HUMN 3092 (3) Studies in Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3093 (3) Topics in Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3104 (3) Film Criticism and Theory

Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3104

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

HUMN 3200 (3) Fictions of Illness: Modern Medicine and the Literary Imagination

Examines the ways in which the rise of modern medicine fueled the literary imagination with a new focus, new patterns of perception and potent metaphors. Through a study of various works of fiction, critical theory and medical history, the course traces how medical discoveries and the increasing professionalization of medicine manifested itself in modern literature.

Requisites: Requires a prerequisite course of HUMN 2000 (minimum grade C-) or restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

HUMN 3210 (3) Narrative

Explores the nature of sacred and secular narrative in literature, film, and the visual arts.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3211 (3) The Craft of Mystery

Explores examples of and theories about the formation and growth of the genre of detective fiction, especially in the late 19th and early 20th centuries. Explores the social conditions of the times in which the texts were written and the possible resulting influences on style. Compares the texts and theories to examples from other genres and time periods.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3212 (3) Shipwrecks, Mutinies, and Other Catastrophes at Sea

Explores the theatrical analogy that frames our understanding of catastrophes at sea and their literary and visual representation, paying particular attention to issues of gender, race, and sexuality, which are intentionally banned from such representations, but turn out to be their secret focus.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3240 (3) Tragedy

Studies some of the great tragic works of art, music, and literature from the Greeks to the 20th century. Tragic theory is invoked as an aid to interpretation.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3290 (3) Foundations of Disability Studies

Introduces students to the interdisciplinary field of disability studies by investigating key concepts in disability theory, disability history and culture, media representations of people with disabilities, and pertinent bioethical issues.

HUMN 3310 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3310 and JWST 3310

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 3321 (3) Culture and Literature of Ancient China

Focuses on the religious, cultural, philosophical, and literary aspects of ancient Chinese civilization (1500 B.C.-A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 3321

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Departmental Category: Asia Content

HUMN 3341 (3) Literature and Popular Culture in Modern China

Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 3341

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Asia Content

HUMN 3500 (3) Literatures of Consciousness

Facilitates a complex and productive understanding of consciousness by analyzing and synthesizing interdisciplinary works (including literature, film and theoretical and scientific texts). This interdisciplinary approach enables students to think deeply about the following questions: what is consciousness? How do we think and perceive? What does it mean to be "neurotypical"? What does all of this have to do with who we are?

Requisites: Requires a prerequisite course of HUMN 2000 (minimum grade C-) or restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 3505 (3) The Enlightenment: Tolerance and Emancipation

Examines Enlightenment notions of reason, humanity and social progress. Topics include 18th century views on government, science, education, religion, slavery and gender roles.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3505

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 3640 (3) Modernisms: Art and Theory from 1900 to 1960

Offers an introduction to Modernism in various media, emphasizing in particular the historical development of the visual arts from German Expressionism and Cubism to Neo-Dada and Pop Art. Readings in literature will include Proust, Beckett, Blanchot and poets associated with various art movements. Theoretical readings range from Saussure and Freud to Adorno and Jameson. Recommend prerequisite: HUMN 2000.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 3660 (3) The Postmodern

Analyzes the cultural and critical practices as well as the thought that defines the postmodern period at the end of 20th century.

Equivalent - Duplicate Degree Credit Not Granted: FILM 3660

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 3702 (3) Dada and Surrealist Literature

Surveys the major theoretical concepts and literary genres of the Dada and Surrealist movements. Topics include Dada performance and cabaret, the manifesto, montage, the ready made, the Surrealist novel, colonialism and the avant-garde, and literary and philosophical precursors to the avant-garde.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3702

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 3802 (3) Politics and Culture in Berlin 1900-1933

Examines early 20th century German culture, with emphasis on the Weimar Republic (1918-1933) in light of contemporaneous political discussions. The course presents modern art and literature (Expressionism, Dada, Brecht's epic theater) and architecture and design (Bauhaus, Werkbund) as well as political movements of women, sexual minorities, and Berlin's Jewish communities. Taught in English. Offered through CU Study Abroad Program.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3802

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 3811 (3) Love, Death, and Desire: Classical Japanese Literature in Translation

Surveys the major works and authors of classical Japanese literature, both poetry and prose, from the earliest historical records and literary anthologies through the Heian period (784-1185). Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3811

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Asia Content

HUMN 3841 (3) Tradition and Transgression: Modern Japanese Literature in Translation

Surveys the major works, authors and genres of literature from the late Meiji period and 20th century in their historical and cultural contexts. Attention is given to various approaches of literary analysis and interpretation. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3841

Recommended: Prerequisite JPNS 1051.

Additional Information: Departmental Category: Asia Content

HUMN 3850 (3) The Mediterranean Religion Before Modernity

Offers an innovative approach to the multifaceted history of Christian-Muslim-Jewish interaction in the Mediterranean. It eschews established paradigms (e.g., Europe, Islamic world) that distort our understanding of these and pushes students to reconsider the accepted paradigms of Western history. Students will reappraise assumptions regarding the nature of ethnic, religious, national and cultural identity, and their role in human history.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3850

Additional Information: Arts Sci Core Curr: Historical Context

HUMN 3860 (3) Politics and the Arts in the Information Age

Examines the political aspects of the art and literature of the information age, with a focus on conceptual practices since 1965. The course investigates political theories of art along side sculpture, performance, installation, poetry, and graphic design.

Recommended: Requisite HUMN 2000 or restricted to students with 57-180 credits (Junior or Senior).

HUMN 3930 (1-6) Humanities Internship

Students gain academic credit and professional experience working in museums, galleries, arts administration, and publishing. They work 3-18 hours per week with their professional supervisor and meet regularly with a faculty advisor who determines the reading and writing requirements. An interview with faculty advisor is required.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 3935 (1-3) Humanities Internship: Literature and Social Violence

See HUMN 4835.

Requisites: Requires enrollment in corequisite course of HUMN 4835.

HUMN 4000 (3) The Question of Romanticism

Interdisciplinary study of literature, art, and music from 1780 to 1830 in France, England, and Germany.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topics, establishing critical dialogue with the primary materials.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4004 and ARTF 5004

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of FILM 3051 (minimum grade D-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Film (FILM or FMST) or Humanities (HUMN) majors only.

HUMN 4010 (3) Hitchcock and Freud

Applies Freudian psychoanalysis to the films of Alfred Hitchcock. Students will familiarize themselves with the Freudian methodology by reading a number of books and essays and then apply both Freud's general ideas as well as specific texts to particular aspects, both formal and contentual, of his films. Particular attention will be given to the important field of "feminism and psychoanalysis" as it relates to the study of the role of women in Hitchcock's films.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 4011 (3) The Criminal-Hero

Studies various theories of literary transgression by Aristotle, Nietzsche, Freud, Bataille and others to understand the many works, beginning with Genesis and the Iliad and including contemporary works such as Norman Mailer's *The Executioners Song* and the films of Herzog (*Aguirre, Nosferatu*) and Scorsese (*Taxi Driver, Cape Fear*) which feature this paradoxical figure.

HUMN 4020 (3) Reading, Chance, and Guessing

Considers the method of the humanities as opposed to those of the natural and social sciences, especially in view of their respective ability or claim to predict the future and to master chance.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4030 (3) The Art of Travel

Examines the art of travel: not where to go and what to do, but rather philosophical concepts about why people travel. Areas of discussion will include exploration, discovery, escape, pilgrimage, the grand tour, expatriotism, exile, nomadism, armchair travel, and the sense of home. Materials will include books by travel writers, novels, films, essays, short stories, art, music, and historical documents.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4050 (3) Representations of People with Disabilities

Examines the representation of people with disabilities in canonical and contemporary literature and drama, and introduces students to disability theory and the history of people with disabilities.

HUMN 4060 (3) Modern Critical Theory

Explores, through guided discussions, the concept of theory itself and how a theory is constructed. Emphasizes the close reading of theory in order to learn to analyze critically, considering theory as something to be thought about rather than simply applied.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4082 (3) 19th Century Art and Literature

Interdisciplinary study of English fiction and poetry together with related movements in visual arts.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4092 (3) Advanced Studies in the Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4093 (3) Advanced Topics in the Humanities

Students should check with the department for specific semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4100 (3) Writing the World in Traditional China

Examines the history and implications of the central role played by writing in pre-modern China, especially with regard to traditional constructions of the world, including relations with aesthetics, the non-human, and the spiritual. Key works of Chinese literature and thought from different periods are studied, with the aim of determining a particular type of Chinese humanism. All readings in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Asia Content

HUMN 4110 (3) Greek and Roman Epic

Students read in English translation the major epics of Greco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and CLAS 5110

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4111 (3) Modern and Contemporary Culture

Examines the legacy of the historical avant-garde (1910-1930) in postwar and contemporary culture: 1945 to the present. We will study the construction of a "neo-avant-garde" in diverse fields (art, film, philosophy) as well as the methodology of "social art history" which, like the artistic neo-avant-garde, critically analyzes the relation between aesthetic production and global capitalism.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Grading Basis: Letter Grade

HUMN 4120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and CLAS 5120

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and CLAS 5130

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4131 (3) The Greek and Roman Novel

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and CLAS 5140

HUMN 4135 (3) Art and Psychoanalysis

Explores psychoanalytic theory as it relates to our understanding of literature, film and other arts. After becoming familiar with some essential Freudian notions (repression, narcissism, ego/libido, dreamwork, etc.), students apply these ideas to works by several artists (e.g., Flaubert, James, Kafka, Hoffmann and Hitchcock).

Equivalent - Duplicate Degree Credit Not Granted: FILM 4135

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4140 (3) The Age of Dante: Readings from The Divine Comedy

Focuses on close reading of Dante's poetry with emphasis on the intellectual, religious, political, and scientific background of the medieval world. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4140 or 4145 or ITAL 4147

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4150 (3) Boccaccio's Decameron: Tales of Sex and Death in the Middle Ages

Studies Boccaccio's masterpiece, the Decameron, as emblematic of the post-Black Plague era in the late Middle Ages. Focuses on the art of storytelling through gendered perspectives to portray the complexity of the Middle Ages. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4150

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Literature and the Arts

HUMN 4155 (3) Philosophy, Art, and the Sublime

Explores philosophies of art, theories of the sublime, and the relation between art and morality through philosophy, literature, and the visual arts. Includes works by Plato, Longinus, Burke, Rousseau, Kant, Mary Shelley, Melville, Friedrich, Turner, and Pollock.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 4170 (3) Fiction and Reality: Literature, Science, and Culture

Explores the significance of how one defines "fiction" and "reality". Begins by defining the core concepts and compares them with related terms.

Lectures and discussions analyze the implications of these concepts from the perspective of a variety of disciplines and in the context of diverse issues in order to develop a critical awareness of them. Reading and writing intensive.

Recommended: Requisite HUMN 2000 and restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4502 (3) Nietzsche: Literature and Values

Emphasis is placed on Nietzsche's major writings spanning the years 1872-1888, with particular attention to the critique of Western values. A systematic exploration of doctrines, concepts and ideas leading to the values of creativity.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4502

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

HUMN 4504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4504 and GRMN 5504

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4552 and ETHN 5552

Requisites: Requires prerequisite course of ETHN 1022 or ETHN 2001 or ETHN 3212 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

HUMN 4555 (3) Interpreting Art

Introduces various methods of interpretation (New Criticism; Reader Response; structuralism, post-structuralism, psychoanalysis, art history, etc.) with which to examine how one determines the meaning of the work of art. Methodologies are studied in close conjunction with particular poems, paintings, stories and films.

Requisites: Requires either prerequisite course of HUMN 2000 (minimum grade D-) or restricted to students with 57-180 credits (Junior or Senior).

HUMN 4650 (3) Religion, Power, Modernity

Examines the representation of religion in relationship to the claims made by modern narratives of power in fables, literature, graphic novels, visual materials and critical writings.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

HUMN 4730 (3) Italian Feminisms: Culture, Theory, and Narratives of Difference

Studies Italian women writers, artists and filmmakers. Literary and visual texts are analyzed in dialogue with readings of leading Italian gender theorists. Italian history and culture is reread by following the development of a discourse about women. Taught in English; readings in Italian for Italian majors.

Equivalent - Duplicate Degree Credit Not Granted: ITAL 4730

Additional Information: Arts Sci Core Curr: Human Diversity

HUMN 4811 (3) 19th Century Russian Literature

Surveys background of Russian literature from 1800 to 1900. Russian writers and literary problems in the 19th century emphasizing major authors: Pushkin, Lermontov, Gogol, Dostoevsky, Turgenev, Tolstoy, and Chekhov.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4811

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4821 (3) 20th Century Russian Literature and Art

Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4821

Additional Information: Arts Sci Core Curr: Literature and the Arts

HUMN 4835 (3) Literature and Social Violence

Provides a theoretical understanding of heightened awareness arising from literary and sociological investigations of contemporary sources of social violence (gang culture, racism, domestic violence), combined with the concrete knowledge offered by an internship in a social service agency. Optional internship credit is available.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Contemporary Societies

HUMN 4840 (1-3) Independent Study

May be repeated for a maximum of 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

HUMN 4845 (3) Reading Culture: The Meanings We Make

Analyzes a range of literary and cultural texts through the lens of critical theory in order to come to more understanding of how we are making meaning, how those meanings make us and how we might use that awareness to open new fields of possibility, both in our readings of texts and in our reactions to cultural contexts and conventions.

Grading Basis: Letter Grade

HUMN 4950 (1-6) Honors Thesis

Supervised project on a topic of the student's own choosing. It should demonstrate ability in interdisciplinary (such as literature and art, art and music, film and literature, literature and theory), extensive research, critical thinking, and excellent writing skills. The thesis is submitted to the Honors Program of the College of Arts and Sciences and is orally defended.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Humanities (HUMN) majors only.

Humanities - Bachelor of Arts (BA)

The humanities major is an interdisciplinary program designed for students who wish to concentrate in more than one field or discipline. The major leads to a Bachelor of Arts (BA) degree and offers considerable flexibility, but courses should be chosen in consultation with your primary advisor. Areas of concentration include a humanities-related discipline or a single language and its literature. Students interested in preparing for graduate work in comparative literature or other areas requiring extensive language training may want to select the language track option.

Requirements

A minimum of 60 credit hours is required for the major.

Required Courses and Credit Hours

Required Courses

HUMN 1110 & HUMN 1120	Introduction to Humanities: Literature 1 and Introduction to Humanities: Literature 2	6
HUMN 1210 & HUMN 1220	Introduction to Humanities: Art and Music 1 and Introduction to Humanities: Art and Music 2	6
HUMN 2000	Methods and Approaches to the Humanities	3
Upper-division HUMN courses		15

Area of Concentration

Select one of the following: ¹ 18

A single language/literature (English or a foreign language, ancient or modern; first-year language courses may not be counted)

A field related to the humanities, such as history, art history, anthropology, etc.

Secondary Field

Select from one other humanities-related discipline such as fine arts, 12 music, dance, theatre, film, philosophy, foreign language literature (first-year language courses may not be counted), or other discipline ²

Total Credit Hours 60

¹ At least 12 of these 18 credit hours must be taken at the upper-division level.

² There is no upper-division requirement for this area of concentration.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. Because the humanities major is unique in requiring courses from a number of different departments in addition to its own courses, it is imperative that students wishing to graduate in four years declare the major early and meet regularly with a major advisor. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in humanities, students should meet the following requirements:

- Complete the lower-division sequences HUMN 1110–HUMN 1120 and HUMN 1220–HUMN 1220 by the end of the fourth semester.
- Complete at least two lower-division courses in the secondary field and/or area of concentration by the end of the fourth semester.
- Complete 15 of the remaining 42 credit hours at the upper-division level by the end of the sixth semester—at least two of these must be upper-division humanities courses.
- Complete all remaining required courses (no more than 27 credit hours) by the end of the eighth semester.

Humanities - Minor

The depth of critical analysis as well as the breadth of knowledge covered by the humanities program's courses can be a great benefit to students pursuing a variety of other majors in the College of Arts and Sciences, in the Professional Schools and particularly students pursuing a pre-medical or pre-law school program of study. This minor provides students with the kinds of skills and interests that enhance employment opportunities as well as applications to graduate school.

Humanities program courses are designed to train students to understand and analyze critical, historical, social, political and critical issues from different perspectives and to teach students to draw independent conclusions. Our courses also help develop excellent written and verbal communication skills—recognized by the business and scientific worlds as indicators of future innovators as well as indicators of high quality practitioners and researchers across many different fields (media, communications, arts, creative design, marketing, etc.).

Requirements

The minor in humanities offers students the opportunity to take a range of interdisciplinary courses offered by the humanities program faculty. Total: 18 credit hours (9 upper-division).

Integrative Physiology

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs and systems. Our multidisciplinary curriculum requires students to take foundational courses in anatomy, biochemistry, mathematics, physics, physiology and statistics. With this basic knowledge, students can undertake a flexible curriculum that includes the study of biomechanics, cell physiology, endocrinology, immunology, exercise physiology and neurophysiology. The department also encourages student participation in research.

Students completing a degree in integrative physiology are expected to acquire the ability and skills to:

- read, evaluate and synthesize information from the research literature on integrative physiology;
- observe living organisms and be able to understand the physiological principles underlying function;
- be able to interpret movement and performance data from laboratory measurements; and
- communicate the outcome of an investigation and its contribution to the body of knowledge on integrative physiology.

These goals are achieved by providing a curriculum that comprises required courses and elective experiences. The required courses establish the foundation of knowledge for the discipline, whereas the elective courses provide opportunities to extend this knowledge on selected topics. The elective courses include seminars, independent study and research projects on such topics as aging, applied biomechanics, applied exercise science, behavioral neuroendocrinology, epidemiology, genetics of substance abuse, integrative physiology of aging, integrative vascular biology, locomotion, molecular biology of neurodegeneration, molecular neurogenetics, molecular signaling of neurological disorders, motor behavior, neuromechanics, neurophysiology of movement, reproductive endocrinology, sleep and chronobiology, sleep and development and stress physiology.

For more information, visit the Integrative Physiology (<http://www.colorado.edu/intphys>) website.

Course code for this program is IPHY.

Bachelor's Degree

- Integrative Physiology - Bachelor of Arts (BA) (p. 395)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

IPHY 1950 (3) Introduction to Scientific Writing in Integrative Physiology

Provides an overview of writing skills and strategies, emphasizing those most important to the sciences, especially physiology. Focuses on fundamental skills, objective analysis, and scientific persuasion, with attention to clear organization and style, academic and scientific mechanics, and distinctions between audiences.

Requisites: Restricted to students with 0-86 credits (Freshmen, Sophomore or Juniors) only.

Additional Information: Arts Sci Core Curr. Written Communication MAPS Course: English

IPHY 2010 (1-3) Seminar in Integrative Physiology

Introduces a small group of lower-division students to current research topics in integrative physiology. Emphasizes relevant applications to real-world situations.

Repeatable: Repeatable for up to 6.00 total credit hours.

IPHY 2400 (2) Introduction to Medical Terminology for Future Health Professionals

Provides an introduction to medical terminology used within the health professions. Word roots, prefixes and suffixes used in medical records for major body systems will be examined and explained. The structure and functions of the major systems will be defined and described. Recommended for IPHY students and students interested in pursuing a career in the health professions. No prerequisites required.

Grading Basis: Letter Grade

IPHY 2420 (3) Nutrition for Health and Performance

Focuses on the basic anatomy, physiology, and chemistry of nutrition. Topics include weight management, the role of diet and lifestyle in disease prevention, specific nutrient deficiencies and toxicities, nutrition standards and guidelines, sports nutrition recommendations, agricultural practices, and food policy issues. IPHY juniors or seniors are excluded from taking this course.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 3400

Requisites: Restricted to non-IPHY majors or IPHY freshmen/sophomores (students with 0-56 credits) only.

Additional Information: Arts Sci Core Curr. Natural Science Non-Sequence

IPHY 2500 (1) Perspectives in Health and Medicine

Designed to increase awareness of issues that surround international and U.S. health care. Provides broad overview of topics relevant to 21st century medical practice. Includes guest lectures by faculty and practitioners from Denver Metro region, followed by opportunities to integrate new concepts using small group discussion and writing. Topics change each semester and may include: global development and health; socio-cultural issues in health care; health disparities; applied bioethics; health care system reform; narrative medicine.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Pass/Fail

IPHY 2750 (3) Introduction to Exercise Psychology

Focuses on how psychological factors influence exercise and motor performance in both clinical and sport settings. Major topics include motivation, arousal, stress, imagery, self-confidence, concentration and burnout. Principles of psychological skills training are also discussed.

IPHY 2800 (4) Introduction to Statistics

Examines the application of statistics to research relevant to integrative physiology. Includes instruction and hands-on experience with related computer programs and interpretation of the results of their use.

Requisites: Restricted to Integrative Physiology (IPHY) majors only.

Recommended: Prerequisite MATH 1300.

IPHY 2910 (1-6) Practicum in Integrative Physiology

Offers practical experience in organized situations with direct supervision.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

IPHY 3010 (1-2) Teaching in Integrative Physiology

Provides an opportunity to assist in teaching specific laboratory sections in IPHY under direct faculty supervision. Students must make arrangements with the faculty member responsible for the course in which they plan to assist.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

IPHY 3060 (4) Cell Physiology

Lect. and lab. Introduces the biology of eukaryotic systems at molecular, cellular and systems levels of integration, emphasizing the complementarities of structure and function and physiological mechanisms of regulation at the cellular and molecular level. Department enforced prerequisite: one year of general biology (lecture + lab).

Requisites: Requires prerequisite course of IPHY 3430 or IPHY 3470 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

IPHY 3400 (3) Nutrition for IPHY Majors

Focuses on the science of nutrition, reviewing the basic anatomy, physiology and chemistry of nutrition. Concepts will focus on what the body needs for proper nutrition, how they are obtained, absorbed and processed by the body. Studies will expand to include the following: diet types, nutrition during life stages (i.e. pregnancy), different disease states and real world applications.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 2420

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

Recommended: Prerequisite IPHY 3410.

Grading Basis: Letter Grade

IPHY 3410 (3) Introduction to Human Anatomy

Introduces the basics of human anatomy. Department enforced prerequisite: one year of general biology (lecture + lab).

IPHY 3415 (2) Human Anatomy Laboratory

Introduces structures of the human anatomical systems using human cadavers and animal tissue. This laboratory is meant to complement IPHY 3410. Department enforced prerequisites: one year of general biology (lecture + lab) and corequisite: IPHY 3410.

IPHY 3430 (3) Introduction to Human Physiology

Introduces the physiology of the nervous, muscular, cardiovascular, respiratory, urinary, immune, endocrine, digestive and reproductive systems. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 3321 and CHEM 3451 (all minimum grade C-). Restricted to non-Integrative Physiology (IPHY) majors only.

Recommended: Prerequisites IPHY 3410 and IPHY 3415.

IPHY 3435 (2) Physiology Lab

Introduces laboratory experience in selected aspects of human and comparative physiology for students in pharmacy and allied health programs. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 2800 (or equivalent); IPHY 3410, IPHY 3415 and IPHY 3430 (prerequisites for majors; recommended courses for non-majors); IPHY 3430 (non-majors only).

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-).

Recommended: Corequisite IPHY 3480 (majors only).

IPHY 3440 (3) Clinical Nutrition

Exploration of clinical nutrition concepts from a health care provider perspective. Examines how and why diseases develop and what nutritional therapy and intervention is appropriate for disease resolution.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

Recommended: Prerequisite IPHY 2420.

IPHY 3450 (3) Comparative Animal Physiology

Introduces principles of animal physiology and responses to environmental change. Involves animals and/or animal tissues. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

IPHY 3460 (5) Comparative Vertebrate Anatomy

Introduces major components of the vertebrate body and how they are organized into a whole organism, emphasizing function, evolution, and diversity of these basic features. Laboratories involve dissection of representative groups and demonstrations. Involves animals and/or animal tissues. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

IPHY 3470 (3) Human Physiology 1

Focuses on scientific thinking, cell physiology, neurophysiology, endocrinology, immunology and musculoskeletal physiology. First semester of a two-semester sequence for IPHY and NRSC majors only. Department enforced prerequisites: IPHY 3410 and one year of general biology (lecture and lab) and one year of general chemistry (lecture and lab).

Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 3321 and CHEM 3451 (all minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

IPHY 3480 (3) Human Physiology 2

Focuses on the physiology of the respiratory, cardiovascular, urinary, digestive and reproductive systems. The second semester of a two-semester sequence for IPHY and NRSC majors. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3410 and 3415.

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

Recommended: Corequisite IPHY 3435.

IPHY 3490 (3) Introduction to Epidemiology

Examines the history and uses of epidemiology, measures of disease frequency and occurrence, association and causality, analytic epidemiology, evidence-based screening and outbreak investigations.

Recommended: Prerequisites IPHY 2800 and SOCY 2061 and PSYC 3101.

IPHY 3500 (2) Applied Clinical Research

Introduces fundamental concepts of clinical research to those interested in pursuing a career in medicine or medical research. In addition to lectures introducing students to research design, errors in research and basic biostatistics, there will be significant emphasis on participation in on-going medical research at Denver Health Medical Center and The Children's Hospital. This unique experience will provide students with first-hand exposure to all aspects of clinical research. Department enforced prerequisites: one year of general biology (lecture + lab).

Recommended: Prerequisite CHEM 3111 and premedical focus and/or previous research experience.

IPHY 3580 (3) Sleep, Circadian Rhythms and Health

Examines the history of sleep and circadian rhythms; lifespan development of sleep and rhythms; observational, physiological and clinical measures of sleep; screening for sleep and circadian disorders; associations between poor sleep and circadian misalignment and health; and evidence-based sleep and circadian interventions/preventions in healthy and clinical samples. Department enforced prerequisites: one year general biology plus labs, and one semester of statistics.

IPHY 3660 (3) Dynamics of Motor Learning

Focuses on information processing approaches and dynamical systems theory as explanations for human motor learning and the coordination of movement. Various topics are discussed from both perspectives including practice organization, attainment of elite performance, and the production of novel movements.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

IPHY 3700 (3) Scientific Writing in Integrative Physiology

Takes a process-based approach to writing. Assignments and classroom experiences emphasize critical thinking, using scientific evidence and reasoning to construct original arguments, and applying conventions and problem-solving skills to craft successful documents. Department enforced prerequisite: IPHY 2800 or equivalent.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Additional Information: Arts Sci Core Curr: Written Communication

IPHY 3800 (3) Forensic Biology

Introduces basic concepts of modern forensic science with emphasis on biological aspects such as forensic entomology, forensic botany, hair analysis, forensic anthropology, and forensic DNA analysis. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

IPHY 3810 (1) Forensic Biology Laboratory

Introduces basic laboratory techniques and procedures of modern forensic science with emphasis on biological aspects such as forensic entomology, forensic botany, hair analysis, forensic anthropology and forensic DNA analysis. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Recommended: Corequisite IPHY 3800.

IPHY 4010 (1-3) Seminar in Integrative Physiology

Introduces a small group of students to current research topics in integrative physiology, evaluation of current research and discussion of critical issues. Department enforced prerequisite: IPHY 2800 or equivalent.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

IPHY 4200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5200

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

IPHY 4440 (4) Endocrinology

Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5440

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

IPHY 4470 (3) Biology of Human Reproduction

Anatomy and physiology of human reproduction, including gender determination, embryology, puberty, menstrual cycle, pregnancy, lactation, menopause, sexual behavior, sexual abnormalities and contraception. Open to nonmajors. Department enforced prerequisites: one year of general biology (lecture + lab).

Recommended: Prerequisites IPHY 3470 and IPHY 3480 (majors) or IPHY 3430 or (non-majors) or IPHY 4440.

IPHY 4480 (3) Comparative Reproduction

Focuses on comparative anatomy and physiology of reproductive system and the evolution of reproductive behavior in vertebrates and invertebrates. Topics include courtship, mating, fertilization, estrous and menstrual cycles and environmental control of seasonal reproduction. Department enforced prerequisite: one year of general biology (lecture + lab).

Recommended: Prerequisite IPHY 3480 (majors) or IPHY 3430 (non-majors).

IPHY 4490 (3) Case Studies in Public Health

Explores case studies in public health in how they have influenced our approach to disease outbreaks and disease resolution. Examines famous case studies in infectious disease, zoonoses and non-infectious diseases, including environmental and occupational exposure to see how they have changed our understanding of disease and responses by health and medical personnel. Examines special populations within public health, as well as discuss modern public health challenges.

Requisites: Requires prerequisite courses of IPHY 3490 (minimum grade D-).

Grading Basis: Letter Grade

IPHY 4540 (5) Biomechanics

Applies the principles of physics and physiology to the analysis of human movement. Quantitative analysis of the forces, torques, mechanical energy, power impulses and momentum associated with human movement. Mechanical properties of muscles, tendons, ligaments and bones. Department enforced prerequisites: PHYS 2010 or PHYS 1110 or IPHY 3410 and IPHY 2800.

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to Integrative Physiology (IPHY) or Neuroscience (NRSC) majors only.

Recommended: Prerequisites MATH 1300 or MATH 1310 or APPM 1350 and IPHY 3415.

IPHY 4580 (3) Sleep Physiology

Describes the physiology and neurobiology of sleep and impact of sleep, sleep deprivation, and sleep disorders on immune, endocrine, cardiovascular, respiratory, and neural systems, as well as examines changes in sleep across the life span. The integrative nature of sleep and circadian rhythms in normal

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-).

IPHY 4600 (3) Immunology

Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5600

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY), Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Recommended: Prerequisite IPHY 3060.

IPHY 4650 (5) Exercise Physiology

Examines physiological and biochemical adjustments that occur in the body with acute and chronic exercise. Topics center on physiological mechanisms pertaining to metabolic, cardiovascular, and hormonal alterations, the role of exercise in health and disease, soreness and fatigue, immune function, as well as exercise during varied environmental conditions. Department enforced prerequisites: IPHY 2800 or equivalent and IPHY 3480. Department enforced corequisite: IPHY 3410.

Requisites: Requires prerequisite course of IPHY 3470 and 3480 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

IPHY 4660 (3) Critical Thinking in Integrative Physiology

Covers specific integrative physiology topics in areas such as animal physiology, endothelial function, neurobiology, exercise immunology and exercise physiology. Department enforced prerequisite: 13-hours of IPHY coursework.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

IPHY 4680 (3) Critical Thinking in Exercise Physiology

Covers specific exercise physiology topics such as cellular cause of fatigue and muscle soreness, heart disease, regulation of blood flow, diabetes, aging, training adaptations, exercise at high altitude, ergogenic aids and excitation-contraction of muscle. Department enforced prerequisite: IPHY 4650.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree majors only.

IPHY 4720 (4) Neurophysiology

Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5720

Requisites: Requires prerequisite course of IPHY 3470 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree or Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

IPHY 4730 (3) Integrative Motor Control

Investigates human motor control by integrating concepts from exercise physiology, biomechanics, and sport psychology. Applications are made to clinical and educational exercise contexts.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5730

Recommended: Prerequisites IPHY 3410 and IPHY 3470.

IPHY 4740 (3) Theory of Motor Skill Learning

Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory, and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 5740

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IPHY 4850 (1) Honors Thesis Seminar

To be taken during the final academic year prior to graduation. Consists of a lecture component on Honors thesis writing and defense, as well as a seminar component where Honors candidates present their thesis research in a practice defense talk.

Recommended: Prerequisite IPHY 3700, minimum 3.3 GPA and a declared IPHY major and approval by departmental honors committee.

Grading Basis: Pass/Fail

IPHY 4860 (1-6) Independent Study: Undergraduate

Students may register for more than one section per term.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

IPHY 4870 (1-3) Honors Thesis

Department enforced prerequisites: IPHY 2800 and IPHY 3700.

Additional Information: Arts Sciences Honors Course

IPHY 4890 (3) Community-Based Primary Health Care

Introduces models of Community-Based Health Care (CBPHC), relevant research regarding the models and methods of implementation in rural low resource settings. This 3 week summer global seminar in Nicaragua also includes public health data collection in a rural area in conjunction with local health promoters. Provides students with practical skills in the implementation of CBPHC in rural low resource settings.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite GEOG 3692.

Grading Basis: Letter Grade

IPHY 4930 (1-6) Internship

Provides an opportunity for field/laboratory work in a variety of different settings. Consult with faculty for approval. Department enforced prerequisite: completion of at least two of the major core classes.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IPHY 4940 (1-6) Application for Clinical Internship

Provides an opportunity for clinical experience in a clinic or hospital setting with which the University has an established Affiliation Agreement. Consult with faculty for approval. Department enforced prerequisite: completion of two 3000-level courses.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Integrative Physiology - Bachelor of Arts (BA)

The integrative physiology program leads to a Bachelor of Arts (BA) degree. The program allows the student to learn the accumulated scientific knowledge about the human body and its responses to physical activity. IP students spend a significant portion of their freshman and sophomore years taking prerequisite course work in biology, chemistry, human anatomy and human physiology, physics and statistics.

In their junior and senior years, students take at least three of the six core courses: biomechanics, cell physiology, endocrinology, immunology, exercise physiology and neurophysiology. In addition, a number of elective courses are offered to complete the degree including independent study, internships and honors work with individual faculty members.

Because of its emphasis on the natural sciences, many students select integrative physiology as a premedical degree since it provides the type of course work required for advanced training in areas such as health, wellness and medicine.

The program provides students with the knowledge, skills and expertise required for advanced training in fields like physical therapy, medicine, osteopathic medicine, dentistry, exercise management, nursing and physiological sciences. A degree in IP also qualifies graduates for other career possibilities in cardiac rehabilitation, chiropractic, geriatrics, physical fitness programming (industrial and corporate) and further scientific training in graduate school.

International Bachelor of Arts

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in Integrative Physiology, in addition to completing all the current requirements for the BA with a major in Integrative Physiology at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Concurrent Degree Program BA/MS in Integrative Physiology

The Department of Integrative Physiology has developed a curriculum that results in simultaneously conferring BA and MS degrees following a five-year course of study. The program has been designed to provide qualified undergraduate students with an opportunity to enhance their knowledge base in the discipline, engage in research, increase their opportunities for employment and make their applications to medical/allied health professional schools more competitive. Candidates for the program are recruited from the undergraduate population of declared integrative physiology majors during the beginning of their junior year. All interested candidates must apply by the second semester of their junior year. To apply, students must have a minimum GPA of 3.30, one letter of recommendation and a faculty mentor. Approximately 3–5 of the applicants will be selected on a competitive basis to begin the program.

Once accepted into the program, a student must maintain a GPA of 3.00 in all course work undertaken. By the completion of their senior year, students must have completed the 116 undergraduate credit hours as outlined in the concurrent degree plan options. Continuing students must register for at least 5 graduate course credit hours per semester, beginning with the fall semester of their senior year. Students deciding to discontinue the program may do so at any time during their course of study. All credit hours completed toward the concurrent degree program will be counted toward the completion of the requirements for a BA degree in integrative physiology.

The curriculum for all students in the first year of the program is the same and is designed for students to complete their undergraduate requirements (116 credit hours) and 8 of their graduate credit hours. To complete the program in five years, students will be allowed to count 6 credit hours of their graduate work as electives for the undergraduate degree and 6 prespecified credit hours of undergraduate work toward the master's degree. See Integrative Physiology - Master of Science (MS) (p. 1024) for more information.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses below. Students must complete a minimum of 38 credit hours, 30 credit hours in courses with the IPHY subject area and 8 credit hours in a biology sequence including requisite labs.

A grade must be earned of C-, or better, for any course applied to the major.

Required Courses and Credit Hours

Required IPHY course work:

IPHY 2800	Introduction to Statistics	4
IPHY 3410 & IPHY 3415	Introduction to Human Anatomy and Human Anatomy Laboratory	5

IPHY 3470	Human Physiology 1	3
IPHY 3480	Human Physiology 2	3
IPHY 3435	Physiology Lab	2
Select three of the following (two of which must be taken at CU Boulder):		11-14
IPHY 3060	Cell Physiology	
IPHY 4440	Endocrinology	
IPHY 4540	Biomechanics	
IPHY 4600	Immunology	
IPHY 4650	Exercise Physiology	
IPHY 4720	Neurophysiology	
<i>IPHY elective course work:</i>		0-2
Required biology sequence:		
Select one of the following biology sequence options:		8
Option 1:		
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
EBIO 1220 & EBIO 1240	General Biology 2 and General Biology Laboratory 2	
Option 2:		
MCDB 1150 & MCDB 1151	Introduction to Cellular and Molecular Biology and Introduction to Cell and Molecular Biology Lab	
MCDB 2150 & MCDB 2151	Principles of Genetics and Principles of Genetics Laboratory	
Required Ancillary course work:		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5
PHYS 2010 & PHYS 2020	General Physics 1 and General Physics 2	10
Select one of the following calculus options:		4-5
MATH 1300	Calculus 1	
MATH 1310	Calculus, Systems, and Modeling	
APPM 1350	Calculus 1 for Engineers	
Total Credit Hours		60-66

The number of major elective credit hours needed to reach the 30 credit hour major requirement will vary based on what major courses are taken. Students cannot apply more than 45 major credit hours toward the degree. Contact department for current elective choices.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in integrative physiology, students should meet the following requirements:

- By the first semester, declare the major.
- Before the beginning of the fifth semester, complete the biology and chemistry requirements.
- By the end of the sixth semester, complete the anatomy and physiology requirements.

Students must consult with a major advisor to determine adequate progress toward completion of major requirements.

International Affairs

With the increasing importance of world issues to the United States, employment opportunities in government, international organizations and business continue to expand. Today there is an urgent need for college graduates with a strong background in international affairs. To meet this need, the University of Colorado offers a comprehensive and flexible interdisciplinary program in international affairs leading to the BA degree.

The undergraduate degree in international affairs emphasizes knowledge and awareness of:

- major political, economic, social and cultural problems facing the international community, including international economic relations, world population and resource utilization
- the international political system in the broadest global context, international organizations and alliances, and foreign political systems and processes
- ethical issues involved in international relations
- patterns of conflict and cooperation among nations and peoples
- chief historical factors that give rise to existing international institutions and processes
- problems and issues in United States foreign policy

In addition, students completing the degree in international affairs are expected to acquire the ability and skills to:

- analyze an international problem from a political, economic, historical and cultural perspective
- read, critically evaluate and synthesize information obtained from international affairs literature
- analyze international phenomena critically
- communicate, orally and in writing, findings to other students of international affairs and to a broader audience
- communicate in other cultural contexts through advanced foreign language study

Course code for this program is IAFS.

Bachelor's Degree

- International Affairs - Bachelor of Arts (BA) (p. 401)

Certificates

- Arctic Studies - Certificate (p. 399)
- European Union Studies - Certificate (p. 399)
- Global Environmental Affairs - Certificate (p. 400)
- International Media - Certificate (p. 403)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bearce, David H. (https://experts.colorado.edu/display/fisid_147837)
Professor; PhD, Ohio State University

Chester, Lucy P (https://experts.colorado.edu/display/fisid_126541)
Associate Professor; PhD, Yale University

PhD, University of Massachusetts at Amherst

Zhang, Shuang (https://experts.colorado.edu/display/fisid_151517)
Assistant Professor; PhD, Cornell University

IAFS 1000 (4) Global Issues and International Affairs

Introduces the student to the international affairs program. The course examines political and economic development in several countries in many different world regions. Examines historical trends and development as well as current political and economic issues.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame
Arts Sci Core Curr: Contemporary Societies
Departmental Category: Asia Content

IAFS 3000 (3) Special Topics in International Affairs

Junior or senior level umbrella seminar spanning a variety of topics relevant to the study of international affairs. Subjects addressed under this heading vary according to student interest and faculty availability.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) or Political Science (PSCI) majors only.

IAFS 3010 (3) Islam, Geopolitics and Society: Gender, Identity and Place

Examines Islam, geopolitics and society in various locations throughout the globe, such as Afghanistan, Egypt, France, Germany, India, Indonesia, Iran, Iraq, Ireland, Israel/Palestine, Morocco, Pakistan, Saudi Arabia, Turkey, Yemen, the UK and the US. Addresses issues of gender, identity and place to illustrate the complexity and diversity of social experiences within the milieu of Islam and geopolitics.

Grading Basis: Letter Grade

IAFS 3500 (3) French Connections: Contemporary France and America in Historical Context

Faculty-led Global Seminar, based in Bordeaux, France provides an opportunity to compare French history and contemporary culture, economy, and culture to that of the United States. Lectures in Boulder and Bordeaux are supplemented by interactions with officials, scholars, business leaders, interest groups, and organizations in France. Offered through Study Abroad.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4190

Additional Information: Arts Sci Core Curr: Historical Context

IAFS 3520 (6) Global Seminar: Justice, Human Rights and Democracy in Israel

Explore the challenges and complexities of justice, democracy and human rights in Israel and the West Bank through field trips, course work and service learning projects with Jerusalem based non-profit organizations. Acquire new knowledge and lived experience on critical issues facing Israelis and Palestinians with the wider scope of Middle East politics.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4302

Recommended: Prerequisites ANTH 4050 or JWST 4050 and IAFS 3600 or JWST 3600.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Asia Content

IAFS 3530 (3) Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

Spend two weeks in Istanbul and examine Jewish-Muslim relations in a place that was for 500 years the crossroads of civilization. The only Muslim city in the 21st century with a large, thriving Jewish community, Istanbul models how people from different social classes, ethnicities and religious backgrounds can coexist.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3530 and RLST 3530

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

IAFS 3600 (3) Contemporary Jewish Societies

Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3600 and GSLL 3600

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Human Diversity

IAFS 3610 (3) Topics in International Affairs and Jewish Studies

Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3610

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IAFS 3621 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present

Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4481 and RUSS 5481

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context

IAFS 3630 (3) Radical Nationalism in Contemporary Northern Europe

Examines the current rise of National Socialists, white supremacists, ethnic separatists, anti-Islam activists and social and cultural ultraconservatives in northern Europe. Treats extremist nationalism as a social, cultural, aesthetic, intellectual and political movement. Consults scholarship from sociology, criminology and political science, as well as music, literature, art and film.

Equivalent - Duplicate Degree Credit Not Granted: SCAN 3301

Additional Information: Arts Sci Core Curr: Ideals and Values

IAFS 3631 (3) Arctic Society and Culture

Investigates representations of the Arctic in literature, art, cinema, media and scientific, and geographical writing over the past century and a half, spanning material from North America, Britain, continental Europe and the Nordic region. Interpretive approaches include ecocriticism; post-colonialism; literary studies; indigenous studies; visual, film and media theory; Cold War studies.

Equivalent - Duplicate Degree Credit Not Granted: SCAN 3631

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

IAFS 3640 (3) Data Analysis for Global Environmental Affairs

Develops data analysis techniques for global environmental data including demographic, economic, agricultural, fisheries and energy sectors. Designed to support the development of basic and intermediate data analysis skills for students in the Global Environmental Affairs certificate program. Includes hands-on exploration of up-to-date global data sets from a variety of sources. Fulfills the application requirement for the ENVS major.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3640

Grading Basis: Letter Grade

IAFS 3650 (3) History of Arab-Israeli Conflict

Explores the origins and development of the Arab-Israeli conflict. Traces Arab-Jewish/Israeli relations from the 19th century through the Palestine Mandate, the evolution of Arab and Jewish nationalism and the creation of Israel to the present day.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3650

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) majors only.

Recommended: Prerequisite HIST 1308 or HIST 1828 or JWST 1828.

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Asia Content

IAFS 4500 (3) The Post-Cold War World

Capstone course for international affairs majors. Examines the ways in which the end of the Cold War, the collapse of failed states, and the rise of global terrorism changed the world. Studies how peoples, governments and nongovernmental organizations face new social, political, economic and security challenges in an era of globalization. Includes discussion, oral reports, critical book reviews, and research papers.

Requisites: Restricted to students with 87-180 credits (Senior)

International Affairs (IAFS) majors only.

IAFS 4800 (3) Honors Seminar in International Affairs

Directed research course tailored to the particular research interests of the students enrolled. Devoted to research methodology and the development of students' research. Department enforced prerequisite: overall 3.30 GPA and IAFS 3.40 GPA.

Additional Information: Arts Sciences Honors Course

IAFS 4810 (3) Honors in International Affairs

Continuation of IAFS 4800. Students complete original research begun in the fall and write, defend their honors thesis and meet regularly with the instructor.

Requisites: Requires prerequisite course of IAFS 4800 (minimum grade C-).

Additional Information: Arts Sciences Honors Course

IAFS 4900 (1-6) Independent Study in International Affairs

Provides an opportunity to earn academic credit for learning outside the formal class structure. Students interested in doing in-depth research propose a research project to a faculty sponsor and then work closely with that person to produce a piece of original research. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors), GPA of 3.00 or better, grade of C or better in all lower-division courses, and at least 6 upper-division courses.

Repeatable: Repeatable for up to 6.00 total credit hours.

IAFS 4930 (3-6) Internship in International Affairs

Working individually under the guidance of a public or private organization, students are assigned to projects selected for their academic suitability. Written assignments occur throughout the semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) International Affairs (IAFS) majors only.

Arctic Studies - Certificate

The International Affairs Program (IAFS) offers an interdisciplinary undergraduate certificate in arctic studies, in collaboration with the Program in Nordic Studies (SCAN), the Program in Russian Studies (RUSS), the Department of Geography (GEOG), the Department of Environmental Studies (ENVS), the Department of Anthropology (ANTH), the Department of Ethnic Studies (ETHN) and the research entities of the Cooperative Institute for Research in Environmental Sciences (CIRES), the National Snow and Ice Data Center (NSIDC) and the Institute of Arctic and Alpine Research (INSTAAR).

This certificate prepares students to address pressing environmental, political and cultural issues in the far north. A laboratory for studying the effects of global climate change, the arctic region spans three continents, with territories in Canada, Greenland (Denmark), Finland, Iceland, Norway, Sweden, Russia and the United States. Its population exhibits considerable ethnic, linguistic, and sociopolitical diversity, and contains numerous indigenous peoples. Issues as critical as nationalism, territorial rights and law, security, economic development and resource technology place the arctic at the center of global, regional and national interests. Further, the region's natural and social characteristics have inspired influential and enduring expressive culture—produced by locals and outsiders—from antiquity to the present.

These features make study of the arctic ideal for students pursuing careers in international politics and diplomacy, indigenous rights, environmental science and climate change, humanistic scholarship or creative work.

For more information, and to apply to the certificate in arctic studies, please contact Prof. Ben Teitelbaum (<http://www.colorado.edu/iafs/benjamin-teitelbaum>) at benjamin.teitelbaum@colorado.edu ([benjamin.teitelbaum@colorado.edu?subject=RE: Arctic Studies Certificate](mailto:benjamin.teitelbaum@colorado.edu?subject=RE:ArcticStudiesCertificate) (IAFS website)).

Requirements

The certificate is open to all CU undergraduates and requires the completion of six courses for a total of 18 credit hours.

Credit hours are distributed in three categories: (1) Certificate Core Courses, (2) Environment and Policy, and (3) Culture and Society. Students must complete all three courses in the core category and one course in each of the other two categories. They will then take one elective course, and only one 1000-level course is allowed. Nine of the 18 credits must be upper-division.

Up to three credits of approved study abroad experience may be applied to either the Environment and Policy or Culture and Society categories.

Required Courses and Semester Credit Hours

Required Certificate Core Courses

GEOG 2271	Introduction to the Arctic Environment	3
PSCI 3206	The Environment and Public Policy	3
IAFS/SCAN 3631	Arctic Society and Culture	3

Society and Culture

3-6

ETHN 2013	Critical Issues in Native North America	
RUSS 2501	Russia Today	
SCAN 2201	Introduction to Modern Nordic Culture and Society	
SCAN 3206	Nordic Colonialisms	
SCAN 3301	Radical Nationalism in Contemporary Northern Europe	

Environment and Policy

3-6

EBIO 3170	Mountain Ecology and Conservation	
EBIO 3175		
ENVS 1000	Introduction to Environmental Studies	
ENVS 3022	Climate Politics and Policy	
GEOG 4261	Glaciers and Permafrost	
GEOG 4271	The Arctic Climate System	
GEOG 3682	Geography of International Development	
IAFS 1000	Global Issues and International Affairs	
PSCI 2116	Introduction to Environmental Policy and Policy Analysis	

European Union Studies - Certificate

The Certificate in European Union Studies (CEUS) allows CU Boulder undergraduates in a range of social science and humanities programs to gain skills and understanding around the European Union (EU). The certificate documents a student's expertise in European Union Studies, opening opportunities for further study, internships and careers in public, private or nonprofit sectors.

CEUS is housed in the International Affairs Program (IAFS) in the College of Arts and Sciences, and the certificate curriculum is intentionally interdisciplinary. Students admitted into the program will complete coursework with EU content going beyond what they can obtain merely by completing any single major. They will also participate in co-curricular activities to augment their understanding of the development, focus, functioning and future of the EU. Upon completion of this program, students will have a demonstrated understanding of the European Union; its politics, history, institutions, economics, policies, member states, relations with the US, role in the world and much more.

Requirements

Application and Admission

Applications for admission into the certificate program can be submitted to iafs@colorado.edu. The application includes an essay describing the applicant's interests and background in EU studies and reasons or motivations for pursuing this certificate. Please include an unofficial transcript.

All degree-seeking students at CU Boulder are eligible to apply for the certificate once they have completed at least 30 credit hours of coursework and have completed at least six credits hours of coursework from the certificate requirements (below). The certificate would be particularly useful, however, to students majoring in one of the following related social science and humanities majors: International Affairs, Political Science, History, Geography, Sociology, Women and Gender Studies, Economics, French, Italian, Spanish, Russian Studies, or German Studies.

Applications will be reviewed once each semester for admission effective the following term.

Certificate Requirements

A total of 19 credit hours of coursework is required to complete the Certificate in European Union Studies. All credit hours must be completed with grades of C- or better and an overall GPA of 2.00. None of the required hours may be taken pass/fail.

In addition to their course work, CEUS students will attend at least four EU-related lectures and events during their semesters of residency at CU and will submit a brief write-up of the main themes or discussion points of the events to iafs@colorado.edu.

Students earn the certificate in European Union studies upon verification by the Director of International Affairs that they have completed a series of curricular and co-curricular requirements.

Required Courses and Semester Credit Hours

Lower-Division Core Requirements

7

It is essential that all students in the EU Studies Certificate program begin with a common framework for the analysis of international institutions and relations as a background for the upper division coursework in EU studies. All students must therefore complete the following lower division requirements:

PSCI 2012 Introduction to Comparative Politics

IAFS 1000 Global Issues and International Affairs

Upper-Division Core Requirements

3

PSCI 4302 European Union Politics

Upper-Division Electives

9

Students must complete at least 9 hours of relevant upper-division course work, including at least 6 credit hours from outside their major or minor, selected from the list below. Courses not listed here, but with a focus on EU issues may be applied to this elective requirement with permission from the Director of International Affairs. This includes, in particular, courses taken on authorized study abroad program in EU countries.

ECON 4514 Economic History of Europe

FNCE 4060 Special Topics in Finance (certain topics)

GEOG 4892 Geography of Western Europe

GRMN 3150 Issues in German Politics and Literature

GRMN/WGST 4301 Gender, Race and Immigration in Germany and Europe

HIST 4212 The Age of Religious Wars: Reformation Europe, 1500-1648

HIST 4053 Britain and the Empire, 1688-1964

HIST 4083 Revolution and Nationalism in Modern Ireland

HIST 4233 History of France since 1815

HIST 4423 German History Since 1849

HIST 4424 Modern European Thought and Culture, 1870-Present

HIST 4442 Europe since 1945

IAFS 3500 French Connections: Contemporary France and America in Historical Context

ITAL 4250 History of Modern Italy

PSCI 3074 Democracy and Its Citizens in the US and EU

PSCI 3143 Current Affairs in International Relations

PSCI 4002 Western European Politics

PSCI 4062 East European Politics

PSCI 4173 International Cooperation and Global Anarchy

PSCI 4183 International Law

PSCI 4193 International Political Economy

PSCI 4213 Europe and the International System

SPAN 3200 Spanish Culture

SPAN 3240 Catalan Culture 1: Nation and Art

SPAN 3250 Catalan Culture 2: Contemporary Trends and Barcelona

SPAN 3230 Discovering Barcelona: Culture and Heritage

SPAN 3270 Barcelona: Understanding Local and Immigrant Cultures

Total Credit Hours

19

Global Environmental Affairs - Certificate

The Certificate in Global Environmental Affairs is offered jointly by the Program in International Affairs (IAFS) and the Program in Environmental Studies (ENVS). This certificate is open to all majors at CU Boulder, and it draws upon courses and interdisciplinary expertise in both IAFS and ENVS. This certificate links and develops knowledge of global environmental policies and practices. For IAFS and ENVS students, it will provide additional value for the two interdisciplinary majors. For more information and to apply, contact GEAcertificate@colorado.edu.

Why do the GEA?

The certificate in Global Environmental Affairs provides students with opportunities to personalize undergraduate learning across disciplinary lines and to deepen student engagement with world problems. The certificate includes both formal coursework and a 3-credit off-campus experiential component. This experiential learning component may be completed through internship, study abroad, or CU in DC. This requirement not only enriches the students' educational experience through applied learning and fieldwork, but it also helps students demonstrate their skills and experience as they prepare for graduation and the job market.

The certificate requires 19-20 credits (depending on the courses chosen). For more details and application information, see the International Affairs Program (<http://www.colorado.edu/iafs>) website.

Track 1: ENVS Majors

<i>Introductory course</i>		4
IAFS 1000	Global Issues and International Affairs	
<i>9 credits from the following elective list:</i>		9
ENVS 4100	Special Topics in Environmental Studies (approved sections for the certificate)	
ENVS 4800	Capstone: Critical Thinking in Environmental Studies (approved sections for the certificate)	
ECON 3403	International Economics and Policy	
ECON 3784	Economic Development and Policy	
IAFS 3000	Special Topics in International Affairs (approved sections for certificate)	
PSCI 4012	Global Development	
PSCI 4732	Critical Thinking in Development	
<i>Data Analysis requirement</i>		3
ENVS/IAFS 3640	Data Analysis for Global Environmental Affairs	
<i>Off-Campus requirement</i>		3
Approved ENVS 3930 internship, study abroad class, or CU in DC class		
Total Credit Hours		19

Track 2: IAFS majors

<i>Introductory course</i>		4
ENVS 1000	Introduction to Environmental Studies	
<i>9 credits from the following elective list:</i>		9
ENVS 4100	Special Topics in Environmental Studies (approved sections for the certificate)	
ENVS 4800	Capstone: Critical Thinking in Environmental Studies (approved sections for the certificate)	
ENVS 3070	Energy and the Environment	
ENVS/GEOL 3520	Energy and Climate Change: An Interdisciplinary Approach	
ENVS 3525	Intermediate Environmental Problem Analysis: Topical Cornerstones	
ENVS 3621	Energy Policy and Society

ENVS/IAFS 3640	Data Analysis for Global Environmental Affairs	
<i>Off-campus requirement</i>		3
Approved IAFS 4930 internship, study abroad class, or CU in DC class		
Total Credit Hours		19

Track 3: All other majors (20 credits)

<i>Introductory courses - complete BOTH</i>		8
IAFS 1000	Global Issues and International Affairs	
ENVS 1000	Introduction to Environmental Studies	
<i>6 credits from the elective list of Track 1 or Track 2</i>		6
<i>Data Analysis requirement</i>		3

ENVS/IAFS 3640 Data Analysis for Global Environmental Affairs

<i>Off-campus requirement</i>	3
ENVS 3930 or other internship class, study abroad class, or CU in DC class	
Total Credit Hours	20

International Affairs - Bachelor of Arts (BA)

With the increasing importance of world issues to the United States, employment opportunities in government, international organizations and business continue to expand. Today there is an urgent need for college graduates with a strong background in international affairs. To meet this need, the University of Colorado offers a comprehensive and flexible interdisciplinary program in international affairs leading to the BA degree.

The undergraduate degree in international affairs emphasizes knowledge and awareness of:

- major political, economic, social and cultural problems facing the international community, including international economic relations, world population and resource utilization
- the international political system in the broadest global context, international organizations and alliances, and foreign political systems and processes
- ethical issues involved in international relations
- patterns of conflict and cooperation among nations and peoples
- chief historical factors that give rise to existing international institutions and processes
- problems and issues in United States foreign policy

In addition, students completing the degree in international affairs are expected to acquire the ability and skills to:

- analyze an international problem from a political, economic, historical and cultural perspective
- read, critically evaluate and synthesize information obtained from international affairs literature
- analyze international phenomena critically
- communicate, orally and in writing, findings to other students of international affairs and to a broader audience
- communicate in other cultural contexts through advanced foreign language study

Requirements

Students must complete the general requirements of the College of Arts and Sciences and a minimum of 51 credit hours of specified courses with a grade of C- or better (none may be taken pass/fail).

Required Courses and Semester Credit Hours

Lower-Division

ECON 2010	Principles of Microeconomics	4
ECON 2020	Principles of Macroeconomics	4
IAFS 1000	Global Issues and International Affairs	4
PSCI 2012	Introduction to Comparative Politics	3

PSCI 2223	Introduction to International Relations	3
Total Credit Hours		18

Upper-Division

Complete the requirements listed below for **functional area, geographic concentration, off-campus experience, foreign language** and **senior seminar**. IAFS 3000 Special Topics in International Affairs can be repeated up to 9 credit hours for different topics.

Functional Area (18 credit hours)

Students must complete one class in each of the four functional areas and complete two additional classes in any functional area. Students cannot apply more than four functional area classes from any one department.

Development and Culture (Functional Area I)

ANTH 4020	Explorations in Anthropology (approved topics only)	3-6
ANTH 4500	Cross-Cultural Aspects of Socioeconomic Development	3
COMM 3410	Intercultural Communication	3

WGST 4500/ PSCI 4391	Gender Politics and Global Activism	3

Geographic Concentration (9 credit hours)

Students are required to complete three classes concentrating on one of the four following global regions: Africa/Middle East, Asia, Europe/Eurasia or Latin America. Students should choose a geographic concentration and a language appropriate to that geographic concentration no later than the beginning of their junior year.

Geographic concentration coursework should be mainly in the social sciences, must include one course in contemporary history and can include a maximum of three credit hours of regional literature and arts (taught in the foreign language whenever possible). See the International Affairs Program (<http://www.colorado.edu/iafs>) website for geographic concentration courses.

Off-Campus Experience (3 credit hours)

Complete 3 upper-division credit hours to fulfill the Off-Campus Experience from one of: IAFS 4930 Internship in International Affairs; a CU Boulder study abroad course; a CU in DC course; or other credit-bearing off-campus experience approved by the program.

Language Requirement

A third-year university-level proficiency in a foreign language appropriate to the geographic concentration is required. This requirement may be met by completion of one or two semester-long, third year, university-level grammar courses (depending on the language) with a grade of C- or better, while also satisfying language department requirements for advancement through the sequence. See the International Affairs Program (<http://www.colorado.edu/iafs>) website for more information.

Senior Seminar

IAFS 4500	The Post-Cold War World	3
or IAFS 4800	Honors Seminar in International Affairs	
<hr/>		
Total Credit Hours		3

Recommendations

- All international affairs majors should have a good command of the English language.
- Students should choose electives with a view to their relevance to this program or usefulness as prerequisites for upper-division work.
- Students in international affairs are encouraged to consider the possibility of participating in one of the Study Abroad programs affiliated with the University of Colorado. Students wishing to participate in such a program should contact their advisor to work out an appropriate program.
- Internships are a useful experience for students seeking a career in international affairs. The Internship in International Affairs (IAFS 4930) provides the opportunity to earn academic credit for appropriate internships in the field. This course is generally offered during the spring and fall semesters and during summer sessions. Interested sophomores, juniors or seniors should consult with the director of the Internship Program. An application is required for admission to the Internship Program; see the International Affairs Program (<http://www.colorado.edu/iafs>) website for more details. IAFS 4930 could count for the Off-Campus Experience, major elective, or geographic concentration credit with approval from the internship director.
- The IAFS Honors Program offers the opportunity to learn and apply research skills for a select number of IAFS majors. Entry into the IAFS Honors Program is limited to seniors with a 3.40 major GPA and a 3.30 overall GPA. The Honors Seminar in International Affairs (IAFS 4800—offered each fall semester) provides instruction in

research methods and facilitates the development of a sound research project. Research continues into the spring semester under the guidance of individual faculty members and through the continuation course, Honors in International Affairs (IAFS 4810). Interested and eligible students should consult with their academic advisor and the director of the Honors Program before spring break of their junior year. An application is required for admission to the Honors Program; see the International Affairs Program (<http://www.colorado.edu/iafs>) website for more details. IAFS 4810 could count for either an upper-division functional area and/or a geographic concentration class with approval from the honors director.

- Students interested in international affairs may want to consider the Global Studies Residential Academic Program offered through the residence halls. See Residential Academic Programs for information.
- International affairs majors who wish to minor in political science must apply the following additional rules:
 - No more than 9 credit hours toward the PSCI minor can come from courses that count toward another major
 - International affairs majors must take at least one upper-division course in American politics and one course (lower- or upper-division) in political theory, in addition to the regular minor requirements.

The specific courses that may be counted to meet the requirements in this program are determined by the committee on international affairs and the dean of the College of Arts and Sciences.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in international affairs, students should meet the following requirements:

- Declare the major by the beginning of the second semester
- Begin language study by the third semester
- Complete the lower-division requirements by the end of the sophomore year
- Begin geographic concentration courses in first semester of the junior year
- Begin upper-division general international affairs requirements in the first semester of the junior year
- Successfully complete any remaining major requirements by the end of the eighth semester

International Media - Certificate

This undergraduate certificate program is designed exclusively for undergraduate students enrolled in the College of Media, Communication and Information (CMCI), and in the International Affairs program (IAFS) in the College of Arts and Sciences. This certificate allows students majoring in international affairs to explore careers in international reporting, advertising and entertainment, while CMCI majors will acquire the context and perspective necessary to work in global and international jobs.

Requirements

The certificate requires 18 to 19 credit hours (depending on the lower-division courses chosen), 15 of which must be upper-division courses.

Students majoring in international affairs are eligible to apply for admission to the certificate program if they have completed 30 credit hours (at least 6 of which must be in their major) with a GPA of 2.75 or better.

For more information, visit the International Affairs Program (<http://www.colorado.edu/iafs>) website.

Required Courses

CMCI Students

Required Courses

MDST 3201	Media, Culture and Globalization	3
JRNL 4411	International Media and Global Crises	3
Choose one of the following:		3-4
IAFS 1000	Global Issues and International Affairs	
PSCI 2012	Introduction to Comparative Politics	
PSCI 2223	Introduction to International Relations	
GEOG 1962	Geographies of Global Change	

Electives

Choose at least 9 credit hours of courses from List A.	9
Total Credit Hours	18-19

International Affairs Majors

Required Courses

MDST 3201	Media, Culture and Globalization	3
JRNL 4411	International Media and Global Crises	3

Electives

Choose a total of 12 credit hours of courses from Lists A and B. ¹	12
Total Credit Hours	18

¹ International affairs majors must take at least 6 credit hours from List B.

Electives

List A

Courses on this list deal with international issues.

GEOG 3682	Geography of International Development	3
GEOG 4712	Political Geography	3
HIST 4126	History of U.S. Foreign Relations Since 1941	3
HIST 4820	Human Rights: Historical Perspectives	3
ECON 3403	International Economics and Policy	3
ECON 3545	Environmental Economics	3
ECON 3784	Economic Development and Policy	3
ECON 4784	Economic Development	3
PHIL 3190	War and Morality	3-4
PHIL 3260	Philosophy and the International Order	3
PSCI 3143	Current Affairs in International Relations	3
PSCI 3163	American Foreign Policy	3
PSCI 3193	International Behavior	3
PSCI 4012	Global Development	3
PSCI 4173	International Cooperation and Global Anarchy	3

PSCI 4183	International Law	3
PSCI 4193	International Political Economy	3
PSCI 4732	Critical Thinking in Development	3
PSCI 4783	Global Issues	3
WGST 3500	Global Gender Issues	3

List B

Courses on this list deal with communication media.

JRNL 2001	Fundamentals of Reporting	3
JRNL 3102	Photojournalism I	3
JRNL 3651	Media Law and Ethics	3
JRNL 4351	Reporting Wars, Conflict and Peace	3
MDST 3321	Media Industries and Economics	3
MDST 3711	Media and Popular Culture	3
MDST 3791	Media and the Public	3
MDST 4211	Asian Media and Culture	3
MDST 4371	Media and Religion	3
MDST 4331	Gender, Race, Class, and Sexuality in Popular Culture	3

Jewish Studies

The Program in Jewish Studies, which is open to all students of all backgrounds, Jewish and non-Jewish, explores Jewish culture, history, society, and thought from a broad, interdisciplinary perspective. The program reflects the core goals of Colorado's flagship university: to provide an outstanding liberal arts education, to foster critical thought, and to instill a keen appreciation of humankind's interrelatedness and diversity. At its core, the major trains students to be global citizens by studying one of the world's oldest global peoples.

With internationally acclaimed faculty engaged in cutting-edge research and opportunities to study with leading artists, scholars, and professionals working in the field of Jewish Studies, the program offers an innovative and contemporary curriculum designed to provide a strong foundation in cultural education and to connect Jewish thought and text to action and people's lives.

The Program offers a Bachelor of Arts in Jewish Studies (students can pursue either a culture intensive concentration or a foreign language intensive concentration), a Minor in Jewish Studies, and a Minor in Hebrew and Israel Studies.

An undergraduate degree in Jewish Studies emphasizes knowledge and awareness of:

- the history of global Jewish communities over time, including the history of Israel and Palestine, biblical and medieval Jewish history, history of Jewish communities in the Mediterranean, the history of the Holocaust, and post-Holocaust American Judaism
- dimensions of Jewish culture across variant Jewish communities, including differences in Jewish cultural practices, Jewish music and film, and Jewish philosophies, religious practices, mysticisms, and thought
- Jewish literature from the biblical period to the present, including Israeli literature, the Hebrew origins of western civilization, and contemporary Jewish literature, and

- global languages of the Jewish people, including Hebrew, Arabic, Spanish, French, Italian, Russian, German, Ladino, and others (for students pursuing the foreign language intensive concentration).

In addition, students completing the degree in Jewish Studies are expected to develop:

- fundamental skills in critical thinking, comparative analysis, oral and written expression
- a well-rounded perspective of the diversity of the Jewish experience, and
- professional skills intended to aid students in their career ambitions.

Jewish Studies alumni have gone onto careers in politics, international policy, criminal justice, non-profit, business, education, law, public relations, administration, marketing, real estate, and journalism. Many have pursued additional education through graduate programs and professional schools.

The study of Jewish culture, society, history, and religion is, by its nature, comparative and interdisciplinary. Our program offers many cross-listed classes with other departments on campus to facilitate a well-rounded learning experience. Many of our courses also satisfy core requirements.

The program also offers many professional development opportunities to help students find employment after graduation in a field that fits their interests. The Internship in Jewish Studies (JWST 3930) pairs students with local organizations based on the student's long-term career goals. Majors are also required to complete a Capstone in Jewish Studies (JWST 4000) in which they design an artistic project or research paper under the supervision of a faculty mentor that serves as a summation of their work in Jewish Studies. Majors and minors are eligible to join the Jewish Studies Undergraduate Student Advisory Board. Jewish Studies also highly encourages students to study abroad and has instituted two Global Seminars, one to Istanbul and the other to Israel.

The Program in Jewish Studies is growing rapidly and new courses are continually being added. Visit www.colorado.edu/jewishstudies (<https://www.colorado.edu/jewishstudies>) for the most current course information.

Course codes for this program are JWST and HEBR.

Bachelor's Degree

- Jewish Studies - Bachelor of Arts (BA) (p. 409)

Minors

- Hebrew and Israel Studies - Minor (p. 409)
- Jewish Studies - Minor (p. 412)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Goodman, Nan (https://experts.colorado.edu/display/fisid_100633)

JWST 1040 (3) Beginning Biblical Hebrew, Second Semester

Building on HEBR 1030, continues to build expertise in reading the Hebrew Bible. Modern language acquisition and classical grammar study methods equip students with the tools to translate and read the various genres of the Biblical material. Department enforced prerequisite: HEBR 1030 or JWST 1030 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: HEBR 1040

JWST 1234 (3) Mysticism and the Jewish American Literary Tradition

Explores the mystical tradition within Judaism from ancient times to the present. With roots in the Hebrew Bible, Jewish mysticism is one of the oldest forms of mysticism and has had an influence on some of the greatest philosophical traditions of western civilization.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 1340

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Ideals and Values

JWST 1818 (3) Introduction to Jewish History: Bible to 1492

Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1818 and RLST 1818

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Asia Content

JWST 1828 (3) Introduction to Jewish History: Since 1492

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and antisemitism.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1828 and RLST 1828

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: Historical Context

JWST 1830 (3) Global History of Holocaust and Genocide

Examines the interplay of politics, culture, psychology and sociology to try to understand why the great philosopher Isaiah Berlin called the 20th century, "The most terrible century in Western history." Our focus will be on the Holocaust as the event that defined the concept of genocide, but we will locate this event that has come to define the 20th century within ideas such as racism, imperialism, violence, and most important, the dehumanization of individuals in the modern world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1830 and RLST 1830

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context

JWST 1900 (3) Introduction to the Hebrew Bible/Old Testament

Examine the content of the Hebrew Bible and critical theories regarding its development. Explore the development of these texts, as well as their foundational role for rabbinic literature and the New Testament. Assess the enduring influence of the Hebrew Bible/Old Testament in world literature and culture (such as in art and music).

Equivalent - Duplicate Degree Credit Not Granted: RLST 1900

Grading Basis: Letter Grade

JWST 1910 (3) Introduction to the New Testament

Examine the background, content and influence of the New Testament books. Studies the diverse perspectives contained in the various books, as well as the process of canonization. Assess the influence of the New Testament on the development of Christianity as well as world (eastern and western) culture.

Equivalent - Duplicate Degree Credit Not Granted: RLST 1910

Grading Basis: Letter Grade

JWST 2350 (3) Introduction to Jewish Culture

Explores the development and expressions of Jewish cultures across the chronological and geographical map of the Jewish people, with an emphasis on the variety of Jewish ethnicities and their cultural productions, cultural syncretism, and changes, including such issues as sexuality and foodways. Sets the discussion in relevant contexts and looks at cultural representations that include literary, religious and visual texts.

Equivalent - Duplicate Degree Credit Not Granted: GSLL 2350

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 2502 (3) Representing the Holocaust

Examines representations of the Holocaust in film, memoirs, poetry, novels, graphic novels, memorials. Considers questions such as: How to depict an event that resists representation? How does the memory of the Holocaust transform over generations? How do representations of the Holocaust inform our understanding of other experiences of racism and genocide? What ethical issues are at stake?

Equivalent - Duplicate Degree Credit Not Granted: JWST 2502

Additional Information: Arts Sci Core Curr: Ideals and Values

JWST 2551 (3) Modern Jewish Literature

Examines Jewish experience through the study of literary texts from around the world, mainly from the 20th and 21st centuries. Discusses issues pertaining to secularism and tradition; diasporas and homelands; modernity and questions of identity raised by the intellectual transitions brought about by political and social emancipation; sexualities; enormous changes wrought by population redistributions, world wars and rapid cultural transformations. Formerly GSLL 2551.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Hebrew

JWST 2600 (3) Judaism, Christianity, and Islam

Introduces literature, beliefs, practices, and institutions of Judaism, Christianity, and Islam, in historical perspective.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2600

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Asia Content

JWST 3100 (3) Judaism

Explores Jewish religious experience and its expression in thought, ritual, ethics, and social institutions.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3100

Additional Information: Arts Sci Core Curr: Historical Context
Departmental Category: Asia Content

JWST 3110 (3) Of Jewish Legends, Folktales and the Supernatural

Explores Jewish traditional legends, folktales and stories of the supernatural. Starts with Aggadic Talmud tales and Midrashic texts and focuses on later rabbinic and mystical texts and folktales ca 500-1900 C.E. from around the Jewish world with subjects ranging from didactic narratives extolling the virtues of the simple pure soul, to the horrors of a blood sucking vampiric outside world.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3110

JWST 3120 (3) Radical Jews

Explores major Jewish figures, and their cultural productions, who were radical in the challenges they posed and transformative in the effects they had on society. The figures we examine range from the Rabbis of the Talmud who revolutionized a sacrificial cult religion, to Western secularist Baruch Spinoza and American icons such as Allen Ginsberg, Gloria Steinem and Bob Dylan.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3120

Grading Basis: Letter Grade

JWST 3200 (3) Religion and Feminist Thought

Examines the origin of patriarchal culture in the theology and practices of Judaism and Christianity. Explores attitudes and beliefs concerning women as Judeo-Christian culture impacts gender roles and gender stratification through reading and discussion. Women's religious experience is studied from the perspective of feminist interpretations of religiosity.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3200

JWST 3202 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 3202 and RLST 3202 and WGST 3201

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 3310 (3) The Bible as Literature

Surveys literary achievements of the Judeo-Christian tradition as represented by the Bible. Formerly JWST 3312.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3310 and HUMN 3310

Additional Information: Arts Sci Core Curr: Ideals and Values

JWST 3401 (3) The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe

Surveys the major works of 20th century central and central east European film and literature. Examines cultural production in the non-imperial countries and non-national languages of the region including Yiddish, Belarusian, Czech, Hungarian, Polish and Romanian, among others. Traces the rise of nationalism over the course of the century from the age of empires through the Cold War.

Equivalent - Duplicate Degree Credit Not Granted: GSSL 3401

JWST 3501 (3) German-Jewish Writers: From the Enlightenment to the Present

Provides insight into the German-Jewish identity through essays, autobiographies, fiction and journalism from the Enlightenment to the post-Holocaust period. Examines the religious and social conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3501

Additional Information: Arts Sci Core Curr. Human Diversity

JWST 3530 (3) Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

Spend two weeks in Istanbul and examine Jewish-Muslim relations in a place that was for 500 years the crossroads of civilization. The only Muslim city in the 21st century with a large, thriving Jewish community, Istanbul models how people from different social classes, ethnicities and religious backgrounds can coexist.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3530 and RLST 3530

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr. Human Diversity

JWST 3600 (3) Contemporary Jewish Societies

Uses transnational lens to explore contemporary debates about Jewish people, places and practices of identity and community; places that Jews have called 'home', and what has made, or continues to make those places 'Jewish'; issues of Jewish homelands and diasporas; gender, sexuality, food and the Jewish body; religious practices in contemporary contexts. Readings drawn primarily from contemporary journalism and scholarship.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3600 and GSSL 3600

Additional Information: Arts Sci Core Curr. Human Diversity

JWST 3610 (3) Topics in International Affairs and Jewish Studies

Explores topics in international affairs as it relates to Jewish culture and society. Subjects addressed under this heading vary according to student interest and faculty availability.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3610

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 3650 (3) History of Arab-Israeli Conflict

Explores the origins and development of the Arab-Israeli conflict. Traces Arab-Jewish/Israeli relations from the 19th century through the Palestine Mandate, the evolution of Arab and Jewish nationalism and the creation of Israel to the present day.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3650

Additional Information: Arts Sci Core Curr. Historical Context
Departmental Category: Asia Content

JWST 3930 (3) Internship in Jewish Studies

Learn beyond the classroom by interning in a local non-profit organization that connects with the Program in Jewish Studies through its mission and/or program. Interns will attend class to learn about work place ethics, professional development and leadership skills through a Jewish Studies lens. Interns will be supervised by the faculty member of record as well as the employer housing the intern.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites HEBR 2350 or JWST 2350 or HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828.

JWST 4000 (1-3) Capstone in Jewish Studies

Serves as the final product for students completing the major in Jewish Studies. Students will design a project under the supervision of a mentor that serves as the summation of their past work in Jewish Studies. Capstone projects can take the form of a thesis, film or another media. Instructor consent required for JWST minors.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Jewish Studies (JWST) BA majors only. Excludes JWST minors.

JWST 4050 (3) Anthropology of Jews and Judaism

Explores topics in Jewish anthropology. Uses the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Explores fundamental questions about the definition of Jewish identity, practices and communities.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4050

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 4101 (3) Topics in Hebrew Studies

Explores topics in Hebrew and Jewish literature and cultures. These may include topics such as diasporic literatures, Jewish artists and thinkers, courses on specific authors, figures or communities. Topics change each semester. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4101

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 4122 (3) Music in Jewish Culture

Introduces students to a wide range of musical styles, traditions, genres, performers, composers, events and works that are part of Jewish culture, focusing on the twentieth and twenty-first centuries. Provides tools for understanding music on its own and in connection with issues of identity, diaspora, memory and liturgy. Includes opportunities for creative and critical engagement with Jewish music.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4122

Grading Basis: Letter Grade

JWST 4170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4170 and RLST 5170

JWST 4180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4180 and RLST 5180

JWST 4203 (3) Israeli Literature: Exile, Nation, Home

Examines the creation and development of Israeli literature from its pre-State beginnings to the present day, from the writings of immigrants for whom Hebrew was not their mother tongue to a literature written by native Hebrew speakers. Considers texts written by Israeli Jewish and Arab writers and explores how ideas of exile, nation, and home play into the Israeli experience.

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4203

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites ENGL 4677 or JWST 4677 or GRMN 2502 or JWST 2502 or JWST 2551 or WRTG 3020.

Additional Information: Arts Sci Core Curr: Literature and the Arts

JWST 4260 (3) Topics in Judaism

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4260 and RLST 5260

Repeatable: Repeatable for up to 9.00 total credit hours.

JWST 4301 (3) Venice: The Cradle of European Jewish Culture

Explores the development of European Jewish culture from the late Middle Ages to the present by focusing on Jewish life in the city of Venice, Italy. Emphasis is on the development of Venetian print culture and emergence of Italy as a center of Jewish publishing in both the religious and secular world. Examines a variety of cultural and historical material including early printings of the Talmud, the creation of Yiddish popular literature, Hebrew rabbinic literature, responses to political turmoil, and the aftermath of the Nazi genocide. Taught in English. Department enforced prerequisite: HEBR 2350 or JWST 2350 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: HEBR 4301

Additional Information: Arts Sci Core Curr: Literature and the Arts

JWST 4302 (6) Global Seminar: Justice, Human Rights and Democracy in Israel

Explore the challenges and complexities of justice, democracy and human rights in Israel and the West Bank through field trips, course work and service learning projects with Jerusalem based non-profit organizations. Acquire new knowledge and lived experience on critical issues facing Israelis and Palestinians with the wider scope of Middle East politics.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3520

Recommended: Prerequisites ANTH 4050 or JWST 4050 and IAFS 3600 or JWST 3600.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Asia Content

JWST 4338 (3) History of Modern Israel/Palestine

Explore the history culture, and politics of this crossroads of Europe and Asia from the late Ottoman period to the present. Topics include: nationalism and colonialism, development of Zionist ideology, Palestinian nationalism, the Jewish community (Yishuv) under British rule, the founding of the State of Israel, Arab-Israeli and Palestinian-Israeli relations, Israel's minorities, and the conflict of religion and state.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4338

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1308 or JWST 2350 or other course work in Middle Eastern or Jewish History.

JWST 4348 (3) Topics in Jewish History

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester. Consult the online Schedule Planner for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4348

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of HIST 1308 or HIST 1828 or JWST 2350 (minimum grade D-).

JWST 4378 (3) History of Modern Jewish-Muslim Relations

Examines the modern history and culture of Jewish communities under Islamic rule in the Middle East and North Africa; Jews' and Muslims' encounters with empire, westernization and nationalism; representations of Sephardi and Eastern Jews; Jewish-Muslim relations in Europe and the U.S.; and contact and conflict between Jews and Muslims in (and about) Israel/Palestine. Sources include memoirs, diaries, newspapers and films.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4378

Additional Information: Departmental Category: Asia Content

JWST 4401 (3) The Russian Jewish Experience

Examines the experience of Russian Jews from the late 19th century to the present through fiction and films dealing with challenges of co-existence of Jews and their neighbors; Bolshevik Revolution, Stalinism, Holocaust, post-Stalin period; place of Jews as individuals and a minority within Russian and Soviet society; and emigration to America and elsewhere at the turn of the century. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4401 and RUSS 5401

Recommended: Prerequisite any 1000 or 2000-level undergraduate literature course.

Additional Information: Arts Sci Core Curr: Literature and the Arts

JWST 4454 (3) Jewish Intellectual History

Takes students on a journey from Medieval Spain to contemporary United States to explore how Jews, living in different societies, have attempted to reshape and interpret central Jewish values and beliefs in accordance with the prevailing ideas of their host societies. Focuses on the historical context of each Jewish society that produced the thinkers and ideas considered in this course.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4454

Additional Information: Departmental Category: Europe: Topical

JWST 4534 (3) Modern European Jewish History

Focus on the last 500 years of European Jewish history, from 1492 until the present, to examine Jews' place in European history and how Europe has functioned in Jewish history. Does not end with the Holocaust, since, although Hitler and the Nazis attempted to destroy European Jewish civilization, they did not succeed. Rather, this course will spend several weeks looking at European Jewish life in the past sixty year.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4534

Recommended: Prerequisite HIST 1818 or JWST 1818 or HIST 1828 or JWST 1828 or HIST 1012.

Grading Basis: Letter Grade

JWST 4544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4544 and HIST 5544

Recommended: Prerequisite HIST 1818 or JWST 1818 or JWST 1828 or GSSL 2350 or JWST 2350.

JWST 4580 (3) The Holocaust: An Anthropological Perspective

Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics and consequences as well as other genocides of the 20th century, using an anthropological approach.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4580

JWST 4677 (3) Jewish-American Literature

Explores the Jewish-American experience from the 19th century to the present through writers such as Sholom Aleichem, Peretz, Babel, Singer, Malamud, Miller, Ginsberg and Ozick. The Jewish experience ranges from the travails of immigration to the loss of identity through assimilation. Formerly JWST 3677.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4677

Additional Information: Arts Sci Core Curr: Human Diversity

JWST 4827 (3) Modern U.S. Jewish History since 1880

Explores the experience of Jews in the United States from the 1880's when the great migration of Jews from Eastern Europe began, through the twentieth century. Students will explore the changing ways in which Jews adapted to life in the U.S., constructed American Jewish identities, and helped to participate in the construction of the United States as a nation.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4827

Additional Information: Departmental Category: United States: Topical Courses 2

JWST 4900 (1-6) Independent Study in Jewish Studies

Working with a faculty member in Jewish Studies on an independent study research project provides students with an opportunity to learn outside the formal classroom structure, with individual direction from Jewish Studies faculty on a topic of mutual interest not offered in regularly scheduled classes. (Independent study may not be used to substitute for a regular course not being offered in a given term.)

Repeatable: Repeatable for up to 6.00 total credit hours.

Hebrew and Israel Studies - Minor

The Minor in Hebrew and Israel Studies focuses on developing a student's Hebrew language skills while exploring a variety of courses on issues related to Israel and the Middle East. This minor is ideal for students who are interested in pursuing an international career or study in the Middle East.

The Minor in Hebrew & Israel Studies is open to all students of all backgrounds, Jewish and non-Jewish.

A minor is offered in Hebrew and Israel Studies. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students must complete 19 credit hours of Hebrew language and course requirements. A grade of C- or better must be received in all courses used to satisfy the minor requirements. For more information, visit the Minor in Hebrew and Israel Studies (<http://www.colorado.edu/>

jewishstudies/academics/majors-minors-jewish-studies/minor-hebrew-israel-studies) website.

Jewish Studies - Bachelor of Arts (BA)

The Major in Jewish Studies is designed to help students develop the professional skills they need to become engaged global citizens, preparing them to obtain a job after graduation or pursue graduate studies. By studying the world through the lens of Jewish culture, history, literature, society, and thought from a broad, interdisciplinary perspective, our students gain fundamental critical thinking, problem solving, and communication skills.

Students pursuing a BA in Jewish Studies may choose one of the following two concentrations:

- Culture Intensive Concentration, in which students will pursue an in-depth study of Jewish culture.
- Foreign Language Intensive Concentration, in which students will obtain advanced language skills in addition to considerable knowledge of Jewish culture.

The Major in Jewish Studies is open to all students of all backgrounds, Jewish and non-Jewish.

Requirements

In addition to the general requirements of the College of Arts and Sciences, students must complete 36 credit hours of Jewish Studies requirements, of which 18 credit hours must be upper-division (3000- or 4000-level) courses.

A grade of C- or better must be received in all courses used to satisfy the major requirements, with an overall average of 2.00 in the major.

No more than 6 credit hours may be taken in independent study. No *pass/fail* graded courses may satisfy the 36-credit-hour minimum requirement.

Many courses also satisfy university core curriculum requirements. For more information on the core curriculum, visit colorado.edu/artssciences/students/undergraduates/core_curriculum.html (http://colorado.edu/artssciences/students/undergraduates/core_curriculum.html).

Students pursuing a BA in Jewish Studies may choose one of the following two concentrations: Culture Intensive Concentration or Foreign Language Intensive Concentration (see requirements below):

Culture Intensive Concentration: Required Courses and Credit Hours

Required Courses 6

JWST/GSLL 2350 Introduction to Jewish Culture

JWST 4000 Capstone in Jewish Studies (Senior Capstone)

Fundamental Jewish Studies Requirements

Select at least two of the following courses, all courses are highly recommended: 6

JWST/HIST 1818 Introduction to Jewish History: Bible to 1492

JWST/HIST 1828 Introduction to Jewish History: Since 1492

JWST/GSLL 2551 Modern Jewish Literature

JWST/RLST 3100 Judaism

JWST/IAFS 3600 Contemporary Jewish Societies

Literature, Culture, and the Arts ¹

Select at least two of the following courses 6

JWST/GSLL 2551 Modern Jewish Literature

JWST/ENGL 3310 The Bible as Literature

JWST/GSLL 3401 The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe

JWST/GRMN 3501 German-Jewish Writers: From the Enlightenment to the Present

JWST 4101 Topics in Hebrew Studies

JWST/MUSC 4122 Music in Jewish Culture

JWST 4203 Israeli Literature: Exile, Nation, Home

JWST/RUSS 4401 The Russian Jewish Experience

JWST/HIST 4544 History of Yiddish Culture

JWST/ENGL 4677 Jewish-American Literature

JWST 4900 Independent Study in Jewish Studies (On topic relevant to Literature, Culture, and the Arts)

HUMN/GRMN 2601 Kafka and the Kafkaesque ⁴

History, Politics, and Religion

Select at least two of the following courses 6

FYSM 1000 First Year Seminar (God) ⁴

JWST 1234 Mysticism and the Jewish American Literary Tradition

JWST/HIST 1818 Introduction to Jewish History: Bible to 1492

JWST/HIST 1828 Introduction to Jewish History: Since 1492

JWST/HIST/RLST 1830 Global History of Holocaust and Genocide

JWST/RLST 1900 Introduction to the Hebrew Bible/Old Testament

JWST/RLST 1910 Introduction to the New Testament

JWST/GRMN 2502 Representing the Holocaust

JWST/RLST 2600 Judaism, Christianity, and Islam

JWST/RLST 3100 Judaism

JWST/WGST 3200 Religion and Feminist Thought

JWST/RLST 3202/ WGST 3201 Women, Gender & Sexuality in Jewish Texts & Traditions

JWST/IAFS/RLST 3530 Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

JWST/IAFS/GSLL 3600 Contemporary Jewish Societies

JWST/IAFS 3610 Topics in International Affairs and Jewish Studies

JWST/IAFS 3650 History of Arab-Israeli Conflict

JWST 3930 Internship in Jewish Studies

JWST/ANTH 4050 Anthropology of Jews and Judaism

JWST/RLST 4170 God and Politics

JWST/RLST 4180 Is God Dead?

JWST/RLST 4260 Topics in Judaism

JWST 4301 Venice: The Cradle of European Jewish Culture

JWST 4302/ IAFS 3520 Global Seminar: Justice, Human Rights and Democracy in Israel

JWST/HIST 4338 History of Modern Israel/Palestine

JWST/HIST 4348	Topics in Jewish History	
JWST/HIST 4378	History of Modern Jewish-Muslim Relations	
JWST/HIST 4454	Jewish Intellectual History	
JWST/HIST 4534	Modern European Jewish History	
JWST/ANTH 4580	The Holocaust: An Anthropological Perspective	
JWST/HIST 4827	Modern U.S. Jewish History since 1880	
JWST 4900	Independent Study in Jewish Studies (On topic relevant to History, Religion, and Politics)	
WRTG 3020	Topics in Writing (After the Holocaust) ⁴	
Electives (12 credit hours from the courses listed above not used to fulfill a requirement listed above)³		12
<i>Auxiliary Courses (Optional) (maximum of 6 credit hours)</i>		
Auxiliary courses are courses from outside the Program in Jewish Studies which may count toward a Jewish Studies major. For all auxiliary courses, all final projects must be approved for the Jewish Studies major by the Director of Undergraduate Studies for the Program in Jewish Studies. A current list of auxiliary courses eligible to be counted towards the Jewish Studies major can be found on the Program in Jewish Studies website.		
Total Credit Hours		36

Foreign Language Intensive Concentration: Required Courses and Credit Hours

Required Courses		6
JWST/GSLL 2350	Introduction to Jewish Culture	
JWST 4000	Capstone in Jewish Studies (Senior Capstone)	

Language Requirement
 Three years of university level language training or demonstrated equivalent proficiency in Hebrew (modern or Biblical) or another language that is to be used in the Jewish Studies capstone project (JWST 4000). Examples include Russian, French, German, Arabic or Spanish. Language must be approved by major advisor. 0-12

Fundamental Jewish Studies Requirements
 Select at least two of the following courses, all courses are highly recommended: 6

JWST/HIST 1818	Introduction to Jewish History: Bible to 1492	
JWST/HIST 1828	Introduction to Jewish History: Since 1492	
JWST/GSLL 2551	Modern Jewish Literature	
JWST/RLST 3100	Judaism	
JWST/IAFS 3600	Contemporary Jewish Societies	

Optional but highly recommended:

JWST 3930	Internship in Jewish Studies	
-----------	------------------------------	--

Additional Requirements

12–24 remaining credit hours, of which at least eight must be upper12-24 division (3000-4000 level), taken from among the following list or other courses by approval of major advisor:

*Lower Division:*²

FYSM 1000	First Year Seminar (God) ⁴	
JWST 1234	Mysticism and the Jewish American Literary Tradition	
JWST/HIST/RLST 1830	Global History of Holocaust and Genocide	
JWST/RLST 1900	Introduction to the Hebrew Bible/Old Testament	
JWST/RLST 1910	Introduction to the New Testament	
JWST/GRMN 2502	Representing the Holocaust	
JWST/RLST 2600	Judaism, Christianity, and Islam	
HEBR 1030	Beginning Biblical Hebrew, First Semester	
HEBR 1040	Beginning Biblical Hebrew, Second Semester	
HEBR 2040	Intermediate Biblical Hebrew, Second Semester	
HEBR 2120	Intermediate Modern Hebrew, Second Semester	
HUMN/GRMN 2601	Kafka and the Kafkaesque ⁴	

Upper Division:

JWST/WGST 3200	Religion and Feminist Thought	
JWST/RLST 3202/WGST 3201	Women, Gender & Sexuality in Jewish Texts & Traditions	
JWST/ENGL 3310	The Bible as Literature	
JWST 3401	The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe	
JWST/GRMN 3501	German-Jewish Writers: From the Enlightenment to the Present

HEBR 3020	Third Year Modern Hebrew, Second Semester
HEBR 3030	Advanced Biblical Hebrew, Third Year, First Semester
WRWG 3020	Topics in Writing (After the Holocaust) ⁴

Auxiliary Courses (Optional) (maximum of 6 credit hours)

Auxiliary courses are courses from outside the Program in Jewish Studies which may count toward a Jewish Studies major. For all auxiliary courses, all final projects must be approved for the Jewish Studies major by the Director of Undergraduate Studies for the Program in Jewish Studies. A current list of auxiliary courses eligible to be counted towards the Jewish Studies major can be found on the Program in Jewish Studies website.

Total Credit Hours 36

¹ NOTE: For students pursuing the Culture Intensive Concentration, language courses may count as electives, but they do not count for Literature, Culture, and the Arts.

² NOTE: For student pursuing the Language Intensive Concentration, the first three semesters of modern Hebrew (or any equivalent language being used in the required capstone course JWST 4000) do not count as credit hours toward the major.

³ NOTE: Electives can come from JWST, HEBR, or a range of other departments.

⁴ NOTE: Not subject to the 6 credit hours limit on Auxiliary courses from outside Jewish Studies.

Graduating in Four Years with a BA in Jewish Studies

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. Please speak with your advisor for specific recommendations; the following is intended to be a general outline only

and there may be flexibility to this plan. To maintain adequate progress in Jewish Studies, students should meet the following requirements:

- Declare the major by the beginning of the second semester, freshmen year.
- Chose to pursue either the Culture Intensive Concentration or the Foreign Language Intensive Concentration.
- For students pursuing the foreign language intensive concentration, have language study approved by Jewish Studies' director of undergraduate studies by the beginning of the first semester, freshmen year. Enroll in beginning language course (or language level applicable) during the first semester of freshmen year.
- Enroll in JWST/GSLL 2350 the second semester, freshmen year.
- Each semester, complete two Jewish Studies courses.
- The last spring semester in residence, complete the Capstone in Jewish Studies (JWST 4000).

Jewish Studies - Minor

The minor in Jewish studies is designed to help students develop a unique interdisciplinary perspective, building their critical thinking skills by exploring the world through the lens of Jewish studies. As the program in Jewish studies is inherently interdisciplinary, many students are easily able to fulfill Jewish studies minor requirements while simultaneously completing requirements for their major.

The minor in Jewish Studies is open to all students of all backgrounds, Jewish and non-Jewish.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. Students must complete 18 credit hours of Jewish studies requirements, of which 12 credit hours must be upper division (3000/4000). A grade of C- or better must be received in all courses used to satisfy the minor requirements. For more information, visit the program's Minor in Jewish Studies (<http://www.colorado.edu/jewishstudies/undergraduates/major-minors-jewish-studies/minor-jewish-studies>) webpage.

Required Courses and Semester Credit Hours

Required Course: 3

JWST/GSLL 2350	Introduction to Jewish Culture
-------------------	--------------------------------

Additional Requirements:

Select one of the following: 3

JWST/HIST 1818	Introduction to Jewish History: Bible to 1492
-------------------	---

JWST/HIST 1828	Introduction to Jewish History: Since 1492
-------------------	--

Select four upper-division (3000-4000 level) Jewish Studies courses 12 from the following list or by approval of advisor.

JWST/RLST 3100	Judaism
-------------------	---------

JWST/WGST 3200	Religion and Feminist Thought
-------------------	-------------------------------

JWST/ RLST 3202/ WGST 3201	Women, Gender & Sexuality in Jewish Texts & Traditions
----------------------------------	---

JWST/ENGL 3310	The Bible as Literature
JWST 3401	The Heart of Europe: Filmmakers and Writers in 20th Century Central Europe
JWST/GRMN 3501	German-Jewish Writers: From the Enlightenment to the Present
JWST/IAFS/ RLST 3530	Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

JWST/HIST 4827	Modern U.S. Jewish History since 1880
JWST 4900	Independent Study in Jewish Studies

WRTG 3020 Topics in Writing (After the Holocaust)

Total Credit Hours

18

Lesbian, Gay, Bisexual, Transgender and Queer Studies

The Lesbian, Gay, Bisexual, Transgender and Queer Studies Certificate program is designed to help students develop a social, historical and cross-cultural understanding of gender and sexuality. By exploring the historical and contemporary experiences of lesbians, gay men, bisexuals and transgender people, the courses in the program encourage students to think critically about the function of sexuality and gender in the world around them. In doing so, students will be able to analyze the relationships between queer and normative sexualities and gender identities.

By developing an understanding of diverse sexual and gender identities, certificate program students apply the meaning and function of sexuality to a broad range of historical and contemporary institutions and societies.

Open to any student in the university, this interdisciplinary program consists of two required courses and a number of relevant courses offered by different departments.

View more information about the LGBTQ Studies Certificate program (<http://www.colorado.edu/lgbtq/certificate>), email lgbt@colorado.edu or call 303-492-8923.

Course code for this program is LGBT.

Certificate

- LGBTQ Studies - Certificate (p. 414)

LGBT 2000 (3) Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

Investigates the social and historical meanings of racial, gender, and sexual identities and their relationship to contemporary lesbian, bisexual, gay, and transgender communities.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2030

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame
Arts Sci Core Curr: Human Diversity

LGBT 2707 (3) Introduction to Lesbian, Bisexual, and Gay Literature

Offers students at sophomore and junior levels an introduction to some of the forms, concerns, and genres of contemporary lesbian, bisexual, transgender and gay writing in English.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2707

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

LGBT 3710 (3) Topics in LGBT Studies

Content varies by semester and reflects contemporary issues in the field of LGBT Studies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

LGBT 3796 (3) Queer Theory

Surveys theoretical, critical, and historical writings in the context of lesbian, bisexual, transgender and gay literature. Examines relationships among aesthetic, cultural and political agendas, and literary and visual texts of the 20th century.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3796

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

LGBT 3930 (3) Lesbian, Gay, Bisexual, Transgender, and Queer Studies Internship

Matches selected students with supervised internships in university programs and advocacy groups, local businesses, human service or government agencies. Internships will focus on lesbian, gay, bisexual, transgender or queer issues, such as anti-violence programs, educational outreach, and civil rights initiatives.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite LGBT 2000.

LGBT 4287 (3) Special Topics in LGBT Literature

Examines a special topic in LGBT literature, foregrounding an approach that focuses on how same-sex desire is represented in literature. May explore the rhetorical and ideological depiction of masculinity and femininity; literary representations of inversion, bisexuality, and transgenderism; the social construction of homosexuality and heterosexuality. Specific topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4287 and WGST 4287

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

LGBT 4400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, this course examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 5400 and WGST 4400 and WGST 5400

Grading Basis: Letter Grade

LGBT 4840 (3) Independent Study in LGBTQ Studies

Self-directed research project in LGBTQ studies supervised by a faculty member and approved by one of the Co-Directors of the LGBT Studies Certificate Program.

Repeatable: Repeatable for up to 6.00 total credit hours.

LGBTQ Studies - Certificate

Lesbian, gay, bisexual, transgender and queer (LGBTQ) studies at CU Boulder is an interdisciplinary undergraduate program encompassing more than 20 courses in a dozen departments.

LGBTQ studies involves the academic investigation of sexuality in established fields such as literature, history, theatre, law, medicine, economics, sociology, anthropology and political science. With its interdisciplinary approach, LGBTQ studies interweaves complex theories and analysis into the study of sexuality.

Through the certificate program and the guidance of faculty advisors, students are given an opportunity to integrate a wide variety of courses offered in the humanities, social sciences and natural sciences, to extend

and deepen their knowledge and understanding of societies and cultures and to relate that understanding to lived experience.

For more details including application instructions, visit the LGBTQ Studies Certificate (<http://www.colorado.edu/lgbtq/certificate>) webpage, or email lgbt@colorado.edu.

Requirements

Completion of the certificate in LGBTQ studies requires the completion of 18 credit hours (9 upper-division) of approved courses with grades of C or better.

Required Courses and Credit Hours

Required Courses

LGBT 2000	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	3
LGBT 3796	Queer Theory	3

Electives

Twelve credit hours of approved elective courses, with at least 6 credit hours of upper-division electives¹

Total Credit Hours 18

¹ Up to six credit hours of independent study may be applied toward the certificate program.

Credits earned at other institutions may be transferred in partial fulfillment of the requirements upon approval of the program director. No more than 12 credit hours (6 upper-division) of transferred course work may be applied to the certificate.

Students are encouraged to meet with the program directors early in their course of study and again in the semester prior to the semester of graduation, to ensure that program requirements are met.

Available elective courses are listed each semester under the "Courses" tab of the program (<http://www.colorado.edu/lgbtq>) website.

Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible to transmit ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves and the way people's brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

The major in linguistics is useful for careers involving cognitive science, computer science, psychology, international business, language teaching, advertising, publishing, law and documentation. Double majors and minors are encouraged with language, computer science, psychology, communication, sociology, anthropology, international affairs, philosophy and education.

The core of the major is a set of courses, taught in the Department of Linguistics, on the nature of language. In addition, the major requires

language courses offered by other departments (except for fluent speakers of languages other than English).

The undergraduate degree in linguistics emphasizes knowledge and awareness of:

- the fundamental architecture of language in the domains of phonetics and phonology, morphology and syntax and semantics and pragmatics;
- the diversity of languages structures;
- the main interactions between language, culture and society, including the role of language as a cultural institution and the social functions of language diversity; and
- the approaches to the study of language that are used by a discipline other than linguistics.

In addition, students completing the degree in linguistics are expected to acquire the ability and skills to:

- demonstrate proficiency in a second language equivalent to the third-year university level;
- infer language structures from the analysis of data from unfamiliar languages; and
- give coherent general interpretations of common language phenomena in terms of language structure and language use.

Course codes for this program are **LING** and **ESLG**.

Study Abroad

Language study and some courses in the major may be completed in university or university-affiliated study abroad programs, and such study is recommended. Students interested in doing part of their major work in a study abroad program should discuss the matter with their advisor before going abroad. For information on study abroad programs, consult the Office of International Education.

Graduation with Honors

The honors program in linguistics offers the opportunity for highly motivated undergraduates to undertake a deeper and more individualized study of linguistics than is provided by the regular BA curriculum. Linguistics majors with an overall grade point average of 3.30 or higher are eligible to participate in the program. Honors that may be earned are cum laude (with honors), magna cum laude (with high honors), and summa cum laude (with highest honors).

Students interested in pursuing departmental honors are encouraged to consult with the departmental honors advisor by the beginning of their junior year to ensure that they will be able to meet the requirements for departmental honors before graduation.

Bachelor's Degree

- Linguistics - Bachelor of Arts (BA) (p. 418)

Minor

- Linguistics - Minor (p. 419)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Palmer, Martha (https://experts.colorado.edu/display/fisid_138162)
Professor; PhD, Univ of Edinburgh (Scotland)

Scarborough, Rebecca Anne (https://experts.colorado.edu/display/fisid_143741)
Associate Professor; PhD, University of California-Los Angeles

Shay, Maire Erin Jean (https://experts.colorado.edu/display/fisid_110594)
Asst Professor Adjunct

Taylor, Allan R.
Professor Emeritus

Thomas-Ruzic, Maria L (https://experts.colorado.edu/display/fisid_143443)
Senior Instructor

ESLG 1130 (2) Accent Reduction for Foreign Students

Provides oral activities with authentic English materials to reduce accents and to increase intelligibility for U.S. academic situations. Evaluates individual problem areas and includes one-on-one meetings with the native-speaker instructor. Improves overall articulation and fluency. Does not fulfill humanities or major requirements.

Equivalent - Duplicate Degree Credit Not Granted: ESLG 1210 or ESLG 1410

ESLG 1140 (2) Presentation Skills for International Students

Provides instruction and practice to improve classroom oral communication skills necessary for effective participation in the U.S. academic setting, either as an international TA or RA, graduate or undergraduate student. Evaluates individual problem areas and includes digital audio and video recording with extensive feedback from the native-speaker instructor. Improves oral competence and listening comprehension in English for international students.

Recommended: Prerequisite ESLG 1130.

ESLG 1210 (2) Academic Writing for Foreign Students

Addresses the development of paragraphs and full-length essays. Focus areas include organization and style, grammar and vocabulary and conventions of academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Improves fluency and precision in academic writing. Does not fulfill humanities or major requirements.

Equivalent - Duplicate Degree Credit Not Granted: ESLG 1130 or ESLG 1410

ESLG 1222 (2) Advanced Written Composition for Foreign Students

Continued practice in academic writing, including incorporating the ideas of others and citing sources appropriately. Extensive instructor feedback provided. Preparation, writing, and revising of a full-length academic term/research paper or work on chapters for a master's thesis or doctoral dissertation. Does not fulfill humanities or major requirements.

Recommended: Prerequisite ESLG 1210.

ESLG 1410 (3) Academic English Skills for International Students

Provides instruction and practice to improve academic speaking and writing skills for effective participation in U.S. universities. Speaking includes accent reduction and effective communication through oral activities and recordings. Writing addresses development of paragraphs and full-length papers, including organization, grammar, vocabulary, incorporating ideas of others and citing sources appropriately. Instructor feedback helps students improve fluency in both speaking and writing. Restricted to non-native speakers of English.

Equivalent - Duplicate Degree Credit Not Granted: ESLG 1130 or ESLG 1210

LING 1000 (3) Language in U.S. Society

Nontechnical exploration of the ways that language is used in America. Emphasizes language as a social institution and how values and goals of both public institutions and private groups shape and are shaped by language and its use.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Core Curr: United States Context
MAPS Course: Social Science

LING 1010 (3) The Study of Words

Study of English words of Latin and Greek origin, focusing on etymological meaning by analysis of component parts (prefixes, bases, suffixes) and on the ways in which words have changed and developed semantically.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1010

LING 1020 (3) Languages of the World

Explores the issue of human diversity by examining how languages vary around the world. Outlines historical, geographic, and typological classifications of languages across human societies, and the criteria used by linguists for grouping them into language families. Theorizes the relationship between linguistic and cognitive diversity, and considers the impact of language death on humanity. No formal training in linguistics is required.

Additional Information: Arts Sci Core Curr: Human Diversity

LING 1500 (3) Understanding Grammar

Presents fundamentals of grammar in the Western tradition. Emphasizes making concepts and uses of grammar (as exemplified in English and closely related foreign languages) understandable to the nonspecialist.

LING 1900 (1) Service Learning Practicum: Adult Literacy

Practicum for selected students in LING 1000. Provides practical experience of the impact of illiteracy on individuals, families, and the community at large. Coregistration in service learning recitation is required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of LING 1000 (prereq minimum grade C-).

Grading Basis: Pass/Fail

LING 2000 (3) Introduction to Linguistics

Introduces the study of languages as structural systems. Principles of sound patterns, word formation, meaning, and sentence structure. Gives attention to language acquisition, psycholinguistics, language families, dialects, historical change in languages, and different language types.

Additional Information: MAPS Course: Social Science

LING 2400 (3) Language, Gender and Sexuality

Familiarizes students with the effects of gender on language use; discusses popular beliefs and scholarly theories about language and communication. Provides students with tools for exploring the role of language and gender.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

LING 3005 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications, and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and PHIL 3310 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

LING 3100 (3) Language Sound Structures

Introduces the sounds of languages and their organization into phonological structures.

Recommended: Prerequisite LING 2000.

LING 3220 (3) American Indian Languages in their Social and Cultural Context

A sampling of the many indigenous languages and cultures found in America. Emphasizes the United States, but also gives attention to the languages of Canada and Latin America.

Recommended: students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Human Diversity

LING 3430 (3) Semantics

Theoretical and practical study of meaning in natural language. Considers both semantic theories and semantic phenomena from diverse languages. Does not treat techniques for improving the use of language.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Linguistics (LING) majors only.

Recommended: Prerequisite LING 2000.

LING 3545 (3) World Language Policies

Examines the economic and sociopolitical impact of choosing English vs. other languages in the U.S. Introduces the study of language policies, rights, and planning in other countries, including the worldwide use of English in social, business, and legal contexts.

LING 3630 (3) Principles and Practices in Teaching English to Speakers of Other Languages

Provides a practical overview of principles and practices in TESOL in its global context. Introduces methods and materials (texts, media, tools) and standards for teaching, learning and assessment. Includes lesson observation, planning and micro-teaching focused especially on listening, speaking and pronunciation. Assumes some background and/or interest in linguistics and language and applications to teaching English to adults/young adults.

Requisites: Requires a prerequisite or corequisite course of LING 2000 (minimum grade C).

Grading Basis: Letter Grade

LING 3800 (1-4) Special Topics in Linguistics

Intensive study of a selected area or problem in linguistics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

LING 4050 (3) Japanese Sociolinguistics: Japanese Language and Society

Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 4050 and JPNS 5050

Requisites: Requires prerequisite course of JPNS 3110 (minimum grade C).

Grading Basis: Letter Grade

LING 4100 (3) Perspectives on Language

Provides extended critical examination of a few selected issues, chosen each term for their general interest and relevance, e.g., the relation between language and thought, or human language vs. animal languages, and computer languages.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite LING 2000.

LING 4220 (3) Language and Mind

Studies topics such as speech perception, word recognition, sentence comprehension, language acquisition, bilingualism, reading and writing. Examines the role of language as a product and producer of the mind, studying interactions between language and cognition from an interdisciplinary perspective. Students will become familiar with the methods of psycholinguistics and design and conduct a psycholinguistic experiment on their own.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4220

Recommended: Prerequisites PSYC 1001 and LING 2000.

LING 4225 (4) Interdisciplinary Research Methods in Child Language Acquisition

Explores fundamental issues in language acquisition cross-culturally, combining methods from Linguistics, Anthropology, Psychology and Computer Science. Students will explore theoretical issue using a hands-on approach that involves acquiring skills such as designing and conducting experiments, investigating corpus data, and computational modeling.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4225

Recommended: Prerequisites PSYC 1001 and LING 2000.

Grading Basis: Letter Grade

LING 4420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 5420

Recommended: Prerequisite LING 2000.

LING 4450 (3) Introduction to Formal Syntax

Introduces formal generative grammar, including determining constituent structure, drawing trees, writing rules, understanding the properties of the lexicon and their interaction with syntax, X-bar theory and its modifications and movement analysis.

Recommended: Prerequisite LING 4420.

LING 4560 (3) Language Development

Emphasizes acquisition of language by young children; development in later years and into adulthood is also treated. Particular attention given to roles of environment and of neurophysiological endowment in learning to communicate with words, sentences, and narratives.

Equivalent - Duplicate Degree Credit Not Granted: SLHS 4560 and PSYC 4560

Requisites: Restricted to Linguistics (LING) majors only.

Recommended: Prerequisites LING 2000 and PSYC 1001.

LING 4610 (3) English Structure for Teachers of English to Speakers of Other Languages

Description of morphological and syntactic categories and structures of English.

Equivalent - Duplicate Degree Credit Not Granted: LING 5610

Recommended: Prerequisite LING 2000.

LING 4800 (3) Language and Culture

Principles of language structure and how language and culture interrelate, how language and language use are affected by culture and how culture may be affected by use of, or contact with, particular languages.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4800

Recommended: Prerequisite LING 1000 or LING 2400 or ANTH 2100.

LING 4830 (3) Honors Thesis

Required for students who elect departmental honors. Students write an honors thesis based on independent research under the direction of a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sciences Honors Course

LING 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

LING 4910 (3) TESOL (Tching English to Spkrks of Other Languages) Practicum

Provides the field-based component and practical experience in English language teaching for the TESOL Certificate. Work on site includes class observations and supervised teaching in community-based programs/ESL providers. Weekly meetings provide opportunities to debrief/discuss teaching practice and connect theory, methods and practice. Supports professional development, completion of a teaching resume and portfolio and the job search process.

Equivalent - Duplicate Degree Credit Not Granted: LING 5910

Requisites: Requires prerequisite courses of LING 2000 and LING 3630 (minimum grade C).

Grading Basis: Letter Grade

Linguistics - Bachelor of Arts (BA)

The CU Department of Linguistics has a strong commitment to excellence in teaching at both the graduate and undergraduate levels. The linguistics faculty offers a wide range of research strengths—including syntactic theory, socio-cultural linguistics, computational and psycholinguistics, phonetics/phonology and language documentation—ensuring that students can gain both versatility and expertise in an array of subfields.

Our educational mission is to provide students with insight into the fundamental design features of language—its sound patterns, its word- and sentence formation devices, its semantic structure—and to create awareness of language varieties: the diversity of human languages, the role of language as an index of social identity and the ontogenetic and historical development of language.

Concurrent Degree Program

BA/MA in Linguistics

The department has a five-year concurrent bachelor's and master's degree program, which is recommended only for the most serious and able graduate students. For further information, see the graduate advisor in the spring of the sophomore year or during the first week of the fall semester of the junior year.

Requirements

Majors in linguistics must complete a total of 32 credit hours of study in general linguistics, including 5 in a natural language (for exceptions, see below). Language study is taken in other departments.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Required Courses and Semester Credit Hours

General Linguistics Courses

LING 2000	Introduction to Linguistics ¹	3
LING 3100	Language Sound Structures ¹	3
LING 3430	Semantics ¹	3
LING 4420	Morphology and Syntax ¹	3

Natural Language

Complete a minimum of 5 credit hours of study of a natural language other than English (see details below) with a grade of C- (2.00) or better.

Electives

Select a minimum of 15 elective credit hours from the following with a grade of C- (2.00) or better.

ENGL 4003	Introduction to Old English
FREN 3020	French Phonetics Through Musical Performance
FREN 3010	French Phonetics and Pronunciation
JPNS 4030	Japanese Syntax
JPNS 4080	Kanji in Japanese Orthography
JPNS 4070	Second Language Acquisition of Japanese
LING 1000	Language in U.S. Society
LING 1010	The Study of Words
LING 1020	Languages of the World
LING 2400	Language, Gender and Sexuality
LING 3005	Cognitive Science
LING 3220	American Indian Languages in their Social and Cultural Context
LING 3545	World Language Policies
LING 3800	Special Topics in Linguistics
LING 4100	Perspectives on Language
LING 4220	Language and Mind
LING 4225	Interdisciplinary Research Methods in Child Language Acquisition
LING 4450	Introduction to Formal Syntax
LING 4560	Language Development
LING 4610	English Structure for Teachers of English to Speakers of Other Languages
LING 4800	Language and Culture

Other upper-division linguistics courses may also be chosen if available; graduate courses may be taken with permission of the department.

Total Credit Hours 32

¹ Complete with a grade of C- or better.

Natural Language

Students must complete with a grade of C- (2.00) or better a minimum of 5 credit hours of study of a natural language other than English (including signed languages used by deaf communities). The 5 credit hours offered in satisfaction of this requirement must be at the 3000 level or above for widely-taught languages (French, German, Latin, Spanish), or at the 2000 level or above for less-widely-taught languages (Arabic, American Sign Language, Chinese, Farsi, Greek, Hebrew, Hindi, Indonesian, Italian, Japanese, Korean, Norwegian, Portuguese, Russian, Swedish).

Only courses taught in the language in question, and focused specifically on language learning, may be used for this requirement. A list of all the approved courses is available from the Department of Linguistics or the departmental undergraduate advisor.

The natural language requirement may be satisfied by examination or waived for foreign students whose native language is not English; in these cases, students must still meet the college minimum major requirement of 18 credit hours of upper-division course work and 30 credit hours overall in the major. Students who wish to have their language requirement waived must obtain the consent of an undergraduate advisor before registering for the fall term of the junior year.

Additional Information

The department recommends that prospective majors complete LING 2000 and at least two 1000-level foreign language courses (in the same language) by the end of the sophomore year, unless the student's foreign language proficiency is already advanced.

The fall semester of the junior year should include LING 3430, a 2000-level foreign language course, and a linguistics elective or LING 4420. It must also include LING 2000 if that was not taken earlier. The spring semester of the junior year should include LING 3100, a linguistics elective and a further 2000-level foreign language course (if needed to prepare the student for the required upper-division foreign language credit hours).

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here refers only to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in linguistics, students should meet the following requirements:

- By the beginning of the spring semester of the freshman year (second semester), declare linguistics as a major.
- During the freshman or sophomore years (first through fourth semesters), take LING 2000 (required) and LING 1000 or LING 2400 (electives)
- By the end of the sophomore year (fourth semester) at the latest, complete two semesters of study of a natural (spoken or signed) language other than English.*
- During the junior year (fifth and sixth semesters) at the latest, continue natural language study at the 2000 level.
- During the fall of the junior year (fifth semester), take one or both of LING 3430 or LING 4420.
- During the junior or senior year (fifth through eighth semesters), take the remaining courses as needed.
- During the spring of the junior year (sixth semester), take LING 3100 and an upper-division linguistics elective.
- During the senior year (seventh and eighth semesters) at the latest, take 5 credit hours of natural language study at the 3000 level.*

*The language requirement is waived for native speakers of a language other than English, but if it is waived, 6 additional upper-division credit hours in linguistics must be taken.

Note: A linguistics major who has been excluded from any upper-division linguistics course due to enrollment limitations will be given first preference for a seat in that course the following year if the exclusion is made known to the department staff within two weeks after it occurs. No declared linguistics major who still needs LING 2000 for fall of the junior year and attempts to register for it during the regular registration period for continuing students (spring of the sophomore year) will be excluded from the course.

Linguistics - Minor

One good reason to take the linguistics minor is that by learning to analyze language and evaluate claims about language, students can improve the quality of their writing and argumentation in their major discipline.

Students can profitably combine the linguistics minor with a major in one of the modern languages, classics, psychology or speech, hearing and language science, to name just a few possibilities.

Requirements

Declaration of a minor in linguistics is open to any student enrolled at CU Boulder, regardless of college or school.

Students minoring in linguistics must complete a total of 18 credit hours in linguistics, 9 of which must be at the upper-division level. Students must maintain an overall and linguistics GPA of at least 2.00 (C), and complete all LING courses with a C- or better.

Required Course and Semester Credit Hours

Required Courses

LING 2000	Introduction to Linguistics	3
-----------	-----------------------------	---

Electives

Select two of the following:		6
------------------------------	--	---

LING 3100	Language Sound Structures
-----------	---------------------------

LING 3430	Semantics
-----------	-----------

LING 4420	Morphology and Syntax
-----------	-----------------------

Take the remaining one of the three courses listed above and/or select from the following electives to bring the total credit hours to 18: ¹		9
---	--	---

LING 1000	Language in U.S. Society
-----------	--------------------------

LING 1010	The Study of Words
-----------	--------------------

LING 1020	Languages of the World

Total Credit Hours		18
--------------------	--	----

¹ At least 3 credit hours of the electives must be in an upper-division course.

Mathematics

The Department of Mathematics offers courses leading to either a Bachelor of Arts (BA) degree in Mathematics or a minor in Mathematics. Students who choose to major in Mathematics choose from one of five tracks for the major:

1. **Comprehensive track:** The comprehensive track emphasizes theoretical mathematics, and is aimed at students seeking a general

background in mathematics or intending to pursue graduate work in mathematics.

2. **Applicable track:** The applicable track is aimed at students seeking a background in applied and/or applicable mathematics.
3. **Secondary Education track:** The secondary education track is designed to align with the Colorado licensure requirements for mathematics secondary education, and the university does offer a program for obtaining secondary education mathematics teaching licensure.
4. **Computational track:** The computational track is designed for students with an interest in the intersection of mathematics and computer science.
5. **Statistics track:** The statistics track is designed for students seeking a background in statistics and/or data science.

Course code for this program is MATH.

Bachelor's Degree

- Mathematics - Bachelor of Arts (BA) (p. 425)

Minor

- Mathematics - Minor (p. 427)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

MATH 1005 (3) Introduction to College Mathematics

Introductory level mathematics course which presents a college level introduction to algebraic functions and their applications. Only offered through the Student Academic Service Center.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1011

Additional Information: MAPS Course: Mathematics

MATH 1011 (3) College Algebra

Covers simplifying algebraic expressions, factoring, linear and quadratic equations, inequalities, exponentials, logarithms, functions, graphs and systems of equations. Department enforced prerequisite: one year high school algebra.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1005

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
MAPS Course: Mathematics

MATH 1012 (3) Quantitative Reasoning and Mathematical Skills

Promotes mathematical literacy among liberal arts students. Teaches basic mathematics, logic, and problem-solving skills in the context of higher level mathematics, science, technology, and/or society. This is not a traditional math class, but is designed to stimulate interest in and appreciation of mathematics and quantitative reasoning as valuable tools for comprehending the world in which we live.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1012

Additional Information: GT Pathways: GT-MA1 - Mathematics

Arts Sci Core Curr: Quant Reasn Mathmat Skills

MAPS Course: Mathematics

MATH 1021 (3) College Trigonometry

Covers trigonometric functions, identities, solutions of triangles, addition and multiple angle formulas, inverse and trigonometric functions and laws of sines and cosines. Department enforced prerequisite: MATH 1011 (minimum grade C-) or 1 1/2 years of high school algebra and 1 year of high school geometry.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1235 or MATH 1150

MATH 1071 (3) Finite Mathematics for Social Science and Business

Discusses systems of linear equations and introduces matrices, linear programming, and probability.

Requisites: Requires prerequisite course of MATH 1011 (minimum grade C-) or a score of 46% or greater on an ALEKS math exam taken in 2016 or earlier.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 1081 (3) Calculus for Social Science and Business

Covers differential and integral calculus of algebraic, logarithmic and exponential functions. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1300 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admission data and/or CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 1110 (3) Mathematics for Elementary Educators 1

Includes a study of problem solving techniques in mathematics and the structure of number systems. Department enforced prereq., one year of high school algebra and one year of geometry. Department enforced restriction: restricted to prospective elementary teachers. The combination MATH 1110 and 1120 is approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1112 (4) Mathematical Analysis in Business

Gives students experience with mathematical problem solving in real business contexts. Students will work with data and spreadsheets to build and analyze mathematical models. Themes of the course include applying logical operators to model business rules, interpreting data and using tables and graphs, finding break-even and optimal points, and addressing uncertainty and forecasting

Equivalent - Duplicate Degree Credit Not Granted: MATH 1012

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1120 (3) Mathematics for Elementary Educators 2

Topics include geometry, measurement, probability, and statistics. Department enforced restriction: restricted to prospective elementary teachers. The combination MATH 1110 and 1120 is approved for arts and sciences core curriculum: quantitative reasoning and mathematical skills.

Requisites: Requires prerequisite course of MATH 1110 (minimum grade C-).

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1130 (3) Mathematics from the Visual Arts

Introduces mathematical concepts through the study of visual arts.

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1150 (4) Precalculus Mathematics

Develops techniques and concepts prerequisite to calculus through the study of trigonometric, exponential, logarithmic, polynomial and other functions. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1235 or MATH 1021

Requisites: Requires prerequisite course of MATH 1011 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework. Requires enrollment in corequisite course MATH 1151.

Additional Information: GT Pathways: GT-MA1 - Mathematics

Arts Sci Core Curr. Quant Reasn Mathmat Skills

MAPS Course: Mathematics

MATH 1151 (1) Precalculus Supplemental Lab

Provides students concurrently enrolled in MATH 1150 with supplemental instruction.

Requisites: Requires enrollment in corequisite course of MATH 1150.

Grading Basis: Letter Grade

MATH 1160 (3) Transition to Calculus (IBL): The Theory, Applications and Analysis of Functions

Examines the functions of calculus and how they can be used to model concrete problems and/or change. This is an intensive study of these functions through Inquiry-Based Learning. Each class will be designed so students will be actively engaged in learning the material in small groups. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Requisites: Requires an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

MATH 1212 (3) Data and Models

Engages students in statistical and algebraic problem solving through modeling data and real world questions taken from the social and life sciences. The course will emphasize these skills and the mathematical background needed for a university level statistics course.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1011

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1300 (5) Calculus 1

Topics include limits, derivatives of algebraic and transcendental functions, applications of the derivative, integration and applications of the definite integral. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 MATH 1081 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of MATH 1011 and MATH 1021 or MATH 1150 or MATH 1160 or APPM 1235 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1310 (5) Calculus, Systems, and Modeling

Calculus concepts are developed through the analysis and modeling of complex systems, ranging from gene networks and cells to populations and ecosystems. Fundamental concepts of probability and statistics are also developed through the lens of calculus. MATH 1300 is similar, but a greater emphasis is placed on relevance and applications in biology and other life sciences. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1330

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics

Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 1330 (4) Calculus for Economics and the Social Sciences

A calculus course intended to meet the needs of social science and economics majors, including applications. Covers differential and integral calculus of algebraic, logarithmic and exponential functions and modeling. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310

Requisites: Requires a prerequisite course of ECON 1078 or MATH 1011 or MATH 1071 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/r CU Boulder coursework.

Additional Information: Arts Sci Core Curr. Quant Reasn Mathmat Skills

MATH 2001 (3) Introduction to Discrete Mathematics

Introduces the ideas of rigor and proof through an examination of basic set theory, existential and universal quantifiers, elementary counting, discrete probability, and additional topics. Department enforced prerequisite: MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (minimum grade C-).

MATH 2130 (3) Introduction to Linear Algebra for Non-Mathematics Majors

Examines basic properties of systems of linear equations, vector spaces, inner products, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, eigenvectors and diagonalization. Intended for students who do not plan to major in Mathematics. Formerly MATH 3130.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2135 or APPM 3310

Requisites: Requires prerequisite course of MATH 2300 or APPM 1360 (minimum grade C-).

MATH 2135 (3) Introduction to Linear Algebra for Mathematics Majors

Examines basic properties of systems of linear equations, vector spaces, inner products, linear independence, dimension, linear transformations, matrices, determinants, eigenvalues, eigenvectors and diagonalization. Intended for students who plan to major in Mathematics. Formerly MATH 3135.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 or APPM 3310

Requisites: Requires a prerequisite course of MATH 2300 or APPM 1360 and MATH 2001 (all minimum grade C-).

MATH 2300 (5) Calculus 2

Continuation of MATH 1300. Topics include transcendental functions, methods of integration, polar coordinates, differential equations, improper integrals, infinite sequences and series, Taylor polynomials and Taylor series. Department enforced prerequisite: MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: APPM 1360

MATH 2380 (3) Mathematics for the Environment

An interdisciplinary course where environmental issues, such as climate change, global epidemics, pollution, population models and kinship relations of Australian Aborigines are studied with elementary mathematics (such as fuzzy logic). Similar techniques are applied to analyze other current events, such as surveillance, economic meltdowns, identity theft and media literacy. Department enforced prerequisite: proficiency in high school mathematics.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills

MATH 2400 (5) Calculus 3

Continuation of MATH 2300. Topics include vectors, three-dimensional analytic geometry, partial differentiation and multiple integrals, and vector analysis. Department enforced prerequisite: MATH 2300 or APPM 1360 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: APPM 2350

MATH 2510 (3) Introduction to Statistics

Elementary statistical measures. Introduces statistical distributions, statistical inference, hypothesis testing and linear regression. Department enforced prerequisite: two years of high school algebra.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 1020

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
MAPS Course: Mathematics

MATH 3001 (3) Analysis 1

Provides a rigorous treatment of the basic results from elementary Calculus. Topics include the topology of the real line, sequences of numbers, continuous functions, differentiable functions and the Riemann integral.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 or MATH 2135 (all minimum grade C-).

MATH 3110 (3) Introduction to Theory of Numbers

Studies the set of integers, focusing on divisibility, congruences, arithmetic functions, sums of squares, quadratic residues and reciprocity, and elementary results on distributions of primes.

Requisites: Requires prerequisite course of MATH 2001 (minimum grade C-).

MATH 3120 (3) Functions and Modeling

Engages the students in daily projects and occasional in-class labs designed to strengthen and expand knowledge of the topics in secondary mathematics, focusing especially on topics from algebra, precalculus and calculus. Projects and labs involve the use of multiple representations, transformations, data analysis techniques and interconnections among ideas from geometry, algebra, probability and calculus. Department enforced prereq., MATH 1300 or MATH 1310 or APPM 1350 (minimum grade C-).

Requisites: Requires prerequisite course of MATH 2001 (minimum grade C-).

MATH 3140 (3) Abstract Algebra 1

Studies basic properties of algebraic structures with a heavy emphasis on groups. Other topics, time permitting, may include rings and fields.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 3170 (3) Combinatorics 1

Covers basic methods and results in combinatorial theory. Includes enumeration methods, elementary properties of functions and relations, and graph theory. Emphasizes applications.

Requisites: Requires prerequisite course of MATH 2001 (minimum grade C-).

MATH 3210 (3) Euclidean and Non-Euclidean Geometry

Axiomatic systems; Euclid's presentation of the elements of geometry; Hilbert's axioms; neutral, Euclidean and non-Euclidean geometries and their models.

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 3430 (3) Ordinary Differential Equations

Involves an elementary systematic introduction to first-order scalar differential equations, nth order linear differential equations, and n-dimensional linear systems of first-order differential equations. Additional topics are chosen from equations with regular singular points, Laplace transforms, phase plane techniques, basic existence and uniqueness and numerical solutions. Formerly MATH 4430.

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) or APPM 3310 (all minimum grade C-).

MATH 3450 (3) Introduction to Complex Variables

Theory of functions of one complex variable, including integrals, power series, residues, conformal mapping, and special functions. Formerly MATH 4450.

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 (minimum grade C-).

MATH 3510 (3) Introduction to Probability and Statistics

Introduces the basic notions of Probability: random variables, expectation, conditioning, and the standard distributions (Binomial, Poisson, Exponential, Normal). This course also covers the Law of Large Numbers and Central Limit Theorem as they apply to statistical questions: sampling from a random distribution, estimation, and hypothesis testing.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2510 or MATH 4510

Requisites: Requires prerequisite courses of MATH 2001 and MATH 2300 or APPM 1360 (all minimum grade C-).

MATH 3850 (1) Seminar in Guided Mathematics Instruction

Provides learning assistants with an opportunity to analyze assessment data for formative purposes and develop instructional plans as a result of these analyses. These formative assessment analyses will build on the literature in the learning sciences. Students gain direct experiences interacting with the tools of the trade, especially with actual assessment data and models of instruction. Restricted to learning assistants in Math.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a corequisite course of EDUC 4610.

Grading Basis: Pass/Fail

MATH 4000 (3) Foundations of Mathematics

Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5000

Requisites: Requires prerequisite courses of MATH 2001 and MATH 3001 or MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) or MATH 3140 or MATH 3210 (all minimum grade C-).

MATH 4001 (3) Analysis 2

Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).

Equivalent - Duplicate Degree Credit Not Granted: MATH 5001

Requisites: Requires prerequisite courses of MATH 3001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 4120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation, and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5120 and APPM 4120 and APPM 5120

Requisites: Requires prerequisite course of MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) or APPM 3310 (minimum grade C-).

MATH 4140 (3) Abstract Algebra 2

Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5140

Requisites: Requires prerequisite course of MATH 3140 (minimum grade C-).

MATH 4200 (3) Introduction to Topology

Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5200

Requisites: Requires prerequisite course of MATH 3001 (minimum grade C-).

MATH 4230 (3) Differential Geometry of Curves and Surfaces

Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5230

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) and MATH 2001 (all minimum grade C-).

MATH 4240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics

Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5240

Requisites: Requires prerequisite courses of MATH 3001 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 4330 (3) Fourier Analysis

The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5330

Requisites: Requires prerequisite course of MATH 3001 (minimum grade C-).

MATH 4440 (3) Mathematics of Coding and Cryptography

Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5440

Requisites: Requires prerequisite course of MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (minimum grade C-).

MATH 4470 (3) Partial Differential Equations

Studies initial, boundary, and eigenvalue problems for the wave, heat, and potential equations. Solution by separation of variables, Green's function, and variational methods.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5470

Requisites: Requires prerequisite courses of MATH 3430 (minimum grade C-).

MATH 4510 (3) Introduction to Probability Theory

Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 3570 or ECEN 3810 or MATH 3510 MATH 5510

Requisites: Requires prerequisite courses of MATH 2400 or APPM 2350 and MATH 2130 (formerly MATH 3130) or MATH 2135 (formerly MATH 3135) (all minimum grade C-).

MATH 4520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5520 and APPM 4520 and APPM 5520

Requisites: Requires prerequisite course of MATH 4510 or APPM 3570 (minimum grade C-).

MATH 4540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models, modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5540 and APPM 4540 and APPM 5540

Requisites: Requires prerequisite course of MATH 4520 or APPM 4520 (minimum grade C-).

MATH 4650 (3) Intermediate Numerical Analysis 1

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced restriction: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4650

Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

MATH 4660 (3) Intermediate Numerical Analysis 2

Continuation of MATH 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4660

Requisites: Requires prerequisite course of MATH 4650 (minimum grade C-).

MATH 4730 (3) Set Theory

Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5730

Requisites: Prereq. courses of MATH 2001 and one of the following: MATH 3001, 3110, 3120, 3140, 3170, 3210, 3430, 3450, 3510, 3850, 4000, 4001, 4120, 4140, 4200, 4230, 4330, 4440, 4510, 4520, 4540, 4650, 4660 or 4820 (all min grade C-).

MATH 4805 (1) Mathematical Teacher Training: Inclusive Pedagogy

Designed to train students to teach mathematics in an inclusive, multicultural environment. Students teach a math course within the McNeill Academic Program (Student Academic Services Center) meeting weekly with faculty and colleagues to learn to re-design curriculum, fine-tune pedagogical practices, create assessments, mentor undergraduate instructor assistants and create an inclusive classroom environment.

Department enforced restriction: experience with college-level instruction.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

MATH 4810 (1-3) Special Topics in Mathematics

Covers various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5810

Repeatable: Repeatable for up to 7.00 total credit hours.

MATH 4820 (3) History of Mathematical Ideas

Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5820

Requisites: Prereq. courses of MATH 2001 and one of the following:

MATH 3001, 3110, 3120, 3140, 3170, 3210, 3430, 3450, 3510, 3850, 4000, 4001, 4120, 4140, 4200, 4230, 4330, 4440, 4510, 4520, 4540, 4650, 4660 or 4820 (all min grade C-).

Recommended: completion of upper division Written Communication requirement.

MATH 4890 (1-3) Honors Independent Study

Offered for students doing a thesis for departmental honors.

Additional Information: Arts Sciences Honors Course

MATH 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Mathematics - Bachelor of Arts (BA)

The undergraduate degree in mathematics emphasizes knowledge and awareness of:

- calculus of several variables and vector analysis;
- the structure of mathematical proofs and definitions;
- basic linear algebra and the theory of vector spaces;
- basic real analysis of one variable;
- at least one additional specialized area of mathematics.

In addition, students completing a degree in mathematics are expected to acquire the ability and skills to:

- move from concrete to abstract thinking and back with facility;
- recognize patterns and connections between areas of mathematics and between mathematics and other subjects;
- organize and construct a logical argument, provide evidence to support arguments and articulate arguments clearly and succinctly, both verbally and in writing.

The mathematics program offers five tracks that lead to the BA degree.

All five tracks require Calculus 1, Calculus 2, Calculus 3, MATH 2001, MATH 2135, and MATH 3001.

Comprehensive Track

The comprehensive track emphasizes theoretical mathematics, and is aimed at students seeking a general background in mathematics or intending to pursue graduate work in mathematics.

Applicable Track

The applicable track is aimed at students seeking a background in applied and/or applicable mathematics.

Secondary Education Track

The secondary education track is designed to align with the Colorado licensure requirements for mathematics secondary education, and the university does offer a program for obtaining secondary education mathematics teaching licensure.

Computational Track

The computational track is designed for students with an interest in the intersection of mathematics and computer science.

Statistics Track

The statistics track is designed for students seeking a background in statistics and/or data science.

Concurrent Degree Program

BA/MA in Mathematics

The Department of Mathematics Concurrent Bachelor's/Master's Program leads to both a BA in Mathematics and either an MA in Mathematics or an MS in Applied Mathematics. It allows highly motivated and successful students to experience graduate-level course work earlier in their education than would otherwise be possible, and also allows them to obtain a master's degree in a reduced time period. Students are allowed to count six hours of graduate-level Mathematics Department course work towards both their undergraduate and graduate degree requirements.

The earliest admission to the program is after the successful completion of at least total 45 credit hours and a minimum of two upper division courses from the Department of Mathematics. Students must have at least one year of coursework remaining towards the completion of their undergraduate degree in order to be admitted to the program. Students admitted to the program may not pursue a double degree or a double major; however, outside minors are allowed.

For more information, see http://www.colorado.edu/math/undergraduate/math_advising/documents/concurrentdegreeguidelines2015.pdf.

Requirements

To earn a BA in mathematics, a student must complete the general requirements of the College of Arts and Sciences, as well as the six mathematics core courses and the five additional courses for one of the five tracks (described below).

Students must earn a grade of C- or better in each of the mathematics core courses and the five additional courses, and have at least a C average for all attempted work in mathematics.

Required Core Courses

The following courses are required of all mathematics majors, regardless of track.

Required Courses

MATH 1300	Calculus 1	4-5
	or MATH 1310 Calculus, Systems, and Modeling	
	or APPM 1350 Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
	or APPM 1360 Calculus 2 for Engineers	
MATH 2400	Calculus 3	4
	or APPM 2350 Calculus 3 for Engineers	
MATH 2001	Introduction to Discrete Mathematics	3
MATH 2135	Introduction to Linear Algebra for Mathematics Majors	3
MATH 3001	Analysis 1	3
Total Credit Hours		21-23

Comprehensive Track

Aimed at students seeking a general background in mathematics or intending to pursue graduate work in mathematics, the comprehensive track requires the following courses:

Required Courses

MATH 3140	Abstract Algebra 1	3
MATH 4140	Abstract Algebra 2	3
	or MATH 4001 Analysis 2	

Electives

Three upper-division MATH or approved APPM courses (at least one at the 4000-level)	9
Total Credit Hours	15

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Calculus 1, Calculus 2, Calculus 3, MATH 2001, MATH 2135, and MATH 3001.
- By the end of the sixth semester, complete MATH 3140, MATH 4140 or MATH 4001, and one additional approved MATH or APPM course.
- By the end of the eighth semester, complete the major.

Applicable Track

Aimed at students seeking a background in applied and/or applicable mathematics, the applicable track requires the following courses:

Required Courses

MATH 4510	Introduction to Probability Theory	3
MATH 3430	Ordinary Differential Equations	3
MATH 4520	Introduction to Mathematical Statistics	3
	or MATH 4470 Partial Differential Equations	

Electives

Two upper-division MATH or approved APPM courses	6
Total Credit Hours	15

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Calculus 1, Calculus 2, Calculus 3, MATH 2001, MATH 2135, and MATH 3001.
- By the end of the sixth semester, complete MATH 4510, MATH 3430, and either MATH 4520 or MATH 4470.
- By the end of the eighth semester, complete the major.

Secondary Education Track

Aimed at students intending to teach mathematics at the secondary level, the secondary education track requires the following courses:

Required Courses

MATH 3110	Introduction to Theory of Numbers	3
or MATH 3140	Abstract Algebra 1	
MATH 3120	Functions and Modeling	3
MATH 3210	Euclidean and Non-Euclidean Geometry	3
MATH 3510	Introduction to Probability and Statistics	3
MATH 4820	History of Mathematical Ideas	3
Total Credit Hours		15

NOTE: Completion of the secondary education track does not provide the student a teaching license.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Calculus 1, Calculus 2, Calculus 3, MATH 2001, MATH 2135, MATH 3001, and MATH 3120.
- By the end of the sixth semester, complete MATH 3510, MATH 3210, and either MATH 3110 or MATH 3140.
- By the end of the eighth semester, complete the major.

Computational Track

Aimed at students interested in both mathematics and computation, the computational track requires the following courses:

Required Courses

CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 3104	Algorithms	4
MATH/APPM 4650	Intermediate Numerical Analysis 1	3

Electives

Three MATH or approved APPM or approved CSCI courses, at least one of which must be at the 4000-level. At most one of these courses may be a computer science course	9
--	---

Total Credit Hours	24
--------------------	----

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Computer Science 1, Computer Science 2, Calculus 1, Calculus 2, Calculus 3, MATH 2001, MATH 2135, and MATH 3001.
- By the end of the sixth semester, complete CSCI 3104, MATH 4650/APPM 4650 and one of the additionally required upper-division MATH classes.
- By the end of the eighth semester, complete the major.

Statistics Track

Aimed at students seeking a background in statistics and/or data science, the statistics track requires the following courses:

Required Courses

MATH 4510	Introduction to Probability Theory	3
MATH 4520	Introduction to Mathematical Statistics	3
MATH 4540	Introduction to Time Series	3

Electives

Two of the following courses: APPM 4580 (Statistical Applications), APPM 4590 (Statistical Modeling), APPM 4560 (Markov Processes), MATH 6550 (Introduction to Stochastic Processes)	6
--	---

Total Credit Hours	15
--------------------	----

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress," as it is used here, refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in mathematics, students should meet the following requirements.

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete Calculus 1, Calculus 2, Calculus 3, MATH 2001, MATH 2135, and MATH 4510.
- By the end of the sixth semester, complete MATH 3001, MATH 4520, and MATH 4540.
- By the end of the eighth semester, complete the major.

Mathematics - Minor

The undergraduate minor in mathematics emphasizes knowledge and awareness of:

- calculus of several variables and vector analysis;
- the structure of mathematical proofs and definitions;
- basic linear algebra and the theory of vector spaces;
- at least one additional specialized area of mathematics.

Requirements

Declaration of a minor in mathematics is open to any student enrolled at CU Boulder, regardless of college or school.

To earn a minor in mathematics, students must complete the following courses with a grade of C- or better in each course, and they must have at least a C (2.00) average for all attempted work in mathematics.

Required Courses and Semester Credit Hours

Required Courses

MATH 1300	Calculus 1	4-5
or APPM 1350	Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
or APPM 1360	Calculus 2 for Engineers	
MATH 2400	Calculus 3	4
or APPM 2350	Calculus 3 for Engineers	
MATH 2001	Introduction to Discrete Mathematics	3
MATH 2130	Introduction to Linear Algebra for Non-Mathematics Majors	3
or MATH 2135	Introduction to Linear Algebra for Mathematics Majors	

Electives

Three upper-division MATH courses (at least one at the 4000-level)	9
--	---

Total Credit Hours	27-29
--------------------	-------

Medieval and Early Modern Studies

To the Middle Ages, the modern world owes the preservation and transmission of Latin and Greek; the development of a host of vernaculars; the evolution of Judaism and Christianity, and the rise of Islam; the renewed study of Roman law; the growth of a mercantile class; the creation of musical notation; the erection of ecclesiastical monuments; the foundations of constitutional government; and the institution of universities. The early modern period inherited and elaborated all these institutions and inventions, adapting them to fit new conceptions of man (and woman), church, and state.

The Center for Medieval and Early Modern Studies is founded on the convictions that the period from c. 400 to c. 1800, conceived in a global context, is a dynamic cultural continuum and ever-evolving system; that study of both periods in tandem sheds new light on each; and that the unity and diversity of the premodern world can be understood and appreciated only from an interdisciplinary perspective. Medieval and Early Modern Studies therefore crosses boundaries of period, nation, language and discipline, and the center's prime function is to facilitate and encourage interdepartmental study and teaching.

Courses throughout the curriculum are available to students whose area of specialization within a given department is the medieval and/or early modern period(s) and who wish to broaden their knowledge of the cultures of the period. With the approval of the major department, a coherent group of these courses may be accepted as a related program of study and as part of the requirements for an undergraduate degree. For additional details concerning these courses, see departmental listings.

For more information see, <http://www.colorado.edu/cmems/>.

Course code for this program is MEMS.

Certificate

- Medieval and Early Modern Studies - Certificate (p. 428)

MEMS 2020 (3) Introduction to Medieval and Renaissance Studies

Introduces students to the literature, history, culture and art of Europe and the Mediterranean basin from late antiquity through the renaissance. The course is interdisciplinary and focuses on topics which reveal the dynamism and diversity of pre-modern culture.

MEMS 4020 (3) Medieval and Early Modern Studies: Texts and Contexts

Focuses on communities in the Mediterranean basin and Europe (i.e., cloister, court and city), discussing major literary texts and visual monuments associated with them and their historical context.

Emphasizes tensions between tradition and innovation, Latin and vernacular, East and West, Christian and non-Christian (Jewish and Islam), sacred and secular, authority and freedom and male and female.

Equivalent - Duplicate Degree Credit Not Granted: MEMS 5020

Requisites: Requires a prerequisite course of CLAS 1110 and CLAS 1120 and ENGL 2503 or HIST 1011 and HIST 1012 (minimum grade D-).

MEMS 4030 (3) Medieval and Early Modern Studies: Special Topics

Different topics offered by the faculty of the Medieval and Early Modern Studies Program in alternate semesters. Topics may include the literature of pilgrimage and travel, women and minorities, theatre, music, epic, medieval and early modern views of the classics, the Bible, and medieval and early modern theories of education.

Equivalent - Duplicate Degree Credit Not Granted: MEMS 5030

Requisites: Requires a prerequisite course of CLAS 1110 and CLAS 1120 and ENGL 2503 or HIST 1011 and HIST 1012 (minimum grade D-).

Medieval and Early Modern Studies - Certificate

Students who pursue the MEMS certificate are free to take a variety of courses offered in numerous departments across the CU Boulder campus. In consultation with the CMEMS Director, each student can tailor the certificate to meet their intellectual interests in the study of premodern Europe and its global influence. Students usually earn the certificate in tandem with a BA degree in history, classics or English and find the analytical and linguistic skills particularly useful for graduate work in history and law.

Requirements

Students must complete at least 24 credit hours of approved course work, as follows.

Required Courses and Semester Credit Hours

Select one of the following lower-division introductory survey courses: 3

ARTH 1300	History of World Art 1
ARTH 1400	History of World Art 2
HIST 1011	Greeks, Romans, Kings & Crusaders: European History to 1600
HUMN 1110	Introduction to Humanities: Literature 1
HUMN 1120	Introduction to Humanities: Literature 2
HUMN 1210	Introduction to Humanities: Art and Music 1
HUMN 1220	Introduction to Humanities: Art and Music 2

Senior-level seminar:

3

MEMS 4030	Medieval and Early Modern Studies: Special Topics (or equivalent) ¹	
Capstone Seminar:		3
MEMS 4020	Medieval and Early Modern Studies: Texts and Contexts (or equivalent) (with a minimum grade of B) ¹	
Five electives, at least four of which must be upper division and two of which must be in disciplines other than the major		15
Total Credit Hours		24

¹ Substitutions for MEMS 4020 and MEMS 4030 may be made at the discretion of the MEMS advisor or faculty chair.

Molecular, Cellular and Developmental Biology

The undergraduate program in MCDB is directed toward understanding the molecular and cellular mechanisms that provide the basis for biological structure, growth, evolution, embryonic development and genetic inheritance. Undergraduate majors learn about the scientific method, experimental approaches and groundbreaking discoveries that have made modern molecular and cellular biology such an important force in medicine, agriculture, and the growing biotechnology industry. They also learn about the diverse tools of modern biology, including recombinant DNA, genomic mapping, transgenic organisms, gene targeting, analysis of mutants, biochemical purification, antibody probes, laser manipulation of living cells, light and electron microscopy, and computer modeling. In addition to academic and laboratory classes, MCDB majors have many opportunities to participate in ongoing research in the department.

Learn how living systems operate at the cellular and molecular levels of organization, their assembly and structure, with heavy emphasis on genetic information and regulation, including embryonic development.

Course code for this program is MCDB.

Animal Use Policy

Biology is the science of life, and a major in it must include some hands-on experience with living organisms to be complete. Exercises involving the use of living animals or animal tissues are included, therefore, in MCDB laboratory courses. Majors with objections on moral grounds may arrange to limit their participation in these exercises, although their educational experience is compromised by doing so.

Nonmajors may take MCD biology lecture courses without the accompanying laboratories. Laboratory courses in which living vertebrate animals or tissues are used are identified in the course description section of this catalog. For additional information, please contact the department.

Bachelor's Degree

- Molecular, Cellular and Developmental Biology - Bachelor of Arts (BA) (p. 436)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lois A.
Professor Emeritus

Anseth, Kristi S (https://experts.colorado.edu/display/fisid_103471)

MCDB 1030 (3) Introduction to Molecular Biology

Introduces the foundation of molecular, cell, developmental and evolutionary biology in the context of human development and disease. Including how the immune system works to protect us from infections and technologies being developed towards the goal of better health around the world. For nonmajors.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

MCDB 1041 (3) Fundamentals of Human Genetics

Covers the basic principles of genetics, human pedigree analysis, and how genetic diseases affect DNA, RNA, and proteins. Considers implications of this research for medicine and society. For nonmajors.

Recommended: Requisite good background in high school chemistry and biology.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

MCDB 1043 (1) Exploring Genetics Laboratory

Provides hands-on experience with fundamental genetic principles.

Topics include scientific method, experimental design, mitosis, meiosis, classical genetics, molecular genetics, mutagenesis, DNA analysis, and transgenic organisms. Wherever possible, the focus of the lab will be on integrating science process skills with human-relevant experiments to encourage students to learn and apply science skills while seeing the application to humans.

Requisites: Restricted to Biological Sciences (MCDB) non-majors only.

Recommended: Corequisite MCDB 1041.

Additional Information: Arts Sci Core Curr: Natural Science Lab

MCDB 1111 (3) Core Concepts in Biology I: Evolutionary, Molecular and Cell Biology

Web-based, in-class discussion course covering the fundamental properties shaping living systems. Uses evolutionary (including social) and physical-chemical mechanisms to frame molecular, cellular and organismic processes. Interpreting and answering questions scientifically as well as quantitative reasoning skills are stressed. Fulfills the MCDB major's requirement for MCDB 1150.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 1150

Additional Information: Arts Sci Core Curr: Natural Science Sequence

MCDB 1150 (3) Introduction to Cellular and Molecular Biology

Covers biologically important macromolecules and biological processes, together with an introduction to cell structure, function, and physiology. Provides the foundation for advanced MCDB courses to majors, and a rigorous overview of modern biology to nonmajors. MCDB 1151 must be taken concurrently by MCDB and biochemistry majors and prehealth science students.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 1111

Recommended: Prerequisite high school chemistry and algebra, and recommended corequisites of MCDB 1151 and MCDB 1152.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

MAPS Course: Natural Science Lab or Lab/Lec

MCDB 1151 (1) Introduction to Cell and Molecular Biology Lab

Offers one two-hour lab per week designed to acquaint students with research techniques and concepts in molecular and cellular biology. Topics include cell structure, function, physiology, and recombinant DNA.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 1111

Recommended: Corequisite MCDB 1150 or CHEN 2810 or EBIO 1210.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science Lab or Lab/Lec

MCDB 1152 (1) Problem Solving Co-Seminar for Introduction to Molecular and Cellular Biology

Uses problem solving and other interactive group work to aid student learning in a corequisite course, MCDB 1150. Students will work in small groups on learning and practicing how to solve difficult conceptual problems, as well as using hands-on activities and concept mapping to help learn content.

Recommended: Corequisite MCDB 1150.

Grading Basis: Pass/Fail

MCDB 1161 (2) From Dirt to DNA: Phage Genomics Laboratory I

Provides laboratory experience working on a bacteriophage genomics research project. Students will study novel bacteriophage they isolate from the environment. Topics covered include phage biology, bacteria and phage culturing and amplification, DNA isolation, restriction digest analysis, agarose gel electrophoresis, and electron microscopy.

Additional Information: Arts Sci Core Curr: Natural Science Lab

MCDB 1171 (2) Drug Discovery Through Hands-on Screens I

Provides introductory research and laboratory experience. Students will work in teams to screen small molecule libraries for novel antibiotics using the bacterium *Salmonella* as a model system. Topics covered include the basic biology of the model system, genetics, approaches to screening for new therapeutics, statistical analysis of the data, compound verification and lead compound development.

Requisites: Requires corequisite course of MCDB 1150.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Lab

MCDB 2150 (3) Principles of Genetics

Introduces the behavior of genes and chromosomes in eukaryotic and prokaryotic organisms. Covers three areas: transmission genetics, molecular genetics, and population genetics. Attention is given to genetic mapping, recombinant DNA procedures, and gene expression.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 2222

Recommended: Prerequisite MCDB 1150 or EBIO 1210 or CHEN 2810 (minimum grade C-) and recommended corequisites of MCDB 2151 and MCDB 2152.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

MCDB 2151 (1) Principles of Genetics Laboratory

One two-hour lab per week. Provides hands-on experience with principles introduced in MCDB 2150. Topics include mitosis, meiosis, classical genetics, complementation, mutagenesis, DNA replication, natural selection, and evolution.

Recommended: Prerequisites MCDB 1150 and MCDB 1151 (all minimum grade D-), and recommended corequisite of MCDB 2150.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

MCDB 2152 (1) Problem Solving Co-Seminars for Genetics

Uses problem solving and other interactive group work to aid student learning in MCDB 2150. Students will work in small groups on learning and practicing how to solve difficult conceptual problems, as well as using hands-on activities and concept mapping to help learn content.

Recommended: Corequisite MCDB 2150.

Grading Basis: Pass/Fail

MCDB 2161 (2) From DNA to Genes, Phage Genomics Laboratory II

Provides laboratory experience working on a bacteriophage isolated during the previous semester. Topics include bioinformatics, genome annotation, open reading frame and RNA identification, BLAST analysis, phylogenetics and submission to a genomic database.

MCDB 2171 (2) Drug Discovery Through Hands-On Screens 2

Provides introductory research and laboratory experience. Students will work in teams to screen molecule libraries using fruit flies as a model system. Topics covered include the basic biology of the model system, genetics, approaches to screening for new therapeutics, statistical analysis of the data, compound verification and lead compound development.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires a corequisite course of MCDB 2150.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Lab

MCDB 2222 (3) Core Concepts in Biology II: Genes, Genetics and Phenotypes

Web-based, in-class discussion course focused on the origins of genetic variation and inheritance, genome dynamics and gene expression and their relationship to phenotype(s). Interpreting, explaining and answering questions scientifically as well as quantitative reasoning are stress. Course fulfills the departmental requirement for MCDB 2150.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 2150

Requisites: Requires a prerequisite course of MCDB 1111 or MCDB 1150 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Sequence

MCDB 2840 (1-3) Lower-Division Independent Study

Students with adequate prerequisites should take MCDB 4840.

Repeatable: Repeatable for up to 8.00 total credit hours.

MCDB 3010 (1-2) Undergraduate Teaching in Course-Based Undergraduate Research Experiences

To address the need for more advanced and continued participation in course-based research, MCDB 3010 is designed to train students who have taken MCDB 1171 or MCDB 2171 or MCDB 4202 as teaching assistants. The aim is to enhance the students' experience and responsibilities in course-based research and to prepare them for research and mentorship in a departmental or graduate laboratory.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires prerequisite course of MCDB 1171 or MCDB 2171 or MCDB 1161 or MCDB 4202 (minimum grade B).

Grading Basis: Letter Grade

MCDB 3135 (3) Molecular Cell Biology I

Examines the central dogma of biology by discussing the most important molecules in cells (DNA, RNA and protein) and how their synthesis (DNA replication, transcription, RNA processing and translation) is regulated. Incorporated into the discussion is how recombinant DNA techniques are used to discover and dissect cellular processes, how to design and interpret experiments, and understanding the limits of experiments to draw conclusions. These principles are the foundation for subsequent examination of intracellular mechanisms in MCDB 3145.

Requisites: Requires prerequisite courses of MCDB 2150 or EBIO 2070 and CHEM 1113 or CHEM 1400 or CHEN 1211 (all minimum grade C-).

MCDB 3140 (2) Cell Biology Laboratory

One four-hour lab per week. Provides experience with and exposure to modern cell biology laboratory techniques. Topics include microscopy, immunocytochemistry, Western blotting, Southern blotting, and flow cytometry. This course does not use vertebrate animals.

Recommended: Corequisite MCDB 3135 or MCDB 3145.

MCDB 3145 (3) Molecular Cell Biology II

Examines intracellular mechanisms, including transport of ions and small molecules across membranes; protein targeting to organelles; membrane trafficking between organelles; signal transduction; the cytoskeleton; and the cell cycle. Analysis of these activities is from the experimental perspective established in MCDB 3135.

Recommended: Prerequisite MCDB 3135 (minimum grade C-), and recommended prerequisite or corequisite of MCDB 3140 concurrent with either this class or MCDB 3135.

MCDB 3150 (3) Biology of the Cancer Cell

Highlights dimensions of the cancer problem; cancer as a genetic/cellular disease; chemicals, viruses, and radiation as causes of cancer; cancer and diet; cancer epidemiology; cancer risk factors; proto-oncogenes, oncogenes, and cancer suppressor genes; and prevention of cancer.

Recommended: Prerequisite MCDB 2150 or EBIO 2070 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

MCDB 3160 (3) Pandemic! How the Genomics Revolution Can Save Us All

Illustrate how cutting edge tools in genomics can be used to study, monitor and cure disease caused by new and re-emerging human pathogens such as SARS/MERS, Ebola virus, Neisseria meningitides, influenza virus and malaria parasites. Technologies covered will include genome sequencing, annotation, transcriptomics, phylogenetics and genotyping of microbial populations. An integrated approach to this topic will be presented, with these concepts threaded throughout: natural history and evolution of pathogens, molecular biology, immunology, epidemiology, public health and clinical diagnosis. There may be some overlap with material covered in MCDB 1030 and MCDB 4750.

Requisites: Requires prerequisite course of MCDB 2150 or EBIO 2070 (minimum grade B-).

Grading Basis: Letter Grade

MCDB 3330 (3) Evolution and Creationism

Intensive lecture/discussion course on the interrelationships among science, religion, and social policy. Includes historical and scientific development of evolution theory, social Darwinism/sociobiology, and the public perception of science.

Recommended: Prerequisite MCDB 1150 or EBIO 1210 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

MCDB 3332 (1) Scientific Ethics

A reading/discussion course on the implications of modern biologically-based technologies, from in vitro fertilization and its variants and issues surrounding these techniques, to genomic testing of embryos and adults, the genetic engineering of organisms, including humans, to issues surrounding communicable diseases and vaccination. Discussion will include a serious consideration of various philosophical and non-scientific perspectives.

Requisites: Requires prerequisite course of MCDB 1150 or EBIO 1210 (minimum grade C). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

MCDB 3333 (3) Biomedical Innovations and Discoveries

Discusses how biological inventions and discoveries fuel biomedical innovations, how important techniques in molecular biology have advanced our understanding of cellular processes and contributed to biotechnology revolution and biomedical sciences to benefit our society. Guest lectures from experts in industry and site visits will enhance the course by providing a non-academic perspective, networking opportunities, and unexpected avenues for career paths for our graduates. Department enforced prerequisite: MCDB 2150 or EBIO 2070 or instructor consent.

Grading Basis: Letter Grade

MCDB 3350 (3) Fertility, Sterility, and Early Mammalian Development

Describes the production of germ cells, ovulation, fertilization, reproductive cycles, controls of reproduction, early development of the embryo, methods of contraception, and causes and treatments of sterility. Recommended for students planning careers in the health sciences.

Recommended: Prerequisite MCDB 1150 or EBIO 1210 (minimum grade C-).

MCDB 3501 (3) Structural Methods for Biological Macromolecules

Teaches fundamental knowledge about protein structures, protein interactions and protein folding. Discusses in detail the most common methods on how proteins and macromolecular complexes are studied, such as X-ray crystallography, NMR-spectroscopy and electron microscopy. Offers about 50 percent direct teaching, 40 percent discussion of papers in a journal club style and 10 percent hands-on practicals on software packages relevant to structural biology. Formerly MCDB 4501.

Recommended: Prerequisite MCDB 2150 or EBIO 2070 (minimum grade C-).

MCDB 3650 (3) The Brain - From Molecules to Behavior

Examines the molecular basis of the brain's role in thought, action, and consciousness by exploring issues such as relationship of cognition and localized brain function, sensory systems and their role in cognition, learning and memory, and behavioral neurochemistry.

Recommended: Prerequisite MCDB 2150 or EBIO 2070 (minimum grade C-).

MCDB 3651 (3) The Brain: Dysfunction to Disease

Misregulation of synaptic function results in abnormal brain function and behavior that is manifested in numerous neurological and psychiatric diseases. Explores the molecular mechanisms responsible for altered synaptic plasticity in neurological diseases such as frontotemporal dementia (FTD), Parkinson's disease, Huntington's disease, Creutzfeldt-Jakob disease, Down syndrome, epilepsy, autism, and Alzheimer's disease.

Recommended: Prerequisites MCDB 3650 or NRSC 2100 (minimum grade C-) or instructor consent required.

Grading Basis: Letter Grade

MCDB 3700 (3) Poisons in Cell Biology and Society

Investigate the inner workings of our cells by studying how poisons disrupt these processes. We will learn how selected poisons affect critical processes inside the cell to cause death or destruction. The scientific aspects of the poison will be discussed in the context of its historical significance or impact on society and popular culture. Department enforced prerequisites: MCDB 1150 or EBIO 1210 and MCDB 2150.

MCDB 3990 (3) Introduction to Systems Biology for Biologists

Introduces majors with relatively little mathematical experience to the major concepts in systems biology, in the context of key processes (cell growth, division, adaptation, development, and disease). Designed to help students master the necessary mathematical tools involved.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and MATH 1310 (minimum grade C-).

Grading Basis: Letter Grade

MCDB 4100 (1-6) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4111 (3) Experimental Design and Research in Cell and Molecular Biology

Learning molecular and cell biology experimental design and approaches through independent research projects. Students, working in pairs, will explore the research process and gain extensive first-hand experience in: hypothesis formation; experimental design; solution preparation and experimental methodology; proposal presentation and defense (oral and written); formal presentation of results and conclusions (oral and written in a publication-style format); the publication process; critical reading and evaluation of primary scientific literature.

Recommended: Prerequisite MCDB 1150 or EBIO 1210 (minimum grade C-) and recommended corequisite of MCDB 3135.

MCDB 4201 (3) From Bench to Bedside: The Role of Science in Medicine

Demonstrates the breadth of research in the life sciences and how such research (not just in medical schools) can lead to medical applications. Lecturers from life sciences, the medical school and biotechnology, discuss drug development and the transfer of research into the clinical arena. Students also prepare a paper and presentation on the development of a commercial drug.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4202 (3) The Python Project

Studies how python hearts grow after they consume a meal.

Understanding the molecular processes of growth and regression in the python heart could lead to development of therapeutics for heart disease. Students work in groups in the laboratory and generate novel data by using modern molecular biology and bioinformatic techniques to clone and sequence candidate molecules of the python genome. May be repeated once.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4234 (3) Research Methods

Presents a rigorous and pedagogically coherent introduction into the experimental process used to collect data, formulate hypotheses, and answer scientific questions in general, and biological questions in particular. Includes a detailed consideration of the elements of experimental design, data collection and analysis, and the interpretation of results in the context of effective science teaching. Part of the CU Teach course sequence for teacher certification in science and mathematics.

Requisites: Restricted to Biological Sciences (MCDB) majors or School of Education (EDUC) undergraduate students only.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4300 (3) Immunology

Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and malfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5301

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4310 (3) Microbial Genetics and Physiology

Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism, regulation of gene expression and protein function, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5310

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-) and recommended corequisite of CHEM 4611.

MCDB 4312 (3-4) Quantitative Optical Imaging

Explores the fundamentals of optical imaging in biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis. MATLAB will be taught throughout the course and used for image processing.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5312

Grading Basis: Letter Grade

MCDB 4350 (3) Microbial Diversity and the Biosphere

Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5350

Recommended: Prerequisites MCDB 1150 or EBIO 1210 and CHEM 1133 and EBIO 3400 and/or CHEM 3311 (minimum grade C-).

MCDB 4361 (3) Evolution and Development

Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. Reviews basic principles of molecular developmental biology and applies these concepts to critically discuss current research in the field of Evo-Devo (evolution and development). Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5361

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4410 (3) Human Molecular Genetics

Studies the human organism as a genetic system, including effect of mutation on protein structure and function, biochemical basis of human genetic disease, polymorphic gene loci, gene mapping and identification, gene cloning and characterization, and impact of human genetics on medicine and society. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisite MCDB 3135 (minimum grade C-).

MCDB 4422 (3) Molecular Biology of Free Radicals: Role(s) in Oxidative Stress, Signaling, Disease, Aging

Examines how free radicals are formed in biological systems and their roles in oxidative stress, cell signalling, aging, and disease. Emphasis will be placed on the recent literature. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and CHEM 3311 (minimum grade C-).

MCDB 4425 (3) Topics in Membrane Biology: Cell Biology, Physiology and Disease

Students will apply their knowledge of basic biology to exploring several of the most exciting topics in biomedicine including protein folding and stress responses, nutrient sensing and balance and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes and cardiovascular disease. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5425

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-) or instructor consent required.

MCDB 4426 (3) Cell Signaling and Developmental Regulation

Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5426

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and CHEM 4700 (minimum grade C-).

MCDB 4427 (3) Biology of the Visual System

Explores the neurobiology, cell biology, genetics and developmental biology of the visual system. Discusses neurodegenerative and vascular diseases that lead to blindness. Students read and analyze original research articles to train scientific reasoning. Involves student-organized presentations and classroom discussion. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5427

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-) or instructor consent required.

MCDB 4441 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5441 and EBIO 4440 and EBIO 5440

Recommended: Prerequisites MCDB 1150 or EBIO 1210 and MCDB 2150 or EBIO 2070 (minimum grade C-).

MCDB 4444 (3) Cellular Basis of Disease

Explores the cellular basis of disease. Discusses diseases arising from defects in intracellular targeting, cytoskeletal function, intracellular signaling, genomic instability, gene regulation, cell proliferation, and cell death. Involves student-organized presentations and classroom discussion. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4471 (3) Mechanisms of Gene Regulation in Eukaryotes

Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing and translation. Is based on critical analysis of primary research papers. Written assignments and oral presentations are required. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5471

Recommended: Prerequisite MCDB 3135 (minimum grade C-) or instructor consent required.

MCDB 4520 (3) Bioinformatics and Genomics

Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics and pharmacogenomics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5520

Recommended: Prerequisites MCDB 3135 or CHEM 4700 (minimum grade C-).

MCDB 4521 (1) Bioinformatics and Genomics Laboratory

Provides experience with, and exposure to, computational and experimental methods in bioinformatics and genomics. Meets once a week. Students are expected to read original research papers, discuss findings, plan and execute data analysis in selected areas.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5521

Grading Basis: Letter Grade

MCDB 4550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5550 and PHYS 4550 and PHYS 5550

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and PHYS 2010 and PHYS 2020 and CHEM 1133 and MATH 1300 and/or CHEM 3311 (minimum grade C-) or instructor consent required.

MCDB 4560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5560 and PHYS 4560 and PHYS 5560

Requisites: Requires a prerequisites course of PHYS 2210 (minimum grade C-).

Recommended: Prerequisite PHYS 4230.

Grading Basis: Letter Grade

MCDB 4615 (3) Biology of Stem Cells

Stem cells have received considerable notice in both the scientific and social arena. Examines the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5615

Recommended: Prerequisite MCDB 3135 or MCDB 3145 or instructor consent required.

MCDB 4621 (3) Genome Databases: Mining and Management

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4621 or CHEM 5621 MCDB 5621

Recommended: Prerequisite MCDB 3135 or CSCI 3104 or CHEM 4700 and recommended corequisite of CSCI 2270.

MCDB 4650 (3) Developmental Biology

Explores the development of invertebrate and vertebrate organisms, emphasizing cellular, molecular and genetic mechanisms. Focuses on conceptual understanding and experimental approaches to topics such as embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis and developmental genetics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5651

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4680 (3) Mechanisms of Aging

Studies aging as a developmental process emphasizing genetic, cellular and molecular mechanisms. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5680

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4750 (3) Animal Virology

Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Includes critical analysis of primary research papers. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisite MCDB 3135 (minimum grade C-) or instructor consent required.

MCDB 4777 (3) Molecular Neurobiology

Introduces the functional anatomy of the nervous system and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5777

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4790 (3) Experimental Embryology

Embryology is studied by considering experiments relevant to specific topics of early animal development. Emphasizes reading, interpretation, and discussion of research articles.

Recommended: Prerequisites MCDB 3135 and MCDB 3145 (minimum grade C-).

MCDB 4810 (3) Insane in the Membrane: The Biology and Biophysics of the Membrane

Studies the biology and physics of the biomembrane. Topics include structure and mechanism of membrane proteins; membrane biogenesis; membrane protein folding and stability; membrane homeostasis; mechanisms of membrane fusion and fission; lipid trafficking. Fulfills MCDB scientific reasoning requirement.

Recommended: Prerequisite CHEM 4700 (minimum grade C-) or instructor consent required.

MCDB 4811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5811 and EDUC 4811 and EDUC 6811

Recommended: Prerequisites MCDB 1150 or EBIO 1210 and MCDB 2150 and MCDB 3145.

MCDB 4840 (1-6) Upper-Division Independent Study

An independent study contract is required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisite MCDB 2150.

MCDB 4980 (3) Honors Research

Provides faculty-supervised research for students who have been approved by the departmental honors committee. Normally taken during the semester before completion of the honors thesis.

Recommended: Prerequisite MCDB 4840 or comparable research experience, and minimum GPA of 3.20.

Additional Information: Arts Sciences Honors Course

MCDB 4990 (3) Honors Thesis

Involves the preparation and defense of an honors thesis, based on faculty-supervised original research, including final phases of the research project.

Recommended: Prerequisites MCDB 4840 or MCDB 4980 or comparable research experience, and minimum GPA of 3.3 and approval by the MCDB Honors Committee.

Additional Information: Arts Sciences Honors Course

Molecular, Cellular and Developmental Biology - Bachelor of Arts (BA)

The undergraduate degree in molecular, cellular and developmental biology emphasizes knowledge and awareness of:

- the biological sciences in general and a detailed understanding of currently important aspects of cellular biology, molecular biology, biochemistry, genetics and developmental biology; and
- the relationship of the specialty area to broader areas of science and to society in general, including ethical issues raised by current biological research and by the rapid growth of biotechnology as an important shaping force for the future.

In addition, students completing the degree in molecular, cellular and developmental biology are expected to acquire the ability and skills to:

- learn detailed laboratory procedures rapidly when the need arises;
- demonstrate a scientific vocabulary and an understanding of research methods that permits the comprehension of current journal articles, extraction of pertinent information and judgment of the quality of the work described;
- evaluate a biological problem, determine which aspects are understood and apply basic research methods and techniques to the unknown aspects; and

- communicate scientific concepts and analytical arguments clearly and concisely, both orally and in writing.

Requirements

Prerequisites

It is MCDB policy to enforce the course prerequisites listed in the course catalog. If you have not either taken and passed (C- or better) the prerequisites for a course, or obtained permission from the instructor or a departmental advisor to take the course based on equivalent preparatory course work or experience here or elsewhere, you may be administratively dropped from the course.

Course Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. All required courses must be completed with a grade of C- or better.

It is strongly recommended that MCDB majors consult with a departmental advisor before applying AP, IB or CLEP credit. Students majoring in MCDB who transfer biology credit from other institutions also must consult a departmental advisor.

Students who plan to double major with biochemistry or chemistry are encouraged to meet with an academic advisor to understand how their chemistry courses will apply to the MCDB major.

Students who plan to also pursue a degree in engineering are encouraged to meet with an academic advisor to understand how their chemistry and calculus courses will apply to the MCDB major.

Required Courses and Credit Hours

Required Courses

MCDB 1150	Introduction to Cellular and Molecular Biology (MCDB 1152 is a recommended coseminar for MCDB 1150) ¹	3
MCDB 2150	Principles of Genetics (MCDB 2152 is a recommended coseminar for MCDB 2150) ²	3
Choose on of the following research-based introductory labs		2
MCDB 1161	From Dirt to DNA: Phage Genomics Laboratory I	
MCDB 1171	Drug Discovery Through Hands-on Screens I	
MCDB 2171	Drug Discovery Through Hands-On Screens 2	
MCDB 3135	Molecular Cell Biology I	3
MCDB 3140	Cell Biology Laboratory	2
MCDB 3145	Molecular Cell Biology II	3

Upper division capstone and scientific reasoning requirements:

Select one of the following MCDB Capstone courses:		3
MCDB 4650	Developmental Biology	
MCDB 4300	Immunology	
MCDB 4777	Molecular Neurobiology	
Select one MCDB scientific reasoning course (see department for full list of approved courses)		3
MCDB 4350	Microbial Diversity and the Biosphere	
MCDB 4361	Evolution and Development	
MCDB 4410	Human Molecular Genetics	
MCDB 4422	Molecular Biology of Free Radicals: Role(s) in Oxidative Stress, Signaling, Disease, Aging	
MCDB 4425	Topics in Membrane Biology: Cell Biology, Physiology and Disease	

MCDB 4426	Cell Signaling and Developmental Regulation
MCDB 4427	Biology of the Visual System
MCDB 4444	Cellular Basis of Disease
MCDB 4471	Mechanisms of Gene Regulation in Eukaryotes
MCDB 4550	Cells, Molecules and Tissues: A Biophysical Approach
MCDB 4615	Biology of Stem Cells
MCDB 4680	Mechanisms of Aging
MCDB 4750	Animal Virology
MCDB 4790	Experimental Embryology
MCDB 4810	Insane in the Membrane: The Biology and Biophysics of the Membrane
MCDB 4811	Teaching and Learning Biology

Electives

An additional 8 credit hours of MCDB upper-division electives (see department for approved courses)³ 8

Required Ancillary Courses:

Complete the following chemistry courses: 18-20

CHEM 1113 General Chemistry 1
& CHEM 1114 and Laboratory in General Chemistry 1

CHEM 1133 General Chemistry 2
& CHEM 1134 and Laboratory in General Chemistry 2

CHEM 3311 Organic Chemistry 1
& CHEM 3321 and Laboratory in Organic Chemistry 1

CHEM 4611 Survey of Biochemistry

Select one of the following physics sequences: 9-10

PHYS 1110 General Physics 1
& PHYS 1120 and General Physics 2 (including PHYS 1140 lab)⁴

PHYS 2010 General Physics 1
& PHYS 2020 and General Physics 2⁴

Select one of the following calculus or statistics courses: 3-5

Calculus:

MATH 1300 Calculus 1

MATH 1310 Calculus, Systems, and Modeling

APPM 1350 Calculus 1 for Engineers

Statistics:

MATH 2510 Introduction to Statistics

EBIO 1010 Introduction to Quantitative Thinking for Biologists

IPHY 2800 Introduction to Statistics

PSYC 2111 Psychological Science I: Statistics

Total Credit Hours 60-65

¹ EBIO 1210 is an acceptable alternative to MCDB 1150.

² EBIO 2070 is accepted in place of MCDB 2150.

³ Up to 6 hours of MCDB 4840 Upper-Division Independent Study, MCDB 4980 Honors Research, MCDB 4990 Honors Thesis, or select courses from outside MCDB may be used. See department for details.

⁴ PHYS 2010 and 2020 are algebra based. PHYS 1110, 1120 and 1140 are calculus-based and require calculus 1 and 2.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a

requirement for the major. To maintain adequate progress in molecular, cellular and developmental biology, students should meet the following requirements:

- In the first semester, declare the MCDB major.*
- During the first and second semesters, complete either general chemistry or the introductory MCDB sequence.
- By the end of the fourth semester, complete general chemistry and the introductory MCDB sequence with a C- or better.
- By the end of the eighth semester, complete the major.

*If the major is not started in the first year, the student must meet with an MCDB academic advisor to ensure that it is still possible to complete the major in 4 years.

Peace and Conflict Studies

Peace and Conflict Studies (PACS) is an interdisciplinary field, focused on advancing our understanding of conflict dynamics and improving our ability to wisely, equitably, and efficiently handle conflict.

The program empowers students by teaching them sophisticated advocacy, collaboration and peace-building skills that are essential to solving today's big problems.

PACS offers an individually tailored program of study that provides students with:

- the ability to more constructively handle conflict in family, workplace, and community settings,
- a foundation for peace-and conflict-related careers, and
- a better understanding of public policy controversies.

Course code for this program is PACS.

Certificate

- Peace and Conflict Studies - Certificate (p. 438)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Castel, Alison Rebecca (https://experts.colorado.edu/display/fid_158167)

Instructor; MS, University of Pennsylvania

Taylor, Bryan Copeland (https://experts.colorado.edu/display/fid_107421)

PhD, University of Utah

PACS 2500 (3) Introduction to Peace, Conflict and Security Studies

Introduces the related fields of peace, conflict and security studies. Examines causes and dynamics of conflict and violence (interpersonal to global). Examines theory and research concerning peace movements, conflict resolution and security institutions. Explores career options in related fields.

Grading Basis: Letter Grade

PACS 3700 (3) Communication and Conflict Management

Examines interdisciplinary concepts and theories enabling students to better understand different types of conflict, sources of conflict, and communication patterns that serve to create, maintain and transform conflict. Teaches practical skills in conflict management areas such as bargaining, facilitation, mediation and negotiation.

Equivalent - Duplicate Degree Credit Not Granted: COMM 3700

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

PACS 3800 (3) Security Studies

Provides an introduction to the academic field of "Security Studies".

Focuses on motives, institutions and processes associated with societal defense against threats posed to cherished possessions and the pursuit of stable, autonomous and prosperous existence. Reviews related theoretical traditions associated with militarism, war and conflict.

Covers key concerns of (in-)security in post 9/11 global society, including surveillance, terrorism, genocide and insurgency.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3123

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

PACS 4500 (3) Senior Seminar in Peace, Conflict and Security Studies

Uses theoretical perspectives in peace, conflict and security studies to conduct in-depth research projects, using a case-study approach. Emphasizes use the critical thinking skills in writing, presentations and class discussion. Case study examples include: U.S. militarism, humanitarian intervention in genocide and environmental conflict resolution.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of PACS 2500 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

Grading Basis: Letter Grade

Peace and Conflict Studies - Certificate

The Certificate Program in Peace, Conflict and Security Studies (PACS) is designed to help students explore why conflict and violence occur, and learn how conflict can be managed and transformed to accomplish constructive ends. The certificate is granted by the College of Arts and Sciences, but students in any school or major at the University of Colorado Boulder may earn it.

The program develops an interdisciplinary perspective on the study of conflict, cooperation, war, and peace. Coursework focuses on theorizing and analyzing various forms of intra- and international conflict, and also related possibilities for personal and social change. Coursework also emphasizes development of practical skills and experience in conflict resolution and civic activism. The program encourages hands-on, "in the field" engagement through volunteer service, enrollment in study-abroad programs, and internship placement with related agencies and programs.

For more information or an application, visit the Peace and Conflict Studies Program (<http://www.colorado.edu/pacs>) website.

Course code for this program is PACS.

Requirements

Completion of the certification requires 24 credit hours (15 upper-division) of study, including:

Required Courses and Semester Credit Hours

Required Courses

PACS 2500	Introduction to Peace, Conflict and Security Studies	3
PACS 4500	Senior Seminar in Peace, Conflict and Security Studies	3

Electives

9 credit hours of relevant course work in the student's major	9
9 credit hours of relevant course work outside the major	9

Additional, optional PACS courses listed below:

PACS 3700	Communication and Conflict Management
PACS 3800	Security Studies

Total Credit Hours	24
--------------------	----

Philosophy

Philosophy provides an essential component in any sound general education – that form of education designed, not to prepare one for a specific career, but to give one a broad and general understanding of the world, the place of human beings in the world, and human values, as well as general intellectual skills that can be brought to bear on diverse subject matters.

Course code for this program is PHIL.

Bachelor's Degree

- Philosophy - Bachelor of Arts (BA) (p. 444)

Minor

- Philosophy - Minor (p. 446)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

PHIL 1000 (3) Introduction to Philosophy

Introduces students to the most fundamental questions of human existence, either typically or through various major figures in philosophy. Topics many include free will, the mind-body problem, the nature of the self, the existence of God, knowledge of the external world, the nature of morality, the meaning of life.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking
Arts Sci Core Curr: Ideals and Values

PHIL 1010 (3) Introduction to Western Philosophy: Ancient

Develops three related themes: the emergence in antiquity of a peculiarly scientific mode of thinking; the place of religious belief within this developing scientific world view; and the force of ethical speculation within the culture and political climates of ancient Greece and Rome. PHIL 1010 and PHIL 1020 may be taken in either order.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1030

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking
Arts Sci Core Curr: Historical Context

PHIL 1020 (3) Introduction to Western Philosophy: Modern

Introduces several philosophical texts and doctrines of 17th and 18th century Europe. Gives special attention to the connection between philosophical ideas and the wider historical milieu: social, political and literary. PHIL 1010 and PHIL 1020 may be taken in either order.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking
Arts Sci Core Curr: Historical Context

PHIL 1100 (3) Ethics

Introductory study of major philosophies on the nature of the good for humanity, principles of evaluation, and moral choice as they apply to contemporary moral problems.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking
Arts Sci Core Curr: Ideals and Values

PHIL 1160 (3) Introduction to Bioethics

Introduce students to topics in contemporary bioethics. No previous knowledge of science, philosophy, or bioethics will be presupposed. A primary goal will be to teach students how to think critically and write persuasively.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 1200 (3) Contemporary Social Problems

Examines competing positions in debates over a wide variety of controversial moral, social and political issues. Topics may include: abortion, world poverty, animal rights, immigration, physician-assisted suicide, freedom of religion, hate speech, cloning, income inequality, pornography, gun rights, racial profiling, capital punishment, overpopulation, prostitution, drug legalization, torture.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Arts Sci Core Curr: United States Context

MAPS Course: Social Science

PHIL 1400 (3) Philosophy and the Sciences

Considers philosophical topics and concepts related to the natural sciences, such as the following: science and pseudo-science; scientific method; the nature of explanation, theory, confirmation, and falsification; the effect of science on basic concepts like mind, freedom, time, and causality; ethics of experimentation; and the relation of science to society.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Natural Science Non-Sequence

PHIL 1440 (3) Critical Thinking

Introductory study of definition, informal fallacies and the principles and standards of correct reasoning. Provides practice in analyzing, evaluating and constructing frequently encountered types of arguments. Does not fulfill major requirement in logic.

PHIL 1500 (3) Reading, Writing and Reasoning

Teaches students how to write argumentative papers. Each seminar will focus narrowly on some controversial topic. For example, one seminar might focus on the existence of God, whereas another might question whether we have free will. In all cases, a significant portion of the course will be devoted to learning how to write cogent argumentative papers about controversial topics.

Additional Information: Arts Sci Core Curr: Written Communication

PHIL 1600 (3) Philosophy and Religion

Philosophical introduction to some of the central concepts and beliefs of religious traditions, focusing particularly on the question of the existence of God and on the relation between religious beliefs and moral beliefs.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Departmental Category: Asia Content

PHIL 1700 (3) Philosophy and the Arts

Considers philosophic questions involved in the analysis and assessment of artistic experiences and of the objects with which the arts, including the literary arts, are concerned.

PHIL 1750 (3) Philosophy through Literature

Introduces philosophy through literature. Selected novels, plays, and short stories that exemplify traditional problems in philosophy are read and discussed.

PHIL 1800 (3) Open Topics/Philosophy

Repeatable: Repeatable for up to 6.00 total credit hours.

PHIL 2140 (3) Environmental Justice

Traditional and contemporary theories of justice are employed in order to critically analyze social and political issues that have important environmental dimensions. Assesses the relationship of justice and equity to the presuppositions of national and global environmental issues and policies.

PHIL 2150 (3) Ethics and Sex

Explores a variety of moral questions relating to sex and procreation. Topics may include arguments for and against the wrongness of masturbation, homosexuality, transgenderism, incest, pedophilia, bestiality, necrophilia, voyeurism, pornography, sadomasochism, prostitution, abortion, commercial surrogacy and cloning, as well as arguments addressing such additional subjects as what constitutes rape and whether procreation is morally obligatory, optional, or forbidden.

PHIL 2200 (3) Major Social Theories

Introductory study of major philosophies of the past in relation to political, economic, and social issues.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 2220 (3) Philosophy and Law

Considers philosophical issues related to law in general and the U.S. system in particular. Topics to be covered may address such questions as the following: What is the nature of law? What kinds of acts should the law prohibit (e.g., abortion, drug use, pornography, cloning)? Is there a moral obligation to obey the law? Can civil disobedience be justified? Is there a justification for punishing people for breaking the law? Is capital punishment, in particular, morally justified?

Additional Information: Arts Sci Core Curr: United States Context

PHIL 2260 (3) Philosophy and Food

Introduces students to topics and issues connected to the nature of food. Helps students investigate questions about our food choices, production and distribution, as well as connection food bears to culture and identity. No previous experience in philosophy required or presupposed.

PHIL 2270 (3) Philosophy and Race

Explores the historical relationship between western philosophy and race and investigates the ways in which philosophy can be used to address contemporary racial issues.

Additional Information: Arts Sci Core Curr: Human Diversity

PHIL 2290 (3) Philosophy and Women

Explores different approaches to the study of women.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2290

Additional Information: Arts Sci Core Curr: Human Diversity

PHIL 2390 (3) Philosophy and Psychology

Interdisciplinary course on issues where philosophy and psychology meet. For example, topics such as selfhood, motivation, psychotherapy, freedom, and human behavior are examined. Selected readings in philosophy and psychology are required.

PHIL 2440 (3) Symbolic Logic

Introduces students to sentential logic, the logic of quantification and some of the basic concepts and results of metalogic (interpretations, validity and soundness).

PHIL 2750 (3) Philosophy and Science Fiction

Explores philosophical issues in science fiction literature and film. Topics may include time travel, artificial intelligence, free will, personal identity, and how scientific advances will change human life and society. Students may read science fiction stories and philosophical articles, and watch several movies.

PHIL 2800 (3) Open Topics/Philosophy

Repeatable: Repeatable for up to 6.00 total credit hours.

PHIL 2840 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

PHIL 3000 (3) History of Ancient Philosophy

Survey of selected figures in ancient Greek and Roman philosophy and in medieval philosophy. Philosophers studied may include the pre-Socratics, Plato, Aristotle, the Hellenistic philosophers and such figures as Aquinas and Occam. Explores the larger cultural context that influenced these philosophers and were, in turn, influenced by them. Department enforced prerequisite: 6 hours of philosophy coursework.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context

PHIL 3010 (3) History of Modern Philosophy

Introduces modern philosophy, focusing on the period from Descartes through Kant. In addition to careful analysis of philosophical arguments, attention is paid to the ways in which philosophers responded to and participated in major developments in the 17th and 18th century, such as the scientific revolution. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context

PHIL 3100 (3) Ethical Theory

Examines important doctrines and arguments in various areas of theoretical ethics, such as the normative ethics of behavior, axiology, virtue theory and metaethics.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 6 hours of philosophy course work.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 3110 (3) Feminist Practical Ethics

Explores a variety of personal and public policy issues in the light of the basic feminist commitment to opposing women's subordination. Provides a sense of how a principled commitment to feminism may influence or be influenced by prevailing interpretation of contemporary ideals and values, and gives an opportunity for developing skills of critical analysis.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3110

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PHIL 2290 or WGST 2000 or WGST 2290.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 3140 (3) Environmental Ethics

Examines major traditions in moral philosophy to see what light they shed on value issues in environmental policy and the value presuppositions of the economic, ecological, and juridical approaches to the environment.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3140

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PHIL 1100 or PHIL 1200 or PHIL 2200 or PHIL 3100 or PHIL 3200.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 3160 (3) Bioethics

Analysis of ethical problems involved in such issues as abortion, euthanasia, organ transplants, eugenics, treatment of the patient as a person and the institutional nature of the health care delivery system. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 3180 (3) Critical Thinking: Contemporary Topics

Looks at a selected topic such as nuclear disarmament, racial and sexual discrimination, animal rights, or abortion and euthanasia by examining issues through the lens of critical philosophical analysis. Reviews the reasoning behind espoused positions and the logical connections and argument forms they contain. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

PHIL 3190 (3-4) War and Morality

Focuses on moral issues raised by war as a human institution. What are the justifications, limits and alternatives? Does the advent of nuclear weapons change the nature of war? Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 3200 (3) Social and Political Philosophy

Systematic discussion and analysis of such philosophic ideas as community, freedom, political power, and violence.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite 6 hours of philosophy course work.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 3260 (3) Philosophy and the International Order

Considers philosophical topics concerning the international economic, political and legal systems. Topics that may be considered include the nature of international law, war and peace, humanitarian intervention, international justice, world hunger and human rights. Department enforced prerequisite: 6 hours philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 3310 (3) Cognitive Science

An interdisciplinary introduction to cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and LING 3005 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

PHIL 3410 (3) History of Science: Ancients to Newton

Surveys the history of science up to Newton, including the emergence of scientific modes of thinking from religious and philosophical roots in the Near East and Greece to the development of these modes in the Middle Ages and Renaissance. Culminates with Isaac Newton and the 17th century scientific revolution. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Natural Science Non-Sequence

PHIL 3430 (3) History of Science: Newton to Einstein

History of physical and biological science, from the epoch-making achievements of Charles Darwin in biology to the dawn of the 20th century revolutions in physics, chemistry and genetics. Deals with the success of the mechanical philosophy of nature and its problems. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Core Curr: Natural Science Non-Sequence

PHIL 3480 (3) Critical Thinking/Writing in Philosophy

Focuses upon the fundamental skills, methods, concepts and distinctions that are essential for the study of philosophy. Basic skills covered include the writing of philosophy papers, the reading of articles and the extraction and evaluation of arguments.

Requisites: Requires a prerequisite or corequisite course of PHIL 1440 or PHIL 2440 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Philosophy (PHIL) majors only (excluding minors).

Recommended: Prerequisites 6 hours of philosophy course work.
Additional Information: Arts Sci Core Curr: Written Communication

PHIL 3600 (3) Philosophy of Religion

Philosophical discussion of fundamental issues in religion, such as existence of God, religious experience, faith and reason, evil, immortality and religious language. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Ideals and Values

PHIL 3700 (3) Aesthetic Theory

Introduces major theories of aesthetics and contemporary discussions of problems, such as the nature of art and the problem of evaluations in art. Department enforced prerequisite: 6 hours of philosophy course work.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

PHIL 3800 (3) Open Topics in Philosophy

See current departmental announcements for specific content. Department enforced prerequisite: 6 hours of philosophy course work.

Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

PHIL 3840 (1-3) Independent Study

Department enforced prerequisite: 6 hours of philosophy course work.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

PHIL 3930 (1-6) Internship in Social Policy

Under the guidance of an official in a governmental or non-governmental organization, students are assigned to projects selected for their academic suitability as well as for value to the sponsoring organization. Prior approval of department required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites PHIL 1200 and PHIL 2200 and PHIL 3200 and 9 hours in moral or political philosophy course work.

PHIL 4010 (3) Single Philosopher

Intensively studies the work of one historical figure in philosophy, with the aim of reaching a broad understanding of the philosopher's whole body of thought. Philosophers covered include, from year to year, Plato, Aristotle, Augustine, Aquinas, Descartes, Spinoza, Locke, Leibniz, Hume, and Kant. Includes at least one course per year on an ancient author and one course per year on a modern author.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5010

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4020 (3) Topics in the History of Philosophy

Examines a specific philosophical problem over an extended historical period.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites 12 hours of philosophy course work including PHIL 3000 and PHIL 3010.

PHIL 4030 (3) Medieval Philosophy

Introduces philosophy from the late Roman era to the 14th century. Philosophers studied may include Augustine, Boethius, Aquinas, and Ockham. Topics range over religion, ethics, mind, and metaphysics.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4040 (3) Studies in 20th Century Philosophy

Studies two or three major philosophies prominent during the last century.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4070 (3) Existentialist Philosophy

Examines central figures and texts in the existential tradition, from Kierkegaard and Nietzsche to Heidegger and Sartre.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4110 (3) Contemporary Moral Theory

Provides an in-depth look at some recent work in moral theory. Topics covered, varying from year to year, include: consequentialism and its critics; virtue theory; moral psychology; impartiality and the personal point of view.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5110

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites PHIL 3100 and 12 hours philosophy course work.

PHIL 4120 (3) Philosophy and Animals

Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5120

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PHIL 3100 and 12 hours philosophy course work.

PHIL 4200 (3) Contemporary Political Philosophy

Provides a survey of recent approaches to political philosophy: liberalism (Rawls, Dworkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); feminism (Jaggar). Topics and readings vary with the instructor.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of PHIL 2200 and PHIL 3200 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours of philosophy course work.

PHIL 4210 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and CLAS 5041 and HIST 4041

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite CLAS 1051 or CLAS 1061 or HIST 1011 or HIST 1051 or HIST 1061 or PSCI 2004 or PHIL 3000.

PHIL 4250 (3) Marxism

Historical and systematic study of principal themes of Marxist thought, from its Hegelian origins to its contemporary varieties, emphasizing the works of Marx and Engels.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4251

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours of GRMN or PHIL course work or instructor consent.

PHIL 4260 (3) Philosophy of Law

Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5260

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4300 (3) Philosophy of Mind

Discusses topics in the philosophy of mind, including the mind-body problem, consciousness, intentionality, rationality, mental causation and the nature of mental states.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5300

Requisites: Requires prerequisite courses PHIL 2440 and PHIL 3010 and PHIL 3480 and PHIL 4340 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

PHIL 4340 (3) Epistemology

Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition.

Equivalent - Duplicate Degree Credit Not Granted: 5340

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Philosophy (PHIL) majors only.

Recommended: Prerequisites PHIL 3480 and 12 credit hours of philosophy including PHIL 2440 and PHIL 3010.

PHIL 4360 (3) Metaphysics

Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will and modality.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5360

Requisites: Requires prerequisite courses PHIL 2440 and PHIL 3010 and PHIL 3480 and PHIL 4340 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

PHIL 4370 (3) Free Will and Determinism

Explores the full range of questions relating to the problem of free will and determinism. Topics may include; the scientific evidence for determinism, hard versus soft determinism, arguments for and against the compatibility of free will and determinism, moral responsibility and the principle of alternate possibilities, hierarchical motivation, the deep self, reactive attitudes, the intelligibility question for libertarianism, divine foreknowledge.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5370

PHIL 4400 (3) Philosophy of Science

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5400

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites 12 hours philosophy course work including PHIL 2440.

PHIL 4440 (3) Topics in Logic

Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic. Department enforced prerequisite: 12 hours PHIL course work, including PHIL 2440.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

PHIL 4450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics. Uses case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5450 and PHYS 4450 and PHYS 5450

Requisites: Requires prerequisite course PHYS 1020 or PHYS 1120 or PHYS 2020 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4460 (3) Modal Logic

Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5460

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PHIL 2440.

PHIL 4470 (3) Probability and Rational Choice

Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox, and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle, and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons, and Schelling points), and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5470

Recommended: Prerequisite PHIL 2440 and 12 hours philosophy course work.

PHIL 4490 (3) Philosophy of Language

Examines theories and problems regarding the nature of language and its relation to reality. Concepts discussed include sense, reference, conventions, intentions and their relation to science and social life. Relevant literature includes readings in Frege, Russell, Quine, Putnam, Kripke and Chomsky.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5490

Requisites: Requires prerequisite course PHIL 2440 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4600 (1) Theology Forum Seminar

Discusses a variety of theological and philosophical topics. Some reading, much discussion, occasional guest speakers.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4800 (3) Open Topics in Philosophy

See current departmental announcements for specific content.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4830 (3) Senior Seminar in Philosophy

Critical in-depth examination of a selected philosophical topic.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Philosophy (PHIL) majors only.

Recommended: Prerequisite 15 hours philosophy course work.

PHIL 4840 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Recommended: Prerequisite 12 hours philosophy course work.

PHIL 4950 (3) Honors Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 12 hours philosophy course work.

Additional Information: Arts Sciences Honors Course

Philosophy - Bachelor of Arts (BA)

The undergraduate degree in philosophy emphasizes knowledge and awareness of:

- some of the principal philosophical texts in the history of western philosophy, from its beginnings in Greece to the late 19th century;
- some of the main currents in 20th century philosophy, including some acquaintance with contemporary philosophical issues and modes of inquiry;
- a single major author or a single philosophical movement; and
- elementary formal logic.

In addition, students completing the major will develop the knowledge and skills to:

- form reasoned opinions about the issues—moral, religious, political, etc.—that educated people debate;
- understand, analyze and evaluate complex arguments and theories;
- distinguish between the main thrust of an argument or position and what is ancillary to it;
- discover and critically examine the underlying presuppositions of major systems of ideas or programs for action;
- see important connections between different systems of ideas or programs for action;
- explain difficult ideas and concepts in an informed, effective and coherent manner;
- develop a thesis and present a coherent argument for it;
- write a clear and coherent essay; and
- engage in rational and productive discussion of issues and arguments.

In addition to the general philosophy major, the department offers two topically oriented major tracks that are interdisciplinary in nature: law and society and values and social policy.

Concurrent Degree Program BA/MA in Philosophy

The Philosophy Department offers a five-year program that leads to the concurrent awarding of both the BA and MA in philosophy (p. 1051). Students who successfully complete this program receive the two degrees simultaneously, normally at the end of their fifth year of study.

To complete the concurrent BA/MA program, the student will fulfill separately all requirements for the BA and thesis-based MA, with the exception that two 4000-level courses can satisfy requirements for both the BA and the MA. In addition to these two overlapping 4000-level courses, the student must complete all of the remaining requirements for the general major in philosophy, as well as all of the remaining requirements for the thesis-based MA in philosophy.

For more information, see the department's Concurrent BA/MA Program (<http://www.colorado.edu/philosophy/undergraduate/concurrent-ba-ma-program>) webpage.

Requirements

For the undergraduate degree in philosophy, students must take 33 to 45 credit hours in philosophy, no fewer than 18 of which must be upper division, earning 33 credit hours with a grade of C- or better in each course in philosophy and a C (2.00) average for all work attempted in philosophy. No fewer than 12 of those credit hours must be completed on the Boulder campus. No more than 8 credit hours of independent study may count toward the minimum requirement.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

General Track

Required Courses and Credit Hours

History

PHIL 3000	History of Ancient Philosophy	3
PHIL 3010	History of Modern Philosophy	3
Select one of the following:		3
PHIL 4010	Single Philosopher	
PHIL 4020	Topics in the History of Philosophy	
PHIL 4030	Medieval Philosophy	
PHIL 4040	Studies in 20th Century Philosophy	
PHIL 4070	Existentialist Philosophy	
PHIL 4250	Marxism	

Logic

Select one of the following:		3
PHIL 2440	Symbolic Logic	
PHIL 4440	Topics in Logic (Mathematical Logic)	
PHIL 4460	Modal Logic	

Philosophical Writing

PHIL 3480	Critical Thinking/Writing in Philosophy	3
-----------	---	---

Values

PHIL 3100	Ethical Theory	3
Select one of the following:		3
PHIL 2140	Environmental Justice	
PHIL 2200	Major Social Theories	
PHIL 2220	Philosophy and Law	
PHIL 2270	Philosophy and Race	
PHIL 2290	Philosophy and Women	
PHIL 3110	Feminist Practical Ethics	
PHIL 3140	Environmental Ethics	
PHIL 3160	Bioethics	
PHIL 3190	War and Morality	
PHIL 3200	Social and Political Philosophy	
PHIL 3260	Philosophy and the International Order	
PHIL 4110	Contemporary Moral Theory	
PHIL 4120	Philosophy and Animals	
PHIL 4200	Contemporary Political Philosophy	
PHIL 4250	Marxism	

Metaphysics and Epistemology

PHIL 4340	Epistemology	3
-----------	--------------	---

Select one of the following:		3
PHIL 3600	Philosophy of Religion	
PHIL 4300	Philosophy of Mind	
PHIL 4360	Metaphysics	
PHIL 4400	Philosophy of Science	
PHIL 4490	Philosophy of Language	

Electives

Two courses which includes all courses that are at the 2000 level or above, and are not taken to satisfy any of the above requirements	6
--	---

Total Credit Hours	33
--------------------	----

The department also offers two topically oriented majors that are interdisciplinary in nature: law and society and values and social policy. These majors require two semesters in the history of philosophy, as well as a series of core courses that vary according to the topic. A student intending to complete a topical major in philosophy should see the departmental undergraduate advisor as soon as possible.

Values and Social Policy Track

Required Courses and Semester Credit Hours

Group I

Required courses:		
PHIL 1440	Critical Thinking	3
or PHIL 2440	Symbolic Logic	
PHIL 2200	Major Social Theories	3
PHIL 3000	History of Ancient Philosophy	3
PHIL 3010	History of Modern Philosophy	3
PHIL 3100	Ethical Theory	3
PHIL 3200	Social and Political Philosophy	3

Group II

Select four of the following:		
PHIL 2140	Environmental Justice	
PHIL 2220	Philosophy and Law	
PHIL 2270	Philosophy and Race	
PHIL 2290	Philosophy and Women	
PHIL 3110	Feminist Practical Ethics	
PHIL 3140	Environmental Ethics	
PHIL 3160	Bioethics	
PHIL 3190	War and Morality	
PHIL 3260	Philosophy and the International Order	
PHIL 3930	Internship in Social Policy	
PHIL 4110	Contemporary Moral Theory	
PHIL 4120	Philosophy and Animals	
PHIL 4200	Contemporary Political Philosophy	
PHIL 4250	Marxism	
PHIL 4260	Philosophy of Law	
Other courses with advisor's approval		

Group III

15 credit hours of approved courses in allied fields. For further information, see the Department of Philosophy advisor.	15
--	----

Total Credit Hours	33
--------------------	----

Law and Society Track

Required Courses and Semester Credit Hours

Group I

Required courses:

PHIL 1440	Critical Thinking	3
or PHIL 2440	Symbolic Logic	
PHIL 2200	Major Social Theories	3
PHIL 2220	Philosophy and Law	3
PHIL 3000	History of Ancient Philosophy	3
PHIL 3010	History of Modern Philosophy	3
PHIL 3100	Ethical Theory	3
PHIL 3180	Critical Thinking: Contemporary Topics	3
or PHIL 3480	Critical Thinking/Writing in Philosophy	
PHIL 3200	Social and Political Philosophy	3
PHIL 4260	Philosophy of Law	3

Group II

Recommended courses:

PHIL 2140	Environmental Justice
PHIL 2290	Philosophy and Women
PHIL 3110	Feminist Practical Ethics
PHIL 3140	Environmental Ethics
PHIL 3160	Bioethics
PHIL 3260	Philosophy and the International Order
PHIL 4110	Contemporary Moral Theory
PHIL 4200	Contemporary Political Philosophy
PHIL 4250	Marxism

Group III

Required Courses:

12 credit hours of approved courses from other departments. For further information, see the Department of Philosophy advisor.	12
Total Credit Hours	39

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in philosophy, students should meet the following requirements:

- By the beginning of the second semester, declare the major and meet with an undergraduate advisor at the time the major is declared.
- In each of the next five semesters, complete an average of 6.7 credit hours of required philosophy courses.
- By the end of the fifth semester of study, complete PHIL 2440, PHIL 3480, PHIL 3000 and PHIL 3010.

Philosophy - Minor

A minor is offered in philosophy. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

For the minor in philosophy, students must take 18 credit hours in philosophy (PHIL), earning 18 credit hours with a grade of C- or better and a 2.00 (C) average for all work attempted in philosophy. Also, students

must take 9 credit hours of upper-division work in philosophy with grades of C- or better. Minor students may apply no more than 9 credit hours, including 6 upper-division credit hours of transfer work, toward a minor.

There are no distribution requirements for a minor in philosophy: any six 3-credit-hour philosophy courses will do, so long as at least three are upper-division. However, for a well-rounded course of study, the Philosophy Department recommends:

Recommended Courses

Logic

At least one course in Logic, such as:

PHIL 1440 Critical Thinking

PHIL 2440 Symbolic Logic

History of Philosophy

At least one course in the History of Philosophy, such as:

PHIL 1010 Introduction to Western Philosophy: Ancient

PHIL 1020 Introduction to Western Philosophy: Modern

PHIL 3000 History of Ancient Philosophy

PHIL 3010 History of Modern Philosophy

Values

At least one course in Values, such as:

PHIL 1100 Ethics

PHIL 1200 Contemporary Social Problems

PHIL 3100 Ethical Theory

PHIL 3200 Social and Political Philosophy

Metaphysics/Epistemology

At least one course in Metaphysics/Epistemology, such as:

PHIL 1400 Philosophy and the Sciences

PHIL 1600 Philosophy and Religion

PHIL 3600 Philosophy of Religion

PHIL 4300 Philosophy of Mind

PHIL 4340 Epistemology

PHIL 4360 Metaphysics

Physics

The curriculum offered by the Department of Physics provides knowledge of the physical concepts that are basic to the laws of nature, and the ability to use these fundamental concepts to answer questions and solve real problems. Students also gain an understanding of the relationship of physics to other fields such as astronomy, biology, engineering, chemistry, and medicine.

Areas of Study

Students can choose from one of three plans leading to the Bachelor of Arts (BA) degree. Plan 1 is designed primarily for students who plan to pursue graduate study in physics or go directly into professional employment. Plan 2 is intended for students who wish to combine a physics major with an interdisciplinary or applied physics focus. Interdisciplinary focuses include applied mathematics, biophysics, chemical physics, environmental science, history and philosophy of science, or pre-medicine. Plan 3 is a program designed specifically for those who wish to become elementary or secondary school teachers. It includes a teaching licensure in cooperation with the School of

Education. A concurrent bachelor's/master's degree (BA/MS) is also available.

The Department of Physics also offers a Bachelor of Science degree in Engineering Physics (p. 724) through the College of Engineering and Applied Science.

Research Opportunities

Physics majors are strongly encouraged to work in a research laboratory. Such experience is especially useful in pursuing a career in science or engineering. Involvement in laboratory experimentation provides knowledge of modern electronic equipment and computerized instrumentation. As contributing members of a research group, students also get a real sense of the creative processes that are part of modern physics research.

Career Opportunities

Physics provides an excellent background for a wide variety of careers, as well as preparation for admission to graduate school in physics and related fields. Design and development work in industrial firms, government and academic laboratories, and nonprofit research centers present opportunities to apply theory to specific problems. In such settings, physics graduates often work closely with engineers, complementing specific disciplines with a broader physics perspective. Graduates can also go on to careers in business, law, finance, or medicine, after appropriate graduate work.

Course code for this program is PHYS.

Bachelor's Degree

- Physics - Bachelor of Arts (BA) (p. 453)

Minor

- Physics - Minor (p. 457)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

PHYS 1000 (3) Preparatory Physics

Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110 and PHYS 1120, the engineering majors sequence. Does not satisfy any MAPS deficiency in either the sciences or math. Department enforced prerequisite: 1 year high school algebra.
Additional Information: Arts Sci Core Curr: MAPS Course

PHYS 1010 (3) Physics of Everyday Life 1

Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Department enforced prereq., high school algebra or equivalent. This course should not be taken if the student has a MAPS deficiency in math.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Core Curr: Natural Science Sequence
MAPS Course: Chemistry
MAPS Course: Physics

PHYS 1020 (4) Physics of Everyday Life 2

Intended primarily for nonscientists, this course is a continuation of PHYS 1010. Includes electrical power generation and distribution, electrical motors, radio, television, computers, copiers, lasers, fluorescent lights, cameras, and medical imaging. Department enforced prereq., high school algebra.

Requisites: Requires prerequisite course of PHYS 1010 (minimum grade C-).
Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Core Curr: Natural Science Sequence
Arts Sci Core Curr: Natural Science Lab

PHYS 1110 (4) General Physics 1

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion and introduction to thermodynamics.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1110
Requisites: Requires prerequisite or a corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-).
Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab
Arts Sci Core Curr: Natural Science Sequence

PHYS 1115 (4) General Physics 1 for Majors

First semester of three semester sequence for physics, engineering physics and astronomy majors. Covers kinematics, dynamics momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion and introduction to thermodynamics.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1110
Requisites: Requires a prerequisite or co-requisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-). Restricted to Physics (PHYS-BA) or Engineering Physics (EPEN-BS) or Astronomy (ASTR-BA) majors only.
Grading Basis: Letter Grade

PHYS 1120 (4) General Physics 2

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1125

Requisites: Requires prerequisite courses of PHYS 1110 or PHYS 1115 and a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade of C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

PHYS 1125 (4) General Physics 2 for Majors

Three lect., one rec per week, plus three evening exams in the fall and spring semesters. Second semester of three semester introductory sequence for physics, engineering and astronomy majors. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1120

Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 1115. Requires a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to Physics (BA), Engineering Physics (BS) and Astrophysics (BA) students only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Sequence

PHYS 1140 (1) Experimental Physics 1

One lect., one 2-hour lab per week. Introduction to experimental physics through laboratory observations of a wide range of phenomena. Covers experiments on physical measurements, linear and rotational mechanics, harmonic motion, wave motion, sound and heat, electricity and magnetism, optics, and electromagnetic waves with the mathematical analysis of physical errors associated with the experimental process.

Requisites: Requires a prerequisite or corequisite course of PHYS 1120 or PHYS 1125 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

PHYS 1230 (3) Light and Color for Nonscientists

Discusses light, color, vision, and perception. Covers reflection, refraction, lenses, and applications to photography and other methods of light sensing. Other topics include lasers and holography. Course is geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
MAPS Course: Chemistry

MAPS Course: Physics

PHYS 1240 (3) Sound and Music

Explores the physical processes that underlie the diversity of sound and musical phenomena. Topics covered include the physical nature of sound, the perception of sound, the perception of pitch and harmony, musical instruments, synthesizers and samplers, and room acoustics. Geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Chemistry

MAPS Course: Physics

PHYS 1400 (1) Fundamentals of Scientific Inquiry

Explore and discuss the nature of science and what it means to work in science, technology, engineering or math. Focus on relevant open questions in these fields and the methods used to investigate them. For more information visit: www.colorado.edu/studentgroups/cuprime.

PHYS 1580 (3) Energy and Interactions

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physical content focuses on interactions and energy.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 1580

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

PHYS 2010 (5) General Physics 1

Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers mechanics, heat and sound. Thorough presentation of fundamental facts and principles of physics using algebra and trigonometry. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020. Department enforced prerequisites: ability to use high school algebra and trigonometry.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science

PHYS 2020 (5) General Physics 2

Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers electricity and magnetism, light and modern physics. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020.

Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 2010 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

PHYS 2130 (3) General Physics 3

Covers special relativity, quantum theory, atomic physics, solid state and nuclear physics. Third semester of introductory sequence for science and engineering students. Physics majors should take PHYS 2170 instead of this course. Normally taken with PHYS 2150.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 2170

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).

PHYS 2150 (1) Experimental Physics 2

One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid state physics, electron diffraction, radioactivity and quantum effects. Normally taken concurrently with PHYS 2130 or PHYS 2170, this course may be taken after PHYS 2130 or PHYS 2170.

Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of PHYS 2130 or PHYS 2170 (all minimum grade C-).

PHYS 2170 (3) Foundations of Modern Physics

Covers special relativity, quantum mechanics and atomic structure. Completes the three-semester sequence of general physics for physics and engineering physics majors. Normally taken with the laboratory PHYS 2150.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 2130

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).

PHYS 2210 (3) Classical Mechanics and Mathematical Methods 1

Theoretical Newtonian mechanics, including position and velocity dependent forces, oscillation, stability, non-inertial frames and gravitation from extended bodies. Ordinary differential equations, vector algebra, curvilinear coordinates, complex numbers, and Fourier series will be introduced in the context of the mechanics.

Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 and a prerequisite or corequisite course of APPM 2360 or MATH 3430 (all minimum grade C-).

PHYS 2840 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 3000 (3) Science and Public Policy

For nonscience majors. Reading, discussions, debates and lectures are used to study how science affects society economically, intellectually, and in terms of health and national security. Another focus is how government fosters and funds scientific activities. Department enforced prerequisite: completion of core science requirement.

PHYS 3050 (3) Writing in Physics: Problem-Solving and Rhetoric

Teaches strategies used in scientific writing with an emphasis on argument, reviews and reinforces essential writing skills, provides experience in writing both academic and professional communications in a style appropriate to the literature of physics. Department enforced prerequisite: lower-division core writing requirement.

Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Written Communication

PHYS 3070 (3) Energy and the Environment

Contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Included are some basic physical concepts and principles that often constrain choices. No background in physics is required.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3070

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

PHYS 3210 (3) Classical Mechanics and Mathematical Methods 2

Lagrangian and Hamiltonian treatment of theoretical mechanics, including coupled oscillations, waves in continuous media, central force motion, rigid body motion and fluid dynamics. The calculus of variations, linear algebra, tensor algebra, vector calculus, and partial differential equations will be introduced in the context of the mechanics.

Requisites: Requires a prerequisite course of PHYS 2210 (minimum grade C-).

PHYS 3220 (3) Quantum Mechanics 1

Introduces quantum mechanics with wave, operator and matrix computational techniques. Investigates solutions for harmonic oscillator, potential well and systems with angular momentum. Develops a quantitative description of one-electron atoms in lowest order.

Requisites: Requires a prerequisite course of PHYS 3210 (minimum grade C-).

PHYS 3221 (1) Tutorial Practicum for Quantum Mechanics 1

Uses interactive group work to aid student learning in co-requisite course PHYS 3220. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.

Requisites: Requires a corequisite course of PHYS 3220.

Grading Basis: Pass/Fail

PHYS 3310 (3) Principles of Electricity and Magnetism 1

Covers mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, and polarized media, and provides an introduction to electromagnetic fields, waves, and special relativity.

Requisites: Requires prerequisite courses of PHYS 2210 (minimum grade C-).

PHYS 3311 (1) Tutorial Practicum for Electricity & Magnetism 1

Uses interactive group work to aid student learning in co-requisite course PHYS 3310. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.

Requisites: Requires a corequisite course of PHYS 3310.

Grading Basis: Pass/Fail

PHYS 3320 (3) Principles of Electricity and Magnetism 2

Continuation of PHYS 3310. Electromagnetic induction; magnetic energy; microscopic theory of magnetic properties; AC circuits; Maxwell's Equations; planewaves; waveguides and transmission lines; radiation from electric and magnetic dipoles and from an accelerated charge.

Requisites: Requires a prerequisite course of PHYS 3310 (minimum grade C-).

PHYS 3330 (2) Electronics for the Physical Sciences

Introduces laboratory electronics for physical science students. Includes basic electronic instruments, dc bridge circuits, operational amplifiers, bipolar transistors, field-effect transistors, photodiodes, noise in electronic circuits, digital logic and microcontrollers. Students gain hands-on experience in designing, building and debugging circuits. Two lectures and one three hour laboratory per week. Concludes with a three-week project in which students design and build an experiment of their choice and present a seminar on the results.

Requisites: Requires prerequisite courses of PHYS 2150 and PHYS 2130 or PHYS 2170 (all minimum grade C-).

PHYS 4130 (3) Biological Electron Microscopy: Principles and Recent Advances

Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5130

Requisites: Requires a prerequisite course of EBIO 1220 or MCDB 1150 or MCDB 4550 or MCDB 5550 or PHYS 1120 or PHYS 2020 (minimum grade D-).

PHYS 4150 (3) Plasma Physics

Discusses the fundamentals of plasma physics, including particle motion in electromagnetic fields, wave propagation, collisions, diffusion, and resistivity. Presents examples from space plasmas, astrophysical plasmas, laboratory fusion plasmas, and plasmas in accelerators.

Requisites: Requires a prerequisite course of PHYS 3310 and a prerequisite or corequisite course of PHYS 3320 (all minimum grade of C-).

PHYS 4230 (3) Thermodynamics and Statistical Mechanics

Statistical mechanics applied to macroscopic physical systems; statistical thermodynamics, classical thermodynamics systems; applications to simple systems. Examines relationship of statistical to thermodynamic points of view.

Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite or corequisite course of PHYS 3220 (all minimum grade of C-).

PHYS 4340 (3) Introduction to Solid State Physics

Discusses crystal structure, lattice dynamics, band theory, semiconductors and ferromagnetism.

Requisites: Requires a prerequisite course of PHYS 3220 (minimum grade of C-).

PHYS 4410 (3) Quantum Mechanics 2

Extends quantum mechanics to include perturbation theory and its applications to atomic fine structure, multi-particle systems, interactions with external forces, the periodic table and dynamical processes including electromagnetic transition rates.

Requisites: Requires prerequisite courses of PHYS 3220 and PHYS 3310 (all minimum grade of C-).

PHYS 4420 (3) Nuclear and Particle Physics

Introduces structure of the atomic nucleus, spectroscopy of subnuclear particles, scattering, reactions, radioactive decay, fundamental interactions of quarks and leptons.

Requisites: Requires a prerequisite course of PHYS 4410 (minimum grade of C-).

PHYS 4430 (3) Advanced Laboratory

Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5430

Requisites: Requires a prerequisite course of PHYS 3330 (minimum grade of C-).

PHYS 4450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5450 and PHIL 4450 and PHIL 5450

Requisites: Requires a prerequisite course of PHYS 1020 or PHYS 1120 or PHYS 1125 or PHYS 2020 (minimum grade of C-).

PHYS 4460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching and education research.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5460 and EDUC 4460 and EDUC 5460

Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade of C-).

PHYS 4510 (3) Optics

Basic electromagnetic theory of light, using Maxwell's equations. Examples in geometrical optics; extensive applications in physical optics including diffraction and polarization. Spectra, including Zeeman effect and fluorescence. Recent advances in experimental techniques: microwaves, lasers, image converters.

Requisites: Requires a prerequisite course of PHYS 3320 (minimum grade of C-).

PHYS 4550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extra-cellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5550 and MCDB 4550 and MCDB 5550

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and PHYS 2010 and PHYS 2020 and CHEM 1133 or MATH 1300 and/or CHEM 3311 (minimum grade C-) or instructor consent required.

PHYS 4560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5560 and MCDB 4560 and MCDB 5560

Requisites: Requires a prerequisites course of PHYS 2210 (minimum grade C-).

Recommended: Prerequisite PHYS 4230.

Grading Basis: Letter Grade

PHYS 4610 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4620 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4620 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4630 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4620. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4810 (1-3) Special Topics in Physics

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4840 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4850.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4850 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4840.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4970 (3) Seminar on Physical Methods in Biology

Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, Eels, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, PET, Cat), Fourier analysis, synchrotron radiation, Exafs, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5970

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 2020 and MCDB 1150 or EBIO 1220 (all minimum grade D-).

Physics - Bachelor of Arts (BA)

The undergraduate degree in physics emphasizes knowledge and awareness of:

- the basic subfields of physics (classical mechanics, electricity and magnetism, quantum mechanics, statistical mechanics and

thermodynamics), as well as at least one specialty area of application (e.g., solid state physics or optics);

- the major principles of physics, their historical development and the roles they play in the various subfields of physics;
- the interrelations between theory and observation, the role of systematic and random experimental errors and methods used to analyze experimental uncertainty and compare experiment with theory;
- physical phenomena and experience in the use of basic experimental apparatus and measuring instruments;
- mathematics sufficient to facilitate the acquisition and application of physical principles; and
- the importance of physics in other fields such as chemistry, biology, engineering, medicine and in society at large.

In addition, students completing the degree in physics are expected to acquire the ability and skills to:

- apply physical principles to new situations;
- construct and assemble experimental apparatus, conduct and analyze measurements of physical phenomena, analyze experimental uncertainty and make meaningful comparisons between experiment and theory; and
- communicate results of scientific inquiries verbally and in writing.

Plans of Study

Three different plans are available to students in physics. Because there is some flexibility within each plan, the department encourages students to pursue their own interests in setting up their curriculum. The final responsibility for fulfilling the requirements for the degree rests with the student.

Plan I

This plan is primarily for students planning graduate work in physics.

Plan II

This plan is for students desiring either an interdisciplinary or an applied physics program.

The interdisciplinary program includes a combination of a physics major with a focus in another area such as astrophysics, atmospheric sciences, applied mathematics, biophysics, chemical physics, computer science, environmental sciences, geophysics, philosophy and history of science, and pre-medicine.

The applied physics program includes a focus on applying physics to a field such as biotechnology, optics, and electronic devices.

Plan III

This plan is for students intending to become elementary or secondary school teachers.

Concurrent Degree Program BA/MS in Physics

The BA/MS program in physics aims to provide new opportunities for undergraduate physics majors. The program is specifically addressed to the students in the Plan 1 Major Program of the Department of Physics. The Plan 1 physics major gives students a thorough grounding in theoretical physics so that they are well prepared either to proceed with graduate work or with professional employment. For students

interested in graduate studies, the BA/MS program in physics allows for participation in graduate course work and research in a broad range of areas. For students interested in immediate professional employment, the BA/MS program would serve as a terminal degree program that qualifies students for a higher level of employment.

For more information, see the Department of Physics website (<http://www.colorado.edu/physics/academics/undergraduate-students/concurrent-bachelorsmasters-degree>).

Contents

- Plan I (p. 454)
- Plan II (p. 454)
- Plan III (p. 455)
- Sample Four-Year Plan of Study (p. 455)
- Graduating in Four Years (p. 457)

Requirements

Students who have declared physics as a major are required to consult with the departmental advisor at least once per semester. Even if first-year students are only considering physics as a major, they are strongly encouraged to visit the departmental advisor and discuss the situation. Because most of the advanced physics courses have various prerequisites, failure to settle on an appropriate plan of study early in the college career can result in delay and complications later.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Plan I

This plan includes 45 credit hours of physics courses.

Required Courses and Semester Credit Hours

Required Physics Courses

PHYS 1110 & PHYS 1120	General Physics 1 and General Physics 2	8
PHYS 1140	Experimental Physics 1	1
PHYS 2150	Experimental Physics 2	1
PHYS 2170	Foundations of Modern Physics	3
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3330	Electronics for the Physical Sciences	2
PHYS 4230	Thermodynamics and Statistical Mechanics	3
PHYS 4410	Quantum Mechanics 2	3

Upper-Division Physics Electives

Select a research activity - see details below (3-6 credit hours)

PHYS 4430	Advanced Laboratory	
PHYS 4610 & PHYS 4620 & PHYS 4630	Physics Honors and Physics Honors and Physics Honors	
PHYS 4840	Independent Study	

Select upper-division physics theory electives (3-6 credit hours)

PHYS 4150	Plasma Physics	
PHYS 4340	Introduction to Solid State Physics	

PHYS 4420	Nuclear and Particle Physics	
PHYS 4450	History and Philosophy of Physics	
PHYS 4460	Teaching and Learning Physics	
PHYS 4510	Optics	
PHYS 4550	Cells, Molecules and Tissues: A Biophysical Approach	
PHYS 4560	Introduction to Biophysics	
PHYS 4810	Special Topics in Physics	
PHYS 5030	Intermediate Mathematical Physics 1	
PHYS 5040	Intermediate Mathematical Physics 2	
PHYS 5770	Gravitational Theory (Theory of General Relativity)	
Other PHYS or ASTR upper-division courses as approved in advance by advisor.		

Ancillary Mathematics Courses

MATH 1300	Calculus 1	4-5
or APPM 1350	Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
or APPM 1360	Calculus 2 for Engineers	
MATH 2400	Calculus 3	4
or APPM 2350	Calculus 3 for Engineers	

Select one of the following: 4-6

APPM 2360	Introduction to Differential Equations with Linear Algebra	
MATH 2130 & MATH 3430	Introduction to Linear Algebra for Non-Mathematics Majors and Ordinary Differential Equations	

Ancillary Chemistry Courses

CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5

Total Credit Hours 71-75

Research Activity

The research activity may be completed in one of the following ways:

1. Between 3 and 6 credit hours may be earned from: PHYS 4430, PHYS 4610/PHYS 4620/PHYS 4630, or PHYS 4840.
2. By documentation of your accomplishments as an intern with a research activity within the physics department or a suitable cognate department, institute or external entity such as NCAR, NIST, NOAA, etc.
 - Approval by a physics department advisor is required for option (2) and should be obtained in advance.
 - No academic credit is earned under the internship option (2), so if an internship is taken, students must still earn 9 credit hours of physics electives.

Plan II

For the interdisciplinary program, 33 credit hours of physics courses, plus 3 credit hours of physics electives, plus 12 credit hours of interdisciplinary courses are required. For the applied physics program, 33 credit hours of physics courses plus 15 credit hours of applied physics courses are required. Courses in the interdisciplinary or applied physics subjects may not be double-counted with the required 33 credit hours of physics courses.

Interdisciplinary or applied physics courses must be approved by the physics department, either by the pre-approved list of courses in each discipline or by a physics department mentor on a course-by-course basis. It is therefore imperative that students in Plan II be in close contact with the physics department advisor.

Required Courses and Semester Credit Hours

Required Physics Courses

PHYS 1110 & PHYS 1120	General Physics 1 and General Physics 2	8
PHYS 1140	Experimental Physics 1	1
PHYS 2150	Experimental Physics 2	1
PHYS 2170	Foundations of Modern Physics	3
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3220	Quantum Mechanics 1	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 3330	Electronics for the Physical Sciences	2
PHYS 4230	Thermodynamics and Statistical Mechanics	3

Select the interdisciplinary program or the applied physics program: 15

Interdisciplinary Program

Select 12 credit hours from an interdisciplinary focus, as well as 3 credit hours of upper-division physics electives from the departmental list ¹

Applied Physics Program

Select 15 credit hours in the applied physics program from the departmental list ¹

Ancillary Mathematics Courses

MATH 1300	Calculus 1	4-5
	or APPM 1350 Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
	or APPM 1360 Calculus 2 for Engineers	
MATH 2400	Calculus 3	4
	or APPM 2350 Calculus 3 for Engineers	

Select one of the following: 4-6

APPM 2360 Introduction to Differential Equations with Linear Algebra

MATH 2130 Introduction to Linear Algebra for Non-Mathematics Majors & MATH 3430 Mathematics Majors and Ordinary Differential Equations

Ancillary Chemistry Courses

CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	5

Total Credit Hours 74-78

¹ Departmental lists of approved courses for the interdisciplinary and applied physics programs are available in the advising guide on the Department of Physics website (<http://www.colorado.edu/physics>).

Plan III

This plan involves a minimum of 31–34 credit hours of physics and a minimum of 35 credit hours in education courses. A School of Education advisor, who should be consulted for updated requirements,

is available by appointment at 303-492-2559. Students must review the Undergraduate Program of Studies Checklist for Elementary or Secondary Science for Arts & Sciences majors on the School of Education website for current teacher licensure requirements.

Required Courses and Semester Credit Hours

Required Physics and Astronomy Courses

PHYS 1110 & PHYS 1120	General Physics 1 and General Physics 2	8
PHYS 1140	Experimental Physics 1	1
PHYS 2130	General Physics 3	3
PHYS 2150	Experimental Physics 2	1
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3330	Electronics for the Physical Sciences	2
PHYS 4460 or PHYS 4450	Teaching and Learning Physics or History and Philosophy of Physics	3
ASTR 1030	Accelerated Introductory Astronomy 1	4

Additional required course for teaching in secondary schools

PHYS 3220	Quantum Mechanics 1	3
-----------	---------------------	---

Ancillary Chemistry Courses

Select one of the following options: 7-10

Option 1:

CHEM 1011 Environmental Chemistry 1 & CHEM 1031 and Environmental Chemistry 2

Option 2:

CHEM 1113 General Chemistry 1 & CHEM 1114 and Laboratory in General Chemistry 1

CHEM 1133 General Chemistry 2 & CHEM 1134 and Laboratory in General Chemistry 2

Ancillary Mathematics Courses

MATH 1300	Calculus 1	4-5
	or APPM 1350 Calculus 1 for Engineers	
MATH 2300	Calculus 2	4-5
	or APPM 1360 Calculus 2 for Engineers	
MATH 2400	Calculus 3	4
	or APPM 2350 Calculus 3 for Engineers	

Select one of the following: 4-6

APPM 2360 Introduction to Differential Equations with Linear Algebra

MATH 2130 Introduction to Linear Algebra for Non-Mathematics Majors & MATH 3430 Mathematics Majors and Ordinary Differential Equations

Total Credit Hours 57-64

Sample Four-Year Plan of Study

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in physics plans I and II, students should meet the following requirements:

- In the first semester, declare the physics major.
- By the end of the second semester, complete PHYS 1110, PHYS 1120, PHYS 1140, MATH 1300 or APPM 1350 and MATH 2300 or APPM 1360.
- By the end of the fourth semester, complete PHYS 2150, PHYS 2170 and PHYS 2210, CHEM 1113, CHEM 1133, MATH 2400 or APPM 2350 and APPM 2360. MATH 2130 and MATH 3430 can substitute for APPM 2360.
- Before the fifth semester, meet with the physics advisor to get approval for completion plan (FSACP). In addition to completing PHYS 4230 and PHYS 4410, Plan I students must get approval to complete 9 credit hours in physics electives, with a research participation component. In addition to completing PHYS 4230, interdisciplinary Plan II students must complete 3 credit hours of physics electives and 12 credit hours of interdisciplinary courses. Applied physics students must complete 15 credit hours of applied physics courses.
- By the end of the sixth semester, complete PHYS 3210, PHYS 3220, PHYS 3310, PHYS 3320 and PHYS 3330.
- Early in the seventh semester, meet with the physics advisor to have the statement of major status filled in. This includes a plan for completing the requirements of the major during the senior year and must be signed by the student and the advisor. Further details concerning the execution of the guarantee can be obtained from the department.

Physics - Minor

A minor is offered in physics. Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. For more information, see the Department of Physics Minor in Physics (<http://www.colorado.edu/physics/academics/undergraduate-students/minoring-physics>) webpage.

Requirements

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school. The minimum number of credit hours for a student without advanced placement or transfer credit is 25 hours (16 lower-division and 9 upper-division). *All of the required physics classes listed below have co-requisite or prerequisite mathematics courses. Please check to see if you meet these requisites.*

Required Courses and Semester Credit Hours

Required Physics Courses	16
PHYS 1110 General Physics 1	
PHYS 1120 General Physics 2	
PHYS 1140 Experimental Physics 1	

PHYS 2130	General Physics 3	
	or PHYS 2170 Foundations of Modern Physics	
PHYS 2150	Experimental Physics 2	
PHYS 2210	Classical Mechanics and Mathematical Methods 1	
Upper-Division Physics Electives		
Select three of the following upper-division courses:		9
PHYS 3210	Classical Mechanics and Mathematical Methods 2	
PHYS 3220	Quantum Mechanics 1	
PHYS 3310	Principles of Electricity and Magnetism 1	
PHYS 3320	Principles of Electricity and Magnetism 2	
PHYS 4230	Thermodynamics and Statistical Mechanics	
Total Credit Hours		25

Political Science

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative politics, international relations, public policy, political theory and empirical theory and methodology. The department's mission is to understand the political world and give students skills for a lifetime of inquiry, engagement, and analysis.

The undergraduate program equips students with the analytical and writing skills essential for work in government agencies, non-governmental organizations, non-profits, and business. It also prepares students for study at the graduate level in political science, law, and other cognate disciplines.

Our mission is to provide students with the knowledge and tools to understand important political ideas, political institutions (both domestic and international), and political actors. Students learn the philosophical basis of justice, equality, and representation, and how those concepts are manifested in ongoing political events. Understanding the issues surrounding diversity and their political consequences, both globally and domestically, are important areas of study. A strong grasp of the American political system and society is coupled with learning about how other countries and societies organize politically. Another important component includes understanding why some countries cooperate while others engage in conflict. Finally, the major exposes students to real-world problems that require political solutions, and trains students to operate effectively in a dynamic and complex global environment.

Below is a sample of current courses which represent areas of inquiry within our curriculum.

PSCI 2116	Introduction to Environmental Policy and Policy Analysis	3
PSCI 3062	Revolution and Political Violence	3
PSCI 3074	Democracy and Its Citizens in the US and EU	3
PSCI 3225	Strategy and Politics	3
PSCI 3271	Law and Society: Legal Institutions and Human Behavior	3
PSCI 3774	Free Speech and Dangerous Ideas	3
PSCI 4183	International Law	3
PSCI 4243	Modern Warfare: Terrorism, Ideology, Identity	3
PSCI 4771	Civil Rights and Liberties in America	3

Undergraduate Learning Outcomes

The political science curriculum is designed to develop the following learning outcomes:

- a solid grounding in politics and the ideas that motivate them at the national and international level
- the ability to both clearly and persuasively articulate ideas and arguments in oral presentation and in written form
- the ability to analyze problems using logical inference based on quantitative and qualitative evidence
- the ability to critically evaluate arguments both in political science research and in our current political world

To learn more about our program please visit our website: <http://www.colorado.edu/polisci/>.

Students interested in political science may want to consider the Global Studies Residential Academic Program.

Course code for this program is PSCI.

Bachelor's Degree

- Political Science - Bachelor of Arts (BA) (p. 466)

Minor

- Political Science - Minor (p. 468)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

PSCI 1101 (3) Introduction to American Politics

Emphasizes interrelations among levels and branches of government, formal and informal institutions, processes, and behavior.

Additional Information: GT Pathways: GT-SS1 - Soc Behav Sci: Econ or Pol Systems

Arts Sci Core Curr: Contemporary Societies

Arts Sci Core Curr: United States Context

Departmental Category: American

MAPS Course: Social Science

MAPS Course: Social Science US Context

PSCI 2004 (3) Survey of Western Political Thought

Studies main political philosophies and political issues of Western culture, from antiquity to 20th century.

Additional Information: GT Pathways: GT-SS1 - Soc Behav Sci: Econ or Pol Systems

Arts Sci Core Curr: Ideals and Values

Departmental Category: Political Theory

PSCI 2012 (3) Introduction to Comparative Politics

Most countries confront a variety of common political problems, including how to gain popular support, what kinds of political institutions are most appropriate, and how to distribute burdens and benefits to different segments of the population. Concentrates on learning how to compare different political systems and provides illustrative examples from several countries in both the industrialized and nonindustrialized world.

Additional Information: GT Pathways: GT-SS1 - Soc Behav Sci: Econ or Pol Systems

Arts Sci Core Curr: Contemporary Societies

Departmental Category: Comparative

PSCI 2028 (3) Special Topics

Offers subjects not covered by existing courses. Offered when department approves a special topic.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSCI 2075 (3) Quantitative Research Methods

Introduces quantitative research methods used in political science.

Focuses on basic tools of analysis: data collection, processing, and evaluation, with special attention to survey techniques. Includes elite and case study analysis; aggregate, cluster, and content analysis; and the use of computers in political research.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

Departmental Category: Empirical Theory and Research Methodology

PSCI 2106 (3) Introduction to Public Policy Analysis

Studies policymaking processes in American government, factors shaping public decision, and issues and questions relevant to political inquiry.

Additional Information: Departmental Category: Public Policy

PSCI 2116 (3) Introduction to Environmental Policy and Policy Analysis

Teaches a systematic general framework for the analysis of environmental policy issues. Analyzes the interaction of environmental sciences, ethics, and policy across a range of environmental policy problems. Stresses critical thinking and practical applications.

Additional Information: Departmental Category: Public Policy

PSCI 2223 (3) Introduction to International Relations

Introduces the field of international relations, with general survey of the theories, histories, and problems of historical and contemporary relations among state and nonstate actors.

Additional Information: GT Pathways: GT-SS1 - Soc Behav Sci: Econ or Pol Systems

Arts Sci Core Curr: Contemporary Societies

Departmental Category: International Relations

PSCI 2481 (3) Introduction to the Legal Process

Covers basic legal concepts and processes emphasizing the American system. Gives special attention to political functions of law.

Recommended as preparation for PSCI 4241.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 3011 (3) The American Presidency and the Executive Branch

Examines the constitutional, institutional and historical development of the presidency and the federal bureaucracy. Explores the changing role of the executive branch in the U.S. political system over time and competing views of executive power.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American

PSCI 3021 (3) U.S. Campaigns and Elections

Introduces students to the subjects, techniques, and findings of Political Science research on campaigns and elections. Particular emphasis is placed on the study of voting, campaign effects, partisan coalitions, electoral rules, campaign finance, and the policy impact of elections.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American

PSCI 3022 (3) Russian Politics

Examines the development of Russian politics from the late Soviet period to the present. Topics covered include political culture, democratic transition, economic reform, and social problems in Russia.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Comparative

PSCI 3031 (3) Political Parties and Interest Groups

Highlights the practice of party politics in the United States, including the nature, structure, organization, and functions of political parties and interest groups. Analyzes interest group politics and political behavior.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 3032 (3) Democracy, Inequality and Violence in Latin America

Stresses different perspectives on Latin American politics and understanding key political actors and processes. Country focus varies.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Comparative

PSCI 3041 (3) The American Congress

Provides intensive examination of the role of Congress in American government, including congressional elections, representation, the organization of Congress, and congressional policy making. Examines larger context of congressional politics, including political parties, the president, and interest groups.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 3051 (3) Public Opinion and Political Behavior

Examines measurement of public opinion and evaluation of its impact on governmental policy formation, including survey research techniques.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 3052 (3) Gender and Politics in Latin America

Examines Latin American politics with particular focus on women's participation in social movements, war, revolution, and elections. Compares women's and men's politics and activism and examines changing gender and sexuality policies, gender relations, and the differential impact of political, economic, and social changes on men and women.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3650

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2600 or PSCI 3032.

Additional Information: Departmental Category: Comparative

PSCI 3054 (3) American Political Thought

Highlights the development of American political theories and ideas from colonial period to present. Can also be taken for American field credit.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004.

Additional Information: Arts Sci Core Curr: United States Context

Arts Sci Core Curr: Ideals and Values

Departmental Category: Political Theory

PSCI 3061 (3) State Government and Politics

Examines politics in the American states from a comparative and historical perspective. Considers major political actors—interest groups, citizens (direct democracy), and political parties, as well as central institutions, in the state political arena. Also focuses on major state public policy concerns.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: United States Context

Departmental Category: American

PSCI 3062 (3) Revolution and Political Violence

Studies and evaluates alternative theoretical frameworks for the analysis of revolution and political violence. Theoretical material is firmly couched in case situations, such as ethnic, class, colonial, urban, racial, and religious conflicts.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101 or PSCI 2012 or IAFS 1000.

Additional Information: Departmental Category: Comparative

PSCI 3064 (3) Environmental Political Theory

Examines environmental discourses as conceptual means for theorizing environmental politics, and applies normative political theories to contemporary environmental policy issues. Considers the roles of political actors (individuals, groups, the state) in defining and addressing environmental problems on local, national, and global levels.

Equivalent - Duplicate Degree Credit Not Granted: ENV5 3064

Recommended: Prerequisite PSCI 2004.

Additional Information: Arts Sci Core Curr: Ideals and Values

Departmental Category: Political Theory

PSCI 3071 (3) Urban Politics

Examines the structure of political, social, and economic influence in urban areas. Focuses on the relationship of the political system to governmental, social, and economic institutions and the contemporary policy processes in American cities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: American

PSCI 3072 (3) Government and Politics in Southeast Asia

Surveys historical and contemporary forces shaping politics in Southeast Asia. Gives special attention to comparative political economy, including development strategies and transitions to democracy.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012 or IAFS 1000.

Additional Information: Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 3074 (3) Democracy and Its Citizens in the US and EU

Studies theories and problems related to citizenship in the US and the EU. This includes rights and restrictions of citizenship, issues of immigration, multicultural citizenship, globalization and citizenship. In the EU the relation between member nation citizenship and EU citizenship is a special problem. Examines how the US and EU compare.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Political Theory

PSCI 3082 (3) Political Systems of Sub-Saharan Africa

Analyzes post-independence and post-Cold War change in sub-Saharan Africa and provides intensive case studies of selected countries exemplifying each type with South Africa seen as a special case.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012 or IAFS 1000.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Comparative

PSCI 3084 (3) Diversity, Disagreement, and Democracy: an Introduction to the Theory and Practice of Democracy

Examines the justification and limits for moral, political and religious pluralism. Students will be trained in the practice of dialogue and research the historical context of a subject that would be appropriate for a dialogue, and then interview members of the community who have different perspectives on the subject.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Political Theory

PSCI 3091 (3) Politics of Social Movements

Examines theoretical and empirical research on social movements from a U.S. perspective. Considers why social movements arise, who participates in them, the tactics they employ, obstacles they face, and their political impact.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 3092 (3) Comparative Political Economy

Presents theories on the interaction between policies and economics, economic models of politics, and familiarizes students with an approach that will prove useful in understanding current developments in both economics and politics. Explores relationships between financial markets, currency regimes and politics with some special consideration of the behavioral foundations of political and economic developments.

Recommended prerequisite: PSCI 2012.

Additional Information: Departmental Category: Comparative

PSCI 3101 (3) Black Politics

Examines structure of political, social, and economic influence in urban areas. Focuses on the relationship of political processes to governmental, social, and economic institutions and contemporary policy processes in American cities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: American

PSCI 3102 (3) South Asian Politics

Examine the diverse political trajectories of four South Asian countries: India, Pakistan, Nepal, and Sri Lanka. Using a comparative lens, we will take into account historical, cultural, and economic, in addition to political, factors in deciphering this diversity of political paths.

Recommended: Prerequisite PSCI 2012 or IAFS 1000.

Additional Information: Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 3105 (3) Designing Social Inquiry: An Introduction to Analyzing Political Phenomena

Tackles conceptualization and measurement with a focus on reliability and validity of measures at the individual level. Explores how improper measurement and conceptualization can affect our inferences. Investigates how to use the tools of causal logic with statistical tools to differentiate linear, spurious, intervening and conditional relationships with a particular focus on what it means to "control for other factors".

Requisites: Requires prerequisite course of PSCI 2075 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills
Departmental Category: Empirical Theory and Research Methodology

PSCI 3123 (3) War, Peace, and Strategic Defense

Analyzes employment, or the threat of employing force, in securing American interests in the post-Cold War world. Gives special attention to utilities claimed for nuclear weapons, and alternatively, to weapons control and disarmament.

Equivalent - Duplicate Degree Credit Not Granted: PACS 3800

Recommended: Prerequisite PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 3143 (3) Current Affairs in International Relations

Analyzes the various theoretical and policy challenges facing the post-Cold War world, with an emphasis on examining alternative conceptions of and approaches to such challenges.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: International Relations

PSCI 3155 (3) Survey Design and Analysis

Provides the unique experience of involvement in ongoing survey research. Designed for students from different disciplines who will learn about what makes a good versus bad survey, how to write effective questions and how to put survey questions together into a cohesive questionnaire. Gain insight into the pitfalls of survey research and how to overcome them. Provides hands-on, real world experience on the design, implementation and analysis of the annual Colorado Political Climate survey.

Requisites: Requires prerequisite course of PSCI 2075 (minimum grade C-).

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 3163 (3) American Foreign Policy

Examines foundations, assumptions, objectives, dynamics, and methods of U.S. foreign policy since WWII. Gives special attention to domestic and external problems of adapting U.S. policy to the changing world environment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2223.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: International Relations

PSCI 3174 (3) Sex, Power, and Politics: U.S. Perspectives

Explores how norms of sex, gender, race and sexuality find expression in institutions and policies in ways that legitimize only certain individuals as political actors, certain identities as politically relevant, and certain relationships as important. Critically examines how norms may be exposed, resisted, and changed by studying the politics of the women's, gay liberation, and men's movements in the U.S.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3174

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004 or WGST 2000 or LGBT 2000.

Additional Information: Departmental Category: Political Theory

PSCI 3191 (3) National Security Organization and Policy Making

Analyzes how the American governmental and political system is structured to define, select, and implement national security policies. Examines roles of the president, Congress, bureaucracy, interest groups, and other actors.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 3193 (3) International Behavior

Presents alternate theoretical frameworks for the explanation of international processes. Applies theories of conflict behavior and social organization to problems of war and peace.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 3205 (3) Undergrad Research Fellowship

Broadens and strengthens social science methodological skills and training by providing individualized instruction and research collaboration between the student and advanced graduate students and faculty. Promotes hands-on learning, immersion in the research process, and professional relationships with faculty. Includes a classroom component and a research opportunity in collaboration with a mentor.

Requisites: Requires prerequisite course of PSCI 2075 (minimum grade C-). Restricted to students with 27-180 credits (Sophomore, Junior or Senior) Political Science (PSCI) majors or minors only. Restricted to students with a cumulative GPA of 3.4 or higher.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 3206 (3) The Environment and Public Policy

Considers constitutional, political, and geographic factors in development of public policy affecting the use of natural resources and management of the environment; organization, procedures, and programs for use of natural resources; and administration of environmental policies.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101 or PSCI 2012.

Additional Information: Departmental Category: Public Policy

PSCI 3211 (3) The Politics of Economic Inequality in the United States

Explores empirical and normative origins and current state of economic inequality in the United States from a political science perspective. Evaluates how ideas about democracy and public policy address economic inequality, including the roles of gender, race and class in inequality. Examines the relationship between economic inequality and political inequality in both political behavior and political institutions.

Requisites: Requires a prerequisite course of PSCI 1101 (minimum grade D-).

Additional Information: Departmental Category: American

PSCI 3225 (3) Strategy and Politics

Focuses on the rational choice approach to understanding political decision making. Introduces students to the tools and methods of game-theoretic reasoning, and examines the strategic logic of many forms of political decision-making, including voting, lawmaking, and international conflict.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101 or PSCI or 2012 or PSCI 2223.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 3271 (3) Law and Society: Legal Institutions and Human Behavior

Examines relationship between human behavior and legal system, looking closely at the voluntary relationship between the citizen and the state, the use of law to balance economic liberty and equality, support for civil liberties, and procedural, distributive, and retributive justice.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 3274 (3) Capitalism and its Critics

Examines competing theoretical approaches to questions related to origins, development, and purposes of modern government in the United States; particular attention paid to impact of transformations in the underlying structure of the capitalist economy. Formerly PSCI 3171.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: Political Theory

PSCI 3281 (3) Development of American Political Institutions

Learn about the evolution of major American political institutions including the presidency, Congress, the judiciary, the party system and the right to vote.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 3301 (3) Gender, Sexuality and U.S. Law

Contemporary and historic overview of U.S. courts' treatment of sex and gender. Using the case method, examines policy issues including, but not limited to: same sex marriage and civil unions; privacy; affirmative action; abortion; reproductive technologies; and discrimination based on sex and sexual orientation in education and in the workplace.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3300

Recommended: Prerequisite PSCI 1101 or WGST 2000.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: American

PSCI 3311 (3) Gender and U.S. Politics: Protest, Polls and Policy

Provides an overview and critical examination of women as political actors within the United States. Students will examine the gendered components of citizenship, election, political office, and public policy. Furthermore, students will explore the ways in which gender intersects with class, race, ethnicity, sexual orientation, and other identities in U.S. politics.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3311

Additional Information: Departmental Category: American

PSCI 3774 (3) Free Speech and Dangerous Ideas

Examines in depth various philosophical and legal justifications of First Amendment rights of speech, press, association and religion. Assesses these justifications in relation to broader normative theories of liberal democracy. Can also be taken for American field credit. Formerly PSCI 4774.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites PSCI 2004 and PSCI 2481.

Additional Information: Departmental Category: Political Theory

PSCI 4002 (3) Western European Politics

Comparatively analyzes development of the political systems and processes of European democracies. Emphasizes contemporary institutions, decision making patterns, and policy issues. Special attention to challenges of welfare systems.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Comparative

PSCI 4012 (3) Global Development

Analyzes development theory, case studies in development strategies, and the problems and promises of development: specifically issues of gender, environment, labor, corruption and poverty. The primary focus is on explanations for variation in level of development over time and across countries.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Comparative

PSCI 4022 (3) Chinese Foreign Policy

History of China's external relations and theories of foreign policy decision making. Explores two vital bilateral relations (Sino-U.S. and Sino-Japanese) and several key issues (like Taiwan) in China's 21st century foreign policy.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 4024 (3) Senior Seminar in Political Theory

Intensively analyzes and discusses major theories and issues of both contemporary political thought and the history of political philosophy. The topic is announced by the instructor, but might include analysis of concepts (justice, human rights, democracy, etc.) or major theories. Emphasizes advanced discussion plus individual research.

Recommended: Prerequisite PSCI 2004.

Additional Information: Departmental Category: Political Theory

PSCI 4028 (3) Special Topics

Offers subjects not covered by existing courses. Offered when the department approves a special topic.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: General

PSCI 4052 (3) Chinese Politics

Explores the politics of 20th century China to speculate on China's future in the 21st century. Begins with an extensive look at the political history of the People's Republic, before turning to social, cultural, economic, and political issues today. Concludes with an examination of Chinese foreign policy, with a focus on Sino-American relations.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 4062 (3) East European Politics

Studies developments in the former Soviet satellites and Yugoslavia, their governmental organizations, and their relation to the former Soviet Union and the West.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Comparative

PSCI 4106 (3) Issues and Challenges in American Green Energy Policy

Explores growth of contemporary American green energy industry.

Explores different types of green energy policies and how government institutions and regularly arrangements affect the development of green energy policy.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 4131 (3) Latinos and the U.S. Political System

Examines the political status and activities of Mexican Americans and other Latino groups (Cuban Americans and Puerto Ricans) in the U.S. Also covers Latino political attitudes and behaviors; Latino efforts to influence the major national, state, and local institutions of the American government; and public policy concerns of Latinos.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: American

PSCI 4173 (3) International Cooperation and Global Anarchy

Explores if and how countries cooperate in a world with no government. Investigates cooperation over a number of international issues, including peace and security, trade and development, climate change, human rights, and justice for victims of war crimes. Gives special attention to organizations including the United Nations, International Monetary Fund, European Union and World Trade Organization.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: International Relations

PSCI 4183 (3) International Law

Investigates the body of law that regulates relations between nation states and provides a framework for the solving of common problems. Explores its nature and effectiveness as well as its adaptability to a changing environment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 4193 (3) International Political Economy

Analyzes issues at the intersection of international politics and international economics. Utilizes theories and concepts from both economics and political science to understand issues in trade, finance, development and migration.

Recommended: Prerequisite PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 4213 (3) Europe and the International System

Covers the past, present and future of Europe's global role.

Recommended: Prerequisite PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 4221 (3) Political Psychology

Examines the psychological foundations of political decision-making among citizens and elites. Considers the role of political psychology in explaining political behavior and outcomes at the individual and collective level.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 4241 (3) Constitutional Law

Focuses on the nature and scope of American constitutional principles as developed by the U.S. Supreme Court, including federalism, separation of powers, commerce, due process and equal protection.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 4242 (3) Middle Eastern Politics

Explores the domestic politics of various Middle Eastern countries as well as the development and globalization of the region. Includes topics such as the ongoing prevalence of dictatorships, political Islamism, oil politics, economic growth and stagnation, and relations with the U.S.

Recommended: Prerequisite PSCI 2012.

Additional Information: Departmental Category: Comparative
Departmental Category: Asia Content

PSCI 4243 (3) Modern Warfare: Terrorism, Ideology, Identity

Explores the evolution of warfare and origins of terrorism. Ideological and identity differences have come to the forefront of violent political conflicts while the emerging doctrine of warfare has placed civilians in the middle of modern conflicts. Tracks potential changes in the means of and reasons for fighting, roles of civilians and media, and rules of war.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisites PSCI 2223 and PSCI 3193.

Additional Information: Departmental Category: International Relations

PSCI 4252 (3) Politics of Ethnicity and Nationalism

Analyzes ethnic identity as a factor in contemporary politics. Deals extensively with the role of ethnic groups in political mobilization, the development of national collective consciousness, nation building, and international relations. Explores the influence of religion, language, history, culture and class on ethnic group formation and behavior.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2012.

Additional Information: Departmental Category: Comparative

PSCI 4253 (3) Politics of Identity and Inter-Ethnic Violence

Discusses politics of identity and why identity is such a potent source of violence. Is inter-ethnic conflict an end in itself, or are ethnic groups trying to achieve other goals through violence? What can be done to prevent or ameliorate inter-ethnic strife? Examines theoretical aspects of identity, inter-ethnic conflict, as well as specific examples of ethnic crises.

Recommended: Prerequisite PSCI 2223 or PSCI 2012.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 4283 (3) International Migration and Policy

Explores the politics of international migration, including public attitudes toward immigration, special interests politics of immigration policy making and the dynamics between political institutions and international migrations. Students will learn about the politics of international migration across different receiving and sending states over the past two centuries with an emphasis on the current debates over immigration in the U.S. and Western Europe.

Additional Information: Departmental Category: International Relations

PSCI 4302 (3) European Union Politics

Explores the development, functioning, focus and future of the European Union. Examines history, institutions, policies and politics as well as governance theories that have been developed to explain origins and evolution of the EU.

Recommended: Prerequisite PSCI 2012.

Additional Information: Departmental Category: Comparative

PSCI 4341 (3) Media and Politics

Examines aspects of political communication as it applies to citizens, political decision makers, and specific public policies.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 4391 (3) Gender Politics and Global Activism

Addresses the problems and challenges women face around the world and the ways in which women have mobilized to address them. Explores political activism at the local, national, regional, and global levels.

Focuses on different forms of activism, including strategies aimed at working with and within governmental institutions, as well as outside and against them.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4500

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Departmental Category: American

PSCI 4701 (3) Symbolic Politics

Introduces uses and abuses of symbols as instruments and indicators of political change.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 4703 (3) Alternative World Futures

Aims to help students think about the future of the world in a systematic way. Focuses on alternative projections and policies dealing with major problems.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 4714 (3) Liberalism and Its Critics

Examines contemporary arguments for and against liberalism. Focuses on the analysis, evaluation, and understanding of the philosophical contributions to this debate. Gives special attention to the concepts of justice, freedom, equality, and individualism.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004.

Additional Information: Departmental Category: Political Theory

PSCI 4715 (3) Honors Political Science Seminar

Involves writing and discussion of selected topics in political science. Critically reviews the major methodological and conceptual features of the discipline. Students begin their honors papers in the seminar. Department enforced prerequisite: minimum 3.3 GPA. Generally offered in fall term only.

Additional Information: Arts Sciences Honors Course

Departmental Category: Empirical Theory and Research Methodology

PSCI 4716 (3) Selected Policy Problems

Integrates general principles of policy inquiry with documents and other literature on specific problems in public policy, in order to evaluate courses of action.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Public Policy

PSCI 4725 (3) Political Science Honors Thesis

Involves writing an honors thesis. Formerly PSCI 4008.

Requisites: Requires prerequisite course of PSCI 4715 (minimum grade B-).

Additional Information: Arts Sciences Honors Course

Departmental Category: Empirical Theory and Research Methodology

PSCI 4731 (3) Civic Engagement in America

Closely examines the various understandings of democracy, the arguments for and against democracy, and the progress of and prospects for democratic politics in the United States. Particular attention is paid to economic, social, and political developments in the United States that affect popular sovereignty, political equality, and liberty.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 4732 (3) Critical Thinking in Development

Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization and economic development. Specifically explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade and democratization.

Equivalent - Duplicate Degree Credit Not Granted: INVS 4302

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 2012.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Departmental Category: Comparative

PSCI 4734 (3) Politics and Literature

Broadly examines political topics as they are presented in important literary works and analyzes the possibilities involved in using the literary mode to present political teachings.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004.

Additional Information: Departmental Category: Political Theory

PSCI 4751 (3) The Politics of Ideas

Examines theoretical arguments and case studies of interactions of ideas, interests, and institutions in policymaking. Analyzes processes through which ideas come to the public agenda, how institutional settings shape those ideas, and why some ideas and interests are more successful.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 4771 (3) Civil Rights and Liberties in America

Implementation of rights and liberties in America. Examines fundamental issues of free speech, press, association, and religion along with rights to due process and equal protection under the law.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: American

PSCI 4783 (3) Global Issues

Studies the principal issues confronting humanity that affect stability and survivability and their economic, social, and political implications.

Requisites: Restricted to Political Science (PSCI), International Affairs (IAFS) or Environmental Studies (ENVS) majors only.

Recommended: Prerequisite PSCI 2012 or PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 4792 (3) Issues in Latin American Politics

Studies several Latin American countries in some depth including history and contemporary politics. Teaches students to listen to and evaluate different sides of political controversies, and critically evaluate arguments.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite PSCI 2012.

Additional Information: Departmental Category: Comparative

PSCI 4841 (1-3) Independent Study in American Politics

Subjects are chosen and arrangements are made to suit the needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. A special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: American

PSCI 4842 (1-3) Independent Study in Comparative Politics

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite PSCI 2012 or IAFS 1000.

Additional Information: Departmental Category: Comparative

PSCI 4843 (1-3) Independent Study in International Relations

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite PSCI 2223.

Additional Information: Departmental Category: International Relations

PSCI 4844 (1-3) Independent Study in Political Theory

Subjects and arrangements suit individual student needs. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite PSCI 2004.

Additional Information: Departmental Category: Political Theory

PSCI 4846 (1-3) Independent Study in Public Policy

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average GPA of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 4848 (1-3) Independent Study

Subjects chosen and arrangements made to suit needs of each student. Independent study is for upper-division students who have completed 9 credit hours of political science and who have an overall average of at least 3.00. Not more than 6 credit hours of independent study may be credited toward the minimum requirements in the political science major. Special independent study approval agreement form must be obtained from the department.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSCI 4938 (3-6) Internship in Government

With instructor's assistance, students secure an internship with a political or governmental organization. In addition to the internship, the class consists of regular seminars, course readings and assignments, and individual conferences with the instructor. Student pursues an academic research project and writes an original research paper. Instructor approval required in semester preceding internship. Contact instructor prior to early registration.

Recommended: Prerequisite PSCI 1101.

Additional Information: Departmental Category: General

Political Science - Bachelor of Arts

A degree in political science provides students with knowledge and understanding of political issues and prepares them for a career in fields such as:

- Civil service
- Journalism
- Management
- Politics
- Legislative analysis
- Criminology
- City planning
- Population studies

Students can combine the major with teaching credentials and teach government, political science and civics in secondary schools. If a student plans to go on to the graduate level, the political science major provides excellent background for law school or graduate school in political science, sociology, economics or a number of other social science disciplines.

Career Services (<http://www.colorado.edu/career>) offers a number of programs and services designed to help students plan their career, including workshops, internships and placement services after graduation.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. Total credit hours required in Political Science courses: 42 credit hours.

No courses for the PSCI major may be taken pass/fail, and a student must have a grade of C- or better in all 42 required credit hours in political science, and a cumulative GPA of 2.0 or better in political science courses.

No more than 45 credit hours in political science credit will count toward the Arts and Sciences graduation requirement of 120 credit hours. This may be exceeded by 6 credit hours (for a total of 51 credit hours), provided that the excess credit hours are taken in PSCI 4715 and PSCI 4725 (honors thesis credit).

Required Courses and Credit Hours

Lower Division Distribution

PSCI 1101	Introduction to American Politics	3
PSCI 2012	Introduction to Comparative Politics	3
PSCI 2223	Introduction to International Relations	3
PSCI 2004	Survey of Western Political Thought	3

Empirical Theory and Research Methodology

PSCI 2075	Quantitative Research Methods	3
PSCI 3105	Designing Social Inquiry: An Introduction to Analyzing Political Phenomena	3

Upper Division Distribution

Select one course in four of the following six primary fields: 12

American		
Comparative		
International Relations		
Political Theory		
Empirical Theory and Research Methodology ¹		
Public Policy		

Political Science Electives

Three upper division PSCI elective courses	9
One lower or upper division PSCI elective course	3
Total Credit Hours	42

¹ Note that PSCI 3105 does not count towards the upper division distribution requirement for the Empirical Theory and Research Methodology field.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only

refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in political science, students should meet the following requirements:

- By the end of the second semester, declare the major.
- By the end of the third semester, complete PSCI 1101 and two of the following required courses: PSCI 2012, PSCI 2223, PSCI 2004 or PSCI 2075.
- By the end of the fourth semester, complete the remaining lower-division political science courses.
- By the end of the sixth semester, complete 12 upper-division credit hours of political science courses, including at least one course in three of the following fields: American, comparative, international relations, methodology, policy and theory. In addition, complete three upper-division or lower-division political science elective credit hours.
- During the seventh and eighth semesters, complete 12 credit hours of political science courses, including at least 9 upper-division political science elective credit hours and all remaining upper-division field distribution requirements.

Course	Title	Credit Hours
Year One		
Fall Semester		
PSCI 1101	Introduction to American Politics	3
PSCI 2012 or PSCI 2223	Introduction to Comparative Politics or Introduction to International Relations	3
		Credit Hours 6
Spring Semester		
PSCI 2223 or PSCI 2012	Introduction to International Relations or Introduction to Comparative Politics	3
PSCI 2004	Survey of Western Political Thought	3
		Credit Hours 6
Year Two

	Credit Hours	3
	Total Credit Hours	42

Political Science - Minor

A minor in political science provides students with knowledge and understanding of political issues and prepares them for a career in fields such as:

- Civil service
- Journalism
- Management
- Politics
- Legislative analysis
- Criminology
- City planning
- Population studies

Students can combine the minor with teaching credentials and study in an affiliated field to teach government, political science and civics in secondary schools. If a student plans to go on to the graduate level, the political science minor provides an excellent complement to other fields as preparation for law school or graduate school in political science, sociology, economics or a number of other social science disciplines.

Career Services (<http://www.colorado.edu/career>) offers a number of programs and services designed to help students plan their career, including workshops, internships and placement services after graduation.

Requirements

Declaration of a minor in political science is open to any student enrolled at CU Boulder, regardless of college or school.

Students must complete 21 credit hours of political science to complete the political science minor, of which 9 credit hours must be in upper-division course work. All 21 credit hours must be completed with grades of C- or better and an overall GPA of 2.00. None of the required credit hours may be taken pass/fail.

Required Courses and Semester Credit Hours

Lower-Division Courses

PSCI 1101	Introduction to American Politics	3
Select two of the following:		6
PSCI 2012	Introduction to Comparative Politics	
PSCI 2223	Introduction to International Relations	
PSCI 2004	Survey of Western Political Thought	
PSCI 2075	Quantitative Research Methods	

Upper-Division Courses

9 credit hours in a minimum of two of the following primary fields: ¹ 9

American
Comparative
International Relations
Political Theory
Empirical Theory and Research Methodology
Public Policy

Lower- or Upper-Division Political Science

3 credit hours of lower- or upper-division political science	3
Total Credit Hours	21

¹ PSCI 4938 will not fulfill a primary field area in the minor.

International Affairs Majors

International affairs majors who wish to minor in political science must apply the following additional rules:

- No more than 9 credit hours toward the PSCI minor can come from courses that count toward another major.
- International affairs majors must take at least one upper-division course in American politics and one course (lower- or upper-division) in political theory, in addition to the regular minor requirements.

Psychology and Neuroscience

At the undergraduate level, this department offers a major in psychology and a major and a certificate in neurosciences. Psychology is a broad discipline that seeks to understand human cognition, emotion and behavior. It is also an applied field that is concerned with testing perception, psychopathology, inheritance of complex behavioral traits, mental health, memory and social factors that influence behavior.

Neuroscience is the study of the mechanisms of nervous system—the brain, the spinal cord and networks of sensory nerve cells, or neurons. Neuroscientists work to describe how neural circuits transmit signals and process different types of information. The principles of neuroscience are derived from the application of methods from many scientific disciplines,

including molecular and cellular biology, biochemistry, physiology, structure and computational modeling.

Students contemplating postgraduate education, either in professional or in graduate school, are encouraged to participate in the departmental honors program, which provides special opportunities for individualized attention.

CU Boulder's Department of Psychology and Neuroscience has been ranked by the National Academy of Sciences as one of the best in the country with respect to the quality of the faculty and their scholarly productivity. Moreover, the department offers undergraduates a wide range of opportunities for involvement in research.

Course codes for this program are PSYC and NRSC.

Bachelor's Degrees

- Neuroscience - Bachelor of Arts (BA) (p. 476)
- Psychology - Bachelor of Arts (BA) (p. 479)

Certificate

- Neurosciences - Certificate (p. 479)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

NRSC 2100 (4) Introduction to Neuroscience

Provides an introduction to fundamental concepts in neuroscience. The goal of this first course is to provide a strong foundation in neurobiology-cell biology, physiology of the neuronal membrane, interneuronal communication, neurotransmission, gross anatomy, and how the brain develops. Students will also learn principles of sensory systems functions. Recitation will reinforce lecture concepts through discussion of current research.

Requisites: Requires prerequisite courses of MCDB 1150 or EBIO 1210 (minimum grade C-).

NRSC 2101 (1-4) Topics in Neuroscience

Provides students with the opportunity to focus on a specific area of Neuroscience in depth. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

NRSC 2200 (2) Laboratory Techniques in Neuroscience

Introduces students to many basic and essential laboratory skills in neuroscience research. Students will learn experimental methods and perform experiments depicting principles in neurophysiology, neuroanatomy, neurochemistry, and the fundamentals of neuroimaging techniques.

Requisites: Requires a prerequisite course of NRSC 2100 (minimum grade C-). Restricted to Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

NRSC 4011 (1-3) Senior Thesis

Critically reviews topics in neuroscience research, scholarly analysis of a major neuroscience issue, and/or empirical research project. See the neuroscience director for further information.

NRSC 4015 (3) Affective Neuroscience

Experiencing and learning from affect–emotional value–is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. Covers recent advances in understanding the emotional brain.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5015

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

NRSC 4032 (3) Neurobiology of Learning and Memory

Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5032

Requisites: Requires a prerequisite course of PSYC 2012 or PSYC 4052 or NRSC 2100 or NRSC 4052 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Biological

NRSC 4052 (4) Behavioral Neuroscience

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5052 and PSYC 4052 and PSYC 5052

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 and one of the following sequences EBIO 1210 and EBIO 1220 or CHEM 1113 and CHEM 1133 or PHYS 1010 and 1020 or PHYS 2010 and PHYS 2020 (all minimum grade C-).

Additional Information: Departmental Category: Biological

NRSC 4062 (3) The Neurobiology of Stress

Provides an introduction to the concept of stress and the physiological systems involved. Factors modulating stress vulnerability versus resilience, and stress interactions with other systems with health relevance will be explored. Emphasis will be placed on current research on brain mechanisms. Formerly PSYC 4062.

Requisites: Requires prerequisite course of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior).

Recommended: Prerequisite a strong foundation and interest in biological psychology, neuroscience, and physiology.

Additional Information: Departmental Category: Biological

NRSC 4072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective

Provides a review of the anatomy and physiology of the nervous system and then explores how alterations in these systems can result in neurologic or psychiatric disorders. Emphasizes pathological neuroanatomy, neurophysiology and neuropharmacology, which is essential for understanding problems related to health and disease.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5072

Requisites: Requires a prerequisite course of PSYC 2012 or PSYC 4052 or NRSC 2100 or NRSC 4052 and one of the following sequences of courses: EBIO 1210 and 1220 or MCDB 1150 and 2150 or MCDB 1150 and EBIO 1220 or EBIO 1210 and MCDB 2150 (all minimum grade C-).

Additional Information: Departmental Category: Biological

NRSC 4082 (3) Neural Circuits of Learning and Decision Making

Provides an in-depth survey of the neural mechanisms of learning, motivated behavior and decision making. Analysis will focus on the interaction of neural circuits underlying these processes with particular attention to the cellular, molecular and information-processing aspects of identified pathways and considered into the context learning-based and neuroeconomic models of choice.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5082

Requisites: Requires prerequisite course of NRSC 2100 or NRSC 4052 (minimum grade C-).

Grading Basis: Letter Grade

NRSC 4092 (3) Behavioral Neuroendocrinology

Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5092

Requisites: Requires a prerequisite course of NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) or Neuroscience (NRSC) majors only.

Additional Information: Departmental Category: Biological

NRSC 4132 (3) Neuropharmacology

Study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the neurobiological and neurochemical mechanisms of drug action. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) biochemical basis of psychiatric disorders and their pharmacological treatment.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5132

Requisites: Requires a prerequisite course of NRSC 2100 (minimum grade C-).

Additional Information: Departmental Category: Biological

NRSC 4155 (4) Cognitive Neuroscience/Neuropsychology

Introduction to cognitive neuroscience and neuropsychology. Provides a survey of the neuropsychological underpinnings for a wide range of cognitive functions: vision, object recognition, attention, language, memory and executive function. One lab per week.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4155

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 and one of the following: PSYC 2111 or MATH 2510 or IPHY 2800 or EBIO 1010 or BCOR 1020 or ECON 3818 (all minimum grade C-).

NRSC 4542 (3) The Neurobiology of Mental Illness

Provides in depth study of what is known concerning the neurobiology of mental illnesses, with a focus on depression and anxiety. Consideration will be given to both animal models and human work, with neurochemical, circuitry level, and neuroinflammatory processes to be highlighted. There will be discussion of the intricacies of determining the effectiveness of pharmacological treatments, and what the implications of such treatments might be.

Requisites: Requires prerequisite courses of PSYC 2012 or NRSC 2100 and one of the following: PSYC 4052 or NRSC 4052 or NRSC 4132 or NRSC 4082 or NRSC 4092 or NRSC 4032 (all minimum grade C-).

Additional Information: Departmental Category: Biological

NRSC 4545 (3) Neurobiology of Addiction

Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction. Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5545

Requisites: Requires prerequisite courses of NRSC 4132 (minimum grade C-).

NRSC 4561 (2-3) Special Topics in Neuroscience

Presents and analyzes special interest topics from the broad and interdisciplinary field of neuroscience. The instructor determines the content of a particular section. Repeatable for up to 6.00 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of NRSC 2100 (minimum grade C-). Restricted to Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

NRSC 4841 (1-3) Independent Study in Neuroscience

Pass/Fail only.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Neuroscience (NRSC) majors only.

Grading Basis: Pass/Fail

NRSC 4911 (3) Teaching of Neuroscience

Offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. Offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Intro to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate with instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 5911

PSYC 1001 (3) General Psychology

Surveys major topics in psychology: perceptions, development, personality, learning and memory, and biological bases of behavior. Students may participate as subjects for several hours in ongoing research.

Additional Information: Departmental Category: General
MAPS Course: Social Science

PSYC 2012 (3) Biological Psychology

Surveys biological bases of learning, motivation, emotion, sensory processes and perception, movement, comparative animal behavior, sexual and reproductive activity, instinctual behavior, neurobiology of language and thought, and neurophysiology and neuroanatomy in relation to behavior.

Recommended: Prerequisite PSYC 1001.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Biological

PSYC 2111 (4) Psychological Science I: Statistics

Three hours of lecture and one two-hour lab per week. Introduces descriptive and inferential statistics and their roles in psychological research. Topics include correlation, regression, T-test, analysis of variance and selected nonparametric statistics.

Requisites: Requires prerequisite course of MATH 1011 or MATH 1071 or MATH 1081 or MATH 1150 or MATH 1212 or MATH 1300 (minimum grade C-).

Additional Information: Departmental Category: General

PSYC 2145 (3) Introductory Cognitive Psychology

Introduces the study of human cognitive processes and covers perception, attention, memory, language, problem solving, reasoning, and decision making. Focuses on basic research and theory in cognitive psychology but also considers their implications for everyday applications such as effective learning and retention, multitasking, and eyewitness testimony.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-).

Additional Information: Departmental Category: Experimental

PSYC 2606 (3) Social Psychology

Covers general psychological principles underlying social behavior. Analyzes major social psychological theories, methods, and topics, including attitudes, conformity, aggression, attraction, social perception, helping behavior, and group relations.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-).

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

Departmental Category: Social

PSYC 2643 (3) Child and Adolescent Psychology

Surveys major psychological processes of childhood and adolescence.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-).

Additional Information: Departmental Category: Clinical

PSYC 2700 (3) Psychology of Gender and Sexuality

Examines psychological research on gender and sexuality as they intersect with race, class and other social categories. Points of emphasis include differences in cognition, attitudes, personality and social behavior. Conceptual themes include research methodologies, implicit and explicit attitudes, stigma and stereotypes. These elucidate such areas as close relationships, leadership, career success and mental health and happiness.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2700

Requisites: Requires a prerequisite course of PSYC 1001 or WGST 2000 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: General

PSYC 3001 (4) Honors Research Methods Seminar

Focuses on research design. Each student prepares an original, detailed research proposal, which can become the honors thesis. Open only to students who have been accepted into the psychology departmental honors program. Instructor consent required.

Additional Information: Arts Sciences Honors Course
Departmental Category: General

PSYC 3005 (3) Cognitive Science

Provides an introductory survey of influential models, theoretical approaches, and methods of cognitive science. Emphasizes and explains the convergence by work in multiple fields - including psychology and neuroscience, linguistics, computer science, and philosophy - on the idea that mental activity is a form of computation. Students from diverse backgrounds are introduced to a wide range of methods and approaches, including behavioral and neuroimaging experimental approaches, computational modeling and philosophical work. Department enforced prerequisites: two of the following CSCI 1300 or LING 2000 or PSYC 2145.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and LING 3005 and PHIL 3310 and SLHS 3003

Additional Information: Departmental Category: Experimental

PSYC 3102 (3) Behavioral Genetics

Introduces the basic principles of genetics, covers how these principles can be used in the study of behavior, and evaluates the evidence for genetic influences on behavioral characteristics.

Additional Information: Departmental Category: Biological

PSYC 3105 (3) Experimental Methods in Psychology

Provides an introduction to the use of experimental procedures in psychology. Students learn about the logic and design of experiments, the meaning of psychological data, how to analyze and interpret data, and the role of theory in psychology.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 (minimum grade C-).

Recommended: Prerequisite PSYC 2145.

Additional Information: Departmental Category: Experimental

PSYC 3111 (4) Psychological Science 2: Research Methods in Psychology

Provides a foundation in research methodology to give students the ability to design, conduct, analyze, and present (both verbally and in writing) an empirical study in psychology. Allows students to be effective producers and consumers of research.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

PSYC 3112 (3) Behavioral Genetics II

Follows PSYC 3102, Behavior Genetics, and surveys recent developments in behavior genetics, including recent genotyping and sequencing technologies, statistical approaches, and epigenetics.

Requisites: Requires a prerequisite course of PSYC 3102 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Biological

PSYC 3131 (3) Human Emotion

Introduces students to a diverse array of theoretical and empirical issues related to the study of human emotion. Evolutionary theories of anger, love and disgust; emotion and morality; cultural and gender differences; emotion and the brain; relation between emotion and thinking; development of emotion; and abnormal emotions in mental illness.

Recommended: Prerequisite PSYC 1001.

Additional Information: Departmental Category: General

PSYC 3303 (3) Abnormal Psychology

Examines etiological, theoretical, clinical, diagnostic, and experimental perspectives of major mental health disorders, with an emphasis on the main symptoms and diagnostic criteria associated with these disorders.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-).

Additional Information: Departmental Category: Clinical

PSYC 3456 (3) Psychology of Personality

Offers a psychological study of structure, organization and development of the person as a whole. Analysis of major theories, methods and research, including topics such as emotion, motivation, temperament, inner experience, identity and the self, personality change and the influence of sociocultural context.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Social

PSYC 3511 (3) History of Psychology

Includes outline of development of psychological theories since the Greek philosophers, the story of experimental psychology and its problems, and schools of psychological thinking. Students read original sources in English and English translations. Formerly PSYC 4511.

Requisites: Requires a prerequisite course of PSYC 1001 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General

PSYC 3684 (3) Developmental Psychology

In-depth consideration of human developmental processes across the life span. Includes coverage of the major topics in human development, such as physical, cognitive, social, emotional, and moral development.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites PSYC 1001 and PSYC 2111 and PSYC 3111.

Additional Information: Departmental Category: Developmental

PSYC 4001 (3) Honors Seminar 2

Surveys contemporary issues, explores current controversies, and examines in detail selected topics in psychology. Open to juniors and seniors pursuing departmental honors.

Additional Information: Arts Sciences Honors Course

Departmental Category: General

PSYC 4011 (1-3) Senior Thesis

Critically reviews some aspect of psychological literature, scholarly analysis of a major psychological issue, and/or empirical research project. See the psychology honors director for further information.

Additional Information: Departmental Category: General

PSYC 4021 (3) Psychology and Neuroscience of Exercise

Explores social, cognitive, psychobiological and behavioral aspects of exercise and other forms of physical activity. Examines how psychological and neuroscience research have been used to study how participation in regular physical activity affects mental health and how psychological and other variables influence participation in, adherence to, enjoyment of, and consequences of exercise and physical activity.

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General

PSYC 4052 (4) Behavioral Neuroscience

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 5052 and NRSC 4052 and NRSC 5052

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 and one of the following sequences EBIO 1210 and EBIO 1220 or CHEM 1113 and CHEM 1133 or PHYS 1010 and 1020 or PHYS 2010 and PHYS 2020 (all minimum grade C-).

Additional Information: Departmental Category: Biological

PSYC 4114 (3) Educational Psychology and Adolescent Development

Examines the principles of educational and adolescent psychology and development that play a significant role in analyzing and understanding the complex processes in middle and secondary school classrooms. Course has both theoretical and practical dimensions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4112

Additional Information: Departmental Category: Developmental

PSYC 4136 (4) Judgment and Decision Making

Introduces the study of judgment and decision making processes (estimation, prediction and diagnosis, choice under certainty, and risky decision making) and the methods that have been developed to improve these processes (statistical modeling, decision analysis, and expert systems).

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2606 and PSYC 2111 and PSYC 3111 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Departmental Category: Social

PSYC 4142 (3) Brain Injury, Plasticity and Recovery: From Neuron to Behavior

Traumatic brain injury is prevalent in all aspects of society, with incidence rates varying according to age, gender, military affiliation and participation in certain sports. Delves into the full spectrum of consequences following injury, beginning with the individual neural cells in the brain through to the behaving individual. Covers strategies to improve functional recovery.

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) majors only.

Recommended: Prerequisite NRSC 4132.

Additional Information: Departmental Category: Biological

PSYC 4145 (4) Advanced Cognitive Psychology

Advanced course in human cognitive processes. Covers key aspects of cognition, such as perception, attention, learning, memory, language and thinking. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week and a research project is required.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 5145

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2145 and PSYC 2111 and PSYC 3111 (all minimum grade C-).

Additional Information: Departmental Category: Experimental

PSYC 4155 (4) Cognitive Neuroscience/Neuropsychology

Introduction to cognitive neuroscience and neuropsychology. Provides a survey of the neuropsychological underpinnings for a wide range of cognitive functions: vision, object recognition, attention, language, memory and executive function. One lab per week.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4155

Requisites: Requires a prerequisite course of PSYC 2012 or NRSC 2100 and one of the following: PSYC 2111 or MATH 2510 or IPHY 2800 or EBIO 1010 or BCOR 1020 or ECON 3818 (all minimum grade C-).

Additional Information: Departmental Category: Experimental

PSYC 4165 (4) Psychology of Perception

One lab, three lect. per week. Analyzes peripheral and central mechanisms involved in the transduction and interpretation of experience. Gives special attention to vision and audition; major theories in these areas are discussed in terms of research they have inspired.

Requisites: Requires a prerequisite course of PSYC 1001 and PSYC 2111 and PSYC 3111 (all minimum grade C-).

Additional Information: Departmental Category: Experimental

PSYC 4175 (4) Computational Cognitive Neuroscience

Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 5175

Requisites: Requires prereq of PSYC 1001 and PSYC 2012 or NRSC 2100 and PSYC 2111 or MATH 2510 or 2520 or IPHY 2800 or APPM 1710 or 2750 or CHEN 3010 or 3130 or ECON 3818 (min grad C-). Restricted to PSYC or NRSC majors with 57-180 credits only.

Additional Information: Departmental Category: Experimental

PSYC 4220 (3) Language and Mind

Studies topics such as speech perception, word recognition, sentence comprehension, language acquisition, bilingualism, reading and writing. Examines the role of language as a product and producer of the mind, studying interactions between language and cognition from an interdisciplinary perspective. Students will become familiar with the methods of psycholinguistics and design and conduct a psycholinguistic experiment on their own.

Equivalent - Duplicate Degree Credit Not Granted: LING 4220

Recommended: Prerequisites PSYC 1001 and LING 2000.

Additional Information: Departmental Category: General

PSYC 4225 (4) Interdisciplinary Research Methods in Child Language Acquisition

Explores fundamental issues in language acquisition cross-culturally, combining methods from Linguistics, Anthropology, Psychology and Computer Science. Students will explore theoretical issue using a hands-on approach that involves acquiring skills such as designing and conducting experiments, investigating corpus data, and computational modeling.

Equivalent - Duplicate Degree Credit Not Granted: LING 4225

Requisites: Requires a prerequisite course of PSYC 1001 or LING 2000 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Developmental

PSYC 4263 (3) Evidence-Based Practice in Mental Health: Science and Skills

Provides an intensive introduction to behavioral interventions for common mental health problems and the framework of evidence-based practice in psychology, including helping students to acquire, critically evaluate and communicate about clinical psychological science intervention research and become familiar with applied skills that are relevant to a broad range of clinical settings.

Requisites: Requires prerequisite courses of PSYC 2111 and PSYC 3111 and PSYC 3303 (all minimum grade C-)

Grading Basis: Letter Grade

PSYC 4332 (1) Found in Translation: TBI From Bench to Bedside to Community

Traumatic Brain Injury (TBI) is prevalent in all aspects of society. Delves into all aspects of TBI, with particular emphasis on translational clinical neuroscience. That is, the movement of knowledge from bench, to bedside, to community. All of this knowledge resulting in better treatment of and outcome for those with TBI.

Requisites: Requires prerequisite courses of PSYC 2012 or NRSC 2100 (minimum grade C-). Restricted to students with 57-180 units (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Biological

PSYC 4376 (4) Research Methods in Social Psychology

Introduces the study of social psychological processes, emphasizing the social cognition perspective (e.g., stereotyping, person perception, theory of planned behavior) and the methods utilized in studying these processes. Students will complete research projects as part of the course.

Requisites: Requires prerequisite courses of PSYC 2606 and PSYC 2111 and PSYC 3111 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Departmental Category: Social

PSYC 4385 (3) Ethology and Comparative Psychology

Discusses behavior of representative members of each animal phylum. Emphasizes ontogeny of behavior as well as phylogeny.

Requisites: Requires a prerequisite course of PSYC 1001 or EBIO 1210 (minimum grade C-).

Additional Information: Departmental Category: Experimental

PSYC 4443 (4) Research Methods in Clinical Psychology

Learn to evaluate research methods as they relate to etiology, assessment, and intervention of psychological disorders. Emphasizes the importance of using sound methodological strategies in both research and clinical settings.

Requisites: Requires prerequisite courses of PSYC 2111 and PSYC 3111 and PSYC 3303 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) only.

Additional Information: Departmental Category: Clinical

PSYC 4521 (3) Critical Thinking in Psychology

Allows students to expand their powers as they think about psychological problems, or about how psychological knowledge and techniques can be applied to pressing political, economic, biological, quantitative and social issues. Encourages intellectual discipline and critical thinking about concepts and ideas; enables students to participate in oral and written discussion. May not be repeated, only 3 credit hours allowed.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 and PSYC 3111 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Psychology (PSCY) majors only.

Additional Information: Departmental Category: General

PSYC 4526 (3) Social Neuroscience

Develops greater knowledge of the general psychological principles underlying social behavior by using methods and theories from neuroscience. Students learn about common methods in human neuroscience and how they can be applied to better understand social behavior.

Requisites: Requires prerequisite courses of PSYC 2012 and PSYC 2111 and PSYC 2606 and PSYC 3111 (all minimum grade C-). Restricted to students with 57-180 credits (junior or senior) Psychology (PSYC) or Neuroscience (NRSC) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Social

PSYC 4541 (3) Special Topics in Psychology

Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 5541

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 and PSYC 3111 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Departmental Category: General

PSYC 4543 (3) Clinical Neuropsychological Disorders

Neuropsychological disorders are behavioral and cognitive expressions of underlying brain diseases or injury. The course will provide in-depth coverage from clinical perspectives of wide range of disorders caused by stroke, traumatic brain injury, degenerative diseases, and inflammatory diseases. Students will learn the various neurologic, neuroimaging and neuropsychological methods for assessing and diagnosing these disorders and will review specific illustrative cases.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Clinical

PSYC 4553 (3) Women's Mental Health: A Biopsychosocial Approach

Provides a broad overview of current research and theory related to women's mental health, emphasizing topics and problems that are prevalent among or particularly relevant to women. Teaches students to develop a critical and integrative understanding women's mental health, including historical, social, cultural, biological, behavioral, cognitive and emotional factors.

Requisites: Requires a prerequisite course of PSYC 3303 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Departmental Category: Clinical

PSYC 4560 (3) Language Development

Examines the development of language in childhood and into adult life, emphasizing the role of environment and biological endowment in learning to communicate with words, sentences, and narratives.

Equivalent - Duplicate Degree Credit Not Granted: LING 4560 and SLHS 4560

Requisites: Restricted to Psychology (PSYC) or Neuroscience (NRSC) majors only.

Recommended: Prerequisites PSYC 1001 and LING 2000.

Additional Information: Departmental Category: General

PSYC 4606 (3) Advanced Topics in Social Psychology

In-depth study of selected topics in social psychology. Particular section content each semester is determined by the instructor. May be repeated for a maximum of 6 credit hours, provided the topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2606 and PSYC 2111 and PSYC 3111 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Departmental Category: Social

PSYC 4713 (3) Survey of Clinical Psychology

Covers theories and practices relating to problems of ability and maladjustment. Diagnostic procedures and treatment methods with children and adults.

Requisites: Requires a prerequisite course of PSYC 3303 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Additional Information: Departmental Category: Clinical

PSYC 4733 (4) Psychological Testing and Assessment

Provides an overview of issues central to testing and assessment of psychological constructs, including types of evaluation instruments currently in use in the field, their applications and design.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 and 3111 (all minimum grade C-).

Additional Information: Departmental Category: Clinical

PSYC 4744 (4) Methods in Developmental Psychology

Learn to critically read and form hypotheses from studies in the developmental literature, gain hands-on experience in testing children and in the design of methods to test children, evaluate experimental data and relate them to hypotheses, previous results and theory, and write so others can understand.

Requisites: Requires prerequisite courses of PSYC 1001 and PSYC 2111 and PSYC 3111 and PSYC 3684 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

PSYC 4841 (1-6) Independent Study (Upper Division)

Pass/fail only.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Psychology (PSYC) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

PSYC 4911 (3) Teaching of Psychology

Students receive concrete experience in teaching general psychology under supervision of a psychology faculty member. Alternative pedagogical strategies are discussed. Students must submit an application to the undergraduate advising center.

Additional Information: Departmental Category: General

PSYC 4931 (3) Field Placement Internship

Offers valuable volunteer experience through a supervised field placement. Provides hands-on insight into the decisions and issues that confront professionals in psychology and related fields.

Requisites: Restricted to Psychology (PSYC) majors only.

Recommended: Prerequisite completion of 15 or more hours of psychology course work.

Additional Information: Departmental Category: General

Neuroscience - Bachelor of Arts (BA)

Our Neuroscience major provides a fundamental understanding of brain function that emerges from knowledge of the interplay of the molecular, cellular, and systems-level operation of the nervous system. Our distinguished faculty also teach excellent upper division courses in areas of expertise that include, but are not limited to, learning and memory, addiction, mental illness, stress, neuroendocrinology, neuropharmacology, and behavioral neuroscience.

Requirements

Prerequisites

It is policy to enforce the course prerequisites listed in the course descriptions. If you have not either taken and passed (C- or better) the prerequisites for a course, or obtained permission from the instructor or a departmental advisor to take the course based on equivalent preparatory course work or experience here or elsewhere, you may be administratively dropped from the course.

Degree Requirements

The neuroscience major requires at least 55 credit hours of course work.

Students must complete the general requirements of the College of Arts and Sciences and the requirements listed below. Students must fulfill all of the following requirements with a grade of C- or better. Additional

explanatory notes are available in the department advising office, Muenzinger D260.

The department recommends taking NRSC 2100 and NRSC 2200, the genetics and statistics requirements and the ancillary biology, chemistry and calculus sequences during the first two years of study.

Required Courses and Credit Hours

Required Courses

NRSC 2100	Introduction to Neuroscience	4
NRSC 2200	Laboratory Techniques in Neuroscience	2
Select one of the following genetics courses: ¹		4-6
EBIO 2070	Genetics: Molecules to Populations	
MCDB 2150 & MCDB 2151	Principles of Genetics and Principles of Genetics Laboratory	
MCDB 2150 & MCDB 2161	Principles of Genetics and From DNA to Genes, Phage Genomics Laboratory II	
MCDB 2150 & MCDB 2171	Principles of Genetics and Drug Discovery Through Hands-On Screens 2	
Select one of the following statistics/computation requirement:		3-4
BCOR 1020	Business Statistics	
EBIO 1010	Introduction to Quantitative Thinking for Biologists	
ECON 3818	Introduction to Statistics with Computer Applications	
IPHY 2800	Introduction to Statistics	
MATH 2510	Introduction to Statistics	
PSYC 2111	Psychological Science I: Statistics	
Upper-division Neuroscience Requirements		
MCDB 3135	Molecular Cell Biology I	3
Select at least three of the following:		9-10
NRSC 4032	Neurobiology of Learning and Memory	
NRSC 4052	Behavioral Neuroscience	
NRSC 4072	Clinical Neuroscience: A Clinical and Pathological Perspective	
NRSC 4082	Neural Circuits of Learning and Decision Making	
NRSC 4092	Behavioral Neuroendocrinology	
NRSC 4132	Neuropharmacology	
Select 9 credit hours of upper-division elective course work by taking additional courses from upper-division requirements above or from the following neuroscience and general science electives with a maximum of 6 credit hours allowed from courses outside of psychology and neuroscience: ¹		9
CHEM 4611	Survey of Biochemistry	
ECEN 3030	Electrical/Electronic Circuits Non-Major	
ECEN 4120	Neural Network Design	
ECEN 4811	Neural Signals and Functional Brain Imaging	
ECEN 4821	Neural Systems and Physiological Control	
ECEN 4831	Brains, Minds, and Computers	
EBIO 3240	Animal Behavior	
IPHY 3410	Introduction to Human Anatomy	
IPHY 3430	Introduction to Human Physiology	
IPHY 3470	Human Physiology 1	
IPHY 4200	Physiological Genetics and Genomics	
IPHY 4580	Sleep Physiology	

IPHY 4720	Neurophysiology	
MCDB 3140	Cell Biology Laboratory	
MCDB 4201	From Bench to Bedside: The Role of Science in Medicine	
MCDB 4426	Cell Signaling and Developmental Regulation	
MCDB 4444	Cellular Basis of Disease	
MCDB 4680	Mechanisms of Aging	
NRSC 4011	Senior Thesis	
NRSC 4015	Affective Neuroscience	
NRSC 4062	The Neurobiology of Stress	
PSYC/NRSC 4155	Cognitive Neuroscience/Neuropsychology	
NRSC 4542	The Neurobiology of Mental Illness	
NRSC 4545	Neurobiology of Addiction	
PSYC 4021	Psychology and Neuroscience of Exercise	
PSYC 4142	Brain Injury, Plasticity and Recovery: From Neuron to Behavior	
NRSC 4561	Special Topics in Neuroscience	
MCDB 3651	The Brain: Dysfunction to Disease	
PSYC 4165	Psychology of Perception	
PSYC 4175	Computational Cognitive Neuroscience	

Ancillary Foundation Courses

Ancillary molecular biology requirement—select one of the following: 4-5

EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
MCDB 1150 & MCDB 1151	Introduction to Cellular and Molecular Biology and Introduction to Cell and Molecular Biology Lab	
MCDB 1150 & MCDB 1161	Introduction to Cellular and Molecular Biology and From Dirt to DNA: Phage Genomics Laboratory I	
MCDB 1150 & MCDB 1171	Introduction to Cellular and Molecular Biology and Drug Discovery Through Hands-on Screens I	

Ancillary calculus requirement: 5

MATH 1300	Calculus 1	
or MATH 1310		Calculus, Systems, and Modeling

Ancillary general chemistry sequence requirement—select one of the following options: 10

Option 1:		
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	
CHEM 1133 & CHEM 1134	General Chemistry 2 and Laboratory in General Chemistry 2	

Option 2:
BCHM/CHEM Majors: the for-majors CHEM courses count. Discuss with you NRSC advisor.

Ancillary organic chemistry requirement: 4

CHEM 3311	Organic Chemistry 1 ²	
or CHEM 3351		

Total Credit Hours 57-62

¹ Please check all prerequisites and corequisites before enrolling in courses.

- ² Students planning graduate/medical school or work in the biotechnology industry should plan to take CHEM 3331 and CHEM 3341. Students should verify program requirements for any additional chemistry prerequisites.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major.

To maintain adequate progress in neuroscience, students should meet the following requirements:

- The neuroscience major must be started in the first semester. Adequate progress is defined as cumulative completion of at least one fourth of the required course work for the major during each academic year, including the following specific requirements: a) The ancillary molecular biology requirement and the genetics requirement must be completed during the first year; b) All ancillary requirements (molecular biology, calculus and general chemistry) and Introduction to Neuroscience and Laboratory Techniques in Neuroscience must be completed by the end of the second year.
- The neuroscience major requires at least 55 hours of required course work. Thus, at least 14 hours must be completed yearly, including timely completion of advanced course prerequisites.
- The four-year guarantee also requires completion of 30 hours of core curriculum courses by the end of the sophomore year. Calculus counts as three hours of QRMS; chemistry and molecular biology count as 13 hours of natural science.

Course	Title	Credit Hours
Year One		
Fall Semester		
MCDB 1150 with 1151, 1161, 1171, or 2171: Molecular Biology with lab (Preferred course to fulfill ancillary requirement. Taking a two credit lab will fulfill Genetics lab requirement).		4
CORE: Skills Acquisition (example: Lower Division Written Communication)		3
CORE: Content Area of Study (example: Ideals & Values)		3
Elective/MAPS: (example: if needed pre-requisite for MATH1300 or CHEM 1021 as preparation for General Chemistry. Speak to an advisor if you need both preparatory courses).		3
Elective/MAPS		3
	Credit Hours	16
Spring Semester		
MCDB 2150 & MCDB 2151	Principles of Genetics and Principles of Genetics Laboratory	4
MATH 1300	Calculus 1	5
CORE: Content Area of Study (example: U.S. Context)		3
CORE: Content Area of Study (example: Human Diversity)		3
	Credit Hours	15

Year Two

Fall Semester

CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5
NRSC 2100	Introduction to Neuroscience	4
CORE: Content Area of Study (example: Lower-Division Literature & the Arts)		3
CORE: Content Area of Study (example: Historical Context)		3
	Credit Hours	15

EBIO 1210 General Biology 1
& EBIO 1230 and General Biology Laboratory 1

Either:

PSYC 2012 Biological Psychology
or NRSC 210 Introduction to Neuroscience

One course in general genetics

Select one of the following:

EBIO 2070 Genetics: Molecules to Populations
MCDB 2150 Principles of Genetics
IPHY 4200 Physiological Genetics and Genomics

Or an approved equivalent general genetics course

One course in statistics:

Select one of the following:

PSYC 2111 Psychological Science I: Statistics
IPHY 2800 Introduction to Statistics
EBIO 1010 Introduction to Quantitative Thinking for Biologists
EBIO 4410 Biometry
MATH 2510 Introduction to Statistics

Or an approved equivalent statistics course

At least two additional upper - division Neuroscience/Behavior courses in IPHY, MCDB, PSYC and/or another department; one of these courses has to be outside of the home department. In the case of double majors, one advanced neuroscience course from each major department fulfills this requirement.

All courses must be taken for a letter grade (no pass/fail).

For more information on this certificate, see the Neuroscience Undergraduate Certificate (<http://www.colorado.edu/neuroscienceprogram/ugcert.html>) website or send e-mail to Prof. Serge Campeau (Serge.Campeau@Colorado.EDU), director of the program. Answers to Frequently Asked Questions are also available on this web page.

To obtain the certificate, a student must satisfy the requirements of a major and the neuroscience certificate program, and maintain a grade point average of 3.20 or better.

Psychology - Bachelor of Arts (BA)

The psychology major provides a fundamental understanding of the principles of human cognition, emotion, behavior, social interactions and mind-brain relationships. Our distinguished faculty also teach excellent upper division courses in areas of expertise that include, but are not limited to, behavioral genetics, cognitive neuroscience, cognitive psychology, clinical psychology, child development, women's health, and judgment and decision making.

International Bachelor of Arts (IBA)

The International Bachelor of Arts (IBA) is a joint degree between the University of Colorado Boulder and the University of Wollongong, Wollongong, Australia. To earn an IBA in Psychology, in addition to completing all the current requirements for the BA with a major in Psychology at the home institution, students must complete one full-time semester experiential, customized, international learning experience at the non-home institution.

Neurosciences and Behavior - Certificate

The neurosciences certificate program encourages undergraduate students interested in how the brain controls behavior to take courses in the basic sciences while providing the means to specialize in neuroscience.

Since this subdiscipline of the biological sciences spans a number of departments at the university (e.g., integrative physiology, psychology & neuroscience, and MCD biology), students are encouraged to obtain greater academic breadth through interdepartmental course selection.

For more information, see www.colorado.edu/neuroscienceprogram (<http://www.colorado.edu/neuroscienceprogram>).

Requirements

The Neuroscience Certificate Requirements are:

Required Courses

General Chemistry sequence with lab (or equivalent sequence)

CHEM 1113 General Chemistry 1
& CHEM 1114 and Laboratory in General Chemistry 1

CHEM 1133 General Chemistry 2
& CHEM 1134 and Laboratory in General Chemistry 2

Organic Chemistry sequence (or equivalent sequence)

CHEM 3311 Organic Chemistry 1
& CHEM 3321 and Laboratory in Organic Chemistry 1

CHEM 3331 Organic Chemistry 2
& CHEM 3341 and Laboratory in Organic Chemistry 2

General Physics sequence with lab (or equivalent sequence)

PHYS 2010 General Physics 1
& PHYS 2020 and General Physics 2

Biology with lab

Select one of the two options (or approved equivalent biology courses):

MCDB 1150 Introduction to Cellular and Molecular Biology
& MCDB 1151 and Introduction to Cell and Molecular Biology Lab

OR

Concurrent Degree Program

BA/MA in Psychology with Specialization in Cognitive Psychology

A concurrent BA/MA in psychology with a specialization in cognitive psychology is offered. Both the BA and MA degree must be completed within a five-year period. In recent years, both basic and applied research in cognitive psychology have come to rely increasingly on related findings, theories and methods in other cognitive science disciplines, including philosophy, computer science and linguistics.

The purpose of this degree program is to provide training that prepares students either for continuing doctoral study in cognitive psychology or for technical careers involving cognitive psychology in government and industry. Students complete the requirements for an undergraduate major in psychology, an interdisciplinary undergraduate certificate in cognitive science and a master's degree in the cognitive psychology graduate training program. Because of the demanding nature of this program, only highly qualified students are admitted.

Requirements

Prerequisites

It is policy to enforce the course prerequisites listed in the course descriptions. If you have not either taken and passed (C- or better) the prerequisites for a course, or obtained permission from the instructor or a departmental advisor to take the course based on equivalent preparatory course work or experience here or elsewhere, you may be administratively dropped from the course.

Degree Requirements

Students must complete the general requirements of the College of Arts and Sciences and the requirements listed below. Students must fulfill all of the following requirements with a grade of C- or better. Additional explanatory notes are available in the department advising office, Muenzinger D260.

Transfer students must complete a minimum of 12 upper-division credit hours of psychology course work on the Boulder campus with a C- or better. Of those 12 credit hours, one laboratory and methods course must be included.

The department recommends taking PSYC 1001, PSYC 2012, PSYC 2145, PSYC 2606 and PSYC 2111 by the end of the sophomore year, and PSYC 3111 by the end of the junior year.

Required Courses and Credit Hours

Required Courses

PSYC 1001	General Psychology	3
PSYC 2012	Biological Psychology	3
PSYC 2145	Introductory Cognitive Psychology	3
PSYC 2606	Social Psychology	3
PSYC 2111	Psychological Science I: Statistics	4
PSYC 3111	Psychological Science 2: Research Methods in Psychology	4
PSYC 3102 or PSYC 3303	Behavioral Genetics Abnormal Psychology	3

Laboratory or Methods course

Select at least one upper-division laboratory and methods courses from the following: 4

PSYC 3001	Honors Research Methods Seminar
PSYC/NRSC 4052	Behavioral Neuroscience
PSYC 4136	Judgment and Decision Making
PSYC 4145	Advanced Cognitive Psychology
PSYC/NRSC 4155	Cognitive Neuroscience/Neuropsychology
PSYC 4165	Psychology of Perception
PSYC 4175	Computational Cognitive Neuroscience
PSYC 4376	Research Methods in Social Psychology
PSYC 4443	Research Methods in Clinical Psychology
PSYC 4733	Psychological Testing and Assessment
PSYC 4744	Methods in Developmental Psychology

Upper-Division PSYC or NRSC electives 7

Ancillary Natural Science sequence (some courses may have required labs):

Select one of the following natural science sequences:² 6-10

CHEM 1011 & CHEM 1031	Environmental Chemistry 1 and Environmental Chemistry 2
CHEM 1113 & CHEM 1133	General Chemistry 1 and General Chemistry 2
CHEM 1400 & CHEM 2100	Foundations of Chemistry and Chemical Energetics and Dynamics
EBIO 1210 & EBIO 1220	General Biology 1 and General Biology 2
MATH 1300 & MATH 2300	Calculus 1 and Calculus 2
MCDB 1150 & MCDB 2150	Introduction to Cellular and Molecular Biology and Principles of Genetics
MCDB 1150 & EBIO 1220	Introduction to Cellular and Molecular Biology and General Biology 2
PHYS 1110 & PHYS 1120	General Physics 1 and General Physics 2 (calculus based)
PHYS 2010 & PHYS 2020	General Physics 1 and General Physics 2 (algebra based)

Total Credit Hours 40-44

¹ Students are encouraged to use independent study to gain field or laboratory experience. However, independent study credit hours are pass/fail credit hours only and cannot be used toward the 34 credit hours required for graduation.

² The student is required to pass with a grade of C- or better.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility.

¹ PSYC approved Natural Science Sequence and Ancillary. Also fulfills Core: Content Area Natural Science. Other choices can be found in your Degree Audit, but EBIO 1210 and 1220 are the most common.)

Religious Studies

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion, through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in one religious tradition, such as Buddhism, Christianity, Daoism, Hinduism, Islam and Native American traditions.

The undergraduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Course codes for this program are RLST and SNSK.

Bachelor's Degree

- Religious Studies - Bachelor of Arts (BA) (p. 486)

Minor

- Religious Studies - Minor (p. 487)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

RLST 1620 (3) Religious Dimension in Human Experience

Studies religion as individual experience and social phenomenon. Examines varieties of religious language (symbol, myth, ritual, scripture) and of religious experience (Asian, Western, archaic).

Additional Information: Arts Sci Core Curr: Ideals and Values

RLST 1800 (3) Cyborgs and Robots: Implications for Gender and Religion

Making is the core idea that connects artificial intelligence (cyborgs and robots) with classic literature (Prometheus, Pygmalion, Golem and Frankenstein) and fundamental religious and cultural concerns (Genesis, technology, work). The guiding question is what will humanity and religion be in the future? The goal is less predictive than to set a mandate with potential strategies for those who will create this future.

Grading Basis: Letter Grade

RLST 1818 (3) Introduction to Jewish History: Bible to 1492

Focus on Jewish history from the Biblical period to the Spanish Expulsion in 1492. Study the origins of a group of people who call themselves, and whom others call, Jews. Focus on place, movement, power/powerlessness, gender, and the question of how to define Jews over time and place. Introduces Jews as a group of people bound together by a particular set of laws; looks at their dispersion and diversity; explores Jews' interactions with surrounding cultures and societies; introduces the basic library of Jews; sees how Jews relate to political power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1818 and JWST 1818

RLST 1820 (3) Religion and Politics in Ancient Egypt

Studies the literature, politics, religions and other traditions of Ancient Egypt.

Repeatable: Repeatable for up to 3.00 total credit hours.

RLST 1828 (3) Introduction to Jewish History since 1492

Surveys the major historical developments encountered by Jewish communities beginning with the Spanish Expulsion in 1492 up until the present day. Studies the various ways in which Jews across the modern world engaged with the emerging notions of nationality, equality and citizenship, as well as with new ideologies such as liberalism, socialism, nationalism, imperialism and antisemitism.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1828 and JWST 1828

RLST 1830 (3) Global History of Holocaust and Genocide

Examines the interplay of politics, culture, psychology and sociology to try to understand why the great philosopher Isaiah Berlin called the 20th century, "The most terrible century in Western history." Our focus will be on the Holocaust as the event that defined the concept of genocide, but we will locate this event that has come to define the 20th century within ideas such as racism, imperialism, violence, and most important, the dehumanization of individuals in the modern world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1830 and JWST 1830

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Historical Context

RLST 1850 (3) Ritual and Media

Ritual continues to play an important role in contemporary societies in both religious and secular contexts. This course examines the elements and genres of ritual activity from African rites of passage to the Beijing Olympics, paying close attention to how the media documents, appropriates and transforms aspects of ritual.

Additional Information: Arts Sci Core Curr: Contemporary Societies

RLST 1900 (3) Introduction to the Hebrew Bible/Old Testament

Examine the content of the Hebrew Bible and critical theories regarding its development. Explore the development of these texts, as well as their foundational role for rabbinic literature and the New Testament. Assess the enduring influence of the Hebrew Bible/Old Testament in world literature and culture (such as in art and music).

Equivalent - Duplicate Degree Credit Not Granted: JWST 1900

Grading Basis: Letter Grade

RLST 1910 (3) Introduction to the New Testament

Examine the background, content and influence of the New Testament books. Studies the diverse perspectives contained in the various books, as well as the process of canonization. Assess the influence of the New Testament on the development of Christianity as well as world (eastern and western) culture.

Equivalent - Duplicate Degree Credit Not Granted: JWST 1910

Grading Basis: Letter Grade

RLST 2200 (3) Religion and Dance

Connecting dancing to religions across the globe demonstrates the near synonymy of the two in most cultures, the remarkable potential for dancing to articulate cultural identity, and finally that dancing is strongly connected to what distinguishes being human. Provides an enriched appreciation of dancing and the introduction to dancing in many cultures.

Grading Basis: Letter Grade

RLST 2202 (3) Islam

Introduces students to foundational Islamic concepts, texts, core practices, historical narratives and intellectual, spiritual and literary traditions. Topics covered include: the figure of Muhammad; the Quran; the emergence of distinct Muslim identities; Hadith; Sharia; Islamic theology; Islamic philosophy; science in Islamic civilization; Islamic mysticism; the impact of colonialism and modernity on the Muslim world; gender and sexuality; political Islam.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Ideals and Values

RLST 2320 (3) The Muslim World, 600-1250

Focusing on the history of the Muslim World in the age of the caliphates, this course takes an interdisciplinary, comparative approach to the development of Islamicate society, focusing on social structure, politics, economics and religion. Students will use primary and secondary sources to write a research paper, and make in-class presentations to cultivate critical thinking, research and writing skills.

Equivalent - Duplicate Degree Credit Not Granted: ARAB 2320

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Asia Content

RLST 2400 (3) Religion and Contemporary Society

Explores the role of religion in contemporary society, focusing on debates in religious ethics. Examining diverse voices from Christianity, Judaism and other traditions, this course considers religion's role in debates about issues such as same-sex marriage, climate change, war, criminal justice, torture, sexual ethics, abortion and economic justice.

Additional Information: GT Pathways: GT-SS3 - Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

RLST 2500 (3) Religions in the United States

Explores the development of various religions within the shaping influences of American culture, including separation of church and state, the frontier experience, civil religion, and the interaction of religions of indigenous peoples, immigrants, and African Americans.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Ideals and Values

Arts Sci Core Curr: United States Context

RLST 2600 (3) Judaism, Christianity, and Islam

Introduces literature, beliefs, practices, and institutions of Judaism, Christianity, and Islam, in historical perspective.

Equivalent - Duplicate Degree Credit Not Granted: JWST 2600

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Departmental Category: Asia Content

RLST 2610 (3) Religions of India

Introduces Hinduism, Buddhism, Jainism and Sikhism, in historical perspective.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Ideals and Values

Departmental Category: Asia Content

RLST 2612 (3) Yoga: Ancient and Modern

Addresses the history and philosophy of yoga, beginning from its earliest articulations in Vedic India 1200 BCE up to contemporary understandings of yoga. Examines yoga's historical evolution from a primarily mental practice to a bodily centered practice. Looks at the shifts yoga undergoes as it becomes popular in the modern West.

Additional Information: Arts Sci Core Curr: Human Diversity

RLST 2614 (3) Paganism to Christianity

Offers a cultural history of Greek and Roman religion. Students read ancient texts in translation and use evidence from archaeology to reconstruct the shift from paganism to Christianity in antiquity. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2610

Additional Information: Arts Sci Core Curr: Ideals and Values

RLST 2620 (3) Religions of East Asia

Introduces literature, beliefs, practices, and institutions of Taoism, Confucianism, Buddhism, and Shintoism in historical perspective.

Additional Information: GT Pathways: GT-AH3 - Arts Hum: Ways of Thinking

Arts Sci Core Curr: Ideals and Values

Departmental Category: Asia Content

RLST 2700 (3) American Indian Religious Traditions

Introduces religions of the peoples indigenous to the Americas. Concerns include ritual, mythology and symbolism occurring throughout these cultures in such areas as art, architecture, cosmology, shamanism, sustenance modes, trade and history.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2703

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Ideals and Values

RLST 2800 (3) Women and Religion

Examines roles of women in a variety of religious traditions including Judaism, Christianity, Hinduism, Buddhism, and goddess traditions.

Equivalent - Duplicate Degree Credit Not Granted: WGST 2800

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Human Diversity

RLST 2840 (1-3) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

RLST 3000 (3) Christian Traditions

Serves as an introduction to the academic study of Christianity, understood in its historical context, beginning with its most remote Mesopotamian origins and through to beginnings of the Protestant Reformation. Coverage is global, but "Western" Christian tradition are emphasized, as is the evolution of doctrine, ritual and institutions in relation to social, cultural and political factors.

Additional Information: Arts Sci Core Curr: Historical Context

RLST 3010 (3) Religion and the Senses

Expanding the five common senses so they are grounded on a more fundamental kinesthetic sense, that is, sense of movement, this course focuses on the study of religion and culture on all those marvelous richly and sensuously textured aspects of religious behavior: movement, experience, feeling, action, sensation, gesture, art, music, dancing, architecture, costume, food, and ritual.

RLST 3020 (3) Advanced Writing in Religious Studies

Seminar for religious studies majors that emphasizes the development of writing skills for use inside as well as outside the academy. Writing assignments are focused on one or more core topics in religious studies.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) Religious Studies (RLST) majors only.

Additional Information: Arts Sci Core Curr: Written Communication

RLST 3040 (3) The Quran

Explores the Quran from multiple perspectives including literary criticism, ethnomusicology, translation, history, paleaography, classical exegesis, Feminist Studies, Judicial interpretation, Islamic philosophy, materiality, Islamic law, spirituality, hip-hop and Jihadism.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Asia Content

RLST 3050 (3) Religion and Literature in America

Studies religious dimensions of American culture through representative literature, beginning with the Puritans and focusing on diversity in the 19th and 20th centuries.

Additional Information: Arts Sci Core Curr: United States Context

RLST 3060 (3) Fundamentalism and Islam

Explores the global rise of fundamentalism, particularly Islamic fundamentalism. Students will analyze fundamentalism as a function of modernity, and in metaphysical rather than geostrategic or cultural terms. Students will examine the arguments of Muslim fundamentalists, and the counterarguments of their critics.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Asia Content

RLST 3070 (3) Sufism

Examines the development of Sufism from a piety movement to a social institution. Students will be introduced to classical and modern expressions of Sufism including treatises on spirituality and ethics, commentaries on the Quran, timeless poetry, music and mystical philosophy. Students will learn how Sufism differs across cultural contexts and how it compares to other mystical traditions.

RLST 3100 (3) Judaism

Explores Jewish religious experience and its expression in thought, ritual, ethics, and social institutions.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3100

Additional Information: Arts Sci Core Curr: Historical Context
 Departmental Category: Asia Content

RLST 3110 (3) Of Jewish Legends, Folktales and the Supernatural

Explores Jewish traditional legends, folktales and stories of the supernatural. Starts with Aggadic Talmud tales and Midrashic texts and focuses on later rabbinic and mystical texts and folktales ca 500-1900 C.E. from around the Jewish world with subjects ranging from didactic narratives extolling the virtues of the simple pure soul, to the horrors of a blood sucking vampiric outside world.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3110

RLST 3120 (3) Radical Jews

Explores major Jewish figures, and their cultural productions, who were radical in the challenges they posed and transformative in the effects they had on society. The figures we examine range from the Rabbis of the Talmud who revolutionized a sacrificial cult religion, to Western secularist Baruch Spinoza and American icons such as Allen Ginsberg, Gloria Steinem and Bob Dylan.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3120

Grading Basis: Letter Grade

RLST 3200 (3) Hinduism

Studies literature, beliefs, practices, and institutions of Hinduism, in historical perspective.

Additional Information: Departmental Category: Asia Content

RLST 3202 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3201 and JWST 3202 and HEBR 3202

Additional Information: Arts Sci Core Curr: Human Diversity

RLST 3300 (3) Foundations of Buddhism

Introduction to Buddhist thought and practice in the variety of its historical and cultural contexts. The course begins with an exploration of narrative, cosmology, doctrine and ritual in early Buddhism and the Theravada of South and Southeast Asia. Through case studies, we then trace diverse conceptions of the Buddhist path in Tibet and East Asia where the Mahayana spread.

Additional Information: Departmental Category: Asia Content

RLST 3530 (3) Global Seminar: Jews and Muslims - The Multiethnic History of Istanbul

Spend two weeks in Istanbul and examine Jewish-Muslim relations in a place that was for 500 years the crossroads of civilization. The only Muslim city in the 21st century with a large, thriving Jewish community, Istanbul models how people from different social classes, ethnicities and religious backgrounds can coexist.

Equivalent - Duplicate Degree Credit Not Granted: IAFS 3530 and JWST 3530

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

RLST 3550 (3) Tibetan Buddhism

Explores Tibetan Buddhism through literature and film, including sacred biographies, treatises on the Buddhist path and films providing a visual window into Tibetan life worlds. We examine different kinds of Tibetan journeys: moving through the life cycle, treading the path of self-cultivation, embarking on solitary retreat, traversing from death to rebirth and traveling on pilgrimage and into exile.

Grading Basis: Letter Grade

RLST 3750 (3) Women in Buddhism

Explores diverse representations of the female in Buddhist literature and the social realities of actual women in Asian historical contexts. Through case studies that traverse Buddhist Asia, we delve into monastic views of the female body, philosophical analyses of the emptiness of gender, idealized images of the feminine in Buddhist tantra, and contemporary issues such as the nun's revival moment.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3750

Additional Information: Departmental Category: Asia Content

RLST 3800 (3) Chinese Religions

Studies classical Confucianism, Taoism, Buddhism, and Neo-Confucianism within the historical context of Chinese culture.

Additional Information: Departmental Category: Asia Content

RLST 3820 (3) Topics in Religious Studies

Intensive study of a selected area or problem in religious studies.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

RLST 3838 (3) Dancing, Religion, and Culture

A critical examination of the received cultural, religious, and academic understandings of dancing and the body; the construction of a richer theory of dancing that will more adequately support comparative studies; the study of dancing in cultures and religions in a diverse representation of cultures; and a more in depth social study of Latin American dancing including actual dancing experience.

RLST 3850 (3) The Mediterranean Religion Before Modernity

Offers an innovative approach to the multifaceted history of Christian-Muslim-Jewish interaction in the Mediterranean. It eschews established paradigms (e.g., Europe, Islamic world) that distort our understanding of these and pushes students to reconsider the accepted paradigms of Western history. Students will reappraise assumptions regarding the nature of ethnic, religious, national and cultural identity, and their role in human history.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3850

Additional Information: Arts Sci Core Curr: Historical Context

RLST 4030 (3) Religions in America

Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion and Asian religions in America.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5030

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

RLST 4045 (3) Ritual Art Dance Drama

Ritual Art Dance Drama as well as the common actions, gestures and objects of culture provide a foundation for cultural and individual concepts and values that may often be characterized as religious. Rich examples drawn from a variety of cultures around the world will be considered from a broad range of theoretical perspectives designed to help us gain the fullest understanding and appreciation of the lived and practiced aspects of culture and religion. Consistent with the fundamental proposition of the course, each student will also engage activities that will provide an experiential basis for learning.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5045

Grading Basis: Letter Grade

RLST 4050 (3) Topics in Christian Studies

Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5050

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

RLST 4170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5170 and JWST 4170

RLST 4180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5180 and JWST 4180

RLST 4200 (3) Topics in Hinduism

Examines in depth central themes, schools of thought and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, Tantra and Yoga.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5200

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

Additional Information: Departmental Category: Asia Content

RLST 4250 (3) Topics in Buddhism

Examines in depth central themes, schools of thought and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America. Department enforced prerequisite: RLST 2610 or RLST 2620 or RLST 3300 or instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5250

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Asia Content

RLST 4260 (3) Topics in Judaism

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5260 and JWST 4260

Repeatable: Repeatable for up to 9.00 total credit hours.

RLST 4280 (3) Body and Magic in India

Addresses ideas of the body and its use and functions within magic, particularly in Tantric traditions. Uses classical Hinduism and Tantra as a point of departure, focusing on subtle bodies and Tantric bodies and will also supplement this with writing about the body and its connection to mind in contemporary Western thought addressing the mind-body problem.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5280

RLST 4300 (3) Topics in Native American Religions

Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology; shamanism and medicine; trickster, clown and fool; crisis cult movements.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5300

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of RLST 2700 (minimum grade C-).

Recommended: Prerequisite 3 additional credit hours of RLST course work or instructor consent.

RLST 4353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5353 and ETHN 4353 and ETHN 5353

RLST 4450 (3) Religion and Nonviolence

Studies theories of nonviolence developed by major thinkers and movements, especially in the U.S., in the context of their religious commitments and beliefs and their historical circumstances.

RLST 4650 (3) Islam in the Modern World

Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya and Pakistan; development and change; the status of women; media and academic stereotyping.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5650

Recommended: Prerequisite 6 credit hours of religious studies at any level or instructor consent.

Additional Information: Departmental Category: Asia Content

RLST 4750 (3) Daoism

Traces the development of Daoism from its origin as an organized, communal religion in the second century CE to the vibrant living religion of today, encompassing meditative monastics, martial exorcists, solemn ritual masters and lay practitioners of inner alchemy and other self-cultivation techniques. Focuses on the extensive Daoist ritual tradition and the community of believers who created and used it.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5750 and CHIN 4750 and CHIN 5750

Grading Basis: Letter Grade

Additional Information: Departmental Category: Asia Content

RLST 4800 (3) Critical Studies in Religion

Focuses on a current issue or area of research in the study of religion. Students analyze the way theories develop and learn to develop their own critical analysis. Topics vary, e.g., comparative kingship, colonialism, ritual theories, feminist analysis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Religious Studies (RLST) majors only.

RLST 4810 (3) Honors Thesis

Students write an honors thesis based on independent research under the direction of a faculty member. Required for students who elect departmental honors.

Additional Information: Arts Sciences Honors Course

RLST 4820 (3) Interdisciplinary Seminar on Religion: Topics

Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5820

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Requisite 6 credit hours of religious studies at any level or instructor consent.

RLST 4830 (3) Senior Majors Seminar

Topics and instructors vary. Brings advanced majors together in order to focus their major experience on significant topics and issues of common interest.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

RLST 4840 (1-6) Senior Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

RLST 4850 (3) Gender in Hagiography

Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources and also examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.

Equivalent - Duplicate Degree Credit Not Granted: RLST 5850 and WGST 4850

Grading Basis: Letter Grade

SNSK 1010 (3-4) Introductory Sanskrit 1

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Sanskrit

SNSK 1020 (3-4) Introductory Sanskrit 2

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 1020 (minimum grade C-).

Additional Information: Departmental Category: Sanskrit

SNSK 2110 (3-4) Intermediate Sanskrit 1

Continued study of the grammar of classical Sanskrit and translation of selected readings from the literature.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 1020 (minimum grade C-).

Additional Information: Departmental Category: Sanskrit

SNSK 2120 (3-4) Intermediate Sanskrit 2

Continuation of SNSK 2110.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 2110 (minimum grade C-).

Additional Information: Departmental Category: Sanskrit

Religious Studies - Bachelor of Arts (BA)

The curriculum in the Department of Religious Studies at the University of Colorado Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion, through careful study of history, texts, rituals, narrative, art, and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in one religious tradition,

such as Buddhism, Christianity, Daoism, Hinduism, Islam and Native American traditions.

The undergraduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Graduation with Honors

The Honors Program in Religious Studies offers the opportunity for highly motivated undergraduates to undertake a deeper and more individualized study than is provided by the regular BA curriculum and to earn an honors designation on their diploma. Religious studies majors with at least a 3.30 overall grade point average and 3.50 in the major are eligible to participate in the program. Honors that may be earned are cum laude (with honors), magna cum laude (with high honors), and summa cum laude (with highest honors).

Students interested in pursuing departmental honors are encouraged to consult with the departmental undergraduate advisor by the beginning of their junior year.

Concurrent Degree Program BA/MA in Religious Studies

A concurrent bachelor's/master's degree program offers a select group of exceptional undergraduates the opportunity to begin graduate work while still an undergraduate and thereby complete the BA and MA degrees simultaneously and on an accelerated schedule. The entire program normally requires five to six years and permits 6 credit hours to be double-counted toward both degrees; otherwise, requirements for the two degrees remain unchanged.

Admission to the Program

Applicants to the program must be full-time, continuously enrolled students with a minimum overall GPA of 3.00, and a 3.50 GPA in RLST courses. They must have completed at least 24 credit hours prior to admission to the concurrent BA/MA degree program, and must have satisfied any MAPS deficiencies. Applications will include letters of recommendation from RLST faculty and will be evaluated by faculty as a whole, much as graduate applications are.

Continuation in the Program

Students enrolled in the concurrent BA/MA program must maintain a minimum cumulative GPA of 3.25, and 3.50 in the department. Concurrent degree students may not participate in the Time Out program; exceptions may be granted by the CDAC (Concurrent Degree Appeals Committee) based on a review of extenuating circumstances. Each BA/MA student will be assigned a graduate advisor with whom to meet regularly and will be required to demonstrate satisfactory progress toward degree to the advisor within the framework of the department's graduate student assessment policies.

Curriculum

Students enrolled in the concurrent BA/MA program are permitted to double-count 6 credit hours of course work, thereby reducing the total amount of RLST course work to $(36 + 31 - 6 =) 61$ credit hours. One of these courses must be RLST 6830, which would replace Senior Seminar for BA/MA students, and the other must be in an area of depth concentration. Otherwise program students will fulfill all the normal requirements for the BA and the MA degree.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and at least 36 credit hours of religious studies course work, at least 12 of which must be upper-division. At least 27 credit hours must be taken in the CU Department of Religious Studies in addition to the following requirements.

Required Courses and Semester Credit Hours

Academic Study of Religion Requirement

RLST 1620	Religious Dimension in Human Experience	3
RLST 4830	Senior Majors Seminar	3

Cluster Requirement

Select three courses in either of the following: 9

A single religious tradition (i.e. Buddhism, Christianity, East Asian Religions, Hinduism, Islam, Judaism, Native American and Indigenous Religions)

A particular theme (i.e. ancient and medieval religions, gender and sexuality, interreligious interactions, law and politics, media, culture, and contemporary society, philosophy and ethics, religion and violence, ritual, performance, and the body)

Electives	21
------------------	-----------

Total Credit Hours	36
--------------------	----

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in religious studies, students should meet the following requirements:

- At the beginning of the second semester of study, declare the major.
- Each semester, complete two religious studies courses.
- The last spring semester in residence, take the senior seminar.

Religious Studies - Minor

The Department of Religious Studies offers a minor in religious studies in addition to the BA. Students are subject to the College of Arts and Sciences minor requirements.

Requirements

Students must complete at least 18 credit hours in religious studies course work, including at least 6 credit hours of lower-division and 9 credit hours of upper-division work. At least 12 credit hours must be taken in the CU Department of Religious Studies.

Sociology

Sociology is the study of society. Students who major in sociology have the opportunity to learn in-depth about social structures and processes,

and to gain skills in critical thinking, writing, and data analysis. Sociology graduates go into many different fields, as described by a recent study by the American Sociological Association.

Course code for this program is SOCY.

Bachelor's Degree

- Sociology - Bachelor of Arts (BA) (p. 494)

Minor

- Sociology - Minor (p. 495)

Certificate

- Care, Health and Resilience - Certificate (p. 495)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

SOCY 1001 (3) Introduction to Sociology

Examines basic sociological ideas including social relations, social interaction, social structure, and social change. Examples are drawn from societies around the world.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

Departmental Category: General Sociology

MAPS Course: Social Science

SOCY 1004 (3) Deviance in U.S. Society

Examines the social construction of deviance in the U.S., the process of acquiring a deviant identity and managing deviant stigma, and the social organization of deviant act, lifestyles, relationships and careers.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Ideals and Values

Departmental Category: Deviance and Criminology

SOCY 1006 (3) The Social Construction of Sexuality

Discusses the social determinants of sexuality. Analyzes the economic, psychological, and cultural influences on human sexuality. Interactional perspective of human sexuality is presented.

Equivalent - Duplicate Degree Credit Not Granted: WGST 1006

Additional Information: Departmental Category: Sex and Gender

SOCY 1016 (3) Sex, Gender, and Society 1

Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical context of gender roles and status, reviews major theories of gender stratification.

Equivalent - Duplicate Degree Credit Not Granted: WGST 1016

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

Departmental Category: Sex and Gender

SOCY 1021 (3) United States Race and Ethnic Relations

An examination of race and minority problems in U.S. society, including the psychological, social, and cultural sources of prejudice and discrimination.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: United States Context

Departmental Category: General Sociology

SOCY 1022 (3) Ethics and Social Issues in U.S. Health and Medicine

Explores current ethical and policy issues in U.S. health and medical practices. Includes such issues as alcohol and drug abuse, organ transplants and substitutes, genetic engineering, contraception, abortion, occupational safety and health, and euthanasia.

Additional Information: Arts Sci Core Curr: Ideals and Values

Departmental Category: Population and Health Issue

SOCY 1841 (1-6) Independent Study in Sociology

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: General Sociology

SOCY 2011 (3) Contemporary Social Issues and Human Values

Explores contemporary societies on a global scale. Focuses on such issues as capitalism, socialism, race and ethnic problems, sex discrimination, poverty and the concentration of wealth, crime and deviance, human rights and human values, peace and war.

Additional Information: Departmental Category: General Sociology

SOCY 2021 (3) Nonviolence and the Ethics of Social Action

Examines nonviolence as a strategy of social action. Focuses on ethics and dynamics of nonviolent action; racial and economic justice movements; civil disobedience; and conscientious objection to war.

Additional Information: Departmental Category: General Sociology

SOCY 2031 (3) Social Problems

Examines U.S. society from a normative perspective emphasizing theories of social change. Considers such problems as distribution of power, unemployment, poverty, racism and sexism, the changing role of the family, and drugs.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Ideals and Values

Departmental Category: General Sociology

SOCY 2034 (3) Drugs in United States Society

Examines the relationship between drugs and social contexts. Lends insight into why people find consciousness alteration meaningful, what kinds of experiences and problems arise, and what types of social policies emerge to control drug use.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 2044 (3) Crime and Society

Explores issues related to crime, the criminal justice system, and crime-related public policy. It addresses what we know about crime and how we know it, how our society responds to crime, and how the institutions designed to address crime (police, courts, corrections) function.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2044

Additional Information: Departmental Category: Deviance and Criminology

SOCY 2061 (3) Introduction to Social Statistics

Introduces students to quantitative analysis of social phenomena. Emphasizes understanding and proper interpretation of graphs; measures of central tendency, dispersion, and association; and the concept of statistical significance. Assumes students have only limited mathematical background.

Additional Information: Departmental Category: General Sociology

SOCY 2077 (3) Environment and Society

Examines how both natural and built environments influence human behavior and social organization. Focuses on microenvironments and their influence on individuals; the impact of macroenvironments on societal organization; and environmental movements.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Environment and Society

SOCY 2080 (3) Sociology of the Helping Professions

Investigates how today's helping professionals are trained and socialized to care for clients, the challenges they face in working within modern bureaucracies and with advanced technologies and the importance of inter-professional care.

Additional Information: Departmental Category: General Sociology

SOCY 2091 (3) Topics in Sociology

Variety of courses taught by visiting and regular faculty. See current departmental announcements for specific content. Students may receive credit for this course up to three times for different topics.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: General Sociology

SOCY 2092 (3) Sex, Power and Reproduction

Examines fertility, contraception and abortion with an emphasis on demographic trends, social stratification and policy impacts. Sociological, demographic and public health perspectives will be presented.

SOCY 3001 (3) Classical Theory

In-depth study of classical sociological theorists, particularly Marx, Durkheim, and Weber. Examines their roles in defining the discipline of sociology.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade C-). Restricted to students with 27-180 credits (Sophomore, Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 3002 (3) Population and Society

Examines population, its structure and processes, and its relationships to selected areas of the social structure. Examines Malthusian, neo-Malthusian, and Marxist perspectives.

Requisites: Restricted to Sociology (SOCY) majors only.

Additional Information: Departmental Category: Population and Health Issue

SOCY 3011 (3) Contemporary Theory

Continuation of SOCY 3001. In-depth study of modern and post-modern theories of the 20th century, including structural-functionalist, conflict, symbolic interactionist, feminist, and world system theories.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 3012 (3) Women and Development

Investigates the status of women in the context of globalization and social and economic development.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3012

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Population and Health Issue

Departmental Category: Asia Content

SOCY 3016 (3) Marriage and the Family in U.S. Society

Comparative and historical examination of marriage and the family within the U.S. Emphasizes changing family roles and family structures. Also considers alternatives to the nuclear family and traditional marriage exploring new definitions of family.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3016

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: United States Context

Departmental Category: Sex and Gender

SOCY 3032 (3) Social Epidemiology

Explores the role of medicine and medical systems in society. How does society shape health, how does health shape social position and how do societies make sense of health and illness? Topics may include epidemiology, social demography of health, social stress, health behavior, experiences of illness and recovery, health care provision and health care delivery systems.

Additional Information: Departmental Category: General Sociology

SOCY 3041 (3) Self and Consciousness

Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation.

Equivalent - Duplicate Degree Credit Not Granted: INVS 3041

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 3042 (3) Topics in Population and Health

A variety of courses in population and/or health will be taught, usually by visiting lecturers. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-).

Additional Information: Departmental Category: Population and Health Issue

SOCY 3044 (3) Race, Class, Gender, and Crime

Overview of race, class, gender and ethnicity issues in offending, victimization and processing by the justice system. Examines women and people of color employed in the justice system.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3044 and WGST 3044

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 1001 or SOCY 1004 or SOCY 1021 or SOCY 2044.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 3045 (3) Sociology of Death and Dying

Addresses sociological aspects of thanatology (the study of death and dying). Includes study of the social meaning of death and its normative treatment in western civilization, with a focus on the contemporary United States.

Requisites: Requires a prerequisite course of SOCY 1001 or SOCY 3001 (minimum grade D-).

Additional Information: Departmental Category: Population and Health Issue

SOCY 3046 (3) Topics in Sex and Gender

Faculty present courses based on their area of expertise and specialization in the field of sex and gender. Students should check current sociology department notices of course offerings for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3046

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Sex and Gender

SOCY 3052 (3) Medical Sociology

Explores the role of medicine and medical systems in society. How does society shape health, how does health shape social position, and how do societies make sense of health and illness? Topics may include epidemiology, social demography of health, social stress, health behavior, experiences of illness and recovery, health care provision, and health care delivery systems.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Population and Health Issue

SOCY 3141 (3) Social Movements in the U.S

Considers theory and research about American social movements. Emphasizes leadership, ideology, recruitment, strategy, organizational dynamics, public response, and reasons for success or failure.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Recommended: Prerequisite SOCY 3001.

Additional Information: Departmental Category: General Sociology

SOCY 3151 (3) Self in Modern Society

Explores how modern social institutions and culture shape our personal experiences, how personal experiences can affect the nature of those, institutions and culture, and how strategies can be developed for achieving balance between the individual and society.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: Ideals and Values
Arts Sci Core Curr: United States Context
Departmental Category: General Sociology

SOCY 3161 (3) Sociological Perspectives on Race and Ethnicity

Addresses three subtopics of race from a sociological perspective: ethnic and racial identities, immigration, and race and ethnicity in Latin America.

Recommended: Prerequisite SOCY 1001 or SOCY 1021.

Additional Information: Departmental Category: General Sociology

SOCY 3171 (3) Whiteness Studies

Uses the conceptual framework of the sociology of race and ethnic relations to explore whiteness as a racial category that is centered and privileged in American society. Investigates the development of whiteness from past white supremacy, current colorblindness, to possible future multiculturalism. Analyzes the consequences of whiteness as a racial identity and a social structure.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-).

Additional Information: Departmental Category: General Sociology

SOCY 3201 (3) Sociological Research Methods

Introduces students to the logics and methods of sociological research. This requirement for majors teaches ways to answer sociological questions by collecting and analyzing different types of data. Students are trained in research ethics and learn how to collect their own data and conduct original sociological research. Collection and analysis of both qualitative and quantitative data are included.

Requisites: Requires prerequisite course of SOCY 2061 or ANTH 4000 or EBIO 4410 or ECON 3818 or GEOG 3023 or IPHY 2800 or MATH 2510 or PSCI 2075 or PSYC 2111 or EDUC 4716 (minimum grade C-). Restricted to Sociology (SOCY) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Sociology

SOCY 3301 (3) Survey Methods

Teaches quantitative research methods and, particularly, methods of survey research. Topics include sampling, interviewing, schedule construction, data analysis, computer methods, index construction, and statistical analysis. Students participate in a survey project, design, collect data, and prepare a research paper on the basis of collected data.

Requisites: Requires prerequisite courses of SOCY 2061 and SOCY 3001 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 3314 (3) Violence Against Women and Girls

Focuses on aspects of the victimization of women and girls that are "Gendered" - namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class, and sexuality in gendered violence.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3314 and WGST 3314

Recommended: Prerequisite SOCY 1016 or WGST 1016.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 3401 (3) Field Methods

Skill development prepares students to conduct qualitative sociological research. Emphasizes ethnographic techniques, including intensive interviewing, direct observation, coding, participant observation, and report writing. Students conceive and execute a field research project with data collection, analysis, and a report.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4000 (3) Gender, Genocide and Mass Trauma

Studies the persistence of genocide and the effects of mass trauma on women and girls. Within the framework of political and social catastrophe, examines cataclysmic world events and the traumatic consequences for women of religious persecution, colonialism, slavery and the genocides of the 20th and 21st centuries.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4010

Recommended: Prerequisite SOCY 1016 or WGST 1016 or WGST 2000 or SOCY 3314 or WGST 3314.

Additional Information: Departmental Category: Sex and Gender

SOCY 4002 (3) Sociology of Aging

Studies present and future roles of the aged in the family, the community, and the larger society. Considers economic, political, and health consequences of various retirement systems.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Recommended: Prerequisite SOCY 3001.

Additional Information: Departmental Category: Population and Health Issue

SOCY 4004 (3) Advanced Topics in Criminology

Variety of courses in criminology. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 1001 or SOCY 1004 or SOCY 2044.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 4007 (3) Global Human Ecology

Examines global environmental issues from sociological perspectives. Focuses on such problems as overpopulation, world hunger and poverty, pollution, resource shortages, environmental impact of technology and population dynamics, public policy, and strategies for change.

Equivalent - Duplicate Degree Credit Not Granted: SEWL 2000

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: Environment and Society

SOCY 4010 (3) Sociology Capstone Course: Professional Writing

Builds on previous coursework in survey or field methods to result in an original, article-length research paper analyzing sociological data. Students will hone their writing skills through in- and -out-of-class writing exercises, and read and analyze models of quantitative and qualitative sociological articles to develop sociological writing skills.

Requisites: Requires a prerequisite course of SOCY 3301 or SOCY 3401 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: General Sociology

SOCY 4014 (3) Criminology

Examines the scientific study of types of criminal behavior and explanations for criminal behavior, with special attention to social factors affecting criminal behavior.

Requisites: Requires a prerequisite course of SOCY 1001 or SOCY 1004 or SOCY 2044 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Deviance and Criminology

SOCY 4016 (3) Sex, Gender and Society 2

Studies status and power differences between the sexes at individual, group, and societal levels. Examines empirically established sex differences, and reviews biological, psychological, and sociological explanations for gender differences.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4016

Requisites: Requires a prerequisite course of SOCY 1016 or WGST 1016 or WGST 2000 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Sex and Gender

SOCY 4017 (3) Animals and Society

Examines the role of non-human animals in human society. Investigates the social construction of the human/animal boundary. Challenges ideas that animals are neither thinking nor feeling. Examines the many ways humans rely on animals. Considers the link between animal cruelty and other violence. Explores the moral status of animals.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-).

Additional Information: Departmental Category: Environment and Society

SOCY 4021 (3) Conflict Management in Social Systems

Explores conflict resolution theory and method as applied to interpersonal, intergroup, and interorganization conflict.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-).

Additional Information: Departmental Category: General Sociology

SOCY 4024 (3) Juvenile Justice and Delinquency

Examines the history, incidence and prevalence of delinquent behavior among youth.

Requisites: Requires a prerequisite course of SOCY 1001 or SOCY 1004 or SOCY 2044 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Deviance and Criminology

SOCY 4027 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between (a) inequality and democratic decision making and (b) undemocratic decision making; U.S. and corporate food and energy policy; and global environmental degradation. Focuses on the role that global inequality plays in fostering environmental degradation.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4027

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Environment and Society

SOCY 4030 (3) Sociology of Climate Change

Examines the human drivers and causes of climate change, the health and security risks it creates and the efforts of societies to mitigate and adapt to its effects.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4030

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Environment and Society

SOCY 4031 (3) Social Psychology

Studies individuals in social context. Reviews philosophical and sociological treatments of the relation between the individual and society. More specific topics include the socialization process, theories of human development and personality formation, language acquisition, conformity, aggression, sex differences in personality and gender identity, and the relation between attitudes and overt behavior.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4037 (3) Hazards, Disasters and Society

Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, key issues in the sociological study of disasters, social vulnerability, the impacts of disasters in the U.S. and worldwide and the U.S. Emergency Management System.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 5037

Requisites: Requires a prerequisite course of SOCY 2077 (minimum grade D-).

Additional Information: Departmental Category: Environment and Society

SOCY 4042 (3) Economic Sociology

Defines relationship between economy and society; sociological approach to study of economic activity and organization; difference from the theoretical and methodological assumptions orienting the discipline of economics; tackles these questions in two ways: studies foundations as established in works of Smith, Marx, Weber, Polanyi, and Schumpeter, and considers current research in economic sociology, focusing on concepts of markets, networks, and embeddedness.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Sociology (SOCY) majors only.

Additional Information: Departmental Category: Population and Health Issue

SOCY 4047 (3) Topics in Environment and Society

Variety of courses taught by visiting and regular faculty. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Environment and Society

SOCY 4052 (3) Social Inequalities in Health

Focuses on social inequalities in health in both U.S. and international contexts. Reviews the link between health status and various types of social statuses, including but not limited to socioeconomic status, gender, race and ethnicity. Explanations for the relationships between these factors and various health outcomes are discussed. Focuses on multiple levels of analysis, from the physician-patient interactions to health care systems and social policies. Students have the opportunity to develop their own specific research interests in this field.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Population and Health Issue

SOCY 4062 (3) Suffering and Care in Society

Examines how modern societies understand and respond to the reality of human suffering, how care systems are organized, and the experiences of professional caregivers.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Population and Health Issue

SOCY 4063 (3) Risk and Resilience in Society

Explores the growing dangers of modern life and the ability of society and its members to recover from epidemics, terrorism, financial disasters, natural catastrophes and other harmful events. Special attention is given to the social (as opposed to the individual) sources of risk and resilience and their implications for the helping professions.

Additional Information: Departmental Category: General Sociology

SOCY 4071 (3) Social Stratification

Studies theories of class, ethnic, sex, and age stratification. Examines social inequality in the United States and analyzes the resulting conflicts.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 5071

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4081 (1-3) Sociology of Education

Analyzes the school as a social organization. Among topics considered are power and control in the school; classroom interaction and its relation to learning and personality development in students; roles of educators; and reciprocal relations of school and community.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Sociology

SOCY 4084 (3) Punishment, Law and Society

Places the current state of punishment in the U.S. in historical and cross national context. Examines key features of penal systems and key sociological theories about the relationship between punishment and society.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4084

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 1001 or SOCY 1004 or SOCY 2044.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 4086 (3) Family and Society

Studies the changing relationship between family and social structure. Examines variations in family organization and considers political, social, ideological, demographic, and economic determinants of family formation.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4086

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Departmental Category: Sex and Gender

SOCY 4104 (3) The Death Penalty in America

Examines the historical and international use of capital punishment, and then focuses on its use and status in the United States in this century, with a special look at Colorado. Critically examines the arguments for and against capital punishment. The inmates on death row and their families will be examined, as well as the needs of families of homicide victims.

Requisites: Requires a prerequisite course of SOCY 4014 (minimum grade C-).

Additional Information: Departmental Category: Deviance and Criminology

SOCY 4117 (3) Food and Society

Examines the food system along the lines of social justice and environmental sustainability. Investigates the institutional and cultural supports of major food system problems and contemporary efforts to address those problems, including the realms of food production, processing, distribution, marketing, policy, regulation, consumption, and activism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Environment and Society

SOCY 4121 (3) Sociology of Religion

Examines complex interactions between religious and other social structures, such as the economy, government, and the family, and how globalization is affecting religious traditions across the globe. Includes discussion of how various religions are used or misused to justify terrorism and other acts of violence.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: General Sociology

SOCY 4131 (1-3) Advanced Topics in Sociology

Variety of advanced specialty courses taught by visiting and regular faculty designed for upper division sociology majors. See current departmental announcement for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4132 (3) Gender, Islam and Modernity

Examines gender in contemporary Muslim societies, with emphasis on Asia and the Middle East. Explores issues such as veiling, feminism, sexuality, family, women's participation in politics and social movements.

Requisites: Requires prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

SOCY 4141 (3) The Social Psychology of Friendships

Studies friendships between individuals and groups, applying social psychological theories of interaction and group processes. Examines the effects of hierarchies of status and power and of norms and social pressure on friendships. Attempts to answer questions like how social categories like gender, race, and class affect friendships, what are the unwritten rules of behavior among friends in different situations, and what happens when we violate them.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4160 (3) Designing Social Innovations

Introduces students to theory and research on social entrepreneurship with special emphasis on the role of design thinking.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

SOCY 4161 (3) Executing Social Innovations

Introduces students to the skills and strategies involved in developing a business plan for a social business or an organization wanting to increase its social impact.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

SOCY 4441 (3) Senior Honors Seminar 1

Helps students design and initiate an honors thesis based on original sociological research.

Requisites: Requires prerequisite courses of SOCY 3001 and SOCY 3301 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sciences Honors Course
Departmental Category: General Sociology

SOCY 4451 (3) Senior Honors Seminar 2

Helps students complete an honors thesis based on original sociological research. Emphasizes analyzing data, writing research reports, and presenting results.

Requisites: Requires prerequisite courses of SOCY 3001 and SOCY 3301 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Arts Sciences Honors Course
Departmental Category: General Sociology

SOCY 4841 (1-8) Independent Study in Sociology

Upper-division variable credit. Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4911 (1-3) Teaching Sociology

Students participate in a teaching seminar under the supervision of a faculty member. Includes pedagogical strategies for implementing concrete educational goals and encouraging higher levels of creativity and analysis in a large, lower-division class. Emphasizes mentorship and personal development. Instructor consent required.

Requisites: Requires a prerequisite course of SOCY 1001 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4931 (1-6) Internship in Sociology

Provides an academically supervised opportunity for junior and senior sociology majors to work in public or private organizations to gain practical knowledge and experience, and allows students to make a connection between sociological theory and the "real world". Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of SOCY 3001 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Sociology (SOCY) majors only.

Additional Information: Departmental Category: General Sociology

SOCY 4932 (3) Internship in Care, Health and Resilience

Provides an academically supervised opportunity for juniors and seniors interested in the helping professions to work in a job that provides them valuable hands-on experience, allows them to apply insights learned in their formal coursework and helps them make informed career choices upon graduation.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Population and Health Issue

Sociology - Bachelor of Arts (BA)

Sociology is the scientific study of human social behavior. It considers how society influences individuals, and how individuals influence society. Sociologists describe and explain the actions of persons, groups, organizations, classes, and entire societies. They also design and evaluate social programs and public policy. The study of sociology includes social theory, research methods, social stratification, race relations, social change, criminology, demography, gender roles, religion, social psychology, and the environment.

Students completing a BA in sociology will acquire the ability to:

- Locate and consult works relevant to a sociological investigation and write a high-quality sociological paper
- Understand the basic procedures of sociological research and analyze sociological data
- Understand and interpret the results of sociological research
Understand sociological concepts and Evaluate sociological writings

Requirements

Students must complete the graduation requirements of the College of Arts and Sciences and the required courses listed below. A minimum of 36 credit hours (but not more than 45) in sociology is required for the degree. Of the 36 credit hours, 21 must be upper division with a minimum of 15 upper-division credit hours of course work in the major taken on the Boulder campus. All required major courses must be completed with a grade of C- or better. The cumulative GPA required in sociology courses is 2.00.

In addition to formal course work, the degree offers opportunities for internships with various organizations, including social service agencies, the criminal justice system and non-profit organizations. There is also the opportunity to design and complete an honors thesis based on your own original research, as well as to work closely with one of our faculty members through the UROP program.

Required Courses and Credit Hours

SOCY 1001	Introduction to Sociology	3
SOCY 2061	Introduction to Social Statistics ¹	3
SOCY 3001	Classical Theory	3
SOCY 3201	Sociological Research Methods	3
Electives		24
Total Credit Hours		36

¹ A non-SOCY statistics course (C- grade or higher) can be used to substitute for SOCY 2061.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility (p. 127). The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in sociology, students should meet the following requirements:

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete SOCY 1001 and SOCY 3001 and 6 credit hours of sociology electives.
- By the end of the sixth semester, complete SOCY 2061 and SOCY 3201 and 15 credit hours of sociology electives (with a minimum of 9 of the 15 being upper-division credit hours).
- By the end of the eighth semester, complete 36 credit hours (but not more than 45), in sociology with at least 21 of those credit hours in upper-division courses.

Sociology - Minor

To declare a minor in sociology, students can attend a new majors/minors meeting, or they can email michael.lynn@colorado.edu (Michael.Lynn@colorado.edu) from their CU email account. Students will need to include their student ID number along with a request to add the SOCY minor.

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. A minimum of 18 credit hours in sociology is required for the minor. Of the 18 credit hours with a minimum of 9 upper division credit hours of course work taken on the Boulder campus. All minor courses must be completed with a grade of C- or better. The cumulative GPA required in sociology courses is 2.00.

Required Courses and Credit Hours

SOCY 1001	Introduction to Sociology	3
SOCY Electives		15
A minimum of 9 of the 15 credit hours of SOCY electives must be upper division		
Total Credit Hours		18

Care, Health and Resilience - Certificate

The Care, Health and Resilience certificate emphasizes the skills and practices necessary for careers in today's helping professions: nursing, medicine, counseling, ministry, community services, teaching, emergency management and related fields. These skills vary from the ability to nurture client's physical, emotional and/or social well-being to helping people thrive despite life-altering circumstances. The program will integrate a variety of occupational practices to give students the opportunity to explore career options through an internship experience.

Curriculum included in the certificate will:

- Provide students the opportunity to explore a variety of care-related occupations and the work experiences of their incumbents;
- Address the needs of suffering people and at-risk populations and will explore how society's understanding of the causes and consequences of human anguish have changed over time;
- Examine the ethical dilemmas posed by medical technologies and bureaucracies; and
- Link students to Colorado's only academic health sciences center, the University of Colorado Anschutz Medical Campus, and other local hospitals through its patient navigator internship program.

Requirements

The certificate is open to degree seeking and non-degree seeking CU Boulder undergraduates in good standing from any declared major. There is no GPA requirement for admission into the program, but students are required to achieve a C- or better in all coursework that applies toward the certificate.

Required Courses and Semester Credit Hours

Required Courses		
SOCY 1022	Ethics and Social Issues in U.S. Health and Medicine	3

PSYC 3456	Psychology of Personality	
WGST 3400	Gender, Personality, and Culture	

- read sophisticated Spanish texts at a level at which literary and cultural analyses can be performed;
- write and speak Spanish sufficiently to participate in critical discussions and write critical essays;
- analyze and interpret texts in terms of themes, characters, structure, style and overall textual strategies;
- relate analysis and interpretations of different texts to one another; and
- communicate such interpretations competently in written form in Spanish.

The undergraduate degree in Spanish and Portuguese language and culture emphasizes knowledge and awareness of the same topics listed in the degree in Spanish language and literature, but specifies electives focusing on the culture of the Portuguese-speaking world and adding knowledge of the Portuguese language.

The undergraduate degree in Spanish for the professions emphasizes knowledge and awareness of:

- several professional practices including business, health, media and sustainable development practices as applied to the Spanish-speaking world;
- fundamental Professional Spanish terminology related to these areas;
- the cultural environment in which these professions are conducted in the Spanish-speaking world;
- basic disciplinary practices according to the canons of each discipline;
- best practices in cross-cultural communication; and
- best practices in the field of translation, interpretation and language services in the targeted professional areas.

In addition, students completing the degree in Spanish for the professions are expected to acquire the ability and skills to:

- read and interpret in cultural and professional-related terms sophisticated Spanish texts concerning business, health, media and sustainable development practices;
- write and speak Spanish sufficiently to communicate effectively on professional-related issues, and be involved in critical discussions and write critical essays on the subject;
- analyze a particular professional problem in order to place it in a relevant context and formulate an appropriate response; and
- adequately translate professional-related documents.

Course codes for these programs are SPAN and PORT.

Bachelor's Degree

- Spanish - Bachelor of Arts (BA) (p. 503)

Minors

- Portuguese Language and Culture - Minor (p. 503)
- Spanish - Minor (p. 506)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Spanish and Portuguese

The Spanish and Portuguese Department offers three major tracks and two minors. Language courses at the elementary and intermediate levels are also offered in Spanish, Portuguese and Catalan.

The department has identified the following as educational outcomes for the three tracks within the Spanish major.

The undergraduate degree in Spanish language and literature emphasizes knowledge and awareness of:

- the fundamental outlines of the history of literary and cultural expressions of the Spanish-speaking world;
- major creative writers in both Spanish and Spanish American literature;
- basic critical methodologies in the study of different genres ranging from fiction to poetry in a variety of textual forms, and from the written word to cinema, media and other visual arts; and
- the cultural and historical contexts in which Spanish-speaking societies developed.

In addition, students completing the degree in Spanish language and literature are expected to acquire the ability and skills to:

Courses

Portuguese

PORT 1010 (5) Beginning Portuguese 1

Provides students with basic vocabulary and fundamentals of grammar through practice in speaking, listening comprehension, reading and writing, based on the Communicative Approach. Introduces the cultures of the Portuguese speaking world, with a focus on Brazil.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Portuguese

PORT 1020 (5) Beginning Portuguese 2

Provides students with basic vocabulary and fundamentals of grammar through practice in speaking, listening comprehension, reading and writing, based on the Communicative Approach. Introduces the cultures of the Portuguese speaking world, with a focus on Brazil. Continuation of PORT 1010. Department enforced prerequisite: PORT 1010 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Portuguese

PORT 2110 (3) Second-Year Portuguese 1

Involves practice in speaking, listening comprehension, reading and writing at an intermediate level. Explores relevant topics of the Brazilian culture through different media. Besides introducing grammar topics corresponding to the intermediate level of the Portuguese languages, it includes grammar review (PORT 1010 and PORT 1020) and extra work on vocabulary acquisition. Department enforced prerequisite: PORT 1020 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Departmental Category: Portuguese

PORT 2120 (3) Second-Year Portuguese 2

Includes practice in speaking, listening comprehension, reading and writing at intermediate level, based on the Communicative Approach. Includes grammar and extra work on vocabulary acquisition, both explored through literary texts by renowned authors of the Portuguese speaking world, with a focus on Brazilian literature.

Additional Information: Departmental Category: Portuguese

PORT 2350 (3) Portuguese for Romance Language Speakers

Focusing on Brazilian Portuguese, this course constitutes an intensive introduction to Portuguese language for those who speak a Romance language. Comprehends basic vocabulary and fundamentals of grammar through practice in speaking, listening comprehension, reading and writing, based on the Communicative Approach. Uses different media to explore cultural aspects of the Portuguese speaking world.

Recommended: Requisite three semesters of college equivalent in any Romance language.

Additional Information: Departmental Category: Portuguese

PORT 2800 (3) Brazil: Past and Present

Discusses contemporary Brazil through the lenses of its literary, as well as socio-political movements. Students acquire a broader perspective of the country's current dynamics based on the formation of its national identity from 1500 to today. History serves as background to analyze literature and arts and critically understand Brazilian culture. Taught in English. Does not count toward Portuguese minor or Spanish and Portuguese major.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Portuguese

PORT 3003 (3) Advanced Portuguese Language Skills

Consists of an advanced language course focused on current socio-environmental issues in Brazil. Involves reading academic texts of different areas of study, writing essays, watching documentaries, conducting class presentations and discussions and studying grammar and vocabulary in the context of a more sophisticated written Portuguese.

Requisites: Requires prerequisite course of PORT 2120 or PORT 2350 (minimum grade C-).

Additional Information: Departmental Category: Portuguese

PORT 3220 (3) Latin American Culture: Spanish America and Brazil

Examines literary, artistic, and philosophical currents in Spanish America and Portuguese America (Brazil), from pre-Columbian times to the present. Taught in Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 3220

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Recommended: Prerequisites PORT 2110 and PORT 2120.

Additional Information: Departmental Category: Portuguese

PORT 3230 (3) Transatlantic Relations in the Portuguese Speaking World

Examines cultural movements in Brazil, Portugal and Portuguese-speaking Africa, from the 15th century period of Portuguese expansion to the postcolonial present. Includes articles on culture as seen through literary, artistic, historical and sociological lenses. Taught in Portuguese.

Requisites: Requires prerequisite courses of PORT 2110 and PORT 2120 and PORT 2350 (all minimum grade C-).

Additional Information: Departmental Category: Portuguese

PORT 3270 (3) Socio-Environmental Dynamics in Brazil

Gives students the opportunity to immerse themselves in the language, culture and contemporary realities of rural Maranhao, Brazil. Explores some of the most pressing issues in Brazil today with focus on sustainable development, environmental governance and social entrepreneurship.

Requisites: Requires a prerequisite course of PORT 2110 or PORT 2350 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Portuguese

PORT 4110 (3) Brazilian Literature

Focuses on Brazilian literature through the lenses of literary and cultural studies. May address fiction, poetry or the relationship between literature and film. Besides reading literary texts, reading of academic essays is included.

Equivalent - Duplicate Degree Credit Not Granted: PORT 5110

Requisites: Requires a prerequisite course of PORT 2120 or PORT 2350 (minimum grade C-).

Additional Information: Departmental Category: Portuguese

PORT 4150 (3) Literature of the Portuguese Speaking World

Examines major works of Portuguese literature and/or Portuguese speaking African literature through the lenses of cultural and literary studies. May address fiction, poetry, or the relationship between literature and cinema.

Equivalent - Duplicate Degree Credit Not Granted: PORT 5150

Requisites: Requires a prerequisite course of PORT 2120 or PORT 2350 (minimum grade C-).

Additional Information: Departmental Category: Portuguese

PORT 4230 (3) Special Topics in Luso-Brazilian and/or African Literature

Designed to examine intensively particular topics or issues concerning the literatures of Portugal, Brazil and/or the African countries of Portuguese colonization. Taught in Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 4230

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of PORT 3230 and SPAN 3100 (all minimum grade C-).

Recommended: Prerequisites SPAN 3120 and an additional course above SPAN 3000.

Additional Information: Departmental Category: Portuguese

PORT 4840 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Portuguese

Spanish**SPAN 1000 (3) Cultural Difference through Hispanic Literature**

For freshmen only. Organized around the general topic of cultural differences. Focuses on a related issue such as gender or history articulated in the literature of Spain, Latin America, and the Hispanic United States. Taught in English; students read selected literary texts in English from the various traditions. Does not count towards the Spanish major.

Requisites: Restricted to students with 0-26 credits (Freshmen) only.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities
Arts Sci Core Curr: Literature and the Arts
Departmental Category: Spanish

SPAN 1010 (5) Beginning Spanish 1

Offers students a firm command of Spanish grammar. Grammar is used as a point of departure for development of oral skills. Reading and writing are stressed to a lesser degree. Attendance at the language laboratory may be mandatory.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 1150

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Spanish

SPAN 1020 (5) Beginning Spanish 2

Continuation of SPAN 1010. Attendance at the language laboratory may be mandatory. Department enforced prerequisite: SPAN 1010 (min. grade C-).

Equivalent - Duplicate Degree Credit Not Granted: SPAN 1150

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Spanish

SPAN 1150 (5) Intensive First Year Spanish

An intensive beginning course covering the same material as SPAN 1010 and 1020. Attendance at the language laboratory may be mandatory.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 1010 and SPAN 1020 SPAN 1010

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: Spanish

SPAN 2110 (3) Second-Year Spanish 1

Grammar review. Emphasizes reading, writing, and speaking skills. Attendance at the language laboratory may be mandatory. Department enforced prerequisite: SPAN 1020 (min. grade C-).

Equivalent - Duplicate Degree Credit Not Granted: SPAN 2150

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Departmental Category: Spanish

SPAN 2120 (3) Second-Year Spanish 2

Grammar review. Emphasizes reading, writing and speaking skills. Attendance at the language laboratory may be mandatory. Department enforced prerequisite: SPAN 2110 (min. grade C-).

Equivalent - Duplicate Degree Credit Not Granted: SPAN 2150

Additional Information: Departmental Category: Spanish

SPAN 2150 (5) Intensive Second-Year Spanish

Intensive review of grammar and other subjects covered in SPAN 2110 and SPAN 2120. Attendance at the language laboratory may be mandatory.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 2110 or SPAN 2120 SPAN 2110

Requisites: Requires prerequisite course of SPAN 1020 (minimum grade C-).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages
Arts Sci Core Curr: Foreign Language
Departmental Category: Spanish

SPAN 2450 (3) Catalan for Spanish Speakers

Offers an intensive introduction to the Catalan language for those able to speak Spanish. By the end of the course students should be able to communicate well in all language-skills areas: listening comprehension, speaking, reading and writing. Students will also have gained a better understanding and appreciation of the Catalan singularity.

Recommended: Prerequisite SPAN 3000 or placement or five semesters of college Spanish or department consent required.

Additional Information: Departmental Category: Spanish

SPAN 3000 (5) Advanced Spanish Language Skills

Transitional course that introduces students to the Spanish major and improves their writing skills. Involves composition, reading, and to a lesser extent, conversation.

Requisites: Requires prerequisite course of SPAN 2120 or SPAN 2150 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3001 (3) Spanish Conversation

Emphasizes vocabulary acquisition and speaking fluency. Through structured and carefully monitored individual, group, and class work, students achieve enduring language growth and meaningful acculturation that otherwise could only be achieved through an extended stay in an Hispanic country. This course is intended for those who are learning Spanish as a second-language. Native speakers of Spanish who have pursued formal education in a Spanish speaking country will not be admitted to the course. Heritage speakers of Spanish (native speakers who have pursued formal education in a non-Spanish speaking setting) as well as students from bi-lingual K-12 programs must meet with the coordinator to determine appropriate class level. Does not count toward the Spanish major or minor.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 3002

Requisites: Requires prerequisite course of SPAN 2120 or SPAN 2150 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3002 (3) Advanced Spanish Conversation

Focuses on refining fluency in both informal and formal discourse through group discussions, class work and individual and group presentations in order to prepare students for communication in professional settings. To that end, the materials used in the course will emphasize themes and problems relevant to the contemporary Hispanic world.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 3001

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3010 (3) Advanced Rhetoric and Composition

Designed to refine expository and argumentative writing in Spanish, this course will center around four main areas of study: culture, linguistics, sociopolitical and economic reality, and literature and criticism. A multi-draft process-based approach will guide the writing and revision of essays. Additionally, there will be a focus on grammar and lexical issues most challenging for students at the third-year level.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Written Communication
Departmental Category: Spanish

SPAN 3030 (3) Professional Spanish for Business 1

Includes the study of business vocabulary, business concepts, geographic context, and cultural context.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3040 (3) Professional Spanish for Business 2

Complements SPAN 3030 with a focus on different business topics and countries. Emphasizes interpreting and elementary translation. Attention is given to the writing of resumes and application letters, as well as the entire job search process.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3050 (3) Spanish Phonology and Phonetics

Designed to teach some of the methods, techniques, and tools of descriptive linguistics as they apply to articulatory phonetics. Students analyze important contrasts between sounds of Spanish and English by means of phonetic transcription.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3060 (3) Spanish for Careers in Environmental Studies and Sustainable Development

Provides advanced Spanish language competency and transcultural knowledge of issues pertaining to the environment, energy and sustainable development in the Spanish-speaking world. Students will develop a critical apparatus for analyzing, reading, listening, speaking and writing about the social, cultural and economic parameters of these countries and the U.S.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Spanish

SPAN 3070 (3) Spanish 21st Century Media Professions

Develops advanced Spanish language skills, trans-cultural knowledge and regional and historical understanding necessary for using Spanish in media related professions. Examines the production, representations and cultural meaning of Hispanic and Latino media within the United States and globally drawing on films, videos and readings in political economy, cultural studies, history and sociology. Students create five media products in Spanish.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Spanish

SPAN 3080 (3) Spanish Health Professions

Develops advanced Spanish language competency and trans-cultural knowledge and skills for health related contexts both in the United States and abroad in order to develop a critical apparatus for analyzing, reading, listening, speaking and writing about health and understanding health fields in historical and sociocultural contexts of the Spanish speaking world.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Spanish

SPAN 3100 (3) Literary and Cultural Analysis in Spanish

Fosters critical thinking and the ability to discuss texts from a historical, sociological, ideological and formalistic viewpoint. Analyzes literary and cultural expressions from Latin America, Spain and the US Latino traditions in different genres, ranging from fiction to poetry, and media from the written word to cinema and other visual arts.

Additional Information: Departmental Category: Spanish

SPAN 3120 (3) Advanced Spanish Grammar

Analysis of texts from morphological and syntactic perspectives. Structural and semantic characteristics of major features of Spanish are studied at the sentence level. Use of these grammatical features is then studied in selected literary texts.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3150 (3) Linguistic Analysis of Spanish

Introduces students to fundamental areas of linguistic analysis with special attention paid to Spanish (and Portuguese). The structural systems of language will be introduced (principles of sound patterns, word formation, meaning, and sentence structure). Different types of language variation will be discussed (historical, social, regional).

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3200 (3) Spanish Culture

Examines historical bases of modern Spain's cultural and political currents. Department enforced prerequisite: SPAN 3000.

Additional Information: Departmental Category: Spanish

SPAN 3215 (3) Urban History and Culture in the Spanish-Speaking World

Understanding the complex history, social fabric, material life and cultural diversity of Latin American and Iberian cities is the goal of this course, which in its iterations will be devoted to analyzing and discussing different urban centers on either side of the Atlantic Ocean. Materials from a wide variety of media and genres such as literature, visual arts, historiography, film, will be used. Taught in Spanish.

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3220 (3) Latin American Culture: Spanish America and Brazil

Examines literary, artistic, and philosophical currents in Spanish America and Portuguese America (Brazil), from pre-Columbian times to the present.

Equivalent - Duplicate Degree Credit Not Granted: PORT 3220

Requisites: Requires prerequisite course of SPAN 3000 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3230 (3) Discovering Barcelona: Culture and Heritage

Presents more than 2,000 years of Barcelona's cultural heritage in the city of Barcelona from the Romans to the present. We will read works by locals and foreign authors to understand how the city has been a hub of the European and Mediterranean cultures for centuries. A faculty sponsored Global Seminar to Barcelona, Spain, offered through the Study Abroad Program. Department enforced prerequisite: SPAN 3000 or equivalent.

Additional Information: Departmental Category: Spanish

SPAN 3240 (3) Catalan Culture 1: Nation and Art

Introduces students to the literary, artistic and historical currents of Catalonia, an economically vibrant area of the Iberian Peninsula with 10 million people, its capital Barcelona, and a distinct culture and language. Examines national identity and major works from renowned Catalan artists, spanning architecture, painting and literature, like Dali, Gaudi, or Miro. Department enforced prerequisite: SPAN 3000.

Additional Information: Departmental Category: Spanish

SPAN 3250 (3) Catalan Culture 2: Contemporary Trends and Barcelona

Introduces students to the contemporary social and cultural trends of Catalonia as they take place mainly in its capital Barcelona. Examines current developments in fields such as theatre, art, fashion, cooking, urban design or architecture. Department enforced prerequisite: SPAN 3000.

Additional Information: Departmental Category: Spanish

SPAN 3260 (3) Late 19th and 20th Century Argentine Narrative

Considers a series of late 19th and 20th century canonical works from several genres (poetry, short story, essay, and the novel). Students will acquire a very specific knowledge of late 19th and 20th century Argentine literature, its relationship to specific social actors and specific historical processes. A faculty sponsored Global Seminar to Rosario, Argentina, offered through the Study Abroad Program. Department enforced prerequisite: SPAN 3000 or equivalent.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Spanish

SPAN 3270 (3) Barcelona: Understanding Local and Immigrant Cultures

Explores the history of Barcelona, a cosmopolitan city that is one of the oldest in Europe, from an interdisciplinary, European perspective that emphasizes the city's cultural diversity and pluralism. A range of historical, literary, artistic, and sociological texts will be examined. Taught in Spanish. Offered through the Study Abroad program. Department enforced prereq., SPAN 3000.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Spanish

SPAN 3280 (3) Introduction to Catalan Literature & Film

Introduces students to the rich and diverse literary and film traditions of Catalonia, an economically vibrant area of the Iberian Peninsula with 10 million people and a distinct culture and language. Department enforced prerequisite: SPAN 3000 or equivalent. Course taught in Spanish.

Additional Information: Departmental Category: Spanish

SPAN 3310 (3) 20th Century Spanish Literature

Surveys leading writers of Spain from 1898 until the present.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3340 (3) 20th Century Spanish American Literature

Introduces contemporary Spanish American literature.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 3700 (3) Selected Readings: Spanish Literature in Translation

Introduces selected Spanish literature masterpieces. Taught in English. Will not count toward major requirements.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Spanish

SPAN 3800 (3) Selected Readings: Latin American Literature in Translation

Introduces selected Latin American (Spanish and Portuguese) literature masterpieces. Taught in English. Does not count toward the Spanish major.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Spanish

SPAN 4060 (3) Problems of Translation for Professions in Spanish 1

Develops skills in English-Spanish and Spanish-English translation and interpretation.

Requisites: Requires a prerequisite course of SPAN 3000 and SPAN 3010 or SPAN 3030 or SPAN 3040 or SPAN 3060 or SPAN 3070 or SPAN 3080 or SPAN 3120 (all minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4070 (3) Problems of Translation for Professions in Spanish 2

Presents documents from different professional areas (business, health, media and environmental studies and sustainable development) which are studied, prepared, translated and discussed in context in order to enable students to perform successfully in real translation situations.

Requisites: Requires a prerequisite course of SPAN 3000 and SPAN 3010 or SPAN 3030 or SPAN 3040 or SPAN 3060 or SPAN 3070 or SPAN 3080 or SPAN 3120 (all minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4110 (3) Hispanic Women Writers

Discusses the image of women in Spanish literature through the centuries using works by representative female writers.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Recommended: Prerequisites SPAN 3120 and an additional course above SPAN 3000.

Additional Information: Departmental Category: Spanish

SPAN 4120 (3) Literature and Cinema in Spain and Latin America

Studies film and fiction in different periods and about main topics of the Hispanic world. It will provide a historical and cultural overview, introduce students to film theory, narrative theory and the vocabulary associated with both, and integrate critical texts about all the material studied.

Topics may vary each semester. This course will be taught entirely in Spanish.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4130 (3) The Power of Storytelling: Oral, Textual and Digital Narratives

Examines the ways in which oral, textual and digital narratives have shaped, and continue to shape, our lives and the different communities we inhabit. Looks at stories of the Spanish tradition produced in a variety of historical settings and across different media.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Spanish

SPAN 4150 (3) Major Works and Trends in Literature and Culture in Spain Up to 1700

Examines major works and trends in literature, visual arts and/or other cultural expressions of Spain from its origins to the end of the Baroque period.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4160 (3) Major Works and Trends in Literature and Culture in Spain: 1700-Present

Examines major works and trends in literature, visual arts and/or other cultural expressions of Spain from 1700 to the present day.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4170 (3) Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century

Examines major works and trends in literature, visual arts and/or other cultural expressions of Latin America from the colonial period to the end of the 19th century.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4180 (3) Major Works and Trends in Literature and Culture in Latin America: 1900-Present

Examines major works of literature, visual arts and/or other cultural expressions of Latin America from the beginning of the 20th century to the present day.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4215 (3) Spanish in the United States

Describes the linguistic characteristics of U.S. Spanish, Spanish-English bilingualism and direct contact, including the study of borrowing, code switching, phonological and grammatical convergence, leveling, accommodation and attrition, among other linguistic phenomena.

Discusses the relationships between language and identity, as well as the role of Spanish in U.S. education, media and social institutions.

Requisites: Requires a prerequisite course of SPAN 3000 or SPAN 3010 or SPAN 3050 or SPAN 3120 or SPAN 3150 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Spanish

SPAN 4220 (1-3) Special Topics in Spanish and/or Spanish American Literature

Examines intensively particular topics or issues concerning Spanish and/or Spanish American literature selected by the instructor.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Recommended: Prerequisites SPAN 3120 and an additional course above SPAN 3000.

Additional Information: Departmental Category: Spanish

SPAN 4230 (3) Special Topics in Luso-Brazilian and/or African Literature

Designed to examine intensively particular topics or issues concerning the literatures of Portugal, Brazil and/or the African countries of Portuguese

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of PORT 3230 and SPAN 3100 (all minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4430 (3) Special Topics in Hispanic Linguistics

Examines intensively particular topics or issues concerning Hispanic linguistics selected by the instructor.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires a prerequisite course of SPAN 3000 or SPAN 3010 or SPAN 3050 or SPAN 3120 or SPAN 3150 (all minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4450 (3) Introduction to Hispanic Linguistics

Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation and Spanish spoken in the United States.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5450

Requisites: Requires a prerequisite course of SPAN 3000 or SPAN 3010 or SPAN 3050 or SPAN 3120 or SPAN 3150 (all minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4620 (3) Cervantes

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Recommended: Prerequisites SPAN 3120 and an additional course above SPAN 3000.

Additional Information: Departmental Category: Spanish

SPAN 4650 (3) Methods of Teaching Spanish

Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5650

Requisites: Requires a prerequisite course of SPAN 3000 and SPAN 3010 and SPAN 3002 or SPAN 3030 or SPAN 3040 or SPAN 3050 or SPAN 3150 or SPAN 3200 or SPAN 3220 or SPAN 3240 or SPAN 3250 or SPAN 3280 or SPAN 3310 or SPAN 3340 (all minimum grade C-).

Additional Information: Departmental Category: Spanish

SPAN 4660 (6) High School Spanish Teaching

Part of supervised secondary school teaching required for state certification to teach Spanish. These hours do not count toward student hours in the major nor in the total departmental hours allowed. Pass/Fail only.

Requisites: Requires prerequisite course of SPAN 4650 or SPAN 5650 (minimum grade D-).

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Spanish

SPAN 4840 (1-3) Independent Study

Departmental approval required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 4930 (1-4) Languages Internship for Professions

Participants interested in public service or management-oriented careers in government or business are able to work as interns in public sector agencies or in private industry, on campus, or abroad.

Requisites: Requires prerequisite course of SPAN 3100 (minimum grade C-).

Recommended: Prerequisites SPAN 3200 and an additional course above SPAN 3000.

Additional Information: Departmental Category: Spanish

SPAN 4980 (1) Methods Language Learn/Pedagogy

Required, intensive mini-course for teaching assistants in Spanish and Portuguese. Provides teachers with the opportunity to learn about language learning theory and pedagogy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 4990 (3) Spanish Honors Thesis

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Recommended: 18 hours of upper-division Spanish, 3.00 GPA overall, and 3.50 GPA in Spanish.

Additional Information: Arts Sciences Honors Course
Departmental Category: Spanish

Portuguese Language and Culture - Minor

The Portuguese minor focuses on Brazilian Portuguese, but provides the students with knowledge of the Portuguese-speaking world and the relations between the different national contexts where the language is spoken. The courses were designed to cover a variety of topics that are relevant to Brazil and other Portuguese-speaking countries. Students acquire a wider comprehension of Portuguese in a multi-cultural context.

The topics of the courses range from language to literature, from academic writing to performing arts; from sixteenth century letters on colonial issues to contemporary issues of biodiversity; from documentary films to soap operas; from nineteenth century Brazilian opera to twenty-first century *funk ostentação*.

The professors in the Portuguese program incorporate their international research into their teaching. The innovative pedagogical approaches aim at students' cultural intelligence, more than just language fluency.

Declaration of a minor is open to any student enrolled at CU Boulder, regardless of college or school.

Requirements

Declaration of a minor in Portuguese is open to any student enrolled at CU Boulder, regardless of college or school. To declare the Portuguese Minor make an appointment with the Spanish and Portuguese Department Professional Advisor (<http://www.colorado.edu/mycuhub>).

The Minor in Portuguese consists of 18 credits, a grade of C- or better for a course to apply to requirements, and a cumulative GPA for Portuguese courses of at least 2.0.

Transfer credit must be approved by the Associate Chair for Undergraduate Studies. A maximum of two courses can be taken abroad; this may be in addition to transfer credits. Study Abroad courses must be approved; contact the Spanish and Portuguese Department Professional Advisor (<http://www.colorado.edu/mycuhub>) to begin the process.

Required Courses and Credit Hours

Required Courses

PORT 2110	Second-Year Portuguese 1	3
or PORT 2350	Portuguese for Romance Language Speakers	
PORT 2120	Second-Year Portuguese 2	3
PORT 3003	Advanced Portuguese Language Skills	3
PORT 3230	Transatlantic Relations in the Portuguese Speaking World	3
PORT 4110	Brazilian Literature	3
PORT 4150	Literature of the Portuguese Speaking World	3

Suggested Course

PORT 3270	Socio-Environmental Dynamics in Brazil (this is a faculty-sponsored global seminar in the Amazon, Maranhão and/or Bahia, and is offered through the Study Abroad Program)
-----------	---

Total Credit Hours

18

Spanish - Bachelor of Arts (BA)

The Department of Spanish and Portuguese offers three different major tracks.

Spanish Language and Literature Track

This track emphasizes knowledge and awareness of:

- the fundamental outlines of the history of Spanish literature and of Spanish American literature;
- the major creative writers in both Spanish and Spanish American literature;
- basic critical methodologies in the study of poetry, drama, narrative fiction and nonfiction; and
- the cultural and historical contexts in which Spanish-speaking societies developed.

In addition, students completing this track are expected to acquire the ability and skills to:

- read sophisticated Spanish texts at a level at which literary analysis can be performed;
- write and speak Spanish sufficiently to participate in critical discussions and write critical essays;
- analyze and interpret texts in terms of themes, characters, structure, style and overall textual strategies;
- relate analysis and interpretations of different texts to one another; and
- communicate such interpretations competently in written form in Spanish.

Spanish and Portuguese Language and Culture Track

This track focuses on the literature and culture of Spanish-speaking and Lusophone countries, guiding students through readings on the history of Spain, Portugal, Brazil and Latin America. Along with major authors and literary movements of the Spanish and Portuguese-speaking world, students read a variety of complex texts across academic disciplines.

The linguistic and cultural mastery of Spanish and Portuguese is key in opening endless possibilities to the European Union (Portugal and Spain), as well as Brazil and the whole of Latin America. Through this bilingual combination, students will gain the tools needed to conduct business in the Western Hemisphere in today's competitive global market.

Spanish for the Professions Track

This track emphasizes knowledge and awareness of:

- modern business practices as applied to the Spanish-speaking world;
- the theories of economics, business law and international trade and finance;
- fundamental business Spanish terminology;

- the cultural environment in which business is conducted in the Spanish-speaking world;
- basic business according to the canons of this discipline; and
- international relationships.

In addition, students completing the degree in international Spanish for the professions are expected to acquire the ability and skills to:

- read and interpret in cultural and business-related terms sophisticated Spanish texts concerning business transactions;
- write and speak Spanish sufficiently to communicate effectively on business-related issues, be involved in critical discussions and write critical essays on the subject;
- analyze a particular business problem to place it in a relevant context and formulate an appropriate response; and
- adequately translate business-related documents.

Study Abroad

The department strongly recommends that all majors include some study in a Spanish-speaking country in their major program. The university cooperates with full-year and semester programs in Argentina, Bolivia, Chile, Costa Rica, Dominican Republic, Ecuador, Mexico, Nicaragua, Panama and Spain. There are also programs in Brazil and Portugal for Portuguese speakers. The Spanish and Portuguese Department also offers Global Seminars. Credit earned normally counts toward satisfaction of the major requirements, but the student should see the Professional Undergraduate Advisor before enrolling in a foreign program to discuss transfer of credit. Credit for work done in special programs offered by foreign universities is evaluated on an individual basis. It should be noted that courses taken abroad and designated as Spanish are also subject to the 45-hour maximum rule of the College of Arts and Sciences.

Students who present transfer work or credit earned in CU study abroad programs to satisfy major requirements are expected to complete at least 12 upper-division credits on the Boulder campus, including SPAN 3100. For the Spanish Language and Literature and Spanish and Portuguese Language and Culture majors, at least 6 must also be from the 4000-level "Major Works and Trends" courses listed above. For Spanish for the Professions, students must take at least 2 of the 3000-level profession courses and SPAN 4070 on the Boulder campus.

Concurrent Degree Program BA/MSIB in Spanish

This program is designed for students who wish to combine their BA in Spanish for the Professions with a 1-year MS in international business (MSIB) from the University of Colorado Denver. Students seeking this option should complete the Leeds Business Minor.

Admission Procedures: Students apply for the MSIB program during their third year by declaring their intention to the Spanish for the professions faculty director, submitting the standard MSIB application forms, and completing admissions requirements, which include the GMAT (Graduate Management Admissions Test). Students are notified of acceptance to the program before the start of their fourth year. Students must have at least a 3.00 GPA to be considered for admission.

Requirements

Please note that the following applies to all the major tracks:

- The College of Arts and Sciences does not allow more than 45 credit hours in any one discipline to be counted toward the 120 credit hours required for a BA degree. This rule does not mean that a student may not take more than 45 credit hours in Spanish, but rather that one must have at least 75 credit hours in courses other than Spanish. PORT 2120 will be accepted as partially fulfilling upper-division courses in other foreign languages. No Spanish or approved area courses with a grade lower than a C- will be counted in the major requirements. The ancillary GPA (made up of the combined grades from area courses) must be at least 2.00.
- To fulfill the requirements for any major track, students must complete at least 12 upper-division credits at CU-Boulder. For Spanish Language and Literature and the Spanish and Portuguese Language and Culture, 9 of the 12 credits must be from the major works/trends courses listed previously (SPAN 4150 or SPAN 4160, and SPAN 4170 or SPAN 4180) and SPAN 3100. For the Spanish for the Professions major, students must take at least 2 of the 3000-level profession courses and SPAN 4070 and SPAN 3100 on the Boulder campus.
- No more than 3 independent study credit hours may count toward the major.
- No grade lower than C- in a Spanish course will be counted in the major requirement.
- Please note that students seeking Colorado State Teaching Certification should complete the Spanish Language and Literature Track. Students seeking teaching certification in Spanish must take certain classes. For full requirements, please contact the Advisor for the Secondary Spanish Teaching Certificate program in the department.
- Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. All Spanish majors are encouraged to consult with Spanish and Portuguese Department Professional Advisor (<http://www.colorado.edu/mycuhub>) before they register each semester.

Spanish Language and Literature Track

Required Courses

SPAN 3000	Advanced Spanish Language Skills	5
SPAN 3100	Literary and Cultural Analysis in Spanish	3
SPAN 3010	Advanced Rhetoric and Composition	3
or SPAN 3120	Advanced Spanish Grammar	

Hispanic Linguistics Requirement

SPAN 3050	Spanish Phonology and Phonetics	3
or SPAN 315	Linguistic Analysis of Spanish	
or SPAN 443	Special Topics in Hispanic Linguistics	
or SPAN 445	Introduction to Hispanic Linguistics	

4000-level Spanish Language and Literature courses

<i>Spanish Literature and Culture</i>		
SPAN 4150	Major Works and Trends in Literature and Culture in Spain Up to 1700	
or SPAN 4160	Major Works and Trends in Literature and Culture in Spain: 1700-Present	
<i>Latin American Literature and Culture</i>		
SPAN 4170	Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century	
or SPAN 4180	Major Works and Trends in Literature and Culture in Latin America: 1900-Present	

Additional 4000-level Spanish Literature course

Choose one of the following courses not used to fulfill an above requirement:

SPAN 4110	Hispanic Women Writers	
	or SPAN 415 Major Works and Trends in Literature and Culture in Spain Up to 1700	
	or SPAN 416 Major Works and Trends in Literature and Culture in Spain: 1700-Present	
	or SPAN 417 Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century	
	or SPAN 418 Major Works and Trends in Literature and Culture in Latin America: 1900-Present	
	or SPAN 422 Special Topics in Spanish and/or Spanish American Literature	
	or SPAN 462 Cervantes	

Upper-Division Spanish Electives 9

9 credit hours of upper-division SPAN electives. 3 credit hours must be 4000-level. Can include courses not used to fulfill an above requirement.

Total Credit Hours 32

Spanish and Portuguese Language and Culture Track

Note that prerequisites for the program include sufficient Spanish knowledge to be admitted to 3000-level courses and sufficient knowledge of Portuguese to be admitted to 2000-level courses.

Required Courses

PORT 2110	Second-Year Portuguese 1	3
	or PORT 2350 Portuguese for Romance Language Speakers	
PORT 2120	Second-Year Portuguese 2 (or SPAN/PORT upper-division)	3
PORT 3003	Advanced Portuguese Language Skills	3
	or PORT 3220 Latin American Culture: Spanish America and Brazil	
	or PORT 3230 Transatlantic Relations in the Portuguese Speaking World	
4000-level PORT course		3

Required Spanish Language and Literature Courses

SPAN 3000	Advanced Spanish Language Skills	5
SPAN 3100	Literary and Cultural Analysis in Spanish	3
SPAN 3010	Advanced Rhetoric and Composition	3
	or SPAN 3120 Advanced Spanish Grammar	

Hispanic Linguistic Requirement 3

Choose one of the following:

SPAN 3050	Spanish Phonology and Phonetics	
	or SPAN 315 Linguistic Analysis of Spanish	
	or SPAN 443 Special Topics in Hispanic Linguistics	
	or SPAN 445 Introduction to Hispanic Linguistics	

Spanish Literature and Culture Course 3

SPAN 4150	Major Works and Trends in Literature and Culture in Spain Up to 1700	
	or SPAN 416 Major Works and Trends in Literature and Culture in Spain: 1700-Present	

Latin American Literature and Culture Course 3

SPAN 4170	Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century	
-----------	--	--

or SPAN 418 Major Works and Trends in Literature and Culture in Latin America: 1900-Present

SPAN or PORT Elective. Upper division (3xxx/4xxx) SPAN or PORT literature, culture and/or language. 3

Total Credit Hours 35

NOTE: Directly-related courses outside of the department, such as ANTH 4730, may replace 3 hours of Spanish or Portuguese elective credits. These courses must be pre-approved by the department.

Native speakers of Portuguese, and in general, all students whose Portuguese skills are beyond the PORT 2120 level, are not required to take Portuguese lower-division courses. However, students have to make up these credit hours by taking 6 hours of upper-division SPAN or PORT courses or any related courses outside the department. Related courses must be approved by the department.

Spanish for the Professions Track

The department offers an interdisciplinary major in Spanish for the Professions which includes the completion of 12 credits in a professional field, in a second major or in a second degree. It offers students numerous career possibilities, both in government and private industry at home and abroad. Those choosing this major are not able to enter the CU-Boulder graduate program in Spanish without fulfilling the requirements in the language and literature major.

NOTE: Prerequisites for the program include sufficient Spanish to be admitted to 3000-level courses and any pertinent pre-requisites for the 12 credits of professional field. SPAN 4070 must be taken at CU-Boulder.

Professional Spanish Courses ¹ 9

Choose three of the following:

SPAN 3030	Professional Spanish for Business 1	
SPAN 3060	Spanish for Careers in Environmental Studies and Sustainable Development	
SPAN 3070	Spanish 21st Century Media Professions	
SPAN 3080	Spanish Health Professions	

6 Credit Hours - Required

SPAN 4060	Problems of Translation for Professions in Spanish 1	3
SPAN 4070	Problems of Translation for Professions in Spanish 2	3

Spanish Language Courses

SPAN 3000	Advanced Spanish Language Skills	5
SPAN 3100	Literary and Cultural Analysis in Spanish	3
SPAN 3010	Advanced Rhetoric and Composition	3
	or SPAN 3120 Advanced Spanish Grammar	

Upper-division SPAN elective 3

Any SPAN 4000-level course. SPAN 4930 is an option. Upper Division Elective 3

Students are required to take 12 credit hours outside of Spanish in a certificate program, minor, second major or degree related to their professional interests. Students must fulfill the pre-requisites for the relevant program. The Business Minor, or the Public Health Certificate, or the Technology, Arts and Media Certificate are recommended. Courses meeting this requirement must be approved by the faculty director of the major. 12

Total Credit Hours 44

¹ No substitutions permitted.

Spanish - Minor

The Department of Spanish and Portuguese's minor in Spanish will help students gain an understanding of the Spanish language, as well as a grasp of main cultural concepts, practices and current literary and cultural trends.

In a global economy and competitive market environment, a Spanish minor adds value to an existing CU degree. Cultural and linguistic competence broadens a student's understanding of the nuances and complexities of today's world. Spanish, Portuguese and English are the most spoken languages in the Western Hemisphere.

Requirements

The minor in Spanish consists of 20 credit hours. A maximum of 9 credits, with no more 6 upper-division credits, can be transferred from other US institutions toward the minor. A maximum of 6 credits can be taken abroad; this may be in addition to transfer credits.

Required Courses and Credit Hours

Required Courses

SPAN 2120	Second-Year Spanish 2 ¹	3
or SPAN 2150	Intensive Second-Year Spanish	
SPAN 3000	Advanced Spanish Language Skills ²	5

Electives

Twelve upper-division credits from any course offered by the department and taught in Spanish ³ 12

¹ If students take SPAN 2150 instead of SPAN 2120, only 3 out of the 5 credits from SPAN 2150 will be counted toward the minor.

² Students who test into SPAN 3000 (i.e., who do not need to take SPAN 2120) must take 15 upper-division credits instead of 12.

³ Courses below SPAN 2120 do not count toward the minor, nor does SPAN 3001. SPAN 3100 is not required for the minor, but it is a prerequisite for all 4000-level literature courses.

Speech, Language and Hearing Sciences

The undergraduate program in speech, language and hearing sciences (SLHS) introduces concepts basic to human communication and provides opportunities for students to acquire an understanding of normal and disordered speech, language and hearing processes. The curriculum for the undergraduate degree in SLHS provides a strong academic foundation for students interested in a wide variety of careers related to the fields of disabilities, healthcare, and education. Additionally, it provides the appropriate undergraduate background for students interested in continuing onto graduate school in speech pathology, audiology and/or special education.

The undergraduate degree in speech, language and hearing sciences emphasizes knowledge of:

- the anatomy of the speech and hearing mechanisms, as well as the processes of speech production, transmission and reception;
- the development of language;

- scientific methods used in investigating speech/language/learning and hearing processes;
- the etiologies, characteristics and treatments of speech/language/learning and hearing disorders; and
- the role of the professional speech-language pathologist and audiologist, including the scientific traditions of the discipline and the ethical issues in providing service to individuals with communication disorders.

In addition, students completing the degree in speech, language and hearing sciences are expected to acquire the ability and skills to:

- express themselves effectively both orally and in written scientific and clinical discipline-specific reports;
- critically evaluate literature in the discipline; and
- analyze the acoustic output of the speech production process auditorily and/or instrumentally.

Course code for this program is SLHS.

Bachelor's Degree

- Speech, Language and Hearing Sciences - Bachelor of Arts (BA) (p. 509)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

SLHS 1010 (3) Disabilities in Contemporary American Society

Addresses the issue that 50 percent of all individuals experience disability in their lifetime. Introduces students to the social, cultural, psychological, economic, political, legal, and health-care issues related to society and individuals with disabilities.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Didactic: All-Department

SLHS 2000 (3) Introduction to Communication Disorders

Surveys communication disorders, including hearing impairments, learning disabilities, and speech-language disorders, as well as an introduction to basic speech and hearing science.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 2010 (3) Science of Human Communication

Discusses how human communication (the process by which a thought is transmitted from the brain of a speaker to the brain of a listener) involves a complex interaction of acoustics, anatomy, physiology, neurobiology, and psychology.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: Didactic: All-Department

SLHS 2305 (4) American Sign Language 1

Introduces basic sign vocabulary, grammatical structures of ASL, and the culture of deaf people. Classes are taught using ASL without the use of spoken English.

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: American Sign Language

SLHS 2315 (4) American Sign Language 2

Develops more complex vocabulary and grammatical structures, and an understanding of deaf culture. Classes are taught using ASL without the use of spoken English.

Requisites: Requires a prerequisite course of SLHS 2305 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: American Sign Language

SLHS 2325 (4) American Sign Language 3

Continuation of SLHS 2315. Covers ASL literature, advanced grammatical structures, idiomatic expressions, and deaf culture. Meets core requirement for a foreign language.

Requisites: Requires a prerequisite course of SLHS 2315 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Foreign Language
Departmental Category: American Sign Language

SLHS 3003 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3702 and LING 3005 and PHIL 3310 and PSYC 3005

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2240 or PSYC 2145.

SLHS 3006 (3) Phonetics

Focuses on production of speech sounds, transcribing speech using the International Phonetic Alphabet, analyzing the acoustic properties of speech sounds, understanding how speech sounds vary depending on the context. Provides a foundation for understanding normal and atypical speech development, atypical speech problems and patterns, regional and foreign accents, and speech recognition by computers.

Requisites: Requires a prerequisite course of LING 2000 (minimum grade C-).

Additional Information: Departmental Category: Didactic: Speech-Hearing Science

SLHS 3014 (3) Hearing Loss Epidemiology

Introduces students to basic epidemiological concepts related to hearing loss. Provides an overview of the hearing mechanism, assessment and identification of hearing loss, prevalence of hearing disorders, treatment and intervention. Noise pollution, aging and toxic agents are discussed. Focuses on risk factors for hearing impairment and comorbidities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 3106 (3) Hearing Science

Focuses on the three main aspects of the hearing process: sounds in the environment (physical acoustics), sounds encoded within the auditory system (physiological acoustics) and perception of sound (psychological acoustics).

Requisites: Requires a prerequisite course of SLHS 2010 (minimum grade C-). Restricted to Speech, Language and Hearing Sciences (SLHS) undergraduate or master's students or Audiology (AUDD) majors only.

Additional Information: Departmental Category: Didactic: Speech-Hearing Science

SLHS 3116 (3) Speech Science

Provides a basic understanding of the structural organization (anatomy), function (physiology), and neural controls of the structures used to produce speech, swallowing, respiration, and related behaviors in humans.

Requisites: Requires a prerequisite course of SLHS 2010 (minimum grade C-).

Recommended: Prerequisite SLHS 3106.

Additional Information: Departmental Category: Didactic: Speech-Hearing Science

SLHS 4000 (3) Multicultural Aspects of Communication Differences and Disorders

Examines perceptions and attitudes regarding differences in communication as a function of cultural-linguistic diversity. Discusses implications of differing verbal and nonverbal communication styles of various cultural groups in terms of professional responsibilities.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite upper-division standing and a minimum of 60 credit hours.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 4100 (1-3) Special Topics in Speech, Language, and Hearing Sciences

Studies selected topics in speech, language, hearing sciences, communication disorders, and other professional issues.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 4502 (3) Language Disorders: Child and Adult

Language disorders can result from problems with cognitive, linguistic, and/or discourse processing. The theoretical framework of language dysfunction is addressed while drawing upon real clinical examples of language disorders that have been observed in children and adults.

Requisites: Requires a prerequisite or corequisite course of SLHS 4560 (minimum grade C-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 4512 (3) Speech Disorders: Voice, Cleft Palate, Motor Disorders, Stuttering

Provides students with an introductory understanding of specific speech disorders including voice disorders, neurogenic speech disorders, articulation and phonological disorders and craniofacial disorders in children and adults.

Requisites: Requires a prerequisite course of SLHS 2010 (minimum grade C-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 4560 (3) Language Development

Covers the development of language in childhood and into adult life, emphasizing the role of environment and biological endowment in learning to communicate with words, sentences, and narratives.

Equivalent - Duplicate Degree Credit Not Granted: LING 4560 and PSYC 4560

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) undergraduate or master's students or Audiology (AUDD) majors only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 4576 (3) Communication Neuroscience

Provides an introduction to neuroscience with an emphasis on the systems that support human communication including speech perception and production, language, memory and cognition. Topics areas will include auditory processing, language, memory and motor systems. Development of brain systems and structures will be explored, as well as neurologically based disorders. Neuroscientific methods surveyed will include MRI, fMRI, EEG, MEG, NIRS, lesion studies and electrophysiology.

Requisites: Requires a prerequisite course of SLHS 2010 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

SLHS 4704 (3) Audiological Evaluation

Studies basic principles and techniques of hearing evaluation, including pure-tone, speech, immittance, and advanced audiometry; hearing conservation in hospital, school, and industrial settings; and identification and evaluation of auditory pathologies. Required projects in screening and pure-tone audiometry.

Requisites: Requires a prerequisite course of SLHS 3106 (minimum grade C-).

Additional Information: Departmental Category: Didactic: Audiology

SLHS 4714 (3) Audiological Rehabilitation

Covers basic principles and techniques related to the habilitation and rehabilitation of individuals who are deaf or hard of hearing: amplification, speech, language, auditory, speech reading, and educational issues.

Requisites: Requires prerequisite courses of LING 3100 or SLHS 3006. Requires a prerequisite or corequisite course of SLHS 4704 (all minimum grade C-).

Additional Information: Departmental Category: Didactic: Audiology

SLHS 4849 (1-6) Independent Study for Undergraduates

Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Independent Study

SLHS 4918 (2) Introduction to Clinical Practice

Introduces students to the clinical processes and key components of assessment and interventions. Explores the applications of the theoretical and scientific information to clinical settings. Students complete supervised observation of individuals with communication challenges.

Requisites: Requires a prerequisite course of SLHS 2000 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Speech, Language and Hearing Sciences (SLHS) majors only.

Additional Information: Departmental Category: Practica

SLHS 4938 (1-6) Internship: Speech-Language Intervention

Provides a supervised clinical experience with children who have communication challenges enrolled in the Child Learning Center programs; individuals demonstrating communication disorders as a cotherapist in the Speech, Language, and Hearing Center; or off-campus experience in an affiliated hospital or public school program. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

Speech, Language and Hearing Sciences - Bachelor of Arts (BA)

The undergraduate major in speech, language and hearing sciences (SLHS) at CU Boulder includes course work in three general areas:

- characteristics, causes and treatment of disorders that impact speech, language and/or hearing (e.g., stuttering, head injury, deafness, autism, learning disabilities, etc.),
- the science behind human communication (e.g., the anatomy and physiology of the speech and hearing mechanisms, acoustics of sound, etc.), and
- linguistics, specifically the normal development of language in children, phonetic transcription and the various component parts of language.

The program leads to a Bachelor of Arts (BA) degree. In addition to learning in the classroom about normal and disordered communication, students will observe graduate students and professionals engaged in clinical work with individuals exhibiting speech, language, learning and hearing problems. Internships are optional but are encouraged throughout a student's program.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below. The major includes 35 credit hours of required course work plus a 3-credit course in general psychology.

Required Courses and Credit Hours

Required Courses

LING 2000	Introduction to Linguistics	3
LING 3100	Language Sound Structures	3
PSYC 1001	General Psychology	3
SLHS 2000	Introduction to Communication Disorders	3
SLHS 2010	Science of Human Communication	3
SLHS 3106	Hearing Science	3
SLHS 3116	Speech Science	3
SLHS 4502	Language Disorders: Child and Adult	3
SLHS 4512	Speech Disorders: Voice, Cleft Palate, Motor Disorders, Stuttering	3
SLHS 4560	Language Development	3
SLHS 4704	Audiological Evaluation	3
SLHS 4714	Audiological Rehabilitation	3
SLHS 4918	Introduction to Clinical Practice	2

Electives

The following courses are recommended, but not required:

SLHS 2305 American Sign Language 1

Speech-Language Assistant Certificate Program

If planning to attend graduate school for SLHS, students should take one course from each of the following categories (graduate school prerequisite courses):

Statistics

EDUC 4716/5716 Basic Statistical Methods

SOCY 2061 Introduction to Social Statistics

MATH 2510 Introduction to Statistics

Biological Science

ANTH 2010 Introduction to Biological Anthropology 1

ANTH 2020 Introduction to Biological Anthropology 2

EBIO 1030 Biology: A Human Approach 1

EBIO 1040 Biology: A Human Approach 2

EBIO 1210 General Biology 1

EBIO 1220 General Biology 2

Physics or Chemistry

PHYS 1010 Physics of Everyday Life 1

PHYS 1230 Light and Color for Nonscientists

PHYS 1240 Sound and Music

PHYS 1580 Energy and Interactions

Total Credit Hours 38

Sample Four-Year Plan of Study

Course	Title	Credit Hours
Year One		
Fall Semester		
SLHS 2000	Introduction to Communication Disorders	3
LING 2000	Introduction to Linguistics	3
Core course: content area of study (e.g., historical context)		3
Core course: skills acquisition (e.g., lower-division written communication)		3

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in the Department of Speech, Language and Hearing Sciences students should meet the following requirements:

- Declare the major by the beginning of the sophomore year
- Complete prerequisite courses—LING 2000, SLHS 2010 and PSYC 1001—by the end of spring semester of sophomore year.

Theatre & Dance

The Department of Theatre & Dance (<http://www.colorado.edu/theatredance>) offers undergraduate and graduate degrees in both Theatre and Dance, a graduate degree in Experience Design (<http://www.colorado.edu/theatredance/mfa-experience-design>), and a Graduate Certificate in Applied Shakespeare (<http://www.colorado.edu/connect/certificate-programs/applied-shakespeare>). These programs combine traditional studies with practical training. Ambitious seasons of theatre productions and dance concerts feature student performers, designers, directors, choreographers, and guest artists of national and international fame whom often participate in curricular and extracurricular activities.

Recent guests have included Ralph Lemon, Ana Prada, Asia One, Teena Marie Custer, Nina Flagg, Nina Martin, Millicent Johnnie, Ananya Chatterjea, Maria Bauman, Jane Hawley, Tim O'Donnel, Ms. Prissy, April Rose, Chris Aiken and Angie Hauser, Art Bridgman/Myrna Packer, Rennie Harris, Heidi Henderson, Kathleen Hermesdorf, Deborah Jowitt, Darrell Jones, Susan Marshall & Co., Bebe Miller, David Dorfman, Joe Goode, Kevin Wynn, John Scott and Shelley Senter in dance; Lisa Wolpe, Jennifer Hubbard, Geoffry Kent, Eric Van Baars, Silvia Gregory, Gary John LaRosa, Ami Dayan, Terry Berliner, Lee Blessing, Jill Dolan, Elizabeth Dowd, Melanie Marnich, Jim Moody, Tim Miller, Holly Hughes, Jane Page, Joan Schirle, Karen Finley and Mark Medoff in theatre.

Students interested in Theatre and Dance are urged to consult with an advisor in the appropriate field to obtain both advice and the most current information concerning program opportunities and expectations.

Course codes for this department are THTR, DNCE, TDXD and THDN.

Bachelor's Degrees

- Dance - Bachelor of Arts (BA) (p. 521)
- Dance - Bachelor of Fine Arts (BFA) (p. 523)
- Theatre - Bachelor of Arts (BA) (p. 526)
- Theatre - Bachelor of Fine Arts (BFA) (p. 528)
- Theatre - Bachelor/Master of Arts (BAMA) (p. 526)

Minors

- Dance - Minor (p. 525)
- Theatre - Minor (p. 532)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bergner, Bruce Alan (https://experts.colorado.edu/display/fisid_113315)

Yang, Daniel
Professor Emeritus

DNCE 1000 (2) Beginning Contemporary Dance Technique

Introduces students to the dynamic capabilities of the body as an articulate means of expression. Presents basic concepts and skills from contemporary dance forms that may include Afro-modern, floor work, inversion, classical modern and improvisation. Classwork develops efficient alignment, strength, flexibility, coordination, rhythm, dynamics and spatial awareness. No experience necessary.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1012 (2) Dance Production

Provides the dancer with an introduction to the types of performance venues available today, and their technical systems and equipment. It will also establish an awareness of how technical theatre design arts may be utilized by a choreographer.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Production

DNCE 1013 (2) Dance Improvisation

An opportunity for students to develop skills of dance improvisation through the exploration of structured movement problems. Students study selected contemporary dance artists whose work stresses improvisation in performance and/or as a training vehicle. Department consent required for dance minors.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Creative Process

DNCE 1017 (3) Dance in Popular Culture and Media

Explores and contextualizes contemporary popular culture and dance. Introduces methods of critical analysis that reveal the rich heritage hidden within and around the dances students commonly encounter at the club, on the street, on television, on the big screen and elsewhere in everyday life. Through watching, reading, and discussion, students discover new meaning in their lived cultural experience.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Dance and Cultural Studies

DNCE 1020 (1) Beginning Contemporary Dance with Experience

Invites students to deepen their somatic awareness, efficient athleticism, and creative voice through the medium of contemporary dance. Continues the investigation of contemporary dance forms that may include Afro-modern, floor work, inversions, classical modern, and improvisation. Classwork will deepen students' alignment, strength, flexibility, coordination, rhythm, dynamics and spatial awareness.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1000 or previous dance experience.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1027 (3) Dance in Cultural Perception and Expression

Explores how the practice of dance can reflect, disrupt, subvert, support, and reinforce cultural expectations, norms and practices. Introduces international and domestic dance traditions and provides context for an interdisciplinary examination. Comparative readings from sociology, anthropology, gender studies, history, post-colonial studies, and political science provide a foundation to understand how cultural identities are negotiated and represented through movement.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts

Departmental Category: Dance and Cultural Studies

Departmental Category: Asia Content

DNCE 1091 (1) Modern 1

Introduces basic skills of modern dance. In-class technique work increases muscle strength, flexibility, and coordination. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 1100 (1) Beginning Ballet

Introduces beginning students to fundamental aspects of classical ballet technique; no previous experience required. Basic principles of alignment, rotation, and movement quality are introduced as the building blocks for success in advanced material. Foundational movements and ballet vocabulary are learned and refined. Students work toward mastery of simple combinations and rhythmic patterns.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1120 (1) Beginning Ballet with Experience

Relies on a demonstrated comprehension of kinesthetic and conceptual principles mastered at the beginning level. New movements from the classical ballet vocabulary are introduced with continued emphasis on alignment, rotation, and movement quality. Ballet sequences are longer and more complex.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1100 or previous ballet experience.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1190 (1) Ballet 1

Beginning ballet covering the basic vocabulary of classical ballet technique. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1200 (1) Beginning Jazz Dance

Introduces various styles of movement unique to jazz dance including improvisation, isolations, and African-influenced polyrhythms. Working within a range of dynamic performance styles, students will learn fundamental dance skills and jazz vocabulary, from which more advanced skills can be developed. Designed for students with little or no dance experience.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1220 (1) Beginning Jazz with Experience

Digs deeper into syncopated movement style of the jazz vernacular by continuing the embodied investigation of the Africanist influence on the form. Demands a rigorous awareness of efficient alignment while engaging with complex movement and challenging rhythmic structures.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1200 or previous dance experience.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1290 (1) Jazz 1

Introduces jazz dance, consisting of a technique warm-up, locomotion across the floor, and a series of dance phrases developed into a short dance combination. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 1301 (2) Hip-Hop Dance Technique 1

Introduces students to Hip-Hop dance as a culturally significant form. Students learn history, the social and political forces at work, and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Training addresses flexibility, sequencing, coordination, and performance skills.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 1401 (1) Transnational Fusion Dance: USA and Middle East/North Africa

Introduces a fusion form popularized in 2000: secular dance traditions of the Middle East/North African (MENA) communities in dialog with popular dances of the hip-hop and underground electronic dance music communities. Stretching, hip work, spinal undulations and poly-rhythmic orientations are covered. Educational highlights include discourse regarding cultural appropriation and gender coding in human movement.

Repeatable: Repeatable for up to 2.00 total credit hours.

DNCE 1849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Freshman level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 1901 (1-3) Technique Practicum

Broadens students' exposure to a range of diverse movement material. Topical course in dance technique, see subtopic for specific form.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technique

DNCE 1908 (1) First Year Dance Seminar

Designed for new dance majors as an introduction to the place of dance within academia and the professional/public spheres. Through the practice of descriptive dance writing, theoretical and physical exploration of discrete pedagogical and choreographic procedures, and interactions with in-class guest artists of different disciplines, students will engage in independent research and physical experimentation, culminating in a final personal presentation and group performance.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Performance

DNCE 2005 (3) Movement Awareness and Injury Prevention for the Dancer

Focuses on safe and effective dance practices supporting longevity and wellness. Areas explored include: experiential anatomy, conditioning, alignment, nutrition, injury prevention, care of common dance injuries, and experience with various somatic practices.

Requisites: Requires a prerequisite course of DNCE 2021 or DNCE 3041 or DNCE 4061 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Somatic Awareness

DNCE 2021 (2) Major Technique

Designed for Dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 2091 (1) Modern 2

Continuation of Modern 1. a developmental sequence of modern dance technique designed to refine the technical/expressive skills required of the professional dancer. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 2098 (1) Performance/Repertory

Students learn and perform dances from the repertory of guest artists. Offered summers only.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Performance

DNCE 2101 (1) Pointe

Introduces the basic training for the art of dancing in pointe shoes. Includes enchainements in pointe shoes and additional conditioning exercises for the feet and legs. Students should be at an Intermediate/Advanced ballet level with a strong understanding of rotation and alignment. No previous pointe experience necessary. Audition required.

Repeatable: Repeatable for up to 4.00 total credit hours.

Recommended: Prerequisite DNCE 3161 or DNCE 4181.

Additional Information: Departmental Category: Major Technique

DNCE 2141 (1) Low Intermediate Ballet

Builds on an existing understanding of alignment, rotation, and movement quality to introduce more mentally and physically difficult movements and enchainements of the classical ballet vocabulary. Students must be able to demonstrate an embodied familiarity with all traditional barre exercises on the first day of class.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1120 or previous ballet experience.

Additional Information: Departmental Category: Technique

DNCE 2191 (1) Ballet 2

Intermediate ballet, covering the complete vocabulary of classical ballet technique. Enchainements are of complex structure. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 2290 (1) Jazz 2

Continuation of Jazz 1. Studies coordination, rhythm, style, and advanced body part isolation in depth. Offered summers only at Perry-Mansfield Performing Arts Camp.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Nonmajor Technique

DNCE 2501 (2) African Dance

Explores the technique, styles, and rhythms of regional and national cultures of Africa. Areas of concentration may vary each semester (e.g. Ghana, Mali, Guinea, etc.). Introduces signature attributes common to different countries' dance traditions and features discussions of the musical traditions, histories, cosmologies, philosophies and aesthetics to contextualize and increase familiarity.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technique

DNCE 2701 (2) Contact Improvisation 1

Investigates movement vocabulary and kinesthetic understanding through physical contact and weight-sharing between two or more dancers. Fundamental skills of contact will be introduced and employed in duets and larger group improvisations: rolling, falling, giving and receiving weight, and the use of momentum and gravity.

Additional Information: Departmental Category: Major Technique

DNCE 2849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Sophomore level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 2901 (1-3) Technique Practicum 2

Topical course (second level) in dance technique, see subtopic for specific form. May require an audition.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Major Technique

DNCE 2909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4909 and DNCE 5909

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 3001 (2) Intermediate/Advanced Contemporary Dance Technique

Challenges intermediate and advanced students to refine their understanding and personal approach to the study of international contemporary dance. Demands a deep sense of somatic awareness, efficient athleticism, and creative voice. Floor work, inversions, and improvisation may be included. No audition required.

Repeatable: Repeatable for up to 4.00 total credit hours.

Recommended: Prerequisite DNCE 1000 or DNCE 1020 or any major technique course ending in "1" or previous dance experience.

Additional Information: Departmental Category: Technique

DNCE 3014 (2) Rhythmic Skills for Dancers

Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class.

Department consent required for dance minors.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Music

DNCE 3024 (2) Musical Resources for Dance

Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Department consent required for dance minors

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Music

DNCE 3033 (3) Choreographic Resources

Explores movement invention and strategies of choreographic manipulation of body, space and time. Students add to their toolbox of compositional resources through solo and duet studies. Class interrogates and supports the students' developing language for addressing, critiquing and comprehending compositional choices and structures through verbal and written feedback practice. Can be taken out of sequence with DNCE 3043. Formerly DNCE 2033.

Requisites: Requires a prerequisite course of DNCE 1013 and DNCE 2021 or DNCE 3041 or DNCE 4061 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Creative Process

DNCE 3035 (1) Production Practicum

Practical production activities and projects within a designated area of dance design, stage technology, or stage management, normally related to the department's season. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Production

DNCE 3041 (2) Major Technique

Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 3043 (3) Choreographic Process

Examines physical and spatial relationships via group and site specific work. New methods of creative problem solving unearth and mine one's imagination and inspiration, cultivating the individual's unique process of dance-making. Class interrogates and supports students' developing language for addressing, critiquing and comprehending compositional choices and structures through verbal and written feedback practice. Can be taken out of sequence with DNCE 3033.

Requisites: Requires prerequisite courses of DNCE 1013 and DNCE 2021 or DNCE 3041 or DNCE 4061 (all minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Creative Process

DNCE 3101 (1-3) Ballet Practicum

Practical studio training in ballet at the advanced/professional level with a professional company. Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of DNCE 2141 or DNCE 3161 or DNCE 4181 (minimum grade C-).

Additional Information: Departmental Category: Major Technique

DNCE 3161 (1) Intermediate Ballet

Surveys a wide range of the intermediate-level classical ballet vocabulary, focusing on an anatomically sound approach to the material. Students must work efficiently to execute the technique with rhythmic accuracy, clarity of line, propriety of style, and fluency in translating names of steps. Enrollment by audition only.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 3241 (1) Intermediate Jazz

Expands student's performance of the syncopated movement style of the jazz vernacular. Designed for the experienced jazz dancer. Includes dance techniques that further improves alignment, strength, flexibility, and coordination within the jazz idiom through an emphasis on style, rhythm, and more challenging dance combinations.

Repeatable: Repeatable for up to 2.00 total credit hours.

Recommended: Prerequisite DNCE 1220 or previous dance experience.

Additional Information: Departmental Category: Technique

DNCE 3301 (2) Hip-Hop Dance Technique 2

Builds on fundamentals established in Hip-Hop Dance Technique 1. Students deepen their understanding of Hip-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. The course focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 3601 (2) Alexander Technique for Actors and Dancers

Studies how human reaction, coordination, and movement play a role in all activities. Through in-depth class discussions, movement, exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 5601.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) or Theatre (THTR or TBFA, excludes THTR-MIN) majors only.

Additional Information: Departmental Category: Technique

DNCE 3801 (2) Major Technique: Multiple Accompanists

Designed for dance majors. Encompasses range of dance forms that require multiple accompanists. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours.

Additional Information: Departmental Category: Major Technique

DNCE 3849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Junior level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 3901 (1-3) Technique Practicum

Topical course (intermediate level) in dance technique. See subtopic for specific form. May require an audition.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technique

DNCE 4012 (1) Concert Production

Provides practical experience in producing formal and informal dance concerts. Introduces basic familiarity with production and promotional responsibilities, backstage and front-of-house duties and procedures. Meets with DNCE 5012.

Requisites: Requires a prerequisite course of DNCE 1012 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Major Technique

DNCE 4015 (3) Movement Analysis

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 5015.

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Movement Awareness Injury Prevent for the Dancer

DNCE 4016 (3) Creative Dance for Children

Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5016

Requisites: Requires a prerequisite course of DNCE 2033 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Pedagogy

DNCE 4017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance

Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5017

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite or corequisite a Human Diversity core requirement course.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Dance and Cultural Studies

DNCE 4023 (2) Performance Improvisation Techniques

Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5023

Additional Information: Departmental Category: Creative Process

DNCE 4036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction

Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialities of participants.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5036

Requisites: Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Pedagogy

DNCE 4037 (3) Contemporary Concert Dance: Shifting Perspectives in Performance

Focuses on the development of perceptual, descriptive, and analytical skills as well as the ability to apply cultural and critical theory to 20th and 21st century concert dance. Specific pieces of choreography are looked at from a broad range of perspectives.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite or corequisite a Human Diversity core requirement course.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: Dance and Cultural Studies

DNCE 4038 (1-3) Dance Repertory

Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5038

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Performance

DNCE 4046 (1) Teaching Practicum

Designed to give students supervised practical teaching skills through practice teaching, discussion, observation (in-person and video), reflection and feedback. Students will develop age appropriate lesson plans, define and refine principles of classroom management and understand the needs of diverse groups of students in a community, academic (K-12) and/or studio setting. All genres of dance are topic relevant.

Requisites: Requires a prerequisite course of DNCE 4036 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Pedagogy

DNCE 4047 (3) Hip-Hop Dance History

Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 5047.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 4053 (3) Advanced Dance Composition

Focuses on deepening the artistic voice and engaging with other art forms. Students explore the integration of technology and collaboration in creative projects and continue to engage in an objective critical process of their own work and the work of others. Meets with DNCE 5053.

Requisites: Requires a prerequisite course of DNCE 3043 (minimum grade C-). Restricted to Dance (DNCE or DBFA, excludes DNCE-MIN) majors only.

Additional Information: Departmental Category: Creative Process

DNCE 4061 (2) Major Technique

Designed for dance majors. Enrollment by audition only.

Repeatable: Repeatable for up to 16.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Major Technique

DNCE 4128 (1) Ballet Repertory

Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and New-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 5128.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Performance

DNCE 4181 (1) Advanced Ballet

Investigates the full range of the advanced-level classical ballet vocabulary, focusing on an anatomically sound approach to the material. Exercises require strength and a deeply subtle understanding of principles of alignment, rotation, epaulement, and movement quality. Class moves quickly through enchainements of complex structure. Enrollment by audition only.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 4261 (1) Advanced Jazz Dance Technique

Refines advanced students' approach to the nuances and virtuosity of jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 5261.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Technique

DNCE 4701 (2) Contact Improvisation 2

Builds upon skills introduced in DNCE 2701 and moves into more rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 5701.

Requisites: Requires a prerequisite course of DNCE 2701 (minimum grade C-).

Additional Information: Departmental Category: Major Technique

DNCE 4849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member. Senior level course.

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 4909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 2909 and DNCE 5909

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study

DNCE 4919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 5919

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Independent Study

DNCE 4939 (1-3) Dance Internship

Provides an opportunity for upper-division dance majors to serve apprenticeships in the community in work areas related to their major interests and career goals. Internships are available in areas such as arts administration, dance therapy, and technical production. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Independent Study

THTR 1003 (3) Acting 1: Introduction to Acting

Introductory course designed to explore creativity, collaboration and communication in the craft of acting. Focuses on basic terms and concepts of psychological realism fundamental to the actors' process through solo work and ensemble exercises. Open to majors and non-majors.

Additional Information: Departmental Category: Performance

THTR 1009 (3) Theatre and Society

Explores the importance of telling (and listening) to stories from the stages of the world; in theatre we learn what people value in their time and place. Investigates the range of genres of theatre in today's society and how theatrical artwork is devised and presented. Ideal for non-majors.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression Arts Sci Core Curr: Literature and the Arts

Departmental Category: Special Courses in Theatre

THTR 1011 (3) Global Theatre 1: Live Performance to Shakespeare

Travels across four continents exploring live performance from the beginning of recorded history to Shakespeare through various forms of theatrical storytelling including masked dramas, shadow puppets, kabuki, passion plays and commedia.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression Arts Sci Core Curr: Literature and the Arts

Departmental Category: History/Dramaturgy/Directing

THTR 1019 (3) Script Laboratory: Text Analysis and Practice for the Theatre

Introduces fundamental methods of text analysis for performance. Equips theatre makers with common vocabulary and concepts to more effectively communicate when collaborating with other artists. Provides tools for analyzing any narrative art form.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) Theatre (THTR or TBFA) majors only (excluding minors).

Additional Information: Departmental Category: Special Courses in Theatre

THTR 1105 (3) Stage Technologies

Introduces technical production elements and procedures, including materials, organizations, methods and equipment to realize theatrical scenery, properties, lighting and sound.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 1115 (3) Costume Technologies

Introduces technical production elements and procedures including materials, organizations, methods and equipment to realize theatrical costuming and make-up.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 2003 (3) Acting 1

Emphasizes principles of acting, focusing on exercises in relaxation, talking and listening, actions and objectives, and basic concepts of process work.

Requisites: Restricted to Theatre (THTR or TBFA) majors only (excluding minors).

Additional Information: Departmental Category: Performance

THTR 2021 (3) Global Theatre 2: Forms of Modern Theatre and Drama

Explores the dramatic literature, performance traditions and cultural contexts in world theatre from 1600s to the present, through discussion, writing and theatre practice, with an emphasis on the impacts of modernity and colonialism.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 2035 (3) Design Fundamentals

Introduces principles and techniques relevant to the expression of dramatic mood and idea through visual elements of the theatre, giving practice in concept development, style selection, and rendering techniques in scenery and costume design.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 2043 (3) Voice and Movement for the Stage

Natural resources of the human voice and body are studied as artistic resources for the performing artist. Designed to examine both the process and products of vocal and physical craft work.

Requisites: Restricted to Theatre (THTR, TBFA) or Dance (DNCE or DBFA) majors only (excluding minors).

Additional Information: Departmental Category: Performance

THTR 2059 (3) Open Topics in Theatre and Drama

Covers topics not otherwise listed in the curriculum. Topics for each semester are specified in the online schedule planner.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 2105 (3) Introduction to Performance Design

Introduces the creative/collaborative process of design for theatre and dance, including scenery, costume, lighting, and sound. Students create design projects and evaluate them with regard to artistic and practical concerns. Much of the course work is hands-on, experiential, and team-oriented.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 2849 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 3005 (3) Costume Design 1

Study and application of the principles of design as applied to stage costume, emphasizing texts in analysis and interpretation. Presented in a studio format and project driven. Explores concept development, style selection, and extensive practice in a variety of media and techniques for costume rendering.

Requisites: Requires prerequisite course of THTR 1115 (minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 3011 (3) American Musical Theatre History

Studies the creation, evolution and influence of American musical theatre and its importance to American society. Students analyze landmark productions, artists and the creative process.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 3 credits in THTR, DNCE or MUSC.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Departmental Category: History/Dramaturgy/Directing

THTR 3013 (3) Studio 1: Building a Character

Students learn to deepen and develop their proficiency with specific acting techniques. Explores the craft elements of acting, as well as text analysis.

Requisites: Restricted to Theatre (TBFA) majors only.

Additional Information: Departmental Category: Performance

THTR 3015 (3) Scene Design 1

Examines the process of theatrical scene design from early conception to realization. Course work is project-based. Students are introduced to the crafts of script analysis, conceptualization, design expression, drafting, and 3-D model building.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 3023 (3) Studio 2: Creating a Role

Continued development of acting technique and tools for play analysis, with particular emphasis on scene study. Special attention will be given to the Master Teachers of Acting and their pedagogies.

Requisites: Requires prerequisite course of THTR 3013 (minimum grade C-). Restricted to Theatre (TBFA) majors only.

Additional Information: Departmental Category: Performance

THTR 3031 (3) Development of Theatre 3: 20th Century International Drama

Introduces 20th century international drama. Discusses selected plays by major African, Asian, and European authors and explores different dramatic traditions and their increasing interactions throughout the 20th century.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 3033 (1-3) Production Research and Practicum: Acting

Allows students to undertake an acting project, either within the major season or approved departmental production. Requires detailed preparational research, rehearsal commitments, and public presentation of theories and concepts in practice. Following the performance, students present written reports and evaluations.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Performance

THTR 3035 (1-2) Production Practicum

Practical production projects within a designated area of technical theatre, design, stage management, normally related to the department's season.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 3037 (2-3) Shakespeare Practicum

Students are assigned to work with production artisans of the Colorado Shakespeare Festival. While there are many possible areas, production designs for each season determine the number of available positions.

May substitute for two credits of THTR 3035.

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Departmental Category: Shakespearean Production

THTR 3043 (3) Advanced Voice for the Stage

Continues the work begun in THTR 2043. Studies advanced vocal techniques with the goal of integrating these skills into the working process of the performing artist.

Requisites: Requires prerequisite course of THTR 2043 (minimum grade C-). Restricted to Theatre (THTR or TBFA) majors only.

Additional Information: Departmental Category: Performance

THTR 3045 (3) Stage Management

Covers stage management from the inception of a production concept through the process of mounting a production, focusing on the interrelationships of the various artists involved, management and scheduling of time, and the psychology of handling a wide range of personalities.

Requisites: Requires prerequisite course of THTR 1105 (minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 3053 (3) Acting 2

Continuation of the techniques introduced in the beginning acting course (THTR 1003). Emphasis is placed on monologues and scene study of contemporary plays. Basic techniques in developing a character are explored.

Requisites: Requires prerequisite course of THTR 1003 (minimum grade C-).

Additional Information: Departmental Category: Performance

THTR 3055 (3) Stage Lighting Design 1

Introduces the craft of stage lighting design through experimental lighting labs, lecture/demos, hands-on production experience, and theoretical projects. Subject matter includes aesthetics of light, color theory, lighting for performance, design graphics, and basic lighting technology.

Requisites: Requires prerequisite course of THTR 1105 (minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 3075 (3) Sound Design

Study and application of the principles of sound technology and design, emphasizing concepts of electricity, acoustics, equipment, and their application to the stage.

Requisites: Requires prerequisite course of THTR 1105 (minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 3085 (3) Fashion, Society and Decor

Surveys topics in western dress and the decorative arts from civilizations of antiquity to contemporary time: the garments, objects, materials and technologies in the context of philosophical, political, social and technological change.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 3149 (2) Professional Orientation: Exploring Professional Potentials for THTR & DNCE Majors

Explores and identifies a wide range of professional opportunities connected to personal strengths and interests in theatre and dance by studying current professional practices, trends and cross-disciplinary connections. Instructor will: provide information/learning needed from representative professionals; open avenues to find/create employment opportunities towards internship consideration/post-graduation; and mentor structured self-assessment/professional development.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Theatre (THTR or TBFA) or Dance (DNCE or DBFA) majors (excluding minors).

Additional Information: Departmental Category: Special Courses in Theatre

THTR 3849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4005 (3) Costume Design 2

Advanced studio course building on experiences and techniques studied in THTR 3005, with additional emphases on portfolio quality rendering technique and costume production technology as it affects and is affected by the designer.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of THTR 3005 (minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4013 (3) Studio 3: Acting Shakespeare

In-depth study of Shakespearean texts from the perspective of their demands on the actor, including the conventions and performance styles of Elizabethan theatre.

Requisites: Requires prerequisite courses of THTR 3013 and THTR 3023 (all minimum grade C-).

Additional Information: Departmental Category: Performance

THTR 4015 (3) Scene Design 2

Advanced projects in theatrical scene design. Provides intensive practice in sketching, rendering, drafting and model-building. Emphasizes portfolio development and preparing the student designer for graduate training or professional work.

Requisites: Requires prerequisite course of THTR 3015 (minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4021 (3) American Theatre and Drama

Explores American theatre and drama in the 18th centuries to the present. Examines productions, their creators and performers. Contains lecture, discussion, writing and theatre practice.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Theatre (THTR or TBFA) majors and minors.

Recommended: Requisite at least 12 hours of THTR course work.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 4023 (3) Studio 4: Playing with Styles

Studies selected styles of theatre performance such as Greek Drama, Comedy of Manners, Commedia Dell'art, Modern Realism, Theatre of Absurd, and Non-Western Theatre, including vocal and physical style elements.

Requisites: Requires prerequisite courses of THTR 3013, THTR 3023 and THTR 4013 (all minimum grade C-).

Additional Information: Departmental Category: Performance

THTR 4029 (1-12) Performance and Community Engagement

Engages students in harnessing the power of performance for effecting positive social change. Students work collaboratively to create performances and workshop experiences. Readings will provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations to intentionally author the future they want. Open to all forms of performance: music, film, dance, theatre.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4033 (3) Advanced Movement for the Stage

Continues the work begun in THTR 2043. Studies the advanced physical techniques with the goal of integrating these skills into the working processes of the performing artist.

Requisites: Requires prerequisite course of THTR 2043 (minimum grade C-).

Additional Information: Departmental Category: Performance

THTR 4035 (3) Scene Painting

Introduces the craft of scene painting through practical projects. Sessions are in a studio format. Students are trained in traditional methods of scenic art, including layout, representational painting, trompe l'oeil, faux finishing, and related skills. Students are taught about proper tool use and care, paint products, and the profession.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4039 (3) Musical Theatre Repertory

Developed around the learning of complete scenes, songs and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5039

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Theatre (THTR, TBFA) or Dance (DNCE or DBFA) or Music (MUSA-BAMUS, MUSC-BMUS or MUSE-BMUE) majors only (excluding minors).

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4041 (3) Women and Theatre of the 20th and 21st Centuries

Explores a body of 20th and 21st century dramatic literature central to the study of women and theatre as well as the study of 20th and 21st century cultural history from a cross-national and multiracial feminist perspective. Major playwrights, particularly women from Asia, Africa, and Europe, are read and discussed.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5041 and WGST 4041

Recommended: Prerequisite THTR 3031.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 4047 (3) Shakespeare Behind the Scenes

Detailed study of script analysis, directing concepts, staging and criticism of the plays being produced by the Colorado Shakespeare Festival.

Additional Information: Departmental Category: Shakespearean Production

THTR 4049 (1-4) Special Topics in Theatre

Opportunity for students to explore, upon consultation with the instructor, areas in theatre that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5049

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4051 (3) Playwriting

Introductory course in craft of playwriting; primary focus on technique of developing short plays.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 4055 (3) Stage Lighting Design 2

Assumes a basic knowledge of stage lighting; concentrates on advanced technology, processes, and design projects.

Requisites: Requires prerequisite course of THTR 3055 (minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4059 (3) Open Topics in Theatre and Drama

Covers topics not otherwise listed in the curriculum. Topics for each semester are specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4061 (3) Directing

Theory and practice of directing for the stage.

Requisites: Requires prerequisite courses of THTR 1003 or THTR 2003 and THTR 1105 and THTR 1115 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Theatre (THTR or TBFA) majors and minors.

Recommended: Prerequisites two semesters of THTR 3035.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 4063 (3) Audition Techniques

Prepares students for the demands of the acting profession. Trains students in various audition techniques including general auditions, prepared auditions, cold readings, on-camera auditions, and commercial auditions. Shows how to prepare and perfect audition material in a professional and exemplary way. Discusses agents, casting directors, and the process of becoming a professional actor.

Requisites: Requires prerequisite course of THTR 1003 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Theatre (THTR or TBFA) majors only.

Additional Information: Departmental Category: Performance

THTR 4073 (3) Performing Voices of Women

Explores theories underlying the "feminine voice," varied perspectives in prose and poetry, ways of embodying these voices and perspectives in performance forms and ultimately the students' own voices through creation of autobiographical performance pieces (some to be presented for student audiences). Open to both men and women.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4073

Additional Information: Departmental Category: Performance

THTR 4081 (3) Senior Seminar

Intellectual and conceptual capstone course for departmental majors with separate sections for theatre and dance students. Course promotes integration of ideas regarding history, criticism, and theory in performance and production. All inquiry throughout the semester relates to the theme of creative process.

Requisites: Restricted to Theatre (THTR, TBFA) or Dance (DNCE or DBFA) majors only (excluding minors).

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 4085 (3) Theatre Management

Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions and season development. Includes practical experience.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5085

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4095 (1-3) Special Topics in Theatre Design and Technology

Intensive study of specialized topics in theatre technology and design. Topics and credits specified in the online Schedule Planner.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4103 (3) Acting for the Camera

Introduces fundamental tools of acting for the camera. Students learn basic film terminology, specific camera acting techniques, and the demands placed on an actor when shooting a film. Uses exercises, scenes, monologues, and readings to provide a solid understanding of how to create a character, analyze a text, utilize important vocabulary, and perform effectively on camera.

Requisites: Requires prerequisite course of THTR 1003 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Theatre (THTR or TBFA) majors only.

Additional Information: Departmental Category: Performance

THTR 4105 (3) Theatre Make-Up Design

Explores theatrical make-up styles and techniques from initial research through paper design to final make-up. Ranging from period styles to Byzantine mosaic, to clowns, to special effects (old age, wounds, stages of healing, zombies, etc.) Techniques include ombre blending, removing eyebrows, shrinking and enlarging features, creating 3D appliances and applying silicone and foam prosthetics.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5105

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4113 (3) Comedy: A Performance Study

Examines the role of comedy in performance within various cultures through readings, viewings and a participatory exploration. We will analyze comedy within various societies to understand the underlying ideals and values. Throughout this investigation we will seek to understand what makes something comedic, why, for whom, for what purpose, when and under what circumstances.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5113

Additional Information: Departmental Category: Performance

THTR 4125 (3) Watercolor Illustration and Rendering Techniques

Gain fluency in established techniques and styles of master illustrators and painters. Famous illustrations are technically analyzed and copied in this exploration of intent, process, technique and style. Other mediums incorporated include pastels, color pencils, pen and ink and gouache. Painting supplies must be supplied by the student.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5125

Grading Basis: Letter Grade

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4145 (3) Colloquium in Advanced Design

An advanced theatre design course that emphasizes the collaborative process and advanced design presentation methods. Course work includes completion of several "mock" design projects, with students often working in collaborative teams.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4149 (1-3) Theatre Internship

Provides opportunities for theatre majors to explore career opportunities in theatre fields other than, or in addition to, those with performance emphasis. Students apply knowledge and skills developed in their major studies to a practical work experience.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Requisite 30 credit hours in THTR.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4173 (3) Creative Climate Communication

We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3173 and ATLS 3173

Recommended: Prerequisite ENVS 1000.

Additional Information: Departmental Category: Performance

THTR 4175 (3) Conceptualization

Fosters the student's creative and collaborative skills by introducing a variety of strategies and scenarios for conceiving live, theatrical productions, events and experiences. A project based curriculum offers several individual and team exercises in visualizing, documenting and communicating ideas for live performances, including their overall scope, aesthetic, style, audience relationship and mode of presentation.

Equivalent - Duplicate Degree Credit Not Granted: THTR 5175

Additional Information: Departmental Category: Special Courses in Theatre

THTR 4193 (1-3) Studio 5: Senior Project

Students engage in a project or projects of their own undertaking that takes a broader experience to apply the craft utilizing self-initiative, collaborative approaches and public exhibition. Instructor consent required for non-BFA THTR performance majors.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of THTR 3013 and THTR 3023 and THTR 4013 and THTR 4023 (all minimum grade C-).

Additional Information: Departmental Category: Performance

THTR 4555 (1-2) Production Studio

Requires participation in a Theatre Department production assignment in the areas of design, technology, or management, as well as participation in a semester portfolio review. May be repeated upto 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Theatre (TBFA) majors only.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 4849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

Dance - Bachelor of Arts (BA)

CU Boulder has an exciting and diversified dance program. We are a contemporary program - one that values and provides study in a range of styles and fusion of forms that influence and reflect the multifaceted nature of dance performance today. Our curriculum is designed to develop concrete skills in performance and choreography and to instill an appreciation of the role that dance plays in human culture around the world. The following areas of knowledge and experience are central to all the undergraduate degrees in dance:

- physical accomplishment in a range of dance styles and within fusions of various forms, including Contemporary, Ballet, Jazz,

Hip-Hop, Transnational Fusion, African Dance, Performance Improvisation, and other dance traditions from around the world;

- experience with the process and underlying aesthetics of dance creation, composition, and collaboration;
- basic familiarity with cultural, sociological, and aesthetic issues important to the contemporary realities of the field of dance, including a working knowledge of major world dance styles, works of dance literature, theoretical lenses, and the history of dance;
- knowledge of the various means, such as stagecraft, costuming, lighting, make-up, production, and projections, through which a public presentation of dance is realized;
- study and practical experience in dance pedagogy, identifying our purpose, goals and objectives as future educators;
- basic knowledge of tactics for sustaining wellness, including various somatic approaches to dance training, injury prevention and rehabilitation from injury;
- experiential study of the relationship between dance and music, including concrete practice of skills in playing and hearing music;
- and, opportunities to explore the power of performance for effecting positive social change.

In addition, students completing a degree in dance are expected to acquire the ability and skills to:

- actively participate in dance as an art form with particular attention to at least one of the following areas of dance: performance, choreography, dance production, scholarship, pedagogy or criticism;
- understand and mobilize knowledge of appropriate use of the anatomy and physiology of the body in performance and teaching;
- communicate effectively to an audience through at least one of the components of dance—performance, choreography, teaching or scholarship;
- and, function constructively as a member of a dance community in the preparation of regularly scheduled public productions.

BA and BFA students are expected to take a variety of technique styles. A minimum of three different styles, as well as African dance, are required. Dance majors must earn a C- or better in all required courses. Students who have not placed in the major technique class (DNCE 2021, DNCE 3041 or DNCE 4061) by their second semester in dance program are strongly advised not to continue in the major program in dance. Placement into and successful completion of major technique is a prerequisite for enrollment in other required dance courses.

Requirements

The Bachelor of Arts provides a well-rounded dance education in both technique and theory courses. Students must receive a C- or better in all required courses.

Required Courses and Credit Hours

Required lower division courses:

DNCE 1012	Dance Production	2
DNCE 1013	Dance Improvisation	2

DNCE 1027	Dance in Cultural Perception and Expression	3
DNCE 1908	First Year Dance Seminar	1
DNCE 2005	Movement Awareness and Injury Prevention for the Dancer	3
DNCE 2501	African Dance	2

Required major technique courses:

*Fulfill 6 credit hours from the following:*¹ 6

DNCE 2021	Major Technique	
DNCE 3041	Major Technique	
DNCE 4061	Major Technique	

Choose one of the following upper division music courses:

DNCE 3014	Rhythmic Skills for Dancers	2
or DNCE 3024	Musical Resources for Dance	

Choose one of the following upper division creative process courses:

DNCE 3033	Choreographic Resources	3
or DNCE 3043	Choreographic Process	

Required production practicum courses:

Take 2 credit hours of production practica: (1 credit of Run Crew required) 2

DNCE 3035	Production Practicum	
-----------	----------------------	--

Required upper division courses:

DNCE 4017	Dancing Histories: Sex, Gender and Race in U.S. Concert Dance	3
DNCE 4036	Dance Teaching Practices: Inclusive Approaches to Instruction	3
DNCE 4046	Teaching Practicum	1
DNCE 4939	Dance Internship	1
THTR 3149	Professional Orientation: Exploring Professional Potentials for THTR & DNCE Majors	2
THTR 4029	Performance and Community Engagement	3
THTR 4081	Senior Seminar	3

Electives in dance technique:

DNCE courses ending in "1" 6

Required theatre production course:

Select one of the following in THTR Production 3

THTR 1105	Stage Technologies	
THTR 1115	Costume Technologies	
THTR 2105	Introduction to Performance Design	
THTR 3005	Costume Design 1	
THTR 3015	Scene Design 1	
THTR 3045	Stage Management	
THTR 3055	Stage Lighting Design 1	
THTR 3075	Sound Design	
THTR 4035	Scene Painting	
THTR 4055	Stage Lighting Design 2	
THTR 4095	Special Topics in Theatre Design and Technology (Some sections including: Tailoring, Conceptualization or Product Design)	
THTR 4105	Theatre Make-Up Design	
THTR 5025	Costume Patterning and Construction	

Total Credit Hours

51

¹ Students are placed at the appropriate level based on audition. Students without sufficient training will be asked to take nonmajor technique classes to make up the deficiency. These classes will not count toward the major requirement.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for more information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in dance, students should meet the following requirements:

Dance - Bachelor of Fine Arts (BFA)

Our BFA program is designed to meet the needs of highly talented and motivated students interested in preparing for a professional dance career in performance and/or choreography while in an academic setting.

The characteristics that the faculty looks for in BFA students are:

- exceptional technical/expressive ability as demonstrated in class work and performance;
- choreographic skill or potential as demonstrated through movement invention and appropriate clarity of structure;
- willingness and drive necessary to pursue a professional career in dance;
- exceptional musicality and rhythmic precision; and,
- maturity, organization and positive attitude.

In addition to specified coursework, the BFA student must meet the following requirements:

- show original choreographic work each semester in Open Space, FRESH, or Dance Class Showings;
- present a concert in conjunction with other senior BFA's in the spring of their senior year;
- By December of their junior year the student must have formed a committee of two faculty members who will evaluate his/her concert. The student and First Reader (lead faculty member) of the committee will complete a BFA Concert Form that is given to the Director of Dance Production by January 31 junior year. The Director of Dance Production will help you plan and oversee the production aspects of the show; and,
- maintain a 3.2 in required dance and theatre courses. If you drop below the required GPA by the time of your concert proposal submission (January 31) you will be removed from the BFA and your concert proposal will no longer be considered.

Applying for the BFA

Students who did not pre-audition into the BFA program and who wish to pursue the BFA can audition during the fall semester of their freshman or sophomore year. If you a sophomore auditioning for the BFA, you must be enrolled in or have taken DNCE 3033 or DNCE 3043 in order to be on track to graduate in 4 years. Application guidelines for the BFA track will be posted each fall semester. The undergraduate director will notify students of faculty decisions regarding their audition. If a student is admitted to the program he/she should talk to Kyle Neidt, Primary Advisor, to have their degree status officially changed from BA to BFA.

Dance - Minor

The minor in dance is designed to provide the student with a broad overview of dance as an art form. Required core courses introduce students to basic elements of dance while the remaining plan is created by the student in conjunction with Primary Advisor, Kyle Neidt. If you have specific dance questions, please contact the Director of Dance.

The rules of the College of Arts and Sciences apply in designing each student's program.

Requirements

Requirements include a minimum of 20 credit hours; 9 of which must be upper division; a minimum grade of C- in each dance class; and a minimum of a 2.00 GPA for all dance and approved non-dance courses. Transfer students may apply a maximum of 9 transfer hours with a maximum of 6 upper-division credit hours to the dance minor. Students select courses from the dance curriculum based on their interests and course availability.

Required Courses and Semester Credit Hours

Required Courses

<i>Select two of the following:</i>		6
DNCE 1017	Dance in Popular Culture and Media	
DNCE 1027	Dance in Cultural Perception and Expression	
DNCE 4017	Dancing Histories: Sex, Gender and Race in U.S. Concert Dance	
DNCE 4037	Contemporary Concert Dance: Shifting Perspectives in Performance	
DNCE 4047	Hip-Hop Dance History	
<i>Plus 4 additional credit hours of dance technique (courses ending in 0 or 1), which could include the following:</i>		4
DNCE 1013	Dance Improvisation	
<i>Elective Courses ¹</i>		10
DNCE 1012	Dance Production	
DNCE 1908	First Year Dance Seminar	
DNCE 2005	Movement Awareness and Injury Prevention for the Dancer

THTR 4073	Performing Voices of Women
THTR 4555	Production Studio
RLST 3838	Dancing, Religion, and Culture

Total Credit Hours 20

¹ Some upper division courses may require prerequisites. 800-900 sections are controlled enrollment and require an audition or instructor consent.

Theatre - Bachelor of Arts (BA)

The BA program in Theatre is a broad-based program of theatre practice and study for the student who may wish to pursue in-depth studies in another area as well. It also serves as the core of studies for a student who wishes to pursue further theatre training in one of the BFA areas of concentration.

The undergraduate degrees in theatre emphasize knowledge and awareness of:

- the major works of dramatic literature that are representative of the most important eras in the development of theatre and drama;
- the history of theatrical production—its styles, conventions and socially related mores—from ancient civilizations to the present time;
- the various means through which a theatrical concept is realized; and
- the aesthetic and intellectual relationship between theatre in its various 21st century modes and contemporary society.

In addition, students completing a degree in theatre are expected to acquire the ability and skills to:

- analyze and interpret plays and performances with particular attention to acting and performance of literature, designing, directing and/or playwriting and criticism;
- use, with safety and efficiency, the tools and equipment basic to theatre production technology;
- communicate to an audience through at least one of the components of theatrical art: acting, directing, designing, playwriting or criticism; and

- function effectively as a collaborative member of a production team in the preparation of regularly scheduled public productions.

Concurrent Degree Program BA/MA in Theatre and Performance Studies

The University of Colorado Department of Theatre & Dance introduces the new BA/MA in Theatre and Performance Studies. This new program is an accelerated program aimed primarily at high-achieving undergraduates who may be planning to pursue a PhD at another institution and who wish to challenge themselves in advanced critical thinking.

Concurrent degrees at CU Boulder have been created in recognition of the increasing demand for master's level training and research skills. The BA/MA in Theatre and Performance Studies can give students advanced skills in a shorter amount of time using an integrated degree plan. A student can enter as a freshman theatre major and graduate with a BA and MA in Theatre within a five-year period (dependent upon criteria described below).

The typical student will be a student writing an honors thesis who will use that project as the basis for developing the MA thesis, though this is not mandatory. This new degree program is open only to students enrolled in the BA in Theatre degree program at the University of Colorado Boulder.

Minimum standards for admission require a cumulative GPA of 3.0 and completion of all MAPS deficiencies. Interested students should apply for admission to the BA/MA by December 15 of their junior year.

Students admitted to the concurrent degree program will undergo a mid-program review at the middle of the senior year to determine their eligibility to continue. Students not recommended for continuation in the concurrent degree program will be eligible to complete their bachelor's degree. To comply with Title IV Higher Education regulations, CU Boulder students pursuing a BA/MA degree will automatically be changed to graduate status after the completion of 130 credit hours. (Note: Students may take graduate courses prior to this formal admission into the Graduate School.) Upon successful completion of the concurrent degree program, both the bachelor's and master's degrees will be awarded simultaneously.

Basic Requirements and Minimum Standards

1. Students in the concurrent degree program must be full-time (average 24 credit hours per year), continuously enrolled students maintaining a minimum cumulative GPA of 3.0 throughout their enrollment.
2. Only currently enrolled, University of Colorado Boulder students may be considered for admission to the program. Transfer students must complete at least 24 credit hours as a degree-seeking student before applying to the program.
3. Students who are admitted to the concurrent degree program may not pursue a double degree or double major of any other kind.
4. Any MAPS deficiencies must be completed prior to admission to the concurrent degree program.
5. Issues of satisfactory academic progress, petition/appeal, transfer credit and grievance shall be monitored by the Theatre Director of Graduate Studies regarding departmental major requirements and minimum standards of achievement. In addition, the Dean of the Graduate School will consider appeals and review standards regarding Graduate School or university requirements and will confer with college Deans as appropriate for issues that cross undergraduate/graduate or school/college lines of authority.

6. Concurrent degree students may not take a leave of absence. Exceptions may be granted only after consideration by the Dean of the Graduate School based on a review of extenuating circumstances.
7. Time limits for the concurrent degree program will generally be 5 years, as specified in the departmental guidelines. Extensions of time limits will be approved only after consideration by the Dean of the Graduate School based on a review of extenuating circumstances.
8. Minimum cumulative GPA for all students enrolled in the concurrent degree program must be maintained at 3.0 for the duration of the program. The Graduate School will be responsible for monitoring the minimum standard and notifying students who are placed on probation. Concurrent degree students may not be admitted to a PhD program prior to completion of both the bachelor's and the master's degrees.
9. Students are awarded the undergraduate and master's degrees simultaneously at the completion of the concurrent degree program.
10. Concurrent students who are permitted by their department and the Graduate School to double count courses toward both the bachelor's and the master's degrees, as allowed by the approved concurrent degree proposal, may not use those overlapped courses toward a subsequent PhD at the University of Colorado Boulder.
11. Students in the concurrent degree program are generally not eligible for TA/RA appointments within the department.
12. Appeals related to the automatic change to graduate status may be considered in some extenuating circumstances. These appeals are made to the Office of the Registrar. Information on this process can be found at: <http://www.colorado.edu/registrar/bama-program>. All other appeals of, or requests for exceptions to concurrent degree standards, rules or policies of the departments, schools and colleges will be reviewed by the Dean of the Graduate School.

For more information, visit www.colorado.edu/theatredance/admissions/degrees/bama-theatre (<http://www.colorado.edu/theatredance/admissions/degrees/bama-theatre>).

Requirements

The BA degree program in Theatre and Performance Studies requires 44 credit hours in Theatre, 3 in Dance and 6 in Dramatic Literature and/or Global Arts outside the department. A grade of C- or better is needed in each required course toward the BA degree, as well as an overall theatre GPA of 2.00.

Required Courses and Semester Credit Hours

Required Courses

THTR 1003	Acting 1: Introduction to Acting	3
THTR 1011	Global Theatre 1: Live Performance to Shakespeare	3
THTR 1019	Script Laboratory: Text Analysis and Practice for the Theatre	3
THTR 1105	Stage Technologies ¹	3

¹ THTR 1105 and THTR 1115 cannot be taken in the same semester.

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BA in Theatre, students should meet the following requirements:

Course	Title	Credit Hours
Year One		
Fall Semester		
THTR 1011	Global Theatre 1: Live Performance to Shakespeare	3
THTR 1019	Script Laboratory: Text Analysis and Practice for the Theatre	3
	Credit Hours	6

Bachelor of Arts/Master of Arts (BAMA)

In addition to the BA requirements, BAMA students must complete the following requirements:

THTR 5011	Seminar: Theory and Criticism	3
THTR 5010	Introduction to Performance Studies	3
On-Stage Studies Courses (2)		6
THTR 6009	Research Strategies and Techniques	1

THTR 6959	Master's Thesis ¹	4
Graduate Electives ²		7
Total Credit Hours		24

¹ The Master's thesis is optional. Students choosing the thesis plan complete 4-6 thesis hours. Students choosing the non-thesis plan take additional electives.

² Thirty credit hours are required to complete the Master of Arts degree. BAMA students transfer six undergraduate credits toward their graduate degree.

Theatre - Bachelor of Fine Arts (BFA)

The BFA degree programs in Theatre offer preprofessional training to a limited number of highly motivated and talented students aiming at professional careers. The BFA student pursues one of four possible areas of concentration:

- Performance
- Design/Technology
- Management
- Musical Theatre

Admission Requirements

Admission is based on talent, academic record, motivation, auditions and/or interviews. Enrollment is limited to ensure individual attention necessary for effective training. Interested students should identify themselves as early as possible. Contact the department for information regarding how to apply to the BFA degree programs.

Formal application to the BFA Musical Theatre concentration should be made concurrently with an application to the University. Auditions and interviews will be held at the regular spring auditions for the College of Music.

Formal application to the BFA Performance concentration should be made at the beginning of the second semester.

Formal application to the BFA Design/Technology/Management concentrations should be made at the beginning of the third semester.

General Degree Requirements

The college counts a maximum of 67 credit hours of THTR credits toward the total credit hours required for graduation. A grade of C- or higher is needed in all required courses to fulfill the requirements of the BFA degree, as well as an overall theatre GPA of 2.00.

In addition to the specific course requirements listed for completing a BFA degree in Performance, Design/Technology, and Management concentrations, students must fulfill all requirements for the BA degree in Theatre.

In addition to the specific course requirements listed for completing BFA degrees in the Performance, Design/Technology, Management concentrations, and Musical Theatre, students must fulfill all requirements for the BA degree in theatre.

Performance Concentration

Students accepted into the BFA Performance concentration each year constitute an ensemble and as a group follow the required sequence of courses. Students in this concentration must fulfill the BA requirements

in Theatre, with specified electives, and are required to audition for theatre season productions each semester.

Musical Theatre Concentration

The BFA in Musical Theatre offers a rigorous concentration in theatre, music, and dance to a select number of highly disciplined, motivated, and talented students. In addition to the Arts & Sciences core curriculum, this concentration requires 60 credit hours: 26 credit hours in THTR, 4 credit hours in DNCE, and 30 credit hours in the College of Music.

Students must confirm their decision to enroll as TBFA-MUS major upon acceptance following the audition and must meet immediately with a departmental advisor.

During the application process, all potential BFA musical theatre students must declare in writing their intention to audition by submitting the appropriate pre-audition materials (www.colorado.edu/TheatreDance/admissions (<http://www.colorado.edu/theatredance/admissions>)).

Graduating in Four Years with a BFA degree in Theatre

Consult the Four-Year Guarantee Requirements for information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress toward a BFA in theatre students should meet the following requirements:

- By Dec. 1 of the year before the first semester, declare in writing the intention to audition for the BFA in Musical Theatre.
- During the second semester (performance concentration) or third semester (design/technology and management concentrations), complete the audition and interview.
- Immediately upon acceptance into a BFA concentration declare the major.
- Once accepted into a BFA concentration, meet with a departmental advisor to confirm in writing specific courses to be completed within the remaining semesters of study.

Theatre - Minor

The minor in Theatre is designed to provide the student with a broad overview of theatre. Theatre minor declaration meetings are held twice a month. Students may view the schedule and sign up to attend a group declaration meeting by going to the following website: advising.colorado.edu (<http://advising.colorado.edu>)

Requirements

Requirements include a minimum of 19 credit hours from the courses below, 9 credit hours of which must be upper-division. Students must receive a minimum grade of C- in each THTR course, and a minimum of 2.00 GPA for all THTR courses. Transfer students may apply a maximum of 9 transfer hours with a maximum of 6 upper-division credit hours to the theatre minor. Students select courses from the theatre curriculum based on their interests and course availability.

Required Courses and Semester Credit Hours

Required Courses

Select one of the following:	3
THTR 1003 Acting 1: Introduction to Acting	
THTR 1009 Theatre and Society	
THTR 2105 Introduction to Performance Design	
Select one of the following:	3
THTR 1011 Global Theatre 1: Live Performance to Shakespeare	
THTR 2021 Global Theatre 2: Forms of Modern Theatre and Drama	
THTR 3011 American Musical Theatre History	
THTR 4021 American Theatre and Drama	
Select one of the following:	3
THTR 1105 Stage Technologies or THTR 111 Costume Technologies	
Additional Requirements	
THTR 3035 Production Practicum	
Run Crew is required, additional 2 credits can be another THTR 3035 or THTR 3033: Acting Practicum	3
Dance elective	1
Theatre electives (must be upper-division)	6
Total Credit Hours	19

Western American Studies

The Center of the American West offers an undergraduate certificate program in Western American Studies for students who have an intellectual commitment to any of a broad range of issues and aspects of the American West, including history and literature, culture and society and economic and environmental challenges facing western communities. Courses involve students in an exploration of the past, an appreciation for traditional and contemporary stories and art in the region and an understanding of western landscapes, ecosystems and the factors that affect them.

Course code for this program is CAMW.

Certificate

- Western American Studies - Certificate (p. 532)

CAMW 2001 (3) The American West

Students tour the cultural, social, and natural features of the American West, based on readings and presentations by guest speakers from the CU faculty and from important professions and positions in the West. Designed as the foundation course in the Western American Studies certificate program.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomores).

Additional Information: GT Pathways: GT-HI1 - History
Arts Sci Core Curr: United States Context

CAMW 3939 (1-3) Center of the American West Internship

Work for public and private organizations on projects that enhance the understanding of various Western American topics and issues (environmental, cultural, public policy, etc.), and which foster students' development as community leaders working for a sustainable West.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CAMW 2001.

CAMW 4001 (3) Seminar on the American West

Interdisciplinary capstone seminar for the Western American Studies certificate program. Applies a selected natural science, social science, or humanities topic to the American West and addresses how westerners can make and sustain viable landscapes and communities.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CAMW 2001 and completion of Western American Studies certificate electives.

CAMW 4840 (1-4) Independent Study: The American West

Requisites: Requires prerequisite course of CAMW 2001 (minimum grade B). Restricted to students with 57-180 credits (Junior or Senior).

Western American Studies - Certificate

The certificate in Western American studies offers students at CU Boulder a unique regional studies curriculum. The interdisciplinary format allows an exploration of the region's characteristic and evolving issues: from its flora and fauna to its history and literature; and from the political, social, cultural, economic and environmental concerns facing Westerners to the landscapes and ecosystems that they inhabit.

The Center for the American West believes in community and in helping students feel more at home within the larger university. As such, the center hosts dinners each semester where students and faculty can get to know each other as well as various noteworthy featured guests in a more social, off-campus environment. Students enrolled in the program are also eligible to apply for the Beardsley Family Scholarship, and the center welcomes applications from all CU Boulder students for its annual Thompson Awards writing contest.

Requirements

The certificate requires 18 credit hours (9 of which must be at the upper division level) and includes an introductory course and a capstone course. It also allows students to choose the remaining four classes from a variety of academic areas. In this way, students are able to piece together a survey of the American West that aligns with their own unique interests.

Western Civilization Studies

The Center for Western Civilization, Thought & Policy (CWCTP) offers an undergraduate certificate program, Foundations of Western Civilization, for students interested in a rigorous grounding in Western culture. The certificate promotes critical reflection and academic research on the traditions and issues that characterize Western civilization through the study of Western culture, science and government in their ancient, medieval and modern forms. It helps students understand their role as citizens in a nation founded on the ancient ideals of consensual rule and republican government.

Course code for this program is CWCV.

Certificate

- Foundations of Western Civilization - Certificate (p. 533)

CWCV 2000 (3) The Western Tradition

Encourages a historical and critical investigation into the formative influences on what is often called Western culture, including religious, political, social and economic factors, and contemporary interpretations and critiques of these developments and concepts. Designed as the foundation course for the Center for Western Civilization.

Additional Information: Arts Sci Core Curr: Ideals and Values
Departmental Category: Arts Sciences Special Courses

CWCV 4000 (3) Foundations of Western Civilization

Offers in-depth consideration of one or more foundational traditions in Western civilization. Focus changes from semester to semester, but possible topics include the Hebrew Bible, classical Greece, Islam, early Christianity, Persia, and North Africa. Designed as a senior seminar for the certificate in Western Civilization.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Arts Sciences Special Courses

Foundations of Western Civilization - Certificate

Our undergraduate certificate program is for students interested in a rigorous grounding in Western culture, reflecting on its traditions and values, and the certificate itself is the equivalent of an inter-disciplinary minor. The program allows students to study Western culture, science and government in their ancient, medieval and modern forms. The curriculum embraces over 30 courses taught by faculty in departments that include art history, classics, English, German, history, humanities, Italian, philosophy, political science and religious studies.

For more information on the program, requirements and current course offerings, visit the Center for Western Civilization, Thought & Policy (CWC)'s Certificate in Western Civilization (<http://www.colorado.edu/>

cwctp/student-resources/certificate-western-civilization) webpage, or contact CWC Director Robert Pasnau at 303-492-4837 or pasnau@colorado.edu.

Requirements

The interdisciplinary curriculum of over 30 courses is taught by faculty in departments that include: classics, English, history, philosophy, religious studies, and Germanic languages and literatures.

The certificate requires the completion with a grade of C- or better of eight courses (24 credit hours), of which 12 credit hours must be at the upper-division level. Up to three courses (or 9 credit hours) may come from the student's major.

In addition, students must fulfill the requirements for a BA in a major in a school or college at the University of Colorado Boulder.

Required Courses and Credit Hours

The required courses are offered each year. Students will enroll in one course from each cluster (9 hours total): literature, history and science.

The elective courses are offered regularly, but not each semester. Students are advised to check with the offering department regarding availability. Some courses may have prerequisites. Additional courses may be petitioned for inclusion in meeting certificate requirements through the center director.

Required Courses

<i>History</i>		3
Select one course from the following:		
HUMN 1120	Introduction to Humanities: Literature 2

CWCV 4000	Foundations of Western Civilization

Politics

PSCI 2004	Survey of Western Political Thought
HIST/CLAS 4041/PHIL 4210	Classical Greek Political Thought

Women and Gender Studies

The Department of Women and Gender Studies offers a bachelor of arts degree, a minor, an undergraduate certificate in global gender and sexuality studies as well as a graduate certificate for students enrolled in another disciplinary master's or doctoral degree program. The interdisciplinary field of women and gender studies offers students rigorous but flexible programs of study that examine women, gender and sexuality in relation to race, class, national identity and ability, among other variables. Students explore the ways that gender and sexuality work in diverse communities and in different cultural and historical contexts. Areas of inquiry include but are not limited to: gender/sex systems across cultures and historical periods; gender and sexuality in literature, the arts, and popular and media culture; legal and public policy issues around gender and sexuality; women's participation in social and cultural production; transnational feminisms; feminist and queer theories and their relation to different philosophical and epistemological traditions; and LGBTQI politics and histories.

The department houses a reading library and organizes colloquia, workshops and other cultural and educational events.

Many students incorporate their women and gender studies degree with other departmental offerings across campus, either as a second major, a minor, or a certificate. A graduate of the department who also completes studies in biology may attend medical school to specialize in women's health; by combining a women and gender studies degree with a focus in business, a graduate could better understand how gender affects the workplace. Students have coupled the critical thinking skills they learn in women and gender studies with additional fields of study from the College of Arts and Sciences or from other colleges or schools at CU Boulder. Students have gone on to careers in fields such as law, medicine, government, public health, social work, teaching, public policy, counseling, advocacy, media, public relations, academia, politics, fundraising, small business development, librarianship and arts administration, among others.

For more information, visit the Department of Women and Gender Studies (<http://www.colorado.edu/wgst>) website.

Course code for this program is WGST.

Bachelor's Degree

Pois, Anne Marie

Professor Emeritus

WGST 1006 (3) The Social Construction of Sexuality

Discusses the social determinants of sexuality. Analyzes the economic, psychological and cultural influences on human sexuality. Interactional perspective of human sexuality is presented.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 1006

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Sociology

WGST 1016 (3) Sex, Gender, and Society 1

Examines status and power differences between the sexes at individual and societal levels. Emphasizes historical context of gender roles and status, reviews major theories of gender stratification.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 1016

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Human Diversity

Departmental Category: Sociology

WGST 1260 (3) Introduction to Women's Literature

Introduces literature by women in England and America. Covers both poetry and fiction and varying historical periods. Acquaints students with the contribution of women writers to the English literary tradition and investigates the nature of this contribution.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 1260

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: English

WGST 2000 (3) Introduction to Feminist Studies

Introduces students to the field of Women and Gender Studies. Examines gender issues in the United States from interdisciplinary, multicultural and feminist perspectives. Covers such topics as sexuality, beauty ideals, women's health, violence against women, work, the economy, peace and war and the environment.

Additional Information: Arts Sci Core Curr: Human Diversity

MAPS Course: Social Science

WGST 2020 (3) Femininities, Masculinities, Alternatives

Examines the construction of gender and sexual identities in the modern world. Focuses on the role of social attitudes and material circumstances in shaping how individuals understand themselves and are understood by others, as well as the actions they take to accept, negotiate and resist these pressures.

Additional Information: Arts Sci Core Curr: Human Diversity

WGST 2030 (3) Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

Investigates the social and historical meanings of racial, gender, and sexual identities and their relationship to contemporary lesbian, bisexual, gay and transgender communities.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 2000

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: LGBT Studies

WGST 2050 (3) Gender, Sexuality, and Popular Culture

Explores diverse cultural forms such as film, popular fiction and non-fiction, music videos, public art, websites, blogs and zines which are shaped by, and in turn shape, popular understandings of gender at the intersections of race, class, ability, religion, nation and imperialism.

Additional Information: Arts Sci Core Curr: Human Diversity

WGST 2100 (3) Gender and Sexuality in Ancient Greece

Examines evidence of art, archaeology and literature of Greek antiquity from a contemporary feminist point of view. Focuses on women's roles in art, literature and daily life. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2100

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Classics

WGST 2110 (3) Gender and Sexuality in Ancient Rome

Uses art, archaeology, and literature to study, from a contemporary feminist point of view, the status of women in works of Roman art and literature, the development of attitudes expressed toward them, and their daily life. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2110

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Classics

WGST 2200 (3) Women, Literature, and the Arts

Introduces the contributions of women to literature and the performing arts from a historical and cross-cultural perspective. Emphasizes the cultural contexts in which artworks are created, as well as representations of gender and sexuality. Stresses issues of structure, content, and style, along with the acquisition of basic techniques of literary and arts criticism.

Recommended: Prerequisite WGST 2000.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Literature and the Arts

WGST 2290 (3) Philosophy and Women

Explores different approaches to the study of women.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 2290

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Philosophy

WGST 2400 (3) Women of Color and Activism

Studies the history of social activism in the United States by women of color, with an emphasis on modes of social activism, issues that have organized specific communities of color, issues that have crossed ethnic/racial boundaries and the interaction of women from different ethnic/racial groups, including women of color and white women.

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: GT Pathways: GT-H11 - History
Arts Sci Core Curr: United States Context

WGST 2600 (3) Gender, Race, and Class in a Global Context

Examines the positionality of women in terms of gender, race, ethnicity, class and power relations in a global context.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Contemporary Societies

Departmental Category: Asia Content

WGST 2700 (3) Psychology of Gender and Sexuality

Examines psychological research on gender and sexuality as they intersect with race, class and other social categories. Points of emphasis include differences in cognition, attitudes, personality and social behavior. Conceptual themes include research methodologies, implicit and explicit attitudes, stigma and stereotypes. These elucidate such areas as close relationships, leadership, career success and mental health and happiness.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 2700

Recommended: Prerequisite WGST 2000 or PSYC 1001.

Additional Information: Arts Sci Core Curr: Human Diversity

WGST 2800 (3) Women and Religion

Examines roles of women in a variety of religious traditions including Judaism, Christianity, Hinduism, Buddhism and goddess traditions.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2800

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Religious Studies

WGST 3004 (3) Women in Education

Honors women in education and their legacy. Introduces women educators, beginning in the late 19th century, whose significant theories of education and work in teaching have had an impact on all of our lives, in history and in society. Explores the educational theories and methods of several representative women educators and analyzes them through an investigation of their professional and personal lives.

Equivalent - Duplicate Degree Credit Not Granted: HONR 3004

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Honors

Departmental Category: Journalism

WGST 3012 (3) Women and Development

Investigates the status of women in the context of globalization and social and economic development.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3012

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Sociology

Departmental Category: Asia Content

WGST 3016 (3) Marriage and the Family in the United States

Comparative and historical examination of marriage and the family within the U.S. Emphasizes changing family roles and family structures. Also considers alternatives to the nuclear family and traditional marriage exploring new definitions of family.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3016

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Arts Sci Core Curr: United States Context

Departmental Category: Sociology

WGST 3020 (3) Methods of Inquiry in Gender, Race, Class, and Sexuality

Examines various research methods and approaches in women's and gender studies. Students will gain practical experience to be able to write a proposal for a significant research project, informed by course readings and discussions.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 3044 (3) Race, Class, Gender, and Crime

Overview of race, class, gender and ethnicity issues in offending, victimization and processing by the justice system. Examines women and people of color employed in the justice system.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3044 and SOCY 3044

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 1001 or SOCY 1004 or SOCY 1021 or SOCY 2044.

Additional Information: Departmental Category: Sociology

WGST 3046 (3) Topics in Sex and Gender

Faculty present courses based on their area of expertise and specialization in the field of sex and gender. Students should check current sociology department notices of course offerings for specific topics.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3046

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Sociology

WGST 3100 (3) Feminist Theories

Explores a variety of alternative systematic accounts of, and explanations for, gender inequities. Social norms of both masculinity and femininity are analyzed in relation to other axes of inequality such as class, sexuality, race/ethnicity, neocolonialism and the domination of nonhuman nature.

Requisites: Requires a prerequisite course of WGST 2000 or WGST 2020 or WGST 2050 or WGST 2600 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

WGST 3110 (3) Feminist Practical Ethics

Explores a variety of personal and public policy issues in light of basic feminist commitment to opposing women's subordination. Provides students not only with a deeper understanding of the specific issues discussed but also with a sense of the ways in which a principled commitment to feminism may influence and be influenced by prevailing interpretations of contemporary ideals and values (such as freedom, equality and community). Provides an opportunity to develop skills of critical analysis useful in a wide range of contexts.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 3110

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2290 or PHIL 2290.

Additional Information: Arts Sci Core Curr: Ideals and Values

WGST 3135 (3) Chicana Feminisms and Knowledges

Provides insight into the present socioeconomic condition of Chicanas and the concept of feminismo through interdisciplinary study of history, sociology, literary images and film portrayals.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3136

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite ETHN 2001 or ETHN 2536.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Chicano Studies

WGST 3174 (3) Sex, Power, and Politics: U.S. Perspectives

Explores how norms of sex, gender, race and sexuality find expression in institutions and policies in ways that legitimize only certain individuals as political actors, certain identities as politically relevant, and certain relationships as important. Critically examines how norms may be exposed, resisted and changed by studying the politics of the women's, gay liberation and men's movements in the U.S.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3174

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite PSCI 2004 or WGST 2000 or LGBT 2000.

Additional Information: Departmental Category: Political Science

WGST 3200 (3) Religion and Feminist Thought

Examines the origin of patriarchal culture in the theology and practices of Judaism and Christianity. Explores attitudes and beliefs concerning women as Judeo-Christian culture impacts gender roles and gender stratification through reading and discussion. Women's religious experience is studied from the perspective of feminist interpretations of religiosity.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3200

WGST 3201 (3) Women, Gender & Sexuality in Jewish Texts & Traditions

Reads some of the ways Jewish texts and traditions look at women, gender and sexuality from biblical times to the present. Starts with an analysis of the positioning of the body, matter and gender in creation stories, moves on to the gendered aspects of tales of rescue and sacrifice, biblical tales of sexual subversion and power, taboo-breaking and ethnos building, to rabbinic attitudes towards women, sexuality and gender and contemporary renderings and rereadings of the earlier texts and traditions.

Equivalent - Duplicate Degree Credit Not Granted: JWST 3202 and HEBR 3202 and RLST 3202

Additional Information: Arts Sci Core Curr: Human Diversity

WGST 3208 (3) Women in Nordic Society: Modern States of Welfare

Examines the role and status of women and marginalized social classes in the Nordic countries, whose societies have been heralded as egalitarian models since the twentieth century. Texts include a variety of media, from literature to sociological works to artifacts of political and popular culture.

Equivalent - Duplicate Degree Credit Not Granted: SCAN 3208

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Nordic (Formerly Scandinavian)

WGST 3210 (3) American Indian Women

Explores the experiences, perspectives and status of American Indian women in historical and contemporary contexts. Examines representations of Indigenous women in mainstream culture. Emphasizes the agency of American Indian women-their persistence, creativity and activism, especially in maintaining Indigenous traditions.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3213

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2600 or ETHN 2001 or ETHN 1023.

Additional Information: Arts Sci Core Curr: Human Diversity

WGST 3220 (3) Women in Islam

Examines the historical and contemporary relation between women, gender and Islamic cultures in different parts of the world. We will consider the role and rights of women in Islam, historical and literary representations of Muslim women, and the historically changing constructions of gender and sexuality in Muslim societies. In addition, we will critically explore the construction of Muslim women in western discourses, including liberal feminist discourse, and ask whether the representation of Muslim women in these discourses achieves or undermines ends that we might consider "Feminist". In attending to the wide range of Muslim women's lived experiences in Islamic communities and cultures, as well as the self-representations of Muslim women themselves, our readings will urge us to reexamine our presumptions about piety, secularism, modernity and feminism.

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Departmental Category: Asia Content

WGST 3250 (3) Disney's Women and Girls

Examines the construction of gender, race, class, sexual orientation and disability in a selection of Disney's animated films. Cultivates skills of media literacy, exploring how mass media acts to enforce and maintain conventional gendered understandings of power, privilege and difference. Analyzes the political economy of the Disney phenomenon through a feminist lens.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

WGST 3267 (3) Women Writers

Introduces literature by British and American women.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3267

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

Additional Information: Departmental Category: English

WGST 3300 (3) Gender, Sexuality and U.S. Law

Contemporary and historic overview of U.S. courts' treatment of sex and gender. Using the case method, examines policy issues including, but not limited to: same sex marriage and civil unions; privacy; affirmative action; abortion; reproductive technologies; discrimination based on sex and sexual orientation in education and in the workplace.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3301

Recommended: Prerequisite WGST 2000 or PSCI 1101.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Political Science

WGST 3302 (3) Facilitating Peaceful Community Change

Students gain knowledge and skills that enable them to become effective agents of community change. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply their own life experiences and to examine themselves as potential change agents.

Equivalent - Duplicate Degree Credit Not Granted: INVS 3302

WGST 3311 (3) Gender and U.S. Politics: Protest, Polls and Policy

Provides an overview and critical examination of women as political actors within the United States. Students will examine the gendered components of citizenship, election, political office and public policy. Furthermore, students will explore the ways in which gender intersects with class, race, ethnicity, sexual orientation and other identities in U.S. politics.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3311

WGST 3314 (3) Violence Against Women and Girls

Focuses on aspects of the victimization of women and girls that are "Gendered" - namely, sexual abuse and intimate partner abuse. Also explores the importance of race, class and sexuality in gendered violence.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3314 and SOCY 3314

Recommended: Prerequisite SOCY 1016 or WGST 1016.

WGST 3400 (3) Gender, Personality, and Culture

Explores the relationship among gender, culture and personality. Brings together the disciplines of psychology and sociology in the study of gender and personality formation through investigation of psychoanalytic theory and the social environment.

Recommended: Prerequisite WGST 2000 or WGST 2700.

WGST 3410 (3) Gender, Sexuality and Culture in the Modern Middle East

Examines the issues of gender and sexuality in the modern Middle East and North Africa from the colonial period to the present, focusing on how feminist movements, Arab women's writing and constructions of gender and sexuality have been shaped by local, national and international factors.

Equivalent - Duplicate Degree Credit Not Granted: ARAB 3410

Grading Basis: Letter Grade

Additional Information: Departmental Category: Arabic

WGST 3500 (3) Global Gender Issues

Introduces global gender issues, such as the gendered division of labor in the global economy, migration, women's human rights, environmental issues, gender violence in war, women in the military, nationalism and feminism and the representation of the Third World in the United States. Offers students the opportunity to broaden their perspectives beyond the borders of the United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2050 or WGST 2600.

Additional Information: Departmental Category: Asia Content

WGST 3505 (3) Historical and Contemporary Issues of African American Women

Explores the social, economic, political, historical and cultural role of African American women from an interdisciplinary perspective. Special emphasis is placed on African American women's rich oral and literary tradition.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3502

Recommended: Prerequisite WGST 2000 or ETHN 1022 or ETHN 2001.

WGST 3510 (3) Gender, Sexuality and Global Health

Examines the intersections of gender, sexuality and health in global perspective. Explores how men's and women's health are shaped by gender and sexual relations in a wide range of social contexts, including South and Southeast Asia, Latin America, sub-Saharan Africa and the United States.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Sociology

WGST 3600 (3) Latinas: History, Culture, and Social Activism

Drawing from work produced by and about Latinas, discusses the social and cultural construction of race and ethnicity, the function of nationalism, the politics of migration and citizenship, Latina literary production and theory, historiographical trends, Latina feminist theory, activism and the academy, and Latina/o political organizing.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 3601 (3) German Women Writers

Explores writing by German/Austrian women from 1945 to the present, with special attention to the representation of the Holocaust, the continuation of avant-garde traditions, innovations in literary form and feminism. Visual arts, film and feminist theory will also be considered in their relation to literature. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3601

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: German

WGST 3650 (3) Gender and Politics in Latin America

Examines Latin American politics with particular focus on women's participation in social movements, war, revolution and elections. Compares women's and men's politics and activism and examines changing gender and sexuality policies, gender relations and the differential impact of political, economic, and social changes on men and women.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 3052

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2600 or PSCI 2012 or PSCI 3032.

Additional Information: Departmental Category: Political Science

WGST 3670 (3) Gender, Race, Sexuality and Global Migration

Engages in an interdisciplinary study of the intersections of gender, race and sexuality that have created a multicultural, multiethnic and multiracial world. Focuses on the effects of political, economic, social and cultural forces on gender, race and sexuality in migrant communities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Ethnic Studies

WGST 3672 (3) Gender and the Global Economy

Examines the role of gender in global economy. Explores the impacts of colonialism and modern global economy on gender relations, with particular emphasis on Third World societies. Also focuses on related issues of population politics, environmental crisis, women's sexual exploitation and women's social movements worldwide.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3672

Recommended: Prerequisite GEOG 1982 or GEOG 1992 or GEOG 2002 or GEOG 2412 or WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Geography

WGST 3700 (3) Topics in U.S. Gender and Sexuality Studies

Examines selected topics in women, gender and sexuality in the US context.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 3710 (3) Topics in Global Gender and Sexuality Studies

Content varies by semester and reflects relevant issues in global feminist scholarship.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 3750 (3) Women in Buddhism

Explores diverse representations of the female in Buddhist literature and the social realities of actual women in Asian historical contexts. Through case studies that traverse Buddhist Asia, we delve into monastic views of the female body, philosophical analyses of the emptiness of gender, idealized images of the feminine in Buddhist tantra and contemporary issues such as the nun's revival moment.

Equivalent - Duplicate Degree Credit Not Granted: RLST 3750

Additional Information: Departmental Category: Religious Studies
Departmental Category: Asia Content

WGST 3767 (3) Feminist Fictions

Examines a series of literary texts to consider how writers across the world have used fiction to creatively stage and reimagine gender and sexuality. Attends to the formal and narrative techniques by which these texts call attention to the fictionality, and thereby the creative malleability, of gender itself. Some cinematic and performance texts will also be included.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 3767

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: English

WGST 3800 (3) Advanced Writing in Feminist Studies

Offers expository writing and training in analytical and descriptive skills, structures or argument, critical thinking, the rhetoric of persuasion, and the development of a personal voice. Readings and papers focus on basic issues in gender studies.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

Additional Information: Arts Sci Core Curr: Written Communication

WGST 3930 (1-6) Women and Gender Studies Internship

Provides field experience in local and national government and non-governmental agencies focusing on women and gender-related issues. Supervision by approved field instructors. Students must relate their academic experience to their field work experience through a portfolio and a final paper. Department enforced prerequisite: 6 hours of course work in Women and Gender Studies and 30 cumulative credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

WGST 3940 (1) Practicum in Women and Gender Studies

Enriches the academic experience of majors and minors within Women and Gender Studies. Usually will combine readings from books with lectures and discussions, community outreach and in-house publications spanning the interdisciplinary focus of the department.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to Womens Studies (WGST) majors or minors only.

Grading Basis: Letter Grade

WGST 4000 (3) Advanced Topics in Gender and Sexuality Studies

Provides an advanced interdisciplinary course organized around a specific topic, problem, or issue relating to gender and sexuality. Course work includes discussion, reading and written projects.

Equivalent - Duplicate Degree Credit Not Granted: WGST 5000

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 4010 (3) Gender, Genocide and Mass Trauma

Studies the persistence of genocide and the effects of mass trauma on women and girls. Within the framework of political and social catastrophe, examines cataclysmic world events and the traumatic consequences for women of religious persecution, colonialism, slavery and the genocides of the 20th and 21st centuries.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4000

Recommended: Prerequisite SOCY 1016 or WGST 1016 or WGST 2000 or SOCY 3314 or WGST 3314.

Additional Information: Departmental Category: Sociology

WGST 4016 (3) Sex, Gender and Society 2

Studies status and power differences between the sexes at individual, group and societal levels. Examines empirically established sex differences and reviews biological, psychological and sociological explanations for gender differences.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4016

Requisites: Requires a prerequisite course of SOCY 1016 or WGST 1016 or WGST 2000 (minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Sociology

WGST 4041 (3) Women and Theatre of the 20th and 21st Centuries

Explores a body of 20th and 21st century dramatic literature central to the study of women and theatre as well as the study of 20th and 21st century cultural history from a cross-national and multiracial feminist perspective. Major playwrights, particularly women from Asia, Africa and Europe, are read and discussed.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4041 and THTR 5041

Recommended: Prerequisite THTR 3031.

Additional Information: Departmental Category: Theatre

WGST 4063 (3) Women in Victorian England

Examines changing roles and status of women in a period of expansion. Studies the impact of industrialization on working women, sexuality, family planning, expansion of women in education, politics and the professions, the single women crisis and women's rights.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4063

Additional Information: Departmental Category: History

WGST 4073 (3) Performing Voices of Women

Explores theories underlying the "feminine voice," varied perspectives in prose and poetry, ways of embodying these voices and perspectives in performance forms and ultimately the students' own voices through creation of autobiographical performance pieces (some to be presented for student audiences). Open to both men and women.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4073

Additional Information: Departmental Category: Theatre

WGST 4086 (3) Family and Society

Studies the changing relationship between family and social structure. Examines variations in family organization and considers political, social, ideological, demographic and economic determinants of family formation.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4086

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite SOCY 3001.

Additional Information: Departmental Category: Sociology

WGST 4277 (3) Topics in Women's Literature

Focuses on areas of research interest in the study of women's literature, such as selected themes or critical issues. Students are expected to contribute original research to the topic under consideration.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4277

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

WGST 4287 (3) Special Topics in LGBT Literature

Examines a special topic in LGBT literature, foregrounding an approach that focuses on how same-sex desire is represented in literature. May explore the rhetorical and ideological depiction of masculinity and femininity; literary representations of inversion, bisexuality, and transgenderism; the social construction of homosexuality and heterosexuality. Specific topics vary each semester.

Equivalent - Duplicate Degree Credit Not Granted: LGBT 4287 and ENGL 4287

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

WGST 4300 (3) Sex, Power, Politics: International Perspectives

Studies the commercial trade of sexual labor in the global economy, examining theories and assumptions about sexual-economic exchanges and gendered and racialized relations of power in the sex trade. Emphasizes prostitution.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite WGST 2600 or WGST 3100.

WGST 4301 (3) Gender, Race and Immigration in Germany and Europe

Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation and sexuality. Texts may include film, literature, television, magazine images. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4301 and GRMN 5301

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: German

WGST 4331 (3) Gender, Race, Class, and Sexuality in Popular Culture

Studies the construction, interconnections, and replications of gender, race, class and sexuality in popular culture and how these constructs become cultural norms and mores. Uses critical methods with a focus on producing responsible viewers and readers.

WGST 4400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: WGST 5400 and LGBT 4400 and LGBT 5400

Grading Basis: Letter Grade

Additional Information: Departmental Category: LGBT Studies

WGST 4471 (3) Women in 20th-21st Century Russian Culture

Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4471 and RUSS 5471

Recommended: Prerequisite lower level literature or culture course.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Russian

WGST 4500 (3) Gender Politics and Global Activism

Addresses the problems and challenges women face around the world and the ways in which women have mobilized to address them. Explores political activism at the local, national, regional and global levels. Focuses on different forms of activism, including strategies aimed at working with and within governmental institutions, as well as outside and against them.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 4391

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 4616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities as served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4616 and HIST 5616

Additional Information: Departmental Category: History

WGST 4619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4619 and HIST 5619

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: History
Departmental Category: Asia Content

WGST 4620 (3) A Global History of Sexuality: The Modern Era

Provides an introduction to the history of sexuality in the modern era through engagement with recent interdisciplinary research into what sexuality has meant in the everyday lives of individuals; in the imagined communities formed by the bonds of shared religion, ethnicity, language and national citizenship; on the global stage of cultural encounter, imperialist expansion, transnational migration and international commerce.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4620

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

WGST 4626 (3) History of Gender and Sexuality in the United States from 1870

Examines the social history and cultural construction of genders and sexualities in America from 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities and served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4626

Additional Information: Departmental Category: History

WGST 4636 (3) Lesbian and Gay History: Culture and Politics and Social Change in the U.S.

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4636 and HIST 5636

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite HIST 1015 or HIST 1025 or LGBT 2000 or WGST 2000 or WGST 2600.

WGST 4640 (3) Women, Gender and War

Study of how women experience war, how the structure, practice and memory of war, and the rights and obligations of military service (masculinity and femininity) are structured by the gender system.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4640

Recommended: Prerequisite HIST 1015 or HIST 1020 or HIST 1025 or HIST 1123 or HIST 1628 or HIST 1708.

Additional Information: Departmental Category: History

WGST 4769 (3) Gender Studies in Early Modern Visual Culture

Examines 15th and 16th century European ideas about women from a variety of feminist perspectives. Focuses on recent contributions to history of women as they intersect with the visual arts.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4769

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Art and Art History

WGST 4800 (3) Senior Colloquium in Feminist Studies

Provides students with the opportunity to actively reflect on their education and to complete a research project that incorporates an interdisciplinary and feminist approach to the study of gender, class, race, ethnicity and sexuality. Offered each spring.

Requisites: Requires prerequisite courses of WGST 2000 and WGST 2600 and WGST 3100 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Womens Studies (WGST) majors or minors only.

WGST 4840 (1-6) Independent Study

Department enforced prerequisite: over minimum GPA of 3.3.

Repeatable: Repeatable for up to 7.00 total credit hours.

WGST 4850 (3) Gender in Hagiography

Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources, and examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4850 and RLST 5850

Grading Basis: Letter Grade

Additional Information: Departmental Category: Religious Studies

WGST 4950 (3) Honors Research

For qualified Women and Gender Studies majors working on the research phase of departmental honors. Department enforced prerequisite: overall GPA of 3.3.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course

WGST 4999 (1-3) Senior Honors Thesis

Qualified Women and Gender Studies majors may write an honors thesis, an in-depth research paper, on a topic of choice. Thesis hours available to majors only after successfully completing the research phase.

Requisites: Restricted to Womens Studies (WGST) majors only.

Additional Information: Arts Sciences Honors Course

Global Gender and Sexuality Studies - Certificate

The Department of Women and Gender Studies offers an undergraduate certificate in global gender and sexuality studies. The ever-increasing movement of people, commodities, politics and culture—"globalization"—impacts all of us in different ways. The Certificate in Global Gender and Sexuality Studies provides students with an opportunity to study how individuals and groups from diverse gender, racial, ethnic, national, class and sexual backgrounds live in and engage with the world and how processes of global change affect gender relations locally, nationally and internationally. The certificate is designed for students who wish to understand, analyze and respond to these dramatic global transformations and their impact on women and gender relations, complementing students' majors and interests and preparing them for graduate studies and employment.

This interdisciplinary undergraduate certificate program is designed to take advantage of the research strengths of the department's core and associate faculty and to enhance the experience of undergraduate students in any major, including international affairs, political science, history, ethnic studies, geography, English, anthropology, sociology, integrative physiology, environmental studies and many others. Career

specialization in international gender and sexuality has grown in both the private and public sectors, in fields including international development, finance, public health, public policy and education.

For more details including application instructions, visit the undergraduate certificate (<http://www.colorado.edu/wgst/ggss>) webpage, or email wgst@colorado.edu.

Requirements

Certificate requirements include 18 credit hours of specified course work, including 12 credit hours at the upper-division level. For more details including application instructions, visit the undergraduate certificate webpage, or email wgst@colorado.edu.

Required Courses and Credit Hours

Lower-Division Required Course

WGST 2600	Gender, Race, and Class in a Global Context	3
-----------	---	---

Upper-Division Required Courses (must select two of the following courses)

WGST 3500	Global Gender Issues	6
WGST 3510	Gender, Sexuality and Global Health	
WGST 3650	Gender and Politics in Latin America	
WGST 3710	Topics in Global Gender and Sexuality Studies	
WGST 4010/ SOCY 4000	Gender, Genocide and Mass Trauma	
WGST 4300	Sex, Power, Politics: International Perspectives	
WGST 4500/ PSCI 4391	Gender Politics and Global Activism	
WGST/HIST 4620	A Global History of Sexuality: The Modern Era	

Elective Courses

Lower-Division Electives (no more than 3 credit hours)

WGST 2050	Gender, Sexuality, and Popular Culture	9
ANTH 1170	Exploring Culture and Gender through Film	
LING 2400	Language, Gender and Sexuality	

Upper-Division Electives (students may draw from the upper-division requirements listed above as well as the following courses, 6-9 credit hours)

WGST/SOCY 3012	Women and Development	9
WGST 3201/ JWST 3202/ RLST 3202	Women, Gender & Sexuality in Jewish Texts & Traditions	
WGST/SCAN 3208	Women in Nordic Society: Modern States of Welfare	
WGST 3210/ ETHN 3213	American Indian Women	
WGST 3220	Women in Islam	
WGST 3670	Gender, Race, Sexuality and Global Migration	
WGST 3672	Gender and the Global Economy	
WGST/GRMN 4301	Gender, Race and Immigration in Germany and Europe	
WGST/HIST 4619	Women in East Asian History	
WGST/HIST 4640	Women, Gender and War	

ETHN/FILM 4001	Screening Race, Class & Gender in the U.S. and the Global Borderland
ANTH 4505	Globalization and Transnational Culture

Total Credit Hours 18

Appropriate topics courses offered by other departments and programs—those that deal centrally with issues of gender and/or sexuality in global context—may count for upper division elective credit with the permission of the department's director of undergraduate studies. Students must get the director's approval beforehand, or credit toward the certificate is not guaranteed.

Study Abroad and CU Global Seminars

Appropriate study abroad courses and CU Global Seminars that deal centrally with issues of gender and/or sexuality in global context may count for lower- or upper-division elective credit with the permission of the department's director of undergraduate studies. Only CU-sponsored study abroad programs and Global Seminars will count as CU credit. Appropriate study abroad courses taken through other accredited study abroad programs may count for elective transfer credit with the permission of the director of undergraduate studies. In all of these cases, students must get the director's approval beforehand, or credit toward the certificate is not guaranteed.

Women and Gender Studies - Bachelor of Arts (BA)

The interdisciplinary women and gender studies undergraduate major and minor offer students a rigorous but flexible program of study that examines women, gender and sexuality in relation to race, class, national identity and ability, among other variables. Students explore the ways that gender and sexuality work in diverse communities and in different cultural and historical contexts. Drawing from approximately 50 courses, many cross-listed with other academic units, students fulfill the requirements of the major or minor and can design an emphasis relevant to their special interests by focusing on one of three cognate areas: 1) gender/sexuality, 2) race/ethnicity and 3) global/transnational.

Requirements

Students must complete the general requirements of the College of Arts and Sciences and the required courses listed below.

Students must complete a minimum of 36 credit hours with grades of C- or better in approved women and gender studies courses, a minimum of 24 credit hours of which must be upper-division (3000- or 4000-level).

Required Courses and Semester Credit Hours

Required Courses

WGST 2000	Introduction to Feminist Studies	3
WGST 2600	Gender, Race, and Class in a Global Context	3
WGST 3100	Feminist Theories	3
WGST 4800	Senior Colloquium in Feminist Studies	3

Cognate Areas

At least three courses, one from each of the three cognate areas (see below)

Electives¹

Three upper-division approved WGST elective courses (those listed under upper-division electives or cognate areas below)

Two additional lower- or upper-division approved WGST elective courses (see below)	6
Total Credit Hours	36

¹ Internships and independent study credit hours may apply, as well as special topics courses (WGST 3700, WGST 3710 and WGST 4000); see advisor or department for more information.

Cognate Areas

Students must take three courses (for a total of 9 credit hours), one each from the three following cognate areas. Select topics offerings of special topics courses (WGST 3700, WGST 3710 and WGST 4000) may apply to cognate areas; see advisor or department for more information.

Gender/Sexuality Cognate Area

At least one course (3 credit hours) from the gender/sexuality cognate area

LGBT 3796	Queer Theory	3
WGST/SOCY 3046	Topics in Sex and Gender	
WGST 3250	Disney's Women and Girls	
WGST 3300	Gender, Sexuality and U.S. Law	
WGST 3510	Gender, Sexuality and Global Health	
WGST 3767	Feminist Fictions	
WGST 4010	Gender, Genocide and Mass Trauma	
WGST 4016	Sex, Gender and Society 2	
WGST 4287	Special Topics in LGBT Literature	
WGST 4400	Critical Inquiries in Transgender Studies	
WGST 4620	A Global History of Sexuality: The Modern Era	
WGST 4636	Lesbian and Gay History: Culture and Politics and Social Change in the U.S.	
WRTG 3020	Topics in Writing (select topics only; see advisor or department for approved topics)	

Race/Ethnicity Cognate Area

At least one course (3 credit hours) from the race/ethnicity cognate area

ETHN 3026	Women of Color: Chicanas in U.S. Society	3
WGST/ETHN/SOCY 3044	Race, Class, Gender, and Crime	
WGST 3135/ETHN 3136	Chicana Feminisms and Knowledges	
WGST 3210/ETHN 3213	American Indian Women	
WGST/PSCI 3311	Gender and U.S. Politics: Protest, Polls and Policy	
WGST 3505	Historical and Contemporary Issues of African American Women	
WGST 3600	Latinas: History, Culture, and Social Activism	
WGST/MDST 4331	Gender, Race, Class, and Sexuality in Popular Culture	
WGST/HIST 4619	Women in East Asian History	

Global/Transnational Cognate Area

At least one course (3 credit hours) from the global/transnational cognate area

WGST/SOCY 3012	Women and Development	
WGST 3220	Women in Islam	
WGST 3500	Global Gender Issues	
WGST 3510	Gender, Sexuality and Global Health (may count for gender/sexuality or global/transnational, but not both)	
WGST 3650/PSCI 3052	Gender and Politics in Latin America	
WGST 3670	Gender, Race, Sexuality and Global Migration	
WGST/GEOG 3672	Gender and the Global Economy	
WGST/ENGL 3767	Feminist Fictions (may count for gender/sexuality or global/transnational, but not both)	
WGST 4300	Sex, Power, Politics: International Perspectives	
WGST/GRMN 4301	Gender, Race and Immigration in Germany and Europe	
WGST 4500/PSCI 4391	Gender Politics and Global Activism	
WGST/HIST 4620	A Global History of Sexuality: The Modern Era (may count for gender/sexuality or global/transnational, but not both)	

Lower-Division Electives

No more than 6 credit hours of lower-division electives 0-6

LING 2400	Language, Gender and Sexuality	
LGBT/ENGL 2707	Introduction to Lesbian, Bisexual, and Gay Literature	
WGST/SOCY 1006	The Social Construction of Sexuality	
	or WGST 101 Sex, Gender, and Society 1	
	or SOCY 101 Sex, Gender, and Society 1	
WGST/ENGL 1260	Introduction to Women's Literature	
WGST 2020	Femininities, Masculinities, Alternatives	
WGST 2030/LGBT 2000	Introduction to Lesbian, Gay, Bisexual, and Transgender Studies	
WGST 2050	Gender, Sexuality, and Popular Culture	
WGST 2200	Women, Literature, and the Arts	
WGST 2400	Women of Color and Activism	
WGST/PSYC 2700	Psychology of Gender and Sexuality	

Upper-Division Electives

Select additional courses from the three cognate areas above or from the following upper-division electives below, total credits toward the degree must equal 36 credit hours

ARTH 3209	Art, Culture, and Gender Diversity, 1400–1600: Renaissance Art Out of the Canon	
ENGL 3217	Topics in Gender Studies	
FILM 3013	Women and Film	
ITAL 4730	Italian Feminisms: Culture, Theory, and Narratives of Difference	
WGST/SOCY 3016	Marriage and the Family in the United States	

WGST 3020	Methods of Inquiry in Gender, Race, Class, and Sexuality	
WGST/PHIL 3110	Feminist Practical Ethics	
WGST/PSCI 3174	Sex, Power, and Politics: U.S. Perspectives	
WGST/JWST 3200	Religion and Feminist Thought	
WGST 3201/ JWST 3202/ RLST 3202	Women, Gender & Sexuality in Jewish Texts & Traditions	
WGST/ENGL 3267	Women Writers	
WGST/INVS 3302	Facilitating Peaceful Community Change	
WGST/ETHN/ SOCY 3314	Violence Against Women and Girls	
WGST/ARAB 3410	Gender, Sexuality and Culture in the Modern Middle East	
WGST/GRMN 3601	German Women Writers	
WGST/RLST 3750	Women in Buddhism	
WGST 3800	Advanced Writing in Feminist Studies	
WGST/THTR 4041	Women and Theatre of the 20th and 21st Centuries	
WGST 4063	Women in Victorian England	
WGST/THTR 4073	Performing Voices of Women	
WGST/SOCY 4086	Family and Society	
WGST/ENGL 4277	Topics in Women's Literature	
WGST/RUSS 4471	Women in 20th-21st Century Russian Culture	
WGST/HIST 4616	History of Gender and Sexuality in the United States to 1870	
WGST/HIST 4626	History of Gender and Sexuality in the United States from 1870	
WGST/RLST 4850	Gender in Hagiography	

Honors

Students may take up to 6 credit hours of honors in women and gender studies; credit hours apply to upper-division electives in the major.

For more information about pursuing departmental honors, visit the department honors (<http://www.colorado.edu/wgst/students/undergraduates/wgst-honors-program>) webpage and the main Honors Program (<http://www.colorado.edu/honors/graduation>) webpage describing qualifications, requirements and deadlines.

WGST 4950	Honors Research	3
WGST 4999	Senior Honors Thesis	1-3

Internship

Students may take up to 6 credit hours of internship in women and gender studies; credit hours apply to upper-division electives in the major. See the College of Arts and Sciences guidelines (<http://>

www.colorado.edu/advising/sites/default/files/attached-files/internshipcredit_0.pdf) for earning internship credit.

WGST 3930	Women and Gender Studies Internship	1-6
-----------	-------------------------------------	-----

Special Topics

Students may take up to 6 credit hours in WMST topics courses; course topics vary each semester. Ask the women and gender studies advisor or department about how each course applies to major cognate area requirements, if applicable.

WGST 3700	Topics in U.S. Gender and Sexuality Studies	3
WGST 3710	Topics in Global Gender and Sexuality Studies	3
WGST 4000	Advanced Topics in Gender and Sexuality Studies	3

Graduating in Four Years

Consult the Four-Year Guarantee Requirements for more information on eligibility. The concept of "adequate progress" as it is used here only refers to maintaining eligibility for the four-year guarantee; it is not a requirement for the major. To maintain adequate progress in women and gender studies, students should meet the following requirements:

- By the beginning of the second semester, declare the major.
- By the end of the fourth semester, complete WGST 2000 and WGST 2600 and 9 additional credit hours of major requirements.
- By the end of the sixth semester, complete WGST 3100 and 9 additional credit hours of major requirements (27 credit hours total of the major requirements completed).
- During the seventh and eighth semester, complete WGST 4800 and 6 additional credit hours of the major requirements.

Students should consult with their advisor for specific recommendations. The following sample plan will outline the major requirements, but the order of some classes can vary greatly. It is important for students to check the degree audit and work with the major advisor each semester to make sure of the requirements and graduation timeline.

Course	Title	Credit Hours
Year One		
Fall Semester		
WGST 2000 or WGST 2600	Introduction to Feminist Studies or Gender, Race, and Class in a Global Context	3
	Credit Hours	3

Writing and Rhetoric, Program for

The Program for Writing and Rhetoric (PWR) is a free-standing unit in the College of Arts and Sciences responsible for campus-wide instruction in writing. The program coordinates and oversees all writing curricula and instruction intended to meet college and campus requirements, including efforts in specific disciplines and targeted campus programs.

The program is committed to training students to think critically about the texts they read and the writing they produce, and to enable them to shape and express ideas with clarity and grace in any context: academic, professional or civic. Classes are generally conducted as intensive writing workshops, placing a premium on thoughtful, substantive revision.

The program offers both lower-division and upper-division courses, as well as some graduate seminars. Certain undergraduate courses fulfill the College of Arts and Sciences written communication requirement, and some also fulfill graduation requirements in other colleges. Students should check with their advisors to be sure that they are taking the right course to fulfill their requirement.

For information about specific classes and their instructors, students should visit www.colorado.edu/pwr (<http://www.colorado.edu/pwr>).

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ackerman, John Martin (https://experts.colorado.edu/display/fisid_144951)

WRTG 1100 (4) Extended First-Year Writing and Rhetoric

Extended version of WRTG 1150 that carries an additional hour of credit and is intended for students desiring more preparation and practice in college writing. Meets the same goals as WRTG 1150. Features one extra hour of small group work out of class. Focuses on critical analysis, argument, inquiry and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting and thoughtful revision. For placement criteria, see the arts and sciences advising office.
Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Arts Sci Core Curr: Written Communication
MAPS Course: English

WRTG 1150 (3) First-Year Writing and Rhetoric

Rhetorically informed introduction to college writing. Focuses on critical analysis, argument, inquiry and information literacy. Taught as a writing workshop, the course places a premium on invention, drafting and thoughtful revision. For placement criteria, see the arts and sciences advising office.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Written Communication
MAPS Course: English

WRTG 1250 (3) Advanced First-Year Writing and Rhetoric

Advanced version of WRTG 1150 intended for more experienced writers, this course meets the same goals as WRTG 1150 but at a more challenging level. Taught as a writing workshop, the course places a premium on invention, drafting and thoughtful revision. For placement criteria, see the arts and sciences advising office.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Written Communication
MAPS Course: English

WRTG 1840 (1-3) Independent Study in Writing

Repeatable: Repeatable for up to 8.00 total credit hours.

WRTG 2020 (3) Introduction to Creative Nonfiction

Explores from both the reader's and writer's perspectives the forms of creative nonfiction, including personal essay and memoir. Students will read and write extensively within this genre, develop skill in revision and peer critique and learn how to submit work for publication. Does not fulfill core requirements. Department enforced prerequisite: WRTG 1150 or equivalent (completion of lower-division writing requirement).

WRTG 2090 (3) Electives in Writing

Explores a variety of academic and professional writing genres, ranging from research to technical writing, in intensive workshops. Students read and write extensively across genres. Check with program for semester offerings. Designed for self-motivated students in all majors. Does not fulfill core requirements. Department enforced prereq., WRTG 1150 or equivalent (completion of lower-division writing requirement)

Repeatable: Repeatable for up to 6.00 total credit hours.

WRTG 3007 (3) Writing in the Visual Arts

Enables students in the arts to improve their writing skills through organization, presentation, critique and revision. Writing assignments include formal writing (analysis and argument), informal writing and grant proposals. Department enforced prerequisite: WRTG 1150 or equivalent (completion of lower-division writing requirement).

Requisites: Restricted to students with 57-180 credits (Junior or Senior) AAAS or C-FILM or FILM or FMST or AASA or AASF or THTR or TBFA or DNCE or DBFA or AMST or ARCH or ATLS or BASA or CLAS or DSGN or ETHN or JADV or JAST or MDST or RLST or TMEN majors only.

Additional Information: Arts Sci Core Curr: Written Communication

WRTG 3020 (3) Topics in Writing

Through sustained inquiry into a selected topic or issue, students will practice advanced forms of academic writing. Emphasizes analysis, criticism and argument. Taught as a writing workshop, places a premium on substantive, thoughtful revision. Department enforced prerequisite: WRTG 1150 or equivalent (completion of lower-division writing requirement).

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Arts and Sciences (ARSCU) or College of Media, Communication and Information (CMCIU) or Business (BUSNU) students only.

Additional Information: Arts Sci Core Curr: Written Communication

WRTG 3030 (3) Writing on Science and Society

Through selected reading and writing assignments, students consider ethical and social ramifications of science policy and practice. Focuses on critical thinking, analytical writing, and oral presentation. Taught as a writing workshop, the course addresses communication with professional and non-technical audiences.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits Engineering, MCDB, EBIO, GEOL, ASTR, IPHY, PHYS, ENVS, MATH, ECON, BCHM, CHEM, PSYC, NRSC, or CSCI majors only.

Additional Information: GT Pathways: GT-CO3 - Communication: Advanced Writing Course

Arts Sci Core Curr: Written Communication

WRTG 3035 (3) Technical Communication and Design

Rhetorically informed introduction to technical writing that hones communication skills in the context of technical design activities. Treats design as a collaborative, user-oriented, problem-based activity, and technical communication as a rhetorically informed and persuasive design art. Taught as a writing workshop emphasizing critical thinking, revision, and oral presentation skills. Focuses on client-driven design projects and effective communication with multiple stakeholders.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering, College of Media, Comm Info, MCDB, EBIO, GEOL, ASTR, IPHY, ENVS, MATH, ECON, BCHM, CHEM, PHYS, ENVD, PLAN, DSGN, ARCH, NRSC, or CSCI majors only.

Additional Information: Arts Sci Core Curr: Written Communication

WRTG 3040 (3) Writing on Business and Society

Through selected reading and writing assignments, students examine ethical and social issues in the context of business decision-making processes. Focuses on critical thinking, analytical writing and oral presentation. Taught as a writing workshop, the course emphasizes effective communication with professional and non-technical audiences. Department enforced prerequisite: WRTG 1150 or equivalent (completion of lower-division writing requirement).

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Leeds School of Business (BUSN), Economics (ECON), International Affairs (IAFS) or Spanish (SPPR) majors only.

Additional Information: Arts Sci Core Curr: Written Communication

WRTG 3090 (1-3) Open Topics in Writing: Advanced

Advanced topics course providing intensive, specialized writing instruction in selected topics. Check with the program for semester offerings. Does not fulfill core requirements. Department enforced prerequisite: WRTG 3007 or WRTG 3020 WRTG 3030 or WRTG 3035 or WRTG 3040 or instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

WRTG 3840 (1-3) Independent Study

Department enforced prerequisite: WRTG 3007 or WRTG 3020 or WRTG 3030 or WRTG 3035 or WRTG 3040 or instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Business

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the “whole student” experience, our strong network of alumni and industry partners and our firm commitment to student support.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB-International), Leeds awards four types of degrees: Bachelor of Science (BS), Master of Science (MS), Master of Business Administration (MBA) and Doctor of Philosophy (PhD). Students can specialize in accounting, finance, management and entrepreneurship and marketing. Leeds further offers certificates in a variety of areas to provide opportunities for students to explore additional areas of interest and distinction.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the *Wall St. Journal*, the *New York Times*, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Graduation Recognition Ceremony

Every December and May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

Facilities & Research

The Leeds School of Business houses resources for the specific needs of business students. The facilities include:

- the Burridge Center for Securities Analysis and Valuation
- the Business Research Division
- Career Development
- the Center for Education on Social Responsibility
- the Center for Research on Consumer Financial Decision Making
- the MBA Business Center
- the Office of Diversity Affairs
- the Real Estate Center
- the Robert H. and Beverly A. Deming Center for Entrepreneurship
- smart classrooms
- student lounges
- Undergraduate Student Services
- William M. White Business Library and Information Commons

The William M. White Business Library and Information Commons

The White Business Library (<http://www.colorado.edu/libraries/libraries/william-m-white-business-library>) and Information Commons provide students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases, both CD- and web-based, contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work, and are available for reservation through University of Colorado Scheduling (<https://vems1.colorado.edu>).

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms, and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international and state documents.

All classrooms in the Leeds School of Business are equipped up to campus "smart" classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable and

both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

Business Research Division

Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic and market research that contributes to the efficient use of Colorado's resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance (TAA) Center (RMTAAC). Through its annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research and custom research projects. It also prepares a Colorado leading economic indicator series, the *Leeds Business Confidence Index*. Research results are distributed through presentations and reports; a quarterly newsletter, the *Colorado Business Review*; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Assistance for Firms Program, which helps import-impacted U.S. firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAA for Firms Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm's competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to \$75,000 in grant funds and 50/50 cost sharing for strategic projects.

Academic Centers

In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Center for Real Estate, the Burridge Center for Securities and Valuation, the Center for Education on Social Responsibility (CESR) and the Center for Business Integration.

The Robert H. and Beverly A. Deming Center for Entrepreneurship

As part of the Leeds School of Business, the Deming Center for Entrepreneurship's mission is to inspire and empower students, community, alumni, faculty and staff through entrepreneurship education and partnership with the community. The Deming Center does this in part by educating, engaging and partnering and focusing on student experience.

Cutting-edge Curriculum. Our progressive curriculum and interdisciplinary programs include:

- courses in entrepreneurial finance, marketing and business planning
- interdisciplinary programs in engineering, business, law and environmental studies

- undergraduate business minor with a Certificate of Entrepreneurship for students across campus
- undergraduate Certificate of Entrepreneurship for Leeds students
- MBA concentration in entrepreneurship
- world renowned PhD program in entrepreneurship

The Deming Center supports the entrepreneurial curriculum and advances the Leeds School's leadership agenda through our collaborative initiatives across campus and in the business community in these key areas:

- **Education.** Our entrepreneurship students have access to a world class entrepreneurship faculty. The faculty are involved in collecting, curating and making available the latest research and thinking on entrepreneurship in the world. These faculty are inspiring and directing new research and thought leadership in entrepreneurship and constantly working with thought leaders to develop and stay ahead of the latest trends and tools for entrepreneurship education.
- **Real World Experience.** Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators serving as student mentors and advisors. The center helps connect students with projects, advisors and internships that challenge them to use their new skills creatively.
- **Student Experience.** Staff and faculty at Deming are focused on delivering an outstanding student experience. Deming promotes the development of entrepreneurial thinkers and doers. Entrepreneurial thinkers and doers are optimistic, resilient, resourceful, persistent, calculated risk-takers, efficient, creative problem solvers and effective workers. These are teachable skills any student is capable of learning.
- **The Community.** Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU-Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers and environmental science programs

Real Estate Center

The Real Estate Center, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate education and scholarship. The center oversees the school's real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Course work is drawn from the law school, the colleges of architecture and engineering, construction management and others.

The center creates real-world experiences for students by providing project course work and being a resource for securing internships, mentors and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

Burridge Center for Securities Analysis and Valuation

The Burridge Center for Securities Analysis and Valuation is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers and the investing public;
- identifying critical research issues in the theory and practice of security analysis and valuation; and
- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts and finance academics.

Center for Education on Social Responsibility (CESR)

CESR's goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school's commitment to developing leaders of conscience. Although the Center's primary focus is on excellence in curriculum development and delivery, CESR also undertakes a broad spectrum of initiatives including a certificate program, student organizations, conferences and other extracurricular offerings as well as providing funding and administrative support for faculty research.

Courses

CESR is directly responsible for course development, staffing and coordination of the Business requisite introduction course World of Business, and collaborates on the design and delivery of the requisite 3000-level course Business Law, Ethics & Social Responsibility. CESR also offers leading edge electives such as CESR 4000, CESR 4005, CESR 4827/ACCT 4827, CESR 4828/MGMT 4828 and the Global Seminar *Social Entrepreneurship & Innovation* in Panama.

Certificate and Portfolio

CESR offers specialized recognition for students at the undergraduate and graduate levels. Undergraduates wishing to focus on CESR-related topics may earn the Certificate in Socially Responsible Enterprise (SRE). At the MBA level, CESR has formalized a Sustainability Portfolio of courses, including the MBA requisite Socially Responsible Enterprise course, and electives such as MBAX 6570 and MBAX 6140.

CESR Co-Curricular Activities

- **CESR Stampede at Leeds: A Week of Driving Values in Business.** This weeklong event showcases the values-driven and innovative curriculum developed by the CESR that is shaping tomorrow's business leaders. Through class visits, expert panels and lectures student competitions and showcases, attendees will explore their own values and network with like-minded professionals about applying positive values in a business setting. Stampede Week also includes the fourth annual Conscious Capitalism Conference, a CESR flagship event.

CESR routinely hosts events aimed at our students, our local business community and educators and industry leaders throughout the academic year. Guest speakers change each semester, but recurring events are included here:

- **CESR Business Ethics Case Competition (BECC).** The CESR BECC is an interactive way to deepen the Leeds undergraduate students' understanding of the importance of creating ethical as well as profitable business cultures. Teams are provided with a business case in the weeks leading up to the competition which they will have to analyze, create recommendations for course of action and present

their solutions to a panel of professional judges. Cash prizes are awarded to the top three teams.

- **Conscious Capitalism Conference.** An annual conference hosted by CESR featuring innovative executives and entrepreneurs who have used the traditional tools of capitalism to serve social needs.
- **Student Center for Social Entrepreneurship.** CESR provides faculty sponsorship for SCSE, the student branch of Social Entrepreneurship for Equitable Development, an interdisciplinary, inter-generational campus group that is involved in researching, teaching and generating student involvement in the areas of social entrepreneurship and sustainable community development.
- **Net Impact Club.** CESR is home to a graduate chapter of Net Impact, an international non-profit organization whose mission is to use the power of business to create a more socially and environmentally sustainable world.
- **New Venture Challenge Social Impact Track.** CESR developed and continues to support the Social Impact Track of the **CU New Venture Challenge**, a campus-wide initiative connecting students and faculty with teammates in a broad range of disciplines and with mentors from the business community. The goal is to provide knowledge and experience making entrepreneurship accessible to anyone on the CU-Boulder campus with the enthusiasm and creativity required to start a new business.

Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Programs & Leadership Professional Mentorship Program

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program's mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities and a sense of connection and community among current students, Leeds alumni and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location or functional area. To ensure a quality experience for both students and mentors, the PMP provides workshops, training and additional support for participants throughout the program.

Program Benefits

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for graduate school, work-life balance and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- Advice and assistance on academic questions, career options, life beyond college and more
- Access to the PMP network and networking opportunities and the opportunity to start building the student's own professional network
- Opportunities to practice and strengthen professional communication and presentation skills
- Help in defining personal and professional goals, and the strategies to achieve them
- Unique internship and job opportunities
- Development of a life-long friend and connection in the business world

Study Abroad

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors and graduate students.

Student Organizations

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:

- Alpha Kappa Psi
- Athletic Business Club
- CU Fashion Club
- Beta Alpha Psi

- Collegiate DECA
- CU Energy Club
- CU Finance Club
- CU American Marketing Association
- CU Investment Club
- CU Society for Human Resources Management
- Delta Sigma Pi
- International Business Club
- Leeds Ambassadors
- Leeds Association of Information Systems
- Leeds Council (Undergraduate Student Government)
- Multicultural Business Student Alliance
- Music Industry Club
- Real Estate Club
- Women in Business Club

Leeds School of Business Student Government

Leeds Council is the governing body of the Leeds School of Business that strives to serve, support and represent the student body. The council also works to make Leeds a better business school through social, academic and professional programming. The council is made up of five primary committees and an executive board that control a significant portion of the Leeds student fees.

Two members of Leeds Council also serve as representatives on University of Colorado Student Government (CUSG) to voice the interests of business students at the main campus.

Career Development

The Leeds Career Development Office is the hub for undergraduate professional development. We work with each student to create a four-year career development plan that will allow them to develop the professional competencies and business connections needed to pursue their personal and career goals. Leeds students have access to unique, business-focused resources including:

Career Readiness Programs

All Leeds students are assigned a career advisor by their area of emphasis. Advisors work with each student to create a four-year career development plan that allows them to develop the professional competencies and business connections needed to pursue their goals. Key services that support career readiness include:

- One-on-One Career Coaching Sessions
- Skill Development Workshops
- Personal- and Career-Assessments
- Mock Interviews

Employer Connections

The Leeds School has created strong partnerships with over 2,000 companies from diverse industries and locations. Our office connects students of all interests with the resources, organizations and people necessary to facilitate career success, including:

- On Campus Interviews
- Employer Panels by Industry or Topic
- Employer Information Session and Recruitment Days
- Leeds-Specific Career Fairs

- Leeds Signature Events: CoLab and Sophomore Professionalism Summit

Industry Experiences

At Leeds, students are encouraged to explore career opportunities in business through hands-on learning via internships and Career Treks.

- **Internships:** Dedicated support includes an internship advisor, internship-focused workshops and networking events.
- **Career Treks:** Visits focused on an industry, functional area or location with in-depth opportunities for job search and connections. Previous visits have included Boulder, Denver, Chicago, Houston, Los Angeles, New York, Salt Lake City and San Francisco.
- **Professionalism Assignments:** The World of Business and Sophomore year provide all Leeds 1st and 2nd-year students with a strong foundation to pursue their career interests and goals.

Mentoring

The integration of multiple mentoring programs throughout the four-year experience is a unique feature of the Leeds education, providing students with individual connections and personalized support. Over 1,500 undergraduates and more than 900 professional mentors participate in mentoring through these programs:

- **CoLab: Essentials of Collaboration and Innovation in Business:** Full-day outdoor orientation experience introducing first-year students to key business concepts and corporate mentors.
- **Peer2Peer:** Connects new Leeds students with trained student mentors to help students build a strong foundation and sense of belonging at Leeds.
- **Young Alumni Mentors Program:** Partners sophomores with recent Leeds graduates to provide major and career exploration, academic preparation and professional skills development.
- **Professional Mentorship Program:** Pairs juniors and seniors with experienced business professionals providing opportunities to develop and practice critical professional skills and build their professional network.

Policies & Requirements

Academic Excellence

Honors

In recognition of high scholastic achievement, upon recommendation of the faculty, the designation "With High Distinction" or "With Distinction" will be awarded at graduation. To qualify for the "With High Distinction" designation, the student's cumulative University of Colorado GPA must be at least 3.90. For the "With Distinction" designation, the student's cumulative GPA must be at least 3.75 but less than 3.90. In addition, for these designations, at least 60 credit hours must have been earned at CU Boulder.

In addition to the distinction of honors, Leeds School of Business students also may participate in the Latin honors granted by the College

of Arts and Sciences. Qualified students are encouraged to participate in this program, which coordinates the offering of a variety of honors seminars as well as the granting of Latin honors (cum laude, magna cum laude, summa cum laude) at graduation. Granting of these honors is determined by the Honors Council based on several criteria, including the quality of original scholarly work (generally reported in the form of a thesis). Latin honors are not conferred on a graduate entering in the summer of 1995 and thereafter simply by virtue of high grades. Interested students should consult the Honors Program listing in the College of Arts and Sciences section or contact the Honors Program in Norlin Library.

Dean's List

Students in the Leeds School of Business who have completed at least 12 credit hours of CU Boulder course work for a letter grade in any single semester with a term GPA of 3.600 or better are included on the dean's list and receive a notation on their transcript.

Beta Gamma Sigma

Membership in Beta Gamma Sigma is an honor that must be earned through outstanding scholastic achievement. Such membership is the highest scholastic honor that a student in a school of business or management can attain.

To be eligible for Beta Gamma Sigma membership, students must rank in the top 10 percent of their junior class, the top 10 percent of their senior class or be among the top 20 percent of those students receiving master's degrees. Also, students completing all requirements for the doctoral degree conferred by a business school are eligible for Beta Gamma Sigma. It should be noted that Beta Gamma Sigma chapters may be chartered only in those schools of business and management accredited by AACSB, the International Association for Management Education.

Scholarships

Each year the college awards a number of divisional and general scholarships. Business scholarships are for students who have completed business course work at the university. The amount and number of the awards vary each year.

Academic Standards

Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery or falsification of official records and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university. Reported acts of academic dishonesty must be referred to the Honor Council.

Students are advised that plagiarism consists of any act involving the offering of someone else's work as the student's own. It is recommended that students consult with instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Official college procedures concerning academic ethics are maintained in the Office of Undergraduate Studies.

Standards of Performance

Students are held to basic standards of performance with respect to attendance, active participation in course work, promptness of assignments, correct English usage both in writing and in speech, accuracy in calculations and general quality of scholastic workmanship.

In general, examinations are required in all courses and for all students, including seniors.

Good Academic Standing

To be in good standing, you must have an overall grade point average of C (2.00) or better for all course work taken, and a 2.00 or better for all business courses taken. Students must earn a passing grade for all required courses. This requirement applies to work taken at all university campuses.

Any student earning all or nearly all failing grades, or no academic credit for a semester will not be permitted to register without the dean's approval.

Official double-degree students must maintain required academic standards for the Leeds School as well as their other college.

When semester grades become available, students below the acceptable standard will be placed on probation or suspension. Students are responsible for being aware of their academic status at all times, and late grades and/or late notification do not waive this responsibility.

Academic Alert (First-Year Students Only)

First-semester freshmen with a cumulative grade point average or business grade point average below 2.00 at the end of their first semester will be placed on academic alert. If you are placed on academic alert, you are in good academic standing, but you must meet with your academic advisor to discuss your performance and establish a customized academic recovery contract. Students placed on a academic alert are given one semester to improve their academic performance. At the conclusion of your academic alert semester, your records will be reviewed.

- If both cumulative and business GPAs are 2.00 or higher, you will remain in good standing.
- If your cumulative and/or business GPA is still below 2.00 but you met the terms of your academic recovery contract, you will be placed on probation and given one academic recovery semester (see Probation/Academic Recovery).
- If your cumulative and/or business GPA is still below 2.00 and you did not meet the terms of your academic recovery contract, or you never met with your advisor to establish a contract, you will be placed on academic suspension (see Scholastic Suspension).

Probation/Academic Recovery

If your cumulative grade point average or cumulative business grade point average falls below 2.00, you will immediately be placed on probation for one semester. If you enroll in any term, excluding summers, after being placed on probation you are expected to raise your cumulative and business grade point average to at least a 2.00 or demonstrate significant progress toward improving your GPA(s).

If you do not raise your GPA(s) to 2.00 or make significant progress during your probation semester you will be placed on suspension.

Significant Progress

Significant progress is defined relative to whichever GPA is below 2.0. If the cumulative GPA is below 2.0, significant progress is defined as a term GPA of 2.5 with at least 12 credits completed toward the cumulative GPA. If the Business GPA is below 2.0, significant progress is defined as a term business GPA of 2.5 with at least 6 credits of business course work completed.

Scholastic Suspension

If your cumulative and/or business grade point average is below 2.00 after your semester of probation and you have not demonstrated significant progress (as defined above), you will be suspended. If you are suspended, you will not be able to register for University of Colorado daytime courses on any campus for one academic year OR until you raise your GPA to 2.0 or demonstrate significant progress.

You are allowed to take summer classes at any of the CU campuses while on suspension.

If you are suspended, you may choose from the following options.

Suspension Option 1: Clear GPA

1. Students may take Continuing Education Independent Learning courses, and/or Boulder Evening credit classes, and apply for readmission when they have cleared their grade deficiency or when they have demonstrated significant progress.
 - If a student is readmitted based on significant progress, they will be readmitted on probation and will be subject to Leeds' probation rules (see Probation).
 - You must maintain a 2.50 term GPA each semester that you enroll in Continuing Education courses. If you do not earn a 2.50 GPA in Continuing Education Courses, you will be suspended from Continuing Education and will only be allowed to enroll in CU Boulder courses during the summer term.
2. Students may choose to attend another educational institution and apply for readmission when, and only when, they have overcome their grade deficiencies by means of a GPA, which is arrived at by averaging the grades from CU with the grades from the other institution. These transfer grades are used only for the purpose of readmission and do not remain in the University of Colorado grade point average. If students choose to attend another institution, they must have their proposed course work preapproved by the Office of Undergraduate Student Services in the Leeds School of Business.
 - If students choose this option and are readmitted based on a virtual GPA, they will be readmitted on probation and will be subject to Leeds' probation rules (see Probation).
3. Students may choose a combination of 1 and 2.

Suspension Option 2: Do not take classes for one year

If students have been under suspension for one calendar year and did not elect Option 1, they may apply for readmission. Students will have two semesters to raise their cumulative or business grade point average to at least a 2.00. If their GPA falls after the first semester, they will again be suspended for another academic year or until their grade deficiency has been made up.

Readmission

When students make up their grade deficiency (Option 1) or have not taken classes for one year (Option 2) and desire to be readmitted, they must request readmission in writing by contacting:

Office of Undergraduate Student Services
UCB 419
Boulder, CO 80309
Email: leedsug@colorado.edu

After doing so, students may need to reapply by submitting an application through the Office of Admissions. For more information, call 303-492-6515.

Suspended Leeds School students who transfer into another school or college of the university will not be eligible to register for business courses and will be subject to administrative drops.

Credit and Enrollment

All students are responsible for knowing and following the provisions set forth below. Any questions concerning these provisions should be directed to the college. The college cannot assume responsibility for problems resulting from a student's failure to follow the policies stated here or from incorrect advice given by those outside the Office of Undergraduate Services. Similarly, students are responsible for all deadlines, rules and regulations stated in the General Information section of this catalog. All rules and regulations are subject to change. Any questions should be directed to the Leeds School of Business, Office of Undergraduate Services, KOB L S220, 303-492-6515.

Admission to the Business Program

Prospective freshman students are encouraged to complete strong academic programs in high school. A minimum of four academic units should be completed each year with special emphasis given to writing, mathematics and science skills. For a detailed explanation of the high school preparation desired, see Undergraduate Admission in the General Information section.

Transfer students are expected to demonstrate proficiency in economics, writing and mathematics. Prospective transfer students should complete courses equivalent to those taken by University of Colorado business freshmen and sophomores.

Residency Requirement

Complete a minimum of 45 credit hours in University of Colorado courses on the Boulder campus. Of these 45 credits, a minimum of 30 credits must be business courses completed as a matriculated student in Leeds.

Intrauniversity Transfer

An undergraduate student who is enrolled on the Boulder campus and wishes to transfer to the Leeds School of Business may submit a completed application for the fall or spring semester. A cumulative university GPA of 3.00 and a cumulative GPA of 2.00 in business courses is necessary to be considered for admission. In addition, students must have 24 completed credit hours, 12 of which must be graded work at CU-Boulder; 4 credit hours of MATH 1112; and microeconomics and macroeconomics. Students must earn a grade of B- or better in ECON and MATH to be considered for admission. Intrauniversity transfer students must take a minimum of 30 credit hours of business courses, including their area of emphasis, in residence after admission to the college. Applications are accepted year round and will be reviewed once a month. However, the deadlines for admission prior to the registration period are October 1 for spring and March 1 for fall. Leeds can't guarantee the usual selection of courses for those who submit applications after the deadline.

In order to apply to the Leeds School of Business, students must complete a mandatory online IUT presentation and quiz.

Registration Stops

A service indicator stop will be placed on students' records when they have earned 45 credit hours, if they have not yet declared their area of emphasis. All first and second year students will also have a service indicator and be required to attend an advising meeting before registration for the next semester.

Registration for Business Courses

Business students may register only for those courses for which they have the stated prerequisites.

Administrative Drops

Instructors may recommend to the Office of Undergraduate Services that students who fail to meet expected course attendance or prerequisites be dropped from their courses at any time during the semester.

Attendance Regulations

Classroom attendance is left to the discretion of the instructor. Students are responsible for understanding each instructor's policy on attendance.

Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Failure to attend regularly may result in receipt of an *F* in a course. Students who, for illness or other legitimate reasons, miss a final examination must notify the instructor no later than the end of the day on which the examination is given. Failure to do so may result in receipt of an *F* in the course.

Concurrent Registration

Concurrent registration is for graduating seniors who must be enrolled on two campuses of the University of Colorado at the same time in order to fulfill graduation requirements.

Students enrolled in the Leeds School of Business may exercise the concurrent registration option if they are in their graduating semester or are two semesters from graduating and cannot obtain a course necessary to complete a prerequisite sequence. The course must be required for graduation and must not be offered on the Boulder campus, or the course must conflict with another required course in which the student is enrolled. Students from other colleges and schools who wish to take business courses must have the approval of their own college or school before submitting the concurrent registration form.

Scholastic Load

The normal scholastic load of an undergraduate student in the college is 15 credit hours, with a maximum of 21 credit hours during the fall and spring semesters. A maximum of 3 credit hours may be taken during Maymester. A maximum of 6 credit hours may be taken during a five-week summer term, with no more than 12 credit hours total during the 10-week summer session.

Credit Policies

To receive credit, all courses must be listed on the student's official transcript by the Office of the Registrar. Credit is then evaluated by the Leeds School of Business to determine degree acceptability.

Cooperative Education Credit

No credit is given for work experience or cooperative education programs.

Correspondence Credit

All correspondence courses must have prior approval and be evaluated to determine their acceptability.

Advanced Placement (College Board)

For students who earn scores of 3, 4 or 5 on Advanced Placement exams, college credit will be given where appropriate. See the General Information section for a comprehensive chart on AP credit.

College-Level Examination Program (CLEP)

College credit for approved CLEP subject examinations may be considered, providing the scores are at the 67th percentile or above.

Specific information is available in the Office of Undergraduate Student Services.

CLEP credit is only appropriate for nonbusiness requirements and nonbusiness electives. A maximum of 6 hours of credit in any one course area is allowed. CLEP may not be used in course areas where credit has already been allowed. General examinations are not acceptable. CLEP credit is not transferable.

Before a CLEP examination can be taken, students must have prior approval in writing by the Office of Undergraduate Student Services.

No Credit

Because of enrollment limitations, business classes may not be taken on a no-credit basis.

Special Sources of Credit

The college reserves the right to accept or reject all special sources of credit that do not have prior approval of the dean.

Independent Study

A maximum of 6 credit hours of independent study will be accepted as degree credit. Prior approval is required if the work is to be applied as degree credit. A maximum of 3 credit hours may be taken in any one semester.

Study Abroad Credit

Transfer credit from study abroad programs may be applied to the business degree. Students planning to attend study abroad programs must meet with an undergraduate advisor and have their course selections approved prior to leaving campus.

More specific information about these opportunities is available from the Office of International Education.

Transfer Credit

The school reserves the right to disallow any credit that it deems inappropriate degree credit.

Credits in business subjects transferred from other institutions will be limited to the number of credit hours given for equivalent work in the regular offerings of the university. Only work from regionally accredited institutions will transfer to the college. A maximum of 60 credit hours of credit may be accepted from a two-year school.

Actual equivalent courses may be substituted for required courses. Students must submit a carefully checked catalog description and course syllabus for course equivalency determination.

Business students desiring to apply course work from another institution or University of Colorado campus toward the BS degree in business administration must have prior approval of the Leeds School of Business. Only nonbusiness requirements or elective credit is acceptable in transfer from other institutions once the student has enrolled.

All courses in the area of emphasis must be taken at the University of Colorado Boulder unless written approval is given by the associate dean of undergraduate services. Transfer students must take a minimum of 30 credit hours of business courses, including the area of emphasis, in residence after admission to the college. For more information on transfer of credit policies, see Transfer of College-Level Credit in the Admission section.

Grading Policies

In addition to the campuswide grading system and *pass/fail* policy listed under Registration in the General Information section, the Leeds School of Business enforces the following policies.

Pass/Fail

Students in the Leeds School of Business may not use the pass/fail option for courses taken to fulfill General Education Core Requirements, courses used to satisfy the Minimum Academic Preparation Standards (MAPS), business core requirements, business major requirements or business electives. A grade of F when earned in a course taken pass/fail will calculate into the GPA as a failing grade. Only nonbusiness electives may be taken on a pass/fail basis. A maximum of 6 credit hours of pass/fail credit may be applied toward the BS degree in business administration. Pass/fail determination must be made by the deadline set through the Registrar's Office is irreversible. A maximum of 6 credit hours designated pass/fail may be taken in any one semester.

Failed courses may be repeated, but the F will be included in the GPA.

Incomplete Grades

The only incomplete grade given in the college is an I grade is given only when documented circumstances clearly beyond the student's control prevent the student from completing the course. Generally, students should make up the missing work and not retake the entire course. Students should not register for the class a second time, unless directed by the instructor. All I grades must be made up within one year or the I will be changed to a grade of F.

Grade Changes

Final grades as reported by instructors are considered permanent and final. Grade changes will be considered only in cases of documented clerical errors, and must be approved by the associate dean.

Withdrawal

Students may withdraw from the university any time before the beginning of the final examination period.

Programs of Study

Business Administration

The following areas of knowledge are central to the undergraduate degree in business administration:

- knowledge of core business concepts that provides students with a comprehensive understanding of the basic functional areas of the discipline;
- knowledge in one or more of the four areas of emphasis, in which students are exposed to in-depth study that provides them with the tools necessary to solve complex business problems;
- awareness of the interrelations between academic theory and practice in order for students to be fully equipped to make effective decisions;
- strong verbal and written communication skills, proficiency in business computer applications and knowledge of international business environments;
- knowledge of mathematics sufficient to facilitate the application of quantitative principles; and

- awareness of the importance of academic fields in the area of arts and sciences, with special emphasis placed on the study of economics, political science and other related fields.

In addition, students completing a degree in business administration are expected to acquire:

- the ability to apply basic business principles to solve problems in new and recurring situations;
- the ability to conceptualize and analyze decision-making situations to facilitate solutions in an effective and timely manner; and
- the ability to effectively communicate the results of problem-solving situations, both verbally and in writing.

Having acquired these skills and knowledge, students are able to conceptualize and analyze the concept of business and problem solving as a system. They have the ability to present solutions to business problems in an understandable and useful form. Their education provides them with excellent working knowledge, not only in the field of business, but also in related academic disciplines.

The Leeds School of Business holds accreditation by the Association to Advance Collegiate Schools of Business (AACSB-International).

Advising and Records

Undergraduate business students receive academic counseling from a staff of professional advisors in the Office of Undergraduate Student Services. During the semester, advisors are available in KOBLS220, Monday–Friday, 8 a.m.–5 p.m., by appointment.

Students are expected to assume responsibility for planning their program in accordance with college rules and policies. Students are encouraged to discuss the various emphases available as well as career opportunities with the faculty of the college.

Bachelor's Degree

- Business Administration - Bachelor of Science (BS) (p. 562)

Minor

- Business - Minor (p. 567)

Certificates

- Entrepreneurial Studies - Certificate (p. 567)
- Global Business - Certificate (p. 568)
- Operations and Information Management - Certificate (p. 568)
- Quantitative Finance - Certificate (p. 143)
- Real Estate - Certificate (p. 569)
- Socially Responsible Enterprise - Certificate (p. 569)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

BADM 1250 (1.5) First Year Seminar for Business

Surveys the entire undergraduate experience and includes topics, issues, and practices that focus on the professional, academic, and leadership growth of a business student. It addresses how to make an effective transition to college and puts students on a path to become well-rounded, engaged and globally-minded. Students will acquire the knowledge and skills to take advantage of all the opportunities and support services available to them while learning to balance the challenges and expectations of their business degree. A sample of the topics covered include: transition to college, dealing with academic rigor, developing a professional tool kit—resume and cover letter preparation, interview skills, project management, working in teams and public speaking—and preparing for the role as a global business leader.

Requisites: Restricted to Business (BUSNU) majors only.

Grading Basis: Pass/Fail

BADM 1260 (2) First-Year Global Experience

In today's world of increased mobility, globally aware students have more choices for employment upon graduation and are immediately ready to contribute in global environments. They are aware of global issues and cultural differences, and their global mindset allows them to recognize good ideas from whenever they might come and new market/product opportunities wherever they might exist. This course is the first step toward the development of a global mindset. It provides a meaningful global experience to first-year business students through an in-depth perspective of a specific country or region outside the United States and a short academic trip to the region.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 2010 (1) Excel in Business

Teaches beginner to intermediate level Excel skills, emphasizing efficient use of Excel to make sense of substantial data sets. The course is designed to increase students' proficiency with Excel through a series of hands-on workshops. The workshops have a business problem solving orientation and use real data from Leeds' corporate partners. The workshops emphasize the most important skills that employers value.

Requisites: Restricted to Business (BUSNU) majors only.

Grading Basis: Pass/Fail

BADM 2050 (3) Honors/Special Topics

Variable topics in business, drawing from a variety of disciplines.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: At least a 3.50 cumulative GPA is required.

Additional Information: Arts Sciences Honors Course

BADM 2880 (3) Special Topics

Explores historical developments, contemporary issues, industry trends and best practices pertinent to the business of sports. Examines how sports enterprises are managed and the impacts that such enterprises have on the economic and social fabric of communities. Designed to provide sufficient background for educated consumption of this literature and pursuit of further study if desired.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

BADM 2900 (1-3) Independent Study

Department consent and departmental form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 3100 (1) Professional Development

Designed to provide opportunities to understand and develop professional competencies for successful careers in business. Designed to increase knowledge of job search strategies and formulate a career management plan for transitioning to the workplace. Topics such as resumes, cover letters, personal branding, job search strategies, internships, career choices, networking and social media will be covered. A Self-Marketing Plan will be developed to help focus on long-term career goals.

Requisites: Restricted to Leeds School of Business majors only.

Grading Basis: Pass/Fail

BADM 3880 (3) Special Topics

Introduces students to the many facets of the marketing of sport and marketing through sport. Theoretical and practical applications of marketing sport are examined. Provides students with an understanding of current marketing concepts and best business practices, related to sports enterprises and a foundation for pursuit of further study and work in sports and event marketing.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

BADM 3900 (1) Independent Study

Department consent and departmental form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 3930 (1-6) Internship

Student training and participation in government or industry environment under faculty supervision. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of BCOR 1000 and BCOR 1020 and BCOR 2000 and BCOR 2400 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Pass/Fail

BADM 4820 (1-6) Special Topics

Variable topics in business drawing from a variety of business disciplines.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Business (BUSN) majors with 52-180 units completed.

BADM 4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Business Administration.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

BADM 4830 (1-3) Special Topics

Various topics in business and society drawing from a variety of business disciplines.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 4900 (1-3) Independent Study

Intended only for exceptionally well qualified business seniors. Department form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 4910 (2) VITA-Volunteer Tax Assistance

Offers students the opportunity to gain professional work experience in an accounting position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential.

Requisites: Requires prerequisite courses of BCOR 2000 and ACCT 3440 or ACCT 5440 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

Grading Basis: Pass/Fail

Business Administration - Bachelor of Science (BS)

All business students pursuing a bachelor's degree in business administration must complete the prescribed courses in at least one area of emphasis. The school offers programs in four areas of emphasis: accounting, finance, management and marketing. An area of emphasis consists of a minimum of 18 credit hours taken at CU Boulder.

In addition to the area of emphasis, students also may complete an area of application. The school offers the following areas of application: entrepreneurship and small business management, international business and real estate. An area of application consists of a minimum of 9 credit hours taken at CU Boulder.

Accounting Emphasis

The accounting area of emphasis prepares students for careers in which they will develop, analyze and interpret complex financial data. Accounting majors become experts in "the language of business." This expertise prepares them for careers in CPA firms, business consulting, industry (from Fortune 500 companies to small entrepreneurial enterprises), not-for-profit enterprises or government. Accountants who pursue careers in public accounting might become partners in public accounting and consulting firms. Those who begin their careers in industry might have positions as a chief executive officer (CEO), chief financial officer (CFO), chief accounting officer (CAO) or controller, tax specialist, internal auditor, accounting systems analyst, financial analyst or managerial accountant. Many students begin their careers in public accounting firms and move to industry or government after several years of experience. Employers seek students with skills in communication, interpersonal interactions, analytical thinking, problem solving and integrity.

The major branches of study in the accounting area of emphasis are:

1. financial accounting / analysis and audit, and
2. tax planning and compliance.

Basic coursework in accounting focuses on developing a comprehensive understanding of the theory and concepts underlying the presentation of financial and operating information about an enterprise to external and internal users. Additional course work exposes the student to income taxation of business enterprises and individuals, the practice and principles of auditing and assurance services and cost management. Specialization is available through graduate work.

Professional Certification as a CPA or CMA

Most accounting students from the University of Colorado earn professional credentials within a year or two of receiving their degrees. The two most widely-recognized professional certifications are the

certified public accountant (CPA) and certified management accountant (CMA).

The CPA is a state-granted license, for which each state sets its own requirements. All states require 150 total credit hours of study to be licensed as a CPA, thus earning a degree with only 120 credit hours will not meet licensure requirements. Although the CPA requirements of most states have similar components, the specifics of those requirements differ greatly. Most states set requirements for the following before a CPA license will be granted:

1. background checks
2. education
3. CPA Exam passage
4. work experience

Not only do state requirements differ greatly from one state to another, those requirements frequently change. It is very important that the accounting student obtain the guidelines for the relevant state to ensure proper development of his or her degree plan (see NASBA.org (<http://NASBA.org>) or the website of the particular state's board of accountancy).

The CPA license is a legal requirement for someone to perform financial statement audits, but is not legally required to perform other kinds of accounting work. It is important to note, however, that many professional accounting positions set CPA licensure as a job requirement even where it is not legally required, thus a CPA license is a valuable credential for any accounting professional. As a result, most students completing an accounting emphasis at Leeds continue into the concurrent bachelor's and master's degree program (see Concurrent Degree Programs below) to seek their CPA license.

The CPA's expertise typically focuses on presentation and analysis of financial information for an external user. The CMA's primary focus is improving information for the internal user. Professional accountants' expertise in financial matters and their understanding of company operations through financial information prepare them to become key players and critical decision makers for all aspects of business creation, operation and transformation.

As is the case at most colleges and universities, simply meeting the requirements to receive a degree with an undergraduate emphasis in accounting at Leeds will not necessarily meet all of the specific requirements for CPA licensure of any particular state including Colorado. Prior to being licensed, a candidate must be granted permission by a state's board of accountancy to take the CPA Examination. As with the overall requirements for licensure, the specific requirements and timing when students can take the exam differ greatly for different states, all of which makes it crucial for the student to develop the degree plan in conjunction with applicable state requirements.

The CMA is a different type of certification because it not granted by a state, but rather by the Institute of Management Accountants, which is a professional organization. The requirements are the same regardless of where an applicant lives. The website for the Institute of Management Accountants provides information about becoming a certified management accountant (CMA). Though not legally required for any kinds of positions in any state, the CMA is also a valuable professional credential.

Finance Emphasis

Finance is essential to business. Finance faculty boast expertise in foundational concepts like corporate finance and macroeconomics, as well as specialized areas like mergers and acquisitions, derivatives and foreign exchange markets. Students within the program benefit from access to the Burrige Center for Securities Analysis and Valuation and the CU Real Estate Center. Our curriculum prepares students to succeed in areas such as financial management, business economics and real estate. The finance program addresses issues in the financial services and securities area, including topics related to high technology firms, large corporations, and entrepreneurial companies. The finance program is designed to provide students with in-depth exposure to the background necessary for entry-level positions in various areas of financial management. Students study financial management, money and capital markets, investments and derivative securities, and financial institutions. This program enables students to develop the ability to evaluate financial problems and formulate sound financial decisions and policies. Although emphasis is on financial management of profit-oriented organizations, the principles and concepts covered are applicable to nonprofit and governmental organizations.

Management & Entrepreneurship Emphasis

Advances in business knowledge and technology have radically changed business systems, organization structures, and processes. As a result, critical to today's businesses is the ability to get the right information to the right people at the right time, so that both strategic and operational decisions are made properly and quickly. Students majoring in management & entrepreneurship will learn to recognize the pivotal role that information plays in the business world and to use their knowledge to increase business competitiveness. Students completing the management & entrepreneurship area of emphasis are viewed by potential employers as having the education required to successfully compete in the team-oriented, horizontally organized and globally competitive environments of the 21st century. The management & entrepreneurship area of emphasis prepares students for careers managing people, operations, and information. Management & entrepreneurship students must choose one of three tracks: human resource management, information management or operations management.

Marketing Emphasis

The Marketing Division at the Leeds School of Business is distinguished by its scholarly impact on academic marketing thought and by exceptional teaching. Research by our faculty is our strength. Research is published in prestigious publications such as the *Journal of Consumer Research*. Our faculty bring marketing theory and practical solutions to students and prepare them for careers in business and in academics. The increasingly global marketplace, coupled with new communication vehicles such as the Internet, have changed the traditional tactics used in marketing. Today's marketing practitioners must understand the unique challenges of serving foreign markets and how to effectively convey their messages to consumers throughout the world. The marketing program develops students' analytic and decision-making skills in such areas as advertising, market research, brand/product management, selling and sales management, distribution, relationship marketing, international marketing, marketing consumer products and services, and marketing nonprofit organizations. Key concepts focus on identifying customer needs and wants, developing products and services to meet those demands, establishing communications to promote products and services, and monitoring transactions and customer responses to guide future activities. Marketing concepts apply to tangible products, services

and ideas, consumer and business markets, and domestic and global markets.

Concurrent Degree Programs

BS/MS in Business Administration and Accounting

Qualified Leeds undergraduate students may apply for a five-year concurrent bachelor's/master's program. Student typically begin the concurrent program in the fall of their senior year, and graduate with both the BS and MS degrees after five years. The concurrent degree program is a 150 credit-hour program. Students earn a BS in Business Administration (120 credits) with an area of emphasis in Accounting, Finance or Accounting and Finance, and an MS in Accounting (30 credits).

For more information, visit the Concurrent BS & MS Accounting or Taxation (<http://www.colorado.edu/business/academic-programs/undergraduate-programs/accounting/concurrent-bsba-ms-accounting>) webpage.

BS/MS in Business Administration and Taxation

Qualified Leeds undergraduate students may apply for a five-year concurrent bachelor's/master's program. Student typically begin the concurrent program in the fall of their senior year, and graduate with both the BS and MS degrees after five years. The concurrent degree program is a 150 credit-hour program. Students earn a BS in Business Administration (120 credits) with an area of emphasis in Accounting, Finance or Accounting and Finance, and an MS in Taxation (31 credits).

For more information, visit the Concurrent BS & MS Accounting or Taxation (<http://www.colorado.edu/business/academic-programs/undergraduate-programs/accounting/concurrent-bsba-ms-accounting>) webpage.

BS/MS in Business Administration and Telecommunications

The Leeds School of Business also offers a unique program that allows undergraduates the opportunity to earn a bachelor's and master's degree simultaneously. The joint program graduates students with a bachelor's degree from the Leeds School of Business and a master's degree from the College of Engineering in telecommunications. For more information, see engineeringanywhere.colorado.edu/itp/ (<http://engineeringanywhere.colorado.edu/itp/>).

Requirements

General Requirements

Total Credit Hours

Students must complete a minimum of 120 acceptable credit hours from the following categories.

- **Business core (30 credit hours):** Consists of integrated course work through which students develop key skills such as communication, teamwork and leadership while learning fundamentals of business and working on live cases.
- **Business area of emphasis (18 credit hours):** Emphases are available in accounting, finance, management or marketing, and require a minimum of three semesters to complete.
- **Business electives (16 credit hours)**
- **Nonbusiness requirements (39 credit hours):** Consists of course work from the College of Arts and Sciences core requirements.

- **Nonbusiness electives (17 credit hours)**

The school reserves the right to disallow any credit that it determines is not appropriate academic credit.

Minimum Grade Point Average

- A cumulative grade point average of 2.00 in the area of emphasis and all grades in the 18 credit hours must have a grade of C- or higher (no pass/fail credit hours can be applied to the area).
- A minimum scholastic cumulative GPA of 2.00 is required for all courses attempted at the university.
- A cumulative 2.000 is required for all business courses attempted at the university.
- A cumulative grade point average of 2.00 is required in the area of application courses.

Required Courses and Semester Credit Hours

Business Core

BCOR 1015	The World of Business	3
BCOR 1025	Data Analysis in Business	3
BCOR 1030	Communication Strategy	3
BCOR 2001	Principles of Marketing and Management	3
BCOR 2002	Principles of Accounting and Finance	3
BCOR 2003	Business Law, Ethics and Social Responsibility	3
BASE 2101	BCOR Applied Semester Experience 1: Early Stage	3
BASE 2102	BCOR Applied Semester Experience 2: Growth Stage	3
BASE 2103	BCOR Applied Semester Experience 3: Mature Stage	3
BASE 2104	BCOR Applied Semester Experience 4: Case Project	3

Area of Emphasis

Students must choose an area of emphasis in accounting, finance, management or marketing. 18

Business Electives

Business courses required by specific areas in excess of the 18 credit hours listed under areas of emphasis may count as business electives. 16

Nonbusiness Requirements

Students in the Leeds School of Business are required to complete course work from the College of Arts and Sciences core requirements, including classes from the following categories: 39

Mathematical skills ²	
Contemporary societies ²	
Written communication ²	
Historical context	
Human diversity	
United States context	
Literature and the arts	
Natural sciences	
Ideals and values	

Nonbusiness Electives

Students are required to complete 17 credit hours of nonbusiness electives. ³ 17

Total Credit Hours 120

¹ A list of courses that fulfill specific requirements for each area is available on the College of Arts and Sciences' Core Curriculum (<http://www.colorado.edu/artsandsciences/student-resources/core-curriculum>) webpage.

² Leeds students are required to take microeconomics and macroeconomics, specific math and writing courses to fulfill these categories. Contact undergraduate student services for more information, or visit leeds.colorado.edu (<https://leeds.colorado.edu>).

³ Not all classes are accepted as elective credit hours. Generally, to be acceptable, electives must have a form of assessment such as a term paper and/or examinations and must be regular classroom-type courses. Course coverage must be college level, must not be repetitious of other work applied toward the degree, must be academic as opposed to vocational or technical and must be part of the regular university offerings. Contact Undergraduate Student Services or visit the school's Degree Requirements (<http://www.colorado.edu/business/academic-programs/undergraduate-programs/undergraduate-degree/degree-requirements>) webpage for more information about the number of business elective credit hours required.

Residence

Students must complete 30 credit hours of business courses in residence on the Boulder campus after admission to the college, including the 18 credit hours in the area of emphasis and the 9 credit hours in the area of application (included in the business electives). Students must be in residence at CU Boulder and must be registered as business degree students during the term of graduation.

Areas of Emphasis

Accounting Emphasis

This degree may be earned by a student who takes 18 credit hours of accounting beyond the core. The 18-credit-hour requirement for the degree does not meet the educational requirements to be licensed as a CPA in any state. This option might be chosen by a student who does not want to become professionally certified, but who seeks a career involving accounting and financial analysis in industry, government or nonprofit enterprises. This also might be chosen by a student choosing a dual emphasis, such as accounting and finance or accounting and information systems.

Required Courses and Semester Credit Hours

ACCT 3220	Corporate Financial Reporting 1	3
ACCT 3230	Corporate Financial Reporting 2	3
ACCT 3320	Cost Management	3
ACCT 3440	Income Taxation of Individuals	3
ACCT 4850	Senior Seminar - Accounting Ethics	3
Select one of the following: 3		
ACCT 4240	Advanced Financial Accounting	
ACCT 4250	Financial Statement Analysis	
ACCT 4330	Advanced Cost Management	
ACCT 4540	Accounting Information Systems	
ACCT 4620	Auditing and Assurance Services	
ACCT 4800	Accounting for Government and Nonprofit Organizations	
ACCT 4820	Topics in Business (ACCT & FNCE for Energy Ind.)	

ACCT 4827	Integrated Reporting for Socially Responsible Strategies	
Total Credit Hours		18

CPA Licensure Requirements

All states require 150 total credit hours for licensure as a CPA and most require additional accounting and other business courses. Most states do not require a master's degree. Thus, one route to licensure is obtain a BS with an accounting emphasis, but take additional course work to meet the specific requirements of the state(s) where the student expects to practice. Students can generally find the current requirements for a particular state at the website for that state's board of accountancy, or at NASBA.org (<http://nasba.org>). It is possible that one or more courses that a state requires for CPA certification is not available to undergraduates at CU Boulder; in such a case the student could take those courses either in person or online at a different institution.

Finance Emphasis

Students with a finance emphasis must take 18 credit hours of finance courses beyond the BCOR sequence. Students interested in a finance area of emphasis should plan to take FNCE 2010 during their sophomore year.

Required Courses and Semester Credit Hours

FNCE 2010	Fundamentals of Financial Analysis (prereqs., BCOR 1025, BCOR 2002 and MATH 1112)	3
FNCE 3010	Corporate Finance (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104 and FNCE 2010 minimum grade: C)	3
FNCE 3030	Investment and Portfolio Management (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104 and FNCE 2010 minimum grade: C)	3
ACCT 3220	Corporate Financial Reporting 1 (prereqs., BCOR 2001, BCOR 2002, BCOR 2003)	3
FNCE 4040	Derivative Securities (prereqs., FNCE 3010 and FNCE 3030)	3
FNCE 4850	Business Senior Seminar in Finance (prereqs., FNCE 3010 and FNCE 3030)	3
Total Credit Hours		18

The required courses represent a minimum requirement for competence in financial analysis and decision-making. Combinations of the upper division elective finance courses allow students to structure their learning in preparation for specific career paths.

FNCE 4000	Financial Institutions Management (prereqs., FNCE 3010, FNCE 3030)	3
FNCE 4050	Capital Investment Analysis (prereqs., FNCE 3010)	3
FNCE 4060	Special Topics in Finance (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104)	1-6
FNCE 4070	Financial Markets and Institutions (prereqs., FNCE 2010)	3
FNCE 4820	Topics in Finance (Experimental Course (prereqs., FNCE 2010)	3
FNCE 4820	Topics in Finance (Fixed Income Securities (prereqs., FNCE 3010, FNCE 3030)	3
FNCE 4826	Experimental Seminar: Corporate Governance (prereqs., FNCE 3010)	3
FNCE 4830	Seminar in Investment Banking (prereqs., admission is by application)	3

FNCE 4831	Seminar in Investment Management (prereqs., FNCE 3010, FNCE 3030)	3
APPM 4720	Open Topics in Applied Mathematics (prereqs., FNCE 3010, FNCE 3030)	3
ESBM 4570	Entrepreneurial Finance (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104)	3
INBU 4200	International Financial Management (prereqs., BASE 2101, BASE 2102, BASE 2103, BASE 2104)	3
REAL 4100	Real Estate Finance and Investment Analysis (prereqs., REAL 3000)	3

Investment Banking Track

In addition to the required courses, students interested in a career in investment banking should consider taking the following courses:

FNCE 4830	Seminar in Investment Banking	3
ACCT 3230	Corporate Financial Reporting 2	3
FNCE 4050	Capital Investment Analysis	3
Total Credit Hours		9

Investment Management Track

In addition to the required courses, students interested in a career in investment management should consider taking the following courses:

FNCE 4050	Capital Investment Analysis	3
FNCE 4831	Seminar in Investment Management	3
FNCE 4820	Topics in Finance	3
Total Credit Hours		9

Commercial Banking Track

In addition to the required courses, students interested in a career in commercial banking should consider taking the following courses:

FNCE 4000	Financial Institutions Management	3
FNCE 4820	Topics in Finance	3
FNCE 4070	Financial Markets and Institutions	3
Total Credit Hours		9

Corporate Finance/Consulting Track

In addition to the required courses, students interested in a career in corporation finance should consider taking the following courses:

ESBM 4570	Entrepreneurial Finance	3
ACCT 3230	Corporate Financial Reporting 2	3
FNCE 4050	Capital Investment Analysis	3
Total Credit Hours		9

Entrepreneurial Finance Track

In addition to the required courses, students interested in a career in entrepreneurial finance should consider taking the following courses:

ESBM 4570	Entrepreneurial Finance	3
INBU 4200	International Financial Management	3
FNCE 4826	Experimental Seminar: Corporate Governance	3
Total Credit Hours		9

Personal Financial Planning Track (PFP)

Program includes six courses, with two required courses, FNCE 4040 and FNCE 4850 waived, see below.

FNCE 2820	Introduction to Personal Financial Planning	3
ACCT 3440	Income Taxation of Individuals	3
FNCE 3040	Insurance, Risk Management and Retirement Planning (note: replaces FNCE 4040)	3
FNCE 3060	Estate Planning	3
FNCE 4840	Personal Financial Plan Development Capstone (note: replaces FNCE 4850)	3
Total Credit Hours		15

Management & Entrepreneurship Emphasis

Management & entrepreneurship students must choose one of the following tracks: information management, leadership, operations, strategy and entrepreneurship, or talent management.

Information Management Track

There are three required courses in the information management track. IM students inclined toward careers in technical information systems are encouraged to take programming courses as non-business electives (such as CSCI 1300 or ATLS 3519).

Required Courses and Semester Credit Hours

Required Courses		
MGMT 3030	Critical Leadership Skills	3
MGMT 3200	Business Analytics	3
MGMT 4850	Senior Seminar in Management	3
Elective Courses		
Select three of the following:		9
MGMT 3210	Business Application Programming	
MGMT 4205	Business Data Management	
MGMT 4220	Business Technologies	
MGMT 4230	Design of Usable Business Systems	
MGMT 4140	Project Management	
Total Credit Hours		18

Leadership Track

Required Courses		
MGMT 3030	Critical Leadership Skills	3
MGMT 4040	Individual, Team, and Organizational Development	3
Elective Courses		
Select three of the following: ¹		9
CESR 4000 & CESR 4001	Leadership Challenges I: Exercises in Moral Courage and Leadership Challenges II: Exercises in Moral Courage	
MGMT/CESR 4828	Experimental Seminar: Corporate Boards in Action	
INBU 3300	International Business and Management	
MGMT 3010	Negotiation and Conflict Management	
Required Senior Capstone Course		
MGMT 4850	Senior Seminar in Management	3
Total Credit Hours		18

¹ Additional management (MGMT) courses may be taken & applied to business electives.

Operations Management Track

There are three required courses in the operations management track. Students focusing on operations are also encouraged to take MGMT 4150.

Required Courses and Semester Credit Hours

Required Courses		
MGMT 3100	Operations Management	3
MGMT 4110	Supply Chain Management	3
Elective Courses		
Select three of the following:		6
MGMT 4120	Managing Business Processes	
MGMT 4130	Sustainable Operations	
MGMT 4140	Project Management	
MGMT 4150	International Operations Management (only one can apply to the OPS area)	
	or INBU 415 International Operations in Hong Kong	
MGMT 4820	Topics in Business	
Required Senior Capstone Course		
MGMT 4850	Senior Seminar in Management	3
Total Credit Hours		15

Strategy & Entrepreneurship Track

Required Courses and Semester Credit Hours

Required Courses		
ESBM 3700	Entrepreneurial Environments	3
ESBM 4830	Entrepreneurship Business Planning and Preparation	3
Elective Courses		
Select three of the following: ¹		9
CESR/MGMT 4828	Experimental Seminar: Corporate Boards in Action	
ESBM 4570	Entrepreneurial Finance	
INBU 3300	International Business and Management	
MGMT 3030	Critical Leadership Skills	
MGMT 4020	Hiring and Retaining Critical Human Resources	
MGMT 4030	Managing Employee Reward Systems	
MGMT 4040	Individual, Team, and Organizational Development	
Required Senior Capstone Course		
MGMT 4850	Senior Seminar in Management	3
Total Credit Hours		18

¹ Additional entrepreneurship (ESBM), management (MGMT) and other courses may be taken as business electives.

Talent Management Track

The talent management track provides students with the knowledge and skills necessary to earn certification in human resources from the Society of Human Resources, the principal professional society in the field. Graduates are qualified to act as human resource generalists in small, medium and large companies; specialists in organizations with focused human resource units; or well-rounded general managers in any organization.

There are three required courses in the HR management track. Students focusing on talent management are also encouraged to take INBU 3300.

Required Courses and Semester Credit Hours**Required Courses**

MGMT 3030	Critical Leadership Skills	3
MGMT 4040	Individual, Team, and Organizational Development	3

Elective Courses

Select three of the following: 9

MGMT 3010	Negotiation and Conflict Management	
MGMT 4010	Redefining the Employee-Employer Relationship	
MGMT 4020	Hiring and Retaining Critical Human Resources	
MGMT 4030	Managing Employee Reward Systems	

Required Senior Capstone Course

MGMT 4850	Senior Seminar in Management	3
-----------	------------------------------	---

Total Credit Hours 18

Marketing Emphasis

Students with a marketing emphasis must take 18 credit hours of marketing courses beyond BCOR 2001 or BCOR 2400. Students pursuing a marketing emphasis will need three semesters to complete the required course work after taking BCOR 2001 or BCOR 2400.

Required Courses and Semester Credit Hours

MKTG 3250	Buyer Behavior (prereq., BCOR 2001 or BCOR 2400)	3
MKTG 3350	Marketing Research and Analytics (prereq., BCOR 2001 or BCOR 2400)	3
MKTG 4250	Product Strategy (prereqs., MKTG 3250 and MKTG 3350)	3
MKTG 4300	Pricing and Channels of Distribution (prereqs., MKTG 3250 and MKTG 3350)	3
MKTG 4550	Advertising and Promotion Management (prereqs., MKTG 3250 and MKTG 3350)	3
MKTG 4850	Senior Seminar in Marketing (prereqs., any two of MKTG 4250, MKTG 4300 and MKTG 4550, with the remaining one of these courses taken as a corequisite)	3

Total Credit Hours 18

Business - Minor

In 2013 the Leeds School of Business launched a 12-credit business minor so that all CU Boulder students could gain business fundamentals, increasing their immediate impact as new hires. The business minor is now the largest minor on campus, attracting students from more than 60 majors across the university.

To learn more, visit the Leeds School of Business (<http://www.colorado.edu/leeds/minor-business>) website.

Requirements**Admission Requirements**

The admissions process consists of an online application and a one-page resume.

To be eligible for admission, students must have a minimum of 12 completed CU credit hours, a 2.0 GPA, be in good academic standing and have earned at least a C- in a preapproved statistics or calculus course. Students currently enrolled in a preapproved statistics or calculus course may apply and be conditionally admitted pending final course grade.

Fees

Students accepted into the business minor must pay a \$500 per course fee, or \$2000 for the 4-course/12-credit-hour program.

Course Requirements

In 2013, the Leeds School of Business launched a 12-credit-hour business minor so that all CU Boulder students could gain business fundamentals, increasing their immediate impact as new hires.

The program takes a minimum of three semesters to complete; it is recommended that students apply before their junior year, but no later than the first semester of their junior year.

Required Courses and Semester Credit Hours**Required Courses**

BUSM 2001	Principles of Marketing and Management	3
BUSM 2002	Financial Accounting and Finance	3
BUSM 4001	Professional Business Plan Development	3

Electives

Select one of the following: 3

BUSM 3001	Managing Innovation in Organizations	
BUSM 3002	Business and Financial Analytics	
BUSM 3003	New Venture Creation: Intro to Entrepreneurship	
BUSM 3004	Global Business for Business Minors	

Total Credit Hours 12

While not required, student may complete multiple tracks for increased breadth of application.

Students participate in a business competition followed by a celebratory graduation where competition winners are recognized by Leeds and the local business community.

Business minor courses are available during fall and spring semesters only, with the global business track being the exception. Our global business track occurs abroad during Maymester and is available to a select few.

Entrepreneurial Studies - Certificate

Whether working for a large global corporation or a small start-up venture, graduates will be valued for their ability to innovate, lead change, recognize emerging markets and launch new products. The entrepreneurial studies program is designed to develop an individual's abilities to create, discover and exploit opportunities in start-up ventures or existing organizations.

The entrepreneurial studies program at the Leeds School of Business is internationally recognized for the quality of its instruction and the capabilities of our students. Within the Leeds School, the Deming Center for Entrepreneurship has served as a rich resource for students with interests in entrepreneurship—coordinating the academic curriculum, providing help with internship and job placement, creating links with the business community and sponsoring networking opportunities and many special events.

The curriculum focuses on experiential learning. Courses are designed to give students hands-on experiences that develop the ability to act on opportunities. Students may begin the study of entrepreneurship in their junior year.

Requirements

A certificate in entrepreneurial studies is granted to students who fulfill the following requirements:

1. complete the three courses listed below with at least a 3.00 GPA;
2. complete an entrepreneurship internship with a start-up company who's been in business for 5 years or less and has less than 200 employees and complete a 2-3 page write-up about it;
3. participate in entrepreneurship-related extracurricular activities and provide a short write-up on their experiences; and
4. pass a written exam in entrepreneurship at the conclusion of their studies.

Required Courses and Semester Credit Hours

ESBM 3700	Entrepreneurial Environments	3
ESBM 4570	Entrepreneurial Finance	3
ESBM 4830	Entrepreneurship Business Planning and Preparation	3

NOTE: Students seeking internships should complete ESBM 3700.

For more information, visit the Leeds School's Deming Center for Entrepreneurship (<http://www.colorado.edu/business/deming>) webpage.

Global Business - Certificate

The globalization of the marketplace has created a need for managers who can function effectively in the international business environment. Despite this movement toward globalization, there remain significant environmental differences (cultural, economic and political) between countries and/or regions. Managers in an international business must be sensitive to these differences and also must adopt the appropriate policies and strategies for dealing with them.

To address these issues, the Leeds School of Business offers an area of application in international business consisting of 9 credit hours. Students completing additional requirements may earn a certificate in international business. The certificate program builds on the students' understanding of the functional areas of business and provides them with an appreciation of the international environment. It also supplies them with a framework for developing policies and strategies appropriate for the global marketplace.

Requirements

Required Courses and Semester Credit Hours

Select one of the following:	3
INBU 3300 International Business and Management	
INBU 4200 International Financial Management	
Global Seminar: London International Finance	
Select one of the following:	3
MGMT 4150 International Operations Management	
Global Seminar: International Operations in Hong Kong	
Select one of the following:	3
INBU 3450 International Marketing	
Global Seminar: Marketing in the Global Environment	
Total Credit Hours	9

In addition to the three INBU courses, the certificate program requires the completion of the following requirements:

- six credit hours of additional international course work, such as international business electives not on the required list above, or courses in economics, geography, political science, history or language. Courses must be selected from an approved list maintained by the Leeds Undergraduate Advising Office.
- a significant international experience, which may be satisfied in a number of ways including participation in a study abroad program, an international academic internship, service work in an international location or an internship with an organization focused on global business and economics. Students should check with the Leeds Undergraduate Advising Office to verify that their global experience will qualify to meet this requirement.
- Students must apply online to receive the global business certificate.

Operations and Information Management - Certificate

Advances in business knowledge and technology have radically changed business systems and processes—for example, how organizations buy and sell goods and services, integrate their supply chain and logistic systems and reach or retain customers. As a result, critical to today's businesses is the ability to get the right information to the right people at the right time, so that both strategic and operational decisions are made properly and quickly. To help students develop this ability, the Leeds School of Business offers the OPIM certificate.

Requirements

Students who are not in the OM or IM track in the Management and Entrepreneurship Division can take any three courses listed in the course description section below. Students majoring in the OM track can take any three IM track courses, while students majoring in the IM track can take any three OM track courses.

To complete the OPIM certificate requirements, all students must also complete a faculty-supervised OPIM research project (MGMT 4900) or faculty-supervised OPIM internship (MGMT 4910).

In addition, students are required to maintain an overall GPA of 3.00 or higher for the selected courses and receive a letter grade of B- or higher in each of the three courses. Successful completion of the certificate program will appear on the student's transcript.

The following illustrates some of the courses that students not majoring in IM or OM might want to take.

Accounting Students

MGMT 4140	Project Management	3
MGMT 4210	Systems Thinking	3
ACCT 4540	Accounting Information Systems (Prereq: ACCT 3220)	3
or ACCT 5540	Accounting Information Systems	

Finance Students

MGMT 3200	Business Analytics	3
MGMT 3210	Business Application Programming	3
MGMT 4210	Systems Thinking	3

Management (HR Track) Students

MGMT 3200	Business Analytics	3
MGMT 4120	Managing Business Processes	3
MGMT 4210	Systems Thinking	3

Marketing Students

MGMT 3200	Business Analytics	3
MGMT 4110	Supply Chain Management	3
MGMT 4210	Systems Thinking	3

Real Estate - Certificate

The real estate area of application is designed to provide students with exposure to the concepts, tools and techniques necessary for entry-level positions. A career in real estate provides an opportunity for individuals to operate as entrepreneurs whether they are brokers, appraisers, developers, property managers, consultants or investors. An integrated process is followed in the three application area courses to prepare students for real estate careers.

Requirements

The real estate certificate program allows students to broaden their knowledge and understanding of real estate through a multidisciplinary focus, whereby courses are taken outside of the Leeds School of Business. See the CU Real Estate Center (<http://realestate.colorado.edu>) website for a list of approved electives and internships.

Required Courses and Semester Credit Hours

Required Courses

REAL 3000	Principles of Real Estate	3
REAL 4000	Real Estate Law	3
REAL 4100	Real Estate Finance and Investment Analysis	3

Electives

Courses in Program in Environmental Design OR from the construction management area in the Department of Civil, Environmental and Architectural Engineering of the College of Engineering and Applied Science	6
Academic internship in real estate practice or related area	3
Total Credit Hours	18

Socially Responsible Enterprise - Certificate

CU Boulder's Leeds School of Business is one of the few undergraduate business schools in the nation that emphasizes socially responsible conduct in business throughout its curriculum. The Center for Education on Social Responsibility (CESR) helps undergraduate students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by an increasingly competitive, globally connected business world.

CESR offers the certificate in socially responsible enterprise (SRE) to business students who seek to distinguish themselves in the field of socially responsible business, whether their unique interests lie in environmental sustainability, social entrepreneurship, corporate ethics or values-driven leadership. Students who complete the certificate will develop the practical knowledge and marketable experiences that will

distinguish them as business professionals who strive to make a positive social impact.

Requirements

Interested students need to register with the CESR office and must graduate with a 3.00 GPA.

Required Courses and Semester Credit Hours

General Courses

Select two of the following in the areas of philosophy, environmental studies, political science, economics, communication, civil engineering or sociology (check prerequisites before enrolling): 6

ECON 3545	Environmental Economics	
ECON 4292	Migration, Immigrant Adaptation, and Development	
ECON 4626	The Economics of Inequality and Discrimination	
ECON 4774	Economic Reform in Developing Countries	
ECON 4784	Economic Development	
ENVD 4361	Special Topics: Social Factors in Design	
ENVS 3070	Energy and the Environment	
ENVS 4027	Inequality, Democracy, and the Environment	
ENVS 4100	Special Topics in Environmental Studies	
FNCE 4832	Microfinance	
GEOG 1962	Geographies of Global Change	
GEOG 3682	Geography of International Development	
GEOG 4742	Topics in Environment and Society	
PHIL 2200	Major Social Theories	
PHIL 2140	Environmental Justice	
PSCI 4012	Global Development	
PSYC 2456		
SOCY 2011	Contemporary Social Issues and Human Values	
WRTG 3040	Writing on Business and Society (Section with CSR Emphasis)	

Business Coursework

Select three of the following:	9	
CESR 4000 & CESR 4001	Leadership Challenges I: Exercises in Moral Courage and Leadership Challenges II: Exercises in Moral Courage	
CESR 4005	Business Solutions for the Developing World: Learning through Service	
Global Seminar: Social Entrepreneurship and Innovation (Cocle, Panama)		
CESR/MGMT 4130	Sustainable Operations	
CESR/MGMT 4440	Privacy in the Age of Social Media	
CESR/ACCT 4827	Integrated Reporting for Socially Responsible Strategies	
CESR/MGMT 4828	Experimental Seminar: Corporate Boards in Action	
MGMT 4140	Project Management (must be pre-approved for SRE course work credit)	

MGMT 3030 Critical Leadership Skills

Total Credit Hours

15

NOTE: These courses are in addition to BCOR, the capstone course, as well as any other prerequisites. See course descriptions for prerequisite details.

Experiential Learning

The experiential learning component is meant to give SRE students the freedom to gain practical experience working in a field of social responsibility of particular interest to them. Students must meet with the SRE Certificate Advisor to gain preapproval of their proposed experiential learning experience. Upon completion of the experience, students and their supervisor will complete a brief form (provided by the SRE Certificate Advisor) that documents the student's service. Experiences will be evaluated for application of business skills and social impact.

Experiential learning options include:

- **Intern for an organization (for-profit or nonprofit).** Acceptable internships will be characterized by substantive work that adds value to the organization and contributes to the student's learning. The SRE Certificate Advisor has information on organizations seeking business assistance from Leeds students. Students may also contact Career Connections for information about internships.
- **Service learning through the Study Abroad Office.** The Office of International Education offers study abroad programs focused on service learning. These programs generally span one academic quarter or semester in the host country, during which the student will participate in, and gain credit for, study in a school of higher education. Outside of the classroom, students will work with local institutions and non-governmental organizations on service projects that promote community development. Service learning programs that are approved through the Office of International Education are automatically approved for experiential learning credit for this certificate.
- **Related course work.** Select courses may count toward the experiential learning requirement or toward the business course work requirement, but not toward both. For course descriptions and program details, visit the CESR Learning (<http://www.colorado.edu/business/CESR/cesr-learning>) webpage.

CESR 4005	Business Solutions for the Developing World: Learning through Service	3
-----------	---	---

MGMT 4140	Project Management (with advisor approval)	3
-----------	--	---

Advisor-approved independent study in a related topic; or an advisor-approved internship of an appropriate nature

Personal Reflection and Statement of Purpose

Upon completion of all certificate requirements, students will reflect on their learning and draft a short reflection paper and a statement of purpose, setting out the values that will guide their conduct and their careers. They will then meet with the CESR faculty advisors to discuss their SRE certificate experience. This final requirement is to remind students why they elected to pursue the certificate and how it will continue to have an impact on their lives after college. Students are encouraged to truly live the statement of purpose.

Cross-College Programs

[ADD OVERVIEW]

Native American and Indigenous Studies - Certificate

The Center for Native American and Indigenous Studies (CNAIS) offers both a graduate and undergraduate certificate in Native American and Indigenous Studies (NAIS). The certificate program offers a unique interdisciplinary curriculum for CU Boulder students interested in studying the history, cultures, languages, arts, policies and rights of Indigenous peoples from the Americas and around the globe. CNAIS encourages interdisciplinary and intersectional study that develops students' awareness of the diversity and complexity of Indigenous peoples, cultures and nations. It also encourages students to link their academic study of Indigeneity with community outreach and service learning.

A founding principle of CNAIS is to value and expand upon the connections and interdisciplinary nature of Native American & Indigenous scholarly work. The issues facing Native American and Indigenous peoples today require expertise from multiple disciplines and draw from scholarship in a number of fields, including art & art history, anthropology, ethnic studies, environmental studies, gender studies, geography, history, law, linguistics, literature and religion. CU Boulder has recruited an unprecedented number of faculty working in a wide array of areas related to NAIS, and already enjoys a high national and international reputation in several of these areas. In pursuing the NAIS certificate, students join a vibrant and growing community at CU Boulder, including graduate and undergraduate students and more than 40 professors.

For more information, visit the Center for Native American and Indigenous Studies (<http://www.colorado.edu/cnaeis>) website.

Requirements

Students pursuing this certificate must complete an undergraduate degree in any of the academic areas offered by CU Boulder, and complete a total of 18 credits of acceptable course work from the certificate program list.

At least 6 of the 12 credit hours of elective courses must be upper division, and students may choose to apply up to 3 credits of independent study/internship toward the credit requirement. Any independent study must be undertaken with a CNAIS core faculty member, and may be done when a student wishes to pursue an individualized course of study not normally offered in the NAIS course offers. Independent study is typically reserved for third- and fourth-year students.

Only nine credits from the student's major or minor may be counted toward the certificate, students must maintain a C average (2.0) or better, and students must earn a grade of C or better in all courses that count toward the certificate.

Required Courses and Semester Credit Hours

Required Courses

ETHN 1023	Introduction to Native American and Indigenous Studies	3
ENGL 4717	Native American and Indigenous Studies Capstone Seminar	3

Electives ¹		12

Public Health - Certificate

As the world becomes more interconnected, our communities and populations face increasingly complex health challenges emerging through the interaction of individual vulnerability and behavior, cultural and social factors, environmental and geographic influences as well as economic and political dynamics. Addressing these public health challenges requires innovative approaches arising from multiple disciplines.

The undergraduate certificate in public health encourages students to extend the breadth of their undergraduate education to include elements of public health. Students are encouraged to take courses from a variety of participating departments to develop an appreciation of the interdisciplinary nature of public health.

Requirements

The certificate requirements include a minimum of 18 credit hours (not to exceed 24) of course work, including at least 9 upper-division credit hours.

Required Courses and Credit Hours

SOCY 3052	Medical Sociology
SOCY 4052	Social Inequalities in Health
Total Credit Hours	12-13

Global Public Health is a track of the Public Health Certificate designed specifically for IAFS students. Students interested in pursuing the Global Public Health track of the Public Health Certificate can find additional information on the International Affairs Program (<http://www.colorado.edu/iafs/academics/certificates/global-public-health>) website.

Space - Minor

The space minor is part of the larger campus-wide Grand Challenge initiative and is open to all CU Boulder students regardless of major. The space minor is designed to provide all students enrolled in the minor with an over-arching background in all aspects of space through the required Pathway to Space (<https://www.colorado.edu/p1dfb9ae7d4d>) course. Course topics include:

- Space science and exploration
- Human spaceflight and life sciences
- Aeronautics and near space
- Launch and spacecraft systems
- Climate and environment
- Space business, policy and politics
- Space arts, media and history

Visit the Grand Challenge Space Minor (<http://www.colorado.edu/spaceminor>) website for more information.

Requirements

Completion of 15 credit hours (5 courses) is required for the minor, distributed as follows:

- ASEN 1969 – Pathway to Space (3 credit hours)

- Four approved elective courses (12 credit hours)

Requirements for the minor are met by completing the required ASEN 1969 Pathway to Space course and four approved electives from the list maintained on the Space Minor web site (<http://www.colorado.edu/spaceminor/space-minor-course-list>). NOTE: There may be restrictions on how many and/or which specific courses/credits can apply towards this minor as well as towards the student's degree program.

Three of the four elective courses must be completed at the CU Boulder campus. One elective course may be transferred from another institution with approval. A grade point average (GPA) of 2.000 or better is required for all courses used to satisfy the requirements for this minor. Each individual course that is counted towards these degree requirements must be passed with a D- or better. Note, however, that a C- or better is required in all prerequisite courses to move on to a subsequent course.

Education

The School of Education offers programs that prepare individuals to lead in a wide array of educational settings, including teaching in K–12 classrooms, conducting educational research, developing evidence-informed policy and designing innovative learning environments both in schools and in community-based settings.

Undergraduate students interested in K–6 Elementary Education may either pursue a Bachelor of Arts in Elementary Education (new for fall 2017) or complete the teacher licensure requirements while earning a bachelor's degree from another college on campus. The school also provides teacher licensure programs that ensure rigorous content preparation and extensive clinical experience in local partner schools. Teacher licensure programs are available at the undergraduate, post-baccalaureate and master's level. The School of Education collaborates with the College of Arts & Sciences, College of Engineering and Applied Science, and the College of Music to design degree programs for undergraduates that combine a major in Arts & Sciences, Engineering and Applied Science, or Music with courses and field experiences in education that lead to a Colorado initial license.

The school offers a range of experiences and courses for undergraduates interested in educational issues, serving in the Peace Corps and/or working in community-based settings. Through the CU Engage program, the school offers undergraduates opportunities to participate in community-based research and programs. Undergraduate students pursuing a major in the College of Arts and Sciences with a bachelor's degree in either Social Sciences or Arts and Humanities can apply for a dual degree with a Bachelor of Arts in Leadership and Community Engagement. This option is available to undergraduate students pursuing a Bachelor of Arts in Anthropology, Political Science, Sociology, Ethnic Studies, Women and Gender Studies, Geography, English, Jewish Studies, Philosophy, Spanish & Portuguese, and Asian Studies. In addition, the school offers two undergraduate minors, one in education and one in leadership.

Graduate programs in the school serve practicing teachers as well as those seeking to improve education through rigorous research and evidence-informed policy and practice. The school's doctoral program is a cohort-based, full-time program that prepares individuals to lead in universities, research or policy institutes, state or government agencies and innovative non-profit organizations.

Mission

The School of Education is dedicated to inspiring and preparing educators, researchers and policy makers who understand and further the democratic foundations of education, who are committed to social justice, who seek to bring about greater equity and access in education and who will draw upon evidence-informed policy and practice to improve the quality of education in both Colorado and the world.

Accreditation

The licensure programs, both undergraduate and graduate, are fully accredited by the North Central Association of Colleges and Schools, the Council for Accreditation of Educator Preparation, the Colorado Department of Education and the Colorado Commission on Higher Education.

Policies & Requirements

Admission Requirements

Students may apply to one of the teacher education programs if the following requirements have been fulfilled:

1. **GPA:** Elementary and Secondary students must have and maintain a 2.75 (on a 4.00 scale) cumulative GPA, 2.75 at CU-Boulder, 2.75 in their subject area (secondary teacher fields) and 2.75 in education. K-12 Music Education students must have and maintain a 3.00 overall and in their subject area. Students applying to Master's Plus (MA+) programs must have and maintain a 3.00 cumulative GPA.
2. **Prior Degrees:** Students applying to Post-Baccalaureate and Master's Plus (MA+) programs must have a bachelor's degree from an accredited institution.
3. **Youth Experience:** Students must provide written verification of 25 clock hours of satisfactory experiences with elementary, middle/junior high or senior high school-aged youth (appropriate to the desired program) in the past five years. Forms for this purpose are available in the Office of Student Services, Education 151, or online at the School of Education (<http://www.colorado.edu/education/prospective-students>) website. Undergraduate students at CU Boulder meet this requirement through school experiences in EDUC 2020 Step 1: Inquiry Approaches to Teaching and EDUC 2050 Step into Humanities Teaching courses.
4. **Basic Skills:** All teacher education students must demonstrate basic skills competence in mathematics and literacy. This may be done through acceptable grades in appropriate college course work, or by acceptable standardized test scores. Contact the Office of Student Services in Education 151 for more information.
5. **Letters of Recommendation.**
6. **Personal Statement.**
7. **Background Check and Fee:** The School of Education and our partner districts require students working in schools to undergo background checks at least once per year. The costs and process for these background checks are changing due to new state requirements. Check with the Office of Student Services for the most updated information.
8. **Application Fee:** The appropriate application fee should be submitted with application materials. Fees vary by program.

Individuals interested in completing the teacher education program at the University of Colorado Boulder should request application materials from the Office of Student Services, Education 151 or online at the School

of Education (<http://www.colorado.edu/education>) website. Students currently enrolled in a degree program at Boulder will need to complete an application.

Individuals who have completed a baccalaureate degree at an accredited institution and are not currently enrolled at the university must complete a program application, a university application and submit official transcripts from all previous colleges directly to the University's Office of Admissions (<http://www.colorado.edu/admissions>).

Academic Excellence Scholarships and Awards

A limited number of scholarships and awards are available for second- and third-year students within the School of Education to support study at the master's and undergraduate levels. Each year a combination of teaching assistantships (TAs), research assistantships (RAs), other forms of graduate assistantships (GAs) and fellowships are available in the School of Education to support full-time doctoral study. The strongest doctoral applicants are nominated by the school for fellowships awarded by the Graduate School. Candidates apply in the spring semester for scholarships and awards for the following school year. Application procedures and deadlines are publicized on the School of Education website.

Students are eligible to apply for university-wide financial assistance through the Office of Financial Aid. State and federal programs are available for loan cancellation or forgiveness for Colorado teachers of certain subjects or who teach in designated schools serving students from low-income families. Information about these opportunities may be found at www.colorado.edu/education (<http://www.colorado.edu/education>).

Academic Standards

Upon enrollment in the Teacher Education Program, a student who fails to maintain a 2.75 GPA (3.00 for graduate students) will be placed on probation or may be suspended. Readmission is subject to program requirements in effect at the time of reapplication. The same conditions apply to students in other colleges and schools who have been admitted to the teacher education program.

Advising

Students are responsible for obtaining and reading the undergraduate student handbook (<http://www.colorado.edu/education/current-students/forms-policies>). Off-campus students may obtain advising materials online (<http://www.colorado.edu/education/prospective-students>) or by calling 303-492-6555.

At CU Boulder, degree requirements vary among the schools and colleges. Students seeking a degree at the University of Colorado should consult, as soon as possible, with an advisor in the college or school from which they expect to graduate and with the School of Education advisor (edadvise@colorado.edu).

Students are encouraged to become familiar with the teacher education requirements by comparing their own transcripts to the published advising materials. Students can then talk with an advisor before applying to the program or they may wait until after their applications are processed. Students seeking teacher licensure in French, German, Japanese, Latin, Russian, Spanish or music education should see the

designated advisor for that content area in addition to the School of Education advisor.

Advising may also be obtained through email (edadvise@colorado.edu). When requesting email advising, please make questions as specific as possible.

Programs of Special Interest CU Engage

The mission of CU Engage is to leverage the resources of the Boulder campus to work collaboratively with community groups to address complex public challenges. CU Engage, which is part of the School of Education, develops and sustains equity-oriented partnerships, organizes opportunities for students to learn alongside community members and supports participatory research methods focused on the public good.

CU Engage provides support for two focal activities: 1) community-based learning pathways and 2) community-based research. These activities are linked through the formation of community partnerships that support both learning and research. Community-based learning pathways—including INVST Community Studies, Public Achievement, CU Dialogues and the Leadership Studies Minor—prioritize experience (learning by doing), reciprocity (work with rather than for communities) and intellectual rigor rooted in academic disciplines. Community-based research refers to projects that bring people together with varied training and expertise, working collectively in mutually beneficial ways, on research studies that matter to the public.

Equity & Diversity Initiatives

As an important part of its mission, the CU Boulder School of Education has a strong commitment to democracy, diversity and social justice. Given that education is a cornerstone of individuals' life chances and opportunities as well as an informed and engaged public, the unwavering evidence of inequality in American education demands the sustained and dedicated attention of researchers, educators and policymakers.

Education Diversity Scholars Program

The Education Diversity Scholars (EDS) program works with the University of Colorado's LEAD Alliance Neighborhood to provide students of color and first-generation college students with social and academic support, as well as advising on financial support and career preparation. The goal of the program is to offer students a welcoming environment and a strong support network in order to help them excel in their chosen fields. By participating in the Education Diversity Scholars neighborhood, students have access to the personal contact and support of a small community while still being able to take advantage of the benefits of a large university.

INVST Community Studies

Consistent with their vision for a just and sustainable world, the INVST Community Studies program develops engaged citizens and leaders who work for the benefit of humanity and the environment. INVST Community Studies innovatively operates as a community-based organization, practicing service learning and participatory education. In order to fulfill this mission, the program offers:

- a comprehensive two-year Community Leadership Program (CLP) focused on developing community leaders who engage in compassionate action as a lifetime commitment;

- Community Studies electives that foster civic responsibility and leadership potential;
- a Public Achievement Program where CU undergrads coach local primary and secondary school students in the design and implementation of public action projects; and
- a Youth Council for Public Policy that empowers young people to use the democratic process as a tool for positive social change.

The INVST CLP offers a unique and transformational educational experience to all majors. Each year the INVST CLP admits a small group of students who are committed to making a positive difference with their lives. The two-year program is designed to cultivate deep understanding about issues facing people and the planet and to provide skills and experiences for community leaders to fulfill progressive visions for change. Specifically, students participate in theory classes, skills-training classes and two summer service-learning experiences, one domestic and one international. In addition, students intern six hours each week with community-based organizations during their first academic year, and collectively design, implement and evaluate community leadership projects during their second academic year. Students learn and serve together in a small group environment throughout the program. Applications for the INVST CLP are due every year in February.

Course code for this program is INVS.

STEM Initiatives

CU is a leader in Science Technology Engineering and Math (STEM) education. The School of Education, in collaboration with the College of Arts & Sciences, developed and is a national leader in the Learning Assistant model. Additionally, CU Boulder was one of the original 13 institutions selected to replicate the U Teach Model which started at the University of Texas, Austin. Both the LA and CU Teach programs help us prepare outstanding secondary math and science teachers.

The Learning Assistant (LA) Model at the University of Colorado-Boulder uses the transformation of large-enrollment science courses as a mechanism for achieving four goals:

- to recruit and prepare talented science majors for careers in teaching;
- to engage science faculty in the recruitment and preparation of future teachers;
- to improve the quality of science education for all undergraduates; and
- to transform departmental cultures to value research-based teaching for ourselves and for our students

The transformation of large-enrollment courses involves creating environments in which students can interact with one another, engage in collaborative problem solving and articulate and defend their ideas. To accomplish this, undergraduate LAs are hired to facilitate small-group interaction in our large-enrollment courses.

CU Teach is a four-year degree/licensure program that allows students to complete a rigorous education in a mathematics, science or engineering major and fulfill requirements for a Colorado initial teaching license in secondary mathematics or secondary science. It is a unique collaborative program between the College of Arts and Sciences, the College of Engineering and Applied Science, and the School of Education. CU Teach students get immediate hands-on K-12 teaching experience by enrolling in the first course in the program, Step 1: Inquiry Approaches to Teaching (EDUC 2020). Students can enroll in Step 1 as early as their freshman year at CU. In addition to taking courses from research faculty

in the School of Education, College of Arts and Sciences and College of Engineering and Applied Science, CU Teach students get support from Mentor Teachers (current K-12 teachers) and Master Teachers (CU faculty who are veteran classroom teachers). The student organization hosts activities and events that are social as well as service-oriented, and that help students develop career networks.

Programs of Study

Undergraduate students interested in K–6 Elementary Education may either pursue a Bachelor of Arts in Elementary Education (new for fall 2017) or complete the teacher licensure requirements while earning a bachelor's degree from another college on campus. The school also provides teacher licensure programs that ensure rigorous content preparation and extensive clinical experience in local partner schools. Teacher licensure programs are available at the undergraduate, post-baccalaureate and master's level. The School of Education collaborates with the College of Arts & Sciences, the College of Engineering and Applied Science, and the College of Music to design degree programs for undergraduates that combine a major in Arts & Sciences, Engineering and Applied Science, or Music with courses and field experiences in education that lead to a Colorado initial license.

The school offers a range of experiences and courses for undergraduates interested in educational issues, serving in the Peace Corps and/or working in community-based settings. Through CU Engage, the school offers undergraduates opportunities to participate in community-based research and programs. Undergraduate students pursuing a major in the College of Arts and Sciences with a bachelor's degree can apply for a dual degree with a Bachelor of Arts in Leadership and Community Engagement. This option is available to undergraduate students pursuing a Bachelor of Arts in Anthropology, Asian Studies, English, Ethnic Studies, Geography, Jewish Studies, Philosophy, Political Science, Sociology, Spanish & Portuguese, and Women and Gender Studies. In addition, the school offers two undergraduate minors, one in Education and one in Leadership Studies.

Preparing the Teachers of Tomorrow

The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators, who desire to invest and succeed in school. This involves noticing children/youth, building relationships with them, valuing their perspectives and attending to their thinking, curiosities and capabilities.
- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion fuel both learning and teaching.
- Teachers must design equitable learning environments in which all children are engaged in robust and consequential learning.
- Teacher's instruction and student learning is always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matters and must be analyzed. Our language and action constructs or constrains opportunities for children to build meaningful, positive and sustained relationships to learning and one another.

Course code for this program is EDUC.

Colorado Teacher Quality Standards

Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below.

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach.
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers reflect on their practice.
5. Teachers demonstrate leadership.
6. Teachers take responsibility for student academic growth.

Bachelor's Degrees

- Elementary Education - Bachelor of Arts (BA) (p. 584)
- Leadership and Community Engagement - Bachelor of Arts (BA) (p. 589)

Minors

- Education (p. 595)
- Leadership Studies (p. 596)

Teacher Licensure Program

- Post-Baccalaureate (p. 600)
- Undergraduate Nondegree (p. 608)
- Master's Degree Plus (p. 1177) Secondary (p. 1177) Teacher Licensure Program (MA+) (p. 1177)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

Education

EDUC 1500 (1) Success Strategies in Higher Education

Introduces students to learning theories and a range of college success strategies to deepen their engagement with their academic work. Students will learn metacognitive practices to identify the values and aims driving their academic ambitions and craft their most successful path through their undergraduate experience.

Repeatable: Repeatable for up to 2.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 1580 (3) Energy and Interactions

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1580

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Departmental Category: General Education

EDUC 2020 (1) Step 1: Inquiry Approaches to Teaching

Invites science, mathematics and engineering students to explore teaching as a career by providing first-hand experiences teaching science/math lessons in local elementary classrooms. Introduces theory and practice necessary to design and deliver excellent instruction. Master teachers provide ongoing support and feedback. Meets weekly on CU campus (1.5 hours/week) and involves five visits to an elementary school.

Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, AS Open Option majors, College of Engineering majors, Education minors, EDEL, EDMU, EDEN, EDMA, EDSC, EDSS, EDFR, EDGR, EDLT, EDRO or EDSP majors only.

Additional Information: Departmental Category: General Education

EDUC 2025 (1) Step 1: Inquiry Approach to Teaching in Informal Settings

Invites science, mathematics and engineering students to explore teaching and learning in informal K-12 environments. Introduces theory and practice necessary to design and deliver excellent instruction. Meets weekly on CU campus (1.5 hours/week) and requires participants to work a minimum of five hours with K-12 students at STEM-related special events such as science fairs, after school programs, and science camps.

Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, Arts and Sciences Open Option majors, College of Engineering majors, or Education minors only.

Additional Information: Departmental Category: General Education

EDUC 2030 (1-2) Step 2: Inquiry-Based Lesson Design

Builds on EDUC 2020 and further develops lesson design and inquiry-based teaching practice. Offers opportunity to explore teaching career and learn about middle school culture. Master teacher provides support as students design and deliver lessons in middle school classrooms. Emphasizes assessment of student learning. Meets weekly on CU campus (1.5 hours/week) and involves five visits to a local middle school.

Requisites: Prereq course of EDUC 2030 (min grade C-). Rstr to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, AS Open Option majors, ENGR majors, EDUC minors, EDEL, EDMU, EDEN, EDMA, EDSC, EDSS, EDFR, EDGR, EDLT, EDU or EDSP.

Additional Information: Departmental Category: General Education

EDUC 2050 (1) Step into Humanities Teaching

Invites students in humanities and social sciences to explore teaching as a career by providing first-hand experiences working with children. Introduces theory and practice for the design of text-based, equity-focused instruction. Students receive support and feedback from experienced educators. Meets weekly on CU campus (1.25 hours/week). Requires additional time at a practicum site.

Additional Information: Departmental Category: General Education

EDUC 2125 (3) History of American Public Education

Provides an overview of the history of American education by exploring major reforms efforts from the common school movement to "Nation at Risk." Examines what intellectuals were thinking about public schools and what ordinary people experienced in them. Assesses how differences in race/ethnicity, class, gender, and power shaped public schools.

Additional Information: Arts Sci Core Curr: United States Context
Departmental Category: General Education

EDUC 2150 (3) Education in Film

Provides opportunities to view and analyze how facets of education are represented (or misrepresented) in film. Considers narratives constructed about education and how those stories fuel popular conceptions of and assumptions about students, teachers, and schools. Examines how issues of race, class, and gender are embedded in how films represent schools, teachers, students, and communities.

Additional Information: Departmental Category: General Education

EDUC 2400 (3) Cultural Diversity and Awareness

Enhances students' self-awareness in a variety of educational and cultural settings. Investigates self within a cultural context, inviting students to engage more deeply with their cultural assumptions and lenses, as well as the cultural practices and beliefs of other distinct groups. Explores themes relating to diversity through works of fiction, cultural contexts, contemplative practices, poetry, music and experiential activities.

Additional Information: Departmental Category: General Education

EDUC 2625 (3) Teaching English as a Second Language

Exposes students to strategies used to teach English as a second or foreign language. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English as a second language. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

Additional Information: Departmental Category: General Education

EDUC 2800 (1-3) Special Topics

Designed to meet needs of students with topics of interest.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: General Education

EDUC 2910 (1-3) Field Practicum 1

Offers supervised campus and off-campus experiences tied to course work in the INVST program. See also EDUC 2920.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 2919 (3) Renewing Democracy in Communities and Schools

Examines curriculum theory, K-12 reform, and the concepts of citizenship, democracy, power, and diversity through classroom discussion and participation in a school-based Public Achievement program. Students will dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions.

Equivalent - Duplicate Degree Credit Not Granted: INVS 2919

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: General Education

EDUC 2920 (1-3) Field Practicum 2

Offers supervised campus and off-campus experiences tied to course work in the INVST program. See also EDUC 2910.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 3013 (3) School and Society

Introduces students - both future teachers and those simply interested in education - to pressing issues surrounding education within the United States. The course reveals the complex relationship between schools and the larger society of which they are a part. Examines issues of diversity and equity from different disciplinary lenses, including history, philosophy, sociology and anthropology.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Core Curr: Contemporary Societies
Departmental Category: General Education

EDUC 3570 (3) Learning With Technology In and Out of School

Examines ways digital media are changing the way young people learn, play, make friends, and participate in civic life. Studies widely implemented digital tools intended to support literary, math, and science learning of children ages 4-18. Involves brief internship (5 hours outside class) and design projects that integrate these tools to transform in either a classroom or after-school program.

Additional Information: Departmental Category: General Education

EDUC 3621 (1-3) Art for the Elementary Teacher

Introduces elementary education students to art education. Introduces many visual art techniques, art media and processes used in art education. Includes hands-on studio art experiences in a format that supports subjects such as literature, writing, music and social studies. Emphasizes the role of art education and materials in supporting the artistic development and visual literacy of children. Department enforced prerequisite: completion of 30 hours of course work.

Requisites: Restricted to School of Education (EDUC) undergraduates only

Additional Information: Departmental Category: Elementary Education

EDUC 4015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace corps and Volunteer Agencies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5015

Additional Information: Departmental Category: General Education

EDUC 4023 (3) Differentiating Instruction in Diverse Secondary Classrooms

Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices and programmatic interventions that support student learning. Includes practicum.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4351

Requisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4050 (3) Knowing and Learning in Mathematics and Science

Explores current theories of learning in mathematics and science at the secondary level. This course focuses on learners' opportunities to learn mathematics and science in a classroom context from the perspective of different theoretical orientations. Students examine their own assumptions about learning, and critically examine the needs of a diverse student population in the classroom.

Requisites: Restricted to AMEN, ASTR, BCHM, CHEM, EBIO, GEOL, IPHY, MATH, MCDB, PHYS, GEEN, NRSC, Arts and Sciences Open Option majors, College of Engineering majors, or Education minors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4060 (3) Classroom Interactions

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts. Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5060

Requisites: Restricted to School of Education (EDUC), Mathematics-Secondary Education (EDMA) or Science-Secondary Education (EDSC) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4112 (3) Educational Psychology and Adolescent Development

Analyzes fundamental concepts from psychology and the learning sciences to understand how educators can support youth development in and out of school. Includes service learning requirement.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4114

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Secondary Education

EDUC 4125 (3) Secondary World Language Methods

Presents and discusses issues in secondary school curriculum, instruction, and classroom management as they play out in world language classroom. Examines, analyzes, and evaluates a variety of teaching strategies, their effectiveness for students, and teacher dispositions to facilitate learning. Includes in-school experiences.

Requisites: Restricted to EDEN, EDFR, EDGR, EDIT, EDJP, EDLT, EDMA, EDMU, EDSC, EDRU, EDSP, EDSS or MMED majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4135 (3) Story and Memoir

Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of "how one remembers one's own life." Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5135

Additional Information: Departmental Category: Secondary Education

EDUC 4161 (1-3) Children's Literature

Addresses reading and evaluation of books, children's, interests, authors and illustrators, folk literature, multicultural literature, modern fanciful tales, and trends.

Additional Information: Departmental Category: General Education

EDUC 4222 (3) Language Study for Educators

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5222

Additional Information: Departmental Category: General Education

EDUC 4232 (3) Language and Literacy across the Curriculum

Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5235

Requisites: Restricted to undergraduate Science-Secondary Education (EDSC) or Mathematics-Secondary Education (EDMA) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4295 (4) Reading and Literacy in the Secondary Classroom

Examines ways in which adolescents develop literacy through reading, writing, speaking, viewing, and listening. Students learn to plan and organize literacy instruction based on ongoing assessment, to draw on and develop learner's linguistic skills related to reading, to support learner's reading comprehension skills, and to support their learning through oral language development.

Requisites: Requires a corequisite course of EDUC 4342 or EDUC 5345. Restricted to undergraduate English - Secondary Education (EDEN) or English - Secondary Education (EDSS) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4311 (3) Children's Literature and Literacy Engagement in Elementary Schools

Focuses on teaching children's literature in elementary schools & youth organizations. Participants will understand theoretical and developmental processes associated with literary learning, methods for teaching literature in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.

Requisites: Restricted to Elementary Education (EDEL) or Education (EDUC-MIN) students only.

Additional Information: Departmental Category: Elementary Education

EDUC 4312 (3) Perspectives on Science

Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5315

Additional Information: Departmental Category: General Education

EDUC 4318 (3) The Nature of "English Language Arts

Considers historical and ongoing controversies concerning the nature of "English" as an academic field of study and of "English Language arts" as a school subject. Integrates understandings of subject-matter specialization, of approaches to teaching this contested subject, and of the diverse learners that teachers seek to prepare for 21st century literacies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5318

Additional Information: Departmental Category: General Education

EDUC 4320 (3) Reading Instruction for Elementary Schools

Participants will engage theories and processes of literacy learning, reading development, and equity-oriented teaching. Students will learn, develop, and enact instructional strategies and lessons to support all students' successful participation in a range of print and multimodal literacy practices embedded in reading instruction in elementary classrooms.

Requisites: Requires corequisite course of EDUC 4321. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4321 (3) Writing Instruction for Elementary Schools

Participants will engage theories and processes of literacy learning, writing development, and equity-oriented teaching. Students will learn, develop, and enact instructional strategies and lessons to support all students' successful participation in a range of multimodal literacy practices embedded in writing instruction in elementary classrooms.

Requisites: Requires corequisite course of EDUC 4320. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4331 (3) Elementary Social Studies Methods

Prepares teacher education candidates for teaching social studies in a social justice and equity context. Participants will understand theoretical and developmental processes associated with social studies learning, culturally responsive teaching pedagogy in social studies, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards.

Requisites: Requires corequisite courses of EDUC 5215 and EDUC 4341. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4341 (3) Elementary Reading Assessment and Instruction

Builds on knowledge and teaching practices introduced in EDUC 4320. Addresses five critical components of reading. Refines understanding of research-based practices for diagnostic assessments and intervention, and teaching strategies for elementary age learners. Prepares candidates to deliver a comprehensive reading curriculum in the elementary grades.

Requisites: Requires corequisite courses of EDUC 4331 and EDUC 5215. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4342 (3) Writing in Humanities Classrooms

Fosters understandings of diverse students' writing processes and the development of a repertoire of research-based teaching practices. Emphasizes writing as a tool for both developing and communicating understandings across a range of settings.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5345

Requisites: Requires a corequisite course of EDUC 4295 or EDUC 5295. Restricted to English - Secondary Education (EDEN) or English - Secondary Education (EDSS) majors only.

Additional Information: Departmental Category: Secondary Education

EDUC 4351 (3) Differentiating Instruction in Diverse Elementary Classrooms

Focuses on differentiating and individualizing instruction for elementary school students including culturally, linguistically and ability diverse students. Includes theoretical and practical orientations to planning instruction and assessment as well as providing information regarding teachers' and families' legal rights and responsibilities. Includes hands-on experiences in elementary school settings.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4023

Requisites: Requires corequisite course of EDUC 5205. Restricted to Music (EDMU) Education majors or Elementary (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 4411 (3-4) Educational Psychology for Elementary Schools

Integrates theories and ideas from elementary school child development, educational psychology and the learning sciences. Explores theories of learning and child development and considers implications for teaching, student engagement and the design of equitable and effective learning environments. Students are required to attend a practicum off-site for this class.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: General Education

EDUC 4425 (3) Introduction to Bilingual/Multicultural Education

Provides a comprehensive survey of bilingual-multicultural education programs for language minority students. Includes an overview of the history and legislation related to bilingual education and English as a second language. Presents various models, philosophies, and theoretical underpinnings of bilingual education and ESL.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5425

Additional Information: Departmental Category: General Education

EDUC 4460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 5460 and PHYS 4460 and PHYS 5460

Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 4513 (2) Education and Practice

Meets during student teaching assignment. Includes topics of concern to teachers, such as classroom organization and management, lesson planning, assessment, preparation of edTPA, etc.

Requisites: Requires corequisite course of EDUC 4691 or 4712 or 4722. Restricted to EDEL, EDEN, EDFR, EDGR, EDJP, EDLT, EDMA, EDRU, EDSC, EDSP or EDSS majors only.

Additional Information: Departmental Category: General Teacher Education

EDUC 4610 (2-3) Math and Science Education

Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science and argumentation in mathematics and science. Department enforced prerequisite: students admitted to the Learning Assistant program.

Additional Information: Departmental Category: General Education

EDUC 4691 (10) Student Teaching: Elementary School 1

Kindergarten through sixth grades. Department enforced prerequisite: completion of all education and content-specific arts and sciences requirements, and passing required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to Elementary Education (EDEL-LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4712 (10) Student Teaching: Secondary School

Student teacher apprentices in a middle/junior or senior high school. Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science or social studies. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to EDEN, EDJP, EDLT, EDMA, EDRU, EDSC or EDSS (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4716 (3) Basic Statistical Methods

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.

Additional Information: Departmental Category: General Education

EDUC 4722 (5) Student Teaching: Secondary School 2

Student teacher apprentices in a middle/junior high or senior high school. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires corequisite course of EDUC 4513. Restricted to EDFR, EDGR or EDSP (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4732 (4-12) Student Teaching K-12

Required experience for music students seeking education at both elementary and secondary levels. Department enforced prerequisites: completed all education and content-specific music courses and passed required licensure exam.

Requisites: Requires corequisite course of MUSC 4193. Restricted to EDMU (LICU or LICG) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

EDUC 4742 (9) Student Teaching: Secondary for Engineers

Student teacher apprentices in a middle/junior or senior high school.

Must be admitted to a secondary teacher education program in English, Japanese, Latin, math, Russian, science or social studies. Department enforced prerequisites: completed all education and content-specific arts and sciences courses and passed required licensure exam.

Requisites: Requires a prerequisite course of EDUC 4513 or EDUC 4050 (minimum grade C-). Restricted to EDMA or EDSC majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Secondary Education

EDUC 4800 (1-9) Special Topics

Designed to meet needs of students with topics of pertinent interest.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4810 (1-9) Special Topics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6811 and MCDB 4811 and MCDB 5811

Additional Information: Departmental Category: Graduate Education

EDUC 4822 (3) Teaching and Learning Chemistry

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology, and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

Requisites: Requires prerequisite course of CHEM 1133 or CHEM 2100 or CHEM 1371 (minimum grade C-).

Additional Information: Departmental Category: General Education

EDUC 4831 (3) Advanced Peer Education

Second semester of an academic year's training for students interested in peer counseling. Expand upon what you learned in ARSC 2274. Focus on presentations, leadership, and group facilitation. Basic group leadership, facilitation theory, and technique taught. Co-create and co-lead your own small groups/presentations for other CU students. Offered only spring semesters.

Requisites: Requires prerequisite course of ARSC 2274 (minimum grade D-).

Additional Information: Departmental Category: General Education

EDUC 4833 (3) Teaching and Learning Earth Systems

Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). Focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions, and developing effective discourse within and outside the classroom.

Requisites: Requires prerequisite course of ATOC 1060 or ENV5 1000 or GEOL 1010 or GEOL 1020 or GEOL 1060 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Teacher Education

EDUC 4840 (1-4) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Education

EDUC 4910 (3) Peer Counseling Practicum

Controlled enrollment. Credit given for peer counseling activities. Students are selected to participate in this class and act as peer counselors or TAs for the peer counseling training. Repeatable up to 9 total credit hours.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: General Education

EDUC 4912 (1) Practicum in Teacher Education

Provides in-school practicum experience.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Teacher Education

INVST Community Studies**INVS 1000 (4) Responding to Social and Environmental Problems Through Service Learning**

By integrating theory with required community service, students explore how problems are shaped by cultural values and how alternative value paradigms affect the definition of problems in areas such as education and the environment. Students examine different approaches to solving problems and begin to envision new possibilities.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: Ideals and Values

Departmental Category: Invst Community Studies

INVS 1513 (3) Civic Engagement: Using the Electoral Process as a Tool for Social Change

Designed to educate and inspire civic engagement primarily in the area of electoral politics. Examines various explanations of why people participate in the electoral process and whom they choose to support. Develops the practical skills necessary to participate successfully in the electoral arena. Through a service component, the course provides experience working on a campaign and mobilizing others to participate in the electoral process.

Additional Information: Departmental Category: Invst Community Studies

INVS 1523 (3) Civic Engagement: Democracy as a Tool for Social Change

Educates and inspires students for civic engagement by exploring democratic values and the rights and responsibilities of citizenship. Develops theoretical knowledge and practical skills for participating in a diverse democratic society, especially at the state level, through analyzing legislative issues, making policy recommendations, and advocating for change.

Additional Information: GT Pathways: GT-SS3 -Soc Behav Sci:Hmn Behav, Cult, Soc Frame

Arts Sci Core Curr: United States Context

Departmental Category: Invst Community Studies

INVS 2005 (2) Puksta Scholars Practicum

Integrates critical reflection and community-based experiences for undergraduates in the Puksta Scholars Program. This two-semester course will focus on the development of knowledge, attitudes and skills to productively engage the public realm. Examines topics includes ethical leadership, frameworks for social action, project design and participatory action research.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

INVS 2919 (3) Renewing Democracy in Communities and Schools

Examines concepts of activism, citizenship, democracy, power, and diversity through classroom discussions and participation in a local K-12 school's Public Achievement project. Through community-based partnerships, students will develop leadership skills; dialogue with diverse groups of people; identify multiple perspectives around controversial issues; and learn to use research and writing to articulate public problems and advocate for their solutions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 2919

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Human Diversity

Departmental Category: Invst Community Studies

INVS 3000 (3-4) Innovative Approaches to Contemporary Issues through Service Learning

Explores creative approaches for solving complex social and environmental issues, with a focus on peace and population. Students analyze the root causes of issues in theoretical and historical contexts, and develop their understanding of effective and innovative approaches to change. This course has a requirement of community service.

Recommended: Requisite upper-division status.

Additional Information: Arts Sci Core Curr: Contemporary Societies

Departmental Category: Invst Community Studies

INVS 3041 (3) Self and Consciousness

Explores human development from a psychosocial perspective, focusing on the interplay between psychological patterns and social forms. Issues such as self-image and social consciousness are studied within the larger context of individual and collective forces leading to transformation.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 3041

Requisites: Requires prerequisite courses of SOCY 1001 and SOCY 3001 or SOCY 3011 (all minimum grade D-).

Additional Information: Departmental Category: Invst Community Studies

INVS 3100 (3-4) Multicultural Leadership: Theories, Principles and Practices

Focuses on leadership theories and skills necessary for effectiveness in multicultural settings. Students gain understanding of traditional and culturally diverse approaches to leadership and change through comparative analyses of Western and non-Western theories and practices. Community service required.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3201

Additional Information: Arts Sci Core Curr: Human Diversity
Departmental Category: Invst Community Studies

INVS 3302 (3) Facilitating Peaceful Community Change

Students gain knowledge and skills that enable them to become effective agents of community change. Focuses on understanding the processes of community building with a multicultural emphasis. Students are encouraged to apply their own life experiences and to examine themselves as potential change agents.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3302

Additional Information: Departmental Category: Invst Community Studies

INVS 3402 (3) Implementing Social and Environmental Change

Examines grassroots innovation as a means for creating comprehensive, solution-based strategies to address social and environmental problems. Students develop an understanding of the root causes of problems, identify how changes are initiated at the grassroots level, and learn the theory and practice of effective and responsible change efforts.

Additional Information: Departmental Category: Invst Community Studies

INVS 3931 (3) The Community Leadership Internship, Part 1

Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Required requisite, admission into INVST CLP.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Invst Community Studies

INVS 3932 (3) Community Leadership Internship, Part 2

Develops students' competencies as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community supervisor, students learn organizational leadership skills by serving as volunteer staff members at community-based organizations. Required requisite, membership in INVST CLP.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of INVS 3931 (minimum grade D-).

Additional Information: Departmental Category: Invst Community Studies

INVS 4302 (3) Critical Thinking in Development

Exposes students to current issues in the political economy of development. Subjects range from globalization, democratization and economic development. Specifically explores the international and domestic determinants of economic development with special reference to currency markets, foreign direct investment, trade, and democratization.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 4732

Requisites: Requires prerequisite courses of PSCI 2012 or IAFS 1000 and ECON 2010 and 2020 (all minimum grade D-).

Recommended: Prerequisite one upper-division PSCI course.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Departmental Category: Invst Community Studies

INVS 4402 (3) Nonviolent Social Movements

Explores theories of democracy and development in relation to movements for nonviolent social change. Focuses on means and ends, spirituality, leadership, decision-making, civil society, cooperative economics, ecology and decentralized powers.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Sociology (SOCY) or Political Science (PSCI) majors only.

Additional Information: Departmental Category: Invst Community Studies

INVS 4919 (1-2) Teaching Social Justice for Public Achievement

Participate as teaching assistants for the practicum course INVS 2919. Focusing on the issues of democratic education, diversity, social justice and social change, students learn how to foster undergraduates' skills as experiential educators.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of INVS 2919 (minimum grade B).

INVS 4931 (1-6) Community Leadership in Action, Part 1

Develops students' expertise as community leaders. Under the supervision of an instructor and a community advisor, students design a community-based project.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of INVS 3931 and INVS 3932 (all minimum grade D-).

Recommended: Prerequisite admission to INVST CLP.

Additional Information: Departmental Category: Invst Community Studies

INVS 4932 (1-6) Community Leadership in Action, Part 2

Develops students' expertise as community leaders working for a just and sustainable world. Under the supervision of an instructor and a community advisor, students learn organizational and leadership skills by designing, implementing and evaluating a community-based project. First-hand experience provides students with a deepened understanding of the complex issues facing humanity, and competence with solution-based strategies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of INVS 4931 (minimum grade D-).

Additional Information: Departmental Category: Invst Community Studies

INVS 4999 (1-4) Teaching Social Justice

Students participate in a service-learning practicum under the supervision of a Community Studies instructor. They explore teaching strategies for implementing concrete educational goals. Focusing on the issues of social justice and social change, they learn how to encourage higher levels of creativity and analysis among students.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Invst Community Studies

LEAD**LEAD 1000 (3) Becoming a Leader**

The foundation course will prepare students to exercise leadership in business, government and community organizations. Introduces leadership skills useful in a variety of settings including community and civic activities. Helps students to improve self awareness, understand multiple theories, recognize moral courage, build analytic and critical thinking skills and adapt leadership practices to different people and contexts.

Equivalent - Duplicate Degree Credit Not Granted: MGMT 3030

Additional Information: Departmental Category: CU Engage

LEAD 4000 (4) Leadership in Context and Emerging Challenges: A Capstone

Integrates leadership topics and experiences students pursued through the Leadership Studies Minor. Using advanced critical thinking skills, the seminar requires students to evidence their knowledge, competencies and skills related to leadership theory and practice through examining contemporary leadership challenges. Further, the seminar directs students to justify decision-making processes, demonstrating their ability to synthesize prior knowledge to effect desirable, ethical outcomes.

Requisites: Requires a prerequisite course of LEAD 1000 or LDSP 1000 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: CU Engage

Elementary Education - Bachelor of Arts (BA)**Elementary Education - Bachelor of Arts (BA)**

If you are interested in a rewarding career as an elementary teacher, the BA in Elementary Education with the endorsement in Culturally and Linguistically Diverse (CLD) Education provides an efficient and rigorous path. We prepare teachers who are committed to ensuring every student learns and excels.

You will gain experience through coursework and extensive, hands-on experience in the classroom. This degree offers a path towards teacher licensure plus the advanced CLD endorsement, which provides preparation and tools for working with diverse populations and English language learners, an area of high demand in education. Please note if you are interested in a degree in another area combined with licensure, visit our existing teacher licensure program (p. 598).

To learn more, contact our advisors at 303-492-6555 or edadvise@colorado.edu. To apply, visit the CU Boulder Admissions website (<http://www.colorado.edu/admissions>).

Elementary Core Requirements

Minimum Required Credit Hours

1. Quantitative Reasoning and Mathematical Skills	4
2. Natural Sciences: As indicated below	7
Biological Science: 3 credit hours	
Physical Science: 3 credit hours	
Lab: At least one credit hour of an associated lab. The lab may be either a biological or physical science.	
3. Written Communication: 3 credits must be upper-division	6
4. World Historical Context	3
5. US Historical Context	3
6. Literature and Arts	3
7. Cultural Geography	3
8. American Government	3
9. Ethics	3
10. Public Speaking	3
Total Credit Hours	38

1. Quantitative Reasoning and Mathematical Skills (4-6 credits)

MATH 1110 & MATH 1120	Mathematics for Elementary Educators 1 and Mathematics for Elementary Educators 2	6
MATH 1300	Calculus 1	5
MATH 1310	Calculus, Systems, and Modeling	5
APPM 1350	Calculus 1 for Engineers	4

2. Natural Science (7 credits)

The Natural Science requirement consists of three credit hours of a biological science, three credit hours of a physical science, and at least one credit hour of an associated lab. The lab may be either a biological or physical science.

Biological Science

Choose from:		
ANTH 2010	Introduction to Biological Anthropology 1	3
ANTH 3000	Primate Behavior	3
ANTH 3010	The Human Animal	3
EBIO 1030	Biology: A Human Approach 1	3
EBIO 1210	General Biology 1	3
EBIO 3180	Global Ecology	3
IPHY 2420	Nutrition for Health and Performance	3
IPHY 3660	Dynamics of Motor Learning	3
MCDB 1030	Introduction to Molecular Biology	3
MCDB 1150	Introduction to Cellular and Molecular Biology	3
MCDB 3150	Biology of the Cancer Cell	3

Physical Science

Choose from:		
AREN 2110	Thermodynamics	3
ASTR 1000	The Solar System	3
ASTR 1010	Introductory Astronomy 1	4
ASTR 1030	Accelerated Introductory Astronomy 1	4

Leadership and Community Engagement - Bachelor of Arts (BA)

The Bachelor of Arts in Leadership and Community Engagement prepares ethical, skilled leaders committed to addressing complex public challenges in our nation and across the world. This major prepares you for careers in community or non-profit organizations, higher education, international development, urban planning, social work, government, and more. It is the only degree program of its kind in Colorado and part of a small number of emerging community engagement degrees nationwide.

This major requires students to get a dual degree, by completing a second degree in the College of Arts and Sciences with a major in either a Social Sciences or Arts and Humanities field. For Social Sciences, these options are: Anthropology, Political Science, Sociology, Ethnic Studies, Women and Gender Studies, and Geography. For Arts and Humanities, these options are: English, Jewish Studies, Philosophy, Spanish & Portuguese, Asian Studies. Through this program, you will develop a deep conceptual understanding of theories of leadership, public policy, and social change. Additionally, you'll use hands-on work in the community to create a capstone project that addresses a local leadership challenge. The coursework builds on the work of CU Engage: Center for Community-Based Learning and Research (<http://www.colorado.edu/cuengage>).

1. Second Major Requirements

This major requires students to get a dual degree by completing a second degree in the College of Arts and Sciences with a major in either a Social Sciences or Arts and Humanities field.

For Social Sciences, these options are:

- Anthropology (p. 144)
- Ethnic Studies (p. 291)
- Geography (p. 322)
- Political Science (p. 457)
- Sociology (p. 487)
- Women and Gender Studies (p. 534)

For Arts and Humanities, these options are:

- Asian Studies (p. 196)
- English (p. 272)
- Jewish Studies (p. 404)
- Philosophy (p. 438)

- Spanish & Portuguese (p. 496)

2. School of Education Requirements

EDUC 2020	Step 1: Inquiry Approaches to Teaching	1
EDUC 2050	Step into Humanities Teaching	1
EDUC 3013	School and Society (Meets Arts and Science Core requirement for Human Diversity or Contemporary Societies.)	3
Please note: Students will choose between INVS 2989 Dialogue Across Difference in spring of their first year or INVS 2919 Renewing Democracy in fall of their second year.		3
INVS 2919	Renewing Democracy in Communities and Schools	3
Or		
INVS 2989 Dialogue Across Difference		
LEAD 1000	Becoming a Leader	3
COMM 1300	Public Speaking (Meets Arts and Science Core requirement for Ideas & Values.)	3
PHIL 1100	Ethics (Meets Arts and Science Core requirement for Ideas & Values.)	3

Total Credit Hours 17

3. Leadership and Community Engagement Requirements

Theoretical Foundations (3 courses, 9 credits)

EDUC 2XXX: Theories of Social Change (new course to be developed)	3
INVS 3XXX: Multicultural Leadership: Theories, Principles and Practices (new course to be developed)	3
INVS 4402 Nonviolent Social Movements	3

Applied Research (3 courses, 9 credits)

SOCY 2061 Introduction to Social Statistics	3
EDUC 3XXX Qualitative Research Methods (new course to be developed)	3
EDUC 4XXX: Community-Based Research Methods (new course to be developed)	3

Learning in Community Settings (2 courses, 7 credits)

EDUC 4411 Educational Psychology for Elementary Schools	4
EDUC 4112 Educational Psychology and Adolescent Development	3

Community Leadership Practice (2 courses, 3 credits and 2 credits, respectively)

LEAD 4XXX and LEAD 4XXX: Leadership Capstone 1 & 2 (2-semester sequence, new courses to be developed)	5
---	---

Requirements for dual degree, completion of Arts and Sciences Core (3 courses, 9 credits)

6 additional Natural Science credits beyond the 7 completed for the Liberal Arts Core. Within this 13 credits of Natural Science would need to be an approved two-course introductory sequence.

Choice of Upper-Division Literature and Arts course	3
---	---

Total Credit Hours 39

4. Liberal Arts Core Requirements

- Quantitative Reasoning and Mathematical Skills (3-6 credit hours)
- Written Communication (6 credit hours: 3 credit hours are upper-division)

- Historical Context (3 credit hours)
- US Context (3 credit hours)
- Literature & Arts (6 credit hours: minimum 3 credit hours upper-division)
- Natural Sciences (7 credit hours)
- Contemporary Societies (3 credit hours)
- Ideals and Values (3 credit hours)
- Human Diversity (3 credit hours)

Quantitative Reasoning and Mathematical Skills (3-5 credit Hours)

Choose from the courses listed below:

ECEN 1500	Sustainable Energy
ECON 1078	Mathematical Tools for Economists 1
ECON 1088	Mathematical Tools for Economists 2
MATH 1011	College Algebra
MATH 1012	Quantitative Reasoning and Mathematical Skills
MATH 1071	Finite Mathematics for Social Science and Business
MATH 1081	Calculus for Social Science and Business
MATH 1110	Mathematics for Elementary Educators 1
MATH 1130	Mathematics from the Visual Arts
MATH 1150	Precalculus Mathematics
MATH 1310	Calculus, Systems, and Modeling
MATH 2380	Mathematics for the Environment
PHYS 1010	Physics of Everyday Life 1
PHYS 1020	Physics of Everyday Life 2
PSCI 2075	Quantitative Research Methods
PSCI 3105	Designing Social Inquiry: An Introduction to Analyzing Political Phenomena

Any 3 credit hour courses of mathematics courses numbered MATH 1300 and above or applied mathematics courses numbered APPM 1350 and above

Written Communication (6 credit hours: 3 credit hours are upper-division)

Choose from the courses listed below:

Written Communication (6) (3 credit upper-division)

Lower-Division Courses

ARSC 1080	College Writing and Research
ARSC 1150	Writing in Arts and Sciences
CLAS 1020	Argument from Evidence: Critical Writing about the Ancient World
EBIO 1940	College Writing for Science Students
ENGL 1001	Freshman Writing Seminar
ENVS 1150	First-Year Writing in Energy, Environment and Sustainability
IPHY 1950	Introduction to Scientific Writing in Integrative Physiology
PHIL 1500	Reading, Writing and Reasoning
WRTG 1100	Extended First-Year Writing and Rhetoric
WRTG 1150	First-Year Writing and Rhetoric
WRTG 1250	Advanced First-Year Writing and Rhetoric

Upper Division Courses

ARSC 3100	Multicultural Perspective and Academic Discourse
CHIN/JPNS 3200	Adv Wrtg Topics on Chinese & Japanese Literature and Civilization
EBIO 3940	Written Communication in the Sciences
ENVS 3020	Advanced Writing in Environmental Studies
GEOL 3090	Developing Scientific Writing Skills
HIST 3020	Historical Thinking & Writing
HONR 3220	Advanced Honors Writing Workshop
ITAL 3025	Advanced Composition 2: Introduction to Literary Writing
IPHY 3700	Scientific Writing in Integrative Physiology
PHIL 3480	Critical Thinking/Writing in Philosophy
PHYS 3050	Writing in Physics: Problem-Solving and Rhetoric
RLST 3020	Advanced Writing in Religious Studies
SOCY 4010	Sociology Capstone Course: Professional Writing
SPAN 3010	Advanced Rhetoric and Composition
WGST 3800	Advanced Writing in Feminist Studies
WRTG 3007	Writing in the Visual Arts
WRTG 3020	Topics in Writing
WRTG 3030	Writing on Science and Society
WRTG 3035	Technical Communication and Design
WRTG 3040	Writing on Business and Society

Historical Context (3 credit hours)

Choose from the courses listed below:

Historical Context

ANTH 1180	Maritime People: Fishers and Seafarers
ANTH 1190	Origins of Ancient Civilizations
ANTH 2200	The Archaeology of Human History
ANTH/CLAS 3009	Modern Issues, Ancient Times

Education - Minor

The School of Education offers a 19-credit-hour Education Minor open to all undergraduates. The minor comprises 7 credit hours of core courses in education and 12 credit hours of elective courses. Courses are taught by faculty known for their teaching excellence. Courses and field experiences in the Education Minor introduce undergraduates to the complex interactions among the various political, cultural, social and historical dynamics that shape educational policy and practice. Through

the Education Minor students develop an understanding of learning and instructional practice in both formal and informal settings.

The Education Minor is designed to serve students with a passion for social justice who are interested in serving in the Peace Corps, leading after-school or community-based youth programs or working in education and youth policy. Individuals who plan to teach in a K–12 school setting should explore Teacher Licensure Programs.

Students in the Education Minor may also be affiliated with programs offered through CU Engage (p. 574).

Application Process and Minor Requirements

After completing one core Education Minor course, students need to contact the School of Education, Office of Student Services (303-492-6555/Room 151) and submit a completed application form.

A “B” average must be maintained in the Education Minor coursework (with C- as lowest acceptable course grade) in order to fulfill the requirements.

Core Courses (7 credit hours)

If a student decides to pursue licensure, these core courses can be transferred to an appropriate licensure program.

EDUC 3013	School and Society	3
Choose one of the following courses:		3
EDUC 4411	Educational Psychology for Elementary Schools	
EDUC 4112	Educational Psychology and Adolescent Development	
EDUC 4050	Knowing and Learning in Mathematics and Science	
Choose one of the following courses:		1
EDUC 2020	Step 1: Inquiry Approaches to Teaching	
EDUC 2050	Step into Humanities Teaching	
Total Credit Hours		7

Elective Options (12 credit hours)

Choose 4 courses from the options below:		12
EDUC 1580	Energy and Interactions	
EDUC 2125	History of American Public Education	
EDUC 2150	Education in Film	
EDUC 2625	Teaching English as a Second Language	
EDUC 3570	Learning With Technology In and Out of School	
INVS 2919	Renewing Democracy in Communities and Schools	
EDUC 4015	International / Comparative Education	
EDUC 4135	Story and Memoir	
EDUC 4222	Language Study for Educators	
EDUC 4311	Children’s Literature and Literacy Engagement in Elementary Schools	
EDUC 4425	Introduction to Bilingual/Multicultural Education	
Total Credit Hours		12

Please note: Students may also work with an advisor to identify additional EDUC courses to fulfill the minor elective requirements.

Leadership Studies - Minor

The Leadership Studies Minor is a valuable academic program available to all undergraduates regardless of major or college. The Leadership Studies Minor provides academically based leadership training that incorporates:

- Understanding the broad context of leadership theory
- Gaining a historical context of leadership
- Developing core leadership competencies
- Practicing and observing leadership experiences

By including the Leadership Studies Minor with a chosen field of study, undergraduates will develop essential skills that prepare them for future work in fields such as community organizing, business, city government, and social services. The minor offers an important credential that distinguishes students in the job exploration process.

The minor involves 16 credit hours of coursework that include a foundations course, three electives and a capstone course.

Additionally, the ePortfolio is a requirement for completion of the Leadership Studies Minor. The purpose of the ePortfolio is to exhibit, blend and demonstrate goals, accomplishments, and leadership experiences. Students are expected to fulfill this requirement by setting up a Google site using the ePortfolio template, and submitting academic and co-curricular reflection essays for each course taken towards the minor.

Students enrolled in the Presidents Leadership Class (PLC), INVST Community Studies, and all ROTC units should talk to their respective programs about how these programs can become integrated as pathways to the Leadership Studies Minor.

The possible pathways to the Leadership Studies Minor are explained in further detail below.

Leadership Minor: General Pathway Electives

Completion of the Leadership Studies Minor requires students to take 9 credits of elective coursework across three categories:

1. Leadership Foundations

Courses focus on:

- Moral and ethical reasoning
- Ability to critically evaluate behavior
- Improved decision-making of life choices

2. Leadership Application

Courses focus on:

- Enhanced ability to function in a team
- Building a team with diverse perspective
- Leading a team effectively to accomplish a shared goal

3. Leadership in Context

Courses focus on:

- Historical and situational analysis
- Critical evaluation of historical and contemporary leaders
- Ability to connect leadership behaviors to organizational outcomes

One elective from each category is required and of the three electives at least one course must be outside of a student's major. Students are responsible for understanding any pre-requisites or conditions for chosen electives. Ideally electives are taken sophomore through junior years and completed before entering the Capstone course.

Approved Electives by Category

Teacher Licensure Program

The School of Education offers course work leading to initial Colorado licensure to undergraduate, postbaccalaureate and master's degree students. Colorado requires public school teachers to be licensed by its state department of education. Students who successfully complete all School of Education requirements will be recommended for a Colorado

provisional (initial) teaching license, the license issued to all new teachers in Colorado. Licensure requirements vary from state to state and from teaching area to area. Students who are interested in teaching in other states should familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

Teacher education at the University of Colorado, while administered by the School of Education, is a university-wide function. Many academic departments provide course work that supports the teacher in training. Undergraduate students follow a prescribed set of Arts and Sciences core courses that meet state content preparation standards, complete a major and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and K–12 school placements.

Undergraduate (p. 608) and Post-Baccalaureate (p. 600) (Non-master's Degree) Teacher Licensure Programs

- Elementary (grades K–6) Education
- Secondary Education (grades 7–12) fields:
 - English Language Arts
 - Mathematics
 - Science
 - Social studies
 - World language (French, German, Japanese, Latin, Russian or Spanish)
- Music Education (grades K–12)

Secondary Master's Degree Plus Teacher Licensure Program (p. 1177) (MA+)

- Secondary Education (grades 7–12) fields:
 - English Language Arts
 - Mathematics
 - Science
 - Social studies

Program Mission and Commitments

The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators, who desire to invest and succeed in school. This involves noticing children/youth, building relationships with them, valuing their perspectives and attending to their thinking, curiosities and capabilities.
- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion fuel both learning and teaching.
- Teachers must design equitable learning environments in which all children are engaged in robust and consequential learning.
- Teacher's instruction and student learning is always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matters and must be analyzed. Our language and action constructs or constrains opportunities for children to build

meaningful, positive and sustained relationships to learning and one another.

Colorado Teacher Quality Standards

Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below.

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach.
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers reflect on their practice.
5. Teachers demonstrate leadership.
6. Teachers take responsibility for student academic growth.

Admission Requirements

Students who already hold a bachelor's degree and wish to pursue licensure should apply directly to the School of Education. Students desiring institutional recommendation for licensure must complete at least 30 credit hours of work at the University of Colorado and also must fulfill the same content area requirements as undergraduate students. The actual number of required credit hours will depend on courses already completed.

Students may apply to one of the teacher education programs if the following requirements have been fulfilled:

1. **GPA:** Elementary and Secondary students must have and maintain a 2.75 (on a 4.00 scale) cumulative GPA, 2.75 at CU Boulder, 2.75 in their subject area (Secondary teacher fields) and 2.75 in education. Music K-12 Education students must have and maintain a 3.00 overall and in their subject area. Students applying to Master's Plus (MA+) programs must have and maintain a 3.00 cumulative GPA.
2. **Prior Degrees:** Students applying to Post-Baccalaureate and Master's Plus (MA+) programs must have a bachelor's degree from an accredited institution.
3. **Youth Experience:** Students must provide written verification of 25 clock hours of satisfactory experiences with elementary, middle/junior high or senior high school-aged youth (appropriate to the desired program) in the past five years. Forms for this purpose are available in the Office of Student Services, Education 151, or online at the School of Education (<http://www.colorado.edu/education/prospective-students>) website. Undergraduate students at CU Boulder meet this requirement through school experiences in EDUC 2020 Step 1: Inquiry Approaches to Teaching or EDUC 2050 Step into Humanities Teaching courses.
4. **Basic Skills:** All teacher education students must demonstrate basic skills competence in mathematics and literacy. This may be done through acceptable grades in appropriate college course work, or by acceptable standardized test scores. Contact the Office of Student Services in Education 151 for more information.
5. **Letters of Recommendation.** Contact the Office of Student Services in Education 151 for more information.

6. **Personal Statement.** Contact the Office of Student Services in Education 151 for more information.
7. **Background Check and Fee:** The School of Education and our partner districts require students working in schools to undergo background checks at least once per year. The costs and process for these background checks are changing due to new state requirements. Check with the Office of Student Services for the most updated information.
8. **Application Fee:** The appropriate application fee should be submitted with application materials. Fees vary by program.

Individuals interested in completing the teacher education program at the University of Colorado Boulder should request application materials from the Office of Student Services, Education 151 or online at the School of Education (<http://www.colorado.edu/education>) website. Students currently enrolled in a degree program at Boulder will need to complete an application.

Individuals who have completed a baccalaureate degree at an accredited institution and are not currently enrolled at the university must complete a program application, a university application and submit official transcripts from all previous colleges directly to the University's Office of Admissions (<http://www.colorado.edu/admissions>).

Advising

Students are responsible for obtaining and reading the undergraduate student handbook (<http://www.colorado.edu/education/current-students/forms-policies>). Off-campus students may obtain advising materials online (<http://www.colorado.edu/education/prospective-students>) or by calling 303-492-6555.

At CU Boulder, degree requirements vary among the schools and colleges. Students seeking a degree at the University of Colorado should consult, as soon as possible, with an advisor in the college or school from which they expect to graduate and with the School of Education advisor (edadvise@colorado.edu).

Students are encouraged to become familiar with the teacher education requirements by comparing their own transcripts to the published advising materials. Students can then talk with an advisor before applying to the program or they may wait until after their applications are processed. Students seeking teacher licensure in French, German, Japanese, Latin, Russian, Spanish or music should see the designated advisor for that content area in addition to the School of Education advisor.

Advising may also be obtained through email (edadvise@colorado.edu). When requesting email advising, please make questions as specific as possible.

Post-Baccalaureate

The School of Education offers course work leading to initial Colorado licensure to undergraduate, post-baccalaureate and master's degree students. Colorado requires public school teachers to be licensed by its state department of education. Students who successfully complete all School of Education requirements will be recommended for a Colorado provisional (initial) teaching license, the license issued to all new teachers in Colorado. Licensure requirements vary from state to state and from teaching area to area. Students who are interested in teaching in

other states should familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

Teacher education at the University of Colorado, while administered by the School of Education, is a university-wide function. Many academic departments provide course work that supports the teacher in training. Undergraduate students follow a prescribed set of courses that meet state content preparation standards, complete a major and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and K–12 school placements.

Post-Baccalaureate (Non-master's Degree) Teacher Licensure Programs

- Elementary Education (K–6) (p. 600)
- Music Education (grades K–12) (p. 601)
- Secondary English Language Arts (7#12) (p. 601)
- Secondary Math (7-12) (p. 602)
- Secondary Science (7-12) (p. 603)
- Secondary Social Studies (7#12) (p. 604)
- World Languages (p. 605) (French, German, Japanese, Latin, Russian or Spanish)

Elementary Education (K-6) Teacher Licensure Program for Post-Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Courses and Minimum Required Credit Hours

Written Communication: Three (3) credit hours in a college-level composition or writing course.	3
Literature	3
Mathematics: College-level mathematics	6
Social Studies: Complete two (2) of the following options: US History or Political Science, World History, Economics	6
Physical Science	3
Biological Science	3
Cultural/Human Geography	3

Education Course Requirements

Courses and Minimum Required Credit Hours

EDUC 3013	School and Society (Meets Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.)	3
EDUC 4411	Educational Psychology for Elementary Schools (Includes up to two (2) hours per week of out-side service learning. May be taken at any time.)	4
EDUC 4311	Children's Literature and Literacy Engagement in Elementary Schools (May be taken at any time.)	3
EDUC 4320 & EDUC 4321	Reading Instruction for Elementary Schools and Writing Instruction for Elementary Schools (Three (3) credit hours each. Must be taken with EDUC 4321. Includes 4 hours per week of school based practicum.)	6

EDUC 5205 & EDUC 4351	Elementary Mathematics Theory and Methods and Differentiating Instruction in Diverse Elementary Classrooms (Three (3) credit hours each. Must be taken with EDUC 4351. EDUC 4320 & EDUC 4321 are prerequisites. Includes four (4) hours per week of school based practicum.)	6
EDUC 4331 & EDUC 4341 & EDUC 5215	Elementary Social Studies Methods and Elementary Reading Assessment and Instruction and Elementary Science Theory and Methods (Three (3) credit hours each. Must be taken with EDUC 4341 & 5215. EDUC 4351 & 5205 are prerequisites. Shares an all day, school based practicum.)	9
Total Credit Hours		31

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4691.
- EDUC 4691 Student Teaching: Elementary School 1 (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5001) or PLACE (test 01).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Music Education (K#12) Teacher Licensure Program for Post-Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Courses and Minimum Required Credit Hours

Written Communication: ENGL, ARSC, or WRTG from Arts and Sciences Core	3
Literature and the Arts: Choose from the Arts & Sciences Core area: Literature and the Arts (excluding music courses).	3
Math: Please see advisor for course options.	3
Social Science or Foreign Language (3rd semester or higher, excluding music courses).	3
Natural Sciences	3

Non-music Electives: Any courses offered at CU-Boulder outside of the College of Music, excluding any School of Education (EDUC) courses.

Education Course Requirements

Courses and Minimum Required Credit Hours

EDUC 3013	School and Society (Meets Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.)	3
EDUC 4112	Educational Psychology and Adolescent Development (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3
or EDUC 4411	Educational Psychology for Elementary Schools	
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum.)	3
Total Credit Hours		9

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for Student Teaching. No other courses may be taken during the Student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4732.
- EDUC 4732 Student Teaching K-12 (8 credits). Pass/fail only.
- MUSC 4193 Student Teaching Seminar (1 credit).
- MUSC 4133 Student Teaching Practicum (3 credits). Optional; check with the College of Music.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5113) or PLACE (test 29).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary English Language Arts (7# 12) Teacher Licensure Program for Post-Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Courses and Minimum Required Credit Hours

Mathematics: College-level mathematics.	3
Social Science	3
Natural Science	3

Advanced Writing: Critical or creative writing beyond the lower-division/introductory composition level.	3
History or Grammar of the English Language: Including or equivalent to EDUC 4222/EDUC 5222, CLAS 1010/LING 1010, LING 1500, or LING 2000.	3
Oral Communication: Includes speech, public speaking, or communication courses.	3
Visual Communication: Includes theatre, film, offerings from ATLAS, TAM or other digital media courses.	3
Literature: Must include a component of British literature as well as a multicultural/non-English literature.	9
Thirty (30) credit hours in English and English Language Arts related courses.	30
Acceptable coursework may be in Communication/Speech, Composition, Drama/Theatre, Humanities, Journalism, and/or Literature. (May include courses from the content requirements above.)	
Recent English coursework in the past five (5) years.	6

Education Course Requirements

Courses and Minimum Required Credit Hours

EDUC 3013	School and Society (Meets Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.)	3
EDUC 4112	Educational Psychology and Adolescent Development (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3
EDUC 5325	Teaching Literature in Middle and Secondary Schools (May be taken at any time. Fall only.)	3
EDUC 4295	Reading and Literacy in the Secondary Classroom (Includes up to five (5) hours per week of school-based practicum. Must be taken concurrently with EDUC 4342. Available once you are admitted into the School of Education. Fall Only.)	4
EDUC 4342	Writing in Humanities Classrooms (Includes up to four (4) hours per week of school-based practicum. Must be taken concurrently with EDUC 4295. Available once you are admitted into the School of Education. Fall Only.)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week in school-based practicum. EDUC 4295 and 4342 are prerequisites. Must be taken concurrently with EDUC 5365. Spring Only.)	3
EDUC 5365	Methods and Materials in Secondary English (Includes up to five (5) hours per week of school-based practicum. EDUC 4295 and 4342 are prerequisites. Must be taken concurrently with EDUC 4023. Spring Only.)	4
Total Credit Hours		23

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5038) or PLACE (test 07).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary Math (7-12) Teacher Licensure Program for Post Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Courses and Minimum Required Credit Hours

Writing: Three credit hours in writing or composition in English.	3
Humanities: Literature, Philosophy, Theater	3
Social Science	3
Natural Science	3
Calculus 1: Including or equivalent to APPM 1350, MATH 1300 or MATH 1310.	4
Calculus 2: Including or equivalent to APPM 1360 or MATH 2300.	4
Calculus 3: Including or equivalent to APPM 2350 or MATH 2400.	4
Linear Algebra: Including or equivalent to MATH 2135	3
Functions & Modeling/Analysis/Abstract Mathematics: One (1) course in functions and modeling, analysis, or topology.	3
Geometry: One course in modern geometry.	3
Probability & Statistics: One (1) course in probability theory and mathematical statistics.	3
Twenty-four (24) credit hours in Math or Applied Math coursework. Eighteen (18) of the required thirty hours above must be completed at the sophomore level or higher. (May include requirements above).	24
Recent Mathematics coursework in the past five (5) years. (May include requirements above and EDUC 5317)	6

Education Course Requirements

Courses and Minimum Required Credit Hours

EDUC 3013	School and Society (Meets Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.)	3
EDUC 2030	Step 2: Inquiry-Based Lesson Design	1
EDUC 4050	Knowing and Learning in Mathematics and Science (Includes up to two (2) hours per week of school-based practicum.)	3

EDUC 5317	Perspectives on Mathematics (May be taken at any time. Fall only.)	3
EDUC 4060	Classroom Interactions (Includes up to five (5) hours per week of school-based practicum. This course is a prerequisite for EDUC 5375.)	3
EDUC 4232	Language and Literacy across the Curriculum (May be taken at any time. Spring only.)	3
EDUC 5375	Problem-Based Math Instruction (Includes up to six (6) hours per week of school-based practicum. Should be taken concurrently with EDUC 4023 Differentiating Instruction in Diverse Secondary Classrooms. EDUC 4060 is a prerequisite.)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum. Should be taken concurrently with EDUC 5375 Problem-Based Instruction. EDUC 4060 is a prerequisite.)	3
Total Credit Hours		22

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary Science (7-12) Teacher Licensure Program for Post-Baccalaureate Studies

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Courses and Minimum Required Credit Hours

Written Communication: Three credit hours in college-level composition or writing.	3
Humanities: Literature, Philosophy, Theater	3
Social Science	3
Calculus I: Including or equivalent to APPM 1350, MATH 1300, or MATH 1310.	4

Two (2) Biology courses.
Two (2) Chemistry courses.
Two (2) Earth/Space Science courses.
Two (2) Physics courses.
<i>Complete three (3) out of four (4) content area lab courses:</i>
Biology Lab
Earth/Space Science Lab
Chemistry Lab
Physics Lab

Content Tracks

Biology

Complete twenty four (24) credit hours in Biology (may include courses from biology area above). Coursework must include the study of: General Biology, Matter & Energy in Living Systems, Ecology, Evolution, Genetics, Molecular Biology, Human Anatomy, Environmental Biology, Biotechnology

Chemistry

Complete twenty four (24) credit hours in Chemistry (may include courses from biology area above). Coursework must include the study of: Analytical, Inorganic, Organic, Physical.

Earth/Space Science

Complete twenty four (24) credit hours in Earth/Space Science (may include courses from biology area above). Coursework must include the study of: Environmental Science, Astronomy, Historical & Physical Geology, Meteorology, Oceanography, Geomorphology & Earth Systems.

Environmental Science

Complete twenty four (24) credit hours in Environmental Science (may include courses from biology area above). Coursework must include the study of: Ecology, Astronomy, seventeen (17) credit hours in Biology.

Physics

Complete twenty four (24) credit hours in Physics (may include courses from biology area above). Coursework must include the study of: Mathematics through Differential Equations, Astronomy, Atomic & Nuclear, Classical Mechanics, Electricity & Magnetism, Heat & Thermodynamics, Optics & Sound, Quantum Mechanics, Radiation & Radioactivity, Relativity, Waves.

Recent Science coursework in the past five (5) years. Six (6) credit hours.

EDUC 4125	Secondary World Language Methods (Includes up to five (5) hours per week of school-based practicum. Fall only.)	3

Total Credit Hours	12
--------------------	----

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5038) or PLACE (test 07).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary Latin (7#12) Teacher Licensure Program for Post-Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements**Courses and Minimum Required Credit Hours**

Mathematics: College-level mathematics.	3
Writing: Three (3) credit hours in writing or composition in English.	3
Social Science	3
Natural Science	3
Beginning Latin 1: Including or equivalent to LATN 1014.	4
Beginning Latin 2: Including or equivalent to LATN 1024.	4
Intermediate Latin 1: Including or equivalent to LATN 2114.	4
Intermediate Latin 2: Including or equivalent to LATN 2124.	3
Two additional Latin reading courses above the sophomore level. Three (3) credit hours each.	6
Latin Prose Composition: Including or equivalent to CLAS 4024 or CLAS 5024.	3
General Classics: Classical literature, culture and thought, ancient history, or classical art and archaeology.	6
Latin electives to make thirty (30) hours in CLAS courses beyond introductory language courses. 18 hours must be upper-division.	30

Education Course Requirements**Courses and Minimum Required Credit Hours**

EDUC 5005	Advanced Social Foundations of Education (May be taken at any time. Fall only.)	3
EDUC 4112	Educational Psychology and Adolescent Development (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3
or EDUC 6368	Adolescent Psychology and Development for Teachers	
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum.)	3
EDUC 4125	Secondary World Language Methods (Includes up to five (5) hours per week of school-based practicum. Fall Only.)	3
LATN 4824	Latin Teaching Methods: Open Topics	3
or LATN 5824	Latin Teaching Methods: Open Topics	
Total Credit Hours		15

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments**Licensure Exam: Prior to Student Teaching**

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5038) or PLACE (test 07).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary Spanish (7#12) Teacher Licensure Program for Post Baccalaureate Students

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements**Courses and Minimum Required Credit Hours**

Mathematics: College-level mathematics.	3
Social Science	3
Natural Science	3
Writing: Three (3) credit hours in writing or composition in English.	3
Advanced Spanish Grammar	3
Advanced Spanish Composition/Hispanic Linguistics	3
Advanced Spanish Conversation	3
Culture & Civilization: Peninsular or Spanish-American. More courses may be available. Please contact an education advisor at 303-492-6555	3
Literary Analysis in Spanish	3
Six credit hours in a related field: Portuguese, Chicano Studies, Linguistics, another language (must be upper division), Comparative Literature, Political Science, or History.	6
Upper Division Spanish Literature	3
Recent Spanish coursework in the past five (5) years.	6
Thirty (30) credit hours of upper-division Spanish coursework. May include courses from above.	30

Education Course Requirements**Courses and Minimum Required Credit Hours**

EDUC 3013	School and Society (Meets Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.)	3
EDUC 4112	Educational Psychology and Adolescent Development (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum. Should be taken concurrently with SPAN 4650.)	3
SPAN 4650	Methods of Teaching Spanish (Spring only.)	3

Total Credit Hours

12

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4722 Student Teaching: Secondary School 2 (2 credits). Must be taken with EDUC 4722 and SPAN 4660.
- EDUC 4712 Student Teaching: Secondary School (5 credits). Must be taken with EDUC 4513 and SPAN 4660.
- SPAN 4660 High School Spanish Teaching (6 credits). Must be taken with EDUC 4513 and EDUC 4722.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5038) or PLACE (test 07).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Undergraduate Nondegree

The School of Education offers course work leading to initial Colorado licensure to undergraduate, post-baccalaureate and master's degree students. Colorado requires public school teachers to be licensed by its state department of education. Students who successfully complete all School of Education requirements will be recommended for a Colorado provisional (initial) teaching license, the license issued to all new teachers in Colorado. Licensure requirements vary from state to state and from teaching area to area. Students who are interested in teaching in other states should familiarize themselves with the requirements of those states so they may plan an appropriate degree program.

Teacher education at the University of Colorado, while administered by the School of Education, is a university-wide function. Many academic departments provide course work that supports the teacher in training. Undergraduate students follow a prescribed set of courses that meet state content preparation standards, complete a major and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and K-12 school placements.

Undergraduate Nondegree Teacher Licensure Programs

- Elementary Education (K-6) (p. 608) (catalog.colorado.edu/undergraduate/colleges-schools/education/programs-study/teacher-licensure-program/undergraduate-nondegree/undergraduate/colleges-schools/education/programs-study/teacher-licensure-program/undergraduate-nondegree/#elementaryk6text)
- Music Education (K-12) (p. 609)
- Secondary English Language Arts (7#12) (p. 610)
- Secondary Math (7-12) (p. 611)
- Secondary Science (7-12) (p. 611)
- Secondary Social Studies (7#12) (p. 612)

- World Languages (p. 613) (French, German, Japanese, Latin, Russian or Spanish)

Elementary Education (K-6) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Foreign Language Requirement

All students are required to demonstrate third-level (intermediate) proficiency in a single foreign language. If not completed in high school, the student must pass an appropriate third-semester college course or an approved proficiency examination. Documentation is required.

Content Course Work Requirements

Written Communication	0
Choose a 3-credit college-level composition or writing course.	3
Mathematics	
Choose one of the following: ^{1,2}	5-6
MATH 1110 Mathematics for Elementary Educators 1 & MATH 1120 and Mathematics for Elementary Educators 2	
MATH 1300 Calculus 1	
World History	
Choose a 3-credit college-level course.	3
United States Context	3
Choose one course from the following:	3
CAMW 2001 The American West	
ECON 4524 Economic History of the United States	
EDUC 2125 History of American Public Education	
ETHN 2004 Themes in American Culture 1	
ETHN 2013 Critical Issues in Native North America	
ETHN 2014 Themes in American Culture 2	
ETHN 2432/ HIST 2437 African American History	
ETHN 2536 Survey of Chicana/o History and Culture	
ETHN 3015 Asian Pacific American Communities	
ETHN 3905/ WGST 3900	
HIST 1015 American History to 1865	
HIST 1025 American History since 1865	
HIST 2015 Themes in Early American History	
HIST 2126 Issues in Modern U.S. Politics and Foreign Relations	
HIST 2166 The Vietnam Wars	
HIST 2316	
HIST 2326 Issues in the History of U.S. Society and Culture	
HIST 2516 America Through Baseball	
HIST 2636/ WGST 2400	
PSCI 1101 Introduction to American Politics	
Physical Science	

Choose a 3-credit college-level course in astronomy, atmospheric and oceanic sciences, chemistry, geology, physics or physical geography. 3

Biological Science

Choose a 3-credit college-level course in the EBIO and MCDB departments. IPHY 2420 also satisfies this requirement. Physical anthropology will NOT be accepted. 3

Cultural/Human Geography

Choose a 3-credit college-level course in a geography department. Physical geography does NOT qualify. 3

Human Diversity

EDUC 3013 School and Society 3

Total Credit Hours 29-30

- ¹ CMCI communication majors may complete MATH 1011, MATH 1012, MATH 1021, MATH 1071, MATH 1081, or MATH 1150 and INFO 1201.
- ² Psychology majors may complete MATH 1011, MATH 1071, MATH 1081, or MATH 1150 and PSYC 2111.

Education Course Requirements

Take Any Time

EDUC 3013	School and Society (meets the Arts and Sciences Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4411	Educational Psychology for Elementary Schools (includes up to 2 hours per week of outside service learning)	4
EDUC 4311	Children’s Literature and Literacy Engagement in Elementary Schools	3

Semester One

Each course includes 4 hours per week of school-based practicum.

EDUC 4320	Reading Instruction for Elementary Schools	3
EDUC 4321	Writing Instruction for Elementary Schools	3

Semester Two

Each course includes 4 hours per week of school-based practicum.

EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 4351	Differentiating Instruction in Diverse Elementary Classrooms	3

Semester Three

These courses share an all-day, school-based practicum.

EDUC 4331	Elementary Social Studies Methods	3
EDUC 4341	Elementary Reading Assessment and Instruction	3
EDUC 5215	Elementary Science Theory and Methods	3

Total Credit Hours 31

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4691.
- EDUC 4691 Student Teaching: Elementary School 1 (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5001) or PLACE (test 01).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

Music Education (K#12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Written Communication

Choose a 3-credit ENGL, ARSC or WRTG course from the Arts and Sciences Core Requirements list. 3

Literature and the Arts

Choose a 3-credit course from the Literature and the Arts area (excluding music courses) of the Arts & Sciences Core Requirements list. 3

Mathematics

Choose one course from the following: 3

MATH 1011	College Algebra	
MATH 1012	Quantitative Reasoning and Mathematical Skills	
MATH 1071	Finite Mathematics for Social Science and Business	
MATH 1081	Calculus for Social Science and Business	
MATH 1120	Mathematics for Elementary Educators 2	
MATH 1150	Precalculus Mathematics	
MATH 1300	Calculus 1	
MATH 1310	Calculus, Systems, and Modeling	
APPM 1350	Calculus 1 for Engineers	

Contemporary Societies, Human Diversity, US Context, Historical Context Ideals & Values, or Foreign Language (3rd sem. or higher) 3

Choose from the Arts & Sciences Core Requirements list (excluding music courses). 3

Natural Sciences

Choose a 3-credit college-level course. 3

Non-Music Electives

Choose 9 credits of courses offered at CU Boulder outside of the College of Music, excluding any School of Education (EDUC) courses. 9

Total Credit Hours 27

Education Course Requirements

EDUC 3013	School and Society (meets the Arts and Sciences Core Requirements for Human Diversity or Contemporary Societies; may be taken at any time)	3
-----------	--	---

EDUC 4112	Educational Psychology and Adolescent Development (includes up to 2 hours per week of outside-class service learning; may be taken at any time)	3
or EDUC 4411	Educational Psychology for Elementary Schools	
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of in-school practicum)	3
Total Credit Hours		9

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

EDUC 4513	Education and Practice (must be taken with EDUC 4732)	2
EDUC 4732	Student Teaching K-12 (pass/fail only)	8
MUSC 4193	Student Teaching Seminar	1
MUSC 4133	Student Teaching Practicum (optional; check with the College of Music)	3
Total Credit Hours		14

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5113) or PLACE (test 29).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

Secondary English Language Arts (7#12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Mathematics

Choose a 3-credit college-level course. 3

Advanced Writing

Choose a 3-credit course in critical or creative writing beyond the lower-division/introductory composition level. 3

History or Grammar of the English Language

Choose one course from the following: 3

EDUC 4222/5222 Language Study for Educators

CLAS/LING 1010 The Study of Words

LING 1500 Understanding Grammar

LING 2000	Introduction to Linguistics	
Oral Communication		
Choose a 3-credit course in speech, public speaking or communication.		3
Visual Communication		
Choose a 3-credit course in theatre, film, ATLAS, TAM or other digital media.		3
Literature		
Choose 30 credit hours in English and English language arts-related courses. Must include a component of British literature as well as a multicultural/non-English literature course. Acceptable course work may be in communication/speech, composition, drama/theatre, humanities, journalism and/or literature. May include courses from the content requirements above.		9
Total Credit Hours		54

Education Course Requirements

Take Any Time

EDUC 3013	School and Society (meets the Arts and Sciences Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4112	Educational Psychology and Adolescent Development (includes up to 2 hours per week of outside-class service learning)	3

Fall Semester

EDUC 5325	Teaching Literature in Middle and Secondary Schools	3
EDUC 4295	Reading and Literacy in the Secondary Classroom (includes up to 5 hours per week of school-based practicum)	4
EDUC 4342	Writing in Humanities Classrooms (includes up to 4 hours per week of school-based practicum)	3

Spring Semester

EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
EDUC 5365	Methods and Materials in Secondary English (includes up to 5 hours per week of school-based practicum)	4

Total Credit Hours 23

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5038) or PLACE (test 07).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

Secondary Mathematics (7-12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

APPM 1350	Calculus 1 for Engineers	4
	or MATH 1300 Calculus 1	
	or MATH 1310 Calculus, Systems, and Modeling	
APPM 1360	Calculus 2 for Engineers	4
	or MATH 2300 Calculus 2	
APPM 2350	Calculus 3 for Engineers	4
	or MATH 2400 Calculus 3	
MATH 2001	Introduction to Discrete Mathematics	3
MATH 3001	Analysis 1	3

	or MATH 3140 Abstract Algebra 1	
MATH 3120	Functions and Modeling	3
MATH 3510	Introduction to Probability and Statistics	3
MATH 2135	Introduction to Linear Algebra for Mathematics Majors	3
MATH 3210	Euclidean and Non-Euclidean Geometry	3
MATH 4820	History of Mathematical Ideas	3
Total Credit Hours		36

Education Course Requirements

Take Any Time

EDUC 3013	School and Society (meets the Arts and Sciences Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4050	Knowing and Learning in Mathematics and Science (includes up to 2 hours per week of school-based practicum)	3

Semester One (Fall)

EDUC 2020	Step 1: Inquiry Approaches to Teaching ¹	1
	or EDUC 4610 Math and Science Education	
EDUC 5317	Perspectives on Mathematics	3

Semester Two (Spring)

EDUC 2030	Step 2: Inquiry-Based Lesson Design	1
EDUC 4060	Classroom Interactions (includes up to 5 hours per week of school-based practicum)	3
EDUC 4232	Language and Literacy across the Curriculum (spring and summer only)	3

Semester Three

EDUC 5375	Problem-Based Math Instruction (includes up to 6 hours per week of school-based practicum)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
Total Credit Hours		23

¹ EDUC 4610 is restricted to students admitted to the Learning Assistant Program and is a variable-credit course.

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5161) or PLACE (test 04).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

Secondary Science (7-12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content, and education coursework. All grades must be a "C-" or better to satisfy a requirement.

Content Course Work Requirements

Mathematics

APPM 1350	Calculus 1 for Engineers	4
	or MATH 1300 Calculus 1	
	or MATH 1310 Calculus, Systems, and Modeling	

Science

Choose two biology courses.	6
Choose two chemistry courses.	6
Choose two earth/space science courses.	6
Choose two physics courses.	6

Complete three out of four of the following content area lab courses separately or as part of a course:

Biology Lab
Chemistry Lab
Earth/Space Science Lab

Physics Lab	
Total Credit Hours	28

Content Majors

- **Biology:** Complete a major in ecology & evolutionary biology; integrative physiology; molecular, cellular & developmental biology; or neuroscience (may include courses from the content requirements above).
- **Chemistry:** Complete a major in chemistry or biochemistry (may include courses from the content requirements above).
- **Earth/Space Science:** Complete a major in astronomy, atmospheric & oceanic sciences or geology (may include courses from the content requirements above). Please contact an education advisor for more information at 303-492-6555.
- **Environmental Science:** Complete a major in environmental studies (may include courses from the content requirements above). Contact an education advisor for more information at 303-492-6555.
- **Physics:** Complete a major in physics with Plan 3 (may include courses from the content requirements above). Students pursuing Plan 1 or Plan 2 in the physics major, or a major in engineering physics, should contact an education advisor at 303-492-6555.

Education Course Requirements

Take Any Time

EDUC 3013	School and Society (meets Arts and Science Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4050	Knowing and Learning in Mathematics and Science (includes up to 2 hours per week of school-based practicum)	3
EDUC 4232	Language and Literacy across the Curriculum (spring and summer only)	3
Choose two courses from the following:		6
EDUC 4811 & MCDB 4811	Teaching and Learning Biology and Teaching and Learning Biology	
EDUC 4822	Teaching and Learning Chemistry (spring only)	
EDUC 4460 & PHYS 4460	Teaching and Learning Physics and Teaching and Learning Physics	
EDUC/PHYS 1580	Energy and Interactions	
EDUC 4833	Teaching and Learning Earth Systems (fall only)	
GEEN 4400	Teaching Design	

Semester One

EDUC 2020	Step 1: Inquiry Approaches to Teaching ¹	1
or EDUC 4610	Math and Science Education	

Semester Two

EDUC 2030	Step 2: Inquiry-Based Lesson Design	1
EDUC 4060	Classroom Interactions (includes up to 5 hours per week of school-based practicum)	3

Semester Three

EDUC 5385	Problem-Based Science Instruction (includes up to 6 hours per week of school-based practicum)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3

Total Credit Hours	26
--------------------	----

¹ EDUC 4610 is restricted to students admitted to the Learning Assistant Program and is a variable-credit course.

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5081) or PLACE (test 06).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

Secondary Social Studies (7#12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Mathematics

Choose a 3-credit college-level course. 3

U.S. History

Choose 6 credits of college-level courses. 6

World History

Choose 6 credits of college-level courses. 6

Economics

Choose a 3-credit course in an economics department. 3

Political Science

Choose a 3-credit course in a political science department.

Cultural/Human Geography

Choose a 3-credit course in a geography department. Physical geography does NOT qualify. 3

Sociology or Social/Cultural Anthropology

Choose a 3-credit course in a sociology or anthropology department. Physical anthropology does NOT qualify. 3

Focus Area

Choose 30 credit hours in one of the following disciplines: anthropology, economics, ethnic studies, geography, history, international affairs or political science (may include courses from the content requirements above). A minimum of 12 credits must be upper division.

Total Credit Hours 24

Education Course Requirements

Take Any Time

EDUC 3013	School and Society (meets the Arts and Sciences Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4112	Educational Psychology and Adolescent Development (includes up to 2 hours per week of outside-class service learning)	3
EDUC 5316	Nature of Social Studies and Social Studies Education (fall only; includes school-based practicum)	3

Fall Semester

EDUC 4295	Reading and Literacy in the Secondary Classroom (includes up to 5 hours per week of school-based practicum)	4
EDUC 4342	Writing in Humanities Classrooms (includes up to 4 hours per week of school-based practicum)	3

Spring Semester

EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
EDUC 5355	Methods and Materials in Secondary Social Studies (includes up to 5 hours per week of school-based practicum)	4

Total Credit Hours 23

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5081) or PLACE (test 06).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject specific assessment, with a score of 42 or higher.

World Languages

Secondary French (7#12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Students must complete 30 credits in French at the junior level or above. May include requirements from below.

Quantitative Reasoning & Mathematical Skills

Choose one course from the following:		3-6
MATH 1011	College Algebra	
MATH 1012	Quantitative Reasoning and Mathematical Skills	
MATH 1071	Finite Mathematics for Social Science and Business	
MATH 1081	Calculus for Social Science and Business	
MATH 1150	Precalculus Mathematics	
MATH 1300	Calculus 1	
APPM 1350	Calculus 1 for Engineers	
MATH 1110 & MATH 1120	Mathematics for Elementary Educators 1 and Mathematics for Elementary Educators 2	

French Core

FREN 3010	French Phonetics and Pronunciation	3
FREN 3050	French Composition 1	3
FREN 3060	French Composition 2	3
FREN 3100	Introduction to Critical Reading and Writing in French Literature	3
FREN 3110	Main Currents of French Literature 1	3
FREN 3120	Main Currents of French Literature 2	3
FREN 3500	French Current Events: Conversation and Composition	3

French Electives

Choose 6 additional credits at the 3100 level or above. 6

Total Credit Hours 30-33

Education Course Requirements

EDUC 3013	School and Society (meets the Arts and Sciences Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4112	Educational Psychology and Adolescent Development (includes up to 2 hours per week of outside-class service learning)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
EDUC 4125	Secondary World Language Methods (fall only; includes up to 5 hours per week of school-based practicum)	3
FREN 5770	Methods of Teaching French as a Foreign Language (fall only)	2

Total Credit Hours 14

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722 and FREN 4960.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513 and FREN 4960.
- FREN 4960 High School French Teaching (6 credits). Must be taken with EDUC 4513 and EDUC 4722.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5601) or PLACE (test 12).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary German (7#12) Teacher Licensure Program Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Students must complete a total of 30 credits in German and related fields. GRMN 4450 or GRMN 5020 may not count towards requirements.

Mathematics

Choose a 3-credit college-level mathematics course. 3

German Core

GRMN 2020 Intermediate German 2 4

GRMN 3010 Advanced German 1 3

GRMN 3020 Advanced German 2 3

GRMN 4010 Advanced Grammar and Stylistics 3

GRMN 4550 Senior Seminar: The Roles of Intellectuals and Academics in German Culture 3

GRMN 5020 Applied Linguistics and Foreign Language Teaching Methodology (Department permission required) 3

Complete one (1) of the following courses: 3

GRMN 4330 The Age of Goethe

GRMN 4340 Seminar in German Literature

Complete two courses from the following: 6

Courses taught in German

GRMN 3110 German Literature from the Avant-garde to the Postmodern

GRMN 3120 German Literature from the Enlightenment to Expressionism

GRMN 3140 Current Issues in German Literature

GRMN 3520 Open Topics in the Cultural Context

GRMN 4030

GRMN 4370

Courses taught in English

GRMN 1601 Germany Today

GRMN 1602 Metropolis and Modernity

GRMN 1603

GRMN 2501 Miniatures of Modern Life: Introduction to Short Fiction

GRMN 3201

GRMN 3501 German-Jewish Writers: From the Enlightenment to the Present

GRMN 3503 German Film Through World War II

GRMN 3504 Topics in German Film

GRMN 4501 Seminar: Literature in Cultural Context

GRMN 4502 Nietzsche: Literature and Values

GRMN 4503 Issues in German Thought

GRMN 4504 Goethe's Faust

Total Credit Hours 31

Education Course Requirements

Courses and Minimum Required Credit Hours

EDUC 3013 School and Society (Meets the Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.) 3

EDUC 4112 Educational Psychology and Adolescent Development (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.) 3

EDUC 4023 Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum) 3

EDUC 4125 Secondary World Language Methods (Includes up to five (5) hours per week of school-based practicum. Fall only.) 3

GRMN 4450 Methods of Teaching German 3
or GRMN 5020 Applied Linguistics and Foreign Language Teaching Methodology

Note: May not count GRMN 5020 for academic preparation in German (section C, item 6) and for methods.

Total Credit Hours 15

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513.
- GRMN 4460 High School German Teaching (6 credits). Pass/fail only. Must be taken concurrently EDUC 4513 & EDUC 4722.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5601) or PLACE (test 12).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary Japanese (7#12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Quantitative Reasoning & Mathematical Skills

Choose one course or sequence from the following: 3-6

MATH 1011	College Algebra	
MATH 1012	Quantitative Reasoning and Mathematical Skills	
MATH 1071	Finite Mathematics for Social Science and Business	
MATH 1081	Calculus for Social Science and Business	
MATH 1150	Precalculus Mathematics	
MATH 1300	Calculus 1	
APPM 1350	Calculus 1 for Engineers	
MATH 1110 & MATH 1120	Mathematics for Elementary Educators 1 and Mathematics for Elementary Educators 2	

Japanese Core

JPNS 3110	Advanced Japanese 1	5
JPNS 3120	Advanced Japanese 2	5
JPNS 4110	Advanced Readings in Modern Japanese 1	3
JPNS 4120	Advanced Readings in Modern Japanese 2	3

Japanese Electives

Choose 12 additional upper-division credits in Japanese language, literature and/or culture, including 6 credits taken in the past five years.. 12

Total Credit Hours 31-34

Education Course Requirements

EDUC 3013	School and Society (meets the Arts and Sciences Core Requirement for Human Diversity or Contemporary Societies)	3
EDUC 4112	Educational Psychology and Adolescent Development (includes up to 2 hours per week of outside-class service learning)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum)	3
EDUC 4125	Secondary World Language Methods (fall only; includes up to 5 hours per week of school-based practicum)	3

Total Credit Hours 12

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5601) or PLACE (test 12).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary Latin (7#12) Teacher Licensure Program

Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Students must complete 30 credits in CLAS courses beyond introductory language courses, of which 18 must be upper division.

Quantitative Reasoning & Mathematical Skills

Choose one course or sequence from the following: 3-6

MATH 1011	College Algebra	
MATH 1012	Quantitative Reasoning and Mathematical Skills	
MATH 1071	Finite Mathematics for Social Science and Business	
MATH 1081	Calculus for Social Science and Business	
MATH 1150	Precalculus Mathematics	
MATH 1300	Calculus 1	
APPM 1350	Calculus 1 for Engineers	
MATH 1110 & MATH 1120	Mathematics for Elementary Educators 1 and Mathematics for Elementary Educators 2	

Latin Core

LATN 1014	Beginning Latin 1	4
LATN 1024	Beginning Latin 2	4
LATN 2114	Intermediate Latin 1	4
LATN 2124	Intermediate Latin 2	3

Latin Reading

Two additional 3-credit Latin reading courses above the sophomore level. 6

Latin Electives

Latin electives to meet the 30-credit-hour minimum in CLAS courses beyond introductory language courses. 6-3

Total Credit Hours 30

Education Course Requirements

Courses and Minimum Required Credit Hours

EDUC 3013	School and Society (Meets the Arts and Science Core requirement for Human Diversity or Contemporary Societies. May be taken at any time.)	3
EDUC 4112	Educational Psychology and Adolescent Development (Includes up to two (2) hours per week of outside-class service learning. May be taken at any time.)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (Includes up to four (4) hours per week of school-based practicum)	3
EDUC 4125	Secondary World Language Methods (Includes up to five (5) hours per week of school-based practicum. Fall only.)	3
LATN 4824 or LATN 5824	Latin Teaching Methods: Open Topics	3
Total Credit Hours		15

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits).
- EDUC 4712 Student Teaching: Secondary School (10 credits).

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5601) or PLACE (test 12).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Secondary Spanish (7#12) Teacher Licensure Program Grade Requirements

Teacher licensure candidates must maintain a 2.75 GPA in cumulative, content and education course work. All grades must be a C- or better to satisfy a requirement.

Content Course Work Requirements

Courses and Minimum Required Credit Hours

Quantitative Reasoning & Mathematical Skills. Three (3) - six (6) credit hours. Complete one of the following options to satisfy this requirement: MATH 1011, MATH 1012, MATH 1071, MATH 1081, MATH 1150, MATH 1300, MATH 1410 (currently not offered), APPM 1350 or MATH 1110 AND MATH 1120

SPAN 3000	Advanced Spanish Language Skills	5
SPAN 3002	Advanced Spanish Conversation	3
SPAN 3050	Spanish Phonology and Phonetics	3
SPAN 3100	Literary and Cultural Analysis in Spanish	3
SPAN 3120	Advanced Spanish Grammar	3
Choose one of the following courses:		3
SPAN 3010	Advanced Rhetoric and Composition	

or SPAN 4430	Special Topics in Hispanic Linguistics	
or SPAN 4450	Introduction to Hispanic Linguistics	
Choose one of the following courses:		3
SPAN 4150	Major Works and Trends in Literature and Culture in Spain Up to 1700	
or SPAN 4160	Major Works and Trends in Literature and Culture in Spain: 1700-Present	
Choose one of the following courses:		3
SPAN 4170	Major Works/Trends in Literature and Culture in Latin America Up to the 19th Century	
or SPAN 4180	Major Works and Trends in Literature and Culture in Latin America: 1900-Present	
Literature: One (1) additional 4000 level course in Spanish Literature.		3
Culture & Civilization—Peninsular or Spanish American: More courses may be available. Please contact an education advisor at 303-492-6555		3
Six (6) credit hours in a related field: Portuguese, Chicano Studies, Linguistics, another language (must be upper division), Comparative Literature, Political Science, or History.		6
Total Credit Hours		38

Education Course Requirements

EDUC 3013	School and Society (meets the Arts and Sciences Core Requirements for Human Diversity or Contemporary Societies)	3
EDUC 4112	Educational Psychology and Adolescent Development (includes up to 2 hours per week of outside-class service learning)	3
EDUC 4125	Secondary World Language Methods (fall only; includes up to 5 hours per week of school-based practicum)	3
EDUC 4023	Differentiating Instruction in Diverse Secondary Classrooms (includes up to 4 hours per week of school-based practicum; should be taken concurrently with SPAN 4650.)	3
SPAN 4650	Methods of Teaching Spanish (should be taken concurrently with SPAN 4023.)	3
Total Credit Hours		15

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4722 and SPAN 4660.
- EDUC 4722 Student Teaching: Secondary School 2 (5 credits). Must be taken with EDUC 4513 and SPAN 4660.
- SPAN 4660 High School Spanish Teaching (6 credits). Must be taken with EDUC 4513 and EDUC 4722.

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Required Tests and Assessments

Licensure Exam: Prior to Student Teaching

Pass either state-approved licensure exam, PRAXIS Subject Assessment (test 5601) or PLACE (test 12).

edTPA: During Student Teaching

Pass the edTPA, a performance-based, subject-specific assessment, with a score of 42 or higher.

Engineering & Applied Science

The College of Engineering and Applied Science has a tradition of excellence in engineering education dating back to 1893, and we continually update and improve our programs to reflect the highest standards in teaching and learning, discovery and innovation, and community and culture. Our college is the top-ranked engineering school in the Rocky Mountain region, with 14 baccalaureate programs and 12 graduate programs.

Mission & Vision

The mission of the College of Engineering and Applied Science is to generate new knowledge in engineering and related fields and to equip students from diverse backgrounds as future leaders and responsible citizens in these fields for the betterment of individuals and society. Its vision is to be a world leader in engineering research and education, with an emphasis on integrated and discovery learning and on engineering for global society.

The college embraces the following core values:

- **Global Society:** Our innovative research programs seek to create and disseminate knowledge to improve global society in areas such as health and well-being, energy and environmental sustainability and infrastructure for both developed and developing communities. Similarly, our innovative educational programs seek to prepare graduates with not only technical knowledge and excellence, but also skills for societal leadership and global citizenship.
- **Active Learning:** We design the student experience based on engineering educational research findings that demonstrate enhanced learning through active engagement of students, both within the classroom and through personalized and team-based opportunities such as design projects, discovery learning, service learning, internships and leadership programs.
- **Inclusive Excellence:** To improve the educational experience and better serve global society, we are committed to building a culture of inclusive excellence of diverse faculty, staff and students with high ethical and performance standards.

The college seeks the following outcomes in our graduates:

- technical excellence and knowledge in modern engineering, mathematics and science
- ability to communicate effectively with diverse peoples and other cultures
- ability to think critically, analyze data and formulate and solve complex problems
- ability to contribute effectively as individuals and in multidisciplinary teams
- knowledge of contemporary issues and preparation for societal leadership and world citizenship

- desire and skills for lifelong learning and personal and professional development
- passion for serving others and commitment to sustainability

Degrees

The College of Engineering and Applied Science offers Bachelor of Science degrees in:

1. aerospace engineering sciences (p. 630)
2. applied mathematics (p. 637)
3. architectural engineering (p. 672)
4. chemical engineering (p. 649)
5. chemical and biological engineering (p. 647)
6. civil engineering (p. 674)
7. computer science (p. 689)
8. electrical engineering (p. 712)
9. electrical and computer engineering (p. 710)
10. engineering physics (p. 728)
11. engineering plus (p. 732)
12. environmental engineering (p. 676)
13. mechanical engineering (p. 740)
14. technology, arts and media (p. 745)

Accreditation

The CU Boulder campus is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools. Programs numbered 1, 3–6, 8–9 and 12–13 are accredited by the Engineering Accreditation Commission (EAC) of ABET (<http://www.abet.org>). Engineering Plus is a new degree program for which ABET EAC accreditation will be sought. The Computer Science degree is accredited by the Computing Accreditation Commission (CAC) of ABET. The degrees in applied mathematics and engineering physics are offered in cooperation with the departments of Department of Applied Mathematics (p. 153) and Department of Physics (p. 446) in the College of Arts and Sciences (p. 121); accreditation by ABET is not usually sought in these areas.

Professional Registration

Professional registration is recommended for all fields of engineering in order to protect the health, safety and welfare of the public. Registration is required in all states for the legal right to practice professional engineering. Although there are variations in state laws regarding engineering licensure, there is a general four-step process for licensure candidates: earn a degree from an EAC/ABET-accredited engineering program, pass the FE exam, gain acceptable work experience under the supervision of a PE, and pass the PE exam. Students typically take the FE exam during their senior year in college.

Centers & Communities

BOLD Center

The BOLD (Broadening Opportunity through Leadership and Diversity) Center focuses the college's inclusion-centered access, retention and performance initiatives. The BOLD Center creates a vibrant and inclusive community of students from a wide range of backgrounds, preparing engineers with diverse perspectives to be innovative leaders in a global society. Through BOLD-inspired and -led initiatives, the college is dedicated to becoming a leader in attracting, preparing and expanding

opportunities for students historically underrepresented in engineering—including women, racial minorities, students from low-income families and those who are the first in their family to attend college. The BOLD Center team focuses deeply on measurable outcomes to significantly improve upon historical student access, retention and performance results.

BOLDly Moving Forward. The BOLD Center achieves breakthroughs in attracting, preparing and expanding opportunities for historically underrepresented students in engineering through academic offerings that inspire and motivate student success. Building strong community among students who might otherwise feel isolated is also a BOLD key to student success. BOLD promotes student engagement, achievement and retention in engineering through a focus on community building, leadership and professional development activities, coupled with building strong academics and an expectation for achieving excellence.

Why be BOLD? Through the inclusive BOLD community, students meet and work with peers, connect with engineering student societies, tap into internships and mentoring opportunities, explore career services, acquire effective study habits and pursue volunteer opportunities. The BOLD Center offers free tutoring for all engineering students in the Student Success Center. BOLD participation scholarships are available through an application process.

For more information, visit the BOLD Center (<http://www.colorado.edu/bold>) website.

Mortenson Center in Engineering for Developing Communities

Engineering for Developing Communities (EDC) is an innovative program dedicated to transforming the understanding, application, and evaluation of engineering to address some of the world's most pressing issues. The engineers of today need to work with colleagues in various disciplines from around the world to find locally appropriate solutions to global issues such as climate change, crumbling urban infrastructure, and adequate water and food supplies for a growing world population. By giving students tools in understanding systems perspectives, development theory, and contexts from local to global, the program helps create global citizen engineers capable of working in many roles in development engineering.

For more information, visit the Mortenson Center in Engineering for Developing Communities (<http://www.colorado.edu/mcedc>) website.

Residential Communities

The Engineering Honors Residential Academic Program, the Global Engineering Residential Academic Program, and the Quadrangle Engineering Living and Learning Community are popular community-building options for engineering students.

Engineering Honors Residential Academic Program

As a residential college (RC) housed in Andrews Hall, the Engineering Honors Program provides an educational experience that transcends the classroom and matches the unique abilities, needs and ambitions of this select group of students. The program is for students who want to help build an honors culture that cares more about learning than grades; more about maximizing opportunities than meeting minimum requirements; and more about being thoughtful, critical, engaged and intentional than being passively defined by the vague expectations of others. Central to fulfilling this mission is the Engineering Honors Program Residential College in Andrews Hall, which includes a residential faculty member,

classrooms, special study spaces and the highest percentage of upper-division students living on campus.

Being part of EHP means belonging to a community that is ambitious without being competitive and committed to a wide range of goals from international development work to graduate school, from research to teaching, and from industry to service. It means living next to students already doing research, returning from summer internships, working with Engineers without Borders and applying to graduate school.

Incoming first-year students are selected to participate in the Engineering Honors Program via an online application process. Although many EHP students live in Andrews for multiple years, it is only required during the first year.

For more information about program requirements and to access the application, visit the Engineering Honors Program (<http://www.cuhonorsengineering.com>) website.

Global Engineering Residential Academic Program

The Global Engineering Residential Academic College opened in Fall 2013 with the mission to provide a four-year educational experience for engineering students invested in foreign languages, culture and geopolitics as well as in global development and international design collaboration. Global Engineering emphasizes those aspects of education that take place outside the traditional classroom: belonging to a strong community, service opportunities, leadership training, peer mentoring and participating in the liberal arts. A Faculty Director in Residence is central to the community and interacts with all community members. Global Engineering is located in Kittredge Central, and includes a kitchen, special classrooms and study spaces, an engineering computer lab, a music room and multiple room designs to attract upper-division students. Students in global engineering are encouraged to speak Spanish, French and/or Russian in residence. Incoming students are selected each year via an online application process, both for incoming freshmen and for returning students on the CU Boulder Campus.

For more information and to access the application, visit the Global Engineering (<http://www.globalengineeringrap.org>) website.

Quadrangle Engineering Living and Learning Community

Adjacent to the Engineering Center, composed of Aden, Brackett, Cockerell and Crosman Halls, the Quad provides a supportive living environment for students studying engineering and applied sciences. Current offerings include a computer lab with engineering software, evening and Sunday drop-in tutoring, and special programs such as hands-on workshops with the Idea Forge, faculty dinners, trips to sporting and cultural events on campus and more. Students in the Quad report that they appreciate the convenient location, the additional academic resources, and always having friends in their hall to study with.

For more information, visit Housing & Dining Services' Get Involved (https://living.colorado.edu/get-involved?qt-get_involved_main_tab=0&qt-get_involved_rap_breakdown_level=2&qt-get_involved_llcs=1/#qt-get_involved_llcs) webpage and scroll down to the Quad Engineering Living & Learning Community section.

Areas of Interest

Active Learning Program

The College of Engineering and Applied Science defines active learning as "enhancing knowledge, skills and understanding through practical experience." The college's goal is to provide all students with the

opportunity to participate in enrichment experiences and partnerships with individual faculty and professionals in discovery, service and professional learning. Several programs are in place to financially support students engaged in undergraduate research or "discovery learning" with faculty, graduate students and research sponsors. Students seeking professional learning experiences such as internships and co-op assignments with a participating employer also typically earn hourly wages, while those pursuing service learning opportunities in the college, community or beyond could earn wages or course credit. Active learning encompasses domestic and international opportunities such as assisting developing communities through Engineers Without Borders, a national nonprofit organization started at CU Boulder.

For more information, visit the Active Learning Program (<http://www.colorado.edu/activelearningprogram>) website.

Colorado Space Grant Consortium

CU's Space Grant program provides interdisciplinary students with access to space through innovative courses and real-world, hands-on space hardware programs that include short and long-duration, high altitude balloon payloads, sounding rocket payloads and low-Earth orbiting satellite missions. NASA's Colorado Space Grant Consortium (also known as Space Grant) is part of a national program.

Space Grant students interact with engineers and scientists from NASA and industry to develop, test and fly new space technologies. All missions are entirely student run—including students in the roles of team members, team leads, systems engineers, project managers and mission operators. Students participate in programs that aid them in their future academic courses and careers.

For more information, visit the Colorado Space Grant Consortium (<http://spacegrant.colorado.edu>) website.

Engineering Leadership Program

The Engineering Leadership Program (ELP) provides students with course work and active learning experiences to prepare them to be leaders in their chosen careers, whether it is in an engineering field or another field such as government service, law, medicine, etc. Students in the program take leadership courses through ELP and other CU programs, attend leadership seminars sponsored by the college and learn from mentors who have experience relevant to their interests. ELP Students also design and undertake a personal leadership experience and produce a portfolio of their ELP work for review prior to graduation. Students apply to the program in their first or second year.

For more information, visit the Engineering Leadership Program (<http://www.colorado.edu/engineeringleadershipprogram>) website.

Engineering Study Abroad

In today's global environment, engineers can expect to work in multilingual and multicultural teams and to engage in projects with global impact. It is therefore essential that students develop global engineering competencies alongside their technical skills, either through careful selection of globally oriented courses or through international experiences such as study abroad.

The College of Engineering and Applied Science has partnered with CU's Education Abroad Office to provide engineering students with numerous global opportunities. Students can study engineering at more than 25 universities across six continents, and more than 1800 courses have been preapproved for engineering credit.

Additionally, the college is adding technically oriented global seminars each summer to allow students to study engineering within a global context and under the tutelage of a CU professor.

Careful planning is required to ensure that the courses taken abroad meet degree requirements and that participants stay on track for graduation. All participants in CU-approved study abroad programs remain enrolled at the university and receive in-residence credit; the pass/fail grade option is used by the college for course work taken during study abroad but is exempt from college and major department pass/fail limitations. CU financial aid, including most scholarships, can usually be applied to program costs, and special study-abroad scholarships may be available for program participants.

Engineering students interested in studying abroad must begin planning early and are advised to save as many HSS and technical elective courses as possible, as these are the easiest to transfer back to CU.

For more information, visit the college's International Programs (<http://www.colorado.edu/engineering-international>) website.

Herbst Program of Humanities

The Herbst Program of Humanities enriches and broadens the education of engineering students with seminar and lecture courses in literature, philosophy, history, social issues and the arts.

In its two seminars, HUEN 1010 and HUEN 3100, class time is devoted almost exclusively to roundtable discussion of original texts in literature, philosophy, and the fine arts. These seminars have fewer than 14 students, so students can hone their critical thinking skills through reading, discussion and extensive writing. Both of these seminars satisfy the college's writing requirement. Note: HUEN 1010 satisfies the writing requirement only when taken in a student's freshman year.

The Herbst Program offers various lecture courses on a rotating basis. Engineering in History: The Social Impact of Technology (HUEN 1850) studies technological change and its consequences through time. HUEN 2100, HUEN 2120 and HUEN 2130 together survey science and technology from the Stone Age to the 20th century. Engineering, Science, and Society (HUEN 2210) explores the ethics and social implications of engineering practice. Special topics courses are occasionally offered (HUEN 2843 or HUEN 3843); these address subjects as varied as world folklore, the ethics of bioengineering, and the relationship between science and religion. The Herbst Program also offers summer and study abroad courses.

Clancy and Linda Herbst founded and endowed the program in 1989 and continue to sustain it; it is also supported by the Price Foundation, the Engineering Excellence Fund, CEAS and many friends and alumni.

For more information, visit the Herbst Program of Humanities in Engineering (<http://www.colorado.edu/herbst>) website.

Idea Forge

The Idea Forge is a flexible, cross-disciplinary collaborative space where students can imagine, design, create, and test products and solutions to meet a range of societal and customer needs. The space serves as the home for Design Center Colorado and Catalyze CU. It supports student teams working on invention and innovation as part of courses, as well as design and development driven by entrepreneurial-minded individuals and service-oriented groups. With all these students working side-by-side, the Idea Forge boosts student learning through collaborative, hands-

on experience, while supporting industry interaction through scheduled workshops as well as spontaneous exchanges.

The mission of the Idea Forge is to enhance interdisciplinary creativity and synergy to develop flexible, adaptable, and practical graduates. To do this, the Idea Forge supports design from a variety of perspectives, from the most formal engineering design process to the human-centered design philosophy. By providing students the opportunity to design, build, and test their concepts, the Idea Forge builds creative confidence and promotes the formation of strong professional skills.

The Idea Forge boasts a variety of flexible spaces to achieve its mission and to fit individual student needs. These spaces fit into three categories: fabrication shops, project space, and community space. The fabrication shops provide students with the tools and equipment needed for prototyping through machining, welding, 3D printing, laser cutting, woodworking, and sewing with an additional emphasis on electronics and micro-controllers. Students learn safe, efficient use of the tools and equipment through action, by taking workshops or tackling a project. Project spaces fill the Idea Forge – students are able to find their nearest wood-topped workbench to assemble their design. The central Idea Forge Commons, an inspiring environment for teamwork and brainstorming, doubles as a project space and a community space. Just off the Commons, the Thinking Lounge community space provides students with a comfortable place to take a break. Additional community space consists of two impressive conference rooms, which are perfect for meetings with industry and community members.

For more information, visit the Idea Forge (<http://www.colorado.edu/ideaforge>) website.

Integrated Teaching and Learning Program

The Integrated Teaching and Learning (ITL) program provides K–16 engineering education initiatives aimed at supporting the teaching and learning of hands-on, minds-on engineering curriculum so that students of all ages can imagine a future in engineering. With a focus on engineering design, undergraduate engineering students have the ability to create what they dream via modern manufacturing and electronics capabilities—reinforced through innovative engineering courses, as well as through time set aside for the creation of personal projects to expand one's creative thinking.

Through ITL Program skill-building workshops on tools, machining, soldering, circuits, strain gauges, laser cutters, Arduino microcontrollers, LabVIEW, SolidWorks, spatial visualization and more, students become comfortable with the resources that help them do the engineering that impacts everyday life. The multidisciplinary, hands-on ITL Laboratory features two open and interactive laboratory plazas that support inquiry-based experimentation, data acquisition and analysis capability. The laboratory also hosts design studios, team work areas, active learning spaces—all designed to be used by all disciplines of CU engineering students as they do engineering.

The ITL Program's nationally recognized K–12 engineering education program focuses on attracting and preparing more diverse and well-prepared youth to careers in engineering and technology. K–12 audiences may visit the ITL Laboratory to learn how engineering is an essential part of their lives through myriad hands-on science and engineering exhibits. K–12 teachers and students can also access the TeachEngineering digital library, a free online curricular resource supporting educators to bring engineering into their K–12 classrooms through high quality engineering lessons and hands-on activities aligned to science, mathematics and technological educational standards. Accessed by over

1.6 million unique users in the past year, TeachEngineering has become a key resource to the broad national STEM movement and the growing K–12 engineering community.

The ITL program features an innovative interdisciplinary undergraduate curriculum that includes the retention-building First-Year Engineering Projects course that engages student teams to experience the design process in a hands-on way, culminating in an end-of-semester public design expo. The ITL Program also supports the design courses that distinguish the Engineering Plus degree program.

For more information, visit the Integrated Teaching & Learning Laboratory (<http://itll.colorado.edu>) website.

Pre-Engineering Program

The pre-engineering program is designed to facilitate the successful transition of qualified first-year students in the College of Arts and Sciences into the College of Engineering and Applied Science. The program provides a structured pathway of CU Boulder course work combined with academic advising support from both the College of Engineering and Applied Science and the College of Arts and Sciences.

The program serves qualified first-time freshmen applicants who initially applied to the College of Engineering and Applied Science, but were alternatively offered admission to the College of Arts and Sciences pre-engineering program. Pre-engineering students prepare for a transition to the engineering college by successfully completing specific math, science and engineering courses. Minimum grade, credit, and GPA requirements must be met to secure the transition from pre-engineering to engineering. Through special registration access to select engineering courses, most students can complete engineering admission requirements in three semesters, while some may do so in as few as two semesters. The maximum length of time in the pre-engineering program for any student is four semesters, at which point the student will either be admitted to engineering or will transition into an arts and sciences major. Pre-engineering students receive dual support from advisors in both the College of Engineering and Applied Science and the College of Arts and Sciences. They are also encouraged to live on campus in engineering-affiliated living communities and actively engage in engineering student societies and organizations.

For more information, visit the Pre-Engineering Program (<http://www.colorado.edu/pre-engineering>) website.

Policies & Requirements

Admission

Freshman Applicants

When students apply to the College of Engineering and Applied Science from high school, they may indicate to enter the college as "open option" (unsure of engineering major), or they may select a preliminary engineering major. Sometime after completion of the first semester, and by the eighth week of the second semester, all students should finalize and confirm their choice of major (<http://www.colorado.edu/engineering-advising/get-your-degree/first-year-freshmen/confirming-your-major>) in the College.

Specific admission requirements are detailed in the Admissions (p. 97) section of this catalog. Contact the campus Admissions Office (<http://www.colorado.edu/admissions>) for more information.

Transfer Students

Students desiring to transfer (<http://www.colorado.edu/engineering/future-students/transferring-cu>) from other accredited collegiate institutions are considered for admission on an individual basis. All transfer students are expected to be enrolled as full-time students and must be admitted to the college prior to the last 45 credit hours of their degree program. Admission criteria for students at other CU campuses are the same as for other transfer students.

Intrauniversity Transfer Students - Intrauniversity transfers (IUTs) (<http://www.colorado.edu/engineering-advising/transfer-within-cu>) on the Boulder campus to the College of Engineering and Applied Science are considered on designated criteria. The applicant's academic record must fulfill the IUT admissions requirements of the College of Engineering and Applied Science.

Former Students

A former student is expected to meet the current requirements outlined in the Admissions (p. 97) section of this catalog and must reapply to the university. Courses taken at other collegiate institutions may or may not be a determining factor in the student's readmission to CU Boulder, but transcripts on all such work must be submitted.

Interruption of studies may require completion of current degree work in addition to repetition of course work for new degree requirements.

A former student returning to the College after a break in attendance must have course work reevaluated by the student's major department/program if it is older than 10 years from the date of their return.

Minimum Academic Preparation Standards (MAPS)

All students entering the University of Colorado who finished high school in the spring of 1988 or after must meet minimum academic preparation standards (MAPS) specified by each school or college. The College of Engineering and Applied Science has adopted the following standards for students. These standards are defined in high school units; a unit is one full year of high school course work:

- **English:** 4 units
- **Mathematics:** 4 units (includes at least 2 of algebra, 1 of geometry and 1 of college preparatory math such as trigonometry, analytic geometry or elementary functions)
- **Natural Science:** 3 units (2 of physics AND 1 of biology or chemistry; **OR** 2 of chemistry AND 1 of physics or biology; **OR** 2 of biology AND 1 of chemistry or physics; **OR** 1 of physics AND 1 of chemistry or biology AND 1 of another science)
- **Social Science:** 3 units (includes at least 1 unit of U.S. or World History)
- **Foreign Language:** 3 years of the same foreign language or 2 years in each of two different foreign languages

For additional information, see the Admissions (p. 97) and MAPS (p. 113) sections of this catalog.

Academic Excellence

Dean's List

An undergraduate student in the College of Engineering and Applied Science who completes at least 12 credit hours of course work for a letter grade during the fall or spring semester on the Boulder campus, and who earns a semester grade point average (GPA) of at least 3.600, will be included on the college dean's list for that semester. Notation of "Dean's

List" is placed on the student's transcript, and is viewable at the end of the semester in which the designation is earned.

Honors at Graduation

Undergraduate students may be eligible for honors designations at graduation (<http://www.colorado.edu/engineering-advising/get-your-degree/graduation/honors-graduation>).

Engineering Scholarships

Undergraduate scholarships are provided by public funds and private donations by alumni, corporations and friends of the college. In some cases, endowments have been established; other scholarships are based on annual gifts. Some companies provide matching funds for gifts from their employees who are alumni.

For additional information about engineering college-specific scholarships (<http://www.colorado.edu/engineering/future-students/financial-aid-scholarships>), contact the College's Scholarship Coordinator at 303-735-2440.

Anyone interested in providing an undergraduate scholarship or contributing to the scholarship fund may contact:

Engineering Advancement
University of Colorado Boulder
422 UCB
Boulder, CO 80309-0422
303-492-7899

Academic Standards

Academic Policies

Students in the College of Engineering and Applied Science must abide by all College policies and procedures as outlined on the College's Advising web site (<http://www.colorado.edu/engineering-advising>), such as Academic Expectations and Policies (<http://www.colorado.edu/engineering-advising/get-your-degree/academic-expectations-policies>). Students should refer to these webpages often since policies, procedures, and forms may be updated throughout the academic year.

Academic Integrity

Students in the College of Engineering and Applied Science may be required to pass an academic integrity quiz. See also the campuswide Honor Code (<http://honorcode.colorado.edu>) website.

Academic Standing

Visit the College's Academic Standing (<http://www.colorado.edu/engineering-advising/academic-standing-0>) webpage for details on good academic standing, academic alert, academic recovery, and academic suspension.

Attendance

Successful work in the College of Engineering and Applied Science is dependent upon regular attendance in all classes. Students who are unavoidably absent should make arrangements with instructors to make up the work missed. Non-attendance does not constitute withdrawal from a class. *If students stop attending a class in which they are formally enrolled, they are likely to receive a failing grade (F).* All students are expected to be enrolled full time and must petition to be enrolled part time.

Registration and Enrollment

To ensure the prompt completion of degree requirements and satisfaction of the four-year guarantee, the undergraduate student is expected to register for, and complete each semester, a full-time course load as outlined in the relevant major department/program curriculum. All students are expected to be enrolled full-time and must petition to be enrolled part-time. Part-time enrollment (less than 12 credit hours) will negatively impact the student's financial aid and scholarships, and is likely to negatively impact student health insurance, on-campus housing, and the four-year graduation guarantee. Students must also petition to be enrolled in more than 19 credit hours in any given semester.

Sequence of Courses

Students are expected to follow the curriculum recommended by their major department/program.

A student who receives a grade of D+ or lower in a course that is prerequisite to another may not enroll in the succeeding course without an approved petition from the student's major department/program, the instructor of the succeeding course and the dean's office. (Check with the major department/program for more stringent requirements on prerequisite course grades.)

All courses are not necessarily offered each semester. According to college policy, undergraduate courses having an enrollment of fewer than 20 students may be cancelled. Students can minimize scheduling problems by closely following the curricular sequence recommended by their major department/program. If a course is unavailable, a student may petition to enroll for equivalent study.

Add and Drop Policies

See the Office of the Registrar web site (<http://www.colorado.edu/registrar>) for campuswide add and drop policies, and specific deadline dates for a given semester/term.

Engineering students may not enroll in more than 19 credit hours in a semester (17 credit hours for first-semester students) without an approved college petition.

After the final drop deadline, students must file a detailed college petition to request a late drop, which may be approved under the following conditions:

- After the tenth week of class, a student may be approved to late drop a course if they had not previously attended or participated in the course, handed in homework or taken any examinations. Course instructor approval is required.
- After the tenth week of class, a student may be approved to late drop a course only with documentation to verify circumstances beyond their control or a university error. Course instructor approval is required.

Students are responsible for being aware of the consequences of a late drop(s), including impacts on financial aid/scholarships, health insurance, on-campus housing eligibility, academic progress towards degree requirements, etc.

Withdrawal from the University

Withdrawal is the term used when a student wishes to drop all classes in a given semester/term. See the the Office of the Registrar web site (<http://www.colorado.edu/registrar>) for campuswide withdrawal deadlines and procedures.

If a student withdraws, college permission may be required for re-enrollment. Students who interrupt their course of study may be required to complete all current degree requirements and to repeat courses previously completed.

Repeating Courses

A student may not enroll more than three times in a course that applies towards degree requirements; furthermore, after the third attempt, a student may not substitute an equivalent course. This means that a student has a maximum of three opportunities to show sufficient mastery of a particular subject area, whether the course is from CU Boulder or through another collegiate institution. Furthermore, the most recent occurrence of the subject is the grade which is applied (e.g., to meet a grade required for a prerequisite course). If a student has earned AP or IB college credit and then subsequently enrolls in that course content, the later grade is applied. All grades will be employed to calculate grade point averages, including any courses which are repeated. Students are not to register for courses in which they already have received a final grade of C- or higher (unless their degree program requires a higher grade in the course).

Incompletes

Incomplete grades are given only when students, for documented reasons beyond their control, are unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given. An Incomplete Grade Record Form (<http://www.colorado.edu/engineering-advising/content/incomplete-grade-form>) must be completed by the instructor and student. In addition to reflecting the course and term taught, it also states what work must be completed to award the final grade and when the work must be finished (not to exceed one year). Incomplete grades are not calculated into the GPA. If a student does not complete a course assigned an Incomplete grade within one year, the Incomplete grade will automatically convert to an F grade. Students cannot repeat an equivalent course at another campus of the university or at another institution and expect the CU-Boulder grade of "I" to be removed, changed, or excluded from conversion to an F. A student is expected to complete any course with an "I" grade and not to re-enroll in a course in which a grade of "I" was awarded. Once the work has been completed, the instructor must complete and submit a Change of Record form. However, it is the student's responsibility to verify that the grade change was processed and is reflected properly on the transcript.

Credit Policies

Advanced Placement (AP)

College credit may be granted on the basis of scores earned on the College Board's Advanced Placement (AP) exams. The Admissions Office maintains a chart showing what AP exam scores must be earned to receive college credit (p. 106).

International Baccalaureate (IB)

College credit may be granted on the basis of International Baccalaureate (IB) program exam scores. The Admissions Office maintains a chart showing what IB exam scores must be earned to receive college credit (p. 107).

College-Level Examination Program Credit

College credit may be granted for select College-Level Examination Program (CLEP) examinations. The Admissions Office maintains a list of eligible CLEP exams and the minimum score required to earn college credit (p. 111).

Credit for Reserve Officers Training Corps (ROTC)

Up to 6 credit hours of approved ROTC courses may be counted toward a student's degree requirements in the humanities/social sciences. These approved courses may be found at www.colorado.edu/engineering/academics/policies/hss (<http://www.colorado.edu/engineering/academics/policies/hss>). With written approval from the student's major department/program, additional ROTC credit hours may be applied as free electives and/or technical professional electives.

No Credit Restrictions

In the College of Engineering and Applied Science, courses required for fulfillment of graduation requirements *cannot be taken for no credit (NC)*. Once a course has been taken for no credit, the course cannot be repeated for credit. Engineering students must petition for approval before enrolling for any course NC.

Pass/Fail Option

The primary purpose for offering courses on a pass/fail grading option is to encourage students to broaden their educational experience by selecting elective courses with this grade option without serious risk to their academic record. Individual departments may have rules that should be checked before registering for the pass/fail option. The college pass/fail policy is:

1. The maximum number of credit hours a student may elect with the pass/fail option shall be designated by the student's major department/program, but no more than 16 hours of pass/fail credit can be applied toward degree requirements. (Study abroad pass/fail credit hours are exempt from this limitation.)
2. Students should obtain advance approval via petition prior to selecting the pass/fail option using the College Petition Form. Course work taken pass/fail without appropriate approval may be reverted to the letter grade earned.
3. All students who wish to register for the pass/fail option in a fall or spring semester must do so by the third Friday after classes begin.
4. Students on academic recovery may not elect the pass/fail grade option.

Transfer Credit

After a prospective transfer student has been admitted, the Office of Admissions issues a transfer credit evaluation listing those courses acceptable for transfer by University of Colorado Boulder standards. A copy of this evaluation is made a part of the student's college record. The student's major department/program will then indicate which of those courses are acceptable in meeting engineering degree requirements. It is the responsibility of the transfer student to request final validation of the transfer credit hours by the major department/program and confirm that this validation is noted in the student's record.

If at any time a student wishes to have a course not previously accepted reconsidered for transfer, the student should consult with the faculty transfer credit evaluator in their major department/program to determine if petitioning for credit is in order.

Nontransferable Credit Hours

Students desiring to transfer credit hours from engineering technology programs should note that such credit hours are accepted only upon submission of evidence that the work involved was fully equivalent to that offered in this college.

Some technology courses are taught with titles and textbooks identical to those in similar engineering courses. These courses may still not

be equivalent to engineering courses because the areas of academic emphasis are divergent.

In order to assist engineering technology students with transfer problems, the following guidelines have been established:

1. Courses on basic subjects such as mathematics, physics, foreign languages, literature or history may be acceptable for transfer credit if they were taught as part of an accredited program for all students and were not specifically designated for technology students.
2. Students who have taken courses with technology designations that may be valid equivalents for engineering courses have these options:
 - They may petition for permission to waive the course requirement. The course requirement can be waived if students demonstrate that, by previous course work, individual study or work experience, they have acquired the background and training normally provided by the course. No credit is given for a waived course, but students may benefit from the waiver by being able to include more advanced work in their curriculum. A student will need to substitute an equivalent number of credit hours (approval by major department/program and college required). Other students may profit by repeating the course at this college and thus establishing a fully sound basis for what follows.
 - The appropriate University of Colorado Boulder academic department may recommend to the dean's office that credit be transferred to count toward the requirements for a related course in its curriculum. Credit cannot be given for vocational/technical or remedial courses under rules of the university.
 - The student may seek credit for the course by examination, if available, and the student pays the appropriate fee.

For more information on transfer of credit policies, see Transfer of College-Level Credit (p. 111) in the Admission section of this catalog.

Petition Policy

A student desiring a waiver of college or department/program policies must request and secure approval for this waiver through a petition procedure. Petitions (<http://www.colorado.edu/engineering-advising/forms>) are first presented to the student's major department/program for review, followed by review at the dean's office. It is the student's responsibility to obtain official notification of the petition decision from the dean's office.

Final Grade Appeal

If a student (rostered in any college/school on campus) wishes to appeal the final grade in a course offered by a College of Engineering and Applied Science academic unit, refer to the College's official grade appeal policy and procedures (<http://www.colorado.edu/p17ac5aa8dc5/rules-policies/grade-appeal-policy>).

Academic Advising

Students are advised by professional staff advisors (<http://www.colorado.edu/engineering-advising>) and faculty mentors from their respective major department/program, typically at least once a semester. Students use MyCUHub (<http://www.colorado.edu/mycuhub>) to communicate with advisors, schedule appointments, explore majors, etc.

Premedical Option

Students interested in meeting requirements for entry into medical or other health professions schools while earning a degree in engineering

should consult with a prehealth advisor (<http://www.colorado.edu/career/exploring-interests/interest-areas/pre-health>). Students should also discuss their plans with their primary academic advisor, since some of the required course work may fulfill electives in their engineering curriculum.

Four-Year Graduation Guarantee

For academically prepared freshmen who do not wish to extend their studies beyond eight semesters, the University of Colorado extends a guarantee (<http://www.colorado.edu/engineering-advising/get-your-degree/graduation/four-year-graduation-guarantee>) that required or essential courses, or acceptable alternative courses, will be available to allow each student to complete all course work required for a bachelor of science degree from the College of Engineering and Applied Science no later than the end of eight consecutive semesters of full-time enrollment. In the event the University of Colorado is not successful in meeting the terms of this guarantee, the university will reimburse the student all tuition and course fees for those courses remaining to successfully complete the previously designated bachelor of science degree.

Degree and Graduation Requirements

To be eligible for any of the baccalaureate degrees from the College of Engineering and Applied Science, students must meet graduation requirements (<http://www.colorado.edu/engineering-advising/get-your-degree/graduation-requirements>). Students should run an online degree audit and meet with their academic advisor to discuss progress towards degree requirements, and then when appropriate, apply for graduation on MyCUInfo according to timelines provided by the College, Graduate School, and/or the Registrar's Office.

Dual Degrees

A student in the College of Engineering and Applied Science may be able to obtain two degrees in engineering, or obtain one degree in engineering and obtain one in another field, such as business, music or one of the arts and sciences disciplines. Full degree requirements must be met for each degree program.

Programs of Study

Aerospace Engineering Sciences

Aerospace Engineering Sciences prepares students for successful and rewarding careers in aerospace and other high-tech industries, national research laboratories, government services, and academia. This program provides students unique opportunities to develop in-depth technical knowledge, effective communication skills, and a systems engineering perspective that enables them to develop creative solutions to complex problems. The curriculum encompasses core aerospace subjects including fluids, thermodynamics, dynamics, orbital mechanics, structures, and systems; design of air and space vehicles; and exciting multidisciplinary applications including bioastronautics, unmanned systems, remote sensing, and GPS.

The mission of the Department of Aerospace Engineering Sciences (<http://www.colorado.edu/aerospace>) is to provide quality education, including hands-on learning, and to conduct foremost research in aerospace engineering sciences. These goals are accomplished through fundamental and multidisciplinary research and by preparing aerospace engineering students to meet the needs of 21st-century society through the conception, design, and application of aerial and spacecraft systems.

The department is uniquely characterized by:

- blending aeronautics, astronautics, and science applications;
- providing an undergraduate experience characterized by rigorous preparation in mathematics and engineering sciences, a hands-on experiential approach to learning, and an extensive emphasis on design in a systems context;
- emphasizing in our graduate education and research programs forefront aerospace technology development and the integration of engineering and science activities to solve critical problems in the earth and space sciences; and
- creating graduates who are broadly educated, interdisciplinary, agile, team-oriented engineers and scientists, with end-to-end mission and systems perspectives.

Educational Objectives

During their first three to five years after graduation, Aerospace Engineering Sciences graduates will have:

- established themselves in professional careers or received a graduate degree;
- demonstrated ethical leadership, project management and/or innovation; and
- played significant roles in the research and development of engineering systems and products.

Desired Outcomes

Students completing the undergraduate degree in aerospace engineering will be knowledgeable in the following areas:

- the professional context of the practice of aerospace engineering and expectations of new graduates in aerospace engineering organizations, including an awareness of ethics issues, economics, and the business environment;
- the history of aerospace engineering, providing a perspective on current events;
- aerospace engineering as a highly multidisciplinary endeavor, requiring a systems perspective to integrate technologies and manage complexity; and
- major principles and scientific methods underlying the technologies comprising aerospace vehicles and systems.

Upon graduation, students will have developed the following general skills and abilities:

- strong written, oral, and graphical communication skills;
- an ability to quantitatively estimate, model, analyze, and compute;
- an ability to define and conduct experiments using modern laboratory instruments, and to interpret experimental results;
- an ability to seek out and gather information, enabling independent, and lifelong learning;
- interpersonal and organizational skills that enable individuals to work effectively in teams and assume leadership positions;
- an ability to identify needs, requirements, and constraints, and to design appropriate reliable engineering solutions;
- an ability to formulate technical problems clearly, and to correctly apply appropriate methods and procedures for their solution;
- an ability to program computers, and skills in the use of modern engineering analysis, simulation software and operating systems; and

- an ability to understand societal needs, business issues, and the ethical concerns and responsibility of the industry.

Course code for this program is ASEN.

Bachelor's Degree

- Aerospace Engineering Science - Bachelor of Science (BS) (p. 630)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Nisar Razzi (https://experts.colorado.edu/display/fisid_153237)
Assistant Professor; PhD, Cornell University

ASEN 1000 (1) Introduction to Aerospace Engineering Sciences

Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics.

Requisites: Restricted to students with 0-26 credits (Freshmen) Aerospace Engineering (ASEN) or Engineering Open Option majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1022 (3) Materials Science for Aerospace Engineers

Covers prerequisite chemistry topics for materials science and introduces material types, properties and behavior for aerospace engineers.

Topics include review of chemistry; atomic bonding; crystals; diffusion; mechanical/thermal properties; phase diagrams; heat treatment; failure mechanisms; materials selection; and a general introduction to modern materials for aerospace engineering applications including composites, nanomaterials and metamaterials. Lab project or tensile testing is included.

Requisites: Requires prerequisite courses of APPM 1350 or MATH 1300 (minimum grade C). Requires corequisite courses of CHEN 1310 or ECEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320. Restricted to Aerospace Engineering (ASEN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 1400 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500

Requisites: Restricted to College of Engineering students with a maximum of 50 credit hours.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1969 (3) Pathway to Space

Explore the many paths one can take to be a part of a space-related career in a unique, engaging and interactive course. Students will learn about the following topics: space science and exploration, human spaceflight and life sciences, aeronautics and near space, launch and spacecraft systems, climate and environment, space business, policy and politics, space arts, media, and history.

Requisites: Restricted to Space Minor students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Specialized Courses

ASEN 2001 (4) Aerospace 1: Introduction to Statics, Structures, and Materials

Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. Matlab proficiency required. Offered fall only.

Requisites: Requires prereqs of PHYS 1110 APPM 1350 or MATH 1300 APPM 1360 or MATH 2300 CSCI 1310 or 1320 CHEN 1310 or CSCI 1300 or ECEN 1310 (all min grade C). Requires coreqs of ASEN 2002 2012 APPM 2350. Restricted to Aerospace Eng (ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 2002 (4) Aerospace 2: Introduction to Thermodynamics and Aerodynamics

Introduces the fundamental principles and concepts of thermodynamics and fluid dynamic systems. Emphasizes the synthesis of basic science (physics), mathematics and experimental methods that form the basis for quantitative and qualitative analyses of general aerospace technology systems. Proficiency in Matlab required. Offered fall only.

Requisites: Requires prereqs of PHYS 1110 APPM 1350 or MATH 1300 APPM 1360 or MATH 2300 CSCI 1310 or 1320 CHEN 1310 or CSCI 1300 or ECEN 1310 (all min grade C). Requires coreqs of ASEN 2001 2012 APPM 2350. Restricted to Aerospace Eng (ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 2003 (5) Aerospace 3: Introduction to Dynamics and Systems

Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control. Class includes experimental and design laboratory exercises for aerospace applications of dynamic principles. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2001 and ASEN 2012 and APPM 2350 (all minimum grade C). Requires corequisite courses of APPM 2360 and ASEN 2004. Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 2004 (5) Aerospace 4: Aerospace Vehicle Design and Performance

Introduction to design and analysis of aircraft and spacecraft. Aircraft topics include cruise performance, wing design, propulsion, stability, control, and structures. Spacecraft topics include rocket staging, orbit selection, launch systems, and spacecraft subsystems. Includes laboratory experiments and team design exercises. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2001 and ASEN 2002 and ASEN 2012 and APPM 2350 (all minimum grade C). Requires corequisite courses of APPM 2360 and ASEN 2003. Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 2012 (2) Experimental and Computational Methods in Aerospace Engineering Sciences

Introduces statistical, experimental, and computational methods used in aerospace engineering sciences. Usage of MatLab is extensive. Offered fall only.

Requisites: Requires a prerequisite course of CHEN 1310 or CSCI 1300 or ECEN 1310 or CSCI 1310 or CSCI 1320 (min grade C). Requires corequisite courses of ASEN 2001 and ASEN 2002 and APPM 2350. Restricted to Aerospace Eng (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 2519 (1-6) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisites: varies.

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 2849 (1-3) Independent Study

Study of special projects agreed upon by student and instructor. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 3036 (3) Introduction to Human Spaceflight

Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Professional Area Elective for ASEN majors.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3046 (3) Introduction to Humans in Aviation

Investigates the history of manned aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Professional Area Elective for ASEN majors.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3111 (4) Aerodynamics

Develops the fundamental concepts of aerodynamics and provides a working knowledge for their application to the design of aircraft and launch vehicles operating at various speeds and altitudes, as well as the atmospheric forces on satellites. Offered fall only.

Requisites: Requires prerequisite courses of ASEN 2002 and ASEN 2004 and APPM 2360 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 3112 (4) Structures

Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations. Offered fall only.

Requisites: Requires prerequisite courses of ASEN 2001 and ASEN 2003 and ASEN 2004 and APPM 2360 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 3113 (4) Thermodynamics and Heat Transfer

Focuses on the applications of the first and second laws of thermodynamics to control volumes and teaches the fundamental concepts of different modes of energy and heat transfer. Learn to use these concepts in gas dynamics, high-speed vehicle spacecraft design, environmental systems, and energy analysis. Offered fall only.

Requisites: Requires prerequisite courses of ASEN 2002 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 3116 (3) Introduction to Biomedical Engineering

Addresses human responses to environment and physical stimuli. Makes use of engineering and physical principles in the study of human dynamics, arriving at reasonable solutions to 15 major areas of biomedical consent. Instructor consent required.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3128 (4) Aircraft Dynamics

Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft and how they impact aircraft design. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2002 and ASEN 2003 and ASEN 2004 and APPM 2360 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 3200 (4) Orbital Mechanics/Attitude Dynamics and Control

Presents the fundamentals of orbital mechanics, 3D rigid body dynamics and satellite attitude dynamics and controls. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2003 and ASEN 2004 and APPM 2360 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 3300 (4) Aerospace Electronics and Communications

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics and radio communication. Offered spring only.

Requisites: Requires prerequisite courses of ASEN 2003 and PHYS 1120 and APPM 2360 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 3519 (1-4) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner.

Department enforced prerequisite: varies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 3930 (6) Aerospace Engineering Cooperative Education

Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Aerospace Engineering (ASEN) majors only.

Recommended: Prerequisite GPA above 3.0.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Specialized Courses

ASEN 4010 (3) Introduction to Space Dynamics

Includes central force fields, satellite orbits, rocket dynamics, orbital transfer, interplanetary mission analysis, and perturbation due to atmospheric drag and Earth oblateness.

Requisites: Requires prerequisite course of ASEN 3200 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 4012 (3) Aerospace Materials

Studies aerospace grade aluminum, magnesium, nickel, and titanium alloys. Covers heat treatment, defect structures, failure mechanisms, corrosion and its prevention, the effect of space radiation on materials, and high and low temperature effects. Introduces composite materials with a lab design and experiment. Emphasizes the selection of materials in design with procedures for choosing materials rationally. Case studies include aerogels, carbides, composites, powder metallurgy, nanomaterials, and advanced materials manufacturing technologies.

Requisites: Requires prerequisite course of ASEN 2001 (minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4013 (3) Foundations of Propulsion

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets.

Requisites: Requires prerequisite courses of ASEN 3113 and APPM 2360 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4018 (4) Senior Projects 1: Design Synthesis

Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only.

Requisites: Requires prereq courses of ASEN 3111, 3112, 3113, 3128, 3200 and 3300 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engr (ASEN) Aerospace or Engr-Concurrent Degree (C-ASEN) students majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4028 (4) Senior Projects 2: Design Practicum

Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Department consent required. Offered spring only.

Requisites: Requires prerequisite course of ASEN 4018 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4057 (3) Aerospace Software

Provides an overview of prevalent software and hardware computing concepts utilized in practice and industry. Establishes the background necessary to tackle programming projects on different computing platforms with various software tools and programming languages.

Requisites: Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites CSCI 1320 or ECEN 1310 or CHEN 1310.

Additional Information: Departmental Category: Computational and Analytical Methods

ASEN 4090 (3) Global Positioning Systems Applications

Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. Culminates in student design projects using GPS.

Requisites: Requires prerequisite courses of APPM 2360 and CHEN 1310 (all minimum grade C).

Recommended: Prerequisite junior/senior standing in engineering.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 4114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5114

Requisites: Requires prerequisite courses of ASEN 3128 and ASEN 3200 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4123

Requisites: Requires prerequisite course of ASEN 3112 or MCEN 3030 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4128 (3) Human Factors in Engineering and Design

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4138 (3) Aircraft Design

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft.

Requisites: Requires prerequisite course of ASEN 3128 (minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5215 and ATOC 4215 and ATOC 5215

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 4216 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation and functional magnetic resonance imaging.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5216 and ECEN 4811

Requisites: Requires prerequisite course of ASEN 3300 or ECEN 2260 or ECEN 3030 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 4218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5218

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) or Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5222

Requisites: Requires prerequisite course of ASEN 3112 and prerequisite or corequisite course of ASEN 4012 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4238 (3) Computer-Aided Control Systems Design

Covers Matlab and Simulink software, and multivariable control system synthesis and analysis techniques for typical aerospace control problems. Students formulate control problems and synthesize control functions using lineage quadratic techniques. Includes numerical integration of differential equations and nonlinear simulation of orbit and attitude dynamics.

Requisites: Requires prerequisite course of APPM 2360 (minimum grade C).

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4248 (3) Computer-Aided Control System Design 2

Studies theory and engineering applications of Kalman filter techniques. Covers discrete and continuous filters, the extended Kalman filter, and their application to guidance, navigation, and control, including satellite orbit and attitude problems, inertial and control navigation, and the Global Positioning System.

Requisites: Requires prerequisite course of ASEN 4238 (minimum grade C).

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4255 (3) Environmental Aerodynamics

A review of the properties and causes of hazards posed by the environment, ranging from atmospheric wind shear to tornadic flows. Involves a multidisciplinary approach combining analytical, numerical, scale modeling studies with extensive field measurements, wind energy and biophysical aerodynamics.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5255

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 4338 (3) Computer Analysis of Structures

Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required.

Requisites: Requires prerequisite course of ASEN 3112 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5426 and ECEN 4821 and ECEN 5821

Requisites: Requires prerequisite course of ASEN 3300 or ECEN 2260 or ECEN 3030 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 4519 (1-3) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner.

Department enforced prerequisite varies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 4849 (1-6) Independent Study

Special projects agreed upon by student and instructor. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 4859 (1-6) Undergraduate Research

Assigns a research problem on an individual basis. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

Aerospace Engineering Science - Bachelor of Science (BS)

The undergraduate curriculum in Aerospace Engineering Sciences (<http://www.colorado.edu/aerospace/prospective-students/undergraduates>) is designed to prepare students to advance to a distinguished professional career in the aerospace industry or for graduate school, consistent with our stated Program Educational Objectives. In particular, this involves providing students with an interdisciplinary systems perspective of aerospace engineering. The curriculum accomplishes these goals by:

- providing a strong basis in mathematics, science, and engineering fundamentals;
- extending these fundamentals to advanced topics in aerospace engineering;
- complementing the engineering education with sufficient exposure to the humanities and social sciences; and
- beginning and ending in major design experiences that stress an interdisciplinary systems perspective.

AES students are also encouraged to consider a technical minor or double major in electrical engineering, computer science, applied math, engineering physics, astrophysical and planetary sciences, or atmospheric and oceanic sciences. In most cases, the junior- and senior-level courses required for the above-mentioned minors can be applied to the professional area elective requirements.

For students having sufficient ability and interest, planning for graduate study should begin by the start of the junior year. Such a plan should consider the foreign language requirements of appropriate graduate schools and an advanced mathematics program. Students who wish to combine the business and aerospace engineering sciences curricula are advised to consider obtaining the BS degree in aerospace and a master's degree in business rather than a combined BS degree.

Bioengineering Option/Premedical Curriculum

Courses can be specifically designed for students who wish either to attend medical school or to enter graduate work in bioengineering after receiving the BS degree. Students should consult their academic advisor, as well as their prehealth advisor, regularly to assure the adequacy of their curricula.

Concurrent Degree Program BS/MS in Aerospace Engineering Sciences

The Concurrent BS/MS Program (<http://www.colorado.edu/aerospace/current-students/undergraduates/bsms-degree>) in Aerospace Engineering Sciences enables the program's top BS students to be admitted to the MS program during the junior or senior year, and to work thereafter toward both the BS and MS degrees in aerospace engineering sciences. This program allows for early planning of the MS portion of the student's education, taking graduate courses as part of the BS degree requirements, more flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit hour load. Up to 6 credit hours may be counted towards both the BS and MS degree programs. Therefore, in theory, the minimum number of credit hours required for the concurrent BS/MS degrees will be 152. Current University of Colorado Boulder aerospace students are eligible to apply after they have completed eight core ASEN courses and have a minimum CU Boulder cumulative and ASEN major GPA of 3.250.

Requirements

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite for another required course is C. If a grade of C- or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C or higher.

The minimum passing grade for a course that is not specifically a prerequisite for another required course is D-.

The Aerospace Engineering Sciences (AES) department reserves the right to drop students enrolled in ASEN courses who have not met the minimum prerequisite grade requirements. It is the student's responsibility to communicate with the department if summer course work and/or transfer credit will be used to meet the prerequisite requirement.

Aerospace engineering students are expected to take Applied Math (APPM) courses for the required mathematics courses (APPM 1350, APPM 1360, APPM 2350, APPM 2360) once they have matriculated into the program.

Course Requirements

The BS curriculum in aerospace engineering sciences is revised annually to keep up with new advances in technology, to make use of new educational methodologies, and to satisfy updated program accreditation criteria. A total of 128 credit hours is required.

Students who are unsure of their major selection are advised to take Chemistry for Engineers & Lab (CHEN 1211/CHEM 1221) in the fall of the freshman year in case the student decides to change their major. The 5 credit hours earned for this course may then apply as free electives for ASEN majors who take the class.

Sample Four-Year Plan of Study

Course	Title	Credit Hours
Freshman		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
First-Year Projects course		3
Humanities or social science elective ¹		3
CSCI 1320	Computer Science 1: Starting Computing-Engineering Applications	4
		Credit Hours
		14
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
ASEN 1022	Materials Science for Aerospace Engineers	3
PHYS 1110	General Physics 1	4

Free elective		3
	Credit	16
	Hours	
	Total Credit	128
	Hours	

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Professional Area Electives

- Any ASEN course at the 4000 level or above that is not a required course can be used as a professional area elective.
- A professional area elective (PAE) is generally a course in math, engineering, or science at the 3000-level or above. Elective courses most likely to help an aerospace engineer's career development are ASEN, APPM, CSCI, ECEN, and PHYS courses. It is suggested that students secure advance approval for professional area elective courses from their advisor.
- Upper-division independent study from technical areas (math, science, and engineering) is acceptable for up to 6 credit hours of professional area elective credit. The upper-division ROTC courses AIRR 3010, NAVR 3030 and NAVR 3040 are acceptable for 3 credit hours of professional area elective credit.

A full listing of approved PAE courses can be found in the degree audit.

Applied Mathematics

Applied mathematics graduates have the expertise and mathematical sophistication necessary to make contributions in a wide variety of fields, including scientific computation, actuarial science, financial modeling, and most areas of science and engineering that have a mathematical basis.

A professional applied mathematician may work with engineers, scientists, programmers, and other specialists. The curriculum at CU Boulder is designed to have the breadth for such an interdisciplinary career.

Course offerings at the undergraduate level focus on providing students with mathematical tools, problem-solving strategies, and expertise useful in science and engineering. To fulfill requirements, a concentrated area of engineering courses (or approved natural science courses) must be completed. The college has formulated several recommended options within the discipline.

The Department of Applied Mathematics (<http://www.colorado.edu/amath>) in the College of Engineering & Applied Science offers a BS degree in applied mathematics. The BS degree is designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines. A minor in Applied Mathematics (p. 153) and a minor in Statistics (p. 159) are offered through the College of Arts & Sciences.

The objectives of the Department of Applied Mathematics at CU Boulder are summarized below:

- provide undergraduate and graduate students with high-quality education and training in applied mathematics, and prepare them for careers in industry, laboratories, and the academic professions;
- offer and monitor degree programs leading to BS, MS, and PhD degrees in applied mathematics;

- nourish and maintain a professional environment in which excellence in teaching, learning, scholarship, and creativity are of central importance;
- assure teaching and research expertise in a number of key areas of applied mathematics including the methodology of applied mathematics, computational mathematics and algorithms, industrial applications, mathematical biology, applied probability, and statistics.

Courses at the undergraduate level provide training in a broad range of mathematical techniques and problem-solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability and statistics, complex variables, and nonlinear dynamics. Since applied mathematicians often are involved in interdisciplinary work, the BS degree requires an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. The BS degree also requires knowledge of a programming language and skill in using the computer.

Course code for this program is **APPM**.

Desired Outcomes

The undergraduate degree in applied mathematics emphasizes knowledge and awareness of:

- differential and integral calculus in one and several variables;
- vector spaces and matrix algebra;
- ordinary and partial differential equations;
- at least one programming language;
- at least one application software package in either mathematics or statistics;
- methods of complex variables as used in applications; and
- numerical solutions of linear and nonlinear problems.

In addition, students completing a degree in applied mathematics acquire:

- an in-depth knowledge of an area of application (an engineering discipline or a natural science field or one of the quantitative areas of business and economics);
- knowledge of problem-formulation, problem-solving and modeling techniques, and strategies central to applications; and
- the ability to communicate analytic arguments clearly and concisely in oral and written forms.

Bachelor's Degrees

- Applied Mathematics - Bachelor of Science (BS) (p. 637)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ablowitz, Mark J (https://experts.colorado.edu/display/fisid_100691)
Professor; PhD, Massachusetts Institute of Technology

Bebernes, Jerrold
Professor Emeritus

Becker, Stephen R (https://experts.colorado.edu/display/fisid_154263)
Assistant Professor; PhD, California Institute of Technology

Beylkin, Gregory (https://experts.colorado.edu/display/fisid_100437)
Professor; PhD, New York University

Bhat, Yermal Sujeet (https://experts.colorado.edu/display/fisid_146506)
Instructor; PhD, University of Florida

Bortz, David Matthew (https://experts.colorado.edu/display/fisid_143348)
Associate Professor; PhD, North Carolina State University at Raleigh

Clauset, Aaron Julian (https://experts.colorado.edu/display/fisid_147554)
Assistant Professor; PhD, University of New Mexico

Corcoran, Jem (https://experts.colorado.edu/display/fisid_118142)
Associate Professor; PhD, Colorado State University

Cox, Murray William (https://experts.colorado.edu/display/fisid_153192)
Instructor; PhD, Texas AM University

Curry, James H (https://experts.colorado.edu/display/fisid_105730)
Professor; PhD, University of California-Berkeley

Dougherty, Anne Margaret (https://experts.colorado.edu/display/fisid_101349)
Senior Instructor; PhD, University of Wisconsin-Madison

Dukic, Vanja (https://experts.colorado.edu/display/fisid_148718)
Professor; PhD, Brown University

Easton, Robert
Professor Emeritus

Fornberg, Bengt (https://experts.colorado.edu/display/fisid_108048)
Professor; PhD, Univ of Uppsala (Sweden)

Grooms, Ian G (https://experts.colorado.edu/display/fisid_155588)
Assistant Professor; PhD, University of Colorado Boulder

Hoefer, Mark (https://experts.colorado.edu/display/fisid_154264)
Associate Professor; PhD, University of Colorado Boulder

Julien, Keith (https://experts.colorado.edu/display/fisid_108913)
Professor; PhD, University of Cambridge (England)

Kilpatrick, Zachary Peter (https://experts.colorado.edu/display/fisid_155782)
Assistant Professor; PhD, University of Utah

Kleiber, William Paul (https://experts.colorado.edu/display/fisid_151943)
Assistant Professor; PhD, University of Washington

Li, Congming (https://experts.colorado.edu/display/fisid_100647)
Professor; PhD, New York University

Lladser, Manuel Bosco (https://experts.colorado.edu/display/fisid_134170)
Associate Professor; PhD, Ohio State University

Manteuffel, Thomas A (https://experts.colorado.edu/display/fisid_102137)
Professor; PhD, University of Illinois at Urbana-Champaign

Martinsson, Per-Gunnar J (https://experts.colorado.edu/display/fisid_141180)

Professor; PhD, University of Texas at Austin

McCormick, Steven

Professor Emeritus

Meiss, James D (https://experts.colorado.edu/display/fisid_103702)

Professor; PhD, University of California-Berkeley

Meyer, Francois Georges (https://experts.colorado.edu/display/fisid_115559)

Professor; PhD, INRIA (France)

Norris, Jan Adam (https://experts.colorado.edu/display/fisid_101412)

Senior Instructor; PhD, University of Colorado Boulder

Restrepo, Juan G (https://experts.colorado.edu/display/fisid_145811)

Associate Professor; PhD, University of Maryland College Park Campus

Segur, Harvey (https://experts.colorado.edu/display/fisid_102287)

Professor; PhD, University of California-Berkeley

Zaharatos, Brian R (https://experts.colorado.edu/display/fisid_156225)

Instructor; MS, Colorado School of Mines

APPM 1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1021 or MATH 1150

Requisites: Restricted to College of Engineering or Pre-Engineering Arts and Sciences majors only. Requires or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

APPM 1340 (4) Calculus 1 with Algebra, Part A

Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills

APPM 1345 (4) Calculus 1 with Algebra, Part B

Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1340 (minimum grade C-).

APPM 1350 (4) Calculus 1 for Engineers

Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330
Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills

APPM 1360 (4) Calculus 2 for Engineers

Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2300
Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

APPM 2350 (4) Calculus 3 for Engineers

Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2400
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2360 (4) Introduction to Differential Equations with Linear Algebra

Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations.

Equivalent - Duplicate Degree Credit Not Granted: both MATH 2130 and MATH 3430
Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2450 (1) Calculus 3 Computer Lab

Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.

Requisites: Requires a corequisite course of APPM 2350.
Grading Basis: Pass/Fail

APPM 2460 (1) Differential Equations Computer Lab

Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.

Requisites: Requires enrollment in a corequisite course of APPM 2360.
Grading Basis: Pass/Fail

APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics

Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students. These topics have the potential to be incorporated into the core APPM curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

Grading Basis: Letter Grade

APPM 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps

Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

APPM 3010 (3) Chaos in Dynamical Systems

Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.

Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APPM 3050 (3) Scientific Computing in Matlab

Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.

Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APPM 3170 (3) Discrete Applied Mathematics

Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruencies; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.

Requisites: Requires a prerequisite or corequisite course of APPM 2350 or APPM 2360 or MATH 2400 (prereq minimum grade C-).

APPM 3310 (3) Matrix Methods and Applications

Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 and MATH 2135

Requisites: Requires prerequisite course of APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).

APPM 3350 (3) Advanced Engineering Calculus

Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

APPM 3570 (3) Applied Probability

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3810 or MATH 4510

Requisites: Requires a prerequisite or corequisite course of APPM 2350 or MATH 2400 (prereq minimum grade C-).

APPM 4120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5120 and MATH 4120 and MATH 5120

Requisites: Requires a prerequisite course of APPM 3310 or MATH 2130 or MATH 2135 (minimum grade C-).

APPM 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5350

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 2130 or MATH 2135 (prereq minimum grade C-).

APPM 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5360

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 2130 or MATH 2135 (prereq minimum grade C-).

APPM 4380 (3) Modeling in Applied Mathematics

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5380

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

APPM 4390 (3) Modeling in Mathematical Biology

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5390

Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 (all minimum grade C-).

APPM 4440 (3) Undergraduate Applied Analysis 1

Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 2130 or MATH 2135 (prereq minimum grade C-).

APPM 4450 (3) Undergraduate Applied Analysis 2

Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.

Requisites: Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

APPM 4500 (3) Statistical Collaboration

Educates and trains students to become effective interdisciplinary collaborators by developing the communication and collaboration skills necessary to apply technical statistics and data science skills to help domain experts answer research questions. Topics include structuring effective meetings and projects; communicating statistics to non-statisticians; using peer feedback, self-reflection and video analysis to improve collaboration skills; creating reproducible statistical workflows; working ethically.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5500

Requisites: Requires a prerequisite course of APPM 4520 (minimum grade C-).

Grading Basis: Letter Grade

APPM 4505 (2) Advanced Statistical Collaboration

Educates and trains students to become advanced interdisciplinary collaborators by developing and refining the communication, collaboration and technical statistics and data science skills necessary to collaborate with domain experts to answer research questions. Students work on multiple projects. Discussions center on technical skills necessary to solve research problems and video analysis to improve communication and collaboration skills.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5505

Requisites: Requires prerequisite course of APPM 4500 or APPM 5500 (minimum grade C-).

Grading Basis: Letter Grade

APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5510

Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 (all minimum grade C-).

Grading Basis: Letter Grade

APPM 4520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5520 and MATH 4520 and MATH 5520

Requisites: Requires prerequisite course of APPM 3570 or MATH 4510 (minimum grade C-).

APPM 4530 (3) Stochastic Analysis for Finance

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5530

Requisites: Requires prerequisite courses of APPM 3570 and APPM 3310 (all minimum grade C-). Requires prerequisite or corequisite course of APPM 4350 (minimum grade C-).

Grading Basis: Letter Grade

APPM 4540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models modeling and forecasting with ARIMA models, spectral analysis and frequency filtration.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5540 and MATH 4540 and MATH 5540

Requisites: Requires prerequisite course of APPM 4520 or MATH 4520 (minimum grade C-).

APPM 4550 (3) Spatial Statistics

Introduces the theory of spatial statistics with applications. Topics include basic theory for continuous stochastic processes, spatial prediction and kriging, simulation, geostatistical methods, likelihood and Bayesian approaches, spectral methods and an overview of modern topics such as nonstationary models, hierarchical modeling, multivariate processes, methods for large datasets and connections to spines.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5550

Requisites: Requires prerequisite course of APPM 4520 or APPM 5520 or MATH 4520 or MATH 5520 (minimum grade C-).

Grading Basis: Letter Grade

APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5560

Requisites: Requires prerequisite course of APPM 3570 or MATH 4510 (minimum grade C-).

APPM 4570 (3) Statistical Methods

Covers basic statistical concepts with accompanying introduction to the R programming language. Topics include discrete and continuous probability laws, random variables, expectation and variance, central limit theorem, testing hypothesis and confidence intervals, linear regression analysis, simulations for validation of statistical methods and applications of methods in R.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5570

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 4580 (3) Introduction to Statistical Learning

Consists of applications and methods of statistical learning. Covers multiple linear regression, classification, regularization, splines, tree-based methods, support vector machines and unsupervised learning.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5580

Requisites: Requires prerequisite course of APPM 4570 or APPM 5570 (minimum grade C-).

APPM 4590 (3) Statistical Modeling

Introduces methods, theory and applications of statistical models, from linear models (simple and multiple linear regression), to hierarchical linear models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples and exercises will be demonstrated using statistical software.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5590

Requisites: Requires prerequisite course of APPM 4520 or APPM 4570 or MATH 4520 (minimum grade C-).

APPM 4650 (3) Intermediate Numerical Analysis 1

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4650

Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

APPM 4660 (3) Intermediate Numerical Analysis 2

Continuation of APPM 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations. Department enforced prerequisite: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4660

Requisites: Requires prerequisite course of APPM 4650 or MATH 4650 (minimum grade C-).

APPM 4720 (1-3) Open Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5720

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

APPM 4840 (1-3) Reading and Research in Applied Mathematics

Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.

Repeatable: Repeatable for up to 9.00 total credit hours.

APPM 4950 (1-3) Seminar in Applied Mathematics

Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Applied Mathematics - Bachelor of Science (BS)

The Department of Applied Mathematics in the College of Arts and Sciences offers a BS Degree in Applied Mathematics (<http://www.colorado.edu/amath/prospective-students/undergraduate>) through the College of Engineering and Applied Science. The BS degree is designed to prepare graduates for exciting and diverse professional careers, and for graduate study in a wide variety of disciplines.

Courses at the undergraduate level provide training in a broad range of mathematical techniques and problem-solving strategies. These courses teach the concepts and methods central to applications of linear algebra, ordinary and partial differential equations, numerical analysis, probability and statistics, complex variables, and nonlinear dynamics. Since applied mathematicians often are involved in interdisciplinary work, the BS degree requires an in-depth knowledge of some area of science or engineering where mathematics is used. This knowledge prepares graduates to successfully communicate and cooperate with engineers and scientists. The BS degree also requires knowledge of a programming language and skill in using the computer.

Research Opportunities

The Department of Applied Math offers a broad range of undergraduate research opportunities funded by National Science Foundation grants, and students can gain professional exposure through the student chapter of the Society of Industrial and Applied Mathematics (SIAM) on campus.

Working with faculty, applied math students have developed solutions to a variety of problems in fluids, dynamical systems, data analysis, networks, signal processing, math biology, math education, and numerics. Applied math students also worked with faculty to develop the Mathematical Visualization Toolkit, an award-winning online instructional tool that helps students better visualize calculus concepts.

Concurrent Degree Programs

BS/MS in Applied Mathematics (<http://www.colorado.edu/amath/academics/bs-ms-program>)

The concurrent BS/MS program in applied mathematics enables well-qualified and motivated students to experience graduate-level course work earlier in their education and to obtain an MS degree in a reduced time period. Applied math majors may apply for this program during their junior year. Minimum requirements for admission include completion of at least two APPM courses numbered 3000 or higher, an overall GPA of 3.400 or higher, a minimum GPA of 3.400 in APPM and MATH courses and two letters of recommendation from APPM faculty. Students interested in this program are encouraged to consult with an applied mathematics faculty advisor early in their undergraduate career.

BS in Applied Mathematics and MS in Interdisciplinary Telecommunications Program (ITP)

Communications and networking systems play an increasingly central role in our individual lives and society. Social networks, internet-based commerce, wireless networks, and remote access to education and medical care all depend on the reliable, secure and efficient use of network hardware consisting of mobile devices, switches, routers, data centers, and cellular base stations. This concurrent program enables well-qualified students to be admitted to the ITP MS program during the junior year of their BS program, and to work thereafter towards earning both the BS and MS degrees. This concurrent degree program is aimed at the specific needs of companies requiring engineers with an integrated knowledge of mathematical techniques to develop and implement secure networks and data centers that are interconnected by state of the art broadband links. For more information, please contact an ITP or APPM advisor.

Dual Degree Program

BS in Applied Mathematics and Civil Engineering

As an exceptional opportunity for talented students who are interested in analytical and computational methods related to civil engineering and general engineering science, the applied mathematics and civil engineering departments offer a streamlined track by which a student can earn a baccalaureate degree from both programs with a minimum of 15 extra credit hours. Consult faculty advisors in applied mathematics and civil engineering for information and admission.

Requirements

The BS Degree in Applied Mathematics requires the satisfactory completion of a minimum of 128 credit hours as follows.

Required Courses and Semester Credit Hours

Calculus

APPM 1350	Calculus 1 for Engineers ¹	4
APPM 1360	Calculus 2 for Engineers ¹	4
APPM 2350	Calculus 3 for Engineers ¹	4

Computing Experience

Select one of the following:		3-4
CSCI 1300	Computer Science 1: Starting Computing	4
CSCI 1310	Computer Science 1: Starting Computing - Experienced	4
CSCI 1320	Computer Science 1: Starting Computing-Engineering Applications	4
CHEN 1310	Introduction to Engineering Computing	3
ECEN 1310	C Programming for ECE	4

Science Requirement

PHYS 1110	General Physics 1	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
Select at least 5 additional credit hours of chemistry or biology (including 2 credit hours of laboratory science) from one of the following:		5-8
CHEN 1211 & CHEM 1221	General Chemistry for Engineers and Engineering General Chemistry Lab	5
CHEM 1113 & CHEM 1114	General Chemistry 1 and Laboratory in General Chemistry 1	5

EBIO 1210 & EBIO 1220 & EBIO 1230 & EBIO 1240	General Biology 1 and General Biology 2 and General Biology Laboratory 1 and General Biology Laboratory 2	8
---	---	---

MCDB 1150 & MCDB 1151 & MCDB 2150 & MCDB 2151	Introduction to Cellular and Molecular Biology and Introduction to Cell and Molecular Biology Lab and Principles of Genetics and Principles of Genetics Laboratory	8
---	--	---

APPM Courses

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
APPM 3310	Matrix Methods and Applications	3
APPM 4350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	3
APPM 4360	Methods in Applied Mathematics: Complex Variables and Applications	3
APPM 4650	Intermediate Numerical Analysis 1	3
Select one of the following:		3
APPM 4440	Undergraduate Applied Analysis 1	3
MATH 3001	Analysis 1	3
MATH 3140	Abstract Algebra 1	3

APPM or MATH Courses Numbered 4000 or Above

A two-semester course sequence of applied mathematics or mathematics courses numbered 4000 or above in addition to APPM 4350 and APPM 4360, for example:

APPM 4380 & APPM 4390	Modeling in Applied Mathematics and Modeling in Mathematical Biology	6
APPM 4440 & APPM 4450	Undergraduate Applied Analysis 1 and Undergraduate Applied Analysis 2	6
APPM 4570 & APPM 4580	Statistical Methods and Introduction to Statistical Learning	6
APPM 4560 & APPM 4520	Markov Processes, Queues, and Monte Carlo Simulations and Introduction to Mathematical Statistics	6
APPM 4650 & APPM 4660	Intermediate Numerical Analysis 1 and Intermediate Numerical Analysis 2	6
APPM 3570 & APPM 4520	Applied Probability and Introduction to Mathematical Statistics ²	6
APPM 3570 & APPM 4560	Applied Probability and Markov Processes, Queues, and Monte Carlo Simulations ²	6

APPM or MATH Courses Numbered 3000 or Above

A minimum of 24 credit hours in applied mathematics or mathematics courses numbered 3000 or above (including the required courses) ³

Engineering Courses

A minimum of 24 credit hours in engineering (see "Recommended Options For Applied Math Majors" below)

General Bachelor's Degree Requirements

15 credit hours of humanities & social sciences electives ⁴	15
3 credit hours of writing ⁵	3

Total Credit Hours 216-220

¹ With a minimum grade of C-.

² APPM 3570 is the only 3000-level course that can be used to satisfy this requirement.

³ No more than 3 credit hours of APPM 4840 may count toward these 24. No more than 6 credit hours of independent study are allowed for credit toward the BS degree in applied mathematics.

⁴ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

⁵ Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Recommended Options for Applied Math Majors

In order to fulfill their degree requirements, applied mathematics majors are required to take 24 credit hours in engineering or approved courses with significant mathematical content in A&S or Business courses, with at least 6 credit hours in courses numbered 3000 or above and at least 15 credit hours in courses numbered 2000 or above. Here are several possible options. It should be stressed that the listed courses and options are **suggestions** and not **requirements**. Final course selection should be made in consultation with an applied math advisor.

These 24 credit hours are in addition to those required credit hours listed in "Computing Experience" and "Science Requirement" (mentioned above). HUEN 3100, HUEN 3200, and HUEN 4200 may not be used to fulfill this requirement, although they may be used as humanities and social sciences electives. Several possible options are listed separately.

I. Aerospace Engineering Sciences

ASEN 2001	Aerospace 1: Introduction to Statics, Structures, and Materials	4
ASEN 2002	Aerospace 2: Introduction to Thermodynamics and Aerodynamics	4
ASEN 2003	Aerospace 3: Introduction to Dynamics and Systems	5
ASEN 2004	Aerospace 4: Aerospace Vehicle Design and Performance	5
ASEN 2012	Experimental and Computational Methods in Aerospace Engineering Sciences	2
Take at least 6 credit hours of ASEN courses at the 3000-level or above		6
Total Credit Hours		26

Advising Note: Students wishing to enroll in ASEN courses must register through an Aerospace advisor. Students who pursue this option are typically double majors.

II. Chemical Engineering Option

CHEN 1211 & CHEM 1221	General Chemistry for Engineers and Engineering General Chemistry Lab	5
Recommended courses (to bring to a total of 25 credit hours):		20
CHEN 2120	Chemical Engineering Material and Energy Balances	3
CHEN 3200	Chemical Engineering Fluid Mechanics	3
CHEN 3210	Chemical Engineering Heat Transfer	3
CHEN 3220	Chemical Engineering Separations and Mass Transfer	3
CHEN 3320	Chemical Engineering Thermodynamics	3
CHEN 4521	Physical Chemistry for Engineers	3
CHEN 4330	Chemical Engineering Reaction Kinetics	3

CHEM 3311	Organic Chemistry 1	4
Total Credit Hours		50

Students choosing this option must take CHEN 1310 as part of their applied math major. CHEN 1310 is a prerequisite for CHEN 2120.

III. Computer Science Option

Required Course

CSCI 2270	Computer Science 2: Data Structures ¹	4
-----------	--	---

Additional Courses

Additional courses to bring the total number of credit hours to 24; at least two of these must be at the 3000 level. Possible choices include:

CSCI 2400	Computer Systems	4
CSCI 3104	Algorithms ²	4
CSCI 3155	Principles of Programming Languages	4
CSCI 3287	Design and Analysis of Data Systems	3
CSCI 3308	Software Development Methods and Tools	3
CSCI 3753	Design and Analysis of Operating Systems	4

Additional CSCI courses to bring the total number of credit hours to at least 24

Total Credit Hours		46
--------------------	--	----

¹ CSCI 2270 has CSCI 1300 as a prerequisite

² CSCI 3104 has APPM 3170 or CSCI 2824 as a prerequisite.

Advising note: Students completing the computer science option should have a minor in computer science. Check with the Computer Science Department.

IV. Technology, Arts & Media Option

Required Courses

ATLS 2000	The Meaning of Information Technology ¹	3
ATLS 2100	Image	3
ATLS 2200	Web	3
ATLS 2300	Text	3
ATLS 3000	Code	3
CSCI 2270	Computer Science 2: Data Structures ²	4
CSCI 3104	Algorithms ³	4
CSCI 4229	Computer Graphics	3

Additional Courses

Recommended additional courses to bring the total to at least 24 credit hours:

Advisor approved technical electives to complete the ATLAS/TAM Certificate in Digital Media		
CSCI 3202	Introduction to Artificial Intelligence	3
CSCI 4448	Object-Oriented Analysis and Design	3

Total Credit Hours		36
--------------------	--	----

¹ This course may be used to satisfy EITHER 3 credit hours of H&SS requirement or the applied math area of emphasis, but not both.

² CSCI 1300 is a prerequisite for CSCI 2270

³ APPM 3170 or CSCI 2824 or ECEN 2703, or MATH 2001 are prerequisites for CSCI 3104

Students are advised to take APPM 3570, APPM 4560, and APPM 4660 as part of their applied math course work.

Advising Note: Students interested in the ATLAS/TAM Certificate (<http://tam.colorado.edu>) in Digital Media and the ATLS Minor in Technology, Arts & Media should contact the ATLAS program.

V. Electrical & Computer Engineering Option

The Department of Electrical and Computer Engineering offers two separate minor programs.

1. Students interested in this option should consult with an advisor as several areas are available (computer engineering, electrical engineering, signals and systems, and electrical renewable energy systems.) A minimum of 24 credit hours is required.
2. Student choosing this option should plan on taking CSCI 1300 and CSCI 2270.

Advising Note: Students interested in the ECE option should contact the Electrical, Computer, and Energy Engineering (<http://www.colorado.edu/engineering/academics/degree-programs/electrical-computer-engineering>) department.

VI. Engineering Physics / Physics Option

Recommended courses after first-year Physics:	23-24
PHYS 2130 General Physics 3	3
or PHYS 2170 Foundations of Modern Physics	
PHYS 2150 Experimental Physics 2	1
PHYS 2210 Classical Mechanics and Mathematical Methods 1	3
PHYS 3210 Classical Mechanics and Mathematical Methods 2	3
PHYS 3220 Quantum Mechanics 1	3
PHYS 3310 Principles of Electricity and Magnetism 1	3
PHYS 3320 Principles of Electricity and Magnetism 2	3
PHYS 3330 Electronics for the Physical Sciences	2
or PHYS 4230 Thermodynamics and Statistical Mechanics	
Additional physics courses to total at least 24 credit hours	0-1
Total Credit Hours	44-46

Students choosing this option are advised to take APPM 3570. MATH 3140 may also be useful for students interested in theoretical physics.

Advising Note: Students completing the Physics Option should have a minor in physics. Check with the Physics Department.

VII. Mechanical Engineering Option

Recommended courses:	
MCEN 2023 Statics and Structures	3
MCEN 2043 Dynamics	3
MCEN 2063 Mechanics of Solids	3
MCEN 3012 Thermodynamics	3
MCEN 3021 Fluid Mechanics	3
MCEN 3022 Heat Transfer	3
MCEN 3025 Component Design	3
MCEN 4043 System Dynamics	3
Total Credit Hours	24

Students choosing this option are advised to take APPM 4570, or APPM 3570 and APPM 4520 as part of their applied math major.

Students wishing to enroll in MCEN courses must do so through the MCEN advisor.

VIII. Civil, Environmental and Architectural Engineering Option

Recommended basic courses:	12
CVEN 2121 Analytical Mechanics 1	3
AREN 2110 Thermodynamics	3
CVEN 3161 Mechanics of Materials 1	3
CVEN 3313 Theoretical Fluid Mechanics	3
Select 2 courses from any one of the following groups plus additional courses to bring the total credit hours to 24:	12

Group A

CVEN 3414 Fundamentals of Environmental Engineering	3
CVEN 4333 Engineering Hydrology	3

Group B

CVEN 3525 Structural Analysis	3
CVEN 3708 Geotechnical Engineering 1	3
CVEN 4545 Steel Design	3
CVEN 4555 Reinforced Concrete Design	3

Group C

AREN 3010 Mechanical Systems for Buildings	3
AREN 3540 Illumination I	3

Total Credit Hours	60
--------------------	----

Students wishing to enroll in CVEN courses that are restricted to majors only must do so through the CVEN advisor.

The Applied Mathematics and Civil Engineering departments offer a streamlined dual-degree track for talented students who are interested in analytical and computational methods related to civil engineering and general engineering science. Students can complete a double major from both programs with a minimum of 143 credits. Consult APPM-CVEN double major program faculty advisors in Applied Mathematics and Civil Engineering for additional information.

IX. Actuarial Option

BCOR 1025, is a prerequisite for BCOR 2200 and BCOR 2002. Students are advised to substitute an applied math prob/stats course for this prerequisite.

The following courses should be taken:	24
BCOR 2002 Principles of Accounting and Finance (prerequisite waived for Actuarial Certificate students)	3
ECON 2010 Principles of Microeconomics ¹	4
ECON 2020 Principles of Macroeconomics ¹	4
ECON 3070 Intermediate Microeconomic Theory ^{2,4}	4
ECON 3080 Intermediate Macroeconomic Theory ^{2,4}	3
ECON 4070 Topics in Microeconomics	3
FNCE 3010 Corporate Finance ^{2,4}	3
Some (or all) of the following courses should be taken:	3-9
FNCE 3030 Investment and Portfolio Management	3
FNCE 4040 Derivative Securities ⁵	3
ECON 4818 Introduction to Econometrics	3

Total Credit Hours	60-66
--------------------	-------

Students are required to take APPM 3570³, APPM 4520^{2,6}, and APPM 4540^{2,6} for the actuarial option. Students are strongly advised to take APPM 4560⁶.

Additional courses that may be useful include ACCT 3220, ACCT 3230, and BCOR 3000. These courses can be taken only if space is available on the first day of the semester.

- ¹ ECON 2010 and ECON 2020 may not count toward the 24 credit hours of the option requirement; however, they can be used to meet the 18-credit-hour social science/humanities requirement of the College of Engineering.
- ² The Society of Actuaries requires students to take certain college courses that will earn the Validation by Educational Experiences (VEE) credit. Courses marked with a ² satisfy this requirement, provided a grade of B- or better is obtained. These courses are also required for students completing the Actuarial Certificate Program. VEE credit is granted for both BCOR 2200 and FNCE 3010.
- ³ The first actuarial examination, Exam P/1, can be taken after completing this course.
- ⁴ The second actuarial examination, Exam FM/2, can be taken after completing these courses, as well as a self-study in interest theory.
- ⁵ The third actuarial examination, Exam MFE/3, can be taken after completing APPM 4560, FNCE 4040, and an independent study.
- ⁶ The fourth actuarial examination, Exam C/4, can be taken after completing these courses.

X. Finance Option

BCOR 1025 is a prerequisite for BCOR 2200 and BCOR 2002. Students are advised to substitute an applied math prob/stats course for this prerequisite.

Recommended basic courses:		14-16
BCOR 2002	Principles of Accounting and Finance	3
FNCE 3010	Corporate Finance	3
ECON 2010	Principles of Microeconomics ¹	4
ECON 2020	Principles of Macroeconomics ¹	4
ECON 3070	Intermediate Microeconomic Theory	4
ECON 3080	Intermediate Macroeconomic Theory	3
ECON 4818	Introduction to Econometrics	3
Select a minimum of two of the following courses in order to meet the 24 credit hour requirements of the option. All of them must be taken to complete the requirements of the Quantitative Finance Certificate Program:		8-10
ACCT 3220	Corporate Financial Reporting 1	3
FNCE 3030	Investment and Portfolio Management	3
FNCE 4040	Derivative Securities	3
FNCE 4820	Topics in Finance	3
FNCE 4070	Financial Markets and Institutions	3
Total Credit Hours		61-65

¹ ECON 2010, ECON 2020 may not count toward the 24 credit hours of the option requirement; however, they can be used to meet the 18-credit-hour social science/humanities requirement of the College of Engineering.

Students are required to take APPM 3570 and APPM 4520 as part of the major's required 24 credits at 3000-level or above, for the finance option. Students are advised to take APPM 4560 and APPM 4540 if time permits.

Additional courses that may be taken as time permits:

ACCT 3230	Corporate Financial Reporting 2	3
FNCE 4000	Financial Institutions Management	3
FNCE 4050	Capital Investment Analysis	3
FNCE 4060	Special Topics in Finance	1-6

Advising note: Students wishing to take College of Business courses cannot register until the first day of classes. However, students can register for BCOR/FNCE courses in summer sessions. Alternatively, students can apply for admittance to the Actuarial Studies and Quantitative Finance Certificate Program (<http://www.colorado.edu/asqf/>). Students accepted into this program receive preferential treatment with respect to other non-business students when registering for business courses. For more information, please see your applied math advisor.

XI. Computational Biology and Bioinformatics Option

The following concentration of selected courses from computer science, biology and chemistry provide the foundation for work in mathematical biology, computational biology and/or bioinformatics.

Required courses:

CSCI 2270	Computer Science 2: Data Structures (Note: CSCI 1300 is a prerequisite for CSCI 2270)	4
CHEM 3311 & CHEM 3321	Organic Chemistry 1 and Laboratory in Organic Chemistry 1	5
MCDB 1150 & MCDB 1151	Introduction to Cellular and Molecular Biology and Introduction to Cell and Molecular Biology Lab	4
MCDB 2150 & MCDB 2151	Principles of Genetics and Principles of Genetics Laboratory	4
MCDB 3135 & MCDB 3140	Molecular Cell Biology I and Cell Biology Laboratory	5
CSCI 4314	Algorithms for Molecular Biology	3
Total Credit Hours		25

Advising Note: Students selecting this option are advised to take APPM 3570, APPM 4520, APPM 4540, and APPM 4390 as part of their applied math course work. Other recommended courses include CSCI 3104 and CSCI 3287.

Sample Curriculum for the BS Degree in Applied Mathematics

(128 Hours needed for graduation)

Course	Title	Credit Hours
Year One		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
CHEN 1211	General Chemistry for Engineers	4

CHEM 1221	Engineering General Chemistry Lab	1
CSCI 1300	Computer Science 1: Starting Computing	4
Humanities or Social Sciences Elective ¹		3
		Credit Hours 16
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
PHYS 1110	General Physics 1	4
Free Electives		6
Humanities or Social Sciences Elective ¹		3
		Credit Hours 17
Year Two		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
APPM 2450	Calculus 3 Computer Lab (Recommended, Not Required)	1

Free Electives		7
		Credit Hours 16
		Total Credit Hours 128

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Chemical and Biological Engineering

The Department of Chemical and Biological Engineering (<http://www.colorado.edu/chbe>) offers degrees at the bachelor's, master's and doctoral levels. The department offers two distinct BS degree

programs, one in chemical engineering and one in chemical and biological engineering. Both programs are accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

The standard chemical engineering undergraduate program includes curricular options in energy, materials, and premedicine. There are active and exciting research and educational programs in biotechnology, pollution control, novel membrane separations, and advanced polymeric and ceramic materials. Chemical engineering prepares students for careers in a range of industries including energy, consumer products, petrochemicals, semiconductors, medicine, environment, and materials. Modern industry depends on chemical engineers to tailor manufacturing technology to the requirements of its products, and chemical engineers play a central role in development of new polymeric materials, alternative energy sources, and safe, efficient processes for chemical synthesis.

The chemical and biological engineering undergraduate program prepares students for careers in biotechnology, pharmaceuticals, medicine, and materials. This degree program adapts a core chemical engineering curriculum to allow for greater depth in biological aspects of chemical engineering. Exploring the structure of protein molecules, the functioning of cells, and the growth and regeneration of tissues are among the new frontiers that chemical and biological engineering students will address.

In addition to the standard chemical and biological curriculum, a premedicine curriculum is also offered. The chemical and biological engineering department has active research and educational programs in the exciting field of biotechnology, which involves the use of individual cells and their components for producing pharmaceuticals and other important products. The department is also active in biomedical engineering, which involves medical devices, tissues and biomaterials.

There are opportunities to specialize via electives, independent study, and research, and the BS in chemical engineering also offers optional variations to the core curriculum that allow students to specialize in energy and materials aspects of chemical engineering.

Given the international nature of most large chemical and engineering corporations and international cooperation in scientific and engineering research, students may carry out part of their studies in another country and are encouraged to consider this opportunity. Many faculty members have significant international experience.

Course code for this program is CHEN.

Cooperative Education and Internships

The Department of Chemical and Biological Engineering offers a formal Co-Op Program, where students obtain a BS in chemical engineering or a BS in chemical and biological engineering and significant industrial experience in five years.

Senior Thesis

The department offers this program for undergraduates with a strong interest in research. The student carries out a yearlong project under the direction of a faculty member in lieu of taking CHEN 4130 (for ChE students) or CHEN 4810 (for ChBE students). Students must apply at the end of their junior year.

Research Facilities

Chemical and biological engineering research facilities are extensive and modern. Nearly all research equipment is interfaced to computers for automated data collection, monitoring, and control. A full description of

chemical engineering research facilities can be found on the department website. (<http://www.colorado.edu/chbe>)

Bachelor's Degrees

- Chemical and Biological Engineering Bachelor of Science (BS) (p. 647)
- Chemical Engineering Bachelor of Science (BS) (p. 649)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

CHEN 1211 (4) General Chemistry for Engineers

One-semester lecture and recitation course designed to meet the general chemistry requirement for engineering students. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisites: one year of high school chemistry or CHEM 1021 (min. grade C-) and high school algebra. Not recommended for students with grade below B- in CHEM 1021.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113 or CHEM 1114 or CHEM 1400

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Corequisite CHEM 1221.

CHEN 1300 (1) Introduction to Chemical Engineering

Meets for one lecture per week. Introduces chemical engineering emphasizing history of the profession, curriculum, chemical industry, and industrial chemistry. Includes industry visits, oral presentations, faculty and professional meetings, and development of a goals statement.

Requisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

CHEN 1310 (3) Introduction to Engineering Computing

Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Matlab. Formerly GEEN 1300 and COEN 1300.

Requisites: Requires prerequisite or corequisite course of APPM 1340 or 1345 or 1350 or MATH 1300 (minimum grade C-). Restricted to College of Engineering majors or Pre-Engineering Arts and Sciences (PREN-COS) students only.

CHEN 2120 (3) Chemical Engineering Material and Energy Balances

Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes.

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEN 1310 (formerly GEEN 1300/COEN 1300; all minimum grade C-).

CHEN 2810 (3) Biology for Engineers

Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes.

CHEN 2840 (1-4) Independent Study

Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours.

CHEN 3010 (3) Applied Data Analysis

Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis.

Requisites: Requires prerequisite course of CHEN 1310 (formerly GEEN 1300/COEN 1300) and APPM 2360 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

CHEN 3200 (3) Chemical Engineering Fluid Mechanics

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 3313 and GEEN 3853 and MCEN 3021

Requisites: Requires prerequisite courses of APPM 2350 (min grade C-) or MATH 2400 (min grade C-) and CHEN 2120 (min grade C-) or MCEN 2023 (min grade C). Requires corequisite course of APPM 2360. Restricted to College of Engineering majors only.

CHEN 3210 (3) Chemical Engineering Heat Transfer

Examines conservation and transfer of thermal energy. Focuses on conduction and convection of heat in the context of chemical processes, with a special focus on heat exchangers. Also studies thermal radiation.

Requisites: Requires prerequisite course of either CHEN 3200 or MCEN 3021 (minimum grade C-). Restricted to College of Engineering majors only

CHEN 3220 (3) Chemical Engineering Separations and Mass Transfer

Studies separation methods including distillation, absorption, and extraction, and graphical and computer-based solutions to separation problems. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients. Applies mass transfer rate theory to packed and tray columns.

Requisites: Requires prerequisite courses of CHEN 3210 or MCEN 3022 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3320 (3) Chemical Engineering Thermodynamics

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes.

Requisites: Requires prerequisite courses of CHEN 2120 (minimum grade C) and CHEN 4521 or CHEM 4511 and CHEM 4531 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3660 (3) Energy Fundamentals

Explains the most important energy technologies and systems; provides tools to analyze performance using science and engineering principles. This course will investigate important energy concepts from sources and extraction to utilization, storage and efficiency. Topics include fossil fuels, hydropower, renewable energy, biofuels, carbon capture and waste disposal.

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 or MCEN 1024 and PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors only.

Grading Basis: Letter Grade

CHEN 3840 (1-4) Independent Study

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 3930 (6) Chemical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program. 00 GPA or higher.

Requisites: Requires prerequisite course of CHEN 2120 (minimum grade C). At least a 2.85 cumulative GPA is required. Restricted to College of Engineering majors only.

Recommended: Prerequisite 3.

CHEN 4010 (2) Chemical Engineering Senior Thesis 1

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4020 (2) Chemical Engineering Senior Thesis 2

Continuation of CHEN 4010. This course and CHEN 4020 can substitute for CHEN 4130.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4090 (1) Undergraduate Seminar

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4130 (3) Chemical Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis.

Emphasizes communication with written memos, full reports, and oral presentations.

Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3220 and CHEN 3320 and CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4330 (3) Chemical Engineering Reaction Kinetics

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors.

Requisites: Requires prerequisite courses of CHEN 3320 and APPM 2360 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4440 (3) Chemical Engineering Materials

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes.

Requisites: Requires prerequisite courses of CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5450

Requisites: Requires prerequisite courses of CHEN 4830 or CHEN 4330 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5460

Requisites: Requires prerequisite courses of CHEM 3311 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4520 (3) Chemical Process Synthesis

Studies applied chemical process design including equipment specification and economic evaluation.

Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3210 or MCEN 3022 and CHEN 3220 and CHEN 4330 or CHEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4521 (3) Physical Chemistry for Engineers

Examines the laws of classical thermodynamics followed by physical transformations of pure substances, the thermodynamics of simple mixtures and chemical equilibrium. Applies quantum theory to atomic and molecular structure. Presents the concepts and applications of statistical thermodynamics. Introduces rates of chemical reactions, reaction dynamics and catalysis.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires a corequisite course of APPM 2360. Restricted to College of Engineering majors only.

CHEN 4530 (2) Chemical Engineering Design Project

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report.

Requisites: Requires prerequisite course of CHEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4570 (4) Instrumentation and Process Control

Examines principles of control theory and their application to chemical processes. Focuses on single-loop feedback and feedforward control. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment.

Requisites: Requires prerequisite courses of CHEN 3220 and CHEN 4330 or CHEN 4830 and APPM 2360 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5630

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5650

Requisites: Requires prerequisite courses of APPM 2360 and CHEN 3200 or MCEN 3021 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4801 (3) Pharmaceutical Biotechnology

Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients.

Requisites: Requires prerequisite courses of CHEN 3320 and prerequisite or corequisite courses of CHEN 4830 or CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4802 (3) Tissue Engineering and Medical Devices

The purpose of this course is to develop a basic understanding of quantitative and qualitative aspects of tissue engineering and medical devices. Particular emphasis will be placed on topics of potential importance and significance to chemical and biological engineers. Students will be introduced to important professional, societal and entrepreneurial issues in the field by examining case studies in which drugs and medical products have been developed or are being considered for FDA approval and clinical use.

Requisites: Requires prerequisite course of CHEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

CHEN 4803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5803

Requisites: Requires prerequisite course of CHEM 4700 or CHEM 4611 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4805 (3) Biomaterials

Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5805

Requisites: Requires a prerequisite course of CHEN 2810 or MCDB 1150 or EBIO 1220 and 1230 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4810 (3) Biological Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations.

Requisites: Requires prerequisite courses of CHEN 2810 or MCDB 1150 and CHEN 3010 and CHEN 4830 (all minimum grade C-). Requires a corequisite course of CHEN 4820. Restricted to College of Engineering majors only.

CHEN 4820 (3) Biochemical Separations

Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes.

Requisites: Requires prerequisite course of CHEN 3220 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4830 (3) Chemical Engineering Biokinetics

Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics.

Requisites: Requires prerequisite course of CHEN 3320 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5836

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4838 (1-3) Special Topics in Chemical Engineering

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4840 (1-4) Independent Study

Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Chemical and Biological Engineering - Bachelor of Science (BS)

Program Educational Objectives

The department prepares its graduates to make significant contributions in many diverse areas. Specifically, within a few years of graduation our graduates will have achieved one or more of the following attributes:

- In their chosen field, be established in a professional career, be pursuing an advanced degree, or be seeking advanced certification.
- Be recognized as academic, industrial, or entrepreneurial leaders.
- Be successfully working and communicating in a variety of technical fields.
- Be adapting to new technologies and changing professional environments.

Program Outcomes

At the time of graduation, graduates will demonstrate:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental,

social, political, ethical, health and safety, manufacturability, and sustainability

- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- the appropriate written and verbal communication skills required to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in, lifelong learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
- an ability to apply engineering to biological systems
- a knowledge of advanced biological concepts

Premed Track

This track is offered for students preparing for medical school. Since chemical engineering already requires most of the premed courses, it is a logical choice for students who desire an engineering degree and the opportunity to pursue a medical profession. For information on the premed track, visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students>) webpage and consult the current advising guide.

Concurrent Degree Program

BS/MS in Chemical and Biological Engineering and Chemical Engineering

The concurrent BS/MS program in the Department of Chemical and Biological Engineering enables especially well qualified students to work concurrently towards a BS in chemical and biological engineering and a MS degree in chemical engineering. Students are admitted into the program during the spring of their junior year and begin planning a graduate program. This program allows for early planning of the MS portion of the student's education, taking graduate courses as part of their BS degree requirements. Up to 6 credit hours may be counted towards both the BS and MS degree programs.

Credit Hours	15
Total Credit Hours	128

- ¹ Course is offered only in the semester indicated.
- ² Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives on the college's Humanities, Social Sciences and Writing Requirements (<http://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>) webpage.
- ³ Electives must meet specific requirements. Visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students>) webpage and consult the current advising guide.
- ⁴ Alternate is CHEM 4700 and either CHEM 4720 or CHEM 4740.
- ⁵ One of the following courses must be taken as the focus technical elective: Pharmaceutical Biotechnology (CHEN 4801, 3), Tissue Engineering and Medical Devices (CHEN 4802, 3) or Metabolic Engineering (CHEN 4803, 3). These courses will be taught in alternating years and should be taken in the junior or senior year as available.
- ⁶ Students may choose a course from the list of college-approved writing courses on the college's Humanities, Social Sciences and Writing Requirements (<http://www.colorado.edu/engineering-advising/get-your-degree/degree-requirements/humanities-social-sciences-and-writing-requirements>) webpage.

Chemical Engineering - Bachelor of Science (BS)

Chemical engineers are responsible for producing products based on chemical processing and chemical transformations. They carry out basic research# they design, build, operate and manage chemical processes and plants# and they supply petroleum products, renewable resources, plastics, detergents, agricultural chemicals, pharmaceuticals, biological compounds, photographic materials, microelectronic devices and various food and other products. Today's processes must be energy efficient, nonpolluting and profitable. Thus, students must master inorganic, organic and physical chemistry, mathematics, statistics, computers, physics and often biology and biochemistry. Students must learn to apply these fundamentals in the process industries. Paralleling the technical courses are studies in the humanities and the social sciences.

Program Educational Objectives

The department prepares its graduates to make significant contributions in many diverse areas. Specifically, within a few years of graduation our graduates will have achieved one or more of the following attributes:

- In their chosen field, be established in a professional career, be pursuing an advanced degree or be seeking advanced certification.
- Be recognized as academic, industrial or entrepreneurial leaders.
- Be successfully working and communicating in a variety of technical fields.
- Be adapting to new technologies and changing professional environments

Program Outcomes

- an ability to apply knowledge of mathematics, science and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate and solve engineering problems
- an understanding of professional and ethical responsibility
- the appropriate written and verbal communication skills required to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
- a recognition of the need for, and an ability to engage in, lifelong learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills and modern engineering tools necessary for engineering practice

Program Tracks

Curricular options have been established in fields of major importance and particular interest. To follow one of these options requires careful planning and course selection by student and advisor.

Energy Track

Chemical engineers continue to be involved with all aspects of energy, including traditional energy (petroleum) as well as solar and renewable sources of energy. This option supplements the standard curriculum with coursework that will provide a vital foundation for students wishing to enter the energy fields.

Materials Track

The need to develop new materials for a rapidly broadening spectrum of applications is one of the major technological challenges confronting applied science. Chemical engineers have the required background in chemistry and transport theory to contribute significantly in this area. This option focuses on polymeric and ceramic materials by complementing the chemical engineering curriculum with elective courses stressing the interrelationship between materials fabrication, structure, properties and performance.

Premed Track

This track is offered for students preparing for medical school. Since chemical and engineering already requires most of the premed courses, it is a logical choice for students who desire an engineering degree and the opportunity to pursue a medical profession.

Concurrent Degree Program BS/MS in Chemical Engineering

The concurrent BS/MS program in the Department of Chemical and Biological Engineering enables especially well qualified students to work concurrently towards a BS in chemical engineering and a MS degree in chemical engineering. Students are admitted into the program during the spring of their junior year and begin planning a graduate

program. This program allows for early planning of the MS portion of the student's education, taking graduate courses as part of their BS degree requirements. Up to six credit hours may be counted towards both the BS and MS degree programs.

Requirements

General Program Requirements

While there are several tracks, only the Standard Curriculum is shown here. For details on the other tracks, visit the department's Current Students (<http://www.colorado.edu/chbe/academics/undergraduate-program/current-students>) webpage and consult the current advising guide.

Civil, Environmental & Architectural Engineering

Civil Engineering

Civil engineering offers a wide range of careers for students interested in the planning, design, and construction management of facilities essential to modern life in both the public and private sectors. Varying widely in nature, size and scope, such facilities include buildings, bridges, tunnels, highways, transit systems, dams, airports, irrigation projects, water treatment and distribution facilities, waste treatment and processing

facilities, structures for space exploration, and offshore engineering designs applications.

In the coming decades, almost two billion more people will populate earth in both developed and developing countries. This growth will create unprecedented demands and opportunities for new methods and innovations in energy production, food supply, land development, water treatment, transportation systems, materials processing, waste disposal, healthcare delivery, environmental preservation and structural designs. Civil engineers play both direct and indirect roles in meeting many of these needs, with the goal of providing and improving the quality and infrastructure of life.

Environmental Engineering

Environmental engineering plays a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of sustainable engineering solutions to environmental problems impacting the biosphere and land, water, and air quality. Environmental issues affect almost all commercial and industrial sectors, and are a central concern for the public, for all levels of government and in international relations.

In common with other engineering fields, courses in solid mechanics, fluid dynamics, and thermal sciences are central to the environmental engineering degree. Course work specific to environmental engineering includes environmental chemistry and microbiology, as well as treatment processes and approach.

Architectural Engineering

Architectural engineering prepares students for leadership careers in the building design, consulting, construction, and management industry and for research at the graduate level on building- and sustainability-related topics. In particular, the architectural engineering program prepares students to design, build and operate facilities that improve our quality of life. This course of study fulfills the academic requirements for registration as a professional engineer.

The architectural engineering curriculum is recommended for those wishing to specialize within the building industry in engineering design (heating, cooling, illumination, electrical, solar, and structures) or construction and contracting (facilities management). Architectural engineering students may select from several concentration areas, including: structural systems; mechanical systems (heating, ventilating and air conditioning); lighting and electrical systems; and construction engineering and management.

Course codes for these programs are AREN, CVEN and EVEN.

Bachelor's Degrees

- Architectural Engineering - Bachelor of Science (BS) (p. 672)
- Civil Engineering - Bachelor of Science (BS) (p. 674)
- Environmental Engineering - Bachelor of Science (BS) (p. 676)

Minors

- Architectural Engineering - Minor (p. 679)
- Civil Engineering - Minor (p. 680)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor; PhD, University of Colorado Boulder

Courses

AREN 1027 (3) Engineering Drawing

Introduces engineering drawing including sections and dimensioning, print readings, computer 3D, and building information modeling (BIM).

Requisites: Restricted to Engineering Physics (EPEN), Architectural (AREN), General Engineering (GEEN) or Civil (CVEN) Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

AREN 1037 (3) Building Information Modeling

Learn to develop and communicate physical information using three-dimensional graphical systems including Computer-Aided Design (CAD) and Building Information Models (BIM). Learn to dimension and scale physical systems and interpret scaled drawings. Get experience with industry standard software tools (REVIT) used to produce design and construction documents, and apply BIM and CAD tools in a project producing scaled 3-D drawings.

Additional Information: Departmental Category: Miscellaneous

AREN 1316 (1) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

AREN 2050 (3) Building Materials and Systems

Covers the broad subject of building materials and systems. Includes a practical approach to assembly details, methods of construction, codes, foundations, steel, concrete, masonry, cladding, doors and windows, interiors, finishes, mechanical, plumbing, electrical, life safety and conveyance. Includes investigation of an existing facility along with a team presentation trends in commercial building construction.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Civil (CVEN) or Architectural (AREN) or GEEN (General) or Applied Mathematics (AMEN) majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 2110 (3) Thermodynamics

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics.

Requisites: Requires a prereq course of PHYS 1110 (min grade C-) and a prereq or coreq course of APPM 1360 or MATH 2300 (min grade C-). Restricted to AREN, CVEN or EVEN, GEEN, AMEN or EVENCVEN Concurrent Degree majors only.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence Departmental Category: Building Systems Engineering

AREN 2120 (3) Fluid Mechanics and Heat Transfer

Explores fundamental principles of fluid mechanics and heat transfer. Topics include fluid statics, momentum and energy conservations; laminar and turbulent viscous flows; conduction, convection and radiation heat transfer. Emphasizes topics and problems that are important to Architectural Engineers including flow of fluids in pipes and ducts, heat transfer in buildings and building systems.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400, and AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 (all minimum grade C-). Requires corequisite course of APPM 2360. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 2830 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Special Topics

AREN 3010 (3) Mechanical Systems for Buildings

Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems.

Requisites: Requires prerequisite courses of AREN 2120 or MCEN 3021 and 3022 and AREN 2050 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 3050 (3) Environmental Systems for Buildings 1

Explores operations and architectural design strategies of environmental (climate) control systems in buildings with a focus on sustainability and resource efficiency. Topics include thermal comfort and indoor air quality, building thermal and moisture loads, HVAC equipment and systems and active and passive thermal strategies in buildings.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Program in Environmental Design major or minor students only. College of Engineering majors are excluded from this course.

Additional Information: Departmental Category: Building Systems Engineering

AREN 3060 (3) Environmental Systems for Buildings 2

Explores operations and architectural design strategies of plumbing, power distribution, renewable electricity generation, illumination, daylighting, acoustical control, vertical transportation, fire protection and telecommunication systems in buildings with a focus on sustainability and resource efficiency.

Requisites: College of Engineering majors are excluded from this course.

Additional Information: Departmental Category: Building Systems Engineering

AREN 3140 (3) Illumination Laboratory

Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Taught intermittently.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 3540 (3) Illumination I

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture.

Requisites: Requires prerequisite course of CHEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5010

Requisites: Requires prerequisite course of AREN 4110 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4035 (3) Architectural Structures 1

Analyzes basic structural systems. Covers principles of mechanics and mechanical properties of materials and analysis and design of trusses, arches, and cable structures. For nonengineering students; does not apply toward an engineering degree.

Requisites: Requires prerequisite course of PHYS 1110 or PHYS 2010 and APPM 1350 or MATH 1300 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Program in Environmental Design majors only.

Additional Information: Departmental Category: Structures

AREN 4045 (3) Architectural Structures 2

Analyzes basic structural systems. Covers principles of mechanics as applied to the design of flexural members, columns, continuous beams, and rigid frames. For nonengineering students; does not apply toward an engineering degree.

Requisites: Requires prerequisite course of AREN 4035 (minimum grade C-).

Additional Information: Departmental Category: Structures

AREN 4110 (3) HVAC Design

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5110

Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4130 (3) Optical Design for Illumination and Solid State Lighting

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5130

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4315 (3) Design of Masonry Structures

Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams, and columns by working stress and strength design methods.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

AREN 4317 (5) Architectural Engineering Design

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual, schematic, and design development phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produce a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation of designs.

Requisites: Requires prerequisite courses of ARCH 4010 and AREN 3010 and AREN 3540 and CVEN 3246 and CVEN 3525 and ECEN 3030 (all minimum grade C-).

Additional Information: Departmental Category: Miscellaneous

AREN 4506 (3) Pre-construction Estimating and Scheduling

Integrates project management methods with an emphasis on the techniques used to create bid-day budgets and schedules for architectural and civil engineering projects.

Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Architectural (AREN), Civil (CVEN) or General (GEEN) Engineering majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Construction

AREN 4530 (3) Advanced Lighting Design

Intended to help students understand light as a medium in design, begin the formulation of a philosophical perspective for its application, and continue to develop the skills required to design and implement lighting systems. Knowledge from previous lighting classes (Illumination I and Illumination II) is essential to this course.

Requisites: Requires prerequisite courses of AREN 3540 and AREN 4550 (all minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Taught intermittently.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5540

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Recommended: Prerequisite AREN 4550.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4550 (3) Illumination 2

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4560 (3) Luminous Radiative Transfer

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis. Taught intermittently.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings.

Requisites: Requires prerequisite course of ECEN 3030 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar and sky modeling, luminous radiative transfer, design methods, and controls for integration with electric lighting systems.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4590 (3) Computer Graphics in Lighting Engineering

Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Taught intermittently.

Requisites: Requires prerequisite courses of AREN 3540 and AREN 4560 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4606 (3) Construction Project Execution and Control

Integrates project execution and control techniques for construction scope, cost and schedule. Includes progress measurement, resource planning, earned value methods, productivity, risk management methods and key contract clauses.

Requisites: Requires prerequisite courses of CVEN 3246 and AREN 4506 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Architectural (AREN) or General (GEEN) Engineering majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Construction

AREN 4830 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Special Topics

AREN 4836 (1-3) Special Topics For Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 30.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

AREN 4837 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Additional Information: Departmental Category: Special Topics

AREN 4849 (1-3) Independent Study

Offers an independent, in-depth study, research or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

AREN 4890 (3) Sustainable Building Design

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5890

Requisites: Requires a prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering students only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.

Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5990

Requisites: Requires prerequisite course of AREN 2120 and APPM 2360 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5010 (3) HVAC System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4010

Recommended: Prerequisite AREN 4140.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5020 (3) Building Energy Audits

Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5050 (3) Advanced Solar Design

Predicts performance and analyzes economics of low-temperature, high-temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite AREN 2120.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5070 (3) Thermal Analysis of Buildings

Examines response factors, conduction transfer functions and weighting factors for dynamic analysis of building envelopes. Also studies radiative and convective exchange in buildings, internal gains and infiltration analysis as modeled in hourly simulations.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5080 (3) Computer Simulation of Building Energy Systems

Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure.

Requisites: Requires prerequisite course of AREN 4110 or AREN 5110 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5110 (3) HVAC Design

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4110

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5130 (3) Optical Design for Illumination and Solid State Lighting

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4130

Recommended: Prerequisite AREN 3540.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Taught intermittently.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4540

Recommended: Prerequisites AREN 3540 and AREN 4550.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5890 (3) Sustainable Building Design

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4890

Requisites: Restricted to graduate students only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.

Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4990

Requisites: Restricted to graduate students only.

Recommended: Prerequisites AREN 2120 and APPM 2360.

Additional Information: Departmental Category: Building Systems Engineering

AREN 6940 (1) Master's Degree Candidate

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Building Systems Engineering

AREN 6950 (1-6) Master's Thesis

Additional Information: Departmental Category: Building Systems Engineering

AREN 6960 (1-3) Master's Report

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Building Systems Engineering

AREN 8990 (1-10) Doctoral Thesis

A minimum of 30 credit hours is required.

Additional Information: Departmental Category: Building Systems Engineering

CVEN 1317 (1) Introduction to Civil and Environmental Engineering

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 1837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 2012 (3) Introduction to Geomatics

Presents basic techniques of land and construction surveying, including measurement of position, elevation, orientation and length of lines, area, volume and layout calculations. Optical, GPS and GIS equipment and methods are included.

Requisites: Restricted to Architectural (AREN) or Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 2121 (3) Analytical Mechanics 1

Applies mechanics to the study of static equilibrium of rigid and elastic bodies. Includes composition/resolution of forces; moments/couples; equivalent force systems; free-body diagrams; equilibrium of particles and rigid bodies; forces in trusses/beams; frictional forces; first/second moments of area; moments and products of inertia.

Equivalent - Duplicate Degree Credit Not Granted: GEEN 2851 and MCEN 2023

Requisites: Requires a prereq course of PHYS 1110 (min grade C-). Requires a prereq or coreq course of APPM 2350 or MATH 2400 (min grade C-). Restricted CVEN or EVEN or AREN or AMEN or EPEN or GEEN majors with a CIV, ENR or ARC subplan.

Additional Information: Departmental Category: Mechanics

CVEN 2837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 3022 (3) Construction Surveying

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data.

Requisites: Requires prerequisite course of CVEN 2012 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3032 (3) Photogrammetry

Familiarizes students with characteristics of aerial photographs. Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3111 (3) Analytical Mechanics 2

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions.

Requisites: Requires prerequisite courses of CVEN 2121 (minimum grade C-). Requires a co-requisite course of APPM 2360. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Mechanics

CVEN 3141 (2) Engineering Materials Lab

Additional Information: Departmental Category: Mechanics

CVEN 3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 2063

Requisites: Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or Engineering Management (EMEN) or General (GEEN) Engineering majors with a CIV, ENR or ARC subplan.

Additional Information: Departmental Category: Mechanics

CVEN 3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Miscellaneous

CVEN 3246 (3) Introduction to Construction

Provides a broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law and financial management. Students with a Business School Real Estate emphasis may be considered for this course.

Requisites: Restricted to students with 36+ units, Civil (CVEN) or Architectural (AREN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

CVEN 3256 (3) Construction Equipment and Methods

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction.

Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

CVEN 3313 (3) Theoretical Fluid Mechanics

Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude and flow in closed conduits.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and GEEN 3853 and MCEN 3021

Requisites: Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) majors, or General (GEEN) Engineering majors with a CIV or ENR subplan.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3323 (3) Hydraulic Engineering

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery.

Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or GEEN 3853 or AREN 2120 or CHEN 3200 (all minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.

Requisites: Requires prereq courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 or CHEM 1400 or CHEM 1351 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, GEEN or AMEN majors only.

Additional Information: Departmental Category: Environmental

CVEN 3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements.

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3434

Requisites: Prereq courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 or CHEM 1400 or CHEM 1351; (all min C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Environmental (EVEN) or Architectural Engineering (AREN) mjrs.

Additional Information: Departmental Category: Environmental

CVEN 3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force method.

Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), General (GEEN) or Applied Mathematic (AMEN) majors only.

Additional Information: Departmental Category: Structures

CVEN 3602 (3) Transportation Systems

Introduces technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems. Focuses on evaluation of urban transportation systems and recent transportation innovations.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; geologic hazards; mapping; and geology of underground excavations, slopes, reservoirs and dam sites.

Requisites: Requires a prerequisite or corequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3708 (3) Geotechnical Engineering 1

Covers basic engineering characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories.

Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), General (GEEN) or Applied Mathematic (AMEN) majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3718 (3) Geotechnical Engineering 2

Covers stress analysis and plastic equilibrium, shear strength of soil, bearing capacity, lateral earth pressures, slope stability and underground construction. Analysis and design of shallow and deep foundations, retaining walls and other earth and rock structures. Selected experimental and computational laboratories.

Requisites: Requires prerequisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 3930 (6) CEAE Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. Offered only through Continuing Education and cannot be used to fulfill any of CEAE's degree requirements. 00 GPA or higher.

Repeatable: Repeatable for up to 24.00 total credit hours.

Requisites: At least a 2.75 cumulative GPA is required. Restricted to Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Building Systems

CVEN 4147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5147

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 4161 (3) Mechanics of Materials 2

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5161

Requisites: Requires prerequisite course of CVEN 3161 (minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 4323 (3) Water Resource Engineering Design

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5423

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4333 (3) Engineering Hydrology

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing.

Requisites: Requires prerequisite course of CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 (all minimum grade C-). Requires prerequisite or corequisite course of CVEN 3227 or APPM 4570 or MCEN 3047 or MCEN 3208 or CHEN 3010.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4353 (3) Groundwater Engineering

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or GEEN 3853 (minimum grade C-).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4383 (3) Groundwater Modeling

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5383

Recommended: Prerequisite CVEN 4353.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4404

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 and CVEN 3414 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN 4404 in laboratory experiments and reports.

Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4414

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 and CVEN 3414 (all minimum grade C-). Requires corequisite course of CVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4424

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1113 or CHEM 2100 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4434

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5464 and EVEN 4464

Requisites: Requires prerequisite or corequisite courses of CVEN 3414 and CVEN 3313 or CHEN 3200 or GEEN 3853 or MCEN 3021 or AREN 2120 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5474

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5484 and EVEN 4484

Requisites: Requires prerequisite courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 or CHEM 1400 or CHEM 1351 and APPM 2350 or MATH 2400 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4511 (3) Introduction to Finite Element Analysis

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5511

Requisites: Requires prerequisite courses of CVEN 3161, CVEN 3525, APPM 2360 or MATH 3130 and MATH 4430 (all minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 4525 (3) Matrix Structural Analysis

Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with Matlab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5525

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4535 (1-3) Construction Materials

Introduces material science of engineering materials, such as atomic and crystal structures, defects and phase diagrams; discusses in detail three construction materials: steel, Portland cement concrete and asphalt concrete including classification and composition, engineering properties and testing methods (with three lab sessions). Covers basic of three materials: wood, fiber reinforced polymers and masonry.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Structures

CVEN 4537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5537

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: Miscellaneous

CVEN 4545 (3) Steel Design

Applies basic principles of structural engineering and mechanics to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Elective for the EVEN air quality track or an environmental concentration course for CVEN.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5554

Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CVEN 3313 or CHEN 3200 or MCEN 3021 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4555 (3) Reinforced Concrete Design

Applies basic principles of structural engineering and mechanics to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4565 (3) Design of Wood Structures

Applies basic principles of structural engineering and mechanics to the design of wood structures, including the design and analysis of columns, trusses, beams and connections using dimensional lumber, glulam and cross-laminated timber.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4594 (3) Water Reuse and Reclamation

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5594

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 4718 (3) Mechanics and Dynamics of Glaciers

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5718

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 and AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002 and CHEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 (all minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 4728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5728

Requisites: Requires prerequisite course of CVEN 3718 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 4830 (1-4) Special Topics

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Building Systems

CVEN 4833 (1-3) Special Topics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4834 (1-3) Special Topics

Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Environmental

CVEN 4835 (1-3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Structures

CVEN 4837 (1-3) Special Topics

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

CVEN 4838 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Geotechnical

CVEN 4839 (3-6) Special Topics for Seniors

Offers a supervised study of special topics, under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 4849 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 4878 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Additional Information: Departmental Category: Geotechnical

CVEN 4897 (2) Professional Issues in Civil Engineering

Educates students about the knowledge and skills required for professional civil engineers. Students learn about the path to a professional license, prepare for the FE exam, analyze a situation involving multiple conflicting ethical interests, identify aspects of sustainability in civil engineering projects, and understand the role of project management, public policy, business and public administration, and leadership in civil engineering.

Requisites: Restricted to students with 87-180 credits (Seniors) Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

CVEN 4899 (4) Civil Engineering Senior Project Design

Provides a simulated real world design and construction planning experience where teams integrate across multiple civil engineering sub-disciplines to create a solution that satisfies multiple constraints, including design, client requirements, budget, schedule, technical, regulatory, and societal. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior) Civil (CVEN) or General (GEEN) engineering majors only.

Additional Information: Departmental Category: Special Topics

CVEN 5111 (3) Structural Dynamics

Focuses on the response of single- and multi-degree of freedom structures subjected to harmonic, impulsive and arbitrary loads (including earthquake base excitation). Sources and modeling of damping will be discussed. Analytical and numerical solutions will be considered for both linear and nonlinear structural systems. Elastic and inelastic response spectra will be discussed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 5131 (3) Continuum Mechanics and Elasticity

Provides foundation for advanced study of structural, mechanical and geo-material behavior and continuum theories in mechanics. Topics: Cartesian tensors, formulation of continuum mechanics for small and large deformation, constitutive laws for elastic solids, energy principles, methods of potentials, formulations and solutions of 2D and 3D elastostatic and elastodynamic problems, analytical and numerical formulations.

Recommended: Prerequisite CVEN 4161.

Additional Information: Departmental Category: Mechanics

CVEN 5147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4147

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5161 (3) Advanced Mechanics of Materials I

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4161

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 5206 (3) Design Development

Provides an overview of the development process and proforma, investigates the interrelationship between design decisions and building costs, and evaluates the impact of each major building system on the development budget and schedule. Provides a simulated development experience where students respond to a Request for Proposal, including proformas, design, estimates and outline specifications. Department consent required. Taught intermittently.

Additional Information: Departmental Category: Construction

CVEN 5216 (3) Applied Construction Financial Management

Teaches students to interpret commonly used financial reports in the construction engineering industry sector. Skills developed in this course will better prepare students to become competent consumers of financial information and influence future results the construction business. Models for financing public and private sector projects will also be explored. Taught intermittently.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5226 (3) Construction Safety

Comprehensively studies construction safety in the construction industry. Focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, predictive analytics and learning. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

Additional Information: Departmental Category: Construction

CVEN 5246 (3) Legal Aspects of Construction

Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Taught intermittently.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5276 (3) Engineering Risk and Decision Analysis

Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, and various types of multicriteria decision analyses. Culminates in a larger term project.

Recommended: Prerequisite CVEN 3227 and graduate standing or instructor consent required.

Additional Information: Departmental Category: Construction

CVEN 5286 (3) Design Construction Operations

Considers effective/efficient design of construction operations. Front end planning; construction labor relations; productivity management. Emphasizes construction productivity improvement by group field studies and discrete event simulation modeling. How overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5313 (3) Environmental Fluid Mechanics

Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites APPM 2350 and APPM 2360 and CVEN 3313.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5323 (3) Applied Stream Ecology

Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5333 (3) Physical Hydrology and Hydroclimatology

Introduces hydrology as a quantitative science describing the occurrence, distribution and movement of water at and near the surface of the earth. Develops a quantitative understanding of atmospheric water, infiltration, evapotranspiration and surface runoff. Studies global climatology and large scale climate drivers of regional hydrology at interannual time scales. Solves engineering problems related to water resources.

Requisites: Requires prerequisite courses of CVEN 5454 and CVEN 5537 (all minimum grade of C-). Restricted to graduate students only.

Recommended: Prerequisite CVEN 4333.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5343 (3) Transport and Dispersion in Surface Water

Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5346 (3) Managing Construction and Engineering Projects and Organizations

Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations.

Additional Information: Departmental Category: Construction

CVEN 5353 (3) Groundwater Hydrology

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 and APPM 2360.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5363 (3) Modeling of Hydrologic Systems

Introduces students to modeling techniques. Focus areas include physical hydrology and hydrometeorology; measurement and inference; climate change impacts; role of scale in hydrology; uncertainty analysis; and a case study project. Projects will examine hydrologic impacts of various drivers such as climate warming or land cover change, utilizing an assessment of historic conditions to better understand and model future disturbance scenarios.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5373 (3) Water Law, Policy, and Institutions

Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5383 (3) Applied Groundwater Modeling

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4383

Recommended: Prerequisites APPM 2360 and CVEN 4353 or CVEN 5353.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5393 (3) Water Resources System and Management

Introduces water resources planning and management as an integrated systems problem that satisfies multiple competing objectives under constraints and uncertainty. Includes problem formulation and solution using decision support systems, optimization with and without uncertainty, stochastic simulation, and multiobjective optimization. Introduces water resources economics and planning under uncertainties such as climate change and increasing urbanization.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5404 (3) Water Chemistry

Introduces chemical fundamentals governing the chemistry of natural and treated waters. Topics include thermodynamics and kinetics of acid and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption.

Requisites: Restricted to concurrent BS/MS (C-CVEN or C-EVENCVEN) or graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5414 (3) Water Chemistry Laboratory

Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters.

Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-). Requires corequisite course of CVEN 5424.

Additional Information: Departmental Category: Environmental

CVEN 5423 (3) Water Resources Engineering Design

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4323

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical processes that impact the fate and transport of organic contaminants in natural and engineered systems. Emphasizes both equilibrium and kinetic aspects, including solubility, vapor pressure, air-water exchange, sorption, abiotic redox reactions, and photodegradation.

Additional Information: Departmental Category: Environmental

CVEN 5434 (3) Environmental Engineering Design

Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Department consent required.

Recommended: Prerequisite CVEN 5524 or CVEN 5534 or CVEN 5474.

Additional Information: Departmental Category: Environmental

CVEN 5444 (3) Municipal Des Proj

Additional Information: Departmental Category: Environmental

CVEN 5454 (3) Statistical Methods for Natural and Engineered Systems

Applies traditional and modern probability and statistical methods to environmental, hydrological, climatological and engineering data analysis. Topics include: basic probability, data visualization, fitting univariate and multivariate distributions, Monte Carlo simulations, extreme value distributions, confidence intervals and hypothesis testing, nonparametric density estimators, linear regression, and Bayesian analysis. The data analysis tool, R, is used throughout the course.

Additional Information: Departmental Category: Environmental

CVEN 5464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and EVEN 4464

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4474

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5484 (3) Applied Microbiology and Toxicology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484 and EVEN 4484

Additional Information: Departmental Category: Environmental

CVEN 5494 (3) Surface Water Quality Modeling

Examines the relationships among air, water, and landpollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions.

Department consent required.

Additional Information: Departmental Category: Environmental

CVEN 5511 (3) Introduction to Finite Element Analysis

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4511

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 5514 (3) Bioremediation

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation.

Recommended: Prerequisite CVEN 4484 or CVEN 5424 or CVEN 5484.

Additional Information: Departmental Category: Environmental

CVEN 5524 (3) Drinking Water Treatment

Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies.

Recommended: Prerequisite CVEN 4464 or CVEN 5464 or graduate standing or instructor consent required.

Additional Information: Departmental Category: Environmental

CVEN 5525 (3) Matrix Structural Analysis

Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with Matlab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4525

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 5534 (3) Wastewater Treatment

Covers the processes used to treat municipal wastewater, focusing on biological processes. Includes: design of aerobic, anoxic, anaerobic and suspended growth technologies to remove and transform pollutants; design and assessment of treatment approaches that recover energy, nutrients and water from wastewater; application of fundamental concepts of aquatic chemistry, environmental microbiology and computational models.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 5404 and CVEN 5484 and CVEN 5464.

Additional Information: Departmental Category: Environmental

CVEN 5537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4537

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5544 (3) Solid Waste Management and Resource Recovery

Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste.

Recommended: Prerequisite CVEN 3414.

Additional Information: Departmental Category: Environmental

CVEN 5554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Required for CVEN environmental engineering graduate students.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4554

Additional Information: Departmental Category: Environmental

CVEN 5555 (3) Structural Reliability

Explores principles and methods of structural reliability, and formulates bases for design to insure adequate safety and performance of elements and structural systems. Undergraduates may enroll with the permission of the instructor.

Requisites: Requires prerequisite course of CVEN 5525 (minimum grade of C-). Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 5564 (3) Water Profession: Leadership & Communication

Develops and improves the skills and tools needed for graduate students and young professionals. Focusing on highly effective leaders; leadership with impact; effective communication tools; and communicating with teams, city councils, governing boards, and the public.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

CVEN 5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems

Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Undergraduates may enroll with the permission of the instructor.

Recommended: Prerequisite CVEN 3227 or equivalent.

Additional Information: Departmental Category: Structures

CVEN 5574 (3) Water Utility Management: Current Issues and Future Challenges

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on management, leadership, communication and utility financial in the new water profession era. Undergraduate seniors may contact instructor for permission to enroll.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5575 (3) Advanced Topics in Steel Design

Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Undergraduate may enroll with permission of the instructor.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CVEN 4545.

Additional Information: Departmental Category: Structures

CVEN 5584 (3) Water Profession: Financial and Management

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on financing water services, capital planning, rates, management planning, staffing and organization and critical thinking. Undergraduates may request instructor permission to enroll.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5585 (3) Advanced Topics in Reinforced Concrete Design

Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Undergraduates may enroll with the permission of the instructor.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CVEN 4555.

Additional Information: Departmental Category: Structures

CVEN 5594 (3) Water Reuse and Reclamation

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4594

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3141 and CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 5604 (3) UV Processes in Environmental and Engineered Systems

Provides a fundamental basis for design of UV processes in water and wastewater treatment. Includes principles of photochemistry and photobiology. Applications to disinfection of water and degradation of chemical compounds in the environment. Design of UV disinfection systems and reactors and advanced oxidation processes. Environmental UV-based decay of pollutants.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3414 and CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 5614 (3) Bioenergy & Bioresource Recovery

Introduces fundamental theories and applied technologies used in production and conversion of renewable biomass including waste materials into bioenergy and other value-added products. Conducts quantitative evaluations on conversion processes such as renewable biogas production, electricity generation, liquid fuels, metal and nutrients recovery and organic chemical production.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CVEN 4484.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

CVEN 5628 (3) Seepage and Slopes

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems.

Recommended: Prerequisites CVEN 3708 and CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5678 (3) Soil Improvement and Reinforcement

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5688 (3) Environmental Geotechnics

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

Additional Information: Departmental Category: Geotechnical

CVEN 5708 (3) Soil Mechanics

Offers an advanced course in soil mechanics. Coverage includes basic principles of continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geotechnical

CVEN 5718 (3) Mechanics and Dynamics of Glaciers

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4718

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geotechnical

CVEN 5728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4728

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geotechnical

CVEN 5738 (3) Applied Geotechnical Analysis

Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures.

Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 5748 (3) Design of Earth Structures

Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems.

Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 5758 (3) Flow Processes in Soils

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5768 (3) Introduction to Rock Mechanics

Nature of rocks and rock masses; engineering properties rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations.

Recommended: Prerequisites CVEN 3708 and CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5788 (3) Computational Modeling in Geotechnical Engineering

Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis.

Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 5798 (3) Dynamics of Soils and Foundations

Covers fundamental characterization of soils, foundations and structures under general dynamic and earthquake loads. Principles of vibrations and wave propagation for 1D, 2D, 3D. In-situ and laboratory determination of dynamic soil properties; methods for site response analysis, foundation vibrations, dynamic soil-structure interaction and liquefaction problems.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5818 (3) Geotechnical Earthquake Engineering

Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CVEN 5798.

Additional Information: Departmental Category: Geotechnical

CVEN 5822 (3) Geographical Information Systems for Civil and Environmental Systems

Theory and use of geographical information systems in civil engineering, environmental studies, natural resources and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software.

Additional Information: Departmental Category: Surveying and

Transportation

CVEN 5830 (3) Special Topics for Seniors/Grads

Department consent required.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Building Systems

CVEN 5831 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 5833 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5834 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5835 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 5836 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Construction

CVEN 5837 (3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Additional Information: Departmental Category: Miscellaneous

CVEN 5838 (3) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Geotechnical

CVEN 5849 (1-3) Independent Study

Available only through approval of graduate advisor. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 5919 (3) Sustainable Community Development 1

Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects.

Requisites: Restricted to students with sub-plan of Engineering Developing Communities (EDC).

Additional Information: Departmental Category: Special Topics

CVEN 5929 (3) Sustainable Community Development 2

Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development.

Requisites: Requires prerequisite course of CVEN 5919 (minimum grade C-). Restricted to students with EDC Sub-Plan.

Additional Information: Departmental Category: Special Topics

CVEN 5939 (3) Sustainable Community Development Field Practicum

Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in CVEN 5919 and CVEN 5929.

Requisites: Requires prerequisites courses of CVEN 5919 and CVEN 5929 (all minimum grade C-). Restricted to students with sub-plan of Engineering Developing Communities (EDC).

Additional Information: Departmental Category: Miscellaneous

CVEN 5969 (1-3) Water, Sanitation, and Hygiene

Studies the fundamentals behind effective hygiene and remediation processes and engineering solutions developed/developed for specific international problems. Approaches to hygiene, clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3424 and CVEN 3414.

Additional Information: Departmental Category: Environmental

CVEN 6161 (3) Advanced Mechanics of Materials 2

Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques.

Recommended: Prerequisite CVEN 5161.

Additional Information: Departmental Category: Mechanics

CVEN 6323 (3) Urban Stormwater Infrastructure Systems

Evaluation and design of more sustainable urban stormwater infrastructure systems including street inlets, on-line and off-line surface storage and infiltration systems. Integrated design for major, minor, and micro storms to provide flood control and drainage as well as control of pollution from stormwater runoff. Simulation and optimization models will be used.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology

Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization.

Requisites: Requires a prerequisite course of CVEN 5333 (minimum grade C-).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6383 (3) Flow and Transport through Porous Media

Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar

Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers.

Requisites: Restricted to graduate student Civil (CVEN) Engineering students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6414 (3) Aquatic Surfaces and Particles

Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics.

Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media

Covers constitutive modeling, multiphase mechanics, and finite element implementation of constitutive models and coupled solid-fluid mechanical governing equations for inelastic porous media at small strain. Considers transient and steady state conditions. Analyzes structural, geotechnical, geological, mechanical, biomechanical, and other related modern engineering problems. Uses general purpose finite element software program for implementation and analysis.

Additional Information: Departmental Category: Mechanics

CVEN 6525 (3) Nonlinear Analysis of Framed Structures

Explores theoretical underpinnings of nonlinear static and dynamic analysis of framed structures, along with exposure to the corresponding programming techniques in Matlab. Topics covered are: flexibility and fiber based beam-column element formulation; structural, section and fiber plasticity; geometric and material nonlinearities; nonlinear pushover and transient analysis of framed structures.

Requisites: Requires prerequisite course of CVEN 5525 (minimum grade of C-). Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 6595 (3) Earthquake Engineering

Analyzes and designs structures for earthquake load covering: properties of earthquake ground motions, ground motion prediction equations, seismic hazard analysis, response spectra, response of linear and nonlinear structures, construction of design spectra, seismic design methods, and building code requirements.

Requisites: Requires prerequisite course of CVEN 5111 (minimum grade of C-). Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 6830 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Building Systems

CVEN 6831 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 6832 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 6833 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6834 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Environmental

CVEN 6835 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Structures

CVEN 6836 (3) Special Topics

Additional Information: Departmental Category: Special Topics

CVEN 7111 (3) Advanced Structural Dynamics

Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads.

Requisites: Requires prerequisite course of CVEN 5111 (minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 7141 (3) Plates and Shells

Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings.

Requisites: Requires prerequisite courses of CVEN 5131 or CVEN 5161 (minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 7161 (3) Fracture Mechanics

Includes three parts: 1) fundamentals through rigorous mathematical formulations of linear/nonlinear elastic fracture mechanics, 2) materials' theoretical strength, including metals, granular materials, polymers and steel, 3) numerical (finite element) methods in fracture mechanics. Heavy emphasis on project and independent work.

Requisites: Requires prerequisite courses of CVEN 5511 and CVEN 6161 (all minimum grade of C-).

Additional Information: Departmental Category: Mechanics

CVEN 7206 (1) CEM PhD Seminar

Provides an overview of the research process and research methods in construction engineering and management. Students will study and evaluate different research methods and designs in an aim to prepare students to conduct and evaluate research. Taught intermittently.

Additional Information: Departmental Category: Construction

CVEN 7511 (3) Computational Finite Inelasticity and Multiphase Mechanics

Covers kinematics, thermodynamics, coupled balance equations and constitutive models, numerical time integration, and finite element implementation of finite strain inelasticity and multiphase mechanics. Kinematics of multiplicative decomposition, and finite strain mixture theory. Linearization for global nonlinear Newton-Raphson and solution algorithm of nonlinear constitutive models and coupled balance equations.

Recommended: Prerequisites CVEN 5131 and CVEN 5511 and CVEN 6511.

Additional Information: Departmental Category: Mechanics

CVEN 7718 (3) Engineering Properties of Soils

Emphasizes engineering aspects of soil mechanics. Implications of soil strength, volume change, consolidation behavior in engineering problems such as slope stability, deformation of retaining walls, surface subsidence due to tunneling. Time effects in soil/long-term bearing capacity of piles. Laboratory determination of constitutive parameters of soils. Field tests/their correlations with soil properties. Case studies using finite element software.

Requisites: Requires prerequisite course of CVEN 5708 (minimum grade of C-).

Additional Information: Departmental Category: Geotechnical

CVEN 7788 (3) Soil Behavior

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 7831 (1-3) Sp Tpc-Constitutive Mech

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Mechanics

CVEN 7838 (3) Special Topics

Additional Information: Departmental Category: Geotechnical

CVEN 7849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Topics

EVEN 1000 (1) Introduction to Environmental Engineering

Introduces first-year students to the environmental engineering program from an academic and a career perspective. Covers air quality, applied ecology, chemical processing, energy, engineering for developing communities, environmental remediation, and water resources and treatment. Includes reading and writing on the history of environmental engineering, major environmental issues, and professional ethics.

Requisites: Restricted to students with 0-60 units completed. Restricted to Environmental Engineering (EVEN) majors only.

EVEN 1001 (3) Environmental Engineering 101: An Introduction to Pollution Science

Surveys the science and engineering needed to understand the environmental and energy challenges which face urbanizing society: air and water pollution, climate change, and mining. Introduces how environmental engineers leverage basic science concepts to reduce pollution and optimize energy use. Analyzes how the mainstream media presents the environmental science of climate change and modern environmental disasters.

EVEN 2840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor.

EVEN 3350 (3) Sustainability Principles for Engineers

An introduction to sustainability principles in the field of environmental engineering. Students will apply these principles to engineering problems in order to evaluate the environmental, economic and social implications of engineering and design decisions. Topics include definitions of sustainability, main engineering sustainability challenges (e.g., water, climate and materials), pollution generation and prevention and sustainability assessment tools.

Requisites: Requires a corequisite course of CVEN 3414. Restricted to Environmental Engineering (EVEN) majors only.

Grading Basis: Letter Grade

EVEN 4100 (3) Environmental Sampling and Analysis

Introduces students to techniques for characterization of surface water, subsurface water, soils and sediments, and air and planning of sampling and analysis efforts. Laboratories include stream sampling, drilling, monitoring well installation, water level, slug tests, air sampling.

Requisites: Requires prerequisite courses of CVEN 4404 and CVEN 4424 (all minimum grade C-). Restricted to Environmental Engineering (EVEN) majors only.

EVEN 4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4404

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 and CVEN 3414 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Grading Basis: Letter Grade

EVEN 4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from EVEN 4404 in laboratory experiments and reports.

Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4414

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of EVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Grading Basis: Letter Grade

EVEN 4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4424

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1113 or CHEM 1271 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4434

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and CVEN 5464

Requisites: Requires prerequisite courses of CVEN 3313 or CHEN 3200 or GEEN 3853 or MCEN 3021 or AREN 2120 and CVEN 3414 (all minimum grade C-).

Grading Basis: Letter Grade

EVEN 4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484

Requisites: Requires prerequisite course of CHEN 1211 (minimum grade C-).

Grading Basis: Letter Grade

EVEN 4830 (3) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

EVEN 4840 (1-3) Independent Study: General Topics

General topics relating to environmental engineering. One-on-one assistance with an instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

EVEN 4980 (3) Senior Thesis 1

Provides faculty-supervised independent research in environmental engineering for students planning to complete a senior thesis. To be taken prior to EVEN 4990, during the final year before graduation. Department consent required.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Environmental Engineering (EVEN) majors only.

EVEN 4990 (3) Senior Thesis 2

Continuation of EVEN 4980. Consists of final phase of faculty-supervised research, the preparation of a written thesis, and an oral defense of the research to

Requisites: Requires prerequisite course of EVEN 4980 (minimum grade C-).

EVEN 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

EVEN 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

EVEN 8990 (1-10) Doctor's Thesis

Repeatable: Repeatable for up to 10.00 total credit hours.

Architectural Engineering - Bachelor of Science (BS)

Architectural engineering has several common elements with civil, mechanical, and electrical engineering, but is specifically directed toward the building industry. It focuses on building systems, which include design of systems such as heating, ventilating and air conditioning (HVAC) systems; illumination and electrical systems; structural building

systems; and construction methods applied to buildings. The Bachelor of Science degree program is administered by the Department of Civil, Environmental and Architectural Engineering. Students also take courses in architectural history and architectural design from the Program in Environmental Design.

Educational Objectives

The educational objective of the architectural engineering program is for graduates to attain a broad knowledge and skills necessary to successfully begin and sustain a career, and to become leaders who advance the state-of-the art, in one of four core disciplines of the building industry:

- electrical and lighting systems
- heating, ventilating and air conditioning (HVAC) systems
- structural systems
- construction engineering and management

Educational Outcomes

The outcomes that students are expected to have attained upon graduation with the bachelor of science degree in architectural engineering are:

- the ability to apply knowledge of mathematics, science, and engineering
- the ability to design and conduct experiments
- the ability to analyze and interpret data
- the ability to design a system or component to meet desired needs
- the ability to function on multidisciplinary teams
- the ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibilities
- the ability to communicate effectively through writing and/or drawing
- the ability to communicate effectively through oral presentations
- an understanding of the impact of engineering on society
- an understanding of the necessity to engage in life-long learning
- a knowledge of contemporary issues in civil, environmental, and architectural engineering
- the ability to use modern engineering techniques, skills, and tools

Areas of Knowledge

The areas of knowledge that define these objectives include both technical and non-technical areas.

Technical areas are:

- elementary—the fundamentals for architectural engineering, including basic science and mathematics, building design, and construction processes; overview of building systems; elementary principles and processes of architecture; and laboratory measurement and data analysis;
- intermediate—introduction to building systems and their components, with corresponding analysis of electrical, HVAC and lighting systems as well as structural elements and components;
- proficiency—design, integration, and advanced analysis of electrical, HVAC, lighting, and structural systems; as well as the standards, codes, and recommended practices that govern these building systems; and

- specialization—advanced design, coupled with industry experience via internships, for building lighting and electrical system design, building HVAC systems design, building structural system design, and construction engineering and management.

Non-technical areas include:

- professional life, including methods of time and resource management, and professional ethics;
- processes and requirements of written and oral communication; and
- broad areas in the humanities and social sciences, including architectural history and language.

Concurrent Degree Program BS/MS in Architectural Engineering

A concurrent BS/MS degree program in architectural engineering (<http://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program>) is available. Students may apply to the program when they have 75–110 credit hours toward the undergraduate BS degree (including completed and in-progress courses). Once accepted into the program, students are allowed to count 6 credit hours taken at the graduate level for both the BS and MS degrees (if certain grade and GPA requirements are met); this allows a student to obtain both degrees in five to six years.

Requirements

The following information represents a nominal 8-semester sequence of study. Failure to complete the requirements listed below will postpone graduation. Any exceptions will require authorization from the CEAE Operations Committee and the Dean's Office. Students anticipating graduation within a year should meet with the architectural engineering undergraduate advisor at least one semester prior to their planned graduation to review their records. It is the student's responsibility to be certain that all degree requirements have been met, to apply for graduation online, and to keep the architectural engineering undergraduate advisor informed of any change in graduation plans.

Humanities & Social Sciences elective ¹		3
Technical electives		6
	Credit Hours	17
	Total Credit Hours	128

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Courses Available for Specialization

Students select two proficiency-level courses from different subdisciplines and two concentration-level courses from one subdiscipline. Upon consultation with their advisors, students are expected to select technical elective courses applicable to their areas of interest and specialization. The areas of specialization are construction engineering and management, mechanical systems, structural systems, and lighting and electrical systems.

In addition to the courses listed below, other courses not listed may be proposed by a student and approved by the advisor if they are found to be applicable.

Construction Engineering & Management

Proficiency

CVEN 3256 Construction Equipment and Methods 3

Concentration

AREN 4506 Pre-construction Estimating and Scheduling 3

AREN 4606 Construction Project Execution and Control 3

Mechanical Systems

Proficiency

AREN 4110 HVAC Design 3

Concentration

AREN 4890 Sustainable Building Design 3

AREN 5080 Computer Simulation of Building Energy Systems 3

Technical Electives

AREN 4010 HVAC System Modeling and Control 3

AREN 4990 Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts 3

AREN 5020 Building Energy Audits 3

Structural Systems

Proficiency

CVEN 4545 Steel Design 3

or CVEN 4555 Reinforced Concrete Design

Concentration

CVEN 4161 Mechanics of Materials 2 3

CVEN 4545 or CVEN 4555, whichever not used as proficiency 3

Technical Electives

AREN 4315 Design of Masonry Structures 3

CVEN 4525 Matrix Structural Analysis 3

CVEN 4565 Design of Wood Structures 3

Lighting & Electrical Systems

Proficiency

AREN 4550 Illumination 2 3

or AREN 4560 Luminous Radiative Transfer

or AREN 4570 Building Electrical Systems Design 1

Concentration

AREN 4550, AREN 4560, AREN 4570 - whichever two not used as proficiency 6

Technical Electives

AREN 4130 Optical Design for Illumination and Solid State Lighting 3

AREN 4530 Advanced Lighting Design 3

AREN 4540 Exterior Lighting Systems 3

AREN 4580 Daylighting 3

Civil Engineering - Bachelor of Science (BS)

The curriculum in civil engineering within the Department of Civil, Environmental and Architectural Engineering has been designed to prepare students for entry-level positions in professional practice or for graduate study in the following subdisciplines of civil engineering:

- construction engineering and management;
- environmental engineering;
- geotechnical engineering and geomechanics;

- structural engineering and structural mechanics; and
- water resource engineering and management.

For undergraduates who want additional preparation for graduate study and careers in research and development within civil engineering, a theoretically-based Engineering Science track is also available.

Educational Objectives

The program objectives for the bachelor of science degree in civil engineering are that within five years:

1. Graduates will be successfully employed in engineering, science, or technology careers
2. Graduates will be assuming management or leadership roles
3. Graduates will engage in continual learning by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training, and/or participation in professional societies
4. Graduates will pursue professional registration or other appropriate certifications
5. Graduates will be engaged in activities that provide benefit to communities

Educational Outcomes

The outcomes that students are expected to have attained upon graduation with a bachelor of science degree in civil engineering are:

- the ability to apply knowledge of mathematics, science, and engineering
- the ability to design and conduct experiments
- the ability to analyze and interpret data
- the ability to design a system or component to meet desired needs
- the ability to function on multidisciplinary teams
- the ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibilities
- the ability to communicate effectively through writing and/or drawing
- the ability to communicate effectively through oral presentations
- an understanding of the impact of engineering on society
- an understanding of the necessity to engage in life-long learning
- a knowledge of contemporary issues in civil, environmental, and architectural engineering
- the ability to use modern engineering techniques, skills, and tools
- the ability to explain basic concepts in management, business, public policy, and leadership

Before their graduation, students in civil and environmental engineering will take a capstone design course in addition to training in structural and foundation design, civil engineering systems, construction, engineering geology, engineering materials, geotechnical engineering, soil mechanics, water quality, environmental engineering, fluid mechanics, computer-aided and manual engineering drawing, mechanics and dynamics, computer modeling, professional practice and ethics seminars, structural analysis and design, surveying and transportation systems via required, and elective courses.

Concurrent Degree Program BS/MS in Civil Engineering

A concurrent BS/MS degree program in civil engineering (<http://www.colorado.edu/ceae/current-students/undergraduate-studies/bsms-program>) is available. Students may apply to the program when they have 75–110 credit hours toward the undergraduate BS degree (including completed and in-progress courses). Once accepted into the program, students are allowed to count 6 credit hours taken at the graduate level for both the BS and MS degrees (if certain grade and GPA requirements are met); this allows a student to obtain both degrees in five to six years.

Dual Degree Program BS in Applied Mathematics and Civil Engineering

As an exceptional opportunity for talented students who are interested in analytical and computational methods related to civil engineering and general engineering science, the civil engineering and applied mathematics departments offer a streamlined track by which a student can earn a baccalaureate degree from both programs with a minimum of 15 extra credit hours. Consult the faculty program advisors in civil engineering and applied mathematics for information and admission.

Requirements

The following information represents a nominal 8-semester sequence of study. Failure to complete the requirements listed below will postpone graduation. Any exceptions will require authorization from the CEAE Operations Committee and the Dean's Office. Students anticipating graduation within a year should meet with the civil engineering undergraduate advisor at least one semester prior to their planned graduation to review their records. It is the student's responsibility to be certain that all degree requirements have been met, to apply for graduation online, and to keep the civil engineering undergraduate advisor informed of any change in graduation plans.

Environmental Engineering - Bachelor of Science (BS)

Environmental engineers play a vital role in maintaining the quality of both public health and the natural environment. Environmental engineering encompasses the scientific assessment and development of engineering solutions to environmental problems impacting the biosphere, land, water, and air quality. Environmental issues affect almost all municipal, commercial, and industrial sectors, and are a central concern for the public, for all levels of government, and in international relations. These issues include safe drinking water, wastewater processing, solid and hazardous waste disposal, outdoor and indoor air pollution, human health and ecological risk management, prevention of pollution through alternative product or process design, and renewable and sustainable energy sources.

To address these challenges, environmental engineers often encounter challenging problems that must be solved in data-poor situations as

members of multidisciplinary teams. Environmental problems require creative solutions blended with contributions from scientists, lawyers, business people, and the public. Good communication skills, as well as technical proficiency, are essential for success in this arena. In addition, technology designed to address environmental problems is marketed globally, opening up increasing opportunities for international work in the environmental engineering field.

Mission

The mission of the Environmental Engineering Program (<http://www.colorado.edu/even>) is to provide a multidisciplinary undergraduate environmental engineering education that emphasizes mastery of principles and practices, inspires service for the global public good, endows a desire for lifelong learning, and prepares students for broad and dynamic career paths in environmental engineering.

Faculty

The faculty of the Environmental Engineering (EVEN) Program (<http://www.colorado.edu/even/people>) are drawn from the Departments of Civil, Environmental, and Architectural Engineering; Mechanical Engineering; Chemical and Biological Engineering; and Aerospace Engineering Sciences. The EVEN faculty, its Professional Advisory Board (representing prospective employers of its graduates), and EVEN alumni and current students have contributed to the creation of the program's mission and the educational objectives of the BS in environmental engineering degree.

Educational Objectives

The educational objective of the Environmental Engineering Bachelor of Science Degree is to produce graduates who are capable of reaching the following career goals three to five years after graduation:

1. Graduates will be employed in engineering, science, or other professional careers
2. Graduates will pursue professional registration or other appropriate certifications
3. Graduates will be engaged in continual learning by pursuing advanced degrees or additional educational opportunities through coursework, professional conferences and training, and/or participation in professional societies.
4. Graduates will be engaged in activities that provide benefits to communities, the environment, and/or public health

Program Outcomes

The outcomes that students are expected to have attained upon graduation with a bachelor of science degree in environmental engineering are:

1. The ability to apply knowledge of math, science, and engineering
2. The ability to design and conduct experiments
3. The ability to analyze and interpret data
4. The ability to design a system, component, or process to meet desired needs within realistic constraints
5. The ability to function on multidisciplinary teams
6. The ability to identify, formulate, and solve engineering problems
7. An understanding of professional and ethical responsibility
8. The ability to communicate effectively through writing
9. The ability to communicate effectively through oral presentations
10. An understanding of the impact of engineering on society

11. A recognition of the need for and an ability to engage in life-long learning
12. A knowledge of contemporary issues in environmental engineering
13. The ability to use modern engineering techniques, skills and tools

Concurrent Degree Program BS/MS in Environmental and Civil Engineering

A concurrent BS/MS degree program in environmental engineering (<http://www.colorado.edu/even/current-students/5-year-bsms>) is available. Students may apply to the program when they have completed 75–110 credit hours toward the undergraduate EVEN degree. Once accepted into the program, students may be allowed to count 6 credit hours taken at the graduate level for both the environmental engineering BS and the civil engineering MS degrees, thus allowing them to obtain both degrees in a five-year curriculum.

Requirements

The BS degree in environmental engineering at the University of Colorado Boulder provides preparation for professional proficiency or graduate training in environmental engineering in a four-year curriculum. The curriculum includes courses in engineering fundamentals and applications, advanced mathematics, chemistry, physics, microbiology and earth science, along with courses in the arts, humanities and social sciences.

Courses specific to environmental engineering practice include water chemistry, environmental microbiology, and air pollution control. In addition, environmental engineering requires hands-on laboratory experiences, up-to-date skills in the use of computers for modeling and data analysis, and experience in the design of environmental engineering systems. Many of the required engineering courses in the bachelor of science curriculum are culled from civil, environmental, and architectural engineering; chemical and biological engineering; and mechanical engineering.

The curriculum also includes three technical electives, three environmental engineering sequence courses, and one free elective. Technical elective courses include a broad range of science and engineering courses, and must include an earth sciences course.

The environmental engineering sequence courses are selected by the student beginning in the junior year. The sequence consists of one environmental engineering design course and two environmental engineering technical elective (<http://www.colorado.edu/even/technical-electives-suggestions>) courses.

Students in the program are also encouraged to participate in research through independent study or senior thesis projects, the Undergraduate Research Opportunities Program (UROP), or as undergraduate research assistants in sponsored research programs. Students are required to take the Fundamentals of Engineering (FE) exam when they are within 32 credit hours of graduation.

Remaining technical elective credit hours must be upper division in engineering, mathematics or sciences. Independent study (EVEN 4840) or senior thesis (EVEN 4980 and EVEN 4990) may be completed as technical electives for up to 6 credits hours.
- ² A nine-credit-hour (three-course) sequence in environmental engineering – one environmental engineering design course and two environmental engineering technical electives.
- ³ Only offered in the semester shown (not including summer offerings).
- ⁴ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).
- ⁵ Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).
- ⁶ A senior thesis can be completed on a single research topic, with faculty approval and direction, and can apply toward technical elective requirements.

Architectural Engineering - Minor

The undergraduate minor in architectural engineering serves CU Boulder students who are interested in building science, engineering and system designs. The minor is intended to expose students to basic building science knowledge, engineering and system concepts, and calculation and design skills.

Requirements

Admission

A cumulative GPA of 2.750 or higher is required to be admitted to the minor.

The minor is not open to students pursuing the Bachelor of Science in architectural engineering or the Bachelor of Science in engineering plus with an architectural engineering disciplinary emphasis. In addition, the structural systems and construction engineering and management tracks (shown below) are not open to students pursuing the Bachelor of Science in civil engineering or the Bachelor of Science in engineering plus with a civil engineering disciplinary emphasis.

Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350 or MATH 1300)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360 or MATH 3130 + MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 and PHYS 1120)
- Statics (CVEN 2121, ASEN 2001, GEEN 2851, or MCEN 2023)

Grade Requirements

A cumulative GPA of 2.250 is required in the courses used to satisfy the minor requirements, with no individual grade lower than C-.

Residency

The minor requires 18 credit hours, at least nine of which must be AREN/CVEN courses completed on the CU Boulder campus. This is composed of three required courses: two courses in a single track plus one elective course.

Course Requirements

Required Core Courses

AREN 2050	Building Materials and Systems	3
CVEN 3246	Introduction to Construction	3
CVEN 3161	Mechanics of Materials 1	3
or MCEN 2063	Mechanics of Solids	

Tracks (Choose one) 6

Mechanical Systems Track

AREN 3010	Mechanical Systems for Buildings
AREN 4110	HVAC Design

Structural Systems Track ¹

CVEN 3525	Structural Analysis
CVEN 4545	Steel Design
or CVEN 4555	Reinforced Concrete Design

Electrical Systems Track

ECEN 3030	Electrical/Electronic Circuits Non-Major
or ECEN 2250	Introduction to Circuits and Electronics
or ECEN 3010	Circuits and Electronics for Mechanical Engineers
AREN 4570	Building Electrical Systems Design 1

Lighting Track

AREN 3540	Illumination I
AREN 4550	Illumination 2

Construction Engineering & Management Track ¹

AREN 4506	Pre-construction Estimating and Scheduling
AREN 4606	Construction Project Execution and Control

Elective 3

AREN 1027	Engineering Drawing
AREN 4010	HVAC System Modeling and Control
AREN 4130	Optical Design for Illumination and Solid State Lighting
AREN 4315	Design of Masonry Structures
AREN 4530	Advanced Lighting Design
AREN 4560	Luminous Radiative Transfer
AREN 4580	Daylighting
AREN 4830	Special Topics for Seniors/Grads (Sustainable Lighting Workshop, Computer Simulation of Building Systems, or Forensic Engineering)
AREN 4890	Sustainable Building Design
AREN 4990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts
AREN 5020	Building Energy Audits
AREN 5050	Advanced Solar Design
AREN 5070	Thermal Analysis of Buildings
CVEN 4565	Design of Wood Structures

CVEN 5830	Special Topics for Seniors/Grads (Distributed Generation Systems, Color Theory/Light Source, or Applied Data Analysis & Modeling)	
ENVD 3114	History and Theory of Environmental Design at the Small Scale: Buildings	
ENVD 3134	History and Theory of Environmental Design and the Medium Scale: Precincts	
Total Credit Hours		18

¹ Not open to students pursuing the Bachelor of Science in civil engineering or the Bachelor of Science in engineering plus with a civil engineering disciplinary emphasis.

Civil Engineering - Minor

The undergraduate minor in civil engineering (CVEN) serves CU Boulder students interested in an introductory exposure to the broad discipline of civil engineering. The minor is intended to expose students to five sub-disciplines of civil engineering. The minor is not open to CVEN majors, or Engineering Plus majors with a CVEN emphasis.

Requirements

Admission

A cumulative GPA of 2.750 or higher is required to be admitted to the minor. See the CVEN undergraduate academic advisor, Christina Vallejos (christina.vallejos@colorado.edu), in ECOT 447 for additional admissions details.

Prerequisites

The following prerequisite courses are required, with a grade of C- or higher in each. A student may be accepted into the minor with no more than two of these courses as deficiencies. All deficiencies must be completed before the minor is awarded.

- Calculus 1 (APPM 1350 or MATH 1300)
- Calculus 2 (APPM 1360 or MATH 2300)
- Calculus 3 (APPM 2350 or MATH 2400)
- Differential Equations and Linear Algebra (APPM 2360 or MATH 2130 + MATH 3430)
- Two semesters of calculus-based physics (PHYS 1110 and PHYS 1120)
- Statics (CVEN 2121, ASEN 2001, GEEN 2851, or MCEN 2023)
- Fluid Mechanics (CVEN 3313, AREN 2120, MCEN 3021, GEEN 3853)
- Mechanics of Materials (CVEN 3161, MCEN 2063)

Residency

18 credits are required for the minor, at least 9 of which must be CVEN courses completed at the CU-Boulder campus.

Minimum Grades

Overall GPA of 2.25 in courses used toward the minor must be maintained, with no individual grade lower than C-.

Required Courses and Semester Credit Hours

Required Core Courses

CVEN 3246	Introduction to Construction	3
CVEN 3323	Hydraulic Engineering	3
CVEN 3414	Fundamentals of Environmental Engineering	3

CVEN 3525	Structural Analysis	3
CVEN 3708	Geotechnical Engineering 1	3
<i>One additional proficiency or advanced course in one of the following sub-disciplines:</i>		3
Construction Engineering and Management		
CVEN 3256	Construction Equipment and Methods	
AREN 4506	Pre-construction Estimating and Scheduling	
Environmental Engineering		
CVEN 3424	Water and Wastewater Treatment	
CVEN 4404	Water Chemistry	
CVEN 3434	Introduction to Applied Ecology	
CVEN 4474	Hazardous and Industrial Waste Management	
CVEN 4484	Introduction to Environmental Microbiology	
Geotechnical Engineering		
CVEN 3718	Geotechnical Engineering 2	
Structural Engineering		
CVEN 4545	Steel Design	
CVEN 4555	Reinforced Concrete Design	
Water Resource Engineering		
CVEN 4333	Engineering Hydrology	
CVEN 4353	Groundwater Engineering	
Civil Systems		
CVEN 4147	Civil Engineering Systems	
Total Credit Hours		18

Computer Science

Computer science offers study in the fields of computer architecture, operating systems, networking, mobile computing, computer security, robotics, algorithm design, artificial intelligence, software and web engineering, programming languages, database design and data mining, human–computer interaction, computer-supported cooperative work, machine learning, lifelong learning and design, numerical and parallel computation, speech and language processing, scientific computing and theoretical computer science.

Graduates typically take positions as software engineers for computer manufacturers or software firms, advanced applications programmers in scientific research firms or technically oriented usability experts or systems designers in commercial or government settings.

Computer science is an exciting and challenging field that has impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, and advance the computational techniques, and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Indeed, computing will be at the heart of future revolutions in business, science and society. Students who study computer science now will be at the forefront of those important advances.

Computer science is concerned with how computers are constructed, how they store and process data, how they are used in problem-solving and how the quality of those solutions is assessed. It is about the science of creating software for a variety of users. It is about understanding how that software interacts with the hardware on which it is run and goes well beyond the machine to the study of how people

interact with the technologies around them. Applications of computer science reach far and wide.

For more information, visit the Department of Computer Science (<http://www.colorado.edu/cs>) website.

Course code for this program is CSCI.

Career Possibilities

Computer science graduates from CU Boulder are engaged in a wide variety of jobs with many different companies in locations all over the world. They produce the software and systems that touch lives every day in fields that include scientific exploration, communication, finance, publishing and research. Many are software developers, but others become teachers, writers, doctors, lawyers, scientists, military leaders and entrepreneurs. They work at some of the largest, most influential companies in the world, at research institutions, nonprofits and at the smallest start-ups of every type imaginable. And many lead highly successful companies that they themselves have founded.

Facilities, Programs and Opportunities

The Department of Computer Science utilizes a modern computing infrastructure that supports its research and educational missions. This includes general purpose computing labs provided by the university, additional instructional labs and administrative computing resources provided by the department, and specialized labs dedicated to the work of individual research groups. A wide variety of computing resources are available so that students have the opportunity to learn about and use cutting-edge equipment and software. The university research computing service maintains a supercomputer, high-speed networking and advanced computing infrastructure for the campus. While not required, the computer science educational culture emphasizes the use of individual laptop computers, including their use in courses and group work.

There are many networking opportunities available with companies offering paid internships. Boulder's tech start-up community, national research labs and traditional tech companies such as Google, IBM, Oracle and Microsoft, gives students with computer science skills many employment opportunities while earning their degrees. There are also extensive opportunities for undergraduate students to participate in research projects across the campus.

Bachelor's Degree

- Computer Science - Bachelor of Science (BS) (p. 689)

Minor

- Computer Science - Minor (p. 691)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Kenneth M (https://experts.colorado.edu/display/fisid_113566)

Professor; PhD, University of California-Irvine

Bennett, John Knox (https://experts.colorado.edu/display/fisid_116933)
Professor; PhD, University of Washington

Black, John (https://experts.colorado.edu/display/fisid_126540)
Associate Professor; PhD, University of California-Davis

Boese, Elizabeth Sugar (https://experts.colorado.edu/display/fisid_154230)
Instructor; MS, Colorado State University

Bradley, Elizabeth (https://experts.colorado.edu/display/fisid_100546)
Professor; PhD, Massachusetts Institute of Technology

Brown, Timothy X (https://experts.colorado.edu/display/fisid_107534)
Professor; PhD, California Institute of Technology

Ying, Jordan Boyd-Graber (https://experts.colorado.edu/display/fisid_154406)
Assistant Professor; PhD, Princeton University

Courses

CSCI 1000 (1) Computer Science as a Field of Work and Study

Introduces curriculum, learning techniques, time management and career opportunities in Computer Science. Includes presentations from alumni and others with relevant educational and professional experience.

Requisites: Restricted to students with 0-26 credits (Freshmen) Computer Science (CSEN-BS, CSEN-ADL, CSCI-BA or CSCI-ADL) majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 1200 (3) The Art of Computational Thinking and Computer Programming

Teaches computational thinking and techniques for writing computer programs using the Python programming language. Intended for students who realize that obtaining computational skills is beneficial to all fields of study, but who have little or no experience in programming or are not Computer Science majors. Students will be expected to create computer programs to solve problems in a range of disciplines.

Additional Information: Departmental Category: General Computer Science

CSCI 1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 1220

Additional Information: Departmental Category: General Computer Science

CSCI 1240 (3) The Computational World

Introduces and explores the "computational style of thinking" and its influence in science, mathematics, engineering and the arts. Does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 1240

Additional Information: Departmental Category: General Computer Science

CSCI 1300 (4) Computer Science 1: Starting Computing

Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. Intended for students with little to no experience in computing or programming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1310 or CSCI 1320 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 1310 (4) Computer Science 1: Starting Computing - Experienced

Intended for students with some prior experience in programming and basic knowledge of variables, conditionals, and loops. Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1320 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 1320 (4) Computer Science 1: Starting Computing-Engineering Applications

Intended for students with no prior experience in programming. Class outcomes and goals are identical to CSCI 1300, but uses problems and tools from Engineering. Teaching techniques for writing computer programs in higher level programming languages to solve problems of interest in Engineering and other domains.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1310 or ECEN 1310

Requisites: Requires a prerequisite or corequisite course of MATH 1300 or MATH 1310 or APPM 1345 or APPM 1350 (all minimum grade C-).

Restricted to College of Engineering or Pre-Engineering Arts and Science (PREN) majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 2270 (4) Computer Science 2: Data Structures

Studies data abstractions (e.g., stacks, queues, lists, trees) and their representation techniques (e.g., linking, arrays). Introduces concepts used in algorithm design and analysis including criteria for selecting data structures to fit their applications.

Requisites: Requires prerequisite courses of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1030 or ECEN 1310 and APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2400 (4) Computer Systems

Covers how programs are represented and executed by modern computers, including low-level machine representations of programs and data, an understanding of how computer components and the memory hierarchy influence performance.

Requisites: Requires prerequisite course of CSCI 2270 and a prerequisite or corequisite course of CSCI 2824 or ECEN 2703 or a prerequisite course of MATH 2001 or APPM 3170 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2820 (3) Linear Algebra with Computer Science Applications

Introduces the fundamentals of linear algebra in the context of computer science applications. Includes vector spaces, matrices, linear systems, and eigenvalues. Includes the basics of floating point computation and numerical linear algebra.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 2824 (3) Discrete Structures

Covers foundational materials for computer science that is often assumed in advanced courses. Topics include set theory, Boolean algebra, functions and relations, graphs, propositional and predicate calculus, proofs, mathematical induction, recurrence relations, combinatorics, discrete probability. Focuses on examples based on diverse applications of computer science.

Requisites: Requires prerequisite courses of CSCI 1200 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1030 or ECEN 1310 and APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 2830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the sophomore level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Computer Science

CSCI 2900 (1-3) Lower Division, Undergraduate Level Independent Study

Offers selected topics at the elementary level for students with little or no previous computing experience.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Computer Science

CSCI 3002 (3) HCC Foundations/User-Centered Design and Development 1

Introduces the practice and research of human-centered computing, including the evolution of human-computer interaction to its forms today and the techniques of user-centered design. Surveys topics that include social computing; tangible computing; mobility; and more. It will cover computing in society at large with respect to domains such as health, education, assistive technology, emergency response and environment.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3010 (3) Programming Project Workshop

A semester-long projects course guided by an instructor to help design and develop a programming project.

Requisites: Requires a prerequisite course of CSCI 2270 (minimum grade C-).

CSCI 3022 (3) Introduction to Data Science Algorithms

Introduces students to the tools methods and theory behind extracting insights from data using computer science algorithms. Covers algorithms that maximize likelihood objective functions; linear prediction algorithms; making decisions based on data assembled from large datasets; discovering and quantifying connections between observations in real-world data such as text and images; representing and manipulating data on a computer.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3100 (1) Software and Society

Provides students with an understanding of the professional, ethical, legal and social issues and responsibilities of software developers, as well as providing them with the ability to analyze the local and global impacts of computing on individuals, organizations and society.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4308 and CSCI 4328 and CSCI 4338 and CSCI 4348

Requisites: Requires prerequisite course of CSCI 3308 (minimum grade C-). Restricted to Computer Science (CSEN-BS, CSEN-ADL, CSCI-BA, CSCI-ADL) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Computer Science

CSCI 3104 (4) Algorithms

Covers advanced data structures, computational geometry, cryptography, dynamic programming, greedy algorithms, divide-and-conquer, graph algorithms (e.g., depth-first search), network algorithms (e.g., shortest paths), approximation algorithms.

Requisites: Requires prerequisite courses of CSCI 2270 and APPM 1360 or MATH 2300 and one of the following: CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 3112 (1-3) Human-Centered Computing Professional Development

Supports students in developing professional skills and practices in human-computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections and gaming.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 3112

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3155 (4) Principles of Programming Languages

Study fundamental concepts on which programming of languages are based, and execution models supporting them. Topics include values, variables, bindings, type systems, control structures, exceptions, concurrency, and modularity. Learn how to select a language and to adapt to a new language.

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Programming Languages

CSCI 3202 (3) Introduction to Artificial Intelligence

Surveys artificial intelligence techniques of search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170 and one of the following: APPM 3570, 4570, 4520, CSCI 3022, MATH 3510, 4510, CVEN 3227, ECEN 3810, MCEN 4120 or ECON 3818 (all minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3287 (3) Design and Analysis of Data Systems

Analyzes design of data systems, including data stored in file systems, database management systems and physical data organizations. Studies calculus of data models, query languages, concurrency and data privacy and security.

Requisites: Requires prerequisite course of CSCI 3104 (minimum grade C-).

Additional Information: Departmental Category: Database Systems

CSCI 3302 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3303

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3308 (3) Software Development Methods and Tools

Covers tools and practices for software development with a strong focus on best practices used in industry and professional development, such as agile methodologies, pair-programming and test-driven design. Students develop web services and applications while learning these methods and tools.

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 3434 (3) Theory of Computation

Introduces the foundations of formal language theory, computability, and complexity. Shows relationship between automata and various classes of languages. Addresses the issue of which problems can be solved by computational means, and studies complexity of solutions.

Requisites: Requires prerequisite courses of CSCI 3104 and CSCI 3155 (all minimum grade C-).

Additional Information: Departmental Category: Theory of Computation

CSCI 3656 (3) Numerical Computation

Covers development, computer implementation, and analysis of numerical methods for applied mathematical problems. Topics include floating point arithmetic, numerical solution of linear systems of equations, root finding, numerical interpolation, differentiation, and integration.

Requisites: Requires prerequisite courses of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 1360 or MATH 2300 and MATH 2130 or APPM 2360 or APPM 3310 or CSCI 2820 (all minimum grade C-).

Additional Information: Departmental Category: Numerical Computation

CSCI 3702 (3) Cognitive Science

Introduces cognitive science, drawing from psychology, philosophy, artificial intelligence, neuroscience, and linguistics. Studies the linguistic relativity hypothesis, consciousness, categorization, linguistic rules, the mind-body problem, nature versus nurture, conceptual structure and metaphor, logic/problem solving and judgment. Emphasizes the nature, implications and limitations of the computational model of mind.

Equivalent - Duplicate Degree Credit Not Granted: LING 3005 and PHIL 3310 and PSYC 3005 and SLHS 3003

Recommended: Prerequisites two of the following CSCI 1300 or LING 2000 or PHIL 2440 or PSYC 2145.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 3753 (4) Design and Analysis of Operating Systems

Analyzes the software that extends hardware to provide a computing environment, including the role of linkers, file systems, resource sharing, security and networking. Studies the history of operating system organization and design and their influence on security, functionality and reliability.

Requisites: Requires prerequisite courses of CSCI 2270 and either CSCI 2400 or ECEN 3350 (all minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 3832 (3) Machine Translation

Provides a comprehensive overview of current techniques in statistical machine translation of natural language, e., automatically translating from Spanish to English. Covers language models, reordering, hierarchical translation and evaluating whether a translation is effective.

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or MATH 2001 or ECEN 2703 or APPM 3170 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4229 (3) Computer Graphics

Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 2D and 3D viewing, clipping, segmentation, translation, rotation and projection. Involves removal of hidden edges, shading and color. Knowledge of basic linear algebra is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5229

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Graphics

CSCI 4239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5239

Requisites: Requires prerequisite course of CSCI 4229 (minimum grade C-).

Additional Information: Departmental Category: Graphics

CSCI 4250 (3) Computer Science: The Canon

Explores the "great works" of computer science through intensive reading and discussion. Readings include works by Babbage, Turing, Von Neumann, Goedel, Shannon and Minsky, among others. Does not count as CS credit for the Computer Science BA, BS or minor.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5250

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Computer Science

CSCI 4253 (3) Datacenter Scale Computing - Methods, Systems and Techniques

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5253

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C). Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CSCI 4273.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, file transfer, client-server computing, remote procedure call and other contemporary network system design and programming techniques. Familiarity with C and Unix is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5273 and ECEN 5273

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5302

Requisites: Requires prerequisite course of CSCI 3302 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4308 (4) Software Engineering Project 1

Advanced practicum in which students design, implement, document and test software systems for use in industry, non-profits, government and research institutions. Also offers extensive experience in oral and written communication throughout the development process. Department enforced prerequisite: successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Recommended: Prerequisite CSCI 4448.

Additional Information: Departmental Category: Software Engineering

CSCI 4314 (3) Algorithms for Molecular Biology

Surveys molecular biology and combinatorial algorithms used to understand DNA, RNA and proteins. Students work in groups to define and tackle meaningful biological problems and learn to collaborate effectively with scientists in other disciplines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5314

Requisites: Requires a prerequisite course of CSCI 3104 (minimum grade C-).

Recommended: Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.

Additional Information: Departmental Category: Theory of Computation

CSCI 4318 (4) Software Engineering Project 2

Second semester of an advanced practicum in computer science. Students must take this course and CSCI 4308 contiguously as the project spans the entire academic year.

Requisites: Requires prerequisite course of CSCI 4308 (minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 4328 (4) Software Project Management and Mentoring

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing and prototype goals. Study project risk management and cost estimation approaches. Experience mentoring Senior Software Project Team. Intended for professional software developers. Department consent required, see Senior Project Director for permission.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Software Engineering

CSCI 4338 (2) Software Project Management

Review software project management and discuss the latest approaches, methodologies and standards of software development. Learn to develop software quality, documentation, testing, and prototype goals. Study project risk management and cost estimation approaches. Intended for double majors doing interdisciplinary projects in other departments.

Department consent required, see Senior Project Director for permission.

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Software Engineering

CSCI 4348 (4) Startup Essentials: Entrepreneurial Projects in Computing

Provide students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept, and be evaluated on product/market fit. Department enforced restriction, successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG. Formerly CSCI 4000.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5340

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Computer Science (CSEN) majors or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 4358 (4) Entrepreneurial Projects II

Follows CSCI 4348. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5350

Requisites: Requires a prerequisite course of CSCI 4348 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4413 (3) Computer Security and Ethical Hacking

Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5413

Requisites: Requires prerequisite course of CSCI 4273 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5446 and ECEN 4423 and ECEN 5423

Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 and APPM 2350 or MATH 2400 (all minimum grade C-).

Recommended: Prerequisites PHYS 1120 and CSCI 3656 and MATH 2130.

Additional Information: Departmental Category: Numerical Computation

CSCI 4448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5448

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 3308 (all minimum grade C-).

Additional Information: Departmental Category: Software Engineering

CSCI 4502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5502

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4555 (3) Compiler Construction

Introduces the basic techniques used in translating programming languages: scanning, parsing, definition table management, operator identification and coercion, code selection and register allocation, error recovery. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5525 and ECEN 4553 and ECEN 5523

Requisites: Requires prerequisite courses of CSCI 3155 and CSCI 2400 or ECEN 3350 (all minimum grade C-).

Additional Information: Departmental Category: Programming Languages

CSCI 4576 (4) High-Performance Scientific Computing

Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5576

Recommended: Prerequisite CSCI 3656.

Additional Information: Departmental Category: Numerical Computation

CSCI 4586 (4) High-Performance Scientific Computing 2

Introduces computing systems, software, and methods to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. Second course in a two-semester sequence.

Requisites: Requires prerequisite course of CSCI 4576 (minimum grade C-).

Additional Information: Departmental Category: Numerical Computation

CSCI 4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4593

Requisites: Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-).

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5753 and ECEN 4753 and ECEN 5753

Requisites: Requires prerequisite course of CSCI 3753 and MATH 2300 or APPM 1360 (all minimum grade C-).

Recommended: Requisite a course in statistics.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 4802 (1) Data Science Team Companion Course

Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5802

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of APPM 3310 or APPM 3570 or APPM 4520 or APPM 4570 or MATH 2130 or MATH 3510 or MATH 4510 or CSCI 2820 or CSCI 3022 or CVEN 3227 or ECEN 3810 or MCEN 4120 (minimum grade C-).

Additional Information: Departmental Category: Artificial Intelligence

CSCI 4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5809 and ATLS 4809 and ATLS 5809

Additional Information: Departmental Category: Graphics

CSCI 4810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6810

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: General Computer Science

CSCI 4830 (1-3) Special Topics in Computer Science

Covers topics of interest in computer science at the senior undergraduate level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 2400 or ECEN 3350 (minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4831 (1-3) Special Topics in Algorithms

Covers topics of interest in computer science at the upper-division undergraduate level. Content varies from semester to semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of CSCI 3104 and CSCI 2820 or MATH 2130 or APPM 3310 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4900 (1-3) Upper Division, Undergraduate Level Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on a small research problem or tutor lower-division computer science students.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 1300 or CSCI 1310 or CSCI 1320 (all minimum grade C-).

Additional Information: Departmental Category: General Computer Science

CSCI 4950 (2-4) Senior Thesis

Provides an opportunity for senior computer science majors to conduct exploratory research in computer science. Department enforced restriction, successful completion of a minimum of 36 credit hours of Computer Science coursework and approved WRTG.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Requires a prerequisite or corequisite course of CSCI 3100 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Additional Information: Departmental Category: General Computer Science

CSCI 4960 (2-4) Computer Science Honors Thesis

Provides an opportunity for senior Computer Science majors to complete an honors thesis by conducting exploratory research in computer science. Department enforced prerequisites: successful completion of a minimum of 36 credit hours of Computer Science foundation and Computer Science electives and a writing requirement.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Computer Science

Computer Science - Bachelor of Science (BS)

The goal of the Department of Computer Science is to prepare students for an intriguing and satisfying career in computer science either in industry, research, or academia. The huge number of technical jobs and the continuing shortage of people to fill them mean that opportunities are great for today's computer science graduates when seeking career options or to continue on to graduate school.

The BS degree program in Computer Science emphasizes knowledge and awareness of computing at all levels, from circuits and computer architecture through operating systems and programming languages to large application systems; the theoretical and mathematical aspects of computing; the interdependence of hardware and software; and the challenge of large-scale software production and the engineering principles used to meet that challenge. Students may choose to take

classes that touch on a wide variety of computing topics, or may select classes that focus on a particular specialization.

For more information, visit the department's BS Degree (<http://www.colorado.edu/cs/current-students/undergraduate-students/bs-degree>) webpage.

Accreditation

The Bachelor of Science degree in computer science is accredited by the Computing Accreditation Commission of ABET (<http://www.abet.org>).

Program Educational Objectives

Our program educational objectives for students 3–5 years after graduating with a Bachelor of Science degree in computer science are that they will be:

- **Broadly Educated and Versatile.** Able to draw upon foundational knowledge, learn, adapt and successfully bring to bear analytical and computational approaches on changing societal and technological challenges
- **Inspiring and Collaborative.** Is a leader and a responsible citizen whose strengths come from an ability to draw on and contribute to diverse teams, expertise and experiences.
- **Innovative.** Drives scientific and societal advancement through technological innovation and entrepreneurship.
- **Engaged.** Is and remains engaged with the University of Colorado, the state of Colorado and technical and scientific professional communities.

Student Outcomes

Student outcomes describe what students are expected to know and be able to do by the time of graduation. The Computer Science Department's Bachelor of Science program must enable students to attain, by the time of graduation:

1. An ability to apply knowledge of computing and mathematics appropriate to the discipline.
2. An ability to identify, formulate and develop solutions to computational challenges.
3. An ability to design, implement and evaluate a computational system to meet desired needs within realistic constraints.
4. An ability to function effectively on teams to accomplish shared computing design, evaluation or implementation goals.
5. An understanding of professional, ethical, legal, security and social issues and responsibilities for the computing profession.
6. An ability to communicate and engage effectively with diverse stakeholders.
7. An ability to analyze impacts of computing on individuals, organizations and society.
8. Recognition of the need for and ability to engage in continuing professional development.
9. An ability to use appropriate techniques, skills and tools necessary for computing practice.
10. An ability to apply mathematical foundations, algorithmic principles and computer science theory in the modeling and design of computational systems in a way that demonstrates comprehension of the trade-offs involved in design choices.

11. An ability to apply design and development principles in the construction of software systems of varying complexity.

Concurrent Degree Programs

BS/MS in Computer Science

Applicants must have completed two 3000-level computer science courses on the Boulder campus. A cumulative GPA of 3.750 or better is required to apply to this program. Very few exceptions will be granted on a case-by-case basis. Students need to gain admission to this program during their junior year.

Six credit hours of Computer Science courses at the 5000 level or above may be counted towards both sets of degree requirements, if chosen from the approved list.

For more information, visit the department's Concurrent BS/MS (<http://www.colorado.edu/cs/current-students/undergraduate-students/concurrent-bsms>) webpage.

BS/MS in Computer Science and Interdisciplinary Telecommunications

The Bachelor of Science degree is from the Department of Computer Science (CS) and the Master of Science degree is from the Interdisciplinary Telecommunications Program (ITP) (p. 1270). The concurrent program enables well-qualified students to be admitted to the MS program during the junior year of their BS program, and to work toward earning both the BS and MS degrees. This concurrent degree program is aimed at the specific needs of companies requiring engineers to operate at the intersection of software development and telecommunications.

For more information, visit the department's Concurrent BS/MS (<http://www.colorado.edu/cs/current-students/undergraduate-students/concurrent-bsms>) webpage.

Requirements

Requirements for the BS degree in computer science include course work in computer science, mathematics, natural science, and the humanities and social sciences, as well as free elective course work.

The degree provides considerable freedom in the selection of specific courses to fulfill these requirements, allowing students to tailor the degree to their individual needs and interests.

A student may not earn both a BS degree in computer science and a BA degree in computer science (p. 253) from CU Boulder. A student may not earn a bachelor's degree in computer science and a minor in computer science from CU Boulder.

For more information, visit the department's BS Degree (<http://www.colorado.edu/cs/current-students/undergraduate-students/bs-degree>) webpage.

Course Requirements

Course	Title	Credit Hours
First Year		
Fall Semester		
CSCI 1000	Computer Science as a Field of Work and Study	1

APPM 1350	Calculus 1 for Engineers	4
CSCI 1300 or CSCI 1310	Computer Science 1: Starting Computing or Computer Science 1: Starting Computing - Experienced	4
PHYS 1110	General Physics 1	4
Humanities and social sciences elective ¹		3
		Credit Hours 16
Spring Semester		
CSCI 2270	Computer Science 2: Data Structures	4
APPM 1360	Calculus 2 for Engineers	4
Natural science course		5
Humanities and social sciences elective ¹		3
		Credit Hours 16
Second Year		
Fall Semester		
CSCI 2400	Computer Systems	4
CSCI 2824	Discrete Structures (or other approved course)	3
CSCI 2820	Linear Algebra with Computer Science Applications (or other approved course)	3
CSCI 3308	Software Development Methods and Tools	3
Humanities and social sciences elective ¹		3
		Credit Hours 16
Spring Semester		
CSCI 3104	Algorithms	4
CS core course from approved core list (1 of 6)		3
CS core course from approved core list (2 of 6)		3
Humanities and social sciences elective ¹		3
Probability or statistics course from approved list of courses		3
		Credit Hours 16

Third Year**Fall Semester**

CSCI 3155	Principles of Programmin Languages	4
CS core course from approved core list (3 of 6)		3
College-approved writing course ²		3
Humanities and social sciences elective ¹		3
Natural science course		3
	Credit Hours	16

Spring Semester

CS core course from approved core list (4 of 6)		4
Computer science elective		3
Computer science elective		3
Natural science course		3
Free elective		3
	Credit Hours	16

Fourth Year**Fall Semester**

CSCI Senior Capstone I		4
CS core course from approved core list (5 of 6)		3
Natural science course		3
Humanities and social sciences elective ¹		3
Free elective		3
	Credit Hours	16

Spring Semester

CSCI Senior Capstone II		4
CS core course from approved core list (6 of 6)		3
Computer science elective		3
Humanities and social sciences elective ¹		3
Free elective		3
	Credit Hours	16
	Total Credit Hours	128

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Computer Science - Minor

The department offers a minor in computer science that is available to CU Boulder undergraduates. The minor offers a basic introduction to the field of computer science.

A student may not earn both a bachelor's degree in computer science and the minor in computer science from CU Boulder.

For more information, visit the department's Minor in Computer Science (<http://www.colorado.edu/cs/current-students/undergraduate-students/minor>) webpage.

Requirements

A minor in computer science can be earned in conjunction with any CU Boulder major degree, except for computer science BA and BS majors.

Students should allow at least 6 semesters to complete the computer science minor. It is advised to start no later than first semester of the sophomore year; otherwise, students should plan to complete summer courses or delay graduation.

Advising for the minor is managed by the Computer Science Bachelor of Science advisors; see the department's Advisors (<http://www.colorado.edu/engineering-advising/advisors>) webpage for details.

For more information, visit the department's Minor in Computer Science (<http://www.colorado.edu/cs/current-students/undergraduate-students/minor>) webpage.

Prerequisites/Corequisites

Calculus courses do not count toward the 21 credit hours required for the computer science minor. Students should complete the following before pursuing the minor: MATH 1300 (or MATH 1310, APPM 1350 or APPM 1345); and MATH 2300 (or APPM 1360).

Required Courses and Semester Credit Hours

Required Courses

CSCI 1300	Computer Science 1: Starting Computing	4
or CSCI 1310	Computer Science 1: Starting Computing - Experienced	
or CSCI 1320	Computer Science 1: Starting Computing-Engineering Applications	
or ECEN 1310	C Programming for ECE	
CSCI 2270	Computer Science 2: Data Structures	4
CSCI 2400	Computer Systems (except ECEN majors; see advisor for details)	4
CSCI 2824	Discrete Structures (see advisor for other options)	3
or ECEN 2703	Discrete Mathematics for Computer Engineers	
Approved upper-division Computer Science electives to reach minimum 21 credit hours		6

Total Credit Hours 21

Electrical, Computer & Energy Engineering

Electrical Engineering offers study of the basic science and technology of information and energy. Its areas of knowledge include information theory and communications systems, computers and digital systems, signal processing and instrumentation, feedback systems and automatic control, electrical and electronic devices and systems, power electronics and renewable energy, electromagnetics and microwave devices and optics and photonic systems. Students learn how this basic knowledge is applied to such modern technologies as computers, telecommunications, biomedical systems, and remote sensing. The curriculum accommodates a variety of student interests including design, production, testing, consulting services, research, teaching, and management. Graduates pursue careers in a large variety of fields in the computer, telecommunications, instrumentation, biomedical, aerospace, energy, materials, and semiconductors industries, as well as academia. Some go on to careers in other professions such as law or medicine.

Electrical and computer engineering offers the same curriculum as electrical engineering, except that required courses in computer hardware and software replace some upper-division electives. As with electrical engineering, it accommodates broad student interests from design to service, and from research to management. Its graduates take positions in fields as diverse as those listed above for electrical engineering.

Course code for this program is ECEN.

Bachelor's Degree

- Electrical and Computer Engineering - Bachelor of Science (BS) (p. 710)
- Electrical Engineering - Bachelor of Science (BS) (p. 712)

Minor

- Computer Engineering - Minor (p. 710)
- Electrical Engineering - Minor (p. 714)
- Electrical Renewable Energy Systems - Minor (p. 714)
- Signals and Systems - Minor (p. 715)

Courses

ECEN 1030 (1-4) Special Topics

Special topics class.

ECEN 1100 (1) Freshman Seminar

Introduces students to areas of emphasis with the ECE department through seminars presented by faculty and outside speakers. Emphasizes career opportunities, professional ethics and practices, history of the profession, and resources for academic success. Several sessions promote team building and problem solving, and provide opportunities for freshmen to meet their classmates.

Additional Information: Departmental Category: General

ECEN 1310 (4) C Programming for ECE

Introduces fundamental programming concepts with engineering applications using C at a lower level of abstraction and MATLAB at a higher, application-focused level. Teaches the use of pointers, control flow, and data types. Example engineering applications include signal processing and the numerical computations. Includes a weekly computer lab session.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1300 or CSCI 1310 or CSCI 1320

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Prerequisite APPM 1350.

Additional Information: Departmental Category: General

ECEN 1400 (3) Introduction to Digital and Analog Electronics

Introduces fundamental concepts in electrical and computer engineering such as Ohm's Law, capacitors, LEDs and 7-segment displays, transformers and rectifiers, digital logic, Fourier decomposition, frequency analysis. Lab work exposes students to commonly used instrumentation. Includes a final project. Skills in wiring, soldering and wire-wrapping are developed.

Additional Information: Departmental Category: General

ECEN 1500 (3) Sustainable Energy

Explores how energy is generated and used in today's society. Through collaborative discussion and hands-on data collection, students will analyze the engineering challenges, fundamental limits, and potential solutions to meeting our energy needs sustainably. Students will learn to analyze numerical data, estimate orders of magnitude, and apply mathematical methods in their own lives and in the ongoing energy debate. Basic algebra required.

Requisites: College of Engineering majors are excluded from this course.

Additional Information: Arts Sci Core Curr: Quant Reasn Mathmat Skills Departmental Category: General

ECEN 1840 (1-6) Independent Study

Provides an opportunity for freshmen to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2010 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2020 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2050 (1-5) Special Topics

Additional Information: Departmental Category: General

ECEN 2060 (1-5) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2250 (3) Introduction to Circuits and Electronics

Introduces linear circuit analysis and design, including OP-Amps. Presents DC networks, including node and mesh analysis with controlled sources. Analysis of RL and RC circuits for both transient and sinusoidal steady-state responses using phasors.

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 and PHYS 1120 (all minimum grade C-), and corequisite course of APPM 2360. Restricted to College of Engineering majors only.

Recommended: Prerequisite ECEN 1310 or CSCI 1300.

Additional Information: Departmental Category: General

ECEN 2260 (3) Circuits as Systems

Continues basic circuit analysis of ECEN 2250: Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution.

Requisites: Requires prerequisite course of ECEN 2250 (minimum grade C-). Restricted to College of Engineering students only.

Recommended: Corequisite ECEN 2270.

Additional Information: Departmental Category: General

ECEN 2270 (3) Electronics Design Lab

Provides an introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, SPICE simulations, prototyping and testing of circuits necessary to drive and remotely control the robot.

Requisites: Requires prerequisite course of ECEN 2250 (minimum grade C-) and corequisite course of ECEN 2260. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2350 (3) Digital Logic

Covers the design and applications of digital logic circuits, including both combinational and sequential logic circuits. Introduces hardware descriptive language, simulating and synthesis software, and programming of field programmable arrays (FPGAs).

Requisites: Requires prerequisite course of ECEN 1310 or CSCI 1300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2410 (3) Renewable Sources and Efficient Electrical Energy Systems

Introduces electrical power generation and renewable energy, including solar, wind, micro, hydro, coal, nuclear and natural gas and some of the issues in integrating renewable energy sources in the grid.

Requisites: Requires prerequisite course of PHYS 1120 (minimum grade C-). Requires corequisite course of ECEN 2250. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 2420 (3) Electronics for Wireless Systems

Explores fundamental principles behind the operation of a radio, including a practical introduction to circuit elements. Covers the components and operation of a radio (transmitter and receiver) with simple signals. Students learn lab exercises the operation principles behind components of a complete practical radio system.

Requisites: Requires prerequisite course of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-). Requires corequisite course of ECEN 2250. Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) majors only.

Additional Information: Departmental Category: General

ECEN 2440 (3) Application of Embedded Systems

Introduces embedded systems and key computer architecture concepts through a variety of projects involving programming a microcontroller in C. Provides students hands-on projects that combine the knowledge gained in their digital and analog coursework in order to engineer hardware, firmware and application software design solutions. Includes a weekly lecture and two weekly laboratory sessions.

Requisites: Requires a prerequisite course of ECEN 1310 (minimum grade C-). Requires corequisite course of ECEN 2250.

Additional Information: Departmental Category: General

ECEN 2703 (3) Discrete Mathematics for Computer Engineers

Emphasizes elements of discrete mathematics appropriate for computer engineering. Topics: logic, proof techniques, algorithms, complexity, relations, and graph theory.

Requisites: Requires prerequisite courses of ECEN 1310 or CSCI 1300 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering students only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 2830 (1-5) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 2840 (1-6) Independent Study

Offers an opportunity for sophomores to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 2841 (1-6) Independent Study

Offers an opportunity for sophomores to do independent, creative work.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 3002 (3-5) Special Topics

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 3003 (3-5) Special Topics

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3004 (3-5) Special Topics

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3005 (2-3) Special Topics

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 3010 (3) Circuits and Electronics for Mechanical Engineers

Covers analysis of electrical circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers. Includes introductory digital electronics and microprocessors/microcontrollers.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 3017

Requisites: Requires prereq course of PHYS 1120 (min grade C). Requires a prereq or coreq course of APPM 2360. Restricted to students with 57-180 credits (Jr or Sr) Mechanical Engr (MCEN) or Electrical Engr (ECEN) or Engineering Plus (GEEN) majors only.

Additional Information: Departmental Category: General

ECEN 3030 (3) Electrical/Electronic Circuits Non-Major

For students not majoring in electrical engineering. Covers analysis of electric circuits by use of Ohm's law; network reduction; superposition; node analysis; Thevenin's and Norton's theorems; sinusoidal signals; phasors; power in AC circuits; transient response, operation of simple circuits; rectifiers; transformers; 3-phase circuits; motors and generators.

Requisites: Requires prereq course of APPM 2360 (min grade C-).

Electrical Computer Engineering (ECEN), Electrical Engineering (EEEN), Electrical Computer Engineering and Electrical Engineering Concurrent Degree (C-ECEN/EEEN) mjrs are excluded from this course

Additional Information: Departmental Category: General

ECEN 3070 (3) Edges of Science

Examines the evidence for paranormal phenomena, reasons for skepticism, and physical models that could account for the data. Reviews controversial scientific theories that overcame barriers to acceptance, and how worldviews shift. Considers the scientific method and ways uncontrolled factors might influence experiments. Develops skills in statistical analysis of data. Includes group projects testing for anomalous and parapsychological effects. Not accepted as a technical elective for engineering majors.

Requisites: Requires prerequisite course of MATH 1011 (minimum grade C-).

Additional Information: Departmental Category: General

ECEN 3170 (3) Electromagnetic Energy Conversion 1

Real and reactive power in single phase circuits, power triangle, balanced three-phase circuits, wye and delta connections, introduction to electromagnetic machines, transformers (single and three-phase) and their equivalent circuits, AC-machinery fundamentals, synchronous generator from a magnetic field point of view, synchronous motors and condensers, three-phase induction motors, DC machinery fundamentals, DC motors, single phase motors. Matlab/Simulink will be used.

Requisites: Requires prerequisite courses of ECEN 2260 and PHYS 1120 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 3250 (3) Microelectronics

Develops a basic understanding of active semiconductor devices. Focuses on building an understanding of BJT and CMOS devices in both digital and analog applications.

Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3300 (3) Linear Systems

Characterization of linear time-invariant systems in time and frequency domains. Continuous time systems are analyzed using differential equations and Laplace and Fourier transforms. Discrete time systems are analyzed using difference equations, Z-transforms and discrete time Fourier transforms. Sampling and reconstruction of signals using the sampling theorem. Applications of linear systems include communications, signal processing, and control systems.

Requisites: Requires prerequisite course of ECEN 2260 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3303 (3) Introduction to Robotics

Introduces students to fundamental concepts in autonomous, mobile robotics: mechanisms, locomotion, kinematics, control, perception and planning. The course consists of lectures and lab sessions that are geared toward developing a complete navigation stack on a miniature mobile robotic platform.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3302

Requisites: Requires prerequisite courses of CSCI 2270 and CSCI 2824 or ECEN 2703 or APPM 3170 or MATH 2001 (all minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3320 (3) Semiconductor Devices

Highlights the fundamentals of semiconductor materials and devices. Topics include the electrical and optical properties of semiconductors, the theory of Pn junctions, bipolar and field-effect transistors, and optoelectronic devices.

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3350 (3) Programming Digital Systems

Explores how computers and programmable hardware in general are used to implement digital systems by looking at the capabilities of central processing units, the use and control of various input/output (I/O) devices, memory organization, and concurrency management. Topics include computer architecture, instruction sets, I/O device programming, interrupts, data transfer mechanisms, semaphores, and memory management.

Requisites: Requires prerequisite course of ECEN 2350 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3360 (3) Digital Design Laboratory

Introduces digital system design, including system software and hardware building blocks, and system software-hardware integration. Emphasizes hands-on system development and debugging. Uses mainstream electronic system design platforms, including FPGAs, embedded and mobile computing platforms, and Assembly/C/Java/Verilog programming languages.

Requisites: Requires prerequisite course of ECEN 3350 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 3400 (3) Electromagnetic Fields and Waves

Electromagnetic fields are covered at an introductory level, starting with electrostatics and continuing with DC current, magnetostatics, time-varying magnetic fields, waves on transmission lines, Maxwell's equations and the basics of plane waves. The use of fields in inductors, capacitors, resistors, transformers, and energy and power concepts are studied.

Requisites: Requires prerequisite courses of APPM 2350, APPM 2360, PHYS 1120 and ECEN 2250 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3410 (3) Electromagnetic Waves and Transmission

Covers reflected and transmitted plane waves in layered media, Poynting's theorem of electromagnetic power, two-conductor transmission line theory and practice, Smith chart usage and impedance matching, waveguides, and elements of antenna theory.

Requisites: Requires prerequisite course ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 3810 (3) Introduction to Probability Theory

Covers the fundamentals of probability theory, and treats the random variables and random processes of greatest importance in electrical engineering. Provides a foundation for study of communication theory, control theory, reliability theory, and optics.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4510 or APPM 3570

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 3840 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 3841 (1-6) Independent Study

Offers an opportunity for juniors to do independent, creative work.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 3930 (6) ECE Co-op Education

Participate in a cooperative education program working with a corporate or government entity. Individual assignments are arranged between the department and the outside employer. Offered only through Continuing Education. Department enforced prerequisite: sophomore, junior or senior EEEN and ECEN majors and 2.85 GPA.

Repeatable: Repeatable for up to 24.00 total credit hours.

Requisites: Requires prerequisite courses of ECEN 2260 and ECEN 3350 (all minimum grade C-).

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

ECEN 4000 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 4001 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Bioengineering

ECEN 4002 (1-4) Special Topics

Credit and subject matter to be arranged. Department enforced prerequisite: varies

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4003 (1-4) Special Topics

Credit and subject matter to be arranged. Department enforced prerequisite: varies

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

ECEN 4004 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4005 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4006 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Optics

ECEN 4007 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4009 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 4011 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5011

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Bioengineering

ECEN 4012 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4013 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4016 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Optics

ECEN 4017 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Power

ECEN 4018 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4021 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4022 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4024 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5024

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4026 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4028 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4031 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4033 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 4043 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

ECEN 4049 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 4053 (1-4) Special Topics

Special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5053

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4106 (3) Photonics

Deals with the generation, transmission, modification and detection of light. Applications include fiber optics communications, data storage, sensing, and imaging. Leads to understanding of fundamental physical principles used in the analysis and design of modern photonic systems.

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Requires a corequisite course of ECEN 3300. Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Optics

ECEN 4116 (3) Introduction to Optical Communications

Given data rates, distance, reliability or bit error rates, the information required to specify the type of fiber, the source, the wave length, type of modulation, repeater or optical amplifiers, and detectors will be presented.

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Optics

ECEN 4120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them and application to practical problems such as pattern recognition, signal processing and control systems. Shows how to construct a network of "neurons" and train them to serve a useful function.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5120

Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and ECEN 1310 or CSCI 1300 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: General

ECEN 4138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Department enforced prerequisite: background in Laplace transforms, linear algebra, and ordinary differential equations.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5138

Requisites: Requires prerequisite course of ECEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4167 (3) Electromagnetic Energy Conversion 2

Introduction to electric machine drives, basic electric machine mechanics, structure and modeling of electric machines (DC, Synchronous, Linear, Induction), reference frame theory using d-q modeling based on the complex space vector and on matrix transformation, transient and steady state analysis of three-phase machine, design of speed regulators, vector control. Matlab/Simulink will be used.

Requisites: Requires prerequisite course of ECEN 3170 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5224

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4242 (3) Communication Theory

Covers modern digital and analog communication systems. Analysis and design of communication signals, transmitters, channels, and receivers. Amplitude and angle modulation and demodulation are treated as well as theory and application of digital data transmission. Emphasis is also placed on the analysis and mitigation of the effects of noise through signal design at the transmitter and signal processing at the receiver.

Requisites: Requires prerequisite course of ECEN 3300 and ECEN 3810 or APPM 3570 or MATH 4510 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4313 (3) Concurrent Programming

Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).

Requisites: Requires a prerequisite course of ECEN 1310 or CSCI 1300 or CSCI 1310 (all minimum grade C-).

Grading Basis: Letter Grade

ECEN 4324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. A seminar style course which surveys topics in microsystem packaging such as electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5324

Requisites: Requires prerequisite course or corequisite course of ECEN 3410 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5341

Requisites: Requires prerequisite courses of ECEN 3400 and ECEN 3810 or APPM 3570 or MATH 4510 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis and testing. Includes design project.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5375

Requisites: Requires prerequisite course of ECEN 3320 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 4423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5423 and CSCI 4446 and CSCI 5446

Requisites: Requires prerequisite courses of APPM 1360 or MATH 2300 and ECEN 1310 or CSCI 1300 and PHYS 1110 (all minimum grade C-). Restricted to College of Engineering majors only.

Recommended: Prerequisites PHYS 1120 and CSCI 3656 and MATH 2130.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5517

Requisites: Requires prerequisite course of ECEN 4797 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5532

Requisites: Requires prerequisite course of ECEN 4632 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4553 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5523 and CSCI 4555 and CSCI 5525

Requisites: Requires prerequisite courses of ECEN 2703 and ECEN 3350 (all minimum grade C). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4555 (3) Principles of Energy Systems and Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5555

Requisites: Requires prerequisite courses of ECEN 3810 or APPM 3570 or MATH 4510 and PHYS 2130 or PHYS 2170 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Nanostructures and Devices

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 4583 (3) Software System Development

Lectures deal with techniques for product requirements definition, project planning, coding, verification, validation, performance evaluation, and maintenance of medium-scale (2-3000 line) systems. Primary emphasis is on practical application of these techniques to a specified software project. Students work in teams to produce appropriate documents for each phase and are responsible for project completion according to specification and schedule. Course project is written in C on a Unix look-alike system; prior knowledge of C or Unix is not required.

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4593 (3) Computer Organization

Studies computer design at the gate level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and cache coherence for these.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4593

Requisites: Requires prerequisite course of ECEN 3350 or CSCI 2400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4606 (3) Undergraduate Optics Laboratory

Introduces fundamental concepts, techniques, and technology of modern optical and photonic systems. Individual labs cover particular fields of optical technology, including light sources such as lasers and LEDs, interferometers, fiber-optic communications, photodetection, spectrometers, and holography. Practical skills such as how to align an optical system will also be emphasized.

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Optics

ECEN 4610 (3) Capstone Laboratory Part 1

Hands-on laboratory experience utilizing teams in the systematic proposal, design, integration, and testing of an electronic/computer based system. Results will be the prototype of a stand-alone analog/digital system. Must have completed all required Advanced Analog Core courses for major, except one course may be taken concurrently by petition. Must take ECEN 4620 to complete the sequence. Minimum required grade for this course and ECEN 4620 is C-.

Requisites: Requires prereq of ECEN 3360 either ECEN 3250 3300; or ECEN 3250 3400; or ECEN 3300 3400 (min grade C-). Restricted to Elect/Comp Engr (ECEN) or Elect Engr (EEEN) or Elect/Comp Engr or Elect Engr Concurrent Degree (C-EEEN or C-ECENEEN) mjrs only

Additional Information: Departmental Category: General

ECEN 4616 (3) Optoelectronic System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5616

Requisites: Requires prerequisite course of ECEN 3400 (minimum grade C-).

Additional Information: Departmental Category: Optics

ECEN 4620 (3) Capstone Lab, Part 2

Hands-on laboratory experience for teams in the systematic proposal, design, build integration, test and documentation of an electronic/computer based system. Results will be a reliably operating, stand-alone analog/digital system, with publication quality technical documentation. Department enforced prerequisite: advanced analog core courses.

Requisites: Requires prerequisite course of ECEN 4610 (minimum grade C-). Restricted to Electrical and Computer Engineering (ECEN) or Electrical Engineering (EEEN) or ECEE concurrent (C-EEEN or C-ECENEEN) majors only.

Additional Information: Departmental Category: General

ECEN 4632 (3) Introduction to Digital Filtering

Covers both the analysis and design of FIR and IIR digital filters. Discusses implementations in both software and hardware. Emphasizes use of the FFT as an analysis tool. Includes examples in speech processing, noise canceling, and communications.

Requisites: Requires prerequisite course of ECEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development and debugging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5633

Requisites: Requires prerequisite courses of ECEN 3350 and ECEN 4593 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4634 (3) Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410: electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5634

Requisites: Requires prerequisite course of ECEN 3410 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 4638 (3) Control Systems Laboratory

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.

Requisites: Requires prerequisite course of ECEN 4138 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 4643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5643

Requisites: Requires prerequisite course of ECEN 4583 or ECEN 5543 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4652 (3) Communication Laboratory

Analysis and design of realistic communication signals in a modern digital signal processing environment. Covers both analog and digital communication signals with and without noise and distortion. Pulse amplitude modulation is used initially at baseband and then combined with amplitude and phase/frequency modulation to produce the kind of bandpass signals that are used in cell phones and wireless data networks.

Requisites: Requires prerequisite course of ECEN 4242 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 4653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5653

Requisites: Requires prerequisite course of ECEN 1030 or ECEN 1310 or CSCI 1300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5743

Requisites: Requires prerequisite course of ECEN 4583 or ECEN 5543 or CSCI 5548 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5753 and CSCI 4753 and CSCI 5753

Requisites: Requires prerequisite course of CSCI 3753 (minimum grade C-). Restricted to College of Engineering majors only.

Recommended: Prerequisite a course in statistics.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 4797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5797

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4811 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation and functional magnetic resonance imaging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5811 and ASEN 4216 and ASEN 5216

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 or ASEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5821 and ASEN 4426 and ASEN 5426

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 or ASEN 3300 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5827

Requisites: Requires prerequisite course of ECEN 3250 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Power

ECEN 4831 (3) Brains, Minds, and Computers

Provides background for the design of artificially intelligent systems based upon our present knowledge of the human brain. Includes similarities and differences between the brain and computers, robots and common computer models of brain and mind. Emphasizes the neuron as an information processor, and organization of natural as well as synthetic neural networks.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5831 and ASEN 5436

Requisites: Requires prerequisite course of ECEN 2260 or ECEN 3030 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Bioengineering

ECEN 4840 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 4841 (1-6) Independent Study

Offers an opportunity for seniors to do independent, creative work.

Repeatable: Repeatable for up to 6.00 total credit hours.

ECEN 5000 (3) Graduate Professional Seminar

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

ECEN 5005 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5008 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5009 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5011 (1-4) Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4011

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Bioengineering

ECEN 5012 (3) Special Topics

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5013 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

ECEN 5016 (1-4) Special Topics

Additional Information: Departmental Category: Optics

ECEN 5018 (1-4) Special Topics

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5021 (1-4) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Bioengineering

ECEN 5023 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering, Embedded Systems.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5024 (1-4) Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4024

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5028 (1-4) Special Topics

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5032 (3) Special Topics

Additional Information: Departmental Category: Bioengineering

ECEN 5049 (1-4) Special Topics

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5053 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering - Embedded Engineering.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4053

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5104 (3) Computer-Aided Microwave Circuit Design

Emphasizes the design of strip-line and microstrip circuits, using a CAD package. Discusses design of impedance transformers, amplifiers, switches, phase-shifters, etc. Assignments include design of typical circuits and their analysis using a microwave circuit analysis program. Laboratory includes measurements using a network analyzer facility on a typical circuit designed and fabricated by students.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to EEEN or ECEN graduate students or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5107 (3) Electric Power Grid

Examines the electrical grid, including conventional generation, transmission/ distribution, and new renewable generation technologies. Issues including grid stability, the increase in variable generation on the grid, and how the electrical grid will change in the future will be addressed. Intended for students with an engineering background from outside electrical engineering who desire an introduction to the power grid.

Requisites: Excludes graduate students in Electrical Engineering or Electrical Engineering Concurrent degree plans.

Additional Information: Departmental Category: Power

ECEN 5114 (3) Waveguides and Transmission Lines

Intermediate course dealing with guided-wave systems at HF, microwave, and optical frequencies. Modern waveguiding structures, including circular metallic waveguides, microstrip transmission lines, and optical waveguides are treated. Additional material may include waveguide losses, excitation of waveguides, microwave network theory, coupled-mode theory, resonators, and pulse propagation in waveguides.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to EEEN or ECEN graduate students or Electrical Engineering Concurrent or Electrical/Computer Engineering Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5120 (3) Neural Network Design

Introduces basic (artificial) neural network architectures and learning rules. Emphasizes mathematical analysis of these networks, methods of training them and application to practical problems such as pattern recognition, signal processing and control systems. Shows how to construct a network of "neurons" and train them to serve a useful function.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4120

Additional Information: Departmental Category: General

ECEN 5122 (3) Wireless Local Area Networks

Examines small-scale wireless networks particularly personal and local area networks. Covers licensed and unlicensed spectrum, indoor and small-scale radio propagation, modulation techniques, network topologies, ad hoc and infrastructure networks, protocol design, TCP/IP-wireless interactions and protocol standards.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5520

Requisites: Requires prerequisite course of ECEN 3810 or APPM 3570 or MATH 4510 (minimum grade D-).

Recommended: Prerequisite TLEN 5430.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5128 (3) Game Theory and Multiagent Systems

Provides an overview of game theory with a special emphasis on its application to multiagent systems, i.e., systems that are comprised of a collection of interacting and possibly competing decision making entities. Examples drawn from engineered, economics and social models, including multivehicle robotics, data networks, sensor networks and electronic commerce.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5134 (3) Electromagnetic Radiation and Antennas

Covers elementary sources and antennas, cylindrical wire antennas, loop antennas, radiation patterns and antenna gain, aperture sources such as horns and dishes, specialized antennas such as microstrip patches, linear and circular arrays, mutual coupling and ground effects, ray and numerical formulations, transmission formulas, and antenna applications.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Topics covered in this course will be investigated in more depth, require external readings, additional homework will be assigned, and the exams will be more difficult.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4138

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3300.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5139 (3) Computer-Aided Verification

Covers theoretical and practical aspects of verification of finite-state systems (hardware) and infinite-state systems (programs). Model checking: temporal logics, explicit-state and symbolic search, BDDs. Constraint solvers: SAT solvers, decision procedures. Program verification: invariants, partial vs. total correctness, abstraction. Department enforced requisite: general proficiency in discrete mathematics and programming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5135

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite CSCI 2824.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5154 (3) Computational Electromagnetics

Provides a computational study of microwave circuits and antennas, using finite-difference, finite-element, and moment methods. Requires students to develop algorithms, write and execute programs, and prepare reports analyzing results. Circuits include waveguides, microstrip lines, and center-fed dipole antennas.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-).

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5156 (3) Physical Optics

Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction.

Recommended: Prerequisite ECEN 3410.

Additional Information: Departmental Category: Optics

ECEN 5166 (3) Guided Wave Optics

Builds up the concepts necessary to understand guided wave optical systems. Topics include slab wave-guides, semiconductor lasers, fiber optics, and integrated optics.

Requisites: Requires prerequisite courses of ECEN 5645 and ECEN 5156 (all minimum grade C-).

Additional Information: Departmental Category: Optics

ECEN 5224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4224

Requisites: Requires a prereq course of ECEN 3400 (min grade D-).

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5254 (3) Remote Sensing Signals and Systems

Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered.

Requisites: Requires prerequisite courses of ECEN 3300 and ECEN 3400.

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5264 (3) Electromagnetic Absorption, Scattering, and Propagation

Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prereqs are ECEN 3400 and ECEN 3410.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5273 (3) Network Systems

Focusing on the design and implementation of network protocols and algorithms. Topics covered include the internet's layered protocol stack, TCP/IP, Web/HTTP, email/SMTP, DNS, Ethernet, wireless networks, secure networking. Students will learn socket-based network programming. Familiarity with C and UNIX required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4273 and CSCI 5273

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5274 (3) Radar Science and Techniques

Studies atmospheric radar fundamentals. Examines scattering by precipitation and atmospheric turbulence; long-wavelength radars and the dynamics of the middle and upper atmosphere; design of meteorological and clear-air radars; profiling tropospheric winds, temperature, and humidity by radar and radiometry; and ionospheric sounding using ionosondes and incoherent-scatter radars.

Requisites: Requires prerequisite course of ECEN 5254 (minimum grade C-).

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5322 (3) Search Engine & Analysis of High-dimensional Dataset

Provides students with an exposition of the novel algorithmic methods for searching and analyzing big data. The class includes a project: students design a content-based music information retrieval system similar to those used by Gracenote, Shazam, or Pandora.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5324 (3) Fundamentals of Microsystem Packaging

Introduction to the fundamentals of microsystems packaging. A seminar style course which surveys topics in microsystem packaging such as electrical package design, design for reliability, thermal management, multichip packaging, IC Assembly, sealing and encapsulation, and board assembly.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4324

Requisites: Requires a prereq course of ECEN 3410 (min grade D-).

Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4341

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Bioengineering

ECEN 5345 (3) Introduction to Solid State Physics

Provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons and electrooptical effects. Makes use of quantum mechanical methods. Department enforced prerequisite: basic quantum mechanics.

Requisites: Restricted to any graduate student or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5355 (3) Principles of Electronic Devices 1

Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3320.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5358 (3) Optimization and Optimal Control

Introduces the theory and practice of optimization and optimal control. Topics include basic theory, nonlinear system trajectories and regulation, function space operators and derivatives, optimality conditions, barrier functionals and Newton's method in function space.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 5448.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5375 (3) Microstructures Laboratory

Offers experience in monolithic silicon integrated circuit fabrication techniques, including Ic layout, pattern compiling and generation, mask making, oxidation, photolithography, diffusion, implantation, metallization, bonding, process analysis and testing. Includes design project.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4375

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5418 (3) Automatic Control Systems 1

Coverage of principles of control systems with Multiple Inputs and Multiple Outputs (MIMO). Topics include Mimo state-space theory, applications of the singular value decomposition (SVD), coprime factorization methods, frequency domain topics, and an introduction to H-infinity design.

Requisites: Requires prerequisite course of ECEN 5448 (minimum grade C-).

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4423 and CSCI 4446 and CSCI 5446

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5438 (3) Robot Control

Provides a comprehensive treatment of the mathematical modeling of robot mechanisms and the analysis methods used to design control laws for these mechanisms.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites PHYS 1110 and ECEN 4138 (minimum grade C-).

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5448 (3) Advanced Linear Systems

Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5458 (3) Sampled Data and Digital Control Systems

Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transferfunction, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5503 (3) Computer Systems Design and Architecture

Covers digital logic circuits, assembly language programming, and gate-level computer design and architecture. Also discusses computer arithmetic algorithms, I/O, peripheral device performance, networking, and the Internet. Limited to graduate students. For ECE/CS majors with nontraditional backgrounds.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4517

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5523 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4553 and CSCI 4555 and CSCI 5525

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4532

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5533 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5535

Requisites: Requires prerequisite course CSCI 3155 (minimum grade D-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5543 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5548

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 1300 and CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5553 (3) Parallel Processing

Examines a range of topics involved in using parallel operations to improve computational performance. Discusses parallel architectures, parallel algorithms and parallel programming languages. Architectures covered include vector computers, multiprocessors, network computers and data flow machines. Department enforced prerequisite: background in computer organization, introduction to programming languages and elementary numerical analysis.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5551

Recommended: Prerequisites ECEN 4593 and CSCI 3653.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5555 (3) Principles of Energy Systems and Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4555

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors) or Graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5573

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5583 (3) Artificial Intelligence

Surveys artificial intelligence methods, theories and applications. Studies the relationship between artificial intelligence and psychology, linguistics and philosophy. Introduces artificial intelligence programming.

Requisites: Requires prerequisite course CSCI 3245 (minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multicore processor designs. Also studies current and historically important computer architectures.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5593

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 4593.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5603 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management and legal issues. Gives special attention to problems unique to software projects.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5608 and EMEN 5031

Requisites: Requires prerequisite courses ECEN 4583 and ECEN 5543 and CSCI 4318 (all minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5606 (3) Optics Laboratory

Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms and experimentation of fiber optics and Fourier optics. Department enforced prerequisite: undergraduate optics course (e.g. PHYS 4510).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5606

Additional Information: Departmental Category: Optics

ECEN 5612 (3) Random Processes for Engineers

Deals with random time-varying functions and is therefore useful in the broad range of applications where they occur. Topics include review of probability, convergence of random sequences, random vectors, minimum mean-square error estimation, basic concepts of random processes, Markov processes, Poisson processes, Gaussian processes, linear systems with random inputs, and Wiener filtering. Applications range from communications, communication networks, and signal processing to random vibration/stress analysis, mathematical finance, physics, etc.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5613 (3) Embedded System Design

Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented and presented. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5616 (3) Optoelectric System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4616

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Optics

ECEN 5622 (3) Information Theory and Coding

Covers fundamental limits of data compression, reliable transmission of information and information storage. Topics include information measures, typicality, entropy rates of information sources, limits and algorithms for lossless data compression, mutual information, and limits of information transmission over noisy wired and wireless links. Optional topics include lossy data compression, limits of information transmission in multiple-access and broadcast networks, and limits and algorithms for information storage.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5623 (3) Real-Time Embedded Systems

Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5626 (3) Active Optical Devices

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance.

Recommended: Prerequisite ECEN 5355.

Additional Information: Departmental Category: Optics

ECEN 5632 (3) Theory and Application of Digital Filtering

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5633 (3) Hybrid Embedded Systems

Introduces system hardware and design techniques for embedded and hybrid reconfigurable systems. Intended for those interested in developing projects using hardware description languages to build application-specific computing systems. Industry standards are used for design, development and debugging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4633

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5634 (3) Graduate Microwave and RF Laboratory

Introduce RF and microwave measurement methods. A laboratory course whose experiments build on material learned in ECEN 3410: electromagnetic waves, transmission lines, waveguides, time-domain reflection, frequency-domain measurement, microwave networks, impedance matching, antenna pattern measurement, radar and simple nonlinear concepts such as harmonics, square-law detection, mixing and transmitter/receiver applications.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4634

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5643 (3) SW Engineering of Concurrent Systems

Addresses engineering of applications requiring multiple software processes running concurrently, sharing data, and communicating as a system in a single environment. Topics include performance analysis of architecture design; analysis of requirements, design and testing of synchronization and communication; the interplay of system design and performance with the impact of memory management, input/output, and file system support.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4643

Requisites: Requires prerequisite course of ECEN 5543 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5645 (3) Introduction to Optical Electronics

Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5652 (3) Detection and Extraction of Signals from Noise

Introduces detection, estimation, and related algorithms. Topics in detection include simple/composite hypothesis testing, repeated observations and asymptotic performance and sequential detection. Topics in estimation include Bayesian estimation including minimum mean-square estimation and non-random parameter estimation. Topics in algorithms vary. Examples include algorithms for state estimation and smoothing in Hidden Gauss-Markov models and the expectation-maximization algorithm. Applications include communications, radar/sonar/geophysical signal processing, image analysis, authentication, etc.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5653 (3) Real-Time Digital Media

Learn how to design and build Linux-based real-time system applications for digital media encode/decode and transport. Course focus is on the process as well as fundamentals of designing, coding, and testing Linux-based real-time systems often used in industry for digital media systems. Students use POSIX kernel-mapped threads and drivers to implement real-time digital media solutions.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4653

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5672 (3) Digital Image Processing

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion).

Requisites: Requires prerequisite course ECEN 5632 (minimum grade C-).

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5673

Recommended: Prerequisite CSCI 5573 or a course in computer networks.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5682 (3) Theory and Practice of Error Control Codes

Introduces error control coding techniques for reliable transmission of digital data over noisy channels. Topics include algebraic characterizations of cyclic codes, convolutional codes, modern graph codes, decoding algorithms for block codes, Viterbi algorithm and iterative decoding on graphs. Applications include modern digital communication and storage systems including deep space communications, satellite broadcasting, cellular networks, and optical disk storage.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5683 (3) Programmable Logic Embedded System Design

Learn to design programmable systems on a chip for the purpose of creating prototypes or products for a variety of applications. Explores complexities, capabilities and trends of Field Programmable Gate Arrays (FPGA) and Complex Programmable Logic Devices (CPLD). Implement synchronization and timing closure in these devices. Projects will involve the latest software and FPGA development tools and hardware platforms.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5686 (3) Optical Communications Systems

Emphasizes the elements that optical communication systems have in common with other communication systems. Works from a general communication system model toward fiber optic applications. Emphasizes the statistical nature of electronic based communication. Topics include 1) general system models, 2) detectors and receivers, 3) optical channels with emphasis on the single mode fiber channel, 4) coherent and incoherent systems: a) sources, b) modulation and c) detection, 5) special topics ranging from optical sensing to quantum communications.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Optics

ECEN 5692 (3) Principles of Digital Communication

Introduces fundamental principles of efficient and reliable transmission of information used in wired and wireless digital communication systems including cable modems, smart phones/tablets, cellular networks, local area (wi-fi) networks, and deep-space communications. Topics include bandwidth and power constraints, digital modulation methods, optimum transmitter and receiver design principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5696 (3) Fourier Optics

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging.

Recommended: Prerequisites ECEN 3300 and ECEN 3410.

Additional Information: Departmental Category: Optics

ECEN 5737 (3) Adjustable-Speed AC Drives

Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine).

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3170.

Additional Information: Departmental Category: Power

ECEN 5743 (3) SW Engineering of Distributed Systems

Addresses engineering of networked applications and self-contained embedded system products involving multiple processors. The fundamental concepts of software engineering are complicated by an application running simultaneously and asynchronously on multiple processors over a network. Topics: specification, analysis, design, and testing of distributed components including concerns of security, synchronization, transaction coordination, data replication, web services, and service oriented architectures.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4743

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Prerequisite ECEN 4583 or ECEN 5543 or CSCI 5548.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4753 and CSCI 4753 and CSCI 5753

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5763 (3) Embedded Machine Vision and Intelligent Automation

Introduces students to machine vision and machine learning methods used in automation, autopilots and security and inspection systems. Embedded and automation topics include implementation of algorithms with FPGA or GP-GPU embedded real time co-processing for autopilots (intelligent transportation), general automation and security including methods for detection, classification, recognition of targets for inspection, surveillance, search and rescue, and machine vision navigation applications.

Requisites: Requires prereq courses of ECEN 5613 and 5623 (all minimum grade of C). Restricted to EEEN or ECEN or C-ECENEEEN or C-EEEN or CRTGE students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4797

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Power

ECEN 5803 (3) Mastering Embedded Systems Architecture

Acquire an understanding of embedded systems architectures for the purpose of creating prototypes or products for a variety of applications. The salient issues in the decision making process will be examined, including trade-offs between hardware and software implementations, processor and operating system selection and IP creation or acquisition. Projects will involve the latest software development and tools and hardware platforms.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5807 (3) Modeling and Control of Power Electronic Systems

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, null-double injection techniques in linear circuits, input filter design, and low-harmonic rectifiers.

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5811 (3) Neural Signals and Functional Brain Imaging

Explores bioelectric and metabolic signals generated by the nervous system from two stand points: 1) their biophysical genesis and role in neural integration and 2) neurotechnologies such as electroencephalography, magnetoencephalography, deep brain stimulation and functional magnetic resonance imaging.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4811 and ASEN 4216 and ASEN 5216

Additional Information: Departmental Category: Bioengineering

ECEN 5813 (3) Principles of Embedded Software

Introduces principles around embedded software elements and software development needed for the Embedded Systems Engineering core curriculum. Student will write C program applications that employ efficient, high performance and robust software design techniques. Topics include bare-metal firmware, C-programming optimization and introductions to underlying embedded architecture. Sound testing and debug practices will be instilled and utilized in several application projects.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5817 (3) Resonant and Soft-Switching Techniques in Power Electronics

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, LCC, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched PWM converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits.

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4821 and ASEN 4426 and ASEN 5426

Additional Information: Departmental Category: Bioengineering

ECEN 5823 (3) Internet of Things Embedded Firmware

Acquire firmware development skills to meet low energy and internet connectivity demands of embedded systems. Event-driven firmware techniques will be explored through programming assignments, transitioning to programming an Internet of Things RF Network Protocol such as Bluetooth Low Energy or Thread. The coursework will align with the latest industry firmware and embedded wireless protocol trends.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4827

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Power

ECEN 5830 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 5831 (3) Brains, Minds, and Computers

Provides background for the design of artificially intelligent systems based upon our present knowledge of the human brain. Includes similarities and differences between the brain and computers, robots and common computer models of brain and mind. Emphasizes the neuron as an information processor, and organization of natural as well as synthetic neural networks.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4831 and ASEN 5436

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Bioengineering

ECEN 5837 (3) Mixed-Signal IC Design Lab

Software laboratory course extends the concepts developed in ECEN 5827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application.

Requisites: Requires prerequisite course of ECEN 5827 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 5863 (3) Programmable Logic Embedded System Design

Learn to design programmable systems on a chip for the purpose of creating prototypes or products for a variety of applications. Explore complexities, capabilities and trends of Field Programmable Gate Arrays (FPGA) and Complex Programmable Logic Devices (CPLD). Implement synchronization and timing closure in these devices. Projects will involve the latest software and FPGA development tools and hardware platforms.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5907 (3) Special Topics

Special topics class.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

ECEN 6016 (1-3) Special Topics

Additional Information: Departmental Category: Optics

ECEN 6139 (3) Logic Synthesis of VLSI Systems

Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits.

Recommended: Prerequisites ECEN 5139 and CSCI 5454.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 6144 (3) Electromagnetic Boundary Problems

Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics.

Requisites: Requires prereq course of ECEN 5114 or 5134 (minimum grade C-). Restricted to graduate students in Electrical Engr (EEEN) or Electrical/Computer Engr (ECEN) or Electrical Engr Concurrent or Electrical/Computer Engr Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 6800 (3) Master of Engineering Report

Additional Information: Departmental Category: General

ECEN 6940 (1) Master's Degree Candidate

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

ECEN 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 6960 (3) Master of Engineering

Additional Information: Departmental Category: General

ECEN 7438 (3) Theory of Nonlinear Systems

Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications.

Requisites: Requires prerequisite course of ECEN 5448 (minimum grade C-). Restricted to graduate students in Electrical Engr (EEEN) or Electrical/Computer Engr (ECEN) or Electrical Engr Concurrent or Electrical/Computer Engr Concurrent Degree students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 7840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 7849 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 8990 (1-10) Doctoral Thesis

Repeatable: Repeatable for up to 10.00 total credit hours.

Additional Information: Departmental Category: General

Computer Engineering - Minor

A student graduating with a bachelor's degree from CU Boulder may also receive a minor in computer engineering.

The minor in computer engineering provides training in computer engineering beyond the training usually received by science and mathematics majors. It can also broaden the training of students majoring in other engineering and applied science fields to provide more depth in computer engineering. The goal is to introduce students to the fundamentals of computer engineering and introduce them to a more advanced field. Such skills are important to students who expect to participate in real world situations that increasingly involve computer engineering solutions.

The minor is not available to students earning a Bachelor of Science degree in electrical engineering or electrical & computer engineering.

Requirements

Prerequisites

The prerequisite for these courses is computing experience such as that provided by ECEN 1310 or CSCI 1300.

Course Requirements

This minor requires a minimum of 19 credit hours.

Students admitted to the computer engineering minor must have a cumulative GPA of 2.700 or better. A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Each individual course that is counted toward this minor must be passed with a grade of D- or better (note that a C- or better grade is required in all prerequisite courses).

Required Courses and Credit Hours

Required Courses

CSCI 2270	Computer Science 2: Data Structures	4
ECEN 2350	Digital Logic	3
ECEN 3350	Programming Digital Systems	3
ECEN 3360	Digital Design Laboratory	3
ECEN 4593	Computer Organization	3
Emphasis Area (Choose one)		3
ECEN 4553	Compiler Construction	
ECEN 4583	Software System Development	
ECEN 4613		
ECEN 4623		
ECEN 5593	Advanced Computer Architecture	

Total Credit Hours 19

Electrical and Computer Engineering - Bachelor of Science (BS)

Program Objectives

- Graduates will be situated in growing careers involving the design, development or support of electrical, electronic and computer hardware and software systems, software engineering, devices instruments or products, or will be successfully pursuing an advanced degree.**

Graduates attaining the Electrical and Computer Engineering (ECE) BS degree will have comprehensive knowledge and experience in the concepts and design of electrical, electronic and computer devices, circuits and systems. Besides emphasizing computer hardware and software, the ECE curriculum also emphasizes design, integration, implementation and application of computer systems, as well as experience in software development. This is achieved through a sequence of required courses in these areas, culminating in a major design project incorporating realistic engineering constraints. The curriculum also provides opportunities for specialization in areas such as compiler design, embedded systems, software engineering, and VLSI design, as well as in the electrical engineering specialties. ECE graduates will have attained other professional skills that will be useful throughout their careers, including verbal and written communication, and the ability to function on multidisciplinary teams. The ECE curriculum is rich in laboratory work. ECE graduates will have achieved extensive practical experience in the laboratory techniques, tools and skills that provide a bridge between theory and practice.
- Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.**

ECE graduates experience a curriculum that contains a broad core of classes focused on mathematical and physical principles that are fundamental to the fields of electrical and computer engineering. Hence, they understand the physical and mathematical principles underlying electrical and electronic technology, and computer systems, and are able to analyze and solve electrical and computer engineering problems using this knowledge. In addition to basic classes in mathematics, science, and computing, the ECE curriculum includes a sequence of courses in analog and digital electronic circuits and systems, electromagnetic fields, probability, computer software, and computer design and architecture.
- Graduates will have demonstrated professional and personal leadership and growth.**

To lay the foundation of a long career in a rapidly changing field, a broad background of fundamental knowledge is required. This is achieved in the ECE curriculum through a sequence of required classes in mathematics, physics, chemistry, and the ECE core. In addition, the graduate must be capable of lifelong learning; this is taught through assignments and projects that require independent research and study. The curriculum includes a significant component of electives in the humanities and social sciences. ECE graduates will have knowledge of the broader contemporary issues that impact engineering solutions in a global and societal context. They will have the verbal and written communications skills necessary for a successful career in industry or academia. Graduates also understand the meaning and importance of professional and ethical responsibility.

Outcomes

The ECE curriculum is designed to prepare our graduates to meet these as follows:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Concurrent Degree Program

BS/MS in Electrical & Computer Engineering and Electrical Engineering

The concurrent BS/MS program enables especially well qualified electrical & computer engineering majors to be admitted to the MS program during the junior year of their BS program, and to work simultaneously toward their BS degree along with an MS in electrical engineering. This program allows for early planning of the MS portion of the student's education, taking graduate courses as part of the BS degree, more flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit-hour load.

For more information, visit the department's BS/MS Degrees (<http://www.colorado.edu/ecee/undergraduate-program/degrees/bs-ms-degrees>) webpage.

Requirements

The following information represents a sample 8-semester sequence of study only. Up-to-date curricular information and policies are contained in the *ECEE HELP Guide*.

Sample Four-Year Plan of Study

Course	Title	Credit Hours
Year One		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
ECEN 1100	Freshman Seminar	1
ECEN 1400	Introduction to Digital and Analog Electronics	3

PHYS 1110	General Physics 1	4

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Electrical Engineering - Bachelor of Science (BS)

A degree in electrical engineering provides graduates the opportunity to enter the profession of engineering and to engage in work as a design, production, testing, consulting, research, teaching, or management professional in a wide variety of careers in the computer industry, telecommunications, instruments, the power and renewable energy industry, the biomedical industry, aerospace, and academia. Some graduates also go on to develop careers in other professions like law and medicine.

Examples of career opportunities include development of new electrical or electronic devices, instruments or products; design of equipment or systems; production and quality control of electrical products for private industry or government; sales or management for a private firm or government; and teaching and research in a university.

Program Objectives

Graduates will be situated in growing careers involving the design, development or support of electrical or electronic systems, devices, instruments, or products, or will be successfully pursuing an advanced degree.

Graduates attaining the Electrical Engineering (EE) BS degree will have comprehensive knowledge and experience in the concepts and design of electrical and electronic devices, circuits, and systems. This is achieved through a sequence of required courses in these areas, culminating in a major design project incorporating realistic engineering constraints.

Moreover, graduates will have advanced, specialized knowledge and skills in elective areas such as communications and digital signal processing, control systems, analog and digital integrated circuit design, semiconductor devices and optoelectronics, electromagnetics and wireless systems, power electronics, renewable energy, bioelectronics, and digital systems.

EE graduates will have attained other professional skills that will be useful throughout their careers, including verbal and written communication and the ability to function on multidisciplinary teams.

The EE curriculum is rich in laboratory work. EE graduates will have achieved extensive practical experience in the laboratory techniques, tools, and skills that provide a bridge between theory and practice.

Graduates will have advanced in professional standing based on their technical accomplishments and will have accumulated additional technical expertise to remain globally competitive.

EE graduates experience a curriculum that contains a broad core of classes focused on mathematical and physical principles that are fundamental to the field of electrical engineering. Hence, they understand the physical and mathematical principles underlying electrical and electronic technology, and are able to analyze and solve electrical engineering problems using this knowledge. In addition to basic classes in mathematics, science, and computing, the EE curriculum includes a sequence of courses in analog and digital electronic circuits and systems, and electromagnetic fields.

Graduates will have demonstrated professional and personal leadership and growth.

To lay the foundation for a long career in a rapidly changing field, a broad background of fundamental knowledge is required. This is achieved in the EE curriculum through a sequence of required courses in mathematics, physics, chemistry, and the EE core. In addition, the graduate must be capable of lifelong learning; this is taught through assignments and projects that require independent research and study.

The curriculum includes a significant component of electives in the humanities and social sciences. EE graduates will have knowledge of the broader contemporary issues that impact engineering solutions in a global and societal context. They will have the verbal and written communication skills necessary for a successful career in industry or academia. Graduates also understand the meaning and importance of professional and ethical responsibility.

Outcomes

- an ability to apply knowledge of mathematics, science, and engineering

- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Concurrent Degree Program BS/MS in Electrical Engineering

The concurrent BS/MS program enables especially well qualified electrical engineering majors to be admitted to the MS program during the junior year of their BS program, and to work simultaneously toward their BS degree along with an MS in electrical engineering. This program allows for early planning of the MS portion of the student’s education, taking graduate courses as part of the BS degree, more flexibility in the order in which courses are taken, and more efficient use of what would otherwise be a final semester with a light credit-hour load.

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Electrical Engineering - Minor

A student graduating with a bachelor's degree from CU Boulder may also receive a minor in electrical engineering (except for students earning a BS degree in Electrical Engineering or Electrical & Computer Engineering).

The minor in electrical engineering provides training in electrical engineering beyond the training usually received by science, mathematics and applied mathematics majors. It can also broaden the training of students majoring in other engineering fields to provide more depth in electrical engineering. The goal is to teach students the fundamentals of electrical engineering and introduce them to at least one of its many advanced application areas. Such skills are important to students who expect to participate in real world situations that increasingly involve electrical engineering applications.

Requirements

Prerequisites

Prerequisites for the Electrical Engineering Minor are two semesters of calculus and differential equations with linear algebra. A grade of C- or better is required in all prerequisite courses.

Course Requirements

This minor requires a minimum of 18 credit hours.

Students admitted to the Electrical Engineering Minor must have a cumulative GPA of 2.700 or better. A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Each individual course that is counted toward this minor must be passed with a grade of D- or better (note that a C- or better grade is required in all prerequisite courses).

Required Courses and Semester Credit Hours

Required Courses

ECEN 2250	Introduction to Circuits and Electronics	3
-----------	--	---

ECEN 2260	Circuits as Systems	3
ECEN 2270	Electronics Design Lab	3

Emphasis Areas (complete 9 credits in one of the following emphasis areas) 9

Bioengineering (all 3 courses are required)

ECEN 4011	Special Topics (Topic: Design of Implantable Medical Devices)	3
ECEN 4021	Special Topics (Topic: Engineering Application in Medicine)	3
ECEN 4341	Bioelectromagnetics	3

Computer Engineering (all 3 courses are required)

ECEN 2350	Digital Logic	3
ECEN 3350	Programming Digital Systems	3
ECEN 3360	Digital Design Laboratory	3

Electronics (choose 3 courses)

ECEN 3250	Microelectronics	3
ECEN 3320	Semiconductor Devices	3
ECEN 3170	Electromagnetic Energy Conversion 1	3
ECEN 4797	Introduction to Power Electronics	3
ECEN 4827	Analog IC Design	3

Fields, Waves and Photonics (all 3 courses are required)

ECEN 3400	Electromagnetic Fields and Waves	3
ECEN 3410	Electromagnetic Waves and Transmission	3
ECEN 4106	Photonics	3

Nanostructures and Devices (all 3 courses are required)

ECEN 3320	Semiconductor Devices	3
ECEN 4005	Special Topics - Photovoltaic Devices	

ECEN 4555	Principles of Energy Systems and Devices	3
-----------	--	---

Signals and Systems (choose 3 courses)

ECEN 3300	Linear Systems	3
ECEN 4138	Control Systems Analysis	3
ECEN 4242	Communication Theory ¹	3
ECEN 4632	Introduction to Digital Filtering	3

¹ Requires one of the following courses in probability: ECEN 3810, APPM 3570 or MATH 4510.

Electrical Renewable Energy Systems - Minor

A student graduating with a bachelor's degree from CU Boulder may also receive a minor in electrical renewable energy systems (except for students earning a BS degree in Electrical Engineering or Electrical & Computer Engineering).

As society moves away from the overwhelming dependence on fossil fuels towards more sustainable and environmentally friendlier alternatives, the need for engineers and scientists ready to take on new challenges and bring innovations to present and future energy systems is expected to grow. The objectives of the minor in electrical renewable energy systems are to address the growing interests and technical needs in renewable energy sources and efficient utilization of electrical energy. The minor provides training in applications of electrical engineering to renewable energy systems such as solar and wind beyond the training

usually received by science, mathematics, applied mathematics or other engineering majors.

Requirements

Prerequisites

Prerequisites for the Electrical Renewable Energy Systems Minor are two semesters of calculus and differential equations with linear algebra.

Course Requirements

This minor requires a minimum of 18 credit hours.

Students admitted to the Electrical Renewable Energy Systems Minor must have a cumulative GPA of 2.700 or better. A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Each individual course that is counted toward this minor must be passed with a grade of D- or better (note that a C- or better grade is required in all prerequisite courses).

Required Courses and Semester Credit Hours

Required Courses

ECEN 2410	Renewable Sources and Efficient Electrical Energy Systems	3
ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2260	Circuits as Systems	3
ECEN 3250	Microelectronics	3

Upper-Division Electives

Select two of the following courses:

ECEN 3170	Electromagnetic Energy Conversion 1	
ECEN 4167	Electromagnetic Energy Conversion 2	
ECEN 4797	Introduction to Power Electronics	
ECEN 4517	Power Electronics and Photovoltaic Power Systems Laboratory	
ECEN 4XXX	Special Topics - Wind Energy & Photovoltaic Devices	

Total Credit Hours 18

Signals and Systems - Minor

A student graduating with a bachelor's degree from CU Boulder may also receive a Minor in Signals and Systems (except for students earning a BS degree in Electrical Engineering or Electrical & Computer Engineering).

The Minor in Signals and Systems provides training in control systems, digital signal processing or communications beyond the training usually received by science, mathematics and applied mathematics majors. It can also broaden the training of students majoring in other engineering fields to provide depth in signals and systems. The goal is to teach students the fundamentals of signals and systems and introduce them to laboratory applications.

Requirements

Prerequisites

Prerequisites for the Signals and Systems Minor are General Physics 2 (PHYS 1120) and a solid mathematics background in Fourier series, Laplace transforms, transfer functions and sinusoidal response. The probability prerequisite may be met with ECEN 3810, APPM 3570, MATH 4510 or an equivalent transfer course. A grade of C- or better is required in all prerequisite courses.

Course Requirements

This minor requires a minimum of 18 credit hours.

Students admitted to the Signals and Systems Minor must have a cumulative GPA of 2.700 or better. A cumulative GPA of 2.250 or better is required for courses used to satisfy the requirements of this minor. Each individual course that is counted toward this minor must be passed with a grade of D- or better (note that a C- or better grade is required in all prerequisite courses).

Required Courses and Semester Credit Hours

Required Courses

ECEN 2250	Introduction to Circuits and Electronics	3
ECEN 2260	Circuits as Systems	3
ECEN 3300	Linear Systems	3

Electives

Choose the remaining 9 credits from any combination of the following theory and lab courses:

ECEN 3350	Programming Digital Systems	
ECEN 4138	Control Systems Analysis	
ECEN 4638	Control Systems Laboratory	
ECEN 4242	Communication Theory	
ECEN 4652	Communication Laboratory	
ECEN 4532	Digital Signal Processing Laboratory	
ECEN 4632	Introduction to Digital Filtering	

Students may petition to replace three of these credit hours with a 3-credit hour, 5000-level ECEN course in digital signal processing, communications or controls.

Engineering and Applied Science

Interdisciplinary programs managed by the College (<http://www.colorado.edu/engineering>) are included here. The listing of courses includes interdisciplinary courses as well as those offered by the Engineering Honors Program (<http://www.cuhonorsengineering.com>) and the Herbst Program of Humanities for Engineers (<http://www.colorado.edu/herbst>).

Minor

- Biomedical Engineering - Minor (p. 719)
- Energy Engineering - Minor (p. 720)
- Global Engineering - Minor (p. 721)

Certificate

- Engineering Leadership - Certificate (p. 720)
- Engineering, Science and Society - Certificate (p. 720)
- Lighting Design - Certificate (p. 722)

BMEN 2000 (3) Introduction to Biomedical Engineering

Reviews important aspects of biology and develops a basic understanding of the biomedical engineering field. Topics include physiological principles, biomechanics, bioinstrumentation, bioimaging, biotechnology and biomaterials.

Requisites: Restricted to Biomedical Engineering minors only.

Recommended: Prerequisite high school biology.

Grading Basis: Letter Grade

COEN 1236 (1) Precalculus Work Group

Develops and enhances problem solving skills for students enrolled in APPM 1235. Course is conducted in a collaborative learning environment with students working in groups under the guide of a facilitator.

Requisites: Requires enrollment in corequisite course of APPM 1235.

Grading Basis: Pass/Fail

COEN 1350 (1) Calculus 1 Work Group

Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Requires enrollment in corequisite course of APPM 1350 or APPM 1345.

Grading Basis: Pass/Fail

COEN 1360 (1) Calculus 2 Work Group

Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator.

Requisites: Requires enrollment in corequisite course of APPM 1360.

Grading Basis: Pass/Fail

COEN 1400 (3) Project Design

Teams of first-year students solve real engineering design problems. Curriculum focuses on iterative design process, teamwork and team dynamics, supporting design with testing and analysis and technical writing.

Requisites: Restricted to students with 0-75 units completed and restricted to Pre-Engineering (PREN-COS) students only.

COEN 1500 (1) Introduction to Engineering

Provides an introduction to the engineering profession, including an examination of current discipline specializations and a focus on career paths for those trained in engineering. Provides sufficient knowledge of the engineering disciplines necessary to make an informed major choice.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering or Pre-Engineering Arts and Sciences majors only.

COEN 1510 (1) Self Management and Leadership Principles 1

Prepares freshmen in their transition to college. Focuses on academic success strategies, time and stress management, study skills, and S.M.A.R.T. goal setting. Students identify their strengths and participate in peer-to-peer interaction to foster collaboration and positive behavior. Leadership capabilities, professional development, and insights into career interests are explored. Speakers provide students with unique insights into being successful students and engineers.

Requisites: Restricted to Engineering Goldshirt (PENG) students only.

COEN 1520 (1) Self Management and Leadership Principles 2

Continuation of COEN 1510. Self-management and student development is reiterated. Includes time and stress management, study skills and S.M.A.R.T. goal setting for the "master" student. Leadership explored through group projects. Students complete professional development activities and assignments geared toward preparing students for engineering internships and research opportunities. Advising on different engineering department provided to support major selection and course scheduling.

Requisites: Requires prerequisite course of COEN 1510 (minimum grade C-). Restricted to Engineering Goldshirt (PENG) students only.

COEN 1550 (1) YOU'RE@CU: Undergraduate Career Seminar

Exposes first or second year undergraduate students to engineering research careers through a partner program (YOU'RE@CU), panel discussions with researchers in academics and industry, and exposure to research labs. Restricted to YOU'RE@CU participants. Department consent required.

Grading Basis: Pass/Fail

COEN 2050 (3) Engineering Leadership Gateway

Examines concepts of engineering leadership and the essential skills required to become an effective leader. Together students will explore leadership principles, creative and critical thinking, interpersonal skills (e.g. collaboration, conflict resolution, leading in diverse communities), intrapersonal development (e.g. self-appraisal, reflective practice, personal leadership philosophy), organizational competencies (e.g. planning, sustainability, climate), effective communication and ethical decision-making. Fulfills Engineering humanities/social science requirements.

Requisites: Restricted to Engineering Leadership Program (PENL) students only.

COEN 2350 (1) Calculus 3 Work Group

Provides problem solving assistance to students enrolled in APPM 2350. Conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator.

Requisites: Requires enrollment in corequisite course of APPM 2350.

Grading Basis: Pass/Fail

COEN 2500 (1) Industry 101: Technical Career and Professional Development

Connects students to the world of technical work, helping them gain an understanding of themselves and develop a unique, professional identity. Knowledge will be gained about how to research various industries and how to make an informed decision about career paths. Structured lessons will be incorporated that will cover resumes, interview preparation, communication skills, proper professional etiquette and employer expectations, self-exploration and connections with industries.

Grading Basis: Letter Grade

COEN 2830 (1-3) Special Topics

Explores topics of interest in engineering. Content varies by instructor and semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 2850 (1-3) Independent Study

Provides opportunities for independent study at the lower-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 3050 (3) Complex Leadership Challenges

Approaches leadership as a process of inquiry, empathy, and action, cultivating skills leaders need to understand, communicate about, and generate innovative approaches to complex issues. Each student conducts extensive, principled research about a complex social issue of their choice, investigating its multidimensionality by applying different analytic lenses. Instructor consent required for students not in Engineering Leadership.

Requisites: Restricted to Engineering Leadership Program (PENL) students only.

Grading Basis: Letter Grade

COEN 3051 (1) Leadership Seminar 1: Launching the Leadership Experience

Practicing needs assessment, decision-making and planning skills, students take this seminar to prepare for their Leadership Experience (required for completion of the Engineering Leadership Certificate). Students work in collaboration with each other, their Engineering Leadership Program mentors and campus/community organizations and leaders to lay the foundation for and launch their individually unique Leadership Experiences.

Requisites: Requires a prerequisite course of COEN 2050 (minimum grade C-). Restricted to Engineering Leadership Program (PENL) students only.

Grading Basis: Letter Grade

COEN 3052 (1) Leadership Seminar 2: Leadership Experience

Tackling a leadership experience of their own design, students undertake a key component of the Engineering Leadership Program experience and a requirement for the completion of the Engineering Leadership Certificate. Guides students through a process of planning, executing and evaluating their leadership experience and progress toward personalized leadership development goals. Coursework involves working with a mentor, collaborating with peers and conducting research.

Requisites: Requires a prerequisite course of COEN 2050 (minimum grade D-). Restricted to Engineering Leadership Program (PENL) students only.

Grading Basis: Letter Grade

COEN 3053 (1) Leadership Seminar 3: ELP Synthesis and Final ePortfolio

Progressing through this course, students complete the ePortfolio that demonstrates fulfillment of the requirements of the Engineering Leadership Certificate, reflecting upon synthesizing and discerning practical applications of the leadership experiences tackled throughout throughout their time at CU.

Requisites: Restricted to Engineering Leadership Program (PENL) students only.

Grading Basis: Letter Grade

COEN 3930 (6) Engineering Co-op

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program with a university, government agency, or industry. Offered only through Continuing Education. 00 GPA or higher.

Repeatable: Repeatable for up to 24.00 total credit hours.

Requisites: At least a 2.75 cumulative GPA is required. Restricted to College of Engineering majors only.

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

COEN 4830 (1-3) Special Topics

Explores topics of interest in engineering. Content varies by instructor and semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 4850 (1-3) Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Subject and/or project agreed upon by the student and the instructor to fit the needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

COEN 4950 (1-6) Global Engineering Internship

Gives students the opportunity to pursue studies in engineering-related work experience projects abroad that allow them to explore the relationship between theory and practice in their major. Internships generally require 40 hours on the job per credit hour and evidence of significant learning (e.g., paper, final project and employer evaluations). Does not count toward degree requirements.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

EDEN 5001 (3) Special Topics in Development Engineering

At the graduate level, covers topics of interest in development, for both domestic and international locations. Content varies by section and from semester to semester.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

EHON 1151 (3) Critical Encounters

Explores critical, literary and philosophical approaches to the following related problems: 1) how we organize knowledge and construct meaning, and 2) how we locate a sense of self as both individuals and members of various groups amidst the resources and demands of competing interpretations, traditions challenges and circumstances. Department restriction, honors standing or instructor consent required.

Requisites: Restricted to Engineering Honors Program (PEHN) students only.

EHON 1500 (1) Honors Reading Group

Faculty led reading seminars, focusing on specific text or texts chosen by the faculty. Special attention will be paid to group formation and the process of collaborative learning.

Requisites: Restricted to Engineering Honors Program (PEHN) students only.

Additional Information: Engineering Honors Course

EHON 3843 (3) Special Topics

Explores different important themes relative to the Engineering Honors Program. Check with department for specific semester topics.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Engineering Honors Program (PEHN) students only.

Additional Information: Engineering Honors Course

EHON 4051 (1) Dimensions of Leadership

Explores the many dimensions of leadership that exceed technical knowledge: the ethical, societal, cultural, interpersonal, and personal. Through seminars, workshops and exposure to leaders, students will reflect upon their engineering education in light of the multifaceted demands of effective leadership and their own personal career goals. Students will take an active role in shaping the course. Department restriction, honors standing or instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

ENEN 2820 (1-6) Special Topics

Explores topics related to energy engineering. Content will vary by semester and instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

ENEN 4321 (3) Oil and Gas Processing

Provides a foundation in the fundamentals of oil and gas processing, including discovery, extraction and refining. Due to the importance of oil and gas in the current energy infrastructure, this course provides a broad understanding of the industry to students interested in energy engineering.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

ENEN 4600 (3) Interdisciplinary Energy Engineering Projects

Prepares students to analyze energy systems from technical, economic, and policy perspectives, with project topics varying by semester. Provides historical and contemporary context of the energy landscape. Emphasizes application of engineering fundamentals for the design and evaluation of real world energy systems. Projects will be completed in interdisciplinary teams.

Requisites: Requires preprerequisite courses of ENVS 3621 and CHEN 3660 (all minimum grade C). Restricted to Energy Engineering Minor (ENMR-MIN) majors only.

Grading Basis: Letter Grade

ENEN 4840 (1-6) Special Topics

Explores topics related to energy engineering. Content will vary by semester and instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 1010 (3) Humanities for Engineers

Explores a wide variety of challenging and interesting humanistic themes (love, responsibility, ambition, etc.) in many forms (fiction, philosophy, plays, poetry, art, music, etc.). In small discussion-based classes, emphasizes the writing, public speaking and critical thinking skills needed to excel as a professional engineer. Fulfills College of Engineering writing requirement for first-year freshmen only.

Requisites: Restricted to students with 0-26 (Freshmen) College of Engineering majors only.

HUEN 1843 (3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

HUEN 1850 (3) Engineering in History: The Social Impact of Technology

Explores how engineering has shaped who we are, how we think, and what we think about, by examining preconceived notions of progress, property, time, and work. Textbook readings plus original sources in philosophy, literature, psychology, and economics provide a rich and stimulating tour of engineering history.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

HUEN 2010 (3) Tradition and Identity

Explores the place and possibility of personal identity both within and against the influence of tradition, including family, culture, language, and social, political and economic institutions. Via literature and film, wrestles with the nature of freedom, self-determination, and belonging.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2020 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval.

Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 2000

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2100 (3) History of Science and Technology to Newton

Spans invention and discovery from the Stone Age to the age of Newton, raising questions about culture, history, and personal expectation; studies Pyramids, odometers, cathedrals, Galileo, etc., on the way.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2120 (3) History of Modern Science from Newton to Einstein

Surveys the great discoveries and theoretical disputes from Newtonian celestial mechanics to the theory of relativity. Includes physics, astronomy, chemistry, geology, and biology; closely examines scientific method, evolution, light and quantum theory. Uses original sources by Newton, Faraday, Lavoisier, Darwin, etc., for immediate contact with the great minds in science.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2130 (3) History of Modern Technology from 1750 to the Atomic Bomb

Surveys the great innovations from the Steam Age to the Atomic Age: transportation, modern construction, communications, internal combustion, etc. Supplements textbook accounts with drawings, patents, and original selections by Edison, Carnegie, Tesla, Bell, etc. Studies the sociological impact of social change via contemporary sources in literature, philosophy, painting and film.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 2210 (3) Engineering, Science, and Society

Explores challenges that engineering and science pose for society plus the ways that societies shape or impede science and engineering. Case studies range from contemporary issues (global warming, nuclear weapons, and genetic engineering) to classic cases (the execution of Socrates). Core texts in the Western Tradition supplement contemporary articles and films.

Requisites: Restricted to College of Engineering majors only.

HUEN 2843 (1-3) Special Topics

Explores different important themes in the humanities; check with the department for specific semester topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

HUEN 3100 (3) Advanced Humanities for Engineers

Explores what it means to be a fully human being: through group discussion, closely examines individual works of culturally and historically significant philosophy, literature and art. Includes extensive writing. Fulfills the College of Engineering & Applied Science writing requirement. Department prerequisite: a minimum GPA of 3.0.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

HUEN 3200 (3) Humanities for Engineers 2

Continues HUEN 3100's discussion of the human condition by exploring culturally and historically significant works of multiple genres in small-group seminars. Alert class participation is required, and writing skills will be honed through regular assignments.

Requisites: Requires prerequisite course of HUEN 3100 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

HUEN 3350 (3) Gods, Heroes and Engineers: The Western Quest for Excellence

Investigates the intensely competitive quest of the ancient Greeks for excellence in everything from art and literature to science and war and also the odyssey of the mind generated by this quest, culminating in our modern world.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Grading Basis: Letter Grade

HUEN 3430 (3) Ethics of Genetic Engineering: A Multidisciplinary Approach

Investigates the metaphorical, ideological and scientific constructs that inform debates over the genetic modification of humans, animals and plants. Begins with a close reading of Shelley's *Frankenstein*, proceeds to a consideration of philosophical arguments for and against human modification and concludes with a consideration of the scientific and political contexts that inform the regulation of genetically modified foods.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Grading Basis: Letter Grade

HUEN 3700 (3) Culture Wars in Rome

Investigates in Rome, Italy (during Maymester), the cultural contrasts among three different cities: ancient, pagan, aristocratic Rome; medieval, Christian, theocratic Rome; and modern, secular, democratic Rome.

Draws on evidence from Roman literature, politics, art and architecture. Must have completed a minimum of 26 credit hours by start of course. Requires some preparatory work in Boulder.

Repeatable: Repeatable for up to 6.00 total credit hours.

HUEN 3750 (3) Xi'an, China: Self-Awareness and Images of the Other

Explores Chinese culture abroad, focusing on ideas of self and other within special historical, social, political and economical circumstances. Chinese and American concepts of self and society, of individual, collective and national identities will be analyzed. Held on the campus of Xi'an Jiaotong University, China.

Requisites: Requires prerequisite course of HUEN 1010 (minimum grade D-).

Additional Information: Departmental Category: Asia Content

HUEN 3840 (1-3) Independent Study

Offers an opportunity for students to do independent work in the humanities. Subject arranged to fit the needs of the student. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) College of Engineering students only.

HUEN 3843 (1-3) Special Topics

Explores different important themes in the humanities, check with department for specific semester topics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

HUEN 4200 (3) Humanities for Engineers 4

Provides opportunity to pursue a variety of humanistic themes related to Herbst Humanities Program.

HUEN 4800 (1) Leadership & Ethics in the Real World

Biomedical Engineering - Minor

The biomedical engineering minor is open to undergraduate students rostered in the College of Engineering and Applied Science who are interested in an exciting, multidisciplinary field that lies at the interface of medicine, biology and engineering.

Already, there are many approved products and applications of the biomedical engineering field. These include pharmaceutical drugs, prosthetics (replacement limbs and stents) and bioprosthesis (e.g., heart valve replacements), drug delivery and other implantable devices, and medical imaging techniques (X-ray, CT, MRI and fluoroscopy).

Current research in the biomedical engineering field is focusing on the use of biologics and genetically modified organisms for the treatment of cell- and gene-based diseases. Because of its diverse nature, the biomedical engineering field will continue to call upon individuals with backgrounds in computer science and mechanical, chemical and electrical engineering.

For more information, visit the college's Minor in Biomedical Engineering (<http://www.colorado.edu/engineering/minor-biomedical-engineering>) webpage.

Requirements

Students must complete 18 credit hours (6 courses) for the minor.

- BMEN 2000 Introduction to Biomedical Engineering (3 credit hours)
- Five elective courses (15 credit hours)

At least four of the five elective courses (see a complete listing of elective courses on the Minor in Biomedical Engineering (<http://www.colorado.edu/engineering/minor-biomedical-engineering>) webpage)

must be upper-division (3000 level or higher). One course can be petitioned to come from outside engineering with preapproval, relevant independent study course work can be petitioned and 5000-level courses are allowed where undergraduate students are eligible to enroll.

Prior coursework may be transferred from other institutions with approval. At least three courses need to be taken on the CU Boulder campus. At least two of these three courses have to be at the upper division. Two of the six courses for the minor may not be applied toward BS degree requirements.

Energy Engineering - Minor

The energy engineering minor provides energy-minded students with a foundational understanding of energy technologies and the energy industry, including technological, policy, and economic considerations related to conventional and renewable energy systems.

Required courses include energy fundamentals, energy policy and society, and an interdisciplinary energy projects course which focuses on the performance and economics of energy systems. Elective courses, selected from across the CU campus, allow students to specialize according to their specific interest in the energy field.

The energy engineering minor has strong connections with industry through an industry advisory panel and guest speakers.

For more information, visit the college's Energy Engineering Minor (<http://www.colorado.edu/engineering/energy-engineering-minor>) webpage.

Requirements

Students must complete 18 credit hours for the minor:

- CHEN 3660 Energy Fundamentals
- ENVS 3621 Energy Policy and Society
- ENEN 4600 Interdisciplinary Energy Engineering Projects
- Three elective courses (9 credit hours)

See a complete listing of elective courses on the Energy Engineering Minor (<http://www.colorado.edu/engineering/energy-engineering-minor>) webpage.

Engineering Leadership - Certificate

The Engineering Leadership Program (<http://www.colorado.edu/engineeringleadershipprogram>) (ELP) provides engineering students with course work and active learning experiences to prepare them to be leaders in their chosen careers, whether it is in an engineering field or another field such as government service, law, medicine, etc. ELP is comprised of a number of elements designed to give engineering students a well-rounded and robust leadership education that is complementary to their potential career paths. Students in the program take leadership courses through ELP and other CU programs, attend leadership seminars sponsored by the college and learn from mentors who have experience relevant to their interests. ELP Students also design and undertake a personal leadership experience and produce a portfolio of their ELP work for review prior to graduation. Students apply to the program in their first or second year.

New first-year students are introduced to ELP through the non-credit "Taste of ELP" offered each fall. Taste of ELP is a series of 1-hour

seminars that introduce students to the components of ELP. After participating in ELP, students are formally accepted into the program.

Students entering the Engineering Leadership Program in Fall 2017 are required to take a total of 9 credit hours in leadership, project management, and/or global perspectives. The first course to be taken is the Engineering Leadership Gateway, COEN 2050. Students then take an additional sequence of 1-credit hour courses, generally one course per academic year, before graduation. These 1-credit courses help the students select, plan, and undertake their leadership experiences. Students select additional elective courses to complete their required 9 credit hours.

In addition to the 9 credit hours, all ELP students undertake a self-defined leadership experience, participate in leadership seminars, work with mentors, and document their ELP work in an ELP Portfolio.

Students can apply to ELP by participating in Taste of ELP (<http://www.colorado.edu/engineeringleadershipprogram/program-elements/taste-elp-calendar-events>) or by applying to the program through the college's Engineering Leadership Program (<http://www.colorado.edu/engineeringleadershipprogram>) website.

Engineering, Science and Society - Certificate

The Certificate in Engineering, Science, and Society (ESS) leads students to courses that will engage them with contemporary issues regarding the promotion, use, and possible risks of engineering and applied science. For example, what are the likely benefits and risks of genetic engineering? How can engineering help offset world-wide environmental degradation? What role should engineers play in formulating policies that will govern the relationship between science and contemporary American society?

The ESS Certificate includes a cornerstone course that explores these philosophical questions (and others related to them). The Certificate also steers students toward other courses that address these difficult questions and will help them find a path toward workable answers. The list of possible courses includes:

- Courses which view engineering in social, economic, and legal contexts;
- Courses which study science and technology in the past, thereby illuminating their influence in the present;
- Courses which explore the environmental consequences of STEM innovation.

Requirements

To begin the certificate, students must:

- Be in good academic standing in the College of Engineering and Applied Science
- Complete a certificate enrollment with Paul Diduch of the Herbst Program

To complete the certificate, students must:

- Complete the cornerstone course, HUEN 2210, with a minimum grade of C+
- Complete four other approved courses (<http://www.colorado.edu/herbst/certificate-option>), with a minimum grade of C+

- Complete at least one of these courses at the 3000-level or above
- Submit a certificate completion form to the director

Approved Courses

The list of courses approved for the certificate is provided below. It includes both lower-division and upper-division courses.

HUEN 1850	Engineering in History: The Social Impact of Technology
HUEN 2020	The Meaning of Information Technology
HUEN 2100	History of Science and Technology to Newton
HUEN 2120	History of Modern Science from Newton to Einstein
HUEN 2130	History of Modern Technology from 1750 to the Atomic Bomb
HUEN 2843	Special Topics
HUEN 3350	Gods, Heroes and Engineers: The Western Quest for Excellence
HUEN 3430	Ethics of Genetic Engineering: A Multidisciplinary Approach
HUEN 3843	Special Topics
ASEN 3046	Introduction to Humans in Aviation
ATLS 2000	The Meaning of Information Technology
GEEN 1100	
GEEN 3300	
CHEN 1000	
CVEN 4700	
CVEN 5373	Water Law, Policy, and Institutions
CVEN 5393	Water Resources System and Management
TLEN 5120	
ANTH 4500	Cross-Cultural Aspects of Socioeconomic Development
ANTH 4600	
ASTR 4800	Space Science: Practice and Policy
ATOC 4800	Policy Implications of Climate Controversies
BAKR 1600	Creating a Sustainable Future
COMM 1210	Perspectives on Human Communication
EBIO 3040	Conservation Biology
EBIO 3180	Global Ecology
EBIO 4180	
ECON 3535	Natural Resource Economics or ECON 45 Environmental Economics
ECON 3545	Environmental Economics or ECON 45 Environmental Economics
ENVD 2001	Human Behavior in Design and Planning
ENVD 3114	History and Theory of Environmental Design at the Small Scale: Buildings
ENVS 1000	Introduction to Environmental Studies
ENVS 3140	Environmental Ethics
ENVS 3621	Energy Policy and Society
ENVS 5000	Policy, Science, and the Environment
ENVS 5810	Water Resources and Environmental Sustainability
ENVS 5820	Energy Policy in the 21st Century
GEOG 3412	Conservation Practice and Resource Management

GEOG 3422	Political Ecology
GEOG 3682	Geography of International Development
GEOG 4430	Seminar: Conservation Trends
GEOG 4501	Water Resources and Water Management of Western United States
GEOG 5772	
GEOL 3500	
GEOL 3520	Energy & Climate Change: An Interdisciplinary Approach
or ENVS 3520	Energy and Climate Change: An Interdisciplinary Approach
GEOL 4080	
HIST 4267	
HIST 4326	Epidemic Disease in US History
HIST 4416	Environmental History of North America
PHIL 1160	Introduction to Bioethics
PHIL 1400	Philosophy and the Sciences
PHIL 3140	Environmental Ethics
PHIL 3160	Bioethics
PHIL 3200	Social and Political Philosophy
PHIL 5210	Philosophy and Social Policy
PHIL 5230	Bioethics and Public Policy
PHIL 5240	Seminar in Environmental Philosophy
PHYS 3000	Science and Public Policy
PHYS 3070	Energy and the Environment
or ENVS 3070	Energy and the Environment
PSCI 3064	Environmental Political Theory
PSCI 3201	
PSCI 4012	Global Development
PSCI 5016	
SOCY 1002	
SOCY 1022	Ethics and Social Issues in U.S. Health and Medicine
SOCY 2077	Environment and Society
SOCY 4007	Global Human Ecology
SOCY 6007	Foundations of Environmental Sociology

Global Engineering - Minor

Engineers of the 21st century will be working in a globalized industry. The Global Engineering Minor (<http://www.colorado.edu/engineering-international/global-engineering-minor>) will help them prepare for that challenge in three ways: (1) it will reveal the profession's global impact on economics, society, and the environment; (2) it will make students more sensitive to and aware of other cultures; (3) it will help students understand the overlapping and sometimes contradictory activities of local, national, international, and transnational agencies. Graduates with this Minor will be capable of negotiating complex, uncertain, and ambiguous circumstances, whether at home or abroad. Coursework for the Minor includes a specially designed cornerstone experience called "A Global State of Mind," and students must also study a foreign language of their choice. Additional coursework includes global perspective courses, a regional perspective course related to the student's chosen foreign language, and a globally-oriented technical elective. Most of these courses fit seamlessly into existing humanities and social science

(H&SS) and technical elective credit requirements so that students do not have to add significant additional coursework to their major. Finally, students pursuing the Minor must study, intern, or volunteer abroad through an approved program.

The Minor in Global Engineering replaces the certificates in Global Engineering and International Engineering as of fall 2016. Students who enrolled in the College of Engineering and Applied Science prior to fall semester 2016 have the option of completing either the Certificate or the Minor in Global Engineering, and/or the International Engineering Certificate. Students who enroll in the College starting with fall 2016 cannot pursue the certificate programs.

To enroll in the Global Engineering Minor (<http://www.colorado.edu/engineering-international/global-engineering-minor>), a student must be admitted to the College of Engineering & Applied Science and have a minimum 2.50 cumulative GPA. The minor requires at minimum completion of 6 courses for 18 credit hours, along with an approved global experience.

Completion Requirements

- HUEN 2843 "Special Topics: A Global State of Mind"
- Language Course (one course at fourth semester level or higher, depending on student's preparation)
- Global Perspective Courses (two courses, including at least one upper division)
- Regional/Local Perspective Course (one course, with focus on region to match language)
- Technical Elective (upper division course focused on a topic relevant to global engineering)
- Global Experience (A CU approved study, research, or internship abroad, or equivalent experience)

Lighting Design - Certificate

Our sense of sight is responsible for much of our perception of the world around us. Through the proper application of light, we can shape a viewer's understanding of architecture and influence the outcome of our architectural designs.

The undergraduate certificate in Lighting Design (<http://www.colorado.edu/lightingprogram/lighting-design-certificate>) is offered to students majoring in environmental design and theatre, as well as other non-engineering students, to expose them to the basics of architectural lighting and daylighting design. Topics include:

- Metrics of light
- Proper use of light sources, luminaires and controls
- Lighting effects on perception of architecture and how it fits into the architectural design process
- Daylight as a source and how it interacts with architecture
- Integration of daylight in interior spaces interacts with electric lighting

The certificate prepares students for entry-level jobs in lighting design firms. A combination of lighting design with architecture, landscape architecture, or design studies could also open doors in architecture and interior design firms.

Requirements

Admission

A cumulative GPA of 2.500 or higher is required to enroll. This certificate is not open to students rostered in the College of Engineering & Applied Science. First-year students are not eligible to take certificate courses - students may sign up for the certificate in the spring of their freshman year, and start taking classes in their sophomore year.

To enroll, students should complete the Lighting Certificate Declaration Form (<http://bit.ly/LightingCertificate>).

Grade Requirements

A cumulative GPA of 2.500 for all certificate courses is required, with no individual grade lower than C. A course not passed with the minimum grade may be repeated one time.

Course Requirements

The certificate is achieved through completion of four lighting courses: two required courses, one technical elective and a capstone or studio course.

Required Courses		6
AREN 4830	Special Topics for Seniors/Grads (Architectural Lighting Design - fall only)	
AREN 4830	Special Topics for Seniors/Grads (Architectural Daylighting Design - spring only)	
Technical Elective (current offerings, subject to change)		3
AREN 4530	Advanced Lighting Design	
AREN 4830	Special Topics for Seniors/Grads (Sustainable Lighting Workshop)	
THTR 3055	Stage Lighting Design 1	
Capstone or Design Studio (current offerings, subject to change)		3-6
AREN 4830	Special Topics for Seniors/Grads (Lighting Design Capstone - spring only)	
Total Credit Hours		12-15

Engineering Management

The Lockheed Martin Engineering Management Program (EMP) (<http://www.colorado.edu/emp>) is a technically-based management and leadership program for the engineering and technical fields that prepares students for early to mid-career positions in a variety of industries. It is designed for students who are looking to advance in management, successfully contribute to the overall business or venture, and develop their leadership skills.

The Program offers an Engineering Management minor, a certificate, and courses for undergraduate students in the College of Engineering and Applied Science. The minor and certificate are designed for Junior and Senior level engineering students who seek to develop business and industry acumen to complement their engineering majors. Courses are offered on campus with many virtual distance sections.

Course code for this program is EMEN.

Minor

- Engineering Management - Minor (p. 724)

Certificates

- Engineering Entrepreneurship - Certificate (p. 724)
- Engineering Management - Certificate (p. 724)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bailey, Wendy Lynn (https://experts.colorado.edu/display/fisid_154942)
Instructor

Bozic, Christy L (https://experts.colorado.edu/display/fisid_155482)
Scholar In Residence/Lecturer; PhD, Purdue University

Johnson, Eben Ormston (https://experts.colorado.edu/display/fisid_149952)
Instructor; MBA, University of California-Davis

Kirschling, Wayne (https://experts.colorado.edu/display/fisid_123149)
Scholar In Residence; DBA, University of Colorado Boulder

Littlejohn, Ray Lynn (https://experts.colorado.edu/display/fisid_151752)
Scholar In Residence; PhD, University of Oklahoma Norman Campus

Moorer, Daniel Fuller (https://experts.colorado.edu/display/fisid_151590)
Scholar In Residence; PhD, University of Colorado Boulder

Murray, Seth (https://experts.colorado.edu/display/fisid_148038)
Instructor; ME, University of Colorado Boulder

EMEN 3100 (3) Introduction to Engineering Management

Examines topics important to the management of engineering activities within organizations. Topics include the relationship of engineering to business and management disciplines, the functions of an engineering manager, principles and techniques for managing financial resource and business ownership. Explores best practices in global engineering management, process management, legal issues, ethics, organizational behavior and communications.

Grading Basis: Letter Grade

EMEN 4030 (3) Project Management Systems

Gain skills in project management, one of the fastest growing professions, using standard processes that fit into any industry, sector or geography. This interactive class provides students with the tools necessary to effectively initiate, execute, control and close any type of project for increased success. Students learn the skills to oversee projects to ensure it meets its goals, time line and budget.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4050 (3) Leadership and Professional Skills

Accelerate your personal and professional growth with the essential skills required to become an effective leader/manager. Conduct personal development through exercises in communication and leadership effectiveness. Explore leadership styles, managing commitments, change management, negotiation, conflict resolution, organizational culture, emotional intelligence, team dynamics and business ethics.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4100 (3) Engineering Economics

Introduces engineering cost concepts, financial statements and the corporate economic environment. Includes concepts and methods of analysis of the time value of money, comparison of project alternatives before and after taxes, cash flow, replacement analysis, risk management and financial case statements.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4200 (3) Engineering and Entrepreneurship for the Developing World

Use your engineering and problem solving skills, combined with market/industry research, customer interviews, design for manufacturability, stakeholder management and financial modeling to promote entrepreneurship and sustainable change in the developing world. Explore alternative energy, medical devices, phones, internet, recycling, cook stoves, clean water, sanitation and infrastructure.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

EMEN 4400 (3) Process and Quality Systems

Introduces the concepts, tools and techniques used in the management and measurement of quality and productivity in a business environment. Associated topics include: statistics methods, design quality, measurement, control and process improvement. Discover the basics of performance excellence management including Baldrige Award criteria, strategic planning, leadership and daily quality management.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4405 (3) Systems Engineering

Introduces students to system engineering in terms of defining objectives, applications and the major steps in the systems engineering process. Learn to work effectively with diverse project teams. Industry standards are covered that lay out the steps of the classic Systems Engineering lifecycle. Real world engineering examples from concept exploration to hardware retirement are used.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

EMEN 4800 (3) Technology Ventures and Marketing

Learn marketing concepts, skills and tools to launch new products and ventures. Engage with faculty, classmates, guest speakers, industry professionals, potential customers and one's leadership team to help you launch your venture. Develop the necessary skills and tools to be successful colleagues, managers and leaders in industry. Gain valuable business acumen using a hands-on learning environment.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4825 (3) Entrepreneurial Business Plan Preparation

Instructs students in the necessary elements of a business plan and how to prepare a complete well-written plan for an entrepreneurial business venture. Students work in interdisciplinary business-engineering five-person teams to create a business concept and take it through to business plan completion.

Equivalent - Duplicate Degree Credit Not Granted: ESBM 4830

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

EMEN 4830 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

EMEN 4840 (1-3) Independent Study Project

Available only through approval of Engineering Management Program. Subjects arranged to fit the needs of the particular student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Engineering Entrepreneurship - Certificate

The Undergraduate Engineering Entrepreneurship Certificate (<http://www.colorado.edu/emp/programs/undergraduate-programs/certificates/undergraduate-engineering-entrepreneurship-certificate>) prepares junior and senior engineering students with the knowledge, understanding, and skills to essential entrepreneurship in a start-up venture or within a larger corporation. This certificate develops entrepreneurial and leadership skills while introducing the students to the multiple facets of entrepreneurship, innovation, creative development, and the overall entrepreneurial process. Courses are available on-campus and some are available online (distance). Customize your program by choosing from three different electives. Many majors count these credits toward technical electives.

Requirements

The Undergraduate Engineering Entrepreneurship Certificate (<http://www.colorado.edu/emp/programs/undergraduate-programs/certificates/undergraduate-engineering-entrepreneurship-certificate>) requires 12 credit hours (6 core credits and 6 elective credits).

Engineering Management - Certificate

This Engineering Management Undergraduate Certificate (<http://www.colorado.edu/emp/programs/undergraduate-programs/certificates/undergraduate-engineering-management-certificate>) program prepares junior and senior engineering students for success in entry-level positions by providing business knowledge and skills in an engineering context. Courses are available on-campus and some are available online (distance). Customize your program by choosing from seven different electives. Many majors count these credit hours toward technical electives.

This certificate gives you the tools to understand the business framework in an engineering and technology environment increases your potential job opportunities and accelerates career development. Refine your interpersonal skills, develop your leadership skills and increase your confidence in working with others.

Requirements

The Undergraduate Engineering Management Certificate (<http://www.colorado.edu/emp/programs/undergraduate-programs/certificates/undergraduate-engineering-management-certificate>) requires 12 credit hours (3 core credits and 9 elective credits).

Engineering Management - Minor

The Engineering Management Minor (<http://www.colorado.edu/emp/engineering-management-minor>) complements the technical knowledge of a baccalaureate engineering program by introducing strategic, organizational, and communication business skills needed to succeed in today's job market. After completion of the requirements, the undergraduate minor in Engineering Management will be listed on the student's transcript at the time of graduation along with the student's BS degree.

Requirements

The Engineering Management Minor (<http://www.colorado.edu/emp/undergraduate-engineering-management-minor-course-requirements>) is open to undergraduate students rostered in the College of Engineering and Applied Science. Students must complete 18 credit hours: 3 required courses totaling 9 credit hours, plus an additional 9 credit hours of electives. Each course requires a minimum grade of D- or better (note, however, that a C- or better is required in all prerequisite courses to qualify to take a subsequent course). To meet the minor's residency requirement, at least three courses need to be taken at the University of Colorado Boulder (in person or online).

Engineering Physics

Engineering physics provides students with a broad exposure to the basic physical theories and mathematical techniques underlying engineering. The program may be specialized to meet the student's interests through engineering electives. Most students become involved in laboratory research, and graduates find opportunities in optics, electronics, magnetics, and other hardware-based job markets. The program also provides excellent preparation for graduate study in physics, applied physics, and other areas of the natural sciences and engineering.

The engineering physics program focuses on the foundations of modern technology. The program prepares students for research, development, and entrepreneurial careers in many frontier areas of engineering, including quantum devices, ultra fast lasers, adaptive optics, cryogenic electronics, computer simulation of physical systems, solar cells, magnetic storage technology, micro-mechanical systems, and molecular electronics. All students study the core theoretical subjects of mechanics, electricity and magnetism, thermal physics, and quantum mechanics, supplemented by courses in mathematics, computation, and laboratory technique. The program can be tailored to a student's interests through electives in engineering, physics, or other sciences.

Course code for this program is PHYS.

Bachelor's Degree

- Engineering Physics - Bachelor of Science (BS) (p. 728)

PHYS 1000 (3) Preparatory Physics

Introduces basic physics, emphasizing an analytical approach to prepare for PHYS 1110 and PHYS 1120, the engineering majors sequence. Does not satisfy any MAPS deficiency in either the sciences or math. Department enforced prerequisite: 1 year high school algebra.

Additional Information: Arts Sci Core Curr: MAPS Course

PHYS 1010 (3) Physics of Everyday Life 1

Intended primarily for nonscientists, this course covers physics encountered in everyday life. Topics include balls, scales, balloons, stoves, insulation, light bulbs, clocks, nuclear weapons, basics of flashlights, and microwave ovens. Department enforced prereq., high school algebra or equivalent. This course should not be taken if the student has a MAPS deficiency in math.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Quant Reasn Mathmat Skills

Arts Sci Core Curr: Natural Science Sequence

MAPS Course: Chemistry

MAPS Course: Physics

PHYS 1020 (4) Physics of Everyday Life 2

Intended primarily for nonscientists, this course is a continuation of PHYS 1010. Includes electrical power generation and distribution, electrical motors, radio, television, computers, copiers, lasers, fluorescent lights, cameras, and medical imaging. Department enforced prereq., high school algebra.

Requisites: Requires prerequisite course of PHYS 1010 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Quant Reasn Mathmat Skills

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

PHYS 1110 (4) General Physics 1

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. First semester of three-semester sequence for science and engineering students. Covers kinematics, dynamics, momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion and introduction to thermodynamics.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1110

Requisites: Requires prerequisite or a corequisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

PHYS 1115 (4) General Physics 1 for Majors

First semester of three semester sequence for physics, engineering physics and astronomy majors. Covers kinematics, dynamics momentum of particles and rigid bodies, work and energy, gravitation, simple harmonic motion and introduction to thermodynamics.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1110

Requisites: Requires a prerequisite or co-requisite course of APPM 1345 or APPM 1350 or MATH 1300 or MATH 1310 (minimum grade C-).

Restricted to Physics (PHYS-BA) or Engineering Physics (EPEN-BS) or Astronomy (ASTR-BA) majors only.

Grading Basis: Letter Grade

PHYS 1120 (4) General Physics 2

Three lect., one rec. per week, plus three evening exams in the fall and spring semesters. Second semester of three-semester introductory sequence for science and engineering students. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1125

Requisites: Requires prerequisite courses of PHYS 1110 or PHYS 1115 and a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade of C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

PHYS 1125 (4) General Physics 2 for Majors

Three lect., one rec per week, plus three evening exams in the fall and spring semesters. Second semester of three semester introductory sequence for physics, engineering and astronomy majors. Covers electricity and magnetism, wave motion and optics. Normally is taken concurrently with PHYS 1140.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 1120

Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 1115.

Requires a prerequisite or corequisite course of APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to Physics (BA), Engineering Physics (BS) and Astrophysics (BA) students only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Sequence

PHYS 1140 (1) Experimental Physics 1

One lect., one 2-hour lab per week. Introduction to experimental physics through laboratory observations of a wide range of phenomena. Covers experiments on physical measurements, linear and rotational mechanics, harmonic motion, wave motion, sound and heat, electricity and magnetism, optics, and electromagnetic waves with the mathematical analysis of physical errors associated with the experimental process.

Requisites: Requires a prerequisite or corequisite course of PHYS 1120 or PHYS 1125 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

PHYS 1230 (3) Light and Color for Nonscientists

Discusses light, color, vision, and perception. Covers reflection, refraction, lenses, and applications to photography and other methods of light sensing. Other topics include lasers and holography. Course is geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Chemistry

MAPS Course: Physics

PHYS 1240 (3) Sound and Music

Explores the physical processes that underlie the diversity of sound and musical phenomena. Topics covered include the physical nature of sound, the perception of sound, the perception of pitch and harmony, musical instruments, synthesizers and samplers, and room acoustics. Geared toward nonscience majors. Department enforced prereq., high school algebra or equivalent. Should not be taken by students with a math MAPS deficiency.

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

MAPS Course: Chemistry

MAPS Course: Physics

PHYS 1400 (1) Fundamentals of Scientific Inquiry

Explore and discuss the nature of science and what it means to work in science, technology, engineering or math. Focus on relevant open questions in these fields and the methods used to investigate them. For more information visit: www.colorado.edu/studentgroups/cuprime.

PHYS 1580 (3) Energy and Interactions

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physical content focuses on interactions and energy.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 1580

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

PHYS 2010 (5) General Physics 1

Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers mechanics, heat and sound. Thorough presentation of fundamental facts and principles of physics using algebra and trigonometry. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020. Department enforced prerequisites: ability to use high school algebra and trigonometry.

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

MAPS Course: Natural Science

PHYS 2020 (5) General Physics 2

Includes three lectures, one two-hour laboratory/recitation per week, plus three evening exams in the fall and spring semesters. Covers electricity and magnetism, light and modern physics. Designed for life science majors, including premed students. Natural science majors with a knowledge of calculus and others taking calculus are urged to take the calculus-based courses PHYS 1110, PHYS 1120, PHYS 1140 and PHYS 2130, rather than PHYS 2010 and PHYS 2020.

Requisites: Requires a prerequisite course of PHYS 1110 or PHYS 2010 (minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

PHYS 2130 (3) General Physics 3

Covers special relativity, quantum theory, atomic physics, solid state and nuclear physics. Third semester of introductory sequence for science and engineering students. Physics majors should take PHYS 2170 instead of this course. Normally taken with PHYS 2150.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 2170

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).

PHYS 2150 (1) Experimental Physics 2

One lect., one 2-hour lab per week. Includes many experiments of modern physics, including atomic physics, solid state physics, electron diffraction, radioactivity and quantum effects. Normally taken concurrently with PHYS 2130 or PHYS 2170, this course may be taken after PHYS 2130 or PHYS 2170.

Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of PHYS 2130 or PHYS 2170 (all minimum grade C-).

PHYS 2170 (3) Foundations of Modern Physics

Covers special relativity, quantum mechanics and atomic structure. Completes the three-semester sequence of general physics for physics and engineering physics majors. Normally taken with the laboratory PHYS 2150.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 2130

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 1125, and a prerequisite or corequisite course of MATH 2400 or APPM 2350 (all minimum grade C-).

PHYS 2210 (3) Classical Mechanics and Mathematical Methods 1

Theoretical Newtonian mechanics, including position and velocity dependent forces, oscillation, stability, non-inertial frames and gravitation from extended bodies. Ordinary differential equations, vector algebra, curvilinear coordinates, complex numbers, and Fourier series will be introduced in the context of the mechanics.

Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 and a prerequisite or corequisite course of APPM 2360 or MATH 3430 (all minimum grade C-).

PHYS 2840 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 3000 (3) Science and Public Policy

For nonscience majors. Reading, discussions, debates and lectures are used to study how science affects society economically, intellectually, and in terms of health and national security. Another focus is how government fosters and funds scientific activities. Department enforced prerequisite: completion of core science requirement.

PHYS 3050 (3) Writing in Physics: Problem-Solving and Rhetoric

Teaches strategies used in scientific writing with an emphasis on argument, reviews and reinforces essential writing skills, provides experience in writing both academic and professional communications in a style appropriate to the literature of physics. Department enforced prerequisite: lower-division core writing requirement.

Requisites: Requires a prerequisite course of PHYS 2130 or PHYS 2170 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Written Communication

PHYS 3070 (3) Energy and the Environment

Contemporary issues in energy consumption and its environmental impact, including fossil fuel use and depletion; nuclear energy and waste disposal; solar, wind, hydroelectric, and other renewable sources; home heating; energy storage; fuel cells; and alternative transportation vehicles. Included are some basic physical concepts and principles that often constrain choices. No background in physics is required.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3070

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

PHYS 3210 (3) Classical Mechanics and Mathematical Methods 2

Lagrangian and Hamiltonian treatment of theoretical mechanics, including coupled oscillations, waves in continuous media, central force motion, rigid body motion and fluid dynamics. The calculus of variations, linear algebra, tensor algebra, vector calculus, and partial differential equations will be introduced in the context of the mechanics.

Requisites: Requires a prerequisite course of PHYS 2210 (minimum grade C-).

PHYS 3220 (3) Quantum Mechanics 1

Introduces quantum mechanics with wave, operator and matrix computational techniques. Investigates solutions for harmonic oscillator, potential well and systems with angular momentum. Develops a quantitative description of one-electron atoms in lowest order.

Requisites: Requires a prerequisite course of PHYS 3210 (minimum grade C-).

PHYS 3221 (1) Tutorial Practicum for Quantum Mechanics 1

Uses interactive group work to aid student learning in co-requisite course PHYS 3220. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.

Requisites: Requires a corequisite course of PHYS 3220.

Grading Basis: Pass/Fail

PHYS 3310 (3) Principles of Electricity and Magnetism 1

Covers mathematical theory of electricity and magnetism, including electrostatics, magnetostatics, and polarized media, and provides an introduction to electromagnetic fields, waves, and special relativity.

Requisites: Requires prerequisite courses of PHYS 2210 (minimum grade C-).

PHYS 3311 (1) Tutorial Practicum for Electricity & Magnetism 1

Uses interactive group work to aid student learning in co-requisite course PHYS 3310. In this tutorial, students will work in small groups to practice how to solve challenging problems and their underlying conceptual basis, as well as using hands-on activities, demonstrations, and other techniques to help learn content.

Requisites: Requires a corequisite course of PHYS 3310.

Grading Basis: Pass/Fail

PHYS 3320 (3) Principles of Electricity and Magnetism 2

Continuation of PHYS 3310. Electromagnetic induction; magnetic energy; microscopic theory of magnetic properties; AC circuits; Maxwell's Equations; planewaves; waveguides and transmission lines; radiation from electric and magnetic dipoles and from an accelerated charge.

Requisites: Requires a prerequisite course of PHYS 3310 (minimum grade C-).

PHYS 3330 (2) Electronics for the Physical Sciences

Introduces laboratory electronics for physical science students. Includes basic electronic instruments, dc bridge circuits, operational amplifiers, bipolar transistors, field-effect transistors, photodiodes, noise in electronic circuits, digital logic and microcontrollers. Students gain hands-on experience in designing, building and debugging circuits. Two lectures and one three hour laboratory per week. Concludes with a three-week project in which students design and build an experiment of their choice and present a seminar on the results.

Requisites: Requires prerequisite courses of PHYS 2150 and PHYS 2130 or PHYS 2170 (all minimum grade C-).

PHYS 4130 (3) Biological Electron Microscopy: Principles and Recent Advances

Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5130

Requisites: Requires a prerequisite course of EBIO 1220 or MCDB 1150 or MCDB 4550 or MCDB 5550 or PHYS 1120 or PHYS 2020 (minimum grade D-).

PHYS 4150 (3) Plasma Physics

Discusses the fundamentals of plasma physics, including particle motion in electromagnetic fields, wave propagation, collisions, diffusion, and resistivity. Presents examples from space plasmas, astrophysical plasmas, laboratory fusion plasmas, and plasmas in accelerators.

Requisites: Requires a prerequisite course of PHYS 3310 and a prerequisite or corequisite course of PHYS 3320 (all minimum grade of C-).

PHYS 4230 (3) Thermodynamics and Statistical Mechanics

Statistical mechanics applied to macroscopic physical systems; statistical thermodynamics, classical thermodynamics systems; applications to simple systems. Examines relationship of statistical to thermodynamic points of view.

Requisites: Requires a prerequisite course of PHYS 2210 and a prerequisite or corequisite course of PHYS 3220 (all minimum grade of C-).

PHYS 4340 (3) Introduction to Solid State Physics

Discusses crystal structure, lattice dynamics, band theory, semiconductors and ferromagnetism.

Requisites: Requires a prerequisite course of PHYS 3220 (minimum grade of C-).

PHYS 4410 (3) Quantum Mechanics 2

Extends quantum mechanics to include perturbation theory and its applications to atomic fine structure, multi-particle systems, interactions with external forces, the periodic table and dynamical processes including electromagnetic transition rates.

Requisites: Requires prerequisite courses of PHYS 3220 and PHYS 3310 (all minimum grade of C-).

PHYS 4420 (3) Nuclear and Particle Physics

Introduces structure of the atomic nucleus, spectroscopy of subnuclear particles, scattering, reactions, radioactive decay, fundamental interactions of quarks and leptons.

Requisites: Requires a prerequisite course of PHYS 4410 (minimum grade of C-).

PHYS 4430 (3) Advanced Laboratory

Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5430

Requisites: Requires a prerequisite course of PHYS 3330 (minimum grade of C-).

PHYS 4450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5450 and PHIL 4450 and PHIL 5450

Requisites: Requires a prerequisite course of PHYS 1020 or PHYS 1120 or PHYS 1125 or PHYS 2020 (minimum grade of C-).

PHYS 4460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching and education research.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5460 and EDUC 4460 and EDUC 5460

Requisites: Requires prerequisite courses of PHYS 3210 and PHYS 3310 (all minimum grade of C-).

PHYS 4510 (3) Optics

Basic electromagnetic theory of light, using Maxwell's equations. Examples in geometrical optics; extensive applications in physical optics including diffraction and polarization. Spectra, including Zeeman effect and fluorescence. Recent advances in experimental techniques: microwaves, lasers, image converters.

Requisites: Requires a prerequisite course of PHYS 3320 (minimum grade of C-).

PHYS 4550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extra-cellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5550 and MCDB 4550 and MCDB 5550

Recommended: Prerequisites MCDB 3135 and MCDB 3145 and PHYS 2010 and PHYS 2020 and CHEM 1133 or MATH 1300 and/or CHEM 3311 (minimum grade C-) or instructor consent required.

PHYS 4560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5560 and MCDB 4560 and MCDB 5560

Requisites: Requires a prerequisites course of PHYS 2210 (minimum grade C-).

Recommended: Prerequisite PHYS 4230.

Grading Basis: Letter Grade

PHYS 4610 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4620 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4620 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4630. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4630 (2) Physics Honors

Students are matched with a faculty member and work independently on a research topic. Typically, the honors program lasts three semesters. A senior thesis and an oral presentation of the work are required. See also PHYS 4610 and PHYS 4620. Department enforced prerequisite: minimum 3.00 GPA. Registration by special arrangement with the Department of Physics.

Additional Information: Arts Sciences Honors Course

PHYS 4810 (1-3) Special Topics in Physics

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4840 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4850.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4850 (1-3) Independent Study

Selected topics for undergraduate independent study. Subject matter to be arranged. See also PHYS 4840.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 4970 (3) Seminar on Physical Methods in Biology

Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, Eels, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, PET, Cat), Fourier analysis, synchrotron radiation, Exafs, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5970

Requisites: Requires a prerequisite course of PHYS 1120 or PHYS 2020 and MCDB 1150 or EBIO 1220 (all minimum grade D-).

Engineering Physics - Bachelor of Science (BS)

During the freshman and sophomore years, students receive a broad introduction to physics, chemistry, applied mathematics, and mathematical methods in physics. Starting in the sophomore year, students take electrodynamics, quantum mechanics, classical

mechanics, mathematical methods, thermodynamics and statistical mechanics, and advanced mathematics. In addition, there is a core of four laboratory courses that students take. Laboratory courses emphasize student-developed and student-designed independent projects in which students use the knowledge acquired to build apparatus of their own choosing. The capstone lab course, PHYS 4430, provides students with hands-on experience with optical spectroscopy, nuclear magnetic resonance, scanning tunneling microscopy, and laser cooling and trapping of atoms, among other experiments.

The program encourages the formation of student research collaborations with faculty in the pursuit of senior thesis projects. Recent projects include research in pulsed laser deposition of high-temperature superconductors, electron diffraction studies of protein structure, and lattice distortion theory of colossal magnetoresistance materials.

Students who plan to become registered professional engineers should check the requirements for registration in their state before choosing their engineering major.

For more information about the bachelor's degree in engineering physics, contact the Department of Physics (<http://www.colorado.edu/physics>), Duane Physics E1B32; 303-492-6953.

Concurrent Degree Program BS/MS in Engineering Physics and Physics

The BS/MS program in engineering physics aims to provide new opportunities for undergraduate Engineering Physics majors. The program is specifically addressed to engineering physics majors in the Department of Physics. The engineering physics major gives students a thorough grounding in theoretical physics, applied mathematics, and broad exposure to engineering topics, so that they are well prepared either to proceed with graduate work or with professional employment in either basic science or in applied fields. For students interested in graduate studies, the BS/MS program in engineering physics allows for participation in graduate course work and research in a broad range of areas. For students interested in immediate professional employment, the BS/MS program would serve as a terminal degree program that qualifies students for a higher level of employment.

For more information, see the Department of Physics Concurrent Bachelor's/Master's Degree (<http://www.colorado.edu/physics/academics/undergraduate-students/concurrent-bachelorsmasters-degree>) website.

Requirements

In order to earn a bachelor's degree in engineering physics, students must complete the curriculum in the undergraduate major programs available through the Department of Physics. (Some variations may be possible; see an engineering physics faculty advisor.) In addition, students must meet the general undergraduate degree requirements of the College of Engineering and Applied Science.

Sample Four-Year Plan of Study

Below is a suggested schedule only. For a complete description of the engineering physics course requirements, visit the Department of Physics (<http://www.colorado.edu/physics>) website.

Course	Title	Credit Hours
Year One		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
CSCI 1300 or CSCI 1310	Computer Science 1: Starting Computing 1 or Computer Science 1: Starting Computi- - Experien	4
PHYS 1110	General Physics 1	4
Humanities or Social Science Elective ²		3
		Credit Hours 15
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
Select one of the following: ¹		3
AREN 1027	Engineering Drawing	
MCEN 1025	Computer-Aided Design and Fabrication	
CSCI 2270	Computer Science 2: Data Structures	
PHYS 1120	General Physics 2	4
PHYS 1140	Experimenta Physics 1	1
Humanities or Social Science Elective ²		3
		Credit Hours 15
Year Two		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
CHEM 1113	General Chemistry 1	4
CHEM 1114	Laboratory in General Chemistry 1	1
PHYS 2150	Experimenta Physics 2	1
PHYS 2170	Foundations of Modern Physics	3
Engineering Electives ³		4
		Credit Hours 17

Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
PHYS 2210	Classical Mechanics and Mathematical Methods 1	3
Engineering Electives ³		3
Free Electives		3
Humanities or Social Science Elective ²		3
		Credit Hours 16

Year Three**Fall Semester**

CHEM 1133	General Chemistry 2	4
CHEM 1134	Laboratory in General Chemistry 2	1
PHYS 3210	Classical Mechanics and Mathematical Methods 2	3
PHYS 3310	Principles of Electricity and Magnetism 1	3
PHYS 3330	Electronics for the Physical Sciences	2
Free Electives		3
		Credit Hours 16

Spring Semester

PHYS 3220	Quantum Mechanics 1	3
PHYS 3320	Principles of Electricity and Magnetism 2	3
PHYS 4230	Thermodynamics and Statistical Mechanics	3
Upper Division Math or Applied Math elective		3
Physics Electives ⁴		3
Humanities or Social Science Elective ²		3
		Credit Hours 18

Year Four**Fall Semester**

PHYS 4410	Quantum Mechanics 2	3
Engineering Electives ³		3
Physics Electives ⁴		3
Free Electives		3

College-Approved Writing Course ⁵	3
	Credit Hours 15
Spring Semester	
Engineering Electives ³	8
Physics Electives ⁴	3
Free Electives	3
Humanities or Social Science Elective ²	2
	Credit Hours 16
	Total Credit Hours 128

- Engineering physics computer science/drafting requirement (7–8 credit hours) is as follows: CSCI 1300 or CSCI 1310, along with CSCI 2270 or AREN 1027 or MCEN 1025.
- Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).
- Engineering electives: 17–18 engineering elective credit hours above and beyond the required courses for engineering physics. Total credit hours required in engineering electives plus the required computer science/drafting credit hours: 25.
- Nine credit hours of physics electives are required. For details, visit the Department of Physics (<http://www.colorado.edu/physics>) website.
- Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Engineering Plus

The Engineering Plus (<http://www.colorado.edu/eplplus>) program prepares graduates for exciting, diverse, and innovative professional careers and for graduate study in a wide variety of disciplines. The degree program provides a pathway through engineering for students interested in interdisciplinary, hands-on engineering design, coupled with a disciplinary engineering emphasis, plus the flexibility to explore another concentration of the students' choice within, or external to, engineering. Students complete core engineering and design coursework, followed by coursework in their chosen engineering emphasis (i.e., Aerospace, Architectural, Civil, Electrical, Environmental, or Mechanical.) Students also choose a concentration area, which can be student-designed or an established concentration such as secondary math or science teaching, entrepreneurship, pre-medical, and many others. Graduates from the Engineering Plus program will find opportunities in many engineering enterprises, as well as unique positions enabled by their engineering emphasis and concentration choices.

Program Objectives

The Engineering Plus program prepares its graduates to make significant contributions in many diverse areas. Specifically, within five years of graduation our graduates will have achieved one or more of the following attributes:

- established themselves as excellent secondary science or math teachers, utilizing hands-on engineering design content in their curriculum;
- established themselves in professional careers, received a graduate or professional degree, or be enrolled in a graduate or professional degree program;

- played significant roles in an engineering or technical enterprise, including research and development of engineering systems and products, technical sales, technical training, and organizational education;
- advanced in professional standing based on their technical accomplishments and accumulated additional technical expertise to remain globally competitive;
- demonstrated professional and personal leadership and growth.

Desired Outcomes

The undergraduate degree in Engineering Plus prepares students to meet the following outcomes upon graduation:

- ability to identify, formulate, and solve engineering problems;
- understanding of the impact of engineering solutions in global, environmental, and societal contexts;
- ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;
- ability to design a system, component, or process to meet needs within constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- knowledge in a specified concentration that is a meaningful contribution to your selected engineering emphasis;
- applicable knowledge of engineering, science, and mathematics;
- ability to function on multidisciplinary teams;
- understanding of professional and ethical responsibilities;
- effective communication skills;
- ability to design and conduct experiments, as well as to analyze and interpret data;
- recognition for the need and ability to engage in life-long learning;
- knowledge of contemporary issues in engineering and technology.

Course code for this program is **GEEN**.

Bachelor's Degree

- Engineering Plus - Bachelor of Science (BS) (p. 732)

GEEN 1010 (4) Engineering Explorations Through Physics

Explore the world of engineering through understanding physics concepts, engaging in active learning assignments, and conducting hands-on labs and experiments. Students will analyze product designs and engineering decisions based on the physics surrounding the situation. Formerly COEN 1010.

Requisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

Grading Basis: Letter Grade

GEEN 1400 (3) Engineering Projects

First-year students solve real engineering design problems in interdisciplinary teams. Design projects vary by section. Curriculum focuses on iterative design process, teamwork and team dynamics, supporting design with testing and analysis, and technical writing. Completed projects are exhibited at an end-of-semester design expo. Students responsible for contributing towards their design project budget and poster costs, and purchasing safety glasses (approximately \$75).

Requisites: Restricted to College of Engineering majors with 75 or less cumulative hours.

GEEN 2024 (3) Materials for Engineers

Examines structure, properties, processing and uses of metallic, polymeric, ceramic and composite materials. Specific topics covered include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical and electrical behavior and failure modes. Approach incorporates both materials science and materials engineering applications.

Requisites: Requires a prerequisite course of PHYS 1110 (minimum grade C). Restricted to College of Engineering students only.

Grading Basis: Letter Grade

GEEN 2400 (3) Engineering Projects for the Community

Design engineering products for local community clients, with emphasis on humanitarian engineering and integrated systems with electrical, mechanical, and software components. Students are challenged to take design projects to a higher level by requiring an additional iteration through the design cycle and more engaged user-testing, in order to infuse student projects with the robustness necessary for public-use products.

Requisites: Requires prerequisite course of GEEN 1400 or COEN 1410 or ASEN 1400 or ECEN 1400 (minimum grade C). Restricted to College of Engineering majors only.

Grading Basis: Letter Grade

GEEN 2851 (3) Statics for Engineers

Examines vector treatment of force systems and their resultants; equilibrium of frames and machines, including internal forces and three-dimensional configurations; static friction; properties of surfaces, including first and second moments; hydrostatics; and minimum potential energy and stability.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 2121 and MCEN 2023

Requisites: Requires prerequisite course of PHYS 1110 (minimum grade C-). Requires a prerequisite or corequisite course of APPM 2350 or MATH 2400. Restricted to College of Engineering majors only.

GEEN 3010 (3) Basic Electronics

Examines basic concepts of electricity, digital systems, circuit design and circuit analysis. Specific topics covered include analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis. Thevenin and Norton theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, operational amplifiers and microcontrollers.

Requisites: Requires a prerequisite course of PHYS 1140 and a prerequisite or corequisite course of APPM 2360 (all minimum grade C). Restricted to College of Engineering undergraduate majors only.

Grading Basis: Letter Grade

GEEN 3400 (3) Invention and Innovation

Introduction to invention and product innovation with a hands-on approach. Students explore the invention process, hone their engineering design skills, and explore the initial stages of entrepreneurship (patenting, intellectual property, marketing research, and raising capital). Student teams design, create, and test a potentially commercial product, and exhibit at an end-of-semester design expo.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

GEEN 3830 (1-3) Special Topics

Explores topics of interest in engineering. Content varies by instructor and semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to College of Engineering undergraduate students only.

GEEN 3852 (3) Thermodynamics for Engineers

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 3012

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 (minimum grade C-). Restricted to College of Engineering majors only.

GEEN 3853 (3) Fluid Mechanics for Engineers

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to engineering systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and CVEN 3313 and MCEN 3021

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and CHEN 2120 or MCEN 2023 or CVEN 2121 (all minimum grade C-). Requires a prerequisite or corequisite course of APPM 2350. Restricted to College of Engineering majors only.

GEEN 4400 (3) Teaching Design

For pre-service math, science and engineering educators, this course focuses on teaching engineering design in secondary schools. Students examine the process of teaching hands-on design, including scoping, stages of team evolution, development of engineering identity and iteration. Students engage in practice of integrating design thinking into secondary math/science curriculum, develop ready-to-use tools and resources and explore the design education literature.

Requisites: Requires prerequisite courses of GEEN 1400 and EDUC 4060 (all minimum grade B). Requires corequisite course of GEEN 3400.

Restricted to Engineering Plus (GEEN) majors in CU Teach math, biology, chemistry or physics (TMMA, TSBI, TSCH, TSPH).

Grading Basis: Letter Grade

GEEN 4830 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering and Applied Science BS students or BS/MS Concurrent Degree Students only.

GEEN 4848 (1-6) Independent Study

Subjects arranged in consultation with instructor and undergraduate advisor. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Engineering Plus (GEEN) students only.

Grading Basis: Letter Grade

Engineering Plus - Bachelor of Science (BS)

The Engineering Plus (<http://www.colorado.edu/eplplus>) program prepares graduates for exciting, diverse, and innovative professional careers and for graduate study in a wide variety of disciplines. The degree program provides a pathway through engineering for students interested in interdisciplinary, hands-on engineering design, coupled with a disciplinary engineering emphasis, plus the flexibility to explore another concentration of the students' choice within, or external to, engineering. Students complete core engineering and design coursework, followed by coursework in their chosen engineering emphasis (e.g., Aerospace, Architectural, Civil, Electrical, Environmental, or Mechanical). Students also choose a concentration area, which can be student-designed or an established concentration such as secondary math or science teaching, entrepreneurship, pre-medical, and many others. Graduates from the Engineering Plus program will find opportunities in many engineering enterprises, as well as unique positions enabled by their engineering emphasis and concentration choices.

Requirements

The BS degree in Engineering Plus (<http://www.colorado.edu/eplplus>) requires the satisfactory completion of the **Foundational Coursework**, the **Engineering Core**, a disciplinary **Emphasis**, plus a **Concentration**. This entails a minimum of 128 credit hours[§] as follows:

Foundational Coursework: 46-48 credits

- Foundational coursework (<http://www.colorado.edu/eplplus/current-students/foundational-coursework>) is common to all Engineering Plus majors. All foundational courses require a minimum grade of C in each course.

Engineering Core: 27-34 credits

- Engineering Core (<http://www.colorado.edu/eplplus/current-students/engineering-core>) coursework is common to all Engineering Plus majors. Core courses require a minimum grade of C in each course. Course titles within disciplines may vary; see disciplinary Emphases (<http://www.colorado.edu/eplplus/prospective-students/e-emphasis>) for discipline-specific core courses.

Disciplinary Emphasis: 22-28 credits

- Disciplinary Emphasis (<http://www.colorado.edu/eplplus/current-students/e-emphases>) coursework depends on the engineering emphasis (i.e., Aerospace⁺, Architectural, Civil, Electrical, Environmental, or Mechanical.) Emphasis courses require a minimum grade of C in each course for every disciplinary emphasis. To meet graduation requirements, the combination of engineering core and disciplinary coursework must sum to 52 credits or more. All Engineering Plus students, regardless of emphasis, are required to take the Fundamentals of Engineering (FE) exam when they are within 32 credit hours of graduation.

Concentration: 12-15 credits (except CU Teach Concentration: 29 credits, plus subject matter courses as required)

- The Engineering Plus Concentration (<http://www.colorado.edu/eplplus/current-students/e-concentrations>) allows students to select additional coursework in a chosen field of study, either within or outside of engineering. The concentration course sequence must be a series of courses with increasing specificity or depth within a field, typically culminating in senior level courses. Most concentrations will be at least four three-credit-hour courses. Every concentration **must** be preapproved by an Engineering Plus advisor **prior** to the commencement of the coursework. All concentration courses require a minimum grade of C in each course.

The Engineering Plus degree program is built around student choice and flexibility. The combinations of engineering emphases and available concentrations allow for more than 120 possible pathways. The sample curriculum below represents only a general idea of what is possible in Engineering Plus. Please visit the Engineering Plus website (<http://www.colorado.edu/eplplus>) or the Engineering Plus advisor for more specifics in planning your own unique pathway, and to ensure that all degree requirements are met.

BS Sample Curriculum

Course	Title	Credit Hours
First Year		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
GEEN 1400	Engineering Projects	3
Required Science Course*		3-5
Humanities or Social Sciences Elective**		3
	Credit Hours	13-15
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
PHYS 1110	General Physics 1	4
CSCI 1320	Computer Science 1: Starting Computing-Engineering Applications (or another computing course)	4
Humanities or Social Sciences Elective**		3
	Credit Hours	15
Second Year		
Fall Semester		
APPM 2350	Calculus 3 for Engineers	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
GEEN 2400	Engineering Projects for the Community	3
Statics Course		3
Humanities or Social Sciences Elective**		3
	Credit Hours	18
Spring Semester		
APPM 2360	Introduction to Differential Equations with Linear Algebra	4
Disciplinary Emphasis Course		3
Disciplinary Emphasis Course		3
Materials Course		3
Humanities or Social Sciences Elective**		3
	Credit Hours	16
Third Year		
Fall Semester		
GEEN 3400	Invention and Innovation	3

Disciplinary Emphasis Course	3
Disciplinary Emphasis Course	3
Thermodynamics Course	3
Humanities or Social Sciences Elective**	3
Concentration Course	3
	Credit Hours
	18

Spring Semester

Disciplinary Emphasis Course	3
Basic Electronics Course	3
Measurement/Data Analysis Course	3
College-Approved Writing Course***	3
Concentration Course	3
Free Elective Course	3
	Credit Hours
	18

Fourth Year

Fall Semester

Disciplinary Emphasis Course	3
Disciplinary Emphasis Course or Free Elective Course	3
Disciplinary Emphasis Capstone/Sr. Design Course	3-5
Free Elective Course or additional Concentration Course	3
Concentration Course	3
	Credit Hours
	15-17

Spring Semester

Disciplinary Emphasis Course	3
Disciplinary Emphasis Course or Free Elective Course	3
Disciplinary Emphasis Capstone/Sr. Design Course	3-5
Concentration Course	3
Free Elective Course or additional Concentration Course	3
	Credit Hours
	15-17
	Total Credit Hours
	128-134

§ Students who select the CU Teach Engineering Math or Science Concentration will have a 9th semester student teaching experience. There is financial assistance available for these students.

+ Students seeking to enroll in ASEN courses must register through an Aerospace advisor.

* Science required course(s) depend on Emphasis chosen. Students should see disciplinary Emphases (<http://www.colorado.edu/eplus/prospective-students/e-emphasis>) for discipline-specific core courses.

** Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

*** Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Mechanical Engineering

Mechanical engineering prepares students for careers in a variety of industrial sectors including transportation, energy, manufacturing, aerospace, medical, and environmental. Career opportunities include work in basic and applied research and development, design, manufacturing, project management, consulting, and teaching. Mechanical engineers are employed by a wide variety of industrial, governmental, and educational organizations. A mechanical engineering

background also provides a firm foundation for other professional careers such as engineering management, law, and medicine.

A mechanical engineering education from the University of Colorado Boulder will prepare you for a future in a broad range of fields in science and technology. As a student, you'll receive a hands-on education that breaks out of the classroom to give you real experience in the industry. You'll learn from and work with a diverse faculty conducting groundbreaking research that is shaping the future of our world.

Course code for this program is MCEN.

Bachelor's Degree

- Mechanical Engineering - Bachelor of Science (BS) (p. 740)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Alaa Abdalla (https://experts.colorado.edu/display/fisid_144736)
Associate Professor; PhD, University of Michigan Ann Arbor

Bergquist, Marcelo R (https://experts.colorado.edu/display/fisid_144022)
Senior Instructor/Instructor Adjunct

Borden, Mark A (https://experts.colorado.edu/display/fisid_148514)
Associate Professor; PhD, University of California-Davis

Branch, Melvyn C.
Professor Emeritus

Professor; PhD, Massachusetts Institute of Technology

Yin, Xiaobo (https://experts.colorado.edu/display/fisid_153484)
Assistant Professor; PhD, Stanford University

Zable, Jack
Professor Emeritus

MCEN 1024 (4) Chemistry for Energy and Materials Science

Covers the basic physical and chemical fundamentals underlying the disciplines of energy and materials, with a focus on topics relevant to your mechanical engineering education. These fundamentals include atomic structure, stoichiometry, the periodic table, chemical bonding, states of matter, thermochemistry, and chemical reactions. Department enforced prerequisite: one year of high school chemistry.

Requisites: Restricted to Mechanical Engineering or students with a plan of Mechanical Engineering Concurrent Degree or General Engineering Plus students with a MCEN subplan.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Materials

MCEN 1025 (4) Computer-Aided Design and Fabrication

Introduces CAD software and relevant concepts, including orthographic projection, sections, engineering drawing, geometric dimensioning and tolerancing, and an introduction to manufacturing methods. Final design project involves rapid prototyping.

Requisites: Restricted to Mechanical Engineering (MCEN) or Engineering Physics (EPEN) majors only.

Additional Information: Departmental Category: Design

MCEN 1208 (1-4) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest. Credit to be arranged.

Requisites: Restricted to students with 0-26 units (Freshmen) Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Special Topics

MCEN 2000 (1) Mechanical Engineering as a Profession

Provides an introduction to the profession of mechanical engineering. Specific topics addressed include career opportunities in mechanical engineering, internship search skills, expectations for professional behavior in the classroom and in industry and current events/ethics topics relevant to the field. Course format may include additional evening/weekend activities.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Mechanical Engineering (MCEN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

MCEN 2023 (3) Statics and Structures

Covers statics of particles, equivalent force systems, rigid bodies, equilibrium of rigid bodies in two and three dimensions, analysis of truss and frame structures, uniaxially-loaded members, distributed force systems and friction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 2121 or GEEN 2851

Requisites: Requires prereq course of APPM 1360 or MATH 2300 (min grade C). Restricted to students with 27-180 credits (Soph/Jrs/Srs) Mechanical (MCEN) or Environmental (EVEN) or General Engineering Plus (GEEN-BS) students, with a sub-plan of Mechanical (MEC).

Additional Information: Departmental Category: Solids

MCEN 2024 (3) Materials Science

Provides an overview of the structure, properties and processing of metallic, polymeric and ceramic materials. Specific topics include perfect and imperfect solids, phase equilibria, transformation kinetics, mechanical behavior and material degradation. Approach incorporates both materials science and materials engineering components.

Requisites: Requires prereq course of MCEN 1024 or CHEN 1211 and CHEM 1221 or CHEM 1113 and 1114, and PHYS 1110 (min grade C).

Restricted to students with 27-180 credits (Soph/Jrs/Srs) MECH or EVEN or GEEN-BS students, with a sub-plan of MEC.

Additional Information: Departmental Category: Materials

MCEN 2043 (3) Dynamics

Covers dynamic behavior of particle systems and rigid bodies; 2-D and 3-D kinematics and kinetics; impulse, momentum, potential, and kinetic energy; and work, collision, and vibration.

Requisites: Requires prerequisite courses of MCEN 2023 or CVEN 2121 or GEEN 2851 (minimum grade C). Restricted to students with 27-180 credits (Soph/Jrs/Srs) MECH or EVEN or GEEN-BS students, with a sub-plan of MEC.

Additional Information: Departmental Category: Solids

MCEN 2063 (3) Mechanics of Solids

Covers shear force and bending moment, torsion, stresses in beams, deflection of beams, matrix analysis of frame structures, analysis of stress and strain in 2-D and 3-D (field equations, transformations), energy methods, stress concentrations and columns.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 3161

Requisites: Requires prereq courses of MCEN 2023 or CVEN 2121 or GEEN 2851 (min grade C). Restricted to students with 27-180 credits (Soph/Jrs/Srs) MECH or EVEN or GEEN-BS students, with a sub-plan of MEC.

Additional Information: Departmental Category: Solids

MCEN 3012 (3) Thermodynamics

Explores fundamental concepts and basic theory, including first and second laws of thermodynamics, properties, states, thermodynamic functions and cycles.

Equivalent - Duplicate Degree Credit Not Granted: GEEN 3852

Requisites: Requires prereq course of APPM 2350 or MATH 2400 (minimum grade C). Restricted to students with 27-180 credits (Soph, Jrs or Srs) Mechanical (MCEN) or Environmental (EVEN) or General Engr Plus (GEEN-BS) students, with a sub-plan of Mechanical (MEC).

Additional Information: Departmental Category: Thermal

MCEN 3017 (3) Circuits and Electronics

Introductory course covers analysis of electric circuits by use of Ohm's law, network reduction, node and loop analysis, Thevenin's and Norton's theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits and operational amplifiers.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3010

Requisites: Requires prerequisite courses of APPM 2360 and PHYS 1140 (all minimum grade C). Restricted to students in the MSC/CU-Boulder Mechanical Engineering Partnership Program only.

Additional Information: Departmental Category: Miscellaneous

MCEN 3021 (3) Fluid Mechanics

Examines fundamentals of fluid flow with application to engineering problems. Topics covered include fluid statics and kinematics, Bernoulli equations, laminar and turbulent viscous boundary layers, laminar and turbulent pipe flow, and conservation equations for mass, momentum and energy.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and CVEN 3313 and GEEN 3853

Requisites: Requires prereq course of MCEN 2023 or CVEN 2121 or GEEN 2851 (min grade C). Requires prereq or coreq course APPM 2360. Restricted to students with 27-180 credits (Soph/Jrs/Srs) MECH or EVEN or GEEN-BS students, with a sub-plan of MEC.

Additional Information: Departmental Category: Fluids

MCEN 3022 (3) Heat Transfer

Studies fundamentals of heat transfer by conduction, convection, and radiation. Emphasizes problem formulation and selection of appropriate solution techniques. Provides applications to modern engineering systems, which may include energy, biological, environmental, and materials engineering problems.

Requisites: Requires prereq courses of MCEN 3021 and MCEN 3012 or GEEN 3852 and APPM 2360 (all min grade C). Restricted to students with 57-180 credits (Jrs/Srs) MECH or EVEN or GEEN-BS students, with a sub-plan of MEC.

Additional Information: Departmental Category: Thermal

MCEN 3025 (3) Component Design

Application of mechanics and materials science to the detailed design of various machine elements including shafts, bearings, gears, brakes, springs, and fasteners. Emphasizes application and open-ended design problems.

Requisites: Requires prerequisite courses of MCEN 1025 and MCEN 2063 (all minimum grade C). Restricted to students with 57-180 credits (Jrs/Srs) Mechanical (MCEN) or Environmental (EVEN) or General Engr Plus (GEEN-BS) students, with a sub-plan of Mechanical (MEC).

Additional Information: Departmental Category: Design

MCEN 3030 (3) Computational Methods

Studies fundamental numerical techniques for the solution of commonly encountered engineering problems. Includes methods for linear and nonlinear algebraic equations, data analysis, numerical differentiation and integration, ordinary and partial differential equations.

Requisites: Requires prerequisite courses of APPM 2360 and CHEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320 (all minimum grade C). Restricted to students with 57-180 credits (Jrs/Srs) Mechanical or Environmental Engineering majors only.

Additional Information: Departmental Category: Math

MCEN 3032 (3) Thermodynamics 2

Offers advanced topics and applications for thermal system design and analysis. Topics include thermodynamics of state, entropy, thermodynamic cycles and reacting and nonreacting mixtures. Provides application to power generation, refrigeration and HVAC with conventional and advanced technologies. Most assignments are design oriented.

Requisites: Requires prerequisite courses of MCEN 3021 and MCEN 3012 or GEEN 3852 and APPM 2360 (all minimum grade C). Restricted to students with 57-180 credits (Junior/Senior) Mechanical or Environmental Engineering majors only.

Additional Information: Departmental Category: Thermal

MCEN 3047 (4) Data Analysis and Experimental Methods

Learn to plan and carry out experiments and analyze the results. Topics covered include measurement fundamentals, design of experiments, elementary statistics and uncertainty analysis. Topics in statistics include probability, error propagation, confidence intervals, hypothesis testing, linear regression, one- and two-factor ANOVA and time series analysis. Formerly MCEN 3037.

Requisites: Prereq APPM 2360 PHYS 1140 MCEN 2024 2063 a prereq or coreq ECEN 3010 or MCEN 3017 MCEN 3030 WRTG 3030 or 3035 or HUEN 1010 or 3100 (min grade C). Restricted to 57-180 credits MCEN or EVEN or GEEN-BS students, with a sub-plan of MEC.

Additional Information: Departmental Category: Miscellaneous

MCEN 3208 (1-4) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Requires prereq courses of APPM 2360 PHYS 1140 and prereq or coreq courses of ECEN 3010 and WRTG 3030 or WRTG 3035 or HUEN 1010 or 3100 (all min grade C). Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Special Topics

MCEN 3930 (6) Mechanical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored education program with a university, government agency, or industry. This course is offered only through Continuing Education. 00 GPA or higher.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: At least a 2.75 cumulative GPA is required. Restricted to Mechanical Engineering or students with a plan of Mechanical Engineering Concurrent Degree or General Engineering Plus students with a MCEN subplan.

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Math

MCEN 4026 (3) Manufacturing Processes and Systems

Examines manufacturing processes for metals, polymers, and composites as well as manufacturing systems that integrate these processes. Lecture topics include forming, machining, joining, assembling, process integration, computer-aided manufacturing, and manufacturing system engineering.

Requisites: Requires prerequisite course of MCEN 2024 (minimum grade C). Restricted to students with 57-180 credits (Jrs/Srs) Mechanical Engineering majors only.

Additional Information: Departmental Category: Manufacturing and Systems

MCEN 4032 (3) Sustainable Energy

Examines sustainability of our current energy systems, including transportation, using environmental and economic indicators. Uses systems analysis that addresses energy supply and demand. Explores the science and technology as well as environmental and economic feasibility of efficiency measures and renewable energy technologies. Additional emphasis is given to the global nature of the challenges and the potential for locally optimal solutions.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5032

Requisites: Requires prerequisite course of MCEN 3012 and MCEN 3022 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Thermal

MCEN 4037 (2) Measurements Lab

Conduct experiments designed to introduce methods of experimentation and data analysis. Experiments taken from solid mechanics, fluid mechanics, thermal science and materials science. Emphasizes planning an experiment, applying sound scientific procedures, keeping proper records and communicating results orally and in written reports. Projects extend over two or more weeks.

Requisites: Requires prereq of MCEN 2063 3047 WRTG 3030 or 3035 or HUEN 1010 or 3100 (all min. grade C). Restricted to students with 57-180 credits (Jrs/Srs) MECH or EVEN or GEEN-BS students, with a sub-plan of MEC.

Additional Information: Departmental Category: Miscellaneous

MCEN 4043 (3) System Dynamics

Covers linear dynamic systems and mathematical tools for understanding them, input-output relationships, modeling templates, complex variables, Laplace transform, time-harmonic forcing and response, Fourier series and discrete Fourier transform, and coupled systems.

Requisites: Requires prereq courses of MCEN 2043 ECEN 3010 or MCEN 3017 APPM 2360 (min grade C) a prereq or coreq course of MCEN 3030. Restricted to students with 57-180 credits (Jrs or Srs) MCEN or GEEN-BS students, with a sub-plan of Mechanical (MEC).

Additional Information: Departmental Category: Solids

MCEN 4045 (3) Mechanical Engineering Design Project 1

First part of a two-course capstone design experience in mechanical engineering. Covers problem definition, determining design requirements, alternative design concepts, engineering analysis, proof-of-concept prototype and CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report.

Requisites: Requires prereq of MCEN 2000,3022,3025 GEEN 1400 or 2400 or 3400 or COEN 1400 or ECEN 1400 (all min grade C). Prereq/coreq of MCEN 3047,4026,4043. Restricted to students with 87-180 units, MCEN or GEEN-BS students, with a sub-plan of MEC.

Additional Information: Departmental Category: Design

MCEN 4047 (2) Measurements 2

Emphasizes experiment planning, applying sound experimental procedures, using statistics, keeping proper records, and communicating results orally, visually, and through written reports. Projects extend over several weeks and relate to solid mechanics, acoustics, electronics, and/or other ME-related disciplines.

Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 4037 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

MCEN 4057 (3) Environmental Modeling

Enables students to develop and evaluate pollutant transport, fate, exposure, and risk models for air, water, and multi-media systems, with a special emphasis on air. Emphasizes the fundamental physics and chemistry that govern contaminant fate and transport and the basic mathematical equations and numerical approaches for describing these processes.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5057

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 or MCEN 1024 and CSCI 1300 or CSCI 1320 (all minimum grade C).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

MCEN 4085 (3-4) Mechanical Engineering Design Project 2

Second part of a two-course capstone design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product.

Requisites: Requires prereq courses of MCEN 4026, 4043 and 4045 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering (MCEN) or General Engr Plus (GEEN-BS) students, with a sub-plan of Mechanical (MEC).

Additional Information: Departmental Category: Design

MCEN 4086 (1) Writing for Design Projects

Communicate professionally in writing to the technical and nontechnical audience. Develop skills to analyze rhetorical situations and compose documents, such as reports, technical manuals and user guides, that achieve a specific purpose and meet the needs of a particular audience. Writing with clarity, conciseness and correctness will be emphasized.

Requisites: Requires enrollment in corequisite course of MCEN 4085.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Manufacturing and Systems

MCEN 4115 (3-4) Mechatronics and Robotics I

Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum).

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5115

Requisites: Requires prerequisite courses of ECEN 3010 or 2250 and ECEN 1310 (formerly GEEN 1300/COEN 1300) or CSCI 1300 or 1310 or 1320 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Design

MCEN 4117 (3) Anatomy and Physiology for Engineers

Explores human physiological function from an engineering, specifically mechanical engineering, viewpoint. Provides an introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5117

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

MCEN 4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4123

Requisites: Requires prerequisite course of MCEN 3030 or ASEN 3112 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Solids

MCEN 4124 (3) Mechanical Behavior of Materials

Addresses the relationship between material structure and the fundamental processes of deformation, yield, and fracture. Examines elements of elasticity theory, introduction to plasticity, and formulation of failure criteria. Studies basic deformation processes in terms of dislocation mechanics and macroscopic mechanical behavior. Takes into consideration the influence of compositional and processing strengthening mechanisms on mechanical properties.

Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 2063 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Materials

MCEN 4125 (3) Optimal Design

Applies linear and nonlinear optimization methods to the design of mechanical components and systems. Examines unconstrained and constrained optimizations as well as formulation of objective functions, including cost, weight, response time and deflection. Applies knowledge to gears, springs, cams and linkages.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5125

Requisites: Requires prerequisite courses of MCEN 3025 and MCEN 3030 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Design

MCEN 4127 (3) Biomedical Ultrasound

Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, acoustic lenses, pulse-echo imaging and cavitation dynamics, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; and a design project.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5127

Requisites: Requires prerequisite course of MCEN 3021 (minimum grade C). Restricted to students with 57-180 credits (juniors/seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

MCEN 4131 (3) Air Pollution Control Engineering

Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5131

Requisites: Requires prerequisite courses of MCEN 3012 and MCEN 3021 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical or Environmental Engineering majors only.

Additional Information: Departmental Category: Fluids

MCEN 4133 (3) Biomechanics

Focuses on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5133

Requisites: Requires prerequisite courses of MCEN 2024, MCEN 2063 and MCEN 3021 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Materials

MCEN 4135 (3) Wind Energy and Wind Turbine Design

Focuses on understanding and applying principles related to current wind energy technology. Students will apply technical coursework from throughout the ME curriculum (fluids, dynamics, circuits, economics) to the process of designing a wind turbine and determining whether their proposal is feasible from an economic standpoint.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5135

Requisites: Requires prerequisite courses of MCEN 3021 and ECEN 3010 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical or Environmental Engineering majors only.

Additional Information: Departmental Category: Design

MCEN 4137 (3) Anatomy and Physiology 2

Provides in-depth understandings of anatomy and physiology as well as introductions to transport phenomena, flow mechanics and solid mechanics in several organ systems: the cardiovascular, pulmonary, kidney, endocrine and digestive systems. Introduces artificial physiological systems to replace or assist physiological functions and introduce the concepts of physiological barriers that prevent diagnosis or effective therapeutics.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5137

Requisites: Requires prerequisite course of MCEN 4117 (minimum grade C). Restricted to students with 57-180 credits (juniors/seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

MCEN 4141 (3) Indoor Air Pollution

Describes the impact of indoor air pollutants on human health, including an introduction to key pollutants and their sources. Students will estimate emission factors, calculate generation/ventilation rates, quantify the impact of deposition and chemical reactions and explore relevant control technology. Current issues will also be addressed, including climate change, green building design, economic concerns and relevance to the developing world.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5141

Requisites: Requires prerequisite courses of MCEN 3021 and MCEN 3022 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Fluids

MCEN 4151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5151 and FILM 4200 and ARTF 5200

Requisites: Requires prerequisite course of MCEN 3021 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Fluids

MCEN 4152 (3) Introduction to Combustion

Focuses on the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety and combustion efficiency.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5152

Requisites: Requires prerequisite course of MCEN 3012 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Recommended: Prerequisites MCEN 3021 and MCEN 3022.

Additional Information: Departmental Category: Thermal

MCEN 4154 (3) Biocolloids and Biomembranes

Covers the thermodynamics and mechanics of biological membranes and biomedical colloids. Considers intermolecular and surface forces, self-assembly and colloidal stability. Addresses structure-property relationships and design principles for biomedical applications. Focuses on monolayers, bilayers, micelles, filomicelles, liposomes, polymersomes, emulsions, microbubbles, polyplexes and polyelectrolyte multilayer capsules.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5154

Requisites: Requires prerequisite courses of APPM 2360 and PHYS 1120 (all minimum grade C). Restricted to students with 57-180 credits (juniors/seniors).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Materials

MCEN 4162 (3) Energy Conversion

Examines common energy-conversion methods and devices. Topics include power-cycle thermodynamics, turbocompressor and expander processes, combustion systems, and applications and limitations of direct energy-conversion systems.

Requisites: Requires prerequisite course of MCEN 3012 (minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Thermal

MCEN 4173 (3) Finite Element Analysis

Introduces the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua and heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5173

Requisites: Requires prerequisite courses of MCEN 2023 and MCEN 2063 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Solids

MCEN 4174 (3) Failure of Engineering Materials

Examines the fundamental concepts regarding the failure of engineering materials. Case studies are used to integrate a basic understanding of material failure mechanisms with analysis techniques and tools. Topics include the elastic properties (isotropic and anisotropic materials) and the origin of elastic behavior, viscoelasticity, plasticity (dislocation mechanisms, yielding criteria, strengthening mechanisms), creep, fracture and fatigue.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5174

Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 2063 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Materials

MCEN 4183 (3) Mechanics of Composite Materials

Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5183

Requisites: Requires prerequisite courses of MCEN 2024 and MCEN 2063 (all minimum grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Solids

MCEN 4194 (3) Electrochemical Energy Conversion and Storage

Presents the fundamentals, principles and experimental techniques of electrochemistry, the background of ionic or electronic conduction of metal, semiconductor, inorganic and polymer materials and applications in the areas of batteries, fuel cells, electrochemical double layer capacitors, electrochemical photonics, sensors and semiconductor electrochemistry.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5194

Requisites: Requires prereq courses of MCEN 2024 and 3032 (all min grade C). Restricted to graduate students or to students with 87-180 credits (Seniors) in the College of Engineering and Applied Science or to Mech Engr Concurrent Degree students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Materials

MCEN 4228 (1-4) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5228

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

MCEN 4848 (1-6) Independent Study

Subjects arranged in consultation with instructor and undergraduate advisor. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

Mechanical Engineering - Bachelor of Science (BS)

The educational objective of the undergraduate program in mechanical engineering is to prepare graduates so that they will build on the educational foundation gained through our program by establishing themselves in professional careers and/or pursuing a graduate degree within three years of graduation. In addition, within these three years, students should have begun to generate new knowledge and/or exercise leadership in their positions.

Each graduate of the mechanical engineering program is expected to:

- apply knowledge of mathematics, science, and engineering
- identify, formulate, and solve engineering problems
- use computers to solve engineering problems
- use modern instrumentation
- design and conduct experiments, including the use of probability and statistics
- analyze and interpret data
- design systems, components, or processes to meet desired needs
- understand the processes used to manufacture products
- understand contemporary issues in mechanical engineering
- demonstrate professional conduct in academic and workplace environment
- demonstrate effective oral and written communication skills
- function effectively on multi-disciplinary teams

- understand professional and ethical responsibility
- understand the impact of engineering in a global and societal context
- engage in lifelong learning

Colorado Mesa University/University of Colorado Boulder Mechanical Engineering Partnership Program

Colorado Mesa University (CMU) (<http://www.coloradomesa.edu/engineering>) and the University of Colorado Boulder have created a partnership to deliver a mechanical engineering baccalaureate program in its entirety in Grand Junction, Colorado. The first two years of the program are taught by CMU faculty and the second two years of the program are taught by CU Boulder faculty located in Grand Junction. Students completing the program will be awarded a BS in Mechanical Engineering from CU Boulder.

Concurrent Degree Program BS/MS in Mechanical Engineering

The concurrent bachelor's/master's degree program offers the opportunity of pursuing the bachelor's and master's degrees leading towards the awarding of the degrees at the completion of the joint program. The program is normally a five to six year program designed for currently enrolled CU Boulder students.

In order to gain admission to the BS/MS program in mechanical engineering, a student must meet the following criteria:

- Have a cumulative GPA of 3.250 or higher
- Have completed a minimum of 75 credit hours of coursework
- Transfer students must have completed a minimum of 24 credit hours at CU Boulder
- If admitted to the program, the student may not pursue a double degree with another baccalaureate program
- Students must have completed four of the following six courses: Component Design, Computational Methods, Fluids, Heat Transfer, Thermodynamics 1, Thermodynamics 2

The degrees will be awarded simultaneously when requirements for both degrees are met. If the student wishes to withdraw from the program and only receive the BS degree, they may do so by contacting the mechanical engineering graduate advisor. The Graduate School will then change their status from BS/MS Concurrent back to BS.

If you are interested in the BS/MS concurrent degree program, please contact the mechanical engineering graduate advisor for an application.

Requirements

Required courses in engineering, physical science, and mathematics are interwoven throughout the curriculum to provide a balanced education in the fundamentals of the mechanical engineering profession. The core courses are complemented by technical electives (<http://www.colorado.edu/mechanical/current-students/undergraduate/electives>), humanities and social sciences electives (<http://www.colorado.edu/engineering/academics/policies/hss>), free electives, and a writing course (<http://www.colorado.edu/engineering/academics/policies/hss>), for a total of 128 credits required for the degree.

Options in environmental and biomedical engineering are available for students interested in these interdisciplinary areas.

Prerequisites and Passing Grades

The minimum passing grade for a course that is a prerequisite or corequisite for another required course is C. If a grade of C- or lower is received in a course which is a prerequisite to another, the student may not register for the subsequent course until the first grade has been raised to a C or higher. If a grade of C- or lower is received in a course which is a corequisite to another, the course must be repeated until a grade of C or higher is achieved. The minimum passing grade for a course that is not specifically a prerequisite or corequisite for another required course is D-.

The Mechanical Engineering department reserves the right to drop students enrolled in MCEN courses who have not met the minimum prerequisite requirements. It is the student's responsibility to communicate with the department if summer coursework and/or transfer credit will be used to meet the prerequisite requirement.

Mechanical engineering students are expected to take Applied Math (APPM) courses for the required mathematics courses (APPM 1350, APPM 1360, APPM 2350, APPM 2360) once they have matriculated into the program.

Sample Four-Year Plan of Study

Course	Title	Credit Hours
Year One		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
CSCI 1320	Computer Science 1: Starting Computing-Engineering Applications	4
PHYS 1110	General Physics 1	4
First-Year Engineering Projects Course		3
	Credit Hours	15
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
MCEN 1024	Chemistry for Energy and Materials Science	4
MCEN 1025	Computer-Aided Design and Fabrication	4
PHYS 1120	General Physics 2	4
PHYS 1140	Experimental Physics 1	1
	Credit Hours	17

Year Two

Fall Semester

APPM 2350	Calculus 3 for Engineers	4
MCEN 2000	Mechanical Engineering as a Profession	1
MCEN 2023	Statics and Structures	3
MCEN 2024	Materials Science	3
PHYS 2130	General Physics 3	3
Humanities or Social Sciences Elective ¹		3
	Credit Hours	17

Spring Semester

APPM 2360	Introduction to Differential Equations with Linear Algebra	4
MCEN 2043	Dynamics	3
MCEN 2063	Mechanics of Solids	3
MCEN 3012	Thermodyna	3
MCEN 3021	Fluid Mechanics	3
	Credit Hours	16

Year Three

Fall Semester

ECEN 3010	Circuits and Electronics for Mechanical Engineers	3
MCEN 3022	Heat Transfer	3
MCEN 3025	Component Design	3
MCEN 3030	Computator Methods	3
College-Approved Writing Course ²		3
	Credit Hours	15

Spring Semester

MCEN 3047	Data Analysis and Experimental Methods	4
MCEN 4026	Manufacturi Processes and Systems	3
MCEN 4043	System Dynamics	3
General Technical Elective		3
Humanities or Social Sciences Elective ¹		3
	Credit Hours	16

Year Four		
Fall Semester		
MCEN 3032	Thermodynamics 2	3
MCEN 4045	Mechanical Engineering Design Project 1	3
MCEN Technical Elective		3
Humanities or Social Sciences Electives ¹		6
Free Elective		2
	Credit Hours	17
Spring Semester		
MCEN 4085	Mechanical Engineering Design Project 2	3
MCEN Technical Elective		3
General Technical Electives		3
Humanities or Social Sciences Elective ¹		3
Free Elective		3
	Credit Hours	15
	Total Credit Hours	128

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Technology, Arts and Media

Courses in Technology, Arts and Media (TAM) are offered through the ATLAS Institute (<http://atlas.colorado.edu>), a center of interdisciplinary research, learning and collaboration in engineering, creative technologies and design. ATLAS is a vibrant and growing community of researchers, instructors, and students from the arts, sciences, social sciences, and engineering whose interest in the creative application of diverse technologies creates a culture of innovation and interdisciplinary collaboration that benefits from strong ties to the technology sector in Colorado and beyond.

Created to equip students with new and adaptable skill sets for the ever-expanding digital landscape, the Technology, Arts and Media (TAM) program offers a bachelor of science, as well as minor and certificate programs. Through both the core curriculum and electives, TAM offers students a wide range of learning opportunities in subjects such as programming, physical computing, digital media, virtual reality, technology education, mobile application development, design, history of technology, big data, virtual reality, web design, user-interface/user-experience, robotics, and wearable technology.

Course code for this program is ATLS.

Centers and Labs

The ATLAS Institute is affiliated with the University of Colorado Boulder College of Engineering and Applied Science and the Graduate School. With a strong emphasis on design, research, project-based learning, and

creative production, the institute includes a wide range of research labs, creative studios, and learning facilities:

Laboratory for Playful Computation

A research lab that designs playful and programmable technologies to create new possibilities for fun, creative, and expressive STEM and computing-based learning.

Interactive Robotics and Novel Technologies (IRON) Lab

A research lab that explores human-centered principles for developing novel sensing, interactive, and robotic technologies, blending methods and techniques from computer science, design, engineering, and the social sciences.

Unstable Design Lab

A research lab that studies technology and culture through the design and development of technologies that embrace chance and uncertainty.

BTU Lab

A dynamic teaching facility, creative studio, and hackerspace that provides a range of physical computing, electronics, and fabrication technologies, including a laser cutter, 3D printers, and computers.

Novel Audio / Radiophonic Workshop and Laboratory (NARWAL)

A learning lab for sound exploration and tinkering with synthesizers, digital audio workstations, vintage audio platforms, and experimental interfaces.

Mixed Reality Lab

A learning lab that provides a range of emerging technologies for the exploration, project development and creative applications of virtual and augmented realities.

Heliographic Lab

Provides a range of technologies and materials for investigating digital imaging and photography through the production of creative works and projects.

Center for Media, Arts and Performance

Centered around the ATLAS Black Box theater, CMAP blends creativity, engineering, and the performing arts, serving as an incubator for the novel and experimental use of technology in music, dance, visual art, theater, film, and new media.

Bachelor's Degree

- Technology, Arts and Media - Bachelor of Science (p. 745)

Minor

- Technology, Arts and Media - Minor (p. 747)

Certificate

- Technology, Arts and Media - Certificate (p. 747)

Courses

ATLS 1100 (3) Design Foundations

Introduces foundational principles, practices and methods of design. Emphasizes design as an expressive and creative problem solving tool. This course engages with design from a broad perspective including visual, computational, physical and auditory design practices. Through lectures, discussions and creative projects, students will gain a familiarity with the diverse applications of creative technology through design.

Requisites: Restricted to Technology, Arts and Media (TMEN) majors only.

Grading Basis: Letter Grade

ATLS 1220 (4) Virtual Worlds: An Introduction to Computer Science

Introduces the fundamental principles of computer science using an on-line virtual world called Second Life as the "Laboratory" for the course. Students will learn how to program by creating objects of interest in Second Life. In-class and in-world discussions and readings will introduce the student to important ideas and concepts that shape the field of computer science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1220

ATLS 1240 (3) The Computational World

Introduces and explores the "computational style of thinking" and its influence in science, mathematics, engineering and the arts. Does not focus on the nuts and bolts of any particular programming language, but rather on the way in which computing has affected human culture and thought in the past half century.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 1240

ATLS 1710 (3) Tools and Methods for Engineering Computing

Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/Actionscript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills.

ATLS 2000 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society.

Equivalent - Duplicate Degree Credit Not Granted: HUEN 2020

Requisites: Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

ATLS 2036 (3) Introduction to Media Studies in the Humanities

Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant reading and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2036

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students in the Atlas student group (PATL) only.

ATLS 2100 (3) Image

Introduces techniques, technologies and concepts of digital image making and manipulation through lectures, projects and critiques. Focuses on digital photography, digital animation and digital video as a means to formal and expressive ends. This course also contextualizes practices and methodologies of digital imaging with historical and critical perspectives.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 2200 (3) Web

Introduces techniques, technologies and concepts of web design and development through lectures, projects and critiques. Focuses technically on HTML, CSS and JavaScript as the primary web technologies. Contextualizes the technical and societal implications of the Internet through historical and critical perspectives.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 2300 (3) Text

Introduces technologies, terminology and histories related to the design of text within digital and analogue media. Students will learn the fundamentals of design, typography and layout through lectures, projects and critiques. The curriculum surveys significant theoretical perspectives, historical periods and significant practitioners that influence the practice of typographic design.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 2519 (1-3) Special Topics in Technology, Arts and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 3000 (3) Code

Instructs non-computer science students in analyzing problems and synthesizing programs for the solution, emphasizing good engineering practices for program construction, documentation, testing, and debugging. Uses Java for programming projects. Formerly ATLS 2010.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade D-). Restricted to students in the ATLAS student group (PATL) only.

ATLS 3100 (3) Form

Teaches the fundamentals of 3D modeling, 3D animation and 3D printing / rapid prototyping from a conceptual and sculptural perspective. Through topical lectures, technical demonstrations and creative projects the course will introduce students to the potentials of thinking and working within 3-dimensional spaces.

Requisites: Requires a prerequisite courses of ATLS 2000 (minimum grade C) and CSCI 1300 (minimum grade C-). Restricted to Technology, Arts and Media (TMEN) majors or the PATL student group only.

Grading Basis: Letter Grade

ATLS 3110 (3) Motion

An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media.

Recommended: Prerequisite ATLS 2100.

ATLS 3112 (1-3) Digital and Social Systems Professional Development

Supports students in developing professional skills and practices in human computer interaction, design of interactive systems, computer supported cooperative work, computer supported collaborative learning, educational technology, tools that support creativity, user-developed knowledge collections and gaming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 3112

Repeatable: Repeatable for up to 10.00 total credit hours.

ATLS 3173 (3) Creative Climate Communication

We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3173 and THTR 4173

Recommended: Prerequisite ENVS 1000.

ATLS 3200 (3) Sound

Introduces techniques, technologies and concepts of digital sound through lectures, projects and critiques. Focuses technically on digital sound creation, production, synthesis and interactivity. Explores various approaches to digital sound production through historical and conceptual perspectives.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

Recommended: Prerequisite CSCI 1300.

Grading Basis: Letter Grade

ATLS 3500 (1-3) Client Projects in Technology, Arts and Media

Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. Focuses on teamwork, conceptual planning, technical design and development and working within real-world client environments. Critical skills include project research, planning, design, development, troubleshooting and presentation.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ATLS 2000 and ATLS 3010 (all minimum grade C).

Recommended: Prerequisite ATLS 3020.

ATLS 3519 (1-3) Special Topics in Technology, Arts, and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice.

Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

ATLS 3529 (1-3) Special Topics in Critical Perspectives in Technology

Analyzes critical perspectives in technology, art, and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 4120 (3) Mobile Application Development

Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5120

Requisites: Requires prerequisite course of ATLS 3000 or CSCI 1300 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 4214 (3) Big Data Architecture

Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5214

Requisites: Requires prerequisite course of CSCI 2270 (minimum grade D-). Restricted to Technology, Arts and Media (TMEN) majors, Computer Science (CSEN/CSCI) majors or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 4230 (3) Case Studies in Information and Communication Technology for Development

Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5230

ATLS 4519 (1-4) Advanced Special Topics in Technology, Arts, and Media

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice.

Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

ATLS 4529 (1-3) Advanced Special Topics: Critical Perspectives in Technology

Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5529

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade D-). Restricted to Technology, Arts and Media (TMEN) majors or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 4630 (3) Web Front-End Development

Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5630

Requisites: Requires prerequisite courses of ATLS 2200 and ATLS 3000 or CSCI 1300 (all minimum grade C).

ATLS 4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5809 and CSCI 4809 and CSCI 5809

Requisites: Restricted to students in the Atlas student group (PATL) only.

ATLS 4900 (1-3) Undergraduate Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of ATLS 3010 and 3020 (all minimum grade D-).

Technology, Arts and Media - Bachelor of Science (BS)

The Bachelor of Science in Technology, Arts and Media (BS-TAM) (<http://tam.colorado.edu>) is an engineering degree unlike any other. Encompassing a broad, transdisciplinary curriculum, BS-TAM blends creativity and design with a rigorous engineering curriculum that emphasizes critical thinking, problem-solving, and creative production. Attracting designers, makers, inventors, and builders seeking diverse and adaptable skills, the degree opens doors to a wide range of 21st-century challenges and opportunities.

Industry and Career Paths

- Information design and data visualization
- Web design and development
- Motion graphics, 3D modelling, and animation
- Video and narrative media
- Robotics and physical computing

- Internet of Things design
- Graphic design and visual communication
- Game design and development
- User interface design, user experience design and experience design
- Digital sound, audio production and electronic music
- Mobile application design and development

Students who complete BS-TAM are poised to pursue graduate or advanced degrees in engineering, other technological fields, and design.

Unique

BS-TAM is unique. With a solid engineering foundation, it caters to an emerging generation of hybrid students who resist the specialization required of traditional engineering disciplines, but eagerly seek mastery of diverse technical and computational skills in pursuit of creative goals and projects.

Hallmarks of the TAM Program

- Most TAM classes are small, studio-based courses that encourage group work and collaboration.
- TAM classes are around 58 percent female, a percentage well above most engineering and computing programs.
- TAM stresses knowledge, skills, and expertise in technology development, with a foundation in engineering and computational thinking; creative technologies and applications; and interdisciplinary perspectives on IT and society. The TAM faculty comprises technologists, designers, and artists from diverse fields who are passionate about sharing their unique knowledge with students.

Transdisciplinarity

BS-TAM is discipline-agnostic, encouraging students to pursue their interests and passions in ways that conform to, as well as transcend traditional disciplinary fields. By helping students discover, explore, and expand these interests, TAM faculty members prepare students for rapid shifts and innovations in tomorrow's technology landscape.

Creative Production and Critical Perspectives

TAM students are prolific creators who learn to critically and conceptually assess the works they create. Courses are designed on the studio model that integrates faculty and peer critique at every level. Graduates of the TAM program are savvy and resourceful engineers, equal parts creator and critic, artist and theorist.

Program Goals

- TAM stresses knowledge, skills and expertise in technology development, with a foundation in engineering, computational thinking, creative technologies, applications, and interdisciplinary perspectives on IT and society.
- Prepare engineers, technologists, designers, and artists for existing and emerging careers.
- Produce students with a mastery of creative technology who are adept at critical problem finding and solving.
- Equip students with technical, theoretical, and historical perspectives they need to contribute to developing new functionalities, aesthetics, and innovations of creative technology.

- Encourage investigation at the intersection of technology with other disciplines and practices.
- Enable students to think creatively, critically, and conceptually about technology and its impacts.
- The TAM faculty comprises engineers, designers, and artists from diverse fields who are experts in working with students of varied backgrounds, abilities and interests.

Degree Requirements Overview

Total BS credit hours: 128–133

General Course Work

Mathematics, Natural Sciences, Engineering and Computation	37-41
Humanities and Social Sciences (including 15 credit hours of upper division courses, with 12 credit hours in ATLS courses, and at least one college-approved writing course)	21
Free Electives	14-15
Foundation and Core courses (including a two-semester sequence of capstone projects-based courses)	32
Critical Perspectives in Technology Electives (including 6 credit hours of upper division courses)	6
Focus electives within one of the possible areas of specialization in Technology, Arts and Media	18
Total Credit Hours	128-133

Graduation Requirements for Completing the BS in Technology, Arts and Media

- Completion of the curriculum, consisting of a minimum of 128 and a maximum of 133 total credit hours
- A grade of C or better is necessary in all Foundation and Core Technology, Arts and Media courses
- The minimum passing grade for a course that is considered a prerequisite for another course is C-.
- Cumulative grade point average of 2.250 or higher, along with other CEAS graduation requirements detailed on the college's Graduation Requirements (<http://www.colorado.edu/engineering/academics/policies/graduation-requirements>) web page.
- The last 45 credit hours of the 128 required for the BS degree must be earned through CU Boulder coursework only, and while rostered in the College of Engineering and Applied Science.
- Pass/Fail credit will be permitted for 6 credits of free electives, or for courses above and beyond degree requirements.
- The College allows a maximum of 6 hours of Independent Study degree credit. A maximum of 3 hours may be taken in any one semester.

Sample Four-Year Plan of Study

Course	Title	Credit Hours
First Year		
Fall Semester		
APPM 1350	Calculus 1 for Engineers	4
ATLS 2000	The Meaning of Information Technology	3
Natural Science Course		3-4

COEN 1500	Introduction to Engineering (or another college introductory course)	1
Humanities or Social Sciences Elective ¹		3

		Credit Hours
		14-15
Spring Semester		
APPM 1360	Calculus 2 for Engineers	4
Natural Science Course		3-4
ATLS 1100	Design Foundations	3
First-Year Projects Course		3
CSCI 1300	Computer Science 1: Starting Computing (or another college introductory computing course)	4
		Credit Hours
		17-18

Second Year		
Fall Semester		
Mathematics Course		3
ATLS 2100	Image	3
ATLS 2200	Web	3
CSCI 2270	Computer Science 2: Data Structures	4
Natural Science Course		3-4
		Credit Hours
		16-17
Spring Semester		
Mathematics Course		3
ATLS 2300	Text	3
ATLS 3100	Form	3
Humanities or Social Sciences Elective ¹		3
Natural Science Course		3
Free Elective		3
		Credit Hours
		18

Third Year		
Fall Semester		
ATLS 3519	Special Topics in Technology, Arts, and Media (Object)	3
ATLS 3200	Sound	3
ATLS 3529	Special Topics in Critical Perspectives in Technology	3
Humanities or Social Sciences Elective ¹		3

College-approved writing course ²	3		
		Credit Hours	15
Spring Semester			
Critical Perspectives in Technology	3		
Humanities or Social Sciences Electives ¹	6		
ATLS Focus Courses	6		
Free Elective	3		
		Credit Hours	18
Fourth Year			
Fall Semester			
Capstone 1	4		
ATLS Focus Courses	6		
Free Electives	6		
		Credit Hours	16
Spring Semester			
Capstone 2	4		
ATLS Focus Courses	6		
Free Electives	4-6		
		Credit Hours	14-16
		Total Credit Hours	128-133

¹ Students may choose courses from the list of college-approved humanities and social sciences (HSS) electives (<http://www.colorado.edu/engineering/academics/policies/hss>).

² Students may choose a course from the list of college-approved writing courses (<http://www.colorado.edu/engineering/academics/policies/hss>).

Technology, Arts and Media - Certificate

The Certificate in Technology, Arts and Media provides a fundamental understanding of information technology and digital media production. The program will motivate students to think critically about technology and its impacts upon society.

Goals

- To equip students with a basic digital media skill-set
- To transform students from passive users of technology into active producers of technology
- To introduce students to critical thinking and theories relevant to digital media

Requirements

Students must have 2.500 cumulative GPA to be admitted to the Technology, Arts and Media certificate program.

This certificates requires completion of the four courses below for 12 credit hours.

Students must earn a minimum grade of C in all courses counted for the certificate. Course work used to satisfy requirements cannot be taken pass/fail. Failing to meet the minimum grade for any individual ATLS course twice will result in automatic removal from the certificate program.

Required Courses and Semester Credit Hours

ATLS 2100	Image	3
ATLS 2200	Web	3
ATLS 2300	Text	3
Total Credit Hours		12

Technology, Arts and Media - Minor

The Minor in Technology, Arts and Media (<http://tam.colorado.edu/minor.html>) (TAM) provides a broad multidisciplinary perspective that integrates technological skills with a critical, theoretical, and historical understanding of technology, media, and the arts.

Goals

- Prepare the next generation of artists, designers, and media producers.
- Give students the necessary technical, theoretical, and historical background to contribute to the development of new functionalities and aesthetics for computer media.
- Facilitate exploration at the intersection of technology and other fields and disciplines.
- Produce active and critically aware producers of creative technology.
- Enable students to think critically and conceptually about creative technology.

Requirements

Students must have 2.50 cumulative GPA to be admitted to the Technology, Arts and Media (TAM) Minor.

Students must complete a minimum of 21 credit hours, as detailed below. Coursework used to satisfy the minor requirements cannot be taken pass/fail. A minimum of 15 credit hours must be taken on the Boulder campus.

Students must earn a minimum grade of C in all courses counted for the minor or certificate. Failing to meet the minimum grade for any individual ATLS core course twice will result in automatic removal from the TAM program.

Required Courses and Semester Credit Hours

ATLS 2000	The Meaning of Information Technology	3
ATLS 2100	Image	3
ATLS 2200	Web	3
ATLS 2300	Text	3
ATLS 3000	Code	3
Upper Division Focus Elective ¹		3
Upper Division Critical Perspectives in Technology Elective ²		3
Total Credit Hours		21

¹ For a list of approved Focus Electives, visit the Focus Elective (<http://tam.colorado.edu/focuselectives.html>) webpage.

² For a list of approved Critical Perspectives in Technology Electives (CPT), visit the CPT Electives (<http://tam.colorado.edu/criticalperspectives.html>) webpage.

Courses may be taken concurrently, although some courses may have recommended and/or required prerequisites.

Environmental Design

Built on strong traditions within the design fields—including architecture, landscape architecture, and planning—the Program in Environmental Design (ENVD) offers an integrative approach to education and research. Committed to enriching the built, social and natural environments, this inclusive and creative community engages learning with local and global partners.

The program offers the Bachelor of Environmental Design (BEnvD)—a four-year, preprofessional degree that prepares students for the practice of and advanced study in design-based fields. From analyzing the design of individual buildings to the planning of entire regions, ENVD course work and projects that engage the diverse scales of environmental design. Course material ranges from building materials and prefabricated building systems to open space issues, political systems, and institutional arrangements.

By challenging the siloed thinking indicative of more traditional design programs, faculty and students in ENVD work together to:

- design solution-based approaches that blend technical, ecological, economic, social, cultural, aesthetic and ethical concerns;
- employ evidence-based knowledge to help inform design and planning decisions;
- spur an interdisciplinary dialogue integrating core design disciplines with the sciences, humanities, arts, and other professions; and
- address a spirit of service to diverse communities, social justice, and ecological sustainability.

Graduates from the Program in Environmental Design are uniquely qualified to confront the significant environmental challenges that lie ahead. By engaging in much more than vocational training, our students become adept at complex problem solving, analytical thinking, and leadership through course work in theory, history, ecological impact, materials and methods, and systems thinking. Students enroll in studios, lectures, and seminars taught by faculty with both academic and professional expertise. Students work directly with communities to integrate their social, ecological, and economic needs to support a sustainable future. Students employ state-of-the-art educational technology, including computing tools, fabrication equipment and advanced media.

The program's cross-disciplinary collaborations with colleagues in closely-affiliated CU programs enhances the curriculum and research within ENVD. Sharing in the diverse resources of Boulder campus—from natural sciences, social sciences, humanities, arts and technology fields—the ENVD program offers an educational opportunity like no other.

Preparing for a Professional Career

The program prepares preprofessional undergraduate students for professional graduate study in the design professions. As with other four year preprofessional degrees, such as the bachelor of science or bachelor of arts in architecture, the BEnvD prepares students for study in a master of architecture (MArch), master of landscape architecture (MLA), master of urban design (MUD) or master of urban and regional planning (MURP)

degree program, or Master of Fine Arts (MFA) in design or industrial design.

It is common for bachelor's of environmental design graduates to receive advanced standing for the work they have done in our program, which allows them to complete a graduate degree at other design schools in a shorter time.

Preparation for a Preprofessional Career in Architecture

The program prepares preprofessional undergraduate students for professional graduate study in architecture. The four year BEnvD degree is a preprofessional degree and is not accredited by the National Architectural Accrediting Board (NAAB) as a professional degree. NAAB does not accredit BA Arch, BS Arch or BEnvD degrees. The NAAB only accredits master of architecture (MArch), five-year bachelor of architecture (BArch), and doctorate of architecture (DArch) programs. The BEnvD degree prepares students for acceptance to NAAB-accredited programs. Students who have completed the BEnvD will normally be asked to complete a *minimum* of four semesters of additional course work (60 hours of credit) after admission into one of 95 NAAB-accredited graduate programs nationally.

In addition to earning a MArch degree, prospective architects must complete three years of internship and must pass a state professional licensing exam. This process is overseen by the National Council of Architectural Registration Boards (NCARB). Some intern requirements may be completed concurrently with studies. In the State of Colorado, individuals with seven years of experience in professional architecture may sit for licensing exams towards professional licensure.

Preparation for a Preprofessional Career in Planning

The program prepares preprofessional undergraduate students for professional graduate study in planning. The practice of planning is currently not licensed in most states. Professional membership and certification is overseen by the American Planning Association (APA) and the American Institute of Certified Planners (AICP). Degrees in the field are accredited by the Planning Accreditation Board (PAB) of the Association of Collegiate Schools of Planning.

Although students interested in entry-level positions in planning may find the BEnvD degree adequate, an advanced degree (MURP, PhD or other graduate planning focus) is highly desirable. Students primarily interested in professional practice should obtain a graduate degree in urban planning, in urban and regional planning, in urban planning and community development or in urban design. Students interested in teaching or research in planning should complete a PhD.

Preparation for a Preprofessional Career in Landscape Architecture

The program prepares preprofessional undergraduate students for professional graduate study in landscape architecture. To obtain a license, landscape architects should have an advanced degree and work experience, and pass the national examination. In the United States, licensing is overseen both at the state level and nationally by the Council of Landscape Architectural Registration Boards (CLARB). Accreditation of educational programs is voluntary. The Landscape Architectural Accreditation Board (LAAB) evaluates programs and provides an assessment. Advanced standing for graduate study is evaluated on a case-by-case basis, according to the standards of each graduate program as demonstrated by and in accordance with a student's prior academic accomplishments in the application, portfolio, and the transcript.

Preparation for Preprofessional Opportunities in Design

Professional and career opportunities are broad and varied. There is an increasing demand in the design, construction and development industries for people who combine an understanding of design with a specialized understanding of related fields like computing, management, finance or marketing. Some students may use the design studies major as general preparation for graduate study in any number of academic fields that are also concerned with the design and planning of the built environment such as art history, environment behavior studies, and information graphics. Other students may use this emphasis to prepare for further graduate study in a professional field related to architecture, landscape architecture and planning, including business, law, journalism, public administration, product design and digital design. Design thinking is increasingly recognized in the business world as a valuable expertise in the analysis of the design of corporate structures and business plans, industrial processes, manufacturing, marketing and other related pursuits. Excellent design constitutes a fundamental aspect of sustainability in any field.

Facilities

Facilities for the program are provided in the Environmental Design Building and at the Center for Innovation and Creativity (CINC) facility.

Environmental Design Building

Located in the heart of campus, the ENVD building (<http://www.colorado.edu/campusmap/map.html?bldg=ENVD>) houses administrative and faculty offices, studio spaces, conference rooms, lecture rooms and exhibit spaces located on the first floor, basement, and third floors of the building.

Studio spaces provide large open areas with individualized work tables available to students 24 hours a day. Studio's are located in the basement and on the third floor of the ENVD building. Students are expected to work within the studio space to complete their models or other design projects.

The Digital Media Center (<http://www.colorado.edu/envd/resources/dmc>), (DMC) an ENVD Academic Support Center, houses a photographic studio for portfolio, digital imaging computer workstations, a printing and production lab with state-of-the-art large format printers for professional style presentation boards and 3-D printers, and provides professional photography and videography services. The Center also serves as an audiovisual equipment check out center for ENVD faculty and students to check out digital cameras, laptop computers, digital projectors, laser pointers, hand tools and other teaching and presentation supplies. ENVD faculty, staff and students use these resources to produce images and materials for course assignments, research papers, research collaborations and other publications. The center also serves the program's needs for marketing and communications through the management of digital and printed communications including website, social media, brochures, posters and e-communications.

Creative Lab Center

The Creative Lab Center (<http://www.colorado.edu/envd/resources/cinc>) (CLC) provides students access to studio space along with specialized fabrication facilities in the University's Center for Innovation and Creativity which is located on the CU-Boulder East Campus. The digital design and fabrication resources at the CLC are supported by a state-of-the-art wood lab, metal lab, laser cutting machines, two 3-Axis CNC routers and a high end CPU lab. These labs enhance the ENVD curriculum by providing students with the technological resources for

design visualization, scale modeling and full scale prototyping, turning ideas into tangible objects.

A mandatory "Basic Safety Orientation" is required for all students before access to the facilities is granted. This course is an introduction to the program's safety policies as well as the proper use of personal safety equipment and safe practices on the fabrication equipment.

Lecture Series

The program's on-going lecture series, held Monday's at 5:47pm, enables students and faculty to meet alumni and other presenter's whose work significantly contributes to the different fields that make up the design professions and related fields. Other professional organizations and design-related institutions in the region also sponsor lectures and events that are open to the program's students. Lectures are video taped and available to the public. View the ENVD website for the lecture series (<http://www.colorado.edu/envd/news-events/547-lecture-series>) schedule and video archive. (catalog.colorado.edu/undergraduate/colleges-schools/environmental-design/%20www.colorado.edu/envd/news-events/547-lecture-series)

Policies & Requirements

Scholarships and Awards

A wide range of scholarships (<http://www.colorado.edu/envd/student-services/advising-center/scholarships>) and awards are available to environmental design students. They are sponsored by the program, the campus, the professions and other foundations and donors.

In addition to these scholarships, interested students may participate in faculty-student research projects funded by the Undergraduate Research Opportunities Program (UROP (<http://www.colorado.edu/suep/about-urop>)) programs, or in other research opportunities provided by the campus or in cooperation with the program's faculty.

Recognition of Academic Achievement

As a preprofessional program, the Program in Environmental Design provides an atmosphere for study and creative investigation. The program holds academic rigor and quality in the highest esteem. In recognition of high academic achievement and professional attainment, the program grants scholarly honors at graduation.

Students achieving a grade point average of 3.50 to 3.749 (honors) and 3.75 to 4.00 (special honors) are recognized at commencement. Honors are based on course work completed at the University of Colorado. A minimum of 70 credit hours of course work must be completed at CU to be eligible for honors.

Latin Honors—General Honors Program

All University of Colorado students may participate in the Latin honors granted by the College of Arts and Sciences. Students may graduate with Latin Honors (*summa cum laude*, *magna cum laude* or *cum laude*) through either the General Honors Program or their departmental honors program (*see below*). Granting of these honors is based on several criteria, including the quality of original scholarly work which is generally reported in the form of a thesis. Students interested in participating in the General Honors Program should visit the CU Honors Program website (<http://www.colorado.edu/honors>).

Latin Departmental Honors in Environmental Design

Environmental design students may graduate with Latin Departmental Honors (summa cum laude, magna cum laude or cum laude). Students with an overall GPA of 3.30 or higher propose a project to work on during their senior year of study under the guidance of a primary advisor. Students defend their thesis to a committee of three faculty (environmental design primary advisor, the honors council liaison and a faculty member from outside the department) in April. The full Honors Committee awards honors in the semester the student graduates. Deadlines can be found on the CU Honors Program graduation page (<http://www.colorado.edu/honors/graduation/convocation>).

Latin Honors candidates present work that is student initiated and student directed well beyond the requirements for required classwork. For the Program in Environmental Design Latin Honors (<http://www.colorado.edu/envd/student-services/advising-center/honors>) projects in fall into two major categories: research and design.

- **Research** projects present a heretofore-unanswered question then seek to answer it, relying on a variety of data or types of evidence. The product is a paper, the length of which is determined by the topic in conversation with the advisor.
- **Design** projects present a problem and propose a solution to that problem. The product is a design or object, presented with a critical introduction. Design theses go beyond designing a building, landscape, urban district, or planning problem that responds to conventional programmatic assumptions, to propose a new response to a problem identified by the student. The scope of the project and the design presentation are determined in conversation with the advisor.

Academic Standards

Student Rights and Responsibilities

The Program in Environmental Design is part of an academic community whose mission requires an open learning and working environment for students, faculty, staff and administrators. An open learning and working environment values and protects individual dignity and the integrity of human relationships and is based upon mutual trust, freedom of inquiry, freedom of expression and the absence of intimidation and exploitation. Any infringement upon these freedoms and rights may be cause for review by the program and/or by other university offices for retention in the program. Students in the program are subject to the policies and procedures governing student rights and responsibilities. See the campuswide Student Conduct & Colorado Creed (p. 25) section.

Ethics and Academic Dishonesty

Students in the Program in Environmental Design are subject to the Boulder campus Honor Code and are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Any act of academic dishonesty may result in sanctions from individual faculty and also be reported to the Honor Code Office for their review and action.

For a full description of Honor Code expectations and policies, see the campuswide Academic Integrity (p. 15) section.

GPA Requirements, Probation and Scholastic Suspension

Students who fail to meet the minimum cumulative grade point requirement of 2.00 are still permitted to continue their studies on a provisional basis.

First semester freshmen students who do not achieve a 2.0 will be placed on academic alert for the following semester and are required to submit an academic recovery plan with their advisor. Scholastic records of students are evaluated at the end of the second semester, if the student has not achieved an overall 2.0 the student will be placed on probation or suspended depending on an evaluation of meeting the academic recovery plan.

Continuing students who fail to meet the minimum cumulative grade point requirement of 2.00 in a given semester are permitted to continue their studies the following semester on a probationary basis. Scholastic records of students are evaluated at the end of the probationary semester, if the student has not achieved an overall 2.0 the student will be placed on suspension.

Students on suspension are not allowed to register on any campus within the University of Colorado system while on suspension, with the exception of continuing education courses or main campus summer sessions. A suspended student may take classes through Continuing Education or on any University of Colorado campus during the summer in order to raise their cumulative CU grade point to a 2.00 or higher to be eligible for re-admittance into the program. Suspended students may petition for early re-admittance, which are reviewed on a case-by-case basis by the program administration.

Students are notified of their academic status (e.g., alert, probation, suspension) in writing, with a copy of the letter placed in the student's file, directing the student to contact their advisor and prepare an academic recovery plan approved by their advisor.

Students in the Program in Environmental Design who withdraw from all their registered courses two semesters in a row will have a hold placed on their account prohibiting them from further registration with the exception of registration in Summer Session classes, which are not counted in the regular academic year. Students will not be readmitted for return to CU Boulder before one full academic year has elapsed (not including the semester of withdrawal).

Students suspended a second time are reinstated only under special circumstances. Students who believe that their situations warrant a departure from these normal stipulations may petition for reinstatement. The program looks with favor on such petitions only if the student has shown marked improvement in academic work or if there are remarkable circumstances that have contributed to the student's academic difficulties.

Attendance

Students are expected to subscribe to attendance and participation guidelines specified by instructors for individual courses in a manner that complies with university protocol. Given that a considerable portion of the ENVD curriculum is offered via studio courses, students are fully expected to comply with guidelines that may be different and more onerous than traditional lecture or seminar courses (e.g., attending skill sessions, lectures, juries and presentations).

The Program in Environmental Design currently offers specializations in architecture, landscape architecture, planning, and design studies. Policy questions may be directed to 303-492-7711 or ENVDoffice@colorado.edu.

Requirements for Admission

High School Students

Candidates for admission to the Program in Environmental Design are expected to meet the general requirements for admission to the university. See the Admissions (p. 97) section for specific requirements. Applicants to the program should possess a strong high-school or equivalent background, including four years of English and math, and at least three years of natural science (including physics and/or biology) and social science. Additional course work in math, social studies and the arts and humanities is recommended.

Transfer Students

Transfer students entering the program are admitted through CU Boulder's admission process directly into the Program in Environmental Design. A college-level GPA of 2.75 or higher is required. Preference is given to students who have taken college-level courses in the areas of architecture, planning or environmental studies. Completion of courses in related fields of social science, natural science, fine arts or humanities is also considered in admission review. All course work except the last term, if in progress, must be completed and must be listed on the official transcript sent for admission consideration.

Students are encouraged to transfer as early as possible in their undergraduate career due to the required sequence of design courses in the first two years of the curriculum. Students may declare their specialization in architecture, landscape architecture, planning or design studies when they transfer or after they complete the core program. While transfer students are admitted for the fall and spring terms each year, it is important to note that the core curriculum sequence begins in the fall semester with only limited opportunities to begin study out of sequence. Students who start the sequence in the spring semester will be required to complete summer classes in order to stay on track in the curriculum. All transfer students are required to take a minimum of 30 credit hours in the Program in Environmental Design.

A maximum of 60 credit hours taken at a two-year college may be applied toward the baccalaureate degree. In general, credit hours in vocational-technical courses are not accepted for transfer. Transfer agreements between the University of Colorado and all Colorado community colleges outline approximately one year of prescribed general education courses that may be completed as preparation for transfer into the Program in Environmental Design. As noted above, students should plan to transfer to the University of Colorado as soon as possible to start the sequential curriculum. See the Transfer of College-Level Credit (p. 111) section for admission standards for transfer.

Transfer Students from Other University Design Programs

Transfer students from other universities offering preprofessional or accredited professional degree programs in one of the program's specializations who enter CU Boulder may apply for equivalency and advanced standing. A portfolio review will be required for these students. In order for transfer credit to meet core degree requirements, a grade of B or better is required in the transferring class. For more information, visit the Academic Center for Excellence (<http://www.colorado.edu/envd/student-services/advising-center-excellence>) webpage.

Intrauniversity Transfer (IUT)

University of Colorado students in good standing who are interested in pursuing a degree in environmental design may apply for transfer into the program. Drop-in IUT advising hours are held for interested students

on Mondays, 1-3pm in ENVD 162. Students should contact the program office for meeting dates and application deadlines for specific semesters. We highly encourage prospective students to attend an Environmental Design Program tour, which are offered Monday–Friday at 12:30 p.m. in the lobby of the Environmental Design building on main campus.

For more information, please visit the program's Intrauniversity Transfer (<http://www.colorado.edu/envd/program-information/prospective-students/intra-university-transfer>) webpage.

Credit Policies

Advanced Placement

Advanced Placement (AP) and college-level credit may be granted on the basis of the College Board's Advanced Placement tests. For students who have completed AP course work in high school and received scores in the AP examination that meet university standards, then AP as well as college credit is granted. Granted college credit is treated as transfer credit without a grade but counts toward graduation requirements and could meet other specific degree requirements when applicable.

Incomplete Grades

The Program accepts incomplete agreements between faculty and students who have satisfactorily completed a substantial amount of coursework but are unable to complete the course requirements due to extenuating circumstances. In all cases, students must present evidence of circumstances beyond their control that prevent them from completing the class. The student and faculty member must complete an Incomplete Agreement outlining the terms of course completion and submit this agreement to their advisor in the Center for Academic Excellence (<http://www.colorado.edu/envd/student-services/advising-center-excellence>).

Independent Study

Ordinarily, only students at 3000 or 4000 studio level and who hold at least a 3.00 GPA are permitted to register for Independent Study (ENVD 3909) or Independent Study (ENVD 4909). Independent study credit is supervised by a faculty member and may not be used to substitute for any required core or design studio courses.

Additional requirements may be established depending on the proposed topic. No more than 3 credit hours of independent study credit during one semester and no more than a total of 6 are given for the entire time the student is enrolled in the program, unless an exception is granted by the Program.

A complete description of the scope of the independent work, a summary of how it will be carried out, and a definition of the intended outcomes must be submitted to the supervising faculty member no later than five days after the official beginning of a semester. Approval of the description must be by the faculty member and by program administration before permission is granted for enrollment in the independent study course. Students should make arrangements for the independent study course details during registration or well before the semester begins.

Other Credits

Credits for Teaching Assistant (ENVD 3919), Research Assistant (ENVD 4929), Professional Design Internship (ENVD 4939), Exploratory Internship (ENVD 3939) and for Independent Study (ENVD 3909) or Independent Study (ENVD 4909) are all guided by the same standards. Credits earned are subject to a 3 credit-hour limitation

per course, Independent Study is graded while teaching assistantships, research assistantships, and internships are offered on a *pass/fail* basis.

Pass/Fail Credits

A student may elect to take up to 6 credit hours toward the BEnvD degree on a pass/fail basis but these credit hours must fall in the category of general electives and may not include course work taught within the Program in Environmental Design. Courses within the Program in Environmental Design that are only offered as pass/fail are not subject to this policy.

ROTC Credit

Students matriculating in the Program in Environmental Design are eligible to participate in the ROTC programs on the Boulder campus.

Students interested in such programs should contact the professor in charge of the ROTC program of their choice (Army, Navy, Air Force) and also their ENVD academic advisor for information on residence and curriculum requirements for graduation. No more than 8 credit hours of ROTC courses may be applied to the BEnvD degree.

Transfer Credit

Credits transferred from other institutions are limited to the number of credit hours given for similar work in regular offerings at the University of Colorado and must meet the quality level expected at the University of Colorado Boulder. The program faculty, in conjunction with the Advising Center for Excellence (<http://www.colorado.edu/envd/student-services/advising-center-excellence>), may make exceptions to this policy.

The program does not accept vocational/technical course work in design, graphics or construction as meeting specific course requirements of the program; nor does it consider such course work as acceptable in fulfilling the program's elective requirements. Only in exceptional circumstances may a student petition the program to request a transfer of such credits.

A grade of C- or better is required in any course for which credit is granted in transfer from another institution to the university. However, in order for transfer credit to meet specific core degree requirements, a grade of B or better is required in the transferring class. Grades earned in other institutions (excluding other campuses of the University of Colorado system) are not factored in the CU grade point average.

For more information on transfer credit policies, see the Transfer of College-Level Credit (p. 111) section.

Residency Requirement

In order to graduate from the University of Colorado with a Bachelor of Environmental Design a student must complete a minimum of 30 credit hours within the Program in Environmental Design as well as complete their last semester in residence as a full-time student.

Advising

Academic advising for students presently enrolled or anticipating enrollment in the program is provided in a variety of forms. High school students or prospective transfer students from other universities are encouraged to participate in "Be a CU Student for a Day" or other visitation programs co-sponsored by the program and the CU Boulder Office of Admissions. For more information, see the Admission Visit Programs (<http://www.colorado.edu/visit/admissions>) or ENVD Transfers (<http://www.colorado.edu/envd/program-information/prospective-students/transfer-students>).

Students already enrolled in Boulder campus programs who are interested in intrauniversity transfer (IUT) into the Program in Environmental Design should refer to the ENVD IUT (<http://www.colorado.edu/envd/program-information/prospective-students/intra-university-transfer>) process.

Students enrolled in ENVD receive academic advising from professional staff in the Advising Center for Excellence (<http://www.colorado.edu/envd/student-services/advising-center-excellence>) through both appointments and open drop-in office hours.

New Student Welcome

Incoming freshmen and transfer students are invited to attend New Student Welcome programming during the summer prior to the start of the fall semester. Visit the New Student & Family Programs (<http://www.colorado.edu/orientation>) website to learn more.

All students are required to attend an ENVD information session during New Student Welcome Week in August to receive an overview of educational opportunities and the philosophy of the program, and to meet other new students and the faculty of the program. If you are starting your educational career in the spring semester, all students are required to attend an ENVD information session during New Student Welcome Week in January to receive an overview of educational opportunities and the philosophy of the program, and to meet other new students and the faculty of the program.

Retention of Student Work

As a condition of admission, the Program in Environmental Design may retain student work submitted in fulfillment of class requirements. This retained work may be used to provide outside agencies with tangible evidence of performance, to serve as additional visual aid material in presentations to other students, and to contribute to possible educational exhibits and publications requested by the university community and the general public. The program does not claim any copyright and intellectual ownership of the material, but does retain rights to display student work for marketing and promotion, or for academic purposes.

Students are responsible for recording their work for future use in their portfolios. When the program retains students' materials for displays or presentations, the program will ensure that students have the opportunity to reclaim and record their work for portfolio use.

Computing

The Program in Environmental Design requires that all incoming undergraduate students have and use their own computers and software applications in their studies. Suggested computer specifications and standards are posted on the Office of Information Technology (OIT)'s Recommended Software and Hardware List (<http://www.colorado.edu/oit/software-hardware/recommended-software-and-hardware-list>) webpage.

Neither the Boulder campus nor the Program in Environmental Design endorse nor require students to buy a computer from a particular manufacturer. The configurations suggested by OIT establish high performance requirements that can be found in many different computers. Specialized software requirements for different classes in the Program in Environmental Design appear on the syllabi for those classes, and that software is generally available at discounted student rates.

Programs of Study

The Program in Environmental Design at CU Boulder prepares students for graduate study and careers in architecture, landscape architecture, planning, urban design and other design professions. With a diverse faculty committed to excellence in teaching, research, scholarship and creative and professional work, the program provides students with a varied range of learning opportunities.

The Program in Environmental Design encourages students to expand their education opportunities and explore certificates available on campus. Students interested in the certificate options below or minors offered at CU should contact their academic advisor to have a plan set in place prior to their junior year.

To filter through all the minors and certificates offered at CU Boulder, see the undergraduate Programs A-Z (p.) section.

Bachelor's Degree

- Environmental Design - Bachelor of Environmental Design (BEnvd) (p. 758)

Minor

- Environmental Design - Minor (p. 762)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ARCH 4010 (5) Architectural Appreciation and Design

Introduces basic processes and principles of architectural design. Provides a basis for understanding and evaluating architecture.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Architectural Engineering (AREN) majors only.

ENVD 1001 (1) ENVD First-Year Seminar

Transitions first-year ENVD students into college through the process of discovering their path to educational success. Provide opportunities to facilitate learning through peer support groups and curricular integration with the ENVD core classes.

Requisites: Restricted to Environmental Design (ENVD) major or minor students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Social Factors

ENVD 1004 (3) Introduction to Environmental Design Theory

Introduces students to the complexity of forces that interact to shape the designed environment. A lecture sequence and parallel set of design exercises exposes students to the theory and practice of environmental design, and to the important issues that guide the work of architects, landscape architects, urban designers, and urban planners. Open to nonmajors on a space available basis.

Recommended: Corequisites ENVD 1052 and ENVD 2001.

Additional Information: Departmental Category: History and Theory

ENVD 1010 (3) Design Appreciation

Designed for students who are interested in pursuing a degree in design. Provides a foundation for viewing the world through the "eyes" of a designer and gives a broad overview of various design professions including: Architecture, Planning, Landscape Architecture, and Industrial Design through a basic history of design and speculation concerning the future of these professions.

Requisites: Restricted to non-Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: History and Theory

ENVD 1012 (3) Digital Representation Methods for Environmental Design

Guides students through a process of exploration and expression using various digital design and representation techniques common to the disciplines of environmental design. This course seeks to demystify contemporary practices in digital design methods and propels students into this discourse with ongoing experimentation in digital design media. It will expose students to Adobe Creative Suite, AutoCAD and SketchUp.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Methods and Techniques

ENVD 1052 (3) Design and Communication 1

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by emerging digital techniques for the depiction of designed artifacts and environments, allowing students to extend and enhance their understandings of advanced practices for design visualization, representation and communication.

Recommended: Corequisites ENVD 1004 and ENVD 2001.

Additional Information: Departmental Category: Methods and Techniques

ENVD 1102 (3) Design and Communication 2

Using both lectures and drawing exercises, this class extends understandings of the representational conventions used by the design professions through its introduction to the possibilities offered by traditional techniques for the advanced practices for design visualization, representation, and communication.

Requisites: Requires prerequisite course of ENVD 1052 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Recommended: Corequisites ENVD 1104 and ENVD 2003.

Additional Information: Departmental Category: Methods and Techniques

ENVD 1104 (3) Introduction to Environmental Design Methods

Explores the forces and conditions that interact to shape the designed environment. It does so through a lecture sequence and parallel set of design exercises introducing students to the theory and practice of environmental design. It develops student understandings of the central role design thinking plays as the unique process used to effect appropriate change in the designed environment.

Recommended: Corequisites ENVD 1102 and ENVD 2003.

Additional Information: Departmental Category: History and Theory

ENVD 2001 (3) Human Behavior in Design and Planning

Examines reciprocal relationships between people and their built and natural environments, tracing major issues and approaches in design research to understand how people are influenced by the environment and how they can create healthy, just, and livable places.

Recommended: Corequisites ENVD 1004 and ENVD 1052.

Additional Information: Departmental Category: Social Factors

ENVD 2003 (3) Ecology and Design

Introduces basic principles and techniques of ecology as they relate to the design and understanding of the built environment. Includes a study of hazards and the impact of modern technology on the natural and built environments.

Recommended: Corequisites ENVD 1102 and ENVD 1104.

Additional Information: Departmental Category: Physical Factors

ENVD 2120 (6) Environmental Design Studio 1

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion.

The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.

Requisites: Requires prerequisite course of ENVD 1102 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Recommended: Corequisite ENVD 3115.

Additional Information: Departmental Category: Studios

ENVD 2130 (6) Environmental Design Studio 2

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion.

The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of architecture, urban design and landscape design - disciplines that share the responsibility for shaping the designed environment.

Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Recommended: Corequisite ENVD 3003.

Additional Information: Departmental Category: Studios

ENVD 3003 (3) Site Planning

Introduces the site planning process including: site analysis and its relationship to building program and site concept, and preparation of site plans. Emphasis is placed on the planning of the physical site through a thorough understanding of process, land use, site constraints and synthesis of ecological, functional and aesthetic considerations in the site planning process.

Recommended: Corequisite ENVD 2130.

Additional Information: Departmental Category: Physical Factors

ENVD 3009 (1-6) Special Topics in Environmental Design

Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topic class.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites ENVD 1004 and ENVD 1052.

Additional Information: Departmental Category: Miscellaneous

ENVD 3052 (3) Introduction to Computer Methods in Environmental Design

Surveys existing and emerging computer methods used in the environmental design professions, with an introduction to computer programming. Open to nonmajors with instructor consent.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3100 (6) Environmental Design Studio 3

Exposes students to a sequence of design investigations that lead to the development of design concepts for critical evaluation and discussion. The intent of this introductory design studio is to expose students to the fundamental design practices that are common to the disciplines of environmental design, planning, urban design and landscape design - that share the responsibility for shaping the designed environment.

Requisites: Requires prerequisite course of ENVD 2120 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Recommended: Corequisite ENVD 3122.

Additional Information: Departmental Category: Studios

ENVD 3114 (3) History and Theory of Environmental Design at the Small Scale: Buildings

Focusing on buildings, this class surveys the built environment from the beginning of time through the present day. Emphasizing developments in the western world, it develops students' recognition of major styles, influential people, and drivers of building form.

Additional Information: Departmental Category: History and Theory

ENVD 3115 (3) Introduction to Building Materials and Systems

Surveys building methods, materials and assemblies from the designer's perspective.

Recommended: Corequisite ENVD 2120.

Additional Information: Departmental Category: Technology and Practice

ENVD 3122 (3) Research Issues and Methods in Design and Planning

Explores topics of current interest in planning. Looks at the development and social consequences of the neighborhood movement, forms of municipal and regional governments, regional settlement patterns, and new communities. Introduces selected methods from the social sciences used by planners and urban designers.

Recommended: Corequisite ENVD 3100.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3134 (3) History and Theory of Environmental Design and the Medium Scale: Precincts

Focuses on design projects not in a building envelope, including landscapes, public and private urban spaces, complexes and similarly scaled design projects. Aspects of architectural and planning thinking are interwoven in a landscape concentration.

Additional Information: Departmental Category: History and Theory

ENVD 3144 (3) History and Theory of ENVD: Systems

Provides an introduction to the history of urban planning and design practices and processes. Examines the history of city-building using examples drawn from the United States as well as other countries. Emphasis is on developing analytical methods and a critical approach in discussing and evaluating historical and contemporary planning issues, mechanisms and cases.

Additional Information: Departmental Category: History and Theory

ENVD 3152 (3) Introduction to Computer Graphics Applications

Explores principles and uses of computer graphics in design. Topics include creation and modification of complex two- and three-dimensional objects; orthographic and perspective views; use of color; input using mouse and digitizer; output using screen, plotter, matrix printer, and slides; automated aids for form generation and manipulation; and analysis of current and future trends of computer usage for design.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3200 (1-6) Advanced ENVD Studio

Design studio dealing with problems at an intermediate level of complexity: emphasis is on the interaction of form, use, and multiple values and technologies in conjunction with issues and techniques drawn from other content area courses of the curriculum.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Program in Environmental Design major or minor students only.

Recommended: Prerequisite ENVD 2130.

Additional Information: Departmental Category: Studios

ENVD 3212 (3) Color Theory

Illustrates color media techniques for the preparation, composition, and presentation of landscape and built environment drawings.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3252 (3) Computer Graphic Programming

Provides an introductory computer programming course designed to teach the capabilities of a computer in providing graphic representations of environments, including buildings. Open to nonmajors.

Additional Information: Departmental Category: Methods and Techniques

ENVD 3300 (3-6) Special Topics: Intermediate Design Lab

Design lab exploring new and emerging themes in environmental design.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 3909 (1-6) Independent Study

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).

Recommended: Prerequisite 3.

Additional Information: Departmental Category: Miscellaneous

ENVD 3919 (1-6) Teaching Assistant

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Miscellaneous

ENVD 3929 (1) Peer Leadership and Mentorship and Transitioning Students

Designed to explore the student transition to university life and engage students in active leadership and mentoring capacity-building activities. Examines the role peers play in leading students through transitional development. Students will learn the theoretical basis for understanding student transition and develop their mentoring capacities as well as examine personal identity and values and its intersection with leadership and mentorship.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) Program in Environmental Design majors only.

Additional Information: Departmental Category: Miscellaneous

ENVD 3939 (3) Exploratory Internship

Offers professional experiences allowing students to discover a variety of design-related environments such as community engagement, non-profit work or assisting research. In addition to the internship experience, students attend four classroom sessions providing professional development exercises. 00 GPA.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENVD 1102 (minimum grade C-). Restricted to students with 27-180 credits (Sophomore, Junior, or Senior) Program in Environmental Design majors only.

Recommended: Prerequisite 2.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

ENVD 4009 (1-6) Special Topics in Environmental Design

Provides a seminar or design lab on special issues in environmental design, including study abroad. Variable topics.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite ENVD 2120.

Additional Information: Departmental Category: Miscellaneous

ENVD 4023 (3) Environmental Impact Assessment

Provides a field-oriented seminar in current environmental impact controversies. Gives attention to history, theory, and application of impact analysis at state levels for designers, land-use planners, and others involved in resource decision making. By instructor consent, open to nonmajors on a space available basis.

Additional Information: Departmental Category: Physical Factors

ENVD 4035 (3) Solar and Sustainable Design

Introduces aspects of solar technology relevant to the environmental design professions. Includes readings and lectures on the nature of energy limitations, energy needs, and the potential role of solar energy in meeting these needs.

Additional Information: Departmental Category: Technology and Practice

ENVD 4052 (3) Digital Presentation and Portfolio

Introductory course creating interactive web sites. Covers use of Hypertext Markup Language (HTML) and Flash to create linked pages containing text, images animations, menus, and buttons. Covers principles of site navigation, page layout, and graphic design for designers and planners.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4100 (3-6) Advanced Design Lab 1

Design lab exploring new and emerging themes in design.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3300 (minimum grade C-).

Additional Information: Departmental Category: Studios

ENVD 4112 (3) Architectural Graphics 1

Illustrates techniques of graphics communication and presentation for architectural design. Includes advanced delineation and use of color.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4122 (3) Digital Photo for Designers

Explores digital photographic workflow from capture to exhibition.

Students gain the ability to document their projects and utilize photography as a means of creative expression. Topics include: using DSLRs, Adobe Lightroom, retouching with Adobe Photoshop, time-lapse photography, Adobe Premier, professional printing, landscape and architectural photography, sharing work through blogs and social media, and submitting work for publication and exhibition.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4152 (3) Computer Graphic Applications

Introduces the mechanics of entering 2-D images and 3-D objects into the computer. Once entered, graphics are interactively rotated in space, walked through, and displayed in perspective from any position. Also covers the mechanics of other computer programs allowing additional manipulation of images and objects.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4212 (3) Architectural Graphics 2

Covers development of an architectural set of construction documents combined with job administration, field observation, and guest speakers from related construction and architectural disciplines.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4300 (3-6) Advanced Design Lab 2

Design lab exploring new and emerging themes in design.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 4100 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 4311 (3) Housing Policies and Practices

A seminar providing students with a descriptive knowledge and analytical understanding of the use and development of residential settings in different political economies, globally divided into advanced capitalist nations, collectivist economies, and the third world.

Additional Information: Departmental Category: Social Factors

ENVD 4322 (1-6) Special Topics: Graphics

Provides an advanced seminar on special issues in design communications. May be repeated for credit by petition.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4340 (4-6) Landscape Design Studio

Studio in landscape design.

Requisites: Requires prerequisite course of ENVD 3300 (minimum grade C-). Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 4352 (1-6) Special Topics: Computer Methods

Topics include animation and environmental simulation, computational methods of technical evaluation and optimization, and computational mapping and analysis. May be repeated for credit by petition.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Methods and Techniques

ENVD 4361 (1-6) Special Topics: Social Factors in Design

Addresses variable topics in the relationship of human experience and behavior to the built environment, e.g., social research methods in environmental design.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Social Factors

ENVD 4363 (1-6) Special Topics: Physical Factors in Environmental Design

Includes such topics as appropriate technology, public policy and natural hazards, organization of the designing and building process, and physical elements of urban development.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Physical Factors

ENVD 4364 (1-6) Special Topics: History and Historiography of Environmental Design

Provides an advanced seminar on history and historiography of environmental design, e.g., American dwellings. May be repeated for credit by petition.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: History and Theory

ENVD 4365 (1-6) Special Topics: Technology and Practice

Provides an advanced seminar on new technologies and issues of professional practice in the environmental design professions.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Technology and Practice

ENVD 4420 (3) Senior Capstone Seminar

Advanced seminar focuses on theoretical concerns and practical issues inherent in environmental design and planning. Views concerns and issues in terms of setting, processes, and planning and design outcomes. Provides a critical synthesis of the inherently interdisciplinary nature of planning and design education.

Requisites: Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: Studios

ENVD 4440 (6) Landscape Design Studio 2

A preprofessional studio in landscape architecture.

Requisites: Requires prerequisite course of ENVD 4340 (minimum grade C-).

Additional Information: Departmental Category: Studios

ENVD 4764 (1-6) Special Topics: Theory and Criticism in Environmental Design

Provides an advanced seminar on theory and criticism in environmental design, e.g., architecture now and introduction to design theory and criticism. May be repeated for credit by petition.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: History and Theory

ENVD 4794 (3) History of Urban Design and Planning

Examines history of European and American planning and urban design in the late 19th and 20th centuries.

Requisites: Restricted to Program in Environmental Design major or minor students only.

Additional Information: Departmental Category: History and Theory

ENVD 4909 (1-6) Independent Study

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).

Recommended: Prerequisite 3.

Additional Information: Departmental Category: Miscellaneous

ENVD 4919 (1-6) Teaching Assistant

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).

Recommended: Prerequisite 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Miscellaneous

ENVD 4929 (1-6) Research Assistant

By special arrangement with instructor. 00 GPA.

Repeatable: Repeatable for up to 99.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-).

Recommended: Prerequisite 3.

Additional Information: Departmental Category: Miscellaneous

ENVD 4939 (3) Professional Design Internship

Allows students to develop design and professional skills outside of the curriculum while working for an architecture, landscape architecture or planning firm. In addition to the internship experience, students attend four classroom sessions providing professional development exercises. 00 GPA.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ENVD 3100 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Program in Environmental Design majors only.

Recommended: Prerequisite 3.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

ENVD 4972 (3) Honors Research Methods and Thesis Preparation

To prepare students for undertaking an independent research or design project in Environmental Design, this asks students to engage with existing literature in the field. Students will understand how research and design projects are conducted, and how their own work fits within a long tradition of scholarship. Department consent required.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Miscellaneous

ENVD 4979 (3) Honors Thesis

Working with an advisor, students prepare, complete, and defend an honors thesis project, either written or creative.

Requisites: Restricted to students with 57-86 credits (Junior).

Additional Information: Departmental Category: Miscellaneous

Environmental Design - Bachelor of Environmental Design (BEnvD)

Program Overview

Structure of the Undergraduate Curriculum

The Bachelor of Environmental Design curriculum is comprised of a shared core (lasting five semesters) followed by three semesters of course work focused on one of four specializations: architecture, landscape architecture, planning or design studies.

The shared core is innovative because it provides an intensive and balanced introduction to the traditional professions contained within the broad field of environmental design. The core provides students the information and flexibility to hone their career direction and specialization area. It allows opportunities for hands-on problem solving that features design studios as the primary teaching pedagogy. Anchored through a combination of lecture courses and studio instruction, the core curriculum builds upon studios where students solve design problems at three important scales of the built-environment: buildings, landscapes, and urban systems.

Prospective students often choose to enroll at CU in ENVD because they can advantageously leverage their first five semesters to help determine which specialization matches their strengths and aspirations. Others are attracted to ENVD because they can declare a specialization at the outset of their studies. Even more will choose ENVD because there is the opportunity to change their mind towards the end of the core and pursue a specialization to reflect their changing interests without a loss of credit or time towards graduation.

The specialization—upper division coursework in the final three semesters—allows students to pursue in-depth projects and gain more specialized skills necessary for pre-professional work or further study. The semester prior to the senior year (a.k.a., PRAXIS) offers options and opportunities for students to experiment and explore personal interests. Alternatively, students can pursue approved international study abroad options as part of the curriculum as well. The final year culminates into the specific requirements for the chosen specialization.

Educational Advantages of the BEnvD

The Program in Environmental Design provides a balanced introduction to environmental design. Despite the many design programs across the country, most focus on providing a generalized experience too broad to provide an in-depth exposure to the fundamentals of each discipline. ENVD's emphasis on both the breadth and depth of design allows students to gain the appreciation, information, skills, and experiences needed to make an informed decision about their career direction.

For the past 50 years, ENVD's innovative teaching style of studio instruction in small class sizes is reflected in the changes revolutionizing teaching across many universities and disciplines. From a student's first semester, they learn to work both in small groups and individually to solve design problems. Unlike most majors across the university, by the end of a student's first year, the small classes and unique teaching relationships will build relationships with several faculty and a cohort of their peers.

ENVD's curriculum stresses both critical thinking and applied project work. PRAXIS projects are not simply a capstone experience but are curricular experiences embedded into all levels of the curriculum.

Student satisfaction within higher education has been directly linked to teaching that incorporates projects where small student groups work together to solve problems that they know are important. By having real clients in the classroom and knowing that their work may influence design decisions, it shows students that learning and living are inextricably tied together.

The pedagogy of the program celebrates an interdisciplinary culture for both students and faculty. Mirroring emerging workplace trends in industry, students work within teams. Sometimes students work within multi-disciplinary teams where each profession shares its expertise and coordinates with others and sometimes within inter-disciplinary teams where the separate expertise is not as important as the ability to mutually and collaboratively define and solve a problem. Increasingly, in environmental design, at the end of each project the list of participants is as long as the endless list of credits we watch at the end of a motion picture.

Study Abroad

The Program in Environmental Design has, along with the Office of International Education, developed an exciting selection of study-abroad options. Study abroad gives students an array of unique experiences, and it can make students more competitive for graduate study and for employment. Summer programs and faculty-led programs are available to students after their first year of study. Full-semester programs are available to students starting in their third year. The study abroad program provides an academically challenging experience with extensive local support.

Environmental design programs in architecture, urban design or urban planning are offered in Sydney, London, Rome, Denmark and Barcelona. In addition, the Office of International Education offers more than 25 programs which offer courses appropriate to design. These courses offer students an opportunity to study the process of design in another culture and to examine their own perceptions and attitudes toward design. Programs outside of the preapproved listing may be considered for approval. Please meet with an ENVD academic advisor for details.

For more information about the study abroad programs, contact:

Office of International Education (<http://abroad.colorado.edu>)
University of Colorado Boulder

Boulder, CO 80309-0123
Phone: 303-492-6016

Dual Degree Program

BEnvD and a Degree in an Outside Major

In addition to the BEnvD degree, students may pursue a dual degree at CU Boulder. Past students have received the BEnvD degree concurrently with undergraduate degrees in business, engineering and various programs offered by the College of Arts and Sciences. Typically, specific course requirements do not change in either program of a double degree; and additional credit hours (varying by college) may be required.

All undergraduate students must complete the general education requirements and the requirements for their specific emphasis within the Program in Environmental Design in addition to the other requirements. Students considering a dual degree program are encouraged to speak with advisors in both units to determine requirements and procedures for application.

Requirements

General Requirements

Students must complete a minimum of 120 credit hours subject to the maximum outlined in this catalog, meet all specified university general education requirements, all major core requirements and maintain a GPA of 2.00 or better.

The curriculum for the Bachelor of Environmental Design (BEnvD) is subdivided into two parts:

1. The first part consists of a core lasting two-and-a-half years which provides a balanced introduction to each of the specializations offered. By the end of the core studies students select or confirm their intended specialization.
2. The second part is one-and-a-half years where students study their selected specialization. Studies lead to the degree Bachelor of Environmental Design (BEnvD) with a specialization in either Architecture, Landscape Architecture, Planning or Design Studies. The course of study for each specialization begins with a transition semester with options and opportunities for students to experiment and explore personal interests. Students select between foreign study and travel, certificate programs, design-build studios, and community services projects for real clients called PRAXIS studios. Each specialization has specific requirements for completing the major.

ENVD Core Studies

BEnvD students must complete one course from each of the following general education requirements areas with a grade of C- or better to fulfill university general education requirements.

Required Courses and Semester Credit Hours

Writing

One class from the following:	3
WRTG 1150 First-Year Writing and Rhetoric	
ENVS 1150 First-Year Writing in Energy, Environment and Sustainability	
ARSC 1150 Writing in Arts and Sciences	

Humanities

One class from one of these arts and sciences core areas:	3-4
Human diversity	
Literature and the arts	
Ideals and values	

Social Science

One class from one of these arts and sciences core areas:	3-4
Historical context	
United States context	
Contemporary societies	

Math

Select one class specific for the appropriate specialization:	4-5
<i>Architecture</i>	
MATH 1150 Precalculus Mathematics	
MATH 1300 Calculus 1	
<i>Planning</i>	
MATH 2510 Introduction to Statistics	
<i>Landscape Architecture and Design Studies</i>	
MATH 1150 Precalculus Mathematics	

MATH 1300	Calculus 1	
MATH 2510	Introduction to Statistics	
SOCY 2061	Introduction to Social Statistics	
Natural Science		
Select one class specific for the appropriate specialization:		4-5
<i>Architecture</i>		
PHYS 2010	General Physics 1	
<i>Planning, Landscape Architecture or Design Studies</i>		
CHEM 1011	Environmental Chemistry 1	
EBIO 1030 & EBIO 1050	Biology: A Human Approach 1 and Biology: A Human Approach Laboratory	
EBIO 1210 & EBIO 1230	General Biology 1 and General Biology Laboratory 1	
PHYS 2010	General Physics 1	
Total Credit Hours		17-21

Sample Four-Year Plan of Study

The first two-and-a-half years of BEnvD is a core program which is prerequisite for each of the specializations: architecture, landscape architecture, planning and design studies. There are corequisite ENVD core courses each semester, and the core courses are sequential from semester to semester.

Course	Title	Credit Hours
First Year		
Fall Semester		
ENVD 1004	Introduction to Environmental Design Theory	3
ENVD 1052	Design and Communication 1	3
ENVD 2001	Human Behavior in Design and Planning	3
Writing requirement		3
Humanities (see list of options above)		3
		Credit Hours 15
Spring Semester		
ENVD 1102	Design and Communication 2	3
ENVD 1104	Introduction to Environment Design Methods	3
ENVD 2003	Ecology and Design	3
Math requirement (see list of options above) ¹		3-5
Social science (see list of options above)		3
		Credit Hours 15-17
Second Year		
Fall Semester		
ENVD 2120	Environmental Design Studio 1	6

ENVD 3114	History and Theory of Environment Design at the Small Scale: Buildings	3
ENVD 3115	Introduction to Building Materials and Systems	3
Natural science requirement (see list of options above) ²		4-5
		Credit Hours 16-17
Spring Semester		
ENVD 2130	Environment Design Studio 2	6
ENVD 3003	Site Planning	3
ENVD 3134	History and Theory of Environment Design and the Medium Scale: Precincts	3
Non-ENVD elective		3
		Credit Hours 15
Third Year		
Fall Semester		
ENVD 3100	Environmental Design Studio 3	6
ENVD 3122	Research Issues and Methods in Design and Planning	3
ENVD 3144	History and Theory of ENVD: Systems	3
Non-ENVD elective		3
		Credit Hours 15
		Total Credit Hours 76-79

¹ Students intending to select in the architecture specialization are strongly encouraged to take a precalculus math class prior to their senior year.

² Students intending to select in the architecture specialization are strongly encouraged to take a physics class prior to their senior year.

Areas of Specialization

Architecture Specialization

Students develop design solutions for buildings and sites that are environmentally responsible, sustainable and ethical using conventional and experimental construction methods including design-build and digital fabrication that are aesthetically pleasing, functional and culturally relevant.

Course	Title	Credit Hours
Third Year		
Spring Semester		
ENVD 3300	Special Topics: Intermediate Design Lab	6
ENVD 3300	Special Topics: Intermediate Design Lab	3
ENVD elective		3
Non-ENVD elective		3
		Credit Hours 15
Fourth Year		
Fall Semester		
ENVD 4100	Advanced Design Lab 1	6
AREN 3050	Environmental Systems for Buildings 1 (or ENVD elective)	3
AREN 4035	Architectura Structures 1 (or ENVD elective)	3
Elective		3
		Credit Hours 15
Spring Semester		
ENVD 4300	Advanced Design Lab 2	6
AREN 3060	Environment Systems for Buildings 2 (or ENVD elective)	3
AREN 4045	Architectural Structures 2 (or ENVD elective)	3
Elective		3
		Credit Hours 15
		Total Credit Hours 45

Planning Specialization

Students focus on problems of sustainability in urban environments and the integration of urban design with other planning practices to address sustainability issues.

Course	Title	Credit Hours
Third Year		
Spring Semester		
ENVD 3300	Special Topics: Intermediate Design Lab (or Practicum or study abroad)	6
ENVD 3300	Special Topics: Intermediate Design Lab (approved certificate courses, study abroad or design studies)	3
ENVD or open electives		3
Non-ENVD elective		3
	Credit Hours	15
Fourth Year		
Fall Semester		
ENVD 4100	Advanced Design Lab 1 (Advanced Planning Seminar)	3
ENVD 3152	Introduction to Computer Graphics Applications (Geographical Information Systems-GIS)	3
ENVD 4023	Environment Impact Assessment	3
ENVD 4363	Special Topics: Physical Factors in Environmental Design (Transportation and Livable Communities)	3
Non-ENVD elective		3
	Credit Hours	15
Spring Semester		
ENVD 4420	Senior Capstone Seminar	3
ENVD 4311	Housing Policies and Practices	3
ENVD 4794	History of Urban Design and Planning	3

ENVD elective	3
Non-ENVD elective	3
Credit Hours	15
Total Credit Hours	45

Landscape Specialization

Students develop design solutions in all scales of sites from gardens, to neighborhoods, to district, to parks, to campuses, to watershed and regions that work in concert with natural systems and reflect both the art and science of design.

Course	Title	Credit Hours
Third Year		
Spring Semester		
ENVD 3300	Special Topics: Intermediate Design Lab (or Practicum or study abroad)	6
ENVD 3300	Special Topics: Intermediate Design Lab (approved certificate courses, study abroad or design studies)	3
ENVD or open elective		3
Non-ENVD elective		3
	Credit Hours	15
Fourth Year		
Fall Semester		
ENVD 4340	Landscape Design Studio	6
ENVD 4100	Advanced Design Lab 1 (Advanced Landscape Seminars)	6
ENVD or open elective		3
	Credit Hours	15
Spring Semester		
ENVD 4440	Landscape Design Studio 2	6
ENVD 4300	Advanced Design Lab 2 (Advanced Landscape Seminars)	6

ENVD or open elective	3
Credit Hours	15
Total Credit Hours	45

Design Studies Specialization

The design studies sequence provides students the opportunity to build interdisciplinary, flexible and specialized courses of study. Students must submit a program of study for approval by both a faculty advisor and an academic advisor prior to beginning the specialization.

Course	Title	Credit Hours
Third Year		
Spring Semester		
ENVD 3300	Special Topics: Intermediate Design Lab (or Practicum or study abroad)	6
ENVD 3300	Special Topics: Intermediate Design Lab (approved certificate courses, study abroad or design studies)	3
ENVD or open electives		3
Non-ENVD elective		3
Credit Hours		15
Fourth Year		
Fall Semester		
ENVD 4100	Advanced Design Lab 1 (Design Thinking)	3
ENVD electives		9
ENVD or open electives		3
Credit Hours		15
Spring Semester		
ENVD 4420	Senior Capstone Seminar	3
ENVD electives		9
ENVD or open elective		3
Credit Hours		15
Total Credit Hours		45

Environmental Design - Minor

The Program in Environmental Design offers a minor in environmental design for students who are not enrolled in ENVD. A minor in environmental design provides an approach to identifying and solving complex problems within the context of the built environment. It provides a foundation in theory, history and methodology employed in fields such

as architecture, planning, landscape architecture and related design disciplines.

The environmental design minor has three possible tracks: design, history and theory, and planning. These three tracks reflect the breadth of topics and methods covered in the environmental design curriculum and meet a variety of interests of students seeking the minor.

Requirements for a Minor in Environmental Design Design Track

The design track develops basic skills and knowledge about designing in the built environment. It provides design experience that enables students to better work with professional architects and planners or to go to graduate school in the professional design fields.

Required

ENVD 1052	Design and Communication 1	3
ENVD 1102	Design and Communication 2	3
ENVD 2120	Environmental Design Studio 1	6

History and Theory Courses

Select two from the following list:

ENVD 3114	History and Theory of Environmental Design at the Small Scale: Buildings	
ENVD 3134	History and Theory of Environmental Design and the Medium Scale: Precincts	
ENVD 3144	History and Theory of ENVD: Systems	

Studio Class Option

Select one from the following list:

ENVD 2130	Environmental Design Studio 2 (Landscape Design)	
ENVD 3100	Environmental Design Studio 3 (Urban Design)	
ARCH 4010	Architectural Appreciation and Design (AREN only)	

Total Credit Hours 24

Environmental Design History and Theory Track

The theory track develops basic skills in design and an understanding of theories of design through history and in contemporary society. It provides a foundation for students interested in a broad range of fields, including computational design, urban and community development, resource management and technology.

Required

ENVD 1004	Introduction to Environmental Design Theory	3
ENVD 1052	Design and Communication 1	3
ENVD 1102	Design and Communication 2	3

History and Theory Classes

Select two from the following list:

ENVD 3114	History and Theory of Environmental Design at the Small Scale: Buildings	
ENVD 3134	History and Theory of Environmental Design and the Medium Scale: Precincts	
ENVD 3144	History and Theory of ENVD: Systems	

History theory elective: Select one from the following list: 3

ENVD 4364	Special Topics: History and Historiography of Environmental Design	
-----------	--	--

or ENVD 4764 Special Topics: Theory and Criticism in Environmental Design

Total Credit Hours 18

Planning Track

The planning track develops basic skills and knowledge about urban and environmental planning. Students gain an understanding of land use, fundamentals of successful communities and the sustainable interaction of systems. This track enables students to work with professional planners and better understand planning as it applies to their own major field. It also prepares students for graduate study in planning.

Required

ENVD 3144	History and Theory of ENVD: Systems	3
ENVD 3300	Special Topics: Intermediate Design Lab (praxis or 4000-level planning studio)	6
Select three from the following list:		9
ENVD 3300	Special Topics: Intermediate Design Lab (required if taking praxis)	
ENVD 3152	Introduction to Computer Graphics Applications ((Geographical Information Systems-GIS))	
ENVD 4023	Environmental Impact Assessment	
ENVD 4311	Housing Policies and Practices	
ENVD 4361	Special Topics: Social Factors in Design	
ENVD 4363	Special Topics: Physical Factors in Environmental Design	
ENVD 4794	History of Urban Design and Planning	

Total Credit Hours 18

Media, Communication and Information

The College of Media, Communication and Information (CMCI) prepares students for careers as engaged and effective citizens endowed with deep understanding of the historical and contemporary context of human communication and expression. Mindful of the active role communication plays in shaping human relationships, CMCI trains graduates to study and practice constructive interaction among people, communities, industries and publics. The college equips students with the skills needed to produce, gather, archive, curate, analyze and evaluate the flood of information, messages, images, sounds and ideas that populate our complex and rapidly evolving global media landscape.

To these ends, CMCI resourcefully combines disciplines newly extended and empowered by digital media and the social and cultural transformations those media engender. These include established scholarly, creative and professional fields such as media studies, communication, the history and interpretation of film and television, journalism, advertising and video production in its cinematic, documentary and broadcast forms. But the college also houses both the fast-growing field of information science—a discipline that, through inquiry and innovation, tackles the problems and opportunities facing an increasingly networked society—and the emergent disciplines of intermedia art, design, music, writing and performance.

In giving these activities a collaborative home, CMCI facilitates innovative interactions among them. Its academic structure accordingly stimulates cross-disciplinary cooperation at all levels of curriculum, research and creative work. Further, CMCI promotes the transformational exchanges

it nurtures within its own walls for campus-wide benefit. Its organization thus fosters outreach to—and student and faculty participation from—other schools, colleges, centers and facilities throughout CU Boulder and the wider Colorado community.

CMCI's collaborative character is even more visible at the graduate level and in terms of its faculty's scholarly and creative work. Examples include the doctoral program in information science (p. 1296), the master's in interdisciplinary documentary media practices (p. 1291), the doctoral program in intermedia art, writing and performance (p. 1298) and the doctoral program in media research and practice (p. 1303), which offers three PhD tracks, each lodged in a different yet related department. CMCI's signature spirit of collaboration is further reflected in the various centers the college contains:

- the Center for Environmental Journalism (CEJ)
- the Center for Media, Religion and Culture (CMRC)
- the Center for the Study of Conflict, Collaboration and Creative Governance (3CG)

It is also reflected in the close relations the new college hopes to entertain with centers elsewhere on campus—for example, with the Center for Humanities and the Arts (CHA); the Center for Media, Arts and Performance (CMAP); and the Stan Brakhage Center.

Statement of Core Skills, Competencies and Scholarly and Creative Initiatives

CMCI attracts students, faculty and industry and creative professionals from across the closely related fields of media, communication and information. All of those either rostered in or affiliated with the new college accordingly share a set of skills, competencies and scholarly and creative interests that form a common core. This core is expressed at all levels of the college, from undergraduate curriculum and graduate training to the research and creative work of its faculty and both internal and external affiliates.

The Undergraduate Experience
