) Modern Paris in Literature, Photographs, Paintings and Movies

Introduces the rise of modern Paris from the French Revolution (1789) to today. Studies the physical and sociological changes of the city in terms of architecture and industrialization through French literature, movies, paintings and photographs. Addresses problems due to the magnitude of the city, the growing fear of urban vices, and the dilemma of controlling massive urban populations. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 1950 (3) French Feminisms

Introduces students to the central problematics that have defined French feminist studies. This course focuses on the various literary and historical contexts in which core concepts such as female subjectivity and agency, feminist writing and political engagement have arisen and developed in Early Modern and Modern France by looking at multiple media (literary text, film, painting). Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: French

FREN 2110 (3) Second-Year French Grammar Review and Reading 1

A film based curriculum will expand the knowledge of francophone culture and will continue the development of communication skills begun in the first year. This third semester course will review essential beginning grammar before introducing intermediate structures, vocabulary, and cultural/literary readings. Satisfies arts and sciences foreign language requirement.

Requisites: Requires a prerequisite course of FREN 1020 or FREN 1050 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: French

FREN 2120 (3) Second-Year French Grammar Review and Reading 2

Completes the film-based study of intermediate grammar begun in FREN 2110. Continued reading in French literature and culture, with considerable practice in writing and speaking French. Fulfills the Graduate School language requirement for the Ph.D.

Requisites: Requires a prerequisite course of FREN 2110 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 2500 (3) Conversation in French

Puts into practice all that has been learned in the first four semesters of college French. Builds conversational skills and confidence through acquisition of new vocabulary and a review of grammar essential to discussing different aspects of French culture. All work is in French.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3010 (3) French Phonetics and Pronunciation

Improves students' ability to pronounce French correctly. Coursework involves the International Phonetic Alphabet, understanding the differences between pairs of sounds, and recognizing the relationship between spelling and pronunciation. Required of all FREN majors.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3020 (3) French Phonetics Through Musical Performance

Advanced oral practice and interpretation of a French Musical. This course of applied and corrective phonetics concentrates on developing good pronunciation and fluency through song. The course culminates with a public presentation of the musical studied in class.

Requisites: Requires a prerequisite course of FREN 3010 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 3050 (3) French Composition 1

French third-year level composition course. Students practice and write different forms of formal French writing. They also hone their grammar skills and analytical reading of short literature pieces. This course or FREN 3060 is required for all French majors.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3060 (3) French Composition 2

French third year level composition course. Students build on their previous knowledge of formal writing in French and more emphasis is given to argumentative and analytical style of writing. This course or FREN 3050 is required for all French majors.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3100 (3) Introduction to Critical Reading and Writing in French Literature

Study of French literature through close readings of representative examples of major literary forms (poetry, fiction, drama, essay) and through the composition of critical writings in French. Required for French majors.

Requisites: Requires a prerequisite or corequisite course of FREN 3050 or a prerequisite or corequisite course of FREN 3060 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 3110 (3) Main Currents of French Literature 1

Surveys 19th and 20th century French literature. Close reading of selected texts and the principal writers and schools. This course or FREN 3120 are required for all majors.

Requisites: Requires a prerequisite or corequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 3120 (3) Main Currents of French Literature 2

Surveys 19th and 20th century French literature. Close reading of selected texts of the principal writers and schools. This course or FREN 3110 are required for all majors.

Requisites: Requires a prerequisite or corequisite course of FREN 3100 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 3200 (3) Introduction to Literary Theory and Advanced Critical Analysis

Introduces important aspects of both classical and modern literary theory as an aid to reading and understanding literary texts. Covers theoretical works by figures ranging from Plato and Aristotle to modern French critics such as Barthes, Foucault, and Derrida in conjunction with selected literary works. Offers students more sophisticated means of understanding issues like gender, ethnicity, the roles of both author and reader in constructing meaning, the nature and functions of signs, and the relationship between literature and the larger society. Conducted in English, though French majors are required to read the texts in the original language. Required for students taking honors in French or Italian.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 3500 (3) French Current Events: Conversation and Composition

For students who have spent fewer than four months in a French-speaking environment. Focuses on presentations, debates, discussions, readings and written work.

Requisites: Requires a prerequisite or corequisite course of FREN 3050 or a prerequisite or corequisite course of FREN 3060 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3600 (3) Business French 1

Gives students the tools needed to function in a French-speaking work environment. A culminating project involves creating a business in a francophone country.

Requisites: Requires a prerequisite course of FREN 2120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3700 (3) French-American Cultural Differences

Through readings, films, discussion and activities, students learn the defining values of their own country, those of France, and key differences between the two cultures. Taught in French.

Requisites: Requires a prerequisite or corequisite course of FREN 3050 or a prerequisite or corequisite course of FREN 3060 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 3800 (3) France and the Muslim World

Introduces students to the polemic colonial, social, and cultural interactions of France and Islam. Close attention will be paid to paradigms of identities of one of the major European nations and the Islamic world. Readings and discussion topics for this course cover the social, cultural, and literary depictions of Islamic and French interactions, negotiations, and contradictions. Taught in English. Cannot be used for French major or minor credit.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: French

FREN 4030 (3) Advanced Oral Practice and Interpreting

Concentrates on developing (or preserving) speaking fluency, correct pronunciation, and a good working vocabulary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4110 (3) French Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4120.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of FREN 3110 or FREN 3120 (minimum grade C-).

Additional Information: Departmental Category: French

FREN 4120 (3) French Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics. See also FREN 4110.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: French

FREN 4170 (3) Francophone Literature

Studies the literary expression of French-speaking peoples of Africa, the Caribbean, and French Canada. Gives special attention to oral tradition, identity question, and cultural conflict.

Requisites: Requires prerequisite courses of FREN 3100 and FREN 3110 and FREN 3120 (all minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 4250 (3) Medieval and Renaissance Readings

Explores the complex and evolving cultural and historical contexts of medieval and Renaissance French. Introduces the masterpieces of French medieval and Renaissance literature, including the Chanson de Roland and Arthurian romance. Also focuses on the work of Marie de France, Guillaume de Lorris and Jean de Meun, Christine de Pisan, Machaut, Villon, Louise Labe, and the poets of the Pleiade, Rabelais, and Montaigne.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4300 (3) Theatre and Modernity in 17th Century France

Readings of plays by Corneille, Moliere and Racine introduce students to theatre's role as a mirror of the multifarious tensions shaping modern Western experience. Taught in English with English translations.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: French

FREN 4330 (3) Moliere and 17th Century French Comedy

Close readings of farces and comedies of Moliere in context with selected comedies by Corneille, Rotrou and Cyrano de Bergerac and selected satires by Boileau and La Fontaine. Themes include comedy as a form of social criticism and the sociocultural significance of such episodes of Moliere's career as the scandalous quarrels of *L'ecole des Femmes* and *Tartuffe*.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4350 (3) French Enlightenment

Studies fiction, essays, theatre, and philosophical tales. Emphasizes the Enlightenment in France through the texts of its major representatives: Montesquieu, Voltaire, Marivaux, Diderot, and Rousseau.

Requisites: Requires prerequisite courses of FREN 3100 and FREN 3110 and FREN 3120 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4430 (3) Survey of 19th Century French Literature

Examines fiction, poetry and theatre in 19th century France. Focuses on developing and changing literary styles and subject matter throughout the century in historical, philosophical and social context.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3120 (all minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: French

FREN 4470 (3) 20th Century French Theatre and Poetry

Close readings of plays from the turn of the century to the contemporary period introduce the principal themes and techniques of modernist and postmodernist French theatre. Students are encouraged to consider problems commonly evoked by these texts and to compare the positions that each text takes on such problems as the status and uses of language, the function and limits of the theatre and the dialectic of appearance and reality.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4480 (3) 20th Century French Novel

Close readings of novels from the 1930s to the contemporary period introduce the principal themes and techniques of the modernist and postmodernist French novel. Students are encouraged to analyze a variety of questions commonly evoked in these texts, such as the problem of representation, the uses and abuses of writing, the relation of fiction and history and the status of the subject in the world.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4600 (3) Topics in French Film

Covers various topics in the French and some other Francophone cinemas (Belgian, Swiss, Quebecois) from 1895 to the present. Focuses on periods, schools, themes, and directors from Melies to Duras, and the critical approaches by which they are studied. Varies from year to year.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of FREN 3050 or FREN 3060 and FREN 3100 (all minimum grade C-).

Additional Information: Departmental Category: French

FREN 4700 (3) Encountering Animals: contemporary Discourse and the Dialog of Species

Explores Western philosophy and literature recent challenges to species' differences and human privileges and includes contemporary theory, novels as well as movies and other cultural artifacts. Themes include animal representations in today's culture, animal and human bond, animal welfare, post-humanism. Taught in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: French

FREN 4750 (3) Methods of Teaching French and Professional Orientation

Presents current methodology and techniques for teaching foreign language for proficiency. Areas of study include ACTFL guidelines, National Standards, assessment, classroom activities, curriculum, and syllabus design.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: French

FREN 4800 (3) Postmodernist French Novel in Translation

Focuses upon recent innovations in the French novel, and upon the postmodernist literary aesthetic. Students will examine a variety of avant-garde novels, and analyze the kinds of literary experimentation that those novels propose. They will be asked to consider a series of questions concerning the changing nature of literary representation and the status of the novel as a cultural form. Taught in English. Cannot be used for major or minor credit.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: French

FREN 4840 (1-6) Independent Study: Language

Upon consultation only and at the undergraduate level.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: French

FREN 4860 (3) War, Trauma, and Memory: Amnesias, Revisions, and Representations of Traumatic History

Attempts to investigate how extreme historical events (war, genocides, terror attacks) function as "trauma" and how these extreme events are dealt with by personal and collective memory in historical narratives, literary and cinematic fiction, and memorials. Amnesia and other types of historical negations or revisions will be analyzed, along with representations of trauma and the difficulties raised by this memorializing. Taught in English. Cannot be used for major or minor credit.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: French

FREN 4960 (6) High School French Teaching

Offered as part of the supervised student teaching in a secondary school required for state licensure to teach French. These hours do not count toward student hours in the major nor in the maximum departmental hours allowed. Pass/fail only.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: French

FREN 4980 (3) French Senior Honors Thesis

The senior honor thesis is a 40 to 45 page original research paper, written in French, and constitutes a requirement for graduating with departmental honors.

Requisites: Requires a prerequisite course of FREN 3200 (minimum grade D-).

Additional Information: Arts Sciences Honors Course
Departmental Category: French

FREN 4990 (3) Senior Seminar

Preparation of a 15-page research paper in French presented to two members of the department faculty and defended orally in class.

Recommended: Prerequisite at least one course numbered FREN 4100 or above and all third-year requirements and advisor consent.

Additional Information: Departmental Category: French

FREN 5110 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5120 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5170 (3) Francophone African Literature

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5250 (3) Medieval and Renaissance Readings

Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France.

Readings in French. May be taught in English to accommodate students in other programs.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5310 (3) 17th Century French Tragedy and Poetry

Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama's role as a symptom and agent of early modern French social and intellectual history.

Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5320 (3) 17th Century French Prose

Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honnêteté and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchic absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5330 (3) Moliere and 17th Century French Comedy

Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy's role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding *L'ecole des femmes* and *Tartuffe*.

Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5350 (3) French Enlightenment

Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d'Alembert's *Encyclopedie*, Voltaire and Diderot's philosophical tales and dialogues, Rousseau's *Discours*, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5360 (3) 18th Century French Literature

Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/writer and their significance as representatives of the century's changing society and culture.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5420 (3) 19th Century French Literature

A survey of principal works and movements, intended as an introductory course.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5430 (3) Topics in 19th Century French Prose, Poetry, and Theatre

Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5440 (3) Literary Ludics

Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5470 (3) 20th Century French Theatre and Poetry

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5770 (2-3) Methods of Teaching French as a Foreign Language

Familiarizes students with current methodology and techniques in foreign language teaching.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 6840 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

General Engineering (GEEN)

Courses

GEEN 1010 (4) Engineering Explorations Through Physics

Explore the world of engineering through understanding physics concepts, engaging in active learning assignments, and conducting hands-on labs and experiments. Students will analyze product designs and engineering decisions based on the physics surrounding the situation. Formerly COEN 1010.

Requisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

Grading Basis: Letter Grade

GEEN 1400 (3) Engineering Projects

First-year students solve real engineering design problems in interdisciplinary teams. Design projects vary by section. Curriculum focuses on iterative design process, teamwork and team dynamics, supporting design with testing and analysis, and technical writing. Completed projects are exhibited at an end-of-semester design expo. Students responsible for contributing towards their design project budget and poster costs, and purchasing safety glasses (approximately \$75).

Requisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

GEEN 2024 (3) Materials for Engineers

Examines structure, properties, processing and uses of metallic, polymeric, ceramic and composite materials. Specific topics covered include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical and electrical behavior and failure modes. Approach incorporates both materials science and materials engineering applications.

Requisites: Requires a prerequisite course of PHYS 1110 (minimum grade C). Restricted to College of Engineering students only.

Grading Basis: Letter Grade

GEEN 2400 (3) Engineering Projects for the Community

Design engineering products for local community clients, with emphasis on humanitarian engineering and integrated systems with electrical, mechanical, and software components. Students are challenged to take design projects to a higher level by requiring an additional iteration through the design cycle and more engaged user-testing, in order to infuse student projects with the robustness necessary for public-use products.

Requisites: Requires prerequisite course of GEEN 1400 or COEN 1410 or ASEN 1400 or ECEN 1400 (minimum grade C). Restricted to College of Engineering majors only.

Grading Basis: Letter Grade

GEEN 2851 (3) Statics for Engineers

Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 2121 and MCEN 2023

Requisites: Requires prerequisite course of PHYS 1110 (minimum grade C-). Requires a prerequisite or corequisite course of APPM 2350 or MATH 2400. Restricted to College of Engineering majors only.

GEEN 3010 (3) Basic Electronics

Examines basic concepts of electricity, digital systems, circuit design and circuit analysis. Specific topics covered include analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis. Thevenin and Norton theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, operational amplifiers and microcontrollers.

Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of APPM 2360 (all minimum grade C). Restricted to College of Engineering undergraduate majors only.

Grading Basis: Letter Grade

GEEN 3400 (3) Invention and Innovation

Introduction to invention and product innovation with a hands-on approach. Students explore the invention process, hone their engineering design skills, and explore the initial stages of entrepreneurship (patenting, intellectual property, marketing research, and raising capital). Student teams design, create, and test a potentially commercial product, and exhibit at an end-of-semester design expo.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

GEEN 3830 (1-3) Special Topics

Explores topics of interest in engineering. Content varies by instructor and semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to College of Engineering undergraduate students only.

GEEN 3852 (3) Thermodynamics for Engineers

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 3012

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C-). Restricted to College of Engineering majors only.

GEEN 3853 (3) Fluid Mechanics for Engineers

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to engineering systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and CVEN 3313 and MCEN 3021

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and CHEN 2120 or MCEN 2023 or CVEN 2121 (all minimum grade C-).

Requires a prerequisite or corequisite course of APPM 2350. Restricted to College of Engineering majors only.

GEEN 4400 (3) Teaching Design

For pre-service math, science and engineering educators, this course focuses on teaching engineering design in secondary schools. Students examine the process of teaching hands-on design, including scoping, stages of team evolution, development of engineering identity and iteration. Students engage in practice of integrating design thinking into secondary math/science curriculum, develop ready-to-use tools and resources and explore the design education literature.

Requisites: Requires prerequisite courses of GEEN 1400 and EDUC 4060 (all minimum grade B). Requires corequisite course of GEEN 3400.

Restricted to Engineering Plus (GEEN) majors in CU Teach math, biology, chemistry or physics (TMMA, TSBI, TSCH, TSPH).

Grading Basis: Letter Grade

GEEN 4830 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering and Applied Science BS students or BS/MS Concurrent Degree Students only.

GEEN 4848 (1-6) Independent Study

Subjects arranged in consultation with instructor and undergraduate advisor. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Engineering Plus (GEEN) students only.

Grading Basis: Letter Grade

Geography (GEOG) Courses

GEOG 1001 (4) Environmental Systems: Climate and Vegetation

Lect. and lab. Introduces the atmospheric environment of the Earth: elements and controls of climate and their implications for hydrology, vegetation, and soils. Emphasizes distribution of physical features across the Earth's surface and interactions between humans and their environment, especially those leading to global change on the decade to century time scale.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Departmental Category: Physical Geography

MAPS Course: Natural Science

MAPS Course: Natural Science Lab or Lab/Lec

GEOG 1011 (4) Environmental Systems: Landscapes and Water

Lect. and lab. Introduces landscapes and flowing water, emphasizing the formation and geographic distribution of mountains, volcanoes, valleys, and deserts, and their shaping by rivers and glaciers. Includes field trips.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Departmental Category: Physical Geography

MAPS Course: Natural Science

MAPS Course: Natural Science Lab or Lab/Lec

GEOG 1962 (3) Geographies of Global Change

Familiarizes students with a geographic understanding of conflicts around the globe and of economic, political and cultural globalization.

Analyzes the relationship between global forces, regions and local interests in contemporary territorial and geopolitical tensions and conflicts, emphasizing issues such as nationalism, migration, labor and natural resources. Formerly GEOG 2002.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

MAPS Course: Geography

GEOG 1972 (3) Environment-Society Geography

Examines interactions between humans and the environment across the globe from a geographical perspective. Introduces different analytical perspectives through which to understand nature-society relationships, with a focus on social, cultural and political-economic dimensions, and examples from different natural resource sectors (e.g., water, agriculture) and countries. Formerly GEOG 2412.

Additional Information: Departmental Category: Human and Cultural Geography

MAPS Course: Geography

GEOG 1982 (3) World Regional Geography

Introduces a comparative framework for recognizing and understanding world regions. Units combine historical understanding with discussion of problems and challenges that face them, including discussion of economic growth, inequality, political conflict, colonialism, race and climate change.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

MAPS Course: Geography

GEOG 1992 (3) Human Geographies

Examines social, political, economic, and cultural processes creating the geographical worlds in which we live, and how these spatial relationships shape our everyday lives. Studies urban growth, geopolitics, agricultural development and change, economic growth and decline, population dynamics, and migration exploring both how these processes work at global scale as well as shape geographies of particular places.

Additional Information: Departmental Category: Human and Cultural Geography

MAPS Course: Geography

GEOG 2053 (3) Mapping a Changing World

Examines roles that maps, geospatial data and technology play in understanding and explaining our world. Topics introduce map reading, GPS, drones, web mapping and spatial data in social networks. Class discussions and assignments include critical thinking about maps as propaganda and as tools of social and political power. Hands-on exercises demonstrate skills for map exploration of natural and societal worlds.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 2271 (3) Introduction to the Arctic Environment

Rising temperatures and shrinking sea ice are only the most visible indications of a rapidly changing Arctic. This course addresses the climate of the Arctic and the changes being observed at a non-mathematical level. It is intended to provide students with a basic understanding of the Arctic physical environment.

Additional Information: Departmental Category: Physical Geography

GEOG 2852 (3) Contemporary Southeast Asia: Environmental Politics

Examines globally pressing questions of environmental sustainability, regional inequality and development in the dynamic and heterogeneous landscapes of contemporary Southeast Asia. Focuses on interactions between histories of uneven development and contemporary debates over energy and infrastructure, food security, governance and access to land, forest and water-based resources.

Equivalent - Duplicate Degree Credit Not Granted: ASIA 2852

Grading Basis: Letter Grade

GEOG 3022 (3) Climate Politics and Policy

Engages students in exploring the realm of contemporary and historical climate policy at three major levels of government: international, national and local/regional. Through course lectures, discussions, readings and activities, students will become conversant with the actors, mechanisms and concerns involved in climate policy and politics and develop their own sense of how to judge the success of climate policies. Fulfills intermediate social science requirement in Environmental Studies Major.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3022

Recommended: Prerequisite ENVS 1000 or GEOG 1972.

GEOG 3023 (4) Statistics for Geography

Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3023

Additional Information: Departmental Category: Techniques (Skills)

GEOG 3053 (4) Cartography: Visualization and Information Design

Introduction to the fundamentals of cartography, the science and art of map design. Emphasis on map projections, symbolization and the design of maps with computers. Students produce series of thematic maps with modern computer-assisted techniques.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite basic familiarity with computers and an introductory course in statistics (may be taken concurrently).

Additional Information: Departmental Category: Techniques (Skills)

GEOG 3251 (3) Mountain Geography

Surveys mountain environments and their human use with illustrations from temperate and tropical mountain areas.

Additional Information: Departmental Category: Physical Geography

GEOG 3301 (3) Analysis of Climate and Weather Observations

Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3300

Requisites: Requires prerequisite courses of APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 and ATOC 1050 and ATOC 1060 or GEOG 3601 or ATOC 3600 or ENVS 3600 or GEOG 1011 (all minimum grade D-).

Recommended: Prerequisites ATOC 1050 or ATOC 1060 or ATOC 3600 or GEOG 3601 or ENVS 3600 or GEOG 1001 and one semester calculus.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Physical Geography

GEOG 3351 (3) Biogeography

Surveys and analyzes plant and animal distributions on a world scale from ecological and historical perspectives. Emphasizes human impact on species.

Requisites: Requires prerequisite course of GEOG 1001 (minimum grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 3402 (3) Natural Hazards

Explores the impacts of extreme geophysical events on human society. Emphasizes adaptations to extreme events and ways of reducing vulnerability and damage.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3412 (3) Conservation Practice and Resource Management

Studies policy and management of natural resources. Emphasizes practical approaches to the conservation and management of soil, land, water and air resources.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3422 (3) Political Ecology

Introduces students to political ecology, an influential approach to understanding society-environment relationships. Explores issues including different philosophies of nature and wilderness, the politics of conservation, causes of environmental degradation, environmental conflict and indigenous ecological knowledge.

Recommended: Prerequisite GEOG 1972.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3511 (4) Introduction to Hydrology

Examines hydrologic processes in the surface environment, emphasizing the environment of the western United States. Emphasizes natural processes and their management to augment water resources.

Requisites: Requires a prerequisite course of GEOG 1011 or GEOL 1010 (minimum grade D-).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Physical Geography

GEOG 3601 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3600 and ENVS 3600

Requisites: Restricted to Geography (GEOG) or Environmental Studies (ENVS) majors or Atmospheric Oceanic Sciences (ATOC) minors only.

Recommended: Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Physical Geography

GEOG 3612 (3) Geography of American Cities

Introduces geography of American cities. Includes demographic and ideological contexts of urban development, emergence of the city system, location theory and rent models, and urban-economic problems.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3662 (3) Economic Geography

Presents theories of the spatial organization of economic production, consumption and exchange systems. Geographical dynamics of industrialization, urbanization and economic growth. Examination of property, labor and social conflict, with a focus on political economy.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3672 (3) Gender and the Global Economy

Examines the role of gender in global economy. Explores the impacts of colonialism and modern global economy on gender relations, with particular emphasis on Third World societies. Also focuses on related issues of population politics, environmental crisis, women's sexual exploitation, and women's social movements worldwide.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3672

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Human and Cultural Geography

GEOG 3682 (3) Geography of International Development

Compares and contrasts global characteristics and processes of development, emphasizing the developing countries of the world. Integrates theories of development, specific development topics, and case studies to explore the problems of development.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 3692 (3) Introduction to Global Public Health

Introduces global health by putting its contemporary definition, determinants, development and direction as a field into a broad global context. The course is divided into four core topics: 1) the burden and distribution of disease and mortality; 2) the determinants of global health disparities; 3) the development of global health policies; and 4) the outcomes of global health interventions. Required for the Public Health Certificate.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3742 (3) Place, Power, and Contemporary Culture

Presents a radical reexamination of the geography of culture. Examines the relationship between places, power, and the dynamics of culture. Explores how the globalization of economics, politics, and culture shapes local cultural change. Looks at how place-based cultural politics both assist and resist processes of globalization.

Recommended: Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Human and Cultural Geography

GEOG 3812 (3) Mexico, Central America, and the Caribbean

Introduces the geography of Latin America, focusing on the lands and peoples of Mexico, Central America, and the Caribbean. Examines regional and national culture, history, environment, and population, as well as ongoing environmental and socioeconomic changes.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3822 (3) Geography of China

Surveys the world's most populous country, examining physical and historical geography, urbanization and regional development, agriculture, population, energy, and the environment. Seeks to situate China's development in a broader Asian and global context.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Human and Cultural Geography
Departmental Category: Asia Content

GEOG 3832 (3) Geographies of South Asia

Examine the geographies of South Asia through four interrelated themes: Territory, Trade, Transportation, and Tributaries. Learn about territory including physical features, political conflicts and changing borders. Explore trade, transportation routes, and tributaries to understand economic, social/cultural and political geographies. Investigate culture and society through analyses of gender roles/relations.

Recommended: Prerequisites GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 3840 (1-6) Undergraduate Independent Study

Provides an independent study opportunity, by special arrangement with faculty, for students presenting strong geography preparation. Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Geography (GEOG) majors only.

GEOG 3842 (3) Human Geography of Czechia: Political, Economic and Social Transitions

Excursions in Prague will begin with an understanding of Czech history through various imprints on the landscape, such as city planning, design, architecture and culture. This will be followed by a discussion of Prague in the 20th century and the various political, economic and social transitions. These transitions will be explored through field based study in and outside of Prague.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3862 (3) Geography of Africa

Studies physical and cultural regions of Africa. Analyzes and compares the development of present nation-states and contemporary geographic issues including globalization, conservation, public health and food security.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 3882 (3) Geography of the Former Soviet Union

Examines the contemporary social, political, population, cultural, ethnic and resource geography of the former Soviet Union. Relations between Russia and neighboring countries are also considered. Historical and physical geography are introduced as background to understanding post-Soviet developments and challenges.

Grading Basis: Letter Grade

GEOG 3930 (3) Internship

Provides an academically supervised opportunity for advanced geography or environmental studies majors to work in public and private organizations on projects related to the student's career goals and to relate classroom theory to practice. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Geography (GEOG) or Environmental Studies (ENVS) majors only.

GEOG 4023 (4) Introduction to Quantitative Methods in Human Geography

Introduces fundamental statistical and quantitative modeling techniques widely used in geography today. Emphasizes geographic examples and spatial problems, as are statistical routines now available on most computers.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5023

Requisites: Requires prerequisite course of GEOG 3023 (minimum grade D-).

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4043 (4) Cartography 2: Interactive and Multimedia Mapping

An advanced course in interactive, multimedia, animated and Web-based cartography stressing the important role digital cartography plays in cyberspace. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5043

Requisites: Requires prerequisite course of GEOG 3053 (minimum grade C-).

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5093 and GEOL 4093 and GEOL 5093

Requisites: Requires prerequisite course of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (minimum grade D-).

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4100 (1-3) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4110 and GEOG 4120.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

GEOG 4103 (4) Introduction to Geographic Information Science

Examines construction and use of an information system and its data specifically designed for representing and manipulating geographical data. Emphasizes modern geographical information systems including computer hardware/software with a collection of methods/procedures for recording, transforming, storing/retrieving, analyzing, and mapping geographic data.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5103

Requisites: Requires prereq crs of GEOG3053 ANTH4000 or APPM4570 or BCOR1020 or ECON3818 or GEOG3023 or GEOL3023 or MATH2510 or PSCI2075 or PSYC2111 or SOCY2061 or 4061 (all min grade C-).

Restricted to students with 57-180 credits (JR/SR) ENVS or GEOG mjrs only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4110 (1-4) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and GEOG 4120.

Repeatable: Repeatable for up to 8.00 total credit hours.

GEOG 4120 (1-3) Special Topics in Geography

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. See also GEOG 4100 and GEOG 4110.

Repeatable: Repeatable for up to 6.00 total credit hours.

GEOG 4173 (3) Research Seminar

Examines the nature of research and develops pregraduate skills for geographic research, emphasizing problem definition, methods, sources, data interpretation, and writing. Recommended for students pursuing honors.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Geography (GEOG) or Environmental Studies (ENVS) majors only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4201 (3) Biometeorology

Interdisciplinary science, studying the interactions between atmospheric processes and living organisms (plants, animals, and humans).

Discusses how organisms adapt to a changing environment. Uses a practical, problem-solving approach to explore these interactions.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4201

Requisites: Requires prereq of GEOG 1001 any of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (min grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 4203 (4) Geographic Information Science: Modeling Applications

Extends basic GIS concepts and mechanics. Develop GIS models for human and environmental applications. Grid and vector data models, tessellated and hierarchical data structures, terrain representation, interpolation and kriging, spatial regression. Small group projects design, implement and run GIS models.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5203

Requisites: Requires prerequisite course of GEOG 4103 (minimum grade C-).

Recommended: Requisite working knowledge of GIS software.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4241 (4) Principles of Geomorphology

Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4241

Requisites: Requires prereq crs GEOG 1011 or GEOL 1010 or 1020 or 1030 or 1040 or 1060 and APPM 1340 and 1345 or APPM 1350 or ECON 1088 or MATH 1081 or 1300 or 1310 (min grade D-). Restricted to students with 57-180 credits (Jr/Sr) EVOC, GEOG, GEOL, ENVS mjrs only

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Physical Geography

GEOG 4251 (4) Fluvial Geomorphology

Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5251

Requisites: Requires prerequisite courses of GEOG 1011 and GEOG 3511 (minimum grade D-).

Recommended: Prerequisite GEOG 3023.

Additional Information: Departmental Category: Physical Geography

GEOG 4261 (3) Glaciers and Permafrost

Surveys the major terrestrial components of the cryosphere, including permafrost, glaciers and ice sheets. Emphasizes physical processes involving ice, including thermal behavior, ice deformation and mass balance, but also considers biogeochemical processes and landforms associated with ice. The climate context, including human interactions and recent climate history, will be considered. Taught in a combination lecture-seminar format.

Requisites: Requires prerequisite course of GEOG 1011 or GEOL 1010 (minimum grade D-).

Recommended: Prerequisite GEOG 4241.

Additional Information: Departmental Category: Physical Geography

GEOG 4271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5271

Requisites: Requires prerequisite course of GEOG 1001 or ATOC 1050 or ATOC 1060 (minimum grade D-).

Recommended: Prerequisites GEOG 3511 or GEOG 3601 or ATOC 3600 or ENVS 3600 and statistics.

Additional Information: Departmental Category: Physical Geography

GEOG 4292 (3) Migration, Immigrant Adaptation, and Development

Examines historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5292 and ECON 4292

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4303 (4) GIS Programming for Spatial Analysis

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data. Covers concepts, principles and techniques of programming and solving spatial problems in physical and human geography.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5303

Requisites: Requires prerequisite course of GEOG 4103 (minimum grade C-).

Recommended: Prerequisite GEOG 4203.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 4311 (3) Watershed Biogeochemistry

Emphasizes terrestrial-aquatic linkages in headwater catchments, focusing on hydrologic pathways, isotopic and geochemical tracers, nutrient cycling, water quality, experimental manipulations, and modeling.

Requisites: Requires prerequisite courses of GEOG 1011 and GEOG 3511 (minimum grade D-).

Recommended: Requisite parametric statistics.

Additional Information: Departmental Category: Physical Geography

GEOG 4321 (3-4) Snow Hydrology

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5321

Requisites: Requires prerequisite course of APPM 1340 1345 or APPM 1350 or 4570 or ECON 1088 or 3818 or MATH 1081 or 1300 or 1310 or 2510 or ANTH 4000 or BCOR 1020 or GEOG 3023 or GEOL 3023 or PSCI 2075 or PSYC 2111 or SOCY 2061 or 4061 (minimum grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 4331 (3-4) Mountain Climatology

Surveys and analyzes climatic characteristics of mountain environments worldwide.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5331

Requisites: Requires prerequisite course of GEOG 1001 or ATOC 1050 or ATOC 1060 (minimum grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 4371 (3) Forest Geography: Principles and Dynamics

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5371

Requisites: Requires prerequisite course of GEOG 1001 (minimum grade D-).

Additional Information: Departmental Category: Physical Geography

GEOG 4401 (3) Soils Geography

Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5401

Requisites: Requires prerequisite course of GEOG 1011 (minimum grade D-).

Recommended: Prerequisite inorganic chemistry.

Additional Information: Departmental Category: Physical Geography

GEOG 4403 (3) Space Time Analytics

Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands on, flipped classroom approach with in-class development of technical skills.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5403

Requisites: Requires a prerequisite course of GEOG 3023 or GEOG 4023 (minimum grade C-).

GEOG 4430 (3) Seminar: Conservation Trends

Provides environmental studies or geography majors with an undergraduate format for interdisciplinary discussion and research into current and future directions of conservation.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEOG 4463 (3) Earth Analytics Data Science Bootcamp

Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5463

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

GEOG 4501 (3) Water Resources and Water Management of Western United States

Interprets and analyzes hydroclimatic data, surface and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5501

Additional Information: Departmental Category: Physical Geography

GEOG 4503 (3) GIS and Geospatial Project Management

Managing a geospatial project encompasses problem design, analysis and team dynamics. The class mixes lectures and class exercises with student-selected projects. Lectures run concurrent with projects, working through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5503

Requisites: Requires prerequisite course of GEOG 3053 or GEOG 4103 (minimum grade C-).

GEOG 4563 (3) Earth Analytics

Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (<http://www.colorado.edu/grandchallenges/>) to use our expertise in space-based observation to address our world's most pressing problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5563

Requisites: Requires prereq course of APPM 1340 and 1345 or one of following: GEOG 4023, 4103, 3023, APPM 1350, 4570, ECON 1088, 3818, MATH 1081, 1300, 1310, 2510, 3510, ANTH 4000, BCOR 1020, GEOL 3023, PSCI 2075, PSYC 2111, SOCY 2061 or EBIO 4410 (min grade C).

Grading Basis: Letter Grade

GEOG 4603 (3) GIS in the Social and Natural Sciences

Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5603

GEOG 4622 (3) City Life

Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5622

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4632 (3) Development Geography

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5632

Requisites: Requires prerequisite course of GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 (minimum grade D-).

Recommended: Prerequisite GEOG 3682.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4712 (3) Political Geography

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5712

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992 or IAFS 1000 or PSCI 2012 or PSCI 2223.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4722 (3) Field Methods in Human Geography

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5722

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4732 (3) Population Geography

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5732

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4742 (3) Topics in Environment and Society

Studies peoples and their environments, including human modification of nature and cultural interpretation and construction of rural and urban landscapes.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4762 (3) Geographies of Political Islam: Empire, Terror and Revolution

Explores the postcolonial landscape of political Islam through the lens of political and cultural geography. Develops a critical anti-essentialist framework for understanding the political crisis of the Muslim world in relation to broader questions of empire, nationalism, democracy, revolution, security, terrorism, globalization and modernity. Focuses on the post-1979 period, several key Muslim nation-states (Saudi-Arabia, Egypt, Iran, Turkey, Pakistan) and movements (Taliban, ISIS).

Recommended: Prerequisite GEOG 1982 or GEOG 1992 or GEOG 3742.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4812 (3) Environment and Development in South America

Presents theoretical approaches to the links between environment and development in Latin America and focuses on analytical discussion of contemporary (and controversial) issues in sustainable development in South America. Examines social, ecological, economic, and political forces influencing the use of natural resources.

Recommended: Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or GEOG 3812 or GEOG 3422 or ANTH 3110 or PSCI 3032.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4822 (3) Environment and Development in China

Examines key environmental problems in relation to China's rapid modernization and development.

Recommended: Prerequisite GEOG 1962 or GEOG 1982 or GEOG 1992 or HIST 1618.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 4832 (3) Geography of Tibet

Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5832

Recommended: Prerequisite GEOG 3822 or other classes on China.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 4852 (3) Health and Medical Geography

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 5852

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites GEOG 1001 or GEOG 1011 and GEOG 1962 or GEOG 1972 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4892 (3) Geography of Western Europe

Provides a regional survey of cultural, political, economic, social, and physical geography of Western Europe, emphasizing the distinctive character and problems of each major area and the relationship of the region to the world.

Recommended: Prerequisite GEOG 1962 or GEOG 1972 or GEOG 1982 or GEOG 1992.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 4990 (3) Senior Thesis

Offers thesis research under faculty supervision. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Geography (GEOG) majors only.

GEOG 5003 (4) Elements of Geographic Information Systems

Discusses incorporating GIS methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite some experience with Mac or Windows.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5023 (4) Introduction to Quantitative Methods in Human Geography

Introduces fundamental statistical and quantitative modeling techniques widely used in geography today. Emphasizes geographic examples and spatial problems, as are statistical routines now available on most computers.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4023

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5043 (4) Cartography 2: Interactive and Multimedia Mapping

An advanced course in interactive, multimedia, animated and Web-based cartography stressing the important role digital cartography plays in cyberspace. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4043

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4093 and GEOL 4093 and GEOL 5093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5100 (1-4) Special Topics: Geography

Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5103 (4) Geographic Information Systems

Examines construction and use of an information system and its data specifically designed for representing and manipulating geographical data. Emphasizes modern geographical information systems including computer hardware/software with a collection of methods/procedures for recording, transforming, storing/retrieving, analyzing, and mapping geographic data.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4103

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5113 (3) Seminar: Geographic Information Systems

Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4103 or GEOG 5103 or instructor consent required.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5152 (3) History and Theory of Geography

History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography.

Requisites: Restricted to Geography (GEOG) graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5161 (3) Research Design in Geography

The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas.

Requisites: Restricted to Geography (GEOG) graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5203 (4) Geographic Information Science: Modeling Applications

Extends basic GIS concepts and mechanics. Develop GIS models for human and environmental applications. Grid and vector data models, tessellated and hierarchical data structures, terrain representation, interpolation and kriging, spatial regression. Small group projects design, implement and run GIS models.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4203

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4103 or GEOG 5103 or working knowledge of GIS software or instructor consent required.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5211 (3) Seminar: Physical Climatology

Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5221 (3) Synoptic and Dynamic Climatology

Examines global climates from the standpoint of synoptic and dynamic climatology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5241 (1-3) Topics in Physical Geography

Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5251 (4) Fluvial Geomorphology

Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4251

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4271

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5292 (3) Migration, Immigrant Adaptation, and Development

historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4292 and ECON 4292

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5303 (4) GIS Programming for Spatial Analysis

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data. Covers concepts, principles and techniques of programming and solving spatial problems in physical and human geography.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4303

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 5321 (3-4) Snow Hydrology

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4321

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5331 (3-4) Mountain Climatology

Surveys and analyzes climatic characteristics of mountain environments worldwide.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4331

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5371 (3) Forest Geography: Principles and Dynamics

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4371

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5391 (3) Seminar: Biogeography

Considers in detail current research themes in biogeography. Includes intensive reading of current research literature and preparation of research papers. Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5401 (3) Soils Geography

Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4401

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5403 (3) Space Time Analytics

Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands on, flipped classroom approach with in-class development of technical skills.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4403

Requisites: Restricted to graduate students only.

GEOG 5463 (3) Earth Analytics Data Science Bootcamp

Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4463

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5501 (3) Water Resources and Water Management of Western United States

Interprets and analyzes hydroclimatic data, surface and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4501

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5503 (3) GIS and Geospatial Project Management

Managing a geospatial project encompasses problem design, analysis and team dynamics. The class mixes lectures and class exercises with student-selected projects. Lectures run concurrent with projects, working through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4503

Requisites: Requires prerequisite course of GEOG 5103 (minimum grade C-).

GEOG 5563 (3) Earth Analytics

Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (<http://www.colorado.edu/grandchallenges/>) to use our expertise in space-based observation to address our world's most pressing problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4563

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5603 (3) GIS in the Social and Natural Sciences

Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4603

GEOG 5622 (3) City Life

Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4622

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5632 (3) Development Geography

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4632

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5642 (3) Seminar: Urban Geography

Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5652 (3) Introduction to Social Theory

Surveys theoretical paradigms in the social sciences. Includes canonical works from the history of the social sciences as well as contemporary theorists. Appropriate for beginning to advanced graduate students doing qualitative research.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5662 (3) Seminar: Topics in Economic Geography

Covers selected topics emphasizing faculty specialties. Topics vary with instructor. Check with department for semester offerings.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5663 (3) Earth Analytics Applications

Develop expertise in finding, organizing, managing and processing large, heterogeneous, spatio-temporal data to address a real-world problem.

Students will work collaboratively on semi-guided science project.

Students gain critical skills required to understand data structures, utilize APIs, extract insight from data and understand how uncertainty propagates. Culminates with a formal presentation of project results.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites GEOG 4463 or GEOG 4563 or GEOG 5463 or GEOG 5563.

Grading Basis: Letter Grade

GEOG 5712 (3) Political Geography

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4712

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5722 (3) Field Methods in Human Geography

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4722

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5732 (3) Population Geography

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4732

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5782 (3) Sustainable Development: Critique

Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5832 (3) Geography of Tibet

Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4832

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

Departmental Category: Asia Content

GEOG 5840 (1-3) Graduate Independent Study

Offers independent research for master's students only. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5852 (3) Health and Medical Geography

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4852

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 5930 (3) Advanced Internship

Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5961 (3) Theories of Climate and Climate Variability

Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 6180 (1-3) Seminar: Geographic Problems

Applies research methods to selected problems. Topics vary with instructor.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6211 (1-3) Readings in Climatology

Discusses selected topics in current climatological literature. Specific themes vary.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 6402 (3) Seminar: Political Ecology

Critically examines the politics of human-environment relationships across cultures and societies. Focuses on environmental degradation, change and management from the perspectives including political economy, cultural politics, STS and post structural theory.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 6443 (2) Remote Sensing Field Methods

Theory and practical field measurements for validation of airborne and spaceborne spectral image acquisition. Emphasizes radiative scattering properties of soil, vegetation, cryosphere and atmosphere. Focuses on characterization and calibration of instrumentation to measure these properties.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6440

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 5093 or GEOL 5093.

Additional Information: Departmental Category: Techniques (Skills)

GEOG 6712 (3) Seminar: Political Geography

Considers in detail history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 6732 (3) Formal Population Geography: Analysis and Forecasting

In-depth introduction to formal demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration and forecasting/projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 5023.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 6742 (3) Seminar: Cultural Geography

Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Human and Cultural Geography

GEOG 6940 (1) Master's Degree Candidate

Instructor consent required.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

GEOG 6950 (1-6) Master's Thesis

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 7840 (1-3) Graduate Independent Study

Offers independent research for doctoral students only. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Instructor consent required.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Geological Sciences (GEOL)

Courses

GEOL 1010 (3) Introduction to Geology

Introductory geology for majors and non-majors. Studies Earth, its materials, its characteristics, its dynamic processes, and how it relates to people. Separate lab (GEOL 1030) is recommended.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Natural Science

GEOL 1020 (3) Introduction to Earth History

Examines how Earth's interior and surface, the atmosphere and climate, the oceans, and life interact and have changed over the immensity of geologic time. For majors and non-majors. Separate lab (GEOL 1030) is recommended.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 1040

Requisites: Requires prerequisite course of GEOL 1010 (minimum grade D-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 1030 (1) Introduction to Geology Laboratory 1

Features field trips to local points of geologic interest. Studies rocks and topographic and geologic maps. Meets the MAPS requirement for natural science lab, if taken with GEOL 1010.

Recommended: Requisite prior or current registration in 1000-level geology course.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science Lab or Lab/Lec

GEOL 1040 (3) Geology of Colorado

Reviews the geologic evolution and history of Colorado. It first develops the basic concepts needed to interpret the geology and then systematically shows how the state evolved through geologic time. Designed for those who enjoy understanding the beauty and splendor of the state.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 1020

Additional Information: Arts Sci Core Curr: Natural Science Sequence

GEOL 1060 (3) Global Change: An Earth Science Perspective

Focuses on evidence for planetary warming, climate change, glacier and ice-sheet melting and sea level rise both now and in the recent past.

Attempts to develop understanding of the interactions within the coupled Earth system that regulate such changes. Utilizes examples from the geological and instrumental records, and evaluates the global warming forecast. Department enforced prerequisite: GEOL 1010 (minimum grade D-).

Equivalent - Duplicate Degree Credit Not Granted: ATOC 1060

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Natural Science

GEOL 2001 (4) Planet Earth

Explores the dynamics of planet Earth with particular emphasis on the factors that make the planet habitable. Includes examination of heat balance, hydrology, geomorphology, biogeochemistry and climate history through both lecture and lab-based activities. Required for the Geology major, introduces students to the major concepts in contemporary Earth system science.

Requisites: Requires prerequisite course of GEOL 1010 or GEOL 2100 or ENVS 1000 (minimum grade D-).

GEOL 2005 (4) Introduction to Earth Materials

Provides introduction to the classification, composition and properties of the materials that compose the Earth, how these materials are studied, and how they are used to interpret Earth history and processes. Required for the Geology major.

Requisites: Requires prerequisite courses of GEOL 1010 or GEOL 2100 and CHEM 1113 and CHEM 1114 (all minimum grade D-).

GEOL 2040 (3) The Search for Life in the Universe

Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, including Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 2040

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 2100 (3) Environmental Geology

Introduces the influences of geologic processes on human lives and the changes human actions cause in geologic systems. Uses examples and case studies from Colorado and the West.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 2700 (2) Introduction to Field Geology

Introduces basic field techniques necessary to collect geologic data and samples, and necessary to map geologic units.

Requisites: Requires prerequisite courses of GEOL 1010 and GEOL 1030 and GEOL 2005 (all minimum grade D-).

GEOL 3010 (3) Introduction to Mineralogy

Covers origin, occurrence, identification, classification, and uses of minerals with emphasis on applications of mineralogy to economic geology and petrology. Two lectures and one lab per week.

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 and GEOL 2005 and MATH 1300 or APPM 1350 (all minimum grade D-).

Recommended: Prerequisite GEOL 2005.

GEOL 3020 (3) Petrology

Studies field relations, petrography, petrology, chemistry, and origins of igneous and metamorphic rocks by means of lectures, reading, and lab and field experience. Labs include instruction in the fundamentals of optical petrography and the study of rocks in thin section.

Requisites: Requires prerequisite course of GEOL 2005 or GEOL 3010 (minimum grade D-).

GEOL 3023 (4) Statistics for Geography

Introduces parametric and distribution-free statistics, emphasizing applications to earth science problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3023

GEOL 3030 (3) Introduction to Hydrogeology

Introduces groundwater flow concepts, hydrologic cycle, physical and chemical properties, flow net, hydraulic potential, geologic controls on heterogeneity and anisotropy, aquifers and aquitards in a geologic system, saturated and unsaturated flow, flow to a well, pumping tests, and role of groundwater in geologic processes.

Requisites: Requires prerequisite courses of GEOL 1010 and MATH 1300 or APPM 1350 (all minimum grade D-).

GEOL 3040 (3) Global Change: The Recent Geological Record

Geological records in lakes, oceans, deserts, and around glaciers indicate the significant changes in the global systems that have taken place over the last few hundred or thousand years. Explores the timing and nature of these changes. Department enforced prerequisites: any two-course sequence of natural science core courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4070

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 3050 (2) GIS for Geologists

Provides an introduction to Geographic Information Systems (GIS) techniques focused on geological applications. Covers GIS analyzing, mapping and GPS use. Basic computer skills are a plus before entering the class.

GEOL 3070 (3) Introduction to Oceanography

Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3070

Recommended: Prerequisite any 1000-level ATOC or GEOL course or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 3090 (3) Developing Scientific Writing Skills

Focuses on the development of scientific writing skills. Enhances student ability to write professionally, revise text and review the work of others. Writing assignments integrate the subject matter of different topics in earth science. Department enforced prerequisites: a lower division writing course and one of the following: GEOL 2001 or GEOL 2005 or GEOL 2700 or GEOL 3010 or GEOL 3030 or GEOL 3120 or GEOL 3320 or GEOL 3430 or GEOL 3820.

Additional Information: Arts Sci Core Curr: Written Communication

GEOL 3120 (4) Structural Geology

Introduces the basic principles and processes involved in deformation of natural rocks and minerals and the techniques used to analyze a variety of common geological structures (e.g., fractures, folds, fault zones).

Requisites: Requires prerequisite course of GEOL 1010 and GEOL 2005 (minimum grade D-).

Recommended: Prerequisite GEOL 2001.

GEOL 3130 (3) Global Warming: Understanding the Forecast

Uses the example of man-made climate change to develop an analytical understanding of the Earth system (solid, fluid, and living) that can be used to interpret the complex and uncertain forecast. Emphasis is given to the concepts of forcing, feedback and response in order to examine natural vs. man-made environmental changes and climate change mitigation strategies.

GEOL 3300 (3) Extraterrestrial Life

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; the possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 3300

GEOL 3320 (3) Introduction to Geochemistry

Introduces chemical principles as applied to geologic processes. Includes an introductory discussion of mineral and rock chemistry, aqueous geochemistry, and organic geochemistry.

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 and MATH 1300 or APPM 1350 (all minimum grade D-).

GEOL 3410 (3) Paleobiology

Surveys morphology, ecology and evolution of ancient animal and plant life and their interactions on Earth. Fossils used to solve geological and biological problems. Department enforced prerequisites: GEOL 1010 and GEOL 1020 or GEOL 2005 or EBIO 1030 and EBIO 1040 or EBIO 1210 and EBIO 1220.

GEOL 3430 (4) Sedimentology and Stratigraphy

Introduces the study of sedimentary rocks emphasizing their origin, characteristics, and interpretation; and the principles and techniques for establishing the temporal order and spatial distribution of sedimentary layers.

Requisites: Requires prerequisite course of GEOL 2005 or GEOL 3010 (minimum grade D-).

Additional Information: Departmental Category: Geology

GEOL 3520 (3) Energy & Climate Change: An Interdisciplinary Approach

Examines sources of energy and other resources in light of their availability, use, environmental impact, as well as their impact on policy, economics and values. As fossil fuels are the dominant energy source today, particular emphasis is placed on climate impacts and the carbon cycle. All material is assessed through the lenses of the physical sciences, policy, ethics and economics. Department enforced prerequisite: a two-course sequence in any natural science.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3520

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

GEOL 3540 (3) Introduction to Petroleum Geology

Discusses the origin and distribution of conventional and unconventional petroleum resources, source rocks, types of traps and seals, reservoir rock properties, exploration methods (seismic data analysis and interpretation, formation evaluation, subsurface mapping), reservoir characterization and modeling, reserves calculations. Department enforced prerequisite: GEOL 1010.

Recommended: Corequisite GEOL 3430.

Additional Information: Departmental Category: Geology

GEOL 3720 (3) Evolution of Life: The Geological Record

Discusses the evolution of life on Earth, beginning with the earliest origins and surveying the major steps that led to the rise of higher plants and animals. Covers modern ideas on the causes of periodic mass extinctions in both the marine and terrestrial realms. Emphasizes geologic evidence for the pathways of evolution, using examples from the ordinary to the bizarre.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

GEOL 3820 (4) The Fluid Earth

Examines the myriad forms of fluid behavior found on Earth, from the atmosphere to the inner core. Explores how basic principles of fluid physics may be used to understand a broad range of earth processes, including mantle convection, atmosphere and ocean dynamics, stream flow, lava spreading, and glacier motion, among others. Covers fundamental fluid concepts such as viscosity, pressure, convection, friction, and free-surface flow. Department enforced prerequisites: MATH 1300 or APPM 1340 and APPM 1345 or APPM 1350.

Recommended: Prerequisites GEOL 1010 and PHYS 1110.

GEOL 3930 (1-6) Internship

Offers an academically supervised opportunity for geological sciences majors to work with public or private organizations. Projects are usually associated with students' career goals; each project has an academic emphasis. Department enforced prerequisites: restricted to students with 57-180 credits (Juniors or Seniors) and completion of at least two courses (minimum grade B) for geology majors.

GEOL 3950 (3) Natural Catastrophes and Geologic Hazards

Surveys historic and prehistoric natural disasters, their cause and potential for recurrence. Meteorite impact, earthquakes, volcanic eruptions, tsunamis, landslides, floods, magnetic reversals and major extinction events. Department enforced prerequisite: one year of science.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

GEOL 4060 (4) Oceanography

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data. Department enforced prerequisite: one semester chemistry or physics or geology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5060

GEOL 4070 (3) Paleoclimatology

Covers the primary forcings and feedbacks that determine Earth's energy balance and the resultant climate system on decadal to millennial time scales. Covers ocean/atmosphere circulation, the role of ice sheets in the climate system, monsoons, Holocene climate change and 20th Century warming. Includes coverage of the proxies available to reconstruct climates of the past and the archives that contain these proxies. Department enforced prerequisite: environmental science or geology introduction sequence courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3040

Recommended: Prerequisite natural science majors only.

GEOL 4093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors, as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5093 and GEOG 4093 and GEOG 5093

GEOL 4130 (3) Principles of Geophysics

Provides an introduction to fundamental geophysics including seismology, geomagnetism, gravity, radiometric dating, and heat flow with applications to plate tectonics and exploration of the subsurface.

Requisites: Requires prerequisite courses of MATH 1300 or APPM 1350 and PHYS 1110 and GEOL 1010 (all minimum grade D-).

GEOL 4150 (2) Planetary Field Geology

Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5150

GEOL 4160 (3) Introduction to Biogeochemistry

Covers fundamentals of biogeochemical cycling, emphasizing water, carbon and nutrient dynamics in terrestrial ecosystems; chemical interactions of atmosphere, biosphere, lithosphere and hydrosphere; natural and human-managed environments. Department enforced prerequisites: GEOL 3320 or EBIO 3270 and CHEM 1011.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4160 and ENVS 4160

GEOL 4215 (3) Geochronology and Thermochronology

Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5215

GEOL 4241 (4) Principles of Geomorphology

Studies weathering, mass-wasting, fluvial, wind, and marine processes and the resulting landforms.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4241

Requisites: Requires prerequisite course of GEOG 1011 or GEOL 1010 and MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade D-).

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

GEOL 4270 (3) Marine Chemistry and Geochemistry

Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO₂; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5270

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites introductory chemistry, introductory geology, introductory oceanography.

GEOL 4330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: upper-division undergraduate standing in physical science and upper-division undergraduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5330 and ASTR 4330 and ASTR 5330

GEOL 4474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups. Department enforced prerequisites: GEOL 1010 and GEOL 1020 and GEOL 3410.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5474

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEOL 4500 (3) Critical Thinking in the Earth Sciences

Deals with controversies within the broad realm of geological sciences, including planetary geology, evolution, paleobiology, global change, environmental issues, plate tectonics, resources, other societal problems, or geologic thought in general. Students are provided the opportunity to analyze and debate scientific issues in the earth sciences. Department enforced prerequisites: GEOL 1010 and GEOL 1030 and GEOL 2001 or GEOL 2005 or GEOL 2700 (minimum grade D-).

Repeatable: Repeatable for up to 6.00 total credit hours.

GEOL 4550 (3) Petroleum Reservoir Characterization and Modeling

Introduces concepts and methods of petroleum reservoir analysis and 3-D reservoir modeling using subsurface data (cores, well logs, 3-D seismic) and outcrop analogs. Examines petroleum system, petrophysics (lithology, porosity, permeability, capillary pressure, flow units), and sequence-stratigraphic, facies, and structural controls on reservoir properties, heterogeneity and recovery efficiency. Deterministic and stochastic reservoir modeling methods are addressed. Department enforced prerequisites: GEOL 1010 and GEOL 3430.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5550

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEOL 4670 (3) Isotope Geology

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5670

Requisites: Requires prerequisite a course of MATH 1300 or APPM 1350 (minimum grade D-).

GEOL 4675 (3) Stable Isotopes in Paleoclimate and Paleoecology

Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5675

Grading Basis: Letter Grade

GEOL 4700 (1-4) Special Geological Topics

Studies in selected geological subjects of special current interest (for undergraduates).

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

GEOL 4711 (2) Igneous and Metamorphic Field Geology

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units.

Requisites: Requires prerequisite courses of GEOL 3020 and GEOL 2001 or GEOL 2700 (all minimum grade D-).

GEOL 4712 (2) Structural Field Geology

Explores methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape.

Requisites: Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D-).

GEOL 4714 (2) Field Geophysics

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic, and electrical measurements.

Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110 (all minimum grade D-).

GEOL 4715 (2) Field Techniques in Hydrogeology

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography, and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring stream flows, interpreting aquifer parameters from geophysical measurements, and using field data for water budget analysis.

Requisites: Requires prerequisite courses of GEOL 3030 and GEOL 2001 or GEOL 2700 (all minimum grade D-).

GEOL 4716 (2) Environmental Field Geochemistry

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters, and atmospheric particulates.

Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3320 and CHEM 1011 and CHEM 1031 or CHEM 1113 and CHEM 1133 (all minimum grade D-).

GEOL 4717 (2) Field Seminar in Geology and Tectonics

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S.

Requisites: Requires prerequisite courses of GEOL 2001 or GEOL 2700 and GEOL 3120 or GEOL 3320 or GEOL 3430 or GEOL 4241 (all minimum grade D-).

GEOL 4721 (2) Field Methods in Active Tectonics

Analysis of active geologic structures, including strike slip fault systems, secondary structures in stepovers and related eruptive centers. Includes the use of digital imagery, elevation models, offset geomorphic features and Quaternary deposits to determine local deformation rates and their relation to plate motions.

Requisites: Requires prerequisite courses of GEOL 2700 and GEOL 3120 (all minimum grade D-).

Recommended: Prerequisite GEOL 4712.

GEOL 4725 (1-4) Field Based Special Topics in Geoscience

Explores selected geological subjects of special interest in a field setting.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5725

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

GEOL 4840 (1-3) Independent Study in Geology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4841 (1-3) Independent Study-Economic Geology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4842 (1-3) Independent Study-Petrology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4843 (1-3) Independent Study-Sedimentology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4844 (1-3) Independent Study-Structure/Tectonics

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4845 (1-3) Ind Stdy-Geochemistry

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4846 (1-3) Independent Study-Geophysics

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4847 (1-3) Independent Study-Hydrology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4849 (1-3) Independent Study-Paleontology

Time and credit to be arranged. For advanced undergraduates who have high scholastic standing. Open only upon consultation with department advisor. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 4851 (1-3) Independent Study in Geoscience Education

Repeatable: Repeatable for up to 3.00 total credit hours.

GEOL 4990 (1-3) Honors Thesis

Supervised project involving original research in any area of the geological sciences. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended. Must be accepted by the departmental honors committee. Department enforced prerequisite: minimum cumulative GPA of 3.30.

Additional Information: Arts Sciences Honors Course

GEOL 5001 (3) Physics and Chemistry of the Solid Earth

Reviews the physical and chemical characteristics of the solid earth, from the core to the crust, and the processes that govern behavior through the earth. Lectures are supplemented with readings from the recent literature. Topics include convection, phase transitions, melt generation, forces of plate tectonics, origin of continents and lithosphere, continental tectonics, and earthquakes.

Requisites: Restricted to graduate students only.

Recommended: Requisite a course in basic chemistry and a course in physics.

Additional Information: Departmental Category: Graduate Course

GEOL 5002 (3) Physics, Chemistry, and Biology of Sedimentary Systems

Reading and discussion of current issues and themes in the stratigraphic sciences, including stratigraphic and facies analysis, spatial heterogeneity and self-organization, numerical modeling; origin, evolution, mass extinctions, and megatrajectories of life; and paleoceanographic and paleoclimatic signals in sedimentary rocks. Goal is to diversify students' understanding of the role of physics, chemistry, and biology in attacking research problems in sedimentary systems. Department enforced requisite, restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5060 (4) Oceanography

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4060

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5080 (3) Advanced Hydrogeology and Modeling Concepts

Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification and prediction.

Department enforced prerequisite: MATH 2300 or Fortran.

Additional Information: Departmental Category: Graduate Course

GEOL 5093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4093 and GEOG 4093 and GEOG 5093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5110 (3) Geomechanics

Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth's surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Department enforced prerequisite: restricted to graduate students only and a course in calculus.

Additional Information: Departmental Category: Graduate Course

GEOL 5150 (2) Planetary Field Geology

Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4150

Additional Information: Departmental Category: Graduate Course

GEOL 5215 (3) Geochronology and Thermochronology

Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4215

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5270 (3) Marine Chemistry and Geochemistry

Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO₂; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4270

Recommended: Prerequisites introductory chemistry, introductory geology, introductory oceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5280 (3) Aqueous and Environmental Geochemistry

Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations and microbial geochemistry. Department enforced prerequisite: GEOL 3320 or 1 year of college chemistry.

Additional Information: Departmental Category: Graduate Course

GEOL 5305 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global scale measurements of element fluxes from satellites, aircraft and measurement networks. Department enforced prerequisite: restricted to graduate students only, general chemistry and some organic chemistry.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5840

Additional Information: Departmental Category: Graduate Course

GEOL 5330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4330 and ASTR 4330 and ASTR 5330

Additional Information: Departmental Category: Graduate Course

GEOL 5420 (3) Quaternary Dating Methods

Features in-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5430 (3) Paleoclimatology and Paleogeography

Examines scientific tools, data and theories related to the dramatically varied past climate of Earth. Focus will be on marine records of climate change and ocean circulation, but ice core and continental archives will also be discussed. Covers the Cretaceous Period to the present, with particular emphasis on the past 150,000 years (the last ice age cycle). Department enforced prerequisite: restricted to graduate students only and introductory geology and introductory oceanography or atmospheric science.

Additional Information: Departmental Category: Graduate Course

GEOL 5474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and MUSM 5474

Additional Information: Departmental Category: Graduate Course

GEOL 5550 (3) Petroleum Reservoir Characterization and Modeling

Introduces concepts and methods of petroleum reservoir analysis and 3-D reservoir modeling using subsurface data (cores, well logs, 3-D seismic) and outcrop analogs. Examines petroleum system, petrophysics (lithology, porosity, permeability, capillary pressure, flow units), and sequence-stratigraphic, facies, and structural controls on reservoir properties, heterogeneity and recovery efficiency. Deterministic and stochastic reservoir modeling methods are addressed.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4550

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5670 (3) Isotope Geology

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4670

Additional Information: Departmental Category: Graduate Course

GEOL 5675 (3) Stable Isotopes in Paleoclimate and Paleoecology

Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4675

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5690 (3) Tectonic History of the Western United States

Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarometry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class.

Requisites: Requires prerequisite courses of GEOL 3120 and PHYS 1110 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Course

GEOL 5700 (1-4) Geological Topics Seminar

Offers seminar studies in geological subjects of special current interest. Primarily for graduate students, as departmental staff and facilities permit.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5701 (2) Super-Problems in Quaternary Climate

Investigates major problems in the study and understanding of Quaternary climate variation, in seminar format. Each year one major topic will be addressed, such as: the physics and chemistry of the Ice Age ocean circulation; the theory and mechanics of glacial/interglacial atmospheric CO₂ change; the origins of the 20, 40, and 100 kyr orbital (Milankovitch) climate cycles. Department enforced prerequisites: introduction geology and climatology or oceanography and paleoclimatology or paleoceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5702 (1) Geomorphology Seminar

Explores the dynamics and forms of the earth's surface through critical reading and discussion of both classical and modern literature.

Repeatable: Repeatable for up to 10.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5703 (1) Seminar in Tectonics

Focuses on a wide variety of topics related to crust, mantle and whole earth tectonics. Published papers from recent peer-reviewed literature are read and discussed. The format and specific topics will vary each semester (e.g., a relatively focused theme or open format) and will in part be determined by the makeup of enrolled students. Department enforced prerequisite: restricted to graduate students only.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5711 (1-3) Igneous and Metamorphic Field Geology

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and GEOL 3020.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5712 (1-3) Structural Field Geology

Methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and GEOL 3020.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5714 (2) Field Geophysics

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic and electrical measurements. Department enforced prerequisite: restricted to graduate students only and GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5715 (1-3) Field Techniques in Surficial Geology and Geohydrology

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring steam flows, interpreting aquifer parameters from geophysical measurements and using field data for water budget analysis. Department prerequisite: GEOL 2001 or GEOL 2700.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5716 (1-3) Environmental Field Geochemistry

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters and atmospheric particulates. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and CHEM 1011 and CHEM 1031 or CHEM 1113 or CHEM 1133 and GEOL 3320.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5717 (1-3) Field Seminar in Geology and Tectonics

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and at least one of the following: GEOL 3120 or GEOL 3320 or GEOL 3430.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5725 (1-4) Field Based Special Topics in Geoscience

Explores selected geological subjects of special interest in a field setting.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4725

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5800 (3) Planetary Surfaces and Interiors

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5800

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres - past and future.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5810 and ASTR 5810

Additional Information: Departmental Category: Graduate Course

GEOL 5820 (3) Origin and Evolution of Planetary Systems

Considers the origin and evolution of planetary systems, including protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5820 and ATOC 5820

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and ASTR 5830

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5835 and ATOC 5835

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5840 (1-3) Independent Study-Quaternary Geology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5841 (1-3) Independent Study-Economic Geology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5842 (1-3) Independent Study-Petrology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5843 (1-3) Independent Study-Sedimentology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5844 (1-3) Independent Study-Structure/Tectonics

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5845 (1-3) Independent Study-Geochemistry

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5846 (1-3) Independent Study-Geophysics

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5847 (1-3) Independent Study-Hydrology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5849 (1-3) Independent Study-Paleontology

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5851 (1-3) Independent Study-Sediment Petrology

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5852 (1-3) Independent Study--GIS Applications in Quaternary Geosciences

Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.

Additional Information: Departmental Category: Graduate Course

GEOL 6050 (3) Space Instrumentation

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and ASEN 6050

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 6060 (4) Petroleum Geology of Turbidite Systems

Covers the exploration and production aspects of petroleum submarine fans and turbidite systems.

Requisites: Requires prerequisite course of GEOL 6330 (minimum grade B).

Additional Information: Departmental Category: Graduate Course

GEOL 6310 (3) Sedimentary Petrology

Covers interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Department enforced requisite, restricted to graduate students only. Department enforced prerequisites: GEOL 3010 and GEOL 3020 and GEOL 3430.

Additional Information: Departmental Category: Graduate Course

GEOL 6330 (4) Applied Sequence Stratigraphy and Basin Analysis

Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop and their applications to basin analysis in petroleum exploration.

Department enforced prerequisite: restricted to graduate students only and introductory undergraduate physics and sedimentology/stratigraphy.

Additional Information: Departmental Category: Graduate Course

GEOL 6610 (3) Earth and Planetary Physics 1

Offered alternate years. Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6610 and PHYS 6610

Additional Information: Departmental Category: Graduate Course

GEOL 6620 (3) Earth and Planetary Physics 2

Offered alternate years. Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6620 and PHYS 6620

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 6630 (3) Earth and Planetary Physics 3

Offered alternate years. Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6630 and PHYS 6630

Additional Information: Departmental Category: Graduate Course

GEOL 6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6650 and PHYS 6650

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 6670 (2) Geophysical Inverse Theory

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations. Department enforced prerequisites: a course in calculus and a course in computer programming (any language).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6670

Additional Information: Departmental Category: Graduate Course

GEOL 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Graduate Course

GEOL 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 6960 (3) Plan II Master's Research

Additional Information: Departmental Category: Graduate Course

GEOL 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

German (GRMN)

Courses

GRMN 1010 (4) Beginning German 1

Introduction to language and culture of the German-speaking world, with emphasis on the acquisition of basic communication skills in cultural context. For students with no previous training in German.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1030

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: German

GRMN 1020 (4) Beginning German 2

Continued development of German-language skills and cultural knowledge for effective communication. Emphasis on more complex language structures and sustained interactions. Department enforced prerequisite: GRMN 1010 (min grade of C-).

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1030

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: German

GRMN 1030 (5) Intensive Beginning German

Covers the same material as GRMN 1010 and GRMN 1020 in one course. Focuses on acquiring ability to understand and speak everyday German; on developing reading and writing skills; and on learning about the cultures of the German-speaking countries.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1010 and GRMN 1020

Additional Information: Departmental Category: German

GRMN 1500 (3) German for Reading Knowledge

Designed especially for graduate students. Emphasizes analytical skills for acquiring reading proficiency in specialized and technical German in one's field of research. Recommended for pass/fail registration. Does not satisfy the arts and sciences foreign language requirement. Does not count towards the German major.

Additional Information: Departmental Category: German

GRMN 1601 (3) Germany Today

Introduces the culture of contemporary German-speaking central Europe, examining historical processes, social and political patterns, and the intellectual and artistic responses to problems of the 20th and 21st centuries. Taught in English.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: German Courses Taught in English

GRMN 1602 (3) Metropolis and Modernity

An interdisciplinary introduction to the modern industrial city in Europe and the USA, with particular attention to the representation of urbanism in the visual arts. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 1701 (3) Nature and Environment in German Literature and Thought

Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green Party. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 1701

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 2010 (4) Intermediate German 1

Development of skills for independent use of German. Discussions, writing and listening/viewing activities that address topics of the contemporary German-speaking world. Department enforced prerequisite: GRMN 1020 or 1030 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2030

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: German

GRMN 2020 (4) Intermediate German 2

Development of communication skills and knowledge about recent social, cultural and political developments in German speaking countries through texts, media and film. Department enforced prerequisite: GRMN 2010 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2030

Additional Information: Departmental Category: German

GRMN 2030 (5) Intensive Intermediate German

Covers the same material as GRMN 2010 and GRMN 2020 in one semester. Offers review and continuation of basic skills begun in the first year: reading, writing, speaking and oral comprehensive. Department enforced prerequisite: GRMN 1020 or GRMN 1030 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2010 and GRMN 2020

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: German

GRMN 2301 (3) Inside Nazi Germany: Politics, Culture, and Everyday Life in the Third Reich

Examines social culture and everyday life in Nazi Germany. Topics include the role of propaganda in the media and entertainment industries, anti-Semitism and suppression of ethnic, social and religious minorities, the role of education and youth organizations, as well as the role of women, the churches, and the effects of a controlled economy before and during World War II. Taught in English.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: German Courses Taught in English

GRMN 2501 (3) Miniatures of Modern Life: Introduction to Short Fiction

Introduces students to short fiction from the 20th century. Focuses on issues and themes of modern life, such as: alienation and anxiety; cultures of spectatorship; gender roles, sexuality and social life; memory and nostalgia; technology, industry and capitalism; state power and revolution. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 2502 (3) Representing the Holocaust

Examines representations of the Holocaust in film, memoirs, poetry, novels, graphic novels, memorials. Considers questions such as: How to depict an event that resists representation? How does the memory of the Holocaust transform over generations? How do representations of the Holocaust inform our understanding of other experiences of racism and genocide? What ethical issues are at stake? Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 2502

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 2503 (3) Fairy Tales of Germany

Explores the origins, cultural significance, stylistic and thematic features of the German fairy tale, with emphasis on the Brothers Grimm; on artistic fairy tales by Goethe, Tieck, Brentano, and others; and, on modern retellings in literature and popular culture. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts

Departmental Category: German Courses Taught in English

GRMN 2601 (3) Kafka and the Kafkaesque

Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque by looking not only for traces of Kafka's influence in the verbal and visual arts, but also for traces left in Kafka's own work by his precursors in the literary tradition. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 2601

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts

Departmental Category: German Courses Taught in English

GRMN 2603 (3) Moral Dilemmas in Philosophy and Literature

Examines the moral dilemmas that arise when opportunities afforded by basic freedoms or advances in technology clash with the ethical imperatives that issue from the Enlightenment and the social contract. Guiding questions include: When does the quest for knowledge legitimate transgression of prevailing morality? By what standard do we adjudicate the ambitions of the individual when they compete with the interests of the state? Taught in English.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 3010 (3) Advanced German 1

Focuses on cultural topics and reviews grammatical topics, expands vocabulary and provides practice in reading, writing, listening and conversation skills. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B1 after GRMN 3010. Department enforced prerequisite: four semesters of college German or equivalent. Open to freshmen with instructor consent.

Additional Information: Departmental Category: German

GRMN 3020 (3) Advanced German 2

Expands and refines skills acquired in GRMN 3010. Improves overall fluency and deepens cultural understanding of the German-speaking countries. Develops an advanced skill level in the areas of listening, speaking, reading and writing. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B1 or B2 after GRMN 3020. Department enforced prereq., GRMN 3010 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 3030 (3) Business German

Introduces students to the language and culture of German business and economic life. Provides insights into everyday business practices and institutions, including Germany's position in the European and world markets. Improves all language skills with an emphasis on Business German. Familiarizes students with current aspects of German society, professional life and business culture. Students will have the option of taking the internationally recognized exam Goethe-Zertifikat B1 or B2 after GRMN 3030. Department enforced prereq., GRMN 2020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 3110 (3) German Literature from the Avant-garde to the Postmodern

Examines selected literary texts. Emphasizes longer unedited texts as well as critical skills. May be taken either before or after GRMN 3120. Department enforced prereq., GRMN 2020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 3120 (3) German Literature from the Enlightenment to Expressionism

Examines selected literary texts of various periods. Emphasizes longer texts and critical skills. May be taken either before or after GRMN 3110. Department enforced prereq., GRMN 2020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 3130 (3) Issues in German Philosophy and Literature

Examines selected interdisciplinary texts from the German literary and philosophical tradition. Topics address issues central to philosophical inquiry, and may include knowledge and its limits, mind and body, determinism and free will, reason and religious belief, and ethical problems. Department enforced prereq., GRMN 2020 or 2030 (minimum grade C-).

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 3140 (3) Current Issues in German Literature

Examines issues pervading contemporary German literature, such as concerns of youth, gender, stereotyping as it affects women and men in their relations with one another, loneliness and sexual frustration, work experiences, and other issues. Department enforced restriction: ability to read unedited German and to speak German.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 3150 (3) Issues in German Politics and Literature

Examines literary and theoretical texts in German about the relationship between literature and politics. Topics may include history and revolution, political theater, feminist aesthetics or terrorism. Readings and discussion in German. Department enforced prereq., GRMN 2020 or GRMN 2030 (minimum grade C-).

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 3501 (3) German-Jewish Writers: From the Enlightenment to the Present

Provides insight into the German-Jewish identity through essays, autobiographies, fiction and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3501

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: German Courses Taught in English

GRMN 3502 (3) Literature in the Age of Goethe

Features the writings of Germany's major literary figures from 1749 to 1832. Special attention is paid to the formation of literary periods, genres, aesthetic, and socio-historical developments contributing to the birth of modernism in German intellectual history and literature. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: German Courses Taught in English

GRMN 3503 (3) German Film Through World War II

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3503

Additional Information: Departmental Category: German Courses Taught in English

GRMN 3504 (3) Topics in German Film

Analyzes key issues in German culture as they are represented in film and other media, e.g., technology, architecture, women and the Holocaust. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3504 FILM 3504

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German Courses Taught in English

GRMN 3505 (3) The Enlightenment: Tolerance and Emancipation

Examines Enlightenment notions of reason, humanity and social progress. Topics include 18th century views on government, science, education, religion, slavery and gender roles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3505

Additional Information: Arts Sci Core Curr: Ideals and Values

Departmental Category: German Courses Taught in English

GRMN 3506 (3) Tracing the Criminal: Crime in 19th C Society and Culture

Examines cultural and literary representations of crime from the Enlightenment to the early 20th century and contextualizes them within the history of judicial and medical approaches to criminality. Focusing on representations of the criminal as an object of knowledge, this survey of intellectual history introduces students to critical approaches in the humanities and the study of social phenomena in their historical context.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: German Courses Taught in English

GRMN 3513 (3) German Film and Society 1945-1989

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3513

Additional Information: Departmental Category: German Courses Taught in English

GRMN 3514 (3) German Film & Society After 1989

Introduces post-1989 German culture through film. Emphasizes films in their socio-historical contexts and explores developments in German culture during and after the unification. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3514

Additional Information: Departmental Category: German Courses Taught in English

GRMN 3520 (3) Open Topics in the Cultural Context

Examines topics in the cultures of German-speaking central Europe.

Contact the departmental office for specific course offerings. Department enforced prereq., GRMN 3020 (minimum grade C-)

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 3601 (3) German Women Writers

Explores writing by German/Austrian women from 1945 to the present, with special attention to the representation of the Holocaust, the continuation of avant-garde traditions, innovations in literary form, and feminism. Visual arts, film, and feminist theory will also be considered in their relation to literature. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3601

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: German Courses Taught in English

GRMN 3702 (3) Dada and Surrealist Literature

Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3702

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: German Courses Taught in English

GRMN 3802 (3) Politics and Culture in Berlin 1900-1933

Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. Offered through CU Study Abroad Program.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3802

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: German Courses Taught in English

GRMN 3900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: German

GRMN 3930 (1-6) Internship

Provides an academically supervised opportunity for upper-division students to earn credit while working for public or private organizations. Students apply skills and knowledge earned in the major, and supplement their work experience through directed readings and assignments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) German Studies (GRMN) majors only.

Additional Information: Departmental Category: German

GRMN 4010 (3) Advanced Grammar and Stylistics

Emphasizes idiomatically correct spoken and written German in a variety of genres and culturally relevant contexts. Offers a comprehensive review of the more complex grammatical problems and syntactic structures of the German language. Grammar exercises alternate with readings, discussions and writing on topics related to current cultural, social and political issues in the German-speaking countries. Students have the option of taking the internationally recognized exam Goethe-Zertifikat B2 after GRMN 4010. Department enforced prereq., GRMN 3020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 4051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 5051

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4231 (3) Sex, Love and Marriage in Literature and Philosophy

Traces notions of love, sex and marriage in 19th-20th century philosophy and literature. Considered will be whether/how these representations reflect or challenge ideas of human agency, dignity and happiness. Examined will be shifting views of gender and other social configurations (e.g., friendship, adultery, same-sex desire) to understand their influence on modern attitudes towards sexuality and fidelity.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 5231

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4251 (3) Marxism

Historical and systematic study of principal themes of Marxist thought, from its Hegelian origins to its contemporary varieties, emphasizing the works of Marx and Engels. Taught in English. Department enforced prerequisite: 12 hours of GRMN or PHIL course work or instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4250

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4253 (3) Philosophy of Language

Surveys seminal essays from Frege to the present on the philosophy of language. Taught in English.

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4301 (3) Gender, Race and Immigration in Germany and Europe

Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4301 and GRMN 5301

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: German Courses Taught in English

GRMN 4330 (3) The Age of Goethe

German literature from 1770 to 1830. Close examination of representative texts from the periods of Sturm und Drang, classicism, and romanticism. Emphasizes philosophical and social background. Department enforced prereq., GRMN 3020 (minimum grade C-).

Additional Information: Departmental Category: German

GRMN 4340 (3) Seminar in German Literature

Intensive study of a particular literary period, author, or genre. Secondary sources are used. Course content differs each time. Department enforced prereq., GRMN 3020 (minimum grade C-).

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German

GRMN 4450 (3) Methods of Teaching German

Required of students who desire the recommendation of the department for secondary school teaching positions. For student teaching in German, see EDUC 4712 under the School of Education.

Requisites: Restricted to School of Education (EDUC) undergraduates only

Additional Information: Departmental Category: German

GRMN 4460 (6) High School German Teaching

Part of the supervised student teaching in a secondary school required for state certification to teach German.

Requisites: Restricted to School of Education (EDUC) undergraduates only

Grading Basis: Pass/Fail

Additional Information: Departmental Category: German

GRMN 4501 (3) Seminar: Literature in Cultural Context

Provides a broader basis for the work of literature, viewing it from various cultural perspectives. Specific content of course is defined by the instructor. Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4502 (3) Nietzsche: Literature and Values

Emphasis is placed on Nietzsche's major writings spanning the years 1872-1888, with particular attention to the critique of Western values. A systematic exploration of doctrines, concepts and ideas leading to the values of creativity. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4502

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: German Courses Taught in English

GRMN 4503 (3) Issues in German Thought

Provides the opportunity to examine major issues in German philosophical, social, and religious thought from the end of German idealism to existentialism and critical theory. Emphasizes the relationship between ideas and social and political action. Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: German Courses Taught in English

GRMN 4504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 5504 and HUMN 4504

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: German Courses Taught in English

GRMN 4550 (3) Senior Seminar: The Roles of Intellectuals and Academics in German Culture

Examines the articulation of the German bourgeoisie during critical periods in German history. Looks at specific groups and their participation in German public culture, e.g., writers, artists, journalists, academics, and political figures. Students work closely with a faculty advisor during the semester and are expected to produce a major research paper. Department enforced prereq., GRMN 3020 (minimum grade C-).

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) German (GRMN) or School of Education (EDUC) majors only.

Additional Information: Departmental Category: German

GRMN 4900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: German

GRMN 5010 (3) Theory and Practice of German Studies

Introduction to German Studies, with emphasis on research methodology, theoretical approaches, coverage of major currents in German intellectual and literary history from 1750-present, and exposure to fields interrelated with German Studies. Includes training in the use of electronic databases and archives and an introduction to online publication. Required of all graduate students.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5020 (3) Applied Linguistics and Foreign Language Teaching Methodology

Required of all graduate teaching assistants, this course provides a knowledge of the aspects of German linguistics that are important for teaching German and a survey of foreign language teaching methods and second language acquisition research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5030 (3) Foundations of Critical Theory

An introductory study of nineteenth-century German philosophy (especially Kant, Hegel, and Marx). Required course for the graduate certificate in Critical Theory.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4051

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Courses Taught in English

Departmental Category: German Graduate Courses

GRMN 5210 (3) Seminar: The Age of Enlightenment

Examines the influence of the emerging middle class on the transformation of aesthetic and societal values. Major works of theory, philosophy, literature, and criticism by Lessing, Herder, Kant, J. E. Schlegel, and others. Examines major literary and cultural influences from France and Great Britain.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5220 (3) Seminar: Topics in the Age of Goethe

Examines various aspects of German-speaking society from the 1770s to 1830s. Topics may include Sturm und Drang as social commentary; romantic theory in the wake of the French Revolution; romantic nationalism; the Faust theme; Weimar as a cultural center; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5231 (3) Sex, Love and Marriage in Literature and Philosophy

Traces notions of love, sex and marriage in 19th-20th century philosophy and literature. Considered will be whether/how these representations reflect or challenge ideas of human agency, dignity and happiness. Examined will be shifting views of gender and other social configurations (e.g., friendship, adultery, same-sex desire) to understand their influence on modern attitudes towards sexuality and fidelity.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4231

Additional Information: Departmental Category: German Graduate Courses

GRMN 5301 (3) Gender, Race, and Immigration in Germany and Europe

Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4301 and WGST 4301

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5310 (3) Seminar: Topics in the 19th Century

Examines the transformation of realism from Buechner to Gerhart Hauptmann. Topics may include literary responses to the Restoration; intellectuals and the Revolution of 1848; philosophy and literature; theatrical representations of woman, family, and gender; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5320 (3) Seminar: The German Novel from 1901--1956

Beginning with T. Mann's *Buddenbrooks*, charts the rise of the German novel in the early 20th century and examines such topics as Wilhelminian society; intellectuals and World War I; dehumanization and alienation; national socialism and literary exile; and others. Authors include T. Mann, H. Hesse, R. Rilke, F. Kafka, A. Seghers, and A. Zweig.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5330 (3) Seminar: German Intellectuals and Society Between the Wars

Examines the period of social crisis and the intellectual responses to the collapse of the prewar order. Gives attention to the antidemocratic thought of Spengler, Juenger, Stefan George and his circle, to the emergence of existentialism with Scheler and Heidegger, and to the search for a new political humanism as evidenced by the work of Thomas Mann.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5410 (3) Seminar: Topics in Early 20th Century German Society

Focuses on major issues, events, movements, and figures prior to World War II. Topics may include the ontology of lyric poetry; Berlin in the 1920s; exiles, their communities, and their writings; women writers from Andreas-Salome to Anna Seghers; topics in German film; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5420 (3) Seminar: Topics in Later 20th Century German Society

Analyzes major currents and events such as the Holocaust, coming to terms with the past (*Vergangenheitsbewältigung*), German Democratic Republic (GDR) literature, and responses to the reunification. Topics may include the Austrians from Anschluss to Haider; Paul Celan; East German writers between Wolf Biermann and Christa Wolf; topics in German film; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's *Doctor Faustus*. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4504 and HUMN 4504

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5510 (3) Seminar: Open Topics in German Civilization

Focuses on cultural issues that cross lines of literary periodization. Topics may include the theater as social criticism from Lessing to Handke; forms of German protest from Luther to Thomas Mann; nihilism from Bonaventura to Thomas Bernhard; topics in German film; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5520 (3) Seminar: Current Issues in German Literature and Media

Examines issues pervading contemporary German literature and media, such as concerns of youth, xenophobia, stereotyping as it affects women and men in their relations, work experience, feminism, problems connected with the reunification, and other issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 6900 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: German Graduate Courses

GRMN 7010 (1-3) Writing Colloquium

Prepares students for the qualifying examination paper and dissertation, and equips students with the skills needed to transform seminar papers into publishable work. Includes sessions on dissertation writing, publishing journal articles, preparing a reading list, and conducting archival research. Required for students in the German Studies PhD program. Cannot be satisfied through transfer credit.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to German Studies PhD students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: German

GRMN 7900 (1-6) Independent Study

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: German Graduate Courses

GRMN 7930 (1-6) Internship

Provides an academically supervised opportunity for doctoral students to earn credit while working for public or private organizations.

Students supplement their work experience through directed readings and assignments. Students interested in applying for an internship must complete the Arts & Sciences Internship Application at <http://advising.colorado.edu/sites/default/files/Internshipcredit.pdf>. 1-6 hours;

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to German Studies graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: German Graduate Courses

GRMN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements of the degree. For detailed information regarding doctoral dissertation credit, refer to Graduate School rules.

Repeatable: Repeatable for up to 100.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

Germanic & Slavic Languages & Literatures (GSLL)

Courses

GSLL 2350 (3) Introduction to Jewish Culture

Explores the development and expressions of Jewish cultures across the chronological and geographical map of the Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes, including such issues as sexuality and foodways. Sets the discussion in relevant contexts and looks at cultural representations that include literary, religious and visual texts.

Equivalent - Duplicate Degree Credit Not Granted: JWST 2350

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Germanic and Slavic Courses

GSLL 2401 (3) The German Experience in North America

Discusses the history, culture and literature of German immigrants from the 17th to the 21st century. Investigates reasons for migration and the Diaspora of Germans in Russia to the United States and Canada. Studies individual settlements and stores of German pioneer authors and introduces course participants to archival research.

Additional Information: Departmental Category: German Courses Taught in English

GSLL 2551 (3) Modern Jewish Literature

Examines Jewish experience through the study of literary texts from around the world, mainly from the 20th and 21st centuries. Discusses issues pertaining to secularism and tradition; diasporas and homelands; modernity and questions of identity raised by the intellectual transitions brought about by political and social emancipation; sexualities; enormous changes wrought by population redistributions, world wars and rapid cultural transformations. Formerly HEBR 2551.

Equivalent - Duplicate Degree Credit Not Granted: JWST 2551

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Germanic and Slavic Courses

GSLL 3401 (3) The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe

Surveys the major works of 20th century central and central east European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the "Cold War." Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3401

Additional Information: Departmental Category: Germanic and Slavic Courses

GSLL 3600 (3) Contemporary Jewish Societies

Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3600 and IAFS 3600

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Germanic and Slavic Courses

GSLL 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Germanic and Slavic Courses

Global Studies Residential Academic Program (GSAP)

Courses

GSAP 1000 (3) World Politics and Society

Explores the history leading up to-and away from-the attacks of 9/11 within an American framework. Topics to be covered include: America's relationship with key countries since 1945; the rise of Muslim extremism; modern terrorism and its meaning; the importance of oil; and the events of 9/11 and the Bush Administration's response to it, at home and abroad.

Requisites: Restricted to Global Studies Residential Academic Program (PGST) students only.

GSAP 1500 (1) Community Engagement

Facilitates community-level service and volunteer opportunities in the University, Boulder-Denver area, and Colorado communities for first-year students. Participants will learn how to conduct basic community research and will design their own volunteer, service, or internship plan in conjunction with the instructor and the class, targeting a university center, community nonprofit, local business, government agency, or international institution.

GSAP 2010 (3) Introduction to National Security

Introduces national and international security studies to students. The course examines the influence of history, domestic politics, and international events and actors on the development of security policy.

Requisites: Restricted to Global Studies Residential Academic Program (PGST) students only.

Graduate Teacher Education (GRTE)

Courses

GRTE 5010 (0.5-5) Graduate Humanities for Teachers

Addresses special topics in arts and humanities with an emphasis on building conceptual understanding of content and enhancing teacher's practice in teaching this content.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Teacher Education

GRTE 5020 (0.5-5) Graduate Mathematics for Teachers

Addresses special topics in mathematics with an emphasis on building conceptual understanding of content and enhancing teacher's practice in teaching this content.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Teacher Education

GRTE 5030 (0.5-5) Graduate Natural Sciences for Teachers

Addresses special topics in natural sciences with an emphasis on building conceptual understanding of content and enhancing teacher's practice in teaching this content.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Teacher Education

GRTE 5040 (0.5-5) Graduate Social Sciences for Teachers

Addresses special topics in social sciences with an emphasis on building conceptual understanding of content and enhancing teacher's practice in teaching this content.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Teacher Education

Hebrew (HEBR)

Courses

HEBR 1010 (4) Beginning Modern Hebrew, First Semester

First semester Hebrew is an introductory course designed for students with little or no prior knowledge of Hebrew. Begins with the Hebrew alphabet and develops rudimentary, conversational reading and writing skills. By the end of the semester students are expected to have attained basic understanding and expressive abilities in Hebrew.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 1050

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Hebrew

HEBR 1020 (4) Beginning Modern Hebrew, Second Semester

Builds on skills introduced in HEBR 1010, focusing on speaking, comprehension, reading and writing. Students learn new verbal tenses and paradigms. Blends communicative method with formal grammatical instruction. By semester's end students will be able to speak, comprehend and write basic Hebrew. Department enforced prerequisite HEBR 1010 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: HEBR 1050

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Hebrew

HEBR 1030 (3) Beginning Biblical Hebrew, First Semester

Designed to enable students to read the Hebrew Bible in the original language. Focus is on the ability to read the various genres of the text, utilizing both the tools of modern language acquisition and the study of classical grammar methods.

Additional Information: Departmental Category: Hebrew

HEBR 1040 (3) Beginning Biblical Hebrew, Second Semester

Building on HEBR 1030, continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1040

Requisites: Requires a prerequisite course of HEBR 1030 (minimum grade C-).

Additional Information: Departmental Category: Hebrew

HEBR 1050 (6) Intensive Beginning Modern Hebrew

Covers the same material as HEBR 1010 and 1020 combined in one course. Focuses on acquiring basic ability to understand and speak modern Hebrew. Develops basic reading and writing skills and provides exposure to the fundamentals of Israeli culture.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 1010 or HEBR 1020

Grading Basis: Letter Grade

Additional Information: Departmental Category: Hebrew

HEBR 2030 (3) Intermediate Biblical Hebrew, First Semester

Builds on linguistic skills acquired in first year biblical Hebrew. Develops students' reading comprehension and language production with textual assignments and writing exercises. Advances the study of complex grammatical forms.

Additional Information: Departmental Category: Hebrew

HEBR 2040 (3) Intermediate Biblical Hebrew, Second Semester

Develops and extends grammatical knowledge acquired in the first three semesters of biblical Hebrew. Reading of more comprehensive biblical texts which include readings from the Pentateuch, prophets and writings.

Requisites: Requires prerequisite course of HEBR 2030 or JWST 2030 (minimum grade C-).

Additional Information: Departmental Category: Hebrew

HEBR 2110 (4) Intermediate Modern Hebrew, First Semester

Third semester Hebrew builds on skills introduced in the first two semesters and focuses on speaking, comprehension, reading and writing. Students learn new verbal tenses and paradigms, modes of expression and syntactical forms. The course blends a communicative method with formal grammatical instruction. By the end of the semester students are expected to be able to converse in, comprehend, and produce written Hebrew at an intermediate level. Department enforced prerequisite: HEBR 1020 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: Hebrew

HEBR 2120 (4) Intermediate Modern Hebrew, Second Semester

Focuses on texts, while still developing speaking, comprehension and writing skills. Students build on grammatical understanding while learning some of the more sophisticated verbal paradigms and nominal patterns. Blends a communicative method with some formal grammatical instruction. By the end of this semester students are expected to converse in, comprehend and produce written Hebrew at an intermediate level. Department enforced prerequisite: HEBR 2110 (minimum grade C-).

Additional Information: Departmental Category: Hebrew

HEBR 3010 (3) Third Year Modern Hebrew, First Semester

Focuses on students' active Hebrew language skills acquired in the first four semesters of Hebrew at CU-Boulder in weekly conversation and composition sessions. Develops grammatical understanding with a further exploration of the root, verbal and noun systems. Students are introduced to texts in contemporary Hebrew fiction and poetry, as well as some biblical readings. Department enforced prerequisite: HEBR 2120 (minimum grade C-) or instructor consent.

Additional Information: Departmental Category: Hebrew

HEBR 3020 (3) Third Year Modern Hebrew, Second Semester

Focuses on students' Hebrew language skills acquired in the first five semesters of Hebrew at CU-Boulder in weekly conversation and composition sessions. Develops grammatical understanding with a further exploration of the root, verbal and noun systems. Students are introduced to texts in contemporary Hebrew fiction and poetry, as well as some biblical readings, academic texts and Israeli newspapers.

Department enforced prereq., HEBR 3010 (minimum grade C-).

Additional Information: Departmental Category: Hebrew

HEBR 3030 (3) Advanced Biblical Hebrew, Third Year, First Semester

Develops students' understanding of the more complex linguistic challenges of Biblical Hebrew by reading both narrative and poetic biblical texts. We also revise in greater depth forms we have studied in the previous semesters and begin to look at the ways scholars have dealt with Hapax Legamona and other linguistic features that cannot be easily understood.

Additional Information: Departmental Category: Hebrew

HEBR 3202 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3202 and RLST 3202 and WGST 3201

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Hebrew

HEBR 3840 (3) Independent Study

Department enforced prerequisites: HEBR 1010 and HEBR 1020 and HEBR 2110 and HEBR 2120 (all minimum grade C-).

Additional Information: Departmental Category: Hebrew

HEBR 3850 (3) Independent Study

Department enforced prerequisites: HEBR 1010 and HEBR 1020 and HEBR 2110 and HEBR 2120 and HEBR 3840 (all minimum grade C-).

Additional Information: Departmental Category: Hebrew

HEBR 4101 (3) Topics in Hebrew Studies

Explores topics in Hebrew and Jewish literature and cultures. These may include topics such as diasporic literatures, Jewish artists and thinkers, courses on specific authors, figures or communities. Topics change each semester. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4101

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Hebrew

HEBR 4203 (3) Israeli Literature: Exile, Nation, Home

Examines the creation and development of Israeli literature from its pre-State beginnings to the present day, from the writings of immigrants for whom Hebrew was not their mother tongue to a literature written by native Hebrew speakers. Considers texts written by Israeli Jewish and Arab writers and explores how ideas of exile, nation, and home play into the Israeli experience.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4203

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites ENGL 4677 or JWST 4677 or GRMN 2502 or JWST 2502 or JWST 2551 or WRTG 3020.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Hebrew

HEBR 4301 (3) Venice: The Cradle of European Jewish Culture

Explores the development of European Jewish culture from the late Middle Ages to the present by focusing on Jewish life in the city of Venice, Italy. Emphasis is on the development of Venetian print culture and emergence of Italy as a center of Jewish publishing in both the religious and secular world. Examines a variety of cultural and historical material including early printings of the Talmud, the creation of Yiddish popular literature, Hebrew rabbinic literature, responses to political turmoil, and the aftermath of the Nazi genocide. Taught in English. Department enforced prerequisite: GSLL 2350 or JWST 2350 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: JWST 4301

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Hebrew

Hindi/Urdu (HIND)

Courses

HIND 1010 (5) Beginning Hindi 1

Provides a thorough introduction to the modern Hindi language, emphasizing speaking, listening, reading, and writing skills. This course is proficiency-based. Activities aim to place the student in the context of the native-speaking environment from the very beginning. Students will be provided with opportunities to participate in local South Asian cultural events.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Hindi
Departmental Category: Asia Content

HIND 1011 (3) Introduction to South Asian Civilizations

Survey of traditional and modern world views and experiences of people on the Indian subcontinent through literature and film, beginning with the Ramayana and including medieval tales, modern novels, and feature films. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Hindi Courses in English
Departmental Category: Asia Content

HIND 1020 (5) Beginning Hindi 2

Continuation of HIND 1010. Provides a thorough introduction to the modern Hindi language, emphasizing speaking, listening, reading and writing skills. Proficiency-based course aims to place the student in the context of the native-speaking environment from the beginning of the course. Provides opportunities to participate in local South Asian cultural activities and events.

Requisites: Requires prerequisite course of HIND 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Hindi
Departmental Category: Asia Content

HIND 2110 (5) Intermediate Hindi 1

Emphasizes speaking, listening, reading and writing skills and culturally appropriate language use.

Requisites: Requires prerequisite course of HIND 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Hindi
Departmental Category: Asia Content

HIND 2120 (5) Intermediate Hindi 2

Continuation of HIND 2110. Enhances students' speaking, listening, reading and writing skills and culturally appropriate language use.

Requisites: Requires prerequisite course of HIND 2110 (minimum grade C).

Additional Information: Departmental Category: Hindi
Departmental Category: Asia Content

HIND 3110 (3) Advanced Hindi 1

Emphasizes speaking, listening and conversational fluently in Hindi, with a focus on cultural appropriate expression and practical knowledge.

Requisites: Requires prerequisite course of HIND 2120 (minimum grade C).

Additional Information: Departmental Category: Hindi
Departmental Category: Asia Content

HIND 3120 (3) Advanced Hindi 2

Continuation of HIND 3110. Emphasizes reading, listening, and speaking fluency in Hindi-Urdu, with a focus on literary, cinematic and cultural themes in modern and contemporary Hindi-Urdu media and culture. Thematic focus of the course may change each semester. An effort will be made to encourage students to put their language skills into literary and cultural context.

Requisites: Requires prerequisite course of HIND 3110 (minimum grade C).

Additional Information: Departmental Category: Hindi
Departmental Category: Asia Content

HIND 3400 (3) Special Topics

Topics in Hindi. No prerequisites.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Hindi
Departmental Category: Asia Content

HIND 3441 (3) Screening India: A History of Bollywood Cinema

Provides a critical overview of one of the world's largest and most beloved film industries, the popular Hindi cinema produced in Bombay (Mumbai) and consumed around the world under the label "Bollywood". Focus on the post-Independence era to the present, with introduction to key films, directors, stars, genres, formal techniques, and themes, as well as critical analyses of these and other topics. Taught in English.

Additional Information: Departmental Category: Hindi Courses in English
Departmental Category: Asia Content

HIND 3651 (3) Living Indian Epics: The Ramayana and the Mahabharata in the Modern Political Imagination

Explores the Ramayana and Mahabharata, two fundamental mythological pillars of Indian society, through literature, comic books, film, television, and political rhetoric as a means of examining major issues of religion, gender, popular culture, and social politics in contemporary India. Taught in English.

Additional Information: Departmental Category: Hindi Courses in English
Departmental Category: Asia Content

HIND 3661 (3) South Asian Diasporas: Imagining Home Abroad

Examines fundamental questions of home, nation, identity, ethnicity, and foreignness in the context of the enormous South Asian diaspora. By means of literature, ethnography, and film, the various connotations of diaspora will be explored along with the cultural productions of members of the South Asian diaspora (both Indian and Pakistani). Taught in English.

Additional Information: Departmental Category: Hindi Courses in English
Departmental Category: Asia Content

HIND 3811 (3) The Power of the Word: Subversive and Censored 20th Century Indo-Pakistani Literature

Provides an overview of a selection of writings by important 20th century Indo-Pakistani authors, which will permit students to get acquainted with Indian literature. Provides insight into the experience of social and political events in the 20th century and the reaction of the government to the critical analysis and portrayal of these events. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Hindi Courses in English
Departmental Category: Asia Content

HIND 3831 (3) The Many Faces of Krishna in South Asia Literature and Culture

Using both textual and visual sources, the multiple facets of Krishna in Indian religious experience will be explored through poetry and prose, painting and sculpture, music, dance, and drama. Taught in English.

Additional Information: Departmental Category: Hindi Courses in English
Departmental Category: Asia Content

HIND 3851 (3) Devotional Literature in South Asia

Focuses on the medieval and modern periods (1200-present), and the languages of North India and Pakistan (Hindi, Urdu, Panjabi). Students engage with English translations of works by Tulsidas, Surdas, Kabir, Mirabai, Nanak, Khusrau, Ghalib, Anis and Iqbal. Arts Sci Core Curr: Historical Context
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 1626 (3) Introduction to Central and East European History since 1770

Examines major themes and events in the history of East-Central Europe from the late 1700s to the present. Themes include the impacts of nationalism, fascism, liberal democracy and communism in shaping the history of the region. Topics include World War I, World War II and the Holocaust, the Cold War, the fall of Communism, the Ukrainian revolution and more.

Equivalent - Duplicate Degree Credit Not Granted: CEES 1626
Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Europe: Specific Countries

HIST 1628 (3) Introduction to Chinese History since 1644

Introduces students to modern Chinese history and culture, from the 17th century to the present. Considers the pertinent aspects of modern China, focusing on its social patterns, economic structure, intellectual trends and political developments.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 1708 (3) Introduction to Japanese History

A broad interdisciplinary survey of the history of Japan from earliest times to the 20th century. Explores the development of political institutions, social structures, cultural and religious life, economic development, and foreign relations in an historical perspective.

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 1800 (3) Introduction to Global History

Applies a broad perspective to the global past in order to illuminate how common historical patterns and processes as well as unique elements shaped the human experience. Using a thematic approach, introduces highlights cross-cultural interactions among societies, and, when relevant, how historical processes that began centuries ago still impact the contemporary world. Topic will vary by semester. Department enforced prerequisite: 3 hours of any history coursework.

Requisites: Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) History (HIST) majors and minors only.
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 1818 (3) Introduction to Jewish History: Bible to 1492

Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1818 and RLST 1818

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 1828 (3) Introduction to Jewish History since 1492

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and anti-semitism.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1828 and RLST 1828

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context
Departmental Category: World Areas: Specific Regions

HIST 1830 (3) Global History of Holocaust and Genocide

Examines the interplay of politics, culture, psychology and sociology to try to understand why the great philosopher Isaiah Berlin called the 20th century, "The most terrible century in Western history." Our focus will be on the Holocaust as the event that defined the concept of genocide, but we will locate this event that has come to define the 20th century within ideas such as racism, imperialism, violence, and most important, the dehumanization of individuals in the modern world.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1830 and RLST 1830

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Methodological, Comparative, and Global

HIST 2015 (3) Themes in Early American History

Examines major themes in the development of colonial societies in North America from the 15th to the early 19th centuries. Explores intercultural relations, economic development, labor systems, religion and society, and family life. Specific course focus may vary.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: United States Context
Departmental Category: United States: Chronological Periods

HIST 2100 (3) Revolution in History

Examines the causes, character, and significance of political revolution in world history. Concentrating on one of the major revolutions of modern history, it examines why revolutions occur, who participates in revolution, and to what effect. Specific course focus varies.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Methodological, Comparative, and Global

HIST 2110 (3) History of Early Modern Societies

Examines major themes in Early Modern history in a variety of global contexts. Issues to be explored could include intellectual developments, religion, popular culture, social history, economic and political changes, and states and warfare, usually in a specific region or nation (i.e. Europe, Latin America, the Atlantic World, Spain, Russia, China, Japan, etc.). Topics vary in any given semester.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Methodological, Comparative, and Global

HIST 2126 (3) Issues in Modern U.S. Politics and Foreign Relations

Traces the historical development of modern U.S. politics and foreign relations. Analyzes subjects such as the Cold War, the Vietnam War, the War on Terror, and the relationship between foreign and domestic politics, and the developing meaning of political conservatism, liberalism, and radicalism in the U.S. Explains the impact of race, gender, class, and immigration. Topics vary in any given semester.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 1

HIST 2166 (3) The Vietnam Wars

Traces the causes, course, and outcome of the wars in Vietnam from 1940 until 1975. Explains the successes of the revolutionaries and the failures of the French and Americans. Analyzes the development of Vietnamese nationalism, French colonialism, and U.S. intervention.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4166

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 1

Departmental Category: Asia Content

HIST 2170 (3) History of Christianity 1: To the Reformation

General introduction to the history of Christianity from its beginnings through the first period of the Protestant Reformation. Examines religious life and the church in relation to its social and cultural setting.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: Methodological, Comparative, and Global

HIST 2220 (3) History of War and Society

Focuses on war and society in a variety of global contexts. Explores the character, origins, and social, political, and intellectual impacts of war in contexts ranging from several centuries of international conflict to the experience of individual nations in specific wars. Topic varies in any given semester; contact Department of History for details.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Historical Context

Departmental Category: Methodological, Comparative, and Global

HIST 2326 (3) Issues in the History of U.S. Society and Culture

Examines the origins, development, and impacts (social, political, cultural, economic, etc.) of significant issues and themes in the cultural, intellectual, and/or social history of the United States from independence to the present day. Explains the impact of race, gender, ethnicity, and class on these issues. Topics vary in any given semester.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 1

HIST 2437 (3) African American History

Surveys African American history. Studies, interprets and analyzes major problems, issues and trends affecting African Americans from about 1600 to the present.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2432

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 2

HIST 2516 (3) America Through Baseball

Baseball could not have existed without America. Explains how the game fit into the larger context of social, cultural, economic and political history from the 19th century to the present. Studies the events and people who made baseball the national pastime.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4556

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: United States Context

Departmental Category: United States: Topical Courses 1

HIST 2616 (3) History of Gender in America

Introduces the social and cultural construction of femininity and masculinity in America from 1500 to the present. Explores gender as a status acquired and performed through tasks, clothing, adornment and bodily movement. Examines gender ideals, expression and practices such as gender crossing, gender bending and gender plan.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: Human Diversity

Departmental Category: United States: Topical Courses 1

HIST 2629 (3) China in World History

Examines the multiple connections between Chinese history and other parts of the world over the course of China's long history. Specific course focus may vary by instructor/term.

Requisites: History (HIST) majors are restricted from taking this course.

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 3012 (3) Seminar in Modern European History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Modern

HIST 3018 (3) Seminar in Latin American History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 3020 (3) Historical Thinking & Writing

Develops the research techniques and habits of mind required to succeed in the History major, honing students' critical, analytical, and synthetic skills while introducing them to History as a discipline and a way of understanding the world. Students practice the kinds of writing required in upper-division History classes. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prereq courses of HIST 1800 and ARSC 1080 or 1150 or CLAS 1020 or ENGL 1001 or PHIL 1500 or WRTG 1100 or 1150 or 1250 (all min grade C-). Restricted to students with 27-180 credits (Soph, Jr, or Sr) History (HIST) majors only.

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Methodological, Comparative, and Global

HIST 3109 (3) Seminar in Asian History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 3110 (3) Honors Seminar

Practical historiography for students who wish to write a senior honors thesis. Emphasizes choice of topic, critical methods, research, organization, argumentation, and writing.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Arts Sciences Honors Course
Departmental Category: Methodological, Comparative, and Global

HIST 3112 (3) Seminar in Renaissance and Reformation

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Modern

HIST 3113 (3) Seminar in Medieval and Early Modern English History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 3115 (3) Seminar in Early American History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 3116 (3) Seminar in American Diplomatic History

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 3120 (3) Honors Thesis

Department enforced prerequisite: HIST 3110 and instructor consent.

Additional Information: Arts Sciences Honors Course
Departmental Category: Methodological, Comparative, and Global

HIST 3133 (3) Seminar in Britain since 1688

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 3212 (3) Seminar in Early Modern Europe

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: Europe: Modern

HIST 3218 (3) Seminar in African History

Deals with the history and anthropology of selected west African societies in the period before the imposition of European colonial rule.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 3317 (3) Seminar in the American West

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 3328 (3) Seminar in Middle Eastern History

Examines selected issues in modern Middle Eastern history. Check with the department concerning the specific subject of the seminar.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course HIST 3020 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) History (HIST) majors (excludes minors).

Recommended: History GPA of 2.0 or higher.

Grading Basis: Letter Grade

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 3849 (1-3) Independent Study

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 4013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5013

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4018 (3) Aztecs, Incas, and the Spanish Conquest of the Americas

Building upon contemporary texts and modern histories of both famous and ordinary people, this course examines the indigenous empires known as the Aztecs and the Incas. It also examines the encounter of Europeans and native people, following the history of exploration and conquest from the time of Columbus to about 1550. Equal consideration is given to the course's three components: Aztec, Inca and the Spanish conquest.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1018 or HIST 3020.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4020 (3) Topics in Comparative History

Explores historical themes from a comparative perspective. Encourages students to think more analytically about historical change. Consult current online schedule for specific topics. Often team-taught by more than one faculty.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite two 4000-level History courses in differing content areas.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and CLAS 5021

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and CLAS 5031

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite CLAS 1051 or CLAS 1509 or CLAS 2039 or CLAS 4139 or CLAS 4149 or CLAS 2041 or CLAS 4021 or CLAS 4041 or HIST 1051 or GREK 3113.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4040 (3) The History of Space Exploration and Defense

This course examines the development and impact of American, Soviet/Russian, and European civilian and military space activities from the dawn of the space age to the space challenges of the 21st century.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and CLAS 5041 and PHIL 4210

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite CLAS 1051 or CLAS 1061 or HIST 1011 or HIST 1051 or HIST 1061 or PSCI 2004 or PHIL 3000.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4048 (3) Latin American Revolutions

Examines the origins, development and continuing influence of 20th-Century Latin American revolutionary movements, with a focus on placing these struggles in comparative historical context. Explores various approaches to revolution and the general role of left political formations in Latin America. Specific focus can vary by semester with examples drawn from various Latin American countries, including Mexico, Guatemala, Cuba, Chile and Nicaragua.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5048

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1018 or HIST 1028 or HIST 3020.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4050 (3) A Global History of World War II

Examines World War II in a global perspective. This era witnessed transformations in the social, political and economic orders across the globe. Traces the domestic and international developments, including military issues, that shaped the period in Europe, Asia, Africa and North America and assesses the war's legacy.

Requisites: Requires prerequisite course of HIST 1012 or 1025 or 1028 or 1123 or 1228 or 1308 or 1528 or 1628 or 1708 or 1800 or 1828 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Methodological, Comparative, and Global
Departmental Category: Asia Content

HIST 4053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5053

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the east as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5061 and CLAS 4061 and CLAS 5061

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence, and the selective use of comparisons with better known societies. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and CLAS 5071

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republic government. Readings are in the primary sources. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and CLAS 5081

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4083 (3) Revolution and Nationalism in Modern Ireland

Surveys Irish nationalist movements since the eighteenth century, treating constitutional nationalism, revolutionary republicanism and Gaelic cultural movements while also examining the development of Unionism in Ulster as a response to political and cultural nationalism. Emphasizes the political, religious and cultural roots of the current sectarian crisis in Northern Ireland and analyzes that crisis up to the present day.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4091 (3) The Roman Empire

Studies Imperial Roman history beginning with the Roman Revolution and ending with examination of the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the Empire.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and CLAS 5091

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4109 (3) World War II in Asia and the Pacific

For Asia, World War II began with the Mukden Incident (1931), resulting in the Japanese domination of Manchuria and leading to a full-scale war between China and Japan in 1937. Only after the Japanese attacked the U.S. Pacific fleet at Pearl Harbor four years later did the United States enter the war. Discusses the various socioeconomic and political factors leading to the war in Asia, examines the nature of the conflict on the Asian mainland and in the Pacific, and assesses legacy of the war on all those involved.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 4116 (3) History of U.S. Foreign Relations, 1865-1940

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5116

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4117 (3) Colorado History

Presents the story of the people, society, culture, and environment of Colorado from the earliest Native Americans, through the Spanish influx, the fur traders and mountain men, the gold rush, railroad builders, the cattlemen and farmers, the silver boom, the twentieth-century tourists, city-dwellers, workers and activists. Highlights the historical origins of twenty-first century institutions, problems, challenges, and opportunities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4118 (3) History of Mexico to 1821

Studies Mexican history beginning with roots and evolution of pre-Columbian civilizations and concluding with the events of Mexican independence in 1821. Emphasizes society and culture of the Aztecs and Mayans, the Spanish conquest of Mexico, and the colonial regime of New Spain.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4122 (3) Europe During the Renaissance

Explores the history and culture of Western Europe, 1300-1520. Comprehensive in scope, with analysis of political, economic, social, religious, intellectual and artistic matters. Discusses significance of the Renaissance for origins of modern civilization.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Departmental Category: Europe: Modern

HIST 4123 (3) Medieval England

Treats the major developments in English history from the Anglo-Saxon period through the 15th century. Emphasizes late medieval English society during the 13th and 14th centuries.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4125 (3) Early American History to 1763

Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5125

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4126 (3) History of U.S. Foreign Relations Since 1941

Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5126

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4128 (3) The History of Modern Mexico Since 1821

Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5128

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1028 or HIST 3020.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4131 (3) The Origins of Christianity

Surveys the sources for the development of ancient Christianity from the ministry of Jesus Christ to the conversion of the emperor Constantine in the early 4th century. Through lectures and a close reading of primary source materials in translation, students will examine the social activity and theological development of early Christians in their Roman and Jewish context.

Requisites: Requires prerequisite course of HIST 1011 or HIST 1061 or HIST 2170 or CLAS 1061 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4133 (3) The Tudors: British History 1485-1603

Deals with the history of England from 1485 to 1603. Examines patterns of daily life, the impact of the Reformation and the Renaissance and the development of Parliament and the monarchy under the Tudor rulers, especially Henry VIII and Elizabeth.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4143 (3) The Making of Great Britain: British History 1603-1714

Covers the history of the British Isles from 1603 to 1714, the era of the English Civil War and the Glorious Revolution. Traces economic and social relationships, cultural change and religious and political conflict under the Stuart monarchs.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1012 or HIST 1113 or HIST 1123.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4146 (3) U.S. Military History since 1898

Examines America's national defense and war efforts from the Spanish American War to the present, emphasizing causes and consequences of modern conflicts, and the impact of military activities on American society.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4153 (3) Emergence of Modern Britain, 1688-1851

Surveys British history from the Revolution of 1688 to the Great Exhibition in 1851. Topics include creation of the United Kingdom, traditional popular culture, birth of a consumer society, the British Enlightenment, the Evangelical Revival, loss of the American colonies, imperial expansion in Asia, war with Revolutionary and Napoleonic France, the Industrial Revolution, and the impact of utilitarianism and political radicalism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1113 or HIST 1123.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4158 (3) History of Modern Brazil

Surveys the post independence history of 19th and 20th century Brazil. Looks at the development of Brazilian nationalism and political institutions and focuses heavily on race, ethnicity, gender and sexuality in Brazil, understanding how different peoples have settled and accommodated themselves to the Brazilian environment. Finally, it will look at Brazilian economic development and its consequences at the beginning of the 21st century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4166 (3) The Vietnam War in Politics and Culture

Examines America's second-longest and most divisive war from the beginning of the U.S. involvement in the 1950s to the repercussions echoing into the 1980s. Considers the global context, motives, and evolution of U.S. involvement, support for and opposition to the war at home, the war's repercussions in international policy and domestic politics, and representations of the war in popular culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 2166

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

Departmental Category: Asia Content

HIST 4190 (3) French Connections: Contemporary France and America in Historical Context

Faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States. Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3500

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Methodological, Comparative, and Global

HIST 4205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5205

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4212 (3) The Age of Religious Wars: Reformation Europe, 1500-1648

Traces the history of Europe from the end of the Hundred Years War through the Thirty Years War. During this period Europe experienced tremendous changes including emerging religious heresies, the advent of the Spanish Inquisition, violent civil wars, the witch craze, and the Thirty Years War, a precursor to the World Wars of the 20th century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Additional Information: Departmental Category: Europe: Modern

HIST 4215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5215

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4217 (3) The American West in the 19th Century

Explores cultural, social and political interaction in the American West during the 19th century. Themes include environmental change; conflict and syncretism across race, class, and gender lines; mythic images, and their relationship to the "Real" West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4218 (3) Lost Kingdoms & Caliphates: West Africa to 1900

Investigates the formation and dissolution of West Africa's kingdoms, caliphates and stateless societies during the era of the trans-Atlantic and trans-Saharan slave trades. Through a survey of oral and written sources, this course examines West Africa's geopolitical transformation in warfare, jihad, trade and slavery, especially in relation to the African Diaspora to the Americas and Muslim world.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4222 (3) War and the European State, 1618-1793

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5222

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Modern

HIST 4223 (3) The French Revolution and Napoleon

Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades of revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5223

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4227 (3) The American West in the 20th Century

Explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental change, urbanization, immigration, and cultural formation.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4232 (3) From Absolutism to Revolution in Europe, 1648-1789

Studies the history of Europe from the end of the Thirty Years War through the outbreak of the French Revolution. Central themes include the establishment of more centralized, increasingly bureaucratic states; global expansion and economic commercialization; cultural developments such as the Scientific Revolution and the Enlightenment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123.

Additional Information: Departmental Category: Europe: Modern

HIST 4233 (3) History of France since 1815

Examines the ongoing struggle between the revolutionary and counter-revolutionary traditions of France and how it shaped the political history and affected the social, cultural and intellectual character of the nation from 1815 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4235 (3) Jacksonian America

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5235

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4238 (3) History of Southern Africa

Examines the history of southern Africa history from the earliest times to the present. Short background readings and lectures cover southern African's history and class discussions of novels are layered over these basics. Topics of study include Cecil Rhodes and the diamond/gold mines; Shaka and the Zulu "nation"; apartheid; Nelson Mandela and the anti-apartheid movement; issues facing South Africa today.

Requisites: Requires prerequisite course of HIST 1218 or HIST 1228 or HIST 3020 or ANTH 1150 or ANTH 3100 or ANTH 4630 or GEOG 3862 or PSCI 3082 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4258 (3) Africa under European Colonial Rule

Looks at the British, French, Portuguese and German empires that undertook the "Scramble for Africa" in the late 19th century. Themes include slavery and the slave trade; colonization and "pacification"; African resistance to European rule; missionaries and converts; decolonization and anti-colonial uprisings; issues facing Africa today, including oil, war and the Rwandan genocide.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1218 or HIST 1228 or HIST 3020 or ANTH 1150 or ANTH 3100 or ANTH 4630 or GEOG 3862 or PSCI 3082.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4303 (3) Venice and Florence during the Renaissance

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5303

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4312 (3) 19th Century Europe

Concerned with major social, political and cultural developments in Europe from circa 1800 to the outbreak of World War I. Special emphasis is placed upon the Napoleonic experience, the rise of modern nationalism, romanticism, Darwinism and its social applications, the Industrial Revolution, imperialism, the emergence of modern ideologies, and the background of World War I.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Modern

HIST 4313 (3) History of Modern Italy

Examines the major historical, economic and social factors that have shaped the identity of modern Italy, from the enthusiasm of young patriots during Italy's unification in the 1860s to the discontent and domestic terrorism of the 1960s-1980s. Focuses on Mussolini, the Fascist movement and on World War II, as well as the changing role of women. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4250

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4315 (3) Civil War and Reconstruction

Describes the forces at work in the antebellum period that led to sectional warfare; social, economic, and political changes effected by the war; the American agony of reconstruction; and the long-range results of that difficult era.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4320 (3) The History of the Mediterranean, 1000-1600

Familiarizes students with the Mediterranean ecumene covering concepts such as the Renaissance, the Crusades, traders and travelers, religions and cities. Explores both conflicts (military, confessional) and exchanges (commercial, artistic, scientific) thus helping students think cross culturally, comparatively and thematically. Emphasizes the Mediterranean contribution to historical developments of western Europe, the Middle East, and North Africa.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1061 or HIST 1308 or HIST 4061 or HIST 4071 or HIST 4081 or HIST 4091 or HIST 4711.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4326 (3) Epidemic Disease in US History

Focuses on the impact of infectious epidemic disease on American history, from smallpox and cholera to influenza, AIDS and Ebola. Addresses early depopulation of the Americas; contagion and social upheaval; interpretations of pestilence; social construction of disease; urbanization; doctors and alternative practitioners; public health; prejudice and infection; the ethics of quarantine; public versus individual interests; and the paradox of prevention.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4328 (3) The Modern Middle East, 1600 to the Present

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5328

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1308.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 4329 (3) Islam in the Modern World: Revivalism, Modernism, and Fundamentalism, 1800-2001

Examines the more important movements of reform in Muslim world (including Africa, the Middle East and India) from the 18th century to the present, and their origins and intellectual import. Due to the trans-regional nature of this broad movement of reform, particular attention is paid to how these movements related to local political, economic and social contexts, and how they, in turn, moved across larger networks of oceanic commerce and trade. Concludes with extended case studies of Islamic reformism in modern Egypt and India, and their ultimate influence on the politics of contemporary Islamist movements, especially the intellectual position of Ussama B. Ladin.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1308.

Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 4336 (3) Nineteenth-Century American Thought and Culture

Examines the emergence of intellectual traditions and cultural trends in their social and political contexts from the early republic to the beginning of the modern era. Addresses developing arguments about democracy, religion, transcendentalism, gender, race, union/disunion, the Darwinian revolution, utopia/dystopia realism and naturalism in literature and the arts.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4338 (3) History of Modern Israel/Palestine

Explore the history culture, and politics of this crossroads of Europe and Asia from the late Ottoman period to the present. Topics include: nationalism and colonialism, development of Zionist ideology, Palestinian nationalism, the Jewish community (Yishuv) under British rule, the founding of the State of Israel, Arab-Israeli and Palestinian-Israeli relations, Israel's minorities, and the conflict of religion and state.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4338

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4339 (3) Borderlands of the British Empire

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5339

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012 or HIST 1123 or HIST 1228 or HIST 1308 or HIST 1528.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 4343 (3) Spain and Portugal during the Golden Age

Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 4064.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5343

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1018.

Additional Information: Departmental Category: Europe: Topical

HIST 4346 (3) Twentieth-Century American Thought and Culture

Examines the emergence of intellectual traditions and cultural trends in their social and political contexts from the beginning of the modern era through the onset of the postmodern. Addresses developing arguments about democracy, science, race, gender, faith, American identity, radicalism and conservatism, modernist thinking and artistic expression, and the role of intellectuals in society.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4348 (3) Topics in Jewish History

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4348

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4349 (3) Decolonization of the British Empire

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5349

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1123 or HIST 1228 or HIST 1308 or HIST 1528 or HIST 4053 or HIST 4238 or HIST 4258 or HIST 4328 or HIST 4329 or HIST 4338 or HIST 4339 or HIST 4538 or HIST 4548 or HIST 4558.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 4366 (3) Culture Wars: Modernism, Mass Culture, and the Modern U.S.

Examines how U.S. public moralists, intellectuals, and artists from the end of the nineteenth century to World War II both celebrated and attacked the rise of two characteristic features of modernity: mass culture (amusement parks, popular music, radio, movies), and modernist literary and artistic expression. Addresses how Americans both constructed and violated the line between "popular" and "high" culture.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4378 (3) History of Modern Jewish-Muslim Relations

Examines the modern history and culture of Jewish communities under Islamic rule in the Middle East and North Africa; Jews' and Muslims' encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, diaries, newspapers and films.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4378

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4412 (3) Europe, 1890-1945

Examines the origins, character and significance of the First and Second World Wars for the major nations of Europe during the first half of the 20th century.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Modern

HIST 4414 (3) European Thought and Culture, 1750-1870

Explores major developments in European thought from the Enlightenment to Nietzsche. Special attention given to the individuals whose ideas have had the greatest influence on modern intellectual history, e.g., Rousseau, Hegel, Herder, Marx, Kierkegaard, Baudelaire, Darwin, and others.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Topical

HIST 4415 (3) Teddy Roosevelt's America - the U.S. from 1877 to 1917

Examines the social, economic, political, and cultural history of the United States from the end of Reconstruction to the eve of World War I. Topics include the struggles of labor and industry, race and immigration, western and environmental issues, city life and new technologies, feminism and Progressivism, and Indian wars and imperialism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025 or ENVS 1000.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4416 (3) Environmental History of North America

Examines how people of North America, from precolonial times to the present, interact with, altered, and thought about the natural world. Key themes include Native American land uses; colonization and ecological imperialism; environmental impacts of food and agriculture; industrialization, urbanization and pollution; energy transitions; cultures of environmental appreciation; the growth of the conservation and environmental movements.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4422 (3) World War I in Europe

Examines the origins of World War I; the military, social and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the 20th century world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5422

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Modern

HIST 4423 (3) German History Since 1849

Cultural, political and social history of Germany since 1849.

Emphasizes German unification, Bismarckian foreign policy, the rise of neoromanticism, Weimar politics and the rise of national socialism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4424 (3) Modern European Thought and Culture, 1870-Present

Emphasizes Nietzsche and the youth revolt against middle class society, the literary and artistic avant garde (impressionism to existentialism), the psychoanalytic movement, the European right and left, and post-WWII European thought.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Topical

HIST 4425 (3) United States History, 1917-1945

Examines U.S. history from World War I through World War II. Key themes include: warfare; the rise of the modern state; consumer culture; the shift from conservative politics to the New Deal liberalism; the women's movement; immigration restriction; segregation; the Great Migration, and civil rights; conflicts between secular modernism and religious fundamentalism; and new technologies such as the automobile.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4433 (3) Nazi Germany

Focuses on the political, social, cultural, and psychological roots of national socialism, with the nature of the national socialist regime, and those politics and actions that came directly out of its challenge to values central to Western civilization. Studies how Nazism came out of this civilization.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4435 (3) United States History, 1945-1973

Examines the History of the United States during the Cold War, with an emphasis on social and cultural issues at home. Also addresses the economic and political evolution of the American people and the nation's role in world affairs.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4437 (3) African American History, 1619--1865

Explores the history of Africans in America from the first arrivals to emancipation, and their role in the social, cultural, economic, and political evolution of the United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4442 (3) Europe since 1945

Explores Europe from the end of World War II through the present day. Topics include postwar reconstruction; the cold war; anticommunist opposition and new social movements; consumer culture and punk music; the fall of communism; the Yugoslav wars; European unity.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Modern

HIST 4444 (3) Topics in Modern European Thought

Explores a selected theme in European thought since the Enlightenment. Topics vary each term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Topical

HIST 4445 (3) United States History since 1973

Traces political, diplomatic, economic, and social developments in the United States from 1973 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 4454 (3) Jewish Intellectual History

Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4454

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Topical

HIST 4511 (3) Europe in the Dark Ages (400-1000 A.D.)

Examines the history of Europe from the fall of the Roman Empire to the turn of the first millennium. Treats social, political and religious transformations in the barbarian kingdoms, and considers the persistence of Roman institutions and culture and the impact of Christianity in northern Europe.

Requisites: Requires prerequisite course of HIST 1011 or HIST 2170 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4516 (3) U.S. Society in the 19th Century

Concerned with the American family and community in the changing social environments of the 19th century. Examines families of different ethnic and class backgrounds, observing how they are changed by new economic conditions, reform, or new political institutions.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4521 (3) Europe in the High Middle Ages (1000-1400 A.D.)

Examines the history of Europe from the emergence of feudal institutions to the rise of nation states, with specific attention to social, intellectual and religious change, the role of law and ritual, the crusades and European expansion, and urban growth and identity in the West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 2170.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4526 (3) Immigrants, Workers and the 1 percent - Recent U.S. Social History

In the 21st century we see a widely divided U.S. society, with a privileged "one percent" on one end, and a striking pattern of poverty on the other. How did the U.S. get this way? This course shows students how to explore social change through the people of the 20th century, their experiences, and the words they left behind.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4527 (3) Mexican-American History since 1848

Examines Mexican-origins people in the United States from the 19th century through the present. Focuses on Mexican-American history as both an integral part of American history and as a unique subject of historical investigation. Using primary and secondary sources, students will examine how Mexicans and Mexican-Americans have negotiated, influenced, and responded to political, social, cultural, and economic circumstances in the U.S.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4528 (3) Islam in South and Southeast Asia (1000 to the Present)

Examines the history of Muslim societies in South and Southeast Asia from 1000 to the present. Focuses on themes such as the rise of Islamic empires in South Asia, Sufism, trade and the spread of Islam in Southeast Asia, the rise or Muslim nationalism and religious fundamentalism, and the impact of modernization and globalization on Muslims of the region.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Requisite 6 hours of any history coursework.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4534 (3) Modern European Jewish History

Focus on the last 500 years of European Jewish history, from 1492 until the present, to examine Jews' place in European history and how Europe has functioned in Jewish history. Does not end with the Holocaust, since, although Hitler and the Nazis attempted to destroy European Jewish civilization, they did not succeed. Rather, this course will spend several weeks looking at European Jewish life in the past sixty year.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4534

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1012.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Topical

HIST 4538 (3) History of Modern India

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5538

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite 6 hours of any history coursework.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5544 and JWST 4544

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HEBR 2350 or JWST 2350.

Additional Information: Departmental Category: Europe: Topical

HIST 4546 (3) Popular Culture in the Modern United States

Traces the history of cultural expression in the United States since the late nineteenth century. From art, fiction, and music to the movies, amusement parks, shopping, and sports, popular culture offers clues to decipher shifting patterns of consumption, globalization, race, gender, politics, technology, and media. Includes instruction and practice interpreting cultural materials in historical context.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1025 or ATLS 2000.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4548 (3) Women in Modern India

Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5548

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1528.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4556 (3) The History of America through Baseball

Baseball serves as a window to view the American experience. Covers U.S. history since 1830, addressing the major topics that reflect on American society, such as professionalization, labor management conflict, race, gender, culture, politics, economics and diplomacy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 2516

Requisites: Requires prerequisite course of HIST 1025 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4558 (3) Buddha to Gandhi: A History of Indian Nonviolence

Focuses on the intellectual history of nonviolence in India from the time of the Buddha to Mahatma Gandhi who led India to national independence from the British Empire in 1947. Pursues this history in light of the encounter between Indian and western cultural traditions in modern India.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities a served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5616 and WGST 4616

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4617 (3) Native North American History I: Human Settlement to 1815

Explores the establishment and development of human societies in North America prior to 1492; the varied experiences of contact; the crises, opportunities, and transformations that attended colonialism; Indians and the inter-imperial contests of the eighteenth century; and the struggles of native peoples confronting the newly-independent United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4618 (3) Early Modern China, 960-1842

Examines political, social, and cultural history of China from the Song Dynasty (960-1279) to the opium War (1839-1842). Topics covered include the development of imperial political institution and gentry society, Conquest Dynasties, Neo-Confucianism, China's "medieval economic revolution", Chinese world order in East Asia, Qing multiethnic empire, Chinese overseas migration, and the coming of the West.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4619 and HIST 5619

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 4620 (3) A Global History of Sexuality: The Modern Era

Provides an introduction to the history of sexuality in the modern era through engagement with recent interdisciplinary research into what sexuality has meant in the everyday lives of individuals; in the imagined communities formed by the bonds of shared religion, ethnicity, language and national citizenship; on the global stage of cultural encounter, imperialist expansion, transnational migration and international commerce.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4620

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4623 (3) History of Eastern Europe Since 1914

Examines the struggle of nations of eastern Europe to assert their independence, from break-up of the imperial system at the end of World War I, through the Soviet bloc that emerged after World War II, to the establishment of democratic governments after the 1989 revolutions.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4626 (3) History of Gender and Sexuality in the United States from 1870

Examines the social history and cultural construction of genders and sexualities in America from 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities and served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4626

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4627 (3) Native North American History II: 1815 to Present

Explores the longevity and continuity of human history in North America by discussing pre-European social and cultural developments. By examining ways in which Indian societies west of the Mississippi River responded to Euro-Americans, the Indians' role in western North American history is demonstrated.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949

Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics as Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5628

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the United States through investigation of lesbian/gay identity formation, community development, politics, and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5636 and WGST 4636

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1025 or LGBT 2000.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4638 (3) Contemporary China: Radicalism and Reform, 1949 to Present

Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5638

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4640 (3) Women, Gender and War

Study of how women experience war, how the structure, practice and memory of war, and the rights and obligations of military service (masculinity and femininity) are structured by the gender system.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4640

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1015 or HIST 1012 or HIST 1025 or HIST 1123 or HIST 1628 or HIST 1708.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4643 (3) Poland since the 16th Century: Democracy and Nation

Traces themes of democracy and nationalism in Polish history from the "Noble Republic" of the early modern era through the struggles with fascism and communism in the 20th century, to Poland's current position on the eastern edge of Western Europe.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4648 (3) Inventing Chinese Modernity, 1800 to Present

Examines the long and painful transformation, during the modern period of native Chinese concepts about the meaning of life, the proper order of politics and society, the role of the individual, the nature and role of human emotions, the place of the gods, the definition of nation, the proper relations between the sexes, and China's place in the global order.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4658 (3) China and Islam from the 7th Century to the 20th Century

Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5658

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1618 or HIST 1628 or CHIN 1012.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4688 (3) Window on Modern China

Examines the relationship between China's recent history and its booming contemporary economy and society through on-location study in a Chinese city. The course makes use of a rich array of historical and other kinds of sites to teach students to think critically about themes and events that played a shaping role in the unfolding of modern Chinese history.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4711 (3) The Medieval Crusades: Holy War and Its History, 1095-1400

Studies the innovation, impact and meaning of holy war and the expansion of Christendom during the High Middle Ages. Topics include the definition of crusade and crusaders, religious persecution and tolerance, the expansion of European modes of government, war memory, colonization and its aftermath, the meaning of the Holy Land and the home front.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 2170.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4713 (3) History of Russia through the 17th Century

Introduces the history and culture of Russia from the 9th to the 17th century. Emphasizes selected topics in social, economic, religious and cultural history, including the formation of the Russian state conversion to Orthodox Christianity, the Mongol invasion and the reign of Ivan the Terrible.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4718 (3) Ancient, Classical, and Medieval Japanese History

Begins with the prehistoric and protohistoric periods. Explores the development of Japan's classical age and traces the rise and attenuation of an elite warrior government.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4723 (3) Imperial Russia

Surveys major cultural, social, and economic changes from the reign of Peter the Great through World War I.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4726 (3) A Nation of Immigrants: Immigration in American History

Examines the shifting kaleidoscope of immigration to the United States in the 19th and 20th centuries. Considers immigrant motives, cultures and experiences; changing cultural and political ideas about the value of immigration; the relationship of immigration and immigration policy to ideas about the American national project; the creation and consequences of immigration law.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 4728 (3) Modern Japanese History

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5728

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4733 (3) The Russian Revolution and the Soviet Regime

Covers in detail the significant social, economic and political events of Soviet Russia from the February Revolution of 1917 to the present.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4738 (3) History of Early Modern Japan (1590-1868)

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).

Equivalent - Duplicate Degree Credit Not Granted: HIST 5738

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 4758 (3) The History of Postwar Japan, 1945 to Present

Explores political, economic, social and cultural factors in postwar Japan. Although the defeat in 1945 is often seen as "zero hour", a moment of near total disjunction, the outlines of postwar Japan emerged during World War II. Beginning with the 1930s, traces growth and development, social change, globalization, the quest for collective identity and other themes in the evolving Japanese nation-state.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5761 and CLAS 4761 and CLAS 5761

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 4800 (3) Special Topics in Global History

Organized around themes that change yearly, this class allows students to study and research processes, phenomena, and events of global significance in historical context. Will stress historical subjects that span multiple geographic regions of the globe. Topics could include the global history of: the arms trade; slavery; health and disease; youth culture; women's rights; genocide, the environment, migration, economic trade, warfare exploration etc...

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4803 (3) Special Topics in European History

Covers specialized topics in European history, usually focusing on a specific country or theme.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite HIST 1011 or HIST 1012.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 4808 (3) Special Topics in World Areas History

Covers specialized topics in the history of World Areas outside of Europe and/or North America, usually focusing on one country or region.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 4820 (3) Human Rights: Historical Perspectives

Examines the history of modern ideas of human rights. Focuses on themes such as the universalism/cultural relativism debate, colonialism, nationalism, refugees and stateless peoples, the United Nations and humanitarianism, ethnic genocide in Rwanda, and human rights abuses by the Taliban regime in Afghanistan.

Requisites: Requires a prerequisite of 6 hours of credit in any History course. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 4827 (3) Modern U.S. Jewish History since 1880

Explores the experience of Jews in the United States from the 1880's when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4827

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 4930 (1-6) History Internship

Matches selected students with supervised internships in professional archives research libraries, historical associations, and special projects. Interns apply their academic area specialty to their work in the field. Internships have a work and academic (reading and writing) component. **Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) History (HIST) majors and minors only.

Recommended: Prerequisite completion of lower-level history coursework (for example HIST 1015 or HIST 1025).

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5000 (3) Historical Methods: Introduction to the Professional Study of History

Introduces purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5012 (3) Graduate Colloquium in European History

Acquaints students with key works in the literature of European history, and addresses matters of method and interpretation. Department enforced requisite: admission to the graduate program in history.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4013

Requisites: Restricted to graduate students only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5048 (3) Latin American Revolutions

Examines the origins, development and continuing influence of 20th century Latin American revolutionary movements, with a focus on placing these struggles in comparative historical context. Explores various approaches to revolution and the general role of left political formations in Latin America. Specific focus can vary by semester with examples drawn from various Latin American countries, including Mexico, Guatemala, Cuba, Chile and Nicaragua.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4048

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4053

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4061 and CLAS 4061 and CLAS 5061

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5106 (3) Graduate Colloquium in United States History

Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5116 (3) History of U.S. Foreign Relations, 1865-1940

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II. Instructor's permission required for non-history graduate students.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4116

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5125 (3) Early American History to 1763

Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4125

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5126 (3) History of U.S. Foreign Relations Since 1941

Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4126

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5128 (3) The History of Modern Mexico Since 1821

Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4128

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5129 (3) Colloquium in Modern Asian History

Introduces major topics and themes in Asian history. Analyzes readings relating to topics such as imperialism, cultural agency, gender, race, nationalism, decolonization, and revolution.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4205

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4215

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5222 (3) War and the European State, 1618-1793

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4222

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5223 (3) The French Revolution and Napoleon

Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades or revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4223

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5235 (3) Jacksonian America

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4235

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5248 (3) History of Anglo-American Criminal Justice

Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5303 (3) Venice and Florence during the Renaissance

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5303

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5328 (3) The Modern Middle East, 1600 to the Present

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4328

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5339 (3) Borderlands of the British Empire

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4339

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5343 (3) Spain and Portugal during the Golden Age

Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 5064.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4343

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 5349 (3) Decolonization of the British Empire

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4349

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 5422 (3) World War I in Europe

Examines the origins of World War I; the military, social, and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the twentieth-century world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4422

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5538 (3) History of Modern India

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4538

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of any history coursework.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4544 and JWST 4544

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Topical

HIST 5548 (3) Women in Modern India

Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4548

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities as served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4616 and WGST 4616

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4619 and WGST 4619

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949

Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics as Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4628

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics, and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4636 and WGST 4636

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5638 (3) Contemporary China: Radicalism and Reform, 1949 to Present

Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4638

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5658 (3) China and Islam from the 7th Century to the 20th Century

Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4658

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5728 (3) Modern Japanese History

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4728

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5738 (3) History of Early Modern Japan (1590-1868)

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4738

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4761 and CLAS 4761 and CLAS 5761

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5840 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5841 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5842 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5843 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5844 (1-3) Independent Study-Europe/Topical

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 5845 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5846 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5847 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 5848 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5849 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6012 (3) Readings in Modern European History

Requisites: Restricted to History (HIST) graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 6019 (3) Readings in World History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6020 (3) Modern Empires: Readings in Imperial History

Introduces major topics and themes in imperial history. Reviews central theories of modern colonial empire, ranging from economic and political motivations for expansion, to the cultural and social impact of empire, to post-colonialism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6028 (3) Readings in Modern Latin American History

Examines major themes and topics in the social, political and economic history of Latin America. Possible topics include nationalism and state-building, neocolonialism, revolution and reaction, race, and gender.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite HIST 5128.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 6030 (3) Readings: Frontiers and Borderlands in the Americas

Introduces classic and recent scholarship on frontiers and borderlands in the Americas. Chronological focus will vary by semester, from contact through twentieth century. A hemispheric approach encourages comparative insights about topics such as colonialism and ecological change, war and violence, indigenous resistance, acculturation, ethnogenesis, and evolving ideas about race, gender, and identity at the margins of empires and nation-states.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6109 (3) Readings in Asian History

Explores a specific theme in Asian History in depth. Topic may vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 6113 (3) Readings in English History to 1714

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 6115 (3) Readings in American Colonial History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 6116 (3) Readings in American Diplomatic History

Requisites: Restricted to graduate students only.

Recommended: Requisite undergraduate work in American history.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6123 (3) Readings in English History Since 1688

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and ARTH 6150 and ANTH 6150

Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-).

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6212 (3) Readings in 17th Century Europe

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 6317 (3) Readings in the American West

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 6326 (3) Readings in United States Intellectual History

Examines the history of ideas and the social history of intellectuals in American society during the 19th and 20th centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse.

Requisites: Restricted to History (HIST) graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6329 (3) Readings in Comparative Ethnohistory

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6330 (3) History of Sex and Sexuality

Examines major historical trends in the study of meanings and practices of sex and sexuality. Focuses on emergence and negotiation of sexual matters in circumstances where sex and identity were not coterminous.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6349 (3) Decolonization in Transnational Perspective: The End of the British Empire in S Asia & Middle East

Examines Britain's withdrawal from South Asia and the Palestine mandate. Topics include collaboration, anticolonial resistance, Indian and Palestinian nationalisms, zionism, transcolonial connections, counter insurgency, and partition.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 6410 (3) Readings in Environmental History

Offers historical perspective on the complex and interdependent relationship between human social and cultural institutions and the natural world. Considers interdisciplinary methodologies incorporating history, biology, geography, law, and other disciplines. Formerly HIST 6417.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6413 (3) Readings in Modern German History

Requisites: Restricted to graduate students only.

Recommended: Requisite general background in European history.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 6414 (3) Readings in European Intellectual History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 6420 (3) Memory and History in Transnational Perspective

Engages in debates about historical methods and how the past is represented. Central topics will include memory and the forces of nationalism and war; commemoration and monuments; the role of memory in the construction of race and ethnicity; personal past and cultural remembrance; and the relationships between academic, public, and popular histories.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6427 (3) Readings in African American History

Introduces classic and recent scholarship, and critical issues in African American history, from slavery to the present.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 6511 (3) Readings in Medieval History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 6526 (3) Readings in U.S. Social History, 1880--1940

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6528 (3) Reading in South Asian History

Introduces major topics and themes in South Asian history. Reviews central theories relating to topics such as religion, nationalism, law, gender, colonialism, and literature.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 6546 (3) Readings in Cultural History and Theory

Introduces standard works and recent developments in cultural history. Explores structuralism and post-structuralism, semiotics, social construction, relativism, hegemony, and the idea of postmodernity in the uses of culture as an historical category.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6610 (3) Readings in Gender History

Examines the field of gender history that includes an understanding of women's and/or men's experience as lived and socially or culturally constructed. Regional or national focus and time period to be determined by the faculty member teaching the course in any given semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6616 (3) Readings in the History of American Women

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6756 (3) Race and Nationalism

Focuses on analytical, ideological, cultural, and political tensions between understandings of race and nationalism. Readings are interdisciplinary, but students identify and analyze tensions between race and nationalism at particular historical moments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6800 (3) Readings in Global History

Explores various topics, regions, and methods in history and historical writing by utilizing a global/thematic approach. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6940 (1) Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7052 (3) Seminar: Modern European History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7110 (3) Research Seminar in Atlantic History 1500-1800

Discusses the concepts and methods that inform the field of Atlantic history in the early modern era. Readings and research papers explore the interactions of peoples from Europe, Africa, and the Americas, including the exchange of ideas, peoples, commodities, and cultural practices.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7119 (3) Graduate Research Seminar in Asian History

Prepares students for research in historical documents in Asian languages in order to write a substantial original research paper based on primary and secondary source materials.

Requisites: Restricted to graduate students only.

Recommended: Requisite background in Asian history.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 7153 (3) Seminar: English History, 800--1688

Requisites: Restricted to graduate students only.

Recommended: Requisite background in English or European history.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 7155 (3) Seminar: Early American History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7156 (3) Seminar: American Diplomatic History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7252 (3) Seminar: Early Modern Europe, 16th to 18th Centuries

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7257 (3) Seminar: History of the American Frontier

Requisites: Restricted to History (HIST) graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 7326 (3) Seminar: U.S. Intellectual History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7415 (3) Graduate Seminar in Modern United States History

Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7424 (3) Research Methods in Medieval/Early Modern European History

Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU's microfilmed collections of manuscripts, and write a research paper based on the manuscript materials.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 7485 (3) Seminar: United States History, 1948–Present

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7556 (3) Seminar: American Society and Thought

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7581 (3) Latin Paleography

Discusses the development of formal scripts from the late Roman Empire to the 15th century. Provides practice in identification, transliteration, and translation of medieval manuscripts.

Requisites: Restricted to graduate students only.

Recommended: Requisite reading knowledge of Latin.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 7840 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7841 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 7842 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7843 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 7844 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 7845 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7846 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7847 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 7848 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 7849 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Methodological, Comparative, and Global

Honors (HONR)

Courses

HONR 1001 (1) Honors Coseminar

Honors coseminars are designed to combine an honors seminar experience with the shared experience of an organized lecture course. Designed typically for 15 students, coseminars are taken for an additional 1 credit hour. Coseminars provide honors students with an opportunity to extend their common experience in the course lecture into an enriched interactive, critical thinking opportunity.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Enrollment allowed for first-year students invited into the Honors Program for the current academic year (not including Honors RAP students) and continuing students with a minimum cumulative GPA of 3.300.

Additional Information: Arts Sciences Honors Course

HONR 1810 (3) Honors Diversity Seminar

Students will develop an appreciation for, and experience with, diverse perspectives. In particular this includes: racial/ethnic, gender, sexual orientation, and class perspectives, for constructing knowledge as they proceed through their undergraduate studies. Three themes provide the framework for the course: education for the next century, the 21st century citizen, and the modern individual in a diverse society. Topics explored include privilege, stigmatization, targeted and nontargeted grouping, and oppression. Engaging in independent research and experiential, empathetic experiences is required.

Requisites: Enrollment allowed for first-year students invited into the Honors Program for the current academic year (not including Honors RAP students) and continuing students with a minimum cumulative GPA of 3.300.

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Human Diversity

HONR 2250 (3) Ethics of Ambition

Through selected readings in classical literature on ethics and through more contemporary readings and films, examines critical ethical issues relating to the competition of ambitions and the alternative styles of choosing between courses of action in a dangerous world. Uses biographies of those whose lives illustrate both the complexities of the struggles and the profundity of possibilities. Considers the unconscious metaphors of national visions and ambitions, the competing ethics of ends and means, the conflicting ambitions in a pluralistic society, and the transcendent ambitions of visionaries.

Equivalent - Duplicate Degree Credit Not Granted: FARR 2660

Requisites: Enrollment allowed for first-year students invited into the Honors Program for the current academic year (not including Honors RAP students) and continuing students with a minimum cumulative GPA of 3.300.

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Ideals and Values

HONR 2251 (3) Introduction to the Bible

Studies the major works, figures, and genres of the Bible and attempts to understand what they meant to their own time and why they became so important to Western civilization and contemporary America.

Requisites: Enrollment allowed for first-year students invited into the Honors Program for the current academic year (not including Honors RAP students) and continuing students with a minimum cumulative GPA of 3.300.

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Historical Context

HONR 2500 (3) Open Topics

Variety of new courses at the 2000 level. See honors program announcements for specific contents.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Enrollment allowed for first-year students invited into the Honors Program for the current academic year (not including Honors RAP students) and continuing students with a minimum cumulative GPA of 3.300.

Additional Information: Arts Sciences Honors Course

HONR 2860 (3) The Figure of Socrates

Investigates why Socrates intrigued great writers like Aristophanes, Plato, Xenophon, and Aristotle and why, through his life and execution by the Athenian democracy, he still influences Western ethics, politics, and education and is central to cultural literacy.

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Literature and the Arts

HONR 3004 (3) Women in Education

Honors women in education and their legacy. Introduces women educators, beginning in the late 19th century, whose significant theories of education and work in teaching have had an impact on all of our lives, in history and in society. Explores the educational theories and methods of several representative women educators and analyzes them through an investigation of their professional and personal lives.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3004

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Human Diversity

HONR 3220 (3) Advanced Honors Writing Workshop

Intensive practice of expository writing skills, particularly argumentation in longer forms. Course includes extensive practice in researching secondary sources, synthesizing large bodies of information, structuring cogent arguments for diverse sources, etc.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Written Communication

HONR 3270 (3) Journey Motif in Women's Literature

Investigates the application of the theme of the journey to developmental narratives by analyzing modern British and American writings by women. Applies methods from psychology, feminist studies, gay studies, cultural studies to concepts of development, regression, progress, escape.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Human Diversity

HONR 3550 (1-6) Open Topics

Investigates special topics in humanities, social sciences, and natural sciences. Topics vary from semester to semester and from course to course. See Honors program announcements for specific contents. Open to Honors-qualified students beyond the freshman year. May be repeated for up to six credit hours for different topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sciences Honors Course

HONR 3810 (3) Privilege and Modern Social Construction

Examines social constructions that lead to productive interactions between and among American social communities. Using case studies and humanistic accounts, students analyze the lived experiences of a unique group or successful citizens who routinely evidence productive practices of multicultural engagement. Through interactions with policy makers and community practitioners, students design and enact activities that allow them to reconstruct their personal patterns of privilege practices of their peer groups in various settings.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sciences Honors Course

HONR 4000 (3) Open Topics

Variety of new courses at the 4000 level, see Honors Program announcements for specific contents.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course

HONR 4025 (3) Heroines and Heroic Tradition

Given recent controversies about the roles of women in power, this course re-evaluates heroic traditions as the stories that ground our sense of public endeavor. What do we mean by heroic? What is a heroine? Are heroines different from heroes?

Requisites: Enrollment allowed for first-year students invited into the Honors Program for the current academic year (not including Honors RAP students) and continuing students with a minimum cumulative GPA of 3.300.

Additional Information: Arts Sciences Honors Course
Arts Sci Core Curr: Human Diversity

HONR 4055 (3) Discourse Analysis and Cultural Criticism

Discourse analysis critically investigates the founding assumptions by which systems of meaning operate. Its practice is aimed at a rigorous, systematic analysis of both specific cultural issues and the dynamics by which structures of meaning may be maintained or transformed.

Requisites: Requires a corequisite course of HONR 4056. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sciences Honors Course

HONR 4056 (1-3) Service Practicum: Discourse Analysis and Cultural Criticism

Help communities in need, with credit hours varying according to time commitment. The practicum provides experiential and intellectual understanding of the discourses and dynamics that maintain major cultural hierarchies of values and of resource distribution.

Requisites: Requires a corequisite course of HONR 4055. Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sciences Honors Course

HONR 4900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sciences Honors Course

HONR 4959 (3-6) Honors Thesis

Requires approval of Honors Program.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sciences Honors Course

Humanities (HUMN)

Courses

HUMN 1110 (3) Introduction to Humanities: Literature 1

Introduces students to works from the major Western literary periods (Classical, Medieval, Renaissance, Baroque) from the 8th c. BC to the early 17th c. AD comparatively, i.e., outside their national literary boundaries. Theorizes interdisciplinary, genre studies, periodization, comparativism, thematology, hermeneutics, criticism, etc.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 1120 (3) Introduction to Humanities: Literature 2

Introduces students to works from the major Western literary periods (Baroque, Enlightenment, Romanticism, Realism, Modernism) from the 17th- through the 20th-centuries comparatively, i.e., outside their national literary boundaries. Theorizes interdisciplinarity, genre studies, periodization, comparativism, thematology, hermeneutics, criticism.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 1210 (3) Introduction to Humanities: Art and Music 1

Examines the major artistic and musical works in the Western tradition from ancient Greece through the 16th century in their larger historical, interdisciplinary, and theoretical ("aesthetic") contexts.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 1220 (3) Introduction to Humanities: Art and Music 2

Examines the major artistic and musical works in the Western tradition from the 17th century to 21st-century post-modernism in their larger historical, interdisciplinary, and theoretical ("aesthetic") contexts.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 1400 (3) Mediterranean Foundations

Examines the pre-Modern Mediterranean as the foundational zone of Western Humanism and culture, beginning with Classical Antiquity and through to the dawn of Modernity. Through history, art, literature and thought, it studies the region's role as the crucible of Hellenic-Persian culture, Roman society, of Judaism, Christianity and Islam, the intersection of Europe, Africa and Asia in the development of Modernity.

Grading Basis: Letter Grade

HUMN 1701 (3) Nature and Environment in German Literature and Thought

Critically examines titles in German literature and thought. Nature and environment are used to explore alienation, artistic inspiration, nihilism, exploitation, sexuality, rural versus urban, meaning of the earth, cultural renewal, identity and gender. This "Green" survey of German classics spans Romanticism's conception of nature as unconscious spirit to the politics and values of contemporary Germany's Green party.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 1701

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 2000 (3) Methods and Approaches to the Humanities

Provides a transition from the introductory courses to the upper-division courses. Introduces the various technical methods and topics encountered in the department's comparative, interdisciplinary upper-division courses, including cultural studies, rhetoric, translation, hermeneutics, word/image studies.

Requisites: Restricted to Humanities (HUMN) majors and minors only.

HUMN 2100 (3) Arts, Culture and Media

Promotes a better understanding of fundamental aesthetic and cultural issues by exploring competing definitions of art and culture. Sharpens critical and analytical abilities by asking students to read and compare different theories about arts, culture, media, and identity, and then to apply and assess those theories in relation to a selection of visual and verbal texts from a range of cultural and linguistic traditions.

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 2145 (3) African America in the Arts

Introduces interrelationships in the arts of African Americans and the African American contribution to American culture as a whole.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: United States Context

HUMN 2601 (3) Kafka and the Kafkaesque

Exposes the students to a wide selection of Kafka's literary output and aims to define the meaning of the Kafkaesque by looking not only for traces of Kafka's influence in the verbal and visual arts, but also for traces left in Kafka's own work by his precursors in the literary tradition.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 2601

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 3092 (3) Studies in Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3093 (3) Topics in Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3104 (3) Film Criticism and Theory

Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3104

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

HUMN 3200 (3) Fictions of Illness: Modern Medicine and the Literary Imagination

Examines the ways in which the rise of modern medicine fueled the literary imagination with a new focus, new patterns of perception and potent metaphors. Through a study of various works of fiction, critical theory and medical history, the course traces how medical discoveries and the increasing professionalization of medicine manifested itself in modern literature.

Requisites: Requires a prerequisite course of HUMN 2000 (minimum grade C-) or restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

HUMN 3210 (3) Narrative

Explores the nature of sacred and secular narrative in literature, film, and the visual arts.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3211 (3) The Craft of Mystery

Explores examples of and theories about the formation and growth of the genre of detective fiction, especially in the late 19th and early 20th centuries. Explores the social conditions of the times in which the texts were written and the possible resulting influences on style. Compares the texts and theories to examples from other genres and time periods.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3212 (3) Shipwrecks, Mutinies, and Other Catastrophes at Sea

Explores the theatrical analogy that frames our understanding of catastrophes at sea and their literary and visual representation, paying particular attention to issues of gender, race, and sexuality, which are intentionally banned from such representations, but turn out to be their secret focus.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3240 (3) Tragedy

Studies some of the great tragic works of art, music, and literature from the Greeks to the 20th century. Tragic theory is invoked as an aid to interpretation.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3290 (3) Foundations of Disability Studies

Introduces students to the interdisciplinary field of disability studies by investigating key concepts in disability theory, disability history and culture, media representations of people with disabilities, and pertinent bioethical issues.

HUMN 3310 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3310 and JWST 3310

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 3321 (3) Culture and Literature of Ancient China

Focuses on the religious, cultural, philosophical, and literary aspects of ancient Chinese civilization (1500 B.C.-A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 3321

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Asia Content

HUMN 3341 (3) Literature and Popular Culture in Modern China

Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 3341

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Asia Content

HUMN 3500 (3) Literatures of Consciousness

Facilitates a complex and productive understanding of consciousness by analyzing and synthesizing interdisciplinary works (including literature, film and theoretical and scientific texts). This interdisciplinary approach enables students to think deeply about the following questions: what is consciousness? How do we think and perceive? What does it mean to be "neurotypical"? What does all of this have to do with who we are?

Requisites: Requires a prerequisite course of HUMN 2000 (minimum grade C-) or restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 3505 (3) The Enlightenment: Tolerance and Emancipation

Examines Enlightenment notions of reason, humanity and social progress. Topics include 18th century views on government, science, education, religion, slavery and gender roles.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3505

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 3640 (3) Modernisms: Art and Theory from 1900 to 1960

Offers an introduction to Modernism in various media, emphasizing in particular the historical development of the visual arts from German Expressionism and Cubism to Neo-Dada and Pop Art. Readings in literature will include Proust, Beckett, Blanchot and poets associated with various art movements. Theoretical readings range from Saussure and Freud to Adorno and Jameson. Recommend prerequisite: HUMN 2000.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 3660 (3) The Postmodern

Analyzes the cultural and critical practices as well as the thought that defines the postmodern period at the end of 20th century.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3660

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 3702 (3) Dada and Surrealist Literature

Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3702

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 3802 (3) Politics and Culture in Berlin 1900-1933

Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. Offered through CU Study Abroad Program.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3802

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 3811 (3) Love, Death, and Desire: Classical Japanese Literature in Translation

Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784-1185). Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3811

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Asia Content

HUMN 3841 (3) Tradition and Transgression: Modern Japanese Literature in Translation

Surveys the major works, authors and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3841

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Asia Content

HUMN 3850 (3) The Mediterranean Religion Before Modernity

Offers an innovative approach to the multifaceted history of Christian-Muslim-Jewish interaction in the Mediterranean. It eschews established paradigms (e.g., Europe, Islamic world) that distort our understanding of these and pushes students to reconsider the accepted paradigms of Western history. Students will reappraise assumptions regarding the nature of ethnic, religious, national and cultural identity, and their role in human history.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3850

Additional Information: Arts Sci Core Curr: Historical Context

HUMN 3860 (3) Politics and the Arts in the Information Age

Examines the political aspects of the art and literature of the information age, with a focus on conceptual practices since 1965. The course investigates political theories of art along side sculpture, performance, installation, poetry, and graphic design.

Recommended: Requisite HUMN 2000 or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3930 (1-6) Humanities Internship

Students gain academic credit and professional experience working in museums, galleries, arts administration, and publishing. They work 3-18 hours per week with their professional supervisor and meet regularly with a faculty advisor who determines the reading and writing requirements. An interview with faculty advisor is required.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 3935 (1-3) Humanities Internship: Literature and Social Violence
See HUMN 4835.

Requisites: Requires enrollment in corequisite course of HUMN 4835.

HUMN 4000 (3) The Question of Romanticism

Interdisciplinary study of literature, art, and music from 1780 to 1830 in France, England, and Germany.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topics, establishing critical dialogue with the primary materials.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4004 and ARTF 5004

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 3051 (minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Film (FILM or FMST) or Humanities (HUMN) majors only.

HUMN 4010 (3) Hitchcock and Freud

Applies Freudian psychoanalysis to the films of Alfred Hitchcock. Students will familiarize themselves with the Freudian methodology by reading a number of books and essays and then apply both Freud's general ideas as well as specific texts to particular aspects, both formal and contentual, of his films. Particular attention will be given to the important field of "feminism and psychoanalysis" as it relates to the study of the role of women in Hitchcock's films.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 4011 (3) The Criminal-Hero

Studies various theories of literary transgression by Aristotle, Nietzsche, Freud, Bataille and others to understand the many works, beginning with Genesis and the Iliad and including contemporary works such as Norman Mailer's *The Executioners Song* and the films of Herzog (*Aguirre*, *Nosferatu*) and Scorsese (*Taxi Driver*, *Cape Fear*) which feature this paradoxical figure.

HUMN 4020 (3) Reading, Chance, and Guessing

Considers the method of the humanities as opposed to those of the natural and social sciences, especially in view of their respective ability or claim to predict the future and to master chance.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4030 (3) The Art of Travel

Examines the art of travel: not where to go and what to do, but rather philosophical concepts about why people travel. Areas of discussion will include exploration, discovery, escape, pilgrimage, the grand tour, expatriotism, exile, nomadism, armchair travel, and the sense of home. Materials will include books by travel writers, novels, films, essays, short stories, art, music, and historical documents.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4050 (3) Representations of People with Disabilities

Examines the representation of people with disabilities in canonical and contemporary literature and drama, and introduces students to disability theory and the history of people with disabilities.

HUMN 4060 (3) Modern Critical Theory

Explores, through guided discussions, the concept of theory itself and how a theory is constructed. Emphasizes the close reading of theory in order to learn to analyze critically, considering theory as something to be thought about rather than simply applied.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4082 (3) 19th Century Art and Literature

Interdisciplinary study of English fiction and poetry together with related movements in visual arts.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4092 (3) Advanced Studies in the Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4093 (3) Advanced Topics in the Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4100 (3) Writing the World in Traditional China

Examines the history and implications of the central role played by writing in pre-modern China, especially with regard to traditional constructions of the world, including relations with aesthetics, the non-human, and the spiritual. Key works of Chinese literature and thought from different periods are studied, with the aim of determining a particular type of Chinese humanism. All readings in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Asia Content

HUMN 4110 (3) Greek and Roman Epic

Students read in English translation the major epics of Greco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and CLAS 5110

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4111 (3) Modern and Contemporary Culture

Examines the legacy of the historical avant-garde (1910-1930) in postwar and contemporary culture: 1945 to the present. We will study the construction of a "neo-avant-garde" in diverse fields (art, film, philosophy) as well as the methodology of "social art history" which, like the artistic neo-avant-garde, critically analyzes the relation between aesthetic production and global capitalism.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Grading Basis: Letter Grade

HUMN 4120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and CLAS 5120

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and CLAS 5130

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4131 (3) The Greek and Roman Novel

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and CLAS 5140

HUMN 4135 (3) Art and Psychoanalysis

Explores psychoanalytic theory as it relates to our understanding of literature, film and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/libido, dreamwork, etc.), students apply these ideas to works by several artists (e.g., Flaubert, James, Kafka, Hoffmann and Hitchcock).

Equivalent - Duplicate Degree Credit Not Granted: FILM 4135

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4140 (3) The Age of Dante: Readings from The Divine Comedy

Focuses on close reading of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or 4145 or ITAL 4147

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4150 (3) Boccaccio's Decameron: Tales of Sex and Death in the Middle Ages

Studies Boccaccio's masterpiece, the Decameron, as emblematic of the post-Black Plague era in the late Middle Ages. Focuses on the art of storytelling through gendered perspectives to portray the complexity of the Middle Ages. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4150

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Literature and the Arts

HUMN 4155 (3) Philosophy, Art, and the Sublime

Explores philosophies of art, theories of the sublime, and the relation between art and morality through philosophy, literature, and the visual arts. Includes works by Plato, Longinus, Burke, Rousseau, Kant, Mary Shelley, Melville, Friedrich, Turner, and Pollock.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 4170 (3) Fiction and Reality: Literature, Science, and Culture

Explores the significance of how one defines "fiction" and "reality". Begins by defining the core concepts and compares them with related terms. Lectures and discussions analyze the implications of these concepts from the perspective of a variety of disciplines and in the context of diverse issues in order to develop a critical awareness of them. Reading and writing intensive.

Recommended: Requisite HUMN 2000 and restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4502 (3) Nietzsche: Literature and Values

Emphasis is placed on Nietzsche's major writings spanning the years 1872-1888, with particular attention to the critique of Western values. A systematic exploration of doctrines, concepts and ideas leading to the values of creativity.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4502

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 4504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4504 and GRMN 5504

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4552 and ETHN 5552

Requisites: Requires prerequisite course of ETHN 1022 or ETHN 2001 or ETHN 3212 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

HUMN 4555 (3) Interpreting Art

Introduces various methods of interpretation (New Criticism; Reader Response; structuralism, post-structuralism, psychoanalysis, art history, etc.) with which to examine how one determines the meaning of the work of art. Methodologies are studied in close conjunction with particular poems, paintings, stories and films.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4650 (3) Religion, Power, Modernity

Examines the representation of religion in relationship to the claims made by modern narratives of power in fables, literature, graphic novels, visual materials and critical writings.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 4730 (3) Italian Feminisms: Culture, Theory, and Narratives of Difference

Studies Italian women writers, artists and filmmakers. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4730

Additional Information: Arts Sci Core Curr: Human Diversity

HUMN 4811 (3) 19th Century Russian Literature

Surveys background of Russian literature from 1800 to 1900. Russian writers and literary problems in the 19th century emphasizing major authors: Pushkin, Lermontov, Gogol, Dostoevsky, Turgenev, Tolstoy, and Chekhov.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4811

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4821 (3) 20th Century Russian Literature and Art

Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4821

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4835 (3) Literature and Social Violence

Provides a theoretical understanding of heightened awareness arising from literary and sociological investigations of contemporary sources of social violence (gang culture, racism, domestic violence), combined with the concrete knowledge offered by an internship in a social service agency. Optional internship credit is available.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Contemporary Societies

HUMN 4840 (1-3) Independent Study

May be repeated for a maximum of 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

HUMN 4845 (3) Reading Culture: The Meanings We Make

Analyzes a range of literary and cultural texts through the lens of critical theory in order to come to more understanding of how we are making meaning, how those meanings make us and how we might use that awareness to open new fields of possibility, both in our readings of texts and in our reactions to cultural contexts and conventions.

Grading Basis: Letter Grade

HUMN 4950 (1-6) Honors Thesis

Supervised project on a topic of the student's own choosing. It should demonstrate ability in interdisciplinary (such as literature and art, art and music, film and literature, literature and theory), extensive research, critical thinking, and excellent writing skills. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Humanities (HUMN) majors only.

Humanities for Engineers (HUEN)

Courses

HUEN 1010 (3) Humanities for Engineers

Explores a wide variety of challenging and interesting humanistic themes (love, responsibility, ambition, etc.) in many forms (fiction, philosophy, plays, poetry, art, music, etc.). In small discussion-based classes, emphasizes the writing, public speaking and critical thinking skills needed to excel as a professional engineer. Fulfills College of Engineering writing requirement for first-year freshmen only.

Requisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

HUEN 1843 (3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

HUEN 1850 (3) Engineering in History: The Social Impact of Technology

Explores how engineering has shaped who we are, how we think, and what we think about, by examining preconceived notions of progress, property, time, and work. Textbook readings plus original sources in philosophy, literature, psychology, and economics provide a rich and stimulating tour of engineering history.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

HUEN 2010 (3) Tradition and Identity

Explores the place and possibility of personal identity both within and against the influence of tradition, including family, culture, language, and social, political and economic institutions. Via literature and film, wrestles with the nature of freedom, self-determination, and belonging.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2020 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 2000

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2100 (3) History of Science and Technology to Newton

Spans invention and discovery from the Stone Age to the age of Newton, raising questions about culture, history, and personal expectation; studies Pyramids, odometers, cathedrals, Galileo, etc., on the way.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2120 (3) History of Modern Science from Newton to Einstein

Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and biology; closely examines scientific method, evolution, light and quantum theory. Uses original sources by Newton, Faraday, Lavoisier, Darwin, etc., for immediate contact with the great minds in science.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2130 (3) History of Modern Technology from 1750 to the Atomic Bomb

Surveys the great innovations from the Steam Age to the Atomic Age: transportation, modern construction, communications, internal combustion, etc. Supplements textbook accounts with drawings, patents, and original selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2210 (3) Engineering, Science, and Society

Explores challenges that engineering and science pose for society plus the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films.

Requisites: Restricted to College of Engineering majors only.

HUEN 2843 (1-3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 3100 (3) Advanced Humanities for Engineers

Explores what it means to be a fully human being: through group discussion, closely examines individual works of culturally and historically significant philosophy, literature and art. Includes extensive writing. Fulfills the College of Engineering & Applied Science writing requirement. Department prerequisite: a minimum GPA of 3.0.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

HUEN 3200 (3) Humanities for Engineers 2

Continues HUEN 3100's discussion of the human condition by exploring culturally and historically significant works of multiple genres in small-group seminars. Alert class participation is required, and writing skills will be honed through regular assignments.

Requisites: Requires prerequisite course of HUEN 3100 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

HUEN 3350 (3) Gods, Heroes and Engineers: The Western Quest for Excellence

Investigates the intensely competitive quest of the ancient Greeks for excellence in everything from art and literature to science and war and also the odyssey of the mind generated by this quest, culminating in our modern world.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Grading Basis: Letter Grade

HUEN 3430 (3) Ethics of Genetic Engineering: A Multidisciplinary Approach

Investigates the metaphorical, ideological and scientific constructs that inform debates over the genetic modification of humans, animals and plants. Begins with a close reading of Shelley's *Frankenstein*, proceeds to a consideration of philosophical arguments for and against human modification and concludes with a consideration of the scientific and political contexts that inform the regulation of genetically modified foods.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

HUEN 3700 (3) Culture Wars in Rome

Investigates in Rome, Italy (during Maymester), the cultural contrasts among three different cities: ancient, pagan, aristocratic Rome; medieval, Christian, theocratic Rome; and modern, secular, democratic Rome. Draws on evidence from Roman literature, politics, art and architecture. Must have completed a minimum of 26 credit hours by start of course. Requires some preparatory work in Boulder.

Repeatable: Repeatable for up to 6.00 total credit hours.

HUEN 3750 (3) Xi'an, China: Self-Awareness and Images of the Other

Explores Chinese culture abroad, focusing on ideas of self and other within special historical, social, political and economical circumstances. Chinese and American concepts of self and society, of individual, collective and national identities will be analyzed. Held on the campus of Xi'an Jiaotong University, China.

Requisites: Requires prerequisite course of HUEN 1010 (minimum grade D-).

Additional Information: Departmental Category: Asia Content

HUEN 3840 (1-3) Independent Study

Offers an opportunity for students to do independent work in the humanities. Subject arranged to fit the needs of the student. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

HUEN 3843 (1-3) Special Topics

Explores different important themes in the humanities, check with department for specific semester topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

HUEN 4200 (3) Humanities for Engineers 4

Provides opportunity to pursue a variety of humanistic themes related to Herbst Humanities Program.

HUEN 4800 (1) Leadership & Ethics in the Real World

Indonesian (INDO)

Courses

INDO 1010 (5) Beginning Indonesian 1

Provides a thorough introduction to the modern Indonesian language, emphasizing speaking, listening, reading and writing skills. This course is proficiency-based. Activities aim to place the student in the context of the native-speaking environment from the very beginning. Students will be provided opportunities to participate in local Southeast Asian cultural events. Students with previous experience with Indonesian or Malay should contact the instructor for placement.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Indonesian

INDO 1020 (5) Beginning Indonesian 2

Continuation of INDO 1010. Provides a thorough introduction to the modern Indonesian language, emphasizing the context of the native-speaking environment from the very beginning. Students will be provided with opportunities to participate in local Southeast Asian events. Students with previous experience with Indonesian or Malay should contact the instructor for placement.

Requisites: Requires prerequisite course of INDO 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Indonesian

INDO 2010 (4) Intermediate Indonesian 1

Aims to increase the students' proficiency in listening, speaking, reading, and writing in modern Indonesian. Students will use only Indonesian in class. Evaluation based on classroom performance, homework, tests, and final project. Students will be provided with opportunities to participate in local Southeast Asian cultural events. Students with previous experience with Indonesian or Malay should contact the instructor for placement.

Requisites: Requires prerequisite courses of INDO 1010 and INDO 1020 (all minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Indonesian

INDO 2020 (4) Intermediate Indonesian 2

Continuation of INDO 2010. Aims to increase the students' proficiency in listening, speaking, reading, and writing in modern Indonesian. Students will use only Indonesian in class. Evaluation based on classroom performance, homework, tests, and final project. Students will be provided with opportunities to participate in local Southeast Asian cultural events. Students with previous experience with Indonesian or Malay should contact the instructor for placement.

Requisites: Requires prerequisite course of INDO 2010 (minimum grade C).

Additional Information: Departmental Category: Indonesian

INDO 3010 (3) Advanced Indonesian 1

Develops students' proficiency in language skills in modern Indonesian. Emphasis is on students' command in leading discussion and writing in formal Indonesian. Students read classic and contemporary authentic materials. Evaluation based on classroom performance, essays, and final project. Students will be provided with opportunities to participate in local Southeast Asian cultural events. Fluent Indonesian or Malay speakers who wish to learn more about Indonesian cultures should contact the instructor for placement.

Requisites: Requires prerequisite course of INDO 2020 (minimum grade C).

Additional Information: Departmental Category: Indonesian

INFO 3020 (3) Advanced Indonesian 2

Continuation of INFO 3010. Develops students' proficiency in language skills in modern Indonesian. Emphasis is on students' ability to lead discussion and write in formal Indonesian. Students read classic and contemporary authentic materials. Evaluation based on classroom performance, essays, and final project. Students will be provided with opportunities to participate in local Southeast Asian cultural events. Fluent Indonesian or Malay speakers who wish to learn more about Indonesian cultures should contact the instructor for placement.

Requisites: Requires prerequisite course of INFO 3010 (minimum grade C).

Additional Information: Departmental Category: Indonesian

Information Science (INFO)

Courses

INFO 1101 (3) Computation in Society

Introduces students to modern information and communication technology, the basic principles of software and programming, the fundamental role of algorithms in modern society, computational reasoning, the major organizations in the information sector and fundamental interactions between humans and information technology. Appropriate for students with limited prior experience with computing. Fulfills the CMCI computing requirement.

Grading Basis: Letter Grade

INFO 1111 (4) Representations Seminar and Studio

Expands students' perspectives on fundamental categories of human experience and helps them develop critical perspectives on how that experience is constructed. Focuses on the ways in which experiences and world views reflect cultural and social differences. Studio format enables students to directly understand how systems of convention live in the simplest of representations.

Grading Basis: Letter Grade

INFO 1112 (4) Representations Seminar and Studio

Expands students' perspectives on fundamental categories of human experience and helps them develop critical perspectives on how that experience is constructed. Focuses on the ways in which experiences and worldviews reflect cultural and social differences. Studio format enables students to directly understand how systems of convention live in the simplest of representations.

Requisites: Requires enrollment in corequisite course of INFO 1111.

Grading Basis: Letter Grade

INFO 1121 (4) Interactions Seminar and Studio

Provides an introduction to thinking about human-centered design and the universal requirements of interactions with data, information and technologies. Studio experiences challenge students to consider the impact that design choices in information and computing technologies have on a) enabling diverse audiences to access, manipulate and experience information, and b) how differences get encoded by data structures, ultimately reflecting biases.

Requisites: Requires enrollment in corequisite course of INFO 1122.

Grading Basis: Letter Grade

INFO 1122 (3) Interactions Seminar

Surveys key concepts and theories in Information Science, focusing on the ways information enables new ways of living, working and thinking. Students will critically examine texts, systems and interpretations of data from a variety of disciplinary perspectives that speak to how people, infrastructures and contexts constrain and enable uses of information.

Requisites: Requires enrollment in corequisite course of INFO 1121.

Grading Basis: Letter Grade

INFO 1201 (3) Computational Reasoning 1: Expression and Media Transformation

Introduces principles of computational thinking through the manipulation, transformation and creation of media artifacts, such as images, sound and web pages. Students will be exposed to a high-level overview of algorithms, functions, data structures, recursion and object-oriented computer programming through a series of assignments that emphasize the use of computation as a means of creative expression.

Grading Basis: Letter Grade

INFO 1301 (3) Quantitative Reasoning 1: Intuitions and Evidence

Surveys concepts and techniques for characterizing and quantifying data. Students will learn to use different types of quantitative data, to summarize data with descriptive statistics, to measure similarity of different datasets, to interpret probabilities and statistical significance and to quantify and predict changes in data.

Grading Basis: Letter Grade

INFO 2001 (1) Information Science Portfolio and Professional Development

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in their chosen field.

Grading Basis: Letter Grade

INFO 2131 (4) Ecosystems Seminar and Studio

Provides direct experience analyzing complex social systems of systems and develops students' ability to learn to listen for (and mediate among) diverse, discordant voices and values within larger communities, organizations and institutions. Employs a variety of qualitative research techniques in the studio, including interviewing, participant observation and ethnographic reflections on differences in communities of practice.

Requisites: Requires enrollment in corequisite course of INFO 2132.

Grading Basis: Letter Grade

INFO 2132 (3) Information Science Ecosystems Seminar

Surveys key concepts and theories in Information Science, focusing on the ways that communities, organizations and institutions influence the design and use of information. Students will critically examine texts, systems and interpretations of data from multiple disciplinary perspectives that speak to the complex interactions among the people and technologies that surround us and the ecosystems form by and through data.

Requisites: Requires enrollment in corequisite course of INFO 2131.

Grading Basis: Letter Grade

INFO 2201 (3) Computational Reasoning 2: Representations of Data

Surveys techniques for representing data and expressing relationships among data, both at small scales (for example, via programmatic data structures) and at large scales (for example, in various kinds of database systems). Introduces fundamentals of algorithm analysis and the trade-offs involved in managing data using different approaches, tools and organizing principles.

Requisites: Requires prerequisite course of INFO 1201 or CSCI 1300 or CSCI 1310 (minimum grade C-).

Grading Basis: Letter Grade

INFO 2301 (3) Quantitative Reasoning 2: Uncertainty and Inference

Introduces intermediate-level methods for quantitative data analysis, focusing on foundational concepts in probability and statistical inference along with complementary computational skills and tools. The course will cover basic probability concepts, common probability distributions and methods for estimating their parameters, multivariate regression with applications to forecasting and classification and a variety of methods of statistical significance testing.

Requisites: Requires prerequisite course of INFO 1201 and INFO 1301 (all minimum grade C-).

Grading Basis: Letter Grade

INFO 3001 (1) Information Science Portfolio and Professional Development

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in their chosen fields.

Grading Basis: Letter Grade

INFO 3101 (3) History of Information, Science and Society

Focusing on two topics: the changing role of information in everyday life over time and the increasing role of information in disciplinary studies such as social science, engineering, computer science, mathematics, digital humanities. Examines information related academic disciplines, businesses, industries and technologies from multiple perspectives from the 17th century to the present.

Grading Basis: Letter Grade

INFO 3401 (3) Information Exploration

Teaches students how to use information to identify interesting real world problems and to generate insight. Students will learn to find, collect, assemble and organize data to inspire new questions, make predictions and work towards solutions. They will learn to appropriately apply different methods (including computational, statistical and qualitative) for exploratory data analysis in a variety of domains.

Requisites: Requires prerequisite course of INFO 2201 and INFO 2301 and INFO 1121 or INFO 2131 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 3402 (3) Information Exposition

Teaches students to communicate information to a wider audience and construct stories with data across a variety of domains. Students will learn to use data for rhetorical purposes, applying visual, statistical and interpretative methods. Students will learn to think critically about ethical and social implications of using data in expository media, including identification of bias.

Requisites: Requires prerequisite course of INFO 1301 or INFO 2301 (minimum grade C). Restricted to students with 57-180 credits (Junior or Senior) Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 3501 (3) Problems in Information Science: Peer Production and Crowdsourcing

Analyzes the mechanisms of peer production and crowdsourcing systems like Wikipedia and OpenStreetMap. Students will investigate how these crowdsourced platforms work socially and technically, develop skills using tools for their analysis and critically evaluate platform and community limitations. Problems in Information Sciences is a series that brings contemporary research to the classroom in the form of progressive, project-based inquiry.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5501

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 3502 (3) Problems in Information Science: Online Communities

Explores practical and theoretical topics in online communities through inquiry into one or more particular online communities. Student projects will explore online communities as social and technical systems, including their alignment with conceptualizations of community, expressed and apparent interests, nature of membership and participation, history, participants' motivations for involvement, and explicit, implicit, and infrastructural features that enable and constrain behaviors.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5502

Grading Basis: Letter Grade

INFO 3503 (3) Problems in Information Science: Everyday Information Behavior

Familiarizes students with practical and theoretical topics in the discipline of information behavior and its application to everyday events, activities and environments. Explores the information dimension of various everyday activities such as buying a car, playing a game or looking up health information on line. Students learn to analyze the informational dimensions that occur in their everyday lives.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5503

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 3504 (3) Problems in Information Science: Digital Identity

Explores and analyzes identity in a digital era. Through applied research, students investigate both social and technical aspects of how identity is captured, represented and experienced through technology using theoretical, empirical and design-based inquiry. Methods and platforms studied vary by semester. "Problems in Information Science" is a series that brings contemporary research to the classroom in the form of progress, project-based inquiry.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5504

Grading Basis: Letter Grade

INFO 3505 (3) Problems in Information Science: Designing for Creativity and Learning

Analyzes learning technologies, discusses learning theories and develops prototypes to investigate strategies for engaging people in creative and inclusive learning experiences. Students explore design, learning and technology by examining sociotechnical systems like construction kits, online communities and makerspaces with a critical lens on equity and inclusion. Studio format enables students to apply constructionist ideas into the design of technology-enabled environments.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5505

Grading Basis: Letter Grade

INFO 4001 (1) Information Science Portfolio and Professional Development

Facilitates career development through the disciplined reflection about and presentation of one's work using a variety of modalities across a variety of media. Students will be introduced to individuals and organizations representing a diversity of career paths in their chosen field.

Grading Basis: Letter Grade

INFO 4601 (3) Ethical and Policy Dimensions of Information, Technology and New Media

Explores ethical and legal complexities of information and communication technology. By combining real-world inquiry with creative speculation, students will probe everyday ethical dilemmas they face as digital consumers, creators and coders, as well as relevant policy. Explores themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5601

Requisites: Restricted to students with 55 or more hours.

Grading Basis: Letter Grade

INFO 4602 (3) Mastery in Information Science: Information Visualization

Explores the design, development and evaluation of information visualizations. Covers visual representations of data and provides hands-on experience with using and building exploratory tools and data narratives. Students create visualizations for a variety of domains and applications, working with stakeholders and their data. Covers interactive systems, user-centered and graphic design, perception, data storytelling and analysis, and insight generation. Programming knowledge is strongly encouraged.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5602

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 4603 (3) Mastery in Information Science: Survey Research Design

Familiarizes students with practical and theoretical topics in using survey methods for conducting information science research. Through discussion and real world assignments, students will learn when and why to use surveys for collecting data; effective, efficient and ethical approaches to maximizing response; sampling issues; development of valid items and scales; and how to implement, analyze and report on survey data collection.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5603

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 4604 (3) Applied Machine Learning

Introduces algorithms and tools for building intelligent computational systems. Methods will be surveyed for classification, regression and clustering in the context of applications such as document filtering and image recognition. Students will learn the theoretical underpinnings of common algorithms (drawing from mathematical disciplines including statistics and optimization) as well as the skills to apply machine learning in practice.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5604

Requisites: Requires prerequisite courses of INFO 2201 and INFO 2301 (all minimum grade D-).

Grading Basis: Letter Grade

INFO 4605 (3) Mastery: Ethnographic Research in Applied Settings

Familiarizes students with ethnography as a research tool as it is used in corporate and consulting research. Systematically explores issues and topics in research for the purposes of product design and development.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5605

Requisites: Requires a minimum of 45 hours taken.

Grading Basis: Letter Grade

INFO 4611 (3) Mastery in Information Science: Ubiquitous Computer Experience Design

Introduces the field of ubiquitous computing, including sensors, ambient displays, tangibles, mobility, location awareness and context awareness. These topics are explored from a user-centered design perspectives, focusing on how a situated models of computing affect requirements gathering, interaction design, prototyping and evaluation. Students gain mastery with contemporary "UbiComp" technologies and learn to incorporate them into a user-centered design process.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5611

Requisites: Restricted to students with a minimum of 45 units.

Grading Basis: Letter Grade

INFO 4700 (3) Senior Capstone

Provides senior level INFO students an opportunity to demonstrate the culmination of their learning in the major by designing and implementing a significant information system or developing a research question, typically in response to a problem of personal interest related to or informed by their secondary area of specialization. Reinforces project planning, public presentation and ethic skills.

Requisites: Restricted to Information Science (INFO) majors only with a minimum of 90 hours.

Grading Basis: Letter Grade

INFO 4800 (1-3) Leadership Practicum in Information Science

Equips students for taking on leadership roles in the interdisciplinary context of information science. Students will learn to facilitate learning among students with diverse backgrounds and expertise, developing communication and mentoring skills and gaining exposure to a variety of learner-centered design strategies and pedagogical approaches. Enrollment is by invitation and at the discretion of the instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 4841 (1-4) Undergraduate Independent Study

Undergraduate independent study.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 4871 (3) Special Topics

Special topics.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

INFO 4900 (1-6) Research Experience in Information Science

Provides research experience in information science. Students will contribute to the construction of new knowledge of novel systems, helping to answer current research questions or to solve contemporary problems in the domain. Enrollment is by invitation and discretion of the advising faculty member.

Repeatable: Repeatable for up to 12.00 total credit hours.

Grading Basis: Letter Grade

INFO 4931 (1-6) Undergraduate Internship

Undergraduate internship.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Information Science (INFO) majors only.

Grading Basis: Letter Grade

INFO 5000 (3) Introduction to Doctoral Studies in Information Science

Introduces students to practices associated with successful advancement in a doctoral program, rigorous scholarship in Information Science and more expert and early participation in their scholarly community of practice.

Grading Basis: Letter Grade

INFO 5101 (3) Theories and Concepts in Information Science

Surveys foundational theories and concepts in Information Science.

Students will learn to read and reflect critically about seminal texts, tracking their intellectual genealogies from a variety of originating disciplines to their appropriation by Information Science. Students will apply these theories to contemporary issues and problems.

Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.

Grading Basis: Letter Grade

INFO 5201 (3) Interdisciplinary Ways of Knowing

Introduces principles of research design and surveys the breadth of research methods appropriated by the field of information science.

Students will explore the diversity of epistemological orientations that make up the field, that influence the types of often mixed research methods applied and that shape the kinds of questions that are and are not explored.

Grading Basis: Letter Grade

INFO 5301 (3) Computation for Research in Information Science

Introduces principles of computational thinking through the manipulation, transformation and creation of data artifacts used in research. Students will be exposed to a high-level overview of algorithms, functions, data structures, recursion and object-oriented computer programming through a series of assignments that emphasize the use of computation as a means of scholarship.

Grading Basis: Letter Grade

INFO 5401 (3) Information and Ideas in Design Disciplines

Introduces principles and practices from user-centered design disciplines and examines how those principles and practices intersect with contemporary issues in information science. Theory, research and exemplary practices from interaction, graphic, product, communication and experience design are introduced through readings, problems and case histories. Project provide direct experience with common design tools and processes.

Grading Basis: Letter Grade

INFO 5501 (3) Problems in Information Science: Peer Production and Crowdsourcing

Analyzes the mechanisms of peer production and crowdsourcing systems like Wikipedia and OpenStreetMap. Students will investigate how these crowdsourced platforms work socially and technically, develop skills using tools for their analysis and critically evaluate platform and community limitations. Problems in Information Sciences is a series that brings contemporary research to the classroom in the form of progressive, project-based inquiry.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3501

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

INFO 5502 (3) Problems in Information Science: Online Communities

Explores practical and theoretical topics in online communities through inquiry into one or more particular online communities. Student projects will explore online communities as social and technical systems, including their alignment with conceptualizations of community, expressed and apparent interests, nature of membership and participation, history, participants' motivations for involvement, and explicit, implicit, and infrastructural features that enable and constrain behaviors.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3502

Grading Basis: Letter Grade

INFO 5503 (3) Problems in Information Science: Everyday Information Behavior

Familiarizes students with practical and theoretical topics in the discipline of information behavior and its application to everyday events, activities and environments. Explores the information dimension of various everyday activities such as buying a car, playing a game or looking up health information on line. Students learn to analyze the informational dimensions that occur in their everyday lives.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3503

Grading Basis: Letter Grade

INFO 5504 (3) Problems in Information Science: Digital Identity

Explores and analyzes identity in a digital era. Through applied research, students investigate both social and technical aspects of how identity is captured, represented and experienced through technology using theoretical, empirical and design-based inquiry. Methods and platforms studied vary by semester. "Problems in Information Science" is a series that brings contemporary research to the classroom in the form of progress, project-based inquiry.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3504

Grading Basis: Letter Grade

INFO 5505 (3) Problems in Information Science: Designing for Creativity and Learning

Analyzes learning technologies, discusses learning theories and develops prototypes to investigate strategies for engaging people in creative and inclusive learning experiences. Students explore design, learning and technology by examining sociotechnical systems like construction kits, online communities and makerspaces with a critical lens on equity and inclusion. Studio format enables students to apply constructionist ideas into the design of technology-enabled environments.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3505

Grading Basis: Letter Grade

INFO 5601 (3) Ethical and Policy Dimensions of Information, Technology and New Media

Explores ethical and legal complexities of information and communication technology. By combining real-world inquiry with creative speculation, students will probe everyday ethical dilemmas they face as digital consumers, creators and coders, as well as relevant policy. Explores themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4601

Grading Basis: Letter Grade

INFO 5602 (3) Mastery in Information Science: Information Visualization

Explores the design, development and evaluation of information visualizations. Covers visual representations of data and provides hands-on experience with using and building exploratory tools and data narratives. Students create visualizations for a variety of domains and applications, working with stakeholders and their data. Covers interactive systems, user-centered and graphic design, perception, data storytelling and analysis, and insight generation. Programming knowledge is strongly encouraged.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4602

Grading Basis: Letter Grade

INFO 5603 (3) Mastery in Information Science: Survey Research Design

Familiarizes students with practical and theoretical topics in using survey methods for conducting information science research. Through discussion and real world assignments, students will learn when and why to use surveys for collecting data; effective, efficient and ethical approaches to maximizing response; sampling issues; development of valid items and scales; and how to implement, analyze and report on survey data collection.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4603

Grading Basis: Letter Grade

INFO 5604 (3) Applied Machine Learning

Introduces algorithms and tools for building intelligent computational systems. Methods will be surveyed for classification, regression and clustering in the context of applications such as document filtering and image recognition. Students will learn the theoretical underpinnings of common algorithms (drawing from mathematical disciplines including statistics and optimization) as well as the skills to apply machine learning in practice.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4604

Grading Basis: Letter Grade

INFO 5605 (3) Mastery: Ethnographic Research in Applied Settings

Familiarizes students with ethnography as a research tool as it is used in corporate and consulting research. Systematically explores issues and topics in research for the purposes of product design and development.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4605

Grading Basis: Letter Grade

INFO 5611 (3) Mastery in Information Science: Ubiquitous Computer Experience Design

Introduces the field of ubiquitous computing, including sensors, ambient displays, tangibles, mobility, location awareness and context awareness. These topics are explored from a user-centered design perspectives, focusing on how a situated models of computing affect requirements gathering, interaction design, prototyping and evaluation. Students gain mastery with contemporary "UbiComp" technologies and learn to incorporate them into a user-centered design process.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4611

Grading Basis: Letter Grade

INFO 5841 (1-3) Independent Study

Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

INFO 5871 (3) Special Topics

Topics will vary by semester.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

INFO 5931 (1-3) Internship

Internship

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

INFO 6101 (3) Theories and Concepts in Information Science

Surveys foundational theories and concepts in information science. Students will learn to read and reflect critically about seminal texts, tracing their intellectual genealogies from a variety of originating disciplines to their appropriation by information science. Students will apply these theories to contemporary issues and problems.

Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.

Grading Basis: Letter Grade

INFO 6201 (3) Interdisciplinary Ways of Knowing

Introduces principles of research design and surveys the breadth of research methods appropriated by the field of information science. Students will explore the diversity of epistemological orientations that make up the field, that influence the types of often mixed research methods applied and that shape the kinds of questions that are and are not explored.

Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.

Grading Basis: Letter Grade

INFO 6301 (3) Computation for Research in Information Science

Introduces principles of computational thinking through the manipulation, transformation and creation of data artifacts used in research. Students will be exposed to a high level overview of algorithms, functions, data structures, recursion and object oriented computer programming through a series of assignments that emphasize the use of computation as a means of scholarship.

Grading Basis: Letter Grade

INFO 6401 (3) Information and Ideas in Design Disciplines

Introduces fundamental principles and practices from user-centered design disciplines and examines how those principles and practices intersect with contemporary issues in information science. Theory, research and exemplary practices from interaction, graphic, product, communication and experience design are introduced through readings, problems and case histories. Projects provide direct experience with common design tools and exposure to leading practitioners.

Grading Basis: Letter Grade

INFO 6500 (1) Information Science Seminar

Enculturates graduate students in the discipline of Information Science through weekly seminar series that hosts guest speakers, internal faculty and graduate speakers and other community building and professional development activities.

Repeatable: Repeatable for up to 8.00 total credit hours.

Grading Basis: Letter Grade

INFO 6871 (3) Special Topics

Topics will vary by semester.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

INFO 7000 (3) Introduction to Doctoral Studies in Information Science

Introduces students to practices associated with successful advancement in a doctoral program, rigorous scholarship in information science and more expert and early participation in their scholarly community of practice.

Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.

Grading Basis: Letter Grade

INFO 7841 (1-3) Independent Study

Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to PhD students only.

INFO 7871 (3) Special Topics

Topics will vary by semester.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to PhD students only.

INFO 8991 (1-10) Dissertation

Dissertation.

Repeatable: Repeatable for up to 40.00 total credit hours.

Requisites: Restricted to PhD students only.

Integrative Physiology (IPHY)

Courses

IPHY 1950 (3) Introduction to Scientific Writing in Integrative Physiology

Provides an overview of writing skills and strategies, emphasizing those most important to the sciences, especially physiology. Focuses on fundamental skills, objective analysis, and scientific persuasion, with attention to clear organization and style, academic and scientific mechanics, and distinctions between audiences.

Requisites: Restricted to students with 0-86 credits (Freshmen, Sophomore or Juniors) only.

Additional Information: Arts Sci Core Curr: Written Communication MAPS Course: English

IPHY 2010 (1-3) Seminar in Integrative Physiology

Introduces a small group of lower-division students to current research topics in integrative physiology. Emphasizes relevant applications to real-world situations.

Repeatable: Repeatable for up to 6.00 total credit hours.

IPHY 2400 (2) Introduction to Medical Terminology for Future Health Professionals

Provides an introduction to medical terminology used within the health professions. Word roots, prefixes and suffixes used in medical records for major body systems will be examined and explained. The structure and functions of the major systems will be defined and described.

Recommended for IPHY students and students interested in pursuing a career in the health professions. No prerequisites required.

Grading Basis: Letter Grade

IPHY 2420 (3) Nutrition for Health and Performance

Focuses on the basic anatomy, physiology, and chemistry of nutrition.

Topics include weight management, the role of diet and lifestyle in disease prevention, specific nutrient deficiencies and toxicities, nutrition standards and guidelines, sports nutrition recommendations, agricultural practices, and food policy issues. IPHY juniors or seniors are excluded from taking this course.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 3400

Requisites: Restricted to non-IPHY majors or IPHY freshmen/sophomores (students with 0-56 credits) only.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

IPHY 2500 (1) Perspectives in Health and Medicine

Designed to increase awareness of issues that surround international and U.S. health care. Provides broad overview of topics relevant to 21st century medical practice. Includes guest lectures by faculty and practitioners from Denver Metro region, followed by opportunities to integrate new concepts using small group discussion and writing. Topics change each semester and may include: global development and health; socio-cultural issues in health care; health disparities; applied bioethics; health care system reform; narrative medicine.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Pass/Fail

IPHY 2750 (3) Introduction to Exercise Psychology

Focuses on how psychological factors influence exercise and motor performance in both clinical and sport settings. Major topics include motivation, arousal, stress, imagery, self-confidence, concentration and burnout. Principles of psychological skills training are also discussed.

IPHY 2800 (4) Introduction to Statistics

Examines the application of statistics to research relevant to integrative physiology. Includes instruction and hands-on experience with related computer programs and interpretation of the results of their use.

Requisites: Restricted to Integrative Physiology (IPHY) majors only.

Recommended: Prerequisite MATH 1300.

IPHY 2910 (1-6) Practicum in Integrative Physiology

Offers practical experience in organized situations with direct supervision.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

IPHY 3010 (1-2) Teaching in Integrative Physiology

Provides an opportunity to assist in teaching specific laboratory sections in IPHY under direct faculty supervision. Students must make arrangements with the faculty member responsible for the course in which they plan to assist.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

IPHY 3060 (4) Cell Physiology

Lect. and lab. Introduces the biology of eukaryotic systems at molecular, cellular and systems levels of integration, emphasizing the complementarities of structure and function and physiological mechanisms of regulation at the cellular and molecular level. Department enforced prerequisite: one year of general biology (lecture + lab).

Requisites: Requires prerequisite course of IPHY 3430 or IPHY 3470 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

IPHY 3400 (3) Nutrition for IPHY Majors

Focuses on the science of nutrition, reviewing the basic anatomy, physiology and chemistry of nutrition. Concepts will focus on what the body needs for proper nutrition, how they are obtained, absorbed and processed by the body. Studies will expand to include the following: diet types, nutrition during life stages (i.e. pregnancy), different disease states and real world applications.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 2420

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

Recommended: Prerequisite IPHY 3410.

Grading Basis: Letter Grade

IPHY 3410 (3) Introduction to Human Anatomy

Introduces the basics of human anatomy. Department enforced prerequisite: one year of general biology (lecture + lab).

IPHY 3415 (2) Human Anatomy Laboratory

Introduces structures of the human anatomical systems using human cadavers and animal tissue. This laboratory is meant to complement IPHY 3410. Department enforced prerequisites: one year of general biology (lecture + lab) and corequisite: IPHY 3410.

IPHY 3430 (3) Introduction to Human Physiology

Introduces the physiology of the nervous, muscular, cardiovascular, respiratory, urinary, immune, endocrine, digestive and reproductive systems. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 3321 and CHEM 3451 (all minimum grade C-). Restricted to non-Integrative Physiology (IPHY) majors only.

Recommended: Prerequisites IPHY 3410 and IPHY 3415.

IPHY 3435 (2) Physiology Lab

Introduces laboratory experience in selected aspects of human and comparative physiology for students in pharmacy and allied health programs. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 2800 (or equivalent); IPHY 3410, IPHY 3415 and IPHY 3430 (prerequisites for majors; recommended courses for non-majors); IPHY 3430 (non-majors only).

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-).

Recommended: Corequisite IPHY 3480 (majors only).

IPHY 3440 (3) Clinical Nutrition

Exploration of clinical nutrition concepts from a health care provider perspective. Examines how and why diseases develop and what nutritional therapy and intervention is appropriate for disease resolution.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

Recommended: Prerequisite IPHY 2420.

IPHY 3450 (3) Comparative Animal Physiology

Introduces principles of animal physiology and responses to environmental change. Involves animals and/or animal tissues. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

IPHY 3460 (5) Comparative Vertebrate Anatomy

Introduces major components of the vertebrate body and how they are organized into a whole organism, emphasizing function, evolution, and diversity of these basic features. Laboratories involve dissection of representative groups and demonstrations. Involves animals and/or animal tissues. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

IPHY 3470 (3) Human Physiology 1

Focuses on scientific thinking, cell physiology, neurophysiology, endocrinology, immunology and musculoskeletal physiology. First semester of a two-semester sequence for IPHY and NRSC majors only. Department enforced prerequisites: IPHY 3410 and one year of general biology (lecture and lab) and one year of general chemistry (lecture and lab).

Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 3321 and CHEM 3451 (all minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

IPHY 3480 (3) Human Physiology 2

Focuses on the physiology of the respiratory, cardiovascular, urinary, digestive and reproductive systems. The second semester of a two-semester sequence for IPHY and NRSC majors. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3410 and 3415.

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

Recommended: Corequisite IPHY 3435.

IPHY 3490 (3) Introduction to Epidemiology

Examines the history and uses of epidemiology, measures of disease frequency and occurrence, association and causality, analytic epidemiology, evidence-based screening and outbreak investigations.

Recommended: Prerequisites IPHY 2800 and SOCY 2061 and PSYC 3101.

IPHY 3500 (2) Applied Clinical Research

Introduces fundamental concepts of clinical research to those interested in pursuing a career in medicine or medical research. In addition to lectures introducing students to research design, errors in research and basic biostatistics, there will be significant emphasis on participation in on-going medical research at Denver Health Medical Center and The Children's Hospital. This unique experience will provide students with first-hand exposure to all aspects of clinical research. Department enforced prerequisites: one year of general biology (lecture + lab).

Recommended: Prerequisite CHEM 3111 and premedical focus and/or previous research experience.

IPHY 3580 (3) Sleep, Circadian Rhythms and Health

Examines the history of sleep and circadian rhythms; lifespan development of sleep and rhythms; observational, physiological and clinical measures of sleep; screening for sleep and circadian disorders; associations between poor sleep and circadian misalignment and health; and evidence-based sleep and circadian interventions/preventions in healthy and clinical samples. Department enforced prerequisites: one year general biology plus labs, and one semester of statistics.

IPHY 3660 (3) Dynamics of Motor Learning

Focuses on information processing approaches and dynamical systems theory as explanations for human motor learning and the coordination of movement. Various topics are discussed from both perspectives including practice organization, attainment of elite performance, and the production of novel movements.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

IPHY 3700 (3) Scientific Writing in Integrative Physiology

Takes a process-based approach to writing. Assignments and classroom experiences emphasize critical thinking, using scientific evidence and reasoning to construct original arguments, and applying conventions and problem-solving skills to craft successful documents. Department enforced prerequisite: IPHY 2800 or equivalent.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Additional Information: Arts Sci Core Curr. Written Communication

IPHY 3800 (3) Forensic Biology

Introduces basic concepts of modern forensic science with emphasis on biological aspects such as forensic entomology, forensic botany, hair analysis, forensic anthropology, and forensic DNA analysis. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

IPHY 3810 (1) Forensic Biology Laboratory

Introduces basic laboratory techniques and procedures of modern forensic science with emphasis on biological aspects such as forensic entomology, forensic botany, hair analysis, forensic anthropology and forensic DNA analysis. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Recommended: Corequisite IPHY 3800.

IPHY 4010 (1-3) Seminar in Integrative Physiology

Introduces a small group of students to current research topics in integrative physiology, evaluation of current research and discussion of critical issues. Department enforced prerequisite: IPHY 2800 or equivalent.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

IPHY 4200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5200

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

IPHY 4440 (4) Endocrinology

Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5440

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

IPHY 4470 (3) Biology of Human Reproduction

Anatomy and physiology of human reproduction, including gender determination, embryology, puberty, menstrual cycle, pregnancy, lactation, menopause, sexual behavior, sexual abnormalities and contraception. Open to nonmajors. Department enforced prerequisites: one year of general biology (lecture + lab).

Recommended: Prerequisites IPHY 3470 and IPHY 3480 (majors) or IPHY 3430 or (non-majors) or IPHY 4440.

IPHY 4480 (3) Comparative Reproduction

Focuses on comparative anatomy and physiology of reproductive system and the evolution of reproductive behavior in vertebrates and invertebrates. Topics include courtship, mating, fertilization, estrous and menstrual cycles and environmental control of seasonal reproduction. Department enforced prerequisite: one year of general biology (lecture + lab).

Recommended: Prerequisite IPHY 3480 (majors) or IPHY 3430 (non-majors).

IPHY 4490 (3) Case Studies in Public Health

Explores case studies in public health in how they have influenced our approach to disease outbreaks and disease resolution. Examines famous case studies in infectious disease, zoonoses and non-infectious diseases, including environmental and occupational exposure to see how they have changed our understanding of disease and responses by health and medical personnel. Examines special populations within public health, as well as discuss modern public health challenges.

Requisites: Requires prerequisite courses of IPHY 3490 (minimum grade D-).

Grading Basis: Letter Grade

IPHY 4540 (5) Biomechanics

Applies the principles of physics and physiology to the analysis of human movement. Quantitative analysis of the forces, torques, mechanical energy, power impulses and momentum associated with human movement. Mechanical properties of muscles, tendons, ligaments and bones. Department enforced prerequisites: PHYS 2010 or PHYS 1110 or IPHY 3410 and IPHY 2800.

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

Recommended: Prerequisites MATH 1300 or MATH 1310 or APPM 1350 and IPHY 3415.

IPHY 4580 (3) Sleep Physiology

Describes the physiology and neurobiology of sleep and impact of sleep, sleep deprivation, and sleep disorders on immune, endocrine, cardiovascular, respiratory, and neural systems, as well as examines changes in sleep across the life span. The integrative nature of sleep and circadian rhythms in normal

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-).

IPHY 4600 (3) Immunology

Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5600

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY), Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Recommended: Prerequisite IPHY 3060.

IPHY 4650 (5) Exercise Physiology

Examines physiological and biochemical adjustments that occur in the body with acute and chronic exercise. Topics center on physiological mechanisms pertaining to metabolic, cardiovascular, and hormonal alterations, the role of exercise in health and disease, soreness and fatigue, immune function, as well as exercise during varied environmental conditions. Department enforced prerequisites: IPHY 2800 or equivalent and IPHY 3480. Department enforced corequisite: IPHY 3410.

Requisites: Requires prerequisite course of IPHY 3470 and 3480 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

IPHY 4660 (3) Critical Thinking in Integrative Physiology

Covers specific integrative physiology topics in areas such as animal physiology, endothelial function, neurobiology, exercise immunology and exercise physiology. Department enforced prerequisite: 13-hours of IPHY coursework.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

IPHY 4680 (3) Critical Thinking in Exercise Physiology

Covers specific exercise physiology topics such as cellular cause of fatigue and muscle soreness, heart disease, regulation of blood flow, diabetes, aging, training adaptations, exercise at high altitude, ergogenic aids and excitation-contraction of muscle. Department enforced prerequisite: IPHY 4650.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

IPHY 4720 (4) Neurophysiology

Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5720

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

IPHY 4730 (3) Integrative Motor Control

Investigates human motor control by integrating concepts from exercise physiology, biomechanics, and sport psychology. Applications are made to clinical and educational exercise contexts.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5730

Recommended: Prerequisites IPHY 3410 and IPHY 3470.

IPHY 4740 (3) Theory of Motor Skill Learning

Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory, and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5740

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IPHY 4850 (1) Honors Thesis Seminar

To be taken during the final academic year prior to graduation. Consists of a lecture component on Honors thesis writing and defense, as well as a seminar component where Honors candidates present their thesis research in a practice defense talk.

Recommended: Prerequisite IPHY 3700, minimum 3.3 GPA and a declared IPHY major and approval by departmental honors committee.

Grading Basis: Pass/Fail

IPHY 4860 (1-6) Independent Study: Undergraduate

Students may register for more than one section per term.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

IPHY 4870 (1-3) Honors Thesis

Department enforced prerequisites: IPHY 2800 and IPHY 3700.

Additional Information: Arts Sciences Honors Course

IPHY 4890 (3) Community-Based Primary Health Care

Introduces models of Community-Based Health Care (CBPHC), relevant research regarding the models and methods of implementation in rural low resource settings. This 3 week summer global seminar in Nicaragua also includes public health data collection in a rural area in conjunction with local health promoters. Provides students with practical skills in the implementation of CBPHC in rural low resource settings.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite GEOG 3692.

Grading Basis: Letter Grade

IPHY 4930 (1-6) Internship

Provides an opportunity for field/laboratory work in a variety of different settings. Consult with faculty for approval. Department enforced prerequisite: completion of at least two of the major core classes.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IPHY 4940 (1-6) Application for Clinical Internship

Provides an opportunity for clinical experience in a clinic or hospital setting with which the University has an established Affiliation Agreement. Consult with faculty for approval. Department enforced prerequisite: completion of two 3000-level courses.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IPHY 5010 (1) Graduate Student Research Forum

Special topics spanning the broad scope of integrative physiology are covered in a seminar-style format. Presentations by current IPHY faculty are augmented by graduate student presentations of thesis and dissertation work.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 5100 (2) Colloquium in Integrative Physiology

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5102 (2) Introduction to Physiology Genomics

Covers recent developments in genomics: a body of revolutionary new approaches that deal with the analysis of all the DNA sequence in the cell. Relies on a genomics text and student presentation/discussion aided by a study guide.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200.

IPHY 5200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and PSYC 5200

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5262 (3) Application of Bioinformatics and Genomics

Explore public websites, databases, and bioinformatic tools that can be used for analysis of genomic data. These include NCBI Resources, genome databases, gene expression databases, tools for nucleotide and algorithms analyses and protein databases. Students develop a mini-grant proposal that is required to incorporate use of some of the tools covered.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200 and IPHY 5102.

IPHY 5300 (3) Statistical Genetics for Complex Traits

Focuses on the methods of mapping complex disease genes in both population and family-based samples. Topics include both linkage and association analyses of qualitative and quantitative phenotypes.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5440 (4) Endocrinology

Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4440

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5550 (3) Exercise Biochemistry

Examines the underlying biochemical mechanisms that are responsible for the physiological adaptations to short- and long-term dynamic exercise including carbohydrate, fat, and protein metabolism. The interaction of key biochemical alterations as it relates to disease (diabetes, obesity, and aging) and exercise will be addressed.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650 and one year of general chemistry (lecture + lab).

IPHY 5580 (3) Sleep Physiology

Describes the physiology and neurobiology of sleep and impact of sleep, sleep deprivation, and sleep disorders on immune, endocrine, cardiovascular, respiratory, and neural systems, as well as examines changes in sleep across the life span. The integrative nature of sleep and circadian rhythms in normal

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5600 (3) Immunology

Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4600

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisites one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3470.

IPHY 5720 (4) Neurophysiology

Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4720

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Grading Basis: Letter Grade

IPHY 5730 (3) Integrative Motor Control

Investigates human motor control by integrating concepts from exercise physiology, biomechanics, and sport psychology. Applications are made to clinical and educational exercise contexts.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4730

Recommended: Prerequisites IPHY 3410 and IPHY 3470.

IPHY 5740 (3) Theory of Motor Skill Learning

Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4740

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5800 (4) Advanced Statistics and Research Methods in Integrative Physiology

Introduces advanced statistical techniques important for analyzing data rising in biomedical research, including physiology. Statistical reasoning will be emphasized through problem solving and applications using statistical software packages.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 2800.

IPHY 5840 (1-6) Graduate Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6010 (1-3) Seminar

Presents special topics in integrative physiology.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6650 (3) Cellular Cardiovascular Physiology

Focuses on the cellular control of cardiac and smooth muscle contraction, at rest and in response to acute and chronic exercise. Addresses certain pathophysiological and physiological adaptive mechanisms.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650.

IPHY 6660 (3) Locomotion Energetics and Biomechanics

Critiques and discusses both classic and cutting edge scientific research in the area of terrestrial locomotion.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisites IPHY 4540 and IPHY 4650.

IPHY 6670 (2) Hypothesis Testing in Locomotion Biomechanics

Focuses on the scientific process including formulating and testing hypotheses in studies of locomotion. Students analyze primary articles to determine whether the studies tested hypotheses and to generate new hypotheses that logically follow from previous studies.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 6680 (3) Matlab for Physiological and Biomechanical Research

Introduces Matlab programming skills needed to write and modify programs for data acquisition and analysis, statistics, plotting, and simulation.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6830 (3) Professional Skills for the Research Scientist

Discusses grant and manuscript writing, scientific presentations, peer-review, setting up/directing a research laboratory, research ethics, mentoring and other professional skills.

Requisites: Restricted to Intergrative Physiology (IPHY) doctoral students only.

IPHY 6840 (1-3) Research Project

Involves a scholarly investigation of a selected topic using literature and/or experimental techniques. Advisor required.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6940 (1) Master's Degree Candidate

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Grading Basis: Pass/Fail

IPHY 6950 (1-6) Master's Thesis

Must have 4 credit hours and may be repeated up to 6 total credits.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to Intergrative Physiology (IPHY) doctoral students only.

Intermedia Art, Writing, & Performance (IAWP)

Courses

IAWP 6000 (3) Introduction to Practice-Based Research

Introduces students to practice-based research methods in intermedia art, writing and performance.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6100 (3) Theory and Practice of Doing

Introduces students to the theory of doing and making. Guiding questions include: what does it mean to place "doing" at the center of one's research agenda? What does it mean to do hands-on work in an art/design studio, a digital humanities lab, a media lab, a media archaeology lab, a makerspace or a hackerspace?

Equivalent - Duplicate Degree Credit Not Granted: ENGL 5529

Grading Basis: Letter Grade

IAWP 6200 (3) Intermedia Collaboratory

Collaborative studio course in which students focus on emerging practices in intermediate art, writing and performance while collaboratively building art, writing and/or performance projects that are presented to the community as public events and programs including exhibitions, publications and performances.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6700 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6800 (3) Intermedia Seminar

Focuses on intermedia arts, writing and performance as they relate to digital media, communication and information.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

Grading Basis: Letter Grade

IAWP 6871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

IAWP 7841 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

IAWP 7871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

IAWP 8991 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 40.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

International Affairs (IAFS)

Courses

IAFS 1000 (4) Global Issues and International Affairs

Introduces the student to the international affairs program. The course examines political and economic development in several countries in many different world regions. Examines historical trends and development as well as current political and economic issues.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

Departmental Category: Asia Content

IAFS 3000 (3) Special Topics in International Affairs

Junior or senior level umbrella seminar spanning a variety of topics relevant to the study of international affairs. Subjects addressed under this heading vary according to student interest and faculty availability.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) or Political Science (PSCI) majors only.

IAFS 3010 (3) Islam, Geopolitics and Society: Gender, Identity and Place

Examines Islam, geopolitics and society in various locations throughout the globe, such as Afghanistan, Egypt, France, Germany, India, Indonesia, Iran, Iraq, Ireland, Israel/Palestine, Morocco, Pakistan, Saudi Arabia, Turkey, Yemen, the UK and the US. Addresses issues of gender, identity and place to illustrate the complexity and diversity of social experiences within the milieu of Islam and geopolitics.

Grading Basis: Letter Grade

IAFS 3500 (3) French Connections: Contemporary France and America in Historical Context

Faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States. Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4190

Additional Information: Arts Sci Core Curr: Historical Context

IAFS 3520 (6) Global Seminar: Justice, Human Rights and Democracy in Israel

Explore the challenges and complexities of justice, democracy and human rights in Israel and the West Bank through field trips, course work and service learning projects with Jerusalem based non-profit organizations. Acquire new knowledge and lived experience on critical issues facing Israelis and Palestinians with the wider scope of Middle East politics.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4302

Recommended: Prerequisites ANTH 4050 or JWST 4050 and IAFS 3600 or JWST 3600.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Asia Content

IAFS 3530 (3) Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

Spend two weeks in Istanbul and examine Jewish-Muslim relations in a place that was for 500 years the crossroads of civilization. The only Muslim city in the 21st century with a large, thriving Jewish community, Istanbul models how people from different social classes, ethnicities and religious backgrounds can coexist.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3530 and RLST 3530

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

IAFS 3600 (3) Contemporary Jewish Societies

Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3600 and GSLL 3600

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Human Diversity

IAFS 3610 (3) Topics in International Affairs and Jewish Studies

Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3610

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IAFS 3621 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present

Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4481 and RUSS 5481

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context

IAFS 3630 (3) Radical Nationalism in Contemporary Northern Europe

Examines the current rise of National Socialists, white supremacists, ethnic separatists, anti-Islam activists and social and cultural ultraconservatives in northern Europe. Treats extremist nationalism as a social, cultural, aesthetic, intellectual and political movement. Consults scholarship from sociology, criminology and political science, as well as music, literature, art and film.

Equivalent - Duplicate Degree Credit Not Granted: SCAN 3301

Additional Information: Arts Sci Core Curr: Ideals and Values

IAFS 3631 (3) Arctic Society and Culture

Investigates representations of the Arctic in literature, art, cinema, media and scientific, and geographical writing over the past century and a half, spanning material from North America, Britain, continental Europe and the Nordic region. Interpretive approaches include ecocriticism; post-colonialism; literary studies; indigenous studies; visual, film and media theory; Cold War studies.

Equivalent - Duplicate Degree Credit Not Granted: SCAN 3631

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IAFS 3640 (3) Data Analysis for Global Environmental Affairs

Develops data analysis techniques for global environmental data including demographic, economic, agricultural, fisheries and energy sectors. Designed to support the development of basic and intermediate data analysis skills for students in the Global Environmental Affairs certificate program. Includes hands-on exploration of up-to-date global data sets from a variety of sources. Fulfills the application requirement for the ENVS major.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3640

Grading Basis: Letter Grade

IAFS 3650 (3) History of Arab-Israeli Conflict

Explores the origins and development of the Arab-Israeli conflict. Traces Arab-Jewish/Israeli relations from the 19th century through the Palestine Mandate, the evolution of Arab and Jewish nationalism and the creation of Israel to the present day.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3650

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) majors only.

Recommended: Prerequisite HIST 1308 or HIST 1828 or JWST 1828.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Asia Content

IAFS 4500 (3) The Post-Cold War World

Capstone course for international affairs majors. Examines the ways in which the end of the Cold War, the collapse of failed states, and the rise of global terrorism changed the world. Studies how peoples, governments and nongovernmental organizations face new social, political, economic and security challenges in an era of globalization. Includes discussion, oral reports, critical book reviews, and research papers.

Requisites: Restricted to students with 87-180 credits (Senior) International Affairs (IAFS) majors only.

IAFS 4800 (3) Honors Seminar in International Affairs

Directed research course tailored to the particular research interests of the students enrolled. Devoted to research methodology and the development of students' research. Department enforced prerequisite: overall 3.30 GPA and IAFS 3.40 GPA.

Additional Information: Arts Sciences Honors Course

IAFS 4810 (3) Honors in International Affairs

Continuation of IAFS 4800. Students complete original research begun in the fall and write, defend their honors thesis and meet regularly with the instructor.

Requisites: Requires prerequisite course of IAFS 4800 (minimum grade C-).

Additional Information: Arts Sciences Honors Course

IAFS 4900 (1-6) Independent Study in International Affairs

Provides an opportunity to earn academic credit for learning outside the formal class structure. Students interested in doing in-depth research propose a research project to a faculty sponsor and then work closely with that person to produce a piece of original research. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors), GPA of 3.00 or better, grade of C or better in all lower-division courses, and at least 6 upper-division courses.

Repeatable: Repeatable for up to 6.00 total credit hours.

IAFS 4930 (3-6) Internship in International Affairs

Working individually under the guidance of a public or private organization, students are assigned to projects selected for their academic suitability. Written assignments occur throughout the semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) majors only.

International Business Cert (INBU) Courses

INBU 2800 (3) Special Topics

Variable topics in international business drawing from a variety of business disciplines, industry trends and best practices.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Leeds School of Business majors only.

INBU 3101 (3) Operations Management Global Seminar

Examines concepts, tools and techniques used in the management of operations. Focuses on how firms add value and compete with high quality products and efficient services. Emphasizes the use of models for designing and improving operations to deliver product and services. Based on an experiential learning approach that balances lecture with business visits to an international location. Credit can be granted for this course and MGMT 3100, but only one will count towards the major.

Requisites: Requires a prerequisite course of BCOR 1025 (minimum grade D-). Restricted to Business majors only.

Grading Basis: Letter Grade

INBU 3300 (3) International Business and Management

This survey course takes a broad and comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international management, including trade practices, country penetration strategies, international finance and accounting, marketing across cultures, global service and manufacturing operations, cultural and legal differences, ethical and sustainability issues and global competitive strategy.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) or International Affairs (IAFS) majors with 52-180 units completed.

Additional Information: Departmental Category: Asia Content

INBU 3301 (3) Doing Business in China

This survey course examines how to conduct international business in China. Explores all the major functional areas of international business as they apply to U.S. companies in China: marketing, human resources, operations, finance, accounting, government relations, cultural and legal differences, ethical and sustainability issues, and global competitive strategy. Open to non-business students.

Requisites: Restricted to students with 52-180 units completed.

Additional Information: Departmental Category: Asia Content

INBU 3333 (3) Leading and Managing Across Cultures in Northern Europe

Explains the "whats" and the "whys" of cultural differences in international management as it covers leadership, motivation, communication, planning, decision making process, change, structure, organizational culture, strategy, negotiation, team work and international assignments in a multicultural environment and in a multidisciplinary context from the perspective of practicing managers. Students will meet with international business professionals from European companies.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 3006

Requisites: Restricted to students with 52-180 units completed.

INBU 3450 (3) International Marketing

Describes the economic, geographic, political and social forces that have shaped and continue to define global markets. Examines topics critical to success in international markets, including assessment of a firm's international capabilities, techniques for gauging the potential of international markets, international segmentation approaches and alternative arrangements for entering foreign markets. Compares and contrasts product, price, distribution, logistics, promotion and research decisions made in global versus domestic markets. Introduces students to financial arrangements characteristic of international marketing, including exchange rates and controls, balance-of-payment principles, import licensing agreements and tariffs.

Equivalent - Duplicate Degree Credit Not Granted: INBU 5100

Requisites: Requires prerequisite class of BCOR 2001 or BCOR 2400 (minimum grade D-). Restricted to Business (BUSN), Advertising (ADVT) or International Affairs (IAFS) majors with 52-180 units completed.

INBU 4151 (3) International Operations in Hong Kong

Compares systems of production/operations management in the United States with those in Asia. Contrasts various regional and national approaches to business, quality management, labor practices, management styles, international competitiveness, productivity, distribution systems, trade practices, and strategies for penetrating foreign markets. Examines different sociocultural environments, government-business relationships, banking industries, operations strategies, and the potential for transferring industrial management practices and techniques between countries.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Asia Content

INBU 4200 (3) International Financial Management

Examines the financial policies and problems associated with firms doing business internationally. Topics include the foreign exchange environment, country risk, managing foreign exchange exposure, international working capital management, international capital budgeting, and international financial markets.

Requisites: Requires prerequisite courses of BCOR 2002 or BCOR 2200 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

Additional Information: Departmental Category: Asia Content

INBU 4825 (1-6) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in International Business Entrepreneurship.

Requisites: Restricted to students with 57-86 credits (Junior).

INBU 4900 (1-12) Independent Study

Department instructor required. Departmental form required.

INBU 4910 (3-6) Global Internship

Business programs must balance theory and practice in order to produce graduates who are not only proficient in the language of business, but also have hands-on experience in their areas of emphasis. Internships are an effective way of acquiring the practical experience that business graduates need. A global internship consists of a practical international experience that includes an academic component.

Requisites: Restricted to Business (BUSN) majors only.

Grading Basis: Letter Grade

INBU 4925 (6) Entrepreneurship and Empowerment in South Africa

The EESA program is broken into two main elements. The first element consists of workshop sessions that address various aspects of an entrepreneurial venture and the consulting experience. The second element involves the actual field experience in the form of consulting interventions. Students will consult with two entrepreneurs, evaluate their venture and implement tangible deliverables that make the biggest impact.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

INBU 5100 (3) International Business and Marketing

Describes the economic, geographic, political and social forces that have shaped and continue to define global markets. Examines topics critical to success in international markets, including assessment of a firm's international capabilities, techniques for gauging the potential of international markets, international segmentation approaches and alternative arrangements for entering foreign markets. Compares and contrasts product, price, distribution, logistics, promotion and research decisions made in global versus domestic markets. Introduces students to financial arrangements characteristic of international marketing, including exchange rates and controls, balance-of-payment principles, import licensing agreements and tariffs.

Equivalent - Duplicate Degree Credit Not Granted: INBU 3450

Additional Information: Departmental Category: Asia Content

INVST Community Studies (INVS)

Courses

INVS 1000 (4) Responding to Social and Environmental Problems Through Service Learning

By integrating theory with required community service, students explore how problems are shaped by cultural values and how alternative value paradigms affect the definition of problems in areas such as education and the environment. Students examine different approaches to solving problems and begin to envision new possibilities.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Ideals and Values

Departmental Category: Invst Community Studies

INVS 1513 (3) Civic Engagement: Using the Electoral Process as a Tool for Social Change

Designed to educate and inspire civic engagement primarily in the area of electoral politics. Examines various explanations of why people participate in the electoral process and whom they choose to support. Develops the practical skills necessary to participate successfully in the electoral arena. Through a service component, the course provides experience working on a campaign and mobilizing others to participate in the electoral process.

Additional Information: Departmental Category: Invst Community Studies

INVS 1523 (3) Civic Engagement: Democracy as a Tool for Social Change

Educates and inspires students for civic engagement by exploring democratic values and the rights and responsibilities of citizenship. Develops theoretical knowledge and practical skills for participating in a diverse democratic society, especially at the state level, through analyzing legislative issues, making policy recommendations, and advocating for change.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: United States Context

Departmental Category: Invst Community Studies

INVS 2005 (2) Puksta Scholars Practicum

Integrates critical reflection and community-based experiences for undergraduates in the Puksta Scholars Program. This two-semester course will focus on the development of knowledge, attitudes and skills to productively engage the public realm. Examines topics includes ethical leadership, frameworks for social action, project design and participatory action research.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

INVS 2919 (3) Renewing Democracy in Communities and Schools

Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local K-12 school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 2919

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Invst Community Studies

INVS 3000 (3-4) Innovative Approaches to Contemporary Issues through Service Learning

Explores creative approaches for solving complex social and environmental issues, with a focus on peace and population. Students analyze the root causes of issues in theoretical and historical contexts, and develop their understanding of effective and innovative approaches to change. This course has a requirement of community service.

Recommended: Requisite upper-division status.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Invst Community Studies

INVS 3041 (3) Self and Consciousness

Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3041

Requisites: Requires prerequisite courses of SOCY 1001 and SOCY 3001 or SOCY 3011 (all minimum grade D-).

Additional Information: Departmental Category: Invst Community Studies

INVS 3100 (3-4) Multicultural Leadership: Theories, Principles and Practices

Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of Western and non-Western theories and practices. Community service required.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3201

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Invst Community Studies

INVS 3302 (3) Facilitating Peaceful Community Change

Students gain knowledge and skills that enable them to become effective agents of community change. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply their own life experiences and to examine themselves as potential change agents.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3302

Additional Information: Departmental Category: Invst Community Studies

INVS 3402 (3) Implementing Social and Environmental Change

Examines grassroots innovation as a means for creating comprehensive, solution-based strategies to address social and environmental problems. Students develop an understanding of the root causes of problems, identify how changes are initiated at the grassroots level, and learn the theory and practice of effective and responsible change efforts.

Additional Information: Departmental Category: Invst Community Studies

INVS 3931 (3) The Community Leadership Internship, Part 1

Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Required requisite, admission into INVST CLP.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Invst Community Studies

INVS 3932 (3) Community Leadership Internship, Part 2

Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Required requisite, membership in INVST CLP.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of INVS 3931 (minimum grade D-).

Additional Information: Departmental Category: Invst Community Studies

INVS 4302 (3) Critical Thinking in Development

Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization and economic development. Specifically explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade, and democratization.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 4732

Requisites: Requires prerequisite courses of PSCI 2012 or IAFS 1000 and ECON 2010 and 2020 (all minimum grade D-).

Recommended: Prerequisite one upper-division PSCI course.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Invst Community Studies

INVS 4402 (3) Nonviolent Social Movements

Explores theories of democracy and development in relation to movements for nonviolent social change. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology and decentralized powers.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Sociology (SOCY) or Political Science (PSCI) majors only.

Additional Information: Departmental Category: Invst Community Studies

INVS 4919 (1-2) Teaching Social Justice for Public Achievement

Participate as teaching assistants for the practicum course INVS 2919. Focusing on the issues of democratic education, diversity, social justice and social change, students learn how to foster undergraduates' skills as experiential educators.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of INVS 2919 (minimum grade B).

INVS 4931 (1-6) Community Leadership in Action, Part 1

Develops students' expertise as community leaders. Under the supervision of an instructor and a community advisor, students design a community-based project.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of INVS 3931 and INVS 3932 (all minimum grade D-).

Recommended: Prerequisite admission to INVST CLP.

Additional Information: Departmental Category: Invst Community Studies

INVS 4932 (1-6) Community Leadership in Action, Part 2

Develops students' expertise as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community advisor, students learn organizational and leadership skills by designing, implementing and evaluating a community-based project. First-hand experience provides students with a deepened understanding of the complex issues facing humanity, and competence with solution-based strategies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of INVS 4931 (minimum grade D-).

Additional Information: Departmental Category: Invst Community Studies

INVS 4999 (1-4) Teaching Social Justice

Students participate in a service-learning practicum under the supervision of a Community Studies instructor. They explore teaching strategies for implementing concrete educational goals. Focusing on the issues of social justice and social change, they learn how to encourage higher levels of creativity and analysis among students.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Invst Community Studies

Italian (ITAL)

Courses

ITAL 1010 (5) Beginning Italian 1

The four skills of listening, speaking, reading, and writing are progressively developed in a predominantly oral presentation. Grammatical concepts are explained and practiced through dialogues, written exercises, and conversations. The cultural focus is on the personal world and life of students.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 1050

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Italian

ITAL 1020 (5) Beginning Italian 2

Continuation of ITAL 1010, with more difficult grammatical concepts explored. The cultural focus shifts to social and civic areas.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 1050

Requisites: Requires a prerequisite course of ITAL 1010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Italian

ITAL 1050 (5) Fast-Track Italian

Two semesters of beginning Italian in one, for students who have studied other languages or have had previous exposure to Italian.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 1010 or ITAL 1020

Grading Basis: Letter Grade

Additional Information: Departmental Category: Italian

ITAL 1300 (3) La Dolce Vita: Why the Humanities Matter, Italian Style

Introduces students to a critical appraisal of the Humanities in their world. Because the Humanities were rediscovered in the late Middle Ages in Italy, the course explores the Humanities from an Italian-centered perspective, though it broadens the scope of its analysis to make this perspective relevant for students who come from a variety of cultures and backgrounds.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Italian

ITAL 1400 (3) Medieval/Renaissance Women Writers in Italy and France
Introduces major literature through close readings of women's writings in their historical context. Offers a general introduction to women's status and roles in Italy and France. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: FREN 1400

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Human Diversity
Departmental Category: Italian

ITAL 1500 (3) That's Amore: Introduction to Italian Culture

Introduces students to representations of Italian society that have persisted through the ages. The course readings allow students to better understand how certain stereotypes about Italian society (e.g., Latin lover, Mafia) were born and persist in the present. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Contemporary Societies
Departmental Category: Italian

ITAL 1600 (3) Strategies of Fear: Introduction to Italian Fantastic Literature

Traces the development of the fantastic theme in Italian Literature from its origins (late nineteenth century) to contemporary times. Analyzes the modes of reception and appropriation of non-Italian gothic and fantastic narrative traditions through which Italian writers have subverted the national literary model proposed by realist narrative. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 2110 (3) Intermediate Italian Reading, Grammar, and Composition 1

Enhances the skills learned in the first-year course and develops greater fluency in understanding and speaking. More emphasis is placed on reading and writing through the use of activities featuring cultural themes that present a realistic portrait of contemporary Italy. Taught in Italian.

Requisites: Requires a prerequisite course of ITAL 1020 or ITAL 1050 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Departmental Category: Italian

ITAL 2120 (3) Intermediate Italian Reading, Grammar, and Composition 2

Continuation of ITAL 2110. Some reading in Italian literature and culture with considerable practice in writing and speaking Italian. Fulfills the Graduate School language requirement for the Ph.D.

Requisites: Requires a prerequisite course of ITAL 2110 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 2130 (3) Introduction to Literary Analysis

Increases student's ability to read and analyze literary texts by improving vocabulary and terminology. Students read short stories, essays, short plays, and poems to acquire critical skills and improve expression of opinions and arguments in Italian. Taught in Italian.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3015 (3) Advanced Composition 1

Teaches students to write in Italian in a variety of genres, focusing on the creative aspects of writing. Exercises and themes are drawn primarily from current events and culture (i.e., blogging, journaling, essays and films), but also allows students to develop their critical skills in other areas.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3025 (3) Advanced Composition 2: Introduction to Literary Writing

Introduces students to complex forms of writing within Italian studies. Focuses on the analysis of literary genres (e.g., autobiography, essays, short stories) through a step-by-step process that allows students to craft advanced arguments in Italian. Studies will read Italian literary texts and write and revise in workshop format (e.g., peer review, collaborative assignments).

Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Italian

ITAL 3030 (3) Storia dell'arte: Advanced Composition/Conversation 3

Improves vocabulary and fluency in spoken Italian, and competence and confidence in correct and more sophisticated written Italian through the study of the history of Italian art. Exercises and themes focus on Italian Classical, Medieval, Renaissance, and Modern Art.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3040 (3) Italian Conversation Through Cinema

Taught in Italian, the course covers various topics of Italian Cinema from WWII to the present. Focus is on periods, genres, themes, and auteur/directors. Emphasis on review of language structures previously learned and acquisition of new vocabulary to enable students to discuss different aspects of Italian culture, in Italian.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3140 (3) Readings in Italian Literature-20th and 21st Century

Covers a selected reading of major texts, prose, and poetry of 20th and 21st-century literature. Emphasizes critical reading and analysis of modern and contemporary Italian literature in its literary and historical context. Taught in Italian.

Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3150 (3) Readings in Italian Literature-19th Century

Introduces students to 19th century literary history through a selected reading of major texts, prose, and poetry. Emphasizes critical reading and analysis of Italian literature in its literary and historical context. Taught in Italian.

Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 3160 (3) Readings in Italian Literature--Medieval and Renaissance
Covers a selected reading of major texts, prose, and poetry of Medieval and Renaissance literature. Emphasizes critical reading and analysis of texts in their literary and historical context. Taught in Italian.

Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4010 (3) Problems in Translation, Advanced Grammar, and Stylistics 1

Emphasizes practice in translating varying types of prose from Italian into English and English into Italian.

Requisites: Requires a prerequisite course of ITAL 2130 or ITAL 3015 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4030 (3) Contemporary Italian Culture, Politics, and the Media

Serves as an introduction to the study of the effect that politics and the media have in shaping Italian culture. Makes use of the World Wide Web for instruction. Taught in Italian. Familiarity with Internet helpful.

Requisites: Requires a prerequisite course of ITAL 2130 or ITAL 3015 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4040 (3) Business Italian Style

Provides an introduction to the Italian way of conducting business, with a close view on the company and its world through learning marketing and producing a real company project for the market. Analyzes topics of international marketing and trade using Italian and American economics websites. Focuses on building cross-cultural bridges between the U.S. and Italy to have smoother business relationships and enable students to participate more easily in joint international working teams.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4140 (3) The Age of Dante: Readings from The Divine Comedy

Focuses on close reading of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4145 or ITAL 4147 or HUMN 4140

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4145 (3) The Age of Dante in Italian

Focuses on close readings of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in Italian.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or ITAL 4147 or HUMN 4140

Requisites: Requires prerequisite course of ITAL 2130 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4147 (3) Visualizing Dante's Inferno: A Global Seminar in Florence Italy

Focuses on close reading of Dante's Inferno. Examines the specific sites and art in Florence and nearby cities that Dante references in the Inferno, as well as visual representations of Hell created both before and after Dante's poem. Taught in English. Offered through the CU Study Abroad Program.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or ITAL 4145 or HUMN 4140

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4150 (3) Boccaccio's Decameron: Tales of Sex and Death in the Middle Ages

Studies Boccaccio's masterpiece, the Decameron, as emblematic of the post-Black Plague era in the late Middle Ages. Focuses on the art of storytelling through gendered perspectives to portray the complexity of the Middle Ages. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4150

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4160 (3-5) Italian Literature Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Italian

ITAL 4170 (3) Italian Literature Special Topics

Topics vary each semester. Consult the online Schedule Planner for specific topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Italian

ITAL 4200 (3) Topics in Italian Culture and Civilization from the Origins through the Renaissance

Taught in English. Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Italian

ITAL 4250 (3) History of Modern Italy

Examines the major historical, economic and social factors that have shaped the identity of modern Italy, from the enthusiasm of young patriots during Italy's unification in the 1860s to the discontent and domestic terrorism of the 1960s-1980s. Focuses on Mussolini, the Fascist movement and on World War II, as well as the changing role of women. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4313

Additional Information: Departmental Category: Italian

ITAL 4280 (3) Topics in Italian Cinema

Examines different aspects of Italian cinema from the origins of neorealism to the present. May focus on a particular director, the culture of a specific period, or certain themes (e.g., the representation of women, the relationship between cinema and literature, or socio-aesthetic movements like Futurism or Fascism). Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Italian

ITAL 4290 (3) Italian Culture Through Cinema

Examines the representations of Italian culture through its cinema. Focusing especially on post-World War II cinema, examines how Italian filmmakers have portrayed Italian history and specific aspects of its culture (i.e., Fascism, post-war reconstruction, the Mafia, patriarchy) in the past 50 years. Taught in English.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Italian

ITAL 4300 (3) Multiculturalism in Italy

Focuses on multiculturalism and difference in contemporary Italian society. Readings assigned explore the experience and co-existence of ethnic and religious minorities in Italy. Students will study how specific minorities live in a major Western-European country and will investigate the connotations that the concept of 'multiculturalism' takes in the Italian context.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Italian

ITAL 4350 (3) From Wops to Dons to Movers and Shakers: The Italian-American Experience

Exposes students to the history of Italian immigration to the United States. By studying how Italians and Americans negotiated different ideas concerning identity, traditions and community, it helps students understand how Italians transformed themselves from a despised and marginalized minority into active participants in the success of the United States in the 20th and 21st centuries. Taught in English.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: Italian

ITAL 4500 (4) Italian Theatre

Using theatre as a medium, this course helps students attain a higher level of proficiency in spoken and written Italian. Study of Italian theatre is integrated with acting activities and pronunciation exercises. Culminates in the production of a play. Performance is in Italian and the students participate in the writing of the script. Taught in Italian.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4600 (3) Once Upon a Time in Italy

Examines the evolution of the Italian fairy tale from the 1500s to the 2000s in literature, theater, and film. Considers the tales and their authors in their social-historical context.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Italian

ITAL 4730 (3) Italian Feminisms: Culture, Theory, and Narratives of Difference

Studies Italian women writers, artists and filmmakers. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4730

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Italian

ITAL 4840 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Italian

ITAL 4930 (1-3) Languages Internship for Professions

Offers opportunities to use Italian skills in service to various sectors of the community, including private industry, government, and education.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of ITAL 2120 (minimum grade C-).

Additional Information: Departmental Category: Italian

ITAL 4980 (3) Italian Senior Honors Thesis

The senior honors thesis is a 40 to 45 page original research paper, written in Italian, and constitutes a requirement for graduating with departmental honors.

Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C-).

Additional Information: Arts Sciences Honors Course
Departmental Category: Italian

ITAL 4990 (3) Senior Seminar

Preparation of a 15-page research paper in Italian presented to two members of the faculty and defended orally in class.

Requisites: Requires a prerequisite course of ITAL 3015 (minimum grade C-).

Additional Information: Departmental Category: Italian

Japanese (JPNS)

Courses

JPNS 1010 (5) Beginning Japanese 1

Provides a thorough introduction to modern Japanese, emphasizing speaking, listening, reading, and writing in a cultural context.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 1012 (4) Introduction to Japanese Civilization

An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of Japan. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity

JPNS 1020 (5) Beginning Japanese 2

Continuation of JPNS 1010.

Requisites: Requires prerequisite course of JPNS 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 1051 (3) Masterpieces of Japanese Literature in Translation

Surveys Japanese thought and culture through careful reading and discussion of selected masterworks of Japanese literature in translation. Texts include significant works of poetry, fiction, drama, diaries, and essays, from ancient times to the present. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 2110 (5) Intermediate Japanese 1

Continued study of oral and written modern Japanese in a cultural context.

Requisites: Requires prerequisite course of JPNS 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 2120 (5) Intermediate Japanese 2

Continuation of JPNS 2110.

Requisites: Requires prerequisite course of JPNS 2110 (minimum grade C).

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 2441 (3) Japanese Culture through Film and Anime

Examines 20th century Japanese culture through cinematic and animated films. Studies films by Ozu, Kurosawa, Mizoguchi, and contemporary animators Tezuka, Miyazaki, and Kon Satoshi. Considers cultural issues raised in film and anime in light of modern Japanese history and literature. Requires no knowledge of Japanese. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 2811 (3) Heroes and the Supernatural: Word and Image in Old Japan

Examines the fusion of literary and visual arts in twelfth- to nineteenth-century Japan, focusing on illustrated handscrolls and narrative paintings. Students will explore tales of monsters, samurai, fantastic journeys to other worlds, anthropomorphic animals, and the eighteenth- and nineteenth-century precursors of contemporary Japanese comics. This course seeks to analyze visual-literary texts in their historical contexts as both literature and art. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3110 (5) Advanced Japanese 1

Enhances student competence and performance in Japanese language in a holistic and integrative manner.

Requisites: Requires prerequisite course of JPNS 2120 (minimum grade C).

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 3120 (5) Advanced Japanese 2

Continuation of JPNS 3110. Enhances student competence and performance in Japanese language in a holistic and integrative manner.

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization

Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for Japanese majors and minors. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 3200

Requisites: Restricted to students with a minimum of 45 units.

Additional Information: Arts Sci Core Curr: Written Communication

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

JPNS 3311 (3) Japanese Colonial and Transnational Literature

Explores the development of Japanese and colonial identities in literature produced in and about Japan's colonies during the first half of the 20th century. We will read works written during and about the Japanese empire by Chinese, Japanese, Korean, Okinawan and Taiwanese writers looking at the different representations of empire. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English

JPNS 3321 (3) Fantasy and Sci-Fi in Japanese Literature, Film and Culture

Explores the development of Japanese science fiction and fantasy literature produced in the past century. We will read works written by writers such as Abe Kobo, Hoshi Shin'ichi, Kurahashi Yumiko, Ueda Sayuri and Project Ito. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English

JPNS 3331 (3) Business Japanese

Designed to teach Japanese with emphasis on using Japanese for professional purposes. The course aims to foster the skills and the knowledge of effective cross-cultural and interpersonal communication in Japanese and to develop intercultural competence in business contexts.

Requisites: Requires prerequisite course of JPNS 2120 (minimum grade C).

Recommended: Prerequisite JPNS 3110.

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 3511 (3) From Rebellion to Calamity: Contemp Japanese Lit in Transl

Explores post-1945 Japanese literature through close reading of prose fiction (including SF, mystery, horror, e-novel and cell-phone novel genres), poetry, visual narratives (manga) and critical essays. Texts will be considered in historical and cultural contexts, with attention to their relationship to traditional arts and global trends. Taught in English.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese Courses in English

JPNS 3811 (3) Love, Death, and Desire: Classical Japanese Literature in Translation

Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784-1185). Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3811

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3821 (3) Monsters, Monks, and Mayhem: Medieval Japanese Literature in Translation

Surveys the major works and authors of medieval Japanese (poetry, prose, and drama) from the Kamakura and Muromachi periods (1185-1600). Taught in English.

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3831 (3) The Floating World of Play and Passion: Early Modern Japanese Literature in Translation

Surveys the major works, authors, and genres of literature from the Tokugawa through Meiji periods in their historical and cultural contexts.

Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3841 (3) Tradition and Transgression: Modern Japanese Literature in Translation

Surveys the major works, authors and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts.

Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3841

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3851 (3) Studies in Japanese Popular Culture

Introduces aspects of Japanese popular culture from the early 1990s economic collapse until the present through a variety of artistic mediums including manga, anime, literature, live-action cinema, video gaming, music, and the visual arts. Taught in English.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3861 (3) Imagining the Samurai in Japanese Literature and Culture

Explores the rich history of the imagination of the samurai in Japan, across multiple genres of fiction, poetry, drama, visual art, and cinema, from earliest times to the present. Attention is given to the varied meanings the image of the samurai has held at different historical moments, and to contrasts between the representations of the realities of samurai life. Taught in English.

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3871 (3) Horror and the Macabre in Japanese Literature, Film, Culture

Explores Japanese horror texts from both the pre-modern and modern eras in a variety of genres, including the monogatari, kaidan, kabuki, contemporary horror fiction, film and anime. Texts will be considered in historical and cultural context with attention being given to interactions with and within popular culture. Taught in English.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3881 (3) Environment, Nature and Disaster in Japanese Literature and Culture

Explores the significance of the environment, nature and disaster in Japanese literature and culture through readings in a variety of genres, including fiction, essay, poetry, sci-fi, film and anime. Attention will also be given to environmental/ecological issues, such as conservation, pollution, biodiversity and industrial development. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 3891 (3) Travel/Travel Writing in Japanese Literature and Culture

Explores selected Japanese literary and cultural texts that treat travel and travel writing, including short and long fiction, poetry, memoir, nonfiction, biography and travel commentary. Taught in English.

Recommended: Prerequisite JPNS 1051.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

JPNS 4030 (3) Japanese Syntax

Deals with syntactic phenomena from five areas of Japanese grammar that cause the most difficulty for learners. Their characteristics are explored in forms and discursal functions that go beyond the explanations in basic, prescriptive grammars of Japanese. Department enforced prerequisite: JPNS 3120 or JPNS 4120 (minimum grade C) or instructor consent.

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4050 (3) Japanese Sociolinguistics: Japanese Language and Society

Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5050 and LING 4050

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese

Departmental Category: Asia Content

JPNS 4070 (3) Second Language Acquisition of Japanese

Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5070

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4080 (3) Kanji in Japanese Orthography

Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5080

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4110 (3) Advanced Readings in Modern Japanese 1

Surveys a variety of material written in modern Japanese, including texts from literature, the social sciences, religion, and cultural history. Emphasizes content and style. Texts and selections vary from year to year.

Requisites: Requires prerequisite course of JPNS 3120 (minimum grade C).

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4120 (3) Advanced Readings in Modern Japanese 2

Continuation of JPNS 4110. Texts and selections vary from year to year.

Requisites: Requires prerequisite course of JPNS 4110 (minimum grade C).

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4150 (3) Japanese to English Translation: Theory and Practice

Introduction to a range of translation tasks and approaches, as well as to professional translation practices, ethics, methods and resources. Emphasis is on application, through translation of representative texts from Japanese into English in the fields of social science, humanities and the arts, journalism, and commerce.

Recommended: Prerequisite JPNS 3110.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4210 (3) Contemporary Japanese 1: Current Issues

Offers intensive review of Japanese language skills beyond the first eight semesters and cultivates further proficiency. Readings will be selected from a wide range of contemporary writings that reflect and represent issues in Japanese as well as global communities. Emphasizes all skills: reading, listening, writing, speaking and translation. Instructional technology is extensively integrated into the curriculum.

Requisites: Requires prerequisite course of JPNS 4120 (minimum grade C).

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4300 (3) Open Topics: Readings in Japanese

Examines selected texts on a particular topic taught by regular or visiting faculty. Topics change each term. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4310 (3) Classical Japanese 1

Introduces reference tools for reading classical Japanese, and grammar, vocabulary, and use of scripts in premodern Japanese, focusing on the 10th century Taketori Monogatari and the 13th century Hojoki.

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Recommended: Prerequisites JPNS 3120 and JPNS 3811 and JPNS 3821.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4320 (3) Classical Japanese 2

Continuation of JPNS 4310. Surveys changes in Japanese literary language from the Nara (eighth century) to Meiji (late 19th century) periods. Attention given to changes in grammar, vocabulary, and use of scripts in premodern Japanese. Introduces representative works of classical Japanese literature of all periods.

Requisites: Requires prerequisite course of JPNS 4310 (minimum grade C).

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4400 (3) Critical Theory and Japanese Literature and Culture

Examines Japanese literary and cultural texts through the lens of specific theoretical paradigms as developed by Japanese and non-Japanese thinkers and academicians. Taught in English.

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Japanese Courses in English
Departmental Category: Asia Content

JPNS 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4950 (3) Honors Thesis

Additional Information: Arts Sciences Honors Course
Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 4980 (1) Practical Issues in Japanese Language Pedagogy

Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language class. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning. Department enforced prerequisite: JPNS 4120 (minimum grade C) or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 5980

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5010 (3) Bibliography and Research Methods

Introduces research materials on Japan in Japanese and Western languages, including bibliographic tools, style sheets, and library resources. Overview of secondary sources and publication outlets/methods of disseminating research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5020 (3) Methods of Teaching Japanese

Surveys pedagogical theory and methods for the teaching of Japanese as a second language, including issues of presentation, interaction, and evaluation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5050 (3) Japanese Sociolinguistics: Japanese Language and Society

Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4050 and LING 4050

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5070 (3) Second Language Acquisition of Japanese

Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4070

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5080 (3) Kanji in Japanese Orthography

Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4080

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5150 (3) Japanese Literary Translation

Explores theories and practice of translation of literary texts as applied to Japanese-English translation; strategies for handling a variety of texts; and professional standards and ethics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5210 (3) Classical Prose Literature

Examines selected prose works and authors from the Classical, or Heian, period (784-1185). Texts may include selections from diaries, tale literature, and *zuihitsu* such as *Izumi Shikibu Nikki*, *Genji Monogatari*, and *Makura no Soshi*. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5220 (3) Waka, Renga, and Haiku

Studies the three most important poetic forms in Japanese literary history. Emphasizes the reading and analysis of selected texts and authors that best represent these genres. Readings include selections from the first eight imperial poetry anthologies (*hachidaishu*), famous *renga* sequences (Minase Sangin Hyakuin, for example), and the haiku of Basho. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5280 (3) Topics in Classical Japanese Literature

Studies a specific problem or issue in classical (eighth through twelfth century) Japanese literature, e.g., the development of specifically Japanese theories of literature or the concept of genre in the Japanese tradition. Topics vary from year to year.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5310 (3) Advanced Classical Japanese 1

Focuses on stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras. Department enforced: knowledge of Classical Japanese at the level of JPNS 4310 is required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5320 (3) Advanced Classical Japanese 2

Advanced analysis of stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras, including *kanbun* and *hentaigana*; translation and explication of texts.

Requisites: Requires prerequisite course of JPNS 5310 (minimum grade C). Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5410 (3) Medieval Prose Literature

Focuses on selected prose works and authors from the medieval, or Kamakura and Muromachi periods (1185-1600). Texts may include selections from a variety of war tales, histories, courtly fiction, diaries, memoirs, short prose narratives (*otogi-zoshi*), *Noh* plays, and Buddhist literature such as *Heike Monogatari*, *Towazugatari*, *Izayoi Nikki*, *Tsurezuregusa*, and *Shasekishu*. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5420 (3) Japanese Buddhism and Literature

Studies selected works from the Japanese literary tradition in which Buddhism plays a significant thematic role. Focuses on texts such as the *Nihon Ryoiki*, Buddhist poetry (Shakkyo-Ka) from the imperial poetry anthologies, Heike Monogatari, Hojoki, the poetry of Saigyō and Bashō, and selected Noh plays. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5480 (3) Topics in Medieval Literature

Focuses on a specific problem or issue in medieval literature, e.g., the spread of literary composition beyond the court. Topics vary from year to year.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5610 (3) Japanese Dramatic Literature

Examines major writers and texts of the no, kyōgen, kabuki, and bunraku theaters, including the plays and critical writings of such authors as Kannami Kiyotsugu, Zeami Motokiyo, Konparu Zenchiku, and Chikamatsu Monzaemon. Texts and secondary readings vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5620 (3) Early Modern Japanese Literature and Culture

Examines the literature, arts, drama and culture of Japan's early modern period in the original language, as well as secondary scholarship and methodologies for pursuing work on early modern materials. Genres covered include kana-zōshi, uklyō-zōshi, dangibon, yomihon, sharebon, kibiyoshi, ninjobon, kokkelbon, gokan, halkai, senryō, kyōka, joruri, kabuki, and literary thought.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5810 (3) Modern Japanese Literature

Studies selected texts in Japanese literature from the Meiji Restoration (1868) to the end of the Pacific War. Surveys various literary genres, emphasizing the development of the modern novel as an aspect of Japan's response to Western cultural forms. The unique cultural politics of each of the periods (Meiji, Taishō, and Showa) are illuminated through the filter of both canonical and more marginalized texts. Specific selections vary from year to year.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5820 (3) Contemporary Japanese Literature

Covers developments in Japanese prose fiction and/or other literary genres from the end of the Pacific War in 1945 to the present.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5830 (3) Readings in Modern and Contemporary Japanese Thought and Culture

Examines central issues in Japanese culture and society since the Meiji Restoration (1868) through selected readings of the works of major writers in the fields of literature, anthropology, feminism, political science, and religion, among others. Provides a broad context for cultural studies in modern and contemporary Japan by positioning the most important commentators within their historical and social situations.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5920 (1-3) Topics in Modern Literature and Culture

Close study of a specific problem or issue in modern or contemporary literature or culture: e.g., transwar literary nationalism. Formerly JPNS 5880.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5980 (1) Practical Issues in Japanese Language Pedagogy

Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language class. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning. Department enforced prerequisite: knowledge of Modern Japanese at the level of JPNS 4120.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4980

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6900 (1-6) Japanese Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6940 (1) Japanese Master's Degree Candidate

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6950 (1-6) Japanese Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

Jewish Studies (JWST)

Courses

JWST 1040 (3) Beginning Biblical Hebrew, Second Semester

Building on HEBR 1030, continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material. Department enforced prerequisite: HEBR 1030 or JWST 1030 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: HEBR 1040

JWST 1234 (3) Mysticism and the Jewish American Literary Tradition

Explores the mystical tradition within Judaism from ancient times to the present. With roots in the Hebrew Bible, Jewish mysticism is one of the oldest forms of mysticism and has had an influence on some of the greatest philosophical traditions of western civilization.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 1340

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Ideals and Values

JWST 1818 (3) Introduction to Jewish History: Bible to 1492

Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1818 and RLST 1818

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Asia Content

JWST 1828 (3) Introduction to Jewish History: Since 1492

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and antisemitism.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1828 and RLST 1828

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context

JWST 1830 (3) Global History of Holocaust and Genocide

Examines the interplay of politics, culture, psychology and sociology to try to understand why the great philosopher Isaiah Berlin called the 20th century, "The most terrible century in Western history." Our focus will be on the Holocaust as the event that defined the concept of genocide, but we will locate this event that has come to define the 20th century within ideas such as racism, imperialism, violence, and most important, the dehumanization of individuals in the modern world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1830 and RLST 1830

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context

JWST 1900 (3) Introduction to the Hebrew Bible/Old Testament

Examine the content of the Hebrew Bible and critical theories regarding its development. Explore the development of these texts, as well as their foundational role for rabbinic literature and the New Testament. Assess the enduring influence of the Hebrew Bible/Old Testament in world literature and culture (such as in art and music).

Equivalent - Duplicate Degree Credit Not Granted: RLST 1900

Grading Basis: Letter Grade

JWST 1910 (3) Introduction to the New Testament

Examine the background, content and influence of the New Testament books. Studies the diverse perspectives contained in the various books, as well as the process of canonization. Assess the influence of the New Testament on the development of Christianity as well as world (eastern and western) culture.

Equivalent - Duplicate Degree Credit Not Granted: RLST 1910

Grading Basis: Letter Grade

JWST 2350 (3) Introduction to Jewish Culture

Explores the development and expressions of Jewish cultures across the chronological and geographical map of the Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes, including such issues as sexuality and foodways. Sets the discussion in relevant contexts and looks at cultural representations that include literary, religious and visual texts.

Equivalent - Duplicate Degree Credit Not Granted: GSLL 2350

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 2502 (3) Representing the Holocaust

Examines representations of the Holocaust in film, memoirs, poetry, novels, graphic novels, memorials. Considers questions such as: How to depict an event that resists representation? How does the memory of the Holocaust transform over generations? How do representations of the Holocaust inform our understanding of other experiences of racism and genocide? What ethical issues are at stake?

Equivalent - Duplicate Degree Credit Not Granted: JWST 2502

Additional Information: Arts Sci Core Curr: Ideals and Values

JWST 2551 (3) Modern Jewish Literature

Examines Jewish experience through the study of literary texts from around the world, mainly from the 20th and 21st centuries. Discusses issues pertaining to secularism and tradition; diasporas and homelands; modernity and questions of identity raised by the intellectual transitions brought about by political and social emancipation; sexualities; enormous changes wrought by population redistributions, world wars and rapid cultural transformations. Formerly GSLL 2551.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Hebrew

JWST 2600 (3) Judaism, Christianity, and Islam

Introduces literature, beliefs, practices, and institutions of Judaism, Christianity, and Islam, in historical perspective.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2600

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Asia Content

JWST 3100 (3) Judaism

Explores Jewish religious experience and its expression in thought, ritual, ethics, and social institutions.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3100

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Asia Content

JWST 3110 (3) Of Jewish Legends, Folktales and the Supernatural

Explores Jewish traditional legends, folktales and stories of the supernatural. Starts with Aggadic Talmud tales and Midrashic texts and focuses on later rabbinic and mystical texts and folktales ca 500-1900 C.E. from around the Jewish world with subjects ranging from didactic narratives extolling the virtues of the simple pure soul, to the horrors of a blood sucking vampiric outside world.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3110

JWST 3120 (3) Radical Jews

Explores major Jewish figures, and their cultural productions, who were radical in the challenges they posed and transformative in the effects they had on society. The figures we examine range from the Rabbis of the Talmud who revolutionized a sacrificial cult religion, to Western secularist Baruch Spinoza and American icons such as Allen Ginsberg, Gloria Steinem and Bob Dylan.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3120

Grading Basis: Letter Grade

JWST 3200 (3) Religion and Feminist Thought

Examines the origin of patriarchal culture in the theology and practices of Judaism and Christianity. Explores attitudes and beliefs concerning women as Judeo-Christian culture impacts gender roles and gender stratification through reading and discussion. Women's religious experience is studied from the perspective of feminist interpretations of religiosity.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3200

JWST 3202 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 3202 and RLST 3202 and WGST 3201

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 3310 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Formerly JWST 3312.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3310 and HUMN 3310

Additional Information: Arts Sci Core Curr: Ideals and Values

JWST 3401 (3) The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe

Surveys the major works of 20th century central and central east European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the Cold War.

Equivalent - Duplicate Degree Credit Not Granted: GSSL 3401

JWST 3501 (3) German-Jewish Writers: From the Enlightenment to the Present

Provides insight into the German-Jewish identity through essays, autobiographies, fiction and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3501

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 3530 (3) Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

Spend two weeks in Istanbul and examine Jewish-Muslim relations in a place that was for 500 years the crossroads of civilization. The only Muslim city in the 21st century with a large, thriving Jewish community, Istanbul models how people from different social classes, ethnicities and religious backgrounds can coexist.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3530 and RLST 3530

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 3600 (3) Contemporary Jewish Societies

Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3600 and GSSL 3600

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 3610 (3) Topics in International Affairs and Jewish Studies

Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3610

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 3650 (3) History of Arab-Israeli Conflict

Explores the origins and development of the Arab-Israeli conflict. Traces Arab-Jewish/Israeli relations from the 19th century through the Palestine Mandate, the evolution of Arab and Jewish nationalism and the creation of Israel to the present day.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3650

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Asia Content

JWST 3930 (3) Internship in Jewish Studies

Learn beyond the classroom by interning in a local non-profit organization that connects with the Program in Jewish Studies through its mission and/or program. Interns will attend class to learn about work place ethics, professional development and leadership skills through a Jewish Studies lens. Interns will be supervised by the faculty member of record as well as the employer housing the intern.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites HEBR 2350 or JWST 2350 or HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828.

JWST 4000 (1-3) Capstone in Jewish Studies

Serves as the final product for students completing the major in Jewish Studies. Students will design a project under the supervision of a mentor that serves as the summation of their past work in Jewish Studies. Capstone projects can take the form of a thesis, film or another media. Instructor consent required for JWST minors.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Jewish Studies (JWST) BA majors only. Excludes JWST minors.

JWST 4050 (3) Anthropology of Jews and Judaism

Explores topics in Jewish anthropology. Uses the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Explores fundamental questions about the definition of Jewish identity, practices and communities.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4050

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 4101 (3) Topics in Hebrew Studies

Explores topics in Hebrew and Jewish literature and cultures. These may include topics such as diasporic literatures, Jewish artists and thinkers, courses on specific authors, figures or communities. Topics change each semester. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4101

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 4122 (3) Music in Jewish Culture

Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4122

Grading Basis: Letter Grade

JWST 4170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4170 and RLST 5170

JWST 4180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4180 and RLST 5180

JWST 4203 (3) Israeli Literature: Exile, Nation, Home

Examines the creation and development of Israeli literature from its pre-State beginnings to the present day, from the writings of immigrants for whom Hebrew was not their mother tongue to a literature written by native Hebrew speakers. Considers texts written by Israeli Jewish and Arab writers and explores how ideas of exile, nation, and home play into the Israeli experience.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4203

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites ENGL 4677 or JWST 4677 or GRMN 2502 or JWST 2502 or JWST 2551 or WRTG 3020.

Additional Information: Arts Sci Core Curr: Literature and the Arts

JWST 4260 (3) Topics in Judaism

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4260 and RLST 5260

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 4301 (3) Venice: The Cradle of European Jewish Culture

Explores the development of European Jewish culture from the late Middle Ages to the present by focusing on Jewish life in the city of Venice, Italy. Emphasis is on the development of Venetian print culture and emergence of Italy as a center of Jewish publishing in both the religious and secular world. Examines a variety of cultural and historical material including early printings of the Talmud, the creation of Yiddish popular literature, Hebrew rabbinic literature, responses to political turmoil, and the aftermath of the Nazi genocide. Taught in English. Department enforced prerequisite: HEBR 2350 or JWST 2350 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4301

Additional Information: Arts Sci Core Curr: Literature and the Arts

JWST 4302 (6) Global Seminar: Justice, Human Rights and Democracy in Israel

Explore the challenges and complexities of justice, democracy and human rights in Israel and the West Bank through field trips, course work and service learning projects with Jerusalem based non-profit organizations. Acquire new knowledge and lived experience on critical issues facing Israelis and Palestinians with the wider scope of Middle East politics.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3520

Recommended: Prerequisites ANTH 4050 or JWST 4050 and IAFS 3600 or JWST 3600.

Additional Information: Arts Sci Core Curr: Contemporary Societies Departmental Category: Asia Content

JWST 4338 (3) History of Modern Israel/Palestine

Explore the history culture, and politics of this crossroads of Europe and Asia from the late Ottoman period to the present. Topics include: nationalism and colonialism, development of Zionist ideology, Palestinian nationalism, the Jewish community (Yishuv) under British rule, the founding of the State of Israel, Arab-Israeli and Palestinian-Israeli relations, Israel's minorities, and the conflict of religion and state.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4338

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

JWST 4348 (3) Topics in Jewish History

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4348

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of HIST 1308 or HIST 1828 or JWST 2350 (minimum grade D-).

JWST 4378 (3) History of Modern Jewish-Muslim Relations

Examines the modern history and culture of Jewish communities under Islamic rule in the Middle East and North Africa; Jews' and Muslims' encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, diaries, newspapers and films.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4378

Additional Information: Departmental Category: Asia Content

JWST 4401 (3) The Russian Jewish Experience

Examines the experience of Russian Jews from the late 19th century to the present through fiction and films dealing with challenges of co-existence of Jews and their neighbors; Bolshevik Revolution, Stalinism, Holocaust, post-Stalin period; place of Jews as individuals and a minority within Russian and Soviet society; and emigration to America and elsewhere at the turn of the century. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4401 and RUSS 5401

Recommended: Prerequisite any 1000 or 2000-level undergraduate literature course.

Additional Information: Arts Sci Core Curr: Literature and the Arts

JWST 4454 (3) Jewish Intellectual History

Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4454

Additional Information: Departmental Category: Europe: Topical

JWST 4534 (3) Modern European Jewish History

Focus on the last 500 years of European Jewish history, from 1492 until the present, to examine Jews' place in European history and how Europe has functioned in Jewish history. Does not end with the Holocaust, since, although Hitler and the Nazis attempted to destroy European Jewish civilization, they did not succeed. Rather, this course will spend several weeks looking at European Jewish life in the past sixty year.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4534

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1012.

Grading Basis: Letter Grade

JWST 4544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4544 and HIST 5544

Recommended: Prerequisite HIST 1818 or JWST 1818 or JWST 1828 or GSSL 2350 or JWST 2350.

JWST 4580 (3) The Holocaust: An Anthropological Perspective

Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics and consequences as well as other genocides of the 20th century, using an anthropological approach.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4580

JWST 4677 (3) Jewish-American Literature

Explores the Jewish-American experience from the 19th century to the present through writers such as Sholom Aleichem, Peretz, Babel, Singer, Malamud, Miller, Ginsberg and Ozick. The Jewish experience ranges from the travails of immigration to the loss of identity through assimilation. Formerly JWST 3677.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4677

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 4827 (3) Modern U.S. Jewish History since 1880

Explores the experience of Jews in the United States from the 1880's when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4827

Additional Information: Departmental Category: United States: Topical Courses 2

JWST 4900 (1-6) Independent Study in Jewish Studies

Working with a faculty member in Jewish Studies on an independent study research project provides students with an opportunity to learn outside the formal classroom structure, with individual direction from Jewish Studies faculty on a topic of mutual interest not offered in regularly scheduled classes. (Independent study may not be used to substitute for a regular course not being offered in a given term.)

Repeatable: Repeatable for up to 6.00 total credit hours.

Journalism (JRNL)

Courses

JRNL 1000 (3) Principles of Journalism and Networked Communication

Surveys the history, practices and responsibilities of journalism in a democracy. Examines ethics, best practices in institutional and network settings, reporting and writing, international news systems, personal branding, and strategies for creating and distributing content across media platforms. Promotes the highest professional values and encourages students to be leaders who recognize the possibilities of journalism in a democratic society.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) or Program in Journalism Mass Communication (JOUR) undergraduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 1871 (1-3) Special Topics for First-Year Students

Special studies in media that are specific for first-year students. May be repeated for a maximum of three credit hours.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 2001 (3) Fundamentals of Reporting

Develops basic news-gathering skills for work in news enterprises. Students learn techniques central to research, reporting, writing and producing stories for various media formats.

Requisites: Requires prerequisite course of JRNL 1000 (formerly JOUR/JRNL 2601) (minimum grade C-). Restricted to Journalism (JRNL) majors only.

JRNL 2401 (3) Media Coverage of Diverse Populations

Explores the ways in which issues of gender, gender expression, sexual orientation, race, ethnicity and religion play out in news coverage and how news organizations approach coverage of marginalized groups in society.

Grading Basis: Letter Grade

JRNL 3102 (3) Photojournalism I

Introduces the basic elements of visual communication. Covers the use of camera systems, digital imaging techniques and other aspects of photojournalism including law, ethics, history and critical decision-making.

Requisites: Requires a prerequisite course of JRNL 1000 or (formerly JOUR/JRNL 2601) (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Journalism (JRNL) majors or Program in Journalism Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 3112 (3) Concepts in Visual Culture

Studies the principles, theories and language of visual communication, emphasizing the evaluation and use of images in mass media. Designed to help students build theories and practices learned in previous classes and perfect their skills integrating words and pictures in communication to gain a greater appreciation of the visual world.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3201 (3) Critical Perspectives on Journalism

Introduces students to the critical perspectives most often employed in qualitative analysis of journalistic texts and practice: Marxism, psychoanalytical criticism, semiology, sociological criticism, structuralism, etc. Emphasis is upon texts from contemporary print and broadcast media, although students may also explore documentary film and literary journalism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3202 (3) Covering Political Campaigns

Provides a blend of theoretical understanding and on the ground experience for students interested in learning about the forces that shape election coverage and the practicalities of reporting on the local and national races for public office.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3211 (3) History of Broadcasting

Offers a broad overview of significant broadcast programs, the institutions and sociocultural and economic influences that have steered the course of radio, television and electronic media history in the United States.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3221 (3) History of Digital Journalism

Explores the history, economics and traditions of digital technologies. Addresses the interaction between digital technologies, culture and economy with particular emphasis on the effects on digital journalism. Concludes with a focus on how these concepts are embraced by new journalism market models.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3231 (3) History of Documentary Film

Explores the evolution of the documentary, both in feature films and on television, to understand how the genre offers both historical context and an understanding of the world in which we live.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3241 (3) History of Journalism

Explores the foundations of journalism practice in a historical context. Students study the evolution of the news industry and analyze examples of contemporary broadcasting, photography, online and print media in light of the past.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3401 (3) Sociology of News

Provides students with an introduction to the factors that shape news reporting and production, including gatekeeping, intermedia agenda setting, pack journalism, beat structures, news values and issues unique to the various platforms on which news is delivered.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3402 (3) Social Media Storytelling

Investigates the theory, ethics and best practices in storytelling across a variety of social media platforms including, but not limited to, Facebook, Twitter, Instagram, Snapchat, Medium and YouTube. Examines best practices for social media engagement. Students develop a story for multiple platforms and analyze the story performance on the sites and make recommendations for best practices.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3552 (3) Editing and Presentation

Explores copy editing, graphic principles and processes, new media technology.

Requisites: Requires prerequisite course of JOUR/JRNL 2001 or JRNL 1000 (formerly JOUR/JRNL 2601) (minimum grade C-). Restricted to Journalism (JRNL) or News Editorial (NSED-BSJR or JNED-BSJR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 3614 (3) Principles of Audio Production

Introduces audio production techniques using digital technologies. Students learn to apply fundamental principles to create professional radio and online programs including podcasting.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) or Program in Journalism and Mass Communication (JOUR) majors with a minimum of 45 hours taken.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 3644 (3) Principles of Television Production

Emphasizes the use of video technologies in both field and studio production, camera and editing work, producing and directing for professional program production.

Requisites: Requires prerequisite course of JRNL 2001 or JRNL 1000 (formerly JOUR/JRNL 260; min grade D-). Restricted to JRNL or BCNS-BSJR or JBCN-BSJR or BCPM-BSJR or JBCP-BSJR majors only with a min of 57 hours taken.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 3651 (3) Media Law and Ethics

Studies state and federal laws and court decisions that affect the media in order to develop knowledge of media rights and responsibilities and an understanding of the legal system. Provides students with an overview of the theory, ethics, codes, and analytical models that are used in journalism, and introduces students to a variety of ethical issues that can arise in journalism.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) or Program in Journalism Mass Communication (JOUR) undergraduate students only.

JRNL 3674 (3) Television Production 2

Covers studio productions for "Newsteam Boulder." Students also do field projects to sharpen their writing, video production, and editing skills.

Requisites: Requires prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) or Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 3704 (3) Sports Writing

Prepares students for the world of sport journalism. Combines the skills of a hard news reporter, the perspective of an entertainment reporter and the persuasive abilities of an editorial writer.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 3804 (3) Sports, Media and Society

Examines how sports, culture and especially the media, with a specific focus on journalism, all come together to influence society. Explores how sports communication affects, and is affected by, the issues and tension that touch society at large, such as law and politics, race, gender, sexuality and disability.

Equivalent - Duplicate Degree Credit Not Granted: MDST 3331

Requisites: Restricted to students with a minimum of 29 credits completed.

Grading Basis: Letter Grade

JRNL 4002 (3) Reporting 2

Assumes mastery of basic reporting and writing skills. Students produce more sophisticated stories on a variety of topics.

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or News Editorial (NSED-BSJR or JNED-BSJR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4011 (3) Principles of Media Relations

Provides students with information about the ethics, history and practice of media relations (community affairs, community relations, customer relations, government relations, industry relations, internal communications, public relations, press agency, public affairs, publicity, etc.). Introduces students from multiple academic disciplines to the genres of writing required for a media relations career.

Grading Basis: Letter Grade

JRNL 4102 (3) Photojournalism Portfolio

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5102

Requisites: Requires a prerequisite course of JOUR/JRNL 3102 (minimum grade C-).

Additional Information: Departmental Category: Print Online Journalism

JRNL 4311 (3) Literary Journalism

Studies the contributions of American literary journalists from Sara Davidson, Joan Didion, Norman Mailer, Hunter S. Thompson and Tom Wolfe; to established writers of nonfiction, including Annie Dillard, Jon Krakauer, Jane Kramer, Adrian Nichole LeBlanc and Terry Tempest Williams; to the newest wave of long-form journalists. Explores the boundaries between fiction and nonfiction and the literary techniques that distinguish creative nonfiction and literary journalism from other reportorial and storytelling forms.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4344 (3) Video Documentary Production

Designed to give students the experience of researching, writing, shooting and editing their own documentaries.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5344

Requisites: Requires a prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4351 (3) Reporting Wars, Conflict and Peace

Explores how journalists report international breaking news with a focus on war, disaster and peace and how these news events affect peoples' lives, governmental decisions and news media operations.

Requisites: Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication students with a minimum of 73 hours taken.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 4354 (3) TV Reporting

Students learn basic broadcast reporting skills – where to find news and how to cover it, how to analyze and organize news stories. Skills are linked with advanced concepts of shooting and editing videotape in order to produce news stories on deadline.

Requisites: Requires a prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) or Broadcast News (BCNS-BSJR or JBCN-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4401 (3) News and Public Perception

Considers the impact that news and journalistic practice have on the public through processes like agenda setting and second-level agenda setting, as well as issues such as news avoidance, the spiral of silence and political cynicism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4411 (3) International Media and Global Crises

Investigates how media organizations, audiences and other international organizations function during various global crises, such as national disasters, climate change and health epidemics, due to imbalanced distribution of wealth and resources, ethnic tensions and diplomatic failures.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4502 (3) Reporting 3

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5502

Requisites: Requires prerequisite courses of JRNL 3552 and JRNL 4002 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) News Editorial (NSEJ or JNED) or Journalism (JRNL) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4562 (3) Digital Journalism

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture and society.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5562

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4572 (3) News Corps

CU News Corps provides students the opportunity to immerse themselves in a single project and then produce an in-depth text based or multimedia explanatory/investigative story for publication in professional media. Students spend several weeks studying the subject in question before reporting and producing their stories.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4602 (3) Opinion Writing

Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5602

Requisites: Requires a prerequisite course of JRNL 2001 (minimum grade C-).

Additional Information: Departmental Category: Print Online Journalism

JRNL 4614 (1-3) Advanced Audio Practices

Applies advanced skills in producing in-depth audio programming for radio stations in Colorado and for weekly discussion-critique sessions.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of JOUR/JRNL 3614 (minimum grade C-). Restricted to Journalism (JRNL) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4624 (4) News Team

Students participate in Newsteam Boulder a program broadcast live over the Boulder cable television system.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5624

Requisites: Requires prerequisite course of JOUR/JRNL 4354 (minimum grade D-). Restricted to Journalism (JRNL) or Broadcast News (BCNS - BSJR or JBCN-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4634 (1-3) Broadcast Projects

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5634

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4651 (3) Advanced Media Ethics

Examines the responsibilities, the power and the problems of news media through the lens of ethical inquiry. Applies the philosophical and other perspectives from humanities and social sciences to consider ethical frameworks for guiding journalism in an era of technological disruption. Examines issues including privacy, conflicts of interest, undercover reporting, use of graphic images, interviewing trauma victims and other concerns in journalism through the lens of moral philosophy, best practices and codes of ethics.

Requisites: Requires prerequisite course of JRNL 3651 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4674 (1-3) Television Production 3

Provides in-depth experience in directing and producing television programs.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of JOUR/JRNL 3674 (minimum grade C-). Restricted to Journalism (JRNL) or Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4684 (3) Advanced Camera and Editing

Emphasizes the advanced techniques in digital video camera usage and digital editing for professional broadcast video production.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5684

Requisites: Requires a prerequisite course of JOUR/JRNL 3644 (minimum grade C-). Restricted to Journalism (JRNL) or Broadcast News (BCNS-BSJR or JBCN-BSJR) or Broadcast Production (BCPM-BSJR or JBCP-BSJR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4702 (3) Arts/Cultural Reporting and Criticism

Emphasizes composition of criticism for the performing arts and other areas of entertainment.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5702

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4704 (3) Athletic Media Relations

Offers the opportunity to both observe and experience what is required to work in the world of intercollegiate athletic media relations and professional sports public relations. Covers how to write and how to budget the vital components of publications, media bias and crisis management.

Requisites: Requires prerequisite course of JRNL 3704 (minimum grade C-).

Grading Basis: Letter Grade

JRNL 4714 (3) Sports Broadcasting

Teaches students how to do live sports television production. Students will learn the sports TV business from the ground up and be responsible for participating in the broadcasting of three to four live sporting events.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

JRNL 4724 (3) Sports Announcing

Teaches students about sports talk and sports announcing, how to interview sports celebrities and the legal considerations and ethics of the business. Students will be doing play-by-play and color of live sporting events.

Grading Basis: Letter Grade

JRNL 4802 (3) Feature Writing

Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5802

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4822 (3) Reporting on the Environment

Involves reporting and writing about the environment by taking into account the scientific, technological, political, economic and cultural dimensions of environmental subjects.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5822

Requisites: Requires prerequisite course of JRNL 2001 (minimum grade C-). Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4841 (1-4) Undergraduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

JRNL 4872 (1-3) Special Topics: Print

Equivalent - Duplicate Degree Credit Not Granted: JRNL 5872

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Journalism (JRNL) or Program in Journalism and Mass Communication (JOUR) majors with a minimum of 57 hours taken.

Additional Information: Departmental Category: Print Online Journalism

JRNL 4874 (1-3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Journalism (JRNL or JOUR) majors only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 4931 (1-6) Internship

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

JRNL 5001 (3) Media Technology Boot Camp

Offers a foundation in the technologies of journalistic storytelling across a variety of established and emerging media platforms, such as print, television, radio, online publications, blogs, social media and emerging forms of communication. Students will emerge from the course with basic competence in the technical tools they will need as journalists.

Requisites: Restricted to graduate students only.

JRNL 5011 (3) Newsgathering and Multimedia Storytelling

Develops skills in research and reporting on public issues and news events, and in the construction of narrative in the journalistic and documentary traditions, using a variety of media platforms.

Requisites: Restricted to graduate students only.

JRNL 5102 (3) Photojournalism Portfolio

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4102

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5344 (3) Video Documentary Production

Designed to give students the experience of researching, writing, shooting and editing their own documentaries.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4344

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 5502 (3) Newsgathering 2

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4502

Requisites: Requires prerequisite courses of JOUR 5511 and JRNL/JOUR 5552 (all minimum grade C-). Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5512 (3) In-Depth Reporting

Shows how to dig beneath the surface of issues and events. Focuses on research, interviewing, and writing.

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5514 (3) Newsgathering for Television

Teaches advanced principles and techniques involved in the preparation of news for broadcasting.

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 5521 (3) Precision Journalism

Instructs students in data-driven investigative reporting. Includes hands-on, in-depth instruction in gathering data from census reports, commercial databases, global information networks, and other sources, and utilizing spreadsheets to analyze the information in ways that can help deepen and strengthen journalistic stories on a wide variety of subjects.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5552 (3) News Editing

Discusses principles and practice in copy editing and writing headlines for local and wire stories. Practice in page makeup, picture editing, and electronic editing.

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5562 (3) Digital Journalism

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture and society.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4562

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5602 (3) Opinion Writing

Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4602

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5624 (4) News Team

Students participate in Newsteam Boulder a program broadcast live over the Boulder cable television system.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4624

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 5634 (1-3) Broadcast Projects

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4634

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 5651 (3) Journalism Law & Ethics

Explores the legal and ethical frameworks of journalistic practice and media production. Covers historical as well as current frameworks used in examining the legal and ethical issues that arise in newsgathering and publication. Examines the relationships between ethics and the law in various media context.

Requisites: Restricted to graduate students only.

JRNL 5684 (3) Advanced Camera and Editing

Emphasizes the advanced techniques in digital video camera usage and digital editing for professional broadcast video production.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4684

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

JRNL 5702 (3) Arts/Cultural Reporting and Criticism

Emphasizes composition of criticism for the performing arts and other areas of entertainment.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4702

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5802 (3) Feature Writing

Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4802

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5812 (3) Science Writing

Helps students acquire the basic skills and knowledge required of science journalists. Also examines issues of scientific importance such as climate change, the nature of scientific knowledge, and how science is covered in various media.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5822 (3) Reporting on the Environment

Involves reporting and writing about the environment by taking into account the scientific, technological, political, economic and cultural dimensions of environmental subjects.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4822

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5841 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5851 (1-6) Graduate Professional Project

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5871 (1-3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5872 (1-3) Special Topics: Print**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4872**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Print Online Journalism**JRNL 5874 (1-3) Special Topics: Electronic Media****Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.**Requisites:** Restricted to Journalism (JRNL) graduate students only.**Additional Information:** Departmental Category: Broadcast Journalism**JRNL 5931 (1-3) Internship****Repeatable:** Repeatable for up to 3.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Core Curriculum and General Electives**JRNL 6321 (3) Literary Journalism**

Analyzes the work of journalists who became some of the greatest fiction writers of the 19th and 20th centuries, and examines the increasingly indistinct lines between journalism and narrative fiction.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Core Curriculum and General Electives**JRNL 6651 (3) Media Law**

Graduate seminar in communications law. Studies changing law and applied legal research techniques.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Core Curriculum and General Electives**JRNL 6871 (3) Special Topics****Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.**Requisites:** Restricted to graduate students only.**JRNL 6940 (1) Master's Degree Candidate****Requisites:** Restricted to graduate students only.**Grading Basis:** Pass/Fail**JRNL 7001 (3) Theories of Journalism Studies**

Introduces the principal concepts, literature and theoretical and paradigmatic perspectives of journalism studies, and explores their ties and contributions to parallel domains in the social sciences and humanities.

Requisites: Restricted to graduate students only.**JRNL 7002 (3) Journalism Research Design**

Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students explore designs that effectively address research questions through elaboration of theoretical and operational linkages.

Requisites: Requires prerequisite courses of JRNL 7001 and MDRP 7051 and MDRP 7061 (all minimum grade C-). Restricted to graduate students only.

Korean (KREN)

Courses

KREN 1010 (5) Beginning Korean 1

Trains students in elementary conversational and writing skills and provides grounding in the basic idiomatic and syntactical features of Korean, through lectures, drills, and language laboratory sessions based on set dialogues and readings.

Additional Information: Arts Sci Core Curr: Foreign Language

Departmental Category: Korean

Departmental Category: Asia Content

KREN 1011 (3) Introduction to Korean Civilization

Introduces the history of Korean culture within the context of political, social, and economic history. Covers the old Choson dynasty to present day Korea. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Korean Courses in English

Departmental Category: Asia Content

KREN 1020 (5) Beginning Korean 2

Continuation of KREN 1010.

Requisites: Requires prerequisite course of KREN 1010 (minimum grade C).**Additional Information:** Arts Sci Core Curr: Foreign Language

Departmental Category: Korean

Departmental Category: Asia Content

KREN 2110 (5) Intermediate Korean 1

Extends the conversational and written skills acquired at the elementary level. Although emphasis remains on spoken Korean, readings are increased, elementary writing skills are introduced gradually, and some Sino Korean characters are taught.

Requisites: Requires prerequisite course of KREN 1020 (minimum grade C).**Additional Information:** Arts Sci Core Curr: Foreign Language

Departmental Category: Korean

Departmental Category: Asia Content

KREN 2120 (5) Intermediate Korean 2

Continuation of KREN 2110.

Requisites: Requires prerequisite course of KREN 2110 (minimum grade C).**Additional Information:** Departmental Category: Korean

Departmental Category: Asia Content

KREN 2441 (3) Film and Korean Culture

Introduces Korean/South Korean cinema from colonial period to the contemporary including old Korean black and white films, the earliest talkie films and contemporary art films. Considers cinema as a window to see the tumultuous and diverse culture of modern Korea. Taught in English. No prior knowledge of Korea, Korean film or film art is required.

Additional Information: Departmental Category: Korean Courses in English

Departmental Category: Asia Content

KREN 3110 (5) Advanced Korean 1

Promotes an advanced level of speaking, reading, and writing. Focuses on contemporary business Korean language as reflected in various Korean media such as newspapers, magazines, and television. The goal is to acquire Korean language skills at a level that allows students to conduct business activities.

Requisites: Requires prerequisite course of KREN 2120 (minimum grade C).

Additional Information: Departmental Category: Korean
Departmental Category: Asia Content

KREN 3120 (5) Advanced Korean 2

This second semester of Korean offers advanced level speaking and writing. Focuses on understanding contemporary Korean languages as reflected in various communication media, such as print, TV, and films to help students understand Korean in a variety of contexts.

Requisites: Requires prerequisite course of KREN 3110 (minimum grade C).

Additional Information: Departmental Category: Korean
Departmental Category: Asia Content

KREN 3841 (3) Modern Korean Literature in English Translation

Surveys masterpieces of modern Korean literature written by significant Korean/Korean American authors in English. Provides various literary and theoretical frameworks to understand Korean literature within the context of Asian global culture. Covers from colonial period to the present. Taught in English. No prior knowledge of Korea or Korean literature is required.

Additional Information: Departmental Category: Korean Courses in English

Departmental Category: Asia Content

KREN 4900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Korean
Departmental Category: Asia Content

Language Technology (LGTC)

Courses

LGTC 5010 (3) Fundamentals of Second Language Acquisition and Teaching Practice

Introduces students to major theoretical approaches to Second Language Acquisition and explores their educational potential through scholarly readings and practical implementation and assessment of their usefulness in the foreign language classroom. This course is offered online summer semesters (D Term) through the School of Continuing Education.

Grading Basis: Letter Grade

LGTC 5020 (3) Educational Technology Foundation

Introduces the field of language technology from its origin to today; the latest theories and practices in technology integration; key journals, trends, issues and researchers in the field. This course is offered online summer semesters (D Term) through the School of Continuing Education.

Grading Basis: Letter Grade

LGTC 5030 (2) Language Technology Tools in Practice

Introduces students to major technical tools, explores their educational potential through scholarly readings and practical implementation and assessment of their usefulness in the classroom. This course is offered online fall semesters through the School of Continuing Education.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

LGTC 5032 (2) Gamification of Language Learning

Understand the fundamental aspects of games and gamification. Be able to distinguish between gaming and gamification in a classroom context. Explain and apply how games can support instruction. Identify various game tools and resources for classroom use and explain how these tools and resources support learning. Use appropriate professional language to discuss game mechanics in a learning context. Apply ACTFL standards for teaching and learning to gameful learning contexts.

Grading Basis: Letter Grade

LGTC 5035 (2) Online Language Learning: Best Practices

Explores the topic of teaching and learning languages online with an emphasis on employing best practices, course design, assessment and the use of synchronous and asynchronous tools to plan, deliver, teach and assess language through learning management systems and various Web 2.0 tools, culminating in the creation of a sample course plan and sample module for a prospective online language course.

Grading Basis: Letter Grade

LGTC 5040 (2) Telecollaboration for Language Learning Foundations

Trains foreign language faculty and instructors in dual immersion language learning via telecollaboration. This course is offered online summer semesters (B Term) through the School of Continuing Education.

Grading Basis: Letter Grade

LGTC 5045 (1) Telecollaboration Exchange for Language Learning

Requires that students conduct a total of 10, 50-minute long virtual immersions (through a video conferencing tool) with a language partner. Students will receive assistance to find a partner. Must be repeated for a total of 2 credit hours for certificate students. Offered online fall and spring semesters through the School of Continuing Education.

Repeatable: Repeatable for up to 2.00 total credit hours.

LGTC 5050 (3) Language Technology Practicum

Select, design, implement and assess a capstone instructional technology project of significance. Students will work closely with their advisor at each stage of the project and develop an online multimedia portfolio. This course is offered online spring semesters through the School of Continuing Education.

Grading Basis: Letter Grade

Latin Language (LATN)

Courses

LATN 1014 (4) Beginning Latin 1

Introduces basic grammar and vocabulary. For students with no previous knowledge of Latin.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Latin

LATN 1024 (4) Beginning Latin 2

Completes the presentation of grammar, incorporates review of fundamentals, and introduces reading of literature. For students with previous experience of Latin.

Recommended: Prerequisite LATN 1014.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Latin

LATN 2004 (3) Accelerated Latin 1

Intensive introductory course in Latin including a survey of grammar and practice reading and writing. No previous knowledge of Latin is required.

Additional Information: Departmental Category: Latin

LATN 2044 (3) Accelerated Latin 2

Continuation of LATN 2004. Reading of advanced texts: Caesar, Cicero, Ovid and others.

Recommended: Prerequisite LATN 2004.

Additional Information: Departmental Category: Latin

LATN 2114 (4) Intermediate Latin 1

Readings from Caesar and/or Cicero, with review of grammar.

Recommended: Prerequisite LATN 1024.

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Departmental Category: Latin

LATN 2124 (3) Intermediate Latin 2

Selections from Virgil's Aeneid with attention to literary form and context as well as advanced grammar and syntax.

Recommended: Prerequisite LATN 2114.

Additional Information: Departmental Category: Latin

LATN 3014 (3) Introduction to Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Cicero, Livy, Pliny). Formerly CLAS 3014.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Latin

LATN 3024 (3) Introduction to Latin Poetry

Author or topic in Latin specified in the online Schedule Planner (e.g., Virgil, Ovid, Catullus, Horace).

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Latin

LATN 4014 (3) Topics in Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).

Equivalent - Duplicate Degree Credit Not Granted: LATN 5014

Repeatable: Repeatable for up to 9.00 total credit hours.

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4024 (3) Latin Prose Composition

Reviews grammar and syntax. Introduces Latin prose style and composition.

Equivalent - Duplicate Degree Credit Not Granted: LATN 5024

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4044 (3) Topics in Latin Poetry

Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).

Equivalent - Duplicate Degree Credit Not Granted: LATN 5044

Repeatable: Repeatable for up to 9.00 total credit hours.

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4084 (3) Survey of Roman Literature Part 2: Imperial

Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 5084

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4094 (3) Survey of Roman Literature Part 1: Republican to Augustan

Introduces Roman literary history from its origins to the 30s BCE.

Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 5094

Recommended: Prerequisites LATN 3014 and LATN 3024.

Additional Information: Departmental Category: Latin

LATN 4824 (3) Latin Teaching Methods: Open Topics

Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.

Equivalent - Duplicate Degree Credit Not Granted: LATN 5824

Additional Information: Departmental Category: Latin

LATN 4844 (1-3) Independent Study

Formerly CLAS 4844.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Latin

LATN 5014 (3) Topics in Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).

Equivalent - Duplicate Degree Credit Not Granted: LATN 4014

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5024 (3) Latin Prose Composition

Reviews grammar and syntax. Introduces Latin prose style and composition. Formerly CLAS 5024.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4024

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5044 (3) Topics in Latin Poetry

Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).

Equivalent - Duplicate Degree Credit Not Granted: LATN 4044

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5084 (3) Survey of Roman Literature Part 2: Imperial

Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4084

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5094 (3) Survey of Roman Literature Part 1: Republican to Augustan

Introduces Roman literary history from its origins to the 30s BCE.

Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4094

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5404 (3) Special Project: Teaching

Trains students to prepare classroom-ready materials, which are then tested in the students' own classroom. Required of master's candidates (teaching of Latin option). Formerly CLAS 5404.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5824 (3) Latin Teaching Methods: Open Topics

Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4824

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 6004 (3) Graduate Reading

Author or topic specified in the online Schedule Planner. Formerly CLAS 6004.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 6844 (1-3) Graduate Independent Study

Formerly CLAS 6844.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 7014 (3) Graduate Seminar in Latin Literature

Formerly CLAS 7014.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

Law School (LAWS)

Courses

LAWS 4005 (3) Constitutional Law: Founding Principles and Current Debates

Explores the principles underlying the United States Constitution and offers an introduction to the powers of the three branches of the federal government and the interrelationship of state and national governments. Includes an introduction to the individual rights protected by the Bill of Rights and the operation of the Fourteenth Amendment's due process and equal protection clauses.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 4007 (3) Federal Income Taxation of Individuals

Designed to provide an introduction to federal income taxation of individuals.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 4017 (3) Introduction to Business Taxation

Provides a comprehensive introduction to the taxation of business activity and entities, including: 1) overview of principles of income taxation; 2) choice of entity; 3) formation, operation and dissolution of entities; 4) taxable and tax-deferred acquisitions; and 5) overview of international taxation. There are no course prerequisites.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 4075 (3) Introduction to American Law

Introduces undergraduate students to the American legal system and to legal reasoning and argumentation via case studies of prominent litigation. Students will learn basic conceptual building blocks of American law, basic lawyering skills and an understanding of how the American legal system structures and resolves complex disputes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 4201 (1) Philosophy of Entrepreneurship

Explores how entrepreneurship principles apply in a variety of life's contexts, ranging from startup companies to legal practice to developing one's own professional brand. Participants consider whether adoption of entrepreneurial principles - viz., a philosophy of entrepreneurship - is a useful way to approach problem solving, management issues, career strategies and other life challenges.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 4211 (3) Corporate Law

Covering foundations legal issues in corporate law. Topics may include the nature and purpose of the corporate form, the relationship between shareholders and management, the fiduciary duties of directors, securities regulation and mergers and acquisitions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 4226 (3) Professional Communication in Business

Aims to teach students the rhetorical principles and writing practices necessary for producing effective business letters, memos, e-mails, reports and collaborative projects in professional contexts. The curriculum is informed by current research in rhetoric and professional writing and is guided by the needs and practices of business, industry and the professions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 4458 (2-3) Introduction to Law and Literature

Explores the intersection between law and literature and will provide an opportunity to think about the law by reading engaging works of fiction and non-fiction, viewing important films and examining the law from a humanistic and philosophical perspective.

Grading Basis: Letter Grade

LAWS 4618 (2) Marijuana Law in Colorado

Explores the aspects of marijuana's history, pharmacology, potential harms and medical uses needed for intelligent study of governing law. Discusses the Federal statutory law classifying marijuana as a Schedule 1 forbidden drug and Colorado's medical and recreational laws permitting marijuana use on specific conditions and the conflicts between the two.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 4700 (3) Native American and Indigenous Peoples Law

Examine international law in the context of the adoption of the United Nations Declaration on the Rights of Indigenous Peoples, which represents a global consensus on adopting a human rights based approach to Indigenous Peoples. Explores how the domestic and international regimes intersect and are developing, as well as implications for future work and we will also look to the development of laws by Native American and indigenous peoples themselves.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 4801 (2-3) Technology, Law and Society

Provides a comprehensive and rigorous overview of contemporary challenges and opportunities introduced by evolving technology. From the Internet to drones, robotics to smartphones, and machine learning to video games, recent advances in technology put pressure on venerable societal institutions. This class focuses on the technology and the institutions, giving a deeper understanding of how each evolve and react to changes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 5064 (2) Legal Analysis

Designed to help students develop the analytical skills necessary for success in law school and on the bar exam. Students will strengthen their core analytical skills, written communication skills, and ability to retain information. The ability to engage legal questions at the highest level is a skill that can be practiced and improved.

Requisites: Restricted to Professional Year 1 Law students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 5103 (1) Legal Ethics & Professionalism: What Kind of Lawyer Do You Want to Be?

Explores both the kind of law students might decide to practice and the ethical, personal and professional commitments central to the practice of law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5121 (4) Contracts

Covers basic principles of contract liability, offer, acceptance and consideration, statute of frauds, contract remedies, the parole evidence rule, performance of contracts, conditions, effect of changed circumstances, third-party beneficiaries, assignment and specific performance.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 5201 (1) Entrepreneurship, Innovation and Public Policy

Explores cutting edge questions around entrepreneurship, including being an entrepreneur, leadership and what makes a great founding team, building and scaling a business, entrepreneurial communities, financing entrepreneurial companies, leadership in government, entrepreneurship and innovation policy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Business

LAWS 5203 (1) Legal Ethics, Professionalism and Creative Problem Solving

Developing reflective, creative problem solving and ethical legal professionals by touching a core set of issues facing lawyers, including the duty of confidentiality to clients and the hazard of conflicts of interest, providing students with an opportunity to confront these challenges in an interactive and engaged environment.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Electives

LAWS 5205 (3) Legislation and Regulation

Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way that implementing institutions, courts and administrative agencies, interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies and the courts.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 5211 (1) Framing and Legal Narrative

Thinking through the fundamental concepts that inform and animate different areas of law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

LAWS 5223 (2) Legal Writing II

Students prepare appellate briefs and related documents and deliver oral arguments before a three-judge court composed of faculty, upper-division students, and practicing attorneys. Practice arguments are videotaped and critiqued.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 5226 (2) Legal Writing I

Provides an intensive introduction to the resources available for legal research. Students also prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 5303 (4) Civil Procedure

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 5313 (3) Civil Procedure 2

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 5323 (1) Courtroom Observation Civil

An elective that requires 15 hours observing actual civil proceedings in a courtroom, attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5425 (3) Torts

Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 5503 (4) Criminal Law

Studies statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, the purposes of criminal law, and the constitutional limits upon it.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 5513 (1) Courtroom Observation Criminal

An elective that requires 15 hours observing actual criminal proceedings in a courtroom, attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5624 (4) Property

Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 5634 (2-3) Property 2

Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 5646 (1) Foundations of Legal Research

Moves students from the brief introduction to legal research offered in the first-year legal writing classes to the sort of problem-centered research students will perform starting in the summer after their first year. Provides students with a conceptual understanding of the organization and connectivity of legal authority and with instruction in research methodology at both the project and resource levels.

Requisites: Restricted to Professional Year 1 Law students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 5803 (1) Courtroom Observation International

An elective that requires fifteen hours observing proceedings before an international tribunal(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. The proceedings observed will be available streaming online and the professor will provide information about how to gain access to them.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6001 (4) Commercial Transaction

Grading Basis: Letter Grade

LAWS 6002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife and wilderness resources on public lands.

Requisites: Requires prerequisite course of LAWS 6112 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6004 (3) Real Estate Transactions

Focuses on legal issues that arise in all phases of real estate transactions, with an emphasis on the role of the lawyer in the business of real estate as well as on the regulation of real estate markets.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 6005 (4) Constitutional Law

Studies constitutional structure: judicial review, federalism, separation of powers; and constitutional rights of due process and equal protection.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 6007 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6700

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 6008 (3) Foundations of International Legal Thought

Provides students with a broad historical and philosophical introduction to international law. Addresses changing conceptions of sovereignty between 1492 and World War II, in the contexts of the Spanish conquest of the Americas, the international legality of the slave trade, relations between the Ottoman Empire and the "Great Powers", the Chinese opium wars and the rise of modern international institutions.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6009 (4) Legal Aid Civil Practice 1

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material.

Develops working knowledge of courtroom skills.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6011 (3) Payment Systems

Examines the methodology and policies of Articles 3 and 4 of the Uniform Commercial Code, dealing with such topics as negotiable instruments, bank deposits, collections, letters of credit and electronic fund transfers.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6019 (4) Civil Practice Clinic 2

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills.

Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6021 (3) Secured Transactions

Explores the methodology and policies of Article 9 of the Uniform Commercial Code, dealing with financing transactions in personal property.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6024 (3) Real Property Security

Examines basic mortgage law, including use of mortgage substitutes (e.g., deeds of trusts and installment land contracts). Covers foreclosure and redemption and related problems; special priority problems in land acquisitions and construction financing; special financing devices, including variable-interest and wraparound mortgages; and problems relating to the transfer of the mortgagor's and mortgagee's respective interests.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property, Trust and Estate and Land Use

LAWS 6029 (4) Criminal and Immigration Defense Clinic

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6031 (2) Consumer Protection Laws and Policies

Focuses on deceptive trade practices and consumer rights. Reviews the law of deception/misrepresentation at common law, and federal and state laws regarding unfair acts and practices. Covers credit practices, environmental and health claims, and telecommunications and privacy. Discusses remedies, including governmental enforcement actions, and individual and class actions.

Grading Basis: Letter Grade

LAWS 6035 (3) White Collar Crime

Examines distinctions between white collar crime and other types of criminal activity and the needs for and arguments against white collar laws and law enforcement. Studies securities fraud, mail and wire fraud, insider trading, money laundering, false statements, conspiracy and criminal forfeiture statutes. Includes use of the grand jury, privileges applicable in the corporate setting, immunity, discovery and the impact of parallel civil proceedings. Examines effect of government policy on corporations and their counsel, pre-trial and trial strategy, jury selection and victim notification and restitution options.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6039 (4) Criminal Defense Clinic 2

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills.

Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6045 (3) Criminal Procedure

Focuses primarily on the constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation and lineup identification.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6049 (4) Legal Assistance 1: Federal Courts

Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

Grading Basis: Letter Grade

LAWS 6055 (3) Post-Conviction Criminal Procedure

Addresses sentencing process and schemes, direct appeals, probation modification and revocation, parole revocation, pardon and commutation processes, post-conviction litigation and appeal in both state and federal court, federal review of state convictions through habeas and/or the AEDPA, and ethical issues that arise in post-conviction proceedings.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6059 (2-3) Legal Aid and Defender

Grading Basis: Letter Grade

LAWS 6060 (3) White Collar Crime Practicum

Addresses the non-trial portion of white collar criminal law. Drawing examples and problems from wire fraud, securities fraud, health care, and computer fraud contexts, explores a white collar case's major investigative and charging phases, corporate and organizational issues, as well as pleas and punishment.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6065 (3) Media, Popular Culture, and the Law

Examines how the institutions, practices, and the very identity of the law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed is: to what extent, and how are the forms and methods of the new media, having an effect on the perception, role and identity of law?

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 6069 (4) Immigration Clinic

Emphasizes practice skills in immigration cases. Includes litigation before Federal Immigration judges, Board of Immigration Appeals, and Federal Circuit Court of Appeals.

Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).

Grading Basis: Pass/Fail

LAWS 6079 (4) Criminal Defense Clinic

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants. Develops working knowledge of courtroom skills, advocacy and evidence presentation. Concludes with full mock trial.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6089 (4) Legal Assistance 2: Federal Courts

Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

Grading Basis: Letter Grade

LAWS 6099 (4) Family Law Clinic

Represents low-income clients in family law cases in local state district court. Students will gain court-based experience in dissolution's and allocations of parental responsibilities. Seminar component includes instruction on substantive family law, related ethical issues, and theoretical backgrounds of poverty lawyering.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation, Negotiation Alt Dispute Resolution

LAWS 6103 (2-3) Legal Ethics Professionalism

Examines the legal profession as an institution, its history and traditions and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 6105 (2) Defending Immigrants in Criminal and Immigration Courts

Addresses legal procedures, pleadings and client advocacy matters involved in the representation of Spanish-speaking clients who have been arrested for criminal offenses and who have been issued a detainer by Immigration and Customs Enforcement for possible immigration removal proceedings. Provides overview of criminal defense concepts, and how criminal defense attorneys must be prepared to competently counsel their clients who are facing removal proceedings in the federal immigration system.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 6108 (3) Conflict of Laws

Addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6109 (2) Trial Advocacy

Focuses on voir dire, opening statement, direct examination of witnesses and cross examination.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6112 (3) Foundations of American Natural Resources Law

Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6113 (2) Legal Ethics and Professionalism: Ethics and the Law of Lawyering

Continuation of LAWS 5103. Focuses on the Model Rules of Professional Conduct. Provides the nuts and bolts of the ethical rules needed to begin to explore externships, clinics, pro bono projects and other practice experiences during law school.

Requisites: Requires prerequisite course of LAWS 5103 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6114 (2) Construction Law

Focuses on the basic principles and practices of construction law. Provides an overview of construction industry participants and players (engineers, contractors, insurers) and discusses and analyzes the various obligations and liabilities of these parties. Covers construction and design contracting, construction claims, professional negligence, construction insurance and suretyship and ADR in construction. Provides transactional-practice oriented exercises.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 6117 (3) Survey of Business Enterprise Tax

Makes a comparative survey of federal income taxation of C corporations, S corporations, and partnership/limited liability companies, the principal entity choices for conducting business in the United States. Includes formation, operations, distributions, sales of interests, and liquidation. Suitable for students seeking introductory background for business or real estate practice, without the detail required for a tax specialist.

Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 6119 (1) Deposition Skills

Provides valuable skills to assume active roles in the deposition process. Explores why and when to take depositions; drafting and objecting to deposition notices for individual deponents, non-party witnesses and corporate designees; drafting successful outlines, proper questions and objections; using exhibits; furthering case theory, making and using stipulations; using depositions in pretrial motions and at trial.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6122 (2) International Natural Resources Law and Policy

Examines the suite of policy issues and legal ramifications associated with sustainable natural resource development. Examines most recent research on the "resource curse" theory. Examines recent policy developments and discussions that have occurred among industry, NGOs, multilateral development agencies and governments. Examines issues related to bribery and corruption in developing country environments and dispute resolution mechanisms at national and local levels.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment Natural Resources

Departmental Category: International Comparative Law

LAWS 6123 (2) Legislative and Policy Drafting

Exposes students to the process of drafting and amending enacted legal texts such as statutes, regulations, and polities of both governmental and non-governmental entities. Students will critically examine lawyers' roles as counselors, advocates and experts in different legislative and policy-drafting contexts.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6128 (1-3) Statutory Interpretation

Examines theories of legislation and the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 6138 (2-3) Federal Tax Politics

Studies the tax system as the nexus of politics and economics. Examines how various interests and entities use the many tools of political power to shape the tax system. Intended for those interested in politics and legislation, rather than for the tax specialist.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 6157 (3) Corporate Taxation

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6450

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 6167 (3) Partnership Taxation

Studies federal income taxation of pass-through entities such as are used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6430

Requisites: Requires a prerequisite course of LAWS 6007 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 6170 (1) E-Discovery

Exposes students to the legal and practical challenges presented by E-discovery and how electronically stored information shapes litigation and the pretrial process. Students gain an understanding of how electronically stored information can impact an overall discovery strategy and how this complicates a lawyer's ethical and professional obligations.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6179 (2) Trial Practice

Students apply the rules and doctrine of evidence in simulated trial settings. Must be taken with the corresponding section of Evidence. Satisfies the trial practice requirement and counts 2 hours toward the 14 credit hour maximum of clinical hours counted toward graduation.

Grading Basis: Letter Grade

LAWS 6201 (3-4) Agency, Partnership, and the LLC

Surveys agency law whose principles are important in many other areas of law. Studies the legal organizations commonly used by small businesses: partnerships and limited liability companies (LLCs).

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6205 (3) Lawyers for Social Change

Helps students expand their perspective to understand the ways in which lawyers more broadly participate in social change work in this service learning class. Analyzes case histories of cause lawyering. The service learning component is based on the precept that one of the most effective ways to learn a role is to perform that role. Students will participate as social change lawyers by working with a local community to help it develop projects that the community believes will help it better itself.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 6206 (3) Litigation Drafting

Examines the intersection of civil procedure and legal writing. Emphasizes the drafting of persuasive adversarial litigation documents, including complaints, answers, motions in limine, motions to dismiss, motions of summary judgment, and jury instructions. Intensive writing and workshop format.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6207 (2) Writing in the Regulatory State

Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.

Grading Basis: Letter Grade

LAWS 6209 (4) Sustainable Community Development Clinic

Provide legal and policy advice, guidance and representation related to sustainable development with a focus on fostering social enterprise, healthy communities and poverty reduction.

Grading Basis: Letter Grade

LAWS 6210 (2-3) Comparative Law

Considers foreign solutions to certain key legal problems. Focuses on general problems of legal process, rather than on substantive rules. Topics include the role of lawyers, civil dispute resolution, criminal procedure and employment discrimination. Covers different legal systems in different years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6211 (3) Corporations

Covers formation of corporations and their management; relations among shareholders, officers and directors; the impact of federal legislation on directors' duties; the special problems of closed corporations.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6213 (2) Advanced Appellate Advocacy

Advanced study and practice of written and oral appellate advocacy. Builds on the foundation established in the required first-year course in appellate advocacy, but provides more extensive coverage, practice and evaluation. Personalized instruction in brief writing, including detailed, one-on-one critique of their work. Include advanced techniques for organizing and writing a brief, and advanced instruction on the strategy and process of oral argument. Required to research, write, and rewrite, an appellate brief and conduct several oral arguments. Attend oral arguments of the United States Court of Appeals for the Tenth Circuit and the Colorado Court of Appeals.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6220 (3) Introduction to Jewish/Israeli Law

Outlines the history and basic principles of Jewish Law, Halakhic system that encompasses Biblical law and the Rabbinic law. Covers Legal Sources of the Jewish laws, interpretation, legislation, custom, precedence and legal reasoning. Explores the study of modern legal system of the state of Israel and examines the problematic nature of the incorporation of the Law of personal status in the Rabbinical and in general courts.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6221 (3) Compliance

Covers requirements for corporate compliance programs and key components of them, including the role of audit committee, internal audit and ethics and compliance. Looks closely at different compliance regimes, including Sarbanes Oxley, the privacy and security components of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), the evolution of other data privacy standards and the anti-corruption standards of the Foreign Corrupt Practices Act and the UK Bribery Act.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6223 (3) Research and Writing in the Regulatory State

Focus on developing in students the research, writing and analytical skills necessary to operate within any highly regulated field. Students will work broadly on research and writing skills required in a regulatory practice and narrowly on how that applies to particular areas of expertise, to gain an understanding of a particular area of the law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6226 (1-3) Advanced Legal Research and Writing

Builds on skills learned in the first-year legal writing course to improve written legal analysis. Students will complete multiple written assignments and will receive individual feedback on their work. Sections vary significantly depending on the professor; please check the Legal Writing page of the Colorado Law website to read each professor's course description.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6236 (2) Judicial Opinion Writing

Places contemporary American judicial opinion in historical and comparative context. Analyzes individual and institutional writing choices that authors of judicial opinions must make and ethical dilemmas they must confront. Builds upon the first-year legal-writing curriculum. Challenges students to develop and defend their own opinion-writing approaches and styles as well as to write from approaches and in styles that are not their own.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6246 (2) Introduction to United States Legal System/Legal Reasoning, Research and Writing

Introduces students without a law degree to the basic structure and content of the United States legal system, examining how the three branches of government at the state and federal levels make law and policy in the United States. The course will provide a basic introductory overview of the following: the various sources of law, including an understanding of how statutes are enacted by legislative institutions; the role of the United States court system in interpreting laws; application of judicial precedent in common-law systems; trial and appellate court procedures; and judicial review standards. The course will also introduce students to the methodology of American law, including legal reasoning, research, and writing, through a variety of in-class and outside research and writing assignments.

Grading Basis: Letter Grade

LAWS 6251 (4) Corporations

Covers formation of corporations and their management; relations between shareholders, officers, and directors; the impact of federal legislation on directors' duties; and the special problems of closed corporations.

Grading Basis: Letter Grade

LAWS 6270 (2) Law and Mathematics

Basic mathematical concepts relevant to law: proportions, exponential growth/interest, present value calculations, probability, DNA evidence, basic statistics. Intended especially for students who lack confidence in their math skills, but all are welcome. Basic calculations will be learned, but emphasis will be on the concepts behind mathematical techniques and on relationships between evidence, calculation and truth.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 6271 (1-2) Special Topics: Deals Lab

Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite LAWS 6211.

Grading Basis: Letter Grade

LAWS 6280 (1) Intensive Intro to Financial Info, Accounting and the Law: Accounting Boot Camp

Exposes students to the basics of financial accounting and when and how lawyers encounter accounting problems. Students will leave the course with an understanding of the basic framework of accounting, including the double-entry method, balance sheets, income statements, and statements of cash flows, time value of money, discount rates, basic methods of business valuation, and risk and diversification concepts.

Grading Basis: Letter Grade

LAWS 6281 (3) Accounting Issues for Lawyers

Studies accounting and auditing problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6301 (3) Introduction to Intellectual Property

Provides an overview of our nation's intellectual property laws, including patents, copyrights, trademarks and trade secrets. Discusses other matters related to intellectual property, including licensing, competition policy issues and remedies.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5245

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6302 (3) Water Resources

Analyzes regional and national water problems, including the legal methods by which surface and ground water supplies are allocated, managed and protected.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6308 (2) Law and Neuroscience

Covers neuroscience basics and explores the relationship between the law and recent neuroscientific discoveries in domains including pain, memory, lie detection, psychopathy and criminal responsibility.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6311 (1) National Security and Privacy Law

Introduces national security and privacy law and relevant law, regulations, rules, policies, and guidelines.

Grading Basis: Letter Grade

LAWS 6315 (2) The Prosecutor's Role in the Criminal Justice System

Designed to familiarize students with the professional and ethical duties of the prosecutor in the criminal justice system, with the goal of encouraging students to think about the role that prosecutors play. While the focus of the materials and presentations will center on the Colorado criminal Justice system, the concepts and principles addressed translate to all state systems and the federal system. National trends and legislative policy decisions related to criminal law, and their potential impact on public safety and prosecution efforts will also be discussed.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Criminal

LAWS 6318 (3) Economic Analysis of Law

Introduces the basic elements of economic theory and emphasizes demand and utility, cost and optimality.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6321 (3) Computer Crime

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront as they respond to recent explosions in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in enforcement of computer crime laws, and civil liberties online.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6328 (3) Financial Decision-Making

Applies concepts, ideas, insights and principles of modern finance to real-world situations that lawyers will face in many areas of law. Analyzes present discounted value (time value of money), risk versus return, asset diversification, portfolio theory, efficient markets hypothesis, arbitrage, financial options, real options, financial signals, human capital, behavioral finance, socially responsible investing, neurofinance, happiness finance and financial bubbles and crashes.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6331 (1) The Technology of Privacy

Explores the escalating debates by policymakers, scholars, advocates and industry representatives about the growing spread of tracking and surveillance in society. Debates are being spurred by the pace of changes to technology and particularly of changes to Internet and mobile technology. Practitioners in information privacy law or technology policy must understand the past, present, and likely future, of the technology of privacy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6338 (1) Understanding the Global Financial Crisis

Explores the causes and consequences of the global financial crisis. Analyzes financial instruments and institutions at the heart of the crisis – including asset-backed securities, credit derivatives, government-sponsored entities, credit rating agencies, hedge funds, and financial conglomerates – and places them in the context of a larger "shadow banking system". Examines the building blocks of financial reform.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6353 (3) Evidence

Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6361 (2) Information Privacy

Explores the laws that regulate the basic technologies of the internet and the management of information in the digital age. It examines the most significant statutes, regulations and common law practices that comprise this emerging legal framework.

Grading Basis: Letter Grade

LAWS 6363 (5) Evidence and Trial Practice

Studies methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Applies rules and doctrine of evidence in simulated trial settings. Combined Evidence and Trial Practice course. Satisfies the trial practice requirement and counts two hours toward the 14 credit hour maximum in clinical hours.

Grading Basis: Letter Grade

LAWS 6373 (3) Federal Litigation: Everything but the Trial

Litigates through all pretrial phases as plaintiff's counsel, a mock federal case: an employee's challenge to compensation and termination, with possible claims including breach of contract, breach of the implied covenant of good faith and fair dealing, violation of wage payment statutory and regulatory requirements, and fraudulent inducement to contract.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6400 (3) International Law

Examines the nature, structure and sources of international law, the relationship between international law and domestic U.S. law, the role of international organizations such as the United Nations, the methods of resolving international disputes, the bases of international jurisdiction, and select substantive areas of international law that may change from semester to semester.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6401 (1) Foreign Corrupt Practices, Anti-Bribery and Anti-Trafficking

Examines Foreign Corrupt Practices Act and similar legal regimes that target bribery and trafficking.

Grading Basis: Letter Grade

LAWS 6410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6415 (2-3) Drug Product Liability Litigation: Principles and Practice

Explores product liability lawsuits and litigation. Explores law of product liability and the tools necessary to successfully litigate these cases. Considers the theory and practice of lawsuits now and after the Supreme Courts landmark decision in Wyeth v. Levine (2009). Focuses on similarities and differences between the special context of FDA regulation. Considers the legal principles governing such lawsuits such as inadequate warning, the Learned intermediary Doctrine and medical causation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business and Commercial Law

LAWS 6420 (1) Law and the Holocaust

Explores comparative law, jurisprudence, conflicts of laws and international law. Examines the Nazi philosophy of law emanating from its egregious racial ideology, and how it was used to pervert Germany's legal system to discriminate against, ostracize, dehumanize and eliminate certain classes of people. Studies the role of international law in rectifying the damage by bringing perpetrators to justice and constructing a legal system designed to prevent a repetition.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6458 (2) Creative Writing for Lawyers

Requires substantial writing and reading. Begins with participants bringing to class a piece of creative writing consisting of three to five thousand words. Each session consists of one hour of discussion and critique of an assigned writing exercise that everyone has prepared for the class, and one hour of workshop critique of each participant's longer work, in turn.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6501 (2-3) The Practice of Labor and Employment Law

Focuses on aspects of the practice of employment law, rather than the examination of legal doctrines. Discusses typical issues presented in advising and litigating on behalf of employers and employees. Topics include special attention to ethical issues.

Grading Basis: Letter Grade

LAWS 6502 (2) Wildlife and the Law

Examines the law that protects wildlife, its habitat and biodiversity. Explores human-caused threats including habitat destruction, illegal trade and climate change. Focuses on statutes, case law, environmental ethics, and current controversies to highlight legal, scientific and political strategies for protecting biodiversity. Particular emphasis is placed on the U.S. Endangered Species Act.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6503 (3) Law and Social Sciences

Explores disparities in criminal sentencing and death penalty cases; quality and effectiveness of legal representation for indigent criminal defendants; relationship between modifications in traditional steps in legal process; connection between alternative tort doctrines and volume of litigation, trial rates, plaintiff success rates and award size; impact of congressional statutes and US Supreme Court decisions on handling and outcomes of habeas corpus petitions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6508 (1) The Philosophy of Law

Questions the nature of law, characteristics and considerations of a legal system, rights and from where they come; thinking like a lawyer, basic techniques of legal reasoning, difference between doctrinal and normative legal analysis. Explores law's frontier and what distinguishes law from morality or politics. Focuses on influential texts from the end of WWII to the end of the Cold War.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6510 (2-3) International Environmental Law

Examines international environmental law, including transboundary impacts and global issues. Addresses such issues as intergenerational equities, principles of compensation, and if international environmental norms should receive special environmental norm consideration. A course in public international law is not a prerequisite, but students who have not taken such a course will probably find it useful to do some additional background reading. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6511 (2-3) Labor Law

Relates to labor unions and other collective aspects of employment, including the right of workers to form and join unions, to provoke collective bargaining and to strike and engage other forms of protest. Focuses on domestic law at the federal level and with a particular statute, the National Labor Relations Act, and the workings of particular agency, the National Labor Relations Board. Engages other sources of law, including constitutional law, as well as judicial decisions and other statutes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6513 (2) Crime Victims Rights and Victim Counseling and Advocacy

Involves highly experiential and participatory form of learning related to the rights and needs of victims of crime. Legal and constitutional aspects of crime victims' rights and advocacy are considered. Includes a training component by Moving to End Sexual Assault, a Boulder based organization. After training by MESA, students will complete 120 hours of volunteer service on the MESA hotline as well as attend various meetings.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 6518 (3) Introduction to Islamic Law

Examines the Formative Era of Islamic Law, through its sources and methodologies. Examines the Established Era of the Schools of Law including differences between Sunni and Shiite Islamic Law. Examines human rights, terrorism, political Islam, women's rights and rights of religious minorities, criminal law, and finance law, and the growing role of fundamentalism in these areas. Examines the relevance of Islam and Islamic law in today's world.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6521 (3) Employment Law

Entails a survey of employment-at-will, workplace safety, workplace torts; ERISA and retirement, workers' compensation; controls on hours and wages; health insurance; disability and unemployment compensation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6525 (2-3) Elder Law

The counseling and legal representation of older persons and their representatives. Topics may include: legal aspects of health and long-term care planning, public benefits, surrogate decision making, legal capacity, the conservation, disposition, and administration of older persons' estates, the implementation of their decisions concerning such matters, and the broad ethical issues of representing clients in this field of practice.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 6528 (3) Capital Punishment in America

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6531 (3) Comparative Employment Law

In today's globalized world, lawyers are increasingly likely to encounter issues involving foreign employment. Provides substantive knowledge about foreign employment law and its relation to American law, as well as a comparative framework to assess the relative merits of the American approach to employment law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6540 (3) Global Law & Global Governance

Addresses contemporary theories of globalization. We will explore questions such as: What is globalization, and in particular, what is the globalization of law? What is the extent of legal globalization, and how can we know? Are global law and global governance good things? How are these categories any different from what has traditionally been called "international law"? Our search for answers will be guided by a selection of recent books from theorists of globalization and global governance, such as David Held, Immanuel Wallerstein, and David Kennedy.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6541 (2) Colorado Worker's Compensation Theory and Practice

Introduces the legal theories that underlie the no-fault compensation system, its historical evolution, policy conundrums and ethical quandaries. Teaches the application of the procedural rules most frequently utilized in administrative setting. Studies the Workers' Compensation Act, the Workers' Compensation Rules of Procedure and the Office of Administrative Courts Rules of Procedure.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6551 (3) Employee Benefits and Compensation Law

Examines past and present employee benefits and compensation practices among private and public employers. Covers ERISA and defined benefit, defined contribution and welfare benefit plans; equity awards granted by corporations; equity awards granted by LLCs and partnerships; nonqualified deferred compensation and Section 409A of the IRS; golden parachutes and Sections 280G and 4999 of the IRC.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6555 (2-3) Disability Rights

Examines doctrinal and practical dimensions of disability rights with particular focus on the Americans with Disabilities Act. Emphasizes not only substantive law in area but also applications, including litigation, counseling clients and working with other professionals (e.g., architects) on compliance.

Grading Basis: Letter Grade

LAWS 6601 (3) Corporate Transactions in Latin America

Introduces students to an overview of Latin American commercial and civil law systems, looking closely at Napoleonic and Chilean law. Explores the choice legal structures available for Latin American corporations; contract law that regulates business transactions in Latin America; and exploration of the way in which Latin American countries have joined international business trade agreements that pertain to Latin American nations such as the Vienna Convention and Gatt.

Grading Basis: Letter Grade

LAWS 6602 (3) Cultural Property Law

Concerns domestic and International regulation of property that expresses group identity and experience. Organized around traditional categories of property (real, personal and intellectual), covers historic preservation, archeological resources, art and museum law, with attention to indigenous people's advocacy on burial sites, traditional lands, ceremonies, music, symbols, ethnobotany, genetic information and language. May satisfy upper-level writing requirement.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6702 (1) Climate Justice

Introduces the field of climate justice and seeks to identify legal and policy tools for advancing fair outcomes in climate change decision making. Climate justice is concerned with the intersection of race and/or indignity, poverty, and climate change.

Grading Basis: Letter Grade

LAWS 6708 (1-3) Special Topics

Explores special topics in law.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions and key issues in policy design. Reviews the Supreme Court's April 2, 2007, decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes and the aftermath in the courts, Executive Branch and Congress.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments and the key federal statutes and regulatory regimes governing natural gas, electricity and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail competition.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6732 (3) Renewable Energy Project Finance and Development

Examines renewable energy and how legal topics impact financing projects. Reviews structure, regulation, and functioning of electric energy industry and laws applicable to development, ownership and operation of renewable energy projects across technologies. Addresses legal policy, economic and financing issues associated with expansion and improvement of the transmission grid to support renewable energy development.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6801 (1) Anti-money Laundering Law

Explores domestic and foreign laws against money laundering, including know your customer and bank secrecy rules.

Grading Basis: Letter Grade

LAWS 6803 (3) Quantitative Methods

Equips students to deal effectively with experts, whether as consultants or as adverse witnesses, and to enable the identification of a quantitative issue. Helps students to become multi-dimensional in quantitative literacy. Enables students to be comfortable reading statistical arguments, performing basic analyses, writing about statistics, expressing quantitative ideas in graphs, questioning an expert, and understanding the power of computer programming.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6813 (2) Problem-Solving, Professional Judgment, and Decision Making

Drawing from materials in psychology, behavioral economics, and mathematics, the course studies a range of patterns, fallibilities, and best practices concerning the complex problems commonly encountered by attorneys. Topics include general problem-solving strategies, techniques for operating in environments of uncertainty and complexity, empirically supported cognitive biases and errors, and strategies for recognizing and overcoming those errors.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6816 (1-2) Problem-Solving and Writing

Enhances students' ability to solve problems and writing concise coherent memos to clients or other legal documents outlining their legal analysis and strategic thinking. Uses diagnostic exams in which students are given multiple documents for fact patterns to begin their analysis.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6823 (1-2) Legal Reasoning

This course of seven 100-minute classes aims to present legal reasoning skills crucial to the crafting and criticism of legal arguments. The classes will cover seven topics: rules and standards, the art of the legal distinction, dealing with legal contradictions, facts and framing, level of abstraction, baselines, and legal interpretation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6836 (1) Special Topics in Legal Research

Builds upon first-year legal research problem solving skills by exposing students to the nuances of research topics in a specialized topic and tracking related doctrinal classes, e.g., environmental and natural resources law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6856 (2-3) Advanced Legal Research

Offers an in-depth look at research resources and methods. Includes sources from the judicial, legislative, and executive branches of federal and state government; research in topical areas such as environmental law, taxation, and international law; and extensive coverage of secondary and nonlaw resources. Covers both print and electronic sources.

Students will have several assignments and a final project.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6866 (1) Colorado Legal Research

Surveys resources and methods to effectively research Colorado law. Covers primary and secondary resources including Colorado statutes, cases and digests, regulations, and constitution and practice materials. Covers how to research Colorado municipal law and other Colorado topics.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6876 (2) Legal Research Skills for Practice

Approaches legal research from a practice-focused perspective using hands-on sessions in the library. Instructs: how to find and use resources specific to a particular practice area; how to evaluate and weigh strengths and weaknesses of the various legal resources available; and, how to use legal resources efficiently. Includes research strategies and methods, primary and secondary resources, and research using library catalogs and Westlaw, Lexis, and other vendors.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6886 (3) Advanced Legal Research and Analysis

Develops students' ability to think critically about and solve current legal problems. Evaluates the benefits and detriments of both print and on-line legal resources, and how to create an efficient research plan. Formulates and applies research strategies to real-world legal problems, and uses legal analysis to refine and improve research results. Note: students who have taken LAWS 6856 may not enroll in this course.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6896 (3) Advanced Legal Research and Writing for Practice

Advances and improves legal research and writing skills learned in first year. Proposes variety of assignment types across substantive and procedural areas to prepare for experiences as summer associates or new attorneys.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 7003 (3) Federal Courts

Looks at structure and jurisdiction of the federal courts, emphasizing problems of federalism and separation of powers and their relationship to resolution of substantive disputes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7004 (3) Advanced Deals Lab: Real Estate Transactions

Using documents from actual real estate transactions, this course will focus on the drafting and negotiation skills required for the successful practice of real estate transaction law. Students will negotiate and draft actual real estate transactional documents.

Requisites: Requires prerequisite course of LAWS 6004 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 7005 (3) Media Law

Surveys common, statutory, and regulatory law as applied to the mass media. Focuses on the law as it affects the gathering and publishing of news. Also examines the regulation of the electronic media.

Grading Basis: Letter Grade

LAWS 7011 (3) Creditors' Remedies and Debtors' Protections

Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes prejudgment remedies, statutory and equitable remedies, fraudulent conveyance principles and exemptions and other judicial protections afforded debtors.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7013 (2) Supreme Court Decision Making

Students deliberate over several important cases as "Justices" of the Supreme Court. Class is divided into three "Courts" with the first hour spent in deliberation and the second hour in discussion of the deliberative process as well as the substantive issues.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7015 (3) First Amendment

Examines speech and religion clauses of the First Amendment. Includes the philosophical foundation of free expression, analytical problems in First Amendment jurisprudence and the relationships between free exercise of religion and the separation of church and state.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7019 (1-2) Advanced Clinical Practicum

Enables a clinical student an optional 1-2 credit course to complete an ongoing clinic project that does not reach its natural conclusion during the regular term of the clinic. May be used in connection with any existing clinical course, but only with permission, and under the supervision of the clinical faculty member. A clinical student must complete a minimum of 50 hours of work per credit taken.

Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7021 (3-4) Bankruptcy

Briefly examines nonbankruptcy business rehabilitation devices, followed by basic principles of federal bankruptcy law and the bankruptcy court system. Concludes with attention to business reorganizations under Chapter 11 of the Bankruptcy Code.

Recommended: Prerequisites LAWS 6001 and LAWS 7011.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7023 (2) Jury Selection and History

Studies the history of the jury from ancient times through the implications of Apprendi, the grand jury from the time of Henry II through modern federal practice, and current jury selection procedures, both federal and Colorado, both civil and criminal. Experienced trial attorneys will work with students to demonstrate jury selection.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7024 (2-3) Real Estate Planning

Considers various contemporary legal problems involved in the ownership, use, development and operation of real estate. Emphasizes the income tax and financing aspects of commercial and residential use and development such as shopping plazas and apartment buildings.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 7025 (3) Civil Rights

Presents a comprehensive study of federal civil rights statutes briefly reviewed in other courses (e.g., Constitutional Law or Federal Courts). Studies federal civil rights statutes, their judicial application, and their interrelationships as a discretely significant body of law of increasing theoretical interest and practical importance.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7029 (3) Appellate Advocacy Clinic

Provides a clinical course that enables students to work on briefs of criminal cases being handled by the Appellate Division of the Public Defender or Attorney General's Office. Instruction in oral advocacy is given. Enrollment limited to eight students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7031 (3) Regulation of Financial Institutions

Focuses on the core banking law and works outward to cover a broader spectrum of bank-like financial institutions. Covers bank licensing, restrictions on bank business, regulating safety and soundness of banks, consumer protection of depositors and other bank customers and regulatory examination and enforcement.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7045 (3) Criminal Procedure: Adjudicative Process

Focuses primarily on criminal procedure at and after trial. Looks at bail, prosecutorial discretion, discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal and federal habeas corpus.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7051 (1-3) Transactional Drafting

Focuses on principles of contemporary transactional drafting. Skills gained will be applicable to transactional practice and will also be useful to litigators. Students will learn to translate, draft and review contracts, as well as how to add value to deals.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

LAWS 7055 (3) Education Law

Considers issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling, alternatives to public schools, socialization and discipline in the schools and questions of equal educational opportunities.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7058 (3) Conflict of Laws

Grading Basis: Letter Grade

LAWS 7061 (1) Contract Drafting

Begins with value creation by transactional lawyers and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps, and warranties, capitalized terms, definitions, indemnifications and escrow).

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Business

LAWS 7065 (3-4) Immigration and Citizenship Law

Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Topics include admission and exclusion, deportation, and refugees and political asylum. Approaches topics from various perspectives, including constitutional law, statutory interpretation, planning, ethics, history and policy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7071 (2-3) Advanced Transactional Drafting

Provides students with the opportunity to further develop skills gained in LAWS 7051 and put them to use in simulations and business contexts across various areas of practice. Students will be asked to draft industry specific contract provisions, revise existing contracts, counsel and negotiate on behalf of clients and work through ethical dilemmas encountered by transactional attorneys.

Requisites: Requires a prerequisite course of LAWS 7051 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 7079 (2) Wrongful Convictions

Focuses on the issues and remedies in cases of people who have been convicted, whose traditional appellate remedies have been exhausted, and who continue to claim actual innocence. Preference given to those who have taken or are taking more criminal procedure courses.

Grading Basis: Letter Grade

LAWS 7085 (2) Law and Religion

Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the First Amendment are a central but not exclusive subject of study. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 7095 (2) Women in Law

Explores the role of women in the legal system by looking at women as parties, jurors, witnesses, lawyers, law professors, and judges. Explores the relationship of law and society to women as victims and offenders. Investigates law and society's response to adoption, lesbian/gay issues, rape, surrogate and bad mothers, and sexual harassment.

Grading Basis: Letter Grade

LAWS 7100 (2-3) International Criminal Law: Theory and Practice

Exposes students to the rapidly growing body of jurisprudence, both international and national, wherein international humanitarian and human rights law are being applied for the purposes of prosecution, trial and punishment of individuals alleged to be responsible for the commission of war crimes, crimes against humanity, genocide and, more recently, terrorism.

Requisites: Requires prerequisite course of LAWS 6400 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7102 (2-3) Oil and Gas

Deals with the legal problems associated with private arrangements for the ownership and development of oil and gas: deeds and leases to oil and gas rights, trespass, adverse possession, implied covenants in leases, conveyances of fractional interests, and the interaction of private rights and conservation regulation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7103 (2-3) Ethics and Compliance Capstone

Integrates skills and knowledge from the introductory compliance course and other courses in law school compliance curriculum as students develop a compliance program for an institution.

Requisites: Requires prerequisite course of LAWS 6112 (minimum grade D).

Grading Basis: Letter Grade

LAWS 7105 (3) Family Law

Focuses on nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of married women in common law and under modern statutes and relations of parent and child.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7106 (1-2) Moot Court Competition

Offers an intensive involvement in legal research, appellate brief writing and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7111 (3) Contract Theory: Collisions of Contracting and Culture

Explores various contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, critical legal studies, law and society, relational theory, and others. Considers and critiques these theories as applied to particular contracting cultures, especially as applied to construction contracts.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7115 (3) Juvenile Justice

Covers a wide array of issues dealing with the legal rights of the unborn, children and juveniles. Covers the legal status of parent-child abuse, delinquency and crime, and emancipation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7116 (1) Barristers Council

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

LAWS 7121 (3) Advanced Contracts: Commercial Transactions

Studies Article 2 and Article 2A of the Uniform Commercial Code, together with the Convention and the International Sale of Goods. Advanced contracts topics are explored in depth. Among other subjects, warranties, title, remedies and risk of loss in the sale of lease of goods will be studied.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7122 (2-3) Mining and Mineral Development Law

Addresses major issues affecting the development of mineral resources through mining activity. Includes the regulation of the impacts of mining on the environment on both public and private land. Covers the Mining Law of 1872, the Federal Coal Leasing Amendments and state regulation of the impacts of mining on the environment.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7125 (2) Advanced Domestic Relations

Offers advanced study of several domestic relations subjects, including both theoretical and lawyering issues. Tentative subjects include discovery, client interviewing and deposition preparation, asset valuation, working with expert witnesses, children as clients, and alternative dispute resolution.

Recommended: Prerequisite LAWS 7105.

Grading Basis: Letter Grade

LAWS 7126 (1-2) Transactional Competition

Covers a broad array of topics, including, but far from limited to, contract negotiation, health law, mergers and acquisitions, and client counseling. A valuable opportunity for students to gain experience outside the classroom and develop tactics for interacting with clients, negotiation, techniques, and transactional drafting skills. Provides great opportunities for networking. A division of Barristers' Council.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7128 (2-4) Jurisprudence

Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies and law and literature.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8128

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 7132 (3) Energy, Insecurity, Sustainable Law

Examines why national security deals not only with armed aggression and the ability to thwart military invasions or subversion, but also includes critical threats to vital national and international support systems such as the economy, energy and the environment.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7135 (3) Parent, Child, and State

Examines the legal rights of parents and children in a constitutional framework, as well as the state's authority to define and regulate the parent-child relationship. Addresses rights of parents and children to freedom of expression and religious exercise, termination of parental rights and adoption, paternity orientation and culture in defining the family.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7138 (3) Legal Philosophy

Grading Basis: Letter Grade

LAWS 7145 (3) Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the US as they affect children, families, and work. Enhances research and writing skills, including field and international research. Contributes to host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7154 (3) Land Use Planning

Explores mechanisms for public control of private land uses, such as planning, zoning, and regulation of land development; including consideration of federal and state constitutional and statutory limitations on local governments. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 7159 (2) Advanced Trial Advocacy

Offers an advanced course covering trial practice elements. Open only to students who have taken LAWS 6109.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7164 (2) Land Conservation Law

Focuses on private land conservation efforts in the United States, and particularly Colorado, also considers public land conservation programs. Analyzes real property principles and instruments used to protect land, and the development and acceptance of conservation easements in gross as a mechanism for protection, financing mechanisms for land conservation, including direct government funding and indirect funding through tax incentives at the federal, state and local levels. Understanding of Real Property and Tax concepts helpful.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 7169 (2) Motions Advocacy

Provides practical training in preparing and arguing pretrial, post-trial and chambers motions to an experienced federal judge based on materials from actual case files. Assigns some research papers. Limited to 15 third-year students with interest in trial advocacy and willingness to participate in confrontational exercises. Counts as practice hours.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7200 (3) Anthropology of Law

Reviews the relationship between the social and cultural features of both developed and developing country societies and the formal and informal legal institutions within them. Considers the nature of social control and constraint, judicial reasoning, fact finding, conciliation, mediation and arbitration, and legal discourse.

Grading Basis: Letter Grade

LAWS 7201 (3) Antitrust

Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance and territorial confinement of dealers. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7202 (3) Environmental Law

Examines and analyzes important federal pollution control statutes, including the National Environmental Policy Act, the Clean Air Act and Clean Water Act, Solid Waste Act, and Superfund. Considers related economic theory, ethics and policy issues.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7205 (3) Administrative Law

Covers practices and procedures of administrative agencies and limitations thereon, including the Federal Administrative Procedure Act, and the relationship between courts and agencies.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7207 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6710

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 7209 (4) Natural Resources and Environmental Law Clinic

Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. The clinic's docket of active cases focuses on public land law and the environmental statutes protecting those lands and their resources. Students participate in projects that test the full range of lawyering skills, including traditional litigation, administrative advocacy, legislative drafting, and the conduct of complex negotiations and settlements.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7211 (3) Business Planning

Focuses on the development and use of concepts derived from a number of legal areas in the context of business planning and counseling.

Topics such as formation of business entities, sale of a business, recapitalization, division, reorganization and dissolution are considered.

Requisites: Requires prerequisite courses of LAWS 6007 and LAWS 6201 and LAWS 6251 or LAWS 6211 (all minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7212 (2) Environmental Litigation

Examines the litigation strategies and procedures used to enforce and defend against enforcement under environmental protection statutes, such as the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and the Toxic Substances Control Act. Covers civil enforcement, and citizen's suits.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7217 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6720

Requisites: Requires prerequisite course of LAWS 7207 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 7218 (2-3) Legal History

Grading Basis: Letter Grade

LAWS 7221 (2-3) Government Regulation of Business

Covers themes that explore the nature of the regulatory state and the realities of how businesses react to regulation. Provides an understanding of regulatory institutions; the tools of governmental regulation; a critical perspective on regulation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7222 (2-3) Environmental Decision-Making

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Equivalent - Duplicate Degree Credit Not Granted: ENV5 6222

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7228 (2) Intellectual Origins of the Constitution

Examines the views of the Constitution's framers as expressed in contemporaneous and antecedent writings and debates. Offered in alternate years.

Grading Basis: Letter Grade

LAWS 7232 (3) Global Energy Justice

Establishes why nearly a third of the world populated by the energy oppressed poor, presents a major national and international "legislative" or socio political problem calling for answers from governments and civil societies in the developed and developing world. Explains and elucidates the concept of energy justice, its jurisprudential heritage and its meaning and relevance in contemporary society. Case studies present problem solving frameworks spanning the political, social, behavioral, engineering, natural sciences and law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7241 (3) Telecommunications Law and Policy

Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular and other wireless systems and the Internet.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5240

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7248 (3) History of Criminal Justice

Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.

Grading Basis: Letter Grade

LAWS 7251 (3) Non-Profit Law

Examines the creation of a non-profit organization, in particular whether to choose a trust or a corporate form, how to qualify for federal tax exemption, and differences between private foundations and public charities. Examines fiduciary duty issues, restrictions on political activity and private benefit, and unrelated business income tax. Addresses tax incentives for charitable giving and state fundraising laws.

Grading Basis: Letter Grade

LAWS 7255 (3) Local Government

Studies state legislative and judicial control of the activities, powers and duties of local governmental units, including home-rule cities and counties, and some problems of federal, state, and local constitutional and statutory limitations on governmental powers when exercised by local governmental units (e.g., the powers to regulate private activities, tax, spend, borrow money and condemn private property for public uses). Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7261 (3) Corporate Finance

Examines a variety of important legal issues related to the funding and financing corporations including creditor protection laws, the Trust Indenture Act of 1939, fiduciary duties, bond indenture provisions, securities laws and rights of equity holders. Covers efficient capitalization structures, corporated valuation techniques, capital markets and the efficient market theory and cost of capital concept.

Requisites: Requires prerequisite course of LAWS 6211 or LAWS 6251 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7271 (3) Venture Capital and Private Equity

Provides overview of the legal and financial principles to represent privately held companies, their founders and managers and their investors. Emphasizes transaction structuring rather than judicial opinions. Includes the organization and financing of start-ups, structuring buyout transactions, exit strategies, legal organization of investment funds and other financial intermediaries. Discusses the relevant regulatory landscape, including securities law, bankruptcy, ERISA and tax law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7285 (2-3) Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers and critical thinkers and provides an opportunity to grow as colleagues and teammates.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 7055.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Government and Public

LAWS 7300 (2-3) International Litigation

Examines the special issues that arise in litigation in U.S. courts when one or more of the parties is a foreign individual, corporation, or government, or when the subject of the litigation concerns events occurring wholly or partly outside of this country. Includes personal jurisdiction over foreign defendants, extraterritorial service of process and evidence gathering, choice of forum, foreign sovereign immunity, the act of state doctrine, extraterritorial application of U.S. law, and recognition of enforcement of foreign judgments.

Grading Basis: Letter Grade

LAWS 7301 (2-3) Copyright

Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the 1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas and misappropriation of trade values, that supplement federal copyright.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5265

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7302 (2) Advanced Oil and Gas

Covers the history of oil and gas conservation and its regulation, proration and allowable regulation, compulsory pooling and unitization, permitting and environment regulation, and the interplay between federal, state and local regulation.

Requisites: Requires prerequisite course of LAWS 7102 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7303 (3) Complex Civil Litigation

Covers civil procedure in modern complex multiparty suits, including class actions in such settings as employment discrimination and mass torts, and problems in discovery, joinder, res judicata, collateral estoppel and judicial management in such suits. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7307 (3) Taxation of Natural Resources

Considers the federal income tax aspects applicable to the exploration for, the development of, and the operation of natural resources, as well as the financing thereof. Also considers oil and gas, hard minerals, timber, and water. Offered in alternate years.

Recommended: Prerequisite LAWS 6007.

Grading Basis: Letter Grade

LAWS 7309 (2-4) American Indian Law Clinic

Offers a clinical education course involving participation in the representation and advocacy of Indian causes – land or water claims, Indian religious freedom, job or other discrimination based on race and issues implicating tribal sovereignty.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7310 (3) International Dispute Settlement

Examines various mechanisms for the settlement of international disputes. Includes negotiation, inquiry, mediation, conciliation, arbitration, and adjudication. Focuses on intergovernmental dispute resolution.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7311 (2-3) Patent Law

Covers selected topics, such as patentable subject matter, patentability and utilization of patent rights through licensing and infringement litigation. Covers practice and procedure of the patent and trademark office.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7312 (2) Advanced Water Law

Builds on the study of basic water law principles for those interested in practicing in this field. Explores in more detail the highly developed legal and administrative system of water law in Colorado and other states, including the use of special courts to adjudicate the existence of water rights and approve changes of use.

Requisites: Requires prerequisite course of LAWS 6302 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7315 (3) Criminal Justice Policy and Practice

Focuses on policy and practice issues rather than case law. Examines how American criminal justice is (and has been) dispensed in the vast majority of cases that never reach trial. Devotes attention to systemic issues rather than case-specific problems. Studies policy behavior, prosecutorial charging and bargaining discretion, the provision of defense services, bail and preventive detention, plea negotiation, and sentencing— aspects of the criminal process that affect huge volumes of cases and require thought in global terms.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Criminal

LAWS 7318 (3) Economics of the American Legal System

Explores the economics of the American legal system. Topics include the cost of producing lawyers, the market for legal services, the practical challenges of running small and large law firms and the government's role in making legal services available.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7320 (3) International Criminal Law

Surveys international human rights law and international crime and punishment. Addresses idea of rights from a historical, philosophical, conceptual and analytical perspective; explores the "Primary rules of conduct" as well as adjudication and remedies, and selected rights from a comparative perspective.

Recommended: Prerequisite LAWS 6400.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7321 (1-2) Patent Drafting and Prosecution

Covers transactions, and often high-tech deals involving intellectual property rights. Studies IP ownership; assignment or rights; commercialization transactions (licensing, distribution, strategic); antitrust; emerging issues. Gives students essential tools to draft and analyze technology contracts.

Requisites: Requires prerequisite course of LAWS 6301 or 7301 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7322 (1) Field Trip of Upper Colorado River Basin for Advanced Water

Spend a week out in the basin meeting and talking with key leaders directly involved in Colorado River Basin water matters, visiting major water projects such as storage facilities and observing their operations, visiting major water users such as irrigation districts and cities, visiting and talking with tribal leaders and touring projects aimed at recovering populations of endangered fish.

Requisites: Requires corequisite course of LAWS 7312.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7323 (2-3) Patent Litigation

Focuses on unique aspects of patent litigation: substantive patent law, civil procedure, federal jurisdiction and litigation strategy; includes claim construction, infringement, anticipation and obviousness defenses, unenforceability challenges, declaratory judgments, injunctions, damages, settlements, licenses and trial strategy. Of interest and useful to those interested in intellectual property generally, not just patents or in litigation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7325 (3) Election Law

Examines the rapidly evolving field of election law: the right to vote, voting procedures, redistricting, candidate selection, campaign finance laws and direct democracy. Emphasizes federal law, including applicable constitutional jurisprudence.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7331 (2) Sports Law

Covers the application of rules from agency, antitrust, contracts, constitutional law (including sex discrimination), labor law, property, torts, unincorporated associations and other subjects to those persons involved in the production and delivery of athletic competition to consumers. Explores the development of the application of these rules to a sports setting and related economic issues.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7333 (2) Advanced Evidence: Forensic Science and the Criminal Courts

Explores the admissibility of forensic science opinion and expert testimony, its use as evidence at a trial, and the challenges that such evidence may pose for the courts and the entire criminal justice system in the future.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7335 (1) The Law of Presidential Elections

Examines the laws and regulations that uniquely shape presidential selection, analyzing practical applications as well as the broader constitutional and policy considerations. A combination of federal, state, and local laws shapes how Americans select their president. But more than ever before, Americans are questioning the rules that influence presidential selection, such as the major party primary system, ballot access, presidential campaign financing, and the electoral college.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public Law

LAWS 7341 (3) Trademark and Unfair Competition Law

Examines trademark protection, the interaction of trademark and unfair competition law with other intellectual property doctrines, the requirements for acquiring and retaining federal trademark rights, false advertising and other misrepresentations, the right of publicity and related claims, remedies for infringement, and international aspects of trademark protection.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7345 (2) Comparative Criminal Procedure

Takes an in-depth look at some of the basic features of modern criminal justice systems that share the civil law tradition with the hope that such study will provide a vehicle for a deeper understanding of the strengths and weaknesses of the American system of criminal justice.

Requisites: Requires prerequisite course of LAWS 6045 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7350 (2-3) Analytical Strategies

Develops analytical, writing and problem-solving skills necessary to pass the bar exam and succeed in practice. Designed for third-year law students in their final semester. Students will improve their techniques for analyzing, organizing and writing responses to essay and performance test questions through frequent written exercises and individual feedback on those exercises.

Grading Basis: Letter Grade

LAWS 7361 (2) Cybersecurity

Introduces students to the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7365 (2) Comp Constitutional Law

Grading Basis: Letter Grade

LAWS 7371 (3) Standardization and Standards Wars

Examines current issues in the standardization of telecommunications and information technologies. Covers the importance of standards, government and private sector perspectives and the impact of information age technologies on standards of development. Emphasizes key national and international organizations.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7375 (3) U.S. Races and Justice Systems

Examines the unique but related legal, social, and economic problems and accomplishments of those persons in this country whose ancestry originated in Africa, Asia, Latin America, or North America, and explores the developing literature on whites and whiteness.

Grading Basis: Letter Grade

LAWS 7381 (3) Intellectual Property Counseling and Licensing

Introduces strategic development and procurement of IP, including patents, trademarks, copyrights, and trade secrets. Evaluates the latest cases and legal trends from a practical and strategic perspective. Focuses on widely accepted best practices and critical thinking in these areas.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property, Technology Telecomm

LAWS 7401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7402 (2) The Law of Toxic and Hazardous Wastes

Examines the EPA's federal hazardous waste statutes, including the Resource Conservation and Recovery Act of 1976 (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Analyzes the RCRA "Cradle-to-grave" hazardous waste program and addresses the evolving CERCLA liability scheme and cleanup process.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7405 (2-3) Health Law 2: Medical Malpractice and Quality Regulation

Explores (1) the law controlling ethical issues that arise during the delivery of medical care, (2) the substantive law of medical malpractice and tort reform aimed at reducing the frequency and severity of medical malpractice verdicts, and (3) the practical aspects of litigating a medical malpractice case. Cross-listed at the Health Sciences Center; will include field trips there.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7406 (1) International Moot Court Competition

Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice of oral arguments or regional oral arguments.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7407 (1-3) Tax Policy

Explores current issues in tax policy. Topics may include the tax legislative process, consumption taxes, taxes and distributive justice, the tax exemption for nonprofits, carbon taxes, corporate taxes and integration, and taxes and entrepreneurship. There are no required prerequisites, but Federal Income Tax will be helpful.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 7409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7411 (2-3) Mergers, Acquisitions and Reorganizations

Studies the planning of corporate mergers, acquisitions and reorganizations, examining the application and integration of state corporate law, federal securities law, accounting principles, tax law, labor law, products liability law, environmental law, ERISA and antitrust law.

Equivalent - Duplicate Degree Credit Not Granted: BADM 6900

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7415 (2) Bioethics and Law

Grading Basis: Letter Grade

LAWS 7420 (2) European Union Law

Covers all the essential aspects of the EU law: EU institutions, competences, the making and the application of EU law, and the content of the fundamental principles of EU law and the common market.

Grading Basis: Letter Grade

LAWS 7425 (2-3) Health Law and Policy: Access, Cost, Quality, Choice

Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes methods used by courts and legislatures to address medical/legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social and political considerations. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7426 (2) Health Care Compliance

Introduces students to a number of primary laws and regulations that give rise to the vast majority of serious fraud and abuse cases. The primary statutes and regulations implementing them will then be viewed from the context of common problems in the health care industry such as: up-coding, unbundling, worthless services/quality of care, medically unnecessary care, over-utilization, joint ventures with referral physicians, off-label marketing.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7428 (3) Bioethics Law and Literature

Interdisciplinary study of law, medicine, and bioethics. Addresses such issues as confidentiality in medical treatment, rejecting life-sustaining treatment, death and dying, reproductive law and genetic technology, human experimentation, and access to health care.

Grading Basis: Letter Grade

LAWS 7429 (2) Alternative Dispute Resolution

Examines a variety of dispute resolution processes, such as mediation, arbitration, minitrials and court-annexed settlement procedures, as alternatives to traditional court adjudication.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7431 (3) Corporate Finance

Grading Basis: Letter Grade

LAWS 7433 (3) Remedies

Examines the types of relief available to vindicate various rights. Covers damages, specific performance, injunctions, and restitution. Emphasizes the planning aspect of enforcement, in view of the limitations and problems of proof associated with specific remedies.

Grading Basis: Letter Grade

LAWS 7439 (2-3) Mediation

Explores mediation, one of the more important methods of alternative dispute resolution and the legal issues that may arise related to mediation. Considers what kinds of persons and disputes are most appropriate for mediation. Includes role playing.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7440 (3) International Human Rights and Humanitarian Law

Surveys international human rights both in law and in philosophy, both current and historical.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7445 (2) Insurance Law

Grading Basis: Letter Grade

LAWS 7449 (2-4) Juvenile and Family Law Clinic

Examines the world of child welfare from the view of the child client, by representing their best interests in abuse and neglect cases. As Guardians ad litem, students will represent children in abuse and neglect cases from the beginning, at the temporary shelter hearing, through the conclusion of the case at a permanency orders hearing.

Repeatable: Repeatable for up to 8.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7451 (3) Law and Finance for Entrepreneurs

Studies unique legal problems faced by entrepreneurs, including formation issues (choice of entity, rights of the founders, initial investors), operation issues (governance, key employees, intellectual property, financing), IPOs and buy-outs.

Equivalent - Duplicate Degree Credit Not Granted: BADM 6910

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7458 (2) Law and Literature

Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final eight page paper are required.

Grading Basis: Letter Grade

LAWS 7461 (1) Dispute Resolution in the Digital Age

Explores the need for expanded and equalized access to remedies in consumer cases, and how the internet opens doors to online dispute resolution ("ODR") systems that utilize cost-effective negotiation, mediation, and arbitration processes for resolving complaints. This course will look at the various systems currently used by major companies, as well as the rules and treaty developments in global markets.

Grading Basis: Letter Grade

LAWS 7465 (2) Public Health Law and Ethics

Explores the legal and ethical dimension of public health. Focuses on topics that generate legal and ethical controversies, including governmental duties to protect citizens, nature and the extent of the government's ability to regulate conduct and responses to epidemics.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7475 (2) Advanced Torts

Studies selected tort actions and theories. Topics covered may include "Dignitary torts" (e.g., defamation, privacy, etc.), business torts, and product liability. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7505 (2) Sexuality and the Law

Examines the regulation of sexuality in local, state, and federal law, with particular emphasis on sexual orientation. Explores how sexuality shapes, and is shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7507 (2-3) State and Local Taxation

Examines the operation of the income, property and sales tax used to finance our state and local governments. Includes requirements of equal protection and due process. Covers jurisdiction to tax allocation of the tax base among different state and local governments.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6760

Grading Basis: Letter Grade

LAWS 7509 (1) Mock Trial Competition

Student teams further develop trial and advocacy skills in a competitive mock-trial format involving two or more rounds of trials. Requires preparation of trial briefs and drafting other court pleadings and documents. Credit is limited to the top two teams (six students). Student finalists may continue involvement in regional and national competitions.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7512 (2) Advanced Environmental Law: Air Pollution

Provides an examination of efforts to regulate air pollution in the United States under the Clean Air Act. Covers key provisions, basic approach of cooperative federalism, role of science and risk assessment establishing health-based standards, implications of instrument choice and regulatory design on innovation and economic growth, development of 'first generation' climate policies, and new approaches to compliance and enforcement.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7513 (3) Domestic Violence

Explores the law, policy, history and theory of domestic violence. Examines the limits of legal methods and remedies for holding batterers accountable and keeping victims safe; the dynamics of abusive relationships; the history of the criminal justice system's response to domestic violence; the defenses available to battered persons who kill their abusers; the legal paradigm of the sympathetic victim; psychological and feminist theories about abusive relationships; civil rights and tort liability for batterers and third parties; and the intersection of domestic violence with international human rights.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7515 (3) Poverty Law

Explores the legal and policy responses to poverty in the United States and addresses how the law shapes the lives of poor people and communities. Examines the extent of poverty in the United States, the root causes and the historical development of social welfare policy. Focuses on the rights-based aspect of poverty law and various policies that attempt to ameliorate poverty.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7520 (3) Food Law and Practice

Surveys the basic regulatory landscape of food law with insight into critical legal issues facing industry and consumers. Covers federal, state and municipal regulation, litigation, government incentives, international standards and soft-law. Combines doctrinal approaches with simulation and problem solving to introduce systems-level thinking. No prerequisites or prior knowledge if required, though interest in food law and corporate law are helpful.

Grading Basis: Letter Grade

LAWS 7523 (2) Juvenile Law

Takes a critical look at the juvenile justice system and how it responds to the needs of juveniles who are either delinquents and/or victims of abuse. Issues include the rights and responsibility of parents, parental responsibility programs, delinquents, and the future of our juvenile courts.

Grading Basis: Letter Grade

LAWS 7525 (3) Race and American Law

Examines the judiciary's approach to racial discrimination from America's colonial period to the present day. Concludes with an analysis of the contemporary status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Pacific Americans and Chicana/os.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7529 (1) Appellate Advocacy Competition

Gives students the opportunity to participate in an intermural appellate advocacy competition, in which a brief must be filed and reviewed, critiqued, and deemed credit-worthy by a member of the faculty. (Law School Rule 3-2-9 (b) should be consulted prior to enrollment.)

Grading Basis: Pass/Fail

LAWS 7535 (2) Poverty, Health and Law 1

Introduces students to the substantive areas of health and poverty law. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, health, violence, and immigrants. Students will also help with intake of clinic patients and support client representation by the attorney of record.

Grading Basis: Letter Grade

LAWS 7541 (2-3) Employment Discrimination

Examines statutory and constitutional prohibitions of discrimination in employment on the basis of race, gender, age, religion, national origin and disability.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7545 (2) Poverty, Health and Law Practicum

A service learning course in which students draw from the substantive materials studied in LAWS 7535 to develop competency in case planning, problem solving, cooperative decision making, and client counseling. Students will staff cases under the supervision of a CO Legal Services (CLS) staff attorney or a pro bono attorney working on behalf of CLS.

Requisites: Requires prerequisite course of LAWS 7535 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7551 (2) Trade Secrets

Examines law of trade secrets and how companies and entrepreneurs use this field to protect intellectual property in conjunction with other forms of legal protection (e.g., patent, copyright and trademark).

Grading Basis: Letter Grade

LAWS 7555 (4) Poverty, Health, and Law Practicum

Introduces students to the substantive areas of health and poverty law. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, and health. Students will also staff cases under the supervision of a Colorado Legal Services (CLS) staff attorney or a pro bono attorney working on behalf of CLS, and will develop competency in case planning, problem solving, cooperative decision making, and client counseling.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7565 (3) Corporate Transactions in Health Law

Introduces key corporate and regulatory issues impacting the delivery of health care. Focus will be transactional, with students gaining an understanding of basic corporate law and regulatory principles, and then learning to integrate core federal and state laws into choice and use of corporate structures and operational strategies.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7601 (2-3) Business Transactions

Provides a practical understanding of how to apply the law in both transactional and litigation settings. Gives an interdisciplinary look at how various areas of the law are brought together in common factual settings. Teaches students to negotiate, document and close the acquisition of a business covering the areas of practice of corporate, contracts, real property, secured transactions and bankruptcy law. Tests, in a litigation setting, the decisions made during the acquisition stage.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7605 (2) Refugee and Asylum Law

Focuses on protections offered under international and domestic law for persons who are threatened by persecution or other adverse conditions in their country of origin. Covers who is a refugee and the protections they have or do not have under United States and international law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7609 (1-2) Law Practice Management

Studies the establishment of a solo or small-firm legal practice. Topics include the business structure (PC, LLC, etc.), office systems, marketing and development, staffing, liability insurance, managing time, technology and billing. (This practice course counts toward the 14 credit hour maximum of practice hours.) Course supported by the Section of Law Practice Management of the ABA in memory of Harold A. Feder, CU Law '59.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7611 (2-3) International Business Transactions

Examines the sources of international business law, the relationship between such law and the U.S. legal system, the choice of law in international business disputes, the special issues that arise when doing business with foreign governments, the law governing international sales and the shipment of goods and international intellectual property protection. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7615 (4) Immigration Law and Immigrants' Rights

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7181

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7617 (3) International Taxation

Covers basic aspects of the United States taxation of income earned abroad by its citizens and the taxation of income derived by foreign persons from U.S. sources, including the implications of income tax treaties.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6780

Requisites: Requires prerequisite course of LAWS 6007 or 6157 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 7618 (1) Marijuana Law and Policy

Covers three distinct but interwoven topics: substantive law governing marijuana; policy rationales behind and outcomes produced by different approaches to regulating the drug; and the legal authority to regulate the drug. The objective is to prepare to handle legal issues that arise in practice but also to provide informed counsel on proposed an future reforms to the law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 7619 (3) Entrepreneurial Law Clinic

Provides law students with practical experience in transactional law while offering valuable legal services without charge to local startup businesses lacking access to legal resources. Enrollment priority is given to third year law students. The ELC professor may set forth additional requirements to ensure that students are qualified to provide services to ELC clients.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7629 (1) Introduction to the In-House Practice of Law

Explores cutting edge questions around the practice of law as an employee of a business. Demonstrates how the combination of law and business can be valuable to businesses and also innovative, challenging and rewarding to legal professionals. Legal services to corporate America is changing dramatically with more entities relying on in-house counsel, compared to private practitioners, to obtain legal advice and counsel.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7709 (3) Advanced Legal Negotiation

Deepens students' understanding of the economic, psychological, cultural, and critical literatures related to legal negotiation and bargaining, provides students an advanced set of negotiations, experiences and simulations that introduce new dynamics and problems not dealt with in the core course, and deepens students' self-understanding and ability to learn from experience.

Requisites: Requires prerequisite course of LAWS 7409 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7715 (3) Indigenous Peoples in International Law

Studies developments in the substance and procedure of international human rights law pertaining to indigenous peoples, examining these developments through varying perspectives, doctrinal and political, pragmatic and critical. Students will become familiar with indigenous peoples' involvement in the human rights movement both before and after WWII, and corresponding developments in the United Nations, Organization of American States, and other institutions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7718 (2) The Regulation of Marijuana

Covers three distinct but interwoven topics: substantive law governing marijuana, policy rationales behind and outcomes produced by different approaches to regulating the drug and the legal authority to regulate the drug. Prepares one to handle legal issues that arise in practice, but also to provide informed counsel on proposed and future reforms to law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7725 (3) American Indian Law I

Investigates the federal statutory, decisional and constitutional law that bears upon American Indians, tribal governments and Indian reservation transactions.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management.

Requisites: Requires prerequisite course of LAWS 7725 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7745 (2-3) Jurisdiction in Indian Country

Examines the current state of the justice system within Indian nations today. Includes understanding the respective roles of tribal and state law enforcement authorities, as well as the Bureau of Indian Affairs' Office of Justice Services, the Federal Bureau of Investigation, and the Drug Enforcement Administration. Examines relationship between federal and tribal courts; substantive laws; and advocates who appear before them.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7751 (3) Arbitration

Discusses the nature of arbitration, enforcement of arbitration agreements and awards, complexities of multi-party arbitrations, fairness and efficiency of the arbitral process and other issues related to arbitration's prevalence in contexts ranging from corporate to consumer and employment disputes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7765 (3) Gender and Justice

Grading Basis: Letter Grade

LAWS 7775 (1) Gender Law and Public Policy

Examines the relationship of law and gender in criminal law, and constitutional law, using feminist theoretical perspectives as the organizing principle. Each perspective is applied to cases and material on such topics as violence against women, prostitution, pornography, and discrimination in education and athletics.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7801 (1) Tech Policy Advocacy

Provides an intensive, one-week look at the substance, strategy, tactics, and import of technology policy advocacy. Each year, we will study one particular theme or conflict and examine it in-depth. The point of studying one particular episode is to learn lessons about the practice of technology policy advocacy that apply beyond this one historical moment. This class is meant to combine traditional doctrinal approaches with an experiential focus.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7809 (2-4) Technology Law and Policy Clinic

Features technology law advocacy before administrative, legislative and judicial bodies in the public interest.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5250

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7846 (1-3) Independent Legal Research

Involves independent study and preparation of a research paper under faculty supervision. Students produce a research paper equivalent to a seminar research paper. A draft is submitted, subjected to critique by the faculty member, and redrafted. Available during or after the fifth semester of law school. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 7896 (1) Journal: University of Colorado Law Review

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the University of Colorado Law Review.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7906 (2) Journal: University of Colorado Law Review

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7916 (1) Journal: CO Natural Resources, Energy & Environmental Law Review

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7926 (2) Journal: CO Natural Resources, Energy & Environmental Law Review

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7936 (1) Journal: Colorado Technology Law Journal

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Journal of Telecommunications and High Technology Law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7939 (1-7) Extern Program

Extern credit may be earned for uncompensated work for a sponsor, which may be any lawyer, judge, or organization that employs lawyers or judges and is approved by the Academic and Student Affairs Committee. Work is done under the direction of a field instructor (a lawyer or judge as the sponsor) and a member of the law faculty. Requires a substantial writing component and 50 hours of working time per credit hour. a minimum of 1 and a maximum of 7 credit hours may be earned. Classified as practice credit.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7946 (2) Journal: Colorado Technology Law Journal

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Journal of Telecommunications and High Technology Law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 8005 (2) Seminar: Advanced Constitutional Law Equality and Privacy

Addresses "Equal Protection" rights under the Fourteenth Amendment and "Privacy" rights to personal autonomy. Analyzes varied constitutional grounds for recognizing or rejecting abortion rights; limits on Congressional power to pass civil rights laws granting broader rights than the Fourteenth Amendment does; treatment of sexual orientation-related laws and government actions as "Privacy" versus "Equality" matters; and "Benign"/"remedial" race- and sex-based government decisions such as affirmative action and same-sex schools.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8011 (1-3) Seminar: Humanizing Contracts: Service Learning

Examines contract theory and policy, while providing community-based service. Students analyze and discuss readings exploring doctrinal and theoretical bases of contract law, and see "Contracts in action" through participating in a service project. Requires a final paper linking theory and doctrine with service experiences. Note: this is a year-long seminar (2 credits per semester); students must enroll in both semesters but receive only one grade at the end of the year. Students participate in a service project that may include off-campus and weekend participation.

Grading Basis: Letter Grade

LAWS 8013 (2) Seminar: Habeas Corpus: The Great Writ of Liberty

Includes readings on the history of the writ, its constitutional status, and its use as a civil rights remedy, as well as case studies of important Supreme Court decisions, and a review of contemporary jurisdictional and procedural issues.

Grading Basis: Letter Grade

LAWS 8015 (1-3) Seminar: Constitutional Theory

Examines the role of the courts and the other branches of government in defining and enforcing constitutional values. Relevant readings are from philosophy, social sciences, and legal scholarship, as well as cases.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8021 (2-3) Consumers and the Law

Expands understanding and analysis of contracts beyond the basic concepts learned in the first-year contracts course. Explores norms, goals and functions of consumer law and also observes the law "in action" through a class blog and outreach with the Boulder County Department of Housing and Human Services ("BCDHHS"), who assists people throughout Boulder County with an array of financial, housing and other consumer issues.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8025 (2) Seminar: Advanced Topics in Federalism

Explores the development of "Our Federalism", the relationship between federal and state governments, from the founding period of the US Supreme Court's recent New Federalism jurisprudence. Studies historical material, commentary, and case law and addresses how federalism is defined; the values that federalism serves; the role of federalism in our interconnected, global society; the Supreme Court's boundaries of federalism; the direction of New Federalism.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8035 (2) Seminar: Intersection of Antidiscrimination and First Amendment Law

Addresses past and continuing debates involving potential tensions between antidiscrimination principles and free speech, free exercise and establishment clause values. Examines constitutional protections under the First Amendment and the equal protection clause, together with an array of existing and proposed federal and state antidiscrimination laws regulating employment, housing, and public accommodations, among other areas.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8036 (2-3) Special Topics in Intellectual Property

Applies copyright doctrine to the digital music contexts. Topics may include but are not limited to radio, compulsory licensing, performance rights, sampling, user generated content, term extension, termination rights, "open-access" and the public domain, emerging technologies and infringement, social implications of copyright legislation, digital fair use and the first sale doctrine and moral rights for users and artists.

Requisites: Require a prerequisite course of LAWS 6301 or LAWS 7301 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 8045 (2) Seminar: Comparative Constitutional Law

Examines legal structures and concepts typically found in constitutions, including judicial review, distinction between legislative and executive authority, federalism and the principle of subsidiarity, the relationship between church and state, free speech and press, and social welfare rights. Examines differences between constitutional law and other domestic law, role of comparative constitutional law in domestic constitutional law adjudication. Emphasizes American and Swedish perspectives.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8055 (1-2) Seminar: Media, Popular Culture, and the Law

Examines how the institutions, practices and the very identity of law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this seminar: to what extent and how are the forms and methods of the new media having an effect on the perception, role and identity of law? This is a year-long seminar.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8060 (3) Poverty and Inequality in Comparative Perspective

Investigates the nature, causes, consequences and major responses to persistent poverty and inequality in the United States and several other countries. Students are expected to write short response papers for each assignment as well as a substantial research paper on a topic selected in discussion with the instructor.

Grading Basis: Letter Grade

LAWS 8065 (2) Sem White Collar Crime

Grading Basis: Letter Grade

LAWS 8075 (2) Seminar: Race, Racism, and American Law

Focuses on issues of race reform law, in particular the group of issues dealing with Black Americans. (Students of all hues and persuasions are welcome.) Offers an interpretive or critical dimension, rather than a litigation-oriented one. Helps students understand how race reform law works and how attitudes and historical forces have shaped that body of law.

Grading Basis: Letter Grade

LAWS 8085 (2) Sem Crit Race Theory

Grading Basis: Letter Grade

LAWS 8095 (2) Seminar: Problems in Constitutional Law

Explores how theories of social freedom and self-governance developed in the United States. Analyzes the most controversial socio-legal issues as they relate to privacy, equal protection and other questions of substantive due process. Discusses recent trends in national security and information privacy to evaluate their overall relevance to civil liberties and nascent influence on the fundamental rights debate in the US and abroad.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8101 (3) Business Law Colloquium

Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8103 (2) Seminar: Alternative Dispute Resolution Ethics

Explores the ethics of mediators and other alternative dispute resolvers and facilitators, of attorneys representing clients in alternative dispute resolution processes, and of judges serving in alternative roles. Issues include confidentiality, providing appropriate notice to those concerned, and avoidance of conflicts of interest.

Grading Basis: Letter Grade

LAWS 8104 (2) Seminar: Cities, Suburbs, and the Law

Explores dynamics that play out in the relationship between cities, suburbs, exurbs and other patterns of urban development. Explores the nature of local power, relations between local jurisdictions, and metropolitan and regional approaches to governance. Includes fiscal disparities, ethnic and racial segregation, sprawl and growth controls, affordable housing, transportation, and the urban/rural divide.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 8105 (3) Seminar: Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the U.S. as they affect children, families and work. Enhances research and writing skills, including field and international research. Contributes to the host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8110 (2) Fascism and the Liberal State

Explores fascist legal theory and its critiques of the liberal democratic state. Readings of major conservative, liberal, fascist, Nazi and Marxist theorists including Marx, Gentile, Fuller, Neumann, Schmitt, Agamben, Hayek and Mill. Understand from a variety of perspectives, the structure and character of the liberal democratic state, its strengths and weaknesses as well as its susceptibility of fascism.

Grading Basis: Letter Grade

LAWS 8111 (3) Sem: National Security Law and US Foreign Policy

Explores the legal frameworks influencing the development of national security policy and U.S. foreign policy. Students will be introduced to applicable U.S. Foreign Relations Law, U.S. National Security Law and International Law before considering how such apply and interact in response to current threats to national security.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8112 (2-3) Seminar: Advanced Natural Resources Law

Provides in-depth study and analysis of current problems in natural resources law, using historical, literary, and scientific materials. Includes field-trip, and requires additional field trip expenses. Department enforced prerequisites or corequisites: any two of the following: LAWS 6002 or LAWS 6112 or LAWS 6302 or LAWS 7725.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite LAWS 6112.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8115 (2) Seminar: Child Abuse and the Law

Explores legal responses to child abuse by examining the constitutional framework for legal proceedings, effective strategies for preventing child abuse and punishing offenders, alternatives to the current system, and cultural aspects of child abuse and the legal response to it. Examines physical abuse and neglect, and focuses on sexual abuse.

Grading Basis: Letter Grade

LAWS 8120 (2-3) Special Topics in Constitutional Law

Offers students the opportunity for in-depth discussion and study on an important topic of constitutional law. Topics may vary from year to year.

Grading Basis: Letter Grade

LAWS 8122 (2) Seminar: Mineral Development

Deals with legal and policy issues surrounding mineral development and its environmental impacts. Emphasizes the problems associated with hard rock minerals and coal development, with some treatment of oil and gas leasing and development issues. Focuses on western public lands with some discussion of international and private lands issues.

Grading Basis: Letter Grade

LAWS 8125 (2) Seminar: Law and the Politics of Family Law

Examines issues that have been raised under the United States Constitution with respect to state regulation of families. Topics include questions of family and individual privacy, the status of children, procreation, marriage and divorce, the definition of family relationships, and problems of federalism and the role of the Supreme Court in the regulation of families.

Grading Basis: Letter Grade

LAWS 8128 (2-3) Jurisprudence

Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies and law and literature.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7128

Grading Basis: Letter Grade

Additional Information: Departmental Category: Legal Theory, Jurisprudence Social Policy

LAWS 8135 (2) Seminar: Gender, Work, and Family

Explores the social and legal problems that develop at the intersection of work and family, and considers legal/non-legal solutions that have been and could be used to accommodate both women and men in their efforts to deal with these problems.

Grading Basis: Letter Grade

LAWS 8138 (2) Seminar: The Rhetoric of Law

Considers how Anglo-American law operates rhetorically, how it persuades, builds character, offers proof, approximates the truth, establishes legitimacy, and makes things happen. It will also explore the ethics of rhetoric and note the relationship of rhetoric to other bodies of legal scholarship (e.g., law and literature, legal pragmatism, law and culture). It will hone student advocacy skills, prepare students to anticipate and defend against the rhetorical stratagems of different legal actors, and enrich students' sense of professional identity.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

LAWS 8154 (2) Seminar: Land Use Planning

Discusses public control of private land uses through planning, zoning, and regulation of land development, including consideration of constitutional and statutory limitations on legislatively created techniques. Offered in alternate years.

Grading Basis: Letter Grade

LAWS 8202 (2) Seminar: Environmental Policy

Examines issues of environmental justice, including the disparate impacts of pollution and land use controls on certain communities and ethnic groups. Topics may include concentration of waste facilities in neighborhoods occupied by poor and minority populations, adequate protection of migrant farmworkers from the impacts of pesticide hazards, and environmental controls that inhibit economic growth and development sought by Indian tribes.

Grading Basis: Letter Grade

LAWS 8205 (3) Seminar: Law and Democratic Governance

Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7171

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 7325.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8210 (2) Seminar: Comparative Law

Studies discrete topics in Jewish law such as family law, commercial law, criminal law, etc., using the text *Jewish Law: Cases and Materials*, and other sources such as guest lectures. The collection of books that we received from the Touro Law Center will provide a valuable resource for student research.

Grading Basis: Letter Grade

LAWS 8211 (2) Sem: Comp Constitutional Law: US, UK and Australia

Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.

Grading Basis: Letter Grade

LAWS 8212 (2) Seminar: Environmental Law Practice and Policy

Focuses on the translation of environmental policies and purposes into environmental law and practice. Investigates policy issues on prevention of significant deterioration of air quality (PSD), the particulate matter national ambient air quality standard (PM NAAQS), and global climate changes. Emphasizes legal structure issues, including the role of national, state, and local governments in implementing environmental law and policy as well as counterpart global structures and mechanisms for responding to global or transboundary environmental problems.

Requisites: Requires prerequisite course of LAWS 7202 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 8222 (2) Seminar: Environmental Philosophy and Law

Investigates the changing philosophical underpinnings of U.S. environmental law and policy and how philosophy and legal institutions interact.

Grading Basis: Letter Grade

LAWS 8235 (2) Family Law Topics

Explores a variety of current issues related to family law: topics will change to reflect emerging issues and will draw from legal and social science scholarship as well as relevant statutes and cases. Possible topics include reproductive technology, children's rights, the role of religion in family law, and political theories of the family.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8251 (2) Seminar: Advanced Corporate Law

Explores current issues in corporate and securities law, including developments in fiduciary duties of officers and directors, corporate governance, executive compensation, revisions to the model business corporation act, and state and federal litigation reform.

Grading Basis: Letter Grade

LAWS 8285 (2-3) Seminar: Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers, and provides an opportunity to grow as colleagues and teammates. Requires extra time outside of class.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 7055.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8300 (3) Seminar: International Adjudication

Focuses on writing briefs and memoranda of law suitable for practice before tribunals such as the International Courts of Justice. Emphasis will be on students writing, legal analysis, and presentation of oral arguments. Instruction identifies how to research and analyze international materials, such as treaties, covenants, and international customary law.

Grading Basis: Letter Grade

LAWS 8301 (2) Seminar: Innovation, Network Theory, Social Entrepreneurship

Covers topics related to the legal and public policy implications of innovation, entrepreneurship, and social networks including normative ideals of entrepreneurship, the concept of regional advantage, whether startups should be subsidized and the design of such subsidies, the role of universities in commercializing ideas, impact of the tax code on entrepreneurship, the role of corporate responsibility in startups, and more.

Grading Basis: Letter Grade

LAWS 8302 (2) Seminar: Advanced Problems in Water Resources Law

Explores the use of watersheds as geographic and political entities for addressing water-related issues and how laws and institutions facilitate or impede watershed-based problem solving.

Grading Basis: Letter Grade

LAWS 8303 (2) Seminar: Advanced Oil and Gas

Covers the history of oil and gas conservation and its regulation, proration and allowable regulation, compulsory pooling and unitization, permitting and environmental regulation, and the interplay between federal, state and local regulation.

Requisites: Requires prerequisite course of LAWS 7102 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8310 (2) Seminar: International Crimes Punishment

Addresses issues in international criminal law in three parts: 1) basic contents of international law, 2) international criminal tribunals that enforce international criminal law, 3) national efforts to bring international criminal prosecutions.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisites LAWS 6400 and LAWS 7440.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 8311 (2) Seminar: Computer Crimes

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront with the recent explosion in computer related crime. Includes Fourth Amendment in cyberspace, law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal and state relations in enforcement of computer crime laws, and civil liberties online.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8315 (2) Seminar: Advanced Criminal Justice

Studies policy and practice issues rather than case law. Focuses primarily on how American criminal justice is dispensed in cases that do not reach trial, including police behavior, prosecutorial discretion, defense services, bail, plea bargaining, and sentencing.

Grading Basis: Letter Grade

LAWS 8318 (2) Seminar: Law and Economics

Introduces the uses and limitations of microeconomic theory for understanding and resolving legal problems. Emphasizes concepts prominent in the law and economics literature such as cost, transaction costs, utility, and rational self interest.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8320 (2-3) Seminar: Oil and International Relations

Addresses the extent to which the international community of nations is oil dependent. Assesses the impact and the geopolitical dangers to international relations arising from the expanding demand for scarce oil from developing, as well as developed, economies.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 8321 (2) Seminar: Computers and Law

Explores a range of topics surrounding the juxtaposition of computers and law. Most are aware of the impact that law has on computers through the myriad of regulations that govern computers and related technologies. Less well known is the impact that computer technology is having on governance and on the practice of law. Explores both sides of this dynamic interplay between law impacting computing, and computing impacting law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8322 (3) Environmental Decision Making

Explores the foundational issues that underlie agency decision making, including environmental ethics, cost benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Grading Basis: Letter Grade

LAWS 8325 (2) Seminar: Reforming Criminal Trials

Starts from the premise that reform of our criminal trial system to make it less complicated, less expensive, and more reliable should be considered. Examines trial systems in other countries and U.S. changes over recent decades. Student papers make and defend proposals for reform.

Grading Basis: Letter Grade

LAWS 8335 (2) Seminar: Advanced Criminal Procedure

Focuses on a particular topic in criminal procedure. Topics include the privilege against self-incrimination, juries and defense and prosecution ethics.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 8341 (3) Seminar: Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "unbundling" policies to advance competition and how intellectual property and antitrust rules should be developed.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5260

Requisites: Requires prerequisite course of LAWS 7201 or LAWS 7241 or LAWS 7301 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 8345 (2) Sem Comp Crim Pro

Grading Basis: Letter Grade

LAWS 8351 (2) Seminar: Law and Economics of Utility Regulation

Discusses economics of regulation and matters ranging from neoclassical economic analysis to public choice theory to new institutional economics. Discusses several regulatory domains, including antitrust law, telecommunications regulation and energy regulation. Highlights both economic and non-economic goals, including universal service, sustainability (e.g., renewable energy) and architecture (e.g., free speech concerns with regard to telecommunications networks).

Requisites: Requires prerequisite course of LAWS 6301 or 7201 or 7241 (minimum grade D-). Restricted to Law (LAWS) or Telecommunications (TELE) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8355 (2) Seminar: Sentencing Law and Policy

Studies sentencing law against the backdrop of criminal justice policy and concerns of public policy. Covers theories of punishment, the merits of indeterminate sentencing, sentencing guidelines, and nonincarcerative sanctions. Confronts problems of race, class, and other disparities in criminal sentencing.

Grading Basis: Letter Grade

LAWS 8361 (2) Seminar: Information Privacy

Explores the laws that regulate the basic technologies of the Internet and the management of information in the digital age. Examines the most significant statutes, regulations and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8375 (2) Seminar: Advanced Immigration and Citizenship

Explores the law and policy of citizenship in the United States, starting with legal questions regarding acquisition and loss of citizenship as well as the consequences of citizenship, but also examines the fundamental premises underlying American citizenship and the concept of citizenship generally.

Grading Basis: Letter Grade

LAWS 8385 (2) Sem Law & Religion

Grading Basis: Letter Grade

LAWS 8395 (2) Seminar: Separation of Powers

Explores the constitutional relationships among the three branches of the federal government in the sphere of domestic matters, omitting foreign affairs and war. Develops topics including executive orders, Congressional control of the executive and the courts, appointment and removal of officers, impeachment, executive privilege, use of military tribunals, and the election of 2000. A seminar paper will be required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8400 (2) Special Topics in International Law

Provides in-depth coverage of particular issues in international law and exposes students to intellectual concepts in the field. Students write seminar length papers and develop critical thinking through writing and research.

Grading Basis: Letter Grade

LAWS 8401 (2) Seminar: Securities Litigation and Enforcement

Designed for students interested in studying topics related to securities litigation. Covers civil liability under the Securities Act of 1933, proxy fraud, class actions (with special emphasis on the Private Securities Litigation Reform Act and the Securities Litigation Uniform Standards Act), market manipulation, SEC enforcement actions, enforcement issues involving attorneys and accountants, criminal enforcement, international securities fraud and securities arbitration.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8405 (2) Seminar: Public Health Law and Ethics

Explores rules of law pertaining to the American public health care system and the ethical issues raised by the government's effort to protect the health of the American people. Held at the Anschutz Medical Campus.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8407 (2) Seminar: Tax Policy

Explores current issues in tax policy. Topics may include the tax legislative process, consumption taxes, taxes and distributive justice, the tax exemption for nonprofits, carbon taxes, corporate taxes and integration and taxes and entrepreneurship.

Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 8409 (2) Seminar Special Problems in Conflict Resolution and Management

Develops a comprehensive description of dispute; creates a conflict assessment of the stakeholders in and dynamics of dispute; assess obstacles to and opportunities for mediation; recommend strategy for addressing and managing the dispute.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 8412 (2) Critical Law and Economics

Explores some of the more successful and enduring critiques of Chicago Law and Economics. Starts with an introduction to economic analysis, including basic analytic tools like rational actor theory, supply and demand, efficiency notions, and cost concepts. Later classes will explore more advanced works in the area.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8415 (2) Seminar: Bioethics and Law

Focuses on legal, moral, and economic analyses of problems posed or soon to be posed by advances in biomedical technologies.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8421 (2) Seminar: Duties of the Professional Advisor

Studies ethical and legal regulation of lawyers, auditors, and investment bankers, who have been described as "Gatekeepers" to the investment markets. Considers changes in ethical and legal regulation that can be adopted to restore a sense of integrity for these professionals.

Grading Basis: Letter Grade

LAWS 8425 (2) Seminar: Advanced Torts

Explores how dignitary interests have influenced the development of and have been incorporated into law, using the common law of torts and the constitutional rights of life and liberty as a general (but not exclusive) focal point of discussion.

Grading Basis: Letter Grade

LAWS 8428 (2) Seminar: Women in Law and Literature

Considers both legal and literary depictions of women and their legal and extralegal situations. Topics may include women as mothers, women as sexual beings, women's silence, women's violence and women as criminals, women at work, and women as the "Other" in law and literature.

Grading Basis: Letter Grade

LAWS 8430 (2) Seminar: Comparative Public Health Law and Ethics

Compares public health law systems to those in other countries. Studies the goals, legal structures, and services provided, together with such issues of coercion as quarantines, monitoring, mandates and prohibitions, and forcing pharmaceutical companies to make available inexpensive generic drugs.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 8440 (2) Seminar: International Human Rights

Investigates the sources of international human rights law and issues of jurisdiction to prescribe, adjudicate, and enforce norms. Students study treaties and reservations, customary law, declarations, resolutions, and the U.S. courts' and activists' use of materials. Topics include sovereignty and self-determination, culture, privacy, right to equality, language and speech rights, right to development, immigration, workers and globalization, and citizenship.

Grading Basis: Letter Grade

LAWS 8450 (2) Seminar: Law and Economic Development

Explores past and present debates over the role of the legal order in economic development. Studies the relationships among economic ideas, legal ideas and the development policies pursued at the national and international level in successive historical periods, beginning in the Seventeenth Century to the present. Focuses on the potential for an alliance of various traditions from economics, law and other disciplines to understand development.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Comparative Law

LAWS 8455 (2) Gender and Criminal Justice

Explores the intersection of gender and criminal justice in such areas as police and prosecutorial discretion, the investigation and prevention of crimes, the definition of offenses and defenses, factors contributing to criminality, criminal sentencing and the experience of punishment, and the societal ramifications of incarcerating children's caregivers.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8458 (2) Seminar: Law and Literature

Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal and a final paper will be required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 8505 (2) Sem Interdisciplinary Perspectives on Law and Social Change

Introduces legal institutions engaged in social change, from courts, to Congress, to bureaucracies and organizations. Posits tension between tasks of dispute resolution and public policy development and institutional adaptations. Considers the role of public opinion and the classics of legal formalism to more critical accounts. Considers postmodern theory and empirical legal scholarship. Presents alternatives to court-centered approaches to change, including community lawyering and organizing, law and social movements, and legislation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8508 (2) Seminar: Constitutional Foundations Core Ideas

Focuses on core ideas in U.S. constitutional law, such as means/ends analysis, institutional competence, rights definitions, and juridical techniques for limiting governmental powers. Draws from historical writings, contemporary press accounts, learned treatises, oral arguments, law review articles, and key judicial opinions such as *Mccullough v. Maryland*, *Lochner v. New York*, *Brown v. Board of Education*.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8511 (2) Seminar: Wal-Mart

Examines issues raised by Wal-Mart's size, power, and business model. Considered issues bring numerous areas of law into play, including employment and labor law, social welfare legislation, class actions, antitrust, zoning, international labor and human rights regulation, and international trade. The course will show how different areas of the law are integrated in practice.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business and Commercial Law

LAWS 8515 (2) Seminar: Forced Labor

Reviews several regimes of compulsory labor that have been central to the American experience: Black chattel slavery in the antebellum South; debt peonage, criminal surety, and related institutions of agricultural involuntary servitude; convict leasing and other forms of compulsory inmate labor; "White slavery" and prostitution; and forced labor among immigrants. Emphasizes the complicated role that the law has played, and in some respects continues to play, in both supporting and undermining such institutions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8521 (2) Seminar: Comparative Labor Law

Explores the laws and economic transformations that affect labor relations on a global scale.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8531 (2) Seminar: Labor and Employment in Transportation

Explores legal, social, and economic issues arising from labor relations in the industries transporting goods and people by road, rail, air, and water, among the most critical sectors of the economy.

Grading Basis: Letter Grade

LAWS 8533 (2) Seminar: Criminal Law in Context: Legal and Social Images of Victims and Perpetrators

Contextualizes criminal law by engaging in an in depth study of the legal and social characterizations of victims and perpetrators in U.S. law, politics and popular culture.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 8535 (2) Seminar: Class and Law

Explores issues relating social class to such areas as labor relations, law enforcement, controls on radical movements and the distribution of wealth and power. Considers problems defining social class.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8538 (2) Seminar: Modern Legal Theory Core Ideas

Explores key ideas that have shaped American law and legal thought, such as Holmes' bad man, the Coase Theorem, the "Hunch" theory of law, and others. Focuses on researching and writing many short papers.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8545 (2-3) Seminar: Food Law and Policy

Introduces students to the laws and regulations that govern our food supply. The focus is federal law provided by the U.S. Food and Drug Administration, with additional readings, videos and speakers. Topics to be covered include legal definitions for food, rules on food labeling, standards for food safety, biotechnology, international trade, organic and environmental regulation, hunger, farmer's markets and obesity.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8548 (1-2) Seminar: Theory of Punishment

Explores the various justifications that philosophers have developed to explain why we have the right to punish. Examines the historical evolution of our punishment system and focuses on the death penalty as a critical contemporary issue in the debate about the proper role of punishment in our society.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8555 (2) Seminar: Race, Education and American Law

Explores issues of equity, access and reform in American public education, particularly as it pertains to race, including desegregation, diversity, equal protection and public education, tracking and high-stakes testing, courts or the political branches, charters and vouchers.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 7525.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8565 (2-3) Citizenship

The concept of citizenship connects immigration with studies of race, international human rights, gender, criminality and many others. It has been receiving growing attention in many scholarly disciplines. Examines the notion of citizenship in recent scholarship spanning law, political science, sociology and history.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8605 (3) Seminar: Regulation and Innovation

Explores two related questions: first, what role does regulation play in encouraging (or inhibiting) innovation? Second, what kinds of innovation approaches to regulation itself are being employed or might be employed and how might these strategies improve the environment for private innovation?

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 8608 (2) Seminar: Power, Ethics, and Professionalism

Examines critically the possibility and character of ethical reasoning within the legal profession in light of its institutional structures. Explores descriptive/normative accounts of the profession's structure, "Professionalism," and individual conscience. Put simply, the seminar explores whether it is possible to be a good lawyer and ethical person.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8611 (2) US National Security and Foreign Relations in a Time of Change

Explores the legal frameworks influencing the development of national security policy and US foreign policy. Students will be introduced to applicable US Foreign Relations Law, US National Security Law and International Law and will engage in analysis about current policy approaches to emergent national security threats.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 8613 (2) Seminar: Civil Liberties Litigation

Studies issues unique to the prosecution and defense of civil liberties lawsuits. Discusses litigation strategies with reference to lawsuits currently pending in the federal courts.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public Law

LAWS 8628 (2) Seminar: Law, Power, and Politics

Draws upon various works of political theory, social theory, and jurisprudence to examine different conceptualizations of politics, power, law, and their relations.

Grading Basis: Letter Grade

LAWS 8645 (3) Law and Politics Colloquium: Race in America

A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7191

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8648 (2) Seminar: The Law of Politics

Examines the legal framework that governs the political process, including such topics as the political question doctrine, the "Right to vote," the 2000 presidential election controversy, term limits, bicameralism and presentment, campaign finance, direct democracy, and the interpretation of the legislative product (i.e., statutes).

Grading Basis: Letter Grade

LAWS 8650 (3) Conflict of Laws

Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.

Grading Basis: Letter Grade

LAWS 8701 (2) Seminar: Counseling Families in Business

Explores the legal aspects of owning, managing and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business and conflict resolution.

Recommended: Prerequisites LAWS 6104 and LAWS 6157 and LAWS 6211 and/or LAWS 7409.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8705 (2) Seminar: Affordable Housing

Explores the policy, legal and practical dynamics that drive the development and preservation of privately owned, government subsidized affordable housing. Investigates the nature of the market for housing, with particular emphasis on multifamily rental housing and debates about market failure in that context and then outline and contrast the major regulatory responses to such market failure. Explores how subsidy programs work in practice, focusing on model documents to frame sample transactions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8718 (2) Seminar: Modern Theorists and Law

Considers the work of Levi-Strauss, Steven Lukes, Pierre Bourdieu, Alfred Schutz, Anthony Giddens, Culler, David Harvey, Denis Cosgrove, Michel Foucault, and Emily Martin with respect to social control and law. Focuses on the way in which social control is exercised through the organization of space, time, and the human body. Topics include consideration of meaning, intersubjectivity in the law, social construction of time, and the body as a real and cultural artifact.

Grading Basis: Letter Grade

LAWS 8722 (2-3) Advanced Energy Law

Provides an opportunity for students to further develop their knowledge of the field and to engage in a substantial writing project. Examples of possible topics include hydraulic fracturing, regulation of air emissions from power plants, the smart grid, transmission siting and development, the ratemaking process, design and regulation of electricity markets, energy finance or comparative study of energy regulation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8725 (2) Seminar: Advanced Topics in American Indian Law

Examines a variety of current issues related to American Indian Law. Topics will change to reflect the subjects that emerge at each time that the seminar is offered. Some examples of topics considered include legal protections for American Indian religion and culture, cultural property, Tribal law, gaming law, and Native American natural and cultural resources law. Department enforced corequisite: LAWS 7725.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8728 (2) Seminar: Critical Theory Colloquium

Surveys critical legal theory; introduces the discipline of analytical engagement with law review literature; feminist legal theory, and critical race theory. Offers a deeper understanding of the purposes behind legal reforms, the interaction between law on the books and law in action, how different groups experience the law in different ways and difficult yet rewarding nature of working through seemingly intractable and emotionally charged race, sex and class issues.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8755 (2) Seminar: Higher Education and the Law

Examines the goals, governance, norms, and ideals of American institutions of higher education, and how those policies are shaped by the legal system. Examines the legal relationship between institutions of higher education and its various constituents: faculty, presidents, governing boards, students, alumni, and staff. Spans several traditional doctrinal categories, including contract, torts, employment law, constitutional law, intellectual property, tax, and antitrust.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8765 (2) Seminar: Gender, Law, and Public Policy

Introduces students to various schools of feminist theory and examines the relationship between feminist theories and concrete problems in such areas as constitutional law, education law, employment discrimination, family law and criminal law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8775 (2) Seminar: Advanced Topics in Health Law and Policy

Addresses advanced legal issues in representing physicians, long-term care institutions, hospitals, and other health providers. Issues range from economic policy, distributive justice, and bioethical questions to antitrust and regulatory issues. To be taught at Health Sciences Center.

Recommended: Prerequisite LAWS 7425.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Health Law

LAWS 8785 (2-3) Access to Justice

Explores the scholarship that has developed around the provision of legal services - or the lack of legal services - for those who cannot afford market prices for attorneys. The seminar will also examine recent efforts to provide empirical support for the range of political claims that are made about access to the legal system.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 8808 (2) Rhetoric and the Art of Persuasion

Explores recent work in rhetoric to identify the principles and techniques of effective persuasion in law. Examines the ways in which cognition, language, imagery, metaphor, narrative, and scene setting shape the ways in which lawyers and judges strive to persuade each other.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 9002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife and wilderness resources on public lands.

Requisites: Requires prerequisite course of LAWS 6112 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9003 (3) Ethical Organizations and Professionals

Provides students, particularly those in the Master of Studies in Law (MSL) in Ethics and Compliance program, the opportunity to examine what drives ethical behavior within organizations and the role that ethics and compliance professionals play in promoting ethical behavior. Investigates ethical challenges and decision making, methods to assess ethical organizational culture and qualities of ethical leadership.

Grading Basis: Letter Grade

LAWS 9005 (3) Introduction to US Law

Provides an overview of the US legal system and will help MSL students begin to 'think like lawyers'. Students will be provided with the necessary vocabulary and skills to use legal resources and legal reasoning in academic and professional environments, including reading and analyzing cases, statutes and regulations, doing legal research, and applying existing law to the issue at hand to predict answers to legal questions.

Requisites: Restricted to Master of Studies in Law (LAWS-MSL) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 9061 (1) Contract Drafting

Begins with value creation by transactional lawyers, and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps and warranties, capitalized terms, definitions, indemnifications and escrow).

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9103 (1) Ethics of Patent Practice

Patent agents are not licensed to practice law in any state and therefore courts, clients and practitioners are often faced with uncertainty in defining the ethical obligations of a patent agent and the consequences of failure to fulfill those obligations.

Grading Basis: Letter Grade

LAWS 9104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 9111 (4) Business Law Colloquium

Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9112 (2-3) Advanced Natural Resources Law

Provides in-depth study and analysis of current problems in natural resources law, using historical, literary and scientific materials. Includes field-trip and requires additional field trip expenses.

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 6112 or students must have taken or be currently enrolled in any three of the following, LAWS 6002, LAWS 6112, LAWS 6302 or LAWS 7725.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9167 (3) Partnership Taxation

Studies federal income taxation of pass-through entities such as are used by most small businesses in the U.S. Includes creation, operation, distributions, sales of interests and liquidation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 9209 (4) Natural Resources Law Clinic

Engages in litigation and advocacy aimed at protecting the natural resources of the Rocky Mountain region. Students will represent clients in matters involving public lands, wildlife, and other resources. The seminar component will focus on practical aspects of environmental litigation, including administrative practice and decision-making, client representation, citizen suits and ethnical issues.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 9226 (1-3) Communications for Compliance Professionals

Develops the tools students will need to thrive in the law school's MSL program. Deepens students' understanding of the United States legal system and develops their ability to communicate effectively and appropriately in writing and orally to their intended audience, and research, organize and explain their ideas clearly, using appropriate writing conventions.

Requisites: Restricted to Master of Studies in Law (LAWS-MSL) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 9341 (3) Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "Unbundling" policies to advance competition, and how intellectual property and antitrust rules should be developed.

Requisites: Requires prerequisite course of LAWS 7201 or 7241 or 7301 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 9410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 9701 (2) Counseling Families in Business

Explores the legal aspects of owning, managing and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Recommended prerequisites: LAWS 6104 and LAWS 6157 and LAWS 6211 and/or LAWS 7409

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007 decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail completion.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom and tribal natural resource and environmental management.

Requisites: Requires prerequisite course of LAWS 7725 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9846 (1-2) LLM Seminar

LLM students study academic legal writing in this 1-credit per semester yearlong course. Topics covered will include: the purpose of academic legal writing; how academic legal writing differs from other forms of legal writing; topic selection; legal research (methods and ethics); first drafts; editing; academic workshops; and publishing. In addition, guest speakers will talk to LLM students about career planning and job seeking. International LLM students will learn about the American legal system.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 9856 (1-4) LL.M Thesis

LL.M students are required to write a thesis in order to graduate. Requires significant work of original research on a topic chosen in close consultation with advisors and other law school faculty, and assignments include due dates for topic selection, drafts, and workshop delivery. Thesis is worth two credits. In exceptional circumstances and only after pre-approval, an LL.M student may enroll for a third or fourth credit.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

Leadership Minor (LEAD)

Courses

LEAD 1000 (3) Becoming a Leader

The foundation course will prepare students to exercise leadership in business, government and community organizations. Introduces leadership skills useful in a variety of settings including community and civic activities. Helps students to improve self awareness, understand multiple theories, recognize moral courage, build analytic and critical thinking skills and adapt leadership practices to different people and contexts.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 3030

Additional Information: Departmental Category: CU Engage

LEAD 4000 (4) Leadership in Context and Emerging Challenges: A Capstone

Integrates leadership topics and experiences students pursued through the Leadership Studies Minor. Using advanced critical thinking skills, the seminar requires students to evidence their knowledge, competencies and skills related to leadership theory and practice through examining contemporary leadership challenges. Further, the seminar directs students to justify decision-making processes, demonstrating their ability to synthesize prior knowledge to effect desirable, ethical outcomes.

Requisites: Requires a prerequisite course of LEAD 1000 or LDSP 1000 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: CU Engage

Lesbn/Gay/Bisexual Stdys (LGBT)

Courses

LGBT 2000 (3) Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

Investigates the social and historical meanings of racial, gender, and sexual identities and their relationship to contemporary lesbian, bisexual, gay, and transgender communities.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2030

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

LGBT 2707 (3) Introduction to Lesbian, Bisexual, and Gay Literature

Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, transgender and gay writing in English.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2707

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

LGBT 3710 (3) Topics in LGBT Studies

Content varies by semester and reflects contemporary issues in the field of LGBT Studies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

LGBT 3796 (3) Queer Theory

Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, transgender and gay literature. Examines relationships among aesthetic, cultural and political agendas, and literary and visual texts of the 20th century.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3796

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

LGBT 3930 (3) Lesbian, Gay, Bisexual, Transgender, and Queer Studies Internship

Matches selected students with supervised internships in university programs and advocacy groups, local businesses, human service or government agencies. Internships will focus on lesbian, gay, bisexual, transgender or queer issues, such as anti-violence programs, educational outreach, and civil rights initiatives.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite LGBT 2000.

LGBT 4287 (3) Special Topics in LGBT Literature

Examines a special topic in LGBT literature, foregrounding an approach that focuses on how same-sex desire is represented in literature. May explore the rhetorical and ideological depiction of masculinity and femininity; literary representations of inversion, bisexuality, and transgenderism; the social construction of homosexuality and heterosexuality. Specific topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4287 and WGST 4287

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

LGBT 4400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, this course examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 5400 and WGST 4400 and WGST 5400

Grading Basis: Letter Grade

LGBT 4840 (3) Independent Study in LGBTQ Studies

Self-directed research project in LGBTQ studies supervised by a faculty member and approved by one of the Co-Directors of the LGBT Studies Certificate Program.

Repeatable: Repeatable for up to 6.00 total credit hours.

LGBT 5400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, this course examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 4400 and WGST 4400 and WGST 5400

Grading Basis: Letter Grade

Libby Residential Acad Prgm (LIBB) Courses

LIBB 1133 (3) Exploring Art, Culture and Visual Literacy through Drawing

Teaches basic drawing skills, mechanics of two dimensional space and deconstructs the kinds of artistic images students commonly encounter in social media, street art, graffiti, advertising, comics and tattoos as a basis for understanding how complex visual language communicates profound meaning. Experiential learning activities introduce the practices of design thinking, idea production, the creative process and critical thinking.

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

Grading Basis: Letter Grade

LIBB 1500 (3) The Dialogue of Art and Religion

Focuses on interdisciplinary study of visual art from the three Abrahamic monotheistic traditions. Addresses aesthetic issues related to the object; the relationship between belief systems and form; and the context of the work, especially religious and social history. Objects and structures studied include Russian Orthodox icons, Celtic and Qu'ranic manuscripts and Christian churches.

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

Additional Information: Arts Sci Core Curr: Ideals and Values

LIBB 1600 (3) Gender and Film

Explores a wide variety of cinematic forms and styles and discusses the treatment of femininity, masculinity, sexuality, and how gender is represented as an artifact of mass culture. Although the course title privileges issues of gender, the course also includes the study of issues of race and ethnicity in film and the inherent connections between the cinematic representations of race and gender.

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression Arts Sci Core Curr: Human Diversity

LIBB 1700 (3) The History of Communication from Caves to Cyberspace

Surveys the history, evolution, and nature of communication and communication technologies. Students learn about the ongoing media revolution and its broader context, considering the interdependence of communication, culture, and society. They critically examine utopian, deterministic, and pessimistic arguments about the influence of new technologies and arts. Course combines lecture, discussion, and group work in a seminar format.

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

Additional Information: Arts Sci Core Curr: Historical Context

LIBB 2001 (3) Pop Culture Heroes

Examines ideals and values related to heroic archetypes as reflected in and circulated by American popular culture. Focuses on the ideology that drives notions of the heroic in pop culture figures such as celebrities and athletes, and in film, TV, comics, street art and slam/performance poetry/
Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

LIBB 2013 (3) Film and the Quest for Truth

Concerns the subjectivity and relativity of truth. Focuses on how and why we pursue (or fail to pursue) the truths about ourselves and about the people and events around us, and how and why such truths are often elusive, fragmentary, and impermanent.

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

Additional Information: Arts Sci Core Curr: Ideals and Values

LIBB 2100 (3) Russian Revolutions: Social and Artistic

Examines revolution as seen not only in light of political and economic effects but through the lens of its major cultural concomitant: revolution in the arts. Material is drawn from 20th century Russian social and artistic revolutions which, due in part to new post-Soviet research, provide some of the most striking examples of art and revolutionary social practices.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 2221

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Contemporary Societies

LIBB 2500 (1-3) Special Topics in Libby Residential Academic Program

Introduces timely studio subjects in the visual and performing arts that cannot be offered on a regular basis. Information concerning the studio topics offered in any given semester is available prior to registration from the Libby RAP.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

LIBB 2510 (1-3) Special Topics in Libby Residential Academic Program

Introduces timely subjects in the visual and performing arts that cannot be offered on a regular basis. Information concerning the seminar topics offered in any given semester is available prior to registration from the Libby RAP.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

LIBB 2800 (3) Horror Films and American Culture

Examines American horror films in an historical context through which students learn to recognize how horror films represent our culture's "collective fears" and provides an analysis of the horror film genre. Considers the cultural contexts in which horror films are made through study of the creation and reception of these films during specific times in American history.

Requisites: Restricted to Libby Residential Academic Program (LIBY) students only.

Additional Information: Arts Sci Core Curr: United States Context

Libraries (LIBR)

Courses

LIBR 2000 (3) Research Strategies on the Electronic Campus

Critical examination and practical exploration of computer technologies, digital communication, and electronic information systems and services for new students.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

LIBR 3010 (3) Methods of Electronic Library Research

Exploration of the structure, organization, retrieval, and evaluation of electronic information sources through the formulation of search strategies useful for undergraduate research.

LIBR 3900 (1-3) Independent Library Research

In-depth library research project for upper-division students. Instructor consent required.

LIBR 4029 (1) Art History Research Methods

Learn to expertly navigate art scholarship and be prepared to do thesis-level research. An introduction to the vast array of art historical resources and their uses. Explore advanced techniques for searching both online and offline sources of art information. Master the various modes of art historical research, including finding iconographic, historical, or technical information.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4029 and ARTH 5029

LIBR 4900 (1-3) Independent Library Research

In-depth library research project for upper-division students. Instructor consent required.

Linguistics (LING)

Courses

LING 1000 (3) Language in U.S. Society

Nontechnical exploration of the ways that language is used in America. Emphasizes language as a social institution and how values and goals of both public institutions and private groups shape and are shaped by language and its use.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Core Curr: United States Context
MAPS Course: Social Science

LING 1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1010

LING 1020 (3) Languages of the World

Explores the issue of human diversity by examining how languages vary around the world. Outlines historical, geographic, and typological classifications of languages across human societies, and the criteria used by linguists for grouping them into language families. Theorizes the relationship between linguistic and cognitive diversity, and considers the impact of language death on humanity. No formal training in linguistics is required.

Additional Information: Arts Sci Core Curr: Human Diversity

LING 1500 (3) Understanding Grammar

Presents fundamentals of grammar in the Western tradition. Emphasizes making concepts and uses of grammar (as exemplified in English and closely related foreign languages) understandable to the nonspecialist.

LING 1900 (1) Service Learning Practicum: Adult Literacy

Practicum for selected students in LING 1000. Provides practical experience of the impact of illiteracy on individuals, families, and the community at large. Coregistration in service learning recitation is required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of LING 1000 (prereq minimum grade C-).

Grading Basis: Pass/Fail

LING 2000 (3) Introduction to Linguistics

Introduces the study of languages as structural systems. Principles of sound patterns, word formation, meaning, and sentence structure. Gives attention to language acquisition, psycholinguistics, language families, dialects, historical change in languages, and different language types.

Additional Information: MAPS Course: Social Science

LING 2400 (3) Language, Gender and Sexuality

Familiarizes students with the effects of gender on language use; discusses popular beliefs and scholarly theories about language and communication. Provides students with tools for exploring the role of language and gender.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

LING 3005 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and PHIL 3310 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

LING 3100 (3) Language Sound Structures

Introduces the sounds of languages and their organization into phonological structures.

Recommended: Prerequisite LING 2000.

LING 3220 (3) American Indian Languages in their Social and Cultural Context

A sampling of the many indigenous languages and cultures found in America. Emphasizes the United States, but also gives attention to the languages of Canada and Latin America.

Recommended: students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Human Diversity

LING 3430 (3) Semantics

Theoretical and practical study of meaning in natural language. Considers both semantic theories and semantic phenomena from diverse languages. Does not treat techniques for improving the use of language.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Linguistics (LING) majors only.

Recommended: Prerequisite LING 2000.

LING 3545 (3) World Language Policies

Examines the economic and sociopolitical impact of choosing English vs. other languages in the U.S. Introduces the study of language policies, rights, and planning in other countries, including the worldwide use of English in social, business, and legal contexts.

LING 3630 (3) Principles and Practices in Teaching English to Speakers of Other Languages

Provides a practical overview of principles and practices in TESOL in its global context. Introduces methods and materials (texts, media, tools) and standards for teaching, learning and assessment. Includes lesson observation, planning and micro-teaching focused especially on listening, speaking and pronunciation. Assumes some background and/or interest in linguistics and language and applications to teaching English to adults/young adults.

Requisites: Requires a prerequisite or corequisite course of LING 2000 (minimum grade C).

Grading Basis: Letter Grade

LING 3800 (1-4) Special Topics in Linguistics

Intensive study of a selected area or problem in linguistics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

LING 4050 (3) Japanese Sociolinguistics: Japanese Language and Society

Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4050 and JPNS 5050

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Grading Basis: Letter Grade

LING 4100 (3) Perspectives on Language

Provides extended critical examination of a few selected issues, chosen each term for their general interest and relevance, e.g., the relation between language and thought, or human language vs. animal languages, and computer languages.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite LING 2000.

LING 4220 (3) Language and Mind

Studies topics such a speech perception, word recognition, sentence comprehension, language acquisition, bilingualism, reading and writing. Examines the role of language as a product and producer of the mind, studying interactions between language and cognition from an interdisciplinary perspective. Students will become familiar with the methods of psycholinguistics and design and conduct a psycholinguistic experiment on their own.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4220

Recommended: Prerequisites PSYC 1001 and LING 2000.

LING 4225 (4) Interdisciplinary Research Methods in Child Language Acquisition

Explores fundamental issues in language acquisition cross-culturally, combining methods from Linguistics, Anthropology, Psychology and Computer Science. Students will explore theoretical issue using a hands-on approach that involves acquiring skills such as designing and conducting experiments, investigating corpus data, and computational modeling.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4225

Recommended: Prerequisites PSYC 1001 and LING 2000.

Grading Basis: Letter Grade

LING 4420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 5420

Recommended: Prerequisite LING 2000.

LING 4450 (3) Introduction to Formal Syntax

Introduces formal generative grammar, including determining constituent structure, drawing trees, writing rules, understanding the properties of the lexicon and their interaction with syntax, X-bar theory and its modifications and movement analysis.

Recommended: Prerequisite LING 4420.

LING 4560 (3) Language Development

Emphasizes acquisition of language by young children; development in later years and into adulthood is also treated. Particular attention given to roles of environment and of neurophysiological endowment in learning to communicate with words, sentences, and narratives.

Equivalent - Duplicate Degree Credit Not Granted: SLHS 4560 and PSYC 4560

Requisites: Restricted to Linguistics (LING) majors only.

Recommended: Prerequisites LING 2000 and PSYC 1001.

LING 4610 (3) English Structure for Teachers of English to Speakers of Other Languages

Description of morphological and syntactic categories and structures of English.

Equivalent - Duplicate Degree Credit Not Granted: LING 5610

Recommended: Prerequisite LING 2000.

LING 4800 (3) Language and Culture

Principles of language structure and how language and culture interrelate, how language and language use are affected by culture and how culture may be affected by use of, or contact with, particular languages.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4800

Recommended: Prerequisite LING 1000 or LING 2400 or ANTH 2100.

LING 4830 (3) Honors Thesis

Required for students who elect departmental honors. Students write an honors thesis based on independent research under the direction of a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sciences Honors Course

LING 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

LING 4910 (3) TESOL (Teaching English to Speakers of Other Languages) Practicum

Provides the field-based component and practical experience in English language teaching for the TESOL Certificate. Work on site includes class observations and supervised teaching in community-based programs/ESL providers. Weekly meetings provide opportunities to debrief/discuss teaching practice and connect theory, methods and practice. Supports professional development, completion of a teaching resume and portfolio and the job search process.

Equivalent - Duplicate Degree Credit Not Granted: LING 5910

Requisites: Requires prerequisite courses of LING 2000 and LING 3630 (minimum grade C).

Grading Basis: Letter Grade

LING 5030 (3) Linguistic Phonetics

Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, and instruction on fundamentals of articulatory, acoustic, and auditory phonetics.

Requisites: Restricted to graduate students only.

LING 5200 (3) Introduction to Computational Corpus Linguistics

Covers computer methods for doing linguistics with on-line corpora.

Includes extensive introduction (with lab) to the Python programming language, UNIX corpus tools, concordance programs, syntactic treebanks, propbanks, and corpora for discourse and phonology research.

Requisites: Restricted to graduate students only.

LING 5300 (3) Research in Psycholinguistics

After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production and theories of brain specialization for language, are explored.

Recommended: Prerequisite at least one graduate-level course in LING, PSYC or CSCI.

LING 5410 (3) Phonology

Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis.

Recommended: Prerequisite LING 5030.

LING 5420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 4420

Requisites: Restricted to graduate students only.

LING 5430 (3) Semantics and Pragmatics

Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning, representation, conversational implications, speech acts, and discourse structure.

Recommended: Prerequisite LING 5420.

LING 5570 (3) Introduction to Diachronic Linguistics

Familiarizes students with terminology, methods, and theories dealing with phenomena of language change through time.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5410.

LING 5610 (3) English Structure for Teachers of English to Speakers of Other Languages

Description of morphological and syntactic categories and structures of English.

Equivalent - Duplicate Degree Credit Not Granted: LING 4610

Requisites: Restricted to graduate students only.

LING 5620 (3) Teaching ESL Pronunciation

Examines the phonetics and phonology of American English (including prosody) and explores techniques for teaching pronunciation skills to non-native speakers. Treats both general issues and specific problems for students from particular language backgrounds.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 3100 or LING 5030 and LING 5410.

LING 5630 (3) Methods and Materials for Teaching English as an Additional Language

Provides an overview of methods and materials for teaching English as an additional language, along with opportunities for students to observe, discuss and analyze these in relation to language teaching principles, linguistic considerations, and global and local contexts. Aimed primarily at the teaching of English to nonnative speaking adults, the course also addresses second and foreign language teaching generally.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5610 or LING 5620.

LING 5800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

LING 5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5832

Requisites: Restricted to graduate students only.

LING 5900 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

LING 5910 (1-3) TESOL Practicum

Provides observation and supervised teaching experiences in classroom and other contexts involving the teaching of English to speakers of other languages, especially adults and young adult learners in settings outside K-12. Meetings provide opportunities to debrief and to consult on teaching practice; help students connect theory, methods and practice; and support a professional teaching portfolio process.

Equivalent - Duplicate Degree Credit Not Granted: LING 4910

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 4610 or LING 5610.

LING 6200 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

LING 6300 (3) Topics in Language Use

Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and sociolinguistic variation.

Requisites: Restricted to graduate students only.

LING 6310 (3) Sociolinguistic Analysis

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary sociolinguistic analysis, with special emphasis on linguistic variation, diversity and change.

Requisites: Restricted to graduate students only.

LING 6320 (3) Linguistic Anthropology

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 6320

Requisites: Restricted to graduate students only.

LING 6450 (3) Syntactic Analysis

Introduces the major constructs used by formal theories of syntax to capture the relationship between meaning and syntactic form and uses data from diverse languages to explore the universality of these constructs.

Requisites: Restricted to graduate students only.

LING 6500 (3) Issues in Indigenous Languages

Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 6500

Grading Basis: Letter Grade

LING 6510 (3) Language Structures

Surveys the structure of one or more languages, emphasizing understanding how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 6520 (3) Topics in Comparative Linguistics

Students compare and contrast selected structures of languages treated from a typological, genetic, or a real perspective. No special prior knowledge of the subject language is required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 6560 (3) Language Acquisition

Theories and research methods in first-language acquisition of phonology, morphology, syntax, semantics, and pragmatics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5430.

LING 6940 (1) Master's Degree Candidate

Grading Basis: Pass/Fail

LING 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

LING 7030 (3) Phonetic Theory and Analysis

Provides students with the practical skills and the conceptual framework to do independent research in phonetics (or in other areas relying on phonetic data). Introduces current and traditional issues in phonetic research (both experimental and theoretical) and gives training in analytical methods.

Recommended: Prerequisites LING 5030 and LING 5410.

LING 7100 (3) Field Methods 1

Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features, and preliminary formulation using computational tools.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 7320 (3) Narrative and Identity

Examines the ways in which identities are constructed, contested, and negotiated through narrative practice.

LING 7350 (3) Language and Gender in Cultural Perspective

Examines organizations of language and gender in a variety of societies and cultures from the perspectives of sociolinguistics, linguistic anthropology, and socially-oriented discourse analysis.

LING 7360 (3) Language and Sexuality

Explores the role of language in the social construction and articulation of sexuality.

LING 7410 (3) Phonological Theory

Phonetic and morphophonological representations: distinctive features, segments, prosodic structures, morphological structures. Phonological processes and their interaction. Naturalness conditions.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5410.

LING 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Department enforced prerequisites: CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

LING 7420 (3) Syntactic Theory

Covers various topics in syntactic theory.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5420.

LING 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506.

LING 7430 (3) Semantic Theory

Current developments in the theory of linguistic semantics. Topics include truth-conditional theories, generative linguistic theories, semantic theories of communicative competence and integration of these theories in development of a combined theory of semantics and pragmatics.

Recommended: Prerequisite LING 5430.

LING 7570 (3) Advanced Diachronic Linguistics

Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items and its relation to theories of grammar and of language variation.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

LING 7800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

LING 7900 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

LING 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Management (MGMT)

Courses

MGMT 1000 (1) The Dean's Leadership Forum

The Dean's Leadership Forum is a one-hour, invitation-only seminar course aimed at developing young, promising leaders and is part of the School's commitment to Educating Principled, Innovative Leaders Who Drive Value. Focuses on various aspects of real-world leadership and introduces students to CEOs and successful business leaders of all types, with a heavy emphasis on CU alumni.

Requisites: Restricted to students with 0-26 units (Freshmen) Business (BUSN) majors only.

Grading Basis: Pass/Fail

MGMT 1001 (1) Women in Business

Everyone can benefit from taking the time to reflect upon and grow their leadership ability. The purpose of this experience is to ground students in a community of similarly minded, high caliber individuals, to equip them with leadership insights and best practices, and to encourage them to achieve their greatest leadership goals. This will be accomplished by careful discussion, readings, and perhaps, most importantly, exposure to key chief executive officers and other very highly accomplished leaders. Although we discuss the unique aspect of being a woman in business, men are welcomed to share in the leadership experience.

Requisites: Restricted to students with 0-26 units (Freshmen) Business (BUSN) majors only.

Grading Basis: Pass/Fail

MGMT 3010 (3) Negotiation and Conflict Management

Provides an opportunity to learn and practice the foundational skills of negotiation and conflict management. This class provides a set of conceptual tools for diagnosing problems and obtaining agreement in difficult situations. Theoretical frameworks from Game Theory get explained and mastered through class simulations. Students will learn to identify and strategically execute a set of options that allow them to obtain their business objectives while building effective and harmonious work relationships.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2300 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 3025 (3) Essential Management Skills

The course takes as its starting point the fact that not all students will be leaders. A student may end up as an individual contributor, or manager of a small group of people, or an owner of a sole-proprietorship. Students can have a tremendous impact on these roles and the questions becomes, how can they become the best they can be?

Requisites: Restricted to Business (BUSNU) majors only.

MGMT 3030 (3) Critical Leadership Skills

Provides an opportunity to learn about and practice the skills required of all managers. These skills include leadership, negotiation, conducting performance appraisals, delegation, effective communication, interviewing and making hiring decisions, and managing employees with problem behaviors. Objectives include developing self-awareness of strengths and weaknesses as a manager, gaining familiarity with theory-based skills, and developing proficiency in the use of these skills.

Equivalent - Duplicate Degree Credit Not Granted: LEAD 1000

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 3040 (3) Fundamentals of Socially Responsible Leadership

Designed to build on the learning from MGMT 3030 and the rest of the management track curriculum, while adding more depth and breadth around the context managers operate within. Techniques used by current business leaders and seminal leadership scholars to prepare students to handle various leadership situations will be explored. Students will engage in oral and written presentations.

Equivalent - Duplicate Degree Credit Not Granted: CESR 3040

Requisites: Requires a prerequisite course of BASE 2104 and prerequisite or corequisite course of MGMT 3030 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 3100 (3) Operations Management

Examines concepts, tools and techniques used in the management of service operations. Focuses on how firms add value and compete with high quality and efficient services. Emphasizes the use of models for designing new products services and improving the effectiveness of service processes. Studies the application of technology in the context of productivity, growth and the globalization of manufacturing and services.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 3200 (3) Business Analytics

Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. The class creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 3201 (3) Business Analytics

Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

Equivalent - Duplicate Degree Credit Not Granted: MKTG 3201

Requisites: Requires prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 3210 (3) Business Application Programming

The objective is to introduce students to the world of programming and empower them with the ability to create and extend business applications. Students will learn the core concepts of programming with VBA (Visual Basic for Applications) and use them to customize and extend applications like Excel, as well as a method to decompose a complex task into manageable pieces.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 3220 (3) Introduction to Python Programming

Python has emerged as the key programming language for data science and business analytics. Helps students understand the programming mindset through use of open source software and libraries and introduces students to object oriented programming.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed

MGMT 3800 (3) Consulting Skills

Provides students with skills to understand, diagnose and solve problems that businesses face. Strong focus on action learning, so emphasizes case analyses, project based learning and exposure to models used in the consulting world. Features interactions with consultants from some of the top firms in the world, such as McKinsey.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4010 (3) Redefining the Employee-Employer Relationship

Explores developments in such areas as employee relations law and procedures, employee and employer rights, worker involvement programs, environmental safety and health, and the effects of technology on emerging organization forms.

Requisites: Requires prerequisite courses of BCOR 2001 and BASE 2104 or BCOR 2300 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4020 (3) Hiring and Retaining Critical Human Resources

Allows students the opportunity to practice conducting job analyses and then use this information to develop employee selection and performance appraisal systems. Provides thorough coverage of employers' equal employment opportunity and affirmative action obligations, as well as various approaches to gender, cultural, and ethnic diversity.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2300 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4030 (3) Managing Employee Reward Systems

Examines theories of work motivation and relates them to the strategic use of compensation and other reward systems. Topics include procedures for managing base pay; linking pay incentives to productivity at the individual, group, and organizational levels; developing cost-effective programs of employee benefits; and the use of nonfinancial reward systems.

Requisites: Requires prerequisite courses of BCOR 2001 and BASE 2104 or BCOR 2300 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4040 (3) Individual, Team, and Organizational Development

Explores how to determine where an organization needs to focus its development efforts, how to develop and deliver an effective training program, and how to evaluate the impact of development programs on organizational effectiveness. Explores individual, team, and organization-wide development, including such topics as skills training, team building, and managing change.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2300 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4065 (3) Digital Leadership

In the digital age, leaders have to orchestrate radical redesign of everything from their internal processes to their business model on an ongoing basis. This requires leaders to adopt new approaches to leadership and new behaviors. This course provides students with the skills required in identifying business opportunities, finding appropriate information related technologies and leading innovation efforts to success.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4090 (3) IT and Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

Requisites: Requires prerequisite courses of BCOR 2001 and BASE 2104 or BCOR 2300 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4110 (3) Supply Chain Management

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses, and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4120 (3) Managing Business Processes

Covers the concepts and tools to design and manage business processes. Emphasizes modeling an analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 5120

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4130 (3) Sustainable Operations

Sustainable operations examines business strategies in response to environmental and social challenges. Grounded in resource efficiency, life-cycle thinking and a dose of investigative skepticism, the course assists students to thoroughly understand the scope of costs, benefits and risks associated with driving businesses toward sustainable operations.

Equivalent - Duplicate Degree Credit Not Granted: CESR 4130

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4140 (3) Project Management

Introduces multidisciplinary project management concepts, skills, and tools, including the relationship between project definition, organization, planning, scheduling, resource and risk management, control, costing and performance. Presents both qualitative and quantitative tools for better project management.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2300 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4150 (3) International Operations Management

Compares systems of production/operations management in the United States with those in Japan, Europe and Asia. Contrasts various regional and national approaches to business, quality management, labor practices, management styles, international competitiveness, productivity, distribution systems, trade practices and strategies for penetrating foreign markets. Examines different sociocultural environments, government-business relationships, banking industries, operations strategies and the potential for transferring industrial management practices and techniques between countries.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4200 (3) Competitive Strategy

Provides students with the foundational skills related to competitive strategy. Tools and techniques associated with this course will enable students to understand the fundamentals of why one firm outperforms another through understanding the fundamentals of superior performance at the business unit level. Examples of specific learning objectives: develop an understanding of fundamentals of what is strategy, foundations of competitive advantage.

Requisites: Requires prerequisite courses of BCOR 2001 and BASE 2104 or BCOR 2500 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4205 (3) Business Data Management

Emphasizes the fundamentals of modern database design in the context of large-scale applications. Covers analysis phase activities such as data modeling for requirements analysis. Covers the extended entity relationship model and the semantic data model in-depth. Covers design phase activities such as the normalization criteria of the relational model and transformation from conceptual to physical design. Introduces object oriented databases.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4210 (3) Systems Thinking

Provides students with problem solving and critical thinking skills in order to analyze large, complex social problems. Students learn techniques to get to the root cause of the problem and understand unintended consequences of proposed solutions to that problem. Students learn to break from typical mental models, make paradigm shifts and learn to recognize and avoid learning barriers and biases.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2300 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4220 (3) Business Technologies

Covers ERP (enterprise resource planning) technologies which facilitate business processes within firms in three modules. The first will involve understanding the basics of technologies in organization. The second module will introduce OpenERP, an open-source ERP system for small-medium sized businesses. The final module is an introduction to SAP, the most widely used ERP system for large organizations.

Requisites: Requires prerequisite course of BASE 2104 or BCOR 2300 or BCOR 2500 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4230 (3) Design of Usable Business Systems

Focuses on the development of user-friendly business systems, especially websites. Students will plan, design and develop websites, including mobile sites, that are user-friendly and visually appealing following current best practices for responsive and interactive design. Usability testing and website analytics techniques will be explored and practiced.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 5230

Requisites: Requires prerequisite courses of BASE 2101 and BASE 2102 and BASE 2103 and BASE 2104 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4240 (3) Competitive Strategy

Covers the competitive strategy of firms. Topics include: what is strategy, external analysis and Porter's five forces, internal analysis and the resource based view, value added and strategic positioning, innovation and entrepreneurship, market entry timing, competitive dynamics.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors.

MGMT 4250 (3) Information Security Management

A broad introduction to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks) and psychological (e.g., social engineering) issues. A key objective is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4430 (3) Corporate Boards in Action

Allows students from any functional area of business to appreciate the difficulties modern boards and management face. Issues addressed include financial strategy; board composition; executive succession, tenure and compensation; management through crisis; sustainability and corporate social responsibility; the challenges and opportunities presented by globalization and international governance issues.

Equivalent - Duplicate Degree Credit Not Granted: CESR 4430

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4440 (3) Privacy in Big Data Analytics

Privacy = the new currency. In a time where technology allows unprecedented aggregation of personal information use of "private" information is moving faster than social norms and laws can follow. We will dissect the technologies and social trends related primarily to privacy and use of information about individuals to reap profits. A good complement to business intelligence and analytics classes.

Equivalent - Duplicate Degree Credit Not Granted: CESR 4440

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4500 (3) Enterprise Intelligence Systems

Through case studies and assignments, students learn how to evaluate and design Enterprise Intelligence Systems (EIS). Students evaluate and develop EIS data governance plans to promote data quality, improve information assurance and better manage risk. Using advanced tools and programming languages, students evaluate, design and prototype strategies, processes and procedures to support the collection, transformation and loading of enterprise data into usable data repositories known as data warehouses and data marts.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4820 (3) Topics in Business

Experimental course offered irregularly for purpose presenting new subject matter in organization management.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 5820

MGMT 4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Management.

Requisites: Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4828 (3) Experimental Seminar: Corporate Boards in Action

Explores the complexity of corporate boards and the need for values-driven leadership. Students will consider corporate governance topics including: financial strategy, international challenges, ethics, corporate social responsibility, board composition, compensation and crisis management. Throughout the course, students will evaluate their own leadership and decision making abilities as they work together in student-run boards to address issues presented in a variety of case studies.

Equivalent - Duplicate Degree Credit Not Granted: CESR 4828

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MGMT 4850 (3) Senior Seminar in Management

Covers the issues and challenges of running a firm in a competitive environment. It integrates and builds upon coursework in other functional areas. Discusses principles, frameworks, and techniques that helps understand how to analyze the competitive environment; firm sources of competitive advantage; competitive dynamics; and, specific types of strategies to promote firm performance. Focuses on specific company examples. Formerly MGMT 4000.

Requisites: Requires prerequisite courses of BCOR 2300 and BCOR 2500 or BASE 2104 (all minimum grade D-). Restricted to students with 102-180 units completed.

MGMT 4900 (1-3) Independent Study

Intended only for exceptionally well qualified business seniors. Departmental form required. Instructor consent required.

MGMT 4910 (1-3) Academic Internship in Management

Offers students the opportunity to gain professional work experience in a management position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes 100 hours per credit and a course paper. Instructor consent is required. Pass/Fail grading only. Formerly SYST 4910, OPIM 4910.

Requisites: Requires prerequisite course of BCOR 2500 (minimum grade D-). Restricted to students with 52-180 units completed.

Grading Basis: Pass/Fail

MGMT 5120 (3) Managing Business Processes

Covers the concepts and tools to design and manage business processes. Emphasizes modeling an analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 4120

Requisites: Restricted to graduate students only.

MGMT 5230 (3) Design of Usable Business Systems

Focuses on the development of user-friendly business systems, especially websites. Students will plan, design and develop websites, including mobile sites, that are user-friendly and visually appealing following current best practices for responsive and interactive design. Usability testing and website analytics techniques will be explored and practiced.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 4230

Requisites: Restricted to graduate students only.

MGMT 5820 (3) Topics in Business

Experimental course offered irregularly for purpose presenting new subject matter in organization management.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 4820

MGMT 8900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

MGMT 8990 (1-10) Doctoral Thesis

Work with a faculty advisor on a doctoral thesis. Student should have passed comprehensive exam before registering for doctoral thesis hours.

Requisites: Restricted to graduate students only.

Marketing (MKTG)

Courses

MKTG 2400 (3) Principles of Marketing for Communications

At its most fundamental level, marketing encompasses activities designed to facilitate exchange. These activities are often described with the "4Ps": product, place, price and promotion. Through these 4Ps, marketers create benefits that provide values to consumers. This course will address how marketers make decisions about the 4Ps to provide value to consumers and motivate consumers to engage in exchange transactions.

Requisites: Requires a prerequisite course of APRD 1002 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors), Strategic Communication (STCM) majors only.

MKTG 2700 (3) Digital Marketing Tools

Digital marketing is an exciting area of marketing practice. Designed to give the knowledge, skills and experiences for digital marketing. Topics covered include search engine optimization, social media data analysis, search ads, the advertising technology business landscape and email marketing. An important course theme is that digital efforts should be designed with performance measurement in mind.

Equivalent - Duplicate Degree Credit Not Granted: MKTG 3700

MKTG 3050 (3) Customer Analytics

Students develop a deep understanding of customer centricity and its implications for the firm, learn about state-of-the-art methods for calculating customer lifetime value and customer equity and develop the analytical and empirical skills that are needed to judge the appropriateness, performance and value of different statistical techniques that can be used to address issues around customer acquisition, development and retention.

Requisites: Requires prerequisite courses of BCOR 2001 and BASE 2104 or BCOR 2400 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

Additional Information: Business Honors Course

MKTG 3100 (3) Fundamentals of Professional Selling

Explores the principles and methods of professional salesmanship with a focus on sales processes, best practices and frameworks used to organize sales efforts. Structured to include involvement from working sales professionals. Topics covered include: the role and value of professional selling in the marketing mix, ethical sales practices, sales quotas and compensation, effective sales communication, prospecting and funnel management, overcoming objections, professional sales closure and negotiation techniques.

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MKTG 3150 (3) Sales Management, Leadership and Organization Development

Explores factors that determine size, shape and strategies of high performing sales organizations in the context of an overall go-to-market strategy. Structure includes involvement from professional sales executives. Includes overview of fundamentals of professional selling, designing sales organization, sales objectives and metrics, sales analytics, sales force recruitment and selection, sales force training and education, sales force motivation and compensation.

Requisites: Requires prerequisite course of MKTG 3100 and BCOR 2001 or BCOR 2400 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MKTG 3201 (3) Business Analytics

Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 3201

Requisites: Requires prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MKTG 3250 (3) Buyer Behavior

Covers both consumer buying behavior and organizational buying behavior. Consumer behavior topics include needs and motives, personality, perception, learning, attitudes, cultural influence, and contributions of behavioral sciences that lead to understanding consumer decision making and behavior. Explores differences between business and consumer markets, business buying motives, the organizational buying center and roles, and the organizational buying process. Required for marketing majors.

Requisites: Requires prerequisite course of BCOR 2001 and BASE 2104 or BCOR 2400 (minimum grade D-). Restricted to Business (BUSN) or Advertising (ADVT) majors and 52-180 hours completed.

MKTG 3350 (3) Marketing Research and Analytics

Explores fundamental techniques of data collection and analysis used to solve marketing problems. Specific topics include problem definition, planning an investigation, developing questionnaires, sampling, tabulation, interpreting results, and preparing and presenting a final report. Required for marketing majors. .

Requisites: Requires prerequisite courses of BCOR 2001 and BASE 2104 or BCOR 2400 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MKTG 3700 (3) Digital Marketing

Covers the what, why and how of major digital marketing approaches, including online listening and monitoring, search engine optimization, search ads, email marketing, and social media. Designed to launch students as digital marketing professionals and to provide experience with industry-relevant hands-on assignments and exercises.

Equivalent - Duplicate Degree Credit Not Granted: MKTG 2700

Requisites: Requires prerequisite courses of BCOR 2001 and BASE 2104 or BCOR 2400 (all minimum grade D-). Restricted to Business (BUSN) majors.

MKTG 3825 (3) Experimental Seminar

Offered irregularly. Provides opportunity for investigation into new frontiers in marketing.

Requisites: Requires prerequisite course of BCOR 2400 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

MKTG 4250 (3) Product Strategy

Covers major topics in managing long-term customer relationships that derive from products. Focuses on concepts, analyses, and strategies for existing and new products. Topics include concept development and testing, conjoint analysis, product positioning, brand image measurements and brand management, and product issues in public policy and ethics. Methods of instruction include lectures, case discussions, student group papers and projects, and examinations.

Required for marketing majors.

Requisites: Requires prerequisite courses of MKTG 3250 and MKTG 3350 (all minimum grade D-). Restricted to Business (BUSN) majors with 52 minimum units required.

MKTG 4300 (3) Pricing and Channels of Distribution

Offered regularly to examine pricing and channel management, the two key components of companies' marketing strategies. Help students to understand the common types of pricing and channel strategies, the rationales behind these strategies. Train students to think analytically in order to apply these strategies. Required for marketing majors.

Requisites: Requires prerequisite courses MKTG 3250 and MKTG 3350 (all minimum grade D-). Restricted to Business (BUSN) majors with minimum 52 units completed.

MKTG 4350 (3) Services Marketing Strategy

Designed for those students interested in working in the service industries. Addresses the distinct needs and problems of service organizations in the area of marketing and service quality. Service organizations (i.e., banks, transportation companies, hotels, hospitals, educational institutions, professional services, etc.) require a distinctive approach to marketing strategy—both in its development and execution. Builds and expands on marketing ideas and how to make them work in service settings.

Requisites: Requires prerequisite courses of MKTG 3250 and MKTG 3350 (all minimum grade D-).

MKTG 4500 (3) Advertising Management

Requisites: Requires prerequisite courses of MKTG 3250 and MKTG 3350 (all minimum grade D-). Restricted to students with 52-180 units completed.

MKTG 4550 (3) Advertising and Promotion Management

Analyzes advertising and promotion principles and practices from the marketing manager's point of view. Considers the decision to advertise, market analysis as a planning phase of the advertising program, media selection, public relations, sales promotion, promotion budgets, campaigns, evaluation of results, and agency relations.

Requisites: Requires prerequisite courses of MKTG 3250 and MKTG 3350 (all minimum grade D-). Restricted to Business (BUSN) majors with 52 minimum units required.

MKTG 4650 (3) Institutional Relationships and Strategy

Focuses on the management of a firm's relationships with other businesses. Addresses business-to-business marketing strategies, relationships with channel members, and strategic alliances/partnerships. Topics include relationship structures, power, conflict, negotiation, industry analysis, selection of business partners, and managing for long-term stability.

Requisites: Requires prerequisite courses of MKTG 3250 and MKTG 3350 (all minimum grade D-).

MKTG 4810 (3) Honors Seminar

Social responsibilities of the business executive, business ethics, business-government relations, and business in literature. Department enforced prerequisites: open to seniors who have completed at least 30 semester hours of business courses with not less than a 3.30 GPA and have instructor consent.

Requisites: Requires prerequisite course of BCOR 2400 (minimum grade D-).

Additional Information: Arts Sciences Honors Course

MKTG 4820 (3) Special Topics in Marketing

Offered irregularly. Provides opportunity for investigation into new frontiers in marketing.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

MKTG 4825 (1-3) Pricing and Channels of Distribution

Offered irregularly to provide opportunity for investigation of new frontiers in Marketing.

Requisites: Requires prerequisite courses of MKTG 3250 and MKTG 3350 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior).

MKTG 4850 (3) Senior Seminar in Marketing

Capstone marketing course that integrates and further develops what students have learned in other courses. Provides students with the insight and skills necessary to formulate and implement sound socially responsible marketing strategies, product line management strategies, promotional and product/service communication strategies, pricing, and distribution strategies. Required for marketing majors.

Requisites: Requires prerequisite courses of MKTG 4250 and MKTG 4300; or MKTG 4250 and MKTG 4550; or MKTG 4300 and MKTG 4550 (all minimum grade D-). Restricted to senior Marketing (MKTG) majors with 102 to 180 units completed.

MKTG 4900 (1-6) Independent Study

Intended only for exceptionally well qualified business seniors. Instructor and division chair consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

MKTG 6900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

MKTG 6940 (1) Master's Candidate

Departmental form required.

Grading Basis: Pass/Fail

MKTG 6950 (1-6) Master's Thesis**MKTG 7300 (3) Multivariable Methods in Marketing Research**

Includes Manova designs, causal models, cluster analysis, discriminant function analysis, factor analysis, and latent structure analysis. Emphasizes computer applications. Department enforced prerequisites: graduate courses in regression and Manova.

MKTG 7310 (3) Design and Analysis of Experiments in Business

Detailed exposure to experimental research methods for business applications. Emphasizes the choice of design options, data collection methods, statistical analysis, and substantive interpretation of experimental results.

MKTG 7810 (3) Doctoral Seminar: Psychological Approaches to Research in Marketing

Examines the basic psychological processes that underlie common marketing phenomena. Topics include memory and judgment, persuasion, attitude-behavior consistency, information processing, automatic and controlled processes, learning, motivation and cognition, social judgment, and the role of affect and mood on judgment. Discusses topics in consumer behavior and marketing management contexts, in conjunction with related methodological issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

MKTG 7815 (3) Doctoral Seminar: Consumer and Managerial Decision Making in Marketing

Examines judgment and decision making research pertinent to understanding how consumers and marketing managers make decisions. Uses economic models as a normative backdrop for examining research on decision heuristics, judgment and choice anomalies, and contingent decision behavior. Examines processes of causal judgment and inference and the influence of a variety of contextual factors (including time) on judgment and decision.

MKTG 7830 (3) Doctoral Seminar: Dissertation Research

Assists doctoral students in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in marketing. Gives special attention to development of thesis topics.

MKTG 7835 (3) Marketing Strategy

Examine theories of marketing strategy emanating from economics, sociology, psychology, strategy and organizational sciences, as well as marketing. Levels of analysis for studying marketing strategy research will include the individual, dyadic, group, firm, interorganizational and industry levels. Examines methods for doing marketing strategy research, including experiments, quasi-experiments, surveys, qualitative data and secondary data.

MKTG 7840 (3) Quantitative Marketing Seminar 1

Provides a foundation for quantitative analysis in marketing. The empirical component covers fundamental empirical modeling techniques (e.g., field experiments, diffusion models, categorical data models, consumer heterogeneity). The theoretical components illustrates how utility maximizing consumers learn about consumption environment and respond to firms' marketing decisions and examines firms' competitive strategy and marketing mix decisions and relevant organizational and sociological factors.

MKTG 8900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

MKTG 8990 (1-10) Doctoral Thesis

Master of the Environment (ENVM)

Courses

ENVM 5001 (3) Foundations of Environmental Leadership

Engages and exposes students to diverse leadership models and styles and emphasizes concepts and skills necessary for effective environmental leadership. Students will explore and critically analyze approaches and tools for effective collaboration, creative communication with diverse stakeholders, facilitation of events and processes, negotiation, fiscal management, strategic planning, practicing design thinking, developing organizational structures and leading social change.

Grading Basis: Letter Grade

ENVM 5002 (3) Analyzing Socio-Environmental Systems

Learn to use a 'systems thinking' approach to address complex environmental challenges. The objective is to introduce students to thinking about environmental challenges in a holistic manner, helping them to understand the connectivity between different parts of the same system and to identify the synergies and trade-offs contained within most socio-environmental systems.

Grading Basis: Letter Grade

ENVM 5003 (3) Ethics and Values in Environmental Leadership

Prepares students to be effective leaders within their organizations by introducing them to a wide range of value systems and examining links between these and effective leadership. Students will learn tools and approaches for effective analysis and presentation of value-based appeals and will learn through practical scenarios to identify and assess value-based analyses used by others.

Grading Basis: Letter Grade

ENVM 6001 (1) Capstone Innovation Lab 1

Providing hands-on, learning-by-doing experiences, while also providing client organizations with solutions to complex problems and useful products. Projects can take place in-residence with a client, when appropriate. Project ideas will be codeveloped by students and industry, government, or non-profit partners and will be guided and evaluated by a committee of ENVS faculty. Required for all MENV students.

Requisites: Restricted to Master of the Environment (MENV) graduate students only.

Grading Basis: Letter Grade

ENVM 6002 (1) Capstone Innovation Lab 2

Providing hands-on, learning-by-doing experiences, while also providing client organizations with solutions to complex problems and useful products. Projects can take place in-residence with a client, when appropriate. Project ideas will be codeveloped by students and industry, government, or non-profit partners and will be guided and evaluated by a committee of ENVS faculty. Required for all MENV students.

Requisites: Requires a prerequisite course of ENVM 6001 (minimum grade C). Restricted to Master of the Environment (MENV) graduate students only.

Grading Basis: Letter Grade

ENVM 6003 (6) Capstone Project

Providing hands-on, learning-by-doing experiences, while also providing client organizations with solutions to complex problems and useful products. Projects can take place in-residence with a client, when appropriate. Project ideas will be codeveloped by students and industry, government, or non-profit partners and will be guided and evaluated by a committee of ENVS faculty. Required for all MENV students.

Requisites: Requires a prerequisite course of ENVM 6002 (minimum grade C). Restricted to Master of the Environment (MENV) graduate students only.

Grading Basis: Letter Grade

ENVM 6004 (1) Capstone Innovation Lab 3

Providing hands-on, learning-by-doing experiences, while also providing client organizations with solutions to complex problems and useful products. Projects can take place in-residence with a client, when appropriate. Project ideas will be codeveloped by students and industry, government, or non-profit partners and will be guided and evaluated by a committee of ENVS faculty. Required for all MENV students.

Requisites: Requires a prerequisite course of ENVM 6003 (minimum grade C). Restricted to Master of the Environment (MENV) graduate students only.

Grading Basis: Letter Grade

Materials Science and Engineering (MSEN)

Courses

MSEN 5000 (1-3) Fundamentals of Materials Science and Engineering

Discusses fundamental topics in materials science and engineering.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MSEN 5370 (3) Materials Thermodynamics

Reviews thermodynamics fundamentals and applies them to understand the chemical, thermal and mechanical behavior of materials. Examines equations of state, solution theory, equilibrium diagrams and phase changes.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MSEN 5840 (1-6) Independent Study

Offers an opportunity for students to do independent work. Subject arranged to fit the needs of the student.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to MS and PhD students in the Materials Science and Engineering program (MTEN) only.

MSEN 5919 (1-5) Special Topics in MSE

Offers an opportunity for special topics in MSE. Subject arrangement to fit the needs of the program.

Repeatable: Repeatable for up to 10.00 total credit hours.

Requisites: Restricted to graduate students only.

MSEN 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to MS students in the Materials Science and Engineering program (MTEN) only.

MSEN 8990 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to PhD students in the Materials Science and Engineering program (MTEN) only.

Mathematics (MATH)

Courses

MATH 1005 (3) Introduction to College Mathematics

Introductory level mathematics course which presents a college level introduction to algebraic functions and their applications. Only offered through the Student Academic Service Center.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1011

Additional Information: MAPS Course: Mathematics

MATH 1011 (3) College Algebra

Covers simplifying algebraic expressions, factoring, linear and quadratic equations, inequalities, exponentials, logarithms, functions, graphs and systems of equations. Department enforced prerequisite: one year high school algebra.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1005

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MAPS Course: Mathematics

MATH 1012 (3) Quantitative Reasoning and Mathematical Skills

Promotes mathematical literacy among liberal arts students. Teaches basic mathematics, logic, and problem-solving skills in the context of higher level mathematics, science, technology, and/or society. This is not a traditional math class, but is designed to stimulate interest in and appreciation of mathematics and quantitative reasoning as valuable tools for comprehending the world in which we live.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1012

Additional Information: GT Pathways: GT-MA1 - Mathematics

Arts Sci Core Curr: Quant Reasn Mathmat Skills

MAPS Course: Mathematics

MATH 1021 (3) College Trigonometry

Covers trigonometric functions, identities, solutions of triangles, addition and multiple angle formulas, inverse and trigonometric functions and laws of sines and cosines. Department enforced prerequisite: MATH 1011 (minimum grade C-) or 1 1/2 years of high school algebra and 1 year of high school geometry.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1235 or MATH 1150

MATH 1071 (3) Finite Mathematics for Social Science and Business

Discusses systems of linear equations and introduces matrices, linear programming, and probability.

Requisites: Requires prerequisite course of MATH 1011 (minimum grade C-) or a score of 46% or greater on an ALEKS math exam taken in 2016 or earlier.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 1081 (3) Calculus for Social Science and Business

Covers differential and integral calculus of algebraic, logarithmic and exponential functions. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1300 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admission data and/or CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 1110 (3) Mathematics for Elementary Educators 1

Includes a study of problem solving techniques in mathematics and the structure of number systems. Department enforced prereq., one year of high school algebra and one year of geometry. Department enforced restriction: restricted to prospective elementary teachers. The combination MATH 1110 and 1120 is approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 1112 (4) Mathematical Analysis in Business

Gives students experience with mathematical problem solving in real business contexts. Students will work with data and spreadsheets to build and analyze mathematical models. Themes of the course include applying logical operators to model business rules, interpreting data and using tables and graphs, finding break-even and optimal points, and addressing uncertainty and forecasting

Equivalent - Duplicate Degree Credit Not Granted: MATH 1012

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 1120 (3) Mathematics for Elementary Educators 2

Topics include geometry, measurement, probability, and statistics.

Department enforced restriction: restricted to prospective elementary teachers. The combination MATH 1110 and 1120 is approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

Requisites: Requires prerequisite course of MATH 1110 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 1130 (3) Mathematics from the Visual Arts

Introduces mathematical concepts through the study of visual arts.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 1150 (4) Precalculus Mathematics

Develops techniques and concepts prerequisite to calculus through the study of trigonometric, exponential, logarithmic, polynomial and other functions. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1235 or MATH 1021

Requisites: Requires prerequisite course of MATH 1011 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework. Requires enrollment in corequisite course MATH 1151.

Additional Information: GT Pathways: GT-MA1 - Mathematics

Arts Sci Core Curr: Quant Reasn Mathmat Skills

MAPS Course: Mathematics

MATH 1151 (1) Precalculus Supplemental Lab

Provides students concurrently enrolled in MATH 1150 with supplemental instruction.

Requisites: Requires enrollment in corequisite course of MATH 1150.

Grading Basis: Letter Grade

MATH 1160 (3) Transition to Calculus (IBL): The Theory, Applications and Analysis of Functions

Examines the functions of calculus and how they can be used to model concrete problems and/or change. This is an intensive study of these functions through Inquiry-Based Learning. Each class will be designed so students will be actively engaged in learning the material in small groups. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Requisites: Requires an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

MATH 1212 (3) Data and Models

Engages students in statistical and algebraic problem solving through modeling data and real world questions taken from the social and life sciences. The course will emphasize these skills and the mathematical background needed for a university level statistics course.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1011

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1300 (5) Calculus 1

Topics include limits, derivatives of algebraic and transcendental functions, applications of the derivative, integration and applications of the definite integral. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 MATH 1081 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of MATH 1011 and MATH 1021 or MATH 1150 or MATH 1160 or APPM 1235 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1310 (5) Calculus, Systems, and Modeling

Calculus concepts are developed through the analysis and modeling of complex systems, ranging from gene networks and cells to populations and ecosystems. Fundamental concepts of probability and statistics are also developed through the lens of calculus. MATH 1300 is similar, but a greater emphasis is placed on relevance and applications in biology and other life sciences. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1330

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1330 (4) Calculus for Economics and the Social Sciences

A calculus course intended to meet the needs of social science and economics majors, including applications. Covers differential and integral calculus of algebraic, logarithmic and exponential functions and modeling. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310

Requisites: Requires a prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 2001 (3) Introduction to Discrete Mathematics

Introduces the ideas of rigor and proof through an examination of basic set theory, existential and universal quantifiers, elementary counting, discrete probability, and additional topics. Department enforced prerequisite: MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (minimum grade C-).

MATH 2130 (3) Introduction to Linear Algebra for Non-Mathematics Majors

Examines basic properties of systems of linear equations, vector spaces, inner products, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, eigenvectors and diagonalization. Intended for students who do not plan to major in Mathematics. Formerly MATH 3130.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2135 or APPM 3310

Requisites: Requires prerequisite course of MATH 2300 or APPM 1360 (minimum grade C-).

MATH 2135 (3) Introduction to Linear Algebra for Mathematics Majors

Examines basic properties of systems of linear equations, vector spaces, inner products, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, eigenvectors and diagonalization. Intended for students who plan to major in Mathematics. Formerly MATH 3135.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 or APPM 3310

Requisites: Requires a prerequisite course of MATH 2300 or APPM 1360 and MATH 2001 (all minimum grade C-).

MATH 2300 (5) Calculus 2

Continuation of MATH 1300. Topics include transcendental functions, methods of integration, polar coordinates, differential equations, improper integrals, infinite sequences and series, Taylor polynomials and Taylor series. Department enforced prerequisite: MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: APPM 1360

MATH 2380 (3) Mathematics for the Environment

An interdisciplinary course where environmental issues, such as climate change, global epidemics, pollution, population models and kinship relations of Australian Aborigines are studied with elementary mathematics (such as fuzzy logic). Similar techniques are applied to analyze other current events, such as surveillance, economic meltdowns, identity theft and media literacy. Department enforced prerequisite: proficiency in high school mathematics.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 2400 (5) Calculus 3

Continuation of MATH 2300. Topics include vectors, three-dimensional analytic geometry, partial differentiation and multiple integrals, and vector analysis. Department enforced prerequisite: MATH 2300 or APPM 1360 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: APPM 2350

MATH 2510 (3) Introduction to Statistics

Elementary statistical measures. Introduces statistical distributions, statistical inference, hypothesis testing and linear regression. Department enforced prerequisite: two years of high school algebra.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 1020

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills
MAPS Course: Mathematics

MATH 3001 (3) Analysis 1

Provides a rigorous treatment of the basic results from elementary Calculus. Topics include the topology of the real line, sequences of numbers, continuous functions, differentiable functions and the Riemann integral.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 or MATH 2135 (all minimum grade C-).

MATH 3110 (3) Introduction to Theory of Numbers

Studies the set of integers, focusing on divisibility, congruences, arithmetic functions, sums of squares, quadratic residues and reciprocity, and elementary results on distributions of primes.

Requisites: Requires prerequisite course of MATH 2001 (minimum grade C-).

MATH 3120 (3) Functions and Modeling

Engages the students in daily projects and occasional in-class labs designed to strengthen and expand knowledge of the topics in secondary mathematics, focusing especially on topics from algebra, precalculus and calculus. Projects and labs involve the use of multiple representations, transformations, data analysis techniques and interconnections among ideas from geometry, algebra, probability and calculus. Department enforced prereq., MATH 1300 or MATH 1310 or APPM 1350 (minimum grade C-).

Requisites: Requires prerequisite course of MATH 2001 (minimum grade C-).

MATH 3140 (3) Abstract Algebra 1

Studies basic properties of algebraic structures with a heavy emphasis on groups. Other topics, time permitting, may include rings and fields.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 3170 (3) Combinatorics 1

Covers basic methods and results in combinatorial theory. Includes enumeration methods, elementary properties of functions and relations, and graph theory. Emphasizes applications.

Requisites: Requires prerequisite course of MATH 2001 (minimum grade C-).

MATH 3210 (3) Euclidean and Non-Euclidean Geometry

Axiomatic systems; Euclid's presentation of the elements of geometry; Hilbert's axioms; neutral, Euclidean and non-Euclidean geometries and their models.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 3430 (3) Ordinary Differential Equations

Involves an elementary systematic introduction to first-order scalar differential equations, nth order linear differential equations, and n-dimensional linear systems of first-order differential equations. Additional topics are chosen from equations with regular singular points, Laplace transforms, phase plane techniques, basic existence and uniqueness and numerical solutions. Formerly MATH 4430.

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) or APPM 3310 (all minimum grade C-).

MATH 3450 (3) Introduction to Complex Variables

Theory of functions of one complex variable, including integrals, power series, residues, conformal mapping, and special functions. Formerly MATH 4450.

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 (minimum grade C-).

MATH 3510 (3) Introduction to Probability and Statistics

Introduces the basic notions of Probability: random variables, expectation, conditioning, and the standard distributions (Binomial, Poisson, Exponential, Normal). This course also covers the Law of Large Numbers and Central Limit Theorem as they apply to statistical questions: sampling from a random distribution, estimation, and hypothesis testing.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2510 or MATH 4510

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2300 or APPM 1360 (all minimum grade C-).

MATH 3850 (1) Seminar in Guided Mathematics Instruction

Provides learning assistants with an opportunity to analyze assessment data for formative purposes and develop instructional plans as a result of these analyses. These formative assessment analyses will build on the literature in the learning sciences. Students gain direct experiences interacting with the tools of the trade, especially with actual assessment data and models of instruction. Restricted to learning assistants in Math.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a corequisite course of EDUC 4610.

Grading Basis: Pass/Fail

MATH 4000 (3) Foundations of Mathematics

Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5000

Requisites: Requires prerequisite courses of MATH 2001 and MATH 3001 or MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) or MATH 3140 or MATH 3210 (all minimum grade C-).

MATH 4001 (3) Analysis 2

Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).

Equivalent - Duplicate Degree Credit Not Granted: MATH 5001

Requisites: Requires prerequisite courses of MATH 3001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 4120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation, and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5120 and APPM 4120 and APPM 5120

Requisites: Requires prerequisite course of MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) or APPM 3310 (minimum grade C-).

MATH 4140 (3) Abstract Algebra 2

Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5140

Requisites: Requires prerequisite course of MATH 3140 (minimum grade C-).

MATH 4200 (3) Introduction to Topology

Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5200

Requisites: Requires prerequisite course of MATH 3001 (minimum grade C-).

MATH 4230 (3) Differential Geometry of Curves and Surfaces

Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5230

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) and MATH 2001 (all minimum grade C-).

MATH 4240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics

Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5240

Requisites: Requires prerequisite courses of MATH 3001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 4330 (3) Fourier Analysis

The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5330

Requisites: Requires prerequisite course of MATH 3001 (minimum grade C-).

MATH 4440 (3) Mathematics of Coding and Cryptography

Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5440

Requisites: Requires prerequisite course of MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (minimum grade C-).

MATH 4470 (3) Partial Differential Equations

Studies initial, boundary, and eigenvalue problems for the wave, heat, and potential equations. Solution by separation of variables, Green's function, and variational methods.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5470

Requisites: Requires prerequisite courses of MATH 3430 (minimum grade C-).

MATH 4510 (3) Introduction to Probability Theory

Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 3570 or ECEN 3810 or MATH 3510 MATH 5510

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 4520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5520 and APPM 4520 and APPM 5520

Requisites: Requires prerequisite course of MATH 4510 or APPM 3570 (minimum grade C-).

MATH 4540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models, modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5540 and APPM 4540 and APPM 5540

Requisites: Requires prerequisite course of MATH 4520 or APPM 4520 (minimum grade C-).

MATH 4650 (3) Intermediate Numerical Analysis 1

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced restriction: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4650

Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

MATH 4660 (3) Intermediate Numerical Analysis 2

Continuation of MATH 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4660

Requisites: Requires prerequisite course of MATH 4650 (minimum grade C-).

MATH 4730 (3) Set Theory

Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5730

Requisites: Prereq. courses of MATH 2001 and one of the following: MATH 3001, 3110, 3120, 3140, 3170, 3210, 3430, 3450, 3510, 3850, 4000, 4001, 4120, 4140, 4200, 4230, 4330, 4440, 4510, 4520, 4540, 4650, 4660 or 4820 (all min grade C-).

MATH 4805 (1) Mathematical Teacher Training: Inclusive Pedagogy

Designed to train students to teach mathematics in an inclusive, multicultural environment. Students teach a math course within the McNeill Academic Program (Student Academic Services Center) meeting weekly with faculty and colleagues to learn to re-design curriculum, fine-tune pedagogical practices, create assessments, mentor undergraduate instructor assistants and create an inclusive classroom environment. Department enforced restriction: experience with college-level instruction.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

MATH 4810 (1-3) Special Topics in Mathematics
