State of Colorado – Social Distancing

The Social Distancing Dashboard tracks how much Coloradans are social distancing using mobile device data from the [Safegraph COVID-19 Data Consortium](#). It uses Jan-Feb 2020 as a baseline (representing 0% social distancing), and looks at how much behavior has changed since that baseline period. For example, if the average device went from 6 hours per day outside of its home pre-COVID, to 3 hours per day outside it's home today, that would be considered 50% social distancing. For more information [please read our documentation](#). If you have any questions or issues, you can send an inquiry to social-distance-team@irvols.org.

By default, the statistics and visualizations below present averages for the entire state of Colorado. If you would like to see data for a specific county or set of counties, click the counties-of-interest on the County Map.

48%

Social Distancing
(7-Day Average)

Colorado is currently at 48% social distancing --- compared to 82% social distancing in April, 41% in July, and 29% in October.
