Norlin Charge to the Graduates

The first commencement at the University of Colorado was held for six graduates on June 8, 1882, in the chapel of Old Main. It was not until 40 years later, on September 4, 1922, that the first summer commencement was held. Since the first commencement in 1882, the University of Colorado Boulder has awarded 350,000 degrees. The traditional Norlin Charge to the graduates was first read by President George Norlin to the June 1935 graduating class.

You are now certified to the world at large as alumni of the university. She is your kindly mother and you her cherished sons and daughters.

This exercise denotes not your severance from her, but your union with her. Commencement does not mean, as many wrongly think, the breaking of ties and the beginning of life apart. Rather it marks your initiation in the fullest sense into the fellowship of the university, as bearers of her torch, as centers of her influence, as promoters of her spirit.

The university is not the campus, not the buildings on campus, not the faculties, not the students of any one time—not one of these or all of them. The university consists of all who come into and go forth from her halls, who are touched by her influence, and who carry on her spirit. Wherever you go, the university goes with you. Wherever you are at work, there is the university at work.

What the university purposes to be, what it must always strive to be, is represented on its seal, which is stamped on your diplomas—a lamp in the hands of youth. If its light shine not in you and from you, how great is its darkness! But if it shine in you today, and in the thousands before you, who can measure its power?

With hope and faith, I welcome you into the fellowship. I bid you farewell only in the sense that I pray you may fare well. You go forth, but not from us. We remain, but not severed from you. God go with you and be with you and us.

The Regents of the University of Colorado

Dear Graduate:

One of the greatest honors for the University of Colorado Board of Regents, the institution’s governing board, is to be part of a graduation ceremony. Your success is a success for us all. Your degree is a measure not only of an accomplishment of dedication and talent, but also notice to the world that you have the intellectual gifts and discipline to contribute greatly to any endeavor you pursue.

This commencement ceremony, like every University of Colorado graduation since 1935, will close with the reading of the *Norlin Charge*. As originally expressed by CU President George Norlin in 1935, graduation marks your initiation in the fullest sense of the fellowship of the university, as bearers of her torch, as centers of her influence, as promoters of her spirit. Welcome to the ranks of CU’s alumni family of more than 350,000 graduates since 1882. Congratulations on achieving this milestone. Well done and well earned!

Dear University of Colorado Graduate,

Congratulations on earning your degree from the University of Colorado Boulder.

This is a momentous time in your life and the lives of those who have supported you. We take great pride in what you have accomplished at CU Boulder and are grateful you are part of our university family.

When you walk away from this exciting day, our hope is that you will do so with a passion to pursue your dreams. Never forget how the university shaped you and prepared you to face life's challenges, just as you helped shape your university. Expect nothing but the best from yourself and those who surround you.

The University of Colorado community is proud of you and your accomplishments. As you leave here to start careers, draw on your academic achievements at CU Boulder to help you succeed and inspire others.

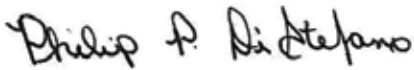

Welcome to the generations of alumni around the globe who carry that CU pride within them. Our collective legacy has been to leave a positive and meaningful mark on Colorado and the world.

Today is your day to shine and share your accomplishments with your family and friends. We wish you success, prosperity, happiness and good health in all your endeavors.

Sincerely,

Academic Dress

In 1896, colleges and universities in the United States adopted a uniform code governing academic dress. Those who are receiving a master's or doctoral degree from the University of Colorado wear hoods lined with the university colors, silver and gold. The velvet border of the hood indicates the degree and usually follows the same code as the color of the tassels.

The Oxford cap, usually referred to as a mortarboard, has a long tassel that is fastened by a button on the top. Candidates for baccalaureate degrees wear the tassel pendant over the right front of the cap before the degree is conferred, and over the left thereafter. The color of the tassel on the bachelor's cap indicates the field of study, with the exception of the BA degree, whose candidates wear white tassels indicating the arts.

The Presidential Chain of Office and the University Mace

The Presidential Chain of Office and the University Mace were created by Mary Sartor, MFA, University of Colorado Boulder. Both were gifts to the university by Mr. and Mrs. David G. Hawthorn, Class of 1924.

Colorado gold and silver are used in both pieces to symbolize the importance of these minerals to the history of the state. The chain's gemstones also consist entirely of minerals from Colorado.

The chain, created in 1980 for the inauguration of President Arnold R. Weber, holds three suspended pendants. The back pendant is the seal of the state of Colorado surrounded by a golden ribbon representing the golden circle of knowledge. The top pendant in the front is the seal of the University of Colorado surmounted by an arch set with diamonds and topaz, signifying the necessary link between the search for knowledge and its practical application to the world beyond the university. The laurel wreaths that decorate the bottom of the seal symbolize honor and success. At the center of the bottom pendant is a gold topaz indicating the quest for knowledge. The surrounding ring is inset with fragmented cubes and diamonds.

The University of Colorado Mace was created for the commencement ceremonies of May 1984. The foot of the scepter is encased in sterling silver bound in 14-karat gold, ending in an intaglio of the seal of Colorado. The shaft of the mace was carved from a black walnut tree thought to have been one of the saplings given to the settlers of the Colorado Territory by President Abraham Lincoln.

Sterling silver is also used in the crown, and the university seal is bound in gold and supported by an inner rod of gold surrounded by eight arching tapered silver ribs. At the base, the motto of the university, translated as Let your light shine, encircles the crown in Greek characters. The wooden staff is bound at intervals in gold and silver rings.

In its history, the University of Colorado has used three different seals. The current seal, adopted in 1908, depicts a male Greek classical figure sitting in front of a pillar and holding a scroll. Next to the figure, laurel branches frame a burning torch. The inscription in Greek reads Let Your Light Shine. The seal's designer, Henry Read of Denver, chose the classical motif because Greek civilization stands as the criterion of culture. The laurel symbolizes honor or success; the youth suggests the morning of life; and the scroll represents writ-ten language.

From 1893 to 1908, the university seal was a copy of Wyon's medallion, Science Trims the Lamp of Life. In this version, a Greek woman knelt before a lamp, and stalks of mariposa lilies decorated the border. Before 1893, an adaptation of the Colorado state seal was used, but it was never adopted by the Board of Regents.

The seal is used primarily on official documents, such as diplomas and transcripts that have been issued on behalf of the university. The Board of Regents uses the seal on its official documents and publications. The seal also appears on the President's Chain of Office, the University Mace, regent regalia and various formal publications.

Ronald L.S. Weaver

When scientists around the world need data on changing sea ice, snow-melt and ice loss, they come to the National Snow and Ice Data Center, part of the Cooperative Institute for Research in Environmental Sciences (CIRES) at the University of Colorado. Collecting and managing all that satellite data is a monumental task that requires an expert in acquisition, validation, storage and distribution. That expert is Ronald Weaver, principal investigator and manager of the Snow and Ice Distributed Active Archive Center (DAAC) for 24 years.

As a student conducting glacier research in Arctic Canada in the late 1960s and early 1970s, Weaver developed a keen understanding of what scientists need from their data and how to get it. After earning bachelor's and master's degrees from CU Boulder, Weaver served two years in the Peace Corps in Haiti and worked in the Dominican Republic. He was recruited in 1980 to become scientific manager of the World Data Center for Glaciology. Digital data and archives were in their infancy, and Weaver started out with just a few datasets and film reels. Soon, the flow of information increased exponentially, growing from an ice cube into an ice cap. Weaver began a long and exemplary record of continuous data management, keeping up with the latest technology until, in 1990, NASA awarded NSIDC a major five-year contract to operate the DAAC, one of only 13 in the country.

In his 37 years at CU Boulder, Weaver has helped the NSIDC grow to include about 100 scientists, data management experts, communications specialists, software developers and undergraduate and graduate students. While Weaver was principal investigator, the DAAC brought in more than \$140 million in funding and has an annual cash flow of more than \$13 million. Federal budget cuts in 1994 almost closed the DAAC, but Weaver sprang into action, organizing a massive letter-writing campaign that persuaded NASA to restore funding. It's not a stretch to say the archive might not exist today without the efforts of Ronald Weaver.

Highly respected by his peers for his skill with data and impressive research credentials in polar science, Weaver has also earned a reputation as a kind and generous mentor to his colleagues and students. Supporting and encouraging budding researchers, Weaver has worked with students to build a low-cost CubeSat to monitor polar ice conditions. Throughout his career he has committed the entire staff to the highest standards in the service of science.

The NSIDC has earned an excellent reputation nationally and internationally for cryospheric research and data management. That is largely due to Weaver's outstanding service to the DAAC. Among his many achievements are construction of an award-winning green data center that uses 90 percent less energy for cooling, and even in retirement, he continues to apply his skills to energy conservation at CIRES.

The Board of Regents is pleased to award the University Medal to Ronald L.S. Weaver in recognition of his lasting contributions to climate research and data management at CU Boulder's Snow and Ice Distributed Active Archive Center.

John J. Sie and Anna Maglione Sie

Honorary Degrees

From humble beginnings as immigrants to the United States, John and Anna Sie have become a force for good in the worlds of health care, the arts and film education. And while it is unusual to confer honorary degrees on a couple, the Sies are inseparable partners in generosity.

John Sie arrived from China at age 14. By 22, he had earned a bachelor's and master's in engineering. He moved quickly from RCA, to co-founding Micro State Electronics, to becoming senior vice president of cable television at Jerrold Electronics in 1972. Five years later he became senior vice president of sales and marketing at Showtime. He is founder and former chairman of Starz Entertainment Group, now owned by Liberty Media and parent of 13 premium movie networks. Many people consider Sie the father of digital TV—he submitted the first white paper on digital compression to Congress and the FCC in 1989.

Anna Sie came from Italy at age 10 with her father and two siblings in the 1950s. Her mother couldn't join them for three years, leaving Anna to help raise the children. That experience sparked a lifelong interest in the well-being of all children. For the past 30 years, John and Anna Sie have distinguished themselves as respected leaders and philanthropists, with a special focus on children with Down syndrome, promising young artists, technology, education and research.

In 2005, they founded the Anna and John J. Sie Foundation, dedicated to improving lives in Colorado and around the world. Among the many recipients of their generosity are CU's BioFrontiers Institute, CU College of Music, Children's Hospital of Colorado, the University of Denver, Denver School of Science and Technology, and the Denver Art Museum. Since the birth of their granddaughter Sophie, the Sie Foundation has been devoted to research and medical care of people with Down syndrome. In 2008 and 2009, the foundation became the founding donor of the Linda Crnic Institute for Down Syndrome and the Global Down Syndrome Foundation, with the goal of eradicating the medical and cognitive effects associated with the condition. The Crnic Institute draws on research conducted at CU Boulder and the Anschutz Medical Campus, from undergraduates to post-doctoral investigators.

The Board of Regents is pleased to award the honorary degree Doctor of Humane Letters, *honoris causa*, to John J. Sie and Anna Maglione Sie in recognition of their generosity and dedication to scientific research, technology and the arts.

Since 1990, graduating seniors at CU Boulder have been creating a permanent impact through the Senior Class Gift Program. It is an honor to recognize those who are wearing a blue contribution cord today. They have personally donated to the Seniors Creating Future Buffs Scholarship. The Senior Class has come together this year to make a lasting difference at the university by providing prospective students with the chance to attend CU. This scholarship provides graduating seniors with the opportunity to give back to the heart of the university, its students. The scholarship will forever ensure the quality of the university that we are so lucky to call our alma mater. Thank you and congratulations to the Class of 2017!

The CU Parents Association created the CU Proud Award to honor students who, by an act of courage, compassion, character, service, integrity and/or initiative, set the standard for their peers and make us proud to call them one of our own. Students earning this honor are wearing a silver cord.

Daniels Scholars are well-rounded leaders committed to working hard to earn a bachelor's degree. They embrace the chance to learn, adhere to high ethical standards, and enjoy giving back to their communities and families. CU Boulder Daniels Scholars have created a strong community for supporting one another throughout their journey. This graduation cord acknowledges all of the challenges each scholar has overcome and celebrates all of their successes. It is an honor to wear this teal and white cord that pays tribute to a man, Bill Daniels, who has made their dream of achieving a college degree a reality.

CU Boulder is proud to recognize those students graduating today who have served in our country's armed forces (veterans) as well as those who will serve upon graduation (ROTC commissionees). These students can be identified by the red, white and blue cords they are wearing with their graduation regalia.

The idea of Forever Buffs, and a continuing lifelong relationship with the University of Colorado, is particularly special for graduates of CU Legacy families. The CU Boulder Alumni Association proudly presents a black and gold cord in recognition of the tradition and generational bonds to CU represented by these graduates and their families.

The royal purple cords are given to the American Institute of Chemical Engineers (AIChE) leadership team. AIChE is the world's leading organization of chemical engineers, which consists of student members and industry professionals. These cords signify the honor and pride associated with leading the AIChE membership at CU.

The brown cords are worn by undergraduates who have earned their Real Estate Certificate and students who have finished their real estate emphasis in the MBA program. As these future leaders spring into their real estate careers, the brown cords will remind them of the richness of the earth and the legacy they will create in their communities. Congratulations to the Class of 2017!

The Smead program, established in 2006 in memory of Dr. Harold "Joe" Smead, recruits two of the most talented aerospace engineering graduate students nationally each year. Smead Scholars are chosen for their outstanding scholarly achievements, character, commitment to others and potential for leadership. To be selected as a Smead Scholar is a singular and distinguished honor in an individual's academic career—and the Smead community is a vibrant one with which scholars can affiliate for life.

The maroon CU Rotaract Club graduation sash identifies students who are members of Rotaract, the campus chapter of the Boulder Rotary Club.

For Your Safety

The University of Colorado Boulder works diligently to ensure the safety of our graduates, their families and their friends during the spring 2017 Commencement Exercises. You can do your part by noting the following:

- Once you are seated in Folsom Stadium, locate the nearest exit. If you are seated on the field level, you should exit north (toward Dal Ward Athletic Center).
- Listen carefully and follow any instructions that might be issued by the Master of Ceremonies or other public safety authority.
- Parents should keep their children with them at all times.
- Pay particular attention to the safety of any elderly people and people with disabilities.
- If directed to evacuate Folsom Stadium, move away from the stadium and remain outside until you receive an all-clear by a public safety authority.
- If necessary, seek assistance from a robed Commencement marshal, uniformed police officer or security guard.

Thank you, and congratulations to all of our graduates!

Additional Information

Diplomas and Diploma Covers

In addition to the general commencement ceremony, many programs, colleges and schools hold recognition ceremonies for graduates and their families. Diploma covers typically are made available during these recognition events. If you are not attending a college, school or departmental ceremony, you may pick up a diploma cover at the Office of the Registrar, Regent Administrative Center 101, weekdays from 9 a.m. to 4 p.m.

Diplomas are mailed to most graduates who satisfactorily complete all degree requirements approximately eight weeks after final grades are posted. However, doctoral degree recipients may pick up their diplomas on Friday, May 5, 8 a.m. to 4 p.m. in Graduate Student Services, Regent Administrative Center 1B53 (lower level). If you are not able to pick up your diploma on that day, it will be mailed to your diploma address as listed in MyCUInfo by the Office of the Registrar.

The University of Colorado Boulder is offering a digitally secure Certified Electronic Diploma (CeDiploma). CeDiplomas may be reserved now through MyCUInfo and will be available for purchase and download in July.

See www.colorado.edu/registrar/diplomas/electronic-diplomas.

Social Media

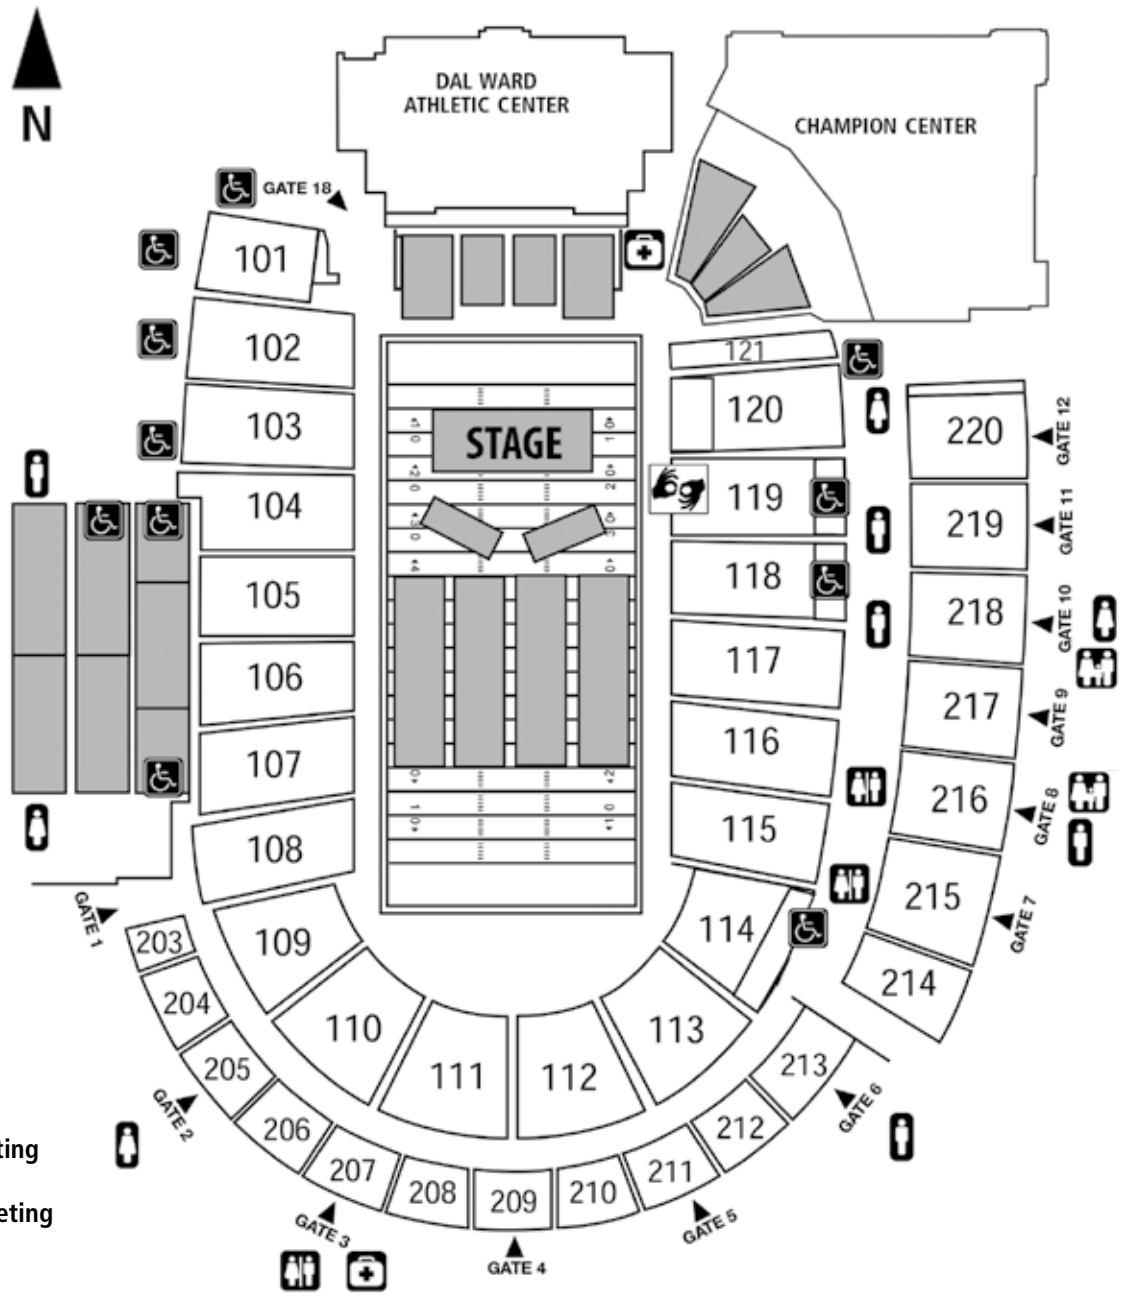

Join the conversation and celebrate the accomplishments of our newest alumni in social media! Use #ForeverBuffs on your photos and stories, follow @CUBoulder and @CUBoulderAlumni on Twitter and Instagram, and check out the highlights of commencement at colorado.edu/social.

International Flags

The international flags on display represent the countries of many of our international students graduating today. Graduating students may request to have the flag of their country represented at the ceremony through the Office of International Education. While the Office of International Education makes every effort to honor requests, there is limited display space and not all country flags are available.
